

Annex 2: Overview of proposed changes to draft Table 3 list of internationally important sites for migratory raptors in African-Eurasia since MoS2

The changes proposed below are changes to the draft Table 3 presented to MoS2 in UNEP/CMS/Raptors/MOS2/15¹.

Proposed insertions for species newly listed on Annex 1 at MoS2

IBAs - Insertions to the IBA element of draft Table 3 for qualifying populations of Annex 1 species newly listed on Annex 1 at MoS are marked in **yellow**. The site name and code are also highlighted in yellow if it is an entirely new IBA.

533 new qualifying population records at IBAs have been added for species newly listed on Annex 1 at MoS2. These involve the following species: Bearded Vulture (95), Cape Vulture (46), Himalayan Griffon² (5), Hooded Vulture (1), Indian Vulture (85), Lappet-faced Vulture (18), Red-headed Vulture (14), Rüppell's Vulture (6), Slender-billed Vulture (68), White-backed Vulture (3), White-headed Vulture (1) and White-rumped Vulture (191). These additions occurred in 34 countries (Botswana, Burkina Faso, Kenya, Lesotho, Mozambique, Namibia, South Africa, Tanzania, Zambia, Zimbabwe, Bangladesh, Bhutan, China, India, Nepal, Pakistan, Afghanistan, Kazakhstan, Armenia, France, Georgia, Greece, Russia, Spain, Turkey, Islamic Republic of Iran, Iraq, Israel, Jordan, Oman, Saudi Arabia, Syria, United Arab Emirates and Yemen) and result in an additional 157 IBAs being added to draft Table 3.

No other newly listed Annex 1 species were qualifying species at IBAs.

SPAs – To amend the SPA component of the list we used the same (May 2015) version of the Natura 2000 database used as the basis for creation of the MoS2 version of Table 3. Newer Natura 2000 datasets are available but without a mandate from MoS to update the entire SPA component of the list the best option was to ensure consistency with the existing SPA information in Table 3. There are 150 cases where species newly listed on Annex 1 at MoS2 have been added as qualifying populations to SPAs on draft Table 3. These cases involved Bearded Vulture in Austria, Spain, France, Greece and Italy and are highlighted in **blue**. No new SPAs qualified to be added to the list as a result.

No other newly listed Annex 1 species had records in SPAs.

Proposed deletions from draft Table 3

As outlined in UNEP/CMS/Raptors/TAG3 doc 4.1b the specific alteration the EU requested to the SPA component of the draft Table 3 presented at MoS2 was the removal of Category D populations. Categories A-C are different bands used to evaluate the relative size or density of the population of a species listed as occurring at an SPA in relation to the national population. They are used to describe the percentage of the national population present at the SPA, while Category D is used for non-significant populations 'where a population of the species concerned is present on the site in question in a non-significant manner'.

¹ <https://cms.int/raptors/en/document/proposals-amendments-raptors-mou-andor-its-annexes-provisional-list-important-bird-areas>

² Himalayan Griffon was prematurely listed as a qualifying species at some sites in the MoS2 version of draft Table 3 presented in UNEP/CMS/Raptors/MOS2/15. This anomaly concerned Afghanistan, Nepal, Kyrgyzstan, Tajikistan and a footnote has been added to draft Table 3 to explain this. Since the recognised common name for the species is now 'Himalayan Griffon' rather than 'Himalayan Vulture' (del Hoyo & Collar 2014) the common names of all records of this species have been updated in draft Table 3 to read 'Himalayan Griffon' for consistency.

Qualifying species with populations listed under category D at SPAs from the draft Table 3 presented at MoS2 have been identified using the May 2015 Natura 2000 dataset. They are highlighted in red and proposed for removal from draft Table 3. 1,307 incidences of 'Category D' populations at SPA's have been proposed for deletion. This affects listings for 39 species and 7 countries: Austria, Belarus, Bulgaria, Cyprus, Denmark, Finland and Croatia. It would result in the removal of 48 whole SPA sites from across countries: Austria, Belarus, Bulgaria, Cyprus, Denmark and Finland.

National site list under review

The Swiss government is currently reviewing the site listings for Switzerland on draft Table 3. This will be discussed during TAG3 and the Swiss list may be subject to update soon.

Table 3: List of internationally important sites for migratory raptors in Africa and Eurasia [as at MoS2 2015]

This list includes internationally important sites for migratory birds of prey^[1] identified as Important Bird and Biodiversity Areas (IBAs)^[2] and/ or EC Birds Directive Special Protection Areas (SPAs)^[3] (listed in red) or other Signatory-recognised sites that meet criteria of international importance^[4] (listed in purple). Some sites of the three types may overlap spatially, but different site types are listed separately for clarity.

Sites are ordered alphabetically by region: Africa, Asia, Central Asia, Europe, Middle East and within each region, alphabetically by country. Season refers to the period of the year during which the ‘trigger species’ is present (as documented by the BirdLife Partnership in the World Biodiversity Database).

Site code	Site name	Qualifying species		Season
Africa				
Algeria				
6178	Djurdjura	Lesser Kestrel	<i>Falco naumanni</i>	breeding
6179	Belezma	Lesser Kestrel	<i>Falco naumanni</i>	breeding
6184	Parc National de l'Ahaggar	Pallid Harrier	<i>Circus macrourus</i>	winter
6185	Îles Habibas	Eleonora's Falcon	<i>Falco eleonora</i>	breeding
Benin				
6039	Pendjari National Park	Fox Kestrel	<i>Falco alopex</i>	resident
