NOTES

Introduction

Conventions

This manual uses the following conventions:

"Device" and "Joya Touch A6" refer to the Joya Touch A6.

"Dock" refers to the Joya Touch Single Slot Dock Locking.

"3-Slot Cradle" refers to the Joya Touch 3-Slot Cradle.

The label artworks may be only a draft. Refer to the product labels for more precise information.

Product Presentation

The Datalogic Joya Touch A6 is a pocket-sized Android™ 6 powered mobile computer, available in two form factors. This compact, lightweight, and versatile device, combines fully integrated automatic data capture (2D barcode), a wireless charging system and wireless communication capabilities, supporting nearly any application. The Datalogic Joya Touch A6 system architecture is based on Qualcomm Snapdragon 210 platform and it was developed to meet the most demanding customer needs. A large quantity of on-board memory is available and it enables the user to adapt the terminal for any specific need. Thanks to its great ergonomics and the state of the art architecture, the Datalogic Joya Touch A6 is the right answer to enhance your business opportunities.

Available Models

The Datalogic Joya Touch A6 is available in different models depending on the features it is equipped with. All options are listed below.

EU models:

- 911350036 Joya Touch A6 Pistol-Grip, 802.11 a/b/g/n, BT 4, 2D Imager w/ white illum. & Green Spot, 4.3" Full Touch, VoIP, Presentation mode, Android6, 2GB RAM/16 GB Flash, Grey/Blue/Blue, EU - colors combination (upper case / battery cover / trigger).
- 311350037 Joya Touch A6 Handheld, 802.11 a/b/g/n, BT 4, 2D Imager w/ white illum. & Green Spot, 4.3" Full Touch, VoIP, Presentation mode, Android6, 2GB RAM/16 GB Flash, Grey/Blue, EU - colors combination (upper case / battery cover).
- 911350055 Joya Touch A6 Pistol-Grip, 802.11 a/b/g/n, BT 4, 2D Imager w/ white illum. & Green Spot, 4.3" Full Touch, VoIP, Presentation mode, Android6, 2GB RAM/16 GB Flash, Dark Grey/Orange/Orange, EU
- 911350056 Joya Touch A6 Handheld, 802.11 a/b/g/n, BT 4, 2D Imager w/ white illum. & Green Spot, 4.3" Full Touch, VoIP, Presentation mode, Android6, 2GB RAM/16 GB Flash, Dark Grey/Orange, EU
- 911350057 Joya Touch A6 Pistol-Grip, 802.11 a/b/g/n, BT 4, 2D Imager w/ white illum. & Green Spot, 4.3" Full Touch, VoIP, Presentation mode, Android6, 2GB RAM/16 GB Flash, White/Green/Green, HC, EU
- 911350058 Joya Touch A6 Handheld, 802.11 a/b/g/n, BT 4, 2D Imager w/ white illum. & Green Spot, 4.3" Full Touch,

VoIP, Presentation mode, Android6, 2GB RAM/16 GB Flash, White/Green, HC, EU

- 911350040 Joya Touch A6 Pistol-Grip, 802.11 a/b/g/n, BT 4, 2D Imager w/ red illum. & Green Spot, 4.3" Full Touch, VoIP, Presentation mode, Android6, 2GB RAM/16 GB Flash, Grey/Blue/Blue, EU
- 911350041 Joya Touch A6 Handheld, 802.11 a/b/g/n, BT 4, 2D Imager w/ red illum. & Green Spot, 4.3" Full Touch, VoIP, Presentation mode, Android6, 2GB RAM/16 GB Flash, Grey/Blue, EU
- 911350059 Joya Touch A6 Pistol-Grip, 802.11 a/b/g/n, BT 4, 2D Imager w/ red illum. & Green Spot, 4.3" Full Touch, VoIP, Presentation mode, Android6, 2GB RAM/16 GB Flash, Dark Grey/Orange/Orange, EU
- 911350060 Joya Touch A6 Handheld, 802.11 a/b/g/n, BT 4, 2D Imager w/ red illum. & Green Spot, 4.3" Full Touch, VoIP, Presentation mode, Android6, 2GB RAM/16 GB Flash, Dark Grey/Orange, EU

North America models:

- 911350061 Joya Touch A6 Pistol-Grip, 802.11 a/b/g/n, BT 4, 2D Imager w/ white illum. & Green Spot, 4.3" Full Touch, VoIP, Presentation mode, Android6, 2GB RAM/16 GB Flash, Grey/Blue/Blue, FCC
- 911350062 Joya Touch A6 Handheld, 802.11 a/b/g/n, BT 4, 2D Imager w/ white illum. & Green Spot, 4.3" Full Touch, VoIP, Presentation mode, Android6, 2GB RAM/16 GB Flash, Grey/Blue, FCC
- 911350063 Joya Touch A6 Pistol-Grip, 802.11 a/b/g/n, BT 4, 2D Imager w/ white illum. & Green Spot, 4.3" Full Touch, VoIP,

Presentation mode, Android6, 2GB RAM/16 GB Flash, Dark Grey/Orange/Orange, FCC

- 911350064 Joya Touch A6 Handheld, 802.11 a/b/g/n, BT 4, 2D Imager w/ white illum. & Green Spot, 4.3" Full Touch, VoIP, Presentation mode, Android6, 2GB RAM/16 GB Flash, Dark Grey/Orange, FCC
- 911350065 Joya Touch A6 Pistol-Grip, 802.11 a/b/g/n, BT 4, 2D Imager w/ white illum. & Green Spot, 4.3" Full Touch, VoIP, Presentation mode, Android6, 2GB RAM/16 GB Flash, White/Green/Green, HC, FCC
- 911350066 Joya Touch A6 Handheld, 802.11 a/b/g/n, BT 4, 2D Imager w/ white illum. & Green Spot, 4.3" Full Touch, VoIP, Presentation mode, Android6, 2GB RAM/16 GB Flash, White/Green, HC, FCC
- 911350067 Joya Touch A6 Pistol-Grip, 802.11 a/b/g/n, BT 4, 2D Imager w/ red illum. & Green Spot, 4.3" Full Touch, VoIP, Presentation mode, Android6, 2GB RAM/16 GB Flash, Grey/Blue/Blue, FCC
- 911350068 Joya Touch A6 Handheld, 802.11 a/b/g/n, BT 4, 2D Imager w/ red illum. & Green Spot, 4.3" Full Touch, VoIP, Presentation mode, Android6, 2GB RAM/16 GB Flash, Grey/Blue, FCC
- 911350069 Joya Touch A6 Pistol-Grip, 802.11 a/b/g/n, BT 4, 2D Imager w/ red illum. & Green Spot, 4.3" Full Touch, VoIP, Presentation mode, Android6, 2GB RAM/16 GB Flash, Dark Grey/Orange/Orange, FCC
- 911350070 Joya Touch A6 Handheld, 802.11 a/b/g/n, BT 4, 2D Imager w/ red illum. & Green Spot, 4.3" Full Touch, VoIP, Presentation mode, Android6, 2GB RAM/16 GB Flash, Dark Grey/Orange, FCC

For further details about the Datalogic Joya Touch A6 models refer to the web site: www.datalogic.com.

Out of the Box

The Joya Touch A6 package contains:

- Joya Touch A6 (device)
- Rechargeable battery
- Quick Start Guide
- Safety & Regulatory Addendum

Remove all the components from their packaging; check their integrity and compare them with all the packing documents.

CAUTION

Keep the original packaging for use when sending products to the technical assistance center. Damage caused by improper packaging is not covered under the warranty.

**CAUTION**

Do not apply any sticker to the Joya Touch A6 (see the picture below).

Accessories

Cradles

- 91ACC0043 Joya Touch 3-Slot Cradle for Wall Mounting; requires power supply, line cord and wall bracket.
- 91ACC0069 Joya Touch 3-Slot Cradle for General Purpose. It contains 1 unlocking key and 1 pair of desktop feet; requires power supply and line cord.
- 91ACC0072 Joya Touch Single slot cradle, locking (light gray); requires a power supply (91ACC0048) and line cord.
- 91ACC0073 Joya Touch Single slot cradle, charge only (light gray); power supply and line cord included.

Cradles Accessories

- 91ACC0045 Joya Touch Cradle Unlock Key (5 PCS).
- 91ACC0048 Joya Touch 3-Slot Cradle and Single Slot Dock Power Supply; requires line cord (for 3-SC powers up to 2 cradles in standard charge mode and 1 cradle in fast charge mode).
- 91ACC0049 Joya Touch 3-Slot Cradle Power Jumper to connect a second 3-slot cradle to a single power supply (5 pcs).
- 91ACC0050 Joya Touch 3-Slot Cradle Wall Bracket; supports both mounting orientations.
- 91ACC0068 Joya Touch 3-Slot Cradle Desktop Feet (1 pair to retrofit wall mount cradle).

Batteries

- 91ACC0055 Joya Touch Battery (1 pc).

Cables

94A051968	Cable, MicroUSB, client.
95ACC1113	Power cord, 3-PIN IEC C13, USA.
95ACC1213	Power cord, 3-PIN IEC C13, UK.
95A051041	Power cord, 3-PIN IEC C13, EU.
95ACC1215	Power cord, 3-PIN IEC C13, Australia.

Various

91ACC0036	Lanyard, Joya Touch (5 pcs).
91ACC0046	Joya Touch Screen Protectors, anti-fingerprint, transparent border (5 pcs).
91ACC0079	Joya Touch Handheld Rubber Boot (for WEC7 models and A6 models).
91ACC0085	Joya Touch Pistol Grip Rubber Boot (for WEC7 models and A6 models).
91ACC0080	Joya Touch Belt Holster.
91ACC0047	Joya Touch Trolley Holder (60 pcs) – for both handheld and pistol grip.
91ACC0086	Joya Touch Trolley Holder (60 pcs) – pistol grip only, display orientation 45 degrees.

Use only Datalogic-approved power supply and cables. Use of an alternative power supply will invalidate any approval given to this device and may be dangerous.

NOTES

Battery

Install the Battery

To install the battery pack, follow the steps below:

1. Unscrew the battery cover and remove it:

Handheld Models

Pistol Grip Models

2. Connect the battery contacts to the battery clip located in the battery slot:

Handheld Models

Pistol Grip Models

3. Insert the battery pack into the slot as shown in the figures below:

Handheld Models

Pistol Grip Models

4. Insert the battery cover and fix the screws:

Handheld Models

Pistol Grip Models

Required torque of the screws is 35 Ncm.

Charge the Battery

The Joya Touch A6 battery pack is not initially fully charged. After installing the battery, charge it with the single slot dock locking, the single slot dock charge only, the 3-slot cradle or a USB cable.

Charge with the Single Slot Dock Locking

To prevent the risk of short-circuiting, first plug the power cord into the power connector on the back of the dock, then connect the power cord to the power supply.

Use only the Datalogic power supply 91ACC0048 to power the Joya Touch Single Slot Dock Locking. The Single Slot Dock Locking cannot be daisy-chained to a Joya Touch 3-Slot Cradle.

NOTE

Insert the device into the dock with the screen facing front and the head facing down.

NOTE

For further information on the Joya Touch Single Slot Dock Locking, refer to the Single Slot Dock Locking Quick Start Guide, included in the dock's box.

Charge with the Single Slot Dock Charge Only

To prevent the risk of short-circuiting, first plug the power supply into the power jack on the back of the dock, then plug the power supply into a power outlet.

CAUTION

Use only the Datalogic power supply included in the box to power the Joya Touch Single Slot Dock Charge Only.

NOTE

Insert the device into the dock with the screen facing front and the head facing down.

Charge with the 3-Slot Cradle

There are two options to connect the cradle to the power supply: fast charge and standard charge.

Fast Charge

The fast charge connection allows to power one cradle with one power supply.

Plug the power supply cable into the power connector on the back of the cradle, then plug the power supply into the AC/DC plug using a Datalogic power cable.

Please see below an example of how to insert the power supply cable through the wall mounting metal bracket:

High Visibility

High Density

Standard Charge

The standard charge connection allows to power two cradles with one power supply. To connect a second cradle use the Joya Touch Cradle Power Jumper, available as optional accessory (P/N 91ACC0049).

1. Connect the first cradle to the second cradle using the power jumper.
2. Connect the power supply to the first cradle.

3. Plug the power supply into the AC/DC plug using a Datalogic power cable.

CAUTION

Use only the Datalogic power supply 91ACC0048 to power the Joya Touch 3-Slot Cradle.

NOTE

Insert the device into the dock with the screen facing front and the head facing down.

NOTE

Under the same conditions, the fast charge connection can charge the battery up to twice as fast as the standard charge connection.

NOTE

For further information on the Joya Touch 3-Slot Cradle, refer to the Joya Touch 3-Slot Cradle Quick Start Guide, included in the cradle's box, and to the Joya Touch 3-Slot Cradle Installation Guide, downloadable from our website www.datalogic.com.

Do not put any foreign object such as, but not limited to, coins, paper clips, stickers inside the slot of any of the docks (see the examples below).

Charge with USB

Use the Datalogic micro-USB power supply (p/n 94ACC1380) to charge the terminal from a power outlet.

Battery Information

By default, the main battery pack is disconnected at the factory to avoid damage due to excessive draining.

Rechargeable battery pack is less than half of full charge when delivered.

The battery pack autonomy varies according to many factors, such as the frequency of barcode scanning, RF usage, battery life, storage, environmental conditions, etc.

Close to the limits of the working temperature, some battery performance degradation may occur.

The Joya Touch A6 should be charged at an ambient temperature between 0 - 35° C (32 to 95°F) to achieve the maximum charging rate.

Never charge the device battery in a closed space where excessive heat can build up.

As a safety precaution, the battery may stop charging to avoid overheating.

The Joya Touch A6 may get warm during charging; this is normal and does not mean a malfunction.

Even if the storage temperature range is wider, it is recommended to store the terminal and the batteries at environmental temperature, in order to achieve the longest battery life.

The Joya Touch A6 gets warm during charging. This is normal and does not mean a malfunction.

Avoid storing batteries for long periods in a state of full charge or very low charge.

We recommend charging the battery pack every two to three months to keep its charge at a moderate level to maximize battery life.

Annual replacement of rechargeable battery pack avoids possible risks or abnormalities and ensures maximum performance.

Do not incinerate, disassemble, short terminals, or expose to high temperature. Risk of fire and explosion. Use specified charger only. Risk of explosion if the battery is replaced by an incorrect type. Dispose of batteries as required by local authorities.

Use only Datalogic approved batteries and accessories for battery charging.

Risk of explosion if battery is replaced by an incorrect type.

Dispose of used batteries according to the instructions.

Il y a risque d'explosion si la batterie est remplacée par une batterie de type incorrect.

Mettre au rebut les batteries usagées conformément aux instructions.

Battery Safety Guidelines

Installing, charging and/or any other action should be done by authorized personnel and following this manual.

The battery pack may get hot, explode, ignite, and/or cause serious injury if exposed to abusive conditions.

If the battery pack is replaced with an improper type, there is risk of explosion.

Do not place the battery pack in or near a fire or other heat source; do not place the battery pack in direct sunlight, or use or store the battery pack inside unventilated areas in hot weather; do not place the battery pack in microwave ovens, in clothes dryers, in high pressure containers, on induction cook surfaces or similar devices. Doing so may cause the battery pack to generate heat, explode or ignite. Using the battery pack in this manner may also result in a loss of performance and a shortened life expectancy.

To power the cradle, use only a Datalogic approved power supply. The use of an alternative power supply will void the product warranty, may cause product damage and may cause heat, an explosion, or fire.

The area in which the units are charged should be clear of debris and combustible materials or chemicals.

Do not use the battery pack of this terminal to power devices other than this device.

WARNING

Immediately discontinue use of the battery pack if, while using, charging or storing the battery pack, the battery pack emits an unusual smell, feels hot, changes color or shape, or appears abnormal in any other way.

Do not short-circuit the battery pack contacts connecting the positive terminal and negative terminal. This might happen, for example, when you carry a spare battery pack in your pocket or purse; accidental short-circuiting can occur when a metallic object such as a coin, clip, or pen causes direct connection of the contacts of the battery pack (these look like metal strips on the battery pack). Short-circuiting the terminals may damage the battery pack or the connecting object.

Do not apply voltages to the battery pack contacts.

Do not pierce the battery pack with nails, strike it with a hammer, step on it or otherwise subject it to strong impacts, pressures, or shocks.

Do not disassemble or modify (i.e. bend, crush or deform) the battery pack. The battery pack contains safety and protection devices, which, if damaged, may cause the battery pack to generate heat, explode or ignite.

In case of leakage of liquid from the battery, avoid contact with liquid the skin or eyes. If the contact occurs, immediately wash the affected area with water and consult a doctor.

Do not solder directly onto the battery pack.

Do not expose the battery pack to liquids.

**WARNING**

Avoid any knocks or excessive vibrations. If the device or the battery is dropped, especially on a hard surface, you should take it to the nearest Authorised Repair Centre for inspection before continuing to use it.

If your device stops working for any reason, do not use its battery on other electronic devices without a prior check and approval by an Authorised Repair Centre.

Do not replace the battery pack when the device is turned on.

Do not remove or damage the battery pack's label.

Do not use the battery pack if it is damaged in any part.

Battery pack usage by children should be supervised.

Collect and recycle waste batteries separately from the device in compliance with European Directive 2006/66/EC, 2011/65, 2002/96/EC and subsequent modifications, with US and China regulatory laws and regulations about the environment.

NOTES

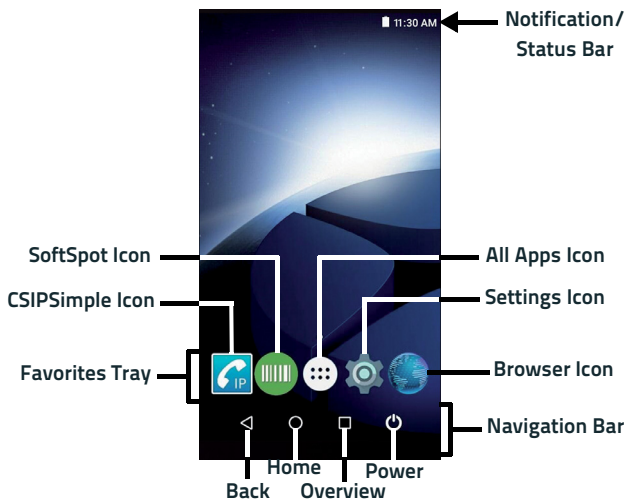

Getting Started

Turn on the Device

To turn on the Joya Touch A6, press and hold the Scan Key or the Scan Trigger (for Pistol Grip models) for at least 4 seconds.

Home Screen

Home Screen Items

Notification/ Status Bar	Displays the time, status icons (right side), and notification icons (left side).
Favorites Tray	It is like a dock for your home screen. By default, it includes commonly used apps, but you can customize it.
CSIPSimple Icon	Launch the CSIPSimple App
SoftSpot Icon	Launch the SoftSpot application.
All Apps Icon	Opens the Apps window. Tap it to view the Apps loaded on your device.
Settings Icon	Opens the Settings.
Browser Icon	Opens the Browser application.
Back Button	Returns you to the previous page.
Home Button	Returns you to the home page.
Overview Button	Shows the list of recent applications.
Power Button	Shows the Power Menu (see "Power Menu" on page -34).

Status Bar Icons

	Wi-Fi is on.
	Wi-Fi not connected.
	Wi-Fi connected no internet.
	Connected to a Wi-Fi network.
	Bluetooth is on.
	Battery is low.
	External power source is connected.
	Battery is full.
	Battery is partially drained.
	Airplane mode.
	Vibrate mode.
	SD storage.

Customize the Home Screen

Application shortcuts placed on the Home screen allow quick and easy access to applications. Widgets are self-contained applications placed on the Home screen to access frequently used features.

The user can add application icons, shortcuts, widgets and other items to any part of the Home screen where there is free space.

To add an application shortcut:

1. Tap the **All Apps** icon.
2. Tap and hold the app icon you want to add until the home screen appears.
3. Drag and drop the icon into position on the home screen panel or in an open spot in the Favorites tray.

To add a widget:

1. On a home screen, long tap on an empty area to go to the screen where you can customise your home screen.
2. Tap the Widget icon.
3. Tap and hold the item you want to add until the home screen appears.
4. Drag and drop the widget into position on the home screen panel.

To create a folder:

Drag and drop an application icon on top of another icon.

Tap the folder.

Tap the title area and enter a folder name using the keyboard.

1. Tap anywhere on the home screen to close the folder. The folder name appears under the folder.

To delete items:

2. Tap and hold the shortcut, widget or folder until it floats on the screen.
3. Drag the item to "**X Remove**" at the top of the screen.

Power Menu

Tap the **Power** button on the Navigation Bar to display the Power Menu.

Alternatively, you can access the Power Menu by pressing the power key on the back of the device with a metallic clip:

Suspend

Select **Suspend** to turn the screen off and lock the terminal in order to save battery power. Also, the Joya Touch A6 automatically enters suspend mode when inactive for a programmed period of time. To set the timeout limit, see [Suspend Timeout on page 88](#).

To wake the device from suspend, press the Scan Key or the Scan Trigger (for Pistol Grip models).

To unlock the home screen, tap anywhere on the screen and drag your finger upward.

Power Off

Select **Power Off** to turn off the terminal. When you turn off the terminal, the session you are working on expires and it won't be possible to restore it.

Alternatively, you can shut down the device by pressing and holding the power key with a metallic clip for about 10 seconds:

Reboot

Select **Reboot** to perform a Soft Reset (see [Soft Reset on page 49](#)).

Ship Mode

Select **Ship Mode** to perform a complete shutdown of the device, after which the battery will be detached.

In the battery pack, undesired current consumption is reduced during a shipping period to extend the charge keeping time of the battery pack.

After this operation, the date and time settings will be lost.

To restart the device, connect it to a power supply or insert it into a dock.

Long Press Power Menu

Long press the **Power** button on the Navigation Bar until the Long Press Power Menu displays.

Take Screenshot

Select **Take Screenshot** to capture a screenshot of the current screen.

Adjust Volume

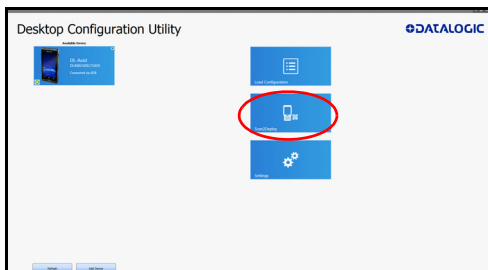

Select **Adjust Volume** to adjust the volume.

Pair Device

Select **Pair device** to start a pairing session with a PC via DXU software. DXU is the Datalogic system application for device configuration and firmware upgrade from a Windows PC. (see [Desktop Configuration Utility \(DXU\)](#) on page 128 for further information).

Starts a pairing with DXU by reading a barcode containing the configuration data of your PC.

Open DXU on your PC and tap **Scan2Deploy**:

From the **Wi-Fi Configuration** window you can select the barcode type and set the Wi-Fi and pairing configuration data.

Tap **Print** to create the barcode; tap **Save** to save it on your hard disk:

If you select **Print**, the barcode displays on the screen:

From the Joya Touch A6's Long Press Power Menu, select **Pair device**. Tap **Scan** to read the barcode:

Quick Settings Menu

You can use this menu to toggle settings such as Wi-Fi, Bluetooth, auto-rotation and more.

To display the Quick Settings Menu, drag your finger twice from the top of your screen downward.

Applications

The **All Apps** screen displays icons for all installed applications. The table below lists the default applications installed on the Joya Touch A6.

Icon	Description
	Amaze - Material Design file manager for Android devices. For more details, refer to the following link: https://github.com/TeamAmaze/AmazeFileManager .
	Avalanche - Enables rapid deployment and central management of Joya Touch A6 installations (see Avalanche on page 211).
	Browser - Use to access the Internet or intranet.
	Calculator - Provides the basic and scientific arithmetic functions.
	Calendar - Use to manage events and appointments.
	Clock - Use to schedule alarms for appointments or as a wake-up.
	Contacts - Use to manage contact information.
	CSipSimple - Voice over Internet Protocol (VoIP) application for Google Android operating system using the Session Initiation Protocol (SIP). See CSIPSimple on page 211 .

Icon	Description
	DL Battery Manager - Provides information on the battery type, charge, status and temperature, allows to set the charging profile and to log battery data (see DL Battery Manager on page 109).
	DL Cradle Manager - Provides information on the cradle (see DL Cradle Manager on page 122).
	DL Ringtone Editor - Allows to create your own ringtones and notifications.
	DL Stager - Configuration tool (see DL Stager on page 127).
	Downloads - Lists all downloaded files.
	DXU Agent - Launch to start a pairing with DXU by reading a barcode containing the configuration data of your PC (see Desktop Configuration Utility (DXU) on page 128).
	Email - Use to send and receive email.
	Enterprise Agent- Enhances the lockdown functionalities of SureLock and SureFox to ensure advanced device security (see SureLock on page 211 and SureFox on page 212).
	Gallery - Use to view photos stored on the internal storage memory.
	Led Effects Editor - Allows to create and store LED effects (see Led Effects Editor on page 193).

Icon	Description
	MobiControl - An enterprise mobility management solution that secures and manages the Joya Touch A6 and controls all aspects of business mobility (see MobiControl on page 213)
	Music - Play music stored on the internal storage memory.
	Notes - Create text notes.
	Profile Manager - Use to set, edit or create a usage profile.
	ProximityCalibrate - Allows to calibrate the proximity sensor (see ProximityCalibrate on page 195).
	Scan2Deploy – Use to pair device (see Pair Device on page 37).
	Scanner – Enables data capture (see Data Capture on page 215).
	Settings - Use to configure the Joya Touch A6 (see Settings on page 53).
	SoftSpot - A configurable application meant to provide easy access to frequently used functionalities (see SoftSpot™ on page 196).
	Sound Recorder - Use to record audio.

Icon	Description
 The icon for SureFox is a blue square with rounded corners. It features the word "SureFox" in a white, sans-serif font. The "F" is larger and more prominent, and there is a small white fox head silhouette to the right of the text.	SureFox - Use to controls web access for the users (see SureFox on page 212).
 The icon for SureLock is a black square with rounded corners. It features the word "SureLock" in a white, sans-serif font. The "L" is larger and more prominent, and there is a small white keyhole silhouette to the right of the text.	SureLock - Use to secure and lock your device (see Connections on page 219).
 The icon for Videos is a green square with rounded corners. It features a white play button symbol (a right-pointing triangle) in the center.	Videos - Play videos stored on the internal storage memory.

Touch Gestures

Tap	Tap the screen with your finger or with the stylus to open items and select options.
Drag	Hold your finger or the stylus on the screen and drag across the screen to scroll or pan. Drag in a list to select multiple items.
Tap-and-hold	Tap and hold your finger or the stylus on an item to see a list of actions available for that item. On the pop-up menu that appears, tap the action you want to perform.

Using the Stylus Pen

The stylus selects items and enters information. It functions as a mouse. Pen input is disabled by default. Tap the **Stylus** icon on the Quick Settings Menu to enable it (see "Quick Settings Menu" on page -40).

The stylus tip size must be minimum 4 mm.

To prevent damage to the screen, do not use sharp devices or any device other than your finger or a touch screen stylus.

Do not apply not necessary high pressures on the screen.

For applications where an intensive use of the touch screen is foreseen, please consider that touch screen components are subject to progressive wear.

Resetting the Device

Configuration Reset

Configuration reset sets the configuration of the device (all its settings) to a known status: the factory status or an enterprise-user-defined status.

Network Settings Reset

Resets all network settings.

1. Tap **Settings** > **Backup & reset**.
2. Tap **Network settings reset**
3. Tap **RESET SETTINGS**.

Factory Data Reset

Brings the device to the default configuration, clearing your device's internal storage and all the user-customized settings.

1. Tap **Settings > Backup & reset**.
2. Tap **Factory data reset**
3. Tap **RESET PHONE**.

Enterprise Reset

Enterprise Reset brings the device to an enterprise-user-defined configuration, clearing all data and settings except the ones persisted by the enterprise system applications in the **enterprise** flash partition and in the **splash** flash partition.

The Enterprise folder is a file system storage that is used for deployment and device-unique data. It is persistent and maintains data after an Enterprise reset. Applications and custom settings (i.e. custom boot animation and wallpaper) can persist data after an Enterprise Reset by saving them to the enterprise folder.

1. Tap **Settings >Backup & reset**.
2. Tap **Enterprise reset**
3. Tap **RESET PHONE**.

Device Reset

Device reset restarts the device.

Soft Reset

Restarts Android Operative System through an Android API function. It is generally used when some applications stop responding, or it is automatically issued by Android after a Configuration reset.

1. Press the **Power** button.

2. Tap **Reboot**.
3. The device shuts down and then reboots.

Hard Reset

Restarts the device resetting all the hardware components. This procedure guarantees the safe reboot of the device in any condition, without causing damage to the device and without data loss. It is generally used when the device stops responding or after a critical failure that compromises its usability.

To perform a hard reset, do the following steps:

1. Perform a full shutdown by pressing and holding the power key with a metallic clip for about 15 seconds. After clip release, the left and right LEDs will blink once simultaneously to confirm the correct shutdown (see "LED Indicators" on page -51).

2. Press the Scan Key or the Scan Trigger to restart the device.

After a hard reset, the date and time settings will be lost.

LED Indicators

The LEDs illuminate to indicate various functions or errors on the reader. Joya Touch A6 LEDs are fully customizable through the SDK, the **Settings** app or the **Led Effects Editor** app. See "Led Notifications" on page -63 and "Led Effects Editor" on page -193 for more details.

The following table lists the default indicators.

LED	Default Status
Left and Right LEDs 	The two LEDs blink alternately in case of critical charge (the device is charging, but the battery level is too low to turn on).
	The two LEDs blink once simultaneously after a full shutdown.
Bottom LED (Good Red) 	Illuminates when a good decode is completed.

Magnetic Sensor Calibration

Joya Touch A6 is a compass-enabled device. Its magnetic sensor allows you to use any compass application to determine north and south and display cardinal directions, no matter which orientation the phone is in.

To calibrate the magnetic sensor, hold the device in front of you and wave it through the air in a figure 8 pattern as shown in the picture below:

Settings

Overview

The **Settings** app allows you to set system parameters to customize your device. Tap the **Settings** icon on the **Favorites Tray** or on the **All Apps** screen to open the **Settings** screen.

Wi-Fi Settings

Connect to Wi-Fi Network

1. To turn on the Wi-Fi, tap **Settings** > **Wi-Fi** and switch right to the **On** position. The Joya Touch A6 scans for available Wi-Fi networks within range and lists them. If the device finds a network that you connected to previously, it will connect to it automatically. Secured networks are indicated with a lock icon.

2. Select the network name you want to connect to from the available network list.
3. If the network is open, tap the profile and then tap **Connect**, or press and hold and then select **Connect to network**:

4. If the network is secured, a dialog box appears requesting information relevant to the network security protocol (e.g., password, key, or certificate). Enter the required information, then tap **Connect**:

Add a Wi-Fi Network

1. Tap **Settings** > **Wi-Fi** and verify that the Wi-Fi is turned on.
2. Tap the Menu icon at the right top of the screen and select **Add network**:

3. Enter the Network SSID (Wi-Fi network name). For secure Wi-Fi network connections, tap **None** under **Security**, and then select the type of security protocol required from the pop-up menu (e.g., WEP, WPA/WPA2 PSK or 802.1x/EAP). Enter any additional security information required by the type of security protocol selected.

4. Tap **Save**.

Bluetooth Settings

To create a Bluetooth® pairing between your device and another device that has Bluetooth® capabilities, ensure that the two devices are turned on, discoverable, and within close range.

Enable Bluetooth®

1. To turn on the Bluetooth®, tap **Settings > Bluetooth** and switch right to the **On** position. Once the Bluetooth® radio is enabled, the terminal automatically starts searching for discoverable devices.

Connect to Other Bluetooth® Devices

1. Tap **Settings** > **Bluetooth** to search for available Bluetooth® devices. Flick the list and select a device. The **Bluetooth pairing request** dialog box displays on the screen:

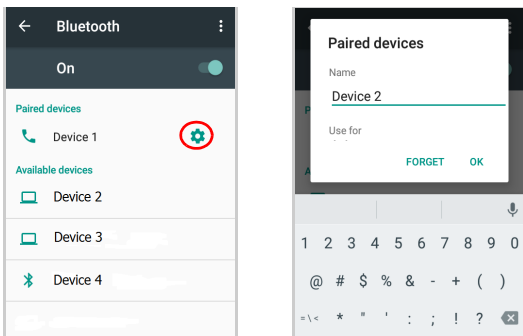

2. Make sure both devices show the same passkey and tap **Pair**.
3. The selected Bluetooth® device is added to the **Paired Devices** list and a paired connection is established.

Configure, Rename or Unpair Bluetooth@ Devices

Tap **Settings** > **Bluetooth**.

Select a device from the **Paired Devices** list and tap the settings icon next to its name. The **Paired devices** window displays on the screen. Type in the **Name** field to rename the paired device.

Tap **FORGET** to unpair:

To rename your device, tap the Menu icon at the right top of the screen and select **Rename this device**.

Tap **Rename** to confirm.

Sound & Notification

The **Sound & notification** window allows to set the volume and to change the notification, touch and other sound settings.

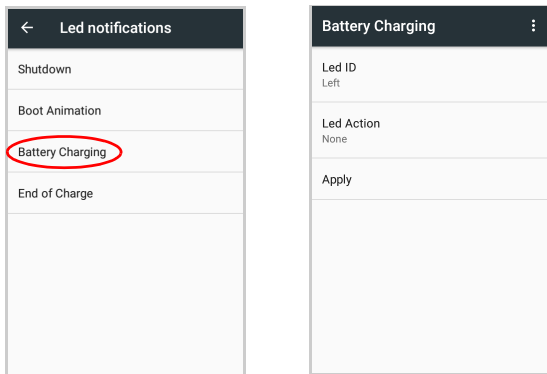

Tap **Settings > Sound & notification**.

Led Notifications

The **Led notification** settings allows to configure the LED indicators (see "LED Indicators" on page -51).

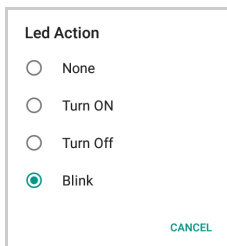

Tap **Settings** > **Led notifications**. The first window lists the events/states the LED should signal. Select the desired event.

Tap **Led ID** to select the LED you want to assign to the event.

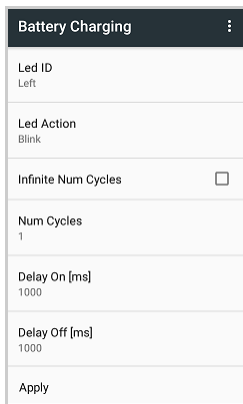

Tap **Led Action** to configure the LED behaviour.

A dialog box titled "Led Action" with four radio button options: "None", "Turn ON", "Turn Off", and "Blink". The "Blink" option is selected, indicated by a green dot. A "CANCEL" button is located at the bottom right of the dialog.

Use the **Blink** window to configure the blink frequency and duration:

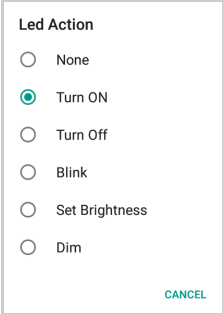

A settings window titled "Battery Charging" with a menu icon in the top right corner. It contains several settings:

- Led ID: Left
- Led Action: Blink
- Infinite Num Cycles:
- Num Cycles: 1
- Delay On [ms]: 1000
- Delay Off [ms]: 1000
- Apply

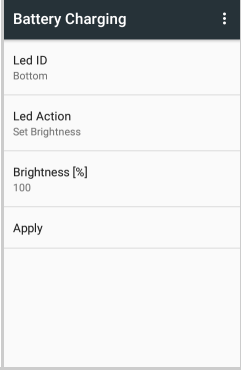

Tap **Apply** to confirm the settings.

If the **Bottom** LED is selected, the **Led Action** list will include two more options:

The screenshot shows a dialog box titled "Led Action". It contains a list of radio button options: "None", "Turn ON" (which is selected), "Turn Off", "Blink", "Set Brightness", and "Dim". A "CANCEL" button is located at the bottom right of the dialog.

Set Brightness allows to configure the LED's brightness.

The screenshot shows a settings screen titled "Battery Charging". It has a dark header with a three-dot menu icon. Below the header, there are several rows of settings: "Led ID" with the value "Bottom", "Led Action" with the value "Set Brightness", "Brightness [%]" with the value "100", and an "Apply" button at the bottom.

Tap **Apply** to confirm the settings.

Dim allows to adjust the LED's brightness through an editor. Select **Dim** and the tap **Dimming Sequence** to draw the dimming curve:

Tap **CONFIRM**.

Scanner Settings

Before you start reading barcodes, use the **Settings** app to view and configure all settings for the scanner.

From the applications menu, tap **Settings** > **Scanner Settings**. Select the desired configuration from the following options:

Notification

Use it to configure the good read tone and display notification:

Good Read Duration

Sets the duration of the notification (LED, green spot or beep) the scanner emits on a good read.

Good Read Interval

Sets the interval between each notification (LED, green spot or beep) the scanner emits on a good read.

Good Read Number

Sets the number of notifications (LED, green spot or beep) the scanner emits on a good read.

Enable Display Notification

Enables display notifications (toasts) and is enabled by default. If cleared, the scanner is disabled until you launch a scanner listener application developed using the Datalogic SDK or enable a keyboard/intent wedge.

Good Read Audio Mode

Sets the audio tone to:

- None
- Beep tone
- Audio file

If **Audio file** is selected, the option **Good read audio file** displays. Tap it to select the file you want to use as good read ringtone.

The Notification settings do not apply to an audio file.

Good Read Audio Volume

Sets the volume of beep tone or audio file (if enabled).

Good Read

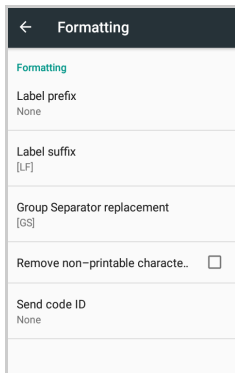

Use it to enable good read notifications (LED, Green Spot):

Tap **Enable good read** to enable/disable notifications (main enabler), then select the notification you want to use.

Formatting

Allows to format the barcode text by enabling and configuring the use of prefix, suffix, group separator and code identifier:

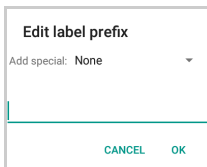

The screenshot shows a settings menu titled "Formatting" with a back arrow. It contains the following options:

- Formatting** (header)
- Label prefix**: None
- Label suffix**: [LF]
- Group Separator replacement**: [GS]
- Remove non-printable characte..**
- Send code ID**: None

Label Prefix

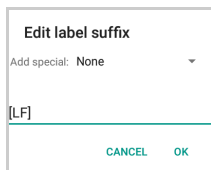

Tap **Label prefix** to enter the characters you will be using as prefix. Tap **Add special** to select a special character to be added in the current cursor position:

The screenshot shows a dialog box titled "Edit label prefix". It has a dropdown menu labeled "Add special: None" with a downward arrow. Below the dropdown is a text input field with a cursor. At the bottom, there are two buttons: "CANCEL" and "OK".

Label Suffix

Tap **Label suffix** to enter the characters you will be using as suffix. Tap **Add special** to select a special character to be added in the current cursor position:

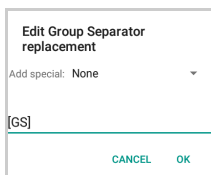

The screenshot shows a dialog box titled "Edit label suffix". At the top, it says "Add special: None" with a downward arrow. Below that, the text "[LF]" is displayed in a light blue font. At the bottom, there are two buttons: "CANCEL" and "OK", both in light blue text.

Group Separator Replacement

The Group Separator replacement is a non printable data separator character (ASCII code 1D hex). Tap **Group Separator replacement** to enter a string that will be used as GS data separator substituting the standard GS character.

Tap **Add special** to select a special character to be added in the current cursor position:

The screenshot shows a dialog box titled "Edit Group Separator replacement". At the top, it says "Add special: None" with a downward arrow. Below that, the text "[GS]" is displayed in a light blue font. At the bottom, there are two buttons: "CANCEL" and "OK", both in light blue text.

Remove Non-Printable Characters

Select it to remove non-printable characters from a unicode string.

Send Code ID

Tap **Send code ID** to add a code identifier prefix or suffix to the barcode string:

Send code ID

None

DLM identifier before

AIM identifier before

User defined identifier before

DLM identifier after

User defined identifier after

CANCEL

The AIM ID (Association for Automatic Identification and Mobility) is an international barcode identifier. When **AIM identifier before** is enabled, the AIM ID is inserted at the beginning of the decoded barcode.

DLM identifier is a Datalogic specific character identifier.

User defined identifier is a user specific character identifier you can set in the related symbology settings menu.

Scanner Options

Tap **Scanner Options** to customize the Joya Touch A6 scanning behavior.

Enable Picklist

If selected, it allows you to pick and decode a barcode from multiple barcodes printed close together, when the scan illumination intersects more than one barcode. Only the targeted barcode will be returned.

Enable Illumination

If selected, it causes the scanner to turn on the illumination to aid decoding.

Enable Aim

Enables the laser aim.

Target Mode

If enabled, when the scan button is pressed, the scanner will project an aiming pattern to assist in centering over the barcode before scanning. Tap **Target mode** to select the desired targeting behavior:

Target mode

No delay

Spot Timeout

Release Scan

CANCEL

No Delay

Target mode is disabled.

Spot Timeout

Scanning takes place after a programmable time upon pressing the scan button. Tap **Target timeout** to set the duration of the spot:

Target timeout

0.25 seconds

0.5 seconds

1 seconds

1.5 seconds

2 seconds

CANCEL

Release Scan

Scanning takes place after the scan button is released. Tap **Release scan timeout** to set the scanning timeout after releasing the scan button:

Decode Timeout

Drag the **Decode timeout** slider to set the maximum amount of time the scanner attempt to decode after target timeout (in case **Spot Timeout** is enabled) or after the scan button is pressed (in case **Target mode** is disabled):

Wedge

Use it to enable or disable the keyboard wedge and the intent wedge:

← Wedge

Keyboard wedge

Enable keyboard wedge
The captured data will be sent to the foreground application in the form of key events

Keyboard wedge only on focus
Send captured data in the form of key events only to the current text area with active keyboard input

Keyboard wedge input mode
Text injection

Intent wedge

Enable intent wedge
The captured data will be sent to an application in the form of an implicit Intent

Intent delivery mode
Broadcast intent

Intent action
com.datalogic.decodewedge.decode_action

Intent category
com.datalogic.decodewedge.decode_category

Intent extra barcode string
com.datalogic.decode.intentwedge.barcode_string

Intent extra barcode type
com.datalogic.decode.intentwedge.barcode_type

Intent extra barcode data
com.datalogic.decode.intentwedge.barcode_data

Web wedge

Enable web wedge
The captured data will be sent to the internet browsing application, in the form of a valid URL

Enable Keyboard Wedge

Enables/disables the keyboard wedge mode.

Keyboard Wedge Only on Focus

If selected, the scanner is enabled whenever a text area is in focus and can receive text.

It provides a safer way to input keystrokes into the foreground application, allowing to send captured data in the form of key events only to the current text area with active keyboard input.

If this setting is not enabled, keystrokes will be always dispatched to the foreground application.

Keyboard Wedge Input Mode

Allows to select the scanned data input mode.

Text Injection

The scanned barcode is injected into the text area.

Key Pressure

The scanned barcode is translated into keyboard strokes.

Enable Intent Wedge

Enables the broadcast of specific intents to the listening applications. The broadcasted intent can have its custom Action, Category and extra content fields. The scanner is enabled whenever the intent option is flagged.

Enable Web Wedge

Enables direct data input into internet browsing applications, in the form of a valid URL.

Symbology Settings

Each barcode symbology can be customized with additional settings that may affect that specific barcode decoding. Tap **Symbology settings** to configure symbology decoding options:

Refer to the sample symbology control panels for examples of the types of fields and options you can modify. The example below shows the settings of a Code 128 barcode symbology:

The screenshot shows a mobile application interface for configuring barcode decoder parameters. The title bar is dark grey with a white back arrow and the text 'Decoder parameters'. Below the title bar, the screen is divided into several sections. The first section is titled 'Code 128' in teal. It contains a single row with the label 'Enable' and a green checkmark icon. The second section is titled 'User ID' and contains the value 'K'. The third section is titled 'Length control' and contains the value 'Range'. The fourth section is titled 'L1 length' and contains the value '2'. The fifth section is titled 'L2 length' and contains the value '40'. The final section is titled 'GS1-128' in teal.

Decoder parameters	
Code 128	
Enable	<input checked="" type="checkbox"/>
User ID	K
Length control	Range
L1 length	2
L2 length	40
GS1-128	

Global Settings

Use this section to change symbologies settings globally and to persist them.

Global settings
Enable all symbologies Enables all supported symbologies
Disable all symbologies Disables all supported symbologies
Reset configuration Reset the decoding subsystem configuration
Commit Saves the configuration

Enable All Symbologies

Enables all barcode symbologies.

Disable All Symbologies

Disables all barcode symbologies.

Reset Configuration

Resets back to default scanner configuration settings.

Commit

Saves the configuration settings to a persistent storage. Any change you make is temporary and will be lost when the system restarts, unless you tap **Commit**.

Digimarc Watermak

All the red illumination models are pre-configured to read Digimarc watermarks. The function can ben disabled in the **Scanner Settings** screen.

System Upgrade

Allows you to upgrade your operative system to the latest version.

Local Upgrade

From the **Settings** menu, tap **System upgrade** > **Local upgrade**. Navigate the file system and select a pre-charged update package. Select the update package you want to install:

The following window displays on screen, showing information about the device and the update package components:

The **PROPERTIES** section shows information about the device model and OS version and the update package version.

The **FIRMWARE** section shows information about each single update component.

The **ACTIONS** section allows to:

- reset the device configuration after the update (see [Resetting the Device on page 46](#))
- force the update of all components, including those already updated.

Tap **Install Update**. The device will reboot and a success notification will be displayed. Tap the notification to display a report showing the installed update components:

System upgrade	
Main version	1.02.74.20170804
Android version	6.0.1
Partitions	
X-Loader	Unknown
Bootloader	1.02.48.20170804
Kernel	1.02.74.20170804
Recovery	

If the update fails, the screen will display a failure message and a report showing the reasons for failure.

**NOTE**

During the update, ensure that:

- battery level is at least **40%** in case of critical update (xloader, bootloader or recovery partition) and **20%** in case of any other update;

or

- the Joya Touch A6 is connected to a power source (USB or dock).

**NOTE**

Update is always done in recovery mode (see [Recovery Mode on page 86](#)).

Recovery Mode

Recovery is an independent, runtime environment that's included on a separate bootable partition from the main Android OS. It contains tools to help repair your installations as well as install official OS updates by using a combination of key presses. Its main purpose is to reset the device, wipe data or perform system updates when the system crashes and the screen is unresponsive.

To enter **Recovery Menu**:

1. Turn off the Joya Touch A6 (see [Getting Started on page 29](#)).
2. Press the Power key with a metallic clip and, immediately after, press the Scan Key.
3. The **Recovery Menu** displays on the screen:

4. Use the touch screen to navigate the menu. You can apply/force updates and perform a configuration reset. Press the Scan Key or the Scan Trigger to select.
5. Select **Reboot system now**. The device reboot is complete.

**NOTE**

In Recovery mode, you can only apply updates from external storage (see [Local Upgrade on page 82](#)).

Advanced Settings

Suspend Timeout

You have two options to set the suspend timeout (see [Suspend on page 35](#) for more information on Suspend Mode):

1. Tap **Settings > Advanced settings**:

- **Suspend on external power** sets the number of seconds without user input activity before the system is suspended while running on external power.

- **Suspend on internal battery** sets the number of seconds without user input activity before the system is suspended while running on battery power.

2. Tap **Settings** > **Display** > **Sleep** to set the number of seconds without user input activity before the system is suspended while running on either battery power or external power.

If you use the **Advanced settings** page to set the auto-suspend timeouts, then the **Display** page's **Sleep** control will display the **Suspend on external power** setting the next time you look in the **Display** page.

If you set the **Display** page's **Sleep** control to a new value, it will override both timeouts for external power and internal battery.

Charging Mode

Sets the battery level at which the device turns on automatically. The default value is 5%.

Wake-Up Configuration

The default wake-up source is the Scan Key. Tap **Settings** > **Advanced settings** > **Configure wake-up sources** to configure other wake-up sources. Possible wake-up buttons are front trigger (Scan Key), pistol trigger (Scan Trigger), auto-scan trigger and motion (see "Triggers" on page -99 for more details).

If **Motion** is selected, your device will wake-up as soon as it detects motion. Tap **Motion wake-up sensitivity** to configure the motion detector's sensitivity:

Input Configuration

Lock Keyboard Input

Select **Lock keyboard input** to lock user input from the keyboard. The following pop up window displays on screen asking for confirmation:

To unlock the keyboard, clear the **Lock keyboard input** check box.

Key Remapping

Tap **Key remapping** to remap an input key, then press the key you want to remap. You can remap the Front Trigger and the Pistol Trigger.

The following window displays on screen:

- **Scancode** represents the physical location of a keyboard key.
- **Keycode** represents the value that is mapped to a specific key.

Tap **Remap type** to select the remapping type:

Keypcode

Select **Keypcode** to map the selected key to a new function:

- Tap the second menu (default = **DISABLE KEY**) to select the new function you want to assign to the selected key.
- Tap the last menu (default = **None**) to add a modifier key (such as **Ctrl**, **Shift** or **Alt**).

Tap **ADD A NEW MAPPING**. A window displays showing the new keymap.

Unicode

Select **Unicode** to remap a key to display Unicode characters (such as symbol "\$"):

Press the Back Button on the navigation bar and then tap **ADD A NEW MAPPING**. A window displays showing the new keymap:

Start Activity

Select **Start activity** to remap a key to launch an application loaded on your device. Tap **SELECT APPLICATION**:

Select the desired application and then tap **ADD A NEW MAPPING**. A window displays showing the new keymap:

View All Remapped Keys

Tap **View all remapped keys** to display all remapped keys:

Swipe left to edit an entry. Swipe right to remove an entry and reset the key mapping back to default.

Triggers

Tap **Triggers** to enable/disable the trigger keys. The physical trigger (front and pistol) are enabled by default.

If **Auto Scan Trigger** is enabled, the device will automatically scan barcodes without a trigger being pressed.

Tap **Auto Scan Trigger Range** to select the maximum distance at which the device will automatically start scanning barcodes.

Accessibility

You can customize your Android device using accessibility settings.

Tap **Settings > Accessibility**:

Captions

Tap **Captions** and then tap the **ON/OFF** switch to turn on captions:

When captions are on, you can set the following options for closed captioning:

- **Language:** select the language in which you want captions to appear.
- **Text size:** select the size for your caption text.
- **Caption style:** select the style and color for your caption text and background.

Magnification Gestures

Tap **Magnification gestures** and then tap the **ON/OFF** switch to enable the magnification gestures. When this feature is turned on, you can zoom in and out by triple-tapping the screen.

While zoomed in, you can:

- **Pan:** drag two or more fingers across the screen.

- Adjust zoom levels: pinch two or more fingers together or spread them apart.

You can also temporarily magnify what's under your finger by triple-tapping and holding. In this magnified state, you can drag your finger to explore different parts of the screen. Lift your finger to return to your previous state.

Triple-tap for magnification works everywhere except the keyboard and the navigation bar.

Large Text

Select to increase the text size.

High Contrast Text

When enabled, this feature fixes the text color as either black or white, depending on the original text color, making text easier to read.

Power Button Ends Call

Not used.

Auto-Rotate Screen

When enabled, the screen automatically rotates when you move your phone between portrait mode and landscape mode.

Speak Passwords

This feature reads out passwords to you automatically to help fill them in correctly. If the check box is selected, password characters are announced audibly like any other typed characters. If is not selected, password characters are only audible via headset. (To protect your privacy, this setting is disabled by default.)

Accessibility Shortcut

Tap **Accessibility shortcut** and then tap the **ON/OFF** switch to enable accessibility features in two steps:

1. Press and hold the power button until you hear a sound.
2. Touch and hold two fingers until you hear audio confirmation.

If the device has multiple users, using this shortcut on the lock screen temporarily enables accessibility until the device is unlocked.

Text-to-Speech Output

Text to speech output converts language text into spoken synthetic speech. This means you are able to type in content and have it read back to you aloud and automatically.

Tap the setting icon next to the name of your preferred engine (Pico TTS) to change the language and the settings for your engine.

Tap **Speech rate** to select the speed at which text is spoken.

Tap **Listen to an example** to hear a short demonstration of speech synthesis.

The **Default language status** field displays the current status of your default language. The default language is the language selected in your preferred Text-to-speech engine.

Touch & Hold Delay

This feature lets you set the recognition time for tapping and holding the screen.

A longer touch and hold delay means that you need to keep your finger in the same place for longer before your touch becomes a touch and hold. If you find that you accidentally touch and hold when you intend to tap, consider choosing a longer delay.

Tap Touch & hold delay to adjust the amount of time before your touch on the screen becomes a touch and hold:

Color Inversion

When enabled, this feature exchanges color values. For example, black text on a white screen becomes white text on a black screen.

Color Correction

The color correction setting enables your device to compensate for color blindness. To enable or disable color correction, tap **Color correction** and set the switch to the on or off position.

To change the color correction mode, select **Correction mode**, then choose one of the following options:

Device Info

The **Device info** screen displays information about the terminal including: model number, Android OS version, open source licenses, baseband version, system versions, build number:

← Device info	
Status	Status of the battery, network, and other information
Factory	Factory configuration

Kernel version	1.02.74.20170804 3.10.49-g937c438-00003-gad1a7d7 jenkins@build1204 #1 Fri Aug 4 20:31:32 CEST 2017
Build number	1.02.74.20170804

Tap **Status** to display terminal information including battery, network, roaming, IP address, serial number.

Tap **Factory** to display information on factory configuration.

Tap **Legal information** > **Open source licenses** to display information on open source software licenses.

NOTES

Datalogic Applications

DL Battery Manager

This application provides information about the battery features and status, allows to configure the battery charging profile and to log battery data.

Tap **All Apps** > **DL Battery Manager** icon, then tap the menu icon on the top left corner of the screen, or swipe right to display the menu.

Battery Info

The **Battery Info** section provides information about the battery's health, capacity, manufacturer, level and charging status.

Battery Info - Realtime

This window provides real-time information about the battery.

Battery Info - Realtime	
100%	 Time To 0% 13h 13min
Status	Discharging
Source	None
Temperature	29.0 °C
Voltage	4276 mV
Current	-253 mA
Charge Left	2936 mAh

Discharge Mode

Battery Info - Realtime	
100%	 Time To 100% 0h 0min
Status	Charging
Source	USB
Temperature	29.1 °C
Voltage	4313 mV
Current	46 mA
Charge Left	2936 mAh

Charge Mode

The top section shows the battery level and the time left to full discharge (when in discharge mode) and to full charge (when in charge mode).

Status

Displays the charging status.

Source

Displays the charging source.

Temperature

Displays the real-time temperature.

Voltage

Displays the real-time voltage.

Current

Displays the real-time current.

Charge Left

Shows how much battery power is left.

Battery Info - Lifetime

This window displays information and statistics about battery life, health and usage over its whole life cycle.

Battery Info - Lifetime		
HEALTH GOOD		STATE OF HEALTH 99%
Total Discharge	33.8 Ah	
Full Charge	2895 mAh	
Temperature	min = 0.3 °C max = 40.3 °C	
Voltage	min = 2635 mV max = 4337 mV	
Charge Current	max = 1899 mA	
Discharge Current	max = 993 mA	

Health

Shows the current battery health and signals potential errors.

State of Health

Shows the current battery's health level.

Total Discharge

Shows how much the battery has been used over its whole life cycle.

Full Charge

Shows the actual maximum capacity available to the user.

Temperature

Shows the maximum and minimum temperature reached by the battery.

Voltage

Shows the maximum and minimum voltage reached by the battery.

Charge Current

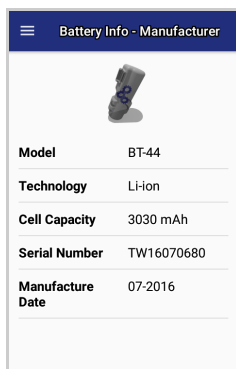

Shows the maximum charge current.

Discharge Current

Shows the maximum discharge current.

Battery Info - Manufacturer

This window displays the model name, the type, the nominal capacity, the serial number and the manufacture date of the battery.

Battery Info - Manufacturer	
	
Model	BT-44
Technology	Li-ion
Cell Capacity	3030 mAh
Serial Number	TW16070680
Manufacture Date	07-2016

Charging Profile

Charging Profile - Setup

This window allows to customize the charging process according to the user's needs and priorities.

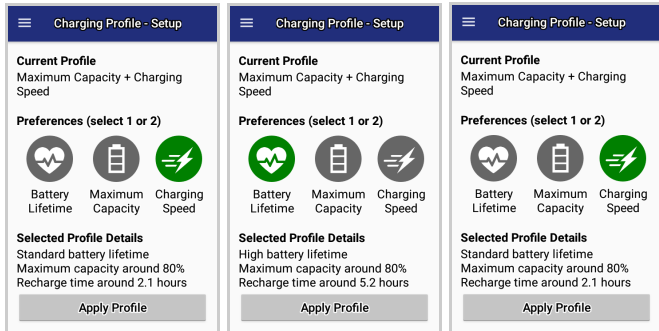

To configure a charging profile, select 1 or 2 of the following preferences:

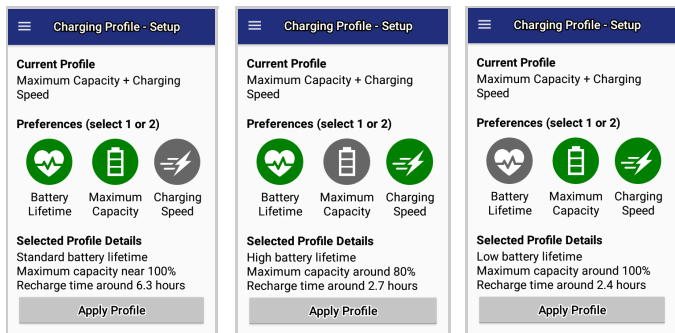

- Battery Lifetime.
- Maximum Capacity.
- Charging Speed.

If a third preference is selected, the system will automatically clear the oldest option.

Tap **Apply Profile** to confirm.

You can configure up to 6 different charging profiles:

Once you have set your profile, it will be applied by default whenever you charge the device.

You can change your profile at any time, even during charging.

Data Logging

The data logging feature allows to collect, store, display and analyze minute-by-minute battery data.

Setup

Use the **Setup** window to select the data you want to log.

The data logging is disabled by default. To enable it, tap **Enable Data Logging**. When enabled, the log is always running, even when the device is in suspend mode.

Graphs

The **Graphs** window provides a graphical display of selected data on a specific date.

Select Date

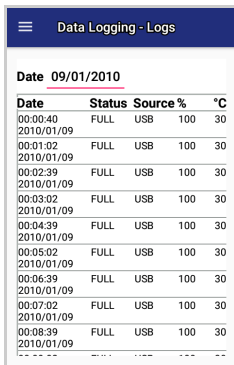

Select Data

Logs

The **Logs** window displays data details by date.

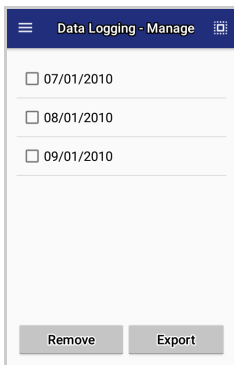

The screenshot shows a mobile application window titled "Data Logging - Logs". It features a blue header with a hamburger menu icon on the left and the title in the center. Below the header, the date "Date 09/01/2010" is displayed. A table follows, with columns for "Date", "Status", "Source", "%", and "°C". The table contains ten rows of data, each representing a log entry for a specific time on 09/01/2010. The status is consistently "FULL", the source is "USB", the percentage is "100", and the temperature is "30".

Date	Status	Source	%	°C
00:00:40 2010/01/09	FULL	USB	100	30
00:01:02 2010/01/09	FULL	USB	100	30
00:02:39 2010/01/09	FULL	USB	100	30
00:03:02 2010/01/09	FULL	USB	100	30
00:04:39 2010/01/09	FULL	USB	100	30
00:05:02 2010/01/09	FULL	USB	100	30
00:06:39 2010/01/09	FULL	USB	100	30
00:07:02 2010/01/09	FULL	USB	100	30
00:08:39 2010/01/09	FULL	USB	100	30
--- -- ---	---	---	---	--

Manage

The **Manage** window allows to remove or export logs.

The screenshot shows a mobile application window titled "Data Logging - Manage". It features a blue header with a hamburger menu icon on the left, the title in the center, and a grid icon on the right. Below the header, there is a list of dates with checkboxes: "07/01/2010", "08/01/2010", and "09/01/2010". At the bottom of the window, there are two buttons: "Remove" and "Export".

Select one or more logs and tap **Remove** to remove them. Tap **OK** to confirm:

Select one or more logs and tap **Export** to export data and store them for extended periods. Tap **Allow** to confirm:

The selected log files will be saved in the "battery" folder in the internal storage of your device.

Application

Settings & Info

The **Info** section displays information about the device name and the software version.

The **Settings** section allows to set the value ranges that will be used to create the graphs.

If you charge the Joya Touch A6 with a wireless charging pad, you're not allowed to customize the charging profile.

If the **Show Wireless Pad Notification** check box is selected, the system displays a warning message saying that the charging profile won't be applied.

Show Wireless Pad Notification is enabled by default. To disable it, clear the **Show Wireless Pad Notification** check box.

DL Cradle Manager

This application provides information about the cradle you're currently using and allows to enable/disable some of its properties.

Below are some screenshots showing the different cradle options:

If the Joya Touch A6 is inserted into the Single Slot Dock Locking or into the 3-Slot Cradle, you have further details and options.

The **DL Cradle Manager** window displays the cradle firmware version and the number of insertions made.

You can set the **Wrong Insertion Timeout**, that is the time lapse after which a "wrong insertion" notification is sent. Tap the menu icon on the right top of the screen and digit your desired insertion timeout:

In addition, you can unlock and lock the device without using the unlock key, by tapping the **UNLOCK** and **LOCK** buttons*.

The 3-Slot Cradle screen has 3 more fields:

- **Slot Index** indicates the slot into which the device is inserted.
- **Fast Charge** is enabled by default. Clear the check box to reduce the charging speed of the slot.
- **Led** turns on the bottom LED anytime you unlock the device. It is disabled by default.

*. If you're using the SSD Locking, you can also unlock the device by entering the Power Menu and tapping **Cradle Unlock**.

DL Ringtone Editor

DL Ringtone Editor allows to create, edit and save your own ringtones and notifications.

Enter the name for the new ringtone in the **Ringtone Name** field and tap  to add the first note. The app will add the default note .

You can change the note, the duration and the octave by selecting the desired options. You can also set the BPM and the style.

Repeat the procedure for each new note.

Tap  to remove a note.

Tap  to add a new note.

Tap  to play the ringtone.

Enter the number of loops in the **Looping** fields.

Tap the menu icon on the right top of the screen for more options:

Effects

Allows to add the following effects to the ringtone:

Effects

- Retrograde canon
- One octave higher
- One octave lower

Note auto-increment

If enabled, you can add a new note without tapping the button +.

Play single note

Select to play notes while editing.

Clear notes

Clears all the notes.

Set as Good Read

Set the ringtone as good read notification.

Save

When the ringtone is ready, tap **Save** on the menu list to save the ringtone. The audio file will be saved in the "Ringtones" folder in the internal storage of your device.

Load

Loads a file from the device's internal storage.

DL Stager

DL Stager is a configuration tool that uses special barcode labels. Contact our technical support for more details (see "[Support Through the Website](#)" on page -265).

Desktop Configuration Utility (DXU)

Datalogic DXU is a unified device configuration utility and firmware update utility. DXU can connect directly to the Joya Touch A6 that connects either directly to a PC via USB or remotely over a network via Wi-Fi. DXU reports information about currently connected devices.

Configure
devices

Save
Configurations

Upload
Configurations

Create
Scan Codes

DXU can configure a wide variety of device parameters, including the scanner and most decoding parameters, the touch screen and the keyboard, interfaces such as Wi-Fi, Bluetooth and USB, device settings such as date, time, time zone, and power management, and security settings such as password access. DXU can also configure communication parameters between the application that runs on a PC and the client applications that run on the device.

DXU offers a method to print out barcodes that Joya Touch A6 users can scan to quickly connect to DXU, called Scan2Deploy. DXU also offers the capability to create barcodes that can completely configure the device by scanning specific configuration barcodes alone, without connecting to DXU via USB or via a network. This feature may prove helpful for configuring devices that operate in environments that forbid the use of networked computers.

DXU offers remote control capabilities for remote troubleshooting, allowing a DXU administrator an opportunity to remotely operate the device to check settings, configure the device using its own user interface, and to see what a user sees.

How DXU Works

DXU is really two applications working together. The DXU desktop application runs on a Windows PC, providing convenient UI to configure the Joya Touch A6. An application runs continuously on the device to extract current configuration settings and send them to the DXU desktop application, and to receive updated settings from the DXU desktop application and apply those configuration settings to the device.

DXU configurations are stored as configuration files on the PC, and are transmitted to and from the Joya Touch A6 as XML web pages.

XML is a standard data format that is widely used for a variety of applications on the internet. Some data is encrypted in the XML file to protect your sensitive data from prying eyes, but most data which is not sensitive is transmitted in plain text that can be easily viewed and analyzed.

DXU can connect directly to devices that are plugged into your PC via USB, including those inserted into a powered dock which is connected to your PC via USB. DXU can also connect to devices on your network. DXU supports connecting only to devices in the same subnet as the PC running DXU. When connected to Wi-Fi wireless access points, the Joya Touch A6 can connect to DXU as long as both are on the same subnet. Ask your network specialists for more information.

Installation

The DXU desktop application must be installed on a Windows PC. DXU Agent is already pre-installed on the Joya Touch A6.

Supported Windows Versions

Windows Vista family

DXU is supported on both 32-bit and 64-bit versions of Windows Vista.

Windows 7 family

DXU is supported on both 32-bit and 64-bit versions of Windows 7.

Windows 8 family

DXU is supported on both 32-bit and 64-bit versions of Windows 8.

Windows 8.1 family

DXU is supported on both 32-bit and 64-bit versions of Windows 8.1.

Windows 10 family

DXU is supported on both 32-bit and 64-bit versions of Windows 10.

Unsupported Windows Versions

DXU may run on older, unsupported Windows versions, but Datalogic technical support will not support users who have problems if they install DXU on Windows versions no longer supported by Microsoft.

How to Install DXU

1. Copy the installer file to any convenient location on your PC.
2. Launch the installer.
3. If User Access Control (UAC) is enabled on your computer, authorize the installer to run. (UAC is enabled by default on all supported Windows operating systems, but it can be disabled by default. If you do not see this prompt, UAC may have been disabled.)
4. Follow on-screen prompts to finish installing DXU.
5. Follow on-screen prompts to finish installing Datalogic Device Support drivers.

Controls

DXU Agent Controls

The most important thing to remember about changing DXU Agent settings is that the DXU Agent Service must be disabled before changing settings, and it must be enabled again after changing settings to put those settings into operation.

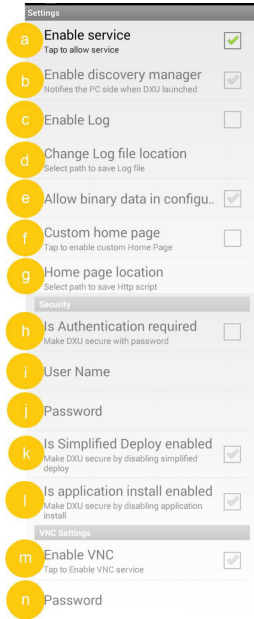

Find these settings in the DXU Agent application on the device.

1. Launch the DXU Agent application.
2. Tap the Menu button to display the menu.
3. Tap the Settings button.

DXU Agent Settings Window

Here is a brief overview of each of the settings:

a. Enable service

This check box is the key to changing any settings in DXU Agent. Clearing this check box allows you to edit almost all settings. Selecting this check box puts those settings into operation. This check box is selected by default.

Also, if for some reason you want to disable DXU on the Joya Touch A6, you can clear this check box to prevent DXU from changing settings. Doing this will not undo settings changes already made, but it will prevent DXU from getting the device's settings and will prevent DXU from changing any settings on the device.

b. Enable discovery manager

This check box controls the Joya Touch A6's broadcast of its name and device type over USB or over a network to the DXU desktop application. When selected, DXU will automatically see when the device connects to USB or over a network. When cleared, DXU will not display when the device connects to USB or over the network. This check box is selected by default.

c. Enable Log

This check box enables DXU Agent's logging capability. When enabled, logs are written to the log file location. Logging can be helpful when diagnosing problems, but at a slight cost of slowing DXU and consuming slightly more power. This check box is not selected by default.

d. Change Log file location

This field allows you to specify where DXU Agent's log file is kept on your device. The default location on Android OS devices is `/storage/sdcard0`, which is located in the device's on-board flash memory. This location is a persistent location, so log files stored here are safe if the device reboots.

e. Allow binary data in configuration

This check box allows a few types of binary data to be transmitted from the Joya Touch A6 to DXU, and from DXU to the Joya Touch A6. The desktop wallpaper file is an example of binary data that can be controlled by DXU. Selecting this check box allows binary data to be sent to or from the binary computer in the configuration file.

Clearing this check box blocks transfer of binary data in the configuration file. Binary data can be quite large compared to other configuration data, so if performance is important and the desktop wallpaper file does not need to be changed remotely for example, the administrator can clear this check box to make configuration files smaller and quicker to apply. This check box is selected by default.

f. Custom home page

This check box enables a locally hosted web page that can be displayed on the device when network connectivity fails. Selecting this check box will set browsers' error pages to the home page located in the **Home page location** folder. Clearing this check box returns browsers to their default error behavior when they cannot load any particular web page.

g. Home page location

This field stores the path to a locally hosted web page that can be displayed on the device when network connectivity fails. This functionality is enabled by the **Custom home page** check box. This folder is located in internal flash (/storage/sdcard0).

h. Is Authentication required

This check box enables authentication to launch DXU Agent, and puts the User Name and Password into operation. When enabled, the user must correctly type both the user name and password to gain access to DXU Agent's settings. This check box is not selected by default.

Note that these settings are also enforced by the DXU desktop application when it loads the configuration from the device. The DXU administrator will be prompted to type this user name and password. Once authenticated, the DXU administrator can edit the user name and password in DXU and apply these to devices.

i. User Name

This field stores the user name used to log into DXU Agent. It is put into effect when the **Is Authentication required** check box is selected. The default value is 'admin' and you can change it.

j. Password

This field stores the password used to log into DXU Agent. It is put into effect when the **Is Authentication required** check box is selected. The default value is '0000' and you can change it.

k. Is Simplified Deploy enabled

This checkbox enables Simplified Deploy. This is a security setting that could be used, for example, to allow use of Simplified Deploy only once as an out-of-box experience.

l. Is application install enabled

This checkbox enables installing applications with Simplified Deploy. This is a security setting that can be used to disable the feature of allowing Simplified Deploy to install customer applications onto the device.

m. Enable VNC

This check box enables VNC, a cross-platform standard for remotely controlling computers. DXU uses VNC to implement its Remote Control feature. Clearing this check box blocks DXU from remotely observing and controlling the device. Selecting this check box enables this feature. This check box is selected by default.

n. VNC Password

This field allows VNC communication to be authenticated, so prying eyes cannot remotely connect to and control your device. This field is blank by default.

Advanced Settings

These settings must match settings on DXU in order for the DXU desktop application to communicate with the your device. A mismatch will result in a communication failure, which will block all configuration functionality.

Change these settings only if you understand precisely any advantage you may gain by doing so. Most users will not realize any advantage from changing these port settings.

Find these settings in the DXU Agent application on the Joya Touch A6.

To configure DXU Agent's **Advanced Settings**, do this:

1. Launch the DXU Agent application.
2. Tap the Recent Apps button to display the menu.
3. Tap **Advanced Settings**.

As with the DXU Agent settings listed above, these advanced settings can only be changed when the **Enable service** check box is cleared.

a. Device HTTP Server Port

This field configures the HTTP port for the DXU server running on the device. It is set to TCP port 80 by default, the same as most web servers.

b. Device UDP Server Port

This field configures the UDP port for the DXU server running on the device. It is set to UDP port 3453 by default.

Desktop UDP Server Port

This field configures the UDP port for communicating to the DXU desktop server. It is set to UDP port 3453 by default.

c. VNC Server Port

This field configures the HTTP port for VNC running on the device. It is set to TCP port 5900 by default, which is the customary port used by most VNC clients for connections.

Version

This page displays the DXU Agent version number.

DXU Application Controls

Available Device List and Configuration

The Available Devices list displays devices which are either currently connected, have been connected since launching DXU, or were manually connected at some time in the past. You can refresh the view to automatically show devices or hide devices which connect while you work on another device. In general, they should appear automatically as they connect.

By default, **No Devices Available** will display when no devices announce themselves to DXU either when they connect via USB or when they connect over a network. Simply connecting the Joya Touch A6 to a network, even on the same subnet as the PC running DXU, will not automatically display as being available. The device must try to connect to DXU, which sends an announcement packet to DXU. This can be done by scanning Scan2Deploy barcode labels. However, connecting a device to the PC running DXU via USB will automatically display it in DXU. You may also select the **Enable Automatic Discovery of Devices** check box in DXU's Settings view to automatically see any device that connects to the network, but

remember that automatic discovery is restricted to discovering devices only within your PC's subnet.

To configure a connected device, you simply click its button under Available Devices to load its configuration into DXU.

To return to the **DXU** main window, click the Back button (generally, a leftward pointing arrow in a circle).

Refresh

This button manually refreshes the display of currently connected devices. This can overcome problems with the automatic display of devices as they connect, and it can remove devices from the list that are not currently connected.

Add Device

This button opens the **Add Device** dialog box which allows you to type the IP address of a device. This dialog box does not support DNS naming of devices. You can also use a custom TCP port if you have configured your device to use one in DXU Agent. For convenience, this field pre-populates with your PC's IP subnet. You need only to type in the last number of your device's IP address if it is in the same subnet as your PC.

This dialog box allows you to manually connect to devices running DXU Agent that are either inside your PC's subnet or outside it. The limitation is that devices on other subnets must be on a subnet that is routable from your PC's subnet. Consult with your network expert for more information.

Once connected, devices that respond to DXU's query over the network will display in the Available Devices list.

Load Configuration

Clicking the **Load Configuration** button opens a standard file dialog box that allows you to explore for and select a DXU configuration file. Loading a configuration allows you to edit a device's configuration when the device is not connected to DXU. This also allows you to save copies of this configuration to new locations or file names, so

you can edit a copy of the configuration while leaving the original configuration unchanged.

To load a configuration:

1. Click the **Load Configuration** button.
2. Explore to any folder where DXU configuration files are located, then select any configuration file you wish. You can double-click it to streamline opening it.
3. Click the **Open** button.

Note that the default location is your user directory on your PC, but DXU remembers the last directory you opened a DXU configuration file, and always starts in that directory the next time you wish to open another DXU configuration file.

Simplified Deploy

DXU desktop can be configured to enable the Datalogic out-of-box experience Simplified Deploy, using Scan2Deploy. With Simplified Deploy you can automatically connect your device to the network and provision it. The **Scan2Deploy** button on DXU desktop can be used to print barcodes that allow factory reset (Android) or clean boot (WEC7) devices to automatically connect to Wi-Fi, update their firmware, configure the device, and install applications.

In order for Simplified Deploy to function:

- The PC where DXU desktop is installed must be accessible from the Wi-Fi network.
- There must be a Manifest File, a text file located in the folder C:\Datalogic\DXUManifests.
- A Simplified Deploy barcode must be generated and printed using the **Scan2Deploy** button on DXU desktop.

Manifest File

Manifest Files are text .ini files indicating which firmware versions to update devices to ([update] tag), which DXU configuration file to apply ([config] tag), and which .apk (Android) and .cab (WEC7) file applications to install ([install] tag). It is recommended that [update] tags be in separate manifest files. You can specify more than one DXU configuration file to apply and more than one application to install.

Additionally, you can have more than one active manifest files on the PC where DXU desktop is installed, each with its' own Simplified Deploy Barcode to be used by Scan2Deploy utility on the device. In this way you can easily have devices provisioned for different tasks.

By default, firmware, configuration files, and applications are assumed to reside in the C:\Datalogic\DXUManifests folder. If they don't, the Manifest File entry must specify the path.

Manifest File Format

```
[update]
<name of firmware file with full path on DXU Server PC>
```

```
[install]
<name of app1 to install file with full path on DXU
Server PC>
<name of app2 to install file with full path on DXU
Server PC>
...
<name of appN to install file with full path on DXU
Server PC>
```

```
[config]
<name of DXU configuration file file with full path on
DXU Server PC>
```

Android Example

```
[update] firmware.zip
```

```
[install] install.apk
C:\Users\DLUser\Documents\Android\my_terminal.apk
```

```
[config] defaultConfigAndroid.dxu
C:\Users\DLUser\Documents\Android\my_user.dxu
```

WEC7 Example

```
[update] firmware.img
```

```
[install] install.cab
C:\Users\DLUser\Documents\Wec7\auto_sync.cab
```

```
[config] defaultConfigWec7.dxu  
C:\Users\DLUser\Documents\Wec7\my_user.dxu
```

Scan2Deploy

Scan2Deploy allows the Joya Touch A6 running DXU Agent to connect using DXU Agent's Scan2Deploy functionality by scanning a barcode. There are two different Scan2Deploy buttons in DXU, and they have different intentions and different scopes of functionality.

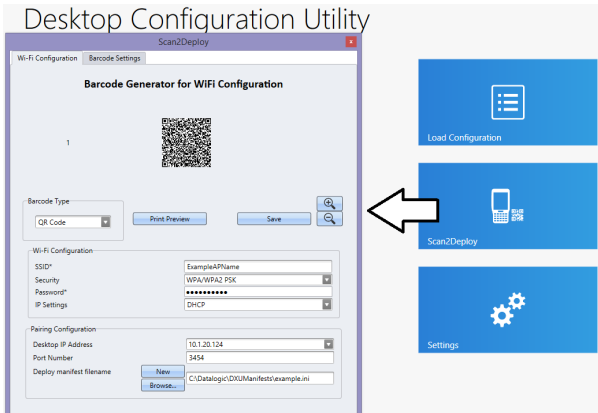

The **Scan2Deploy** button located on the main DXU page does not require an active connection to a device to create a Scan2Deploy barcode label. This button opens the Scan2Deploy dialog box streamlined to create Scan2Deploy labels that can automatically connect a device to a Wi-Fi access point on your PC's subnet and to automatically connect it to DXU, adding it to DXU's **Available Device** list.

Printing a Simplified Deploy Barcode

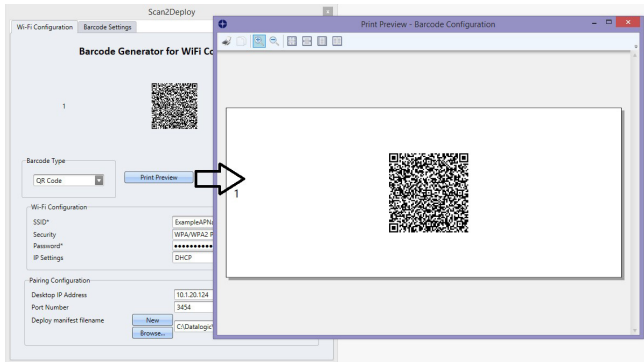

By embedding the IP address of the PC where DXU desktop is installed, the security information for accessing the Wi-Fi network and the name of the desired Manifest File, an encrypted barcode can be printed for use by Scan2Deploy on the device.

To print this barcode, from DXU desktop:

1. Launch Scan2Deploy.

2. Enter the Wi-Fi Configuration information so that the device can connect to the network, including SSID and password.
3. Enter the Pairing Configuration, including the IP Address of the PC which has DXU desktop installed, and the name of the manifest file to be used. You can also create a New manifest file as a template for either DXU configuration file or a firmware update file. You could then edit the Manifest File .ini file in a text editor, like Word Pad, to add applications to install.
4. Click the **Print Preview** button, enlarging the barcode view as needed. And then print by clicking the upper left hand printer button.

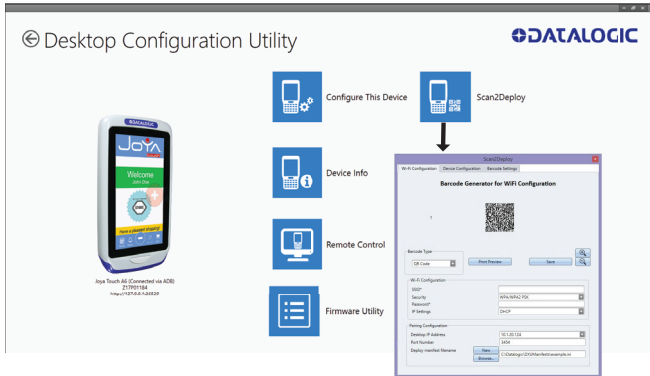

Printing Custom Configuration Barcodes

Outside of Simplified Deploy, the **Scan2Deploy** button located in the **Datalogic Configuration Utility** window can also automatically connect devices to Wi-Fi access points and to DXU. This window also has another tab which controls the ability to include configuration data in the printed barcodes. This version of Scan2Deploy can fully deploy a device configuration to devices which don't have network access to DXU on your PC. When the **Include Unmodified Changes** checkbox is selected, all configuration items will be included in the barcode set. This option results in several barcodes being generated as true Scan2Deploy labels. After scanning the first label in this set, DXU Agent's Scan2Deploy window on your device will display how many barcode labels must be scanned, and will display your progress in scanning them all. Once they are all scanned, DXU Agent will apply the configuration changes automatically, as if you had connected to DXU to transfer the changes.

While it is possible to generate a Simplified Deploy barcode using this window, it has the additional flexibility presented in the **Device**

Configuration tab, which allows printing barcodes to configure the device without the need of the PC with DXU desktop being accessible from the Wi-Fi network.

Wi-Fi Configuration Tab

Barcode Type Menu

The 'Barcode Type' menu allows you to choose which barcode symbology that Scan2Deploy labels will be printed in. Each barcode symbology has advantages and disadvantages which may benefit your organization.

QR Code

Aztec

Data Matrix

PDF417

Code 128

QR Code, Aztec Code, and Data Matrix are 2D barcodes that offer high data density and larger capacity, but require 2D scanners to

scan them. PDF417 is a stacked linear barcode that offers moderate data density and larger capacity than linear symbologies. Code 128 is a linear symbology that can be scanned by laser scanners, but its data capacity is low, which may result in a great many individual labels to be scanned in order to fully configure a device remotely.

Print Preview

The Wi-Fi Configuration tab offers a live preview of the barcode as you select the barcode type and enter data into the dialog box's fields.

Save Button

You may save Scan2Deploy labels as graphic files, should this prove convenient for including Scan2Deploy barcodes in an e-mail to a remote office, for example.

Wi-Fi Configuration Controls

As with the other version of the Scan2Deploy dialog box, this group of controls allows you to configure the automatic configuration of a device's Wi-Fi connection. Fields allow you to enter the SSID, password, security method, and IP settings. If you select **Static** in the **IP Settings** menu, additional field will appear allowing you to configure a static IP address for the device that will scan these Scan2Deploy barcodes.

If you configure Scan2Deploy labels with a static IP address, do not have two different devices scan the same label set, or an IP conflict will result. Consult your network expert for more information.

Pairing Configuration Controls

These fields let you configure your connection to the PC you are running DXU on. These fields are filled in automatically, but you can change them to deliberately connect to another IP address where another instance of DXU is running, for example.

Barcode Settings

As with the other version of the Scan2Deploy dialog box, this tab allows to set the maximum size of each label by symbology. For example, if you know that your devices can scan larger 2D labels than DXU's default setting, you can increase the size of your label so fewer labels are needed to fully deploy your configuration.

Settings Window

The **Settings** window is opened by clicking the Settings button on **DXU** main window. This view includes controls which should seldom need to be changed, such as the language that DXU displays in, TCP ports used to communicate with remote devices, and the About tab that displays DXU's version.

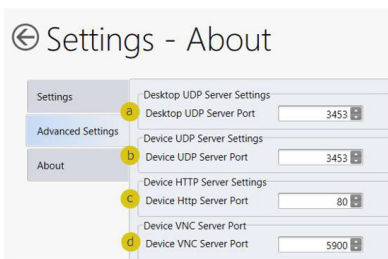

Language Tab

The **Language** tab allows to switch the language that strings in DXU are displayed in. The default language is US English, but you may choose Italian, Chinese Simplified, or Chinese Traditional. Additional languages may be added later without notice.

Advanced Settings Tab

The **Advanced Settings** tab allows to change TCP/IP ports that DXU uses to communicate several types of information with remote computers that are being configured.

The **Desktop UDP Server Port** (a) and the **Device UDP Server Port** (b) fields must be set to the same value as the matching ports on the remote device to ensure communication and remote configuration. The **Device HTTP Server Port** (c) field must be set to the same value as the matching ports on the remote device to ensure communication and remote configuration. The **Device VNC Server Port** field must be set to the same value as the matching ports on the remote device to enable Remote Control.

About Tab

The **About** tab displays DXU's version. This is likely the first question that Datalogic technical support may ask you if you call in with a question.

Desktop Configuration Utility View

This is the view you see when you click on a device's button in the **Available Device** list. It displays a large picture of your device's model, along with the model name and serial number.

Configure this Device Button

This button allows to configure individual parameter values on your device from DXU. The types of settings include scanner settings, enterprise settings, system configuration settings, DXU Agent configuration settings, SoftSpot settings, Tap2Deploy device-side settings, and SureLock settings. Other settings may be added in the future. Additional settings may be available depending on hardware options installed on your device, and may depend on software installed on your device.

Device Info Button

Clicking this button displays the **Device Info** window, which displays your device's Wi-Fi radio capabilities, the type of barcode scanner on the device, the operating system version, battery information, the firmware version installed on your device, and the version of the enterprise SDK, which may be important for troubleshooting.

← Device Info

	Wi-Fi ABGN		Battery Li-ion Charge 91.0 %
	Reading Technology 2D		Firmware Version 2.00.35.20170421
	OS Version Android 4.4.4		Enterprise SDK Version 1.2

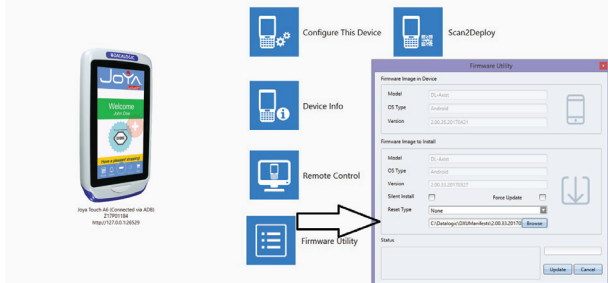

Remote Control Button

Clicking this button opens a **Remote Control** window that displays what is visible on the screen of the device you are currently connected to. This window also includes buttons to remotely activate the devices external buttons, and to capture a screen shot of what is visible on its screen.

Firmware Update Utility Button

Clicking this button opens the **Firmware Utility** dialog box, which you can use to update the firmware on your device.

Desktop Configuration Utility

Scan2Deploy Button

Clicking this button opens the **Scan2Deploy** dialog box (see "Printing Custom Configuration Barcodes" on page -148). Use it to create Scan2Deploy barcode sets that can fully configure a device without network access to DXU on your PC, containing all configuration settings in one set of barcodes and applying them by scanning the labels - all without the need to use Simplified Deploy.

Tasks

Connect to a Device via USB

You can connect to the Joya Touch A6 by connecting it to your PC with a USB cable. DXU will connect to it directly without any further set-up.

1. Launch **DXU**.
2. Connect your device to your PC with a **USB** cable.
3. Click the device's button in the **Available Device** list.

Connect to a Device via Network Manually

If DXU Agent on the device has its **Enable Discovery Manager** feature enabled and **DXU** has **Automatic Discovery of Devices** enabled under **Advanced Settings**, then clicking **Refresh** should display it in the **Available Device** list if it is in the same subnet.

However, if you want to manually add a device in **DXU**, make sure both device and system are in the same subnet and follow these steps:

1. From the **DXU** main window, click **Add Device**;

2. In the **Add Device** dialog box, enter the **IP address** of the device and optionally its port, if it is has been changed from the default;

**NOTE**

You will see the IP Address and port details displayed on the DXU main window along with the model name, serial number, and an illustration of the device.

3. Click **OK** to complete.

The added device will display on the left side of the console under **Available Device**.

**NOTE**

You can also directly connect the device to DXU using **USB**.

Connect to a Device via Network Using Scan2Pair

These steps assume you already have your network set up, and you already have your printer set up. To connect a device to a Wi-Fi access point and to DXU using the default settings, follow the steps below:

1. Launch **DXU**.
2. Click **Scan2Deploy** on the **DXU** main window.
3. Enter the **SSID** and **Password** for the Wi-Fi access point that your device will use to connect to your network.

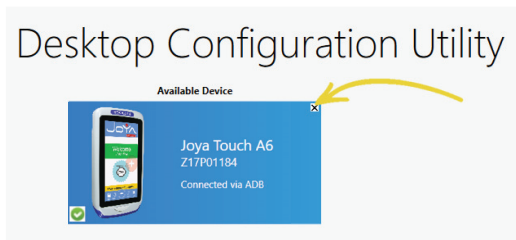

In most cases you should be able to leave other fields with their default values. You may, of course, change those values as needed to work with your network setup.

4. Click **Print Preview**.
5. Click **Print** in the button bar.
6. Since **Print** dialog boxes vary by the model of your printer, configure the print as you normally do. Close these dialog boxes to exit.
7. Resume the device and unlock its screen.
8. Launch the **DXU Agent** application.
9. Tap **Menu**, and then select the **Scan2Deploy** command.
10. Scan the barcode.

Your device should appear in the **Available Device** list of the **DXU** main window. Click **Available Device** to continue configuring your device.

Delete a Device from the Available Device List

Click the exit button (X) located at top right of the device.

Configuration Files

DXU configuration files end with the *.dxu file extension. They are XML files that can contain binary data for some configuration items, such as wallpaper images.

Save a Configuration File

To save a configuration file, follow the steps below:

1. From the **Device Configuration** window, click the **Save As** button.

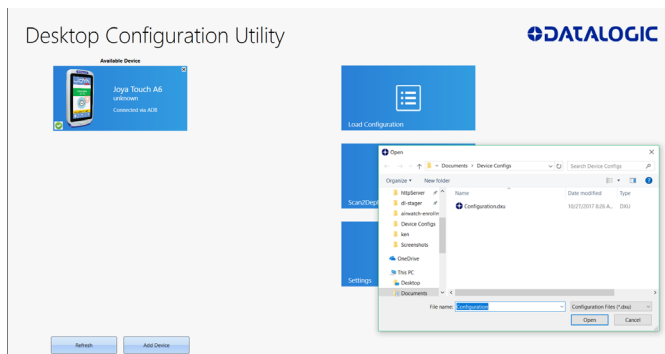

2. You may type the path and the file name in the field, or you can click the **Browse** button to use a standard file dialog box to explore to the folder of your choice and type the file name. Unusually, clicking the **Save** button in the **Save As** dialog box does not actually save the configuration file, but returns you to the **Save Configuration** dialog box.
3. Optionally, you may select the **Use Password** check box and type a password into the field. This will force anyone who opens this configuration file in the future to correctly type the password in order to open the file.
4. Click **Save**.
5. Click **OK** to dismiss the confirmation dialog box.

Open a Configuration File

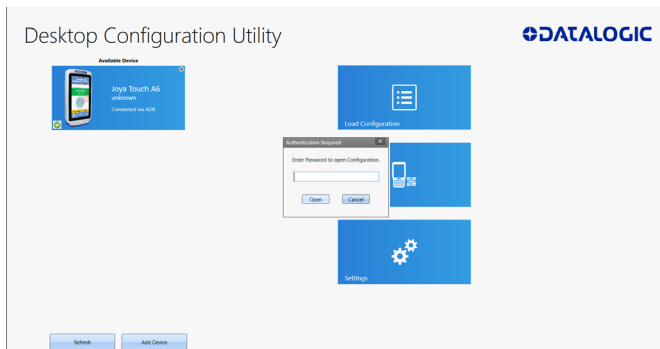

To load a configuration file previously saved, do this:

1. Launch **DXU**.
2. Click the **Load Configuration** file. This will open a standard file dialog box.
3. Explore to your configuration file, select it, and click **Open**.

Open a Configuration File Which is Authenticated

DXU displays a login prompt when you open a configuration file that requires authentication and when you connect to a device with a password set in the DXU Agent.

To open a configuration or to connect to a device which requires authentication:

1. Open a configuration file or load the configuration from a connected device.
2. Type the user name for this configuration/device into the **User Name** field.
3. Type the password for this configuration/device in the **Password** field.
4. Click **OK**.

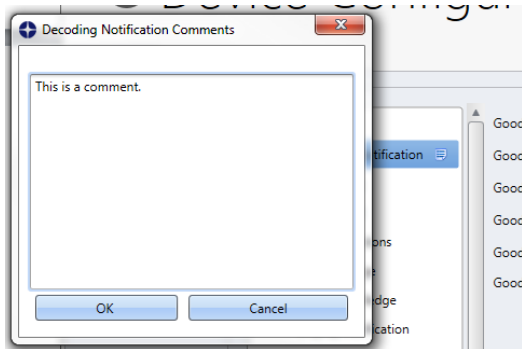

Edit a Configuration File Off-line

You can edit configuration files even when the device they were drawn from are not connected to DXU. Follow the steps below:

1. Open your configuration file.
2. Edit any settings you wish.
3. Either save the result to a new configuration file, or just save to the same configuration file.

Add Comments to Configuration Settings

Comments can be added to any tab, node, or parameter in the **Device Configuration** window. Comments are indicated with a small text balloon icon.

To add a comment:

1. Open a configuration file or load the configuration from a connected device.
2. Click **Configure This Device**.
3. Right-click any tab, node, or parameter, then select **Add comment** in the context-sensitive menu.
4. Type your comment.
5. Click **OK** save. A small text balloon will appear next to the item you commented on.

To edit a comment:

1. Right-click any item with a small comment icon.
2. Select **Edit comment** in the context-sensitive menu.

3. Edit your comment.
4. Click **OK** to save.

Show Comments

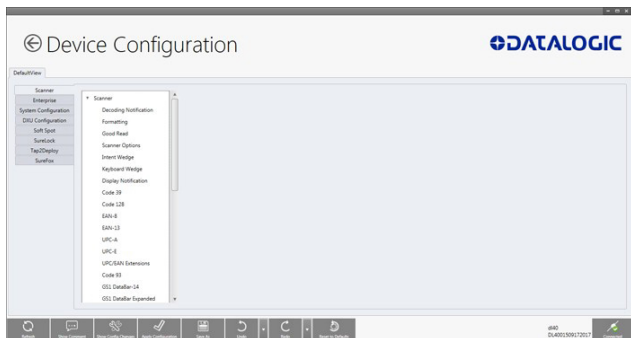

You can show all comments in a configuration file in one handy table by doing this:

1. Open a configuration file or load the configuration from a connected device.
2. Click **Configure This Device**.
3. If there are no comments, add them.
4. Click **Show Comments** in the button bar.

You can select and edit comments in this table by double-clicking the **Comment** field. Click the exit button (**X**) to close the dialog box.

Configure a Device On-line

Once you have added the device to **Desktop Configuration Utility**, you can click its name under the **Available devices** list and use the **Configure This Device** option to start configuring the device. There is also an option to add comments on all the listed settings.

To configure a device that is directly connected via USB:

1. Launch **DXU**.
2. Connect your device to your PC via a USB cable.
3. Click the button for your connected device in the **Available Device** list.
4. Click **Configure This Device**.
5. Configure any settings you wish.
6. Save changes to a configuration file or apply the configuration changes to your device.

To configure a device that is connected over the network:

1. Launch **DXU**.
2. Connect your device to DXU manually, using Scan2Pair labels or automatic discovery. (See instructions for these methods in this section.)
3. Click the button for your connected device in the **Available Device** list.
4. Click **Configure This Device**.
5. Configure any settings you wish.
6. Save changes to a configuration file or apply the configuration changes to your device.

Configure a Device Off-line via Scan2Deploy

DXU's **Desktop Configuration Utility** window allows to generate a **Scan2Deploy** barcode set for device configuration. The device settings modified using the console can be saved, printed and scanned by a remote user of a device to configure it.

The **Device Configuration** tab has the following additional options:

1. **Barcode Type:** selects the barcode symbology used to print the Scan2Deploy labels. Different symbologies have advantages and disadvantages, so DXU gives you a choice.

QR Code

Aztec

Data Matrix

PDF417

Code 128

2. **Include Unmodified Changes:** when you configure a device using the console, you don't always wish to configure all the settings, so by default the generated codes for configuration do not include unmodified settings. However, once selected, the **Include Unmodified Changes** option allows you to also include unmodified changes in the barcode set, letting you fully configure a remote device even when it does not have network access to your DXU console computer.

3. **Include Binary Data:** DXU configuration files can contain some data in binary formats, like wallpaper images. The **Include Binary Data** option allows you to include all binary data in the barcode set. Note that excluding binary data can significantly reduce the size of your configuration file, and also the number of barcode labels in a set used to convey that configuration when printed as a **Scan2Deploy** label set.

To create a **Scan2Deploy** label set:

1. Open a configuration file or load the configuration from a connected device.
2. Click **Configure This Device**.
3. Configure any settings you wish.
4. (Optional) **Save** your configuration.
5. Click the **Back** button to return to the **Desktop Configuration Utility** window.
6. Click the **Scan2Deploy**
7. Click the **Device Configuration** tab.
8. (Optional) Select the **Include Unmodified Changes** check box to include all configuration settings in your Scan2Deploy barcodes.
9. (Optional) Select the **Include Binary Data** check box to include binary data like the desktop wallpaper image in the configuration barcodes.

**NOTE**

This option will increase the number of barcode labels in the **Scan2Deploy** label set.

10. (Optional) Select the barcode symbology in the **Barcode Type** menu.

11. Click **Save** to save your barcode label set as a graphic image file.
12. Click **Print Preview**, then click the **Print** button in the button bar and complete using your printer's **Print** dialog box.

To apply the configuration by scanning the **Scan2Deploy** barcodes:

1. Resume your device and unlock its screen.
2. Launch the **DXU Agent** application.
3. Tap **Menu**, and then select the **Scan2Pair** command.
4. Scan any label in your Scan2Deploy label set.

NOTE

Some configurations are small enough to fit on only one barcode label, and others may have many barcodes to scan.

5. Continue to scan all the barcodes on the list. Once the last label is scanned, the configuration will be put into effect, and an on-screen notification will confirm that your configuration is complete.
6. Tap **Home** to exit.

Configure DXU

You can change DXU's language and the TCP/IP ports used to communicate with DXU Agent on remote devices, enable automatic discovery of devices, enable logging, and reset DXU's settings back to their default values.

Configure DXU's Language

DXU can display its controls in several languages. US English is the default, but you can also select Italian, Chinese Simplified or Chinese Traditional.

To change DXU's language:

1. From the **DXU** main window, click **Settings**.

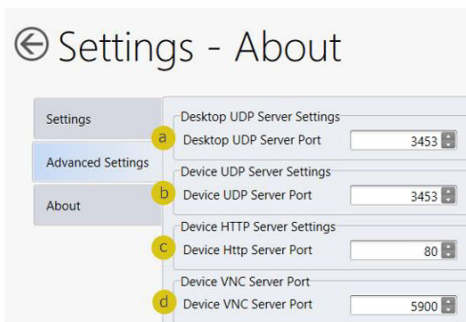

2. Select the language you prefer in the **Language** menu.
3. Click the **Back** button (a leftward pointing arrow in a circle) to return to **DXU** main window.

Configure DXU Communication Settings

You can configure the TCP/IP ports used by DXU to communicate with the DXU Agent on the Joya Touch A6. Configure these settings only if you understand how these changes affect your network. Consult your network expert for more information.

To configure DXU's UDP and TCP ports:

1. From the **DXU** main window, click **Settings**.
2. Click the **Advanced Settings** tab.

3. Edit the port values to match the ports used by the DXU Agent on your devices:
 - a. The **Desktop UDP Server Port** configures the UDP port for the DXU server running on the console PC. It is set to UDP port 3453 by default.
 - b. The **Device UDP Server Port** configures the UDP port for the DXU Agent server running on the device. It is set to UDP port 3453 by default.
 - c. The **Device HTTP Server Port** configures the TCP port for the DXU Agent server running on the device. It is set to TCP port 80 by default, like common web servers.
 - d. The **Device VNC Server Port** configures the TCP port for VNC running on the device. It is set to TCP port 5900, like common VNC servers.

4. Click the **Back** button (a leftward pointing arrow in a circle to return to the **DXU** main window).

Enable Automatic Discovery of Devices

You can enable the automatic discovery of your device by the DXU. This is not enabled by default.

Do not enable automatic discovery if you have more than one user of DXU console in your subnet, or you risk having two DXU administrators changing the settings on any particular device in your subnet at once. DXU will warn you if it launches and detects another instance of DXU already running in your subnet.

To enable automatic discovery of devices:

1. From the **DXU** main window, click the **Settings** button.
2. Click the **Advanced Settings** tab.
3. Select the **Enable Automatic Discovery of Devices** check box.
4. Click the **Back** button (a leftward pointing arrow in a circle) to return to the **DXU** main window.

Enable Logging on the DXU Console PC

DXU can log its activities, and this can be very helpful for technical support to help you diagnose those unexpected problems that always seem to pop up after software is released to actual users. Logging is not enabled by default. Once enabled, the DXU's default log file location is stored in your user directory at the following path: 'C:\Users\\AppData\Roaming\Datalogic DXU'.

To enable logging:

1. From the **DXU** main window, click **Settings**.

2. Click the **Advanced Settings** tab.

3. Select the **Enable Logging** check box.

4. Click the **Back** button (a leftward pointing arrow in a circle) to return to the **DXU** main window.

Reset Advanced Settings to Defaults

To reset the DXU's Advanced Settings to their default values follow the step below:

1. From the **DXU** main window, click the **Settings** button.
2. Click the **Advanced Settings** tab.
3. Click the **Reset Advanced Settings** button.
4. Click **Yes** to confirm.
5. Click the **Back** button (a leftward pointing arrow in a circle) to return to the **DXU** main window.

Enable Logging on the Joya Touch A6

DXU Agent can log its activities. When enabled, logs are written to the log file location. Logging can be helpful when diagnosing problems, but it slows down the DXU Agent and consumes slightly more power. This check box is not selected by default.

You can specify where the DXU Agent's log file is kept on your device. The default location on Android OS devices is /storage/sdcard0,

which is located in the device's on-board flash memory. This location is a persistent location, so log files stored here are safe if the device reboots.

To enable DXU Agent logging on your device:

1. Resume your device and unlock its screen.
2. Launch the **DXU Agent** application.
3. Tap **Menu** to display the menu.
4. Tap the **Settings** button.
5. Clear the **Enable Service** check box.

**NOTE**

You must clear Enable Service before you can change any setting in DXU Agent.

6. Select the **Enable Log** check box.
7. Select the **Enable Service** check box.
8. Tap **Home** to exit.

To specify where the log files are stored on your device:

1. Resume your device and unlock its screen.
2. Launch the **DXU Agent** application.
3. Tap **Menu** to display the menu.
4. Tap the **Settings** button.
5. Clear the **Enable Service** check box.

NOTE

You must clear **Enable Service** before you can change any setting in **DXU Agent**.

6. Tap **Change Log File Location**.
7. Type a valid path on your device in the **Change Log File Location** field, and then tap **OK**.
8. (Optional, but desired if you wish to log to this new location) Select the **Enable Log** check box.
9. Select the **Enable Service** check box.
10. Tap **Home** to exit.

Set User Names, Passwords, and Prompt for Authentication on DXU Configuration Files

Configurations and configuration files can require authentication to open and apply. DXU implements an invisible sort of authentication by automatically applying a default user name and password to every DXU configuration and configuration file. You can display an authentication prompt whenever anyone attempts to connect to one of your devices with DXU, and change both the user name and the password to increase security of your devices.

Enable Authentication in DXU Agent

You can ensure that users are prompted to enter a user name and a password to open a configuration file in the DXU console or in the **DXU Agent's Settings** window on a device.

To enable authentication:

1. Resume your device and unlock its screen.
2. Launch the **DXU Agent** application.

3. Tap **Menu** to display the menu.
4. Tap the **Settings** button.
5. Clear the **Enable Service** check box.

**NOTE**

You must clear **Enable Service** before you can change any setting in **DXU Agent**.

6. Select the **Is Authentication Required** check box.
7. Select the **Enable Service** check box.
8. Tap **Home** to exit.

To authenticate while opening DXU Agent's Settings window:

1. Resume your device and unlock its screen.
2. Launch the **DXU Agent** application.
3. Tap **Menu** to display the menu.
4. Tap the **Settings** button.
5. Type your password in the **Enter Password** field, and then tap **OK**.

Change the User Name in DXU Agent

Editing the user name adds an extra layer of complication to authentication. The default user name is "admin". You can change the user name to add another piece of information that a hacker must enter correctly to access the configuration in DXU.

To change the User Name:

1. Resume your device and unlock its screen.
2. Launch the **DXU Agent** application.
3. Tap **Menu** to display the menu.
4. Tap the **Settings** button.
5. Clear the **Enable Service** check box.

You must clear Enable Service before you can change any setting in DXU Agent.

6. Tap the **User Name** button.
7. Delete the contents of the field, and then type a new user name.
8. Tap **OK**.
9. Select the **Is Authentication Required** check box.
10. Select the **Enable Service** check box.
11. Tap **Home** to exit.

Change the Password in the DXU Agent

You can edit the password to keep untrusted actors out of DXU Agent configuration settings. The default password is "0000".

To change the Password:

1. Resume your device and unlock its screen.
2. Launch the **DXU Agent** application.
3. Tap **Menu** to display the menu.
4. Tap the **Settings** button.
5. Clear the **Enable Service** check box.

You must clear "Enable Service" before you can change any setting in DXU Agent.

NOTE

6. Tap the **Password** button.
7. Delete the contents of the field, and then type a new password.
8. Tap **OK**.
9. Select the **Is Authentication Required** check box.
10. Select the **Enable Service** check box.
11. Tap **Home** to exit.

Create Scan2Deploy Labels to Fully Configure Remote Devices

The **Scan2Deploy** button in the **Datalogic Configuration Utility** window can automatically connect devices to Wi-Fi access points and to DXU. Also, the **Scan2Deploy** window has a further tab which allows you to include configuration data in the printed barcodes.

This version of Scan2Deploy can fully deploy a device configuration to devices which don't have network access to DXU on your PC. When the **Include Unmodified Changes** check box is selected, all the configuration items will be included in the barcode set. This option results in several barcodes being generated as true **Scan2Deploy** labels. After scanning the first label in this set, the **DXU Agent's Scan2Deploy** window on your device will display how many barcode labels must be scanned, and your progress in scanning them all. Once they are all scanned, the DXU Agent will apply the configuration changes automatically, as if you had connected to DXU to transfer the changes.

To create **Scan2Deploy** barcodes that can completely configure your device:

1. Open a configuration file or load the configuration from a connected device.
2. Click **Configure This Device**.
3. Configure any settings you wish.
4. (Optional) **Save** your configuration.

5. Click **Back** to return to the **Desktop Configuration Utility** window.
6. Click **Scan2Deploy**.
7. Click the **Device Configuration** tab.
8. (Optional) Select the **Include Unmodified Changes** check box to include all the configuration settings in your Scan2Deploy barcodes.

**NOTE**

This option will increase the number of barcode labels in the Scan2Deploy label set.

9. (Optional) Select the **Include Binary Data** check box to include binary data such as the desktop wallpaper image in the configuration barcodes.

**NOTE**

This option will increase the number of barcode labels in the Scan2Deploy label set.

10. (Optional) Select the barcode symbology in the **Barcode Type** menu.
11. Click **Save** to save your barcode label set as a graphic image file.
12. Click **Print Preview**, then click the **Print** button in the button bar and complete using your printer's **Print** dialog box.

To apply the configuration by scanning the **Scan2Deploy** barcodes:

1. Resume your device and unlock its screen.
2. Launch the **DXU Agent** application.
3. Tap **Menu**, and then select the **Scan2Pair** command.

4. Scan any label in your Scan2Deploy label set.

Some configurations are small enough to fit on only one barcode label, and others may have many barcodes to scan.

NOTE

5. Continue to scan all barcodes on the list. Once the last label is scanned, the configuration will be put into effect, and an on-screen notification will confirm that your configuration is complete.
6. Tap **Home** to exit.

View Device Info for a Connected Device

You can view information about a device that is connected to DXU. This information includes the capabilities of the device's Wi-Fi radio, the type of barcode scanner it has, the OS version, the battery type and state of charge, the firmware version and the version of the Datalogic Enterprise SDK.

To view information about the device you are connected to:

1. Load the configuration from a connected device.
2. Click **Device Info**.
3. Click the **Back** button (a leftward pointing arrow in a circle) to return to the **DXU** main window.

View Device Info Recorded in a Configuration File

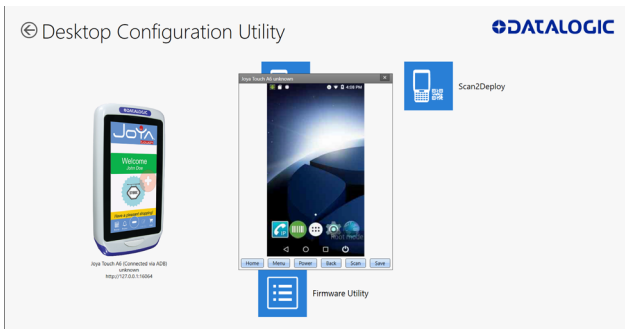

You can view information about the device from which a configuration file was extracted. This information includes the capabilities of the device's Wi-Fi radio, the type of barcode scanner it has, the OS version, the battery type and state of charge, the firmware version and the version of the Datalogic Enterprise SDK.

To view information about the device from which a configuration file was extracted:

1. Open a configuration file or load the configuration from a connected device.
2. Click **Device Info**.
3. Click the **Back** button (a leftward pointing arrow in a circle) to return to the **DXU** main window.

Remote Control

Remote Control allows to see what is displayed on the screen of a connected device. This window also includes buttons to remotely activate the device's external buttons, and to capture a screen shot of what is visible on its screen. Note that clicking a button on screen does not physically press a button, or even trigger it electrically, but sends an event message to the system as if you had pushed a physical key or tapped a physical button on the touch screen.

Unlock the Screen Using Remote Control

You can unlock the screen by dragging your mouse on the **Remote Control** screen.

To start **Remote Control** and unlock a device's screen:

1. Launch **DXU**.
2. Connect the device to DXU either directly using USB or through the network via Wi-Fi, or scan a Scan2Deploy label.
3. Click the device button in the **Available Device** list.
4. Click the **Remote Control**.
5. If the device is suspended, press the **Power** button at the bottom of the **Remote Control** window.
6. Click the **lock** icon and drag it rightward, releasing it over the **unlocked lock** icon at the right edge of the **Remote Control** window.

1. Home Button

At the bottom of the **Remote Control** window, the **Home** button activates the device's **Home** button, which switches the display to the **Home** screen.

2. Menu Button

At the bottom of the **Remote Control** window, the **Menu** button activates the device's menu. Not all the applications have a menu, so this feature depends on which application is active when you click the **Menu** button.

3. Power Button

At the bottom of the **Remote Control** window, the **Power** button toggles the device's power state as if you had pressed the device's **Power** button. If the device is awake, clicking the **Power** button will

turn off the screen, locking the screen if the device is configured to do that. If the device's screen is off, clicking the **Power** button will resume the device.

4. Back Button

At the bottom of the **Remote Control** window, the **Back** button takes the device to the previously viewed screen or application as if you had tapped the device's **Back** button.

5. Scan Button

At the bottom of the **Remote Control** window, the **Scan** button activates the device's barcode scanner as if you had pressed the Scan Key or the Scan Trigger on the device. There are some limitations: the scanner will not scan if:

- there is no application running that can receive its data;
- the Camera application is showing its live preview or taking a photograph or recording a video;
- none of the device's scan buttons are configured to scan.

However, if your device is configured to scan barcodes and an application is receiving the data, then the **Scan** button will trigger a scan remotely.

6. Save a Screenshot of Remote Device

At the bottom of the **Remote Control** window, the **Save** button takes a screenshot of the remote computer and prompts to save it to your PC. The default path is your user folder.

Set a VNC Password

VNC is a standard protocol for remotely controlling PCs and other computers, and it allows the use of a password to prevent unwanted remote access to computers.

NOTE

The VNC password must match between the DXU console and the DXU Agent on the device.

Set a VNC Password in DXU Agent

You can set a password for VNC in DXU Agent. This field allows VNC communication to be authenticated, so prying eyes cannot remotely connect to and control your device. This field is blank by default.

To set or edit a VNC password in DXU Agent:

1. Resume your device and unlock its screen.
2. Launch the **DXU Agent** application.
3. Tap **Menu** to display the menu.
4. Tap the **Settings** button.
5. Clear the **Enable Service** check box.

NOTE

You must clear “Enable Service” before you can change any setting in DXU Agent.

6. Tap the **Password** button in the **VNC Settings** section.
7. Type a password in the field. It can be numbers, letters, or some punctuation characters.
8. Tap **OK**.

9. Select the **Enable Service** check box.
10. Tap **Home** to exit.

To authenticate **Remote Control** when a password is set on the device:

1. Launch **DXU**.
2. Connect the device to DXU either directly using USB or through the network via Wi-Fi, or scan a Scan2Pair label.
3. Click the device button in the **Available Device** list.
4. Click the **Remote Control** button.
5. Type the device's **VNC password** in the field, and then click **OK**.

Set or Edit the VNC Authentication Password from DXU

You can change a device's VNC password from DXU. It is a configuration parameter in the **Device Configuration** window. Follow the steps below:

1. Open a configuration file or load the configuration from a connected device.
2. Click the **Configure This Device**.
3. Click the **DXU Configuration** tab.
4. Click the **General Settings** node in the middle pane.
5. Type a password in the **VNC Authentication Password** field, or edit the value in that field.

The value in this field is encrypted for security. Once entered, it will be displayed as asterisks.

NOTE

6. Click the **Back** button (a leftward pointing arrow in a circle) to return to the **DXU** main window).

Update Firmware

You can update the Joya Touch A6's firmware from DXU. DXU provides the following options:

- a **Silent Install** where no user interaction is required on the device;
- a **Force Update** where the firmware is reinstalled even if the device reports that it already has the same version installed;
- a factory data reset or an enterprise reset can be performed after updating the firmware;
- the update can simply reboot the device without performing an update.

DXU firmware update is not the only way to update the firmware on the Joya Touch A6. DXU's firmware update capability works only with connected devices. If you need a method that can update firmware on many devices remotely, especially if they are not connected to a network, then other methods may suit your needs better. Please consult your device's user reference guide for other firmware update methods.

Customarily firmware update is referred to as "update" on devices that use Microsoft Windows operating systems, and it is referred to as "upgrade" on devices that use the Android operating system. These terms are used because the creators of these operating systems use these terms, but the terms essentially mean the same thing.

Silent Install

This option allows to perform an image update that does not require any user interaction on the device. If cleared, the user will be prompted to perform the update, but has the option to cancel the update. This check box is not selected by default.

Force Update

This option allows you perform a full upgrade of the firmware regardless of what is installed on the device. By default, the firmware upgrade utility will compare the version of the image file with what is already running on the device, and if they match it will skip updating. This is done to save time and prevent inconveniences for most users in the field. However, in rare circumstances a firmware image can become corrupted in the field, and this option allows a DXU administrator to perform a full firmware upgrade, disregarding the version reported by the device.

Factory Data Reset After Installing Firmware

A factory data reset is a full reset of the device intended to return it to factory defaults. This reset deletes all user data, settings and installed applications, and resets the device's real-time clock to its default date and time.

Enterprise Reset After Installing Firmware

An enterprise reset is much like a factory data reset, except that it does not reset network connections (such as Wi-Fi settings), custom desktop wallpaper graphics and splash screen graphics. In every other way, it resets the device, including restoring flash memory to factory defaults, removing installed applications, deleting user data, and resetting the date and time to default levels.

Update Firmware on a Connected Device

You must first connect to a device to update its firmware with DXU. The connection can be either with USB, or over a network using Wi-Fi.

To perform a firmware update with DXU:

1. Launch **DXU**.
2. Connect the device to DXU either directly using USB or through the network via Wi-Fi, or scan a Scan2Pair label.
3. Click the device button in the **Available Device** list.
4. Click the **Firmware Utility** button.
5. Click the **Browse** button to open a standard file dialog box to browse for and select a suitable firmware image file.

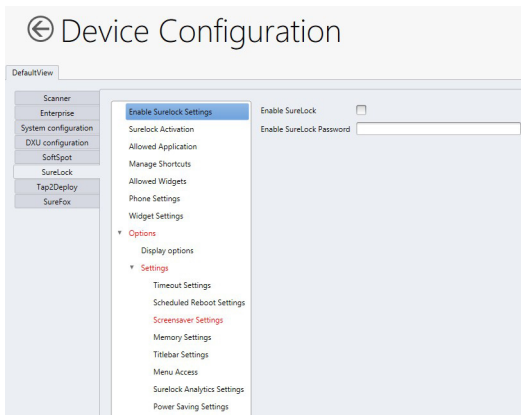

DXU will automatically filter your view of file types to those that are compatible with your device.

6. Navigate to your firmware image file, select it and click **Open**.
 - (Optional) Select the **Silent Install** check box if you wish to perform a firmware update that does not require user interaction on the device.
 - (Optional) Select the **Force Update** check box if you wish to force a complete reinstallation of this image on the device.
 - (Optional) Select an option from the **Reset Type** menu if you wish to perform a factory data reset or an enterprise reset after the image update is completed, or if you just want to have the device reboot without resetting at all.
7. Click **Update**.

Configuring SureLock and SureFox

Device and browsing lockdown can occur using **SureLock** and **SureFox**. These lockdown settings can be set via the DXU desktop. There are two important prerequisites to configuring these settings when creating a DXU configuration file:

1. The EULA on the device must first be accepted. You can use DXU Desktop to remotely accept the SureFox and SureLock EULAs for all devices consuming a.dxu configuration file. Otherwise, you first need to launch **SureLock** or **SureFox** on each device and then accept the EULA.
2. The **Enable SureLock Password** and/or **Enable SureFox Password** fields must have the current password. The Default password is '0000'.

SureLock

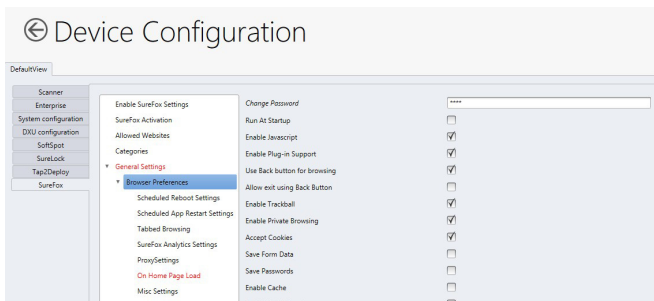

SureFox

Change the SureLock and/or SureFox Password

After completing the above steps, you can enter the new password in the **Change Password** field.

SureLock

SureFox

Command Line DXU Execution

DXU allows for command line execution, i.e. via a .bat batch file. This is a convenient method for configuring multiple devices without the need to launch the UI or the DXU desktop, or to configure Simplified Deploy. This configuration can happen via USB or through Wi-Fi (assuming the device has already been connected to the Wi-Fi network).

Optionally, you can perform Simplified Deploy with a manifest file, without using Scan2Deploy.

Usage

DXU command line options are:

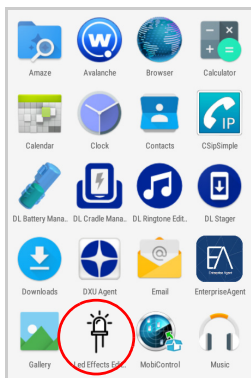

- DXU -put <filename.dxu>
Applies configuration file to any USB connected devices
- DXU -put <filename.dxu> -ip <ipaddress>
Applies configuration file to device of specific IP address
- DXU -man <filename.ini>
Applies Simplified Deploy to any USB connected devices
- DXU -man <filename.ini> -ip <ipaddress>
Applies Simplified Deploy to device of specific IP address

To output a log file, add the optional parameter:

-log <logfile>.

Led Effects Editor

This application allows to create and save customized LED effects.
Tap **All Apps > Led Effects Editor**.

Tap **Led ID** to select the LED you want to assign to the effect.

Tap **Led Action** to configure the LED behaviour.

Tap **Save** to name and save the effect.

ProximityCalibrate

The proximity sensor measures the distance of a surface from the Joya Touch A6' data capture window (see the picture below).

ProximityCalibrate is a wizard that helps you to calibrate the sensor's distance measurement.

SoftSpot™

Datalogic's SoftSpot technology is a user-definable "floating soft trigger" meant to provide easy access to the barcode scanner application and other frequently used functionalities on mobile scanning devices.

Tap the SoftSpot icon on the favorites tray or on the All Apps screen to launch SoftSpot:

Tap the SoftSpot to scan barcodes.

Enable/Disable SoftSpot

Enables/disables the SoftSpot.

Enable SoftSpot on boot

Select it to enable SoftSpot on boot.

Enable swipe to hide

Allows to hide the SoftSpot from the screen by swiping it up in the Notification/Status bar.

Enable vibrator

Enables the vibrator.

Enable auto-transparency

If selected, the SoftSpot turns transparent automatically when it is not used.

Maximum visibility

Sets the SoftSpot transparency level when it is used or when the auto-transparency feature is not enabled.

Minimum visibility

Sets the SoftSpot transparency level when it is not used and the auto-transparency feature is enabled.

Speed of transparency

Sets the lapse of time it takes for the SoftSpot to turn transparent.

To enable the Continuous Scan mode and scan barcodes consecutively, tap **SCAN** and select the **Enable on double tap** check box:

Then double-tap the SoftSpot. Tap one more time to stop laser emission.

You can also configure the SoftSpot from the DXU. For more details on DXU, [Desktop Configuration Utility \(DXU\)](#) on page 103.

Tools

USB ADB Driver & USB CD-ROM

USB connection allows to read and write files on both the internal storage memory and the external storage memory, but doesn't allow to install applications.

Android Debug Bridge (ADB) is a command-line utility included with Google's Android SDK and you can use it to control your device over USB from a computer, copy files back and forth, install and uninstall apps and run shell commands.

Use the USB CD-ROM to install the Windows drivers and then launch ADB to run a shell using the following tool command prompt:
Start/Datalogic Android/Support/Device.

SDK Add-on

SDK add-on is a library which extends the Android SDK and development tools.

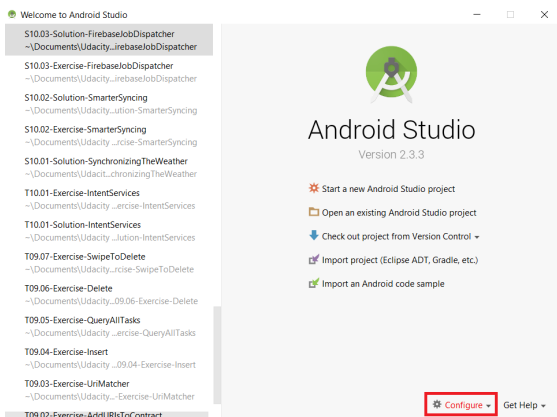

Install SDK Add-on

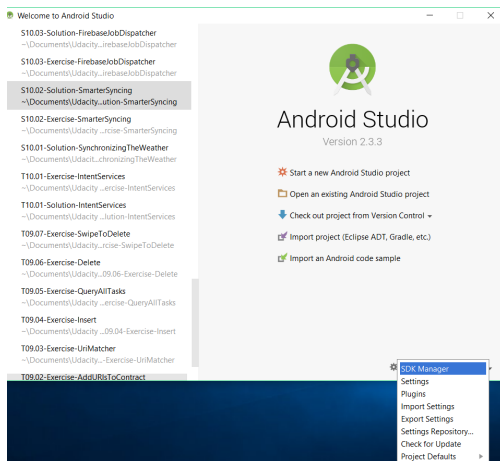

To install Datalogic SDK™ with Android Add-on, please insert the following URL in Android Studio or Eclipse ADT:

<https://datalogic.github.io/android-sdk-addon/addon.xml>.

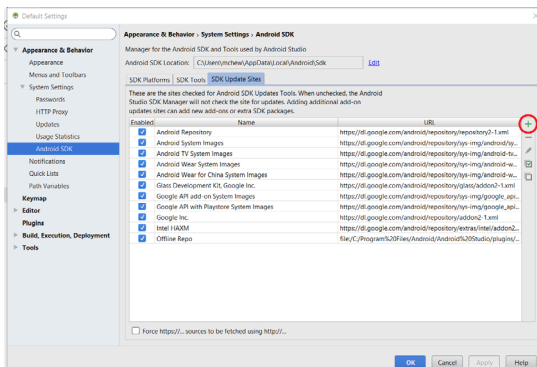

or follow the detailed steps (valid for Android Studio versions released on the stable, there is no support for the beta channel):

1. From Android Studio launch window, click on **Configure > Android SDK Manager** to open Android SDK Manager:

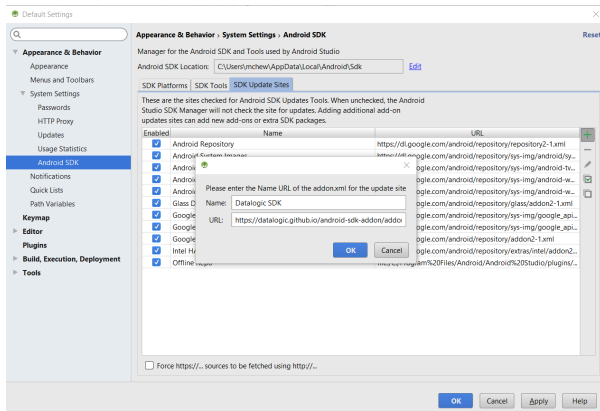

2. Select the tab SDK Update Sites and click the "+" icon on the right-side toolbar:

- In the new window insert the following URL, optionally a name and the press **OK**:

<https://datalogic.github.io/android-sdk-addon/addon.xml>.

- Now select the tab **SDK Platforms** and check the checkbox on the bottom right **Show Package Details**. Under the section **Android 6.0 (API 23)** Datalogic SDK should appear. To install it, select the Datalogic SDK checkbox and a small icon on the left should appear:

Default Settings

Appearance & Behavior - System Settings - Android SDK

Manager for the Android SDK and Tools used by Android Studio

Android SDK Location: C:\Users\mchen\AppData\Local\Android\Sdk [Edit](#)

SDK Platforms SDK Tools SDK Update Sites

Each Android SDK Platform package includes the Android platform and sources pertaining to an API level by default. Once installed, Android Studio will automatically check for updates. Check "show package details" to display individual SDK components.

Name	API Level	Revision	Status

Show Package Details

OK Cancel Apply Help

Please notice that you must also install the **Android API platform matching your Android version (i.e. API 23 is required to compile apps for Android 6.0)**.

- Click on the button **Apply** to install the selected packages. Once the installation is complete, the **Status** of the Datalogic SDK changes from **Not installed** to **Installed**:

Install Android™ Studio

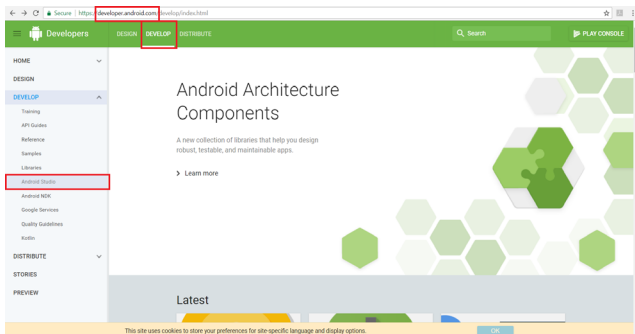

To install Android Studio follow the steps described at:

<http://developer.android.com/sdk/index.html>. No specific version is required.

Install Android SDK

Visit the website <https://developer.android.com> for current instructions to install the Android SDK (the steps below may change).

1. Click on **Develop** > **Android Studio**:

2. Scroll down to the downloads near the bottom to find the SDK tools.
3. Select the correct download for your operating system. For the Windows installer, follow the instructions on the screen. For other unzipped archives, you need to run the **Android** executable in the **tools** directory. This will bring up the Android SDK Manager and prompt you to download the tools you need.

See the [Android Studio release notes](#).

← Back to Developers

DOWNLOAD

FEATURES

USER GUIDE

PREVIEW

Get just the command line tools

If you do not need Android Studio, you can download the basic Android command line tools below. You can use the included [sdkmanager](#) to download other SDK packages.

These tools are included in Android Studio.

Platform	SDK tools package	Size	SHA-256 checksum
Windows	sdk-tools-windows-3859097.zip	132 MB (138,449,982 bytes)	71603745a746789b485c06e7af041e071e9860c5186f7a4e59134987182
Mac	sdk-tools-darwin-3859097.zip	82 MB (86,182,133 bytes)	4a81754a760fe88dba74d99c364b09b31c53d57626f982355e61d5fe4bd99
Linux	sdk-tools-linux-3859097.zip	130 MB (136,964,098 bytes)	444622c8ca097253da48d5175e57373cae9fa95ca18119cbacef1c1bea0

See the [SDK tools release notes](#).

This site uses cookies to store your preferences for site-specific language and display options.

Install ADB Driver

1. Install Android SDK Manager ("Install Android SDK" on page -205 for further information).
2. Download and install the Google USB Driver (see <https://developer.android.com> for further information).

NOTE

Before installing the Google USB Driver, ensure you have installed the Datalogic plug-in.

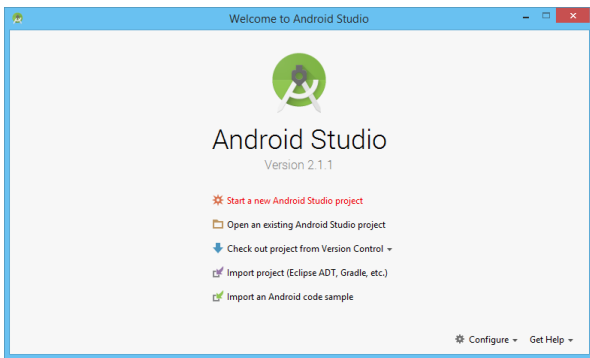

3. In order to use ADB with your device connected over USB, you must enable USB debugging in the device system settings. To enable Android **Developer options**, go to **Settings > Device info** and tap on the **Build Number** section 7 times. After the 7th tap, the Developer options will be unlocked and available. Go back to **Settings** and tap **Developer options**. Select **USB debugging**:

4. Use a CD-Rom Installer to debug the ADB driver and read the Joya Touch A6 as an ADB device.

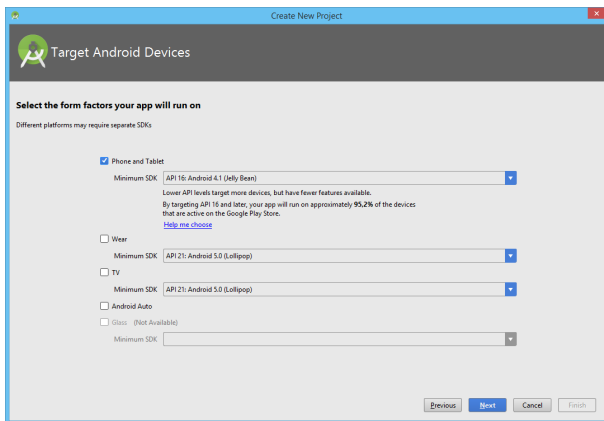

Create a New Application with Android Studio

When creating a new project, choose **Start a new Android Studio project** from the Android Studio Welcome screen.

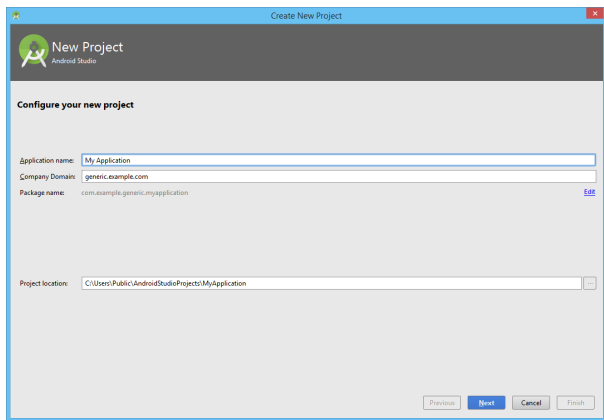

Please notice that you must select the Minimum SDK level in accordance with the installed Android firmware version on your Datalogic device. For example, a device running Android Jelly Bean, can support applications built with Minimum SDK level selected up to 16. Greater values will produce an incompatible Android app.

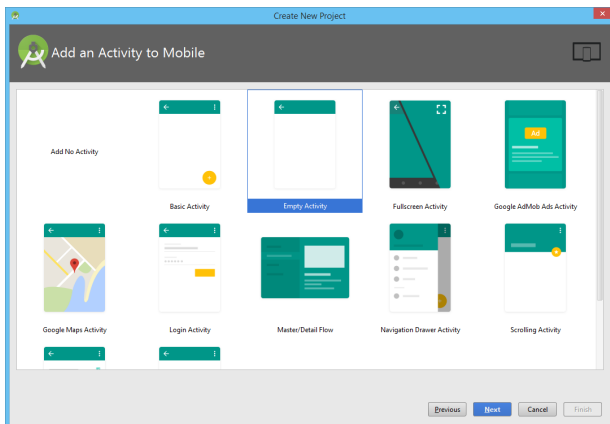

When creating a new project choose the most correct Minimum SDK API level and press **Next**.

The wizard will guide through the creation of a new application.

With a choice of basic layout and Activity styles.

Complete the guided wizard and let the IDE settle down. A generic Android application, runnable on all Android devices, is now ready for development.

Avalanche

Avalanche is an infrastructure and mobile device management system. From a central console, you can locate and manage devices, including monitoring and distributing software and firmware. Network security features allow you to manage wireless settings (including encryption and authentication), and apply those settings on demand throughout the network. Avalanche also provides tools for managing maps, alerts, and reports.

For further details, refer to the Ivanti website:

<https://www.ivanti.com/support/product-documentation>.

CSIPSimple

CSipSimple is a Voice over Internet Protocol (VoIP) application for Google Android operating system using the Session Initiation Protocol (SIP). For more details, visit the website:

<http://www.voipvoip.com/android/csipsimple.html>.

SureLock

With **SureLock** you can secure and lock the Joya Touch A6 to ensure its responsible usage, improve productivity and reduce maintenance cost.

It allows access to only required applications and prevents the users from making any intended or unintended changes in the device. Only administrators can access the password protected settings to either modify lockdown configurations or exit the lockdown.

You can use DXU Desktop to remotely accept the SureFox and SureLock EULAs for all devices consuming a.dxu configuration file ("Configuring SureLock and SureFox" on page -189).

A Datalogic Standard version of **SureLock** is preloaded on the Joya Touch A6. You have the option to upgrade to the Advanced version by contacting 42Gears: <http://www.42gears.com/contact.html>.

Refer to the [SureLock Documentation for Android](#) on the 42Gears website for further details on **SureLock**.

SureFox

Businesses require use of browsers to run web applications on devices with Android and there may be situations when controlled web access for the users is required to ensure appropriate use of the devices.

SureFox creates locked browsing environment in your devices with Android making them apt for deployments as public web kiosks or as field devices for your mobile workforce. You can specify the websites that you wish to allow. **SureFox** will then block all other websites and allow the users to browse the allowed websites in locked down kiosk mode.

You can use DXU Desktop to remotely accept the SureFox and SureLock EULAs for all devices consuming a.dxu configuration file ("Configuring SureLock and SureFox" on page -189).

A Datalogic Standard version of **SureFox** is preloaded on the Joya Touch A6. You have the option to upgrade to the Advanced version by contacting 42Gears: <http://www.42gears.com/contact.html>.

Refer to the [SureFox Documentation for Android](#) on the 42Gears website for further details on **SureFox**.

MobiControl

SOTI MobiControl is an enterprise mobility management solution that secures and manages the Joya Touch A6 throughout its entire lifecycle, from deployment to retirement. It controls all aspects of business mobility — tracking physical assets, managing applications and content, as well as keeping the device and the data safe and secure.

For further details, refer to the SOTI website:

<https://www.soti.net/products/mobicontrol>.

NOTES

Data Capture

The Joya Touch A6 has an integrated imager that collects data by scanning barcodes.

See [Scanner Settings](#) on page 67 for instructions on configuring the scanner settings.

Imager Data Capture

The imager uses digital camera technology to take a digital picture of a barcode, the image is stored in memory and software decoding algorithms are executed to extract the data from the image. The omni-directional scanning does not require that the operator orient the barcode to align with the scan pattern.

To scan a barcode symbol:

1. Point the scan window at the barcode from a distance within the reading range.
2. Press the Scan Key or the Scan Trigger. The imager projects a laser aiming pattern similar to those used on cameras. The aiming pattern is used to position the barcode or object within the field of view.

3. Center the symbol in any orientation within the aiming pattern. Ensure the entire symbol is within the rectangular area formed by the brackets in the aiming pattern, then either wait for the timeout or release the Scan Key to capture the image. A red beam illuminates the symbol, which is captured and decoded.

Linear Bar Code

2D Matrix Symbol

If the scan has been successful:

- If enabled, the good read LED turns on (see [LED Indicators on page 51](#) and [Led Notifications on page 63](#)).

- If enabled, the good read beep plays.
- If enabled, the Green Spot projects a green spot onto the barcode image.
- The barcode type and content data display on the screen.

The field of view changes its size as you move the reader closer or farther away from the barcode. The aiming pattern is smaller when the imager is closer to the barcode and larger when it is farther from the barcode.

Scan symbols with smaller bars or elements (mil size) closer to the unit and those with larger bars or elements (mil size) farther from the unit. Hold the Joya Touch A6 between two and nine inches (depending on symbol density) from the symbol, centering the aiming pattern cross hairs on the symbol.

NOTES

Connections

USB Connection

USB Direct Connection

You can use any standard micro USB cable to directly connect the Datalogic Joya Touch A6 to a host computer to transfer data through the USB interface.

Host
Computer

Joya Touch A6

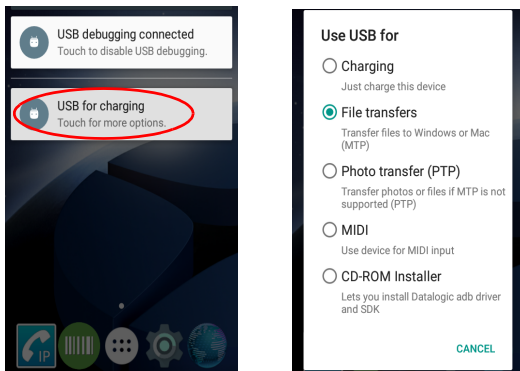

Standard Micro USB
cable type USB A –
micro USB B

Connection through the cable complies to USB 2.0 standard.

To enable file transfer after you connected your device, scroll down the notification bar and tap the **USB for charging** notification:

Tap **File transfers** if you want to transfer all types of media to and from the Joya Touch A6, or tap **Photo transfer (PTP)** if you just want to transfer the pictures.

Wi-Fi Connection

The Joya Touch A6 Wi-Fi 802.11 a/b/g/n radio models can communicate with the host using the on-board radio frequency component and an Access Point connected to the host computer. To launch this utility you can tap the specific icon if it's visible on the taskbar or you can open Connections folder or Control Panel from desktop.

Wi-Fi module is on by default, in order to avoid wasting energy, you can switch it off using the Wireless Communications applet.

NOTE

Suspending the terminal powers off the 802.11 a/b/g/n radio and drops the radio connection. When the terminal resumes, depending on the radio power mode and security protocol selected, it may take up to 30 seconds for the 802.11 a/b/g/n radio driver to re-associate the radio to the network.

NOTE

Area coverage and radio performance may vary, due to environmental conditions, access point types or interference caused by other devices (microwave ovens, radio transmitters, etc.).

Bluetooth® Serial Connection

Joya Touch A6 models can communicate with a Bluetooth® printer, using the on-board Bluetooth® module.

NOTE

Bluetooth® is only available in Joya Touch A6 plus models.

NOTE

In order to extend battery life, the Bluetooth® module is off by default. If you need to have Bluetooth® working, the module must be powered on.

NOTE

Suspending the terminal powers off the Bluetooth® radio and drops the Bluetooth® connection. When the terminal resumes, it takes approximately 10 seconds for the Bluetooth® radio driver to re-initialize the radio.

NOTE

Area coverage and Bluetooth® radio performance may vary, due to environmental conditions or interference caused by other devices (microwave ovens, radio transmitters, etc.).

Wireless and Radio Frequencies Warnings

WARNING

Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications or attachments could damage the product and may violate laws and regulations.

Most modern electronic equipment is shielded from RF signals. However, certain electronic equipment may not be shielded against the RF signals generated by Joya Touch A6.

Datalogic recommends persons with pacemakers or other medical devices to follow the same recommendations provided by Health Industry Manufacturers Associations for mobile phones.

Persons with pacemakers:

- Should ALWAYS keep this device more than twenty five (25) cm from their pacemaker and/or any other medical device;
- Should not carry this device in a breast pocket;
- Should keep the device at the opposite side of the pacemaker and/or any other medical device;
- Should turn this device OFF or move it immediately AWAY if there is any reason to suspect that interference is taking place.
- Should ALWAYS read pacemaker or any other medical device guides or should consult the manufacturer of the medical device to determine if it is adequately shielded from external RF energy.

In case of doubt concerning the use of wireless devices with an implanted medical device, contact your doctor.

WARNING

Turn this device **OFF** in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may use equipment that could be sensitive to external RF energy.

WARNING

RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles. Check with the manufacturer or its representative regarding your vehicle. You should also consult the manufacturer of any equipment that has been added to your vehicle.

WARNING

An air bag inflates with great force. **DO NOT** place objects, including either installed or portable wireless equipment, in the area over the air bag or in the air bag deployment area. If a vehicle's wireless equipment is improperly installed and the air bag inflates, serious injury could result.

**WARNING**

Turn off the device when in any area with a potentially explosive atmosphere. Observe restrictions and follow closely any laws, regulations, warnings and best practices on the use of radio equipment near fuel storage areas or fuel distribution areas, chemical plants or where any operation involves use of explosive materials.

Do not store or carry flammable liquids, explosive gases or materials with the device or its parts or accessories.

Areas with a potentially explosive atmosphere are often, but not always, clearly marked or shown.

Sparks in such areas could cause an explosion or fire, resulting in injury or even death.

NOTES

Technical Features

Technical Data

Physical Characteristics	
Colors (standard)	Enclosures: White Battery Covers: Blue
Color Customization	Topcase and battery covers (both handheld and pistol grip models), and Scan Trigger (pistol grip models) are available in various standard or custom colors
Display	4.3 inch full touch TFT-LCD color display; FWVGA: 854 x 480 pixels; 16M colors, LED backlight
Touch Screen	Capacitive, multi-touch, Gorilla® Glass 3
Physical Keys	Handheld: Scan fully programmable key Pistol Grip: Scan key and scan trigger, both fully programmable
Lighting	Software programmable, lights at the bottom of the battery cover
Dimensions	Handheld: 14.5 x 7.7 x 3.4 cm / 5.7 x 3.0 x 1.3 in Pistol Grip: 14.5 x 7.7 x 11.6 cm / 5.7 x 3.0 x 4.5 in
Weight (with battery)	Handheld: 275.0 g / 9.7 oz Pistol Grip: 305.0 g / 10.7 oz

Electrical	
Battery	Replaceable battery pack with rechargeable Li-Ion batteries; 3.7 V; 3,000 mAh (11.3 Watt-hours)
Wireless Charging	Six charging profiles
Environmental	
Chemical Resistance	Isopropyl Alcohol, Hydrogen Peroxide, Clorox® Bleach, Super Sani-Cloth; applicable for both the device and cradles
Drop Resistance	Withstands repeated drops from 1.2 m / 4.0 ft onto plywood and 1.5 m / 5.0 ft onto plywood with the rubber boot accessory
Temperature	Operating: -10 to 50°C / 14 to 122°F
Interfaces	
Interfaces	USB 2.0 device (with standard Micro-USB connector)
User Interfaces	
Accelerometer	3-Axis accelerometer
SoftSpot Technology	Virtual trigger/Scan Key
Trigger	Pistol grip models only
Vibration	Software programmable - Haptic Effects

Wireless Communications	
Local Area Network (WLAN)	IEEE 802.11 a/b/g/n; Wi-Fi Security Standards: WEP, WPA/WPA2 PSK, 802.1x EAP Methods: PEAP/MSCHAPV2, PEAP/GTC, TLS, TTLS/PAP, TTLS/MSCHAP, TTLS/MSCHAPV2, TTLS/GTC, PWD
Personal Area Network (WPAN)	Bluetooth® wireless technology v4.0 - Dual Mode (Classic Bluetooth wireless technology and BLE available)
NFC Communication	NFC communication between device and cradle
Reading Performance	
Image Sensor	WVGA: 752 x 480 pixels
Light Source	Illumination: White or red LEDs (depending on model) Aiming: 650 nm VLD
Typical Depth of Field	Minimum distance determined by symbol length and scan angle. Printing resolution, contrast, and ambient light dependent. 1D barcode 5.0 mils: 6.5 to 21.0 cm / 2.6 to 8.2 in 1D barcode 13.0 mils: 5.5 to 39.0 cm / 2.2 to 15.2 in Data Matrix 15.0 mils: 4.0 to 25.0 cm / 1.6 to 9.8 in
Minimum Resolution	Linear codes at 3 mils; 2D codes at 5 mils
Reading Indicators	Loudspeaker (Polyphonic); Datalogic's patented "Green Spot" technology for visual good-read feedback; Vibrator; Good read LED
Print Contrast Minimum	25%
Scanning Angles	Pitch: $\pm 60^\circ$; Skew: $\pm 60^\circ$; Roll: up to $\pm 180^\circ$

Decoding Capability	
1D / Linear Codes	Auto discriminates all standard 1D codes including GS1 DataBar™ linear codes
2D Codes	Aztec Code, Data Matrix, MaxiCode, PDF417, MicroPDF417, Micro QR Code, QR Code
Postal Codes	Australian Post, Japanese Post, KIX Code, Royal Mail, USPS Intelligent Mail, USPS PLANET, USPS POSTNET
Digital Watermarks	Supports Digimarc® Barcode
Software	
Configuration and Maintenance	Datalogic X Platform Configuration Utility (DXU)
Development	Java and Xamarin SDK available
System	
Memory	System RAM: 2 GB; System Flash: 16 GB Flash Disk
CPU	Qualcomm Snapdragon 210
Operating System	Google Android 6.0 Marshmallow (field upgradeable to Android 7.1 Nougat)
Safety & Regulatory	
Agency Approvals	The product meets necessary safety and regulatory approvals for its intended use
Environmental Compliance	Complies to EU RoHS
Warranty	
Warranty	1-Year Factory Warranty

NOTES

Maintenance

Cleaning the Device

Periodically clean the Joya Touch A6 device, the Joya Touch Single Slot Docking and the Joya Touch 3-Slot Cradle using a soft cloth slightly dampened with only water, or alternatively with Isopropyl Alcohol (70%), Bleach (diluted 10:1) or Hydrogen Peroxide (stabilized, 3%).

Please note that both Bleach and Hydrogen Peroxide may damage your device if you don't use the correct dilution.

Do not use any other cleaning agents (e.g. different alcohol, abrasive or corrosive products, solvents) or abrasive pads to clean the device.

Do not spray or pour liquids directly onto the device.

The device is not water resistant. Keep it dry.

Ergonomic Recommendations

In order to avoid or minimize the potential risk of ergonomic injury follow the recommendations below. Consult with your local Health & Safety Manager to ensure that you are adhering to your company's safety programs to prevent employee injury.

- Reduce or eliminate repetitive motion
- Maintain a natural position
- Reduce or eliminate excessive force
- Keep objects that are used frequently within easy reach
- Perform tasks at correct heights
- Reduce or eliminate vibration
- Reduce or eliminate direct pressure
- Provide adjustable workstations
- Provide adequate clearance
- Provide a suitable working environment
- Improve work procedures.

Safety and Regulatory Information

NOTE

Read this manual carefully before performing any type of connection to the Joya Touch A6.

The user is responsible for any damage caused by incorrect use of the equipment or by inobservance of the indication supplied in this manual.

General Safety Rules

- Before using the device and the battery pack, read carefully the chapter [Battery](#) on page 15.
- Use only the components and accessories supplied by the manufacturer for the specific Joya Touch A6 being used.
- Do not attempt to disassemble the Joya Touch A6, as it does not contain parts that can be repaired by the user. Any tampering will invalidate the warranty.
- When replacing the battery pack or at the end of the operative life of the Joya Touch A6, disposal must be performed in compliance with the laws in force in your jurisdiction.
- Do not submerge the Joya Touch A6 in liquid products.
- For further information or support, refer to this manual and to the Datalogic web site: www.datalogic.com.

Power Supply

The device is intended to be supplied by a self-contained rechargeable Lithium Ion battery pack (UL listed LPS/SELV power source) and/or by UL Listed/CSA Certified Power Unit LPS/SELV power source which supplies power directly to the unit via the micro USB connector of the cable.

The device could be also used with Certified Accessories (Dock/Cradle) which supply Wireless power. The Dock/Cradle accessories are intended to be supplied by a UL Listed/CSA Certified Power Unit LPS/SELV rating 12V, min 5A power source which supplies power via the power connector of the cable.

Any changes or modifications to equipment, not expressly approved by Datalogic could void the user's authority to operate the equipment.

Laser Safety

The following information applies to Laser Aiming System, used on Joya Touch A6 Imager.

The laser light is visible to the human eye and is emitted from the window indicated in the figure below.

LASER LIGHT - DO NOT STARE INTO BEAM

CLASS 2 LASER PRODUCT

MAX OUTPUT RADIATION 1 mW

COMPLIANT WITH EN 60825-1:2007 and EN 60825-1:2014

The artwork below may be only a draft. Please refer to the label attached to the product for information about certification marks.

ENGLISH

The following information is provided to comply with the rules imposed by international authorities and refers to the correct use of your device.

STANDARD LASER SAFETY REGULATIONS

This product conforms to the applicable requirements of both CDRH 21 CFR 1040 and EN 60825-1 at the date of manufacture.

For installation, use and maintenance, it is not necessary to open the device.

WARNING

Do not attempt to open or otherwise service any components in the optics cavity. Opening or servicing any part of the optics cavity by unauthorized personnel may violate laser safety regulations. The optics system is a factory only repair item.

WARNING

Use of controls or adjustments or performance of procedures other than those specified herein may result in exposure to hazardous visible laser light.

The product utilizes a low-power laser diode. Although staring directly at the laser beam momentarily causes no known biological damage, avoid staring at the beam as one would with any very strong light source, such as the sun. Avoid shining laser light into any person's eye, even through reflective surfaces such as mirrors, etc.

WARNING

Use of optical systems with the scanner will increase eye hazard. Optical instruments include binoculars, microscopes, eye glasses and magnifying glasses.

ITALIANO

Le seguenti informazioni vengono fornite dietro direttive delle autorità internazionali e si riferiscono all'uso corretto del terminale.

NORMATIVE STANDARD PER LA SICUREZZA LASER

Questo prodotto risulta conforme alle normative vigenti sulla sicurezza laser alla data di produzione: CDRH 21 CFR 1040 e EN 60825-1.

Non si rende mai necessario aprire l'apparecchio per motivi di installazione, utilizzo o manutenzione

ATTENZIONE

Non tentare di accedere allo scomparto contenete i componenti ottici o di farne la manutenzione.

L'apertura dello scomparto, o la manutenzione di qualsiasi parte ottica da parte di personale non autorizzato, potrebbe violare le norme della sicurezza. Il sistema ottico può essere riparato solamente alla fabbrica.

ATTENZIONE

L'utilizzo di procedure o regolazioni differenti da quelle descritte nella documentazione può provocare un'esposizione pericolosa a luce laser visibile.

Il prodotto utilizza un diodo laser a bassa potenza. Sebbene non siano noti danni riportati dall'occhio umano in seguito ad una esposizione di breve durata, evitare di fissare il raggio laser così come si eviterebbe qualsiasi altra sorgente di luminosità intensa, ad esempio il sole. Evitare inoltre di dirigere il raggio laser negli occhi di un osservatore, anche attraverso superfici riflettenti come gli specchi.

ATTENZIONE

L'uso di strumenti ottici assieme allo scanner può aumentare il pericolo di danno agli occhi. Tali strumenti ottici includono cannocchiali, microscopi, occhiali e lenti di ingrandimento.

DEUTSCH

Die folgenden Informationen stimmen mit den Sicherheitshinweisen überein, die von internationalen Behörden auferlegt wurden, und sie beziehen sich auf den korrekten Gebrauch vom Terminal.

NORM FÜR DIE LASERSICHERHEIT

Dies Produkt entspricht am Tag der Herstellung den gültigen EN 60825-1 und CDRH 21 CFR 1040 Normen für die Lasersicherheit.

Es ist nicht notwendig, das Gerät wegen Betrieb oder Installations-, und Wartungs-Arbeiten zu öffnen.

ACHTUNG

Unter keinen Umständen darf versucht werden, die Komponenten im Optikhohlraum zu öffnen oder auf irgendwelche andere Weise zu warten. Das Öffnen bzw. Warten der Komponenten im Optikhohlraum durch unbefugtes Personal verstößt gegen die Laser-Sicherheitsbestimmungen. Das Optiksyst \ddot{u} m darf nur werkseitig repariert werden.

ACHTUNG

Jegliche Änderungen am Gerät sowie Vorgehensweisen, die nicht in dieser Betriebsanleitung beschreiben werden, können ein gefährliches Laserlicht verursachen.

Der Produkt benutzt eine Laserdiode. Obwohl zur Zeit keine Augenschäden von kurzen Einstrahlungen bekannt sind, sollten Sie es vermeiden für längere Zeit in den Laserstrahl zu schauen, genauso wenig wie in starke Lichtquellen (z.B. die Sonne). Vermeiden Sie es, den Laserstrahl weder gegen die Augen eines Beobachters, noch gegen reflektierende Oberflächen zu richten.

ACHTUNG

Die Verwendung von Optiksyst \ddot{u} men mit diesem Scanner erhöht die Gefahr einer Augenbeschädigung. Zu optischen Instrumenten gehören unter anderem Ferngläser, Mikroskope, Brillen und Vergrößerungsgläser.

FRANÇAIS

Les informations suivantes sont fournies selon les règles fixées par les autorités internationales et se réfèrent à une correcte utilisation du terminal.

NORMES DE SECURITE LASER

Ce produit est conforme aux normes de sécurité laser en vigueur à sa date de fabrication: CDRH 21 CFR 1040 s et EN 60825-1.

Il n'est pas nécessaire d'ouvrir l'appareil pour l'installation, l'utilisation ou l'entretien.

ATTENTION

Ne pas essayer d'ouvrir ou de réparer les composants de la cavité optique. L'ouverture de la cavité optique ou la réparation de ses composants par une personne non qualifiée peut entraîner le nonrespect des règles de sécurité relatives au laser. Le système optique ne peut être réparé qu'en usine.

ATTENTION

L'utilisation de procédures ou réglages différents de ceux donnés ici peut entraîner une dangereuse exposition à lumière laser visible.

Le produit utilise une diode laser. Aucun dommage aux yeux humains n'a été constaté à la suite d'une exposition au rayon laser. Eviter de regarder fixement le rayon, comme toute autre source lumineuse intense telle que le soleil. Eviter aussi de diriger le rayon vers les yeux d'un observateur, même à travers des surfaces réfléchissantes (miroirs, par exemple).

ATTENTION

L'utilisation d'instruments optiques avec le scanner augmente le danger pour les yeux. Les instruments optiques comprennent les jumelles, les microscopes, les lunettes et les verres grossissants.

ESPAÑOL

Las informaciones siguientes son presentadas en conformidad con las disposiciones de las autoridades internacionales y se refieren al uso correcto del terminal.

NORMATIVAS ESTÁNDAR PARA LA SEGURIDAD LÁSER

Este aparato resulta conforme a las normativas vigentes de seguridad láser a la fecha de producción: CDRH 21 CFR 1040 y EN 60825-1.

No es necesario abrir el aparato para la instalación, la utilización o la manutención.

ATENCIÓN

No intente abrir o de ninguna manera dar servicio a ninguno de los componentes del receptáculo óptico. Abrir o dar servicio a las piezas del receptáculo óptico por parte del personal no autorizado podría ser una violación a los reglamentos de seguridad. El sistema óptico se puede reparar en la fábrica solamente.

ATENCIÓN

La utilización de procedimientos o regulaciones diferentes de aquellas descritas en la documentación puede causar una exposición peligrosa a la luz láser visible.

El aparato utiliza un diodo láser a baja potencia. No son notorios daños a los ojos humanos a consecuencia de una exposición de corta duración. Eviten de mirar fijo el rayo láser así como evitarían cualquiera otra fuente de luminosidad intensa, por ejemplo el sol. Además, eviten de dirigir el rayo láser hacia los ojos de un observador, también a través de superficies reflectantes como los espejos.

**ATENCIÓN**

El uso de sistemas ópticos con el escáner aumentará el riesgo de daños oculares. Los instrumentos ópticos incluyen binoculares, microscopios, lentes y lupas.

LED Class

LED illuminator integrated in the imager engine is classified as 'EXEMPT RISK GROUP' according to IEC62471.

Marking and European Economic Area (EEA)

In radio systems configured with mobile computers and access points, the frequencies to be used must be allowed by the spectrum authorities of the specific country in which the installation takes place. Be absolutely sure that the system frequencies are correctly set to be compliant with the spectrum requirements of the country. The Radio modules used in this product automatically adapt to the frequencies set by the system and do not require any parameter settings.

Simplified EU Declaration of Conformity

Hereby, Datalogic S.r.l. declares that the radio equipment type Joya Touch A6 is in compliance with Directive 2014/53/EU. The full text of the EU declaration of conformity is available at the following internet address: www.datalogic.com.

Statement of Compliance

cs Česky [Czech]	Datalogic S.r.l. tímto prohlašuje, že tento Joya Touch A6 je ve shodě se základními požadavky a dalšími příslušnými ustanoveními směrnice 2014/53/EU - 2011/65/EU.
da Dansk [Danish]	Undertegnede Datalogic S.r.l. erklærer herved, at følgende udstyr Joya Touch A6 overholder de væsentlige krav og øvrige relevante krav i direktiv 2014/53/EU - 2011/65/EU.
de Deutsch [German]	Hiermit erklart Datalogic S.r.l., dass sich das Gerat Joya Touch A6 in Übereinstimmung mit den grundlegenden Anforderungen und den übrigen einschlägigen Bestimmungen der Richtlinie 2014/53/EU - 2011/65/EU befindet.
et Eesti [Estonian]	Käesolevaga kinnitab Datalogic S.r.l. seadme Joya Touch A6 vastavust direktiivi 2014/53/EU - 2011/65/EU põhinõuetele ja nimetatud direktiivist tulenevatele teistele asjakohastele sätetele.
en English	Hereby, Datalogic S.r.l. declares that Joya Touch A6 is in compliance with the essential requirements and other relevant provisions of Directive 2014/53/EU and 2011/65/EU.
es Español [Spanish]	Por medio de la presente Datalogic S.r.l. declara que el Joya Touch A6 cumple con los requisitos esenciales y cualesquiera otras disposiciones aplicables o exigibles de la Directiva 2014/53/EU - 2011/65/EU.

el Ελληνική [Greek]	ΜΕ ΤΗΝ ΠΑΡΟΥΣΑ Datalogic S.r.l. ΔΗΛΩΝΕΙ ΟΤΙ Joya Touch A6 ΣΥΜΜΟΡΦΩΝΕΤΑΙ ΠΡΟΣ ΤΙΣ ΟΥΣΙΩΔΕΙΣ ΑΠΑΙΤΗΣΕΙΣ ΚΑΙ ΤΙΣ ΛΟΙΠΕΣ ΣΧΕΤΙΚΕΣ ΔΙΑΤΑΞΕΙΣ ΤΗΣ ΟΔΗΓΙΑΣ 2014/53/EU - 2011/65/EU.
fr Français [French]	Par la présente Datalogic S.r.l. déclare que l'appareil Joya Touch A6 est conforme aux exigences essentielles et aux autres dispositions pertinentes de la directive 2014/53/EU - 2011/65/EU.
it Italiano [Italian]	Con la presente Datalogic S.r.l. dichiara che questo Joya Touch A6 è conforme ai requisiti essenziali ed alle altre disposizioni pertinenti stabilite dalla direttiva 2014/53/EU - 2011/65/EU.
Latviski [Latvian]	Ar so Datalogic S.r.l. deklare, ka Joya Touch A6 atbilst Direktīvas 2014/53/EU - 2011/65/EU būtiskajām prasībām un citiem ar to saistītajiem noteikumiem.
Lietuvių [Lithuanian]	Šiuo Datalogic S.r.l. deklaruoja, kad šis Joya Touch A6 atitinka esminius reikalavimus ir kitas 2014/53/EU - 2011/65/EU Direktyvos nuostatas.
nl Nederlands [Dutch]	Hierbij verklaart Datalogic S.r.l. dat het toestel Joya Touch A6 in overeenstemming is met de essentiële eisen en de andere relevante bepalingen van richtlijn 2014/53/EU - 2011/65/EU.
mt Malti [Maltese]	Hawnhekk, Datalogic S.r.l., jiddikjara li dan Joya Touch A6 jikkonforma mal-ħtiġijiet essenzjali u ma provvedimenti oħrajn relevanti li hemm fid-Dirrettiva 2014/53/EU - 2011/65/EU.
hu Magyar [Hungarian]	Alulírott, Datalogic S.r.l. nyilatkozom, hogy a Joya Touch A6 megfelel a vonatkozó alapvető követelményeknek és az 2014/53/EU - 2011/65/EU irányelv egyéb előírásainak.
pl Polski [Polish]	Niniejszym Datalogic S.r.l. oświadcza, że Joya Touch A6 jest zgodny z zasadniczymi wymogami oraz pozostałymi stosownymi postanowieniami Dyrektywy 2014/53/EU - 2011/65/EU.
pt Português [Portuguese]	Datalogic S.r.l. declara que este Joya Touch A6 está conforme com os requisitos essenciais e outras disposições da Directiva 2014/53/EU - 2011/65/EU.

sl Slovensko [Slovenian]	Datalogic S.r.l. izjavlja, da je ta Joya Touch A6 v skladu z bistvenimi zahtevami in ostalimi relevantnimi določili direktive 2014/53/EU - 2011/65/EU.
Slovenský [Slovak]	Datalogic S.r.l. týmto vyhlasuje, že Joya Touch A6 spĺňa základné požiadavky a všetky príslušné ustanovenia Smernice 2014/53/EU - 2011/65/EU.
fi Suomi [Finnish]	Datalogic S.r.l. vakuuttaa täten että Joya Touch A6 tyyppinen laite on direktiivin 2014/53/EU - 2011/65/EU oleellisten vaatimusten ja sitä koskevien direktiivin muiden ehtojen mukainen.
sv Svenska [Swedish]	Härmed intygar Datalogic S.r.l. att denna Joya Touch A6 står i överensstämmelse med de väsentliga egenskapskrav och övriga relevanta bestämmelser som framgår av direktiv 2014/53/EU - 2011/65/EU.

Information for the User

Restrictions of use in all EU Countries. This device is restricted to indoor use when operated in the 5.15 to 5.25 GHz frequency range.

Radiofrequency Radiation Exposure Information

This device was tested for handheld and body-worn conditions, according to international Standards covering human exposure to electromagnetic fields from radio devices.

More information about the relevant Standards for SAR measurement methods and procedures may be found in the CE DoC included in the product user manual available at www.datalogic.com website and at the FCC public listing www.fcc.gov under the FCC IDs specified in the FCC/IC labeling section.

Europe

This device is compliant with SAR limits for general population/uncontrolled exposure specified in Council Recommendation 1999/519/EC Annex II.

US and Canada

For body worn operation, this device has been tested and meets the FCC/ISED RF exposure guidelines for use with an accessory that contains no metal and the positions the handset a minimum of 0 cm from the body. Use of other enhancements may not ensure compliance with FCC/ISED RF exposure guidelines.

Cet équipement peut être installé et utilisé à une distance minimale de 0 cm entre le radiateur et votre corps.

The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter, expect those approved under the filing.

Radio Technologies and Frequency Bands

Joya Touch A6 incorporates the following radio technologies and supports the corresponding Frequencies and Radio-Frequency transmitted power, as specified below:

Europe

Radio Technology	Frequency Bands	Max Radio-Frequency Transmitted Power
WLAN IEEE 802.11b/g/n (HT-20)	2.4GHz Frequency Bands: 2.412 - 2.472 MHz	18.64 dBm
WLAN IEEE 802.11a/n (HT-20)	5GHz Frequency Bands: 5.180 - 5.240 MHz 5.260 - 5.320 MHz 5.500 - 5.700 MHz	18.62 dBm
Bluetooth V4.0 - EDR/LE	2402 - 2480 MHz	9.14 dBm

US and Canada

Radio Technology	Frequency Bands
WLAN IEEE 802.11b/g/n (HT-20)	2.4GHz Frequency Bands: 2.412 - 2.462 MHz
WLAN IEEE 802.11a/n (HT-20)	5GHz Frequency Bands: 5.180 - 5.240 MHz 5.260 - 5.320 MHz 5.500 - 5.700 MHz 5.735 - 5.825 MHz
Bluetooth V4.0 - EDR/LE	2402 - 2480 MHz

FCC/IC Labeling

Handheld variants with WLAN+BT radios	Pistol Grip variants with WLAN+BT radios
 <p>FCC ID: U4GJTAWB IC: 3862E-JTAWB HVIN: JTAWB HH</p>	 <p>FCC ID: U4GJTAWB IC: 3862E-JTAWB HVIN: JTAWB GUN</p>

FCC Compliance

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTICE:

This device is restricted to indoor use when operated in the 5.15 to 5.25 GHz frequency range. Changes or modifications made to this equipment not expressly approved by Datalogic S.r.l. may void the FCC authorization to operate this equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to

radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

ISED Compliance

NOTICE:

This device complies with Industry Canada licence-exempt RSS standard(s).

Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:

- (1) l'appareil ne doit pas produire de brouillage, et
- (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

CAUTION:

(i) the device for operation in the band 5150-5250 MHz is only for indoor use to reduce the potential for harmful interference to co-channel mobile satellite systems;

(ii) high-power radars are allocated as primary users (i.e. priority users) of the bands 5250-5350MHz and 5650-5850 MHz and that these radars could cause interference and/or damage to LE-LAN devices.

AVERTISSEMENT:

(i) les dispositifs fonctionnant dans la bande 5 150-5 250 MHz sont réservés uniquement pour une utilisation à l'intérieur afin de réduire les risques de brouillage préjudiciable aux systèmes de satellites mobiles utilisant les mêmes canaux;

(ii) les utilisateurs de radars de haute puissance sont désignés utilisateurs principaux (c.-à-d., qu'ils ont la priorité) pour les bandes 5 250-5 350 MHz et 5 650-5 850 MHz et que ces radars pourraient causer du brouillage et/ou des dommages aux dispositifs LAN-EL.

Radiofrequency Radiation Exposure Information

This device was tested for handheld and body-worn conditions, according to international Standards covering human exposure to electromagnetic fields from radio devices.

More information about the relevant Standards for SAR measurement methods and procedures may be found in the CE DoC included in the product user manual available at www.datalogic.com website and at the FCC public listing www.fcc.gov under the FCC IDs specified in the FCC/IC labeling section.

Europe

This device is compliant with SAR limits for general population/uncontrolled exposure specified in Council Recommendation 1999/519/EC Annex II.

US and Canada

For body worn operation, this device has been tested and meets the FCC/ISED RF exposure guidelines for use with an accessory that contains no metal and the positions the handset a minimum of 0 cm from the body. Use of other enhancements may not ensure compliance with FCC/ISED RF exposure guidelines.

Cet équipement peut être installé et utilisé à une distance minimale de 0 cm entre le radiateur et votre corps.

The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter, expect those approved under the filing.

WEEE Compliance

Information for the user

At the end of its useful life, the product marked with the crossed out wheeled wastebin must be disposed of separately from urban waste.

For more detailed information about disposal, contact the supplier that provided you with the product in question or consult the dedicated section at the website <http://www.datalogic.com>.

Informazione per gli utenti

L'apparecchiatura che riporta il simbolo del bidone barrato deve essere smaltita, alla fine della sua vita utile, separatamente dai rifiuti urbani.

Per maggiori dettagli sulle modalità di smaltimento, contattare il Fornitore dal quale è stata acquistata l'apparecchiatura o consultare la sezione dedicata sul sito <http://www.datalogic.com>.

Information aux utilisateurs

Au terme de sa vie utile, le produit qui porte le symbole d'un caisson à ordures barré ne doit pas être éliminé avec les déchets urbains.

Pour obtenir des informations complémentaires concernant l'élimination, veuillez contacter le fournisseur auprès duquel vous avez acheté le produit ou consulter la section consacrée au site Web <http://www.datalogic.com>.

Información para el usuario

Al final de su vida útil, el producto marcado con un símbolo de contenedor de basura móvil tachado no debe eliminarse junto a los desechos urbanos.

Para obtener una información más detallada sobre la eliminación, por favor, póngase en contacto con el proveedor donde lo compró o consultar la sección dedicada en el Web site <http://www.datalogic.com>.

Benutzerinformation bezüglich

Am Ende des Gerätelebenszyklus darf das Produkt nicht über den städtischen Hausmüll entsorgt werden. Eine entsprechende Mülltrennung ist erforderlich.

Weitere Informationen zu dieser Richtlinie erhalten sie von ihrem Lieferanten über den sie das Produkt erworben haben, oder besuchen sie unsere Homepage unter <http://www.datalogic.com>.

Support Through the Website

Datalogic provides several services as well as technical support through its website.

Log on to www.datalogic.com and click on the **SUPPORT** link which gives you access to:

Downloads by selecting your product model from the dropdown list in the Search by Product field for specific Data Sheets, Manuals, Software & Utilities, and Drawings;

Repair Program for On-Line Return Material Authorizations (RMAs) plus Repair Center contact information;

Customer Service containing details about Maintenance Agreements;

Technical Support through email or phone.

Reference Documentation

For further information regarding Joya Touch A6 refer to the SDK Help on-line and to the Joya Touch A6 User's Manual, downloadable from our website www.datalogic.com.

Warranty Terms and Conditions

The warranty period is 1 year for the device and 90 days for consumables (e.g. battery, power supply, cable etc.) from date of purchase at our company.

NOTES

Glossary

Access Point

A networking hardware device that allows a Wi-Fi device to connect to a wired network. The AP usually connects to a router (via a wired network) as a standalone device, but it can also be an integral component of the router itself. An AP is differentiated from a hotspot, which is the physical location where Wi-Fi access to a WLAN is available.

ASCII

American Standard Code for Information Interchange. A 7 bit-plus-parity code representing 128 letters, numerals, punctuation marks and control characters. It is a standard data transmission code in the U.S.

Barcode

A pattern of variable-width bars and spaces which represents numeric or alphanumeric data in binary form. The general format of a barcode symbol consists of a leading margin, start character, data or message character, check character (if any), stop character, and trailing margin. Within this framework, each recognizable symbology uses its own unique format.

Bit

Binary digit. One bit is the basic unit of binary information. Generally, eight consecutive bits compose one byte of data. The pattern of 0 and 1 values within the byte determines its meaning.

Bluetooth@

A standard radio technology using a proprietary protocol. The onboard Bluetooth@ module in the device is compatible with the 2.1 protocol with Enhanced Data Rate (EDR).

Boot

The process a computer goes through when it starts. During boot, the computer can run self-diagnostic tests and configure hardware and software.

Byte

On an addressable boundary, eight adjacent binary digits (0 and 1) combined in a pattern to represent a specific character or numeric value. Bits are numbered from the right, 0 through 7, with bit 0 the low-order bit. One byte in memory can be used to store one ASCII character.

CDRH

Center for Devices and Radiological Health. A federal agency responsible for regulating laser product safety. This agency specifies various laser operation classes based on power output during operation.

Character

A pattern of bars and spaces which either directly represents data or indicates a control function, such as a number, letter, punctuation mark, or communications control contained in a message.

Decode

To recognize a barcode symbology (e.g., Codabar, Code 128, Code 3 of 9, UPC/EAN, etc.) and convert the content of the barcode scanned from a visual pattern into electronic data.

Density (Barcode Density)

The number of characters represented per unit of measurement (e.g., characters per inch).

Depth of Field (DOF)

The portion of a scene that appears acceptably sharp in the image. Although a lens can precisely focus at only one distance, the decrease in sharpness is gradual on each side of the focused distance, so that within the DOF, the unsharpness is imperceptible under normal viewing conditions.

Dock

A dock is used for charging the terminal battery and for communicating with a host computer, and provides a storage place for the terminal when not in use.

Firmware

A software program or set of instructions programmed on a hardware device. It provides the necessary instructions for how the device communicates with the other computer hardware. Firmware is typically stored in the flash ROM of a hardware device. While ROM is "read-only memory," flash ROM can be erased and rewritten because it is actually a type of flash memory.

Flash Memory

Non-volatile memory for storing application and configuration files.

Host

A computer that serves other mobile computers in a network, providing services such as network control, database access, special programs, supervisory programs, or programming languages.

IEEE 802.11

A set of standards carrying out wireless local area network (WLAN) computer communication in the 2.4, 3.6 and 5 GHz frequency bands. They are created and maintained by the IEEE LAN/MAN Standards Committee.

IP

Internet Protocol. The IP part of the TCP/IP communications protocol. IP implements the network layer (layer 3) of the protocol, which contains a network address and is used to route a message to a different network or subnetwork. IP accepts 'packets' from the layer 4 transport protocol (TCP or UDP), adds its own header to it and delivers a 'datagram' to the layer 2 data link protocol. It may also break the packet into fragments to support the maximum transmission unit (MTU) of the network.

IP Address

(Internet Protocol address) The address of a computer attached to an IP network. Every client and server station must have a unique IP address. A 32-bit address used by a computer on a IP network. Client workstations have either a permanent address or one that is dynamically assigned to them each session. IP addresses are written as four sets of numbers separated by periods; for example, 204.171.64.2.

Laser

Light Amplification by Stimulated Emission of Radiation. The laser is an intense light source. Light from a laser is all the same frequency, unlike the output of an incandescent bulb. Laser light is typically coherent and has a high energy density.

Laser Diode

A gallium-arsenide semiconductor type of laser connected to a power source to generate a laser beam. This laser type is a compact source of coherent light.

Light Emitting Diode (LED)

A low power electronic light source commonly used as an indicator light. It uses less power than an incandescent light bulb but more than a Liquid Crystal Display (LCD).

Liquid Crystal Display (LCD)

A display that uses liquid crystal sealed between two glass plates. The crystals are excited by precise electrical charges, causing them to reflect light outside according to their bias. They use little electricity and react relatively quickly. They require external light to reflect their information to the user.

MIL

1 mil = 1 thousandth of an inch.

Parameter

A variable that can have different values assigned to it.

RAM

Random Access memory. Data in RAM can be accessed in random order, and quickly written and read.

Resolution

The narrowest element dimension which is distinguished by a particular reading device or printed with a particular device or method.

RF

Radio Frequency.

Scanner

An electronic device used to scan barcode symbols and produce a digitized pattern that corresponds to the bars and spaces of the symbol. Its three main components are:

- Light source (laser or photoelectric cell) - illuminates a barcode.
- Photodetector - registers the difference in reflected light (more light reflected from spaces).
- Signal conditioning circuit - transforms optical detector output into a digitized bar pattern.

SDK

Software Development Kit.

Symbol

A scannable unit that encodes data within the conventions of a certain symbology, usually including start/stop characters, quiet zones, data characters and check characters.

Symbology

The structural rules and conventions for representing data within a particular barcode type (e.g. UPC/EAN, Code 39, PDF417, etc.).

USB

Universal Serial Bus. Type of serial bus that allows peripheral devices (disks, modems, printers, digitizers, data gloves, etc.) to be easily connected to a computer. A 'plug-and-play' interface, it allows a device to be added without an adapter card and without rebooting the computer (the latter is known as hot-plugging). The USB standard, developed by several major computer and

telecommunications companies, supports data-transfer speeds up to 12 megabits per second, multiple data streams, and up to 127 peripherals.

Voice over IP (VOIP)

Voice over Internet Protocol (also voice over IP, VoIP or IP telephony) is a methodology and group of technologies for the delivery of voice communications and multimedia sessions over Internet Protocol (IP) networks, such as the Internet. The terms Internet telephony, broadband telephony, and broadband phone service specifically refer to the provisioning of communications services (voice, fax, SMS, voice-messaging) over the public Internet, rather than via the public switched telephone network (PSTN).

WLAN

A Wireless Local Area Network links devices via a wireless distribution method (typically spread-spectrum or OFDM radio), and usually provides a connection through an access point to the wider internet. This gives users the mobility to move around within a local coverage area and still be connected to the network.

WPAN

A Wireless Personal Area Network is a personal area network - a network for interconnecting devices centered around an individual person's workspace - in which the connections are wireless. Typically, a wireless personal area network uses some technology that permits communication within about 10 meters - in other words, a very short range.
