CISS, Continuous Ink Supply System

New construction of CISS ColorWay®:

- Due to features of construction, ink will not spill if user accidentally coup the container;
- Improved control system pressure within the chambers;
- Improved control of ink supply to cartridges and printhead of device;
- Stylish design.

Spare parts for CISS

Meaning of CISS code*

MP240CN-X.X NC

- MP240 – CISS Model
- CN - no chips included
CC - chips are included
- Number of tanks with ink
(0-no inks, 4,5,6 or 8 pcs)
- Ink Volume (5-50 ml, 1-100 ml)
- NC - original cartridges in use with CISS
(original cartridges are not included in box content)

Ink content
(if 0.0-CISS without inks)

CISS, Continuous Ink Supply System

Why install CISS ColorWay is advantageous?

25 times MORE!*

Ink volume of 1 CISS (400 ml) is the same like volume of ink in 25 sets of original cartridges, which saves you from having to go to the shop 25 times for buying the cartridges and the same time replace them.

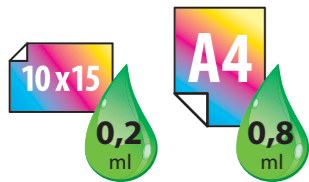

43 times CHEAPER!*

CISS + 400 ml Ink ColorWay® cheaper than one set of original cartridges and volume up to 25 times more!

Lifetime of CISS is the same like lifetime of your printing device!

Average ink consumption for photo printing:

Average ink consumption for photo printing
10x15 - 0.6 EUR*
A4 - 2.2 EUR*

Costs of printing with ColorWay® inks
10x15 - 0.006 EUR*
A4 - 0.025 EUR*

Refillable cartridges code meaning*

SX130RC-X.X

- SX130** - Refillable cartridge set model
- RN** - chips are not included
- RC** - chips are included
- X** - Number of tanks with ink (0-no inks, 4,5,6 or 8 pcs)
- .X** - Ink Volume (5-50 ml, 1-100 ml)

Ink content (if 0.0 - no ink included in box)

*Calculations are made for Canon 2440 in accordance with average retail price and with no paper costs included.

Combo set of cartridges ColorWay® (Combo Pack):
 - more favorable price than upon purchase of separate cartridges;
 - cost of printing is lower than with original's;
 - time saving – no need to spend time on visiting shop twice;
 - replaceable cartridge is always near.

Due ink

Sublimation ink

Refill kits

Sublimation ink – a special ink used for sublimation printing. Sublimation printing is process of placing the image on the cloth, while under the influence of heat, the dye is converted to gas. In gaseous form it penetrates into the cloth and becomes part of its coating. For sublimation printing on textiles using polyester and blended fabrics (but not necessarily with a 50% polyester fiber content). You can also use metal, glass and ceramics with pre-coated polyester coating.

Do not limit yourself with printing of 10x15 photo!

Everyone knows that brilliant picture or photo can be a great part of any interior. The most available format for printing of picture reproduction or photo is A4. But what if that is not enough? Do you think that on home printer you can print only 10x15 and A4 formats? Do you know that common Epson printer of A4 format gives an ability to print panoramic photo with length up to 1176 mm and Canon printers up to 676 mm? Specially for printing of massive and nonstandard formats TM Colorway® offers the series of roll photo paper of different formats and types.

Make masterpiece with your own hands!

Art canvas is a cotton basis with polymeric cover for inkjet printing that imitates the cloth texture. Perfectly fits for printing of piece of art made in a way of gouache, watercolor, graphics. Photo or reproduction printed on a cloth can be a great decoration of any interior!

Just print selected picture on art canvas, put it on an underframe with help of stapler, then put it in frame and enjoy YOUR masterpiece!

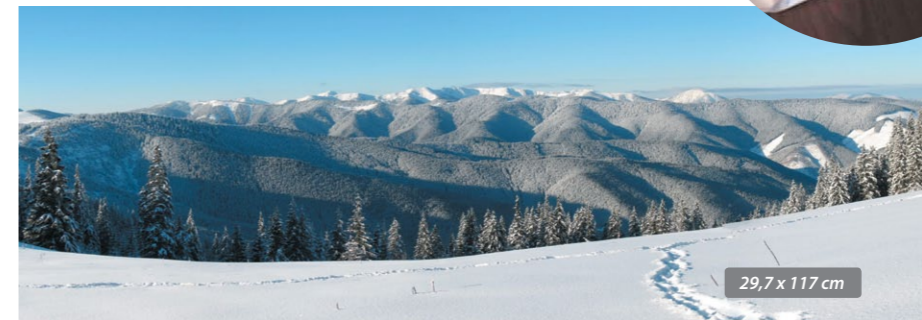

Photo paper of ART series

Your creations will look in a new way!

Equipment for service centers
Equipment for cartridges cleaning YDX-04H

Code:

YDX-04H

Scope of use:

It is used for cleaning and reconstruction of toner cartridges

Product features:

1. Two vertical cylindrical filters with improved performance. Capacity 3000 hours;
2. Antistatic HEPA filter with polyester fiber that provides a high rate of durability;
3. Special dust and explosion-proof centrifugal fans;
4. Fluctuating system of backwash for filter cleaning;
5. Double filtration (2-steps filter) that helps to catch particles up to 0.3 micron. Thanks to this an effectiveness of cleaning is 99.97%;
6. A hose for connection the station to compressor (compressor is not included to equipment content);
7. Adjustor with power regulation of air flow;
8. Additional reducer with dehumidified for providing an air supply stability;
9. Removable container on wheels for used toner.

Technical features:

Input voltage	~220 B ±10 B, 50~60 Hz
Air pressure	0,4~0,7 MPa
Work air pressure	+2-10 atm
Rated power	1.5 kw
Filter precision	≤0.3 mkm
Filter efficiency	99.97 %
Size (mm)	650(L) x 780(W) x 1680(V)

Note:

Features and appearance may vary from the shown or might be changed by manufacturer without web site display.

Equipment for service centers

HEPA filter

Code:

HepaF

Scope of use:

It is used for cartridges cleaning equipment

Product features:

HEPA filters are composed of a mat of randomly arranged fibers. The fibres are typically composed of fiberglass and possess diameters between 0.5 and 2.0 micrometers. Key factors affecting function are fiber diameter, filter thickness and face velocity. The air space between HEPA filter fibers is much greater than 0.3 μm.

Vertical cylindrical filter

Code:

FV1

Scope of use:

It is used for cartridge cleaning equipment

Equipment for service centers
Toner Packing machine YDX-06TS

Code:

YDX-06TS

Scope of use:

It is used for packing of different type of toner

Product features:

That is the first machine on the market that have built-in toner filling system with storage and automatic rollover.
1. Compact size and easy support. It completely exceeds features of traditional machine with automatic rollover in design, size, support and costs;
2. Fast and easy adding of toner, ecologically safe. Put a toner bag in storage and press rollover button, after this toner is delivered to toner exit in closed way, no pollution and electrostatics on machine;
3. Conversion method of frequency control;
4. Two ways of filling control: weight and time;
5. With suction mechanism on the toner exit, can collect completely the dust that is generated during filling of toner.

Technical features:

Input voltage	220 V
Rated Power	400 w
Storage volume	20 kg
Filling volume	from 10 to 5000 g
Filling rate	15-20 g/sec
Filling accuracy	±0,2-1 g (weight), ±1,5 g (time)
Weight	70 kg

Note:

Features and appearance may vary from the shown or might be changed by manufacturer without web site display.

Equipment for service centers
Vacuum cleaner ColorWay Service Vacuum CW-AT88

Code:

CW-AT88

Scope of use:

Using for cleaning office equipment and toner cartridges.

Product features:

1. Vacuum cleaner "CW-AT88" can be operated in two modes:
- Cleaning office equipment - nominal air flow rate 1,5 m³/min., nominal vacuum inlet rate 16 kPa, power consumption is not more than 1100 W;
- Cleaning cartridges- nominal air flow rate 0,83 m³/min., nominal vacuum inlet rate 11,2 kPa, power consumption is not more than 600 W.
2. Vacuum cleaner engine has protect overheating system.
3. Due to universal construction, you can use toner filters from any manufacturer.

Technical features:

Power supply	220 V
Current frequency	50 Hz
Capacity toner filter	1 kg
Ingress protection rating	IP31
Dimensions	200x485x260 mm
Weight not more	5 kg
