Essential Data for your Algo Strategies

Dear Sir or Madam,

High quality, granular market data is a key input needed when developing successful algorithmic trading strategies. Deutsche Börse supplies market participants with historical order book data directly from our trading platforms in Enhanced Broadcast Solution format.

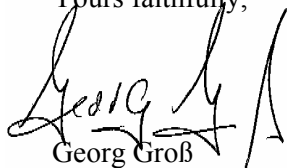

Our product "Xetra EnBS Historical Data" provides original copies of the complete Xetra order book information up to an order book depth of 20 including quotes, trades, reference data and market status information. In short, EnBS Historical Data makes available un-netted, historical data from the Xetra trading platform.

The product will allow you to generate complete order book situations without having to process the entire data history. All trades and quotes are marked with original time stamps in milliseconds.

Test it now! Xetra sample data files are available for download at www.deutsche-boerse.com/xetra_enbsdata_e

If you are interested in more information or more detailed sample files, please contact Nicole Oestreich at tel. +49-(0) 69-2 11-1 24 42 or write an e-mail to mda.frontoffice@deutsche-boerse.com.

Yours faithfully,

Georg Groß
