

Department of Homeland Security Operation Allies Welcome Afghan Evacuee

Quarterly Status Update 2

March 10, 2023

Fiscal Year 2022 Report to Congress

**Homeland
Security**

Message from the Secretary

March 10, 2023

I am pleased to submit the following report, “Department of Homeland Security Operation Allies Welcome Afghan Evacuee,” which was prepared by the Department of Homeland Security’s (DHS) Office of Strategy, Policy, and Plans.

The report was compiled pursuant to Section 2503 of the Afghanistan Supplemental Appropriations Act, 2022 (P.L. 117-43). The report provides available information on the requested topics and was coordinated with the Department of State, the Department of Defense, the Department of Health and Human Services, and the Office of Management and Budget. The report provides the second quarterly status update, which covers data through March 31, 2022.

Pursuant to congressional requirements, this report is being provided to the following:

The Honorable Kevin McCarthy
Speaker of the House of Representatives

The Honorable Kamala Harris
Vice President of the United States
President of the Senate

Inquiries relating to this report may be directed to the DHS Office of Legislative Affairs at (202) 447-5890. Thank you.

Sincerely,

A handwritten signature in blue ink that reads "Alejandro N. Mayorkas". The signature is written in a cursive, flowing style.

Alejandro N. Mayorkas
Secretary

Department of Homeland Security Operation Allies Welcome Afghan Evacuee Quarterly Status Update 2

I. Legislative Language

This document was compiled in response to Section 2503 of the Afghanistan Supplemental Appropriations Act, 2022 (P.L. 117-43), signed into law on September 30, 2021, which states:

Not later than 60 days after the date of the enactment of this Act, and quarterly thereafter through September 30, 2023, the Secretary of Homeland Security, in coordination with the head of any other applicable Federal agency, shall submit to Congress a report that includes ... a summary of the status of Afghan evacuees, ... the number of Afghan evacuees who have been interviewed by U.S. Citizenship and Immigration Services in connection with an application or petition for immigration benefits, ... [and] [f]or each Federal department and agency involved in Operation Allies Welcome ... the costs incurred[] and ... source of appropriated or other funds.

P.L. 117-43 defines an Afghan evacuee as “a person whose evacuation from Afghanistan to the United States, or a location overseas controlled by the United States, was facilitated by the United States as part of Operation Allies Refuge” (OAR).¹ For the purposes of this report, the definition of an Afghan evacuee is limited further to non-U.S. citizens who hold Afghan nationality.

¹ OAR was the U.S.-led effort to support relocation flights out of Afghanistan in July and August 2021. For the purposes of this report, Afghan evacuees also include persons whose evacuation from Afghanistan to the United States, or to a location overseas controlled by the United States, was facilitated by the United States as part of Operation Allies Welcome (OAW). OAW was initiated on August 29, 2021.

II. Introduction

On August 29, 2021, President Biden directed the Department of Homeland Security (DHS) to lead and coordinate ongoing efforts across the Federal Government to support vulnerable Afghans, including those who worked in Afghanistan alongside the United States for the past two decades, as they safely resettle in the United States. DHS established a Unified Coordination Group (UCG), which reports directly to the Secretary of Homeland Security, to coordinate the implementation of a broad range of services, including medical services, immigration processing, and resettlement support. The UCG's work is undertaken in close collaboration with partners across every level of government, nongovernmental organizations (NGOs), and the private sector. Through Operation Allies Welcome (OAW), the United States has welcomed approximately 90,000 Afghans to the United States and is prepared to welcome additional Afghan newcomers.

Prior to entering the United States, Afghan newcomers must successfully complete a rigorous and multilayered screening and vetting process that includes biometric and biographic screening conducted by intelligence, law enforcement, and counterterrorism professionals from multiple federal agencies. They must also receive critical vaccinations—which include measles, mumps, and rubella; varicella; polio; and COVID-19—as a condition of their humanitarian parole. All OAW arrivals are tested for COVID-19.

This report includes data on a total of **90,347** Afghan evacuees based on DHS Office of Immigration Statistics (OIS) analysis of data provided by U.S. Customs and Border Protection (CBP), U.S. Citizenship and Immigration Services (USCIS), the Department of State (DOS), and other departments and agencies. Afghan evacuees include non-U.S. citizens whose evacuation from Afghanistan to the United States, or to a U.S. military facility or transit site overseas, was facilitated by the United States.² For this report, OIS used CBP entry data limited to OAW and OAR charter flights, except as otherwise noted; for example, those with immigrant visas or entering as refugees may have entered on commercial flights.

As directed by P.L. 117-43, the three main sections of this report summarize: (i) the status of Afghan evacuees; (ii) the number of Afghan evacuees who have been interviewed by USCIS in connection with an application or a petition for immigration benefits; and (iii) costs incurred and funds used by each federal department and agency involved in OAW to support the effort.

Each section of the report includes a summary of available data and a discussion of reporting methodology and data limitations. Resettlement of vulnerable Afghan nationals are highly complex and remain underway. Some data included in the report, such as the number of persons entering the United States on OAW flights, can be calculated with precision as of the date reported. Other metrics, such as the number of Priority 1 (P-1) and Priority 2 (P-2) refugee applicants, are based on preliminary calculations. Future reports will reflect data updates and changes as they occur.

² Evacuation flights also included air carrier crewmembers and North Atlantic Treaty Organization personnel; they are not considered Afghan evacuees for the purposes of this report.

III. Section 2503 Reporting Requirements

§ 2503(b)(1)(A) Summary of the Status of Afghan Evacuees

This section of the report includes data on Afghan evacuees who were in one of the two following situations as of the reporting date: (i) entered the United States on OAR or OAW charter flights and, in some cases, on commercial flights; or (ii) had yet to enter the United States and were located at a U.S. military facility overseas in Qatar or at a transit site in the United Arab Emirates.³

Data on Afghan evacuees within the United States are based on person-level CBP records of Afghan nationals who entered the United States between July 30, 2021 and March 31, 2022, or on USCIS person-level LPR records. Data on Afghan evacuees located overseas are based on OAW case management data and on Afghan evacuee lists maintained by DOS and other agencies. Notably, several categories identified in P.L. 117-43 are overlapping. For example, employees of U.S. Government agencies may be counted as Special Immigrant Visa (SIV) holders, SIV applicants,⁴ and/or P-1 or P-2 refugee referrals. The sum of different subgroups identified in this section of the report therefore exceeds the total number of Afghan evacuees because some individuals appear in more than one specified category.

- (i) The number of Afghan evacuees who were U.S. lawful permanent residents (LPR) prior to admission: **3,552**.

NOTES: The reported number includes returning LPRs admitted to the United States after traveling to the United States on an OAW charter flight, as of January 31, 2022. Any returning LPRs admitted after that date, and some LPRs admitted before that date, instead traveled to the United States on commercial flights and are not included in this figure. This figure excludes the admissions of Special Immigrant Visa holders and immigrant visa holders, who become LPRs once admitted to the United States; see (ii) and (iv) below.

METHODOLOGY: For Afghan evacuees within the United States, status is based on CBP person-level entry records; less than 1 percent of CBP records had missing or unknown data on class of admission or parolee status.

- (ii) The number of Afghan evacuees who are SIV holders: **5,509**.

NOTES: SIV holders are those who worked for or on behalf of the U.S. Government or the International Security Assistance Force or a successor mission in certain capacities in Afghanistan and received a visa under the Afghan SIV program; data include principal visa holders and their immediate family members (i.e., derivative visa holders based on their relationships to the principal

³ Additional evacuees located at a transit site in Kosovo are discussed in Section 2503(b)(1)(B).

⁴ SIV applicants include those who had applied for but had not received an SIV at the time of evacuation; and those who were eligible to do so, but who have not begun the SIV application process yet. These individuals cannot obtain a visa while in the United States, but still may apply for “special immigrant status,” which provides a path to lawful permanent residence. Consistent with Section 2503(2)(A)(i)(III) of P.L. 117-43, this report refers to such persons as “SIV” applicants, although, in fact, such persons will not be granted a visa, but instead the status of “special immigrant.”

SIV). The reported number includes SIV holders admitted to the United States as of March 31, 2022.

METHODOLOGY: For Afghan evacuees within the United States, numbers are based on USCIS person-level LPR records and include those admitted on commercial or charter flights.

(iii) The number of Afghan evacuees who are SIV applicants: **39,171**.

NOTES: For the purposes of this report, principal applicants include Afghan evacuees who have applied to the SIV program on the basis of having been employed by or on behalf of the U.S. Government or the International Security Assistance Force or a successor mission in certain capacities in Afghanistan, as well as those who are known to be eligible to apply to the SIV program, but who had not applied at the time that this report was produced and are expected to do so. The reported number includes principal applicants and their immediate family members and includes individuals who entered the United States, or who were located at an overseas U.S. military facility in Qatar or a transit site in the United Arab Emirates, as of March 31, 2022. The reported number excludes principal applicants' extended family members, because they would not be eligible as derivative SIV applicants on the principal SIV applicant's case.

METHODOLOGY: DHS OIS, DOS Center for Analytics, and other departments and agencies that previously employed Afghan evacuees matched available data to CBP person-level entry records and DOS person-level case management records. As described above, Afghan evacuees with a previously granted SIV, as well as those admitted as LPRs, were excluded from the count of special immigrant applicants.

(iv) The number of Afghan evacuees in possession of a valid immigrant visa to enter the United States: **6,056**.

NOTES: This newly reported category does not exist in the legislative language and supplements the figures in (i) and (ii) above, given the U.S. Government's transition to use established immigration pathways. Data are valid as of March 31, 2022, and are limited to immigrant visa holders (IV), including SIV holders reported in (ii) above. Family members of an IV holder who themselves do not hold an IV are not included in this figure.

METHODOLOGY: Numbers are based on USCIS person-level LPR records.

(v) The number of Afghan evacuees in possession of a valid nonimmigrant visa to enter the United States: **135**.

NOTES: Data are valid as of March 31, 2022, and are limited to nonimmigrant visa (NIV) holders. Family members of a NIV holder who themselves do not hold an NIV are not included in this figure.

METHODOLOGY: Numbers are based on CBP person-level entry records.

(vi) The number of Afghan evacuees who are employees of a U.S. Government agency: **703**.

NOTES: Data are valid as of March 31, 2022, and are limited to evacuees who were employees as of August 1, 2021. Family members of employees who themselves were not employed by a U.S. Government agency are not included in this figure.

METHODOLOGY: The number of U.S. Government employees was provided by DOS and is based on a list of locally employed staff previously employed in Afghanistan who were evacuated. Locally employed staff also may be counted within other categories, including those for SIV holders, special immigrant applicants, and/or P-2 refugee referrals.

- (vii) The number of Afghan evacuees in possession of refugee status who entered the United States: **540**.

NOTES: This newly reported category does not exist in the legislative language and supplants the figures in (viii), (ix), and (x) below, given the U.S. Government's transition to use established immigration pathways. Data are valid as of March 31, 2022, and the figure includes all Afghans admitted as refugees since August 1, 2021. Family members of an individual with refugee status who themselves do not hold refugee status are not included in this figure.

METHODOLOGY: This was calculated using data from the case management system of the Bureau of Population, Refugees, and Migration of DOS.

- (viii) The number of Afghan evacuees who are employees of a U.S.-funded partner organization, media, or nonprofit organization.

NOTES: Afghan evacuees who are employees of a U.S.-funded partner organization, media, or nonprofit organization would be eligible to be referred to as the P-2 refugee applicants discussed below. However, the specific number in this category cannot be identified because P-2 processing was suspended for individuals who entered the United States as parolees. See further discussion in (ix) below.

- (ix) The number of Afghan evacuee P-1 refugee referrals: **1,977**.

NOTES: The reported number included referred individuals who entered the United States or were located at a U.S. military facility in Qatar or the transit site in the United Arab Emirates as of January 31, 2022. This figure included the number of individuals preliminarily submitted as P-1, along with their family members.⁵ This data is no longer updated because DOS suspended review of the referrals for eligibility of any evacuees identified in this report as P-1 or P-2 who have already entered the United States as parolees. Future evacuees who receive a P-1 or P-2 refugee referral and

⁵ For the purposes of this report, P-1 refugee applicants include individuals referred by a U.S. Embassy or other U.S. government department or agency. P-2 refugee applicants include groups of special humanitarian concern. On August 2, 2021, DOS announced a P-2 designation for the following three groups of Afghan nationals: (1) Afghans who do not meet the minimum time-in-service for an SIV but who work or worked as employees of contractors, locally employed staff, interpreters/translators for the U.S. Government, U.S. Forces Afghanistan, International Security Assistance Force, or Resolute Support; (2) Afghans who work or worked for a U.S. Government-funded program or project in Afghanistan, supported through a U.S. Government grant or cooperative agreement; and (3) Afghans who are or were employed in Afghanistan by a U.S.-based media organization or NGO.

are granted refugee status are admitted to the United States as refugees, and are counted separately in (vii) above.

METHODOLOGY: For the purposes of this report, data on P-1 and P-2 refugee referrals were based on data from the DOS Bureau of Population, Refugees, and Migration case management system and other P-1/P-2 lists as matched by DOS's Center for Analytics against CBP person-level entry records and DOS person-level evacuee records.

(x) The number of Afghan evacuee P-2 refugee referrals: **3,511**.

See the **NOTES** and **METHODOLOGY** sections for P-1 refugee referrals.

(xi) The number of Afghan evacuees who have been relocated from the United States to a third country (with countries to which they were relocated identified): **484**.

Data include 16 Afghan evacuees relocated by the International Organization for Migration (IOM) to Australia, 465 Afghan evacuees relocated by IOM to Canada, one additional Afghan evacuee relocated to Canada by IOM in coordination with CBP, one Afghan evacuee who voluntarily withdrew his application for admission to the United States and was relocated to Qatar for onward travel to Turkey, and one Afghan evacuee who voluntarily withdrew his application for admission to the United States and relocated to Qatar for onward travel to another destination.

NOTES: For the purposes of this report, the data are limited to persons who have been relocated permanently to a third country. Data on the 16 IOM relocations to Australia and the 465 relocations to Canada are valid as of March 31, 2022, and represent individuals arriving at their final destination between September 7, 2021 and March 31, 2022. These relocations involved Afghan evacuees who had a nexus to Canada or Australia and who were funded by the countries to which the evacuees were relocated, not by the U.S. Government.

Data on the Afghan evacuee who was relocated to Canada by IOM in coordination with CBP was provided by CBP on December 31, 2021, and remained valid as of March 31, 2022.

Data on the Afghan evacuee who withdrew his application for admission and was relocated for onward travel to Turkey was provided by CBP on December 31, 2021, and remained valid as of March 31, 2022.

Data on the additional Afghan evacuee who withdrew his application for admission and was relocated to Qatar for onward travel was provided by CBP on December 31, 2021, and remained valid as of March 31, 2022.

METHODOLOGY: Subject-level data on IOM relocations were provided by IOM through DOS and include confirmed arrivals in Canada and Australia by location and date. Data on DHS withdrawals of application for admission were provided by U.S. Immigration and Customs Enforcement (ICE) and CBP.

(xii) The number of Afghan evacuees who do not fall into any of the above categories: **36,783**.

NOTES: CBP granted humanitarian parole, on a case-by-case basis, to the majority of Afghan evacuees who entered the United States at a U.S. port of entry (see § 2503(b)(1)(C) below). Evacuees who were not identified within any of the above categories include:

- Afghan evacuees who are family members of American citizens or LPRs and who lacked a valid immigrant or nonimmigrant visa;
- Afghan evacuee family members of SIV holders, SIV applicants, and P-1 or P-2 refugee referrals who were not included as derivatives of the principal applicant, including extended family members;
- Afghan evacuees who are eligible to apply for the SIV program but who had not applied yet and have not been identified yet by a department or agency as being eligible to apply for the SIV program; and
- Afghan evacuees who would be eligible for a P-1 or P-2 refugee referral, including those who lack the time-in-service requirement for the Afghan SIV program, but who are not being referred because they now are located in the United States or because they have not been identified by their associated department, agency, or outside organization.

METHODOLOGY: This category was calculated by identifying unique individuals in the combined datasets covering Afghan evacuees present in the United States, and Afghan evacuees located at a U.S. military facility in Qatar or the transit site in the United Arab Emirates who were not identified as belonging to any of the subsets of evacuees discussed above.

§ 2503(b)(1)(B) Afghan evacuees at overseas U.S. military bases or other third country transit sites who have been flagged as potential security concerns or risks, or included on the U.S. no-fly list and who were therefore denied clearance to enter the United States

As of March 31, 2022, several hundred Afghan evacuees were prohibited from immediate onward travel to the United States to undergo additional screening and vetting outside of the United States. As of this date, 36 Afghan evacuees (along with 56 associated family members) still were undergoing additional screening and vetting outside of the United States prior to a final determination on whether they warrant clearance for onward travel to the United States. This multilayered and rigorous screening and vetting process is conducted by intelligence, law enforcement, and counterterrorism professionals at DHS, DOS, and the Department of Defense (DOD), the Federal Bureau of Investigation, the National Counterterrorism Center, and other Intelligence Community partners.

§ 2503(b)(1)(C) Afghan evacuees paroled into the United States

The number of Afghan evacuees who have been paroled into the United States: **73,566**.

The number of Afghan evacuees whose parole was terminated: **5**.
The number of Afghan evacuees whose parole has been extended: **0**.

NOTES: Parolee entry data are valid as of March 31, 2022, and cover the period from July 30, 2021 to March 31, 2022. OAW initial parole periods generally were granted for 2 years, so no Afghan evacuees have become eligible for an extension of their initial parole period.

Data on parole terminations are valid as of March 31, 2021. Those whose parole was terminated were placed into removal proceedings.

METHODOLOGY: Parolee entry data are based on CBP person-level entry records. Data on parolee terminations were provided by ICE.

§ 2503(b)(2) The number of Afghan evacuees who have been interviewed by USCIS in connection with an application or a petition for immigration benefits

The number of such interviews conducted since the United States withdrawal: **188**.
The rate at which individuals were granted or refused the benefits that formed the basis for such interviews: **31 granted, 1 denied, 1 administratively closed, 155 pending**.

The number of individuals who did not appear at a scheduled interview: **2**.

NOTES: Data are valid as of March 31, 2022.

METHODOLOGY: USCIS checked Afghan evacuee person-level identifiers provided by CBP against benefit application and case management data.

§ 2503(b)(2)(D) Description of the procedures for screening for and detecting child marriage, human trafficking, gender-based violence, and marriages entered into or relationships as fiancée or fiancé claimed for the sole purpose of securing evacuation

DHS law enforcement officials at U.S. ports of entry conduct screening and in-person interviews to detect potential concerns, including those related to child marriage, human trafficking, gender-based violence, and fraudulent marriages. The International Rescue Committee (IRC), with funding from DOS, provides training and counseling to its staff conducting resettlement placement and independent departures. The training and counseling help staff to identify and address potential concerns related to trafficking.

USCIS has developed best practices and educational materials (including screening tools, posters, and information sheets) for government personnel to use to identify human trafficking, forced marriage, and other forms of gender-based violence accurately and to address these forms of victimization using a victim-centered approach. USCIS updated its [Information for Afghans](#)

[website](#)⁶ to include a Resources for Victims of Abuse, Violence or Exploitation accordion, aimed at providing stakeholders with key Gender-Based Violence definitions and resources. USCIS also updated its [USCIS Forced Marriage website](#)⁷ to provide the humanitarian immigration options available to victims of forced marriage, and its Information Sheet for Afghan Parolees Departing Safe Havens (Appendix B) provides all Afghan evacuees with an overview of gender-based violence, their legal rights in the United States, and resources for individuals at risk of gender-based violence. In consultation with the DHS Office for Civil Rights and Civil Liberties, the UCG also developed training materials that include guidance on gender-based violence, human trafficking, and forced marriage. These materials were provided to all military installations temporarily housing Afghan evacuees across the United States, known as “safe havens.” USCIS and UCG training materials were translated into Dari and Pashto. USCIS continues to engage with NGO colleagues as questions arise.

Protection of and case management for vulnerable individuals was a key component of the behavioral health support services funded by the Department of Health and Human Services’ (HHS) Office of Refugee Resettlement (ORR) and implemented jointly by the grantees. Program staff at safe havens were trained in identifying abuse and reporting requirements. When staff identified potential instances of gender-based violence, local processes were in place to elevate these issues to the ORR, to ICE Homeland Security Investigations, DOS, and the U.S. Agency for International Development for further review and potential investigation by law enforcement. When these issues were identified, they were also referred to onsite IRC staff for further assessment. In December 2021, the UCG’s Gender and Vulnerable Populations Protection Advisory Group issued a national “Guidance on Gender and Vulnerable Populations Protection Standard Operating Procedures,” which included standards for key communication pathways and the standup of local protection working groups at each of the safe havens. Further, DOS has funded NGO personnel and has coordinated with private-sector legal organizations to give Afghan evacuees orientations on their immigration options and basic immigration counseling, which may include legal assistance to apply for asylum, U nonimmigrant status for qualifying victims of criminal activity (U visa) or T nonimmigrant status for qualifying victims of human trafficking (T visa), or a Violence Against Women Act self-petition, depending on the individual’s circumstances.

§ 2503(b)(3) Costs incurred and related source of funds for each federal department and agency involved in Operation Allies Welcome

For the purposes of this report, the data for this section is available for the following four federal departments: HHS, DHS, DOD, and DOS. Additional information, including information related to other federal departments and agencies, will be provided in the next edition of this report as available.

As of March 31, 2022, HHS has obligated a total of \$1,071,921,569.14 to support Afghan evacuees, using funds from the Administration for Children and Families’ Fiscal Year (FY) 2021 Emergency Security Supplemental Appropriation Act (P.L. 117-31), Division C of the Extending Government Funding and Delivering Emergency Assistance Act (P.L. 117-43), and FY 2022 Further Extending

⁶ <https://www.uscis.gov/humanitarian/information-for-afghan-nationals>

⁷ <https://www.uscis.gov/humanitarian/forced-marriage>

Government Funding Act (P.L. 117-70) appropriations; the Substance Abuse and Mental Health Services Administration's FY 2021 American Rescue Plan Act of 2021 (P.L. 117-2) appropriation; and the Centers for Disease Control and Prevention's FY 2021 Consolidated Appropriations Act (P.L. 116-260), and Division C of the Extending Government Funding and Emergency Assistance Act appropriations.

As of March 29, 2022, DHS has obligated a total of \$105,640,000, with funds from the Operations and Support Appropriation for the Countering Weapons of Mass Destruction Office, the Management Directorate, the Office of the Secretary and Executive Management, ICE, CBP, the Transportation Security Administration, the U.S. Coast Guard, the U.S. Secret Service, the Cybersecurity and Infrastructure Security Agency, the Federal Emergency Management Agency, the Federal Law Enforcement Training Centers, the Science and Technology Directorate, the Office of Intelligence and Analysis, the Office of Operations Coordination, and USCIS.

As of March 16, 2022, DOD obligated \$4.5 billion and expended \$2.8 billion of an available \$8.6 billion in nonmilitary personnel funds received in P.L. 117-31, division C of P.L. 117-43, division B of P.L. 117-70, and several reprogramming actions, to include funds reprogrammed to the Transportation Working Capital Fund for related transportation costs associated with the urgent evacuation response. In addition, DOD obligated \$223.8 million and expended \$198.3 million of an available \$312 million in military personnel funds received in Division B of P.L. 117-70.

DOS received \$312,900,000 in Emergencies in the Diplomatic and Consular Service supplemental appropriations to support OAW and related efforts, including additional relocations of individuals at risk because of the situation in Afghanistan. Of these, DOS has committed, obligated, and/or expended \$187,000,000 as of March 31, 2022, of which \$37,127,810 has been used to reimburse DOD by DOS for the cost of Kabul evacuation flights. DOS also received \$44,300,000 in a Diplomatic Programs supplemental appropriation, of which \$9,439,612 has been obligated or committed. Finally, as of March 31, 2022, DOS had obligated a total of \$1,356,500,512 from the President's Emergency Refugee and Migration Assistance Fund, which was authorized in support of OAW and related efforts by DOS, including additional relocations of individuals at risk as a result of the situation in Afghanistan and related expenses.

IV. Conclusion

This report provides the most complete and current data available to respond to the requirements of Section 2503 of P.L. 117-43. DHS will continue to work with its interagency partners to provide updated information about Afghan evacuees in future editions of this report.
