Introduction

For more than 40 years the Washington Natural Heritage Program (WNHP) has maintained a list of Washington plant species of conservation concern. Each of these species is ranked at the global and state scale following the standardized protocol of the NatureServe network (Faber-Langendoen et al. 2012). The Species of Conservation Concern help inform conservation decisions relating to rare plants on federal, state, private, and tribal lands (WDNR 2018).

The Species of Conservation Concern list is periodically updated as new information becomes available on the status and distribution of rare plants in Washington. The following is an update of the July 2019 list (WNHP 2019). Three species have been dropped from the 2019 list, and 8 have been added. New species are indicated by a * preceding the species name (status changes are underlined for new data or crossed ~~through~~ for newly recognized errors).

The 2021 changes are summarized below:

Species Added to 2021 List

Boechera atrorubens
Cryptantha grandiflora
Erythranthe scouleri
Lomatium klickitatense
Nuttallanthus canadensis (split from *N. texanus*)
Pedicularis bracteosa var. *siifolia*
Pinus albicaulis
Potentilla jepsonii var. *kluanensis*
Sabulina basaltica

Species Dropped from 2019 List

Potentilla glaucophylla var. *perdissecta*: WA reports based on misidentifications
Rotala ramosior: More common than once suspected
Sporobolus compositus var. *compositus*: More common than once suspected

Nomenclature Changes from 2019 List

Synthyris lanuginosa is now *Veronica dissecta* ssp. *lanuginosa*
Synthyris schizantha is now *Veronica schizantha*

Appendix A contains information on the heritage rank, status, habitat, distribution, and management for each species. The definition and codes for each of these attributes are briefly described below:

Species/Common Name: Species are organized alphabetically by their scientific name. Nomenclature mostly follows Hitchcock and Cronquist (2018). Pertinent synonyms are included in parentheses. Common names follow the USDA Plants database (<http://plants.usda.gov>) or NatureServe (<http://explorer.natureserve.org>).

Heritage Rank: WNHP uses the ranking system developed by NatureServe to assess global and state conservation status of each plant species, subspecies, and variety. Taxa are ranked on a scale of 1 to 5 (from highest to lowest conservation concern).

- G = Global Rank: rangewide status of a full species
- T = Trinomial Rank: rangewide status of a subspecies or variety
- S = State Rank: status of a species, subspecies, or variety within the state of Washington
- 1 = Critically Imperiled – at very high risk of extirpation due to very restricted range, very few occurrences, very steep declines, very severe threats, or other factors
- 2 = Imperiled – at high risk of extirpation due to restricted range, few occurrences, steep declines, severe threats, or other factors
- 3 = Vulnerable – at moderate risk of extirpation due to a fairly restricted range, relatively few occurrences, recent and widespread declines, threats, or other factors
- 4 = Apparently secure – at fairly low risk of extirpation due to an extensive range or many occurrences, but with possible cause for some concern as a result of local recent declines, threats, or other factors
- 5 = Secure – at very low risk of extirpation due to a very extensive range, abundant occurrences, and little to no concern from decline or threats
- H = Historical– known from only historical occurrences (prior to 1978) but still with some hope of rediscovery
- X = Presumed Extirpated – not relocated since 1978 despite intensive searches and virtually no likelihood of rediscovery
- U = Unrankable – lack of information or substantially conflicting information about status
- NR = Not Ranked – rank not assessed yet
- Q = Questionable – questions exist about the taxonomic validity of a species, subspecies, or variety
- ? = Questionable – questions exist about the assigned G, T, or S rank of a taxon
- [] = indicates a recommended, but not yet accepted, rank.

State Status: Washington state status is assigned by WNHP based on the matrix in Table 1. Categories include:

- Endang = Endangered, in danger of becoming extinct or extirpated from Washington
- Threat = Threatened, likely to become Endangered in Washington
- Sens = Sensitive, vulnerable or declining and could become Threatened or Endangered in Washington
- Extirp = possibly extinct or extirpated in Washington (includes state historical species)

Federal Status: Under the US Endangered Species Act (ESA), the US Fish and Wildlife Service recognizes four categories:

- Endang = Endangered. A species, subspecies, or variety in danger of extinction throughout all or a significant portion of its range.
- Threat = Threatened. A species, subspecies, or variety likely to become Endangered in the foreseeable future
- Prop = Proposed. A species, subspecies, or variety formally proposed for listing as Endangered or Threatened (a proposal has been published in the Federal Register, but not a final rule)

Table 1. Matrix for classifying species of conservation concern as state of Washington Endangered, Threatened, Sensitive, or Extirpated. T ranks can apply to any G rank of equal or higher number (i.e. G2T2 or G5T3, but not G1T3). A lower T rank supersedes a higher G rank (ie. G5T3 is scored based on T3). Blended ranks are rounded down (i.e. G2G3 = G2). * indicates a species needs to be evaluated further to determine whether it warrants Sensitive status.

Natural Heritage Rank	State Status
G1/S1, G2/S1, G3/S1, T1/S1, T2S1, T3S1	Endangered
G2/S2, G3/S2, T2/S2, T3/S2	Threatened
G3/S3*, G4/S1, G4/S2, G4/S3*, G5/S1, G5/S2, G5/S3*, T3/S3*, T4/S1, T4/S2, T4/S3*, T5/S1, T5/S2, T5/S3*	Sensitive
SH, SX (regardless of G or T rank)	Extirpated
G4/S3*, G4/S4, G5/S3*, G5/S4, G5/S5, T4/S3*, T4/S4, T5/S4, T5/S5	Not of Concern

Cand = Candidate. A species, subspecies, or variety being evaluated by USFWS for potential listing as Threatened or Endangered under the ESA, but no formal proposal has been published yet.

The Interagency Special Status and Sensitive Species Program (ISSSSP) of the US Forest Service (USFS) and Bureau of Land Management (BLM) in Washington and Oregon updated its list of Sensitive species in 2021 (ISSSSP 2021).

B-Sens = BLM Sensitive; all USFWS candidate and delisted species and WNHP species of concern ranked S1, S1S2, S1S3, S2, or S2S3 found on at least one BLM managed area in Washington.

F-Sens = Forest Service Sensitive: all USFWS candidate and delisted species and WNHP species of concern ranked S1, S1S2, S1S3, S2, or S2S3 found on at least one USFS managed area in Washington.

Distribution (Dist.) Pattern: Species rarity is often correlated with geographic distribution patterns. The following patterns can be recognized in Washington:

LocEnd = Local Endemic; global range of taxon is less than 16,500 km² or about 1 degree of latitude x 2 degrees of longitude (about the size of an average county)

RegEnd = Regional Endemic; global range of taxon is between 16,500 to 250,000 km² (or an area about the size of the state of Washington)

Disjunct = Disjunct; globally widespread but state population is isolated from the main contiguous range by a gap or more than 500 km

Periph = Peripheral; globally widespread but Washington population is at the margin of the main contiguous range of the taxon

Sparse = Sparse; widely distributed across the state but with relatively few populations (less than 20)

Widesp = Widespread; widely distributed globally and in Washington, with more than 20 populations in the state.

County: Three-letter codes are used to document the distribution of plant species by county (Figure 1). Vague or unconfirmed reports are indicated by ?.

- | | | |
|----------------|--------------------|-------------------|
| Ada = Adams | Grh = Grays Harbor | Pie = Pierce |
| Aso = Asotin | Isl = Island | Saj = San Juan |
| Ben = Benton | Jef = Jefferson | Skg = Skagit |
| Che = Chelan | Kin = King | Skm = Skamania |
| Clk = Clark | Kli = Klickitat | Sno = Snohomish |
| Clm = Clallam | Ktp = Kitsap | Spo = Spokane |
| Col = Columbia | Ktt = Kittitas | Ste = Stevens |
| Cow = Cowlitz | Lew = Lewis | Thu = Thurston |
| Dou = Douglas | Lin = Lincoln | Waw = Walla Walla |
| Fer = Ferry | Mas = Mason | Whc = Whatcom |
| Fra = Franklin | Oka = Okanogan | Whk = Wahkiakum |
| Gar = Garfield | Pac = Pacific | Wht = Whitman |
| Gra = Grant | Peo = Pend Oreille | Yak = Yakima |

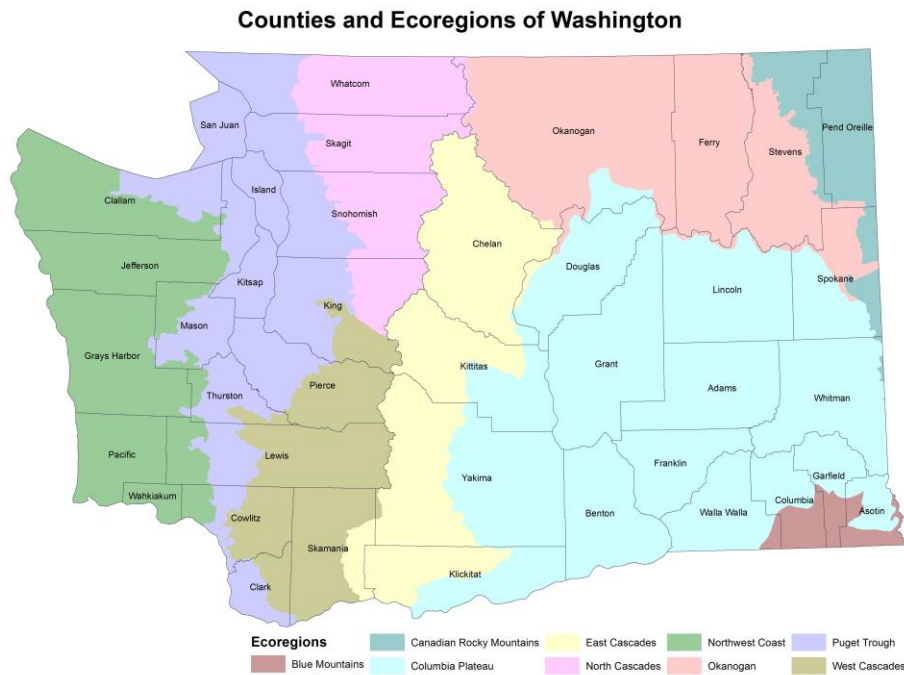

Figure 1. Washington counties and ecoregions.

Ecoregion: Ecoregions are biologically-defined geographic areas with similar environmental, physiographic, or vegetation patterns. WNHP follows the classification of Camp and Gamon (2011). Two-letter codes are used for ecoregion names (Figure 1). Vague or unconfirmed reports are indicated by ?.

- | | | |
|-----------------------|---------------------|------------------------------|
| BM = Blue Mountains | EC = East Cascades | PC = Pacific Northwest Coast |
| CP = Columbia Plateau | NC = North Cascades | PT = Puget Trough |
| CR = Canadian Rockies | OK = Okanogan | WC = West Cascades |

Ecological Systems: Developed by NatureServe, Ecological Systems represent recurring groups of natural upland and wetland plant communities found in similar climatic and physical environments and influenced by similar ecological processes. About 90 Ecological Systems are recognized in Washington (Rocchio and Crawford 2015).

For brevity, the following abbreviations are used for the biogeographic region of each Ecological System (the first part of each system's formal name). These are:

CB = Columbia Basin	NCP = Northern Columbia Plateau
CP = Columbia Plateau	NP = North Pacific
EC = East Cascades	NRM = Northern Rocky Mountain
IMB = Intermountain Basins	RM = Rocky Mountain
M = Modoc	TP = Temperate Pacific
NA = North American	WV = Willamette Valley

Managed Area: Major state, federal, or tribal land management areas are included when known. Blank listings indicate that a species is only known from private lands or state trust lands. A “?” indicates that presence within a management area is not confirmed. Complete managed area information, or data specific to individual plant occurrences, can be obtained from WNHP (www.dnr.wa.gov/natural-heritage-program). The following abbreviations are used:

ACEC = Area of Critical Environmental Concern
AFB = Air Force Base (Dept. of Defense)
BLM = Bureau of Land Management
BSA = Biological Study Area (Washington State University)
CF = Community Forest
ERP = Environmental Research Park (nuclear reservation)
JB = Joint Base (Dept. of Defense)
NAP = Natural Area Preserve (Washington Dept of Natural Resources)
NF = National Forest
NHP = National Historical Park
NM = National Monument
NP = National Park
NRCA = Natural Resources Conservation Area (Washington Dept of Natural Resources)
NRA = National Recreation Area
NSA = National Scenic Area
NVM = National Volcanic Monument
NWR = National Wildlife Refuge
PUD = Public Utility District
RNA = Research Natural Area
SF = State Forest
SP = State Park
SWA = State Wildlife Area (Washington Dept of Fish & Wildlife)
TC = Training Center (Dept of Defense)
WA = Wilderness Area

Acknowledgments

Thanks to the following individuals for contributing new data and recommendations on species ranks: Carlo Abbruzzese, Ed Alverson, Joe Arnett, Laurel Baldwin, Susan Ballinger, Katy Beck, Matt Below, Laura Blomfield, Molly Boyter, Bec Braisted, Tom Brannon, Karen Brimacombe, Paula Brooks, Tom Brumbelow, Keyna Bugner, Janet Burcham, Amy Cabral, Tara Callaway, Kimberly Carlson, Mickie Chamness, Alex Chmielewski, Janet Coles, Kelli Cordell, Mark Darrach, Nate Dietrich, Peter Dunwiddie, Rich Dwelkotte, Tatiana Dreisbach, Richard Easterly, Mark Egger, Kathleen Foley, Joan Frazee, Kim Frymire, Wendy Gibble, David Giblyn, Rod Gilbert, Bridget Glass, Ann Gray, Erica Heinlen, Carol Hughes, Beau Johnson, Heidi Jump, Stacy Kinsell, Sarah Krock, Linda Kunze, Helen Lau, Ben Legler, Joe LeMoine, Peter Lesica, Ed Lisowski, Larry Loftis, Lauri Malmquist, Amber Martens, Adam Martin, Kelli Van Norman, Emily Orling, Von Pope, Tynan Ramm-Granberg, Randi Riggs, Joe Rocchio, Kayla Saager, Debra Salstrom, Sarah Shank, Mark Sheehan, Paul Slichter, Kathleen Smayda, Pene Speaks, Nick Teague, George Thornton, Andrea Thorpe, Ron Tressler, Jenny von Reis, Dana Visalli, Ann Weinmann, Fred Weinmann, Barry Wendling, Ariel Whitacre, David Wilderman, David Woodall, Alex Wright, Carolyn Wright, and Peter Zika. Special thanks to all of the UW RareCare volunteers (40 or more dedicated citizen scientists) for contributing data. Jasa Holt, database specialist with the WNHP assisted with data entry and editing. Jake Kleinknecht of WNHP created the state map in Figure 1. Irene Weber, Tynan Ramm-Granberg, and Joe Rocchio of WNHP helped produce the crosswalk between rare plant habitat and Ecological Systems.
