## 54151S Information Technology Professional Services

### LABOR CATEGORY DESCRIPTIONS

Item	GSA Labor Category	Minimum General Experience and Years of Experience	Functional Responsibility	Educational Requirements
1	Program Manager (PM02)	Has ten (10) years of progressive experience in a combination of systems acquisition, software development and computer communications support activities such as computer operations, data communications, network design, and/or operation, repair, and maintenance activities; has five (5) years program management experience	Organizes, directs, and manages the operation and maintenance functions at a specific site where a substantial number of contractor support personnel are assigned. Manages substantial computer support operations including, but not limited to, systems acquisition, computer operations, system software maintenance, production control, data entry, remote job entry, tape library, etc. Must have demonstrated capability for oral and written communications with all levels of management. Must have a thorough knowledge of the capabilities of applicable computer and communications configurations. Meets with customer and contractor personnel to formulate and review task plans and deliverable items. Ensures conformance with task schedules and costs	Possess a Bachelor's degree in computer sciences, information systems, business administration or other related technical or scientific discipline
2	Task Manager (PM01)	Has six (6) years experience in related technical and management discipline	Works under general supervision of overall project manager of higher-level company management. Is responsible for the management of a specific task, or for a particular portion of a larger, more complex project. Is fully knowledgeable of all aspects of the technical areas involved in the assigned project. Performs studies, analyses, and tests on projects or tasks, which involve conventional plans, investigations, analyses, etc. Receives overall instructions on specific assignment objectives, features, possible solutions, etc. Assistance is furnished on unusual problems and work is reviewed for application of sound professional judgment	Possess a Bachelor's degree in computer science or other related technical or scientific discipline
3	Data Architect (ER03)	Has twelve (12) years of progressive experience in the area of database management, and eight (8) years of which must include management of large scale, complex systems.	Develop an integrated data strategy for MSG and move data from Legacy Systems to the ERP solution. This individual will design, develop and manage the various core analytical data models for enterprise-wide solutions and its suite of analytical applications based upon developing an understanding of key business requirements and proprietary analytical applications. Working with other members of the enterprise-wide solution team, the data architect will identify the appropriate system data flows and data management strategies; design and architect proprietary Data Marts and Data Warehouses; and work with applications teams in validating the data models and key metrics and analytics. This position requires an individual with extensive amount of experience in Critical understanding of data warehousing and relational database concepts is a must.	Possesses Bachelor's degree in computer sciences, information systems, engineering, business management or other related technical area

Item	GSA Labor Category	Minimum General Experience and Years of Experience	Functional Responsibility	Educational Requirements
4	Test Engineer (ER02)	At least five years experience in designing and developing analytical data solutions, solid skills in data architecture, data query, analysis, SQL, reporting tools and methodologies. Must have an ADP II or better DoD security level. Experience with Netcentric architectures	Performs assignments in the test arena when provided specific objectives and standards. Establishes and uses appropriate management information feedback systems to review, control, and report on assigned projects. Applies knowledge and experience of test and evaluation in the design, planning, execution, and analysis phases of test programs to assess the performance of aeronautical systems, subsystems, and equipment. Uses comprehensive knowledge and necessary skills to determine the levels of effort, resources, and integration required to develop executable T&E programs and the technical/managerial ability to execute the T&E plan	Possesses a Bachelor's degree in computer science or engineering.
5	Management Analyst (OM06)	Possess a minimum of five (5) years experience in Budget, Financial, and Procurement support. Understanding of governmental budgeting process	Provide assistance in the development, submission and execution of the budget. Develop the required budget documentation narratives and spreadsheets for the various budget stages throughout the three-year budget cycle for Department, OMB, and Congressional Request levels. This support includes developing and maintaining electronic data bases of planned (and implemented) activities, budget, finance, procurement, and other pertinent elements found in program implementation. Monitor, analyze and summarize budget reports and implementation progress status. Monthly approved financial plan (AFP) tables are reviewed and noteworthy items are highlighted. Status reports tracking the progress of funding reservations against approved budget are maintained and reviewed with client on a regular basis. Procurement requests are initiated based on approved budget and in accordance with individual projects' contractual requirements to insure that funds are appropriately applied. Special attention is given to ensure that the established operations plan goals are reached. Inform program managers and others within the organization of the status and availability of funds in different budget accounts. This position provides support for three separate fiscal budgets concurrently in process with each in a different phase of development or processing stages and all related activities for their implementation. This support will also include developing and maintaining electronic databases of planned (and implemented) activities, budget, finance, procurement, and other pertinent elements found in program implementation	Four-year degree from an accredited college or university

Item	GSA Labor Category	Minimum General Experience and Years of Experience	Functional Responsibility	Educational Requirements
6	On-Site Program Manager (OM05)	<p>The Program Manager will have at least eight (8) years of progressive relevant technical experience in computer applications, information technology support, or computer center operations. Technical experience shall have been gained in some combination of data communications, network design, and/or operation, repair, systems acquisition, management information systems deployment and operation, help desk operations, software development and support activities</p>	<p>Responsible for organizing, directing, and managing the day-to-day onsite operation, support, and maintenance functions at a specific site where work may be assigned to multiple small to medium-sized project or task teams and support personnel. The composition of these multi-disciplinary teams may include customer, contractor, and other third party personnel. Task and/or project teams will provide design, development, deployment, and operational support to an extensive and diversified user base. Working in close coordination with the Program Director, the Program Manager will ensure that the performance of all assigned tasks will comply with applicable policies, directives, and regulatory requirements; and that all deliverables and support services will meet or exceed predefined quality standards. Responsible for the in-direct supervision of assigned task teams, support groups, and project teams. These operational groups may provide system configuration, system operation, help desk, data network administration, computer systems administration, and voice network and infrastructure administration. Other assigned operational groups may provide maintenance and repair, inventory control, asset accountability, and cyber security certification and accreditations. In this role, the Project Director develops operational plans and schedules, implements standard operating procedures, and monitors the performance of all assigned personnel and their assigned business functions. The Program Manager coordinates the development of professional training plans and performance evaluation process for each assigned individual. The On-site Program Manger will facilitate the interaction and aggressive deployment and implementation of re-engineered business processes and enterprise level business systems between assigned operational groups and other project teams; and will support these activities by gathering, analyzing, and reporting operational statistics and workload metrics. This individual will be directly responsible for providing the Program Director with input for all contracted deliverables, reports, and reviews</p>	<p>Requires a Bachelor's degree in Computer Science or other related field</p>

Item	GSA Labor Category	Minimum General Experience and Years of Experience	Functional Responsibility	Educational Requirements
7	Senior Program Manager (OM04)	The Senior Program manager will have at minimum ten (10) years hands-on experience with all or most of the following: enterprise level systems planning, business case and return on investment preparation and analysis, technology insertion and refreshment planning and deployment, network systems administration, and security and continuity of operations planning, deployment, and evaluation. Must have at least eight (8) years program/project management experience	The Senior Program manager is responsible for the direct supervision of Site Team Leaders and multiple Project Task Leaders that may be established during the life of the customer contract. In this role, the Program Manager will provide direct technical and administrative direction, assign qualified personnel to each site and project task, review and approve plans and schedules, and monitor work activities and outputs of the personnel working on all aspects of the program and related projects. The Program Manager will participate in and be directly responsible ensuring that all contracted deliverables, reports, and reviews are delivered on time, at or above predefined quality standards, and within budget. This individual will also ensure organizational reporting support to include, but not be limited to, the gathering and compilation of information for Office of Management and Budget submissions and other calls for information. In addition, the Senior Program Manager must demonstrate experience in managing Government support contracts of similar complexity. In-depth knowledge is to be demonstrated in ADP operations that include, but are not limited to: system configuration, software development, network implementation, capacity planning, security, and systems certification and accreditation. This individual will participate in the development of strategic and operational plans for the future direction of IT activities	Program Manager requires a Bachelor's degree in Engineering, Computer Science, or other related fields. The Program manager must possess a PMP certification
8	Computer Systems Analyst V (CS05)	Has nine (9) years progressive experience in systems analysis, design, and development	Works under general administrative direction. As a team or project leader, guides the development of broad unprecedented computer systems. The information requirements are complex and voluminous. Devises completely new ways to locate and develop data sources and establishes new factors and criteria for making subject-matter decisions. Coordinates fact-finding, analysis, and design of the system and applies the most recent developments in data processing technology and computer equipment	Possess a Bachelor's degree in computer science, information systems, engineering, or other related technical or scientific discipline

Item	GSA Labor Category	Minimum General Experience and Years of Experience	Functional Responsibility	Educational Requirements
9	Senior Systems Engineer (SY05)	Six (6) years of general experience	<p>The Senior Systems Engineer works independently, with management review of end results. Continually assess the performance of appropriate software systems to identify and correct problems which impact operation efficiency and work quality. The Senior Systems Engineer maintains active liaison with user personnel to ensure continuing responsiveness of applicable system software user requirements. The individual analyzes performance indicators such as system's response time and number of programs being processed to ensure operational efficiency. Designs, code, installs, and maintains appropriate systems software program. The Senior Systems Engineer identifies, evaluates, tailors and directs the implementation of vendor-supplied software packages. The individual performs special system regeneration where applicable to reflect changes in peripheral configuration. The Senior Systems Engineer ensures the maintenance of adequate software systems documentation. The Engineer recommends to management the purchase or lease of system software packages and related hardware and provides technical assistance to less experienced systems software personnel in the resolution of complex system-related problems. Trains users in applications programming and other user personnel in the use of systems software and related hardware. May perform other duties as assigned. Has prime accountability for the maintenance and operating efficiency of a major subsystem, such as the teleprocessing network, database management systems, etc. Primary duties and responsibilities include</p>	Bachelor's degree or equivalent

Item	GSA Labor Category	Minimum General Experience and Years of Experience	Functional Responsibility	Educational Requirements
10	Software Engineer Level II (SY02)	<p>The Software Engineer requires a minimum of eight (8) years experience of which five (5) years must have been analyzing requirements for and developing large-scale systems involving information processing, communications, and networking. Specialized experience includes transforming customer requirements and information problems into solutions employing current state-of-the-art information system equipment and software. This position requires experience in computer technology, computer programming languages, developing and executing system simulation performance, developing and implementing applications using mathematical and statistical formulas, developing executive and utility software packages, and planning and executing tests of the system to ensure proper error free operation</p>	<p>The Software Engineer performs the following activities: (1) assesses user and system requirements; (2) determines the best overall system architecture, based on the existing architecture if present; (3) designs the overall system; (4) formulates system specifications in accordance with applicable standards and regulations; and (5) works with System Analysts, Senior Programmer Analysts and Programmer Analysts under the overall direction of the Program Manager to design and implement the system. The Senior Systems Analyst applies systems analysis and design techniques to complex computer information systems in a broad area such as: (1) finance management; (2) logistics planning; or (3) engineering. Usually, there are multiple users of the system; however, there may be complex one-user systems, e.g., for engineering or research projects. The Senior Systems Analyst must be competent in all phases of systems analysis techniques, concepts, methods, and knowledge of available system software, computer equipment, and regulations, structure, techniques and management practices. Since input data usually come from diverse sources, the analyst is responsible for recognizing probable conflicts and integrating diverse data elements and sources. The Senior Systems Analyst produces innovative solutions for a variety of complex problems. The Software Engineer maintains and modifies complex systems or develops new subsystems such as an integrated production scheduling, inventory control, cost analysis, or sales analysis record in which every item of each type is automatically processed through the full system of records. The Senior Systems Analyst performs the following activities: (1) guides users in formulating requirements; (2) advises on alternatives and on the implications of new or revised data processing systems; (3) analyzes resulting user project proposals; (4) identifies omissions and errors in requirements and conducts feasibility studies; (5) recommends an optimum approach and develops the system design for approved projects; (6) interprets information and informally arbitrates between system users when conflicts exist. The Senior System Analyst may serve as Lead Analyst in a design subgroup, directing and integrating the work of lower-level analysts, each responsible for several programs. The Software Engineer ensures that the system and documentation developed are compliant with applicable standards such as the Defense Information Infrastructure Common Operating Environment (DII-COE), Year 2000, and any DOD, Air Force, Army, Navy, or other standards and regulations</p>	<p>The Software Engineer must have a minimum of a Bachelor's degree in Computer Science, Information Systems, Engineering, Business or other technical related discipline</p>

Item	GSA Labor Category	Minimum General Experience and Years of Experience	Functional Responsibility	Educational Requirements
11	Application Systems Analyst/Programmer (SY01)	Four (4) years of related experience	The programmer prepares workflow charts and diagrams to specify in detail operations to be performed by equipment and computer programs and operations to be performed by personnel working with the system. Plans and prepares technical reports and instructional manuals and assists in the documentation of program development. The programmer may provide direction to lower level engineers. The individual must have the ability to code in multiple languages. The Analyst programmer reviews computer systems capabilities, workflow, and scheduling limitations to determine if requested program or modification is possible within existing system. Studies existing information processing systems to evaluate effectiveness and develops new systems to improve production or workflow as required	Bachelor's degree in relevant field
12	Computer Programmer IV (CP04)	Has ten (10) years of progressive experience in a variety of ADP environments	In a supervisory capacity, plans, develops, coordinates and directs large and important programming projects. Supervises the work of a small staff; manages schedules and technically evaluates staff production. Defines complex scientific computational problems and develops computer programs for their solution. Performs simulations as required to determine effects of variations in computer equipment and software. Typically develops techniques and procedures where few precedents exist. Develops original solutions to new and unique problems	Possess a Bachelor's degree in computer science, information systems, engineering, mathematics or other related technical or scientific discipline
13	Computer Programmer III (CP03)	Has seven (7) years of progressive experience in a variety of ADP environments	In a supervisory capacity, applies expertise in programming to complex problems. Recommends redesign of programs, investigates and analyzes feasibility and program requirements. Plans full range of programming activities to produce different but interrelated products from numerous, diverse data elements normally from different sources. Solves difficult programming problems. Tests, documents and writes operating instructions for all programming products produced. Provides technical leadership and supervision to small task groups	Possess a Bachelor's degree in computer science, information systems, engineering, mathematics or other related technical or scientific discipline. Nine (9) years of experience may substitute for the degree requirements

Item	GSA Labor Category	Minimum General Experience and Years of Experience	Functional Responsibility	Educational Requirements
14	Security Engineer (IA03)	The individual will have four (4) years of experience performing the foregoing functions or a Master's degree with two (2) years of related work	Individual will provide security architecture, policy and design guidance for business systems and networks. Individual will also provide Information Security Certification and Accreditation Support for applications, systems and networks in accordance with appropriate customer policies and processes and performs as an Information Assurance assessment team member. The individual will support for defining and assessing appropriate procedural security, network security and connection rules, configuration management and accountability, maintenance, system rules of behavior, personnel and technical security controls, marking and labeling, incident response, continuity Participates in planning, cost analysis and implementation of all aspects of ADP security. Develops and implements Tempest procedures in all areas. Designs, develops, implements, and supports all ADP security policy, procedures, and systems. Will help provide security architecture, policy and design guidance for business systems and networks. Individual may also help provide Information Security Certification and Accreditation Support for applications, systems and networks in accordance with appropriate customer policies and processes. Helps develops materials and provide instruction to teams in the C&A activities at the appropriate skill level to accomplish the mission. Prepares security briefings and reports as necessary and participates as a subject matter expert in support of NETL security initiatives, conferences and Information Security Awareness. The Security Engineer implements and monitors ADP security procedures and issues. The Individual will also conduct risk assessments, firewall determinations, and security procedures	A Bachelor's degree in Computer Science, Information Systems, Mathematics, Operations Research, Statistics, Engineering, or a related field
15	Network Admin / PC Technician (NT02)	The Network Admin will have two (2) years progressive experience performing advanced studies in the planning, design, development, and modification of voice and/or data network systems	Prepares work plans and schematics for the placement, implementation, rearrangement, or removal of voice, data, and video/audio cables and associated hardware; assists in analyzing, selecting, and designing circuit paths, transmission logic, and hardware; assists in evaluating projected network usage, signaling characteristics, and proposed network media; and recommends media that will ensure transport and receipt of voice, data, and video/audio signaling. Under direct supervision, assists in analyzing customer's voice, data, and image requirements, and develops cost-effective solutions	Possess a Bachelor's degree in computer sciences, information systems, business engineering, or other related technical or scientific discipline
16	PC Technician (NT01) (*SCA applicable)	One (1) year of applicable experience in maintaining and repairing computer systems, including peripheral equipment and supporting software	The PC Technician works under general supervision providing maintenance of computer and peripheral equipment and software systems in an operational environment generally at a client site. The specialist is responsible for diagnosing technical and operational problems at the site and implementing necessary actions to resolve problems; provides instruction/assistance to system users in the use of applications software and hardware, as required. Provide technical management support to remote client sites. Day to day supervision for the maintenance of the computer site, including the computer, all peripheral equipment, and support software programs, in operational condition	High School diploma or certification

Item	GSA Labor Category	Minimum General Experience and Years of Experience	Functional Responsibility	Educational Requirements
17	Subject Matter Expert II (SM02)	Has minimum of five (5) years experience and oversees team of system professionals and technicians in installing and maintaining custom and commercial application software. Assists system professionals and technicians in installing and maintaining operation system, network, and data base management software	Serves as a consultant in coding, testing, and document creation, computer programs, modules, subroutines, linkages to Windows objects and application program interfaces to commercial software using two or more programming languages. Has ability to adapt to new situations and environments. Possess keen troubleshooting skills to assist other System Analysts and Program Managers. The SME provides leadership or analytical expertise to other specialist: operates with substantial independence and initiative. Has extensive knowledge of process, software product and/or specific technology. Performs on a daily basis, a variety of system design, analysis, and engineering tasks which are broad in nature and are concerned with design and implementation of major enterprise systems development and integration, including supporting personnel, hardware, software, and support facilities and/or equipment	Bachelor's degree in relevant field
18	Help Desk Support (HD02) (*SCA applicable)	Has five (5) years of progressive experience in a helpdesk environment with emphasis on microcomputer hardware and software applications	Provides user support to IBM compatible PC users and/or provides user support Macintosh users. Works with multi-server Novell 5.11 based system supporting users and work printers. Experience running a variety of applications that may include: Windows WP for Windows, Word for Windows, Excel, Paradox for Windows, PowerPoint, Procomm and cc:Mail for Windows, etc. Experience installing and setting up IBM workstations. Serves as the initial point of contact for troubleshooting hardware/software PC and printer problems	High School diploma or equivalent
19	Help Desk Coordinator (HD01) (*SCA applicable)	Has three (3) years of progressive experience in a business ADP environment with emphasis on microcomputer hardware and software applications	Staff the Help Desk. Answers user's calls and records all necessary information. Offers assistance over the phone and follows the problem through to resolution. Assigns center, or appropriate area for resolution. Logs and reports data on the number and type of calls received	Possess a High School diploma and associates degree. Five (5) years of experience may substitute for the degree requirements.
20	Database Management Specialist II (DM02)	Has five (5) years of progressive experience in the area of database management	Specifies proper types of files organization, indexing methods, and security procedures. Supports project teams on the design of complex hierarchical databases (e.g., schema and subschema details). Defines specialized aspects of user's data base administrator documentation. Performs detailed comparisons of various database systems; implements system designs; tests, troubleshoots and maintains installed systems; provides user training and on-line support; conducts data retrieval; develops electronic commerce and electronic data interchange standards to improve productivity; prepares system related documentation. Works independently, under general guidelines set by supervisor	Possess a Bachelor's degree in computer sciences, information systems, engineering, business management or other related technical area. Seven (7) years of experience may substitute for the degree requirements

Item	GSA Labor Category	Minimum General Experience and Years of Experience	Functional Responsibility	Educational Requirements
21	Database Specialist (DP05)	Minimum five (5) years of experience in relational database environment, with three (3) years of experience administering large database installations	The Database Specialist performs logical and physical data base design and maintenance. The DB specialist provides guidance and expertise in the use of data base languages. Performs data analysis, database design, development, and maintenance activities, and implementation, aired, for databases and database conversion. Develops Interfaces and subroutines to access data from different computing platforms and operating systems. Performs data storage and access requirements. Plans and administers computerized databases, including database definition, structure, documentation, long range requirements, and operational guidelines. Ensures quality control and auditing of data. Establishes security controls. Works with users to resolve data conflicts and inappropriate data usage	A Bachelor of Science degree in Computer Science, Mathematics, Statistics, or Engineering.
22	Technical Writer (TW02) (*SCA applicable)	Has five (5) years as a documentation specialist performing research, writing, and editing functions to prepare briefings, manuals, etc	Under general supervision, edits and rewrites on-line and hard copy documents for grammatical, syntactical, and usage errors; spelling; punctuation; and adherence to standards, including consistency, format, and presentation. Proofreads documentation and graphics for accuracy and adherence to original content, provides quality control checking for documents received from photocopying and word processing; assembles Master copies, including graphics, appendices, table of contents, and title pages, assists in scheduling printing, copying, and graphics with vendors. Gets quotes and determines best prices to achieve quality documents. Assists in determining level of effort required for incoming documents, assists in document tracking and logging, and consults with technical staff to determine format, contents, and the organization of technical reports and proposals	Possess an Associate's degree in English or other related technical discipline
23	Document Specialist III (DC03) (*SCA applicable)	Has five (5) years experience as a documentation specialist performing research, writing, and editing functions to prepare briefings, manuals, etc	Under general supervision, edits and rewrites on-line and hard copy documents for grammatical, syntactical, and usage errors; spelling; punctuation; and adherence to standards, including consistency, format, and presentation. Proofreads documentation and graphics for accuracy and adherence to original content, provides quality control checking for documents received from photocopying and word processing; assembles Master copies, including graphics, appendices, table of contents, and title pages, assists in scheduling printing, copying, and graphics with vendors. Gets quotes and determines best prices to achieve quality documents. Assists in determining level of effort required for incoming documents, assists in document tracking and logging, and consults with technical staff to determine format, contents, and the organization of technical reports and proposals	Possess an associate's degree in English or other related technical discipline.

Item	GSA Labor Category	Minimum General Experience and Years of Experience	Functional Responsibility	Educational Requirements
24	Technical Administrative Support Specialist I (AS01) (*SCA applicable)	Has one (1) year of experience in an office setting, supporting various technical and administrative activities.	Functional Responsibilities: Prepares draft and final form technical documents that will become deliverable items. Must be capable of typing at average or above average speed. Must be capable of typing technical narratives and data. Incumbent is responsible for spelling, grammar, and proper format, and for proofreading finished documents. Must be capable of using various word processing equipment. Must be familiar with typical office administrative procedures and processes	Possess a High School diploma or equivalent
25	Business Systems Analyst (BS02)	The Business Systems Analyst has six (6) years progressive experience performing advanced studies in the planning, design, development, and modification of business and technology systems	Responsible for successful completion of assigned project details that meets customer needs. The analyst will be competent in all phases of complex analysis of customer requirements and end results. The analyst operates very independently on all types of projects. Communicates strategies, methodology and pertinent findings as required. Understands where technology can be inserted into the business to maximize benefits and minimize costs. Bridges the gap between the business and technology areas of the enterprise. Research and understand alternative information analysis techniques. Develops, implements, monitors policies and procedures for information resources management. Analyzes areas of concern such as procurements, software licensing, maintenance contracts, inefficiencies, distribution of resources etc. and presents feasible alternatives and recommendations based on thorough research and analysis. Performs analysis of multiple business process Models	Bachelor's degree in a relevant field
26	Functional Analyst (FA03)	Six (6) years of progressive experience in the field of required expertise. Specific Experience: Four (4) years of the general experience is concentrated hands-on experience in the specific discipline of the field of required expertise.	The Functional Analyst knowledge and skills are applicable to an actual task proposal request and so recognized in the professional community that the Government is able to qualify him as an expert in the field. The Experts provides highly technical and specialized solutions to complex Information Systems problems; Demonstrates exceptional oral and written communications skills; Performs as a consultant in a highly specialized, leading edge information technologies and methodologies; Provides highly technical and specialized guidance concerning automated solutions to complex information processing problems; Performs elaborate analyses and studies. Prepares reports and gives presentations. Work independently or as a member of a team. May serve as a Contractor Task Manager or Project Manager	Possess a Bachelor's degree in related technical or business discipline
27	Systems Analyst III	7 years	Works under general administrative direction. Guides the development of computer system requirements and leads teams in requirements gathering and definition. The information requirements are complex and voluminous. Devises new ways to locate and develop data sources and establishes new factors and criteria for making subject-matter decisions. Coordinates fact-finding, analysis, and design of the system and applies the most recent developments in data processing technology and computer equipment	Bachelors degree

PEOP

Item	GSA Labor Category	Minimum General Experience and Years of Experience	Functional Responsibility	Educational Requirements
28	Database Administrator I	3 years	The responsibility as a database administrator (DBA) will be the performance, integrity and security of a database. The DBA is involved in the planning and development of the database, as well as in troubleshooting any issues on behalf of the users. Ensuring data remains consistent across the database And that data is clearly defined. Responsible for the maintenance, updates and upgrades to the system. Designing and implementing databases in accordance to end users information needs and views.	Associate's degree
29	Help Desk Support Specialist I (*SCA applicable)	0 years	Provides First-tier support to end-users for PC, server, mainframe applications, and hardware. Handles problems under supervision from more senior staff and management. May interact with network services, software systems engineering, and/or applications development to restore service and/or identify and correct core problem Maintains currency and highest level of technical skill in field of expertise.	High School Diploma
30	Help Desk Support Specialist II (*SCA applicable)	1 years	Provides First-tier support to end-users for PC, server, mainframe applications, and hardware. Handles problems under supervision from more senior staff and management. May interact with network services, software systems engineering, and/or applications development to restore service and/or identify and correct core problem Maintains currency and highest level of technical skill in field of expertise.	High School Diploma
31	Help Desk Support Specialist III (*SCA applicable)	5 years	Provides First-tier support to end-users for PC, server, mainframe applications, and hardware. Handles problems under supervision from more senior staff and management. May interact with network services, software systems engineering, and/or applications development to restore service and/or identify and correct core problem Maintains currency and highest level of technical skill in field of expertise.	High School Diploma

Item	GSA Labor Category	Minimum General Experience and Years of Experience	Functional Responsibility	Educational Requirements
32	Material Control Manager (*SCA applicable)	2 years	<p>Ensures the flow of receiving paperwork is documented in our system, stamped and handled properly internally, and sent to accounting for the proper matching of documents</p> <p>Works with the Customer Property (GOE). May use Material Requirements Planning (MRP) systems. Under limited supervision, performs planning and scheduling tasks involved with coordinating products and materials through various engineering and/or production phases. To ensure timely movement, reviews schedules to determine materials and parts requirements. Provides information to various departments regarding materials status. May handle special projects evaluating material shortages and resolution of problems to meet production schedules. Works on assignments that are moderately complex in nature where judgment is resolving problems and making routine recommendations. Follows standard practices and procedures in analyzing situations or data from which answers can be readily obtained. Decisions or failure to achieve results may cause delays in schedules. Interacts daily with supervisor, peer groups, and customers. Interaction normally involves exchange or presentation of factual information. Having some knowledge and experience, able to handle usual occurring job events. Supervises others</p>	High School Diploma
33	Material Control Specialist (*SCA applicable)	1 years	<p>Under supervision, performs planning and scheduling tasks involved with coordinating products and materials through various engineering and/or production phases. To ensure timely movement, reviews schedules to determine materials and parts requirements. Provides information to various departments regarding materials status. May handle special projects evaluating material shortages and resolution of problems to meet production schedules. Follows standard practices and procedures in analyzing situations or data from which answers can be readily obtained. Interacts daily with supervisor, peer groups, and customers.</p>	High School Diploma
34	Network Administrator II	4 years	<p>Network Administrator is responsible for supporting network equipment ranging from core to edge devices for the enterprise networks as well as to assist in the ongoing operation of the Network Control Center. The Network Administrator will become part of a multi-discipline team responsible for taskings that include installation, upgrade, support and troubleshooting of network switches and routers, and ancillary equipment such as KVM switches, UPS units, and network based environmental monitors.</p>	Associate's degree
35	Network Administrator III	7 years	<p>Network Administrator is responsible for supporting network equipment ranging from core to edge devices for the enterprise networks as well as to assist in the ongoing operation of the Network Control center. The Network Administrator will become part of a multi-discipline team responsible for taskings that include installation, upgrade, support and troubleshooting of network switches and routers, and ancillary equipment such as KVM switches, UPS units, and network based environmental monitors.</p>	Bachelors degree

Item	GSA Labor Category	Minimum General Experience and Years of Experience	Functional Responsibility	Educational Requirements
36	Network Engineer II	4 years	Assists in the development and maintenance of network communications. Uses knowledge of LAN/WAN systems to support internal and external networks. Tests and evaluates network systems to eliminate problems and make improvements. Experienced with a variety of the field's concepts, practices, and procedures. Relies on experience and judgment to plan and accomplish goals.	Associate's degree
37	Network Engineer IV	10 years	Leads in the development and maintenance of network communications. Uses knowledge of LAN/WAN systems to support internal and external networks. Tests and evaluates network systems to eliminate problems and make improvements. Experienced with a variety of the field's concepts, practices, and procedures. Relies on experience and judgment to plan and accomplish goals.	Bachelors degree
38	Project Manager I	2 years	Support management of one or more high visibility programs. Assist in development and implementation of program plans, schedules, status tracking, metrics, and budgets. Assist in monitoring the performance of programs and recommend changes. Assist and advise executives on project initiatives.	Bachelors degree
39	Software Engineer Level III	9 years	The Software Engineer III performs the following activities with little to no supervision: (1) assesses user and system requirements; (2) determines the best overall system architecture, based on the existing architecture if present; (3) designs the overall system; (4) formulates system specifications in accordance with applicable standards and regulations; and (5) works with System Analysts, Senior Programmer Analysts and Programmer Analysts under the overall direction of the Program Manager to design and implement the system. The Software Engineer maintains and modifies complex systems or develops new subsystems such as an integrated production scheduling, inventory control, cost analysis, or sales analysis record in which every item of each type is automatically processed through the full system of records. The Software Engineer ensures that the system and documentation developed are compliant with applicable standards such as the Defense Information Infrastructure Common Operating Environment (DII-COE), Year 2000, and any DOD, Air Force, Army, Navy, or other standards and regulations	Bachelors degree
40	Solutions Architect	10 years	The Solutions Architect will support the identification, evaluation and implementation of new IT technologies as a means to improve operational efficiencies/service delivery, reduce total cost of IT ownership, and expand IT service catalog offerings to better meet current and future customer requirements. The Enterprise Technology Analyst will report to the Program Manager and be responsible for technology analysis, risk assessment and implementing technical standards in accordance with applicable Air Force, DoD and Federal instructions, guidance and directives.	Bachelors degree

Item	GSA Labor Category	Minimum General Experience and Years of Experience	Functional Responsibility	Educational Requirements
41	Subject Matter Expert IV	10 years	Serves as a consultant in a particular area or discipline of information technology. Possess keen troubleshooting skills to assist other team members The SME provides leadership or analytical expertise to other specialist: operates with substantial independence and initiative. Has extensive knowledge of process, product and/or specific technology. Performs on a daily basis, a variety of system design, analysis, and engineering tasks which are broad in nature and are concerned with design and implementation of major enterprise systems development and integration, including supporting personnel, hardware, software, and support facilities and/or equipment	Bachelors degree
42	Systems Administrator III	7 years	Administrate and maintain corporate systems and networking for both internal and external customers. In addition, this position will manage all desktop, laptop and other related hardware and software support activities in a corporate environment for internal and external customers. Most work is completed during regular business hours. Availability to be on call and work outside of normal duty hours as customers may require emergency assistance.	Bachelors degree
43	Systems Administrator IV	10 years	Administrate and maintain corporate systems and networking for both internal and external customers. In addition, this position will manage all desktop, laptop and other related hardware and software support activities in a corporate environment for internal and external customers. Most work is completed during regular business hours. Availability to be on call and work outside of normal duty hours as customers may require emergency assistance.	Bachelors degree
44	Systems Engineer I	2 years	Responsible for the planning and engineering of an organization's systems infrastructure. Includes the implementation and design of hardware and software. Monitors the performance of systems. Familiar with standard concepts, practices, and procedures within a particular field. Relies on experience and judgment to plan and accomplish goals. Performs a variety of tasks. Familiar with multiple platforms including Microsoft, Linux, Unix and Virtual systems/infrastructure.	Bachelors degree
45	Systems Engineer II	4 years	Responsible for the planning and engineering of an organization's systems infrastructure. Includes the implementation and design of hardware and software. Monitors the performance of systems. Familiar with standard concepts, practices, and procedures within a particular field. Relies on experience and judgment to plan and accomplish goals. Performs a variety of tasks. Familiar with multiple platforms including Microsoft, Linux, Unix and Virtual systems/infrastructure.	Bachelors degree

Item	GSA Labor Category	Minimum General Experience and Years of Experience	Functional Responsibility	Educational Requirements
46	UC Engineer	5 years	The Unified Communication (UC) VoIP Network Engineer will be responsible for supporting Cisco UC networked equipment ranging from SIP, Collaboration to voice gateway routers for the AFRL, Rome and its supporting sites. This is a full-time position to assist Team Rome IT in the ongoing operation of a DoD Network Control Center and Enterprise Operations. The successful candidate will become part of a multi-discipline team responsible for taskings that include install/upgrade/support/troubleshooting of the UC environment to include network switches and routers, and ancillary equipment such as KVM switches, UPS units, and network based environmental monitors. Also, configuration management tasks, such as data base updates, equipment verification, circuit inventory and maintenance of network maps are an important aspect of this position.	Bachelors degree
47	VTC Technician II	3 years	Experienced video conferencing technician with audio/video background to coordinate, execute, and support multimedia teleconferences in a corporate environment. Able to support, maintain, operate and troubleshoot VTC systems.	Associate's degree
48	VTC Technician III	5 years	Experienced video conferencing technician with audio/video background to coordinate, execute, and support multimedia teleconferences in a corporate environment. Able to support, maintain, operate and troubleshoot VTC systems.	Associate's degree
49	VTC Engineer	7 years	This is a senior position supporting an enterprise AV/VTC environment. Responsible for the design and architecture of AV/VTC facilities as well as the maintenance of AV/VTC systems.	Bachelors degree

**Service Contract Labor Standards**

The Service Contract Labor Standards, formerly the Service Contract Act (SCA), applies to this contract and it includes SCLS applicable labor categories. Labor categories and fixed price services marked with a (\*) in this pricelist are based on the U.S. Department of Labor Wage Determination Number(s) identified in the SCLS/SCA matrix. The prices awarded are in line with the geographic scope of the contract (i.e., nationwide).

<b>Wage Determination No.:</b>	2015-4732
<b>Revision No.:</b>	10
<b>Date of Revision:</b>	12/23/2019
<b>Area:</b>	Ohio counties of Greene, Miami, and Montgomery

**LABOR CATEGORY DESCRIPTIONS**

<b>No.</b>	<b>Labor Category</b>	<b>Minimum General Experience and Years of Experience</b>	<b>Functional Responsibility</b>	<b>Minimum Educational Requirements</b>
1	Cyber Security Analyst 1	3 years	The Cyber Security Analyst I will support the customer in the specification, development, and application of computer security technologies and Information Assurance management techniques. Perform evaluation of commercial- and government off-the-shelf hardware and software with recommendations to management for product procurement, implementation, and configuration. Interface with third party vulnerability teams to identify and remediate issues in system technologies. Define requirements for the design, installation and operation of classified local and wide area networks hardware and software systems. Experience in Information Assurance including the development of Risk Management Framework.	Bachelors
2	Cyber Security Analyst 2	5 years	The Cyber Security Analyst II will support the customer in the specification, development, and application of computer security technologies and Information Assurance management techniques. Perform evaluation of commercial- and government off-the-shelf hardware and software with recommendations to management for product procurement, implementation, and configuration. Interface with third party vulnerability teams to identify and remediate issues in system technologies. Define requirements for the design, installation and operation of classified local and wide area networks hardware and software systems. Experience in Information Assurance including the development of Risk Management Framework.	Bachelors

**SIN 518210C Cloud-Related Professional Services**

**LABOR CATEGORY DESCRIPTIONS**

No.	Cloud Labor Category	Minimum Educational Requirements	Minimum Years of Experience	Functional Responsibility
1	Cloud Architect	Bachelors degree	10 years	Responsible for all architectures for systems and storage in both AWS and Azure Clouds. Senior member will have experience in cloud formations, overall baselines of all IL levels. This position will be responsible for the overall management of the cloud achitecture functions, tasks, projects and resources. This person will manage people directly, oversee adherence to schedules, quality and have responsibility for resources and resultant work products produced by the cloud architcture teams.
2	Cloud System Administrator	Bachelors degree	6 years	Responsible for the planning and engineering of an organization's cloud systems infrastructure. Includes the implementation and patching of cloud machine images. Monitors the performance of systems. Familiar with complex and innovative concepts, practices, and procedures within the cloud administration field. Relies on experience and judgment to plan and accomplish goals. Performs a variety of tasks. Familiar with multiple platforms including Microsoft, Linux, Unix and Virtual systems/infrastructure.
3	Cloud System Engineer	Bachelors degree	6 years	Responsible for the planning and engineering of an organization's cloud infrastructure. Includes the implementation and builds of cloud machine images. Monitors the performance of systems. Familiar with complex and innovative concepts, practices, and procedures within a particular field. Relies on experience and judgment to plan and accomplish goals. Performs a variety of tasks. Familiar with multiple platforms including Microsoft, Linux, Unix and Virtual systems/infrastructure, Splunk and all offerings within cloud hosting efforts.

**CRITERIA FOR EXPERIENCE/EDUCATION SUBSTITUTIONS METHODOLOGY (applicable to all Awarded Labor Categories)**

A college degree is a valuable asset and communicates the caliber of the employee. CDO Technologies, Inc. has a standard commercial practice of allowing education to be substituted for years of experience as shown in our Education Substitution Methodology (e.g. A Bachelor’s Degree may be substituted for 4 years of required experience with a High School Diploma). Based on CDO Technologies, Inc.’s vast years of experience with observing employee development, CDO has determined that an employee with an advanced degree is capable of performing equivalent to a more experienced employee to meet the quality assurance standards of the company..

CDO Technologies, Inc. has also found that actual on-the-job training (performing a job under the tutelage of a senior level experienced manager) is an exceptionally valuable way to teach an employee how to perform a job that meets the “high-quality” standards expected by clients. CDO Technologies, Inc. has found that a non-degreed employee after 4 years of specific experience in a position begins to perform at the same level as the degreed individual. Therefore, CDO Technologies, Inc. also has a standard commercial practice of allowing experience to be substituted for education as shown in our Experience Substitution methodology (e.g. High School Diploma + 4 years additional experience Equals Bachelor’s Degree).

Experience Substitutions:

<ul style="list-style-type: none"> <li>• High School Diploma + 2 years additional experience</li> <li>• Trade/Vocational School or Technical Training or Military training in relevant field</li> </ul>	Equals	Associates Degree
<ul style="list-style-type: none"> <li>• Associates Degree + 2 years additional experience</li> <li>• HS Diploma + 4 years additional experience</li> </ul>	Equals	Bachelors Degree
<ul style="list-style-type: none"> <li>• Bachelors Degree + 2 years additional experience</li> <li>• HS Diploma + 6 years additional experience</li> </ul>	Equals	Masters Degree
<ul style="list-style-type: none"> <li>• Masters Degree + 3 years additional experience</li> <li>• Bachelors Degree + 8 years additional experience</li> </ul>	Equals	PhD

Education Substitutions:

<ul style="list-style-type: none"> <li>• A Ph.D. may be substituted for 3 years of required experience with a Masters Degree or 5 years with a Bachelors Degree.</li> </ul>
<ul style="list-style-type: none"> <li>• A Masters Degree may be substituted for 2 years of required experience with a Bachelors Degree.</li> </ul>
<ul style="list-style-type: none"> <li>• A Bachelors Degree may be substituted for 4 years of required experience with a HS Diploma.</li> </ul>
<ul style="list-style-type: none"> <li>• An Associates Degree may be substituted for 2 years of required experience with a HS Diploma.</li> </ul>
<ul style="list-style-type: none"> <li>• A Professional Certification in a relevant field may be substituted for 4 years of required experience with a HS Diploma.</li> </ul>

## COMMERCIAL SUPPLIER AGREEMENTS

**CDO TECHNOLOGIES SOFTWARE  
END USER LICENSE AGREEMENT**

This End User License Agreement ("EULA") is a binding agreement between CDO Technologies, Inc. ("**Licensor**") and the Government customer under GSA Schedule contracts identified in the Customer Agreement ("**Licensee**" or "Ordering Activity").

LICENSOR PROVIDES THE SOFTWARE SOLELY ON THE TERMS AND CONDITIONS SET FORTH IN THIS EULA AND ON THE CONDITION THAT LICENSEE ACCEPTS AND COMPLIES WITH THEM. BY BOTH PARTIES EXECUTING THE CUSTOMER AGREEMENT IN WRITING, LICENSEE ACCEPTS THIS EULA AND AGREES THAT IT IS LEGALLY BOUND BY ITS TERMS. IF LICENSEE DOES NOT AGREE TO THE TERMS OF THIS EULA, DO NOT EXECUTE THIS AGREEMENT IN WRITING.

NOTWITHSTANDING ANYTHING TO THE CONTRARY IN THIS EULA, NO LICENSE IS GRANTED (WHETHER EXPRESSLY, BY IMPLICATION OR OTHERWISE) UNDER THIS EULA, AND THIS EULA EXPRESSLY EXCLUDES ANY RIGHT, CONCERNING ANY SOFTWARE THAT LICENSEE DID NOT ACQUIRE LAWFULLY OR THAT IS NOT A LEGITIMATE, AUTHORIZED COPY OF LICENSOR'S SOFTWARE.

1. Definitions. For purposes of this EULA, the following terms have the following meanings:

(a) "**Authorized Users**" means the individual persons authorized by Licensee to use the Software pursuant to the license granted under this EULA. Licensee clients or customers may only be declared Authorized Users to the extent the Software access is provided by Licensee in connection with a concurrent and related service offering, and such access shall be subject to Licensee's payment of all fees associated with such access. Licensee is strictly prohibited from "white-labeling" the Software or providing access to the Software to its customers or clients as a stand-alone service.

(b) "**Customer Agreement**" means the contract, standard terms, Government purchase order, or other purchasing documentation between each Licensee and Licensor or, if applicable, Licensor's authorized reseller ("**Reseller**") for purchase of the license for the Software and any related hardware.

(c) "**Documentation**" means user manuals and any other materials provided by Licensor, in printed, electronic or other form, describing the installation, operation, use or technical specifications of the Software.

(d) "**Intellectual Property Rights**" means any and all registered and unregistered rights granted, applied for or otherwise now or hereafter in existence under or related to any patent, copyright, trademark, trade secret, database protection or other intellectual property rights laws, and all similar or equivalent rights or forms of protection, in any part of the world.

(e) "**Person**" means an individual, corporation, partnership, joint venture, limited liability company, governmental authority, unincorporated organization, trust, association or other entity.

(f) "**Services**" means services provided to Licensee by Licensor in connection with the use of the Software.

(g) "**Software**" means any solution powered by Licensor software, including but not limited to CDO CATS, CDO Optimizer, Vehicle Mounted RFID Solution, CDO RoadTag, and 10-4 Tracking, for which Licensee is purchasing a license.

(h) "**Term**" has the meaning set forth in **Section 9**.

(i) "**Third Party**" means any Person other than Licensee or Licensor.

(j) "**Update**" has the meaning set forth in **Section 6(b)**.

2. License Grant and Scope. Subject to and conditioned upon Licensee's payment of all fees and costs set forth in the Customer Agreement in accordance with the GSA Pricelist, Licensor's receipt of associated licensing fees for the number of installations identified in the Customer Agreement (the "**Number of Installations**"), and Licensee's strict compliance with all terms and conditions set forth in this EULA, Licensor hereby grants to Licensee a non-exclusive, non-transferable, non-sublicensable, limited license to use, solely by and through its Authorized Users, the Software and Documentation, solely as set forth in this **Section 1** and subject to all conditions and limitations set forth in this EULA. This license grants Licensee the right, exercisable solely by and through Licensee's Authorized Users, to:

(a) Use and run the Software as properly installed in accordance with this EULA and the Documentation, solely as set forth in the Documentation and solely for Licensee's business purposes. Such use is limited to a number of copies of the Software equal to the Number of Installations. In the event Licensor provides the Software pre-installed on associated hardware, this license is further limited to one (1) copy of the Software per each hardware device that is owned and controlled by Licensee, and use of the Software is permitted only at the device location on which the Software is initially installed.

(b) Use the Documentation, solely in support of its licensed use of the Software in accordance herewith. Any copies of the Documentation made by Licensee will be the exclusive property of Licensor, will be subject to the terms and conditions of this EULA; and must include all trademark, copyright, patent and other Intellectual Property Rights notices contained in the original.

3. Use Restrictions. Licensee shall not, and shall require its Authorized Users not to, directly or indirectly:

(a) use (including make any copies of) the Software or Documentation beyond the scope of the license granted under **Section 1**;

(b) provide any other Person, including any subcontractor, independent contractor, affiliate or service provider of Licensee, with access to or use of the Software or Documentation;

(c) modify, translate, adapt or otherwise create derivative works or improvements, whether or not patentable, of the Software or Documentation or any part thereof;

(d) combine the Software or any part thereof with, or incorporate the Software or any part thereof in, any other programs;

(e) reverse engineer, disassemble, decompile, decode or otherwise attempt to derive or gain access to the source code of the Software or any part thereof;

(f) remove, delete, alter or obscure any intellectual property or proprietary rights notices provided on or with the Software or Documentation, including any copy thereof;

(g) except as set forth in **Section 2**, copy the Software or Documentation, in whole or in part;

(h) except as set forth in **Section 2**, rent, lease, lend, sell, sublicense, assign, distribute, publish, transfer or otherwise make available the Software, or any features or functionality of the Software, to any Third Party for any reason, whether or not over a network or on a hosted basis, including in connection with the internet or any web hosting, wide area network (WAN), virtual private network (VPN), virtualization, time-sharing, service bureau, software as a service, cloud or other technology or service;

(i) use the Software or Documentation in violation of any law, regulation or rule; or

(j) use the Software or Documentation for purposes of competitive analysis of the Software, the development of a competing software product or service or any other purpose that is to the Licensor's commercial disadvantage.

4. Responsibility for Use of Software. Licensee is solely responsible and liable for all uses of the Software and Documentation through access thereto provided by Licensee, directly or indirectly. Specifically, and without limiting the generality of the foregoing, Licensee is responsible and liable for all actions and failures to take required actions with respect to the Software and Documentation by its Authorized Users or by any other Person to whom Licensee or an Authorized User may provide access to or use of the Software and/or Documentation, whether such access or use is permitted by or in violation of this EULA.

5. Payments and Audits.

(a) Licensee is solely responsible for the payment of all fees associated with its use of the Software. Licensee hereby agrees and acknowledges that in the event Licensor does not timely receive the associated licensing fees for the Number of Installations within thirty (30) days of receipt of invoice, Licensee shall be responsible for paying all such fees directly to Licensor at the rates set forth in the Customer Agreement in accordance with the GSA Pricelist.

(b) During the Term, Licensor may, in Licensor's sole discretion, and subject to applicable Government security requirements, audit Licensee's use of the Software to ensure Licensee's compliance with this EULA, provided that (i) any such audit shall be conducted with reasonable prior notice to Licensee, and (ii) no more than one (1) audit may be conducted in any 12-month period except for good cause shown. The Licensee shall fully cooperate with Licensor's personnel conducting such audits and provide all reasonable access requested by the Licensor to records, systems, equipment, information and personnel, including machine IDs, serial numbers and related information. Licensor shall only examine information directly related to the Licensee's use of the Software. Licensor may conduct audits only during Licensee's normal business hours and in a manner that does not unreasonably interfere with the Licensee's business operations.

(c) If any of the measures taken or implemented under this Section determines that the Licensee's use of the Software exceeds or exceeded the use permitted by this EULA then Licensor will promptly invoice Ordering Activity additional license fees sufficient to cover the unauthorized use revealed by the audit.

(d) Licensor's remedies set forth in this Section are cumulative and are in addition to, and not in lieu of, all other remedies the Licensor may have at law, whether under this EULA or otherwise.

6. Maintenance and Support.

(a) Subject to **Section 6(d)**, the license granted hereunder entitles Licensee to basic Software maintenance and support services for the Initial Term and any subsequent Maintenance and Support Periods for the Number of Installations, subject to Licensee's payment of and Licensor's receipt of all associated fees in accordance with the GSA Pricelist.

(b) Maintenance and support services will include Licensor's provision of basic diagnostic services, as well as such updates, upgrades, bug fixes, patches, and other error corrections (collectively, "**Updates**") as Licensor makes generally available free of charge to all licensees of the Software then entitled to maintenance and support services. Licensor may develop and provide Updates in its sole discretion, and Licensee agrees that Licensor has no obligation to develop any Updates at all or for particular issues. Licensee further agrees that all Updates will be deemed Software, and related documentation will be deemed Documentation, all subject to all terms and conditions of this EULA. In the event the Customer Agreement is between Licensee and a Reseller, Licensee will direct all maintenance and support requests directly to the Reseller, and Licensor shall provide the services set forth in this section solely through the Reseller. Licensor shall have no obligation to provide such services directly to Licensee.

(c) Service requests outside the scope of the services and Updates described in **Section 6(b)** may incur additional costs for parts, labor, and Licensee shall be responsible for such costs in accordance with the GSA Pricelist.

(d) Licensor has no obligation to provide maintenance or support services, including Updates, for any but the most current or immediately preceding version of the Software, or if Licensee breaches this EULA.

(e) Upon expiration of the Initial Term, Licensee may purchase, on an annual basis, continued maintenance and support (each year of which shall be a "**Maintenance and Support Period**") at the price specified in the GSA Pricelist.

In the event Licensee elects not to enter into a Maintenance and Support Period in a given year, Licensor shall have no obligation to provide any services set forth in this Section 6, including the Updates defined in 6(b), during that year.

7. If Licensee elects to enter into a Maintenance and Support Period after declining one or more of the immediately preceding Maintenance and Support Periods, Licensee shall be required to pay to bring the fees up to date. Collection and Use of Information.

(a) Licensee acknowledges that Licensor may, directly or indirectly through the services of Third Parties, monitor, collect, and store information regarding all access and use of the Software and Services and any equipment, networks, and systems on which the Software is installed or through which it otherwise is accessed and used. Licensee shall provide Licensor with all credentials necessary to conduct such monitoring of the Software, including but not limited to log-in credentials associated with any third party service used by Licensee to receive, store, or process information collected by the Software. Licensor shall use such credentials solely in connection with exercising its rights under this Section.

(b) Licensee agrees that the Licensor may use such information for any purpose related to any use of the Software by Licensee or on Licensee's equipment, including but not limited to improving the performance of the Software, conducting audits pursuant to Section 5, developing Updates, verifying Licensee's compliance with this EULA, and other lawful purposes.

8. Intellectual Property Rights. Licensee acknowledges and agrees that the Software and Documentation are provided under license, and not sold, to Licensee. Licensee does not acquire any ownership interest in the Software or Documentation under this EULA, or any other rights thereto other than to use the same in accordance with the license granted, and subject to all terms, conditions and restrictions, under this EULA. Licensor and its licensors and service providers reserve and shall retain their entire right, title and interest in and to the Software and all Intellectual Property Rights arising out of or relating to the Software, except as expressly granted to the Licensee in this EULA. Licensee shall safeguard all Software (including all copies thereof) from infringement, misappropriation, theft, misuse or unauthorized access.

9. Term and Termination.

(a) This EULA and the license granted hereunder shall remain in effect for the period set forth in the Customer Agreement (the "**Initial Term**")

(b) If Licensor determines or reasonably believes that Licensee or any Authorized User: (i) breaches this EULA (including but not limited to any payment obligations under Section 5(a)); (ii) commits or attempts to commit a fraud upon Licensor or another party; or (iii) unlawfully accesses, uses, or distributes the Services or Software, the Licensor may bring a dispute under the contract Disputes Clause (Contract Disputes Act). During any dispute under the Disputes Clause, Licensor shall proceed diligently with performance of this Agreement, pending final resolution of any request for relief, claim, appeal, or action arising under the Agreement, and comply with any decision of the Contracting Officer

(c) Reserved.

(d) Upon termination of this EULA, the rights granted hereunder shall also terminate, and Licensee shall cease using and destroy all copies of the Software and Documentation. No expiration or termination shall affect Licensee's obligation to pay all fees that may have become due before such expiration or termination.

10. Limited Warranties, Exclusive Remedy and Disclaimer/Warranty Disclaimer.

(a) Licensor warrants that the Software will substantially perform in accordance with the functionality described in the Documentation.

THE FOREGOING WARRANTIES DO NOT APPLY, AND LICENSOR STRICTLY DISCLAIMS ALL WARRANTIES, WITH RESPECT TO ANY THIRD-PARTY MATERIALS, THE ACCURACY OF ANY DATA COLLECTED,

PROCESSED, OR TRANSMITTED BY THE SOFTWARE, AND ANY DECISIONS OR ACTIONS TAKEN BY OR ON BEHALF OF A LICENSEE BASED ON SUCH DATA.

(b) Reserved.

(c) EXCEPT FOR THE LIMITED WARRANTY SET FORTH IN **Section 10(a)**, THE SOFTWARE AND DOCUMENTATION ARE PROVIDED TO LICENSEE "AS IS" AND WITH ALL FAULTS AND DEFECTS WITHOUT WARRANTY OF ANY KIND. TO THE MAXIMUM EXTENT PERMITTED UNDER APPLICABLE LAW, LICENSOR, ON ITS OWN BEHALF, EXPRESSLY DISCLAIMS ALL WARRANTIES, WHETHER EXPRESS, IMPLIED, STATUTORY OR OTHERWISE, WITH RESPECT TO THE SOFTWARE AND DOCUMENTATION, INCLUDING ALL IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE AND NON-INFRINGEMENT, AND WARRANTIES THAT MAY ARISE OUT OF COURSE OF DEALING, COURSE OF PERFORMANCE, USAGE OR TRADE PRACTICE. WITHOUT LIMITATION TO THE FOREGOING, THE LICENSOR PROVIDES NO WARRANTY OR UNDERTAKING, AND MAKES NO REPRESENTATION OF ANY KIND THAT THE LICENSED SOFTWARE WILL MEET THE LICENSEE'S REQUIREMENTS, ACHIEVE ANY INTENDED RESULTS, BE COMPATIBLE OR WORK WITH ANY OTHER SOFTWARE, APPLICATIONS, SYSTEMS OR SERVICES, OPERATE WITHOUT INTERRUPTION, MEET ANY PERFORMANCE OR RELIABILITY STANDARDS OR BE ERROR FREE OR THAT ANY ERRORS OR DEFECTS CAN OR WILL BE CORRECTED.

11. Limitation of Liability. TO THE FULLEST EXTENT PERMITTED UNDER APPLICABLE LAW:

(a) IN NO EVENT WILL LICENSOR OR ITS AFFILIATES, OR ANY OF ITS OR THEIR RESPECTIVE LICENSORS OR SERVICE PROVIDERS, BE LIABLE TO LICENSEE OR ANY THIRD PARTY FOR ANY USE, INTERRUPTION, DELAY OR INABILITY TO USE THE SOFTWARE, LOST REVENUES OR PROFITS, DELAYS, INTERRUPTION OR LOSS OF SERVICES, BUSINESS OR GOODWILL, LOSS OR CORRUPTION OF DATA, LOSS RESULTING FROM SYSTEM OR SYSTEM SERVICE FAILURE, MALFUNCTION OR SHUTDOWN, FAILURE TO ACCURATELY TRANSFER, READ OR TRANSMIT INFORMATION, FAILURE TO UPDATE OR PROVIDE CORRECT INFORMATION, SYSTEM INCOMPATIBILITY OR PROVISION OF INCORRECT COMPATIBILITY INFORMATION OR BREACHES IN SYSTEM SECURITY, OR FOR ANY CONSEQUENTIAL, INCIDENTAL, INDIRECT, EXEMPLARY, SPECIAL OR PUNITIVE DAMAGES, WHETHER ARISING OUT OF OR IN CONNECTION WITH THIS EULA, BREACH OF CONTRACT, TORT (INCLUDING NEGLIGENCE) OR OTHERWISE, REGARDLESS OF WHETHER SUCH DAMAGES WERE FORESEEABLE AND WHETHER OR NOT THE LICENSOR WAS ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. The foregoing limitation of liability shall not apply to (1) personal injury or death resulting from Licensor's negligence; (2) for fraud; or (3) for any other matter for which liability cannot be excluded by law.

(b) IN NO EVENT WILL LICENSOR'S AND ITS AFFILIATES', INCLUDING ANY OF ITS OR THEIR RESPECTIVE LICENSORS' AND SERVICE PROVIDERS', COLLECTIVE AGGREGATE LIABILITY UNDER OR IN CONNECTION WITH THIS EULA OR ITS SUBJECT MATTER, UNDER ANY LEGAL OR EQUITABLE THEORY, INCLUDING BREACH OF CONTRACT, TORT (INCLUDING NEGLIGENCE), STRICT LIABILITY AND OTHERWISE, EXCEED THE TOTAL CONTRACT PRICE.

(c) THE LIMITATIONS SET FORTH IN **Section 11(a)** AND **Section 11(b)** SHALL APPLY EVEN IF THE LICENSEE'S REMEDIES UNDER THIS EULA FAIL OF THEIR ESSENTIAL PURPOSE.

12. Export Regulation. The Software and Documentation may be subject to US export control laws, including the US Export Administration Act and its associated regulations. The Licensee shall not, directly or indirectly, export, re-export or release the Software or Documentation to, or make the Software or Documentation accessible from, any jurisdiction or country to which export, re-export or release is prohibited by law, rule or regulation. The Licensee shall comply with all applicable federal laws, regulations and rules, and complete all required undertakings (including obtaining any necessary export license or other governmental approval), prior to exporting, re-exporting, releasing or otherwise making the Software or Documentation available outside the US.

13. US Government Rights. The Software is commercial computer software, as such term is defined in 48 C.F.R. §2.101. Accordingly, if the Licensee is the US Government or any contractor therefore, Licensee shall receive only those

rights with respect to the Software and Documentation as are granted to all other end users under license, in accordance with 48 C.F.R. §12.212, with respect to US Government licensees and their contractors.

14. Miscellaneous.

(a) This EULA shall be governed by, and construed and enforced in accordance with, the Federal laws of the United States.

(b) Excusable delays shall be governed by FAR 52.212-4(f).

(c) All notices, consents, waivers and other communications required or permitted to be given pursuant to this EULA shall be in writing and shall be deemed to have been delivered (i) on the delivery date if personally delivered or if delivered by confirmed facsimile or e-mail, or (ii) one (1) business day after deposited with any national overnight courier or express mail, receipt requested, or (iii) three (3) business days after deposit in the United States mail, registered or certified mail, return receipt requested, with adequate postage affixed thereto, addressed to Licensor or Licensee at their respective addresses as set forth in this EULA, or to such other addresses as hereinafter furnished by either Licensor or Licensee to the other party. Licensor and Licensee shall retain evidence that any facsimile or e-mail notices were received by the other party.

(d) Neither Licensee nor Licensor shall not assign or otherwise transfer any of its rights, or delegate or otherwise transfer any of its obligations or performance, under this EULA without the other Party's prior written consent, which consent Licensor may give or withhold in its sole discretion. Any purported assignment, delegation or transfer in violation of this Section is void. This EULA is binding upon and inures to the benefit of the parties hereto and their respective permitted successors and assigns.

(e) This EULA is for the sole benefit of the parties hereto and their respective successors and permitted assigns and nothing herein, express or implied, is intended to or shall confer on any other Person any legal or equitable right, benefit or remedy of any nature whatsoever under or by reason of this EULA.

(f) This EULA and the Customer Agreement, together with the underlying GSA Schedule Contract, Schedule Pricelist, and Purchase Order(s), if directly between Licensor and Licensee, constitute the sole and entire agreement of the parties with respect to the subject matter contained herein, and supersedes all prior and contemporaneous understandings, agreements, representations and warranties, both written and oral, with respect to such subject matter. In the event of any inconsistency between the statements in the body of this EULA and the Customer Agreement, the statements in the body of this EULA shall control, except that a Government Purchase Order shall supersede the terms in this Agreement. This EULA may only be amended, modified or supplemented by an agreement in writing signed by each party hereto. No waiver by any party of any of the provisions hereof shall be effective unless explicitly set forth in writing and signed by the party so waiving. Except as otherwise set forth in this EULA, no failure to exercise, or delay in exercising, any right, remedy, power or privilege arising from this EULA shall operate or be construed as a waiver thereof; nor shall any single or partial exercise of any right, remedy, power or privilege hereunder preclude any other or further exercise thereof or the exercise of any other right, remedy, power or privilege.

(g) If any term or provision of this EULA is invalid, illegal or unenforceable in any jurisdiction, such invalidity, illegality or unenforceability shall not affect any other term or provision of this EULA or invalidate or render unenforceable such term or provision in any other jurisdiction.

END USER LICENSE AGREEMENT  
(RESTRICTED SOFTWARE)

**IMPORTANT PLEASE READ CAREFULLY:** This End User License Agreement ("EULA") is a legal agreement between you (either an individual or a single entity) ("Licensee") and ZIH Corp ("Zebra") for software, owned by Zebra and its affiliated companies and its third party suppliers and licensors, that accompanies this EULA, which includes machine-readable instructions used by a processor to perform specific operations other than machine-readable instructions used for the sole purpose of booting hardware during a startup sequence ("Software"). **BY USING THE SOFTWARE, YOU ACKNOWLEDGE ACCEPTANCE OF THE TERMS OF THIS EULA. IF YOU DO NOT ACCEPT THESE TERMS, DO NOT USE THE SOFTWARE.**

1. **GRANT OF LICENSE.** Zebra grants you, End-User Customer, the following rights provided that you comply with all terms and conditions of this EULA: For Software associated with Zebra hardware, Zebra hereby grants you a limited, personal, non-exclusive license during the term of this Agreement to use the Software solely and exclusively for your internal use in support of the operation of your associated Zebra hardware and for no other purpose. To the extent that any portion of the Software is provided to you in a manner that is designed to be installed by you, you may install one copy of the installable Software on one hard disk or other device storage for one printer, computer, workstation, terminal, controller, access point or other digital electronic device, as applicable (an "Electronic Device"), and you may access and use that Software as installed on that Electronic Device so long as only one copy of such Software is in operation. For a standalone Software application, you may install, use, access, display and run only the number of copies of the Software to which you are entitled. You may make one copy of the Software in machine readable form for backup purposes only, provided that the backup copy must include all copyright or other proprietary notices contained on the original. In the absence of a support contract, you are entitled, for a period of ninety (90) days from when the instance of Software (or hardware including the Software) are first shipped by Zebra or downloaded by End-User Customer, to obtain, if available, updates, from Zebra and operational technical support, not including implementation, integration or deployment support ("Entitlement Period"). You may not obtain updates from Zebra after the Entitlement Period, unless covered by a Zebra support contract or other written agreement with Zebra.

Certain items of the Software may be subject to open source licenses. The open source license provisions may override some of the terms of this EULA. Zebra makes the applicable open source licenses available to you on a Legal Notices readme file available on your device and/or in System Reference guides or in Command Line Interface (CLI) Reference guides associated with certain Zebra products.

1.1 **Authorized Users.** For a standalone Software application, the licenses granted are subject to the condition that you ensure the maximum number of authorized users accessing and using the Software either alone or concurrently is equal to the number of user licenses for which you are entitled to use either through a Zebra channel partner member or Zebra. You may purchase additional user licenses at any time upon payment of the appropriate fees to the Zebra channel partner member or Zebra.

1.2 **Software Transfer.** You may only transfer this EULA and the rights to the Software or updates granted herein to a third party in connection with the support or sale of a device which the Software accompanied or in connection with a standalone Software application during the Entitlement Period or as covered by a Zebra support contract. In such event, the transfer must include all of the Software (including all component parts, the media and printed materials, any upgrades, and this EULA) and you may not retain any copies of the Software. The transfer may not be an indirect transfer, such as a consignment. Prior

to the transfer, the end user receiving the Software must agree to all the EULA terms. If Licensee is purchasing Zebra Products and licensing Software for end use by a U.S. Government end user, Licensee may transfer such Software license, but only if: (i) Licensee transfers all copies of such Software to the U.S. Government end user or to an interim transferee, and (ii) Licensee has first obtained from the transferee (if applicable) and ultimate end user an enforceable end user license agreement containing restrictions substantially identical to the ones contained in this Agreement. Except as stated in the foregoing, Licensee and any transferee(s) authorized by this provision may not otherwise use or transfer or make available any Zebra software to any third party nor permit any party to do so.

2. **RESERVATION OF RIGHTS AND OWNERSHIP.** Zebra reserves all rights not expressly granted to you in this EULA. The Software is protected by copyright and other intellectual property laws and treaties. Zebra or its suppliers own the title, copyright and other intellectual property rights in the Software. The Software is licensed, not sold.

3. **LIMITATIONS ON END USER RIGHTS.** You may not reverse engineer, decompile, disassemble, or otherwise attempt to discover the source code or algorithms of, the Software (except and only to the extent that such activity is expressly permitted by applicable law notwithstanding this limitation), or modify, or disable any features of, the Software, or create derivative works based on the Software. You may not rent, lease, lend, sublicense or provide commercial hosting services with the Software.

4. **MACHINE DATA.** “Machine Data” means anonymized usage data collected by devices sold (or licensed) under this Agreement such as battery management (time to empty, standby current, average current), device system time, CPU processing load, free RAM, number of running processes, network information (name, identifier), device identifier, firmware version, hardware version device type, audio volume, LED state, beeper volume, backlight level, key light, odometer count, reboot, reboot cause, total storage and physical memory availability, power cycle count, and device up time. Notwithstanding anything else in this Agreement, all title and ownership rights in and to Machine Data are held by Zebra. In the event, and to the extent you are deemed to have any ownership rights in Machine Data, you hereby grant Zebra a limited, revocable, non-exclusive right and license to use Machine Data.

5. **LOCATION INFORMATION.** The Software may enable you to collect location-based data from one or more client devices which may allow you to track the actual location of those client devices. Zebra specifically disclaims any liability for your use or misuse of the location-based data. You agree to pay all reasonable costs and expenses of Zebra arising from or related to third party claims resulting from your use of the location-based data.

6. **SOFTWARE RELEASES.** During the Entitlement Period, Zebra or Zebra’s channel partner members may make available to you software releases as they become available after the date you obtain your initial copy of the Software. This EULA applies to all and any component of the release that Zebra may make available to you after the date you obtain your initial copy of the Software, unless Zebra provides other license terms along with such release. To receive Software provided through the release, you must first be licensed for the Software identified by Zebra as entitled to the release. We recommend that you periodically check availability of a Zebra support contract to ensure that you are entitled to receive any available Software releases. Some features of the Software may require you to have access to the internet and may be subject to restrictions imposed by your network or internet provider.

7. **EXPORT RESTRICTIONS.** You acknowledge that the Software is subject to export restrictions of various countries. You agree to comply with all applicable international and national laws that apply to the Software, including all the applicable export restriction laws and regulations.

8. ASSIGNMENT. You may not assign this Agreement or any of your rights or obligations hereunder (by operation of law or otherwise) without the prior written consent of Zebra. Zebra may assign this Agreement and its rights and obligations without your consent. Subject to the foregoing, this Agreement shall be binding upon and inure to the benefit of the parties to it and their respective legal representatives, successors and permitted assigns.

9. TERMINATION. This EULA is effective until terminated. Your rights under this License will terminate automatically without notice from Zebra if you fail to comply with any of the terms and conditions of this EULA. Zebra may terminate this Agreement by offering you a superseding Agreement for the Software or for any new release of the Software and conditioning your continued use of the Software or such new release on your acceptance of such superseding Agreement. Upon termination of this EULA, you must cease all use of the Software and destroy all copies, full or partial, of the Software.

10. DISCLAIMER OF WARRANTY. UNLESS SEPARATELY STATED IN A WRITTEN EXPRESS LIMITED WARRANTY, ALL SOFTWARE PROVIDED BY ZEBRA IS PROVIDED "AS IS" AND ON AN "AS AVAILABLE" BASIS, WITHOUT WARRANTIES OF ANY KIND FROM ZEBRA, EITHER EXPRESS OR IMPLIED. TO THE FULLEST EXTENT POSSIBLE PURSUANT TO APPLICABLE LAW, ZEBRA DISCLAIMS ALL WARRANTIES EXPRESS, IMPLIED, OR STATUTORY, INCLUDING, BUT NOT LIMITED TO, IMPLIED WARRANTIES OF MERCHANTABILITY, SATISFACTORY QUALITY OR WORKMANLIKE EFFORT, FITNESS FOR A PARTICULAR PURPOSE, RELIABILITY OR AVAILABILITY, ACCURACY, LACK OF VIRUSES, NON INFRINGEMENT OF THIRD PARTY RIGHTS OR OTHER VIOLATION OF RIGHTS. ZEBRA DOES NOT WARRANT THAT THE OPERATION OF THE SOFTWARE WILL BE UNINTERRUPTED OR ERROR FREE. TO THE EXTENT THAT THE SOFTWARE COVERED BY THIS EULA INCLUDES EMULATION LIBRARIES, SUCH EMULATION LIBRARIES DO NOT WORK 100% CORRECTLY OR COVER 100% OF THE FUNCTIONALITY BEING EMULATED, ARE OFFERED "AS IS" AND WITH ALL FAULTS, AND ALL THE DISCLAIMERS AND LIMITATIONS CONTAINED IN THIS PARAGRAPH AND THIS AGREEMENT APPLY TO SUCH EMULATION LIBRARIES. SOME JURISDICTIONS DO NOT ALLOW EXCLUSIONS OR LIMITATIONS OF IMPLIED WARRANTIES, SO THE ABOVE EXCLUSIONS OR LIMITATIONS MAY NOT APPLY TO YOU. NO ADVICE OR INFORMATION, WHETHER ORAL OR WRITTEN, OBTAINED BY YOU FROM ZEBRA OR ITS AFFILIATES SHALL BE DEEMED TO ALTER THIS DISCLAIMER BY ZEBRA OF WARRANTY REGARDING THE SOFTWARE, OR TO CREATE ANY WARRANTY OF ANY SORT FROM ZEBRA.

11. THIRD-PARTY APPLICATIONS. Certain third party applications may be included with, or downloaded with this Software. Zebra makes no representations whatsoever about any of these applications. Since Zebra has no control over such applications, you acknowledge and agree that Zebra is not responsible for such applications. You expressly acknowledge and agree that use of third party applications is at your sole risk and that the entire risk of unsatisfactory quality, performance, accuracy and effort is with you. You agree that Zebra shall not be responsible or liable, directly or indirectly, for any damage or loss, including but not limited to any damage to or loss of data, caused or alleged to be caused by, or in connection with, use of or reliance on any such third party content, products, or services available on or through any such application. You acknowledge and agree that the use of any third-party application is governed by such third party application provider's Terms of Use, License Agreement, Privacy Policy, or other such agreement and that any information or personal data you provide, whether knowingly or unknowingly, to such third-party application provider, will be subject to such third party application provider's privacy policy, if such a policy exists. ZEBRA DISCLAIMS ANY RESPONSIBILITY FOR ANY DISCLOSURE OF INFORMATION OR ANY OTHER PRACTICES OF ANY THIRD PARTY APPLICATION PROVIDER. ZEBRA EXPRESSLY DISCLAIMS ANY WARRANTY REGARDING WHETHER YOUR PERSONAL

INFORMATION IS CAPTURED BY ANY THIRD PARTY APPLICATION PROVIDER OR THE USE TO WHICH SUCH PERSONAL INFORMATION MAY BE PUT BY SUCH THIRD PARTY APPLICATION PROVIDER.

12. LIMITATION OF LIABILITY. ZEBRA WILL NOT BE LIABLE FOR ANY DAMAGES OF ANY KIND ARISING OUT OF OR RELATING TO THE USE OR THE INABILITY TO USE THE SOFTWARE OR ANY THIRD PARTY APPLICATION, ITS CONTENT OR FUNCTIONALITY, INCLUDING BUT NOT LIMITED TO DAMAGES CAUSED BY OR RELATED TO ERRORS, OMISSIONS, INTERRUPTIONS, DEFECTS, DELAY IN OPERATION OR TRANSMISSION, COMPUTER VIRUS, FAILURE TO CONNECT, NETWORK CHARGES, IN-APP PURCHASES, AND ALL OTHER DIRECT, INDIRECT, SPECIAL, INCIDENTAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES EVEN IF ZEBRA HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE EXCLUSIONS OR LIMITATIONS MAY NOT APPLY TO YOU. NOTWITHSTANDING THE FOREGOING, ZEBRA'S TOTAL LIABILITY TO YOU FOR ALL LOSSES, DAMAGES, CAUSES OF ACTION, INCLUDING BUT NOT LIMITED TO THOSE BASED ON CONTRACT, TORT, OR OTHERWISE, ARISING OUT OF YOUR USE OF THE SOFTWARE OR THIRD PARTY APPLICATIONS, OR ANY OTHER PROVISION OF THIS EULA, SHALL NOT EXCEED THE FAIR MARKET VALUE OF THE SOFTWARE OR AMOUNT PURCHASER PAID SPECIFICALLY FOR THE SOFTWARE. THE FOREGOING LIMITATIONS, EXCLUSIONS, AND DISCLAIMERS (INCLUDING SECTIONS 10, 11, 12, AND 15) SHALL APPLY TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, EVEN IF ANY REMEDY FAILS ITS ESSENTIAL PURPOSE.

13. INJUNCTIVE RELIEF. You acknowledge that, in the event you breach any provision of this Agreement, Zebra will not have an adequate remedy in money or damages. Zebra shall therefore be entitled to obtain an injunction against such breach from any court of competent jurisdiction immediately upon request without posting bond. Zebra's right to obtain injunctive relief shall not limit its right to seek further remedies.

14. MODIFICATION. No modification of this Agreement shall be binding unless it is in writing and is signed by an authorized representative of the party against whom enforcement of the modification is sought.

15. U.S. GOVERNMENT END USERS RESTRICTED RIGHTS. This provision only applies to U.S. Government end users. The Software is a "commercial item" as that term is defined at 48 C.F.R. Part 2.101, consisting of "commercial computer software" and "computer software documentation" as such terms are defined in 48 C.F.R. Part 252.227-7014(a)(1) and 48 C.F.R. Part 252.227-7014(a)(5), and used in 48 C.F.R. Part 12.212 and 48 C.F.R. Part 227.7202, as applicable. Consistent with 48 C.F.R. Part 12.212, 48 C.F.R. Part 252.227-7015, 48 C.F.R. Part 227.7202-1 through 227.7202-4, 48 C.F.R. Part 52.227-19, and other relevant sections of the Code of Federal Regulations, as applicable, the Software is distributed and licensed to U.S. Government end users (a) only as a commercial item, and (b) with only those rights as are granted to all other end users pursuant to the terms and conditions contained herein.

16. APPLICABLE LAW. This EULA is governed by the laws of the state of Illinois, without regard to its conflict of law provisions. This EULA shall not be governed by the UN Convention on Contracts for the International Sale of Goods, the application of which is expressly excluded.
