FOREWORD

This gazetteer contains about 5,600 entries for places and features in the Sultanate of Oman. Research for this publication was completed in May 1974.

The names in this gazetteer supersede those in all previous Board lists for the area.

The entries include standard names approved by the Board on Geographic Names and unapproved variant names, the latter cross-referenced to the standard names. *Users of the gazetteer should always refer to main entries for approved names.*

The basic name coverage corresponds generally to that of maps at the scale of 1:250,000. Entries include the names of populated places of all sizes, various other cultural entities, and a variety of physical features.

The administrative structure of Oman is very rudimentary, in fact most sources deny the existence of the administrative divisions. Although there does appear to be some form of governmental authority in these entities, the boundaries and administrative seats of the provinces are unestablished. In view of these uncertainties, the names of reputed administrative units are listed in this gazetteer and are characterized as *regions*.

Most of the entities can be identified and located by the approved name or a recognizable variant of the approved name on one or more of the following sources:

1. *Trucial States, Muscat-Oman* (and other titles), 1:100,000 (Series No. K668), Directorate of Military Survey, Great Britain, 1959-1970.
2. *Joint Operations Graphic (Ground) 1:250,000*, D. Survey, Ministry of Defence, U.K., 1966-1968.

3. *Arabian Peninsula 1:500,000* (Series No. K462), Army Map Service, 1963 (Sheets NE 39-E and NF 40-W, in English and Arabic)

4. *Arabian Peninsula 1:2,000,000*, U.S. Geological Survey, 1963. (Arabic ed.)

Interpretation of entries

It has been necessary to express in code numbers and letters some of the information in this gazetteer in order to accommodate it to machine tabulation.

Name.—Approved standard names and unapproved variant names appear in the first column. The variant names are always cross-referenced to the standard names by use of the word “see.” Names containing generic elements preceding the specific term (except names of populated places) are alphabetized by the specific part; thus *Wādī ‘Ārah*, the name of a wadi, is listed as *‘Ārah, Wādī*. Where part of a name is underlined, the use of the part not underlined is optional. If two or more names are approved for a feature, each is identified in parentheses and any or all may be used.

Language labels are used to identify alternate local names of noninternational features. Local names of international features are identified by major-political-entity labels. Where only one country is identified parenthetically, no name is available for the feature in the other country. The following short forms for names of countries contiguous to Oman are used in this gazetteer where it is necessary to indicate the sovereignty of international names:

Yemen (Sana)	[Yemen Arab Republic]
Yemen (Aden)	[Peoples Democratic Republic of Yemen]
U.A.E.	[United Arab Emirates]

As far as possible, Arabic names in this gazetteer have been romanized from Arabic script according to the transliteration system used jointly by the Board on Geographic Names and the Permanent Committee on Geographical Names for British Official Use (the BGN/PCGN 1956 System), which follows on pages vii through xi. It is almost always necessary to add missing symbols for short vowels (vowel points) in Arabic script and to rewrite dialectal forms in standard written Arabic. Names found written only in roman letters but recognizable as Arabic have been reconstructed into Arabic script and then transliterated.

In a few cases, where it was not possible to determine complete BGN/PCGN Arabic forms, names have been given in the form found in romanized sources and marked with an asterisk(\*) preceding the designation; however, individual Arabic words recognizable in these names have been rendered in the system.

The diacritical marks used in approved Arabic names in Oman are the macron (ˉ), the cedilla (ç), and the acute accent (´). These marks are to be used whether the names are written in capital or lowercase letters. In addition, the apostrophe (') and the inverted apostrophe (´), representing the letters *hamzah* and *'ayn* respectively, frequently occur in Arabic names.

In writing Arabic names in capital and lowercase letters, every word in a name should be initially capitalized except the following when they are not name-initial: *wa* (and) and the definite article *al*, *al*, *adh*, *al*, *an*, *ar*, *as*, *as*, *ash*, *at*, *at*, *ath*, *az* and *az*.

Designation.—The second column contains designations or abbreviations of designations, as listed below. Because practically all geographic terms have varied meanings, the senses in which the designator terms are used and the range of features to which they are applied in *this gazetteer* are stated in the

list to reduce ambiguity. The distinctions that can be made in a given gazetteer will vary with the quality of the maps of the area and with the nature of the entities that are named. In Oman some of the features do not fit precisely into the categories used to designate them and others could be designated in two or more ways.

AREA	area (tract of land identified by a name, but without homogeneous character or established boundaries; may be identified and named for characteristics which no longer pertain to it)
BAY	bay (coastal indentation of a size intermediate between a gulf and a cove)
BCN	beacon (an unlighted aid to navigation)
BGHT	bight (open body of water forming a slight recession in a coastline)
BSN	basin (more or less saucer-shaped region delimited by a drainage system, physical relief, and/or geologic structure)
BUTE	butte (small, isolated, usually flat-topped hill with steep sides)
CAPE	cape (seaward end of a projection of land of such position and size as to affect the course of ships)
CAVE	cave (underground cavity, usually in soluble rock)
CHNM	marine channel (channel between coastal islands, reefs, or shoals; between an offshore feature and the mainland; or through a shallow marine water body)
CLF	cliff (high, steep rock face overlooking a lower area, such as a water body, coastal lowland, or valley)
CMP	camp
CMPO	oil camp
CNLA	aqueduct (canal or conduit used to carry water)
CNLU	underground irrigation canal(s) (gently inclined underground tunnel bringing water for irrigation from aquifers near the base of mountains)
COVE	cove (small bay)

CUET	cuesta (ridge characterized by a steep escarpment on one side and a long, gentle slope on the other, formed on tilted strata of hard rock overlying softer rock)		beached; place where boats touch land for the purpose of taking on or discharging people or cargo)
CULT	cultivated area	LGN	lagoon (water body along a coast, largely or wholly cut off from the sea by a barrier beach or other depositional feature)
DPR	depression (lower area wholly or largely surrounded by higher land; ordinarily has interior drainage and does not conform to the valley of a single stream)	MESA	mesa (flat or nearly flat landform less extensive than a plateau with abrupt or steeply sloping side or sides)
DSRT	desert (barren tract characterized by arid climate and sparse xerophytic vegetation)	MSQE	mosque (Islamic house of public worship)
DUNE	dune(s) (hill or ridge of sand formed by the action of wind)	MT	mountain (landform of conspicuous relief, moderate to high elevation, and small summit area)
FLLS	waterfalls	MTS	mountains, mountain range, mountain system
FLTT	tidal flat (coastal area alternately submerged and exposed by the tide)	OAS	oasis (watered area in a desert, usually with cultivation dependent on irrigation or a shallow ground water table)
FRM	farm (small agricultural unit consisting of a farmstead and associated land, usually owned and operated by a single family)	OILF	oilfield (area containing a subterranean store of petroleum of economic value)
FRMQ	abandoned farm	OILQ	abandoned oil well
FT	fort (defensive structure or works, generally of little or no present military significance; may be in a state of ruin)	PAL	palace
GRGE	gorge (relatively narrow, steep-sided segment of a streamcourse)	PASS	pass, gap (way over, through, or between mountains or other high land)
GULF	gulf (large, broad water body indenting a coast)	PCLI	independent political entity (sultanate)
HDLD	headland (conspicuously high piece of land jutting out into or fronting the sea)	PEN	peninsula (area of land projecting into and largely, but not entirely, surrounded by water)
HLL	hill (landform of moderate relief, moderate elevation, and small summit area)	PK	peak (separately named summit on a more extensive elevation)
HLLS	hills	PLAT	plateau (extensive elevated area of flat to rolling surface; may exhibit considerable local relief due to dissection or the presence of hills or mountains rising above the general surface level)
HLT	caravan halting place	PLN	plain (landform of low relief, slope, and elevation); coastal plain; floodplain (deposit of alluvium which covers a valley flat)
INLT	inlet (small, narrow indentation in a coast)	POOL	pool(s) (small body of water in the bed of a wadi)
ISL	island	PPL	populated place (city, town, village, settlement)
ISLS	islands	PPLQ	abandoned populated place
LCTY	locality (minor area or place of unspecified or mixed character)	PPLS	group of villages
LDNG	landing (place where small boats are tied up or		

PPLX	section of populated place (part of a city or contiguous urbanized area named as an entity but having no known administrative status)	SEA	sea
PROM	promontory (piece of an area of high, generally flat land jutting into surrounding lower land; similar to a headland except for its inland location)	SHOL	shoal (an offshore hazard to navigation with a least depth of twenty meters [or ten fathoms] or less, composed of unconsolidated material)
PRT	port	SLP	slope (gradient on the side or end of an elevated relief feature)
PSTB	border post	SPNG	spring(s)
PT	point (relatively minor projection of land into a water body, or its extremity)	STRT	strait (relatively narrow water passage connecting large bodies of water)
RDGE	ridge (elongated, relatively narrow relief feature with a more or less continuous crest)	TRB	tribal area
RDJC	road junction	TREE	trees
RF	reef (offshore consolidated rock hazard to navigation with a least depth of twenty meters [or ten fathoms] or less)	TRGD	interdune trough (elongated corridor between parallel dunes)
RGN	region (large area recognized as an entity by reason of the unity of its history, people, landscape, or other condition or a combination of conditions)	TRMO	oil pipeline terminal
RKSW	rocks in water	VAL	valley (area drained by a stream, or a named segment of such an area)
RKW	rock in water (individual rock of such character and importance as to be identified by name, situated either above or below the surface of a body of water; often associated with reefs but separately named)	WAD	wadi (watercourse or drainageway that carries only occasional flows of water)
RUIN	ruin(s); ruined village (structure(s) in a state of ruin, but not necessarily of great antiquity or archeological interest)	WADS	wadies
RVN	ravine (short, steep, V-shaped watercourse)	WADX	section of wadi
SAND	sand area (includes large tracts of desert sand not in the form of dunes)	WLL	well (dug or drilled source of water)
SBKH	sabkha (area of salt-impregnated ground without vegetation, intermittently wet from rainfall or seepage; slippery when wet, salt encrusted when dry; occurs in depressions and other low-lying parts of deserts)	WLLS	wells
SCRP	escarpment (more or less continuous line of cliffs or steep slopes facing in one direction, caused by differential erosion or faulting or both)	WTRH	waterhole (place, usually in the bed of a watercourse, where water stands or can be obtained by shallow digging during the dry season)

Latitude and longitude.—The third and fourth columns indicate geographic coordinates, with longitude based on Greenwich. Coordinates were generally read to the nearest minute and are for finding purposes only.

Coordinates were read at the map symbol for populated places and other entities occupying limited sites, at the mouths or lower ends of wadies, at the summits of mountains and hills, at the extremities of capes and points, and near the centers or midpoints of other features.

Area number.—The number in the fifth column is the

general number (41525) used for the political entity, Oman, and all named places and features therein.

Glossary of generic terms

The following terms occur as the generic parts of standard names in the gazetteer. The English term or terms which correspond to each local term were applied after objective study of cartographic and other source materials, and do not necessarily reflect dictionary or other normalized usages.

TRANSLITERATION SYSTEM FOR ARABIC GEOGRAPHIC NAMES

BGN/PCGN 1956 System (Revised in 1972)

The BGN/PCGN 1956 System for the Arabic alphabet is designed for use in transliterating standard written Arabic. It was adopted by the BGN in 1946 and by the PCCN in 1956 and has been applied by the Board, so far as practicable, to the systematic romanization of geographic names in Syria, Lebanon, Jordan, Iraq, the Arabian Peninsula, the United Arab Republic (Egypt), Libya, the Sudan, and Tunisia.

The system is designed to bring about uniformity in the spelling of geographic names in Arabic-language areas by eliminating deviations resulting from pronunciation differences in various dialects, except as stated in the special rules.

In contrast to several other languages, uniform results in the transliteration of Arabic are difficult to obtain, since vowel points and some of the diacritical marks necessary for the certain identification of the Arabic words are almost always omitted from both handwritten and printed Arabic. It follows that the transliterator must be able to identify the

words used in the names and must know their standard written Arabic spelling, their proper vowel pointing, and how to eliminate peculiarities resulting from dialectical variation. The problem is complicated in most Arabic-language areas by the fact that a large proportion of the geographic names are not available in the Arabic alphabet. This applies to Arabic names as well as to those of non-Arabic origin. Even when Arabic script is available it is not always possible to determine the proper vowel pointing from dictionaries and other reference tools.

The transliteration of the Arabic consonants, vowels, and diphthongs, with examples of the application to geographic names, is given in the tables. *Hamzah*, often omitted in such tables, is included in its logical position before *alif* as a consonant in order to avoid any question as to its proper treatment.

The notes and special rules explain details of transliteration not stated in the tables.

NOTES

1. *Hamzab* is written in Arabic over all initial *alifs* except those which belong to the definite article *al* or bear a *maddab* (see note 10). When the purpose is to indicate the presence of the sound described as a glottal stop, it is written over internal and final *alif*, *wāw*, and *yā'* (without dots). *Hamzab* following *i* is written *ئ* (almost always the *yā'* is in the *ي* or *بي* form) and the dots are omitted. Example: *بشر*. *Hamzab* following *u* is written *ؤ*. *Hamzab* following a long vowel is written without anything under it ("without a bearer"). The transliteration of *hamzab* (') should always be carefully distinguished from that of *'ayn* (').
2. *Alif* as such is not transliterated when it is bearer of *hamzab*, but see *ṣaḥāb alif* and *alif maddab* in Table II. See also note 1 above and note 10.
3. An original *tā'* in certain endings is written *ت* (i.e., *bā'* with two dots) and is called *tā' marbūṭab*. It is transliterated h (silent), except when followed by another word in a unitary expression, when it is transliterated t, as in *hamzab* (isolated form) and *hamzat al waṣl*. A pronounced final *bā'* occurs and for bibliographical purposes may be transliterated /h when a *ṣaḥāb* precedes it (Al Mara/h). Cf. also note 4.
4. The two-letter symbols th, kh, dh, sh, and gh are convenient for use and easily comprehensible. The infrequent sequences of t, k, d, or s followed by h can be unequivocally transliterated for bibliographical purposes by the use of a slant line ("shilling," "solidus") to separate true h from a preceding t, k, d, or s; that is, th represents *thā'*, but t/h stands for *tā'* followed by *bā'*. Cf. also note 3.

5. Where special considerations are paramount, the sub-dot (h, s, d, t, z) may be used in place of the cedilla (ḥ, ṣ, ḍ, ṭ, ḏ).

6. The letter yā is also used in written *maqṣūrah* in which the dots are omitted. See Table II.

NOTES

7. The classical Arabic grammatical endings written with the so-called nunation symbols (abic *tanwīn*) may be transliterated when necessary by a<sup>n</sup>, i<sup>n</sup>, u<sup>n</sup>. In modern Arabic these endings have become silent and are omitted in transliteration: classical *alifu<sup>n</sup>*, modern *alif*.
8. Doubled consonant sounds are written in Arabic by placing the *tashdīd* over the consonant letter written once. In transliteration the letter should be doubled. When the definite article *al* precedes a word beginning with t, th, d, dh, r, s, sh, ṣ, ḍ, ṭ, ḏ, l, n (the so-called "sun letters"), the l is assimilated in pronunciation, giving tt, thth, etc.

In transliteration this l should be omitted and the following letter written twice, once after the a of the article and secondly at the beginning of the next word. Example: An Nīl, not Al Nīl.

9. *Hamzat al waṣl* is transliterated ' in classical forms, as illustrated in its classical name *hamzatu 'l waṣli*, but ignored in modern forms, as in *hamzat al waṣl*.
10. *Maddah* is a horizontal wavy line over *alif*. Since *maddah* nearly always occurs in word-initial position, no confusion results from the use of ā for *alif maddah* as well as for *fathah alif*.

SPECIAL RULES

The following notes explain details of transliteration not stated above.

1. Initial definite articles and prepositions should be capitalized and hyphens should not be used to connect parts of names; e.g., Ash Shāriqah and Tall al Lahm.
2. If any evidence is found for the use of the definite article in a name, the article will be used in the name chosen.
3. The Arabic word for God will be written Allāh.
4. Phrase names, commonly transcribed as one word, will be written in separate words. The definite article within such names will be written al, not ul; e.g., 'Abd Allāh, 'Abd ar Raḥmān, Dhū al Faqār.
5. The word Ibn will be transliterated Bin wherever written without *alif*, that is, between two proper nouns; e.g., 'Umar Bin al Khaṭṭāb.
6. The Turkish word Paşa will be transliterated directly from Arabic script as Bāshā; the Turkish word Bey will be romanized as Bey in Egyptian names, no matter how written in Arabic-language sources, but in other Arabic areas as Bak where

- written *bā'-kāf* and as Bayk where written *bā'-yā'-kāf*.
7. The modern colloquial word Sīdī will be given precedence over the classical form Sayyidī. (This does not preclude the spelling Sayyidī if the latter is indicated by the Arabic script or other evidence - for instance if the yā' is written with *tashdīd*.)
8. The colloquial word Bū will not be changed to the classical form Abū.
9. The colloquial word for water written *mīm-yā'-tā'* on Arabic maps will be transliterated Mayyat.
10. In place names of Aramaic origin in Lebanon and Syria with an initial cluster beginning with b plus another consonant such as l or h, initial clusters such as bl and bh will be written.
11. In names containing the words for "back, ridge, hill" appearing as either *ḏā'-ḥā'-rā'* or *ḏād-bā'-rā'* in Arabic sources, the spelling used in the sources will be followed.
