

DATE: January 9, 2017
TO: All County Agricultural Commissioners
FROM: Plant Health and Pest Prevention Services
SUBJECT: **AQW Pest Report No. 51-2016**
Weekly AQW Report: For the week of December 15-21, 2016

Attached is the report for all A, Q and W pests intercepted or detected in California from December 15-21, 2016. Pests are identified by the California Department of Food and Agriculture's Plant Pest Diagnostics (PPD) Laboratory

Veronicella cubensis

PDR: 300P06609755

On December 14, 2016, Orange County Agricultural/Standards Inspector Rebekah Ban intercepted a shipment of plants from Waiialua, Hawaii. The shipment contained four hibiscus plants with all necessary certification present. Upon inspection of the plants, Inspector Ban found a slug on one of the hibiscus leaves.

The pest was collected and submitted to the PPD Laboratory where it was identified as a Q-rated *Veronicella cubensis* (Cuban slug).

A notice of rejection was issued for violation of California Food and Agricultural Code (FAC) [Section 6461.5](#) (live pests). The shipment was reconditioned and released.

US distribution map of *Veronicella cubensis* retrieved from:

**Tiny Castaways with a Painful Bite Turned
Away by Intrepid Nevada County Inspector!**

PDR: 290P06322773

December 13, 2016 was the first of two eventful days at a FedEx Facility for Nevada County Inspector Luci Wilson. On December 13, she intercepted a package from Hawaiian Greenhouse in Hilo which contained a variety of cut flowers. Most notably included in the package were orchids inside ventilated plastic bags.

Inspector Wilson observed a small fly, eventually identified as C-rated *Drosophila*, on the orchid bags. After collecting the fly and finishing inspecting the remaining contents of the box, Inspector Wilson made the astounding additional finding of three pale colored ants. Each of the ants were crawling on the plastic casing around the orchids. She collected one ant from each of the three orchids and submitted them for determination at the PPD Laboratory.

Wasmannia auropunctata (the little fire ant) on pencil tip. Photo is for reference purposes only and not the actual pest found by Inspector Wilson. Photo courtesy of Alex Wild (<http://www.alexanderwild.com/keyword/little%20fire%20ants/i-QrQPTgw/A>).

The ants were later determined to be Q-rated *Wasmannia auropunctata* (the little fire ant). A notice of rejection was issued for the violation of California FAC [Section 6461.5](#) (live pests).

The offending package was double bagged and destroyed at the Nevada County Agricultural Commissioner's Office.

A/Q/W-Rated Pest Interceptions with Determinations Entered
December 15, 2016 through December 21, 2016
