## New Snake Species Found in Arunachal Pradesh

---

 [drishtias.com/printpdf/new-snake-species-found-in-arunachal-pradesh](https://drishtias.com/printpdf/new-snake-species-found-in-arunachal-pradesh)

### Why in News

---

Recently, a new species of **non-venomous burrowing snake**, named **Trachischium aptei** has been found in the forested area of the **Talley Valley Wildlife Sanctuary** near the town of **Ziro in Arunachal Pradesh**.

It belongs to a group of **fossorial (adapted to digging) snakes** that live mostly **underground**, and **surface mainly during or after a heavy monsoon shower**.
