**A century of Proven
Filtration Expertise
and Innovation**

For 100 years, Donaldson has helped customers around the world to meet their evolving filtration needs with a broad spectrum of products and technologies.

Our innovative filtration solutions cover all possible on-road heavy duty applications, ensuring the optimal performance of your vehicle with minimal downtime and maintenance.

Donaldson[®]
FILTRATION SOLUTIONS

Donaldson offers a full range of filtration and exhaust system products for truck and bus equipment. Our products enhance engine and equipment performance while protecting the environment in which they operate.

OEM's around the world choose Donaldson for first fit applications. Durable, rugged and built for the long haul, Donaldson replacement filters are manufactured to the same quality specifications as the original.

Fuel Filtration

- ▶ Expanded line of fuel filters protect engine components and extend equipment life.
- ▶ Includes a full complement of filters to fit Cummins® engines, Racor® fuel systems and DAVCO® Fuel Pro® 380/382/482 systems.
- ▶ Twist&Drain™ valves turn the complicated task of removing water into an easy process.

Hydraulic and Transmission Filtration

- ▶ Offering a broad line of spin-on, cartridge style and in-tank hydraulic filters – including high, medium and low pressure options – that protect transmissions, machinery and components in hundreds of applications.
- ▶ Complete line of hydraulic accessories to accommodate virtually any mobile application.
- ▶ Donaldson Duramax® filters are the highest rated medium pressure filters available.

Lube Filtration

- ▶ Donaldson lube filters keep engine oil clean by capturing contaminants that can cause engine damage.
- ▶ With coverage for a full range of popular engines, Donaldson lube filters meet or exceed application requirements.

Coolant Filtration

- ▶ Donaldson coolant filters remove contaminants and maintain cooling system balance – helping to keep today's hot-running engines cool and reducing downtime.

Donaldson Clean Solutions™

- ▶ Filter your fuel prior to entering your vehicle following our Clean. Protect. Polish.™

Air Filtration

- ▶ PowerCore® technology delivers improved filtration performance in a smaller package
 - Straight-through fluted design for greater efficiency
 - Offers better engine protection with no media movement, expansion, contraction or bunching
 - Contamination encapsulation makes servicing easier
 - Over 10 million sold, over 10 years in service on heavy-duty on- and off -road equipment.
- ▶ A full line of air intake systems, replacement parts and accessories for new and retrofit applications – in a variety of styles, sizes, materials and performance specifications.
- ▶ Donaldson cabin air filters improve air quality by removing allergens and pollutants before they enter the truck cab.

PowerCore®
A Donaldson Filtration Technology

Mufflers & Exhaust Accessories

- ▶ For more than 50 years, Donaldson has been a leading supplier of exhaust systems, components and accessories for medium and heavy-duty diesel powered trucks and equipment.

Your Total System Supplier

Count on Donaldson to have the right filters, mufflers and accessories for your engines and equipment. Our filtration solutions optimize on-road performance and reduce maintenance costs.

PRODUCT HIGHLIGHT:

Replacement element for Mercedes-Benz Actros*

This air filtration element is designed for the Mercedes-Benz Actros with filter elements: A0040946804 and A0040946904. We have combined two of our state-of-the-art in-house technologies for this element, PowerCore® Filtration Technology and 'flame retardant' Ultra-Web® media technology to meet and exceed OE specifications.

PowerCore® Filtration Technology

- ▶ Maintain high performance in a smaller space.
- ▶ Invented by Donaldson.

Vehicle design is moving from classic to aerodynamic. This means less under-hood space, highly airflow and other emission requirements with hotter engines... Therefore Donaldson developed PowerCore® Filtration Technology, to do more in less space and to allow system optimization.

The element has been designed with plastic shell that is integrated into the seal for a rigid structure that guarantees the perfect seal and fit.

Ultra-Web®

Donaldson introduced Ultra-Web® Technology to industrial applications more than 30 years ago and to the diesel engine market 20 years ago.

The robust nature of its manufacturing process coupled with its patented chemistry means Ultra-Web® Technology provides a durable filtration solution in the high temperature and humid environments experienced by diesel engines.

Ultra-Web Technology offers a higher initial efficiency compared to standard cellulose media, has very high efficiency throughout a filter's life, provides excellent loading in sub-micron particulate (e.g. exhaust soot), and can even be pulse-cleaned in applications such as military vehicles.

* Mercedes-Benz and Actros are registered trademarks of Daimler AG.

PRODUCT HIGHLIGHT:

Replacement elements for DAF and Scania

The Donaldson replacement air filter elements are equipped with cellulose flame retardant media and come standard with the RadialSeal™ technology.

Scania G-series & R-series

For the Scania filter elements, recognized by their flower shaped cover, Donaldson has released the aftermarket filter elements. The preferred fit elements have the expected flower shaped closed cover for optimal fitting into the air cleaner. To fit all models, the short and long and normal and flame retardant versions are available in our range. By using the radial seal technology, Donaldson pioneered 20 years ago, we ensure a reliable seal to protect your engine in all conditions. This industry changing sealing technology combines two components into one, the end cap and seal. this flexible sealing material creates that sure fit and simplifies the maintenance.

RadialSeal™

Pioneered by Donaldson over 20 years ago. The end cap and seal are combined into one, The flexible sealing material creates a sure-fit and simplifies maintenance. Filters have RadialSeal Sealing Technology that creates a reliable, critical seal and makes servicing easy.

DAF XF105

For the DAF XF105 elements, Donaldson has released the aftermarket filter elements. The filter has a conical design with a customized cover plate to fit the unique housing. The strong plastic inner liner provides rigidity and guides the element into the housing. Combined with the plastic outer liner, the element is robust yet light weighted. For optimal On-Road performance flame retardant and high efficient cellulose media is inserted, Although the element is conical with axial positioning systems, the sealing is achieved by the radial seal. The end cap and seal are combined into one, The flexible sealing material creates a sure-fit and simplifies maintenance.

PRODUCT HIGHLIGHT:

Engine Air Replacement Filters

Hard urethane

High-efficiency cellulose media

Offering media options specifically designed to perform across a wide range of heavy-duty diesel engine applications. Flame-retardant media in UL Recognized filter elements are available for transportation applications.

Vibration Resistant – Super-Tight Seal

Innovative Dual Compression tooth design

incorporates an inventive combination of soft and hard urethane that generates high levels of compression – maintaining secure RadialSeal integrity. Filter resists movement (even under heavy vibration) and delivers sure sealing under the most severe duty conditions.

RadialSeal™ design

Proven sure-fit Donaldson sealing system creates a reliable, vibration-resistant interface between the air cleaner and the filter. Slides easily on and off the outlet tube during servicing, making removal and replacement fast and simple.

Rigid structural support

Rigid structural support system (outer or inner liners) protect filters from damage or collapse in humid conditions or heavy vibration applications. Structure also protects the media from damage during servicing.

PRODUCT HIGHLIGHT:

Superior AdBlue® Filtration

In order to meet current and future Exhaust Emission Regulation, Selective Catalytic Reduction (SCR) are fitted with liquid AdBlue® (urea) injection systems which require high performance and reliable filtration. AdBlue® is a mixture of 32,5% urea and 67,5% demineralized water used to control NOx emissions. When injected in SCRs, NOx will convert into harmless N2 and H2O. Donaldson provides industry-leading filtration expertise for AdBlue® liquids.

Eco-Friendly, High-Performance Engine Liquid Products

Manufactured using eco-friendly construction relying on superior direct-bonding technology, these metal free elements utilize high grade Donaldson media such as our Synteq™ media technology which offers superior efficiency and high performance water separation. Filters using Synteq™ media also give engine fuel pumps and injectors a higher level of protection.

Synteq™ media

Donaldson's third generation of Synteq™ fuel filter water separator media uses both cellulose and melt-blown synthetic layers to achieve the highest levels of fuel filtration performance. This double-layered media has increased particulate holding capacity and is a high performance water separator. It has the ability for high efficiency emulsified water separation and can be used in both the suction and pressure sides of fuel systems – making it an ideal choice for critical applications or extended service intervals.

Direct bonding technology

Eco-friendly construction of this latest generation of engine liquid filters achieved in part by direct bonding technology offers significant benefits, including:

- ▶ Direct bonding of pleats in end cap material offers a higher effective media area, robustness and a leak-free element
- ▶ End cap material, reinforced with glass fibers, ensure higher strength, heat resistance and durability
- ▶ Ultrasonically welded seam seals provide a strong reliable bond
- ▶ 2K molded rubber seal for oil filters using a leak-tight material provide a reliable seal
- ▶ Laser marked identification presents clear printing that won't fade overtime or when exposed to hot liquids.

Donaldson Blue™ filters offer Twice the Distance Guarantee for on-highway fleets

Ultra-Web® Advantages

- ▶ Engineered to perform in extreme temperature and humidity conditions, unlike ordinary nanofibers.
- ▶ Proven in the real world – used on diesel engines for nearly two decades.
- ▶ On-highway trucks are guaranteed to go twice the distance compared to standard cellulose filters.

CELLULOSE MEDIA

Cellulose fibers are larger than Ultra-Web® nanofibers and have larger spaces between the fibers, which causes contaminant to load in the depth of the media and plug the airflow path, resulting in higher restriction and less capacity.

Conventional Cellulose

ULTRA-WEB® MEDIA

Ultra-Web® nanofibers have submicron diameters and small interfiber spaces, which result in more contaminant being captured on the surface of the media, promoting lower restriction and longer filter life.

ULTRA-WEB®
Nanofiber Filtration by Donaldson

Donaldson Blue™ Ultra-Web® Nanofiber Technology

Enlarged top views of media (at the same magnification)
White circles represent the diameter of a 2µ and a 5µ particle.

20 Years of Ultra-Web® Proof

For **on-road trucks**, Donaldson Blue™ air filters extend service intervals. We offer a **“Twice the Life”** guarantee for on-road vehicles. For **mining haul trucks**, air filters equipped with Ultra-Web® media deliver:

- Higher capacity (5x) for **longer filter life**
- Higher efficiency for **longer engine life**
- Extended maintenance intervals for **lower operating costs**.

Donaldson Gen2 DPF Pulse Cleaner

A simple, automated process that quickly and safely cleans diesel particulate filters

Diesel particulate filters (DPF) require routine cleaning to remove ash that builds up over time.

Most vehicles using a DPF system will have an on-board filter service monitor to indicate the filter condition and guide your DPF cleaning schedule. This unit is designed to clean the DPF by removing ash and soot in less than 15 minutes. It has no special power requirements and saves the on-going expense of a filter cleaning service.

IN SHORT

Ideal for truck and bus maintenance Facilities.

Features

- ▶ Uses high-volume, low-pressure pulse to dislodge unburned soot/ash from the DPF.
- ▶ Captures soot/ash in disposable ash receptacle.
- ▶ Self-contained cleaning system prevents contaminant from escaping into ambient air during operation.
- ▶ Short process time - 15 minutes or less.
- ▶ Unique hood design accommodates Donaldson and other DPFs (11-15" diameter and 13-20" length).
- ▶ Adapters for other DPF sizes and unique shapes are available.
- ▶ Standard electrical connection.
- ▶ Installation time - approximately 1 hour.

CE AND ATEX APPROVED

Donaldson Thermal Regenerator

High temperature cleaning process aimed at plugged diesel particulate filters

DPF are sensitive to exhaust temperature and can plug unless they are exposed to minimum exhaust temperatures that will burn soot they capture.

For extremely plugged filters which require a more intense cleaning process, Donaldson offers the DPF Thermal Regenerator, a specially- designed unit that removes hydrocarbons and unburned soot through a timed heating and cooling cycle.

Features

- ▶ Burns soot/hydrocarbons off filter.
- ▶ Heating cycle enhanced with low-volume, low pressure air pulse.
- ▶ Enclosed cleaning system.
- ▶ Collection hopper for ash.
- ▶ Built-in safety features.
- ▶ Accommodates competitive filters and Donaldson filters (DPF sizes from 11" to 15" diameter and up to 20" long).

Specifications

SIZE, WEIGHT AND CLEARANCE

711 mm Width x 1092 mm Depth x 1740 mm Height

Clearance requirement: 305 mm on all sides.

Unit Weight: 227 kg.

Requires and exterior vent connection to roof our outside wall.

ELECTRICAL AND COMPRESSED AIR REQUIREMENTS

Power Supply: Single phase 230 V - 32 A - 50 Hz

Clean, dry, compressed air source: 6.2 bars at 7 m³/h

REPLACEMENT PARTS

CE APPROVED

IN SHORT

Complementary action for extremely plugged particulate filters. Often necessary for vehicles used in urban areas.

* A diesel particulate filter must be pulse cleaned before you start the process and after it's complete.

Donaldson Engine Aftermarket Warranty

More information on the European Block Exemption can be found via ec.europa.eu > European Block Exemption
Donaldson Product Warranty is available via www.emea.donaldson.com/en/engine/support/datalibrary/063051.pdf

European Block Exemption

The EC Block Exemption Regulation (BER) gives motorists **for on-road vehicles** the flexibility to select where they can get their on-road vehicles serviced. The BER also covers service and maintenance during the warranty period.

Donaldson Confidence

We take the common sense approach. In the unlikely event that an engine issue is caused by a defect in the material or workmanship of a Donaldson filter, you have the protection of your Donaldson warranty. We'll make sure that your engine is returned to its previous condition.

And you can rest assured that the products we make use only the best components, media and technology, as well as the most consistent manufacturing processes, to ensure that every hardworking Donaldson filter you purchase is there to protect your engines and equipment.

You need effective filtration – and you want it all from one supplier

When it's time for filter replacement, Donaldson provides the right combination of quality and value to help you operate efficiently.

With Donaldson protection, your engines and equipment will operate longer between filter replacements, saving on costly downtime and repairs. And adding a Donaldson filtration system to your bulk fuel and lube storage will go even further toward protecting your equipment and maximizing uptime.

Depend on Donaldson when every operating hour counts!

You Have a Choice!

You can always choose top-quality Donaldson filters designed specifically for your engines and equipment, and as long as you change the filters according to the engine manufacturer's recommendations Donaldson filters will not void your engine manufacturer's warranty.

Donaldson Engine Aftermarket Warranty

Donaldson warrants its Aftermarket products against failure due to defects in materials and workmanship for the period specified under Terms and Conditions for the particular product.

Donaldson's obligation under this warranty covers replacing the failed product, including transportation charges, only. If the Donaldson product failure is the sole and direct cause of damage to the equipment on which the product was properly installed, Donaldson will reimburse reasonable costs to restore the equipment to the condition it was in immediately before the failure.

This warranty does not cover failure due to misapplication, misuse, abuse, neglect, rust through and corrosion (mufflers), improper service practices or non-Donaldson approved modifications. Engine and equipment manufacturers' warranties remain in effect when Donaldson products are used.

Donaldson must be notified in writing of any claims covered by this warranty within one year of the date of failure. Donaldson, at its discretion, will either physically visit the site where the alleged failure has been found or request that all parts, Donaldson and other relevant parts, be shipped prepaid to its General Office, in care of the Product Lab or as otherwise specified.

Terms & Conditions

Warranty coverage begins at the date of installation to the original end-user, and expires after the indicated period or kilometres, whichever occurs first.

More detailed information can be found in the Donaldson Europe Operating Guide or can be received upon request.

Donaldson Truck & Bus Catalogue Disclaimer

The Donaldson European Truck & Bus catalogue contains the most recent application data available. All major European Truck & Bus manufacturers are listed. Each section gives you the manufacturers model number, the engine fitted, the filter type and the Donaldson equivalent. At the end of this catalogue, a quick cross-reference section has been added.

The original partnumbers are given for comparison only. They are not meant to indicate the origin of parts. The information provided in this catalogue is compiled to the best of our knowledge. However, Donaldson makes no guarantee, either expressed or implied as to the accuracy of the data shown and can not be held responsible for any misapplication.

Donaldson operates a policy of continuously developing and improving its product offering and expanding its product line.

Please contact your nearest Donaldson distributor or dealer for applications not listed in this catalogue. This catalogue replaces and makes obsolete the previous Truck & Bus catalogue.
