Ordering Information

Supported Ordering Systems

1. MCC 7500 and MCC 7500E console equipment is ordered directly in COF. Note that no checking of the console design itself is done in COF.

Don't Forget These Items

1. Don't forget to order the headsets. They are not included with the headset jacks.
2. Don't forget to order both a top and a bottom for each headset.
3. Don't forget external power supplies and/or USB cables for USB mic and USB speaker.

Configuration

PC Hardware

Description	Full Description	Nomenclature	APC	Price
	Provides one HP Z2 workstation computer with the Windows 10			

Z2 G4 MINI WORKSTATION NON RETURNAB	Enterprise LTSC 2019 64 bit operating system. Also includes 1 keyboard, 1 optical mouse, 2 DisplayPort to DVI adapters, 2 DisplayPort to VGA adapters and disk(s) to allow for rebuild / recovery of your PC if ever needed. Does NOT include an internal DVD drive. NOTE THE Z2 WORKSTATION WITH WINDOWS 10 IS NOT RETURNABLE (REALLY!!).	TT3492	708	\$2,500.00
ZBOOK 15 G6 NON RETURNABLE	Provides one HP ZBook 15 G6 laptop with the Windows 10 Enterprise LTSC 2019 64 bit operating system. Includes external brick power supply with North American AC line cord, and Recovery Media. Does NOT include an internal DVD drive. NOTE: THIS LAPTOP IS NON-RETURNABLE (REALLY!!)	TT3721	708	\$4,000.00
STARTECH USB 3.0 TO GIGABIT ETHERNET ADAPTER	External Ethernet Adapter that connects to the computer via a USB connection. StarTech part number USB31000S.	DSUSB31000S	708	\$34.00
USB EXTERNAL DVD DRIVE	External DVD drive that connects to the computer via USB. May be used with computers that don't contain an internal DVD drive. HP part number F2B56AA.	DSF2B56AA	708	\$172.00
STARTECH 7 PORT USB	Provides a 7 port USB 3.0 hub with Type A ports. Includes an external power supply. May be			

3.0 HUB	used with the HP Z2 Mini computer. StarTech part number ST7300U3M. Replaced USB hub DDN1574.	DSST7300U3M	708	\$93.00
HP Z2 MINI ARM WALL VESA MOUNT	VESA compliant mounting sleeve for the HP Z2 workstation. HP part number Y7B61AA.	DSY7B61AA	708	\$77.00
TRACKBALL (ONLY PS/2 & USB COMPATIBLE)	Trackball is 'ruggedized' and 'RF-Verified' by Consoles Engineering. Order as a main line item.	DSCDN6171B	708	\$459.00
STARTECH 7.1 USB AUDIO ADAPTER SOUND CARD	Provides one USB-based external sound card. Startech part number ICUSBAUDIO7D.	DSICUSBAUDIO7D	708	\$47.00
MOUSE PADS 5 PACK	-	TDN9841	708	\$70.00

MSI Purpose-Built USB Microphone

Description	Full Description	Nomenclature	APC	Price
MICROPHONE, DESKTOP, USB	The B1951 microphone is specifically designed for use with the MCC 7500E console. It is a USB-based desktop microphone that connects directly to the dispatch positions's PC or USB hub (it does not connect to the AIM). It has an 18 inch flexible shaft, a transmit button, a monitor button and a noise cancelling feature that provides 20 dB of front to back noise attenuation.	B1951	754	\$445.00

MSI Purpose-Built USB Speaker

Description	Full Description	Nomenclature	APC	Price
	The B1952 speaker is specifically designed for use with			

SPEAKER, DESKTOP, USB	<p>the MCC 7500E console. The B1952 provides a single USB-based desktop speaker that connects directly to the dispatch positions's PC or USB hub (it does not connect to the AIM).</p> <p>Each speaker has its own individual volume control and can be used with an optional external power supply for up to 20 Watts of output power.</p>	B1952	754	\$485.00
ADD: POWER SUPPLY WITH DC CORD	Provides an external power supply brick for use with the B1952 speaker. Requires an AC Line Cord option to also be ordered.	CA03405AA	754	\$75.00
ADD: AC LINE CORD, NORTH AMERICA	Adds a North American AC line cord.	CA03406AA	754	\$13.00
ADD: AC LINE CORD, EUROPE	Adds a European AC line cord.	CA03407AA	754	\$18.00
ADD: AC LINE CORD, UK	Adds a UK AC line cord.	CA03408AA	754	\$39.00
ADD: AC LINE CORD, AUSTRALIA	Adds an Australian AC line cord.	CA03409AA	754	\$55.00
ADD: AC LINE CORD, BRAZIL	Adds a Brazilian AC line cord.	CA03410AA	754	\$35.00

USB Cables for MSI Purpose-Built Mic & Speaker

Description	Full Description	Nomenclature	APC	Price
ADD: USB CABLE, TYPE C TO TYPE C, 4.5M	Adds a 4.5 M Type C to Type C USB cable with a thumb screw on one end. Order as a sub-item to either MSI Purpose-Built Mic (B1951) or Speaker (B1952).	CA03412AA	754	\$39.00
ADD: USB CABLE, TYPE A TO TYPE C, 4.5M	Adds a 4.5 M Type A to Type C USB cable with a thumb screw on the "C" end. Order as a sub-item to either MSI Purpose-	CA03413AA	754	\$29.00

	Built Mic (B1951) or Speaker (B1952).

FRU, USB CABLE, TYPE A TO TYPE C, 4.5M	USB Type C to Type A cable with a thumb screw on the "C" end.	BKN2001	754	\$29.00
FRU, POWER SUPPLY WITH DC CORD	Power supply with DC cord but does not include an AC line cord.	BPN1030	754	\$150.00

Monitors

All monitors are [RF-Validated](#) by Console Engineering and are suitable for use with MCC 7500, MCC 5500 and MIP 5000 consoles.

All ISPO monitors are VESA compliant.

Image retention may occur when using LCD monitors in a 24/7, no-screensaver environment.

Please contact Shannon Fowler (Shannon.Fowler@motorolasolutions.com) for more information on the monitors listed on this page or if you need a monitor that isn't listed.

Motorola MCC 7500 Dispatch Console

-- Dispatch Positions, Dispatch API and Product Software --

Ordering Information

Features

The Motorola MCC 7500 Dispatch Console is a high tier IP dispatch console for use with ASTRO 25 radio systems. It supports an evolving feature set which includes the following features.

System Level Features

- Seamless IP Connectivity with Radio System
- Configured via Radio System Configuration Manager
- Full Participation in Radio System Fault Management
- Full Participation in Radio System Agency Partitioning
- Compatible with MKM 7000 Console Alias Manager
- Full Participation in Radio System Dynamic System Resilience (DSR)

ASTRO 25 Trunking Features

- Full Access to ASTRO 25 Trunked Radio System
- IMBE/AMBE Vocoder for ASTRO 25 Resources
- Full Support for Project 25 FDMA (Phase I) Operation
- Full Support for Project 25 TDMA (Phase II) Operation
- Trunked Talk Group Calls
- Trunked Announcement Group Calls
- Trunked Private Calls
- Trunked Call Alerts
- Trunked Emergency Alarms
- Trunked Emergency Calls
- Trunked Tactical/Normal
- Trunked Repeater On/Off
- Trunked Remote Monitor
- Trunked PTT ID and Alias

ASTRO 25 Conventional Features

- PTT ID and Alias
- Call Alert

- Emergency Alarm and Call
- Voice Selective Call
- Secure Key Select
- Received Key Display
- Momentary Key Override
- Radio Status Display
- Radio Message Display
- Remote Monitor
- Mixed Mode (Analog/Digital) Operation
- Secure Call
- Secure Keypad Select
- Autokey Key Display
- Radio Enable/Disable
- Radio Status Request
- Radio Check
- Ignore Mobile to Mobile Calls

MDC 1200 Conventional Features

- PTT ID and Alias
- Emergency Alarm
- Voice Selective Call
- Radio Status Display
- Radio Message Display
- Remote Monitor
- Call Alert
- Emergency Call
- Radio Enable/Disable
- Radio Status Request
- Radio Check
- Ignore Mobile to Mobile Calls

Analog Conventional Features

- Tone Remote Control
- Analog Talk & Listen
- Private Line (PL) Selection
- Wild Card I & II
- Monitor
- Supervisor Takeover (via Relay)
- RF Cross Mute
- E & M Control
- Frequency Selection
- Repeater On/Off
- Mute Second Receiver
- Line Operated Busy Light (LOBL)
- Main/Alternate Conventional Interfaces
- RF Cross Busy

General Secure Features

- Supports up to 60 Encrypted Calls Simultaneously
- Supports up to 6 Encryption Algorithms Simultaneously

- AES Algorithm
- DES-XL Algorithm
- DVP-XL Algorithm
- Multi-Select Cross-Mode Alert
- Receive Cross-Mode Indication
- Key Management via KVL
- Key Management via OTEK (Over The Ethernet Keying)
- DES-OFB Algorithm
- ADP Algorithm
- DVI-XL Algorithm
- Patch Cross-Mode Alert
- Clear Audio Alert
- Key Management via Store and Forward (KMF with KVL)

General Console Features

- Intuitive, Easy-to-Use Graphical User Interfaces (Elite or IED)
- Up to 8 Speakers
- Desk Microphone
- Instant Recall Recorder Port for Radio Audio
- Local Logging Recorder Port
- General Transmit
- Select/Unselect
- 15 Customizable Alert Tones (Trunking & Conventional)
- VU Meter (On Screen)
- Patch (Standard & Permanent)
- ACIM Link to Console
- Elite GUI is Highly Configurable to meet Unique Customer Needs
- Up to 2 Headsets
- Footswitch
- Instant Recall Recorder Port for Console Telephony Audio
- Telephone Headset Port (for radio & telephone on one headset)
- Instant Transmit
- Multi-Select
- Channel Marker (Trunking & Conventional)
- Integrated Tone Paging Encoder
- Generic Auxiliary Inputs & Outputs

Integrated Tone Paging Encoder Features

- Manual Individual Pages
- Manual Group Pages
- Sequential Paging Operation
- Pre-Defined Individual Pages
- Pre-Defined Group Pages
- Simultaneous Paging Operation

- Quick Page Buttons
- PL Stripping
- Quick Call II B - Tone & Voice
- Quick Call II D - Battery Saver
- Quick Call I
- Touch Code
- Single Tone 0.5
- Digital Dial 1 (1500 Hz)
- Digital Dial 3 (1500/2805)
- ASTRO 25 Conventional Call Alert
- Talk Extend
- "Selected Channel" Paging
- Quick Call II C - Tone Only
- Quick Call II E - Competitive
- Knox
- Motorola 5/6 Tone
- Single Tone 1.5
- Digital Dial 2 (2805 Hz)
- Trunked Call Alert
- MDC 1200 Call Alert

Enhanced Console Telephony Features

- Supports POTS and/or E1/T1 Connections
- Answer/Initiate Calls from Console GUI
- Dialing Keypad
- Configurable Ring Tones
- Caller ID
- Call Hold
- Call Forwarding
- Call Transfer
- Speed Dials
- Phone Books
- Patch Radio & Telephone
- Patch Go-Ahead Tones

VPM Features

- Supports up to 8 Speakers
- Supports up to 2 Headsets
- Supports one Desktop Microphone
- Supports one Footswitch
- Telephone Headset Port (for radio & telephone on one headset)
- Dedicated Private Auxiliary Inputs & Outputs
- Instant Recall Recorder Port for Console Telephony Audio
- Instant Recall Recorder Port for Radio Audio
- Local Logging Recorder Port
- External Paging Encoder Port
- Ethernet Connection between VPM and PC (up to 200 meters)
- Multiple Mounting Options

General Information

IMPORTANT NOTICE ABOUT MOTOROLA SOLUTIONS SOFTWARE SUPPORT POLICY

In line with the Software Support Policy (SwSP) for ASTRO based system software, orderability rules now include alignment to this Software Support Policy which sets a new framework of three periods of support from Ship Acceptance for that specific release.

The policy provides for a 4-year period of time, referred to as the 'Standard Support' period, during which access to qualified software defect repairs and system expansions for that specific release of system software are provided.

Then there is an additional 3 year period of time, referred to as the 'Extended Support' period, during this time no software defect repair, no system expansions and no Security Update/Monitoring Services support are available for that specific release of system software.

After the 4 + 3 year support periods have expired, the system release enters the 'End of Support' period. At this time, no software defect repair, no system expansions no Security Update/Monitoring Services and no service offerings are available for that specific release of system software.

Customers may choose to upgrade or migrate to a supported release at anytime during their system lifecycle.

Historical milestones, such as the date that a system ships, reaches beneficial use, or achieves final acceptance have no impact on the system software dates of support.

Reminder: Under the new SwSP, system expansions are only allowed in the standard support window for a system release. If your customer desires an expansion that would occur toward the end of the standard support period, it is highly recommended that you have them upgrade/migrate first and then expand their system to ensure the customer receives the full warranty time period.

Additional information can be found here: [Software Support Policy Site](#)

VPM-Based Dispatch Consoles Items

The items which comprise a complete VPM-based dispatch console are available for purchase via the models, options and accessories described below. A combination of these items is required to create a complete VPM-based dispatch console as described in the following paragraphs.

Dispatch Console PC

A VPM-based dispatch console uses a dropship workstation PC together with a VPM. The dropship workstation PC comes with a Windows operating system, keyboard and mouse. It does not include a monitor or Ethernet cable. These items must be ordered separately.

Each PC used with a dispatch console also requires the Symantec Anti-Virus application. [Network Security Price Page](#)

Note that the PC ships with a North American AC line cord.

VPM and Licenses

When used with a MCC 7500 dispatch console, the VPM requires a *MCC 7500 Basic Console Functionality Software License* (CA01642AA) and one of the AC line cord options (CA00140AA, AB, AC, AF or AG).

The basic console functionality software license grants the customer the right to use the features supported by the dispatch console application software except for the features covered by the following licenses. Note that it also includes the right to use the API portion of the software.

Depending on the features desired on the dispatch console, one or more of the following license options may also have to be ordered with the VPM.

- *ADD: MCC 7500 Trunking Operation License* (CA01643AA) - This option is required if the dispatch console will be used to control ASTRO 25 trunking resources, SmartZone trunking resources (via a SmartX site converter) or SMARTNET trunking resources (via a SmartX site converter).
- *ADD: MCC 7500 Advanced Conventional Operation License* (CA01644AA) - This option is required if the dispatch console will be used to control ASTRO 25 conventional channels, MDC 1200 channels and/or consolettes connected via ACIM Link.
- *ADD: MCC 7500 Inbound Event Display (IED) License* (CA01645AA) - This option is required if the dispatch console will use the Inbound Event Display (IED) graphical user interface.
- *ADD: MCC 7500 Enhanced Console Telephony Operation License* (CA02073AA) - This option is required if the dispatch console will use any of the enhanced console telephony features.
- *ADD: MCC 7500 Advanced SECURENET Operation License* (CA01972AA) - This option is required if the dispatch console will be used to control Advanced SECURENET channels.

The VPM does not include the following items. These must be ordered separately if required.

- Speakers
- Desktop Microphone
- Headset Jacks
- Footswitch
- Ethernet Cable

Secure Options

The VPM is capable of supporting up to 6 different encryption algorithms simultaneously. When secure operation is desired, order the *ADD: MCC 7500 Secure Operation License* option (CA00147AF) and from 1 to 6 encryption algorithm options (CA00143AC, CA00144AC, CA00145AC, CA00146AC, CA00182AB or CA00245AA).

A particular type of encryption algorithm may only be ordered once with a particular VPM. That is, up to 6 algorithms may be ordered with a VPM, but they must all be different algorithms.

If remote secure key management across the radio system's IP network from a KMF is desired, order the *ADD: Over The Ethernet Keying (OTEK) Operation License* option (CA01220AA).

The TKN8531C cable is used to connect a KVL to a VPM for programming/managing secure key material.

“The Peripherals”

The peripherals are the items which provide interfaces between the VPM and the external environment. These are:

- Speaker (B1912) - Max of 8 per VPM
- Desktop Microphone (B1914) - Max of 1 per VPM
- Headset Jack (B1913) - Max of 2 per VPM
- Footswitch (DSTWIN6328A) - Max of 1 per VPM

The speakers, microphone, headset jacks and footswitch are optional depending on the customer's needs.

Each MCC 7500 dispatch console requires 1 and only 1 VPM.

The VPM is 1 Rack Unit high and is capable of being mounted in a 19" rack. It may also be mounted beneath a writing surface or placed on top of a writing surface. Mounting hardware is included with the VPM.

Each VPM requires an AC line cord option (CA00140AA, AB, AC, AF or AG).

Ordering information for the VPM is provided in the Models, Options and Accessories sections below.

Dual Instant Recall Recorder (IRR)

The dual IRR is compatible with VPM-based dispatch consoles. The dual IRR is capable of recording and playing back the audio from two different sources (e.g., radio and telephone), but may be used to record a single source if desired. If the IRR will be used to record the audio from only one source, the sound card does not need to be ordered. If the IRR will be used to record the audio from two sources, the sound card must be ordered. Only one set of PC speakers needs to be ordered regardless of whether the IRR is recording one or two sources of audio.

Please refer to the [IRR Price Page](#) for information about ordering IRRs for use with MCC 7500 consoles.

Dropship Items

The following dropship items are compatible with VPM-based dispatch consoles. The dropship items are accessories which are not manufactured by Motorola. These include:

- Monitor [Monitor Price Page](#)
- Trackball (See Accessories section below)
- Ethernet Cable
- Headset [Peripheral Devices Price Page](#)
- Dual IRR [IRR Price Page](#)

Note: Headsets certified for use with the MCC 7500 dispatch console are only available from Motorola. While other headsets may work, Motorola cannot guarantee the quality of the audio, especially dispatcher transmit audio, if they are used.

Order the desired dropship items for each dispatch console. Use the links next to the items above to see the ECAT Pages for them. They may also be ordered for use as spares.

Software and Software Refresh Items

The software used on the dispatch console is available for purchase via the model and options shown below. The *MCC 7500 ASTRO 25 Software* (B1905) is a CD which contains the application software for both the dispatch console and the archiving interface server. The two refresh license options (CA00899AA and CA00900AA) provide licenses for using new versions of the dispatch console or archiving interface server software.

These items may be used in the following scenarios.

Buying a New Console System

The dispatch consoles and archiving interface servers come with the appropriate software installed on their computer hard disks, but they do not come with a copy of the software on CD or DVD. It is strongly suggested that at least one *MCC 7500 ASTRO 25 Software* model (B1905) be ordered for each console system as a backup copy.

It is not necessary to order either of the software refresh license options when buying a new console system. They are used when upgrading an existing console system.

Upgrading an Existing MCC 7500 Console System

Upgrade an existing Motorola MCC 7500 console system to the latest version of software as follows.

- Order the desired number of *MCC 7500 ASTRO 25 Software* models (B1905) (at least one is required, but more may be ordered if the customer wants them)
- Order one *ADD: Dispatch Console Software Refresh License* option (CA00899AA) for each dispatch console being upgraded
- Order one *ADD: Archiving Interface Server Software Refresh License* option (CA00900AA) for each archiving interface server being upgraded

The two software refresh license options provide licenses for using the new versions of the dispatch console or archiving interface server software. They must be ordered as sub-items to the *MCC 7500 ASTRO 25 Software* model. The quantities of the software refresh license options may (and most likely will) exceed the quantity of the main model.

Note that the version of software used in the dispatch consoles and AISs must match the versions of software in all the other products in the radio system (zone controller, network manager, CCGWs, Aux I/O servers, etc.). It is usually not possible to upgrade just the dispatch consoles and AISs themselves.

Buying Additional Copies of the Software

If a customer wishes to have additional copies of the dispatch console or archiving interface server software, then the *MCC 7500 ASTRO 25 Software* model (B1905) may be ordered by itself.

Adding Operational Licenses to Fielded Dispatch Consoles and AISs

The following licenses are for use with fielded MCC 7500 dispatch consoles and archiving interface servers. The BLN1316 and BLN1317 are used only with customers who are either converting a SmartX Site Converter VPM into a MCC 7500 VPM or who are using FRUs to

build a MCC 7500 dispatch console or archiving interface server. The rest of the licenses are used when adding the indicated functionality to a fielded dispatch console or archiving interface server, when converting a SmartX Site Converter VPM into a MCC 7500 VPM or when using FRUs to build a MCC 7500 dispatch console or archiving interface server.

Note that the CA01221AA and CA01221AB options are the equivalent of the BLN1316 + BLN1311 + BLN1312, so these do not need to be ordered if the CA01221AA or CA01221AB was ordered with the original dispatch console.

Note also that the CA00288AA and CA00288AB options are the equivalent of the BLN1317, so it does not need to be ordered if the CA00288AA or CA00288AB was ordered with the original archiving interface server.

Adding Basic Dispatch Operation to a Dispatch Console being built from a Converted SmartX VPM or a VPM FRU

Field-assembled VPM-based dispatch consoles can add the licensing for basic console operation by ordering the *Basic Console Operation Field-Add License* (BLN1316) for each dispatch console being assembled in the field.

Adding AIS Software License to an AIS being built from a Converted SmartX VPM or a VPM FRU

Field-assembled VPM-based archiving interface servers can add the AIS license by ordering the *AIS Software Field-Add License* (BLN1317) for each archiving interface server being assembled in the field.

Adding Secure Operation

Existing dispatch consoles and archiving interface servers can add the licensing for secure operation by ordering the *Secure Operation Field-Add License* (BLN1304) for each dispatch console and/or archiving interface server that needs the feature. Note that this license does not provide any required hardware or encryption algorithms. They must be ordered separately.

Adding OTEK Operation

MCC 7500 dispatch consoles and archiving interface servers can support Over the Ethernet Keying (OTEK) operation beginning in the 7.7 system release. Existing systems that are 7.7 or later can add the licensing for OTEK operation by ordering the *Over the Ethernet Keying (OTEK) Operation Field-Add License* (BLN1302) for each dispatch console and/or archiving interface server that needs the feature.

Adding Trunking Operation

Existing dispatch consoles can add the licensing for trunking operation by ordering the *MCC 7500 Trunking Operation Field-Add License* (BLN1311) for each dispatch console that needs the feature.

Adding Advanced Conventional Operation

Existing dispatch consoles can add the licensing for advanced conventional operation by ordering the *MCC 7500 Advanced Conventional Operation Field-Add License* (BLN1312) for each dispatch console that needs the feature.

Adding Inbound Event Display Operation

Existing dispatch consoles can add the licensing for IED operation by ordering the *MCC 7500 Inbound Event Display (IED) Operation Field-Add License* (BLN1313) for each

dispatch console that needs the feature.

Adding or Upgrading Encryption Algorithms on VPM-Based Dispatch Consoles and AISs using a KVL 3000 Plus

Due to obsolete part issues, it is no longer possible to use KVL 3000 Plus KVLs to add algorithms to MCC 7500 consoles. A KVL 4000 KVL must be used. Please see the following section.

Adding or Upgrading Encryption Algorithms on VPM-Based Dispatch Consoles and AISs using a KVL 4000

If a customer wishes to add new encryption algorithms to existing secure-capable VPM-based MCC 7500 dispatch consoles and/or archiving interface servers using a KVL 4000 KVL, the *MCC 7500 VPM Secure Algorithm Upgrade for KVL 4000* (T8063) should be ordered along with the desired algorithm options. This provides a CD containing the desired numbers and types of encryption algorithms. The CD is then used in conjunction with a KVL 4000 Key Variable Loader (KVL) to add the algorithms to secure cards. The KVL 4000 keyloader must have at least the R02.05.03 (also listed as 1.3.0000.174) version of software to be able to load algorithms in VPMs.

Note: The serial number of the KVL 4000 keyloader must be entered into the ordering system when ordering the T8063. This serial number will be loaded on the CD by the factory. The CD can only be used by the keyloader with the matching serial number.

The *MCC 7500 VPM Secure Algorithm Upgrade* may also be used to upgrade encryption algorithms to the latest versions in existing secure-capable VPM-based MCC 7500 dispatch consoles and/or archiving interface servers.

Order one algorithm option for each VPM that is being upgraded. For example, to add the ADP algorithm to three VPMs, order one T8063 with three CA00245AA options.

Multiple types of algorithm options may not be ordered on the same T8063. For example, to add the DES-OFB and AES algorithms to twenty-four VPMs, order two T8063s with twenty-four CA00143AC options on one and twenty-four CA00182AB options on the other.

The T8063 can support up to 100 copies of any single algorithm option.

When adding algorithms to a VPM on a 7.7 system, make sure the VPM has the 7.7 SER or later version of software (VPM_R7.7.00.23). Earlier versions of the 7.7 VPM software do not allow algorithms to be added in the field. Contact Upgrade Operations to obtain the 7.7 SER software. VPMs on 7.8 and later systems do not have any special software version requirements.

Dispatch API Software Development Kit

The Software Development Kit (SDK) for the MCC 7500 Dispatch API requires a license agreement to be executed between the software developer and Motorola Solutions. The license agreement, and instructions for completing it, can be found on the [MCC 7500 wiki page](#). After the license agreement has been signed by both parties, an invoice will be issued for payment of the license fee (\$5000.00). After payment has been received, the SDK will be shipped to the developer. The B1925 is no longer used to order the SDK. **Please note that**

the licensing process typically takes around 8 weeks to complete. Please plan accordingly.

The SDK is required when a customer wishes to use the MCC 7500 Dispatch API to allow 3rd party software to communicate with the MCC 7500 dispatch console or if they wish to use a custom graphical user interface (GUI) on the dispatch console.

The right to use the Dispatch API is covered by the console software license (CA01221AA, CA01221AB, CA01222AA or CA01642AA) which must be purchased with each dispatch console, so no additional licenses are required.

Technical support for the SDK may be ordered using the QLN3437 *Field Add MCC 7500 SDK Technical Support* which provides one hour of technical support. Multiple quantities of the QLN3437 may be ordered if more than one hour of support is desired. The QLN3437 is a "billing only" item (a BB item) and therefore must be on a factory order by itself.

Note that if the QLN3437 is not ordered, no plant technical support will be provided for the software developers using the SDK.

Enhanced Console Telephony Media Gateways

The Enhanced Console Telephony feature is not currently available with MCC 7500 dispatch positions.

Field Replaceable Units (FRUs)

The following items are available directly from the Radio Products and Services Division (RPSD, formerly AAD). None of these items can be ordered in COF; they must be ordered directly from RPSD. Also see the circuit board FRUs listed in the Accessories section at the bottom of this page.

3082534Y18 - VPM/GPIOM to Speaker Cable

3071113H01 - VPM/GPIOM to Headset Jack Permanent Cable

3071114H01 - VPM/GPIOM to Headset Jack Extension Cable

0183734Y01 - VPM/GPIOM to Microphone Cable

01009513004 - VPM/GPIOM Power Supply (w/o DC cable or AC line cord, not orderable in COF)**

30009351001 - VPM/GPIOM DC Power Cable (connects 01009513001 power supply to VPM or GPIOM)**

3082933N08 - AC Line Cord (North American)

3082933N13 - AC Line Cord (UK)

3082933N09 - AC Line Cord (Continental European)

3508800G96 - Microphone Wind Screen

3684434Y01 - Speaker Volume Knob

60009256001 - Secure Key Retention Battery (for VPM, not orderable in COF)

0310907A98 - Screws for VPM Rack Mounting Bracket (two screws required for each bracket)

0771936H01 - VPM Rack Mounting Bracket (two brackets required for each VPM)

** Note that the 0183650Y03 GPIOM/VPM Power Supply has been replaced with a Level V energy efficiency compliant model. The 0183650Y03 power supply has a non-detachable DC power cable, but the new supply has a detachable DC power cable. Please order both the 01009513004 Power Supply and 30009351001 DC Power Cable when replacing a

0183650Y03.

The various board-level FRUs for the MCC 7500 dispatch console are orderable via the accessory numbers shown below.

Manuals

The various manuals for the MCC 7500 dispatch console are included in the ASTRO 25 Radio System Documentation Set. The individual manuals (or the complete documentation set) can be downloaded from the [ASTRO 25 Documentation Web Site](#).

MCC 7500 Product Planner and Ordering Guide

The MCC 7500 Product Planner and Ordering Guide is available on the [High Tier Consoles wiki page](#).

Ordering Requirements

Supported Ordering Systems

1. This equipment is ordered directly in COF or OMAR. Note that no checking of the design itself is done in COF or OMAR.
2. Motorola On-Line may not be used to order complete console systems.

Don't Forget These Items for Each Dispatch Console

1. VPM, Speaker, Microphone, Headset Jack
2. AC Line Cords
3. Monitor
4. Software License

Configuration

Models

Dispatch Console PC

VPM

Description	Full Description	Nomenclature	APC	Price
MOTOROLA VOICE PROCESSOR MODULE	Provides one Voice Processor Module (VPM) unit for an MCC 7500 console. Requires appropriate software license option (CA01642AA or CA00288AB) and AC line cord option (CA00140AA, AB, AC or AF). When ordered for a secure-capable MCC 7500 console, also requires the CA0147AF Secure Operation License option and at least one encryption algorithm.	B1933	443	\$11,920.00

Software Items

Description	Full Description	Nomenclature	APC	Price
MCC 7500 ASTRO 25 SOFTWARE	Provides a CD ROM containing the application software for the MCC 7500 dispatch console and MCC 7500 Archiving Interface Server. Does NOT include the licenses required to use the software. Licenses can be purchased by using - CA01642AAB or CA00288AB with the B1933	B1905	443	\$250.00

Note: The B1925 is no longer used to order the SDK for the MCC 7500 Dispatch API. Please see the "Dispatch API Software Development Kit" section above for information on how to obtain the SDK.

Options

Software License

Description	Full Description	Nomenclature	APC	Price
	Provides a license for using the MCC 7500 Dispatch Console			

<p>ADD: MCC 7500 BASIC CONSOLE FUNCTIONALITY SOFTWARE LICENSE</p>	<p>Software. A software license is required for each dispatch position being ordered. Covers basic console features such as non-signaling analog conventional, patch, multi-select, paging, aux i/os, alert tones, channel marker, using the API, etc. Order as a sub-item to the B1933.</p>	<p>CA01642AA</p>	<p>443</p>	<p>\$14,400.00</p>
---	--	------------------	------------	--------------------

Upgrade Software Licenses

Description	Full Description	Nomenclature	APC	Price
<p>ADD: MCC 7500 DISPATCH CONSOLE SOFTWARE REFRESH LICENSE</p>	<p>Provides a license for upgrading to the latest version of the MCC 7500 Dispatch Console Software. One is required for each dispatch console being upgraded. Order as a sub-item to the B1905.</p>	<p>CA00899AA</p>	<p>443</p>	<p>\$3,000.00</p>
<p>ADD: MCC 7500 AIS SOFTWARE REFRESH LICENSE</p>	<p>Provides a license for upgrading to the latest version of the MCC 7500 AIS Software. One is required for each AIS being upgraded. Order as a sub-item to the B1905.</p>	<p>CA00900AA</p>	<p>443</p>	<p>\$2,700.00</p>

Trunking & Advanced Conventional Operation

Description	Full Description	Nomenclature	APC	Price
<p>ADD: MCC 7500 / MCC 7100 TRUNKING OPERATION</p>	<p>Required when the MCC 7500 or MCC 7100 dispatch position is used to control trunking resources (ASTRO 25, SmartZone via SmartX or SMARTNET via SmartX). Order as a sub-item to the</p>	<p>CA01643AA</p>	<p>443</p>	<p>\$6,000.00</p>

	B1933 for MCC 7500 and as a sub-item to B1939 for MCC 7100.			
ADD: MCC 7500 /MCC 7100 ADV CONV L OPERATION	Required when the MCC 7500 or MCC 7100 dispatch position is used to control ASTRO 25 conventional channels, MDC 1200 channels or ACIM Link channels. Order as a sub-item to the B1933 for MCC 7500 and as a sub-item to the B1939 for MCC 7100.	CA01644AA	443	\$3,600.00

Advanced SECURENET Operation

Description	Full Description	Nomenclature	APC	Price
ADD: ADVANCED SECURENET OPERATION	Required when the MCC 7500 dispatch position is used to control Advanced SECURENET resources (Conventional channels using an Advanced SECURENET CIU device). Order as a sub-item to the B1933.	CA01972AA	443	\$50,000.00

Secure Operation

Description	Full Description	Nomenclature	APC	Price
ADD: MCC 7500 SECURE OPERATION	Order when secure capabilities are required in a VPM-based dispatch console or AIS. Order as a sub-item to the B1933.	CA00147AF	443	\$3,900.00
ADD: MCC 7500 / MCC 7100 OTEK OPERATION	Order when remote key management capabilities are required on a VPM-based dispatch console, AIS, or MCC 7100. Order as a sub-item to the B1933 for MCC 7500 or as a sub-item to the B1939 for MCC 7100. Note that OTEK does not support the ADP encryption algorithm.	CA01220AA	443	\$4,020.00

Secure Algorithms

Description	Full Description	Nomenclature	APC	Price
ADD: DES-OFB ALGORITHM	Provides factory programming for the DES-OFB encryption algorithm. Order as a sub-item to the appropriate MGEG, MCC 7500 Dispatch Console, MCC 7500 Archiving Interface Server, VPM FRU or Secure Card FRU model.	CA00143AC	443	\$900.00
ADD: DES-XL ALGORITHM	Provides factory programming for the DES-XL encryption algorithm. Order as a sub-item to the appropriate MGEG, MCC 7500 Dispatch Console, MCC 7500 Archiving Interface Server or VPM FRU.	CA00144AC	443	\$900.00
ADD: DVI-XL ALGORITHM	Provides factory programming for the DVI-XL encryption algorithm. Order as a sub-item to the appropriate MGEG, MCC 7500 Dispatch Console, MCC 7500 Archiving Interface Server, VPM FRU or Secure Card FRU model.	CA00145AC	443	\$900.00
ADD: DVP-XL ALGORITHM	Provides factory programming for the DVP-XL encryption algorithm. Order as a sub-item to the appropriate MGEG, MCC 7500 Dispatch Console, MCC 7500 Archiving Interface Server or VPM FRU model.	CA00146AC	443	\$900.00
ADD: AES ALGORITHM	Provides factory programming for the AES encryption algorithm. Order as a sub-item to the appropriate MGEG, MCC 7500 Dispatch Console, MCC 7500 Archiving Interface Server, VPM FRU or Secure Card FRU model.	CA00182AB	443	\$900.00
ADD: ADP ALGORITHM	Provides factory programming for the ADP encryption algorithm. Order as a sub-item to the appropriate MGEG, MCC 7500 Dispatch Console, MCC 7500 Archiving Interface Server,	CA00245AA	443	\$900.00

	VPM FRU or Secure Card FRU model.

Inbound Event Display GUI

Description	Full Description	Nomenclature	APC	Price
ADD: MCC 7500/MCC 7100 IED OPERATION	Required when the MCC 7500 or MCC 7100 dispatch position uses the Inbound Event Display GUI. Order as a sub-item to the B1933 for MCC 7500 and as a sub-item to the B1939 for MCC 7100	CA01645AA	443	\$6,300.00

Enhanced Console Telephony

Description	Full Description	Nomenclature	APC	Price
ADD: MCC 7500 Enhanced Console Telephony Operation License	Required when the MCC 7500 dispatch position is used to control enhanced console telephony phone lines. Order as a sub-item to the B1933.	CA02073AA	443	\$1,200.00

Power Cords

Description	Full Description	Nomenclature	APC	Price
ADD: AC LINE CORD, NORTH AMERICAN	Adds one AC line cord with a North American plug.	CA00140AA	443	\$0.00
ADD: AC LINE CORD, EUROPEAN	Adds one AC line cord with a continental European plug (Schuko plug).	CA00140AB	597	\$0.00
ADD: AC LINE CORD, UK	Adds one AC line cord with a United Kingdom plug.	CA00140AC	597	\$0.00
ADD: AC LINE CORD, AUSTRALIA	Adds one AC line cord with an Australian plug.	CA00140AF	277	\$0.00
ADD: AC LINE CORD, BRAZIL	Adds one AC line cord with a Brazilian plug.	CA00140AG	277	\$0.00

API Technical Support

Description	Full Description	Nomenclature	APC	Price
FIELD ADD MCC 7500 SDK TECHNICAL SUPPORT	Provides one hour of technical support for the SDK from the factory. May be ordered multiple times if more than one hour of support is required. May be ordered to add additional technical support for software developers who are already using the SDK. Note that this is a billable item only (BB item) and must be ordered by itself on its own order.	QLN3437	443	\$1,000.00

Accessories

Enhanced Console Telephony Media Gateways

The MCC 7500 console telephony media gateways have been cancelled by Cisco and are no longer available. Because the replacement gateways are not yet available, there will be a period of time where it will not be possible to order the required hardware to support the MCC 7500 console's enhanced console telephony feature. At this time, there is no date for when a replacement will be available.

Because Cisco is ending their software support and security update patching on December 8, 2020, the last ASTRO 25 system release that will support the Cisco media gateways will be the 7.18 release. They will not be supported in 7.19 and later releases. Also, because Cisco is ending their software support and security update patching on December 8, 2020, Motorola Solutions will not be able to provide software support or security update patching for the Cisco products after that date. Customers who upgrade to the 7.18 release are strongly encouraged to replace their Cisco media gateways with the replacement solution before December, 2020.

Description	Full Description	Nomenclature	APC	Price
MCC 7500 Console Telephony Media Gateway O/S for Upgrade or Recovery	Provides a CD-ROM containing a copy of the operating system for the enhanced console telephony media gateways. This should be ordered for use in upgrade or disaster recovery scenarios.	BVN1014A	877	\$500.00

Motorola MCC 7500 Dispatch Console

-- Dispatch Positions, Dispatch API and Product Software --

Ordering Information

General Information

IMPORTANT NOTICE ABOUT MOTOROLA SOLUTIONS SOFTWARE SUPPORT POLICY

In line with the Software Support Policy (SwSP) for ASTRO based system software, orderability rules now include alignment to this Software Support Policy which sets a new framework of three periods of support from Ship Acceptance for that specific release.

The policy provides for a 4-year period of time, referred to as the **Standard Support** period, during which access to qualified software defect repairs and system expansions for that specific release of system software are provided.

Then there is an additional 3 year period of time, referred to as the **Extended Support** period, during this time no software defect repair, no system expansions and no Security Update/Monitoring Services support are available for that specific release of system software.

After the 4 + 3 year support periods have expired, the system release enters the **End of Support** period. At this time, no software defect repair, no system expansions no Security Update/Monitoring Services and no service offerings are available for that specific release of system software.

Customers may choose to upgrade or migrate to a supported release at anytime during their system lifecycle.

Historical milestones, such as the date that a system ships, reaches beneficial use, or achieves final acceptance have no impact on the system software dates of support.

Reminder: Under the new SwSP, system expansions are only allowed in the standard support window for a system release. If your customer desires an expansion that would occur toward the end of the standard support period, it is highly recommended that you have them upgrade/migrate first and then expand their system to ensure the customer receives the full warranty time period.

Additional information can be found here: [Software Support Policy Site](#)

MCC 7500 Product Planner and Ordering Guide

The MCC 7500 Product Planner and Ordering Guide is available on the [High Tier Dispatch Console wiki page](#).

Dispatch API Software Development Kit

The Software Development Kit (SDK) is required when a customer wishes to use the MCC 7500E/7500 Dispatch API to allow 3rd party software to communicate with the MCC 7500E dispatch console or if they wish to use a custom graphical user interface (GUI) on the dispatch console.

The MCC 7500E utilizes the same SDK as the MCC 7500 and MCC 7100 consoles. Please see the [High Tier Dispatch Console wiki page](#) for more information about the SDK and SDK technical support.

Ordering Requirements

Supported Ordering Systems

1. This equipment is ordered directly in COF or OMAR. Note that no checking of the design itself is done in COF or OMAR.
2. Motorola On-Line may not be used to order complete console systems.
3. Please note that the latest available release of software and hardware will be provided when ordering through the system. If earlier release versions are required then a case must be opened with the System Support Center (SSC) to obtain the desired version from Upgrade Operations (UO).

Don't Forget These Items for Each Dispatch Console

1. PC, Monitor, Speakers, Microphone, and other accessories.
2. Software Entitlement Licenses

4. [MCC 7500 IP Dispatch Console](#)
5. [MCC 7500E IP Dispatch Console](#)
6. [MCC 7500 IP Logging Recorder](#) (includes Dual IRR in it's pulldown box).
7. Also see the pulldown box at the top of this page for other elements.

Configuration

Order Dispatch PC Equipment, Accessories, Spares, and FRUs if desired (more VPM specific FRU's below)

Please see the [MCC Series PC, Monitor, and accessories](#) in the pulldown box above.

VPM

Description	Full Description	Nomenclature	APC	Price
MOTOROLA VOICE PROCESSOR MODULE	Provides one Voice Processor Module (VPM) unit for an MCC 7500 console. Requires appropriate software license option (CA01642AA or CA00288AB) and AC line cord option (CA00140AA, AB, AC or AF). When ordered for a secure-capable MCC 7500 console, also requires the CA0147AF Secure Operation License option and at least one encryption algorithm.	B1933	443	\$11,920.00

Order the MCC 7500 IP Console SW Application

Description	Full Description	Nomenclature	APC	Price
MCC 7500 ASTRO 25 SOFTWARE	Provides a CD ROM containing the application software for the MCC 7500 dispatch console and MCC 7500 Archiving Interface Server. Does NOT include the licenses required to use the software. Licenses can be purchased by using - CA01642AAB or CA00288AB with the B1933	B1905	443	\$250.00

Software License

Description	Full Description	Nomenclature	APC	Price
ADD: MCC 7500 BASIC CONSOLE FUNCTIONALITY SOFTWARE LICENSE	Provides a license for using the MCC 7500 Dispatch Console Software. A software license is required for each dispatch position being ordered. Covers basic console features such as non-signaling analog conventional, patch, multi-select, paging, aux i/os, alert tones, channel marker, using the API, etc. Order as a sub-item to the B1933.	CA01642AA	443	\$14,400.00

Upgrade Software Licenses

Description	Full Description	Nomenclature	APC	Price
ADD: MCC 7500 DISPATCH CONSOLE SOFTWARE REFRESH LICENSE	Provides a license for upgrading to the latest version of the MCC 7500 Dispatch Console Software. One is required for each dispatch console being upgraded. Order as a sub-item to the B1905.	CA00899AA	443	\$3,000.00

Trunking & Advanced Conventional Operation

Description	Full Description	Nomenclature	APC	Price
ADD: MCC 7500 / MCC 7100 TRUNKING OPERATION	required when the MCC 7500 or MCC 7100 dispatch position is used to control trunking resources (ASTRO 25, SmartZone via SmartX or SMARTNET via SmartX). Order as a sub-item to the B1933 for MCC 7500 and as a sub-item to B1939 for MCC 7100.	CA01643AA	443	\$6,000.00

ADD: MCC 7500 /MCC 7100 ADV CONVL OPERATION	Required when the MCC 7500 or MCC 7100 dispatch position is used to control ASTRO 25 conventional channels, MDC 1200 channels or ACIM Link channels. Order as a sub-item to the B1933 for MCC 7500 and as a sub-item to the B1939 for MCC 7100.	CA01644AA	443	\$3,600.00
--	---	-----------	-----	------------

Secure Operation

Description	Full Description	Nomenclature	APC	Price
ADD: MCC 7500 SECURE OPERATION	Order when secure capabilities are required in a VPM-based dispatch console or AIS. Order as a sub-item to the B1933.	CA00147AF	443	\$3,900.00
ADD: MCC 7500 / MCC 7100 OTEK OPERATION	Order when remote key management capabilities are required on a VPM-based dispatch console, AIS, or MCC 7100. Order as a sub-item to the B1933 for MCC 7500 or as a sub-item to the B1939 for MCC 7100. Note that OTEK does not support the ADP encryption algorithm.	CA01220AA	443	\$4,020.00

Secure Algorithms

Description	Full Description	Nomenclature	APC	Price
ADD: DES-OFB ALGORITHM	Provides factory programming for the DES-OFB encryption algorithm. Order as a sub-item to the appropriate MGEG, MCC 7500 Dispatch Console, MCC 7500 Archiving Interface Server, VPM FRU or Secure Card FRU model.	CA00143AC	443	\$900.00
	Provides factory programming for the DES-XL encryption algorithm. Order			

ADD: DES-XL ALGORITHM	as a sub-item to the appropriate MGEg, MCC 7500 Dispatch Console, MCC 7500 Archiving Interface Server or VPM FRU.	CA00144AC	443	\$900.00
ADD: DVI-XL ALGORITHM	Provides factory programming for the DVI-XL encryption algorithm. Order as a sub-item to the appropriate MGEg, MCC 7500 Dispatch Console, MCC 7500 Archiving Interface Server, VPM FRU or Secure Card FRU model.	CA00145AC	443	\$900.00
ADD: DVP-XL ALGORITHM	Provides factory programming for the DVP-XL encryption algorithm. Order as a sub-item to the appropriate MGEg, MCC 7500 Dispatch Console, MCC 7500 Archiving Interface Server or VPM FRU model.	CA00146AC	443	\$900.00
ADD: AES ALGORITHM	Provides factory programming for the AES encryption algorithm. Order as a sub-item to the appropriate MGEg, MCC 7500 Dispatch Console, MCC 7500 Archiving Interface Server, VPM FRU or Secure Card FRU model.	CA00182AB	443	\$900.00
ADD: ADP ALGORITHM	Provides factory programming for the ADP encryption algorithm. Order as a sub-item to the appropriate MGEg, MCC 7500 Dispatch Console, MCC 7500 Archiving Interface Server, VPM FRU or Secure Card FRU model.	CA00245AA	443	\$900.00

Inbound Event Display GUI

Description	Full Description	Nomenclature	APC	Price
ADD: MCC 7500/MCC 7100 IED OPERATION	Required when the MCC 7500 or MCC 7100 dispatch position uses the Inbound Event Display GUI. Order as a sub-item to the B1933 for MCC 7500 and as a sub-item to the B1939 for MCC 7100	CA01645AA	443	\$6,300.00

Enhanced Console Telephony

NOTE: The enhanced console telephony functionality described here is for historical information purposes only. The MCC 7500 dispatch position does not currently support a console telephony solution for new deployments due to the cancellation of the telephony media gateways by the vendor.

Description	Full Description	Nomenclature	APC	Price
ADD: MCC 7500 Enhanced Console Telephony Operation License	Required when the MCC 7500 dispatch position is used to control enhanced console telephony phone lines. Order as a sub-item to the B1933.	CA02073AA	443	\$1,200.00

VPM Power Cords

Description	Full Description	Nomenclature	APC	Price
ADD: AC LINE CORD, NORTH AMERICAN	Adds one AC line cord with a North American plug.	CA00140AA	443	\$0.00
ADD: AC LINE CORD, EUROPEAN	Adds one AC line cord with a continental European plug (Schuko plug).	CA00140AB	597	\$0.00
ADD: AC LINE CORD, UK	Adds one AC line cord with a United Kingdom plug.	CA00140AC	597	\$0.00
ADD: AC LINE CORD, AUSTRALIA	Adds one AC line cord with an Australian plug.	CA00140AF	277	\$0.00
ADD: AC LINE CORD, BRAZIL	Adds one AC line cord with a Brazilian plug.	CA00140AG	277	\$0.00

Enhanced Console Telephony Media Gateways

The MCC 7500 console telephony media gateways have been cancelled by Cisco and are no longer available. The enhanced console telephony functionality described here is for historical information purposes only. The MCC 7500 dispatch position does not currently support a console telephony solution for new deployments due to the cancellation of the telephony media gateways by the vendor.

Because Cisco is ending their software support and security update patching on December 8, 2020, the last ASTRO 25 system release that will support the Cisco media gateways will be the

7.18 release. They will not be supported in later releases. Also, because Cisco is ending their software support and security update patching on December 8, 2020, Motorola Solutions will not be able to provide software support or security update patching for the Cisco products after that date.

Description	Full Description	Nomenclature	APC	Price
MCC 7500 Console Telephony Media Gateway O/S for Upgrade or Recovery	Provides a CD-ROM containing a copy of the operating system for the enhanced console telephony media gateways. This should be ordered for use in upgrade or disaster recovery scenarios.	BVN1014A	877	\$500.00

Field-Add Software Licenses

Description	Full Description	Nomenclature	APC	Price
OVER THE ETHERNET KEYING (OTEK) OPERATION FIELD-ADD LICENSE	-	BLN1302	443	\$4,020.00

KVL Programming Cable

The cable used to connect the KVL to the VPM in the dispatch position and the archiving interface server is the TKN8531.

Description	Full Description	Nomenclature	APC	Price
CABLE FOR RNC, DIU MGEG	-	TKN8531C	362	\$260.00

Field Replacement Units (VPM Specific)

Note: We've been seeing a significant number of VPM FRUs being returned to the Repair Depot because they don't have the necessary encryption algorithms. Please read the note text under the B1934 below and make sure any required encryption algorithms are ordered when the VPM FRU is ordered.

The items listed in this section are specific to MCC 7500. Please also see the FRUs and other accessories listed in the [MCC Series PC, Monitor, and accessories](#) pulldown menu.

Description	Full Description	Nomenclature	APC	Price
MCC 7500 VOICE PROCESSOR MODULE FRU	Provides the housing and circuit board used for the B1933 VPM. Does not include the power supply, AC power cord, or DC power cord. Each of these items must be ordered separately from RPSD. If secure capability is required, then order the following options with the B1934: - the secure operation option (CA00147AF) - from 1-6 encryption algorithm options Order as a main line item.	B1934	443	\$11,830.00
SHIELD,VPM SHIELD KIT	Provides one complete shield kit to replace the encryption engine shields on a Voice Processor Unit (VPM). Instructions for replacing the shields are also provided. When ordering, divide the quantity needed into multiple lines so that no line contains more than 9 BLN1324's. For	BLN1324	443	\$0.00

	example, if 30 kits are needed, create 3 lines of 9 each and 1 line of 3.

Model

CRYPTR is Motorola Solution's FIPS 140-2 Level 2 Hardware Key store for the MCC7500E.

Ordering Information

This section does not cover ordering an MCC7500 E console, only the CRYPTR when hardware key storage is required.

The CRYPTR requires an USB Ethernet adaptor: recommended is STARTECH USB 3.0 TO GIGABIT ETHERNET ADAPTER (DSUSB31000S)

Configuration

CRYPTR Base hardware

Select the base hardware AND a power cord.

The power cord includes the power supply and must be ordered with the hardware.

Motorola MCC 7500E IP Dispatch Console
-- Dispatch Position, Dispatch API and Product Software --

Ordering Information

General Information

IMPORTANT NOTICE ABOUT MOTOROLA SOLUTIONS SOFTWARE SUPPORT POLICY

In line with the Software Support Policy (SwSP) for ASTRO based system software, orderability rules now include alignment to this Software Support Policy which sets a new framework of three periods of support from Ship Acceptance for that specific release.

The policy provides for a 4-year period of time, referred to as the **Standard Support** period, during which access to qualified software defect repairs and system expansions for that specific release of system software are provided.

Then there is an additional 3 year period of time, referred to as the **Extended Support** period, during this time no software defect repair, no system expansions and no Security Update/Monitoring Services support are available for that specific release of system software.

After the 4 + 3 year support periods have expired, the system release enters the **End of Support** period. At this time, no software defect repair, no system expansions no Security Update/Monitoring Services and no service offerings are available for that specific release of system software.

Customers may choose to upgrade or migrate to a supported release at anytime during their system lifecycle.

Historical milestones, such as the date that a system ships, reaches beneficial use, or achieves final acceptance have no impact on the system software dates of support.

Reminder: Under the new SwSP, system expansions are only allowed in the standard support window for a system release. If your customer desires an expansion that would occur toward the end of the standard support period, it is highly recommended that you have them upgrade/migrate first and then expand their system to ensure the customer receives the full warranty time period.

Additional information can be found here: [Software Support Policy Site](#)

MCC 7500E Product Planner and Ordering Guide

The MCC 7500E Product Planner and Ordering Guide is available on the [High Tier Dispatch Console wiki page](#).

Dispatch API Software Development Kit

The Software Development Kit (SDK) is required when a customer wishes to use the MCC 7500E/7500 Dispatch API to allow 3rd party software to communicate with the MCC 7500E dispatch console or if they wish to use a custom graphical user interface (GUI) on the dispatch console.

The MCC 7500E utilizes the same SDK as the MCC 7500 and MCC 7100 consoles. Please see the [High Tier Dispatch Console wiki page](#) for more information about the SDK and SDK technical support.

Ordering Requirements

Supported Ordering Systems

1. This equipment is ordered directly in COF or OMAR. Note that no checking of the design itself is done in COF or OMAR.
2. Motorola On-Line may not be used to order complete console systems.
3. Please note that the latest available release of software and hardware will be provided when ordering through the system. If earlier release versions are required then a case must be opened with the System Support Center (SSC) to obtain the desired version from Upgrade Operations (UO).

Don't Forget These Items for Each Dispatch Console

1. PC, Monitor, Speakers, Microphone, and other accessories.
2. Software Entitlement Licenses

Links to Other Elements of the Console Sub-System

1. [MCC Series PC, Monitor, and accessories](#) (also available in pulldown box above)
2. [Manuals](#)
3. Please see [Information Assurance \(IA\) PCAT page](#) for Control Room Firewall media, Element Hardening, and other IA features.
4. [MCC 7500 IP Dispatch Console](#)
5. [MCC 7500E IP Dispatch Console](#)
6. [MCC 7500 IP Logging Recorder](#) (includes Dual IRR in it's pulldown box).
7. Also see the pulldown box at the top of this page for other elements.

Ordering Instructions

Ordering in Oracle R12 Quoting (OMAR)

If ordering in Oracle R12 Quoting, the MCC 7500E hardware and software can be ordered using SBoM <MCC7500E-ASTRO-CNSL>. The information below can be used to check the resulting lists.

Ordering in COF

Use the models and options defined below.

Configuration

Step 1: Order the MCC 7500E IP Console SW Application

Software DVD

Description	Full Description	Nomenclature	APC	Price
MCC 7500E SOFTWARE DVD	Provides a DVD containing the application software for the MCC 7500E console. One copy of the DVD may be used to install software on multiple MCC 7500E dispatch positions.	B1949	244	\$250.00

Upgrade Software License

Description	Full Description	Nomenclature	APC	Price
ADD: DISPATCH POSITION SOFTWARE REFRESH	The software refresh license option is required for each existing MCC 7500E dispatch position when upgrading the ASTRO System to a new major system release. Order the option as a sub-item to B1949.	CA03321AA	244	\$2,500.00

Step 2: Order Feature Licenses for each Dispatch Position

Feature/Capacity License Model

All installations of MCC 7500E software must order the corresponding feature and/or capacity licenses for their given software release otherwise the products will not operate. Orders for feature and/or capacity licenses require parametric data (an email address) to be provided with the order. This is required in both COF and OMAR. Motorola emails the License Entitlement ID to the email address entered with the order as part of the order fulfillment process. These licenses are ordered as sub-items to the B1948.

Description	Full Description	Nomenclature	APC	Price
MCC 7500E DISPATCH POSITION LICENSES	The various licenses used with the MCC 7500E console are ordered as options to this model. One B1948 may be ordered per dispatch position or one B1948 may be ordered per multiple dispatch positions. An email address must be entered into COF with the B1948.	B1948	244	\$0.00

Radio Resource Capacity Licenses

Notice: Effective January 1, 2019, Motorola Solutions announces the cancellation of the MCC 7100 / MCC 7500E Dispatch Consoles radio resource capacity tiered license options of 45, 60 and 100. Option numbers UA00251AA, UA00252AA, & UA00651AA, respectively.

This cancellation does not affect the cumulative nature of the any of the capacity licenses, cancelled or otherwise, e.g., two new 30 capacity licenses will provide 60 radio resource capacity, adding a 15 capacity license to an existing 60 capacity license will provide 75 radio resource capacity, etc. Please see the ITC Notification for more information. The notice is available on our wiki page at <https://converge.motorolasolutions.com/groups/high-tier-voice-radio-dispatch-consoles>.

Description	Full Description	Nomenclature	APC	Price
ADD: 15 RADIO RESOURCES LICENSE	MCC 7100 A7.16+: Allows maximum of 5 simultaneous voice streams with 15 on-screen radio resources. Order as a sub-item to B1942. MCC 7500E info: Enables a MCC 7500E dispatch position to support up to 15 radio resources (trunking talkgroups and/or conventional channels) to be assigned on it. Order as a sub-item to the B1948.	UA00249AA	244	\$3,500.00

ADD: 30 RADIO RESOURCES LICENSE	MCC 7100 A7.16+: Allows maximum of 10 simultaneous voice streams with 30 on-screen radio resources. Order as a sub-item to B1942. MCC 7500E: Enables a MCC 7500E dispatch position to support up to 30 radio resources (trunking talkgroups and/or conventional channels) to be assigned on it. Order as a sub-item to the B1948.	UA00250AA	244	\$6,250.00
ADD: 160 RADIO RESOURCES LICENSE	Enables a MCC 7500E dispatch position to support up to 160 radio resources (trunking talkgroups and/or conventional channels) to be assigned on it. Order as a sub-item to the B1948.	UA00652AA	244	\$18,820.00

Feature Licenses

Description	Full Description	Nomenclature	APC	Price
ADD: BASIC CONSOLE OPERATION	Enables a MCC 7500E dispatch position to support basic console functionality. This includes non-signaling analog conventional, patch, multiselect, paging, aux I/Os, alert tones, channel marker, using the API, etc. One UA00653AA is required for each dispatch position being ordered. Order as a sub-item to the B1948.	UA00653AA	244	\$4,800.00
ADD: ASTRO 25 TRUNKING OPERATION	Enables a MCC 7500E dispatch position to support ASTRO 25 trunking operation. One UA00654AA is required for each dispatch position that will be controlling trunking resources (talkgroups and private calls) via a wireline connection to a trunking system. Order as a	UA00654AA	244	\$6,000.00

	sub-item to the B1948.			
ADD: ADVANCED CONVENTIONAL OPERATION	Enables a MCC 7500E dispatch position to support advanced conventional operation. One UA00655AA is required for each dispatch position that will be controlling advanced conventional resources (P25 conventional, MDC 1200 conventional and ACIM connections to consolettes). Order as a sub-item to the B1948.	UA00655AA	244	\$3,600.00
ADD: IED OPERATION	Enables a MCC 7500E dispatch position to support Inbound Event Display (IED) operation. One UA00656AA is required for each dispatch position that will be using the IED GUI. Order as a sub-item to the B1948.	UA00656AA	244	\$6,300.00
ADD: TELEPHONY OPERATION	Enables a MCC 7500E dispatch position to support console telephony operation. One UA00657AA is required for each dispatch position that will be accessing telephone resources via the console telephony feature. Order as a sub-item to the B1948.	UA00657AA	244	\$1,200.00
ADD: SECURE OPERATION	Enables a MCC 7500E dispatch position to support secure (encrypted) voice operation. One UA00658AA is required for each dispatch position that will be controlling radio resources that use encrypted voice. Order as a sub-item to the B1948.	UA00658AA	244	\$3,900.00
	Enables a MCC 7500E dispatch position to support the ADP, AES and DES-OFB			

ADD: ADP/AES/DES-OFB ENCRYPTION	encryption algorithms. The secure operation license must be ordered separately. One UA00659AA is required for each dispatch position that will be using any of those algorithms. Order as a sub-item to the B1948. Please note that this option is for use with software key management. Hardware key management algorithm licenses are ordered as part of the CRYPTR2.	UA00659AA	244	\$2,160.00
ADD: OTEK OPERATION	Enables a MCC 7500E dispatch position to support Over The Ethernet Keying (OTEK) operation. One UA00660AA is required for each dispatch position that will be using the OTEK feature. Order as a sub-item to the B1948. Please note that this option is for use with software key management. Hardware key management OTEK license is ordered as part of the CRYPTR2.	UA00660AA	244	\$4,020.00
ADD: ENHANCED IRR	Enables a MCC 7500E dispatch position to support the Enhanced Integrated Instant Recall Recorder (IRR). One UA00661AA is required for each dispatch position that will be using the Enhanced Integrated IRR. Order as a sub-item to the B1948.	UA00661AA	244	\$3,000.00

Step 3: Order Dispatch PC Equipment, Accessories, Spares, and FRUs if desired

Please see [MCC Series PC, Monitor, and accessories](#) pulldown menu.

Step 4: Order Audio Interface Module (AIM) if desired

Description	Full Description	Nomenclature	APC	Price
USB AUDIO INTERFACE MODULE	The AIM supports connectivity for Motorola standard peripherals used in mission critical public safety environment	B1941	443	\$1,900.00

Step 5: Order PRX 7000 Proxy and Firewall (Only required if Installing the MCC 7500E Console outside of the ASTRO 25 Network)

Each PRX 7000 Entitlement License supports 1 to 10 connections from the customer network into the ASTRO 25 Network. Up to 5 PRX 7000 installations are supported per site. Each proxy requires its own computer and its own software license.

More detailed ordering information for the PRX 7000 proxy is included in the MCC 7500E Product Planner and Ordering Guide. That document is available on the High Tier Dispatch Console wiki page located at <https://converge.motorolasolutions.com/groups/high-tier-voice-radio-dispatch-consoles>. This page can't be opened directly from this page, so the link will have to be cut and pasted into the address bar of a web browser.

Proxy Software DVD

Description	Full Description	Nomenclature	APC	Price
PRX 7000 Proxy Application SW DVD	Provides the DVD containing the application software for the PRX 7000. Does NOT include the licenses required to use the software. The required licenses are purchased as HKVN4225A for pre-A7.16 software versions and option UA00254AA for A7.16 and beyond software versions.	BVN6079	443	\$250.00

Proxy Software License

Description	Full Description	Nomenclature	APC	Price
ADD: PRX 7000 PROXY SW	Applies to A7.16 and later PRX 7000 software versions only. Each license enables one PRX 7000 application. Each PRX 7000 application supports up to 10 MCC 7100 and/or MCC 7500E connections into the RNI.	UA00254AA	443	\$2,500.00

LICENSE (1-10 CONNECTIONS)	Up to 5 installations of PRX 7000 are supported per console site. The PRX 7000 DVD is not included. DVD item# BVN6079 must be purchased separately. Order as a sub-item to B1942 or B1948.			
----------------------------	--	--	--	--

Proxy Computers

Please see [MCC Series PC, Monitor, and accessories](#) pulldown menu.

Control Room Firewall

When ordering in OMAR, the firewall must be ordered as a standalone item.

Please see [Information Assurance \(IA\) PCAT page](#) for Control Room Firewall media, Element Hardening, and other IA features. Below item is listed for convenience only and may be out of date. It is not managed by the console group.

Description	Full Description	Nomenclature	APC	Price
FORTINET FIREWALL APPLIANCE	(Firewall for A7.15 and later)	T8126	147	\$3,200.00

Step 6: Order Dispatch Assistant software if desired

The following items may be ordered for the Dispatch Assistant. Note that a control room firewall will also be required if the dispatch position hosting the Dispatch Assistant is located inside of the ASTRO 25 console site. The firewall listed above may be used for this purpose.

Description	Full Description	Nomenclature	APC	Price
INTERFACE ADAPTER SOFTWARE LICENSES	Dispatch Assistant software license. One required per dispatch position.	HKVN4581A	443	\$7,975.00
DISPATCH ASSISTANT SOFTWARE DVD	Dispatch Assistant software DVD. One copy of the DVD may be used to install the software on multiple dispatch positions.	BVN1017	443	\$250.00

CONFIGURATION

Model

MCC 7500 IP Logging Recorder

DL360 G7 / G8 servers are not supported in A7.17 or later releases

Ordering Information

General Information

PLEASE NOTE: The Standard Support Period for the 7.11 Release ends on June 30, 2017. Any software and hardware expansions on this release will no longer be supported after this date.

Click [here](#) for additional information.

NICE MUST QUOTE ALL SERVICES INCLUDING TRAINING, PM, AND INSTALLATION - THESE ARE NOT IN ECAT OR DQ MODELS

The MCC 7500 IP Logging Recorder provides audio call recording and archiving for ASTRO 25 radio systems. It is the only certified, tested, and supported solution that Motorola sells for use on all ASTRO 25 recording. Jointly developed with NICE Systems, the MCC 7500 IP Logging Recorder has been tested and certified with the MCC 7500 console in every Motorola ASTRO 7.x system release. An innovative recording solution that allows public safety organizations to record their radio system communications, it utilizes an Intel Xeon Core Processor with logical drives in a mix of mirrored RAID 1 and RIAD 5 array configurations providing up to 500,000 on-line channel hours of storage and data, redundant power supplies, and Windows Server 2008 R2 (starting with the A7.14 release). The 10 simultaneous call recorder is scalable with the ability to add capacity with the purchase of additional call licenses.

The MCC 7500 IP Logging Recorder works in conjunction with an Archiving Interface Server (AIS) utilizing an API that allows the recording system to specify which talkgroups and conventional channels will be recorded. Because this API allows call control data to be passed to the recorder system, Motorola's recording solution provides unique capabilities. Customers have the ability to:

- See a call originator's unit ID and/or alias
- See the type of call initiated - talkgroup, emergency, conventional
- See when certain radio events occurred - emergency acknowledgement/knockdown, changes in frequency or PL selection, etc.

The following types of radio system calls are capable of being processed via the AIS and recorded on the logging recorder:

- Conventional PTT Call
- Trunked Talkgroup Call

- Trunking Announcement Group Call
- Trunking Emergency Call

The following types of trunking radio system events are capable of being processed via the AIS and recorded on the logging recorder:

- Call Alert
- Emergency Alarm
- Emergency Acknowledge
- Emergency Knockdown
- Repeater On/Off
- Main/Alt Status

The following types of conventional radio system events are capable of being processed via the AIS and recorded on the logging recorder:

- Frequency Selection
- Private Line (PL) Selection
- Mute Second Receiver
- Repeater On/Off
- Wildcard I
- Wildcard II
- Group Text Messaging (7.16)

Recorders now come in the following capacities:

- 10 simultaneous transmissions (upgradeable up to 120 simultaneous transmissions)
- 120 simultaneous transmissions

The recorder's capacity for recording simultaneous calls is scalable and can be tailored to suit the customer's needs. An option is available which allows the 10 simultaneous recorder to increase capacities by steps of 10 up to a limit of 120 simultaneous transmissions. The simultaneous transmissions capacity of a recorder includes all the trunked talkgroups and conventional channels being recorded via the AIS. Due to the different vocoders used with trunked and conventional audio, the following equation should be used to determine the size of the recorder required to meet a particular customer's needs.

- $1.7 \times (\# \text{ of simultaneous conventional calls}) + (\# \text{ of simultaneous trunked calls}) = \text{required simultaneous call capacity}$

Additional factors to consider when sizing an MCC 7500 IP Logging Recorder:

For customers that use regrouping, there are nuances to consider when sizing the recorder's capacity. The below highlights scenarios that could be encountered. It is best to discuss with the customer how they use these features and the impact their usage patterns might have on the recorders size requirements.

Regrouping's Impact on Call Licenses in the Recorder

- A dispatcher has a patch set up with "N" regroupable trunking talkgroups in it. The dispatcher is transmitting on the patch. This results in N calls being logged on the logging recorder which consume N of the licenses. While the dispatcher is transmitting on the patch, a radio begins transmitting on one of the talkgroups in the patch. This results in an additional N calls being logged on the logging recorder which consume an additional N of the licenses. The end result is 2 x N licenses are consumed by this

scenario.

- A dispatcher has a multiselect group open with N regroupable trunking talkgroups in it. The dispatcher is transmitting on the multiselect. This results in N calls being logged on the logging recorder which consume N of the licenses. While the dispatcher is transmitting on the multiselect, a radio begins transmitting on one of the talkgroups in the multiselect. This results in an additional N calls being logged on the logging recorder which consume an additional N of the licenses. The end result is 2 x N licenses are consumed in this scenario.

Audio and events which have been recorded are accessed through the NICE Inform application. Included with each MCC 7500 IP logging recorder is Inform Lite - a state-of-the-art multiple channel search and replay tool which is configurable to meet specific customer needs.

The NICE logging recorders and playback stations are configured and managed by a common administration application. This application can be run on a playback station PC or on a dedicated PC.

System Requirements:

1. Motorola Archiving Interface Server (AIS)

Client PC Requirements:

Minimum specification for the client (configuration and replay) PC:

Recommended Hardware Specification Windows 7

1. Audio only - Dual Core 2 GHz or higher or Audio and Video - Intel Core 2 Quad 2.4GHz recommended
2. 1GB - audio only, 2GB with 4GB recommended for audio and video
3. 100 Mb/s Ethernet network card
4. 10GB hard disk space to support local call cache
5. SoundBlaster or compatible sound card / [Audio and video - NVidia PX8400 GS 512MB]
6. DVD/CD-ROM drive required for installation
7. 1024 x 768 16bit color display / [SXGA 1280 x 1024]
8. Keyboard and mouse or other pointing device.
9. Loudspeaker or Headphone output

Software Specification

1. Supports the OS platforms:
 1. Windows 7 64 bit
2. The user must have Administration privileges at Install time
3. Direct X 9.0
4. MSXML 4.0
5. Internet Explorer 6 Service Pack 1 or later

Inform Lite supports the following capacities. If greater capacity is required the full version of Inform is required (see Inform price page).

- Maximum of 5 concurrent user licenses (total of both Reconstruction and Monitor)
- Maximum of up to 608 recording resources (a resource is defined as a Talk Group, a Conventional Radio Channel and/or a recording channel in an analog/digital logger)
- Inform Lite can interface to a maximum of 4 active recorder databases and 4 legacy recorder databases
- Inform Lite also supports capture and search of Text-to-9-1-1 recordings on the following platforms:
 - Intrado
 - Airbus
 - NENA
 - Agent 5-1-1

- Inform Lite supports the Redaction tool to allow customers to block replay of sensitive portions of a recording
- One Reconstruction Module license is included with each primary or parallel recorder ordered

Ordering Requirements

The MCC 7500 IP Logging Recorder solution requires a Motorola Archiving Interface Server (AIS). The AIS model numbers can be found on the product catalog tab [here](#). MCC 7500 consoles require an MCC 7500 IP logging recorder.

Key Information & Ordering Instructions:

MCC 7500 IP Logging Recorder Package & Required / Recommended Items

1. Each ASTRO Base Bundle for the MCC 7500 IP Logging Recorder includes the following items: DL360 servers, Radio System AIS Client Software, Internal Storage (up to 500,000 Channel Hours). Parallel bundles include 2 logging servers and one backup server. Single bundles include one logging server and a backup server. All specifications are subject to change.

2. Recording channels must be added to the Logger Recorder(s). There are 2 tiers of channels - Professional and Elite. The differences and description of each are defined on the Inform Price Page. A corresponding number of P25 channel license must be ordered. If parallel logging is required, a corresponding number of resilient channels must be ordered. For the **120-channel bundles**, the channel licenses, P25 licenses and (if applicable) resilient channel licenses are included.

3. Anti-virus software should be ordered separately (see Network Security Price Page). NICE will assist with the initial installation of the software. The customer is responsible for keeping the antivirus software current.

4. An Uninterruptible Power Supply (UPS) is strongly recommended for use in any logging recorder installation. These are not supplied as part of the logging solution and are expected to be supplied by the customer.

5. Windows Supplemental Configuration - A selection is **REQUIRED** for any logging recorders used on **ASTRO 25** systems or later. Either T7448A or T7449A is required to be ordered for every box - one for each logging recorder, replay station, etc.

6. One AIS is required for each ASTRO 25 IP Digital Logging Recorder used on the system.

Consult AIS price pages for a description and ordering information.

7. When used on ASTRO 7.17 release, you must order replay client TT3225A.

8. When placing an order for NICE equipment it is important that all product is placed on the same FO/order and not broken out into separate orders. Please contact David Gutteridge at NICE if there is an exceptional circumstance that requires equipment to be broken out into separate FO's.

Redundant Systems

Audio recording is a mission critical activity on the radio system; often a legal requirement as well. Because of the critical importance of redundancy, special pricing is now available for customers who purchase redundant systems. There are many benefits to having redundant solutions. Here are a few reasons to consider redundancy:

- Protects data loss from a single point of failure
- Protects customers from down time associated with planned activities like upgrades, patches, hardware replacement, etc.
- Increases customer satisfaction and reduces stress

Redundant recorder ordering criteria:

1. The logging recorders must record in parallel (i.e. record exactly the same audio)
2. In a parallel recording system you must have **two** AIS and VPM. There is a one-to-one relationship between the logging recorder and the AIS / VPM.

Warranty & Support

1. Pricing includes first year **SILVER** warranty maintenance (Monday - Friday, 8 -5) (Except International). It is strongly recommended to uplift the warranty to Gold Lite or Gold during year one and for subsequent years of maintenance to ensure customer satisfaction.

2. NICE provides 8x5 technical phone support and NICE or its participating dealer provides M-F 9AM-5PM (local time) same day remote access support for Level A & B severity issues during the warranty period.

3. NICE requires remote access to meet published SLA. Without remote access support may be delayed.

4. If 24x7 support is required, please contact the field CSM for a quotation. This is strongly recommended.

5. HP DAT 72 & 360 Tape Drives - New HP DAT Drives are no longer commercially available. NICE will RMA units for replacement within the standard HP warranty period. After HP warranty period expires, NICE will fulfill RMA's with commercially available refurbished units. This applies to pre-G9 servers that used DAT drives.

Installation / Services

1. IMPORTANT - NICE Services must be ordered separately. NICE will provide a cost quotation to the field that can be margined up and quoted to the customer. There are

no services included in ECAT models. Installation (both at CCSi and in the field, PM services, and training must all be ordered separately). Note: Staging in CCSi does not include telephony recorders unless specifically quoted by NICE.

2. IMPORTANT - In the field commissioning of the logging equipment: The Motorola field PM needs to contact NICE to schedule final commissioning of the logging recorder equipment. Please contact the NICE PM to schedule a final installation. Please note that scheduling for NICE at CCSi or in the field is 8-10 weeks lead-time.

3. Pricing Includes Installation in Domestic United States (**Alaska, Hawaii, and International require additional service quotation**): A factory-trained and certified professional service representative will assist the end user in the implementation of their new recording solution. NICE or a participating dealer installation technician will provide a short demonstration of the basic functions of the MCC 7500 IP radio recorder system and the search and replay application. The demonstration is not intended to provide a thorough understanding of the operation of the system.

4. Professional Training - Professional training for new customers is strongly recommended and will be quoted as part of the services proposal from NICE Systems.

1. Professional training provides a full day or more of in-depth instructor led product training and Q&A for up to six customer personnel.

2. Additional operator, administrative, and technical training are available for added cost (Except International).

3. Training is scheduled Monday-Friday, 8-5 - US orders only - dependent upon travel.

4. **Rescheduling** - NICE training is scheduled several weeks in advance with a lead time that can be 8-10 weeks. If rescheduling is required, please provide at least 6-8 weeks advance notice to NICE. Training is essential to a positive customer experience. Rescheduling delays that prevent training from occurring reduce customer satisfaction. Please try to ensure the training schedule is not changed once locked in.

5. Please order NICE services in advance to ensure NICE has receipt of the service PO at least 8-10 weeks in advance of installation to help ensure proper resource scheduling of field installations or commissioning.

6. NICE maintenance does not include Motopatch or NICEpatch installation. These services are provided by the field team and / or customer.

Upgrades & Telephony Integration

1. **UPGRADES** - The MCC 7500 IP Logging Recorder requires upgrades with each system release. Please contact the UO PM working on the system releases. A quotation will be required for the upgrade - the quote includes pricing for NICE software and on-site technical installation. The logging recorder upgrade should take place immediately **after** the system upgrade. A document outlining the requirements can be found at the Compass site below.

2. **"Integration"** with existing telephony (analog) recorders. If a customer requires the ability to access both a telephony (analog) recorder(s) and a MCC 7500 IP recorder(s) from one replay station then the sales team must work with the field engineering team on the design. An integration document is available at the Compass site below that provides guidance for designing an integrated MCC 7500 IP and telephony/analog logging recorder

system. The NICE implementation engineer will configure the logging recorders, but it will be the responsibility of the Motorola field team to "integrate" the system (configure and design border router, firewall settings, etc).

3. DL360 G6 servers are not supported in A7.16 or later releases

4. DL360 G7 / G8 servers are not supported in A7.17 or later releases - A7.17 release is OS 2012 and this OS will not support HP DAT drives used in G7 / G8 server solutions. DL360 G9 two server solution is supported in A7.17 release.

General Notes

1. The MCC 7500 IP logging recorder and AIS are certified in Motorola's System Integration & Test (SIT) as part of the system release. The integrated telephony solutions are not certified in ASTRO 25 releases, but are ship accepted and have been deployed on the RNI.

2. The MCC 7500 IP Logging Recorder being used with the AIS is not capable of supporting other types of recording interfaces (PBX, T1/E1, analog line, etc.). Separate recorders must be used for anything that isn't coming through the AIS (e.g., recording telephony audio from a PBX or recording analog audio directly from its source). Please see ordering instruction # 2 in Upgrades & Telephony Integration section for incorporating a telephony/analog recorder with an MCC 7500 IP logging recorder.

3. Due to the size of the IP logging recorder, some customers may desire a cabinet for racking of the equipment. If mounting in a 2 post rack, part number DDN9748A can be ordered. This is a black shelf for a 19" 2 post rack.

4. A KVM is strongly recommended as a keyboard, mouse, and monitor are required for both installation and administration of the system.

5. The MCC 7500 IP Logging Recorder has no Motopatch support in the ASTRO 25 7.13 release. This restriction is limited to the A7.13 release when using an HP Gen 8 Windows Server 2008 R1 operating system. NICE does supply Motorola with a monthly patching procedure called NICEpatch that should be applied in the field using the same methodology as Motopatch. Any new system using the HP Gen9 server will have Motopatch support. **NICE maintenance does not include Motopatch or NICEpatch installation. These services are provided by the field team and / or customer.**

6. Customer retention requirements must be shared with NICE for the MCC 7500 IP logging recorder and / or telephony logging solutions. Retention requirements dictate how the database is configured within the logging system during installation. If a change in retention requirements is required after initial installation, the configuration change could impact recording and / or result in a loss of audio.

For technical information on the ASTRO 25 IP Digital Logging Recorder subsystem feature please reference the MCC 7500 System Planner.

Additional Information on NICE products is available from NICE directly at their **ExtraNICE business partner portal**. This site provides Motorolans with access to materials published by NICE on their applications, tools, and solutions. The materials include marketing collateral, manuals (user, installation, hardware, etc.), technical notes, FAQ's, and much more. Register at www.extranice.com .

ASTRO 25 Advanced Messaging Solution

[Ordering Guide](#)

Ordering Information

[Ordering Guide](#)

Ordering Requirements

Motorola Solutions, Inc. announces the transition of the ASTRO® 25 Advanced Messaging Solution (AMS) from its own standalone platform to the new ASTRO® 25 AMS within the Intelligent Middleware (IMW - formerly known as UNS or Unified Network Services) Messaging service platform. This means that AMS will become an application with the server software residing on the IMW Messaging service platform. This will take effect as of September 30, 2016.

IMPORTANT: The AMS A1 and A2 models will no longer be available for new orders after September 30, 2016. After that time, all new orders for AMS messaging only will need to be transitioned to the new Intelligent Middleware (IMW - formerly known as UNS) Messaging service platform R5.2 and later. Refer to IMW (UNS) prices pages for ordering and pricing [UNS](#).

For existing AMS customers this AMS ECAT page will still be used for upgrades and expansions (add-ons), see bottom of this page. Contact your regional sales enablement or pre-sales / field engineering team for the AMS release specific lifecycle ordering and support

plan.

IMPORTANT NOTE: For any A3 configuration integrated with PremierOne CAD the Field Engineering team MUST contact the Applications (SPSS) Pre-Sales System Architect team to co-architect / engineer the solution and approve the equipment list before a quote is provided to the customer. Contact leo.marroquin@motorolasolutions.com (956-631-3777) or Devery.Thumann@motorolasolutions.com

MCD 5000 DESKSET SYSTEM

Ordering Information

General Information

MCD 5000 DESKSET SYSTEM OVERVIEW:

The MCD 5000 Deskset System is the Motorola Solution's next generation radio dispatch deskset platform that utilizes VoIP technology. The MCD 5000 Deskset can be deployed on existing customer's IP network or on a stand-alone IP network. The MCD 5000 Deskset is part of the MCD 5000 Deskset System that provides radio dispatch capability when connected to a two-way radio device. MCD 5000 Desksets can be placed anywhere on the IP network. Each MCD 5000 Deskset connects to a single radio device at a time. The MCD 5000 Deskset may connect directly to a radio or connected to a selected radio over IP network via the MCD 5000 Radio Gateway Unit (RGU).

The MCD 5000 Deskset can be used where MC3000, MC1000 and MC2000 desksets have been used in the past. In addition, it can be used with the APX Consolette and/or a MOTOTRBO XPR5550e.

The MCD 5000 Deskset can connect to the following radios:

- ASTRO XTL5000 Consolette (W9): ASTRO Spectra Consolette, ASTRO Spectra Plus Consolette
- CDM1550 Series Radios: CDM 1550, CDM 1550 LS, CDM 1550 LS+ - **See Note Below**
- MCS 2000 Model III Control Station - **See Note Below**
- APX Consolette (via IP)
- 2-Wire or 4-Wire Tone Remote Control (TRC) devices
- 4-Wire E&M devices
- Dimetra-TETRA Mobile Radios (MTM5400 & MTM800E)
- MOTOTRBO XPR5550e Control Station (**NEW in R02.03.00**)

Note: The CDM1550 Series Radios and MCS 2000 Model III Control Station will not be supported starting in release 2.3.4 (Nov 18, 2019 release). If the customer still wants to use these radios, they can downgrade the Deskset and RGU to any release prior to 2.3.4.

MCD 5000 DESKSET SYSTEM Current Shipping Release R02.03.00 (Jan. 2018):

Changes, New Features and Enhancements with MCD 5000 Deskset System in R02.03.00:

- Control Head emulation of MOTOTRBO XPR5550e Control Station
- CT and ACP application now certified on Windows 10 Pro (64-bit) and Windows 10 IoT Enterprise LTSB 2015/2016 (64-bit) OS
- Redundant OMC Server is no longer a supported configuration

WHERE TO GO TO LEARN MORE ABOUT THE MCD 5000 DESKSET SYSTEM:

- **System Planner:** is available on the [MCD 5000 Deskset System Converge page](#)
- **Manuals:** The various manuals for the MCD 5000 Deskset can be downloaded from the [ASTRO Dispatch Documentation Site](#)

MCD 5000 Deskset System Components

The MCD 5000 Deskset System consists of the following components:

- **MCD 5000 DESKSET** - IP-based deskset that provides dispatch capability when connected to a radio. Each MCD 5000 Deskset can only connect to and monitor one radio channel at a time.
- **DESKSET AUDIO ACCESSORIES** (optional) – each MCD 5000 Deskset is capable of supporting one Desktop Paddle Microphone or one Headset Jackbox in addition to a Push-To-Talk (PTT) Foot Switch.
- **MCD 5000 RADIO GATEWAY UNIT (RGU)** – is used to connect radios to the MCD 5000 Deskset System. Each MCD 5000 RGU can interface up to 4 radios to the MCD 5000 Deskset System IP network. A MCD 5000 Deskset user can create a talkpath over the IP network to a radio resource connected to the MCD 5000 RGU. The MCD 5000 Deskset can only connect to and monitor one radio channel at a time.
- **IP NETWORK** –can be deployable on customer's existing WAN/LAN IP Network or on a dedicated IP network for the deskset system.
- **TWO-WAY RADIO DEVICES** – are used with the MCD 5000 Deskset to provide access to the customer's land mobile radio (LMR) system.
 - ASTRO XTL5000 Consolette (W9): ASTRO Spectra Consolette, ASTRO Spectra Plus Consolette
 - CDM1550 Series Radios: CDM 1550, CDM 1550 LS, CDM 1550 LS+ - **See Note Below**
 - MCS 2000 Model III Control Station - **See Note Below**
 - APX Consolette (via IP)
 - Direct Connection to 2 or 4 wire Tone Remote Control (TRC) devices
 - 4W-E&M Radios
 - Dimetra TETRA Mobile Radios (MTM5400 & MTM800E)
 - MOTOTRBO XPR5550e Control Station

Note: The CDM1550 Series Radios and MCS 2000 Model III Control Station will not be supported starting in release 2.3.4 (Nov 18, 2019 release). If the customer still wants to use these radios, they can downgrade the Deskset and RGU to any release prior to 2.3.4.

- **CONFIGURATION TOOL (CT) APPLICATION** – used to configure all parameters and settings on the MCD 5000 Deskset and MCD 5000 RGU. The CT Application can be located remotely anywhere on the IP network or locally using Ethernet connection. The CT Client PC runs on Microsoft Windows® 7 (64-bit) or Windows 10 Pro (64-bit) or Windows 10 IoT Enterprise LTSB 2015/2016 (64-bit) OS.
- **OMC/ACP** (optional)

OPERATION AND MANAGEMENT CENTER (OMC) SERVER – is a centralized server in the MCD 5000 Deskset System responsible for remote management and configuration of the MCD 5000 Desksets and MCD 5000 RGUs deployed in the system. The OMC server runs on the Red Hat® Linux® operating system.

ADMINISTRATOR CONTROL PANEL (ACP) CLIENT PERSONAL COMPUTER (PC) – provides the user level interface to the OMC Server. The APC Client PC allows local or remote administration access for system management activities. The ACP Client PC runs on Microsoft Windows® 7 (64-bit) or Windows 10 Pro (64-bit) or Windows 10 IoT Enterprise LTSC 2015/2016 (64-bit) OS and is required for MCD 5000 Deskset Systems with an OMC.

Features

The MCD 5000 Deskset provides a comprehensive feature set as listed below.

DESKSET CONNECTIONS:

- IP connection to Motorola radios
- Serial (local) connection to Motorola radios
- TRC (Tone Remote Control) connection to LMR radios

DESKSET FEATURES:

- Emulates the buttons and display of the connected radio, for applicable radios
- Perform all the functions of the radio control head, for applicable radios
- Advanced Signaling capabilities such as Push-To-Talk IDs, Emergency, Call Alerts
- Ability to access different radio system types using the deskset - connect to any one of the radios on the network and change connection when desired
- Programmable security access to certain radio channel - ability to control permissions for individual deskset user to access each radio on the network
- Anywhere access - security PIN solution to allow employees to switch between desksets, customer sites and offices.
- Remote or Local Configuration Management

DESKSET CONTROLS:

- Large LCD Display with Menu Selection and Soft Keys
- Push-To-Talk (PTT), Base Intercom, Channel Selection, Monitor Radio Channel
- Supervisory Mode
- Parallel Deskset Communications and Status Updates
- Inbound Emergency Alarm Acknowledge and Clear
- Generate Outbound Emergency Alarm, for applicable radios
- 3x4 Keypad
- Volume Controls

DESKSET AUDIO INPUTS:

- Front Panel Push-To-Talk (PTT)- (comes standard with deskset)
- Handset with PTT- (comes standard with deskset)
- Supports one PTT Footswitch- (optional)
- Supports one Headset Jackbox OR one Desktop Paddle Microphone- (optional)
- Supports one Local Logging Port - (optional)

DESKSET MOUNTING OPTIONS:

- Desktop Mount via Adjustable Deskset Footstand (comes standard with deskset)
- Wall Mount (optional)

MCD 5000 DESKSET SYSTEM OS HARDENING CDs AVAILABLE :

MCD 5000 Deskset System does offer Windows PC Operating System Hardening CD Kits for Motorola supplied PCs. Element hardening must be applied to every box in the MCD 5000 System (CT and ACP).

The table below summarizes the OS Hardening CD that is available to purchase for Motorola supplied PCs ONLY based on the different MCD 5000 Deskset System types:

- **MCD 5000 Deskset System without OMC** (available for CT PC)
- **MCD 5000 Deskset System with OMC** (available for following PCs: CT and ACP. Note: OMC Server ships OS fully hardened.)

IA COMPLIANT SYSTEM	MCD 5000 DESKSET SYSTEM APPLICATION	MOTOROLA SUPPLIED PC	OS HARDENING CD PART #s
MCD 5000 Deskset System w/out OMC (IA Non Compliant)	FVN5847 CT Application for Systems without OMC	TT3492 Z2 Mini Workstation Windows 10 IoT Enterprise LTSP 2016 (64-bit) Non-Returnable	FVN5956 (Full OS Hardening)
MCD 5000 Deskset System with OMC (IA Compliant)	FVN5848 CT Application for Systems with OMC	TT3492 Z2 Mini Workstation Windows 10 IoT Enterprise LTSP 2016 (64-bit) Non-Returnable	FVN5956 (Full OS Hardening)
MCD 5000 Deskset System with OMC (IA Compliant)	FVN5853 ACP Application	TT3492 Z2 Mini Workstation Windows 10 IoT Enterprise LTSP 2016 (64-bit) Non-Returnable	FVN5956 (Full OS Hardening)
MCD 5000 Deskset System with OMC (IA Compliant)	FVN5850 OMC Application	TT3549 ML30 Gen10 Server Linux 7.x OS Non-Returnable	No IA CDs are required to purchase for OMC Server. The OMC Servers (TT3190) ships Fully OS Hardened.

IMPORTANT NOTE:

- The IA OS Hardening CD (FVN5956) for the MCD 5000 Deskset System is **ONLY** compliant with Motorola supplied PCs.
- For the CT Application, (FVN5847 or FVN5848) the compliant Motorola Supplied PC's are: TT2538 (Z420-Win 7), TT2833 (Z440-Win 7), TT3106 (Z440-Win 10), TT3225 (Z2 Mini-Win 10) and TT3492 (Z2 Mini-Win 10).
- For the ACP Application, the compliant Motorola Supplied PC's are: TT2401 (Z420-Win 7), TT2833 (Z440-Win 7), TT3106 (Z440-Win 10), TT3225 (Z2 Mini-Win 10), and TT3492 (Z2 Mini-Win 10).

Ordering Requirements

This section will lead you through the necessary ordering steps required to order the MCD 5000 Deskset System.

NOTE: For EMEA, orders are entered in OMAR. In the "Product" field, enter "IPDESKSET" and click GO to get to the MCD 5000 Product.

STEP 1: ORDER THE MCD 5000 DESKSET

MCD 5000 Deskset is a desktop console that provides digital control to a variety of Motorola radios. The MCD 5000 Deskset may connect directly to a radio or it may connect to a selected radio over an IP network via the MCD 5000 Radio Gateway Unit (RGU). Through the digital control link the MCD 5000 Deskset emulates the control head of the radio allowing the deskset to perform all the functions that can be performed using the radio control head.

Below are the ordering instructions:

1. Order the [MCD 5000 Deskset Hardware](#) (F2380) - Required
2. Order a [MCD 5000 Deskset Power Supply](#) for each MCD 5000 Deskset - Required
 - FHN7469A - Assy, P/S, MCD 5000 Deskset/RGU Power Supply with USA Power Cord (NA Plug)
 - FHN7485A - Assy, Kit, FRU: MCD 5000 Deskset/RGU Power Supply with out Power Cord (For EU & UK order plug below)
 - 3004209T01 - Power Cord (EU Plug)
 - 3004209T02 - Plug, British Standard (UK Plug)
3. Order an [ETHERNET CABLE](#) for each MCD 5000 Deskset to connect to LAN Switch - Required. Available through MSI or may be customer provided.
Ethernet Cable 10' with Red and Black (FKN8695)
4. Dependent on Deskset Configuration - Order appropriate [RADIO INTERFACE CABLE](#) to connect radio to deskset directly if not using a MCD 5000 RGU.

If system configuration is "Single Deskset" connected to "Single Radio"--- then order the appropriate RADIO INTERFACE CABLE to connect radio to deskset directly:

- FKN8690 - Cable - MCD 5000 to ASTRO Consolette W9 Direct Connect
- FKN8689 - Cable - MCD 5000 to CDM 1550 Series Direct Connect - **See Note Below**
- FKN8688 - Cable - MCD 5000 to MCS 2000 III Direct Connect - **See Note Below**
- FKN8691 - Cable - MCD 5000 to MC3000 DJB for ASTRO Consolette W9
- FKN8693 - Cable - MCD 5000 to MC3000 DJB for CDM 1550 Series
- FKN8692 - Cable - MCD 5000 to MC3000 DJB for MCS 2000 III
- FKN0012 - Cable - MCD 5000 to MOTOTRBO XPR5550e Control Station
- FKN2003 - Cable - MCD 5000 to MTM5400 TETRA Mobile Direct Connect
- FKN2004 - Cable - MCD 5000 to MTM800E TETRA Mobile Direct Connect
- Standard Ethernet Cable is needed for connecting the MCD 5000 Deskset or RGU to the APX Consolette

Note: The CDM1550 Series Radios and MCS 2000 Model III Control Station will not be supported starting in release 2.3.4 (Nov 18, 2019 release). If the customer still wants to use these radios, they can downgrade the Deskset and RGU to any release prior to 2.3.4.

STEP 2: ORDER MCD 5000 DESKSET NATIVE LANGUAGE SUPPORT - OPTIONAL

The MCD 5000 Deskset provides the Software enforced licensing option for Native Language support feature. The MCD 5000 Deskset ships standard with English on the display. IF a 2nd/Native language (German, French or Japanese) is desired/required on the MCD 5000 deskset display, THEN complete this Step otherwise skip to Step 3 below.

Below are the ordering instructions IF 2nd/Native Language Support is desired/required:

1. Order the [B1943A MCD 5000 Licensing, main model](#) (Qty 1 per MCD 5000 System)
2. Order the [UA00447AA Native Language Support](#), option to the B1943 model. (Qty = number of desksets needing 2nd/Native Language Support)

STEP 3: ORDER MCD 5000 DESKSET ACCESSORIES - OPTIONAL

The MCD 5000 Deskset ships standard with a built-in condenser microphone, an internal front panel speaker, and a K-style handset with a Push-To-Talk (PTT) button.

In addition, the following OPTIONAL MCD 5000 Deskset accessories are also available for ordering:

- MCD 5000 Deskset Wall Mount Kit (FHN7394) - Max of 1 per deskset
- PTT Footswitch (BLN6732B) - Max of 1 per deskset
- Desktop Paddle Microphone (RMN5068) OR MCD 5000 Headset Jackbox (FHN7470) - Max of 1 per deskset
- Local Logging Cable (FKN8696) to connect a generic analog voice logger to deskset - Max of 1 per deskset
- VIP Cable (FKN8697) - Max of 1 per deskset

NOTE: The Desktop Paddle Microphone and Headset cannot be used simultaneously since they use the same connector on the MCD 5000 Deskset.

Below are the ordering instructions:

1. Order a [MCD 5000 Deskset Wall Mount Kit](#) (FHN7394) for each MCD 5000 Deskset - Optional

2. Order a [PTT Footswitch](#) (BLN6732B) for each MCD 5000 Deskset - Optional

NOTE: Each MCD 5000 Deskset can support up one PTT footswitch. The PTT footswitch provides two foot pedals in a rugged, metal housing with a 7 foot cable. One pedal is used for the general transmit feature while the other pedal is used for the monitor feature.

3. Order a [Desktop Paddle Microphone](#) (RMN5068) for each MCD 5000 Deskset - Optional

NOTE: Desktop Paddle Microphone and Headset cannot be used simultaneously since they use the same connector on the MCD 5000 Deskset.

4. Order a [Headset](#) for each MCD 5000 Deskset - Optional

A headset may be used with the MCD 5000 Deskset to allow the deskset user to listen to receive audio and to talk on the radio channel. The MCD 5000 Deskset supports one headset per deskset. The headset must be connected to a MCD 5000 Deskset Headset Jackbox (FHN7470).

A headset consist of two parts, a base and a top.

The Headset Base consists of an amplifier unit with volume control, an optional PTT switch, a connector for connecting to the headset jack, a clip for attaching the amplifier to the user's clothing and either a 15 or 25 foot cable for connecting to the jack.

The Headset Top consists of an earpiece, a microphone, a cable for connecting to the bottom section and a clip for attaching the cable to the user's clothing.

To use a headset with the MCD 5000 Deskset the following MUST be ordered per deskset:

- Order MCD 5000 Headset Jackbox Hardware (FHN7470)
- Order Headset Base - choice of two headset bases (RLN6098 - Headset Base with PTT switch, 15' CBL) OR (RLN6099A - Headset Base with PTT Switch, 25' CBL)
- Order Headset Top - several to choose from - see below:
 - RMN5150A - Over-the-Head Monaural Headset Top with Noise Canceling Microphone
 - RMN5151A - Over-the-Head Binaural Headset Top with Noise Canceling Microphone

5. Order a [MCD 5000 Logger Cable](#) (FKN8696) for each MCD 5000 Deskset - Optional

NOTE: The MCD 5000 Deskset contains a local 4W-E&M logging output with the ability to connect a generic external voice logger directly to the MCD 5000 Deskset.

6. Order a [MCD 5000 VIP Cable](#) (FKN8697) for each MCD 5000 Deskset - Optional

STEP 4: ORDER MCD 5000 RADIO GATEWAY UNITS (RGUs)

MCD 5000 RGU is used to connect radios to the MCD 5000 Deskset System. Each MCD 5000 RGU can interface up to 4 radios to the MCD 5000 Deskset System IP network. A MCD 5000 Deskset user can create a talkpath over the IP network to a radio resource connected to the MCD 5000 RGU. The MCD 5000 Deskset can only connect to and monitor one radio channel at a time.

NOTE: The current model of the RGU- F7979A will be cancelled and replaced by new model F7879B. The new model has refreshed hardware components but its connectivity and functionality is identical to the current model. Orders for the F7979A will be accepted through July 31, 2018. All orders must have a customer requested ship date prior to 8/31/2018. The new model- F7879B will be available for ordering starting August 1, 2018.

The F7879B was certified starting with release R02.03.00. The customer can integrate this RGU model with an existing MCD 5000 Deskset System that uses RGU model F7979A. However, if the System is not currently using release R02.03.00, they will need to upgrade their system. The Software can be found at the following location: <http://motonline.mot-solutions.com> **At Path = "Resource Center > Software > 2-Way > Dispatch Console > MCD 5000 Deskset System"**.

Below are the ordering instructions:

1. Order the MCD 5000 RGU Hardware (F7879B) - Required
2. Order a MCD 5000 RGU Power Supply for each MCD 5000 RGU - Required
 - FHN7469A - ASSY, P/S, MCD 5000 Deskset/RGU Power Supply with USA Power Cord (NA Plug)
 - FHN7485A - ASSY, KIT, FRU: MCD 5000 Deskset/RGU Power Supply with out Power Cord (For EU & UK order plug below)
 - 3004209T01 - Power Cord (EU Plug)
 - 3004209T02 - Plug, British Standard (UK Plug)
3. Order an ETHERNET CABLE for each MCD 5000 RGU to connect to LAN Switch - Required (Available thru MSI or may be customer provided)

Ethernet Cable 10' with Red and Black (FKN8695)

4. Order the appropriate RADIO INTERFACE CABLE for each radio connected to each MCD 5000 RGU - Required

NOTE: Each MCD 5000 RGU can connect up to 4 radios.

- Cable - MCD 5000 RGU to ASTRO CONSOLETTTE W9 Direct Connect (FKN8690)
- Cable - MCD 5000 RGU to CDM 1550 SERIES Direct Connect (FKN8689) - **See Note Below**
- Cable - MCD 5000 RGU to MCS 2000 III Direct Connect (FKN8688) - **See Note Below**
- Standard Ethernet Cable is needed for connecting the MCD 5000 Deskset or RGU to the APX Consolette
- Cable - MCD 5000 Deskset RGU to MTM5400 TETRA Mobile Direct Connect (FKN2003)
- Cable - MCD 5000 Deskset RGU to MTM800E TETRA Mobile Direct Connect (FKN2004)
- Cable - MCD 5000 RGU to MOTOTRBO XPR5550e Control Station (FKN0012)

Note: The CDM1550 Series Radios and MCS 2000 Model III Control Station will not be supported starting in release 2.3.4 (Nov 18, 2019 release). If the customer still wants to use these radios, they can downgrade the Deskset and RGU to any release prior to 2.3.4.

5. Order the appropriate DJB/RADIO INTERFACE CABLE for each radio connected to each MCD 5000 RGU - Required

NOTE: If installing MCD 5000 Desksets in parallel to fielded MC3000 desksets using a Digital Junction Box (DJB) – you must order the appropriate DJB / RADIO INTERFACE CABLES. Each MCD 5000 RGU can connect up to 4 radios.

- Cable - MCD 5000 RGU to MC3000 DJB for ASTRO CONSOLETTTE W9 (FKN8691)
- Cable - MCD 5000 RGU to MC3000 DJB for CDM 1550 SERIES (FKN8693)
- Cable - MCD 5000 RGU to MC3000 DJB for MCS 2000 III (FKN8692)

6. Order a RGU RACKMOUNT SHELF (FTN7490) - Optional

NOTE: Each MCD 5000 RGU Rackmount Shelf can fit up to 2 MCD 5000 RGUs (F7879B) per shelf.

STEP 5: ORDER THE CONFIGURATION TOOL (CT) APPLICATION CD

The Configuration Tool (CT) application is a Windows based utility, used to configure all parameters and settings on the MCD 5000 Deskset and MCD 5000 RGU. The CT can be located remotely anywhere on the IP network or locally using Ethernet connection. ONE required per system.

There are two types of configuration tool (CT) applications depending on the type of MCD 5000 Deskset System:

- CT Application for MCD 5000 Deskset System without Operation and Management Center (OMC) – FVN5847
- CT Application for MCD 5000 Deskset System with OMC – FVN5848

Below are the ordering instructions:

1. Order the Configuration Tool (CT) Application CD depending on what type of MCD 5000 Deskset System - ONE REQUIRED per System. Choose one:

- If the MCD 5000 Deskset System will NOT contain an OMC, then order the following CT Application - FVN5847
- If the MCD 5000 Deskset System will contain an OMC, then order the following CT Application - FVN5848

2. Order a Configuration Tool (CT) Workstation - TT3492 (Z2 Mini-Win 10) - Optional

NOTE: CT Application (FVN5847 or FVN5848) can be installed on a technician PC and doesn't need to be connected to the MCD 5000 Deskset System at all times.

IMPORTANT NOTE:

If IA (OS Hardening) is required, then the CT workstation, TT3492, MUST be supplied from Motorola along with OS Hardening CD - FVN5956. In addition, if the CT Workstation is purchased from Motorola, then order McAfee Windows Anti-Virus Client to install on the workstation - T7885.

If IA OS Hardening is NOT a customer requirement --- below are the CT Application PC requirements for supplying own PC:

- Processor: Intel Xeon E5-1603, 2.8 GHz 1066MHz memory Quad Core
- System Memory: 4 GB
- Free Space on Hard Disk: 10 GB
- Network Adapter with LAN 10/100 Mbps
- Screen Resolution: 1024 x 768
- Operating System: Microsoft Windows 7 Professional SP 1 (64-bit) OR Windows 10 Professional (64-bit) OR Windows 10 IoT Enterprise LTSB 2015/2016 (64-bit)

STEP 6: ORDER THE OMC/ACP COMPONENTS - OPTIONAL

The OMC and ACP Applications and PCs are REQUIRED for larger customer installations, customer who want centralized configuration management or for those customers with Information Assurance (IA) needs.

Operation and Management Center (OMC) Server - is a centralized server in the MCD 5000 Deskset System responsible for remote management and configuration of the MCD 5000 Desksets and MCD 5000 RGU's deployed in the system. The OMC server runs on the Red Hat® Linux® operating system. Only ONE OMC Server may be present per MCD 5000 system.

Administrator Control Panel (ACP) Client Personal Computer (PC) – provides the user level interface to the OMC Server. The ACP Client PC allows local or remote administration access for system management activities. The ACP Client PC runs on Microsoft

Below are the ordering instructions:

1. Order the OMC Server Components - Required for MCD 5000 Deskset System with OMC

- Order the OMC Application Software - FVN5850
- Order the OMC Server Hardware - TT3549
- Order a 19" LCD Monitor - DSTG191B

2. Order the ACP Components - Required for MCD 5000 Deskset System with OMC

- Order the ACP Application Software - FVN5853
- Order the ACP Workstation Hardware - TT3492
- Order a 19" LCD Monitor - DSTG191B
- Order a MCD 5000 Windows Supplemental Full Hardening CD - FVN5956
- Order the McAfee Windows Anti-Virus Client - T7885

STEP 7: ORDER SPARES / FIELD REPLACEMENT UNITS (FRUs) - OPTIONAL

- FHN7290AS - FRU: K-Style Handset (includes coiled cable) for the MCD 5000 Deskset
- FHN7394AS - MCD 5000 Deskset Wall Mount Kit
- FKN8696AS - Cable - MCD 5000 Deskset to Logger
- FHN7470AS - MCD 5000 Headset Jackbox & Cable
- FKN8694AS - Cable - MCD 5000 Deskset to Headset Jackbox
- FHN7469AS - MCD 5000 Deskset / RGU Power Supply with USA Power Cord
- FHN7485AS - MCD 5000 Deskset / RGU Power Supply without Power Cord
- FKN8706AS - FRU: Power Cord for USA - MCD 5000 Deskset / RGU Power Supply
- FKN8695AS - Ethernet Cable 10'
- FKN8704AS - Cable - MCD 5000 RGU Ground Cable
- FKN8690AS - Cable - MCD 5000 RGU to ASTRO Console W9 Direct Connect
- FKN8689AS - Cable - MCD 5000 RGU to CDM 1550 Series Direct Connect

Configuration

Models

NOTE: The current model of the RGU- F7979A will be cancelled and replaced by new model F7879B. The new model has refreshed hardware components but it's connectivity and functionality is identical to the current model. Orders for the F7979A will be accepted through July 31, 2018. All orders must have a customer requested ship date prior to 8/31/2018. The new model- F7879B will be available for ordering starting August 1, 2018.

The F7879B was certified starting with release R02.03.00. The customer can integrate this RGU model with an existing MCD 5000 Deskset System that uses RGU model F7979A. However, if the System is not currently using release R02.03.00, they will need to upgrade their system. The Software can be found at the following location: <http://motonline.mot-solutions.com> **At Path = "Resource Center > Software > 2-Way > Dispatch Console > MCD 5000 Deskset System"**.

Description	Full Description	Nomenclature	APC	Price
MCD 5000 DESKSET	Provides one MCD 5000 Deskset. An in-line power supply (FHN7469) and an Ethernet cable are NOT included with the MCD 5000 Deskset (F2380) and must be ordered separately.	F2380	202	\$1,800.00
SM, RADIO GATEWAY UNIT (RGU)	Provides one MCD 5000 Radio Gateway Unit (RGU) and one RGU ground cable (FKN8704). Each RGU (F7879B) is capable of supporting up to 4 radios. A power supply (FHN7469), Ethernet cable and cabling for connecting radios to the RGU are NOT included with the RGU (F7879B) and must be ordered separately.	F7879	202	\$1,800.00
Z2 G4 MINI WORKSTATION NON RETURNAB	Provides one HP Z2 Mini computer with Windows 10 IoT Enterprise LTSB 2016 64 bit. Also includes 1 keyboard, 1 optical mouse, 2 DisplayPort to DVI adapters, 2 Display Port to VGA adapters and disk(s) to allow for rebuild / recovery of your PC if ever needed. NOTE THE Z2 MINI WORKSTATION IS NOT RETURNABLE (REALLY!!)	TT3492	708	\$2,500.00
ML30 GEN 10 SERVER FOR MCD 5000 OMC	Provides one ML30 Server that runs on the Red Hat® Linux® operating system. Also includes 1 keyboard, 1 optical mouse and disk(s) to allow for rebuild / recovery of your PC if ever needed. NOTE THE ML30 SERVER IS NOT RETURNABLE (REALLY!!).	TT3549	708	\$4,500.00
TECH GLOBAL EVOLUTION SERIES 19INCH NON TOUCH	19 Inch Non Touch Display for CT/ACP Workstation and/or OMC Server	DSTG191B	708	\$1,422.00

Licensing - OPTIONAL

The MCD 5000 Deskset provides software enforced licensing option for Native Language support feature. The MCD 5000 Deskset ships standard with English on the display. IF a 2nd/Native language (German, French or Japanese) is desired on the MCD 5000 deskset display, THEN follow the 2 Steps below otherwise skip this Licensing section.

1. Order the B1943A MCD 5000 Licensing, main model (Qty 1 per MCD 5000 System)
2. Order the UA00447AA Native Language Support, option to the B1943 model. (Qty = number of desksets needing 2nd/Native Language Support)

Orders for licenses require email address(s) to be provided with the order. Motorola emails the License Confirmation to the email address(s) entered with the order as part of the order fulfillment process.

Description	Full Description	Nomenclature	APC	Price
-------------	------------------	--------------	-----	-------

MCD 5000 LICENSING	Provides the main model for ordering the various software-enforced licensing options for MCD 5000. Only one (1) B1943 should be ordered per MCD 5000 system.	B1943	202	\$0.00
ADD: NATIVE LANGUAGE SUPPORT	Software license that enables the MCD 5000 Deskset to support a native/2nd language (in addition to the English language shipped standard) for the MCD 5000 deskset display. This is an option to the B1943 model number. Qty for this option should equal the qty of MCD 5000 desksets that need native/2nd language support in the MCD 5000 system.	UA00447AA	202	\$500.00

Accessories

Software Application

Description	Full Description	Nomenclature	APC	Price
MCD 5000 DESKSET SYSTEM CONFIG TOOL - SYSTEM W/OUT OMC	Provides one CD containing the CT application software that is required for configuring a MCD 5000 Deskset System without OMC.	FVN5847	202	\$250.00
MCD 5000 DESKSET SYSTEM CONFIG TOOL - SYSTEM WITH OMC	Provides one CD containing the CT application software that is required for configuring a MCD 5000 Deskset System with an OMC.	FVN5848	202	\$250.00
MCD 5000 DESKSET SYSTEM OMC SERVER APPLICATION SW	Provides one CD containing the OMC Server application software that is required for MCD 5000 Deskset System with an OMC. Requires OMC Server Hardware (TT3190) that must be ordered separately.	FVN5850	202	\$10,000.00
MCD 5000 DESKSET SYSTEM ACP APPLICATION SW	Provides one CD containing the ACP application software that is required for MCD 5000 Deskset System with an OMC. Requires ACP Workstation Hardware (TT3225) that must be ordered separately.	FVN5853	202	\$2,500.00

Direct Radio Interface Cables

Description	Full Description	Nomenclature	APC	Price
	Provides one cable for connecting a MCS 2000 Model III Control Station to a MCD 5000 RGU (F7879B). Note: This radio type			

CABLE - MCD 5000 RGU TO MCS 2000 III DIRECT CONNECT	will not be supported starting with release 2.3.4. If the customer wants to use these radios, they can downgrade to a release prior to R2.3.4.	FKN8688	202	\$100.00
CABLE - MCD 5000 RGU TO CDM 1550 SERIES DIRECT CONNECT	Provides one cable for connecting a CDM 1550 Series radio to a MCD 5000 RGU (F7879B). Note: This radio type will not be supported starting with release 2.3.4. If the customer wants to use these radios, they can downgrade to a release prior to R2.3.4.	FKN8689	202	\$100.00
CABLE - MCD 5000 RGU TO ASTRO CONSOLETTTE W9 DIRECT CONNECT	Provides one cable for connecting an ASTRO Consolette W9 to a MCD 5000 RGU (F7879B).	FKN8690	202	\$100.00
MCD5000 TO MTM5400 TETRA MOBILE RADIO DIRECT CONNECT	Provides one cable for connecting an MTM5400 Tetra Mobile Radio to a MCD 5000 RGU (F7879B).	FKN2003	202	\$100.00
MCD5000 TO MTM800E TETRA MOBILE RADIO DIRECT CONNECT	Provides one cable for connecting an MTM800E Tetra Mobile Radio to a MCD 5000 RGU (F7879B).	FKN2004	202	\$100.00
CABLE RGU TO MOTOTRBO	Provides one cable for connecting a Mototrbo XPR5550e Control Station to a MCD 5000 RGU (F7879B).	FKN0012	202	\$100.00

Parallel with DJB Radio Interface Cables

Description	Full Description	Nomenclature	APC	Price
CABLE - MCD 5000 RGU TO MC3000 DJB FOR ASTRO CONSOLETTTE W9	Provides one cable for connecting a MC3000 DJB with ASTRO Consolette W9 to a MCD 5000 RGU (F7879B).	FKN8691	202	\$100.00
CABLE - MCD 5000 RGU TO MC3000 DJB FOR MCS 2000 III	Provides one cable for connecting a MC3000 DJB with MCS 2000 Model III Control Station to a MCD 5000 RGU (F7879B).	FKN8692	202	\$100.00
CABLE - MCD 5000 RGU TO MC3000 DJB FOR CDM 1550 SERIES	Provides one cable for connecting a MC3000 DJB with CDM 1550 Series radio to a MCD 5000 RGU (F7879B).	FKN8693	202	\$100.00

Ethernet Cable

Description	Full Description	Nomenclature	APC	Price
ETHERNET CABLE 10' WITH RED & BLACK LABELS	Provides one 10 in. ethernet cable to be used with the MCD 5000 Deskset (F2380) or MCD 5000 RGU (F7879B). Note: This cable is color coded to match the connector colors of the MCD 5000 Deskset and MCD 5000 RGU.	FKN8695	202	\$47.00

Power Supply

Description	Full Description	Nomenclature	APC	Price
MCD 5000 DESKSET / RGU POWER SUPPLY WITH USA POWER CORD	Provides one in-line power supply unit and a North American AC line power cord that connects directly to the MCD 5000 Deskset (F2380) or MCD 5000 RGU (F7879B) to provide power (110/220 VAC to 12 VDC). Note: This power supply is required for both F2380 and F7879B.	FHN7469	202	\$100.00
FRU: MCD 5000 DESKSET / RGU POWER SUPPLY W/OUT POWER CORD	Provides one power supply unit to be used with the MCD 5000 Deskset (F2380) or MCD 5000 RGU (F7879B) to provide power (110/220 VAC to 12 VDC). This part does NOT contain an AC line power cord. Power cord must be ordered separately.	FHN7485	202	\$85.00
CORD, POWER	EUROPE POWER CORD - Ordered with FHN7485	3004209T01	785	\$7.00
PLUG, BRITISH STANDARD	UK POWER CORD - Ordered with FHN7485	3004209T02	362	\$8.45

Deskset Accessories

Description	Full Description	Nomenclature	APC	Price
MCD 5000 DESKSET WALL MOUNT KIT	Provides one wall mount base kit to be used for mounting a MCD 5000 Deskset (F2380) to a wall.	FHN7394	202	\$24.00
	Provides one MCD 5000 Headset Jackbox & cable (FKN8694) that connects to a MCD 5000 Deskset (F2380). The Headset Jackbox provides			

MCD 5000 DESKSET HEADSET JACK BOX & CABLE	a connecton for a single headset. Compatible with both 6-wire and 4-wire headsets. A Headset Base and Headset Top are not included with Headset Jackbox and must be ordered separately.	FHN7470	202	\$150.00
CABLE - MCD 5000 DESKSET TO LOGGER	Provides one logger cable to connect a generic external analog voice logger directly to the MCD 5000 Deskset (F2380).	FKN8696	202	\$40.00
CABLE - MCD 5000 DESKSET TO VIP (R2.0)	-	FKN8697	202	\$40.00
MCD 5000 DESKSET RGU RACK MOUNT PANEL PLUS SCREWS	-	FTN7490	202	\$200.00
USB EXTERNAL DVD DRIVE	External DVD drive that connects to the computer via USB. May be used with the HP Z2 Mini Workstation - TT3225A.	DSF2B56AA	708	\$172.00
HP Z2 MINI ARM WALL VESA MOUNT	VESA compliant mounting sleeve for the HP Z2 Mini Workstation - TT3225A.	DSY7B61AA	708	\$77.00
DESKTOP MIC	Desktop Paddle Microphone	RMN5068A	706	\$120.00

Motorola / Sony Camera System

Ordering Information

General Information

Infrastructure Camera Systems

The Motorola Infrastructure Camera System Solution (pictured above) is part of the Motorola Data Solutions Organization Multimedia/Video Solutions portfolio. The Sony SNC-RX550N/W-MT Network Dome Camera (pictured above, available in Black and White housings) combines the latest image processing technologies to provide multiple compression formats (JPEG, MPEG4, H.264) and advanced functionality with a high-speed Pan/Tilt/Zoom (PTZ) capability. Slip rings on the camera allow a full pan of 360 degrees, allowing users to monitor almost anywhere surrounding the camera using this single unit. In addition, equipped with a powerful 26x optical zoom, the camera allows users to zoom in on small or distant objects with exceptional clarity. Designed for 24/7 operation the SNC-RX550N/W-MT incorporates a Day/Night function, providing clear images even in very low lighting conditions. The camera comes standard with Advanced Video Motion Detection (VMD).

The Infrastructure Camera System integrates Motorola's Mesh technology (MEA™) into Sony's IPELA cameras to provide a cost-effective, robust and easy to deploy, wireless video solution for a wide range of fixed and mobile video monitoring applications. By integrating MOTOMESH™ Quattro or MOTOMESH™ Solo Wireless Modem Cards (WMC) directly into the Sony IPELA camera, the cost to deploy these cameras are reduced by up to 50% or

more. The integrated Mesh Camera System solution is also smaller, less visible, and draws less power than deployments that require external modems or access points. These cameras not only wirelessly connect to the network, but the Mesh Camera System video solution can also be deployed in ad-hoc mode to create an incident video network at licensed 4.9GHz or unlicensed 2.4GHz frequencies where the network is not available. Whether integrated into an existing MOTOMESH Quattro or MOTOMESH Solo network, or deployed as a stand alone video solution, Mesh Camera System users can wirelessly access high quality video feeds – even while traveling at highway speeds. Since the WMC drivers come preloaded, Mesh Camera Systems will then automatically join the wireless network and will continually self-optimize routes and links for maximum performance. With every Mesh Camera System acting as a router/repeater, the video network actually becomes more robust when additional cameras are added.

For applications where meshing, high speed connectivity to the video stream, or ad-hoc networking are not required, the Infrastructure Camera is also available in a standards based 802.11b/g 2.4GHz Wi-Fi interface. This camera model comes with a CompactFlash 802.11g card that is inserted directly into the camera to allow the camera to stream video back over the wireless network. This is the best option for a wireless video surveillance solution over the MOTOMESH™ Duo network.

Rapidly Deployable Video PODs

The Motorola Rapidly Deployable Video PODs (Portability On Demand) include the Sony SNC-RZ50N-MT wireless video camera, a vandal resistant dome, rugged tripod, battery, charger, antenna, wheeled Pelican carrying case, and two cards at either 2.4GHz MEA or 4.9GHz MEA. One card is inserted into the camera and the other into a PC, laptop, or PDA with a PCMCIA Type 2 slot. The POD is also available in a standards based 802.11b/g 2.4GHz interface, which comes with a CompactFlash 802.11g card. Mesh Camera POD domes and cameras are powered by an included 12V DC deployable battery designed to function for over eight hours on a single charge. The entire kit is packaged in a rugged carrying case for portability on demand.

The SNC-RZ50N-MT is the latest in a series of Sony network cameras that incorporates advanced image processing technology to provide three compression formats: JPEG,

MPEG-4, and H.264 (H.264 format can currently only be viewed using a browser). Users can choose any of the three compression formats to match the network environment and application requirements. Furthermore, with a newly developed "Dual Encoding Capability," the camera allows for simultaneous streaming in JPEG and MPEG-4, further expanding monitoring applications. In addition to its Pan/Tilt capability, the SNC-RZ50N is equipped with a powerful 26X optical zoom, allowing users to zoom in on small or distant objects with exceptional clarity. And because the camera incorporates a Day/Night function, it provides clear images in low-light environments and even in 0.1x lighting conditions (when visible light is absent to the naked eye).

Combining other convenient features, such as Intelligent Motion Detection, Intelligent Object Detection, Voice Alert, Built-in Compact Flash and PC card slots, and an Image Flip function, the SNC-RZ50N-MT can be used for a wide variety of monitoring applications in locations such as schools, shopping malls, public spaces. The SNC-RZ50N-MT also offers more PTZ-capabilities with a pan range of 340 degrees and a tilt range of 115 degrees, enabling users to monitor a wide area.

Motorola also offers multiple types of video surveillance camera kits that consist of various packaged solutions for wireless data users interested in broadband capabilities. The kits include the basic hardware and software needed for an outdoor video camera deployment (additional details below).

Wired Cameras

In addition to the Infrastructure and POD wireless camera models, Motorola offers several different types of wired camera solutions.

The SNC-CS50N is ideal for mounting in airports, schools, buildings, corners, and places where a PTZ camera is not needed. The SNC-RZ50N is PTZ-capable with a pan range of 340 degrees and a tilt range of 115 degrees, enabling users to monitor a wide area. The SNC-RX530N, RX550N, and RX570N cameras are top of the line PTZ day/night cameras with a full 360 degree endless pan range. The SNC-DF80N model is a vandal-resistant in/outdoor camera with a polycarbonate mini-dome and aluminum die-cast housing that has a heater option for severely cold areas. And the SNC-DF50N model is a vandal-resistant indoor camera with a polycarbonate mini-dome.

Software & Services

Motorola / Sony Camera Solutions

There are five Motorola Infrastructure Camera models (Options 1-4 below) that provide solutions to meet your customers' wireless video surveillance requirements. For detailed information on what is included in each model, see the Ordering Instructions (below). Infrastructure video cameras are defined to be cameras that are mounted on poles, buildings, and permanent structures. The Sony cameras used for infrastructure deployments are the SNC-RX550N-MT models. These include a single outdoor camera for a MOTOMESH Quattro network, a single outdoor camera for a MOTOMESH Solo network, a single outdoor camera for a MOTOMESH Duo or other Wi-Fi network, a surveillance kit for a MOTOMESH Quattro network, and a complete turnkey surveillance kit for a MOTOMESH Solo network.

There are three Rapidly Deployable Video POD Camera models (Options 5-7 below) that are defined to be cameras mounted on tripods, used in the field, and powered by a 12V DC battery. The Sony Cameras used for the rapidly deployable video PODs are SNC-RZ50N-MT. The deployable video cameras include a MOTOMESH Quattro camera POD, a MOTOMESH Solo camera POD, and a 2.4Ghz 802.11g Wi-Fi camera POD.

In addition to the Infrastructure and POD wireless camera models, Motorola offers several wired camera solutions detailed below (Options 8-12 below).

OPTION #1: (HK1257A):

The 4.9 MEA Sony Camera is for deploying a video camera in an existing MOTOMESH Quattro network. This model assumes you have MeshManager. The camera, outdoor dome, remote antenna mount, power supply, and WMC7300 card are part of the model. To view the Sony camera, a version of the RealShot software needs to be ordered or another video management solution.

The 4.9 MEA Sony Camera includes the following:

- 1 Sony Camera - SNC-RX550N/W-MT/W-MT (or SNC-RX550N/W-MT/B-MT)
- 1 WMC7300 Card
- 1 Outdoor dome, mounting brackets and antenna
- 1 Camera power supply

Notes:

(1) RealShot Manager software is not included and must be ordered separately, or another video management solution.

(2) The HK1257A comes standard with a white camera, 11 dBi antenna, and clear outdoor dome. These items can be substituted by ordering a ZA00479AB black camera, ZA00454AA 9 dBi antenna, or a ZA00480AB tinted outdoor dome. Plan to lose about 1.0 to 1.2 F-Stops with the tinted dome.

OPTION #2: (HK1256A):

The 2.4 MEA Sony Camera is for deploying a video camera in an existing MOTOMESH Solo legacy network (**NOTE:** HK1256A will only work with legacy R3.x software). This model assumes you have MeshManager. The camera, outdoor dome, remote antenna mount, power supply, and WMC6300 card are part of the model. To view the Sony camera, a version of the RealShot software needs to be ordered or another video management solution.

The 2.4 MEA Sony Camera includes the following:

- 1 Sony Camera - SNC-RX550N/W-MT (or SNC-RX550N/W-MT/B-MT)
- 1 WMC6300 Card
- 1 Outdoor dome, mounting brackets and Antenna
- 1 Camera power supply
- MEA Admin CD
- Windows 2000 XP

Notes:

(1) RealShot Manager software is not included and must be ordered separately, or another video management solution.

(2) The HK1256A comes standard with a white camera, dynamically provisioned, 8 dBi antenna, and clear outdoor dome. These items can be substituted by ordering a ZA00479AB black camera, ZA00385AA static provisioning, ZA00388AA 4 dBi antenna, or a ZA00480AB tinted outdoor dome. Plan to lose about 1.0 to 1.2 F-Stops with the tinted dome.

OPTION #3: (HK1767A):

The 2.4GHz 802.11b/g Sony Camera is for deploying a video camera in an existing MOTOMESH Duo network or other standards based Wi-Fi network. The camera, outdoor dome, remote antenna mount, power supply, and CF 802.11b/g card are part of the model. To view the Sony camera, a version of the RealShot software needs to be ordered or another video management solution.

The 2.4GHz 802.11b/g Sony Camera includes the following:

- 1 Sony Camera - SNC-RX550N/W

- 1 SNCA-CFW5 802.11g Card
- 1 Outdoor dome, mounting brackets and Antenna
- 1 Camera power supply
- MEA Admin CD
- Windows 2000 XP

Notes:

(1) RealShot Manager software is not included and must be ordered separately, or another video management solution.

(2) The HK1767A comes standard with a white camera and clear outdoor dome. The clear dome can be substituted by ordering a ZA00480AB tinted outdoor dome. Plan to lose about 1.0 to 1.2 F-Stops with the tinted dome.

OPTION #4 (HK1302A):

The 4.9 MEA Sony Surveillance Kit is a video solution package to deploy in a MOTOMESH Quattro network. The MeshManager software is **not** included but can be ordered as a separate model number as part of a MiSC, Mobile MiSC, or as software only. RealShot software is included and used to manage the Sony Cameras.

The 4.9 MEA Sony Surveillance Kit includes the following:

- 1 IAP7300
- 2 Sony Cameras - SNC-RX550N/W-MT (or SNC-RX550N/W-MT or N/B-MT)
- 2 WMC7300 cards for cameras
- 1 WMC6300 card for laptop
- 2 Outdoor domes, mounting brackets and antenna
- 1 RealShot Manager supporting up to 4 Cameras
- 2 Camera power supplies

Note: The HK302A comes standard with white cameras, 8 dBi antennas, and clear outdoor domes. These items can be substituted by ordering ZA00479AC black cameras, ZA00452AA 4 dBi antennas, or a ZA00480AC tinted outdoor domes. Plan to lose about 1.0 to 1.2 F-Stops with the tinted dome.

OPTION #5 (HK1304A):

The 4.9 MEA Deployable Camera POD is a rapidly deployable video surveillance solution with portability on demand. It operates with a MOTOMESH Quattro network on the 4.9GHz public safety band or in ad-hoc mode outside of the network.

The 4.9 MEA Deployable Camera POD includes the following:

- 1 Sony SNC-RZ50N-MT
- 1 WMC7300 Card for camera
- 1 WMC7300 Card with antenna for laptop
- 1 Battery and battery charger
- 1 Sony remote deployable antenna mount
- 1 Outdoor vandal resistant clear dome, tripod, mounting brackets, and antenna
- 1 Wheeled Pelican carrying case

Note: RealShot Manager software is not included and must be ordered separately, or another video management solution.

Option #6 (HK1301A):

The 2.4 MEA Deployable Camera POD is a rapidly deployable video surveillance solution with portability on demand. It operates with a MOTOMESH Solo legacy network on the 2.4GHz band or in ad-hoc mode outside of the network. **NOTE:** HK1256A will only work with legacy R3.x software.

The 2.4 MEA Deployable Camera POD includes the following:

- 1 Sony SNC-RZ50N-MT
- 1 WMC6300 Card for camera
- 1 WMC6300 Card with antenna for laptop
- 1 Battery and battery charger
- 1 Sony remote deployable antenna mount
- 1 Outdoor vandal resistant clear dome, tripod, mounting brackets, and antenna
- 1 Wheeled Pelican carrying case

Notes:

(1) RealShot Manager software is not included in the kit and must be ordered separately, or another video management solution.

(2) The HK1301A must be ordered as either statically provisioned (ZA00385AA) or dynamically provisioned (ZA00386AA).

Option #7 (HK1766AA):

The 2.4GHz 802.11b/g Deployable Camera POD is a rapidly deployable video surveillance solution with portability on demand. It operates in an existing MOTOMESH Duo network or other standards based Wi-Fi network.

The 2.4GHz 802.11b/g Deployable Camera POD includes the following:

- 1 Sony SNC-RZ50N
- 1 SNCA-CFW5 802.11g card for camera
- 1 Battery and battery charger
- 1 Sony remote deployable antenna mount
- 1 Outdoor vandal resistant clear dome, tripod, mounting brackets, and antenna
- 1 Wheeled carrying case

Notes:

(1) RealShot Manager software is not included in the kit and must be ordered separately, or another video management solution.

Wired Camera Models

Option #8: The SNC-CS50N is ideal for mounting in airports, buildings, corners, and places where a PTZ camera is not needed. This color IP network camera is ideal for applications ranging from surveillance to remote monitoring in areas such as shopping malls, airports, warehouses, and more. It incorporates a highly sensitive 1/3-type CCD with Super Exwave technology for superb picture quality and high sensitivity with a minimum illumination of 0.4 lx at F 0.95, 50 IRE. This camera comes equipped with an auto iris, high-performance vari-focal lens and features a CS mount that offers users the flexibility to replace the existing lens with a different lens to match the application requirements. This camera also offers a variety

of key features for surveillance and remote monitoring, such as a Day/Night function to provide clear monitoring images even in low light conditions, Advanced Video Motion Detection, and Unattended Object Detection. Using advanced image processing technology, the SNC-CS50 provides three compression formats: JPEG, MPEG-4, and H.264, allowing users to choose the appropriate compression format to match the network environment and monitoring applications. A high-frame rate of 30 fps when the image size is VGA (640 x 480) for JPEG and MPEG-4 can be achieved, providing clear and smooth moving images while monitoring. Also, because the SNC-CS50 employs a newly developed "Dual Encoding Capability," JPEG and MPEG-4 images can be streamed simultaneously, further expanding monitoring applications possibilities.

To order an SNC-CS50N infrastructure, non-PTZ camera for video surveillance purposes, to be used with an Ethernet cable, order the following accessory items from the list of accessories below:

RLN6186A - Sony fixed IP Camera POE

RLN6340A - Indoor Wall Mount / Fixed IP Camera POE

RLN6341A - Outdoor Wall Mount / w/ H&B Fixed IP Camera POE

Option #9 (HK1764A, HK1765A)

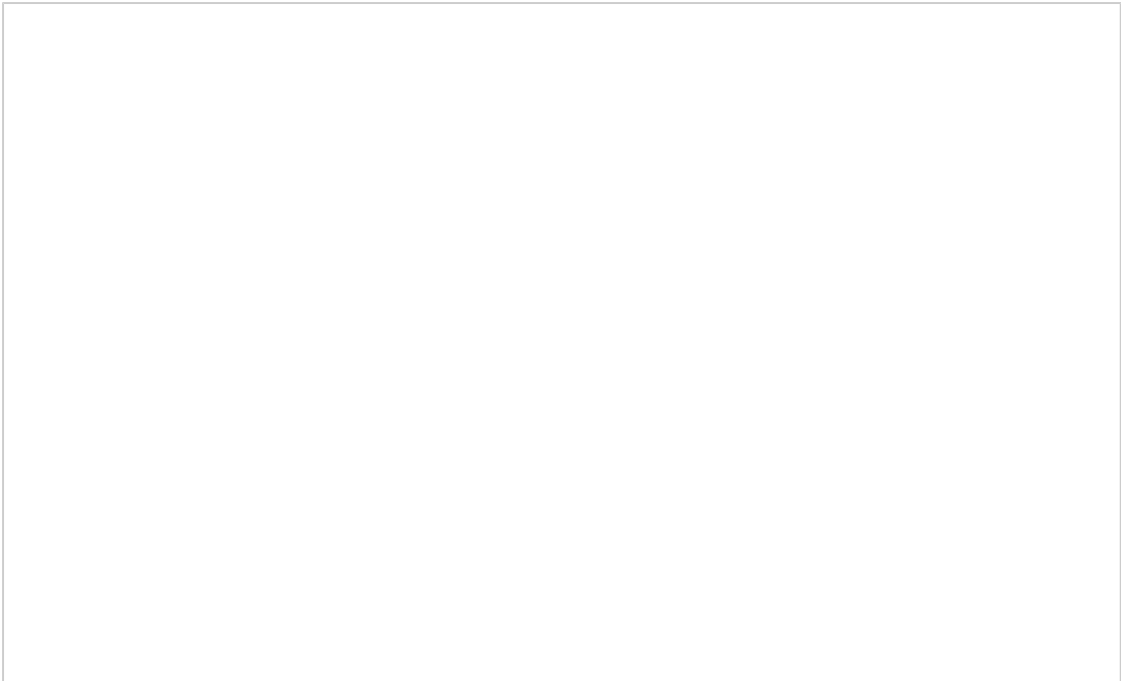

The SNC-RZ50N is PTZ-capable with a pan range of 340 degrees and a tilt range of 115 degrees, enabling users to monitor a wide area. In addition to its Pan/Tilt capability, the SNC-RZ50N is equipped with a powerful 26X optical zoom, allowing users to zoom in on small or distant objects with exceptional clarity. And because the camera incorporates a Day/Night function, it provides clear images in low-light environments and even in 0 lx lighting conditions (when visible light is absent to the naked eye). Similar to the SNC-CS50N, it also provides three compression formats: JPEG, MPEG-4, and H.264, as well as "Dual Encoding Capability". Combining other convenient features, such as Intelligent Motion Detection, Intelligent Object Detection, Voice Alert, Built-in Compact Flash and PC card slots, and an Image Flip function, the SNC-RZ50 can be used for a wide variety of monitoring applications in location such as schools, shopping malls, public spaces, and more. PTZ-capable with a pan range of 340 degrees and a tilt range of 115 degrees, enabling users to monitor a wide area.

To order an SNC-RZ50N camera with gooseneck mount, pole mount adaptor, power supply, and vandal resistant dome, order HK1764A for model with clear dome and HK1765A for model with tinted dome.

Option #10 (RLN6422A, RLN6425A, RLN6426A):

These 3 Sony Day/Night PTZ cameras offer a broad set of high end capabilities and features including 360 degree endless pan, -90 to 0 degree tilt angle, Intelligent Motion Detection, Intelligent Object Detection, 1/4 type Exwave HAD CCD, Exwave DEPA, selectable codec (JPEG/MPEG-4/H.264), and 30 fps JPEG/MPEG-4 (10 fps H.264). The cameras differ primarily on zoom ratio, horizontal resolution, and minimum illumination specs.

A) RLN6426A - Sony SNC-RX530N/W Camera - No MEA

- 18x Optical Zoom, 470 TVL, 0.7 lx (color) / 0.15 lx (B/W)

B) RLN6422A - Sony SNC-RX550N/W Camera - No MEA

- 26x Optical Zoom, 470 TVL, 1.0 lx (color) / 0.15 lx (B/W)

C) RLN6425A - Sony SNC-RX570N/W Camera - No MEA

- 36x Optical Zoom, 530 TVL, 1.4 lx (color) / 0.15 lx (B/W)

Each RX500 series camera can be ordered with the 4 accessories listed below to create a complete wired camera kit.

Accessories:

RLN6235A - Wired Outdoor 7" Dome - Clear

RLN6197A - Aluminum Pole Mount Adapter

RLN6198A - White Aluminum Gooseneck Wall Mount Adapter

RPN4069A - UNIPBU1 Power Block Unit - AC110V In AC24V Out

Option #11 (RLN6401A):

The SNC-DF80N model is a vandal-resistant in/outdoor camera with a polycarbonate mini-dome and aluminum die-cast housing that has a heater option for severely cold areas. The camera also uses Sony's SuperExwave CCD technology to achieve sensitivity of 0.6lx, and has a day/night function to improve sensitivity in low-light conditions. Its IP66 ingress protection with inner cable pipe helps prevent water from reaching the camera, and it has Power over Ethernet capability, as well as a CF card slot, for local pre/post-alarm recording.

To order an SNC-DF80N camera, order RLN6401A. This camera can also be ordered with an optional heater (RLN6404A), in-ceiling bracket (RLN6403A), and wall mount adaptor (RLN6405A).

Option #12 (RLN6402A):

The SNC-DF50N model is a vandal-resistant indoor camera with a polycarbonate mini-dome.

To order an SNC-DF50N camera order RLN6402A. This camera can also be ordered with an in-ceiling bracket (RLN6403A).

Video Management Server

Motorola offers a video management server with the following specifications:

DDN9528A - HP ProLiant DL360 G5 Rackmount/ 2 GB Mem / two 120 GB hard drives

The DL360 G5 Server includes:

Dual Core Intel® Xeon® 5110 (1.60GHz, 1066 FSB) Processor

Windows 2003 Server with the latest service pack available from Microsoft

CD-RW/DVD-ROM 24X Combo Kit

Video Card with dual analog/digital displays

HP L1740 17-inch LCD Flat Panel Monitor Analog/Digital and Multimedia

The OS drive is designated as C: , and the video drive as D: . RAID info: RAID 0 - the two HDDs to present one large logical drive to the OS.

The server can also be ordered with additional storage - up to four 120 GB hard disks, for a total of six.

DDN9529A - Additional 120 GB Hard Disk

Wireless and Wired Camera Models

Order the following Kits based on customer requirements, for additional details of what is included in each kit see section: Motorola / Sony Camera Solutions (above)

Wireless:

Wired: (the tinted dome causes the camera to lose 1.0 to 1.2 F-Stops)

NOTES:

(1) For more information about the various camera housings, see the following camera housing brochure: http://il02cms01.comm.mot.com/cms/File_bin/Camera-Housing%20Brochure_final%20v2.pdf

(2) Tinted Housings: All camera orders come with clear housings unless otherwise specified. To order HK1256 or HK1257 with a tinted housing, order option ZA00480AB. To order HK1302 with tinted housings, order option ZA00480AC.

(3) Camera Color: All camera orders come with white cameras unless otherwise specified. To order HK1256 or HK1257 with a black camera, order option ZA00479AB. To order HK1302 with black cameras, order option ZA00479AC.

SIERRA WIRELESS IN VEHICLE ROUTER
BASED SOLUTIONS

KEEPING YOU AND YOUR VEHICLE
CONNECTED

WITH REMOTE WORKING A CRITICAL ELEMENT
OF PUBLIC SAFETY, MOBILE CONNECTIVITY IS
VITAL.

IT'S ALL ABOUT INFORMATION FLOW

IMPORTANT NOTE:

- Maximum discount over list price is 15%. Additional discounts will require price exception approvals.
- Prices DO NOT include installation or configuration services. For quoting installation and configuration services please contact your Pre-Sales Quoting team.

Updates

IT'S ALL ABOUT INFORMATION FLOW

Vehicle routers keep people connected in vehicles so they can access real-time intelligence on the road. They provide a bubble of connectivity around the vehicle that allows a variety of equipment from laptops and tablets to in-vehicle and body-worn cameras to access the Internet. We call this bubble a vehicle area network (VAN) and the connectivity between the VAN and the enterprise network is what makes the crucial flow of information between the field and base possible. For public safety, this information flow can be a lifeline. Mobile connectivity over WAN allows frontline teams to transmit and receive data securely in real time – video feeds, maps and criminal record databases, for example – and coordinate their response with other emergency services. Command can monitor the location and status of assets, access telemetry and see fleet information such as data on driver behavior. This two-way flow of information help keep responders safe and effective.

General Information

Microwave Radio Systems

Motorola Provides Optimal Engineering Design Chosen from Multiple Suppliers

Our Suppliers Have Dedicated Microwave Project Management follow projects from presale through implementation.

Motorola has Negotiated Extended Warranty Coverage with these Suppliers

For additional Supplier information, please refer to the [MODES](#) website.

Preferred Suppliers are

- [Aviat Networks](#)
- [Cambium Networks](#)
- [Microwave Networks Inc](#)
- [NEC](#)
- [Nokia](#)

Our Preferred Microwave Suppliers have a long history with Motorola Solutions

Your Customers can choose a system that delivers the best solution for their specific project

Single Integrated Point of Contact for your Turnkey Systems

Supplier Program Management is your One point of Contact for all Project Needs

Ease of Negotiation, Procurement and Billing

No Need for additional Purchase Orders, Credit Issues or Multiple Funding Sources

Tested under Extreme Operational Conditions in Worldwide Deployments

Protection Strategies include Loop Switching, Space Diversity and Hot Standby Radios

Motorola & Suppliers work together to provide a solution

3rd Party Manufacturers adhere to Motorola Quality and Standards (UL and R56)

For additional Information, Contact Tim Shevlin
timothy.shevlin@motorolasolutions.com

Ordering Information

Microwave projects are custom designed. Please contact the suppliers directly in order to initiate work on your design.

Part Numbers are set up as Project Specific

Mid Power Amplifier

Ordering Information

General Information

The Mid Power Amplifier is a robust RF power amplifier containing TX and RX filtering & amplification circuitry.

Supporting GSM, CDMA2K, UMTS, and LTE, the Mid Power Amplifier enables active missions to be completed with one

front end device. The Mid Power Amplifier contains a swappable fin and fan module which provides a standalone or cold plate option.

The Mid Power Amplifier also contains automated power controls for maximum flexibility. Weighing nine pounds,

the Mid Power Amplifier will support a number of environments including those missions requiring a man packable solution.

Features

- 40W Peak RF Transmit Power Out
- 5W Average RF Transmit Power Out
- Simultaneous High and Low Band Operation
- Internal TX and RX Duplex Filtering

- Internal RX LNA
- Supports Nine Bands
- Automated Power Controls
- Swappable Fin and Fan module
- Cold Plate Mounting Option

Ordering Requirements

For ordering information please send an email to: BuyAT@MotorolaSolutions.com.

Description	Nomenclature	Price
Mid Power Amplifier	FDKT00353	\$22,500

The Mid Power Amplifier contains the Power Amplifier, power supply, and cables required for operation.

Software & Services

Warranty

LIMITED WARRANTY

Motorola warrants the Product against significant defects in material and workmanship under normal use and service for a period of sixty (60) calendar days from the date of shipment from Motorola. Motorola, at its option, will at no charge, either repair the Product (with new or reconditioned parts), replace it with the same or equivalent Product (using new or reconditioned Product), or refund the purchase price of the Product for significant defects identified during the warranty period provided Motorola is notified of such significant defects no later than 14 calendar days after the expiration of the warranty period according to the terms of this warranty. Repaired or replaced Product is warranted for the balance of the original applicable warranty period. All replaced parts of the Product shall become the property of Motorola.

This warranty sets forth the full extent of Motorola's responsibilities regarding the Product. Repair, replacement or refund of the purchase price, at Motorola's option, is the exclusive remedy. THIS WARRANTY IS GIVEN IN LIEU OF ALL OTHER EXPRESS WARRANTIES. MOTOROLA DISCLAIMS ALL OTHER WARRANTIES OR CONDITIONS, EXPRESS OR IMPLIED, INCLUDING THE IMPLIED WARRANTIES OR CONDITIONS OF

MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. IN NO EVENT SHALL MOTOROLA BE LIABLE FOR DAMAGES IN EXCESS OF THE PURCHASE PRICE OF THE PRODUCT, FOR ANY LOSS OF USE, LOSS OF TIME, INCONVENIENCE, COMMERCIAL LOSS, LOST PROFITS OR LOST SAVINGS OR OTHER INCIDENTAL, SPECIAL, INDIRECT OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE SUCH PRODUCT, TO THE FULL EXTENT SUCH MAY BE DISCLAIMED BY LAW.

Mini Mag (TM) Antennas

Ordering Information

Features

Electrical Specifications

Frequency Range	806-860 MHZ., 824-895 MHZ., 890-960 MHZ.
Band Width	60 MHZ.
Gain	3 dB
Power	15 Watts Maximum (Intermittent Duty)
VSWR	<2:1
Impedance	50 Ohms Nominal

Mechanical Specifications

Material	Elastomer
Cable Length	12 Foot RG174/U
Connector	Choice of Mini-UHF, SMA, BNC or TNC
Height	8.3 Inches
Weight	5.5 oz.
Base Diameter	2.3 Inches

General Information

The Mini Mag(TM) antenna comes factory tuned and ready to install. The magnetic mount

not only provides quick installation, but also quick removal when going through car washes or switching vehicles. It's ideal for applications requiring no holes drilled in the vehicle body. The low profile whip and the small strong magnet are excellent choices for low clearance applications. The single piece elastomer housing means there are no moving parts to install or break. It has been environmentally tested for temperature, humidity, and corrosion. Applications include conventional and trunked mobile radios operating in 800 MHz and 900 MHz. The Mini Mag^a antenna is covered by a Two Year Limited Warranty. All Warranty claims and questions should be directed to 1-800-422-4210.

MIP 5000 VoIP Radio Console

Ordering Information

General Information

MIP5000 Release 4.3 Now Shipping

MIP 5000 Release 4.3 Features

- Now certified for use with APX8500 Mid Power Control Station, Remote mount with 05 Control Head
- Now Certified on Microsoft Windows 10 Professional (64-Bit)
- Now Certified on Microsoft Windows 10 Enterprise IoT LTSC 2015/2016 (64-Bit)
- NEW IA OS Hardening CDs for TT3106 PC (Windows 10 Enterprise IoT LTSC 2015/2016 (64-Bit) OS)

MIP 5000 Release 4.2 Features

- Support for XPR 5550 MOTOTRBO Mobile
- 48 Channel Support
- Microsoft Windows 8.1 64-Bit
- Multi-Touch Monitor Support
- Dual Channel IRR Support

The MIP 5000 VoIP Radio Console is designed to provide customers an affordable solution to transmit dispatch quality voice over their existing Multicast enabled Ethernet network. The MIP 5000 radio console connects up to 100 users with flexible licensing that is available with 1, 4, 8, 12, 24, and 48 channel software options. In addition, up to 128 radio resources can be connected to the network and configured in the Console System Database Manager (CSDM). These configuration files can be saved on each operator position to allow the dispatcher to access & control different combinations of radio resources (up to 48 at a time).

MIP 5000 consists of **Gateways** which connect the radios to the **Network** and Operator Position components including: **MIP 5000 application software, Personal Computer (PC), and Audio accessories.**

Gateways

There are 4 types of gateways available in a MIP 5000 system to interface to radios: Local, Tone, Digital, and MOTOTRBO. Gateways have a one to one relationship to radios. One gateway is required for each radio controlled.

Local Gateway L3482 controls radios, typically Mobiles in a Tray, via Microphone and Speaker connection and will support up to 16 frequency select (depending on radio capability).

Radio interface cables:

- Prewired cable for CDM Family DDN6338
- Prewired cable for MCS2000 DDN6699
- Generic radio cable for use with XTL family DDN6340 (Requires field install of XTL accessory connector)
- Map universal cable for use with MOTOTRBO/XPR family including **Connect Plus** PMKN4018 (Requires field install of DB25 for local gateway)

Tone Gateway L3483 controls base stations or repeaters with tone control signaling which will support up to 16 frequency select (depending on radio capability) via 600 Ohm lease lines. In addition, the tone gateway will also support E&M signaling.

DIU With a tone gateway connected to the 4 wire interface on a DIU, the MIP 5000 can talk/listen, change frequency and, select coded/clear. However, MIP 5000 does not support the ACIM link functionality of the DIU.

Digital Gateway L3484 acts as a virtual control head for specific Motorola radios or Consolettes via the SB9600 protocol. MIP 5000 will display the Alias ID if the individual Subscriber is configured to send it. MIP 5000 will provide the dispatcher access to the same number of frequencies the radio is capable of.

Mobiles supported are:

- APX 7500 Mobile in a tray (05 Control Head, Remote Mount)
- MCS2000 Model III
- Spectra/Spectra Plus Consolette W9
- ASTRO XTL5000 Consolette W9
- CDM1550 LS/LS+ - (Requires Remote Kit (RLN4802) and Remote Cable Kit (RKN4077)).

R04.02.00	R10.00.00
R04.03.00	R17.00.00

MOTOTRBO Gateway L3598 acts as a virtual control head for the MOTOTRBO XPR 4550 and XPR 5550 control station. MIP 5000 will display the Alias ID when in analog or TRBO digital mode. MIP 5000 will provide the dispatcher access to the same number of frequencies the radio is capable of. MOTOTRBO system types supported are:

- Conventional
- IP Site Connect
- Capacity Plus
- Linked Capacity Plus
- Connect Plus - Requires Connect Plus System Release 1.4A
- Capacity Max - Requires XPR5550e Control Station

Note: Below is a compatibility chart between the MIP 5000 and the MOTOTRBO Control station connected to the MOTOTRBO Gateway. These are the tested combinations between the radio and the MIP 5000, any other combinations may cause unexpected functionality.

MIP 5000 Release	XPR 4550 Firmware Version	XPR 5550 Firmware Version
R03.00.00	1.7.x	N/A
R03.00.01	1.7.x	N/A
R04.00.00	1.8.x	N/A
R04.01.00	1.9.x	N/A
R04.01.01	1.11.x	N/A
R04.02.00	1.12.x	R02.03.01

Network

It is highly recommended that customers intending to use MIP 5000 in Public Safety situations use a dedicated network for dispatching. For non public safety situations, a MIP

5000 can be placed on an existing customer network. Network must support multicast addressing and be QoS enabled. For complete network requirements, see Specification Sheet on [Converge](#).

MIP 5000 Application Software

The Channel License configurations available are: 1, 4, 8, 12, 24, or 48. Individual license per operator position is required. Site license is not available.

MIP 5000 license activation is accomplished using a Hardware USB Hasp Key at each position. Each USB Hardware Hasp Key is configured for the number of channels purchased. If the USB is removed after activation, the software will continue to function for 10 days with a visible countdown reminder to allow time for key replacement.

MOTOTRBO AppServer

The MIP 5000 AppServer provides the tools for text messaging and private/group calls on the MOTOTRBO Conversation window. In addition to a texting server, the MOTOTRBO AppServer has a presence server to populate the MOTOTRBO Contacts Window with available MOTOTRBO radio subscribers that report their status. The MOTOTRBO AppServer does not require any additional software to purchase as it comes with every MIP 5000 Software CD. It's recommended to install the MOTOTRBO AppServer on the same PC as the MIP 5000 CSDM/TFTP Server because it needs to have 24/7 availability. Like the TFTP Server, only one AppServer is required per MIP 5000 System.

In addition to installing the AppServer, a MOTOTRBO Gateway must be configured to receive MOTOTRBO data. The quantity of MOTOTRBO Gateways needed will depend on your system type.

- For IP Site Connect Systems, 1 MOTOTRBO Gateway is needed for every repeater and timeslot desired to be simultaneously monitored. For example, a 2 repeater site has 4 timeslots total so 4 MIP 5000 MOTOTRBO Gateways and XPR 4550 Control Stations are needed.

Note: Each control station must be programmed with the same MOTOTRBO ID so data can be properly routed to the AppServer.

- For Capacity Plus Systems with Data Revert, 1 MOTOTRBO Gateway is needed for every voice talk group the dispatcher wants to simultaneously monitor. Also, 1 additional MOTOTRBO Gateway configured for data only is needed for every data repeater in the system. For example, if the dispatcher wants to simultaneously monitor 5 voice talk groups and the system has 3 data revert repeaters, then 8 MIP 5000 MOTOTRBO Gateways and XPR 4550 Control Stations are needed. 5 gateways will be used for voice and 3 gateways (configured for data only) will be used for ARS and Texting.

Note: The additional MIP 5000 gateway set to data only mode will allow the subscribers to report their status without interrupting MIP 5000 dispatcher voice communications. The data only gateway will be a "hiddenEresource" from the dispatcher and will not count towards the total software license limit (1,4,8,12, 24, or 48).

- For Capacity Plus Systems without Data Revert, 1 MOTOTRBO Gateway is needed for every talk group the dispatcher wants to simultaneously monitor. For example, if the dispatcher wants to simultaneously monitor 5 talk groups, then 5 MOTOTRBO Gateways and XPR 4550 Control Stations are needed. All 5 gateways are used for both voice and data.

Note: Unlike Capacity plus systems with data revert, no additional MOTOTRBO Gateways configured for data only are required to support ARS and Texting. Also, each control station must be programmed with a different MOTOTRBO ID so data can be properly routed to the AppServer.

- The MOTOTRBO AppServer is not supported on Connect Plus or Capacity Max Systems, this is a limitation of the Radio.

Personal Computer (PC)

It is highly recommended that customers intending to use MIP 5000 in Public Safety situations purchase the TT3225 (Win 10) Motorola certified HP workstation. If not purchasing a Motorola computer, please see the Specification Sheet on [Converge](#) for Recommended Minimum Computer Specifications. R04.03.00 supports Windows 7 Pro SP1 (32 or 64 Bit), Windows 8.1 Pro (64-Bit) Windows 10 Pro (64-Bit) and Windows 10 Enterprise IoT LTSC 2015/2016 (64-Bit).

Audio Accessories

MIP 5000 Enhanced USB Jackbox provides the MIP 5000 operator position access to Public Safety grade (non USB) audio accessories.

Jackbox Limits

1 headset per Jackbox

1 footswitch per Jackbox

1 microphone per Operator position

2 headsets maximum per Operator position

3 Jackboxes maximum per Operator position (any combination of Basic or Enhanced) **MIP 5000 Basic USB Jackbox is no longer available.**

Basic USB Jackbox DDN9492 * MIP 5000 Basic USB Jackbox is no longer available. *****

One Basic Jackbox includes 10ft USB cable and will provide access for up to three accessories: one Plantronics two prong headset with Quick Disconnect, one B1914 Standard Desktop Gooseneck Microphone, and one BLN6732 Foot-switch. Only one Desktop Gooseneck Microphone (B1914) can be used per MIP 5000 position. Jackboxes are connected using USB. Basic Jackbox does not support telephone Call Director functionality.

Enhanced USB Jackbox TT05522AA (DDN9493)

One Enhanced USB Jackbox includes 10ft USB cable and provides all of the accessory capability of the Basic USB Jackbox plus offers an auxiliary port that supports an array of options:

a) Call Director or b) External Paging Encoder or c) Analog Recorder. d) PTT, e) MDC Emergency Alarm output.

See Jackbox Connector Chart below for PIN limitation guidance. Multiple Jackboxes may be required to support all desired options. Limit of 3 USB Jackboxes per operator position.

MIP 5000 Enhanced USB Headset Jackbox Connector Chart

PIN	Recorder	Call Director	External Pager	PTT	MDC Emergency Alarm Output
1		X	X		
2		X	X		
3		X	X		
4		X			
5	X	X			
6	X	X			
7	X	X		X	X

Example #1:

If Recorder and External Pager are needed at an operator position, one Enhanced Jackbox will support both since they do not share common pins on the auxiliary port.

Example #2:

If Call Director and External Paging are required at the operator position, two Enhanced Jackboxes are required since they use common pins #1 through #3.

Speakers:

Each MIP 5000 Dispatch Console operator position requires at least two desktop speakers; the select and unselect speakers.

Four additional monitor speakers (unselect audio) can be connected to each MIP 5000 Operator Position by a 5.1 or 7.1 soundcard. The 5.1 or 7.1 soundcard supports up to four monitor speakers on the MIP 5000 VoIP Radio Console in addition to a select speaker and unselect speaker.

Call Director:

The Call Director feature on the Enhanced USB Jackbox allows one headset to be used for both telephone and radio. The telephone must be 4 wire, 600 ohm with off-hook sense. (typical phone used with E9-1-1) The Call Director feature is supported for both the operator and supervisor headsets. The primary headset (operator) works in the full-duplex mode and the secondary headset (supervisor), works in half-duplex mode. Call Director also supports patching with a radio channel / conversation.

External Paging Encoder Input:

External Paging Encoder allows access for an External Encoder device.

Analog Recorder Port:

Analog Recorder port provides access for analog logging recording for the operator position.

PTT:

Whenever the Op position does a PTT, a relay closure occurs. For example this relay can be used to activate an ON-THE-AIR light.

MDC Emergency Alarm Output

When an inbound emergency is decoded by a local or tone gateway the MDC Emergency Alarm output relay will close at the operator position. This option can be used to activate a buzzer or light to notify the operator of an emergency condition.

Instant Recall Recorder (IRR)

The Instant Recall Recorder (IRR) software with MIP 5000 allows users to record audio digitally on the MIP 5000 Operator position. Operator TX audio, Select and Unselect RX audio, Telephone Call Director Audio or any combination may be recorded.

If PC is	Order	Includes
...TT2833 MIP 5000 Certified Win 7 PC	DDN2090	IRR Software & License, PCIe Soundcard, and PC Speakers

...TT3106 MIP 5000 Certified Win 10 PC	DDN2250	IRR Software & License, PCIe Soundcard, and PC Speakers
...TT3225 MIP 5000 Certified Win 10 PC	DDN2249 & DSICUSBAUDIO7D & CDN6673	IRR Software & License, USB Soundcard, and PC Speakers
... Customer Win 7 PC w/o Speakers	DDN2090	IRR Software & License, PCIe Soundcard, and PC Speakers
... Customer Win 10 PC w/o Speakers	DDN2250	IRR Software & License, PCIe Soundcard, and PC Speakers
... Customer Win 7 PC with Speakers	DDN2089 & DDN2134	IRR Software & License, PCIe Soundcard
... Customer Win 10 PC with Speakers	DDN2249 & DDN2134	IRR Software & License, PCIe Soundcard

Note: MIP 5000 with IRR on a laptop is not a supported configuration

Analog Logging Recorder

MIP 5000 can be used with legacy Analog Logging recorders to record audio at the radio and/or at the operator position(s).

Analog recording at the radio is accomplished by bridging the connection between the gateway and radio. When installing an analog recording device with a MIP 5000 Local Gateway a Local Junction Box (DDN6337) is recommended. When installing an analog recording device with a MIP 5000 MOTOTRBO Gateway or Digital Gateway connected to an APX mobile, a RJ45 splitter on the Gateway radio port is recommended. With an Analog Logging Recorder, Gateways and radios must be co-located with the recorder.

Analog Recording of select and/or unselect audio at the operator position is accomplished by using the auxiliary port on the Enhanced USB Jackbox (DDN9493).

Ordering Other Elements

1. Jackbox, Headsets, Microphone and Footswitch should be ordered as separate line items. The CDN6673 speakers are commercial off the shelf items and can be substituted if desired.
2. For information on Instant Recall Recorder (IRR), Computer Hardware, or Console Headset Accessories please refer to the following price pages.

[Instant Recall Recorder](#)

[Computer Hardware](#)

[Console Headset Accessories](#)

MIP 5000 and Remote Comparator Display

The MIP 5000 console can now Cohab with CTI's MCN RCD Client Server Software. This software provides real-time monitoring and control for a wide range of devices including

doors, alarms, light switches, and other general purpose Auxiliary I/O applications. In addition, the MCN RCD system supports comparator/voting displays at the MIP 5000 console operator position. The MCN RCD Client Server Software is an IP based solution and can run on the same network as the MIP 5000 consoles. The MCN RCD system consists of two parts: The MCN RCD Server Software with HIB-IP Module and the specific interface module for the application. The interface module(s) can be General Purpose I/Os, Comparator module, or a combination of the two. The paired solution between the MIP 5000 console and the MCN RCD Client Server Software can support up to 192 inputs and 128 outputs.

Features

The MIP 5000 provides a comprehensive feature set as listed below:

SIGNALING: MDC 1200 and Conventional ASTRO are supported with the following capabilities: MDC 1200 (Local and Tone Gateways)

OUTBOUND MESSAGES

- Call Alert
- PTT ID Alias
- Radio Check
- Radio Disable
- Radio Enable
- Remote Monitor
- Manual RAC
- Selective Call
- Voice Alert

INBOUND MESSAGES

- Call Alert*
- PTT ID*
- Emergency Alarm*
- Emergency Call*
- Radio Status*
- Radio Message*

*Appear in Activity Log Window

Conventional ASTRO (Digital Gateways, depending on the supported capability of the radio).

OUTBOUND MESSAGES

- Call Alert
- PTT ID
- Emergency Alarm
- Radio Status Request
- Radio Check

INBOUND MESSAGES

- Call Alert*
- PTT ID*
- Emergency Alarm*
- Emergency Call*
- Radio Status
- Radio Message

*Appear in Activity Log Window

PAGING: Both manual and pre-programmed pages are supported. Pages may be sent individually or via sequential page-list paging. Pre-programmed lists can also be created to provide pre-programmed Group Pages. Up to 128 pre-programmed pages (single or group) can be assigned to a button that can be placed on the GUI. By default, the operator position is configured with a page history window showing recent paging activity. The paging formats listed below are supported:

- 5/6 Tone
- Custom Formats
- Digital Dial 1500 Hz (Rotary Pulse)
- Digital Dial 2805 Hz (Rotary Pulse)

- Quik-Call (Motorola 2+2)
- Quik-Call II Tone and Voice (Motorola 1 + 1)
- Quik-Call II Tone Only (Motorola 1 + 1)
- Single Tone
- Touch Code (DTMF)
- Knox
- GE Type 99
- Reach

PATCHING and MULTISELECT: Each operator position can support up to 11 patches: 10 with memory and 1 without memory and 11 Multiselects: 10 with memory and 1 without memory. Patch and Multiselect can each support up to 16 members. A resource cannot be a member of more than one active patch or Multiselect. An All Points Bulletin (APB) transmit feature is also available for use with the Multiselect groups.

CHANNEL CONFIGURATIONS: MIP 5000 consoles support the following channel configurations for Local and Tone Gateways. All channels support analog operation with MDC 1200 signaling if so configured.

Type	# TX Frequencies	# RX Frequencies	NOTES
R1	0	1	Receive Only
T1R1	1	1	1 Frequency Station
T2R2	2	2	2 Frequency Station
T4R4	4	4	4 Frequency Station
T8R8	8	8	8 Frequency Station
T12R12	12	12	12 Frequency Station
T14R14	14	14	14 Frequency Station
T16R16	16	16	16 Frequency Station

In addition to the above, SB9600 control and MOTOTRBO are supported with the number of modes and features being determined by the mobile.

Manuals

Soft copies of the manuals are found on the documentation CD and available on:

Converge @ <https://converge.motorolasolutions.com/groups/mid-low-tier-voice-radio-dispatch-consoles>

Ordering Requirements

New required options for the MIP 5000 Gateways. You must select either TT05979AA for existing systems at Release 4.0 or earlier or select TT05980AA for new or existing systems at Release 4.1 or later.

The MIP 5000 gateways do not ship with punch blocks or cables for connecting to base stations or radios. These must be ordered separately or provided by the customer. See the Accessories section below for cables that can be used for connecting to various radios.

Headset Jackbox

Every MIP 5000 operator position requires an Enhanced USB Headset Jackbox. The Jackbox is needed to interface to any of Motorola Public Safety grade (non USB) audio accessories. Each position requires a minimum of 1 and can support a maximum of 3 Jackboxes. TT05522AA is the option for the Enhanced USB Headset Jackbox.

A headset(s) may be used with the MIP 5000 Console. Each headset must be connected to a MIP 5000 Enhanced USB Jackbox. A headset consist of two parts, a base and a top. A choice of two bases (RLN6098 and RLN6099) and several tops is provided. The MIP 5000 supports a maximum of two headsets per operator position (requires two Enhanced USB Jackboxes).

Upgrades

Upgrades to R04.03.00 are available at no charge. Labor for upgrade installation is not reimbursable.

To order contact System Support Center at [800-221-7144](tel:800-221-7144), option 4 on the call tree and request that a software case be opened.

Existing System Expansion

All new orders for Software and Gateways will ship with the latest release software R04.03.00

Adding Gateways: If adding gateways onto an existing R04.01.01 system or earlier, gateways will automatically downgrade during the installation process to match the software release running in the system.

Adding Operator Positions: If adding new operator positions to an existing R04.01.01 system or earlier, you will be required to upgrade the entire system (all Operator positions, CSDM and gateways) to R04.03.00. All operator positions and gateways in a MIP 5000 system must run the same version of software.

Instant Recall Recorder (IRR)

The Instant Recall Recorder (IRR) software with MIP 5000 allows users to record audio digitally on the MIP 5000 Operator position. Operator TX audio, Select and Unselect RX audio, Telephone Call Director Audio or any combination may be recorded.

Ordering instructions for APX 8500 Mobile in a tray when used with a Digital Gateway

APX 8500 Remote Mount Mid Power Model with the MIP 5000 Digital Gateway is now a certified solution.

Below is a guide, for the 12 groups of required selections, to order an APX 8500 mobile.

1. Main Model: Select *M37TSS9PW1_N APX 7500 All-Band MP Mobile*

2. Operation Mode: Select either Operation Mode option, *G241 or G806. (Choose ONE)*

3A. System Enhancement Software: Select option to match your system, *G51 or G48. (Choose ONE)*

3B. Optional System Enhancement Software: Select, if needed to match your system, *G173, G361, GA00580, or QA01648*

4. Control Head Hardware: Select *G88 - APX NO 05 CH NEEDED.*

(Note: G442 - APX O5 CONTROL HEAD can be ordered for visual use of the control head but is not required for connecting to a MIP 5000.)

5. Control Head Software: Select *G444 - CONTROL HEAD SOFTWARE*

6. Mounting: Select *G67 - REMOTE MOUNT MID POWER*

(Note: The remote mount mobile is the only configuration for use with the MIP 5000.)

7. RF Antenna: Select appropriate antenna option, *G89 or GA01513 (Choose ONE)*

Note: G89 - NO RF ANTENNA NEEDED should be ordered if G88 selected in Step 4.

8. GPS Wi-Fi Antenna: Select appropriate antenna option: *GA00226, GA00269, or GA00235 (Choose ONE)*

Note: GA00235 - NO GPS/Wi-Fi ANTENNA NEEDED should be ordered for most applications.

9. Microphone: Select appropriate microphone option, *G892, G90, W20, W22, or W382 (Choose ONE)*

Note: G90 - NO MICROPHONE NEEDED should be ordered if G88 selected in Step 4

10. Speakers: Select appropriate speaker option, *B18, G142, G831, G832, or W432 (Choose ONE)*

Note: G142 - NO SPEAKER NEEDED should be ordered if G88 selected in Step 4

11. J600 Adapter: Select *GA01517* - NO J600 Adapter Cable needed

12. Service Option: Select desired Service From Start option, *G78*, *GA00318*, *GA00249*, or *GA00255* (*Choose ONE*)

OTHER Required Items:

A- Order power supply for mobile - *KT000254A01*

Note: The power supply is not included with the mobile, this part must be ordered separately. Legacy power supplies do not supply sufficient current for the APX 8500. The APX 8500 requires the high capacity *KT000254A01* power supply

B- Order RF Adapter Cable - *CB000091A03* (QMA to Mini-UHF, Female)

Note: APX8500 RF Antenna port on the rear panel is QMA.

C- Don't forget the MIP 5000 Digital Gateway - *L3484* and APX Radio Interface Cable - *DDN1463*

Ordering Information for Aux I/Os

- Step 1: Order the MCN RCD Software with HIB-IP, *DDN1388* - this will allow up to 4 MIP 5000 operator positions (clients) to share the I/O module status. If more than 4 operator positions are required, then the MCN SW Lic Opt Client Expansion for 4 Add'l Clients, *DDN1295* is required.
- Step 2: Order 1 power supply *CDN6116* with every HIB-IP Module.
- Step 3: Order the appropriate modules for the application. A maximum of 16 modules can be supported per HIB-IP.
 - For General Purpose Aux I/Os, order *DDN1385* (GPIO). Each *DDN1385* can control 12 inputs and 8 outputs.
 - For interfacing to ASTRO-TAC Comparators, order *CDN6119* (AIB)
 - For Interfacing to SPECTRA-TAC Comparator, order *CDN6121* (CIB)
- Step 4: Order 1 power supply, *CDN6116*, for every 4 modules ordered in Step 3.
 - Example 1: If you order 2 *DDN1385* and 2 *CDN6119*, then order 1 *CDN6116*
 - Example 2: If you order 3 *DDN1385* and 2 *CDN6121*, then order 2 *CDN6116*.
- Step 5: Order the same number of network cables as the Quantity of modules ordered in Step 3. The following Network cable lengths are available:
 - CABLE ASSY NETWORK 9 INCHES, *CDN6123*
 - CABLE ASSY NETWORK 3 FT, *CDN6124*
 - CABLE ASSY NETWORK 10 FT, *CDN6125*
 - CABLE ASSY NETWORK 25 FT, *CDN6126*
 - CABLE ASSY NETWORK 100 FT, *CDN6127*

Note: If rack mounting, the 9 inch cable should be used from module to module. To connect between rack mount shelves, the 3 FT cable should be used.

- Step 6: Order 2 Network Terminators, CDN6115, for every HIB (DDN1388) ordered in Step 1.
- Step 7: Order appropriate cabling for modules:
 - For each GPIO and CIB module ordered in Step 3, order:
 - 1 PUNCH BLOCK DUAL 25 PAIR, CDN6118
 - 1 CABLE ASSY 25 PR M-NONE 25FT, CDN6135
 - And 1 of the cables below:
 - CBL ASSY 25 PR MALE-MALE 10 FT, CDN6129 OR
 - CBL ASSY 25 PR MALE-MALE 25 FT, CDN6130
- For each AIB module ordered in Step 3, order CBL ASSY AIB COMPARATOR 10 FT, CDN6131
- Order 1 CABLE KIT HIB PC AT/XT 6 FT, DDN6132 for every system
- Step 8: It's recommended to order the appropriate manual for modules ordering in Step 1 and Step 3, manuals are not included with Modules.
 - Step 1 Manuals - Both manuals are needed for DDN1388
 - HIB HARDWARE GUIDE, CDN6110
 - MCN SERVER SOFTWARE MANUAL, DDN1402
 - Step 3 Manuals
 - GPIO HARDWARE GUIDE, DDN1386
 - AIB HARDWARE GUIDE, CDN6107
 - CIB HARDWARE GUIDE, CDN6109
- Step 9 (Optional): Order the appropriate quantity of rack mount shelves for modules ordered in Step 1 and Step 3.
 - DDN1387 is available to rack mount the MCN RCD HIB MODULE. Each rack mount will support 1 DDN1388 (step 1) and two additional GPIO, AIB or CIB modules (step 3).
 - Additional rack mount shelves for the GPIO, AIB or CIB modules ordered in Step 3, can be purchased with part number CDN6112. Each CDN6112 can support up to 4 modules.

Configuration

Gateways

Description	Full Description	Nomenclature	APC	Price
MIP5000 VOIP LOCAL GATEWAY	Provides one MIP 5000 Local Gateway. Each gateway is capable of supporting one local control radio. Punch blocks and cabling for connecting to the radio are not included in the L3482AC. An Ethernet cable (not included) is also required for each L3482AC.	L3482AC	740	\$798.00

MIP5000 VOIP TONE GATEWAY	Provides one MIP 5000 Tone Gateway. Each gateway is capable of supporting one tone remote controlled base station. Punch blocks and cabling for connecting to the station are not included in the L3483AC. An Ethernet cable (not included) is also required for each L3483AC.	L3483AC	740	\$798.00
MIP5000 VOIP DIGITAL GATEWAY	Provides one MIP 5000 Digital Gateway. Each gateway is capable of supporting one SB9600-capable radio. Punch blocks and cabling for connecting to the radio are not included in the L3484AC. An Ethernet cable (not included) is also required for each L3484AC.	L3484AC	740	\$798.00
MIP 5000 VOIP MOTOTRBO GATEWAY	Provides one MIP 5000 MOTOTRBO Gateway. Each gateway is capable of supporting one XPR4550 or XPR 5550 radio. Punch blocks and cabling for connecting to the radio are not included in the L3598. You must order the DDN9867 MOTOTRBO Direct Connect Cable to connect to the XPR 4550 or XPR 5550. An Ethernet cable (not included) is also required for each L3598.	L3598AC	740	\$798.00

Options for Gateways - Must select one per gateway

Motorola MKM 7000 Console Alias Manager

Ordering Information

General Information

IMPORTANT NOTICE ABOUT MOTOROLA SOLUTIONS SOFTWARE SUPPORT POLICY

In line with the Software Support Policy (SwSP) for ASTRO based system software, orderability rules now include alignment to this Software Support Policy which sets a new framework of three periods of support from Ship Acceptance for that specific release.

The policy provides for a 4-year period of time, referred to as the **Standard Support** period, during which access to qualified software defect repairs and system expansions for that specific release of system software are provided.

Then there is an additional 3 year period of time, referred to as the **Extended Support** period, during this time no software defect repair, no system expansions and no Security Update/Monitoring Services support are available for that specific release of system software.

After the 4 + 3 year support periods have expired, the system release enters the **End of Support** period. At this time, no software defect repair, no system expansions no Security Update/Monitoring Services and no service offerings are available for that specific release of system software.

Customers may choose to upgrade or migrate to a supported release at anytime during their system lifecycle.

Historical milestones, such as the date that a system ships, reaches beneficial use, or achieves final acceptance have no impact on the system software dates of support.

Reminder: Under the new SwSP, system expansions are only allowed in the standard support window for a system release. If your customer desires an expansion that would occur toward the end of the standard support period, it is highly recommended that you have them upgrade/migrate first and then expand their system to ensure the customer receives the full warranty time period.

Additional information can be found here: [Software Support Policy Site](#)

MKM 7000 Console Alias Manager Product Planner and Ordering Guide

The MKM 7000 Console Alias Manager Product Planner and Ordering Guide is available on

the [High Tier Dispatch Console wiki page](#).

Software Development Kit

The MKM 7000 Software Development Kit (SDK) is required when a customer wishes to use the MKM 7000 Console Alias Manager API to allow 3rd party software to communicate with the MKM 7000 Console Alias Manager.

Please see the [High Tier Dispatch Console wiki page](#) for more information about the SDK and SDK technical support.

Ordering Requirements

Supported Ordering Systems

1. This equipment is ordered directly in COF or OMAR. Note that no checking of the design itself is done in COF or OMAR.
2. Motorola On-Line may not be used to order complete console systems.
3. Please note that the latest available release of software and hardware will be provided when ordering through the system. If earlier release versions are required then a case must be opened with the System Support Center (SSC) to obtain the desired version from Upgrade Operations (UO).

Don't Forget These Items

1. PC, Monitor, Speakers, Microphone, and other accessories.

Links to Other Elements of the Console Sub-System

1. [MCC 7500 Dispatch Console Product Catalog](#)
2. [MCC Series PC, Monitor, and accessories](#) (also available in pulldown tab above)
3. [Manuals](#)
4. Please see [Information Assurance \(IA\) PCAT page](#) for Control Room Firewall media, Element Hardening, and other IA features.
5. Also see the pulldown box at the top of this page for other elements.

MLC 8000 Comparator

Ordering Information

Features

- **Software defined for base station gateway or analog comparator operation.** Provides maximum design flexibility for voting up to 64 subsites. Reduces service complexity.
- **Protects customer's investment in analog QUANTAR and ASTRO-TAC Receiver.** Provides a Mixed Mode and Digital P25 migration path to ASTRO 25 for analog QUANTAR and ASTRO-TAC Receiver, with support for up to four 'Hybrid' (4-wire V.24) links. (Digital P25 voting is provided by GCM 8000. MLC 8000 performs the analog voting and base station/receiver gateway functionality as a companion device to the GCM 8000).
- **Enables smooth migration to IP transport technology.** Can be co-located at the site with analog QUANTAR and ASTRO-TAC Receiver equipment, or co-located with the comparator at the prime site to support circuit transport links. Converts 4-wire audio to G.711 for optimal audio quality with minimal latency, and full support for MDC1200 signalling.

General Information

MLC 8000 Dimensions:

Length: 9.75" (247.083mm)

Width: 8.6" (218.353mm)

Height: 1.63" (41.2mm)

The MLC 8000 analog comparator:

- Provides a 4-wire TRC connection to an analog console
- Supports non-simulcast voting and simulcast system configurations
- 64 subsite capacity

The MLC 8000 gateway:

- Provides receiver status tone and base station TRC signalling on each of its four analog interfaces (non-simulcast voting configurations)
- Provides one analog simulcast base station interface, one receiver interface when receiver is part of a simulcast coverage solution
- Certified to be fully compatible with GTR 8000 and several other Motorola base station and receiver products, including:
QUANTAR
ASTRO-TAC Receiver

SIMULCAST AND NON-SIMULCAST VOTING CONFIGURATIONS:

ANALOG VOTING: In a voting (non-simulcast) configuration, one MLC 8000 comparator is required for each channel at the prime site, providing a 4-wire connection to a TRC console. Up to four co-located transmitting base stations can connect with a co-located MLC 8000 analog voting gateway for voting or multicast transmit operation. Up to four co-located receivers can connect to a MLC 8000 analog voting gateway.

MIXED MODE VOTING (P25 DIGITAL/ANALOG): In a voting (non-simulcast) configuration, one MLC 8000 comparator and one GCM 8000 comparator are companion devices providing a single mixed mode channel at the prime site. The mixed mode companion comparator provides a 4-wire analog audio connection and an IP digital audio connection to a GGM 8000 ASTRO 25 site gateway. Up to four co-located mixed mode transmitting base stations can connect with a co-located MLC 8000 mixed mode voting gateway for voting or multicast transmit operation. Up to four co-located mixed mode receivers can connect to a MLC 8000 mixed mode voting gateway.

P25 DIGITAL-ONLY VOTING, P25 DIGITAL-ONLY SIMULCAST: In a voting or simulcast configuration with V.24 circuit connectivity to the transmit/receive subsites, one MLC 8000 digital-only V.24 gateway can connect up to four co-located transmitting base stations or receivers to a GCM 8000 comparator.

(PRELIMINARY) NETWORK REQUIREMENTS FOR CUSTOMER NETWORK PERFORMANCE

The **Prime Site** is defined as the location which houses the MLC 8000 comparators. A **Subsite** is defined as any location which houses the MLC 8000 gateways that are connected to the base stations and receivers.

A **talk path** is defined as a single audio stream. For example, the inbound audio stream from a receiver to a comparator comprises one talk path. The outbound audio stream from a comparator to a base station comprises one talk path. A full duplex 'repeater' audio stream

(from receiver to comparator to base station) is two talk paths.

To ensure optimal analog-only and mixed mode audio performance (to approximate, as closely as possible, circuit system performance) the following requirements must be met:

IP network performance requirements for Prime Site to Subsite links:

- 90kbps bandwidth required per talk path
- 30msec or less network throughput delay
- 5msec or less jitter
- %.1 or less packet loss
- 10msec differential delay between any two subsite/primesite links (required for continuous voting, optional for vote-and-hold operation)

Network equipment loading requirements:

The MLC 8000 utilizes G.711 vocoding with 20msec audio samples - each talk path generates 50 packets per second.

- Router equipment at the Prime Site and at each Subsite must provide for the following packet loading capacity: 50 packets per second, multiplied by the number of talk paths (inbound and outbound). *As a general rule, the sum of packet loading at each of the Subsite routers will be approximately equal to the loading requirement on the router at the Prime Site.*
- Switch equipment must provide 100Mbps connectivity on all ports.
- *Remember to budget for additional packet loading capacity due to traffic associated with non-audio operations (file transfer, SNMP, NTP packet activity).*

Configuration

Model

Description	Full Description	Nomenclature	APC	Price
MLC 8000	F2979 includes: - MLC 8000 module - QMA to BNC adapter - for connecting 5MHz/1PPS in analog simulcast configurations - Analog Simulcast adapter cable - Ground cable	F2979	112	\$1,000.00

Options

MLC 8000 Software

Order software according to one of the following conventional voting channel applications:

Analog Simulcast

Description	Full Description	Nomenclature	APC	Price
-------------	------------------	--------------	-----	-------

<p>ADD: ANALOG CONVENTIONAL SIMULCAST COMPARATOR/GATEWAY</p>	<p>VA00783AA provides software that can be configured for one of two operational modes (but not both): analog simulcast comparator or base radio gateway. The MLC 8000 analog simulcast comparator provides one TRC 4-wire connection to a circuit analog console, and IP connectivity for up to 64 transmit/receiver resources connected to MLC 8000 gateways. The MLC 8000 base radio gateway will connect to one transmit simulcast base station. Only one simulcast base station can be connected to the MLC 8000.</p>	<p>VA00783AA</p>	<p>112</p>	<p>\$1,000.00</p>
--	--	------------------	------------	-------------------

Analog Voting

Description	Full Description	Nomenclature	APC	Price
<p>ANALOG CONVENTIONAL VOTING COMPARATOR/GATEWAY</p>	<p>For receive-only sites in analog simulcast, the VA00784AA option provides software to operate as a receiver gateway. The MLC 8000 receiver gateway will support up to four analog receivers.</p>	<p>VA00784AA</p>	<p>112</p>	<p>\$500.00</p>

Mixed Mode (digital P25 and analog) Voting

Description	Full Description	Nomenclature	APC	Price
	<p>VA00785AA provides software that can be configured for one of</p>			

<p>ADD: MIXED MODE GCM 8000 COMPANION VOTING COMPARATOR/GATEWAY</p>	<p>two operational modes (but not both): analog companion comparator or mixed mode base radio/receiver gateway. The MLC 8000 analog companion comparator provides one TRC 4-wire connection to a co-located GCM 8000 CCGW, and IP connectivity for up to 64 transmit base radio or receiver resources connected to MLC 8000 gateways. The MLC 8000 comparator shares the MLC 8000 gateway resources with a GCM 8000 digital P25 comparator. One MLC 8000 base radio/receiver gateway provides 4wire/V.24 hybrid connections to four mixed mode transmit base radios or receivers.</p>	<p>VA00785AA</p>	<p>112</p>	<p>\$0.00</p>
---	---	------------------	------------	---------------

P25 Digital-Only Voting, P25 Digital-Only Simulcast

Description	Full Description	Nomenclature	APC	Price
<p>ADD: GCM 8000 SIMULCAST VOTING V.24 BASE RADIO AND RECEIVER GATEWAY</p>	<p>VA00786AA provides gateway software to translate the IP GCM 8000 traffic to the V.24 circuit protocol for interfacing to V.24 base radios and receivers. Used in conjunction with the GCM 8000 comparator, one MLC 8000 base</p>	<p>VA00786AA</p>	<p>112</p>	<p>\$0.00</p>

	radio/receiver gateway provides V.24 connections to four mixed mode transmit base radios or receivers.

MOBILITY MANAGEMENT ENTITY (MME)

Ordering Information

Features

- Session and Mobility Management of PDN connections.
- Authentication and security procedures, based on encryption and integrity algorithms EEA0, EEEA1/EIA1.
- Automatic Neighbor Relations (ANR) to enable automatic configuration of neighbor relations lists in the eNBs.
- Support of intra-eNB and inter-eNB location change reporting.
- Support of network-initiated dedicated bearer creation.
- PDN and Serving Gateway Selection
- Operation and maintenance support, including configuration management, fault management, performance management, security management, software management, and 3GPP-based UE trace.
- MME pool for LTE access and for network resilience.

General Information

The MME is the key control node for the LTE network. It is responsible for the control plane function for subscribers and session management. The MME also supports security procedures, terminal-to-network session handling, and terminal location management.

Given its high capacity, scalability (100 kSAU to 10 MSAU), small footprint and low power consumption, the MME enables service providers to optimize operations and manage

increasing traffic volume from mobile broadband. As 3GPP standards evolve, the MME, corresponding RAN and core network elements, continue to incorporate new features which help reduce CAPEX and OPEX.

Configuration

New System Order Guidelines

A new MME system can be ordered as a package/bundle of both SW and HW. The MME is licensed based upon the number of Simultaneous Attached Users (SAUs). Please choose from one of the following options when ordering a new MME system:

Description	Full Description	Nomenclature	APC	Price
MME 5K SAU BUNDLE	-	TT2705	053	\$298,400.00
MME 10K SAU BUNDLE	-	TT2706	053	\$390,570.00
MME 25K SAU BUNDLE	-	TT2707	053	\$632,480.00
MME 50K SAU BUNDLE	-	TT2708	053	\$700,390.00
MME 100K SAU BUNDLE	-	TT2709	053	\$823,850.00
MME 250K SAU BUNDLE	-	TT2695	053	\$1,160,060.00
MME 500K SAU BUNDLE	-	TT2696	053	\$1,732,710.00
GSN SUPPORT SYSTEM (GSS)	-	TT2766	053	\$49,500.00

Existing System Capacity Expansion Guidelines

When ordering an MME user license capacity expansion for an existing system, please choose from one of the following options:

Description	Full Description	Nomenclature	APC	Price
MME FROM 5K TO 10K IP SAU CAPACITY SOFTWARE LICENSE	-	TT05866AA	053	\$101,400.00
MME FROM 10K TO 25K IP SAU CAPACITY	-	TT05867AA	053	\$266,100.00

SOFTWARE LICENSE				
MME FROM 25K TO 50K IP SAU CAPACITY SOFTWARE LICENSE	-	TT05868AA	053	\$80,810.00

**MOBILE WORKSTATION 520
PENTIUM III 700MHz.**

Ordering Information

General Information

The Mobile Workstation 520 is a 3-piece rugged mobile computer designed specifically for real-time computer access and messaging in a mobile environment. It features an Intel Pentium III 500MHz. Microprocessor operating on one of several Windows Operating System. It offers a choice of sunlight readable 10.4" touch screen display modules with an optional anti-reflective coating. It can be provided with an illuminated top-lit/backlit keyboard with integrated pointing device. The CPU module includes one each of the following external ports: USB, RS232 (either COM1 or DB9M), parallel (DB25F), VGA output (DB15F), IDB, Video input (coax), Audio in/out (MIC & Speaker), Radio Modem Antenna (mini UHF), GPS antenna and power. It also interfaces to the supplied display module and keyboard. There are two internal serial ports available for internal radio options and/or internal GPS receiver support.

[AirMobile](#) is a software application for customers who need a way to handle regularly occurring file transfers or application updates while preserving the use of their wide-area data channel for mission-critical and real-time applications.

[MW520-700MHz Catalog Sheet](#)

Ordering Requirements

(Please note that this Price Page is structured differently from the previous price

pages for this product.)

1. The hard drive is included in the main model. **NOTE:** As of July 1, 2002, all booked orders for the main model F5205 will contain a 20GB Hard Disk.
2. The memory and the operating system has to be selected with the main model.
3. The radio, display module, GPS receiver, keyboard, or cables can be selected as an option with the main model.
4. One of the following internal radio modems can be selected with the main model:

Private DataTAC™

The factory installed over-the-air protocol for an internal Private DataTAC™ radio is RD-LAP 19.2. Other RF protocols (MDC-4800™, RD-LAP 9.6) needs to be configured in the field. When selecting an internal Private DataTAC™ radio, the factory will assign a unique ID Numbers for new private systems from an existing block of number (LLI & SID).

NOTE: The MW520-VRM 650 package offers a better-performing, high power package than the PA-MW520 combinations. The VRM-MW520 combination provides greater interference protection and is provided with a significant price break. The option includes a 10' DB-9 M-F cable. The VRM comes with RD-LAP 19.2 programming (no need to order Air Protocol option). All components of the option are shipped in the MW520 original packaging. Antenna is not included.

[Vehicular Radio Modem Catalog Sheet](#)

CDPD

The assigned EID (Electronic Identification) number, which is labeled on the back of the CPU box, shall be used to register the unit with the network provider.

IDEN® Packet Data

The assigned IMEI (International Mobile Equipment Identification) number, which is labeled on the back of the CPU box, shall be used to register the unit with the network provider.

5. The warranty on the Mobile Workstation 520 is 1 year parts and 1 year labor.
6. Select a processor, either 500 or 700MHz.
7. The V147 external speaker option is REQUIRED for any text-to-voice software operations.

VIRTUAL RADIO CONTROL HEAD (VRCH) General Information

Virtual Radio Control Head

Virtual Radio Control Head (vRCH) is a Windows-based software application developed specifically for an MW-520. vRCH is a factory loaded application with touch-screen display capability. The vRCH displays an interactive image of a voice radio control head allowing the user to operate most voice radio control head buttons via the MW-520 display. An MW-520 with a USB Port, but needing more serial ports, can support up to four radio connections using the USB to RS-232 Converter accessory (Comm 5 through 8). MW-520's shipped from the factory after October 4, 2001, will include the vRCH.

(vRCH is included on models with serial numbers including or later than: 736SBUXXX;

where B=2001 and U=start of October; any subsequent letters in the "B & U" positions signify a later release.)

Compatible models shipped prior to October 4, 2001, can access a downloadable version of the vRCH software from the [Mobile Workstation 520 Website](#).

The appropriate Cabling Interface Kit must be ordered from Motorola AAD:

MW-520 to Voice Radio Cable Interface Kits

FLN2869 MCS 2000 Mobile Radio Cable Interface Kit

FLN2871 Spectra (Analog or ASTRO Digital) Mobile Radio Cable Interface Kit
(Supports Control Heads Types: Analog Spectra A4, A5, A7, & A9 plus ASTRO Digital Spectra W5 & W7)

MW-520 Serial Port Extension Kit

FLN2955 Converter, USB to 4 RS232 (Converts MW-520 USB Port to 4 RS-232 Ports)

Manuals are available electronically at the [Mobile Workstation 520 Website](#)

vRCH User's Guide

vRCH Administrator's Guide

vRCH Software is intended for touch-screen MW-520s on the following platforms:

F5200C Win98 and WinNT

F5201C Win98 and WinNT

F5203* Win98, WinNT, and Win2000 (Model will need the USB to 4 RS232 Converter Cable)

F5205* Win98 and Win2000 (Model will need the USB to 4 RS232 Converter Cable)

NOTE: User's with MW-520 models above that did not come from the factory with vRCH all ready installed can download the installable version of vRCH Software from the [Mobile Workstation 520 Website](#)

Monitoring and Control Network
Used for Comparator
Status and Control

Ordering Information

General Information

The Monitoring and Control Network (MCN) links a control center to a comparator. This provides an easy to use interface to view the status of a voting system and allows for control of comparators. The network uses a series of serial, parallel, and network cables to link comparator with display devices.

- The network is modular and can grow as the system grows.
- There are two types of user interfaces available:
 - CRT based - Uses a DOS computer to display the status and control of receivers on a CRT screen
 - Logic based - Connects an ASTRO-TAC Comparator with relay cards in a console electronics bank
- On the CENTRACOM one or more B1426 relay cards are required to interface into the MCN system.
- Each model comes with serial cables, network terminators, modules, and manuals.
- The CRT models include application software and users manual.
- **Note: The computer and monitor must be ordered separately.**

Ordering Requirements

For interfacing with ASTRO-TAC Comparators...

1. Order appropriate model as determined by how many receivers and base stations that are connected to the comparator (8 or 16 Receivers maximum).
2. Order a power supply option: Z491 120VAC for Canada or US, or Z492 230VAC for International.
 - **Note: A power supply option must be ordered for each model number.**
3. Order a mounting option: Z493 Rack Mount or Z494 Wall Mount.
 - **Note: A mounting option must be ordered for each model number and include network cables.**
4. On ASTRO-TAC Systems order the appropriate software option. Z255 for ASTRO VSELP or Z708 for ASTRO CAI (IMBE).
 - **Note: A software option must be ordered for each L1953, L1954 or L1959 model numbers.**

5. Order the appropriate spares or alternate cable lengths.

For interfacing with Spectra-TAC/DIGITAC Comparators...

1. Order appropriate model as determined by how many receivers and base stations that are connected to the comparator (8 or 16 Receivers maximum).
2. Order a power supply option: Z491 120VAC for Canada or US, or Z492 230VAC for International.
 - **Note: A power supply option must be ordered for each model number.**
3. Order a mounting option: Z493 Rack Mount or Z494 Wall Mount or Z496 Wiring Mount (DIGITAC-TAC only). The Z496 can mount the equipment easily on the back of the DIGITAC-TAC comparator.
 - **Note: A mounting option must be ordered for each model number and include network cables.**
4. Order a wiring option: Z550 or Z495. If the Z496 is ordered, don't order a wiring option.
5. Order the appropriate spares or alternate cable lengths.

For interfacing with MLC 8000 and GCM 8000 IP Comparators...

1. Order appropriate DDN model based on how many servers/clients are required

MOTOMESH Extension Kit - 2.4/4.9 GHz Broadband Data Solution

General Information

The MOTOMESH Extension Kit is a prepackaged system for municipalities and public safety agencies looking to provide dedicated licensed network connectivity to first responders, license-free mobile broadband to public works employees, and WiFi access to public users - all over a single network. The MOTOMESH Extension kit enables cost-effective scalability and simplified municipal wireless broadband deployments. It is the first and only integrated private and public combined solution available on the market.

The MOTOMESH solution is a dual-band wireless broadband data system that operates at the 2.4 GHz ISM band (unlicensed) and 4.9 GHz (licensed) public safety band using mesh networking technology. This system provides both wide-area broadband data coverage and peer-to-peer ad-hoc networking. This system also provides users with sustained high data rate performance at vehicular speeds and with location capabilities, which are unique attributes that are not found in competing solutions and are considered critical to many public safety applications. The system is designed primarily to satisfy the needs of public safety on the 4.9 GHz band. This system is also designed to simultaneously serve other municipal constituencies, such as public works agencies and general public access, over the unlicensed 2.4 GHz band. The multiple use cases provide a strong value proposition for municipalities by spreading the Total Cost of Ownership (TCO) rationalization over a wider base of users.

In addition to a MOTOMESH equipment package (detailed below) the MOTOMESH Extension kit includes various options: AirMobile™, Wireless Network Extension, and Multi-

Net Mobility™. AirMobile allows you to easily manage large file transfers and software updates. Wireless Network Extension allows you to extend your mobile coverage with access to public networks. Multi-Net Mobility adds security and session persistence while you seamlessly roam across coverage areas and between your private network and the public network.

Features and Components

The complete MOTOMESH Extension Kit offers the optimal combination of features to leverage the integrated technology.

MOTOMESH

- Infrastructure meshing to create a wide-area broadband wireless backhaul
- High data rate mobile communication at vehicular speeds, achieving 6 Mbps burst data rates to a single user
- Support high speed motion and seamless hand-off between infrastructure nodes
- Self-forming and self-healing wide-area wireless mesh routing, providing increased network availability and robustness
- Client meshing allows for ad hoc and unique vehicle extensions
- Geo-location services
- Quality of Service for mission critical communications and differentiated services
- Symmetric data rates to and from users
- Wireless element management system, including configuration managements, statistics reporting, alarms and remote firmware upgrade
- Hardware and User authentication of wireless networking devices
- Differentiated services using IP Quality of Service
- IP networking and transport services with a single mobile internet switching center kit

The MOTOMESH Extension Kit includes the following MOTOMESH Level 2 Starter Kit components:

- 2 Internet Access Points with VLAN (IAP7300-01)
- 4 Mesh Wireless Routers (MWR7300) without Ethernet ports
- 5 Vehicular Mounted Modems (VMM7300)
- 15 Wireless Modem Cards (WMC7300)
- 1 Linux MiSC with 200 Device Licenses

2 Mesh Cameras

For more information, see the [MOTOMESH E-CAT Pages](#) and [Mesh Camera E-CAT Pages](#)

In addition to the standard MOTOMESH equipment described above, the full MOTOMESH Extension Kit solution includes:

AirMobile

- Secure, 256 bit, AES-compliant data encryption with compression
- Centralized, automated, scheduled, prioritized content delivery
- Robust error and session recovery
- Individual and group update capability
- Transfer progress indicators and per-client upload tracking

The AirMobile option includes the following components:

- 1 AirMobile server, server software, and OS
- 20 AirMobile client licenses

For more information, see the [AirMobile Page](#)

Wireless Network Extension

- First and only integrated private and public solution on the market
- Single point of contact for customer's wireless data network design and customer care
- Expanded broadband coverage to wide area
- Application roaming when combined with Multi-Net Mobility

The Wireless Network Extension option includes the following components:

- 5 Wireless PCMCIA data cards with installation software and user guide
 - 2 Year unlimited* data plan for 5 users
- * Subject to restrictions per carrier

Multi-Net Mobility

- End-to-End Security with "always on" AES 256 bit encryption between end device and fixed equipment
- Session Persistence to automatically suspend/reconnect open application sessions across network holes
- Intelligent Routing selects the best available network, blocks applications from unintended networks and prioritizes application traffic

The Multi-Net Mobility option includes the following components:

- 1 HP ProLiant DL360 server, with Linux, keyboard, and mouse
- 1 19 inch monitor
- 1 Multi-Net Mobility server software package
- 20 Multi-Net Mobility client licenses - for 15 WMC cards and 5 VMMs (additional can be ordered as required)

For more information, see the [Multi-Net Mobility Page](#)

Installation and optimization is included as part of the MOTOMESH Extension solution. Reference the Technical Support SOW for more details.

This and other customer communication templates can be found at the [TAG Contracts and Compliance Site](#)

Ordering Requirements

A detailed site survey and system design should be done prior to ordering, to determine the proper network configuration required. This should be done in conjunction with the Broadband Specialist in your region or through your Business Development Manager.

All orders must be entered into the Customer Order Fulfillment (COF) system.

A complete MOTOMESH Extension system configuration consists of the following, but can be ordered a la carte. (Note: the AirMobile pricing below is only available when ordered with the Starter Kit):

1. 1 MOTOMESH Level 2 Starter Kit with design and implementation services -
2. 1 AirMobile Server with 20 client licenses, installed -
3. 5 Wireless Network Extension data cards with 2 year data plans -
4. 1 Multi-Net Mobility server, software, and 20 client licenses, and installation -

Please consult the [MOTOMESH System Home Page](#) to gain access to the System Planner document, system configuration tool(s), FAQ list, and other support documentation that is relevant to the MOTOMESH solution prior to ordering.

The following process outline should be followed when ordering a MOTOMESH Extension Network:

Step 1 - Order a MOTOMESH Starter Kit

Step 2 - To add AirMobile, order:

- 1 SCA4304 AirMobile server software package

- 20 Option SCA4300 AirMobile client licenses
- 1 Option ZA00107AA CD-ROM media
- 1 DSPE860KMMWIN03 Dell PowerEdge 860 Server

Step 3 - To add Wireless Network Extension, order:

- 120 Kit TT1971A
- 5 Option TT05030AA

Step 4 - To add Multi-Net Mobility, order:

- 1 Model T7258A MNM Server Software
- 20 Option ZA00484AA MNM Client Licenses
- 1 DDN9003B Server with O/S
- 1 DS019BLK 19 inch monitor
- 1 Installation required, please contact your Business Development Manager for details.

Step 5 - Service and Technical Support:

Engineering, design, installation, optimization, test, and project management are all included

Step 6 - Training: Professional training classes are offered and conducted by Motorola's Worldwide Learning Services group. Contact Worldwide Learning Services at 847-538-7999 to obtain information about the training session offerings.

Step 7 - Field Upgrades, Spares, and Replacements: Hardware and software field upgrades, spares, and replacements are available as accessories as required.

Our certified and recommended backhaul products supplied by Motorola Canopy are provided and orderable as accessories for this system. These should be ordered based on the outcome of a detailed site survey and system design. Some common Canopy items are listed on these pages. For more complete information regarding Canopy models and options go to <http://il02cms01.comm.mot.com/prodsys/pagelist.asp?catid=183>

Service and Training

Service

1 Year Standard Warranty and Maintenance is included with the product and includes Monday through Friday 9-4 CST technical support, software updates to address defect repair issues, and depot unit repair.

Post warranty services are offered as a bundle and include the following:

- Monday through Friday 9-4 CST technical support (7x24 support option is available)

- Software defects repair
- Depot Unit repair
- 8x5 on-site Dispatch of customer bucket truck to IAP/MWR sites
- 8x5 on-site dispatch of Motorola personnel for the MiSC (7x24 option is available)

Services can be ordered directly through the Customer Support Manager. Contact your regional business service BDM to arrange for a quotation.

Training

Both on-site and off-site training class options will be available. Class size will be limited, and on-site classes are to be held in Schaumburg. The pricing below is on a per student basis and only applies to on-site classes held in Schaumburg. Off-site classes will need to be quoted separately.

Contact Worldwide Learning Services at 847-538-7999 to obtain information about the training session offerings.

Motorola MCC 7100 Dispatch Console

-- Dispatch Positions, Dispatch API and Product Software --

Ordering Information

General Information

IMPORTANT NOTICE ABOUT MOTOROLA SOLUTIONS SOFTWARE SUPPORT POLICY

In line with the Software Support Policy (SwSP) for ASTRO based system software, orderability rules now include alignment to this Software Support Policy which sets a new framework of three periods of support from Ship Acceptance for that specific release.

The policy provides for a 4-year period of time, referred to as the **Standard Support** period, during which access to qualified software defect repairs and system expansions for that specific release of system software are provided.

Then there is an additional 3 year period of time, referred to as the **Extended Support** period, during this time no software defect repair, no system expansions and no Security Update/Monitoring Services support are available for that specific release of system software.

After the 4 + 3 year support periods have expired, the system release enters the **End of Support** period. At this time, no software defect repair, no system expansions no Security Update/Monitoring Services and no service offerings are available for that specific release of system software.

Customers may choose to upgrade or migrate to a supported release at anytime during their system lifecycle.

Historical milestones, such as the date that a system ships, reaches beneficial use, or achieves final acceptance have no impact on the system software dates of support.

Reminder: Under the new SwSP, system expansions are only allowed in the standard support window for a system release. If your customer desires an expansion that would occur toward the end of the standard support period, it is highly recommended that you have them upgrade/migrate first and then expand their system to ensure the customer receives the full warranty time period.

Additional information can be found here: [Software Support Policy Site](#)

MCC 7100 Product Planner and Ordering Guide

The MCC 7100 Product Planner and Ordering Guide is available on the [High Tier Dispatch Console wiki page](#).

Dispatch API Software Development Kit

The Software Development Kit (SDK) is required when a customer wishes to use the MCC 7500E/7500 Dispatch API to allow 3rd party software to communicate with the MCC 7500E dispatch console or if they wish to use a custom graphical user interface (GUI) on the dispatch console.

The MCC 7500E utilizes the same SDK as the MCC 7500 and MCC 7100 consoles. Please see the [High Tier Dispatch Console wiki page](#) for more information about the SDK and SDK technical support.

Ordering Requirements

Supported Ordering Systems

1. This equipment is ordered directly in COF or OMAR. Note that no checking of the design itself is done in COF or OMAR.
2. Motorola On-Line may not be used to order complete console systems.
3. Please note that the latest available release of software and hardware will be provided when ordering through the system. If earlier release versions are required then a case must be opened with the System Support Center (SSC) to obtain the desired version from Upgrade Operations (UO).

Don't Forget These Items for Each Dispatch Console

1. PC, Monitor, Speakers, Microphone, and other accessories.
2. Software Entitlement Licenses

Links to Other Elements of the Console Sub-System

1. [MCC 7500 Dispatch Console Product Catalog](#)
2. [MCC Series PC, Monitor, and accessories](#) (also available in pulldown tab above)
3. [Manuals](#)
4. Please see [Information Assurance \(IA\) PCAT page](#) for Control Room Firewall media, Element Hardening, and other IA features.
5. Also see the pulldown box at the top of this page for other elements.

Configuration

Ordering Instructions

Step 1: Order the MCC 7100 IP Console SW Application

Software Items

Description	Full Description	Nomenclature	APC	Price
MCC 7100 IP Dispatch Position Main Model	Provides the main model for ordering the various options available to the MCC 7100 Dispatch Position. Order one (1) B1939 for each MCC 7100 Dispatch Position. Each B1939 requires at least the CA01642AB software license option.	B1939	443	\$0.00
MCC 7100 DVD	Provides the DVD containing the latest shipping version of the application software for the MCC 7100 dispatch console. Need at least one per system. Does NOT include the licenses required to use the software. The required licenses are purchased with the B1939.	B1940	443	\$250.00

Upgrade Software License

Description	Full Description	Nomenclature	APC	Price
ADD: MCC 7100 DISPATCH CONSOLE SOFTWARE REFRESH LICENSE	Provides a license for upgrading to the latest version of the MCC 7100 Dispatch Console Software. One is required for each dispatch console being upgraded. Order as a sub-item to the B1940.	CA02090AA	443	\$2,500.00

MCC 7100 & PRX 7000 Feature/Capacity License Model (A7.16 & A7.17 application software only)

All installations of MCC 7100 and PRX 7000 software must order the corresponding feature (e.g., IRR) and/or capacity licenses for their given software release otherwise the products will not operate. Prior to A7.16 software these licenses are in the "HKVNxxxxx" format and are

ordered directly. Beginning with A7.16 software these licenses are in the "UAxxxxxxx" format and are ordered as a sub-item to B1942. Please note that the licenses follow the SOFTWARE version of the MCC 7100 or PRX 7000 and NOT the system release in which they may be installed.

Description	Full Description	Nomenclature	APC	Price
MCC7100 SOFTWARE LICENSING	-	B1942	443	\$0.00

Step 2: Order Basic Console Operator License

Description	Full Description	Nomenclature	APC	Price
ADD: MCC 7100 BASIC CONSOLE FUNCTIONALITY SOFTWARE LICENSE	Provides a license for using the MCC 7100 Dispatch Console Software. A software license is required for each dispatch position being ordered. Covers basic console features such as non-signaling analog conventional, patch, multi-select, paging, aux i/o's, alert tones, channel marker, using the API, etc. Order as a sub-item to the B1939.	CA01642AB	443	\$4,800.00

Step 3: Order Licensed Features for the Console

Orders for licenses require email address(s) to be provided with the order. Motorola emails the License Entitlement ID to the email address(s) entered with the order as part of the order fulfillment process.

Notice: Effective January 1, 2019, Motorola Solutions announces the cancellation of the MCC 7100 Dispatch Consoles radio resource capacity tiered license options of 45 and 60. Option numbers UA00251AA (was HKVN4158A) and UA00252AA (was HKVN4157A).

This cancellation does not affect the cumulative nature of the any of the capacity licenses, cancelled or otherwise, e.g., two new 30 capacity licenses will provide 60 radio resource capacity, adding a 15 capacity license to an existing 30 capacity license will provide 45 radio resource capacity, etc. Please see the ITC Notification for more information. The notice is available on our wiki page at <https://sites.google.com/motorolasolutions.com/high-tier-voice-radio-dispatch>.

Pre-A7.16 MCC 7100 Software Radio Resource Capacity Licenses

Order one software capacity license per operator position depending on capacity needs.

Description	Full Description	Nomenclature	APC	Price
5 CHANNEL SW LICENSE	Allows maximum of 5 simultaneous voice streams with 15 on-screen radio resources.	HKVN4160A	443	\$3,500.00
10 CHANNEL SW LICENSE	Allows maximum of 10 simultaneous voice streams with 30 on-screen radio resources.	HKVN4159A	443	\$6,250.00

Pre-A7.16 MCC 7100 Software Integrated Recall Recorder (IRR) License

Order one optional Integrated Recall Recorder (IRR) license per operator position.

Description	Full Description	Nomenclature	APC	Price
MCC 7100 INSTANT RECALL RECORDER LICENSE	Enables the Integrated IRR application on the MCC 7100 SW package. Order one per operator position.	HKVN4225A	443	\$1,200.00

A7.16 & A7.17 MCC 7100 Software Radio Resource Capacity Licenses

Notice: Effective January 1, 2019, Motorola Solutions announces the cancellation of the MCC 7100 Dispatch Consoles radio resource capacity tiered license options of 45 and 60. Option numbers UA00251AA (was HKVN4158A) and UA00252AA (was HKVN4157A).

This cancellation does not affect the cumulative nature of the any of the capacity licenses, cancelled or otherwise, e.g., two new 30 capacity licenses will provide 60 radio resource capacity, adding a 15 capacity license to an existing 30 capacity license will provide 45 radio resource capacity, etc. Please see the ITC Notification for more information. The notice is available on our wiki page at <https://sites.google.com/motorolasolutions.com/high-tier-voice-radio-dispatch>.

Order one software capacity license per operator position depending on capacity needs. Order as a sub-item to B1942.

Description	Full Description	Nomenclature	APC	Price

ADD: 15 RADIO RESOURCES LICENSE	Applies to A7.16 and later MCC 7100 software versions only. Allows maximum of 5 simultaneous voice streams with 15 on-screen radio resources. Order as a sub-item to B1942.	UA00249AA	244	\$3,500.00
ADD: 30 RADIO RESOURCES LICENSE	Applies to A7.16 and later MCC 7100 software versions only. Allows maximum of 10 simultaneous voice streams with 30 on-screen radio resources. Order as a sub-item to B1942.	UA00250AA	244	\$6,250.00

A7.16 & A7.17 MCC 7100 Software Integrated Recall Recorder (IRR) License

Order one optional Integrated Recall Recorder (IRR) license per operator position. Order as a sub-item to B1942.

Description	Full Description	Nomenclature	APC	Price
ADD: MCC 7100 INSTANT RECALL RECORDER LICENSE	Applies to A7.16 and later MCC 7100 software versions only. Enables the Integrated IRR application on the MCC 7100 SW package. Order one per operator position. Order as a sub-item to B1942.	UA00253AA	443	\$1,200.00

Step 4: Order Proxy and Firewall (Only required if Installing MCC 7100 Console Outside ASTRO Network)

Each PRX 7000 Entitlement License supports 1 to 10 connections from the Customer network into the ASTRO Network.

Up to 5 PRX 7000 installations are supported per site. Proxy SW DVD not included, item #BVN6079 must be purchased separately.

Software Items

Description	Full Description	Nomenclature	APC	Price
PRX 7000 Proxy Application SW DVD	Provides the DVD containing the application software for the PRX 7000. Does NOT include the licenses required to use the software. The required licenses	BVN6079	443	\$250.00

	are purchased as HKVN4225A for pre-A7.16 software versions and option UA00254AA for A7.16 and beyond software versions.			
--	---	--	--	--

Pre-A7.16 PRX 7000 Software License

Order one per PRX 7000 installation.

Description	Full Description	Nomenclature	APC	Price
PRX 7000 Proxy SW License (1-10 CONNECTIONS)	Each license enables one PRX 7000 application. Each PRX 7000 application supports up to 10 MCC 7100 connections into the RNI. Up to 5 installations of PRX 7000 are supported per console site. The PRX 7000 DVD is not included. DVD item# BVN6079 must be purchased separately.	HKVN4161A	443	\$2,500.00

A7.16 & A7.17 PRX 7000 Software License

Order one per PRX 7000 installation. Order as a sub-item to B1942.

Description	Full Description	Nomenclature	APC	Price
ADD: PRX 7000 PROXY SW LICENSE (1-10 CONNECTIONS)	Applies to A7.16 and later PRX 7000 software versions only. Each license enables one PRX 7000 application. Each PRX 7000 application supports up to 10 MCC 7100 connections into the RNI. Up to 5 installations of PRX 7000 are supported per console site. The PRX 7000 DVD is not included. DVD item# BVN6079 must be purchased separately. Order as a sub-item to B1942.	UA00254AA	443	\$2,500.00

A7.15, A7.16, and A7.17 system release Control Room Firewall

When ordering in OMAR, the firewall must be ordered as a standalone item.

Please see [Information Assurance \(IA\) PCAT page](#) for Control Room Firewall media, Element Hardening, and other IA features. Below item is listed for convenience only and may be out of date. It is not managed by the console group.

Description	Full Description	Nomenclature	APC	Price
FORTINET FIREWALL APPLIANCE	(Firewall for A7.15 and later)	T8126	147	\$3,200.00

A7.11, A7.13, and A7.14 Control Room Firewall

The SSG 140 is no longer available for existing systems expansions on A7.11, A7.13, and A7.14. Please see the SSG 140 cancellation notice for more information.

Step 5: Order Operational Licenses for Trunking and/or Conventional Operation

Operational Licenses

Depending on the features desired on the MCC 7100 IP Console, one or more of the following operational license options may also have to be ordered.

Description	Full Description	Nomenclature	APC	Price
ADD: MCC 7500 / MCC 7100 TRUNKING OPERATION	Required when the MCC 7500 or MCC 7100 dispatch position is used to control trunking resources (ASTRO 25, SmartZone via SmartX or SMARTNET via SmartX). Order as a sub-item to the B1933 for MCC 7500 and as a sub-item to B1939 for MCC 7100.	CA01643AA	443	\$6,000.00
ADD: MCC 7500 /MCC 7100 ADV CONVL OPERATION	Required when the MCC 7500 or MCC 7100 dispatch position is used to control ASTRO 25 conventional channels, MDC 1200 channels or ACIM Link channels. Order as a sub-item to the B1933 for MCC 7500 and as a sub-item to the B1939 for MCC 7100.	CA01644AA	443	\$3,600.00
	Required when the MCC			

ADD: MCC 7500/MCC 7100 IED OPERATION	7500 or MCC 7100 dispatch position uses the Inbound Event Display GUI. Order as a sub-item to the B1933 for MCC 7500 and as a sub-item to the B1939 for MCC 7100	CA01645AA	443	\$6,300.00
---	--	-----------	-----	------------

Step 6: Order Secure Options if desired

Secure Operation

Description	Full Description	Nomenclature	APC	Price
ADD: MCC 7100 SECURE OPERATION	Order when secure capabilities are required in an MCC 7100 dispatch console. Requires CA02092AA and is ordered as a sub-item to the B1939.	CA02180AA	443	\$3,900.00

The MCC 7100 Dispatch Console will support OTEK beginning with the A7.17.1 MCC 7100 software version.

Description	Full Description	Nomenclature	APC	Price
ADD: MCC 7500 / MCC 7100 OTEK OPERATION	Order when remote key management capabilities are required on a VPM-based dispatch console, AIS, or MCC 7100. Order as a sub-item to the B1933 for MCC 7500 or as a sub-item to the B1939 for MCC 7100. Note that OTEK does not support the ADP encryption algorithm.	CA01220AA	443	\$4,020.00

Secure Algorithms

Description	Full Description	Nomenclature	APC	Price
ADD: SOFTWARE AES, DES-OFB, ADP ENCRYPT KEY FILE MGMT	Required for secure operation. Provides licensing for the AES, DES-OFB, and ADP encryption algorithms. Requires CA02180AA and is ordered as a sub-	CA02092AA	443	\$2,160.00

	item to the B1939.			
--	--------------------	--	--	--

Step 7: Order Dispatch PC Equipment, Accessories, Spares, and FRUs if desired

Please see [MCC Series PC, Monitor, and accessories](#) pulldown menu.

Step 8: Order Audio Interface Module (AIM) if desired

Description	Full Description	Nomenclature	APC	Price
USB AUDIO INTERFACE MODULE	The AIM supports connectivity for Motorola standard peripherals used in mission critical public safety environments.	B1941	443	\$1,900.00

Step 9: Adding Operational Licenses to Fielded Dispatch Consoles, a.k.a., Field-Adds

The following licenses are for use with fielded MCC 7100 dispatch consoles. These licenses are used when adding the indicated functionality to a fielded dispatch console

Basic Operational Licenses

Description	Full Description	Nomenclature	APC	Price
MCC 7500 / MCC 7100 TRUNKING OPERATION FIELD-ADD LICENSE	-	BLN1311	443	\$6,000.00
MCC 7500 / MCC 7100 ADVANCED CONVENTIONAL OPERATION FIELD-ADD LICENSE	-	BLN1312	443	\$3,600.00
MCC 7500 / MCC 7100 INBOUND EVENT DISPLAY (IED) FIELD-ADD LIC	-	BLN1313	443	\$6,300.00

Encryption Licenses

Description	Full Description	Nomenclature	APC	Price
OVER THE ETHERNET KEYING (OTEK) OPERATION FIELD-ADD LICENSE	-	BLN1302	443	\$4,020.00

SECURE OPERATION FIELD- ADD LICENSE	-	BLN1304	443	\$3,900.00
SOFTWARE AES, DES-OFB, ADP ENCRYPT KEY FILE MGMT	Existing dispatch consoles may add the licensing for the AES, DES-OFB, and ADP encryption algorithms by ordering the Software AES, DES-OFB, ADP Encryption Key File Management Field-Add License for each dispatch console that needs the feature. Note that this license does not provide the required Secure Operation license (BLN1304 or CA02180AA). The Secure Operation license must be ordered separately.	BLN7224	443	\$2,160.00

Updates

NEW JULY 2019!

TO REGISTER FOR AIRLINK COMPLETE SEE BELOW:

Go to this website: <https://www.sierrawireless.com/complete/register/>

New Customer will need to log in and create a log in account.

This process costs nothing – it is a free service that is included in the first year of the MP70 and RV55 that you are receiving.

It will register the devices for you to be eligible to call in for phone support and the use of ALMS (our online management software).

IT'S ALL ABOUT INFORMATION FLOW

Vehicle routers keep people connected in vehicles so they can access real-time intelligence on the road. They provide a bubble of connectivity around the vehicle that allows a variety of equipment from laptops and tablets to in-vehicle and body-worn cameras to access the Internet. We call this bubble a vehicle area network (VAN) and the connectivity between the VAN and the enterprise network is what makes the crucial flow of information between the field and base possible. For public safety, this information flow can be a lifeline. Mobile connectivity over WAN allows frontline teams to transmit and receive data securely in real time – video feeds, maps and criminal record databases, for example – and coordinate their response with other emergency services. Command can monitor the location and status of assets, access telemetry and see fleet information such as data on driver behavior. This two-way flow of information help keep responders safe and effective.

ALL NEW ROUTERS MUST BE REGISTERED

Model

**MT 1500 Portable Series 800 MHz Band
Wide Area SmartZone® "Handie-Talkie™" Radio
Trunked Radio Systems**

Ordering Information

Features

All MT 1500 packaged models include the following hardware features:

- 3 Programmable Side Buttons
- Orange Emergency Button
- 16 Position Mode Rotary Select Switch
- On/Off Volume
- Low Battery Alert Tone
- Antenna (Bandsplit and Type Dependent on Band Option)
- Noise Reduction Software
- 1 Top Mounted Programmable Three Position Concentric Switch
- Weather Sealed Universal Connector
- Bi-Color LED Indicator
- Nickel Metal Hydride Battery
- Detachable Belt Clip
- Audio Gain Control
- 1 Year Warranty

General Information

The MT 1500 Portable is offered in model I only:

Hardware Model	Modes	Alphanumeric Display Lines/Characters Per Line	Keypad	Navigation Pad
MT 1500 Model I	48	None	None	No

Operating Modes

MT 1500 Radio Model is capable of operation in two different voice communication modes:

- 3600 Analog Trunking
- MDC 1200 Analog Conventional

The MT 1500 Portable is capable of 48 modes when the programmable Concentric Top Mounted Switch is used for Zone Operation. The mode of operation is programmed on a channel-by-channel basis.

There are no maximum frequency separation conditions that must be adhered to on the MT 1500

Portable Radio Series. Separation of frequencies can be as wide as the allowable sub-band per radio model with no degradation of any performance specifications. Mutual Aid channels 821-824 will be supported. If an incorrect antenna is used, degraded performance may be experienced.

RELATIVE RADIATED RECEIVE SENSITIVITY

The relative radiated receive sensitivity test (formerly referred to as self-quieters) measure the sensitivity from 764MHz to 870Mhz in 12.5kHz steps. The radio is set to 25kHz channel mode. These measurements were taken in a shielded environment so that degraded sensitivity at discrete frequencies is known to be due to the radio's self-interference (as opposed to external interference.) The following list contains frequencies which were consistently found to have severely degraded performance on all measured radios: 856.3375, 857.7000, 860.7000, 862.2000, 863.7000, 867.3000, 864.0000.

FM INFORMATION

The XTS 2500 portable radio when properly equipped with options H223 and Q393 are Factory Mutual (FM/CSA) approved as intrinsically safe for use in, Division 1, Class I, II, III, Groups C, D, E, F, G, T3C without encryption modules.

The XTS 2500 portable radio when properly equipped with options H223 and Q393 are Factory Mutual (FM/CSA) approved as intrinsically safe for use in, Division 1, Class I, Class II, Class III, Groups D ,F, G, T3C with encryption modules.

Ordering Requirements

MT 1500
FLASHport® Aftermarket Upgrades
800MHz, VHF, UHF Bands
Trunked Radio Systems

Ordering Information

General Information

FLASHport Aftermarket Software is used to upgrade to the latest version of your System Enhancement Software Package or to upgrade to a different System Enhancement Software Package for existing MT 1500 radios in the field. FLASHport Upgrade Kits contain upgrade software, FLASHkey, and upgrade documentation.

Ordering Requirements

1. Specify the *current* System Enhancement Software Package that represents the software in the radio as the main line item (T7020, T7334, T7019 or T7324) and order quantity 1 at \$0 (No Charge).
2. Select the *desired* System Enhancement Software Package and enter as sub-items.
3. **IMPORTANT:** If upgrading to a new System Enhancement Software Package, you must use the column which represents that new System Enhancement Software Package to determine price and availability of System Enhancement Options. If you are remaining at the same System Enhancement Software Package, use the column of the current System Enhancement Software Package to determine price and availability of System Enhancement Options.
4. Each sub-items must have the same quantity listed (which equals the number of radios being upgraded) even though the main line is ALWAYS 1.
5. Radio Model number and FLASHcode must be entered into designated COF fields. A separate line item must be entered for each different combination of Radio Model and FLASHcode.

NOTE: The FLASHcode can be read by using the SRIB and RSS.

CURRENT SYSTEM SOFTWARE PACKAGE

MTC 3600 SmartZone Site Controller (Non-Simulcast)

Ordering Information

General Information

ORIGINAL MTC3600 INTENT TO CANCEL NOTICE: [MTC3600 Cancellation Memo](#)

MTC3600 FOR SMARTX INTENT TO CANCEL NOTICE: [MTC3600 Controller Cancellation Memo](#)

'All orders for SmartZone MTC 3600's must be accompanied by a matching order for SmartX. Any orders for SmartZone MTC 3600's, accompanying SmartX orders, must be for a single unit replacement of a non-SmartX compatible 6809 controller. No orders for additional SmartZone MTC 3600's for site expansion, or any other purpose, will be honored. All site expansions associated with SmartX must be accomplished with 9600 based sites'

Trunked System Site Controller

MTC 3600 Controllers are the site call processing units for operation in an analog or ASTRO/Mixed Mode SmartZone and/or SmartZone/OmniLink Trunking radio system. MTC 3600 is the evolution of the 6809-based central controller.

MTC 3600 Controllers are the central call processing equipment that use advanced PowerPC processing with Compact PCI technology to provide trunked operation in SmartZone and SmartZone/OmniLink Trunked Radio Systems. When combined with other equipment, the MTC 3600 Controllers yield leading edge trunked radio operation, system management, and control. In addition to supporting features like Selective Call, Group Call and Push to Talk ID Display, key features and benefits yielded by the controller are listed below.

MTC 3600 SmartZone Simulcast Remote Controller

Ordering Information

General Information

PREVIOUS MTC3600 INTENT TO CANCEL NOTICE: [MTC3600 Cancellation Memo](#)

MTC3600 FOR SMARTX INTENT TO CANCEL NOTICE: [MTC3600 Controller Cancellation Memo](#)

'All orders for SmartZone MTC 3600's must be accompanied by a matching order for SmartX. Any orders for SmartZone MTC 3600's, accompanying SmartX orders, must be for a single unit replacement of a non-SmartX compatible 6809 controller. No orders for additional SmartZone MTC 3600's for site expansion, or any other purpose, will be honored. All site expansions associated with SmartX must be accomplished with 9600 based sites'

Trunked System Site Controller

MTC 3600 Controllers are the site call processing units for operation in an analog or ASTRO/Mixed Mode SmartZone and/or SmartZone/OmniLink Trunking radio system. MTC 3600 is the evolution of the 6809-based central controller.

MTC 3600 Controllers are the central call processing equipment that use advanced PowerPC processing with Compact PCI technology to provide trunked operation in SmartZone and SmartZone/OmniLink Trunked Radio Systems. When combined with other equipment, the MTC 3600 Controllers yield leading edge trunked radio operation, system management, and control. In addition to supporting features like Selective Call, Group Call and Push to Talk ID Display, key features and benefits yielded by the controller are listed below.

MTC 3600 Controller Upgrades

Ordering Information

General Information

PREVIOUS MTC3600 INTENT TO CANCEL NOTICE: [MTC3600 Cancellation Memo](#)

MTC3600 FOR SMARTX INTENT TO CANCEL NOTICE: [MTC3600 Controller Cancellation Memo](#)

Trunked System Site Controller

MTC 3600 Controllers are the site call processing units required for operation in trunking radio systems. MTC 3600 is the evolution of the 6809-based central controller.

The following ordering information provides model numbers to order software refresh upgrades for fielded MTC 3600 controllers. To upgrade an existing, fielded MTC 3600 controller to a different system configuration or modulation type and to upgrade a customer's system from a 6809-based SMARTNET controller to an MTC 3600 controller, please contact [Upgrade Operations](#) or by calling 1-800-221-7144.

Software Refresh Ordering Requirements

MTC 3600 Controllers can be upgraded to the latest shipping software by ordering only one (1) of the proper T model based on the fielded system type. No code plug is necessary when refreshing the MTC 3600 with the latest shipping software.

1. **T6358** SMARTNET Single Site (Analog) Software Refresh
2. **T6881** SMARTNET Single Site (ASTRO) Software Refresh
3. **T6973** SMARTNET Simulcast Prime Software Refresh
4. **T6360** Simulcast Remote Site (ReSC) Software Refresh (SMARTNET and SmartZone)
5. **T6356** SmartZone Non-simulcast Software Refresh
6. **T6651** SmartZone Simulcast Prime Software Refresh

System Migration Ordering Requirements

System Migration allows for a fielded MTC 3600 system to change to a new system type or configuration. Examples of system migration include migration from SMARTNET Single Site to SMARTNET Simulcast, migration from analog operation to ASTRO or Mixed Mode, and migrating a system from seven channels to 14. All MTC 3600 system migration orders should be placed with the SQM01SUM0146 as the main line item. See additional ordering requirements below.

1. All system and/or MTC 3600 upgrades or migrations should be done through the Upgrade Operations group. Please contact [Upgrade Operations](#) for a quote to upgrade or migrate a fielded system.
2. MTC 3600 upgrades or migrations should be ordered by using SQM01SUM0146 as the main line item. Please contact Upgrade Operations for order and pricing details.
3. The MTC 3600 Upgrade model - SQM01SUM0146 - will automatically be placed on D4 hold in order to ensure Upgrade Operations involvement in the MTC 3600 controller upgrade/migration. This is to ensure that the upgrade process is followed correctly, including correct options are ordered, the TDR is updated, and a new code plug is programmed.
4. If a migration from the 6809-based SMARTNET controller to the MTC 3600 controllers is desired, new base station cables will be required. A list of cables and a cable matrix is available and viewable from this website. Please see the appendices of the Installation and Configuration manuals under [MTC 3600 Documentation](#) All cables can be purchased from the Accessories and Aftermarket Division at 1-800-422-4210.
5. There are three variations of channel capacity options available, depending on the type of controller fielded.
 - MTC 3600 Stand Alone or Simulcast Prime Controllers (SMARTNET and SmartZone): D391AP - 7 Channels, D392AQ - 14 Channels, and D611AK - 21 Channels.
 - MTC 3600 Remote Simulcast Controllers (SMARTNET and SmartZone): D391AO - 7 Channels, D392AN - 14 Channels, and D611AJ - 21 Channels.
 - MTC 3600 Remote Simulcast Controllers with Receive-only sites (SMARTNET and SmartZone): D391AR - 7 Channels, D392AR - 14 Channels, and D611AM - 21 Channels.

Link Status Board Upgrade Ordering Requirements

Link Status Board upgrades are now achieved by ordering a T6813. This includes the link status board and the necessary cable. However it does NOT include the software. In order for the link status board to work properly, be sure your MTC 3600 has one of the following software versions or better.

- SMARTNET 3.1 - R20.03.23
- SMARTNET 3.2 - R30.01.07
- 4.1 SmartZone/SmartZone OmniLink, 3.0 SmartZone, 3.5 - R35.02.10

MONTHLY PATCHING SECURITY UPDATE SERVICE (SUS)

The Defense Information Systems Agency (DISA) now requires DHS/DoD Agencies to update their systems w/ current security patches on a monthly cadence.

Once tested, Motorola will post the updates to a secured extranet website and send an email notification to the customer. If there are any recommended configuration changes, warnings, or workarounds, Motorola will provide detailed documentation along with the updates on the website. Customer will be responsible for the download and deployment of these updates to their ASTRO System.

Monthly Patching SUS includes: Windows, Adobe, Open JDK, Oracle Java, IDS Signature Updates, Dot Hill, HP Service Pack for ProLiant, McAfee, PostgreSQL, ESXi, RHEL, SQL Server, DAS, and QNAP Firmware.

For more information, contact your Motorola representative

Ordering Requirements

Applicable to an ASTRO 7.17.2 system release. Complete the Quote Tool for all applicable pricing.

Benefits

- Maintain Compliance
- Protect Continuity of System Operations
- Minimize Risk and Cost
- Increased network availability
- Reduce the vulnerabilities addressed by security patches and increase the safeguards of confidentiality, integrity, and availability of mission-critical systems.
- Reduced maintenance costs
- Dramatically reduce potential for system downtime; resulting in fewer maintenance costs to restore the system back to proper operational state.
- Assurance
- Motorola assumes responsibility to verify security updates without unnecessary burden to

your staff.

- Better use of technical resources
- Keep staff focused on core responsibilities relying on Motorola to deliver the expertise and support for a proper cybersecurity regimen.

Satellite Receiver
UHF (403-524)
800MHz (806-870)
900MHz(896-940)
VHF(136-174)

Ordering Information

General Information

- **MTR3000 Satellite Receiver operates in Analog Conventional operation only**
- **MTR3000 Satellite Receiver can also be used as Digital Voting Satellite Receiver**
- RoHS (Restriction of Hazardous Substances) Compliant
- Come standard with a basic install/ service and user manual
- Come standard with a wireline board
- Switching power supply functions for over a wide range of voltages and frequencies
- **NEW IMPROVED WARRANTY - TWO Year Motorola Standard Warranty**

Ordering Requirements

- Order a quantity of one T7713A per line item.
- You must enter the exact customer frequencies at the time order is placed.
- Customer Programming Software (CPS) is required to program.

- Preselector is optional for the MTR3000 Satellite Receiver - Refer to the Product Planner/Sales Ordering Guide for Further rules.
- AC cable comes standard. The DC cable is optional.

**Please refer to Motorola Online Resource Center for further product level information and technical configuration/Ordering requirements

MOSCAD NFM - Network Fault Management

Ordering Information

General Information

MOSCAD NFM (Network Fault Management) is an ASTRO sub-system consisting of SDM3000 hardware, Client Server Hardware & Software, Operator GUI Software and System Configuration Software. The MOSCAD NFM application provides customers with the capability to remotely monitor the status of infrastructure communications equipment located at RF sites distributed throughout an ASTRO system. Faults, failures, status, and metering information are automatically detected and sent to the MOSCAD GMC/GWS Server/Client system and the ASTRO UEM. The MOSCAD GMC/GWS also supports configuration and control capability of site equipment according to the capabilities of that equipment.

The SDM3000 Unit is designed for the A7.x ASTRO platform and ships with ASTRO A7.x systems. The NFM XC Unit is designed for the A4.1 and SmartNet platforms. The NFM XC Unit can be "dragged" forward up until an ASTRO A7.13 system however the NFM XC does not support IA (Information Assurance) requirements and does not support the G-Series site equipment. Guidance from ASTRO business planning is to replace the NFM XC with the SDM3000 when the Quantar Stations are replaced with the GTR Stations. SDM3000 Units and NFM XC Units can exist in the same ASTRO A7.x system and zone for existing systems, however, the NFM XC is no longer available starting in 2013. Therefore, the IP Gateway is also no longer available and has been replaced by the SNT.

Note: Starting A7.14, the NFM XC is not supported and only the SDM3000 will be supported.

MCC7500 AUX I-O utilizes the SDM3000 Basic unit with appropriate system release firmware option. More information can be found under the MCC7500 link.

For equipment list questions, please contact your system planner.

Ordering Requirements

Note: ALL NEW MOSCAD NFM systems must ship through CCSI

The MOSCAD NFM system consists of the following orderable elements:

1 - SDM3000 RTU (Site Manager Advanced), ASTRO firmware based on release, power option, punch block option.

NOTE: Licenses are ordered for each SDM3000 RTU.

2 - Licenses:

The SDM3000 interfaces to a wide variety of devices at each site.

2a - The RTU license option is ALWAYS required. Order Qty. 1 F2463

RTU_PER_DEVICE_SW_LICENSES per SDM3000 RTU.

Select device license options with quantities matching the quantity of each device the SDM3000 interfaces to at that site. This allows an ST to view alarms from all selected devices. If alarms will only be sent to the UEM, only the RTU License option is required.

2b - The GMC License option is ONLY required when the alarms must be sent to the GMC Manager. Order Qty. 1 F4528 GMC_PER_DEVICE_SW_LICENSES per SDM3000 RTU.

The GMC device license options and quantities should match the RTU license options and quantities. Order total number of options for devices interfacing to the SDM3000 which will be supported by the GMC.

3 - SDM3000 Expansion unit, power option, punch block option

4 - SNT SDM Network Translator (Site Manager Advanced), SNT firmware based on release, power option

The SNT replaces the IP Gateway starting with the ASTRO A7.5 release. When upgrading to ASTRO A7.5 and above follow these guidelines:

- If the system consists of SDM3000 units only, replace the IP Gateway with the SNT (SDM Network Translator).
- If the system consists of XC units only, do NOT replace the IP Gateway with the SNT (SDM Network Translator).
- If the system consists of both XC units and SDM units, the existing IP Gateway will be used with the XC units and a new SNT (SDM Network Translator) will be required for the SDM units.

5 - GMC Manager and Software

5a - Release - A7.8 and earlier

- ML110G-Series Win2003 HP Server
- MOSCAD NFM Application S/W. Version based on ASTRO release
- InTouch S/W. Version supported on ASTRO release
- Symantec Anti Virus S/W supported on ASTRO release
- Microsoft SQL2005 S/W
- HyperACCESS S/W. Needed when remote configuration of TeNSr Channel Banks is required
- Serial / IP S/W. Needed when remote configuration of analog Quantar Stations is required

5b - Release - A7.9/11

The GMC Manager is virtualized on the Common Platform Hardware for the ASTRO A7.9 release.

This means that all required software which was included in pre-A7.9 releases (except SCADAAlarm) is bundled in one Virtual Appliance item number.

This also means that in the M-Core and L-Core systems the GMC application and all software will be installed on the Common Platform Hardware.

In K-Core there is no Common Platform Hardware so the option to order the rack server hardware must be selected.

- M1/M2/M3 Core - GMC Virtual Appliance software
- L Core - GMC Virtual Appliance software

- K Core and IP non-ASTRO - GMC Virtual Appliance software and DL360 hardware option

5d - Release - A7.12

The GMC Manager is only released for K-Core, IP non-ASTRO, and A3.1.

(For reference, ASTRO 3.1 refers to non-core non-IP systems infrastructure, which can be conventional digital, conventional analog or conventional mixed mode. This is the conventional architecture that shipped prior to ASTRO 25 7.X. See additional details in the A7.12 GMC Manager system planner.)

All required software which was included in pre-A7.9 releases (except SCADAAlarm) is bundled in one Virtual Appliance item number.

In K-Core there is no Common Platform Hardware so the option to order the rack server hardware must be selected.

- K Core and IP non-ASTRO - GMC Virtual Appliance item and DL360 server option (selected from MOSCAD NFM Price Page)
- A3.1 - GMC Virtual Appliance item and DL360 server option and Terminal Server (selected from MOSCAD NFM Price Page)

5e - Release - A7.13

The GMC Manager is released for M/L/K-Core, IP non-ASTRO, and A3.1.

(For reference, ASTRO 3.1 refers to non-core non-IP systems infrastructure, which can be conventional digital, conventional analog or conventional mixed mode. This is the conventional architecture that shipped prior to ASTRO 25 7.X. See additional details in the A7.13 GMC Manager system planner.)

All required software which was included in pre-A7.9 releases (except SCADAAlarm) is bundled in one Virtual Appliance software number.

M1/M2/M3 Cores

- Order as an option to the NEW M1/M2/M3 Master Site Core Part Number (SQM01SUM0226A), add option CA02102AA - ADD: MOSCAD NFM VIRT APPL A7.13 (\$28,453)
- Order as an option to the DSR M-3 Master Site Core Part Number (SQM01SUM0231A), CA02102AA - ADD: MOSCAD NFM VIRT APPL A7.13 (\$28,453)
- Order as an option to the ADD-ON M1/M2/M3 Master Site Core Part Number (SQM01SUM0239A) CA02102AA - ADD: MOSCAD NFM VIRT APPL A7.13 (\$28,453)
- Order as an option to the UPGRADE M1/M2/M3 Master Site (SQM01SUM0239A) CA02155AA - ADD: MOSCAD NFM VIRT APPL A7.13 (\$12,800)

L1/L2 Cores

- Order as an option to the NEW L1 Master Site Core Part Number (SQM01SUM0235), add option CA02102AA - ADD: MOSCAD NFM VIRT APPL A7.13 (\$28,453)
- Order as an option to the NEW L2 Master Site Core Part Number (SQM01SUM0234), add option CA02102AA - ADD: MOSCAD NFM VIRT APPL A7.13 (\$28,453)
- Order as an option to the UPGRADE L1/2 Master Site Core Part Number (SQM01SUM0240), add option CA02155AA - ADD: MOSCAD NFM VIRT APPL A7.13 (\$12,800)
- Order as an option to the ADD-ON L1/2 Master Site Core Part Number (SQM01SUM0240), add option CA02102AA - ADD: MOSCAD NFM VIRT APPL A7.13 (\$28,453)

K1/K2 Cores

- Order as an option to the K1 Master Site Core Part Number (SQM01SUM0237A), add

- option CA01992AA - ADD: MOSCAD NFM VIRT APPL A7.13 (\$28,453)
- Order as an option to the K2 Master Site Core Part Number (SQM01SUM0236A), add option CA01992AA - ADD: MOSCAD NFM VIRT APPL A7.13 (\$28,453)

Non ASTRO Cores

- IP non-ASTRO - Select GMC Virtual Appliance item and DL360 server option (selected from MOSCAD NFM Price Page)
- A3.1 - Select GMC Virtual Appliance item and DL360 server option and Terminal Server (selected from MOSCAD NFM Price Page)

5f - Release - A7.14 and beyond

Please refer to the 7.17 Fault Management Ordering Guide: <https://converge.motorolasolutions.com/groups/astro25-network-managemen/overview>

6 - GWS Client and Software

6a - Release - A7.8 and earlier

- Z400 Series Vista HP Client
- InTouch S/W. Version supported on ASTRO release
- Symantec Anti Virus S/W supported on ASTRO release

6b - Release - A7.9/11/12

- Z400 Series Vista HP Client (A7.9)
- Z400 Series Win7 HP Client (A7.11)
- InTouch S/W. Version supported on ASTRO release
- Symantec Anti Virus S/W supported on ASTRO release
- HyperACCESS S/W. Needed when remote configuration of TeNSr Channel Banks is required
- Serial / IP S/W. Needed when remote configuration of analog Quantar Stations is required
- SCADALARM Paging S/W with Modem

6c - Release - A7.13/14/15/16

- Z420 Series Win7 HP Client (A7.11)
- InTouch S/W. Version supported on ASTRO release
- McAfee Anti Virus S/W supported on ASTRO release
- HyperACCESS S/W. Needed when remote configuration of TeNSr Channel Banks is required
- Serial / IP S/W. Needed when remote configuration of analog Quantar Stations is required
- SCADALARM Paging S/W with Modem

The [Network Management Wiki Site](#) always has the most up to date MOSCAD NFM

ordering guides.

Key items to ensure the correct software is received for a new release

- Refresh quotes older than 90 days to ensure model numbers are current!
- Select "Ship Partial" when ordering to allow hardware to ship before software.
- Always check the [SIO Wiki Site](#) for the most up to date MOSCAD NFM ordering guides.

OPTIONS for SDM3000 and R-MUX

Add options as defined in the Ordering Guides located at [SIO Wiki Site](#) to assist in choosing valid options.

SDM3000 Power Supply Options for RTU, AUX I-O & SNT

Description	Full Description	Nomenclature	APC	Price
ADD:24/48 VDC PS TO SM	-	VA00905	469	\$120.00
ADD: 90VAC TO 260VAC PS TO SM	This option includes the FKN8266 power cord when shipped to North America. When shipped outside North America the field must supply the applicable power cord.	V266	469	\$120.00

SDM3000 Punch Block Termination for RTU and AUX I-O

Description	Full Description	Nomenclature	APC	Price
AAD TERM BLCK & CONN WI	This is the punch block termination for use with the SDM3000 F4543 & F4544 units, the SDM IO Expansion F4547 & F4548 units, and the NFM XC I/O F4551 & F4550 units. The punch block is ordered with the V592 option or the FHN1668 field add on kit. This option requires a quantity of three for each unit ordered.	V592	469	\$90.00

Terminal Server required A3.1 non-IP non-ASTRO solutions

Description	Full Description	Nomenclature	APC	Price
TERMINAL SERVER	(16 Port)	T7385	147	\$6,500.00

R-MUX Options

--	--	--	--	--

Description	Full Description	Nomenclature	APC	Price
ADD : 4OUT TO R-MUX	This option adds 4 additional serial RS-232 ports to the R-MUX 1001 or 4 additional serial RS-232 with a multiplex port for the R-MUX 1004. A quantity of 2 of this option (max per model qty of 1) provides 8 additional serial ports for the R-MUX 1001 and 2 sets of 4 serial ports, each set with a multiplex port.	V582	469	\$300.00
ADD : IP INTERFACE TO R-MUX	This option adds a stand alone IP interface with an RS-232 serial port to the R-MUX models. Max of one per R-MUX unit.	V527	469	\$440.00

MOSCAD NFM - Network Fault Management

Ordering Information

General Information

MOSCAD NFM (Network Fault Management) is an ASTRO sub-system consisting of SDM3000 hardware, Client Server Hardware & Software, Operator GUI Software and System Configuration Software. The MOSCAD NFM application provides customers with the capability to remotely monitor the status of infrastructure communications equipment located at RF sites distributed throughout an ASTRO system. Faults, failures, status, and metering information are automatically detected and sent to the MOSCAD GMC/GWS Server/Client system and the ASTRO UEM. The MOSCAD GMC/GWS also supports configuration and control capability of site equipment according to the capabilities of that equipment.

The SDM3000 Unit is designed for the A7.x ASTRO platform and ships with ASTRO A7.x systems. The NFM XC Unit is designed for the A4.1 and SmartNet platforms. The NFM XC Unit can be "dragged" forward up until an ASTRO A7.13 system however the NFM XC does not support IA (Information Assurance) requirements and does not support the G-Series site equipment. Guidance from ASTRO business planning is to replace the NFM XC with the SDM3000 when the Quantar Stations are replaced with the GTR Stations. SDM3000 Units and NFM XC Units can exist in the same ASTRO A7.x system and zone for existing systems, however, the NFM XC is no longer available starting in 2013. Therefore, the IP Gateway is also no longer available and has been replaced by the SNT.

Note: Starting A7.14, the NFM XC is not supported and only the SDM3000 will be supported.

MCC7500 AUX I-O utilizes the SDM3000 Basic unit with appropriate system release firmware option. More information can be found under the MCC7500 link.

For equipment list questions, please contact your system planner.

Ordering Requirements

Note: ALL NEW MOSCAD NFM systems must ship through CCSI

The MOSCAD NFM system consists of the following orderable elements:

1 - SDM3000 RTU (Site Manager Advanced), ASTRO firmware based on release, power option, punch block option.

NOTE: Licenses are ordered for each SDM3000 RTU.

2 - Licenses:

The SDM3000 interfaces to a wide variety of devices at each site.

2a - The RTU license option is ALWAYS required. Order Qty. 1 F2463 RTU_PER_DEVICE_SW_LICENSES per SDM3000 RTU.

Select device license options with quantities matching the quantity of each device the SDM3000 interfaces to at that site. This allows an ST to view alarms from all selected devices. If alarms will only be sent to the UEM, only the RTU License option is required.

2b - The GMC License option is ONLY required when the alarms must be sent to the GMC Manager. Order Qty. 1 F4528 GMC_PER_DEVICE_SW_LICENSES per SDM3000 RTU. The GMC device license options and quantities should match the RTU license options and quantities. Order total number of options for devices interfacing to the SDM3000 which will

be supported by the GMC.

3 - SDM3000 Expansion unit, power option, punch block option

4 - SNT SDM Network Translator (Site Manager Advanced), SNT firmware based on release, power option

The SNT replaces the IP Gateway starting with the ASTRO A7.5 release. When upgrading to ASTRO A7.5 and above follow these guidelines:

- If the system consists of SDM3000 units only, replace the IP Gateway with the SNT (SDM Network Translator).
- If the system consists of XC units only, do NOT replace the IP Gateway with the SNT (SDM Network Translator).
- If the system consists of both XC units and SDM units, the existing IP Gateway will be used with the XC units and a new SNT (SDM Network Translator) will be required for the SDM units.

5 - GMC Manager and Software

5a - Release - A7.8 and earlier

- ML110G-Series Win2003 HP Server
- MOSCAD NFM Application S/W. Version based on ASTRO release
- InTouch S/W. Version supported on ASTRO release
- Symantec Anti Virus S/W supported on ASTRO release
- Microsoft SQL2005 S/W
- HyperACCESS S/W. Needed when remote configuration of TeNSr Channel Banks is required
- Serial / IP S/W. Needed when remote configuration of analog Quantar Stations is required

5b - Release - A7.9/11

The GMC Manager is virtualized on the Common Platform Hardware for the ASTRO A7.9 release.

This means that all required software which was included in pre-A7.9 releases (except SCADAAlarm) is bundled in one Virtual Appliance item number.

This also means that in the M-Core and L-Core systems the GMC application and all software will be installed on the Common Platform Hardware.

In K-Core there is no Common Platform Hardware so the option to order the rack server hardware must be selected.

- M1/M2/M3 Core - GMC Virtual Appliance software
- L Core - GMC Virtual Appliance software
- K Core and IP non-ASTRO - GMC Virtual Appliance software and DL360 hardware option

5d - Release - A7.12

The GMC Manager is only released for K-Core, IP non-ASTRO, and A3.1.

(For reference, ASTRO 3.1 refers to non-core non-IP systems infrastructure, which can be conventional digital, conventional analog or conventional mixed mode. This is the conventional architecture that shipped prior to ASTRO 25 7.X. See additional details in the A7.12 GMC Manager system planner.)

All required software which was included in pre-A7.9 releases (except SCADAAlarm) is bundled in one Virtual Appliance item number.

In K-Core there is no Common Platform Hardware so the option to order the rack server hardware must be selected.

- K Core and IP non-ASTRO - GMC Virtual Appliance item and DL360 server option (selected from MOSCAD NFM Price Page)

- A3.1 - GMC Virtual Appliance item and DL360 server option and Terminal Server (selected from MOSCAD NFM Price Page)

5e - Release - A7.13

The GMC Manager is released for M/L/K-Core, IP non-ASTRO, and A3.1.

(For reference, ASTRO 3.1 refers to non-core non-IP systems infrastructure, which can be conventional digital, conventional analog or conventional mixed mode. This is the conventional architecture that shipped prior to ASTRO 25 7.X. See additional details in the A7.13 GMC Manager system planner.)

All required software which was included in pre-A7.9 releases (except SCADAAlarm) is bundled in one Virtual Appliance software number.

M1/M2/M3 Cores

- Order as an option to the NEW M1/M2/M3 Master Site Core Part Number (SQM01SUM0226A), add option CA02102AA - ADD: MOSCAD NFM VIRT APPL A7.13 (\$28,453)

- Order as an option to the DSR M-3 Master Site Core Part Number (SQM01SUM0231A), CA02102AA - ADD: MOSCAD NFM VIRT APPL A7.13 (\$28,453)

- Order as an option to the ADD-ON M1/M2/M3 Master Site Core Part Number (SQM01SUM0239A) CA02102AA - ADD: MOSCAD NFM VIRT APPL A7.13 (\$28,453)

- Order as an option to the UPGRADE M1/M2/M3 Master Site (SQM01SUM0239A) CA02155AA - ADD: MOSCAD NFM VIRT APPL A7.13 (\$12,800)

L1/L2 Cores

- Order as an option to the NEW L1 Master Site Core Part Number (SQM01SUM0235), add option CA02102AA - ADD: MOSCAD NFM VIRT APPL A7.13 (\$28,453)

- Order as an option to the NEW L2 Master Site Core Part Number (SQM01SUM0234), add option CA02102AA - ADD: MOSCAD NFM VIRT APPL A7.13 (\$28,453)

- Order as an option to the UPGRADE L1/2 Master Site Core Part Number (SQM01SUM0240), add option CA02155AA - ADD: MOSCAD NFM VIRT APPL A7.13 (\$12,800)

- Order as an option to the ADD-ON L1/2 Master Site Core Part Number (SQM01SUM0240), add option CA02102AA - ADD: MOSCAD NFM VIRT APPL A7.13 (\$28,453)

K1/K2 Cores

- Order as an option to the K1 Master Site Core Part Number (SQM01SUM0237A), add option CA01992AA - ADD: MOSCAD NFM VIRT APPL A7.13 (\$28,453)

- Order as an option to the K2 Master Site Core Part Number (SQM01SUM0236A), add option CA01992AA - ADD: MOSCAD NFM VIRT APPL A7.13 (\$28,453)

Non ASTRO Cores

- IP non-ASTRO - Select GMC Virtual Appliance item and DL360 server option (selected from MOSCAD NFM Price Page)

- A3.1 - Select GMC Virtual Appliance item and DL360 server option and Terminal Server (selected from MOSCAD NFM Price Page)

5f - Release - A7.14 and beyond

6 - GWS Client and Software

6a - Release - A7.8 and earlier

- Z400 Series Vista HP Client
- InTouch S/W. Version supported on ASTRO release
- Symantec Anti Virus S/W supported on ASTRO release

6b - Release - A7.9/11/12

- Z400 Series Vista HP Client (A7.9)
- Z400 Series Win7 HP Client (A7.11)
- InTouch S/W. Version supported on ASTRO release
- Symantec Anti Virus S/W supported on ASTRO release
- HyperACCESS S/W. Needed when remote configuration of TeNSr Channel Banks is required
- Serial / IP S/W. Needed when remote configuration of analog Quantar Stations is required
- SCADALARM Paging S/W with Modem

6c - Release - A7.13/14/15/16

- Z420 Series Win7 HP Client (A7.11)
- InTouch S/W. Version supported on ASTRO release
- McAfee Anti Virus S/W supported on ASTRO release
- HyperACCESS S/W. Needed when remote configuration of TeNSr Channel Banks is required
- Serial / IP S/W. Needed when remote configuration of analog Quantar Stations is required
- SCADALARM Paging S/W with Modem

The [Network Management Wiki Site](#) always has the most up to date MOSCAD NFM ordering guides.

Key items to ensure the correct software is received for a new release

- Refresh quotes older than 90 days to ensure model numbers are current!
- Select "Ship Partial" when ordering to allow hardware to ship before software.
- Always check the [SIO Wiki Site](#) for the most up to date MOSCAD NFM ordering guides.

Network Monitoring Service

Ordering Information

General Information

Network Monitoring Operations (NMO) provides real-time fault monitoring and diagnostics capabilities for a customer's network on a consistent, continuous basis. NMO utilizes multiple hardware and software tools for remote monitoring, event characterization, and restoration of their communications networks. When an event is detected, NMO technologists acknowledge and assess the situation, conduct remote diagnostic routines, and initiate an effective response. Such responses could include, but are not limited to, continuing to monitor the event for further developments; attempting remote restoration; or transferring the event information via a case report to Technical Support to better define the event or dispatch a local service technician. The service technician will respond to the customer site based on pre-determined severity levels and response times and NMO maintains contact with the on-site service technician until the system is restored and the case is closed.

Features

- Customer Support Management
- Remote Diagnostic & Monitoring
- 24 Hour Monitoring of System
- Escalation Management
- Report Metrics
- 24 Hour/365 Day Service Availability

Statement of Work

The customer Statement of Work for this Standard Service Product **CANNOT** be modified. All requests for modifications to STANDARD service products or the development of "custom" service products should be routed through the Solutions Planning process. Your first point of contact for these requests is your local Area Service Manager.

Network Monitoring and Customer Technician Dispatch Service

Ordering Requirements

1. This product must be ordered using the Services Lifecycle (SLC) contract system. Please contact your local Area Service Manager (ASM) or Customer Support Manager (CSM) if you are interested in ordering this product.
2. Options for this product are based on the component parts of the complete system. Pricing is based on the size and complexity of the customer's system configuration such as the type of system, number of sites and number of base stations. **To ensure accurate pricing, orders will not be processed or accepted if they do not include all system components.**
3. Technology must be correct in Install Base in order to price.
4. Enter the main line item as quantity one.
5. Options are required as sub-items, with the quantity equal to the option description.
6. All dollar amounts reflect an annual one year pricing.
7. A Customer Support Plan must be created to provide detailed information to the customer regarding delivery of this service.

Network Preventive Maintenance Service

Ordering Information

Executive Summary

Network Preventive Maintenance is a service that will provide an operational test and alignment, as applicable, on the customer's equipment (infrastructure or fixed network equipment only) to ensure the equipment meets original manufacturer's specifications.

Motorola's large network of service helps the customer plan and schedule the annually preventative maintenance of their network to meet their operational timelines.

Network Preventive Maintenance assures that the customer's network is up and running in top condition. This service proactively detects those potential issues that may result if the equipment is not meeting original manufacturer's specifications. Customers can help prevent a system malfunction and minimize their costly repairs, thus managing their maintenance budget.

Motorola's technicians have immediate access to engineering design teams and multiple technology experts. The technicians are equipped with detailed checklists describing what and how the pieces of equipment need servicing. The customer can take advantage of the Network Preventative Maintenance service to maximize their network uptime.

Over 600 customers have entrusted their network support to Motorola with the Network Preventive Maintenance service. Many of these customers (Federal, State & Local Government, Police & Fire entities, etc) rely on this service to keep their systems performing consistently. Enhance the value of Motorola's service offerings by offering the customer such complementary services as Technical Support, OnSite Infrastructure Response, Infrastructure Repair, Network Monitoring, or many others.

Features

- Trained Technical Expertise on-site
- Provides interface to Motorola
- Access to local Motorola servicer
- Preventative Maintenance Check

Statement of Work

One of the primary business objectives of the North American Group (NAG) is to promote the sales of STANDARD service products. Standards help to ensure consistent and profitable delivery of our service products to our customers. To that end, the customer Statement of Work for this Standard Service Product **CANNOT** be modified. All requests for modifications to STANDARD service products or the development of "custom" service

products should be routed through the Solutions Planning process. Your first point of contact for these requests is your local Area Service Manager.

Network Products Routers

Important notice:

The below Juniper router models for sites, T8547A, T8492A, T8493A and associated options are only certified with A7.18 expansions and new A2019.X and as such **MUST** connect up to a Juniper product in the core.

All new A7.18 will ship with GGM 8000 through 09/30/2019 (Q3 2019) as the site and core router. Any expansions to A7.18 systems are certified only with Junipers.

From A7.18 and later releases, all the new Hub sites (CSUB/TSUB, Prime Sites, K core etc) will ship with SRX1500 instead of SRX345 until further notice, please check back with this ordering guide regularly

Ordering Information

Please refer to the Ordering Guide for Juniper products, DCG 9000 Dynamic Conventional Gateway and GGM 8000: [Ordering Guide](#)

FRU: GGM 8000 HD ENH CONV GATEWAY MODULE	8 port CCGW for Astro releases 7.12 and later	TYN4011B	454	\$6,000.00
FRU: GGM 8000 EXPANDER MODULE	-	TYN4005	454	\$1,200.00
FRU: GGM 8000 ROUTER MODULE	Base router with the USB port. EOS compatible with A7.9 or A7.11 only. For newer releases order TYN4001.	TYN4006	454	\$4,050.00

FRU: GGM 8000 ROUTER MOD-ENCRYPTION ENABLED	Encrypted base router with USB port. EOS compatible with A7.9 or A7.11 only. For newer releases order TYN4010.	TYN4009	454	\$5,550.00
FRU: GGM 8000 FLEXWAN MODULE	-	TYN4007	454	\$1,000.00
FRU: FIPS 140-2 LEVEL 2 ENCRYPTION CERT LABELS	-	TYN4008	454	\$500.00
FRU: GGM 8000 AC MODULE	-	TPN6210	454	\$750.00
FRU: GGM 8000 DC MODULE	-	TPN6211	454	\$750.00

S6000 MNR Multi-Protocol Router

Intent to Cancel

The S6000 Motorola Network Gateway model, options, and FRU kits are scheduled for cancellation. The last date to place an order for new systems is September 29, 2017, orders must ship by December 29, 2017. FRUs available for system expansions through 12/31/2019. Please refer to the published cancellation notice for additional details:

Ordering Information

General Information

Please refer to the [3rd Party Drop Ship Wiki](#) for vendor information and more specific product detail.

TRAK 9100 Product

DSTRAK91008E Redundant Modular Frequency/Time System

The following components are included in the Model 9100-8. Module model numbers are listed for reference. Band-pass antenna, 100 ft LMR-400 coaxial cable, ground kit, and lightning arrestor are included with each 9101 GPS Reference module.

Configured for AC Power input. Add DSTRAK91008EDC to switch unit to 48Vdc (no change in price).

TRAK Model Number

Description

9100 MF	Main Frame, 3U chassis
9101-15	GPS Reference, with rubidium oscillator
9101-16	GPS Reference, with double oven xtal oscillator
9120-2 (2 each) or 9121 (2 each)	AC input power supplies (85-260Vac), 9100-8 DC input power supplies (48 Vdc nominal)
9106-1 (4 each)	DDM, 1 PPS, 5 MPPS, or Composite dist., 4 outputs of one signal type, each module
9107-1	FDM, IRIG-B time code dist., 4 outputs
9111-1	Telecom, T1, 4 outputs framed and clock

DSTRAK91009E Redundant Modular Frequency/Time System **must add Distribution modules when ordering, see below

The following components are included in the Model 9100-9. Module model numbers are listed for reference. Band-pass antenna, 100 ft LMR-400 coaxial cable, ground kit, and lightning arrestor are included with each 9101 GPS Reference module. The Model 9100-9 contains no distribution modules. Quantity and type must be specified.

Configured for AC power input. Add DSTRAK91009EDC to switch

unit to 48Vdc (no change in price).

TRAK Model Number	Description
9100 MF	Main Frame, 3U chassis
9101-15	GPS Reference, with rubidium oscillator
9101-16	GPS Reference, with double oven xtal oscillator
9120-2 (2 each) or 9121 (2 each)	AC input power supplies (85-260Vac) DC input power supplies (48 Vdc nominal)

The Model 9100-9 accepts a total of six each of the following modules. Any type module may be used in any of the six distribution positions. Select from the following module list:

DSTRAK91061	DDM, 1 PPS, 5 MPPS, or Composite dist., 4 outputs of one signal type, each module
DSTRAK91071	FDM, IRIG_B time code dist., 4 outputs
DSTRAK91111	Telecom, T1, 4 outputs framed and clock

DSTRAK92003 Digital Distribution Unit **must add distribution modules, see below.

The Model 9200-3 is used for expanding digital distribution of the Model 9100 series. The following components are included in the Model 9200-3. Module model numbers are listed for reference. Interconnecting signal cable is supplied. The Model 9200-3 contains no distribution modules. Quantity and type must be specified.

Configured for AC power input. Add DSTRAK92003DC to switch unit to 48Vdc (no change in price).

TRAK Model Number	Description
9200 MF	Main Frame, 3U chassis
9150-1	Terminator and Fault Logic
9120-3 (2 each) or 9121-4 (2 each)	AC input power supplies (85-260Vac) DC input power supplies (48 Vdc nominal)

The Model 9200-3 accepts a total of fourteen each of the following modules. Any type module may be used in any of the fourteen distribution positions. Select from the following module list:

DSTRAK91061	DDM, 1 PPS, 5 MPPS, or Composite dist., 4 outputs of one signal type, each module
DSTRAK91111	Telecom, T1, 4 outputs framed and clock

For more information on TRAK products, please see the [TRAK website](#).

**INFORMATION ASSURANCE (IA)
ASTRO 25® SYSTEMS
A7.15 - A2019.1**

Ordering Information

General Information

Radio communication systems have evolved from simple analog systems that handled voice transmissions to interconnected networks that utilize computer-based digital IP technology to process both voice and data communications. These advancements have resulted in new security concerns that are more commonly associated with Information Systems. The interactions across networked systems can dramatically magnify the damages resulting from even simple security violations. Organizations need assurance that their communication systems can be relied upon and trusted, even in the most demanding situations.

Automated attack tools and malicious agents that can inflict serious damage to a radio communication network are rapidly growing in levels of sophistication. Security vulnerabilities can be exploited, resulting in enough damage to the valuable system information and communication assets to degrade or disable system operations and place field personnel at risk.

Information Assurance involves maintaining information privacy, protecting information soundness, and ensuring that information is accessed only by those who are authorized in a manner consistent with policy. Organizations need to expect attacks and design their system with detection and prevention tools and procedures that will allow them to react and recover. An Information Assurance strategy is critical for safeguarding a system investment.

The Information Assurance functionality offered with ASTRO 25 systems can be enhanced with best practice service offerings. Please refer to the Security Services section of the price book for more information.

All ASTRO 25 Systems include the following standard Information Assurance functionality. These features require configuration that is based on a customer's preferences, which should be discussed with the customer prior to staging.

Securing Protocols with Secure Shell (SSH) - The ASTRO 25 system consists of many components that communicate with each other using a variety of standard protocols. In some cases, these protocols are not secure, which can result in various levels of risk to the network. The highest amount of risk is associated with protocols that pass authentication parameters (i.e., passwords) in the clear. Capturing this information by sniffing the network can lead to unauthorized access to a device, which could severely compromise data and network security. Secure Shell (SSH) addresses this threat by providing a secure point-to-point connection between two different machines, where the connection is encrypted and

both ends have been authenticated. The reduction of clear protocol usage is necessary to sustain Authority to Operate (ATO) certification for U.S. Federal systems and is increasingly identified as a mandatory system requirement for non-federal systems.

Router Access Control Lists (ACLs) - System routers inspect network traffic and control which packets will be forwarded or blocked at the router interface, based on the customers specified configuration criteria. Unauthorized traffic is prevented from crossing network boundaries, which ensures that only permitted traffic can transverse the network. Filtering is employed at core, exit, gateway, and site routers to enhance the security of the network. Please note that Router ACLs will prohibit certain functionality at remote (non-Core) network management clients. This should be discussed with the customer prior to staging.

Ethernet Switch Port Security - Provides a layer of security at the physical location of the equipment by preventing unauthorized access to the system through the ports on a network switch. Two methods of Ethernet Switch Port Security are available:

- **MAC Port Lockdown:** Locks the port on a network switch to one or more MAC addresses, ensuring that traffic intended for a specific device can only go through the one port which is supposed to be connected to that device.
- **802.1x capability for Service Ports:** Based on the IEEE 802.1X standard, devices that connect through a switch port must be authenticated before access to the network is allowed.

Central Authentication - The centralized Authentication, Authorization, and Accounting (AAA) feature starts with Active Directory (AD) for all Windows servers and workstations and Remote Authentication Dial-In User Service (RADIUS) services already in the radio network for infrastructure devices. The feature extends the ASTRO 25 architecture for Active Directory (AD) to Solaris and Linux platforms.

A single user account can be used to access all devices in the system, as opposed to creating and managing accounts for a user across multiple devices. The users authorization level can be centrally defined and managed, and allows confirmation of the identity of users and controlled access to the objects on the network and the operations they may perform. Records of logins are stored and managed for auditing purposes. Centrally managing this information provides a more efficient way to oversee the network. Network administrators can more effectively enforce security policies and can also remotely administer the network.

In addition, Federated Identification has been implemented between the customers Radio Network Infrastructure (RNI) and the System Support Center (SSC). This allows SSC users to access devices in customers systems using their own user accounts defined in the SSC domain based on Federated ID management, in order to more effectively service systems.

Simple Network Management Protocol version 3 (SNMPv3) - Utilizes the inherent authentication and encryption capabilities of SNMPv3 to secure the network management traffic between the network managers and the network elements.

Secure Software Download (SWDL) - The Software Download application allows users to transfer only, install only, or transfer and install new software in an ASTRO 25 Repeater subsystem, a High Performance Data (HPD) subsystem, an IP Simulcast subsystem, or a Simulcast subsystem.

The transfer only operation transfers (but does not install) new versions of software. Transfer only operations can occur at any time because the call processing is not interrupted, and users can later install the new software at a planned time.

Secure SWDL ensures that transfer operations are authenticated and encrypted, based on the Secure File-Transfer Protocol (SFTP), making it difficult for transmission to be intercepted through unauthorized access. Secure SWDL allows customer to comply with the updated Defense Information Systems Agency (DISA) Security Technical Implementation Guide (STIG) versions.

Configuration

INFORMATION ASSURANCE FEATURES

1. Element Hardening - Removes nonessential tools and utilities from the Windows Operating System, which could be used to help an attacker gain unauthorized access to system settings or data. Two types of Windows hardening are offered:

- **Transparent Hardening** - Provides best practice security for Windows to minimize security threats.
- **Full Hardening** - Provides the appropriate level of hardening for systems that require compliance with federal security standards (FISMA certification).

Platforms that utilize Solaris and Linux Operating Systems also require hardening. This does not require an orderable model; these platforms will automatically be configured with full hardening prior to shipment.

Element Hardening for Windows must be ordered and applied to every Windows device in the system. Please note that Element Hardening will enable a password-protected screen saver on all Windows devices. This should be discussed with the customer prior to staging.

Select either the Transparent Hardening or Full Hardening model; an ASTRO 25 system can be configured with only one type of hardening. Order a quantity of ONE for EVERY device (except the Common Platform Hardware at the Core, or a standalone Domain Controller see Note below) within the system that uses the Windows Operating System.

Please refer to the [ASTRO 25 Master Site](#) price pages for more details.

2. Anti-Malware - Detects and blocks malicious software including viruses, worms, Trojan horses, spyware, adware and rootkits from infiltrating the system. Anti-malware functionality is standard on all Windows and Linux devices on all L and M ASTRO platforms using McAfee and is provided with the CSMS Virtual Container.

3. Two Factor Authentication - Compliments the standard Central Authentication functionality in ASTRO 25 systems to authenticate the identity of a person or other entity attempting to access the system remotely via a VPN connection (from CEN, Internet or through DMZ terminal server). Two Factor authentication requires the user to possess a token in addition to their Active Directory credentials. For more details, please refer to [ASTRO 25 Network Product Firewalls Ordering Guide](#).

4. Firewalls - Firewalls ensure that only legitimate traffic from external networks can access the radio system. They protect the system from unauthorized connections, restrict access to known applications and protocols, and ensure that network resources cannot be accessed from external systems unless authorized. For more details, please refer to [ASTRO 25 Network Product Firewalls Ordering Guide](#).

5. Central Event Logging - The system logs security events of interest as reported by client devices such as log-in failures, changes made to the hardware and software, and failures in security elements. Information about these events is recorded on a central server so it can be retrieved and analyzed, helping a network technician detect, diagnose, and respond to possible security breaches. Central event logging also enables archiving of audit information as a requirement of many IA programs. Examples of some of the information that may be stored include login successes and failures, elevation of privileges, configuration changes, and hardware failures.

The Event Logging software is installed on a virtual container on the Common Platform Hardware at the core.

Event Logging is ordered as an option when ordering the Core. A quantity of ONE license should be ordered at every zone for customers that require this functionality.

Please refer to the [ASTRO 25 Master Site](#) price pages for more details.

6. Zone Core Protection (ZCP) Detects and blocks unauthorized packets attempting to enter the zone core which originate from remote sites or the communication links that remote sites utilize. ZCP also provides traffic filtering between zones in multi-zone system configurations. ZCP can be ordered as a system level option for M3 systems, if you have multiple zones, you need to order a set of equipment for each zone.

If ZCP is needed, you must order the following:

- a. ZCP requires TWO firewalls per zone.
- b. ZCP requires the Firewall Management Service (FortiManager).
- c. ZCP requires TWO mediation switches per zone.

Please refer to [ASTRO 25 Network Product Firewalls Ordering Guide](#) for more details.

7. Zone Core Protection (ZCP) Logging - Provides a logging server that will be used to receive and forward logs from remote site devices to the primary event logging server within the radio network infrastructure (RNI). Logs the failed attempts to access the zone core that are blocked by the Zone Core Protection feature.

The ZCP Logging software is installed on a virtual container on the Common Platform DC - SYSLOG hardware.

ZCP Logging is ordered as an option when ordering the Core. A quantity of ONE license should be ordered along with Common Platform DC.

Please refer to the [ASTRO 25 Master Site](#) price pages for more details.

8. Install, Backup & Recovery - Eliminates the need to perform local backups on individual system devices, by providing a centralized location for the management of data backup and restore operations. The data can be used to quickly return the system to a functional state following any event which causes a failure or interruption of normal service. Customers can choose between two different backup options:

- **Baseline Backup and Recovery (Baseline BAR)** - Backs up only the following BAR clients, if present in the system configuration: Network Management servers, Zone Controllers, Domain Controllers, Authentication Center servers, and the Linux-based BAR client for backing up the Baseline BAR server itself.
- **Backup and Recovery (BAR)** - Backs up additional BAR clients at the core, in addition to those included with the Baseline BAR option.

NAS: The NAS device is **always required** when either Baseline BAR or BAR is ordered to back up the ASTRO 25 system. The Backup and Restore server also allows for the creation of media that can be stored off site, which is a common requirement in standard IT disaster recovery plans.

- One NAS device is connected to only one BAR server (order at least one NAS per zone or two if DSR)
- Additional NAS devices may be order if rotation is needed. It is highly recommended to do a weekly rotation between three NAS devices

Please refer to the [ASTRO 25 Master Site](#) price pages for more details.

9. Service Access Architecture - Provides secured communications access between the Radio Network Infrastructure (RNI) and service users. Service users can perform functions such as remote control of devices, diagnostics, file transfers, security monitoring, and fault management. Secure remote access to these services allows a reduction in the cost for maintenance of the radio network and reduced response time for issue resolution.

The following primary access scenarios are supported:

- Access to the RNI through a VPN connection originating from the Internet or from the CEN. Requires VPN Client license, RNI-DMZ Firewall, and optional multi-factor tokens.

- Access to the RNI from the Motorola System Support Center (SSC) via a dedicated WAN connection. Requires RNI-DMZ Firewall.

- Access to the RNI via terminal server:

a) Out of Band Management (OOBM) Terminal Server is connected to the DMZ switch to provide access to RNI via a dial-up connection. Requires VPN Client license, RNI-DMZ Firewall, modem, and terminal server. Multi-factor tokens for the firewall VPN are optional

b) Simulcast Prime Site Terminal Server provides access to the Simulcast Prime Site devices

and the RNI via a dial-up connection. Requires modem and terminal server.

Description	Full Description	Nomenclature	APC	Price
MRV - LX4000T 8 PORT TERMINAL SERVER, NO DIAL-UP MODEM INCLD.	-	TT2022	708	\$2,700.00
NCP SECURE ENTRY CLIENT/VPN FOR WINDOWS (WIN32-64)	(For A7.15 and beyond. Juniper is not supported)	DSNEYW1	708	\$200.00

If the zone has an existing RNI-DMZ firewall this capability is configured on the existing RNI-DMZ firewall. If a firewall needs to be order for SAA, please refer to [ASTRO 25 Network Product Firewalls Ordering Guide](#).

10. Router Encryption - Safeguards all voice and data packets against unauthorized interception as they move between the core and remote sites within a zone, or across multiple zones. The packets that travel through the WAN links provided by a public network circuit provider will be encrypted, adding an extra layer of security. The transport devices at each end of a link authenticate each other. This feature complies with FIPS 140-2. NIAP certification to Common Criteria EAL 4 is in progress.

The Router Encryption feature must be configured across the entire system. This feature is required when Zone Core Protection is also ordered. Event Logging is also recommended, as this feature is useful to aid with troubleshooting Router Encryption, since any configuration changes in the router are recorded using this feature.

Encryption is ordered along with the Routers and may be ordered for Site Gateways. Router encryption may be ordered for individual gateways or integrated as part of a system under an SQM model:

- Please refer to the ASTRO 25 Network Routers Price Pages to choose an individual router with encryption: [ASTRO 25 Network Routers](#)
- For SRC (M1, M2 and M3 Cores) only please refer to: SRC 7500 Switching and Routing Center price pages
- Visit individual price pages for K, L or other products for encryption ordering instructions.

11. Radio Authentication - Prevents illegitimate radios from gaining access to the radio network. It enhances security by authenticating radios before allowing registration to the system. This feature uses the P25 link layer authentication standard (TIA 102.AACE). The Radio Authentication implementation allows the gradual activation across the subscriber base until all subscribers are provisioned for authentication.

Systems without the optional Radio Authentication feature are susceptible to cloned and otherwise unwanted radios on the system. Radio Authentication prevents these unwanted P25 radios from successfully unit registering, thus preventing them from using the services of the

system. Unregistered radios cannot listen to calls, place calls or otherwise disrupt customer operations.

When Radio Authentication is ordered, an Authentication Server (AuC) will be installed as a virtual container on the Common Platform Hardware at the core.

An option for Radio Authentication must be ordered for each subscriber that will be provisioned for authentication. In addition, Radio Authentication requires the purchase of a system level option to enable the functionality (CA02472) along with radio user licenses (JA00165AA) for the number of Radio Authentication radios in the system. These two options are ordered under the supermodel for the Core. Finally, the Radio Authentication Client Software application must also be ordered. This software can reside on a separate client terminal or it can also be installed on a network management client terminal.

Please refer to the [ASTRO 25 Master Site](#) price pages for more details.

12. Fiber Modules - Fiber Modules are available as a compensative security control. Fiber optic links prevent an unauthorized user from using a basic Ethernet analyzer with RJ45 interfaces (very common and available on laptops) to plug in and learn about MAC addresses of the devices. If fiber modules are installed its more costly and difficult for someone to jack into a port and learn information about a device.

For a remote site with dual Ethernet switches, order the following per switch: CLN8490 (quantity 2) and CKN6906 (quantity 1).

Description	Full Description	Nomenclature	APC	Price
FRU: MINI GBIC (J4858B)	-	CLN8490A	454	\$750.00
FRU: FIBER CABLE	-	CKN6906A	454	\$100.00

13. On Premises Security Ops Center (OPSOC) - Installed inside your network, Motorola's On-Premise Security Operations Center allows you to effectively monitor unusual security activities. Minimal in comparison to the investment, time, technology and resources required to establish and maintain an internally owned and operated SOC, the unsurpassed monitoring technology in Motorola's On-Premise Security Operations Center covers; Firewalls, intrusion detection sensors, authentication and logging servers, Worm, virus and other malicious activity, Network vulnerabilities, Abnormal network activity, Compromised host command and control communication, and Advanced behavioral analytics. The OPSOC features Holistic event traffic insights, Continuous monitoring, Powerful correlation performance, End-to-End intelligent alerting, Customized mission critical provisions, Automated alerting, Auto generated reports, Real-time visualization portal, and IP-autonomous monitoring.

Please refer to the [ASTRO 25 On Premises Security Ops Center](#) price page.

14. ASTRO 25 Security Monitoring Service - This Service supports the current shipping Release and three previous System Releases. Security Monitoring Service is an integration of the existing Network Monitoring service with Security Monitoring that includes the monitoring of radio system infrastructure as well as monitoring and managing the Motorola security equipment present on the Customers System.

Motorola Solutions ASTRO 25 Security Monitoring is a complete solution that provides peace of mind and reduces the risk that your network availability will be impacted by a security threat. The solution includes uninterrupted monitoring of the radio network security elements by experienced, specialized security technologists with years of experience working with communications networks like yours. Motorola security technologists keep continuous eyes on your network to detect, analyze, and respond remotely or on-site to security events. This level of service will ensure that the operational impact that any security event may cause to your network is kept to a minimum, and in many instances, eliminated. For highly complex or unusual security events, our technologists have direct and immediate access to Motorola engineers for rapid resolution.

Please refer to the [ASTRO 25 Security Monitoring Service](#) price page.

15. ASTRO 25 Cybersecurity Professional Services - Motorola Solutions Cyber Security Professional Services provide a comprehensive and systematic process for identifying, assessing and managing cyber security risk throughout enterprise systems. With Cyber Security Professional Services, you will be able to fully understand your cyber security risk posture related to your organization's operational environment. Motorola Solutions provides a comprehensive assessment of your attack surface profile; a cost/benefit evaluation and detailed remediation recommendations. With ever-changing technologies and business processes, security threats are always changing and your organization's security posture is never static. Periodic security posture assessments help to maintain a current record of vulnerabilities and help to prioritize remediation activities necessary based on overall risk to your operations. Professional Services feature cover only applicable controls spanning Technical, Management and Operational categories are selected to conduct a tailored risk analysis. Mitigation steps such as security architecture changes, integration of specific products or implementation of procedural control are recommended and discussed with the stakeholders only after the environment is methodically evaluated, risks are identified, analyzed, clearly understood and risk prioritized.

Using physical observation, in-person interviews, manual, computerized, commercially available and custom tools, Motorola Solutions will evaluate potential threat scenarios and assess potential risk implications to confidentiality, integrity and availability of the organization's mission.

All applicable risk factors are considered and taken into account prior and during the assessment. After capturing all necessary data pertaining to the scope of the assessment, a threat profile is developed and prepared as a Risk Scorecard report indicating low, moderate, high and critical values for each finding/issue identified. A remediation or risk acceptance recommendation will follow each finding/issue. Using physical observation, in-person interviews, manual, computerized, commercially available and custom tools, Motorola will evaluate potential threat scenarios and assess potential risk implications to confidentiality, integrity and availability of the organization's mission. Only applicable controls spanning Technical, Managed and Operational categories are selected to conduct a tailored risk analysis. Mitigation steps such as security architecture changes, integration of specific products or implementation of

procedural control are recommended and discussed with the stakeholders only after the environment is methodically evaluated, risks are identified, analyzed, clearly understood and risk prioritized.

Please refer to the [Cybersecurity Professional Services](#) price page.

16. Security Update Service (SUS) & Security Update Remote Delivery Service - Security Update Service (SUS) provides the customer with peace of mind that the 3rd party SW security patches ASTRO uses are vetted for issues before they are applied to their live ASTRO system. These 3rd party patches include weekly anti-malware definition updates, monthly "Patch Tuesday" Microsoft Windows updates, and other operating system patches as they are released.

This service is only available for select ASTRO25 System Releases. Is it critical that this be considered in planning for the duration of a contract and that upgrades be planned for continued support.

Please refer to the [Security Update Services](#) price page.

17. Security Configuration Updates - Security Configuration Updates was formerly known as STIG Updates. The Defense Information Systems Agency (DISA) creates Information Assurance configuration standards for DOD IT systems and devices. These standards are known as Security Technical Implementation Guides (STIGs) and there are numerous STIGS. Currently we are providing STIG updates only for Windows but in the future other operating systems like Linux may be offered.

In every ASTRO release, Windows security configurations are assessed against the STIGs and modified accordingly. The purpose of Security Configuration Updates is to apply those newer updates in older releases to the extent possible.

This service is only available for select ASTRO 25 System Releases. It is critical that this be considered in planning for longer-term contracts so that upgrades are included for continued support.

Please refer to the [Security Configuration Updates](#) price page.

General Information

Nice Logging Recorder Service Offerings

Warranty uplift and post warranty services provide a level of support for optimal system performance for Motorola certified NICE logging recorders

Motorola standard warranty is equivalent to NICE Silver level of support. When added coverage is required during warranty, uplift to Gold-Lite, Gold and Platinum maintenance services.

Post-warranty Silver, Gold-Lite, Gold and Platinum maintenance services.

Warranty up-lift and post-warranty services are offered under a Motorola Service Agreement.

Contractual Documents

The documents below will outline both the Implementation process and the Ongoing Maintenance process which begins in year two.

STATEMENT OF WORK for:

- [NICE Silver Maintenance](#)
- [NICE Gold-Lite Maintenance](#)
- [NICE Gold Maintenance](#)
- [NICE Platinum Maintenance](#)

TERRITORY MAP

- locations of NICE responders

HOW TO GUIDE

- [Request for Quotation and Contract Process Guideline](#)

All warranty uplift, post warranty and contract renewal opportunities must be quoted by NICE prior to creating a Motorola service agreement.

QUOTE FORM

CUSTOMER SUPPORT PLANS (CSP) for:

- [NICE Silver Maintenance](#)
- [NICE Gold-Lite Maintenance](#)
- [NICE Gold Maintenance](#)
- NICE Platinum (contract your local Customer Support Manager)

Ordering Requirements

1. **These services cannot be ordered directly through COF at this time.** Please contact your local Area Service Manager (ASM) or Customer Support Manager (CSM) if you are interested in ordering these services.

CONFIGURATION

Model

NICE Inform Recording (NIR) Logging Recorder

Ordering Information

General Information

NIR is a full-featured, compact recording solution designed to meet the needs of first responders, Integrated Command and Control Centers, law-enforcement agencies, and small contact centers. With its state-of-the-art architecture, NIR provides an affordable, easy-to-use and easily maintained solution. It comes with a wide range of features and benefits, and is designed to meet the needs of organizations seeking a powerful and cost-effective recording system.

NIR bundles utilize standard HP Server hardware with options available for server upgrades.

The standard server included in the NIR bundles has the following features:

- Windows 2016 (or 2012) 64 bit OS
- SQL 2016 CAL licenses
- 48,000 hours of on-line storage
- RAID 1 for the hard drives (disk mirroring)
- Dual / redundant power supplies
- HP Rail kit for 4-post cabinet

NIR can record a variety of audio inputs. These include analog inputs (phone and radio), traditional digital telephones (TDM), and VoIP telephones - all within a single recording chassis. NIR also supports CTI integrations for digital and VoIP systems to capture more call data with each recording.

The NIR bundles come in two configurations for a single or parallel system. Each bundle comes with either a single or dual HP ML350 servers. **It is highly recommend that missions critical audio be ordered as parallel systems.**

Either NIR bundle will require Inform Channel licenses (Professional or Elite). Aside from recording licenses, analog and digital (TDM) recording requires audio input boards for the server. VoIP recording does not require audio input boards. Each audio input board provides 24 ports for 2-wire audio feeds.

Some additional features of the solution include:

- G.729A compression (8Kb/s)
- Support for archiving audio to an RDX drive or external USB drive
- Support for archiving audio to a network storage device (i.e. external archiving is native to the product and does not require a separate Storage Center application)
- Archiving to multiple locations for geographic redundancy

Please note that the NIR does not come with a removable archive media such as DVD or DAT.

NIR can be part of an integrated solution with a Motorola MCC 7500 IP Logging Recorder. NIR can be integrated into any Inform Lite or full Inform system. The network storage capability that is native to NIR can also be incorporated into any Storage Center archiving strategy that is set up for the MCC 7500 IP logging recorder.

Please note that the NIR bundle does not include a user software package. NIR can use the Inform package sold with the MCC 7500 IP logging recorder with the appropriate amount of channels ordered. Also note that in small user systems, Inform can be loaded on the NIR server. This can eliminate the need for a separate hardware for the Inform user applications. Please consult with NICE Systems on the limitations of deploying Inform on the NIR recorder.

Parallel Loggers: A parallel recording option is available as an NIR bundle. The parallel bundles have special discounts to encourage the purchase of these options. **Any customer that considers recording to be "Mission Critical" should be quoted parallel recorders.**

Contact Closure Boards (Squelch): Used when recording the analog audio feeds from a 911 telephone system (even VoIP based 911 systems offer analog feeds for each telephone to be recorded). This kit interfaces with the 911 system to use contact closure as the start / stop trigger for recording (replaces the VOX trigger). This provides efficiencies when trying to reconstruct a 911 event. The basic kit provides capacity for up to 96 channels but only includes Activity Detection for up to 24 audio positions. Additional 24-channel cables can be ordered. When used, the NIR logger will have a maximum capacity of 144 channels due to internal card slot usage.

Additional 24 Ports of Activity Detection: Adds additional interface capacity to the basic kit described above.

Server Hardware Upgrade (Additional Storage): There are 1 TB and 6 TB HDD options to increase the internal storage in the NIR recorder. Because the servers are configured with RAID 1, each additional drive should be ordered in pairs to accommodate drives for disk mirroring. The option is limited to a quantity of one to ensure that the order does not exceed the number of drive slots available in the server(s). No more than one set of drives can be added as this will max out the available HD slots.

Ordering Requirements

Ordering Instructions:

1. Each NIR recorder bundle includes the following items:
 - HP ML350 server hardware
 - 48,000 hours of on-line storage
 - RAID 1 (mirrored drives)
 - Hot swappable redundant power supplies 1+1
 - Support for archiving to external USB drives
 - Support for archiving to network storage server
 - Windows 2016 or 2012 64 Bit OS
 - Slide rails for 4-post cabinet / rack
2. Please note that the NIR bundle do not include Inform user software. This must be ordered as a separate line item as either Inform Professional or

- Inform Elite channel licenses.
3. Pricing includes first year warranty maintenance (Monday-Friday, 8 x 5 - excludes international). This warranty includes software patches and fixes, but does not incorporate a SMA/SUA package.
 4. Warranty upgrades to 24 x 7 support are available and can be obtained through your CSM. **This is highly recommended for all Missions Critical logging recorders.**
 5. Pricing does not include any services. Services are ordered separately through the iProcurement system.
 6. For equipment being placed in a 19" two post rack, part number DDN9748A can be ordered. This is a two post rack mount shelf.
 7. The NIR logging recorder can be hardened. However, the NIR is not supported UEM through ASTRO 7.18.
 8. The customer must purchase and install antivirus software on all devices that reside on the customer network. The customer is responsible for keeping the antivirus software and Microsoft patches current. A listing of approved patches and anti-virus software is available at the NICE www.Extranice.com website for telephony equipment residing on the customer enterprise network (CEN). Motorola has approved antivirus for logging equipment residing on the radio network infrastructure (RNI).
 9. When used on ASTRO 7.17 release, you must order replay client TT3106A.
 10. When placing an order for NICE equipment it is important that all product is placed on the same FO/order and not broken out into separate orders. Please contact David Gutteridge at NICE if there is an exceptional circumstance that requires equipment to be broken out into separate FO's.

Pricing Exception Process:

For opportunities above \$500K, a P&L is required. Please contact Pricing and Profitability. For opportunities \$500K or less, a regional approval is required for **all** pricing exceptions. In its simplest form, this would typically be a call or an email from the requestor that provides background information, bid strategy, equipment list (including part number and DNUP/list price), and the target pricing required. PE requests typically state "we need to meet a maximum price of \$X" or "we need an additional 10% off the current price to be competitive", etc... The regional contact, Rich Nita, will then work with NAG Finance on a financial analysis and respond to the requestor with an approval / denial, or a suggested alternative discount. The requestor then provides Rich's email approval authorizing the discount to the person / team doing the order entry.

Additional Information on NICE products is available from NICE directly at their **ExtraNICE business partner portal**. This site provides Motorolans with access to materials published by NICE on their applications, tools, and solutions. The materials include marketing collateral, manuals (user, installation, hardware, etc.), technical notes, FAQ's, and much more. Register at www.extranice.com .

To contact your local NICE sales representative. You can also contact David Gutteridge if you need a local NICE sales rep or have additional questions.

David Gutteridge, Business Development Manager, NICE Systems globally
- David.Gutteridge@NICE.com or 416-729-2626.

NICE Inform Release R9.0

Updates

PLEASE NOTE: The Standard Support Period for the 7.11 Release ends on June 30, 2017. Any software and hardware expansions on this release will no longer be supported after this date. Click [here](#) for additional information.

ASTRO Release 7.13 to 7.16 releases require Inform R5.1 or later versions.

ASTRO Release 7.17 or later requires Full Inform 7.2 or later versions.

NICE Inform is a full-spectrum incident information management solution that captures, consolidates, manages, and analyzes incident information from multimedia sources for faster incident reconstruction, greater insight and improved response. NICE Inform is a browser-based application suite for organizations (Public Safety, Transportation, Utilities, etc.) that pieces together incidents in a highly visual and intuitive way; all laid out in a time sequence on a graphical display. It is a modular suite of applications comprised of:

Reconstruction module - Search / Playback / Save functionality for quick multimedia and multi-source search and incident recreation for investigation purposes.

Organizer module - Organize and manage audio files as well as other media files (such as photos, video, etc.) in a secure folder. **Inform Media Player** - Send files via e-mail in a secure manner. Audio files can be shared electronically while still encoded. Senders can add on Inform Media Player that recipients access with a password. The Player opens to provide recipients with a fully functional Inform GUI that allows them to review the recordings just as if they were connected to the Inform system.

Monitor module - for Supervisor visibility to real-time communications in the call center.

Administrator applications - includes system administrator, user administration, and audit applications.

Inform Matrix - Create a connected web of Inform systems across multiple sites to provide efficiencies in network traffic and performance. Also allows for a blending of centralized and local administrative controls of the system.

Quality Monitoring - Evaluating - A requirement in many Public Safety organizations. Provides customizable on-line forms to evaluation and review agent performance and provide instruction/feedback.

Report - Provides statistics and graphs on the results of the Quality Monitoring effort. Also provides usage statistics, showing customers call volumes by channel, time, etc.

Analytics - Search on spoken keywords and phrases across all calls to quickly find additional calls related to incidents and uncover evidence to expedite investigations. Also enhances customer's Quality Monitoring efforts.

Screen Reporting - Record screen activity on a PC (such as the CAD screen) to add to incident review and evaluation procedures.

Text 911 Recording - Record all interactions with the PSAP that occurred via Text to 911.

UNS Interface for Geospatial Data - Provides the Latitude and Longitude data with each PTT. Plotted on a map to give customers a visual representation of recorded events.

Resiliency - A second iteration of Inform and its applications. It will take over in the event of a failure in the primary Inform system. It can provide load-sharing functionality.

NICE Inform provides for:

- Streamlining of investigations

- Improving interoperability within and between agencies by facilitating secure on-line information sharing
- Automation and simplicity of incident management process
- Secure and tamper-proof infrastructure for sensitive evidence
- Improved services to the public

The basic Inform package comes with the following applications / features:

- Reconstruction
- System Administration
- Audit

The additional modules/features are optional and can be added to the system at any time.

Reconstruction Application

NICE Inform Reconstruction application is the main search and playback tool in NICE Inform. The Reconstruction application enables searches for recordings stored on various NICE logging recorders, then plays them back as a complete scenario or as a single recording channel. When a search is completed, the results are presented in both a table format and a graphical timeline format. NICE Inform is 'layered on top' of the NICE recording capture devices and views them as one logical system. The application is similar to the Scenario Replay application that shipped with the NiceLog, NiceCall Focus III, and MCC 7500 IP logging recorders in the past.

System Administration

The Inform system administration application enables administrators to install and set up the physical NICE Inform servers and to add labels to the various system entities. The principal activities involved with system administration include:

Privileges:

- Creation, editing, and deletion of recording systems
- Importing and exporting resources from or to a file
- Importing and exporting resources from or to a system

User Administration

- Set up system-wide and user-by-user security for Inform
- Creation, editing, and deletion of user and group accounts

Audit Application

Enables the user to view and manage the Audit events raised within the Inform system. These are events related to any kind of user interaction with the system including login/logout, tasks, etc.

Client Applications

The client application runs on a PC and provides the interface to the user. The applications communicate with the Inform server, providing a single communication link between the user application and the system.

NICE Inform Server

As a .NET application, Inform delivers applications to users via a server. Users log into a server via Internet Explorer at the desktop. The Inform server requires appropriate MS SQL licensing.

Organizer Application

Organizer is an incident management application that provides the ability to manage incident information. It works independently from the recording platform, providing the ability to collect and organize materials related to an incident. All material can be 'Authenticated' to verify that copies of the recording and digital material are true, unaltered copies of the original.

Distribution can be done in a variety of ways, such as by saving the calls into one or more ".wav" files, to an audio cassette recorder, DVD, email, etc. as well as by sharing specific incident folder on-line with users that have access to the NICE Inform server. All actions in the incident preparation, modification, or distribution are tagged with unique file numbers, incident numbers, and other reference information for historical tracking and quick lookup.

An optional item within Organizer is the **Inform Media Player**. It allows Users to attach the Inform Reconstruction Player and CODEC with a copied audio file. This allows Users to present audio to recipients that are not connected to the recording solution in a compressed and encoded (secure) format. The recorded copy will also retain other features of Inform such as the time/date stamp and the spoken date and time. Recipients will also be able to view the audio files in the graphic time-line format in Inform Reconstruction.

Monitor Application

A multi-channel audio live monitor application used by Supervisors allowing visibility in real-time of the communications

managed by the call takers, dispatchers, or both. The Monitor application also allows for recent call replay so supervisors can verify the details of specific interaction.

Inform Matrix Server

Provides an optional server matrix that sets up Inform servers as "hubs" and "pointers". The "pointer" servers can access and leverage the database and licensing of a "hub" server. In a multi-site, multi-org solution, this provides a couple of important advantages over Inform R3. It reduces channel license costs because the pointer server can use the channel licensing in the hub server. For example, if a hub server is licensed for 2 IP Radio Loggers, the pointer server does not require those licenses.

It also makes Inform more efficient on the network. Pointer servers can manage the search/playback process for local loggers and the hub servers it is connect to. This puts an end to audio playback from a local logger having to go all the way to the primary Inform server and then back again to the local user. Using the Inform R4 server matrix accessing the local loggers remains local and does not require use of the WAN. In addition, local users have more admin and access control over the local loggers they own.

UNS Integration - A NICE Location Server can collect device location information from a Motorola UNS server and create a corresponding record containing the Latitude / Longitude data for a call. NICE Inform Reconstruction can then match the location information with the corresponding call metadata and present a combined record to the user. This metadata can then be searched and presented visually using ESRI Maps or as a data field in a call record.

Evaluator - Quality Assurance

Reviewing incidents to provide training and ensuring compliance with regulations and procedures is a large part of the supervisor everyday job. Evaluator provides tools and features that make the job much easier - and make the supervisor more efficient and effective.

Evaluator is an application within the Inform GUI. This allows Supervisors to find and review recordings (ex: audio, Text-911, screens, etc.) as well as score/evaluate them from a single GUI interface. No need to jump from one application to the other. Evaluator meets both APCO/NENA and CALEA QA standards.

Supervisors can construct evaluation forms on-line using a wide variety of scoring/evaluating criteria. They can link each evaluation to the recordings, for easy review later. Evaluator also provides a Scheduler that allows supervisors to automate the call selection process (improving impartiality and efficiency).

Evaluator also offers integration into AQUA (Priority Dispatch) and APCO 9-1-1 Advisor (Smart Horizons).

Reporter

There are two types of reports. First, Reporter can show a variety results and trends for the Quality Assurance results in Evaluator. The second type of report is a usage report. Reporter can show data such as which channels or Talk Groups are busiest, what time of day has the most traffic, etc. Reporter also allows Supervisor to set up a customized dashboard to monitor the data that is most interesting to them.

Analytics

Searching audio and text recordings for spoken/typed words and phrases is an extremely powerful tool for both reconstructing an event as well as for Quality Assurance.

Customers can use analytics to find recordings that would otherwise be very difficult to find. The result being that users can find more information, better information, faster. For example, if a user needs to find all 911 calls that reference a "œred truck", the user can use analytics to find any call where the phrase "œred truck"™ is spoken.

This is equally powerful for Quality Monitoring, and checking on compliance and procedures. For Example, a 911 caller should never hear the words "œon-hold". A Supervisor could review all calls in the past month where the phrase "œon-hold" is spoken. This gives them immediate access to calls where a breach in protocol may have occurred.

The NICE Systems analytics package is one of the most, if not most, advanced and powerful in the industry. Users can have access to these powerful tools, and wait times for search results is measured in a few seconds.

Screen Recording

This feature is growing in popularity. Along with recording the audio and text of 911 events, many customers want to record the screens of the call takers and dispatchers (its like watching a video of their screen activity during the call). This helps/enhances their Quality Assurance efforts by being able to watch how quickly data is entered and screens are navigated. They can also review the accuracy of the data entered.

Inform lets supervisors easily sync media recordings for playback simultaneously. Screen recording playback and audio playback can be synchronized on the same timeline. The Inform GUI provides users with a graphic timeline display showing the start time and end time if each media recording.

Text - 911 Recording

NICE Systems provides text recording for a variety of vendors and standards. Also, NICE captures the SMS data feed rather than just capturing a screen-shot of the text. This means customers can use the standard Inform search tools (as well as analytics tools) to find relevant Text-911 recordings. Like other media capture, the Text-911 recordings appear in the Inform GUI on the graphic timeline. This provides ease of access and a clear understanding of a sequence of events.

UNS Interface

NICE offers an interface to the Motorola Solutions' UNS server to deliver the longitude and latitude of each PTT transmission. This data become part of the call record. It is searchable criteria and is displayed in the search results. More importantly, the Long. and Lat. data can be displayed graphically on a map. Users would be able to view the sequence and location of each PTT on the map - aiding overall understanding of the sequence of events.

Resiliency

Providing redundancy is key to ensuring happy customers. Inform offers a resiliency package - which is a redundant Inform server with an Inform licensing profile that is identical to the Primary server. The Primary and Secondary servers are in constant communication. When communication to the Primary server is lost, the Secondary server automatically takes over and all user requests are routed to the Secondary server.

Ordering Information

Ordering Requirements

SERVICES ARE NOT INCLUDED IN ECAT MODELS - THESE ARE QUOTED AND ORDERED SEPARATELY.

The Inform software bundle includes everything required to deliver an Inform solution (with the exception of Training). This includes everything included with the tier of channels ordered (Inform Professional or Inform Elite)

Inform DOES NOT include User Training. NICE or a participating dealer installation technician will provide a short demonstration of the basic functions of the search and replay application. The demonstration is not intended to provide a thorough understanding of the operation of the system. Training for new customers will be quoted as part of the services proposal from NICE Systems. Training provides a full day of in-depth instructor led product training and Q&A for up to six customer personnel.

Inform can installed on the MCC 7500 IP Logging Recorder backup server starting in 7.17. It can also run on an NIR telephone recorder or a stand-alone server. Please consult with NICE Systems as to the best configuration for your customer.

Ordering Instructions for Inform Application:

1. Pricing includes first year **SILVER** warranty maintenance (Monday - Friday, 8 -5) (Except International) - **if 24x7 SUPPORT is required, please contact the Motorola field CSM for a quotation.**
2. Anti-Virus should be ordered separately. The customer is responsible for keeping the antivirus software and Microsoft patches current. A list of approved patches and antivirus software are available at the NICE www.Extranice.com website for telephony equipment residing on the customer enterprise network (CEN).
3. An Uninterruptible Power Supply (UPS) is strongly recommended for use in any logging recorder/Inform installation. These are not supplied as part of the logging solution and are expected to be supplied by the customer.
4. When placing an order for NICE equipment it is important that all product is placed on the same FO/order and not broken out into separate orders. Please contact David Gutteridge at NICE if there is an exceptional circumstance that requires equipment to be broken out into separate FO's.

SERVICES ARE REQUIRED, BUT NOT INCLUDED IN PCAT MODELS ON THIS PAGE.

1. Pricing does NOT include a Remote Project Manager. Call NICE Systems for a services quote. If you do not know your NICE Systems sales rep, please contact David.Gutteridge, NICE Systems, [416-729-2626](tel:416-729-2626) or David.Gutteridge@NICE.com.
2. Pricing does not includes installation. This must be quoted separately by NICE and ordered by the field team. When ordered, a factory-trained and certified professional service representative will perform the implementation. Pricing includes Installation in Domestic United States and most Canadian Cities (Alaska, Hawaii, remote regions of Canada and International require additional service quotation from NICE, please contact David Gutteridge @ NICE Systems, [416-729-2626](tel:416-729-2626) or David.Gutteridge@NICE.com .
3. Pricing does not include on-site training. Training is highly recommended to ensure customer satisfaction with using the product. NICE will quote training and the pricing will include all travel expenses within the continental United States and most cities in Canada. Included with Inform is only a basic tutorial of the Inform Lite application by the

installation technician.

4. **IMPORTANT: The Motorola field PM needs to contact NICE to schedule installation.**

5. For recording solutions that include an MCC7500 IP Logging Recorder, if the customer desires search/playback capabilities on the Customer Enterprise Network (CEN), there must be a Motorola Firewall between the RNI and the CEN. Motorola must configure the Motorola Firewall to allow the Inform server to communicate with the MCC7500 IP Logging Recorder. The Motorola field engineering team is responsible for the design of this integrated solution - including support from ST's or engineers.

6. Selling NICE Inform is a process in selling Value-Adds. It is highly recommended that a NICE Sales Representative be consulted during the selling process. Utilizing a NICE Representative will result in the following benefits:

- A higher success rate for sales
- Reduced chance of configuration error
- Improved chances for up-sell opportunities
- To contact your local NICE Sales Rep, please contact

David Gutteridge, Business Development Manager, NICE Systems, [416-729-2626](tel:416-729-2626) or David.Gutteridge@nice.com

Ordering Instructions For Inform Tiers:

Ordering Inform channels (Professional or Elite) for the logging solution will include everything required to deliver a basic turnkey Inform solution. Please note that services (installation, PM, and training) as well as uplift maintenance to 24x7 are ordered separately and are not included in the PCAT bundle prices below.

Options:

Professional Channel Licenses: When choosing this tier, it is required to have one for each primary recording channel in the system (parallel channels are optional sold separately). For example, if the order included a single 25 simultaneous call MCC 7500 IP Logging Recorder and a single 64 channel NIR, this would require 89 Professional channel licenses. The applications defined above will be included as a part of this channel tier. The exception to this is the ASTRO 120-channel Professional bundles (single or parallel) where the 120-channels are already included.

Elite Channel Licenses: When choosing this tier, it is required to have one for each **primary** recording channel in the system (parallel channel licenses are included). For example, if the order included parallel 60 simultaneous call MCC 7500 IP Logging Recorders and parallel 48 channel NIRs, this would require 108 Elite channel licenses. The applications defined above will be included as a part of this channel tier. The exception to this is the ASTRO 120-channel Elite bundle where the Elite channel licenses are already included.

Resilient (Parallel) Recording channel License: Resilient/parallel channel license that is **required** for all primary MCC 7500 IP Logging Recorder channels where a parallel bundle is ordered. It must be in the same quantity as the primary channels. The exception to this rule is that the ASTRO 120-channel parallel bundles (Professional or Elite) that already have the parallel licensing included.

P25 Channel License: A P25 channel license is **required** for all primary MCC 7500 IP Logging Recorder channels. The exception to this rule is that all ASTRO 120-channel bundles already have the P25 licensing included.

Inform Module Resiliency Option: This is used to create / implement a hot-standby (or secondary) Inform server with appropriate licensing. The secondary server receives Inform database back-ups from the primary server on a regular basis. In the event that the primary Inform server goes down, the Inform back-up server can be brought on-line quickly and access to the applications restored. This licensing is included with the Inform Elite tier.

Add-on/Matrix/Professional Channel License: Professional tier channel license that is required to connect Inform to an existing logging system that is not a part of a new order. This could be the logger channels at a hub location in a Matrix environment or connecting to a legacy logger, etc.

Add-on/Matrix/Professional Resilient Channel License: Channel license for a parallel Add-on/Matrix channel.

Add-on/Matrix/Elite Channel License: Elite tier channel license that is required to connect Inform to an existing logging system that is not a part of a new order. This could be the logger channels at a hub location in a Matrix environment or connecting to a legacy logger, etc.

Screen Recording Channel License: A screen recording channel license for each PC that is required to have its screen recorded to an NIR Logger.

Text-to-911 Recording License: A license for each Call Taker position that is capable of receiving incoming SMS/Text messages from 911.

Evidence Pack: Includes the applications listed above. One license to be ordered per primary logging channel in the solution.

QA Pack: Includes the applications listed above. One license to be ordered per primary logging channels in the

solution.

Business Intelligence Dashboards (Elite option only): One license to be ordered per primary logging channels in the solution.

General Ordering Instructions for the Inform Application outside of an upgrade to A7.17 release

1. Select the appropriate logger bundle.
2. Select the NICE Inform tier and order the corresponding amount of logger channels
3. Select the system release flag.
4. Optional: Select Additional items that are not included with the Inform tier selected.
5. Services (PM, Installation, and Training) are ordered separately. Call NICE Systems for a quote. If you don't know your NICE sales rep, please contact David Gutteridge at [416-729-2626](tel:416-729-2626) or David.Gutteridge@NICE.com.

Selling NICE Inform is a process in selling Value-Adds. It is highly recommended that a NICE Sales Representative be consulted during the selling process. Utilizing a NICE Representative will result in the following benefits:

- A higher success rate for sales
- Reduced chance of configuration error
- Improved chances for up-sell opportunities
- To contact your local NICE Sales Rep, please contact

David Gutteridge, Business Development Manager, NICE Systems, [416-729-2626](tel:416-729-2626) or David.Gutteridge@nice.com

Additional Information on NICE products is available from NICE directly at their **ExtraNICE business partner portal**. This site provides Motorolans with access to materials published by NICE on their applications, tools, and solutions. The materials include marketing collateral, manuals (user, installation, hardware, etc.), technical notes, FAQ's, and much more. Register at www.extranice.com. Please contact Greg Vasilopoulos in product marketing with additional questions.

Additional information is available on the Motorola Solutions Logging Wiki:

ORDERING UPGRADES

***** Ordering Instructions for NICE Inform for customers upgrading to ASTRO 7.17+ release: *****

Customer migrating the MCC 7500 IP Logging Recorder(s) to A7.17 (or later releases) who are currently using Inform Lite on the RNI must upgrade to Full Inform. For these customers, NICE is providing the Full Inform (certified version on the RNI) software free of charge. Please note that unlike Inform Lite, Full Inform will require a server. The server can be the MCC 7500 IP Radio Logger backup server, an NRX server, or a dedicated server. Please consult with NICE for the best / optimal configuration for your customer. For customers installing Inform a previously existing MCC 7500 backup server, DDN2269A must be ordered. This upgrades the HD, RAM, SQL elements of the existing server to allow it to support Full Inform.

Full Inform will provide customers with improved functionality over Inform Lite and a better road map to many NG 911 features such as Text-911 recording, CAD integrations, Screen Capture, and more. It represents significant value for our customers.

Inform upgrades independent of ASTRO system release

Starting with Inform 8, Inform upgrades will now also include an upgrade to the telephony logger (NIR) at the same time. The Inform version and NIR version, when used together in the same solution, must be at the same version.

Please contact NICE sales for a quote on an Inform upgrade or expansion.

Pricing for these upgrades will be based on a **percentage off of list price** depending on the how many versions and which tier the upgrade is from. The pricing matrix is below where **N is the current version of Inform**.

	Legacy (older than 3 versions)	N-3 Lite	N-3 Pro	N-2 Lite	N-2 Pro	N-1 Lite	N-1 Pro	N Pro
Current Version								

Target Version:	NICE Professional	List	10%	40%	30%	60%	60%	80%	-
	NICE Elite	List	List	List	10%	30%	15%	50%	60%

Telephony upgrade to new R8 Platforms

Radio logger only upgrades are a separate item on the Radio Logger Price Page

All Percentages are Discount (reduction to list)

OnSite Infrastructure Response Service with Local Dispatch

Ordering Information

General Information

With OnSite Infrastructure Response with Local Dispatch, technicians are dispatched from the MSS/FSO location directly to the customer site to perform diagnostics, remove failed components, and reinstall new or reconditioned components to restore the system.

Features

- Motorola Technical Expertise
- On-site Motorola Authorized Servicer
- Response is 24 x 7x 365 for Severity 1

Statement of Work

One of the primary business objectives of the North American Group (NAG) is to promote the sales of STANDARD service products. Standards help to ensure consistent and profitable delivery of our service products to our customers. To that end, the customer Statement of Work for this Standard Service Product **CANNOT** be modified. All requests for modifications to STANDARD service products or the development of "custom" service products should be routed through the Solutions Planning process. Your first point of contact for these requests is your local Area Service Manager.

Definitions

Capitalized terms used in this Statement of Work and not otherwise defined within the Statement of Work or Communications System Agreement have the following meanings: [Click here](#)

Statement of Work

OnSite Infrastructure Response and Dispatch Service

1.0 Description of Service

OnSite Infrastructure Response provides for on-site technician Response by a Servicer. A Servicer will respond to the Customer location based on pre-defined Severity Levels set forth in the Severity Definitions Table and Response times set forth in the Response Time Table in order to Restore the System.

The terms and conditions of this Statement of Work (SOW) are an integral part of Motorola's Service Terms and Conditions or other applicable Agreement to which it is attached and made a part thereof by this reference.

2.0 Motorola Servicer has the following responsibilities:

- 2.1 Continuously receive service requests.
- 2.2 Assign and dispatch technical resources and provide estimated time of arrival (ETA) to Customer.
- 2.3 Servicer will perform the following on-site:
 - 2.3.1. Run diagnostics on the Infrastructure or FRU
 - 2.3.2. Replace defective Infrastructure or FRU, as applicable. Customer, Servicer or Motorola may provide Infrastructure or FRU.
 - 2.3.3. Provide materials, tools, documentation, physical planning manuals, diagnostic/test equipment and any other requirements necessary to perform the Maintenance service.
 - 2.3.4. If a third party Vendor is needed to Restore the System, the Servicer may accompany that Vendor onto the Customer's premises.
- 2.4 Verify with Customer that Restoration is complete or System is functional. If Customer cannot be contacted within twenty (20) minutes of Restoration, the Servicer will leave the Customer site.
- 2.5 Provide the service ticket document to Customer, when requested. Service ticket document should include the following:
 - 2.5.1 Resolution action.
 - 2.5.2 Provide defective FRU or part number (model #) used.

3.0 Customer has the following responsibilities:

- 3.1 Contact Servicer, as necessary, to request service Continuously.
- 3.2 Allow Servicers access to Equipment.
- 3.3 Supply Infrastructure or FRU as needed in order for Motorola to Restore the System as set forth in paragraph 2.3.2.
- 3.4 Maintain and store in an easily accessible location any and all Software needed to Restore the System.
- 3.5 Maintain and store in an easily accessible location proper System backups.
- 3.6 For E911 systems, test the secondary/backup PSAP connection to be prepared in the event of a catastrophic failure of a system. Train appropriate personnel on the procedures to perform the function of switching to the backup PSAP.
- 3.7 Contact the Servicer upon expiration of Response time goal.
- 3.8 Upon being contacted by the Servicer requesting Verification of a Restoration as described above in Section 2.4, respond to that request within twenty (20) minutes.
- 3.9 Cooperate with Motorola and perform all acts that are reasonable or necessary to enable Motorola to provide this service.

Severity Definitions Table

Severity Level	Problem Types
Severity 1	<ul style="list-style-type: none">• Response is provided Continuously• Major system failure• 33% of System Down• 33% of Site channels down• Site Environment Alarms (smoke, access, temp, A/C Power)• This level is meant to represent a major issue that results in an unusable system, sub-system, Product, or critical features from the Customer's

perspective. No Work-around or immediate solution is available.

- Severity 2
- Response during Standard Business Day
 - Significant System Impairment not to exceed 33% of system down
 - System problems presently being monitored
 - This level is meant to represent a moderate issue that limits a Customer's normal use of the system, sub-system, product, or major non-critical features from a Customer's perspective

- Severity 3
- Response is provided Standard Business Day
 - Intermittent problems
 - Informational questions
 - Upgrades/preventative maintenance
 - This level is meant to represent a minor issue that does not preclude use of the system, sub-system, product, or critical features from a Customer's perspective. It may also represent a cosmetic issue, including documentation errors, general usage questions, recommendations for product enhancements or modifications, and scheduled events such as preventative maintenance or product/system upgrades

Response Times Table (Customer's Response Time Classification is designated in the Service Agreement).

Severity Level	Regular Response Time	Premier Response Time	Limited Response Time
Severity 1	Within 4 hours from receipt of Notification Continuously	Within 2 hours from receipt of Notification Continuously	Within 4 hours from receipt of Notification Standard Business Day
Severity 2	Within 4 hours from receipt of Notification Standard Business Day	Within 4 hours from receipt of Notification Standard Business Day	Within 4 hours from receipt of Notification Standard Business Day
Severity 3	Within 24 hours from receipt of Notification Standard Business Day	Within 24 hours from receipt of Notification Standard Business Day	Within 24 hours from receipt of Notification Standard Business Day

Approved by Motorola Contracts & Compliance 12/19/03

Ordering Requirements

1. **This product cannot be ordered directly through COF at this time.** Please contact your local Area Service Manager (ASM) or Customer Support Manager (CSM) if you are interested in ordering this product.
2. Options for this product are based on the component parts of the complete system. Pricing is based on the size and complexity of the customer's system configuration such as the type of system, number of sites and number of base stations. **To ensure accurate pricing, orders will not be processed or accepted if they do not include all system components.**
3. Enter the main line item as quantity one.
4. Options are required as sub-items, with the quantity equal to the option

description.

5. All dollar amounts reflect an annual one year pricing.
6. Do not order OnSite Infrastructure Response or Dispatch Service. OnSite Infrastructure Response with Local Dispatch replaces these two services.
7. A Customer Support Plan must be created to provide detailed information to the customer regarding delivery of this service.

- 3.6 For E911 systems, test the secondary/backup PSAP connection to be prepared in the event of a catastrophic failure of a system. Train appropriate personnel on the procedures to perform the function of switching to the backup PSAP.
- 3.7 Contact the Servicer upon expiration of Response time goal.
- 3.8 Upon being contacted by the Servicer requesting Verification of a Restoration as described above in Section 2.4, respond to that request within twenty (20) minutes.
- 3.9 Cooperate with Motorola and perform all acts that are reasonable or necessary to enable Motorola to provide this service.

Severity Definitions Table

Severity Level	Problem Types
Severity 1	<ul style="list-style-type: none">• Response is provided Continuously• Major system failure• 33% of System Down• 33% of Site channels down• Site Environment Alarms (smoke, access, temp, A/C Power)• This level is meant to represent a major issue that results in an unusable system, sub-system, Product, or critical features from the Customer's

perspective. No Work-around or immediate solution is available.

- Severity 2
- Response during Standard Business Day
 - Significant System Impairment not to exceed 33% of system down
 - System problems presently being monitored
 - This level is meant to represent a moderate issue that limits a Customer's normal use of the system, sub-system, product, or major non-critical features from a Customer's perspective

- Severity 3
- Response is provided Standard Business Day
 - Intermittent problems
 - Informational questions
 - Upgrades/preventative maintenance
 - This level is meant to represent a minor issue that does not preclude use of the system, sub-system, product, or critical features from a Customer's perspective. It may also represent a cosmetic issue, including documentation errors, general usage questions, recommendations for product enhancements or modifications, and scheduled events such as preventative maintenance or product/system upgrades

Response Times Table (Customer's Response Time Classification is designated in the Service Agreement).

Severity Level	Regular Response Time	Premier Response Time	Limited Response Time
Severity 1	Within 4 hours from receipt of Notification Continuously	Within 2 hours from receipt of Notification Continuously	Within 4 hours from receipt of Notification Standard Business Day
Severity 2	Within 4 hours from receipt of Notification Standard Business Day	Within 4 hours from receipt of Notification Standard Business Day	Within 4 hours from receipt of Notification Standard Business Day
Severity 3	Within 24 hours from receipt of Notification Standard Business Day	Within 24 hours from receipt of Notification Standard Business Day	Within 24 hours from receipt of Notification Standard Business Day

Ordering Requirements

1. **This product cannot be ordered directly through COF at this time.** Please contact your local Area Service Manager (ASM) or Customer Support Manager (CSM) if you are interested in ordering this product.
2. Options for this product are based on the component parts of the complete system. Pricing is based on the size and complexity of the customer's system configuration such as the type of system, number of sites and number of base stations. **To ensure accurate pricing, orders will not be processed or accepted if they do not include all system components.**
3. Enter the main line item as quantity one.
4. Options are required as sub-items, with the quantity equal to the option description.

5. All dollar amounts reflect an annual one year pricing.
6. Do not order OnSite Infrastructure Response or Dispatch Service. OnSite Infrastructure Response with Local Dispatch replaces these two services.
7. A Customer Support Plan must be created to provide detailed information to the customer regarding delivery of this service.

**OnSite Infrastructure Response Service
(Premier) with Local Dispatch**

Ordering Information

General Information

With OnSite Infrastructure Response with Local Dispatch, Premier Option, technicians are dispatched from the MSS/FSO location directly to the customer site to perform diagnostics, remove failed components, and reinstall new or reconditioned components to restore the system.

Features

- Motorola Technical Expertise
- Resonse is 24 x 7x 365 for Severity 1
- On-site Motorola Authorized Servicer

Statement of Work

One of the primary business objectives of the North American Group (NAG) is to promote the sales of STANDARD service products. Standards help to ensure consistent and profitable delivery of our service products to our customers. To that end, the customer Statement of Work for this Standard Service Product **CANNOT** be modified. All requests for modifications to STANDARD service products or the development of "custom" service products should be routed through the Solutions Planning process. Your first point of contact for these requests is your local Area Service Manager.

Definitions

Capitalized terms used in this Statement of Work and not otherwise defined within the Statement of Work or Communications System Agreement have the following meanings: [Click here](#)

Statement of Work

OnSite Infrastructure Response and Dispatch Service

1.0 Description of Service

OnSite Infrastructure Response provides for on-site technician Response by a Servicer. A Servicer will respond to the Customer location based on pre-defined Severity Levels set forth in the Severity Definitions Table and Response times set forth in the Response Time Table in order to Restore the System.

The terms and conditions of this Statement of Work (SOW) are an integral part of Motorola's Service Terms and Conditions or other applicable Agreement to which it is attached and made a part thereof by this reference.

2.0 Motorola Servicer has the following responsibilities:

- 2.1 Continuously receive service requests.
- 2.2 Assign and dispatch technical resources and provide estimated time of arrival (ETA) to Customer.
- 2.3 Servicer will perform the following on-site:
 - 2.3.1. Run diagnostics on the Infrastructure or FRU
 - 2.3.2. Replace defective Infrastructure or FRU, as applicable. Customer, Servicer or Motorola may provide Infrastructure or FRU.
 - 2.3.3. Provide materials, tools, documentation, physical planning manuals, diagnostic/test equipment and any other requirements necessary to perform the Maintenance service.
 - 2.3.4. If a third party Vendor is needed to Restore the System, the Servicer may accompany that Vendor onto the Customer's premises.
- 2.4 Verify with Customer that Restoration is complete or System is functional. If Customer cannot be contacted within twenty (20) minutes of Restoration, the Servicer will leave the Customer site.
- 2.5 Provide the service ticket document to Customer, when requested. Service ticket document should include the following:
 - 2.5.1 Resolution action.
 - 2.5.2 Provide defective FRU or part number (model #) used.

3.0 Customer has the following responsibilities:

- 3.1 Contact Servicer, as necessary, to request service Continuously.
- 3.2 Allow Servicers access to Equipment.
- 3.3 Supply Infrastructure or FRU as needed in order for Motorola to Restore the System as set forth in paragraph 2.3.2.
- 3.4 Maintain and store in an easily accessible location any and all Software needed to Restore the System.
- 3.5 Maintain and store in an easily accessible location proper System backups.
- 3.6 For E911 systems, test the secondary/backup PSAP connection to be prepared in the event of a catastrophic failure of a system. Train appropriate personnel on the procedures to perform the function of switching to the backup PSAP.
- 3.7 Contact the Servicer upon expiration of Response time goal.
- 3.8 Upon being contacted by the Servicer requesting Verification of a Restoration as described above in Section 2.4, respond to that request within twenty (20) minutes.
- 3.9 Cooperate with Motorola and perform all acts that are reasonable or necessary to enable Motorola to provide this service.

On Premises Security Ops Center

Ordering Information

General Information

Installed inside your network, Motorola's On-Premise Security Operations Center allows you to effectively monitor unusual security activities. Minimal in comparison to the investment, time, technology and resources required to establish and maintain an internally owned and operated SOC, the unsurpassed monitoring technology in Motorola's On-Premise Security Operations Center covers:

- Firewalls, intrusion detection sensors, authentication and logging servers
- Worm, virus and other malicious activity
- Network vulnerabilities
- Abnormal network activity
- Compromised host command and control communication
- Advanced behavioral analytics

Features

Holistic event traffic insights. Capture and examination of system logs throughout your network infrastructure, devices, operating systems, software and applications.

Continuous monitoring. With the capability to function in attended and unattended modes, your system can be monitored round-the-clock without the presence of a physical resource 24x7.

Powerful correlation performance. Use of state-of-the-art "semantic correlation" technique to process more than 2,500 messages per second and handle traffic burst of more than 10,000 messages in one second to pin-point substantiated threats - alleviating false positives and omissions from a manual approach.

End-to-End intelligent alerting. Programmed with auto learning algorithms that become more informed over time from your system log data, alerts are generated based on learned system behaviors. From this, actionable tickets that can be assigned, investigated and resolved are created.

Customized mission-critical provisions. Tailored tool set to address the unique security monitoring needs of mission-critical environment using the knowledge accrued from

Motorola's decades of experience and lessons learned from securing critical systems.

Automated alerting. Instant notification of significant threats to your network the instance they occur for organizations with an email or paging server tied to their systems.

Auto generated reports. Easy to understand customized reports to keep you informed of your system's overall security events and risk posture.

Real-time visualization portal. Regularly updated dashboards reflecting vital information required by your team to identify security events of interest and respond accordingly. This includes an overview of the system status from the homepage.

IP-autonomous monitoring. Continuous monitoring of your system is situated within your isolated network environment alleviating the need for an external connection which further protects your monitoring tool from cyber intrusions.

Ordering Requirements

1. Current system releases supported are Astro25 7.13 and beyond.
2. M and L cores are supported.
3. The system must have the Event Logging Option (Formerly called Centralized Event Logging or Syslog)
 - M Core - 7.13 and newer, the option is CA01725XX
 - L core - IA/security package is required to get Event logging- CA01741XX
4. Service **MUST** be ordered in SLC only using service model down below and selecting appropriate license in pricing attributes
 - Dollar amount reflects annual pricing for new and renewal orders
 - Once the contract is built and active, the appropriate hardware and software will be ordered and shipped by our On-boarding team
 - Same options are used for both new and renewal licenses

NOTE: Contact CSM or submit request for order with NSS [here](#) (Please right click and open in new tab or window)

1. Initial installation requires a server and the SW.
 - Only 1 server and SW instance is required per system in a non-DSR system. DSR systems require a server and SW instance for the primary system and the backup system.
 - There is a 2 GB, 5GB and 10GB daily logging version of the SW. The 2 GB version will work for any L, M1, M2 cores and most single zone M3 cores. Multiple zone (2 Zone and 3 Zone) M3 cores should use the 5 GB version. Multiple zone (4 Zone, 5 Zone, 6 Zone and 7 Zone) M3 cores should use the 10 GB version.
2. Annual licensing is required after the first year. This entitles the customer to all updates/patches in future OPSOC releases.
 - 2 GB, 5 GB, or 10 GB Annual license on primary system
 - DSR licenses for back-up system also come in 2GB, 5 GB, or 10 GB versions. Should reflect the primary license.
3. Installation of this service on an existing system in the field will require 2 - 5 days system integration by a Field Service Tech

NOTE: This service offering must be ordered in SLC, **NOT** COF. An on-boarding team will order, configure & ship the needed hardware & software

OnSite Infrastructure Response-Standard

Ordering Information

General Information

Motorola OnSite Infrastructure Response provides local, trained and qualified technicians who arrive at your location to diagnose and restore a customer's communications network. All they have to do is make one phone call and their system response and restoration process begins immediately. Following proven response and restore processes, Motorola Dispatch (requires Dispatch Service) contacts the local authorized service center in their area and dispatches a qualified technician to their site. An automated escalation process ensures that technician site arrival and system restoration comply with contracted response times. The field technician will restore the system by performing first level trouble-shooting on-site. If the local technician is unable to resolve the problem, the escalation process includes intervention by Motorola System Support Center technologists or product engineering teams as needed (requires Technical Support service).

Features

- Motorola Technical Expertise
- 24 Hour/365 day service availability
- On-site Motorola Authorized Servicer
- Preventative maintenance check

PUBLIC SAFETY LTE OPERATIONS SUPPORT PLATFORM 'OSP'

Ordering Information

FEATURES

The deployment of Public Safety LTE brings significant opportunities to the customer agencies but it also presents operations & management challenges to the network operator. The technology complexity of LTE, and the security requirements demand large effort and knowhow to ensure maximum utilization and availability of the deployed CapEx while lowering the OpEx. Ensuring service availability while maintaining lower OpEX requires web-enabled, automated monitoring capabilities that provide clear notification and contextual help.

Motorola's Operations Support Platform (OSP) is a pre-integrated and comprehensive solution that provides a single point of operational capability for the end-to-end solution, including LTE infrastructure, backhaul, transport, and application servers. It is a low-footprint and low cost network management solution that reduces data center requirements and administration costs. Apart from pre-integrated FM and Syslog monitoring for MSI provided LTE and application servers, OSP also provides an ability to field-configure a network element MIB (SNMP, MIB-II) and its syslog interface to enable event monitoring of the network element.

The following functions are provided in OSP:

Content Management System (CMS): OSP utilizes web technologies to facilitate a configurable User Interface (UI). It provides a configurable web portal that enables the users to access the network status dashboard and various network management applications from anywhere on the web in a secure manner and tuned to the users preferences. An industry leading content management system allows the admin staff to add portlets for collaboration, communication as well as content creation that makes information exchange amongst network operator staff efficient and easy.

Dashboard and Monitoring Views: To ease the comprehension of the multitude of information generated in an LTE network, canned dashboards/portlets are provided that summarize the fault and service quality of the network. Monitoring and automated alarming of service level deviation is implemented that reduces the operator's work-load.

The 'Network Monitor' depicts the RAN elements on a topographical map with their real-time state information. This form of network state visualization enables the OSP operators to realistically and quickly comprehend the impact of service failures.

Fault Management: OSP provides a real time alarm/fault monitoring and notification application called Unified Event Manager (UEM). All network elements, backhaul, application servers and site/environmental alarms included as part of the Motorola Solutions global broadband product portfolio are consolidated into this integrated alarm/event stream using CORBA and SNMP interfaces. Alarms and faults are time stamped, localized to root-cause component, isolated to root cause failure, and correlated when possible. New correlation rules can be programmed as a service.

Salient features of fault manager are:

- Alarm History, Alarm Filtering, Alarm Details, Alarm Correlation
- Active Alarm View, Summary View, Network Explorer Tree View
- External Notifications, North Bound Interface
- Automated Discovery, Device Inventory

Note that correlation and the fault management toolkit are always optional. All other fault management features are standard when UEM/fault management is ordered, including the North Bound Interface.

Log Management: Provides centralized event log management and real-time monitoring of security events generated by the eNB, EPC Firewalls, DNS server, NTP server, EPC routers/switches, MME, EPG, HSS, PCRF, IMS sub-system, and any element that supports syslog. Log management also supports log correlation. Log correlation is essential when performing threat analysis, forensics, and overall system monitoring. Standard dashboards are included with the base product, as well as the capability to create custom dashboards. As with the other OSP functions, the log management UI (User Interface) is accessed via a web browser.

Unified Provisioning Manager (UPM): Provides a comprehensive subscriber provisioning solution for Motorola Public Safety and Private LTE systems. The Unified Provisioning Manager (UPM) provides a centralized location for network operators to provision devices with LTE, IMS, Priority Manager, VoIP, and WAVE PTT services. The UPM also creates a linkage between the UICC, various subscription identities and the subscriber. The UPM application is accessed via a web browser, and uses a Graphical User Interface (GUI) to add, delete, and modify users, as well as perform bulk "add" provisioning. This method of provisioning is far more efficient, user-friendly, and less error prone than the industry-standard Command Line Interface (CLI), resulting in lower total cost of operation for the network operator. The UPM can also be accessed via an optional Application Program Interface.

Backup And Restore (BAR): Provides a unified, consistent PS LTE network-wide backup solution that includes Motorola Solutions elements, Ericsson elements and selected third party elements. Restoring network elements to their end state becomes a simpler task in case of a disaster or a fault. Backup and Restore is a function that protects the customer's configuration data, provisioned data and files from loss in the event of a disaster or malfunction with network appliances and applications operating on the LTE network. The backup function provides a routine method to update and maintain data on such appliances and applications. Should a problem arise, the restore function can repopulate the network device application servers with the key data so that there is minimal or no disruption to the customer operations.

OSP GENERAL INFORMATION

The Operations Support Platform (OSP) is a mandatory subsystem of Motorola's Public Safety LTE (PS LTE) LXN 7000 solution. The OSP is a centralized platform for network management activities. It is available in a non-redundant or a redundant/geo-redundant configuration. There is also a migration option to move from non-redundant configuration to a redundant configuration.

The OSP is scaled for end-to-end management of a LXN 8100 system (core, RAN, and applications) with up to a maximum of 300K provisioned objects (UUICs, subscribers and devices) and 500 eNBs.

The Motorola Solutions LTE OSP uses industry-standard IT server and storage solutions. The non-redundant OSP deployment will require one HP server and one Seagate storage array configured as a RAID50 array. For BAR, the OSP uses a QNAP NAS.

All applications on the Motorola Solutions OSP server utilize virtualization to leverage the multi-core compute power on the servers.

The redundant configuration can be deployed in same geo-location, or in a geo-redundant mode (at geographically apart sites). The redundant configuration replicates the primary node. For example, the redundant configuration adds one more HP server and one more Seagate storage array.

GENERAL GUIDANCE ON POWER SUPPLIES

For all supermodels, the provided power supply for the HP server, Seagate storage array, and QNAP NAS is AC. If DC power supplies are preferred, please contact product management.

OSP ORDERING REQUIREMENTS

FOR A NEW (GREENFIELD) OSP, ORDER THE SUPERMODEL SQM01SUM0264D (BSR 4.X) AND SELECT CA03313AB (this includes):

- (Qty 1) OSP Server Hardware Kit
- (Qty 1) OSP 24TB DAS Hardware Kit
- (Qty 1) OSP Software Kit

And select following mandatory items:

Fault Management Options

'N' quantity of CA02603AA ('OSP eNB Licenses') equal to the number of eNBs in your network

FM bundle:

CA02590AA: FM (mediation 500 eNB, 100K users) Use this option if no GUI is required and the OSP needs to support a higher level Manager of Managers.

OR

CA02624AA: FM (UX 500 eNB, 100K users) Use this option if OSP provides GUI and there is no Manager of Managers (i.e. OSP is the highest level of management in the system). This option includes mediation capability.

Log Management Options

CA02704A LOG MGMT BUNDLE, 5GB SRVR, SYSDEF, WIN AGENTS, 500 ENB - contains 5 GB Log (Daily Throughput) Management Server, Syslog Defender, four Windows agents, support for up to 500 eNBs.

OR

CA02705AA LOG MGMT BUNDLE, 10GB SRVR, SYSDEF, WIN AGENTS, 500 ENB - contains 10 GB Log (Daily Throughput) Management Server, Syslog Defender, four Windows agents, support for up to 500 eNBs

OR

CA03393AA LOG MGMT BUNDLE, 20 GB SRVR, SYSDEF, WIN AGENTS, 500 ENB - contains 20 GB Log (Daily Throughput) Management Server, Syslog Defender, four Windows agents, support for up to 500 eNBs

OR

CA03394AA LOG MGMT BUNDLE, 50 GB SRVR, SYSDEF, WIN AGENTS, 500 ENB - contains 50 GB Log (Daily Throughput) Management Server, Syslog Defender, four Windows agents, support for up to 500 eNBs

OR

CA03399AA LOG MGMT BUNDLE, 100 GB SRVR, SYSDEF, WIN AGENTS, 500 ENB - contains 100 GB Log (Daily Throughput) Management Server, Syslog Defender, four Windows agents, support for up to 500 eNBs

AND OPTIONALLY ANY QUANTITY OF THE FOLLOWING

CA02706AA LOG MGMT WINDOWS AGENT - If additional Windows agents are required, select 'x' quantity of CA02706AA.

CA03442AA LOG MGMT LINUX AGENT - If Linux agents are required, select 'x' quantity of CA03442AA.

Unified Provisioning Manager (UPM) Options

Order UA00189AA: Unified Provisioning Manager, LTE System - Base software license for the Unified Provisioning Manager. This option must be ordered for initial or first time purchases of the Unified Provisioning Manager when LTE/IMS provisioning is needed. The base software license also includes the provisioning capability for Priority Manager, WAVE 7000, Secure VoIP, and IMW services when those products' respective licenses are purchased. See product catalog pages for those products for ordering details.

Select one of the following license options for LTE subscriber provisioning. For example, if 60,000 licenses are needed, for best pricing order 60,000 of

UA00191AA.

UA00190AA: Provisioning of LTE service 1,000 - 49,999

Select number of LTE subscriber provisioning licenses. Minimum quantity is 1,000 licenses. Maximum quantity is 49,999 licenses.

OR

UA00191AA: Provisioning of LTE service 50,000 - 99,999

Select number of LTE subscriber provisioning licenses. Minimum quantity is 50,000 licenses. Maximum quantity is 99,999 licenses.

Select one of the following license options for IMS subscriber provisioning.

UA00195AA: Provisioning of IMS service 1,000 - 49,999

Select number of IMS subscriber provisioning licenses. Minimum quantity is 1,000 licenses. Maximum quantity is 49,999 licenses.

OR

UA00196AA: Provisioning of IMS service 50,000 - 99,999

Select number of IMS subscriber provisioning licenses. Minimum quantity is 50,000 licenses. Maximum quantity is 99,999 licenses.

NOTE: The licenses above for LTE & IMS are for UPM provisioning use. Ericsson HSS has its own capacity licenses in progressive capacity bundles.

One for HSS HW/SW and another for IMS module.

FOR ADDING A REDUNDANT OSP NODE (EITHER AS A GREENFIELD OR ADDITION TO EXISTING NON-REDUNDANT NODE) ORDER THE SUPER MODEL SQM01SUM0293D (BSR 4.X) AND SELECT CA03313AB OSP (this includes):

- (Qty 1) OSP Server Hardware Kit
- (Qty 1) OSP 24TB DAS Hardware Kit
- (Qty 1) OSP Software Kit

And select following mandatory items:

Fault Management Options

'N' quantity of CA02949AA ('Redundant OSP eNB Licenses') equal to the number of eNBs in your network.

Redundant FM Bundle:

CA02947AA: Redundant FM (mediation 500 eNB, 100K users). Use this option if no GUI is required and the OSP needs support a higher level Manager of Managers.

OR

CA02948AA: Redundant FM (UX 500 eNB, 100K users) Use this option if OSP provides the GUI and there is no Manager of Managers (i.e. OSP is the highest level of management in the system). This option includes mediation capability.

Log Management Options (select second copy for redundant server):

CA02704A LOG MGMT BUNDLE, 5GB SRVR, SYSDEF, WIN AGENTS, 500 ENB - contains 5 GB Log (Daily Throughput) Management Server, Syslog Defender, four Windows agents, support for up to 500 eNBs.

OR

CA02705AA LOG MGMT BUNDLE, 10GB SRVR, SYSDEF, WIN AGENTS, 500 ENB - contains 10 GB Log (Daily Throughput) Management Server, Syslog Defender, four Windows agents, support for up to 500 eNBs

OR

CA03393AA LOG MGMT BUNDLE, 20 GB SRVR, SYSDEF, WIN AGENTS, 500 ENB - contains 20 GB Log (Daily Throughput) Management Server, Syslog Defender, four Windows agents, support for up to 500 eNBs

OR

CA03394AA LOG MGMT BUNDLE, 50 GB SRVR, SYSDEF, WIN AGENTS, 500 ENB - contains 50 GB Log (Daily Throughput) Management Server, Syslog Defender, four Windows agents, support for up to 500 eNBs

OR

CA03399AA LOG MGMT BUNDLE, 100 GB SRVR, SYSDEF, WIN AGENTS, 500 ENB - contains 100 GB Log (Daily Throughput) Management Server, Syslog Defender, four Windows agents, support for up to 500 eNBs

AND OPTIONALLY ANY QUANTITY OF THE FOLLOWING

CA02706AA LOG MGMT WINDOWS AGENT - If additional Windows agents are required, select 'x' quantity of CA02706AA.

CA03442AA LOG MGMT LINUX AGENT - If Linux agents are required, select 'x' quantity of CA03442AA.

Unified Provisioning Manager Options

Order UA00265AA: Unified Provisioning Manager Redundant LTE System License - Base software license for the Unified Provisioning Manager. This option must be ordered for initial or first time purchases of the Unified Provisioning Manager when LTE/IMS provisioning is needed. The base software license also includes the provisioning capability for Priority Manager, WAVE 7000, Secure VoIP, and IMW services when those products' respective licenses are purchased. See eCAT pages for those products on ordering details.

Select one of the following license options for LTE subscriber provisioning. For

example, if 60,000 licenses are needed, for best pricing order 60,000 of UA00267AA.

UA00266AA: Redundant: Provisioning of LTE service 1,000 - 49,999

Select number of LTE subscriber provisioning licenses. Minimum quantity is 1,000 licenses. Maximum quantity is 49,999 licenses.

OR

UA00267AA: Redundant: Provisioning of LTE service 50,000 - 99,999

Select number of LTE subscriber provisioning licenses. Minimum quantity is 50,000 licenses. Maximum quantity is 99,999 licenses.

Select one or more of the following license options for IMS subscriber provisioning.

UA00271AA: Redundant: Provisioning of IMS service 1,000 - 49,999

Select number of IMS subscriber provisioning licenses. Minimum quantity is 1,000 licenses. Maximum quantity is 49,999 licenses.

OR

UA00272AA: Redundant: Provisioning of IMS service 50,000 - 99,999

Select number of IMS subscriber provisioning licenses. Minimum quantity is 50,000 licenses. Maximum quantity is 99,999 licenses.

NOTE: The licenses above for LTE & IMS are for UPM provisioning use. Ericsson HSS has its own capacity licenses in progressive capacity bundles.

BACKUP AND RESTORE (BAR) ORDERING REQUIREMENTS

For adding BAR to a new, or an existing OSP, order the following items:

- TT3548A QNAP 2U 8-Bay NAS, Ryzen 5 2600 6-core NAS followed by qty 8 DDN2830A WD RED PRO 4TB SATA. 3.5inch, 256MB and DDN2831A QNAP RAIL KIT FOR 2U RACKMOUNT MODE
- For non-redundancy/primary node, order T8400A followed by:
 - UA00491AA (Feature License non-redundant)
 - This is the feature license for allowing usage of the centralized Backup & Restore application and allows for 1000 GB of disk storage.
 - UA00493AA UA00494AA Tier 1, 2 (Incremental License, non redundant)
 - This is incremental capacity license for LTE BAR. Each unit of this license will allow for 250 GB of additional disk storage.
- If customers choose option UA00493AA, they would be required to purchase a minimum of 1 license and could purchase up to a maximum of 10 licenses. If customers choose option UA00494AA, they would be required to purchase a minimum of 11 and could purchase up to a maximum of 45 licenses.
- For redundant node, order T8400A followed by:
 - UA00492AA (Feature License redundant)

This is the feature license for allowing usage of the centralized Backup & Restore application and allows for 1000 GB of disk storage.

- UA00495AA UA00496AA Tier 1, 2 (Incremental License, redundant)
 - This is incremental capacity license for LTE BAR. Each unit of this license will allow for 250 GB of additional disk storage.
 - If customers choose option UA00495AA, they would be required to purchase a minimum of 1 license and could purchase up to a maximum of 10 licenses. If customers choose option UA00496AA, they would be required to purchase a minimum of 11 and could purchase up to a maximum of 45 licenses.

NOTE:

The NAS is configured in RAID6 configuration.

A minimum of 4 HDDs are needed and they provide available capacity of 8 TB.

Any additional HDD will provide an additional capacity of 4 TB. So, 5 HDDs will give $8 + 4 = 12$ TB, 6 HDDs will give $8 + (4 \times 2) = 16$ TB.

Max 8 HDDs can be configured.

NAS = Network attached storage unit. It is connected to network via Ethernet. The models above do not contain any specific data cabling or transport.

OSP & UPM CAPACITY EXPANSION ORDERING REQUIREMENTS

1. For adding capacity and Agents to Log Management:

For each OSP node, order T8030A OSP SOFTWARE LICENSE KIT and choose quantity of 1 of one of the following options:

- CA02707AA: Log Management Upgrade, 5 GB to 10 GB
- CA03400AA: Log Management Upgrade, 5 GB to 20 GB
- CA03401AA: Log Management Upgrade, 5 GB to 50 GB
- CA03402AA: Log Management Upgrade, 5 GB to 100 GB

AND OPTIONALLY ANY QUANTITY OF THE FOLLOWING

- CA02706AA LOG MGMT WINDOWS AGENT - If Windows agents are required, select 'x' quantity of CA02706AA.
- CA03442AA LOG MGMT LINUX AGENT - If Linux agents are required, select 'x' quantity of CA03442AA.

NOTE: Windows and Linux Agents must be ordered with at least one of the following: CA02704AA, CA02705AA, CA02707AA, CA03393AA, CA03394AA, CA03399AA, CA03400AA, CA03401AA, CA03402AA.

2. For adding Log Management after initial OSP order:

For each OSP node, order T8030A OSP SOFTWARE LICENSE KIT, followed by:

- CA02704AA LOG MGT BUNDLE, 5 GB SRVR, SYSDEF, WIN AGENTS, 500 ENB - contains 5GB Log Management Server, Syslog Defender, four Windows agents, support for up to 500 eNBs.

OR

- CA02705AA LOG MGMT BUNDLE, 10 GB SRVR, SYSDEF, WIN AGENTS, 500 ENB - contains 10GB Log Management Server, Syslog Defender, four Windows agents, support for up to 500 eNBs.

OR

- CA03393AA LOG MGMT BUNDLE, 20 GB SRVR, SYSDEF, WIN AGENTS, 500 ENB - contains 20 GB Log (Daily Throughput) Management Server, Syslog Defender, four Windows agents, support for up to 500 eNBs

OR

- CA03394AA LOG MGMT BUNDLE, 50 GB SRVR, SYSDEF, WIN AGENTS, 500 ENB - contains 50 GB Log (Daily Throughput) Management Server, Syslog Defender, four Windows agents, support for up to 500 eNBs

OR

- CA03399AA LOG MGMT BUNDLE, 100 GB SRVR, SYSDEF, WIN AGENTS, 500 ENB - contains 100 GB Log (Daily Throughput) Management Server, Syslog Defender, four Windows agents, support for up to 500 eNBs

AND OPTIONALLY ANY QUANTITY OF THE FOLLOWING

- CA02706AA LOG MGMT WINDOWS AGENT - If additional Windows agents are required, select 'x' quantity of CA02706AA.
- CA03442AA LOG MGMT LINUX AGENT - If Linux agents are required, select 'x' quantity of CA03442AA.

NOTE: Windows and Linux Agents must be ordered with at least one of the following: CA02704AA, CA02705AA, CA02707AA, CA03393AA, CA03394AA, CA03399AA, CA03400AA, CA03401AA, CA03402AA.

3. For adding LTE or IMS capacity to a UPM:

For non-redundant/primary node, order T8163A, and order N qty for:

UA00190AA: 1000 - 49999 (LTE service)

UA00191AA: 50000 - 99999 (LTE service)

UA00195AA: 1000 - 49999 (IMS service)

UA00196AA: 50000 - 99999 (IMS service)

For redundant node, order T8163A, and order N qty for:

UA00266AA: Redundant 1000 - 49999 (LTE service)

UA00267AA: Redundant 50000 - 99999 (LTE service)

UA00271AA: Redundant 1000 - 49999 (IMS service)

UA00272AA: Redundant 50000 - 99999 (IMS service)

For additional licenses for Priority Manager, WAVE 7000, Secure VoIP, and IMW services, please see eCAT pages for those products on expansion ordering details.

For Subscriber Provisioning License orders of 100K or more, please contact [OSP Product Management](#).

OSP OPTIONAL FEATURES ORDERING REQUIREMENTS

1. For adding the Fault Management Toolkit licenses to a new or existing BSR 2.0 or higher OSP:

Each license purchased allows fault management of one node instance. Minimum order quantity for licenses is 100. Licenses must be ordered in bundles of 100. Total Fault Management Toolkit licenses supported per OSP node (either non-redundant/primary node or redundant node) is 2,000. If any of the following network elements are to be fault managed by OSP, then the option must be ordered: AXS6240 Sensor, Brocade 7800 Extension Switch, HP 3PAR Network Attached Storage (NAS for Voicemail), Metaswitch Voicemail, QNAP TVS-871 NAS, Site Boss 550, SS8 AIS Mediation Server, SS8 PTT Normalization Server, SS8 Xcipio Mediation Server, Microsemi NTP SyncServer S650, Wave 7000 Server, Mavenir (Xura) Message Controller (SMS server in the IMS).

- For non-redundant/primary node, order T8406A and T8294A, and order 'N' quantity in multiples of 100 for:
 - UA00260AA: Fault Management Toolkit License
- For redundant node, order T8406A and T8294A, and order 'N' quantity in multiples of 100 for:
 - UA00504AA: Redundant Fault Management Toolkit License

T8294A cannot be ordered in any other quantity of 1. Each instance of T8294A must be ordered on its own line item in quantity of 1.

2. For adding the Alarm Correlation Engine license to a new or existing R11.X or higher OSP:

The Alarm Correlation Engine supports a maximum of 100 correlation rules. Configuration of these rules is not provided with the Alarm Correlation Engine, but is offered as a service option.

- For non-redundant/primary node, order T8395A, followed by:
 - UA00490AA LTE Correlation Engine License
- For redundant node, order T8395A, followed by:

- UA00505AA Redundant LTE Correlation Engine License

T8395A cannot be ordered in any other quantity of 1. Each instance of T8395A must be ordered on its own line item in quantity of 1.

OSP SOFTWARE RELEASE KITS ORDERING REQUIREMENTS

- **For ordering the R9 UEM patch kit:**

For each OSP node (primary or redundant), order quantity 1 of:

CVN7215A UEM-R9.0 SUPPLEMENTAL

- **For ordering the R11.2 UEM patch kit:**

For each OSP node (primary or redundant), order quantity 1 of:

CVN7216A UEM-R11.2 SUPPLEMENTAL

- **For ordering the R11.3 (BSR2.0) UEM patch kit:**

For each OSP node (primary or redundant), order quantity 1 of:

CVN7217A UEM-R11.3 SUPPLEMENTAL

- **For ordering the R9 to BSR1.0/1.0+ software upgrade kit:**

For each OSP node (primary or redundant), order quantity 1 of:

T8393B OSP R9 TO R11 SOFTWARE UPGRADE KIT.

Also see T8607B below, which is needed for the BSR 2.0 upgrade if the original ESXi/iLO/BIOS installation media is not available.

- **For ordering the R11.2 to R11.3 (BSR2.0) software upgrade kit:**

For each OSP node (primary or redundant), order quantity 1 of:

CVN7126D OSP Application Software R11.3

- **For ordering the R11.3 (BSR2.0) OSP replacement software kit:**

For each OSP node (primary or redundant), order quantity 1 of:

T8607B OSP R11.3 REPLACEMENT SW MEDIA KIT.

This kit contains the R11.3 (BSR 2.0) OSP software media required for R11.3 (BSR2.0) OSP installation in the event that the original media is not available. It does not contain any licenses or royalties.

- **If upgrading from BSR 1.0 / BSR 2.0 to any BSR 4.X release (including BSR 4.3), the BSR4.0 OSP software kit must be ordered:**

For each OSP node (primary or redundant), order quantity 1 of:

T8393C OSP BSR4.0 SOFTWARE UPGRADE KIT

Each kit contains:

OSP Application BSR4.0 Software

Patches

BSR 4.0 Common Platform Software

5 Windows 2016 license kits, each of which contains 3 COAs (Certificate of Authenticity). So each T8393C contains 15 COAs.

1 Microsoft SQL Server 2016 Certificate of Authenticity

NOTE: Windows 2016 licenses must be applied without 180 days of BSR 4.0 or BSR 4.X LR2 upgrade.

NOTE: BSR 4.X LR2 OSP application software is not shippable by the factory. Please contact field engineering or project manager to obtain this software.

- **If upgrading from any release to BSR 4.3, the BSR4.3 OSP AND SNARE AGENT UPGRADE KIT must be ordered also. The BSR 4.3 OSP MEMORY UPGRADE KIT may also be required for your deployment -- PLEASE CHECK WITH PRODUCT MANAGEMENT IF YOU ARE UNSURE.**

For each OSP node (primary or redundant), order quantity 1 of:

T8393D BSR 4.3 OSP AND SNARE AGENT UPGRADE KIT

This kit contains the OSP software media required for BSR 4.3 OSP (and BSR 4.3 OSP SER3Q) installation and BSR 4.3 Snare royalties (for secure syslog) for all BSR products.

For ordering the BSR 4.3 OSP MEMORY UPGRADE KIT, please order:

TT3561A OSP MEMORY UPGRADE KIT

This kit contains the OSP memory upgrade. One kit is used to upgrade a complete set of geo-redundant OSPs (order one kit for every two OSPs deployed).

- **For ordering the BSR 4.0 OSP replacement software kit and/or the latest patch that addresses Quality Alert 4400:**

Please order:

T8607D OSP BSR 4.0 REPLACEMENT SW MEDIA KIT.

This kit contains the OSP software media required for BSR 4.X OSP installation in the event that the original media is not available. It does not contain any licenses or royalties. It also contains the patch that addresses Quality Alert 4400.

UPM OPTIONAL FEATURES ORDERING REQUIREMENTS

For ordering the UPM API (UPMI) license:

- For each UPM node (primary or redundant), order quantity 1 of T8296A, followed by

quantity 1 of:

- **UA00263AA** ADD: UPMI LICENSE

If Quantity 2 is desired for geo-redundant UPM, order two line items of Quantity 1 of T8296A.

NOTE: UPMI enables access to UPM via REST based API.

PLEASE READ: GENERAL NOTES AND NOTES ON CONFIGURATION SECTION

1. T8393C is not shown. Issue is under investigation by Product Catalog team. List price for T8393C is \$0. T8393C is confirmed as correctly set-up in COF as of Feb-21 2018 and is fully orderable.
2. Trial licenses are not available for OSP.
3. There are no HP HBA FRUs available for this product. It is not recommended for the field to stock or replace on their own HBAs. If a HBA needs to be replaced, then HP should be contacted for warranty or post-warranty support.
4. A Manager of Managers (MoM) is not available as part of the Global Broadband Product Portfolio. If a deployment requires a MoM, the region should supply.
5. OSP must be hosted on equipment provided. Hosting support on other MSI servers or data center servers is not supported at this time.
6. OSP models on this page cannot be used to manage LXN 6000, LXN 7100, or LXN 505 core and associated RAN equipment.
7. The region supplies its own preferred performance management solution for KPI collection and reporting of the LXN 8100 core and RAN; access to the regional solution can be configured via the OSP dashboard.

Operations Support System: Evolved Network Management (ENM)

Ordering Information

General Information

Evolved Network Manager (ENM) is the latest Operations Support System (OSS) solution. It provides unified network management of complete radio, CS & PS core, IMS and IP & Broadband network elements from a single GUI, which provides ease and smooth working the network. ENM is based on Integrated Hardware and Software and also based on a VMWare Integrated Openstack (VIO) platform. An O&M Backup and Restore system is also included in the solution for the backup and restore of servers in ENM deployments. ENM software is separated into layers, with the responsibilities for different aspects of the system such as mediation, data storage, business processing and presentation. Each of these layers is separately horizontally scalable and is based in part on JEE technologies. The use of industry-standard technologies, such as cloud and virtualization results in a much more flexible and leaner deployment.

Features

The ENM performs the following functions from a centralized GUI:

- Fault Management
- Configuration Management
- System Administration
- Performance Management
- Security Management

The major supported network versions in ENM are: OSS-RC performs the following O&M functions:

- Ericsson LTE radio network support (DUS/DUL, Baseband Series and pico)
- Ericsson WCDMA radio network support (RNC, DUS/DUW, Baseband Series and pico)
- WCDMA and LTE mixed mode operation
- Evo Controller 8300
- Ericsson GSM radio network support (BSC, Baseband Series)
- Ericsson Core network support (SGSN-MME, vMME, EPG, vSAPC, MGW)
- Ericsson Transport network support (MINI-LINK, R6000, Fronthaul 6080, Baseband T)
- Ericsson vCSCF, vMTAS, vSBG, vBGF, vMRF, EME, vWCG, HSS-FE, vIPworks, vUPG, BSP
- The AFG is supported via the SNMP interface.

Configuration

SINGLE NODE ENM:

For a new system purchase, order the following items:

HARDWARE:

ENM base kit HW, consisting of servers, switches, cables and connectors. Customer Access and Security System (CAS)/Remote Support Gateway (RSG), chassis and power. Order Quantity 1 per ENM system:

Description	Full Description	Nomenclature	APC	Price
ENM HW	-	DDN2551	053	\$447,240.00

GENERAL SW:

General SW, consisting of Cloud and Backup server SW and licenses. Order Quantity 1 per ENM system for each of the below:

Description	Full Description	Nomenclature	APC	Price
CLOUD SW AND LICENSES	-	DDN2552	053	\$68,960.00
BACKUP SERVER SW AND LICENCES	-	DDN2553	053	\$47,060.00

FEATURES:

EPC support for ENM. This is priced per kilo IP (kIP or 1000 IP) sessions. Order Quantity 1.75 X # of kIP sessions.

Description	Full Description	Nomenclature	APC	Price
EPC SUPPORT	-	DDN2554	053	\$480.00

IMS support for ENM. This is priced per kilo Active (kActive or 1000 Active) users. Order Quantity 0.75 x # of kActive users.

Description	Full Description	Nomenclature	APC	Price
IMS SUPPORT	-	DDN2555	053	\$850.00

RAN support per ENM. This is priced per sector. Order Quantity # of sectors per eNB X # of eNB to account for the total # of sectors.

Description	Full Description	Nomenclature	APC	Price
ACC NTWK SUP COMB LTE BP ADV MO SCR	-	DDN2560	053	\$990.00

FRONTHAUL network support per ENM. Order Quantity 1 per Fronthaul mode.

Description	Full Description	Nomenclature	APC	Price
TRANSPORT NETWORK SUPPORT FRONTHAUL	-	DDN2561	053	\$530.00

MICROWAVE network support per ENM. Order Quantity 1 per Microwave node.

Description	Full Description	Nomenclature	APC	Price
TRANSPORT NETWORK SUPPORT MICROWAVE	-	DDN2562	053	\$100.00

ROUTER 6000 network support per ENM. Order Quantity 1 per Router 6000 node.

Description	Full Description	Nomenclature	APC	Price
TRANSPORT NETWORK SUPPORT ROUTER 60	-	DDN2563	053	\$90.00

BASEBAND T network support per ENM. Order Quantity 1 per Baseband T node.

Description	Full Description	Nomenclature	APC	Price
TRANSPORT NETWORK SUPPORT BASEBANDT	-	DDN2565	053	\$90.00

SOUTHBOUND network support (example eMBMS) per ENM. Order Quantity 1 per integrated node.

Optimized Video Security

Ordering Information

General Information

The Optimized Video Security solution offering is comprised of a strategic selection of products from 3rd party suppliers that help our public safety customers get the most out of their current and future video investments. This solution offers a Video Management System from NICE Systems called NiceVision, a Physical Security Information Management System from VidSys called VidShield, a variety of cameras from Axis, Sony, Pelco and Bosch and switches and servers from HP.

If the cameras we've selected do not meet your customer's needs, please find the appropriate camera from one of these vendors and contact the business team to discuss getting that camera set up as a Motorola part.

You can use the Axis product selector tool to select the right Axis camera based on the features and functions required by your customer:

<http://www.axis.com/products/video/selector/index.php>

Axis also has a great selection of tutorials, design guides and design tools that you will find invaluable during the pre-sale phase of the project:

<http://www.axis.com/solutions/system.htm>

Configuration

POD1000 Video Surveillance Solution

The POD1000 Video Surveillance Solution (commonly referred to as “MotoPOD”) is designed to provide automated, reliable recording and management of surveillance video at any remote location. Video can be recorded locally in the POD1000 with the integrated video server and 500GB hard drive. This allows immediate, reliable edge recording of video, even when backhaul links may fail. This local recording also provides system design flexibility for users to integrate the POD with backhaul variants such as Fiber, Point-To-Point, Point-To-MultiPoint, and even Carrier WWAN to provide access to streaming video. A single POD1000 system can support multiple backhaul technologies.

The modular architecture of the POD1000 allows for technology flexibility based on customer need. This means the POD1000 can incorporate multiple current camera variants, for example, and also incorporate new technologies when future needs arise. While the standard POD100 includes video recording capabilities, non-recording version are also available. The POD accepts multiple inputs to accommodate new technology and features. This future-proofing provides years of useful service without unit replacement.

Operators will be able to work from the command center or other location and remotely connect to the POD1000. The user can view recorded video, make changes to the current configuration and manage the video data from the remote management console. This creates an efficient workflow for the user and allows other users faster access to video evidence for investigation and prosecution. The POD1000 system can also be power-cycled remotely, without the need to send personnel to its location. This brings significant benefits in terms of personnel safety and cost savings. VideoPOD Video POD ChicagoPOD Chicago POD

At initial launch the POD1000 is configured with Genetec Video Management Software (VMS). This allows for limited remote browser viewing functionality as a standalone device. A full system deployment (with multiple POD1000s) would require a Genetec Server with VMS to aggregate the multiple devices and facilitate viewing/management. Genetec Server and Server License required to provide a system level view is available separately.

Currently, described below are the three current shipping variants of the POD1000. Please contact the Product Team if a unique solution or version of VMS is needed meet customer requirements.

Recording Pelco/Genetec Fiberglass Enclosure: Fiberglass Enclosure with: MW810 Network Video Recorder, Axis Network I/O, Magnum Outdoor rated Edge Switch, Genetec License Video Management Software, Pelco Spectra HD series Network Camera

Non-Recording Pelco / Genetec Fiberglass Enclosure: Fiberglass Enclosure with: Axis Network I/O, Magnum Outdoor rated Edge Switch, Pelco Spectra HD series Network Camera

Non-Recording Fiberglass Enclosure Only with Managed Switch: Fiberglass Enclosure with: Managed Switch (Unit can be upgraded with Pelco camera available separately). Product can NOT be be upgraded to include recording functionality.

Networking Equipment

Power Over Ethernet (PoE) switches to power PoE cameras and GigE switches from HP used for general switching needs in the video system network are listed below with their model # and Motorola part #. Click on the model number to access product information.

Switch Type	Manufacturer and Model #	Mot Part #
8 Port PoE Switch (to power PoE cameras)	HP E2520G-8-PoE	DSHPSWI
Rack Shelf for 8 Port PoE Switch	Belkin RK5023	DSBELKIN
24 Port PoE Switch (to power PoE cameras)	HP E2910-24G-PoE	DSHPSWI
24 Port GigE Switch	HP E2510-24G	DSHPSWI
48 Port GigE Switch	HP E2510-48G	DSHPSWI

Networking Equipment

NiceVision -- Video Management System

NiceVision Net 2.0 is offered via 3 basic product packages making ordering and migrating to new features very easy. A basic rule of thumb in determining the package to order is... If the customer wants to perform analytics, order the Enterprise package, otherwise order the eXpress or Professional packages based on the number of cameras and concurrent users required.

If there is a requirement to have more than one NVR or to have a remote NVR on a separate server from the main application management server, then the Professional package must be ordered as the eXpress package does not support those architectures.

NiceVision eXpress – A single-server recording and management solution, optimized for small sites. The main features of NiceVision eXpress are:

- Single server solution

- Supports up to 64 cameras and 4 concurrent users

- Integration ready (1 SDK license included)

- Offered in bundles: 16/32/48/64 channels (a bundle includes site, channels, users and SDK

licenses)

NiceVision Professional – A multi-server recording and management solution, optimized for mid-sized deployments. The main features of NiceVision Professional are:

Supports multiple recorders

Supports up to 200 cameras and 20 users

Enables centralized and local Monitoring

Includes advanced features (optional) including VPO,CT and others

NiceVision Enterprise – A high-end recording and management solution, optimized for large scale deployments. The main features of NiceVision Enterprise are:

Optimal for large scale, multi site deployments

Supports unlimited number of cameras & users

Includes advanced resilience features

Analytics enabled

Advanced features are included as standard in channel price (VPO, CT, multicast and others)

NiceVision eXpress

NiceVision eXpress	NiceVision Part #
NICEVISION EXPRESS SOFTWARE 16 CAMS NiceVision eXpress Video Management & Recording solution. Includes licenses for 16 cameras, 16 audio-in channels, 2 concurrent users and 1 SDK connection.	NV-NVX-16CH
NICEVISION EXPRESS SOFTWARE 32 CAMS NiceVision eXpress Video Management & Recording solution. Includes licenses for 32 cameras, 32 audio-in channels, 2 concurrent users and 1 SDK connection.	NV-NVX-32CH
NICEVISION EXPRESS SOFTWARE 48 CAMS NiceVision eXpress Video Management & Recording solution. Includes licenses for 48 cameras, 48 audio-in channels, 4 concurrent users and 1 SDK connection.	NV-NVX-48CH
NICEVISION EXPRESS SOFTWARE 64 CAMS NiceVision eXpress Video Management & Recording solution. Includes licenses for 64 cameras, 64 audio-in channels, 4 concurrent users and 1 SDK connection.	NV-NVX-64CH

HP Servers for NiceVision and VidSys

Various server configurations are required to support the various software components in the video system network, such as the NiceVision Network Video Recorder (NVR) which collects and stores video from the cameras, the NiceVision Application Management Server (AMS) which manages the all NVRs in the system and the Central Storage Server (CSS) which is a central server for long term storage once video is removed from the NVRs. Any one of these servers can be used for VidSys depending on the customer's requirements. Various server configurations from HP are listed below with their model # and Motorola part #.

Server Type	Model and Specs	Mot Part #
	HP DL180 G6	

NICEVISION AMS -- STANDARD SITE (up to 500 cameras and up to 15 recorders)	1 x Xeon E5640 - 4 core 2.66 GHz 4 GB RAM 2 x 160 GB HDD Dual Power Supply DVD-ROM	DSHPDL180
NICEVISION AMS -- LARGE SITE (Number of cameras between 501- 8,500, OR Number of recorders between 15-600)	<u>HP DL180 G6</u> 1 x Xeon X5670 - 6 core 2.93 GHz 4 GB RAM 2 x 160 GB HDD Dual Power Supply DVD-ROM	DSHPDL180

HP Servers for NiceVision and VidSys

VidSys -- Physical Security Information Management System

The VidSys PSIM software collects information from all security systems and devices, analyzes the information to determine the underlying situation, displays the information (video, audio, text, maps, pictures and data) for instant verification, automatically presents the tools, information and policy instructions to resolve the situation, and then tracks and reports the results for compliance and investigative analysis.

To do this, the VidSys PSIM software provides an open standards web-based platform and applications that collect and correlate events from disparate security devices and information systems (video, access control, sensors, analytics, networks, etc.) and creates one common operating picture that automatically translates the resulting information into prioritized situations that can be visually verified in seconds.

Once a situation is confirmed, the software presents standard operating procedures with step-by-step instructions which update automatically as the situation evolves. From dispatching responders and communicating with field personnel, to locking or unlocking doors to streaming real time information and video to mobile devices, the VidSys PSIM software manages the situation. Once the situation is resolved, the software saves the history for future analysis.

The VidSys PSIM Software is the only web-based solution on the market today that provides all the necessary tools for real time dynamic situation management, that can track and change situations dynamically to respond to situation changes, and allows changes to security policies, devices, and maps without bringing down the system or loading new software on desktops.

The VidSys PSIM Software system includes three components: an Open PSIM Platform, RiskShield, and VidShield.

The Open PSIM Platform is an industry leading open software architecture that is the backbone of the VidSys software. The platform enables organizations to connect and leverage any number and variety of disparate physical security and information systems in their organization. By integrating these components into one seamless infrastructure, an organization has a Common Operating Picture of their entire security system allowing real time diagnosis, prioritization, and resolution of all security or business policy exceptions.

RiskShield is the application that enables situation awareness, management, and resolution according to standard business processes and policies. Situations are identified, analyzed and prioritized automatically and then all appropriate information is presented to an operator in an integrated display. In the same display, operators can view and manage all assets and critical details necessary to resolve the situation in real time including live and recorded video, alarms and events, communications and collaboration with field personnel, and map views. Additionally, organizations can easily translate policies in to step-by-step action plans for situation resolution, based on corporate policies and leverage out-of-the-box, post situation

reporting for compliance and investigative analysis.

VidShield is multi-vendor video management application that facilitates centralized utilization and management of deployed video assets and the selective presentation of live and recorded video streams. It enables tracking of an object thru recorded video as well as in real-time thru a network of security cameras. Together the Open PSIM Platform, RiskShield, and VidShield provide a complete situation awareness and management solution to effectively manage any security, business related, or emergency situation in real time “ across any industry.

Ordering Information

When pricing video components, here is the procedure to follow:

1. All cameras must be counted and priced as “cameras” .
2. Any cameras that have analytics (whether in the camera or through a server or otherwise, a count is taken and placed in or added to the two way sensor column of the calculator. This is an additional charge to cover the analytics in addition to the camera license charge.
3. NVR/DVRs are NOT counted.
4. If the cameras are managed through an NVR/DVR, only price a connector for the make and model of the NVR/DVRs involved. There is no reason to price connectors for the individual cameras if they are managed through an NVR/DVR.

Prior to quoting VidSys, it is important to understand what functionality the PSIM platform is expected to provide in the potential customer’s environment. If the requirement for the system is to just provide video aggregation from multiple video sources through a common interface then the VidShield application will provide that functionality. The information required to scope the effort would be the vendor names and version numbers of all the NVR’s that need to be aggregated. In addition, the number of cameras currently supported by each NVR is required to obtain the appropriate licensing.

If the requirement is to implement more advanced functionality such as correlation of multiple security events from sources such as access control, alarms, sensors or other physical security events then the quotation process becomes more complicated. The vendor names and version numbers of all the physical security elements need to be gathered prior to obtaining a quote. It is also necessary to document the rules to be applied to correlating the events and what actions need to be taken when an actual event takes place.

If the requirement is to provide a set of rules for how the security events are correlated and management of any resultant security event with a documented action plan then the RiskShield user application will be required. It is possible that VidShield and RiskShield can both be used for systems that need video aggregation and event correlation and management.

The pricing from VidSys can have a great deal of variability based on whether there is a device driver already in the VidSys library for the security element (NVR, sensor, alarm, etc) to be integrated into the system. If no device driver exists then it is necessary to get a quote for the development of the software which will be significantly more than the cost of licensing an existing one.

VidSys pricing is derived from several different categories depending on user requirements. The software license costs are for the base configuration plus any user applications, the number of cameras, and software drivers for any security elements that are included in the configuration. There is also a list of services that need to be priced such as installation, configuration, custom software development, and security rule development for correlating events and creating subsequent actions.

The VidSys platform also requires a dedicated server for operation of the system. It is possible to get a quotation for (N + 1) redundancy if the customer requires it. Since the platform operates only as a control device with no actual video being transferred or processed within VidSys a single server is adequate for all system sizes.

VidShield

VidShield	VidShield Part #	
<p>VIDSHIELD OPERATOR USER LICENSE</p> <p>The number of individual regular full time system users with full system functionality (typically all "Operator" users operate in a security command center environment).</p>	CVS-OUL	[

Outdoor Coverage Evaluation Service

Ordering Information

General Information

Radio coverage evaluation testing can be performed as proof of performance for newly installed radio systems and can also be used as a tool to aid in long range planning for the acquisition of new or the expansion of existing radio systems. The verification of radio coverage may also be beneficial to system users as radio systems age and their operational condition becomes questionable.

Coverage Verification Testing makes use of Motorola's FACTWare (sm) (Fully Automated Coverage Testing) equipment. FACTWare (sm) is a combination of hardware and software that is used for performing radio coverage surveys and executing coverage acceptance tests. It provides customers with an automated method to evaluate outdoor radio coverage over their service area by dividing the area into grids. Delivered signal strength in each grid is measured, recorded, and presented statistically and graphically to provide an objective evaluation of system operation.

For more information, please review the [Solution Resource Guide](#).

Ordering Requirements

- This product requires an authorized quotation from the service delivery organization. Contact your local Area Service Manager (ASM) or Customer Support Manager (CSM) for more details.
- **This product CANNOT be ordered directly through COF at this time.** This product must be ordered using the Services Pricing Configurator. Please contact your local ASM or CSM if you are interested in ordering this product. For a listing of ASMs/CSMs [click here](#).
- A Customer Support Plan must be created to provide detailed information to the customer regarding delivery of this service.

Model

PDR8000

Ordering Information

Features

All bands – VHF, UHF, 700 & 800 MHz

Wireline connection to Motorola Solutions consoles

Lightweight construction – Less than 28 lbs.

Durable construction for the most extreme conditions

Closed case operation with internal or external duplexer

General Information

The PDR8000 (Portable Digital Repeater), with its wireline interface, supports Digital Conventional features when connected to a Motorola console via DIU/CCGW interfaces. Support of existing interfaces enables the PDR8000 to be deployed quickly for the coverage challenges that many first responders face.

Applications

- Special Events
- Interoperability
- Dignitary protection

- In-building coverage

The PDR8000 is a replacement for the retired PDR 3500 portable repeater and allows for enhanced coverage. It supports interfaces to V.24 boundary devices (DIU/CCGW) for dispatch over a Digital Conventional channel.

PDR8000 Specs

- Output power 15 Watts post duplexer/20 Watts before
- AC/DC Power Operation: 12 VDC, 120 VAC or 220 VAC
- Length: 19.20" Width: 15.20" Height: 7.30"
- Weight 27.4 lbs./12.5 kg
- Programming software available on-line
- Optional External 5 Hour battery pack
- Internal Duplexer requires a valid TX and RX for factory tuning

Orderability Guidelines

Each PDR model requires the following:

- Accurate TX and RX frequencies for factory tuning needs
- One protective case color option (of three choices)
- One duplexer option, including the "No Duplexer" configuration

Performance Management Reports Service

Ordering Information

General Information

The Motorola Performance Management Reports Service transforms raw system data into actionable information. Using the information provided by the Performance Reports, a customer can help guide network activities for effective capacity planning, trend analysis, and network performance optimization. This enables effective decisions to optimize the usage of a customer's network to best meet their business needs and prevent misuse of critical resources. Performance Management Reports will enable a customer's network managers to evaluate the critical system load parameters on their system to show where and when system bottlenecks occur and to allow for accurate future system growth planning.

Features

Performance Management Reports report on various operational levels of the customer's system:

- Overall System Level
- Zone Level
- Site Level

The Performance Management Reports also report on various user partitions:

- Talkgroup Level
- Agency Level
- Individual User Level

Statement of Work

The customer Statement of Work for this Standard Service Product *CANNOT* be modified. All requests for modifications to STANDARD service products or the development of "custom" service products should be routed through the Solutions Planning process. Your first point of contact for these requests is your local Area Service Manager.

Statement of Work

Performance Management Reports [SOW](#)

Ordering Requirements

1. This product must be ordered using the Services Lifecycle (SLC) contract system. Please contact your local Area Service Manager (ASM) or Customer Support Manager (CSM) if you are interested in ordering this product.
2. This service is ordered on a system basis, regardless of the size of the system.
3. Enter the main line item as quantity one.
4. All dollar amounts reflect an annual one year pricing.

PMP (Point to Multi-Point) Portfolio

Ordering Information

Features

Point-to-Multipoint (PMP) solutions help municipalities and government agencies of all sizes realize the benefits of high-speed wireless connectivity. PMP systems can be deployed faster, easier and more cost-effectively, helping communities connect underserved areas, improve community safety with video surveillance, save tax dollars, empower public works and public safety departments to be more effective. PMP solutions are available in a variety of Unlicensed and Licensed bands which enable wireless broadband to send data, voice, and/or video simultaneously. These solutions are cost effective, easy to deploy, reliable, and can be configured in a way that best suits your customer's needs.

General Information

The Secure, Flexible, Reliable Wireless Solution for Extending Broadband Networks

In the burgeoning but demanding broadband marketplace, the Motorola PMP platform offers state-of-the-art wireless technology with significant benefits that enhance the broadband experience for a wide range of providers and end users. The system's performance makes high-demand technologies like voice over IP, video services, security surveillance, broadband Internet access and more both effective and cost-effective.

Interference Resistance. The Motorola PMP solution's unique and powerful modulation scheme significantly improves the quality of data delivery and effectively mitigates interference from other systems of virtually every shape and spectrum.

Data Rates. The point-to-multi-point system offers up to 40Mbps (aggregate data rates) to network end users.

Operating Ranges. The Motorola PMP platform offers last mile broadband access for networks of various sizes and coverage areas. A single point-to-multipoint system can cover a range of up to 20 miles.

Scalability. As the density of global networks increases, clean channels become more scarce. With frequency reuse enabled by GPS Synchronization, your network can reuse the same channels across the entire network, growing where others can't.

Security. The Motorola PMP system enhances security with over-the-air DES (Data Encryption Standard) encryption that provides 128-bit encryption to ensure secure data delivery and exceptional reliability. In some areas, the platform is also available with AES (Advanced Encryption Standard) capabilities that make it virtually impossible to crack a

code.

Video Ready. Streaming video applications demand a lot from today's networks, and their popularity only grows. PMP and ePMP are built to ensure great quality of service for video, letting your customers enjoy IPTV undisturbed.

One Point Wireless Outdoor Suite Software

The One Point Wireless Suite is a set of powerful software solutions that help design, deploy, manage wireless networks. The suite's design tools help optimize equipment spend and ensure reliable coverage for most demanding application through the use of advanced prediction engines and intuitive 3-D user interface. The suite's holistic and intuitive management tools help organizations maximize uptime and availability for trusted networking by using breakthrough network visualization technology that enables network administrators to monitor and control the performance of their outdoor wireless network.

Network Management Tools:

Wireless Manager- is a deployment and management solution that provides a holistic view of the entire outdoor wireless network. This management system allows you to respond quickly to issues and maximize uptime and user trust in wireless networks.

Wireless Manager Features:

The Wireless Manager is a highly advanced network management system and offers tremendous values to organizations. Key differentiators are the following :

1. Live Google Map visualizations
2. rich Google maps functionality including street view, local search, network device search and Google local search
3. One Common interface for management and monitoring of Mesh, Point to Point (PTP), Point to Multipoint (PTM)
4. Template based Configuration enables user to quickly configure new devices resulting in fewer errors and an accelerated deployment
5. These version will have the ability to replace the Prizm element license functionality
6. Enhanced and improved dashboards and Google Maps
7. Increased scalability of network elements from 5K to 10K
8. Heat Display imports from Broadband Planner
9. High Availability option which allows users to have a redundancy server
10. Ultra thin client which allows users to view alarms and monitor system through their smartphone other than configuration changes.

Configuration

PMP 450 High performance, synchronization and low latency modules for access and backhaul

- FREQUENCY AVAILABILITY: 900 MHz, 2.4 GHz, 3 GHz, 5 GHz
- THROUGHPUT: Over 250 Mbps
- LATENCY: 3 - 5 msec
- FLEXIBLE CHANNEL WIDTH: 5, 7, 10, 15, 20, 30 or 40 MHz
- DYNAMIC ADAPTIVE MODULATION: QPSK, 16QAM, 64QAM, and 256 QAM
- SYNCHRONIZATION: GPS Synchronization for scalability
- SECURITY: FIPS-197 128-bit AES, SNMPv3, HTTPS

Policy and Charging Rules Function (PCRF)

Ordering Information

General Information and Features

- The Policy and Charging Rules Function (PCRF) provides real-time network, application, and subscriber policy control that allows service providers to manage mobile data growth and deliver personalized services by applying dynamic QoS (Quality of Service) to IP flows.
- PCRF is designed to be the central policy node in the network of a Public Safety Agency, coordinating the nodes in the transport domain to behave according to the defined policies of the operator.
- PCRF allows Public Safety agencies to manage mobile data traffic by applying real-time bandwidth controls that adapt to changing network conditions and subscriber context.
- PCRF supports subscriber policy capabilities that give Public Safety agencies direct control over their agency users' mobile usage, including: tracking real-time data, SMS, applications usage, and setting personalized limits.
- PCRF applies subscriber and service-centric policy control capabilities to mobile broadband, mobile IMS (IP Multimedia System), and SAE (System Architecture Evolution). The main policy types supported are related to service access control, QoS control, and charging control.
- These policy types can be statically configured, or dynamically generated through real-time integration with application functions like IMS applications.
- Default and dedicated bearers to provide for subscriber and service differentiation.
- PCRF provides support for network-initiated QoS control by managing dedicated bearers.
- PCRF provides support for Voice over LTE (VoLTE) offering.
- PCRF provides a fully redundant node architecture reaching 5X9s availability.
- IP Sessions are calculated based on the number of APNs (Access Point Names) required for the network. For example, if there is a default APN and IMS APN, you will need 2 IP sessions per subscription. This has to be worked with the design engineer who is working the deal.
- For additional information, please see the product data sheet at http://compass.mot-solutions.com/doc/489309017/Product_SPEC_SHEET_PCRF.pdf.

Configuration

New System Ordering Guidelines

A new PCRF system can be ordered as a package/bundle of both software and hardware. PCRF is licensed, based upon the number of IP sessions. Please choose from one of the following when ordering a new PCRF system:

Description	Full Description	Nomenclature	APC	Price
-------------	------------------	--------------	-----	-------

PCRF HW/SW 5K IP SESSIONS	-	DDN1834	054	\$210,710.00
SAPC HW/SW 10K IP SESSIONS	-	DDN1835	054	\$262,920.00
PCRF HW/SW 25K IP SESSIONS	-	DDN1836	054	\$339,790.00
PCRF HW/SW 50K IP SESSIONS	-	DDN1837	054	\$462,130.00
PCRF HW/SW 100K IP SESSIONS	-	DDN1838	054	\$679,100.00
PCRF HW/SW 250K IP SESSIONS	-	DDN1839	054	\$1,298,580.00
PCRF HW/SW 500K IP SESSIONS	-	DDN1840	054	\$2,163,980.00
PCRF HW/SW 1M IP SESSIONS	-	DDN1841	054	\$3,616,590.00

Existing System Capacity Expansion Guidelines

When ordering a PCRF user license capacity expansion for an existing system, please choose from one of the following item numbers listed below. Please note that capacity expansions can only occur as mentioned. If the capacity expansion needs to span multiple steps, then all steps in between need to be accounted for. For example, if a capacity expansion is needed for 5K to 25K, then 5K to 10K and 10K to 25K need to be accounted for.

Description	Full Description	Nomenclature	APC	Price
PCRF HW/SW FROM 5K TO 10K IP SESSIONS	-	DDN1842	054	\$57,440.00
PCRF HW/SW FROM 10K TO 25K IP SESSIONS	-	DDN1843	054	\$84,560.00
PCRF HW/SW FROM 25K TO 50K IP SESSIONS	-	DDN1844	054	\$134,590.00
PCRF HW/SW FROM 50K TO 100K IP SESSIONS	-	DDN1845	054	\$238,670.00
PCRF HW/SW FROM 100K TO 150K IP SESSIONS	-	DDN1846	054	\$271,820.00

PCRF HW/SW FROM 150K TO 250K IP SESSIONS	-	DDN1847	054	\$406,300.00
PCRF HW/SW FROM 250K TO 350K IP SESSIONS	-	DDN1848	054	\$419,330.00
PCRF HW/SW FROM 350K TO 500K IP SESSIONS	-	DDN1849	054	\$531,320.00
PCRF HW/SW FROM 500K TO 750K IP SESSIONS	-	DDN1850	054	\$820,650.00
PCRF HW/SW FROM 750K TO 1M IP SESSIONS	-	DDN1851	054	\$772,400.00

Spares

The recommended PCRF spare parts package for this system includes one of each of the following:

Description	Full Description	Nomenclature	APC	Price
DUST FILTER UNIT FOR BFD 538	-	DDN1863	054	\$1,010.00
GEP3-24GB NODE MANAGEMENT/APPLICATION LOADER	-	DDN1864	054	\$26,244.00

**Programming Over P25 (POP25)
for ASTRO® 25 Trunking
Integrated Voice & Data (IV&D) Systems**

Ordering Information

General Information

Motorola's POP25 solution is a feature that is offered on the ASTRO 25 Trunking and Conventional Integrated Voice & Data (IV&D) System. The POP25 feature allows a customer to configure a radio remotely from his/her enterprise network by sending a sequence of commands over-the-air via the ASTRO 25 IV&D system. It is expected that POP25 will significantly reduce the operational costs of IV&D radios by configuring personalities, talkgroups, channels, sites, etc in a radio without physically touching the radio. POP25 can update a radio that is available anywhere within the coverage area of the radio's home system.

System Components:

The POP25 Solution consists of the following components:

1. **ASTRO 25 Integrated Voice & Data (IV&D) System:** The POP25 solution uses the ASTRO 25 IV&D system's data pipe to transport the radio configuration information.
2. **Compatible POP25 XTS & XTL Subscribers:** POP25 will initially be supported on the XTS/XTL 5000 and XTS/XTL 2500. This feature is also supported on the XTS/XTL 1500. The Packet Data and POP25 options must be enabled in the subscriber radio to allow POP25 capability.
3. **CPS:** The latest version of CPS (R09.00.00 or later) must be running on a PC in the customer network. For Conventional systems CPS version R12.00.00 or later is required.
4. **Advanced System Key:** The Advanced System Key is a physical hardware key that grants access to the POP25 feature. It is connected to a parallel port or USB port of the PC running the Customer Programming Software (CPS). The CPS will verify the proper key is attached before every read, write, and clone operation.
5. **ASTRO 25 Presence Notifier Application:** The ASTRO Presence Notifier Application provides the presence, absence, and routing information of two-way portable and mobile subscriber radios to any compatible data applications located in the Customer Enterprise Network (CEN). It interfaces with data applications and subscriber radios using User Datagram Protocol / Internet Protocol (UDP/IP).

Refer to the Presence Notifier Services document for more information which can be [obtained here](#).

Ordering Instructions

These pages will lead you through the necessary ordering steps required to enable POP25 on an ASTRO 25 Trunking IV&D System.

NOTE: The information provided is from a system level. Provided below is the MINIMUM system compatibility requirements. For more product level details, please refer to each of the individual product pages.

ASTRO 25 IV&D System (REQUIRED)

The POP25 feature uses the ASTRO 25 Trunking IV&D system's data pipe to transport the messaging information.

For ASTRO 25 IV&D Systems, a Data Infrastructure is **REQUIRED**, some of components include, but are not limited to the following:

Trunking

Packet Data Gateway (PDG)

Conventional

Radio Network Controller (RNC)

[GSM Gateway Support Node \(GGSN\)](#) [Wireless Network Gateway \(WNG\)](#)

ASTRO 25 Portable and Mobile Subscribers- UPFRONT

The POP25 feature is available on select ASTRO 25 portable two-way and mobile subscriber radios and **MUST** have Customer Programming Software (CPS) and Radio Software Version R09.00.00 or later for trunking IV&D systems and Radio Software Version R12.00.00 or later for Conventional IV&D systems.

STEP 1:

Order the **XTS 5000/2500/1500 Portable Radio(s)**. Click on the links below to be redirected to the XTS 5000/2500/1500 price pages.

- [ASTRO Digital XTS 2500 700/800MHz](#)

[ASTRO Digital XTS 1500 700/800MHz](#)

[ASTRO Digital XTS 1500 VHF](#)

[ASTRO Digital XTS 1500 UHF](#)

NOTE:

- POP25 is supported on all XTS 5000/2500/1500 models (I / 1.5 / II / III)
- XTS 1500 does not support POP25 capability on Conventional systems
- **REQUIRED** to order ASTRO Digital CAI Operation (Q806), SmartZone Operation (H38)
- **REQUIRED** to order for **XTS 5000** is ASTRO Project 25 Trunking Software Enhancement (Q361)
- **REQUIRED** to order for **XTS 2500/1500** is ASTRO Project 25 Trunking Software (Q574)
- **REQUIRED** to order Packet Data Interface (Q947)
- **REQUIRED** to order POP25 Capability (G996) to enable the POP25 feature
- **REQUIRED** to order encryption for Conventional IV&D systems, not required for Trunking systems.
- ADP encryption is not supported for POP25 operation on conventional systems.

Order the **XTL 5000/2500/1500 Mobile Radio(s)**. Click on the links below to be redirected to the XTL 2500/5000/1500 price pages.

NOTE:

- POP25 is supported on all XTL 5000/2500/1500 models
- XTL 1500 does not support POP25 capability on Conventional systems.
- **REQUIRED** to order for **XTL 5000/2500** is ASTRO Digital CAI Operation (G806); SmartZone Operation (G51), and ASTRO Project 25 Trunking Software Enhancement (G361)
- **REQUIRED** to order for **XTL 5000/2500** Packet Data Interface (Q947)
- **REQUIRED** to order for **XTL 1500** is the 9600 ASTRO DIGITAL ENHANCED package (G964) which includes the Packet Data Interface functionality
- **REQUIRED** to order POP25 Capability (Q996) to enable the POP25 feature
- **REQUIRED** to order encryption for Conventional IV&D systems, not required for Trunking systems.
- ADP encryption is not supported for POP25 operation on conventional systems

ASTRO 25 Portable and Mobile Subscribers - Fielded Upgrades

Requirements for **UPGRADING** an existing mobiles and portables to support POP25

STEP 2:

If adding POP25 to an XTS/XTL 5000/2500 radio that already exists in the field, click on the below links to be redirected to the FLASHport Aftermarket Upgrade price pages.

NOTE:

- The upgrade to add POP25 (G996) is software ONLY.
- The subscriber is required to have ASTRO 25 Trunking IV&D and Packet Data capability. If not, the subscriber needs to be updated to include this functionality.

PORTABLES

- [ASTRO Digital XTS 5000 FLASHport Upgrade](#)
- [ASTRO Digital XTS 2500 FLASHport Upgrade](#)
- [ASTRO Digital XTS 1500 FLASHport Upgrade](#)

MOBILES

- [ASTRO Digital XTL 5000 FLASHport Upgrade](#)
- [ASTRO Digital XTL 2500 FLASHport Upgrade](#)
- [ASTRO Digital XTL 1500 FLASHport Upgrade](#)

Advanced System Key

The Advanced System Key is a physical hardware key that grants access to the POP25 feature. It is connected to a parallel port or USB port of the PC running the Customer Programming Software (CPS). The CPS will verify the proper key is attached before every read, write, and clone operation.

For more information on the Advanced System Key refer to the [following presentation](#).

STEP 3:

Order the Advanced System Key kit using the [ASK price page](#).

ASTRO 25 Presence Notifier Application

The ASTRO Presence Notifier Application provides the presence, absence, and routing information of two-way portable and mobile subscriber radios to any compatible data applications located in the Customer Enterprise Network (CEN).

STEP 4:

Order the Presence Notifier using the [Presence Notifier price page](#).

Manuals

When ordering QUANTAR FLASHport Upgrades use one the following model numbers:

- SQM01SUM0130 Software & Hardware Upgrades
- T6693 Software Only Upgrades

More information on these model numbers can be found in the following eCat Price Pages:

- Main folder: Software Upgrades & FLASHport
- Infrastructure FLASHport Upgrades Folder
- QUANTAR Software & Hardware Upgrade Folder
- [Software Upgrades/FLASHport](#)
- [Software & Hardware Upgrades/FLASHport](#)

For copies of the User Guides and Manuals associated with POP25, visit Motorola Online and download the appropriate documents.

Downloading instructions:

Ø **Go to Motorola Online** <https://motonline.mot.com/Login.aspx>

ü Select Resource Center from the Top Panel

Ø **Click on Resource Center**

Ø Search for a **User Guide and/or Manual from the list:**

Presence Services

Ordering Information

Product Information

Important: the location services and presence services price pages will be deleted on 10/3/16. location services and presence service client is not cancelled, the location and presence services converged service client bundles are now part of the uns price pages. therefore, when you order the uns, access to the client is included. the client then needs to be downloaded from the googleâ play store. if a windows version of the client is required, order via the window converged services client option on the uns.

Contact Name: Cathal Tierney

Presence Services provides the ability to share user and device presence related information to applications on the network. Presence Service has a server and client component. The presence service client uses the existing status bar that provides a user the ability to set their presence state manually (available and busy) and updates server. It also allows users to report user name or alias, type of device(s) associated with user, device(s) IP address, collaborative device attached, etc to the network

General Deployment Information

OFFERED HARDWARE:

Hewlett-Packard DL380 G9 server running Windows Server 2012 R2 and fully configured by Motorola.

SUPPORTED DEVICES/CLIENTS:

LEX 755: (Jellybean), LEX L10 (Kit Kat), LEX L10i, BYOD/Non-MSI Android devices, MDTs/Laptops: Windows 7.

CAPACITY:

Presence server (HW) supports 1000 updates per second or 10,000 users updating once every 10 seconds (10K devices on presence server with best case of reporting 1000 users/sec). Additional servers should be ordered to support larger capacity requirements (exceed 10K active user requirement).

NOTE: When installing in an agency, additional accessories (firewall and switches) are needed. Please refer to the following Information page: [Agency Configuration](#)

Ordering Information and Requirements

REQUIRED: Hardware

1. **Hardware:** Priority Manager, Location Services and Presence Services share same hardware. Do not purchase/order separate server hardware if your customer already purchased Priority Manager or Location Services. For ordering new hardware please refer to Priority Manager eCAT page: [PRIORITY MANAGER](#).
1. **Server Capacity License:** In order to activate Presence Services on server side, you must purchase licenses for UNS Presence Services. For information on part numbers and price, please refer to the UNS eCAT page:[UNS](#)
1. **Client Licenses:**

NOTE: App Central client will be branded as Converged Services client going forward.

3.1 LEX 755:

The Presence Services client is part of App Central client (App Central client is a software package/bundle of Priority Manager client, Location Services client, Presence Services client, Quick Action Button client and Radio Remote Control client. Each client/functionality is activated based on licensing, and customer needs to purchase each application separately).

App Central Client is pre-loaded on LEX 755 Android devices. In order to activate and use Presence Services client, customer needs to order/purchase both client licenses stated below.

Ordering Guide	
LEX 755 Presence Services Client License	Option T8080A must be selected, followed by UA00127AA (0\$) with the required amount of client licenses. Please order T8327A, followed by the needed bundle below.

3.2 LEX L10, LEX L10i:

The Presence Services client is part of Converged Services Client (Converged Services Client is a software package/bundle of Priority Manager client, Location Services client and Presence Services client. Each client/functionality is activated based on licensing, and customer needs to purchase each application separately).

In order to activate and use Presence Services client, customer needs to purchase client license under T8327A. Please order T8327A, followed by the needed bundle below.

3.3 Generic/BYOD/Non-MSI Android:

Presence Services client is part of Generic/BYOD Converged Services client available on Google Play Store (Converged Services Client is a software package/bundle of Location Services client and Presence Services client. Each client/functionality is activated based on licensing, and customer needs to purchase each application separately).

In order to activate and use Presence Services client, customer needs to purchase license under T8327A. Please order T8327A, followed by the needed bundle below.

3.4 Windows 7:

App Central client is a post-load application, and in order to use Presence Services client, customer needs to purchase and load App Central Client on MDT/laptop. One software CD will be shipped. (NOTE: App Central Client may already be loaded on MDT/laptop if your customer already uses Priority Manager and/or Location Services. You still need to order/purchase both below licenses to use Presence Services Functionality).

	Ordering Guide
Windows Presence Services Client License	<ul style="list-style-type: none"> Option T8080A must be selected followed by CA02602AA (0\$) with the required amount of client licenses. Please order T8327A, followed by the needed bundle below.

PRIORITY MANAGER

Ordering Information

Features

Priority Management, an application function, is an integral part of the QoS (Quality of Service) solution. The solution is designed as an agency level application to prioritize data based on the users roles, agency affiliation and applications. Priorities can also be dynamically elevated for all responders assigned to an incident, via an included Priority Management (aka QoS Web) Portal application or an agency Computer Aided Dispatch (CAD) application.

Priority Management functionality is available in 2 tiers:

- TIER-1 software - Enables QoS management based on Application, Agency and Role.
- TIER-2 software - Enables QoS management based on Incident.

General Deployment Information

OFFERED HARDWARE:

Hewlett-Packard DL380 G9 server running Windows Server 2012 R2. Platform is fully configured by Motorola.

SUPPORTED DEVICES/CLIENTS:

LEX L10 (Android), LEXL10i (Android), MDTs/Laptops: Windows 7/10.

CAPACITY:

Priority Manager Server (HW) supports up to 45,000 provisioned users, of which 60% or 27,000 users can be active. Additional servers should be ordered to support larger capacity requirements (exceed 27K active user requirement).

NOTE: When installing in an agency, additional accessories (firewall and switches) are needed. Please refer to the following Information page: [Agency Configuration](#)

REDUNDANCY:

Priority Manager Server is offered in multiple redundancy options:

- Non-redundant
- Locally Redundant (N+1, where N is the number of servers required for Capacity, and 1

the additional server for Redundancy. N is a minimum of 1).

- Geo-redundant (N+1 at each site, where N is the number of servers required for Capacity, and 1 the additional server for Redundancy. N is a minimum of 1). Geo-Redundant is always offered with Locally Redundant.

Ordering Information and Requirements

Required: Hardware, Tier License, Server Capacity License and Client License

Dependencies:

- Priority Manager requires Intelligent Middleware (IMW 5.x series or later) to operate - this (HW and SW) must be ordered and licensed separately. Specifically, PCM software, Presence, Identity Management and Common Address Book (CAB) services from IMW are used. This must be ordered separately - please see the IMW eCAT page for ordering guidelines: [IMW](#). Only the following items from IMW are required by Priority Manager (please also check with the Priority Manager Product Manager to discuss IMW quantities required and pricing for the software elements):
 - UNS Software (includes PCM, required for Priority Manager configuration)
 - LTE Network Interface Licenses
 - Presence Resource Licenses
 - Identity Manager Resource Licenses (includes CAB)
- Priority Manager uses the OSP (order R11.0 or later) UPM (Unified Provisioning Manager) software for centralized provisioning of users, roles. This must be ordered separately (OSP HW and UPM SW) - please see the Operations Support Platform eCAT page for ordering guidelines: [OSP](#).
- Priority Manager solution uses the QoS (Priority Management) Client software, which is provided as part of the MSI Cockpit (formerly Converged Services) Client available from the Android Playstore and/or the MSI IMW/Enablement team. This must be ordered separately - please see the IMW/Client eCAT pages for ordering guidelines: [IMW](#).

1. New System: Non-Redundant Hardware, Priority Manager Server Licenses (refer to Section 7 for client order):

	Ordering Guide
Hardware and Software Kit	Select SQM01SUM0245 (Quantity 1), followed by: CA02230AA. (Order a quantity equal to the number of servers required for Capacity).
Priority Manager Server Licenses (Software and Server Capacity), if Tier 1	Select UA00361AA (500) or UA00362AA (1K) or UA00363AA (5K) or UA00364AA (10K) or UA00365AA (25K) or UA00366AA (50K) or UA00367AA (100K)
Priority Manager Server Licenses (Software and Server Capacity), if Tier 1 and Tier 2	Select {UA00361AA and UA00368AA (500)} or {UA00362AA and UA00369AA (1K)} or {UA00363AA and UA00370AA (5K)} or {UA00364AA and UA00371AA (10K)} or {UA00365AA and UA00372AA (25K)} or {UA00366AA and UA00373AA (50K)} or {UA00367AA and UA00374AA (100K)}

2. New System: Locally Redundant Hardware, Priority Manager Server Licenses (refer to Section 7 for client ordering) - only one Local Redundancy SW license needs to be purchased per Priority Manager system:

	Ordering Guide
Hardware and Software Kit	Select SQM01SUM0245B (Quantity 1) followed by: CA02230AB (Order a quantity equal to the number of servers required for capacity, and 1 additional, for Redundancy.)
Priority Manager Server Licenses (Redundancy, Software and Server Capacity), if Tier 1	Select UA00375AA (Local Redundancy Tier 1 SW License); Select UA00361AA (500) or UA00362AA (1K) or UA00363AA (5K) or UA00364AA (10K) or UA00365AA (25K) or UA00366AA (50K) or UA00367AA (100K)
Priority Manager Server Licenses (Redundancy, Software and Server Capacity), if Tier 1 and Tier 2	Select UA00375AA and UA00376AA (Local Redundancy Tier 1 and Tier 2 SW Licenses); Select UA00361AA and UA00368AA (500)} or {UA00362AA and UA00369AA (1K)} or {UA00363AA and UA00370AA (5K)} or {UA00364AA and UA00371AA (10K)} or {UA00365AA and UA00372AA (25K)} or {UA00366AA and UA00373AA (50K)} or {UA00367AA and UA00374AA (100K)}

3. New System: Geo-Redundant Hardware, Priority Manager Server Licenses (refer to Section 7 for client ordering) - only one Geo-Redundancy SW license needs to be purchased per Priority Manager system):

	Ordering Guide
Hardware and Software Kit	Select SQM01SUM0245B (quantity 1) followed by: CA02230AB. (Per site, order a quantity equal to the number of servers required for capacity, and 1 additional, for Redundancy).
Priority Manager Server Licenses (Redundancy, Software and Server Capacity), if Tier 1	Select UA00375AA and UA00377AA (Local and Geo-redundancy Tier 1 SW licenses); Select UA00361AA (500) or UA00362AA (1K) or UA00363AA (5K) or UA00364AA (10K) or UA00365AA (25K) or UA00366AA (50K) or UA00367AA (100K)

Priority Manager Server Licenses (Redundancy, Software and Server Capacity), if Tier 1 and Tier 2	Select UA00375AA and UA00376AA and UA00377AA and UA00378AA (Local and Geo-redundancy Tier 1 and Tier 2 SW licenses); Select {UA00361AA and UA00368AA (500)} or {UA00362AA and UA00369AA (1K)} or {UA00363AA and UA00370AA (5K)} or {UA00364AA and UA00371AA (10K)} or {UA00365AA and UA00372AA (25K)} or {UA00366AA and UA00373AA (50K)} or {UA00367AA and UA00374AA (100K)}
---	--

4. Upgrade: Non-Redundant to Locally Redundant Hardware, Priority Manager Server Licenses (refer to Section 7 for client ordering):

	Ordering Guide
Hardware and Software Kit	Select SQM01SUM0245B (Quantity 1) followed by: CA02230AB. (Order a minimum of 1 for redundancy).
Priority Manager Server Licenses (Redundancy, Software), if Tier 1 and Tier 2	Select UA00375AA (Local Redundancy Tier 1 SW license)
Priority Manager Server Licenses (Redundancy, Software), if Tier 1 and Tier 2	Select UA00375AA and UA00376AA (Local Redundancy Tier 1 and Tier 2 SW licenses)

Refer to Section 8 if also upgrading from Tier 1 to Tier 2 and/or if adding additional server capacity.

5. Upgrade: Locally Redundant to Geo-Redundant, Priority Manager Server Licenses (refer to Section 7 for client ordering):

	Ordering Guide
Hardware and Software Kit	Select SQM01SUM0245B (Quantity 1) followed by: CA02230AB. (Order a quantity equal to the number of servers required for capacity, and 1 additional, for Redundancy.)
Priority Manager Server Licenses (Redundancy, Software), if Tier 1 and Tier 2	Select UA00377AA (Geo-Redundancy Tier 1 SW License)
Priority Manager Server Licenses (Redundancy, Software), if Tier 1 and Tier 2	Select UA00377AA and UA00378AA (Geo-redundancy Tier 1 and Tier 2 SW Licenses)

6. Upgrade: Non-Redundant to Geo-Redundant, Priority Manager Server Software and Server Capacity (refer to Section 7 for client ordering):

	Ordering Guide
Hardware and Software Kit	Select SQM01SUM0245B (Quantity 1) followed by: CA02230AB. (For Primary site, order a minimum of 1 additional for Redundancy. For Geo-Redundant site, order a quantity equal to the number of servers required for capacity, and 1 additional, for Redundancy)
Priority Manager Server Licenses (Redundancy Software), If Tier 1	Select UA00375AA and UA00377AA (Local- and Geo-Redundancy Tier 1 SW Licenses).
Priority Manager Server Licenses (Redundancy Software), If Tier 1 and Tier 2	Select UA00375AA and UA00376AA and UA00377AA and UA00378AA (Local- and Geo-Redundancy Tier 1 and Tier 2 SW Licenses).

Refer to Section 8 if also upgrading from Tier 1 to Tier 2 and/or if adding additional server capacity.

7. Client License:

NOTE: Priority Manager Client is offered as part of Converged Services (aka PSX) client, going forward.

a. LEX L10, LEXL10i: The Priority Manager client is part of the PSX Cockpit Client. PSX Cockpit Client is a software package/bundle of Priority Manager client, and other Intelligent Middleware capabilities such as Location, Presence, Identity Management, etc.

For Android devices, the PSX Cockpit client can be downloaded from the Google Play Store available on the device. No additional licensing or purchase is needed.

b. Windows 7/10: The Priority Manager client is part of the Converged Services Client (a software package/bundle of Priority Manager client, and other Intelligent Middleware capabilities). The Converged Services Client is a post-load application and, in order to use Priority Manager client, the customer needs to order and license the Converged Services Client on MDT/laptop -- this is available to order through the Intelligent Middleware (IMW) solution (order part number CA03184AA). One software CD will be shipped.

	Ordering Guide
Windows Priority Manager Client License	Order through the Intelligent Middleware (IMW) solution (order part number CA03184AA. A CD will be shipped.

8. Priority Manager Software Release Upgrade

Please order T8412A for Priority Manager R9 to R11.3 Upgrade Software Kit. This includes license SW for VMWare 6 (PrM R9 was on VMWare 5.x, and 6 must be repurchased), the RHEL license upgrade from 1-pack to 4-pack (for supporting multiple VM's on the same server), as well as the full PrM Application Release Software for a scratch install.

	Ordering Guide
Priority Manager R9 to R11 Upgrade Kit	Please order T8412A

Please order T8522 for Priority Manager R11.x to R11.3 Upgrade Software Kit. This includes the PrM "patch release" Application Software for an upgrade.

	Ordering Guide
Priority Manager R11.x to R11.3 Upgrade Kit	Please order T8522A

9. Priority Manager Server Software Tier Upgrades and Server Capacity Expansions:

	Ordering Guide
Priority Manager Tier 1 with 500 Capacity	Please order T7884A, followed by UA00200AA
Priority Manager Tier 1 with 1000 Capacity	Please order T7884A, followed by UA00025AA
Priority Manager Tier 1 with 5000 Capacity	Please order T7884A, followed by UA00026AA
Priority Manager Tier 1 with 10,000 Capacity	Please order T7884A, followed by UA00027AA
Priority Manager Tier 1 with 25,000 Capacity	Please order T7884A, followed by UA00028AA
Priority Manager Tier 1 with 50,000 Capacity	Please order T7884A, followed by UA00029AA
Priority Manager Tier 1 with 100,000 Capacity	Please order T7884A, followed by UA00201AA
Priority Manager Tier 2 with 500 Capacity	Please order T7884A, followed by UA00202AA
Priority Manager Tier 2 with 1000 Capacity	Please order T7884A, followed by UA00030AA

Priority Manager Tier 2 with 5000 Capacity	Please order T7884A, followed by UA00031AA
Priority Manager Tier 2 with 10,000 Capacity	Please order T7884A, followed by UA00032AA

Priority Manager Tier 2 with 100,000 Capacity	Please order T7884A, followed by UA00203AA

10. Accessories (please also refer to the eCAT page [Agency Configuration](#) .

SWITCHES (required) - Ordering Guide:

- For a Non-Redundant IP Transport configuration (Transport Redundancy not required) for Priority Manager, 1 Northbound switch and 1 Southbound switch are needed at each site).
 - For Geo-Redundant deployments, double this quantity (2N, 2S)
- For Transport Redundancy at a site, double this quantity (2 Northbound, 2 Southbound).
 - For Geo-Redundant deployments, double this quantity (4N, 4S)
- Depending on traffic and throughput requirements, you can choose either the 24-port switch, 48-port switch (higher throughput), or a combination.
- Depending on power connection requirements, you can choose AC power or DC power options. Generally, AC is used unless there are specific requirements for a DC-based data center (many large data centers use all DC, as it will save power/heat dissipation in the long run, but requires a large up-front cost for the DC power plant).

	Ordering Options
Extreme 24 Port Switch Bundle - AC Power (HW and Core Licenses)	Please order TT2838
Extreme 24 Port Switch Bundle - AC Power (HW and Core Licenses)	Please order TT2839
Extreme 24 Port Switch Bundle - DC Power (HW and Core Licenses)	Please order TT2846
Extreme 24 Port Switch Bundle - DC Power (HW and Core Licenses)	Please order TT2847

TERMINAL SERVER (OPTIONAL) - Ordering Guide:

- An optional Terminal Server is recommended to allow remote access to the serial ports of the switches, allowing remote setup/change of the switch configuration and routing.

--	--

	Ordering Options
LX4000T - 8-port terminal server	Please order TT2022

If you have questions, please send email to [Ajit Rudran](#).

Private Broadband Networks

Ordering Information

General Information

The Private Broadband products were the first Ethernet over copper repeaters. These products are unique in their in line power wall plates and power over Ethernet over copper products. There are four major product lines in this portfolio which are the XLT-400, XLP6800, T2 PowerBroadband system, and the XL1010M. The XLT-400 products are used for extending Ethernet LANs and Intelligent Transportation systems. The XLP6800 PowerBroadband System is used for powering remote IP surveillance cameras. The T2 PowerBroadband System is used in hospitality markets such as Hospitals, Hotels, Apartments. The XL1010M Ethernet bridge is used for connecting remote users for campus, corporate, government environments.

The XLT400 family of Ethernet over copper switches provide up to 75MBps of broadband over two telephone grade copper wire pairs, providing an extremely cost effective alternative or compliment to fiber networks. The powerful features and flexible installation, XLT products can be a key network enabling controllers, video cameras, wireless access points and other devices for Intelligent Transportation Systems network and extended industrial campus networks. . XLT-400 units can be managed with advanced enterprise network management features such as RADIUS network authentication, user selectable alerts, 0and SNMPv2c.

The T2 Powerbroadband network is a 25 port T2a Ethernet XD switch that provides the innovative features required for successful next generation in room services. The Ethernet XD CPEs are available in three configuration with 2 or 4 Ethernet ports, plus choice of installation bracket. The wall plates can convert any RJ11 jack into Ethernet. The wall plate and the switch is ROHS compliant.

Motorola has added a new wireless wall plate and new switch to the Private Broadband Portfolio. this new solution is clded the T3 Powerbroadband solution. This solution enables every fourth room to be wireless. this new solution also ill give the customers a 80% installation savings.

Features

Key XLT-400 Extended Ethernet Switch Features

- Flexible Topologies
- High performance using a minimum number of copper pairs., XLT-400 allows a flexible adaptable network topology
- 75MBPS Symmetrical
- Superior signal/noise isolation enables fiber- like speed and performance over copper wire

- Automatic rate adaptation to 10,000 Feet (3,000m)
- Fiber Like Network
- Monitor critical data links and manage each link for maximum availability
- Easily add/move/ change to any location over existing or newly pulled telephone grade or data grade wires
- High Performance Ethernet over Copper
- Deploy new applications over existing cable such as Muni WiFi and Vehicle Detection, and Traffic Controller

Key XLP-6800 PowerBroadband System Features

- Automatic rate adaptation to 10,000 feet (3000m)
- Same speed as the XL-400
- This product's switch includes power over Ethernet

Key T2 PowerBroadband System Features

- Line powered, high speed network, designed for hospitality. No power supply to lose or unplug
- Predictable installation routine to minimize service interruption
- Up to 75MBPs bit rate supports new revenue generating services
- Adaptive Line Power (ALP)- this feature powers each wall plate up to 2000 feet over the same wire pair as analog telephone service
- Intuitive web UI provides at a glance status of every port and every line
- SNMPv2c support which easily integrates management of the T2 into any network management framework
- Distributed VLANS and intelligent QoS allow the service provider to manage service levels and guarantee security
- New feature to speed channel change performance as low as 50msec channel changing in the network

Key T3 PowerBroadband System Features

- Wireless Wall plates
- Reduced Installation cost
- Seamless design
- Mobility Duo software
- Continuous RF Monitoring
- Self healing configurations
- Enterprise Class Features

Key XL1010M Ethernet Bridge Features

- The maximum speed for its SHDSL bridge is 9.2 Mbps
- The maximum distance is 27,000 feet
- Easy to configure
- Extended Ethernet based applications such as remote users, Wi-Fi backbone, Surveillance and security, Interconnect LANs
- Point to point Ethernet connections

Ordering Requirements

XLT-400 Series

The XLT-400 series includes a 1 port, 2 port or 4 port version for multiple configuration options.

When specifying the XLT-400 product for a customer, keep in mind there are three different units for three types of configurations.

Part numbers	Used with	Applications
42211	1 Twisted pair copper port as an end point	For point to point connections or
42212	2 Twisted pair copper ports	For daisy chaining devices
42214	4 Twisted pair copper ports up to three other XLT devices	To be used as a star connecting

XLT-400 products are designed to work over two pair of twisted pair copper. If in the rare case there is only one pair of copper wire available the XL68a (model #42202) two pair to one pair converter can be used. If used the available line rate (bandwidth available with two pair will be reduced by half. **

T2 PowerBroadband

Here are the most common hotel configurations using this product line.

A typical hotel installation for 25 guest rooms

Qty	Description	Part number
1	25 port T2 switches (25 ports cover 25 guest rooms	45125
25	T2 port wall plates (1 for each guest room)	45101
TBD	Filters (one for every additional phone in the guest room)	

A typical hotel installation for a 500 room hotel with two phones in each room would require

Qty	Description	Part number
20	T2 switches	45125
500	T2 2port wall plates	45101
500	Filters	
	<ul style="list-style-type: none"> • use terminated filters for desk phones • use unterminated filters for wall phones 	65603 65602

Model

**PSC 9600 Site Controller for
ASTRO® 25® Digital Trunking Solutions**

Ordering Information

Features

The **PSC 9600** is only supported in a redundant configuration. The redundant or standby PSC 9600 communicates with the active PSC 9600, at regular short intervals, to detect any failures in either PSC. If the active PSC should fail, the redundant PSC will maintain all current functionality and state information to maintain continuous operation of the site.

The PSC 9600 reports the status of the link with which it communicates to the Zone Controller. It also manages the site's states (wide area trunking, site trunking... etc), manages call control functionality in both wide area and site trunking.

General Information

The PSC 9600 is designed for use in ASTRO 25 sites, in conjunction with the ASTRO 25 Site Repeater. Two PSC 9600s are required for all ASTRO 25 sites to provide site level control and resource management redundancy. The two PSC 9600s will support up to 28 Site Repeaters at a site.

- The PSC 9600 supports ASTRO 25 operation only.
- All models must be installed using Motorola R-56 Site Install Standards to comply with Warranty requirements. The R-56 standard is available on CD-Rom - Part Number 9882904X01.

Ordering Requirements

1. Only the T6391 upgrade model is available. Add the appropriate quantities of option CA00276AA for the number of PSCs being refreshed.
2. As a separate line item, the 3084225N24 cable can be ordered as a spare.

Point to Point Wireless Ethernet Bridges

Ordering Information

General Information

Motorola Point-to-Point (PTP) Wireless Ethernet Bridges make it easy to extend your network wirelessly.

Our high performance, cost-effective bridges make reaching the out-of-reach easier than ever. Operating in a variety of frequencies, these solutions provide reliable connectivity in even the most challenging of situations.

Features and Benefits

PTP Unlicensed Backhauls: PTP 550, 670

PTP 550 Point-to-Point Gigabit+ Capacity

Provides up to 1.36 Gbps throughput with ARQ and asymmetric non-contiguous channel aggregation across 5 GHz band.

- Frequencies: 5.15 GHz to 5.96 GHz
- Throughput: up to 1.36Gbps
- Latency: 2.2-6ms
- Asymmetric Non-Contiguous Channel Aggregation: 5 GHz spectrum
- Industry Standards: FCC Approved

PTP 670 Cambium Networks combines best-in-class spectral efficiency and reliability with high-capacity multipoint (HCMP) deployment flexibility. With up to 450 Mbps aggregate throughput, PTP 670 systems let you flexibly, reliably and securely handle today's needs.

- Frequencies: 4.9 GHz to 6.05 GHz
- Throughput: up to 450Mbps
- Latency: 1-3ms
- Flexible Channel Width: 5, 10, 15, 20, 30, 40, and 45 MHz channels
- Reliability: Dynamic Spectrum Optimization
- Industry Standards: FIPS 197, 1588v2, IPv6, IP66/67

Refer to the following website for Spec Sheets, Brochures, etc; <http://www.cambiumnetworks.com/>

PTP 820 - Licensed Ethernet microwave for multi-service networks

PTP 820 is a point-to-point licensed microwave backhaul platform that integrates leading networking functionality with the industry's most advanced microwave technologies, creating a superior transport solution.

Supporting licensed frequency bands ranging from 6 to 42 GHz, the PTP 820 series delivers a wide range of configurations to offer a tailored solution for any deployment scenario. High-density multi-technology nodes and integrated radio units enable flexibility in choosing split-mount and all-outdoor configuration options. Implementing unique Line of Sight (LOS) and Multiple Input Multiple Output (MIMO) technologies, and modulation across bandwidths above 2048QAM, ensures Industry-leading throughput and spectral efficiency.

- Frequencies: Licensed frequency bands 6-38 GHz
- Capacity: Multi-gigabits radio capacity with high spectral efficiency
- Adaptive Coding and Modulation (ACM): Up to 2048 QAM, with 11-step hitless and errorless ACM
- Bandwidth Supported: Up to 80 MHz channel width
- Integrated Synchronization: Integrated synchronization solution: SyncE/IEEE 1588v2

PTP 820S - PTP 820S is an all-outdoor point-to-point licensed microwave unit.

PTP 820C - PTP 820C is an all-outdoor, multi-core unit. The PTP 820C has dual-core functionality enabling the system to operate up to 2 Gbps via software upgrades, eliminating the need for future forklift upgrades, or major system overhaul by the network operator to deliver gigabit-plus capacity.

PTP 820G - PTP 820G is a split-Mount / All-Indoor unit, with Multi-Carrier Options

Refer to the following website for Spec Sheets, Brochures, etc; <http://www.cambiumnetworks.com/>

Ordering Requirements

Definitions:

How to determine which radios are needed:

-To determine which frequency or type of radio you would need, please refer to the [PTP LINKPlanner Tool](#)

This tool will allow you to enter in your coordinates, distance, etc. and the tool will tell you what your availability of the radios would be, your throughput, etc.

-Integrated: The PTP link or spare will have a internal antenna built inside of the radio.

-Connectorized: The PTP link or spare will need to have an external antenna used and purchased with this link or radio.

-Link: includes; 2 radios, 2 power supplies, and 2 mounting brackets.

-Spare: includes; 1 radio, 1 power supply, 1 mounting bracket.

-It is highly recommended that a Lightning Protection Unit (LPU) is used with these radios to prevent lightning damage. 1 LPU is needed for the top of the tower, and 1 LPU is needed at the base of the tower (PTP500 only needs 1 LPU since it has a surge protection built in the radio).

-Other other items are considered optional, ie; software, warranty, and other misc. accessories.

Configuration

Cambium Networks Models

Please refer to Cambium Networks web site for details on PTP radios: <http://www.cambiumnetworks.com/>

PTP 820 Licensed Microwave Backhaul:

PTP 820 is a point-to-point licensed microwave backhaul platform that integrates networking functionality with the microwave technology

CMU (Compact Modem Unit): For use with all PTP 820 Frequencies below. 2 CMU's are needed with 2 ODU's (1 Low and 1 High), accessories, and antennas to make a complete link.

PTP820C

PTP 820C is an all-outdoor, multi-core unit.

The PTP 820C has dual-core functionality enabling the system to operate up to 2 Gbps via software upgrades, eliminating the need for future forklift upgrades, or major system overhaul by the network operator to deliver gigabit-plus capacity.

11GHz

LTE PTT L2/L3 Switch

Ordering Information

Features

- Provides a single cable solution for edge devices, such as VoIP telephones and wireless access points.
- Supports PoE Plus standard (802.3at), providing up to 30 watts of power to a single device, which simplifies wiring for next generation solutions.
- Addresses challenge of configuring IP endpoints through LLDP (Link Layer Discovery Protocol) and LLDP-MED (Link Layer Discovery Protocol-Media Endpoint Discovery). This offers a standard, open method for configuring, discovering and managing network infrastructure.
- Offers simple and robust expandability for future growth. Brocade's IronStack technology enables eight switches to be stacked into one logical switch.
- Provides other high availability features, such as dual hot-swappable load-sharing redundant power supplies, and a removable fan assembly.
- Utilizes the Brocade IronWare OS, with a rich Layer 2/3 security suite, Network Access Control (NAC) and Denial of Service (DoS) protection.
- For additional information, see Brocade Model Number FCX624-E at <http://www.brocade.com>

General Information

This FCX switching series offers scalability and flexibility for enterprise campus and data center network applications. Its advanced capabilities deliver performance to the network edge in a 1U form factor that helps to reduce infrastructure and administrative costs. The 24- and 48-port models (both PoE and non-PoE) are stackable and can offer up to eight switches in a single logical switch with 384 ports.

Ordering Requirements

1. There is a minimum quantity 1 required for the PTT L2/L3 switch (TT2380).
2. When the PTT L2/L3 switch (TT2380) is ordered, a PTT L2/L3 Redundant AC Power option (TT05632AA) must be ordered. The minimum quantity is 1.
3. The FRUs for this product are listed under "Accessories." The FRU part numbers must be used when ordering standalone items.
4. The first year of Maintenance and Support for each switch/router must be ordered through Tigers. Please contact [Product Management](#) to obtain a current Maintenance and Support quote.

PREMIERONE® SUITE - PUBLIC SAFETY APPLICATIONS

Ordering Information

Features

- PremierOne is the leading suite of Public Safety Applications including:
 - Computer Aided Dispatch (CAD)
 - Mobile (In-vehicle Solution)
 - Records Management (RMS) for Law Enforcement
 - Mobile Records Management
 - Integrated NG9-1-1 Call Control
- Support for Complex Multi-Agency/Multi-jurisdiction Systems
- System and User Interface designed exclusively for public safety
- Services Oriented Architecture based on Microsoft Windows® Server and SQL Server for commonality and ease of support
- Embedded ESRI tools for GIS and Mapping
- Highly configurable and flexible product architecture to address the needs of complex agencies
- Integrated workflows for handling 9-1-1 call taking, including text to 9-1-1

- PremierOne Handheld
- Premier Mobile Data Computing (PMDC)

General Information

PremierOne Components

PremierOne was developed with the goal of effectively changing the way public safety agencies manage operations by creating highly available, scalable, and secure software solutions. PremierOne is a unified applications portfolio that provides a real-time view of an agency's operations for enhanced safety and resource allocation. PremierOne uses a common services platform and provides the capability to proactively deploy resources and enhance situational awareness. The PremierOne Public Safety portfolio includes:

1. PremierOne Computer Aided Dispatch (CAD)
2. PremierOne Records Management System (RMS)
3. PremierOne Mobile and Records Mobile

PremierOne NG9-1-1 Call Control

Integrated NG9-1-1 Call Control simplifies incident management in an increasingly complex environment. Motorola's PremierOne NG9-1-1 Call Control Solution streamlines and simplifies workflows by integrating call taking functionality with PremierOne CAD. This PremierOne application handles voice calls and citizen texts simultaneously. Using Call Control, the most common 9-1-1 call handling functions can be accessed from the NG9-1-1 Call Control interface or PremierOne CAD command line. With full integration of previously disparate data sources, call takers and dispatchers maintain critical focus by accessing 9-1-1 and CAD controls from one application using a single keyboard and mouse.

Ordering Requirements

Due to the unique customer requirements for each PremierOne opportunity you will need to work closely with your AST representative and qualified PremierOne presales Solution Architect and Services Business Development Manager to ensure that all customer requirements are accounted for and the proper system and deployment services identified.

- Warranty and Maintenance on PremierOne software products initiates with productive use (beneficial use) of the software. For License only orders, Warranty initiates upon shipment.
- Export restrictions may apply for orders outside of North America

NOTE: Ordering of specific PSA licenses may require additional licenses and /or services to enable the functionality. Please contact your PSA sales representative or inside sales person prior to ordering.

ALL ITEMS REQUIRE AN EXPORT LICENSE TO BE EXPORTED FROM THE UNITED STATES/CANADA

IMPORTANT: WARRANTY SERVICES ARE NOT INCLUDED WITH LICENSES AND MUST BE ORDERED SEPARATELY AS OUTLINED BELOW

PremierOne Software Licenses

PremierOne Software licenses are modular and scalable in nature. A qualified PremierOne presales Solution Architect needs to analyze the requirements of a given system and

determine the specific PremierOne Software licenses required for that system.

PremierOne Common Services Licenses

IMPORTANT: WARRANTY SERVICES ARE NOT INCLUDED WITH LICENSES AND MUST BE ORDERED SEPARATELY

PremierOne NG9-1-1 Call Control Solution

Notes on NG9-1-1 Call Control:

Additional hardware and software may be required for CAD and/or 9-1-1. Please contact APS Product Management (NG-ICC / 911) or PremierOne Pre-Sales Engineering for guidance on quoting and ordering. There are many interfaces available to integrate PremierOne with additional agency and external systems. Required interfaces vary greatly by system and typically require additional professional services for deployment and integration. Please consult a qualified PremierOne Pre-sales Solution Architect and/or Services Business Development Manager for the details of the capabilities provided by each PremierOne interface and the requirements for deployment.

Alternative licenses available for some customers that already have the Power9-1-1 Application from Intrado or who need to run Power9-1-1 Application from Intrado until PremierOne CAD is installed and operational. Contact APS Product Management or PremierOne Pre-Sales Engineering for guidance.

Premier CAD Licenses (Add-on)

IMPORTANT: WARRANTY SERVICES ARE NOT INCLUDED WITH LICENSES AND MUST BE ORDERED SEPARATELY

Premier CAD is Motorola's legacy CAD product and has an announced End of Support date of August 31, 2018. Addition of client licenses to existing Premier CAD systems is possible via the part number below, but we are no longer offering new system purchases. PremierOne CAD is our current, market leading CAD product for new system sales.

IMPORTANT: Please note Premier CAD UDT, MGU and Open Query are end-of-life products. Add-on licenses are only available for existing customer systems, contact your ICC overlay team for details.

Advanced Messaging Solution (AMS) and Unified Network Services (UNS) items are often included with PremierOne solutions to provide unique cross product functionality between PremierOne and Motorola Radio systems. Please refer to the AMS and UNS sections of ECAT for additional details.

PremierOne Interface Annual Fees

There are many interfaces available to integrate PremierOne with additional agency and external systems. Required interfaces vary greatly by system and typically require additional professional services for deployment and integration. Please consult a qualified PremierOne presales Solution Architect and/or Services Business Development Manager for the details of the capabilities provided by each PremierOne interface and the requirements for deployment.

PremierOne Hardware Components

PremierOne runs on Microsoft® Windows Server based servers and associated, storage, network, and ancillary elements. The flexibility and scalability of PremierOne leads to several different possible hardware platform combinations. The system design and associated software and hardware components for a specific system needs to be determined by a qualified PremierOne Solution Architect.

The PremierOne deployment processes is optimized for hardware ordering and staging to be performed by Motorola Solutions at the Schaumburg Customer Center for System Integration (CCSi). Deviation from this optimized system purchase, integration and staging process will impact deployment services for a system.

Service components

Motorola System Integration (SI) team professional services are required for PremierOne system deployments. Please contact the PremierOne presales Solution Architecture (SA) and Services Business Development Management (BdM) teams for the proper quoting of the required system deployment services.

NOT FOR: [QUANTAR](#), [QUANTAR Data Base Stations](#), QUANTAR Receiver, or [ASTRO-TAC® Receiver](#).

1. "Limited" QUANTAR Stations can only be used within a Conventional/Analog radio system.
2. "Limited" QUANTAR Station's operation is only offered in two UHF frequency bands: 470 - 494MHz with a 110 Watt PA (CA00018AA) or 494 - 520 MHz. with a 100 Watt PA (CA00019AA).
3. "Limited" QUANTAR Station is Non-Upgradeable (NOT FLASHport® Capable) to ASTRO®, Trunking, Simulcast, or SmartZone®.
4. "Limited" QUANTAR Stations are only compatible with the following options:
X580, X622, X597, X182, X371, X84, C101, X286, X425, X233, X157, X30, X112, X113, X676, U752, X432, X287, X52, X308, X180, X36, X87, X374, X375, X376, X377, X380, X381, X382, X383, X379, X741, X742, X832, X882, X810 and X153.
5. "Limited" QUANTAR Stations are not compatible with the following options:
X148, X844, X932, U453, C457, C753, X312, X322, X323, X324, C115, X337, X338, X339, X777, X888, U764, X144, X269, X122, X149, X150, X8433, X814, X145, X146, X147, X325, X326, X327, X121, C28, C32, C681, C257, X873, X394, X696, X139, X288, X889, X598, X599, X806, X997, X996, X992, X900, X989, X897, X999, X998, X990 and X898.
6. "Limited" QUANTAR Stations are not compatible with trunked options.

ALL STATIONS SHIP UNCONFIGURED, AND MUST BE FIELD PROGRAMMED with the Radio Service Software (RSS) to alter the Communication Channel functions and to input the Transmit and Receive Frequencies within the specified range selected. The sales person is responsible for this information and should forward it to the field programmer or service shop. Radio Service Software (RSS) is not shipped with the station, order from Aftermarket and Accessories Division. (1-800-422-4210)

Please see the Product Planner for full descriptions of each option.

Ordering Requirements

You **MUST** select a frequency by option.

- UHF 470-494MHz 110W (CA00018AA)
- UHF 494-512MHz 100W (CA00019AA)

The station configuration, QUANTAR will be determined by this option. Specify one transmit and one receive frequency for factory tuning. Exact customer frequencies are programmed in the field. If the frequencies are not accurate, retuning may be required in the field.

You **MUST** select a System Family Option. Choose the appropriate suffix in COF for QUANTAR.

- Conventional (X597 A)

Access Solutions
RAD

Ordering Information

General Information

Product Families

Access + Portfolio

Best-of-breed, hybrid SDH/SONET and PSN access solutions for seamless migration and smart communications:

- Carrier-grade Ethernet capabilities
- Extensive support for legacy services and interfaces
- Enhanced connectivity for any topology
- System solutions: CPE, grooming and aggregation
- Unified management

RAD's megaplex multiservice access concentrators for delivering legacy and next-generation services over fiber or copper PDH/SDH/SONET, or over packet switched transport networks (PSN). Able to handle a broad range of Ethernet, data and voice services, as well as a large variety of network technologies in a single compact managed node.

[Click here for data sheets](#)

Ethernet over TDM/SONET

Connect Ethernet applications over low and high-speed SDH/SONET and PDH circuits, from fractional and full E1/T1, bonded E1/T1s, E3/T3, bonded E3/T3s, STM-1/OC-3, to STM-4/OC-12.

RAD's Ethernet over TDM/SONET products are designed for backhauling Ethernet traffic over copper, fiber, or microwave connections, employing standards based technology. RAD's family of Ethernet over TDM/SONET products include both end user devices as well as aggregators.

[Click here for data sheets](#)

TDM Psuedowire

RAD's pseudowire family of products provide transport of TDM traffic (T1, T3, E&M, FXS, FXO, RS-232, v.24, etc.) over Ethernet/IP/MPLS backbones. Replace traditional leased lines with lower cost packet networks. Transparent to all protocols and signaling, TDM pseudowire allows you to keep using all existing end user equipment. It also delivers highly accurate clock synchronization and carrier-class availability, and is compatible with all

pseudowire standards.

[Click here for data sheets](#)

EtherAccess

RAD's EtherAccess portfolio incorporates a complete family of MEF certified Ethernet access devices. From simple media converters and carrier class Ethernet switches, to sophisticated Carrier Ethernet demarcation devices providing extensive diagnostic and monitoring capabilities. RAD's EtherAccess devices provide a wide range of features and functions including:

- Multiple combinations of FE, GbE and 10GbE user and network ports
- Optional E1/T1, T3, or SHDSL modular network ports
- Hardware-based Ethernet OAM, L2 and L3 performance monitoring with Y.1731 and TWAMP and built-in RFC-2544/Y.1564 tester capabilities; L2/L3 diagnostic loopbacks
- ITU-T G.8032 Ethernet Ring Protection Switching; G.8031 Ethernet Linear Protection Switching; Link aggregation (LAG) per 802.3ad; dual homing (1:1) redundancy
- Hybrid Synch-E and IEEE 1588 Grandmaster, Boundary Clock, Transparent Clock
- TDM pseudowire per MEF-8, UDP/IP, MPLS encapsulation in CESoPSN and SAToP modes
- RADview management; Supported by RADview Performance Monitoring Portal and RADview Service Manager

[Click here for data sheets](#)

Airmux PTP & PTMP Wireless Products

RAD's Airmux series of carrier-class broadband wireless radios deliver native Ethernet and TDM services over a single wireless link in various sub-6 GHz frequencies (including 4.9). RAD's Airmux-400 point to point radio systems, with a flexible combination of Ethernet and up to 16 E1/T1 interfaces, provides aggregated throughput of up to 250 Mbps and a range of up to 12 km (7.5 miles).

RAD's Airmux-5000 carrier class point to multipoint Ethernet radio systems is the ideal wireless solution for users demanding high capacity throughput with dedicated traffic bandwidth allocation per subscriber. Featuring up to 250 Mbps aggregated sector capacity and shared base station architecture, a single Airmux-5000 base station supports up to 32 remote subscriber units (SUs) with multiband operation, making it ideal for:

- Security and surveillance applications, requiring aggregation and backhaul of traffic from multiple co-located HD cameras.
- Private networks, requiring high capacity inter-branch connectivity for university campuses, healthcare organizations, government institutions, large enterprises and public establishments.

[Click here for data sheets](#)

Optimux

RAD has fiber optic multiplexers that enable cost-effective and efficient transport of multiple E1 or T1 lines, E3 or T3 tributaries and Ethernet over fiber optic links. RAD's comprehensive product line of high-performance fiber optic multiplexer products features ranges of up to 120 km (75 miles).

Typical applications for the fiber optic muxes include point-to-point and ring topology, E1, T1 fan out, E3, T3 extension, and drop and insert.

RAD's fiber optic muxes are highly manageable, accompanied by a network management system for configuration, service, performance, security, and fault management. The compact fiber optic multiplexers also multiplex combined E1 and T1 channels according to

the G.747 standard.

[Click here for data sheets](#)

SFP's

RAD's SFP (small form-factor pluggable) transceivers are hot-swappable, input/output transceiver units converting optical and electrical media. Providing a wide range of detachable interfaces to multimode/single-mode optic fibers and UTP/coaxial electrical cables, they also allow the transport of Fast Ethernet and Gigabit Ethernet LAN packets over TDM-based WANs, as well as the transmission of E1/T1 streams over packet-switched networks. In addition to facilitating efficient design of host devices and flexible network planning, RAD's miniature transceiver units enable significant savings in system maintenance and upgrade costs.

[Click here for data sheets](#)

RADview

RAD's RADview is a multi-platform network management suite for configuration, provisioning, monitoring, and management of networks and end-to-end services. Fully compliant with the ITU-T Telecommunications Management Network (TMN) standards, the RADview management suite features advanced fault, configuration, administration, performance, security (FCAPS) capabilities. In addition to a network element management component, RADview also offers a service manager for managing end-to-end Carrier Ethernet services, a service center for managing TDM services, and an Ethernet performance monitoring portal for real-time monitoring of Ethernet service performance. RADview manages both legacy TDM and next-generation RAD devices using n SNMP southbound interface, and also features third-party device monitoring capabilities. Its northbound interface enables integration into a third-party umbrella system (OSS).

Radio Rental

Ordering Information

Executive Summary

Meeting a temporary need for additional radios

Whether it's providing increased traffic coverage for a convention, trade show, or civic event; crowd control for a sporting event; increased communication for a mining project; or emergency response for a disaster, sometimes you find yourself with the temporary need for additional radios. The Motorola Radio Rental program is flexible, cost effective, and helps you scale to meet those needs.

Easy, flexible and quick

Motorola Radio Rental program provides customers with the opportunity to rent Motorola two way subscriber units for either short term or long term use. Radios may be rented for as little as one week or as long as you need them. Prior to shipping, Motorola will program your radios to your requested frequencies, or will set to standard frequencies for you to program upon arrival. We begin processing your order immediately upon your request and, pending availability, your rental equipment can often be shipped overnight.

Equipment that augments your own network

Motorola's fleet of rental equipment includes

- VHF, UHF, 800/900 MHz SMARTNET®, SmartZone®, and Privacy Plus™
- Two-way portable and mobile radios
- Repeaters and iDEN units
- Full range of accessories

For more information, please review the [Solution Resource Guide](#).

Radio Rental is covered in the Technical Services brochure (RC-110-2000) available through [Literature Distribution Center \(LDC\)](#).

Features

- Increased flexibility of scheduling and operation
- Latest technology for affordable price
- Convenient process for
- Offers customer disaster response options without

Statement of Work

One of the primary business objectives of the North American Group (NAG) is to promote the sales of STANDARD service products. Standards help to ensure consistent and profitable delivery of our service products to our customers. To that end, the customer Statement of Work for this Standard Service Product **CANNOT** be modified. All requests for modifications to STANDARD service products or the development of "custom" service products should be routed through the Solutions Planning process. Your first point of contact for these requests is your local Area Service Manager.

Statement of Work

[Radio Rental SOW](#)

Ordering Requirements

There are two ways in which Rentals can be ordered:

1. By calling Motorola Radio Rental at 1-888-736-8567, a Rental Sales Representative will answer all questions, help to design and implement the Rental solution. This product requires an authorized quotation.
2. Through the [Rental website](#). A Rental form needs to be completed then submitted. A Rental Sales Representative will answer all requests within 24 hours.
3. This product cannot be ordered directly through COF at this time.
4. A Customer Support Plan must be created to provide detailed information to the customer regarding delivery of this service.

FCC Information

The use of these two-way radio units is approved and licensed by the Federal Communications Commission under Rule 90.75. Consequently, all radio usage must be in accordance with the F.C.C rules and regulations and are the sole responsibility of the user. Here are some general tips to follow:

1. Prior to any transmission, the user must monitor the channel to determine no other user is presently transmitting. If anyone is transmitting, do not transmit. Wait until their conversation has ended.
2. Confine radio transmissions for business purposes only. Keep conversations short in duration as other users may be licensed on the same frequency.
3. Use no profanity during any conversation. This is against the FCC rules and regulation and violation is subject to fines.
4. Suggested "10" codes for easy communications.
 - 10-4 Means OK, yes, I understand.
 - 10-20 What is your location?
 - 10-8 Unit in service and on the air.
 - 10-7 Unit out of service.
 - 10-19 Unit returning to base.
5. Your cooperation and adherence to these suggestions will provide better

use of the equipment.

General Information

Regional Application Network

Regional Application Network deployment can support Push-To-Talk application and / or the Device Manager application in a regional configuration that connects to one or more agency networks.

In R3.0, there are 3 configurations for the Regional Application Network (RAPP Network).

1. Push-To-Talk Application Only in RAPP
2. Push-To-Talk Application and Device Manager Application in RAPP
3. Device Manager Application Only in RAPP

The following defines the networking hardware required in the RAPP network for each of the configurations.

CONFIGURATION 1: Push-To-Talk Application Only in RAPP

FIREWALL (Qty 2 required):

- Redundant configuration is standard; Quantity 2 of the following is required.
- This firewall interfaces from the RAPP to the Agency Network.

Fortinet 200B Firewall TT2589A

For pricing, please refer to the Fortinet 200B Firewall eCAT page:

Agency and Regional Applications Firewall

SWITCHES (Qty 2 required):

- Redundant configuration is standard; Quantity 2 of the following is required.
- Please select the type of switch that best meets customer requirements:
 - Brocade FCX 624 **or**
 - Brocade CES 2024 (supports MPLS)

Brocade FCX 624-E Switch TT2380

For pricing, please refer to the Brocade FCX 624 Switch eCAT page:

PTT L2/L3 Switch (AC Power)

Brocade CES 2024 Switch See Price Page for ordering details.

For pricing, please refer to the Brocade CES Switch eCAT page:

L2/L3 Aggregation Switch/Router (copper)

L2/L3 Aggregation Switch/Router (fiber)

CONFIGURATION 2: Push-To-Talk Application and Device Manager in RAPP

CONFIGURATION 3: Device Manager Application Only in RAPP

The required RAPP networking equipment is the SAME for Configuration # 2 and Configuration #3, as described below:

FIREWALL (Qty 2 required):

- Redundant configuration is standard; Quantity 2 of the following is required.
- This firewall interfaces from the RAPP to the Agency Network.

Fortinet 200B Firewall TT2589A

For pricing, please refer to the Fortinet 200B Firewall eCAT page:

Agency and Regional Applications Firewall

FIREWALL (Qty 2 required):

- Redundant configuration is standard; Quantity 2 of the following is required.
- This firewall interfaces from the RAPP to the Verizon Network.
- A separate Firewall is required for information integrity because the RAPP network is directly connected to Verizon network for Device Manager communication to devices on VzW.

Fortinet 200B Firewall TT2589A

For pricing, please refer to the Fortinet 200B Firewall eCAT page:

Agency and Regional Applications Firewall

SWITCHES (Qty 2 required):

- Redundant configuration is standard; Quantity 2 of the following is required.
- These switches are required from the RAPP to Agency Network.
- Please select the type of switch that best meets customer requirements:
 - Brocade FCX 624 **or**
 - Brocade CES 2024 (supports MPLS)

Brocade FCX 624-E Switch TT2380

For pricing, please refer to the Brocade FCX 624 Switch eCAT page:

PTT L2/L3 Switch (AC Power)

Brocade CES 2024 Switch See Price Page for ordering details.

For pricing, please refer to the Brocade CES Switch eCAT page:

L2/L3 Aggregation Switch/Router (copper)

L2/L3 Aggregation Switch/Router (fiber)

Switches (Qty 2 required)

- Redundant configuration is standard; Quantity 2 of the following is required
- This switch/router interfaces from the RAPP to the Verizon Network
- A separate switch/router is required for information integrity because the RAPP network is directly connected to Verizon network for Device Manager communication to devices on VzW.

Brocade FCX 624-E Switch TT2380

For pricing, please refer to the Brocade FCX 624 Switch eCAT page:

PTT L2/L3 Switch (AC Power)

Switches (Qty 2 required)

- Redundant configuration is standard; Quantity 2 of the following is required
- This switch/router interfaces from the RAPP to the Verizon Network
- A separate switch/router is required for information integrity because the RAPP network is directly connected to Verizon network for Device Manager communication to devices on VzW.

Brocade BR6910 Switch TT2593

For pricing, please refer to the Brocade BR6910 Switch eCAT page:

eNodeB L2 Switch (AC/DC Power)

DNS / DHCP (Qty 2 required)

- Redundant configuration is standard; Quantity 2 of the following is required

DNS / DHCP (Adonis 800) TT2381

For pricing, please refer to the DNS / DHCP eCAT page:

EPC DNS/DHCP Appliance/NTP Server

CODING INFORMATION REQUIRED ON PAGING ORDERS

Ordering Information

General Information

In order to enable orders for paging equipment to be processed without unnecessary delay, the following information must be provided via the area office:

1. **RF FREQUENCY REQUIREMENTS.** Although Paging encoders/terminals are not frequency sensitive, the system operating frequencies are required for proper customer file establishment, Code usage and record keeping. The RF frequency should be listed in the special instructions section of the STIC for the paging encoder/terminal.
2. **FREQUENCY CHANGES.** Since all information on paging systems is filed in the plant by RF frequency, the plant must be notified of any changes in these frequencies. If the plant is not notified, the customer 's particular system cannot be located in the records and orders for additional equipment will be put on hold and further information will be requested .
3. **MULTIPLE ENCODERS.** If more than one encoder is ordered for a new system, the order must state how they are to be coded. Are the encoders to be coded alike or are they to carry separate sets of codes?
4. **ADDITIONAL ENCODERS.** Whenever additional encoders are ordered for an existing system, the order must specify whether the new encod- ers are to be coded the same as those existing or whether new sets of codes are to be assigned.
5. **CUSTOMERS SERVICED BY COMMON CARRIERS.** Orders from customers who receive service from COM- MON CARRIERS must include the codes for the pagers ordered. In addition, the COMMON CARRIERS name must be specified.
6. **EXPANSION KITS.** The plant must be notified whenever encoder expansion kits are ordered from the Parts Department and field in- stalled. Without this information the plant is unaware that system capacity has increased.
7. **BINARY GOLAY SEQUENTIAL CODES (GSC)** Plant will assign codes on new systems. For compatibility with existing systems consult your Area

Systems Engineering Office.

SP REQUIREMENTS

Contact your Area Systems Engineering Office for availability, price and delivery of any nonstandard paging encoders, terminals, systems, or code plans.

CommandCentral Aware Alerts

General

CommandCentral Aware provides a complete operating picture, integrating real-time intelligence in the command center to remotely assist officers in the field. Simplify your operational view by consolidating your resources into one single pane of glass. Support officer safety by monitoring CAD incidents, responder location and real-time alerts. Alerts indicating a weapon draw, vest pierce or other emergency display the location and type of incident in real time on the consolidated map, helping dispatchers provide immediate support and improving officer and citizen safety.

MONITOR ACTIVITY FROM ANYWHERE

View all of your location-based data together, in real-time, on a single map display. This common operating picture can be accessed anywhere, from any internet-connected device.

ACT WITH THE NECESSARY CONTEXT

Communicate a more informed response to a critical incident and enhance responder safety for those in the field by accessing a common operating picture through CommandCentral Aware - directly from your agency's map.

COLLABORATE WITHOUT DISTRACTION

Control specific viewing permissions based on groups of users to ensure a focused response from every team member during a critical event. Filter your view to only the datasets you need in the moment.

Further information can be found [here](#).

RESPOND QUICKLY TO ESCALATING INCIDENTS

Aware Alerts automatically show the command center what's happening to officers during an incident, whether that be an emergency, weapon drawn, vest pierce, man down alerts, and more. Alerts showing the location and type of incident on the consolidated map help personnel enhance situational awareness and improve officer and citizen safety.

Features

- **Command Central Aware Mapping:** Alerts inherits all functionality and capability of the Command Central Aware Mapping offer. CommandCentral Aware automatically informs the command center that a situation has escalated, with alert type, location and user identification without further action by the officer
- **Weapon Draw Alert and Conducted Electrical Weapon (Stun Gun) Drawn Alert:** Sensors can be retrofitted to the most common holsters used and will send notifications when an officer un-holsters and re-holsters a weapon.
- **Weapon Fired Alert (Handguns Only):** This sensor can be retrofitted to certain handguns to send an alert that the weapon has been discharged. The sensor is located in the grip of the handgun.
- **Vehicle Impact Alert:** When a responder vehicle, equipped with APX mobile radios, experiences significant impact, an emergency alert will notify the command center of the situation and location.
- **Man Down Alert:** A man down emergency alert generated by all enabled APX portable radios appears as a notification when the radio is at an angle and there is no movement based on user parameters.
- **Vest Pierce Alert:** When a piercing event is detected, such as a shot or stab, an emergency alert is transmitted to notify command staff that a responder may be incapacitated and needs help. Insert sensors into existing body armor.

- **Si500 Contextual Activation:** Sensor activates Motorola Solutions' Si500 Video Speaker Microphone, a body-worn camera solution used for capturing, storing, and analyzing crucial video evidence, to start recording for post-event analysis.

Ordering Information

The solution provides mapping of responder location and alerts. This offer also includes Enhanced Data Network and IMW Software Upgrades. If users also have ASTRO 25 consoles MC7200 and MC7500 on their system, the alert will also be sent to the consoles.

On an ASTRO 25 system release of 7.18 or higher, the customer will differentiate the emergency event notification received. For example: If user pressed the orange emergency button, it will receive an emergency, but if emergency alert was activated from a vest pierced event, the console as well as CommandCentral Aware will be able to show vest pierced alert type and icon instead of emergency only.

Weapon Drawn, Conducted Electrical Weapon drawn and weapon fired alerts require sensors that are connected via Bluetooth Low Energy (BT LE) to a hub device (radio) Vest Pierce alert sensor connects to BT 2.1 capable radios. Vehicle Impact and Man Down are available within the APX 8500 mobile and APX subscribers respectively and do not require Bluetooth connectivity.

Data is sent from APX subscriber or mobile over ASTRO P25 Network to Command Central Aware.

	ASTRO
Network	ASTRO 7.16+
Data Capability	Enhanced Data
APX Radios	Radio Firmware required is 7.18.8 or beyond;. Vest Pierced is available on APX subscribers with Bluetooth Capabilities. Vehicle Impact is available on APX 8500 radios. Man Down is available on an APX model. Weapon Drawn, Conducted Electrical Weapon Drawn and Weapon Fired alerts is available on APX 6000BN or APX 8000.
Device Feature Set	APX P25 Radio w/ GPS, Standard BT or BT 4.0+, Enhanced Data
IMW services & Deployment	IMW 5.2.1
Application	Command Central Aware
Supported Weapons: Weapon Drawn Alert	Sig Sauer P226 (9mm, .4); P229 (9mm, .4), P320; S&W (9mm, .4); Glock 17,19,21,22,34 With these Safariland holster Models: Safariland 6280, 6360, 6390, 7360 and 7390
Supported Weapons: Conducted Electrical Weapon Drawn Alert	X26P and X2 (Taser) With these BlackHawk holster models: 22501, 22504 (X2); 11501, 11504 (X26P
Weapon Fired	Gen 4 Glocks 17, 22, 34 and 35
Vest pierced	All Vests. Isabel Paul will also work with third Party (SES) and Bid & Quote for sizing https://docs.google.com/document/d/1vcZ2hSuSCWPMXCtlyNlryXPEz-YrBL42ZqWDSCfGRVc/edit?usp=sharing

Service Offering

Software updates with technical support.

How to Order

Contact Isabel Paul for Quote. She will coordinate across CPQ, PCAT, and COF for quoting.

eNodeB Battery Backup

Ordering Information

General Information

Battery backups pair up in AC or DC configurations, based on the RBS characteristics and selection, as well as the attainable backup time, based on the operator's requirements.

The battery backup systems provide the AC powered eNodeBs with backup power, in case the AC main supply is lost. They come in two categories:

- A separate cabinet standing side-by-side with the eNodeB cabinet for both indoor and outdoor deployments; this type of battery option is often referred to as BBS (Battery Backup in Separate cabinet).
- A cabinet that goes underneath of the eNodeB cabinet for both indoor or outdoor deployments; this type of battery backup is often referred to as BBU (Battery Backup for Underneath deployment).

The underneath battery backup option saves valuable floor space. The footprint area of the underneath cabinet matches that of the corresponding eNodeB cabinet.

Depending on the backup time requirements and the quality of the AC mains electricity grid, alternative battery types and sizes are available for order, including an in-cabinet option for specific enclosures.

Note that for outdoor configurations, BBS/BBU battery blocks are charged with -48V by the eNB (RBS) rectifiers. Therefore, when ordering a BBU/BBS, an AC eNodeB should be selected.

For indoor configurations, BBS/BBU solutions need to be custom quoted--please contact product management.

Table 1 depicts a summary of available enclosures or BB with RRUs with which battery backup solutions can be paired.

Enclosure	Power Option	Battery Option	Available Capacity (Ah)	Battery Type	Max # of Strings
OUTDOOR:					
6101	AC	BBU6101	100 Ah	Lead acid	1

			180 Ah	Lead Acid	1
	AC	In Cabinet Battery	100 Ah	Lead Acid	1
	AC	BBS6101	100 Ah	Lead Acid	3
		BBS6101	180 Ah	Lead Acid	3
6135	AC	BBS05	100 Ah	Lead Acid	2
6301	AC	BBS6301	100 Ah	Lead Acid	1

TABLE -1 Battery Backup Solutions for RBS Enclosures or Self-Contained Basebands

Configuration

Ordering Requirements

Outdoor AC Configurations

RBS6101:

BBU6101. Order Quantity 1 per site.

Description	Full Description	Nomenclature	APC	Price
BBU 6101	-	DDN2456	051	\$9,500.00

One string possible for BBU6101 from the below. Order Quantity 1 of either 100 Ah or 180 Ah per site.

Description	Full Description	Nomenclature	APC	Price
BATTERY KIT 100AH	-	DDN2465	051	\$1,510.00

BATTERY KIT 180AH	-	DDN2466	051	\$2,380.00
-------------------	---	---------	-----	------------

In-cabinet battery for RBS6101. Order Quantity 1 per site:

One string possible for In-cabinet battery for RBS6101. Order Quantity 1 per site.

Description	Full Description	Nomenclature	APC	Price
BATTERY KIT 100AH	-	DDN2465	051	\$1,510.00

BBS6101

Description	Full Description	Nomenclature	APC	Price
BBS 6101	-	DDN2454	051	\$9,580.00

Up to three strings possible from the below for BBS6101. Order Quantity 1-3 based on the number of strings.

Description	Full Description	Nomenclature	APC	Price
BATTERY KIT 100AH	-	DDN2465	051	\$1,510.00
BATTERY KIT 180AH	-	DDN2466	051	\$2,380.00

Power 6135

BBS05 with ground mounting kit

Description	Full Description	Nomenclature	APC	Price
BBS05	-	DDN2460	051	\$2,560.00

Up to two strings possible from the below for BBX05. Order Quantity 1-2 based on the # of strings.

Description	Full Description	Nomenclature	APC	Price
BATTERY KIT 100AH	-	DDN2465	051	\$1,510.00

RBS6301:

--	--	--	--	--

Description	Full Description	Nomenclature	APC	Price
BBS 6301	-	DDN2458	051	\$7,090.00

Up to one string possible from the below for BBS6301. Order Quantity 1, based on the number of strings.

Description	Full Description	Nomenclature	APC	Price
BATTERY KIT 100AH	-	DDN2465	051	\$1,510.00

Wall mount kit option. Order Quantity 1 per site, depending on mounting option selected for RBS6301.

Description	Full Description	Nomenclature	APC	Price
WALL MOUNT KIT REAR FOR RBS 6301 AND BBS 6301	-	DDN2401	051	\$640.00

Ground base frame option. Order Quantity 1 per site, depending on mounting option selected for RBS6301.

Description	Full Description	Nomenclature	APC	Price
GENERIC BASE FRAME FOR RBS 6301 AND	-	DDN2402	051	\$400.00

Indoor DC Configurations

**Real Time Crime Center Services 2.0
(RTCC 2.0)**

Ordering Information

Executive Summary

Real Time Crime Center enables smart policing and emergency response by provisioning real-time intelligence to first responders during incidents and making video and other data and media inputs available and actionable. With the Real-Time Crime Center solution from Motorola Solutions, law enforcement officers can now approach an incident armed with more operational intelligence than ever before. Inputs from multiple data sources such as video, sensors, alarms, computer-aided dispatch (CAD) and records are integrated with data analytics to deliver one, unified operational view.

RTCC enables better situational awareness and allows for more proactive responses resulting in smarter and safer decisions. Advanced public safety analytics deliver intelligent data and video to anticipate crowd formations, recognize faces, or detect gunshots to help agencies become more proactive, shortening response times and optimizing resource strategies.

Product Description

Overview

Real Time Crime Center Services 2.0 supports the current RTCC Solution related to all hardware, software and virtual feature connectors which can connect to stand alone systems such as UNS, UEM, APLR, etc.

RTCC Technical Support

RTCC Technical Support service provides continuous centralized remote telephone support for technical issues that require a high level of RTCC solutions expertise or troubleshooting on RTCC equipment. Once a trouble call is received from the customer technical resource, Motorola immediately begins diagnosis of the event. This may also include remotely connecting and interrogating the RTCC system, running appropriate diagnostics, characterizing the problem, and remotely restoring the affected device or subsystem. If a remote fix is not possible, if the customer has a current Onsite Infrastructure Response & Dispatch service contract, a field technician will be dispatched to the site. Motorola will engage relevant engineering resources, as required, to resolve the issue.

RTCC Onsite Infrastructure Response with Dispatch Service - Standard & Premier Options

On-Site Infrastructure Response & Dispatch service provides Case Management and

escalation for onsite technical service requirements. The On-Site Infrastructure Response & Dispatch service is delivered by the MSI's Solutions Support Center ("SSC") in conjunction with a local service provider. The SSC is responsible for opening a Case for on-site support and monitoring the status of that Case to ensure strict compliance to committed Response Times.

Service is available 24*7 to dispatch servicers to be at a customer's site within a specific timeframe, which is defined by the severity of the problem.

SSC will create a Case as necessary when On-Site Infrastructure Response & Dispatch service requests are received. Gather information to perform the following:

- Characterize the issue.
- Determine a plan of action.
- Assign and track the Case to resolution.
- Dispatch. Call out a Servicer as required by MSI standard procedures.

Once on-site, the servicer will diagnose the issue and work towards resolution which may include installation of necessary patches (to the extent that the customer is entitled to receive them), installing new hardware with the units provided by the customer or under the MSI RTCC Solution Advanced Replacement Support service.

RTCC Advanced Replacement Support

RTCC Solution Advanced Replacement is a repair exchange service for Motorola Solutions, Inc. ("MSI") and select third party infrastructure supplied by MSI. When available, MSI will provide customer with an advanced replacement unit(s) or Field Replacement Units ("FRU") in exchange for customer's malfunctioning equipment. All malfunctioning equipment returned to and kept by MSI becomes the property of MSI. This service provides replacement for the RTCC, MSIP and RIC server hardware that comprise the RTCC Solution.

Replacement units and Field Replaceable units will be shipped directly to the Customer. Shipments will be made to customer prior to receiving the Customer's damaged unit in the service center. Infrastructure will ship for next-business-day delivery. In NA calls must be received before 7 p.m. (EST) for the Infrastructure to ship the day the call is placed (excludes MSI-observed holidays).

NOTE: The terms and conditions of all Statement of Works (SOW) are an integral part of Motorola's Service Terms and Conditions or other applicable agreement to which it is attached and made a part thereof by this reference.

Statement of Work

One of the primary business objectives of the North American Group (NAG) is to promote the sales of STANDARD service products. Standards help to ensure consistent and profitable delivery of our service products to our customers. To that end, the customer Statement of Work for this Standard Service Product **CANNOT** be modified. All requests for modifications to STANDARD service products or the development of "custom" service products should be routed through the Solutions Planning process. Your first point of contact for these requests is your local Area Service Manager.

Definitions

Capitalized terms used in this Statement of Work and not otherwise defined within the Statement of Work or Communications System Agreement have the following meanings: [Click here](#)

All SOW's can be found on Insite ([Click here](#)) and will also be loaded and linked to the appropriate models in Services Life Cycle (SLC)

- RTCC Technical Support SOW
- RTCC Dispatch and OnSite Infrastructure Response Service SOW
- RTCC Infrastructure Repair with Advanced Replacement SOW

Ordering Requirements

This product cannot be ordered directly through COF at this time. This product must be ordered using the Service Lifecycle Application (SLC). Please contact your local Territory

Service Lead (TSL), Customer Support Manager (CSM) or System Manager (SM) if you are interested in ordering this product.

Options for this product are based on the component parts of the complete system. Pricing is based on the size and complexity of the customer's system configuration such as the type of system, number of sites and number of products. To ensure accurate pricing, orders will not be processed or accepted if they do not include all systems components.

1. Enter the main line item as quantity one.
2. Options are required as sub-items, with the quantity equal to the option description.
3. All dollar amounts reflect an annual one year pricing.
4. A Customer Support Plan must be created to provide detailed information to the customer regarding delivery of this service.

Site ID & Technology Information

Site ID Prefixes:

- PSAXXXX_(RTCC) – Format should be used for New & Existing customers.

Technology: All Sites should use **RTCC** as the technology in order to build Install Base and price all SLC Contracts correctly.

Updates

NEW JULY 2019!

TO REGISTER FOR AIRLINK COMPLETE SEE BELOW:

Go to this website: <https://www.sierrawireless.com/complete/register/>

New Customer will need to log in and create a log in account.

This process costs nothing – it is a free service that is included in the first year of the MP70 and RV55 that you are receiving.

It will register the devices for you to be eligible to call in for phone support and the use of ALMS (our online management software).

IT'S ALL ABOUT INFORMATION FLOW

Vehicle routers keep people connected in vehicles so they can access real-time intelligence on the road. They provide a bubble of connectivity around the vehicle that allows a variety of equipment from laptops and tablets to in-vehicle and body-worn cameras to access the Internet. We call this bubble a vehicle area network (VAN) and the connectivity between the VAN and the enterprise network is what makes the crucial flow of information between the field and base possible. For public safety, this information flow can be a lifeline. Mobile connectivity over WAN allows frontline teams to transmit and receive data securely in real time – video feeds, maps and criminal record databases, for example – and coordinate their response with other emergency services. Command can monitor the location and status of assets, access telemetry and see fleet information such as data on driver behavior. This two-way flow of information help keep responders safe and effective.

ALL NEW ROUTERS MUST BE REGISTERED HERE: <https://www.sierrawireless.com/complete/register/>

SALIENT Location Application

Ordering Information

General Information

CommandTRACKER GPS for Motorola IV&D ASTRO® 25 Networks is a full featured command and control GPS solution. It is designed to provide broad scale common operating pictures (COP) where ever Motorola subscriber and mobile units are deployed. This provides emergency operations managers in Public Safety, Law Enforcement, Military and Homeland Security settings with enhanced situational awareness, increased safety and security – all in an effort to significantly increase the capability for real time decision making

NOTE: ESRI mapping is not part of this solution. It is assumed that the customer already has the mapping application. If mapping application other than ESRI is needed, please contact Renata Oiticica Lampert for details.

ComandTRACKER is IA certified. For quote with IA needs please mention on the questionnaire for appropriate pricing.

Features

Real Time Tracking

- Variable & Configurable Refresh Modes
- Immediate Location Updating
- Situational Awareness across Multiple Groups (Security, Public Safety, Force Protection)

Customizable Groups

- Standardized & Pre-Configured
- Ad-Hoc for “on the fly” events

Geo-Fencing & Incident Alerts

- Event driven & Pre-Planned
- Configurable Alerts and Refresh Rates

Playback

- History for Investigation reports & Training
- Breadcrumb Trails

Extend Your CAD/AVL COP

- Integrate Motorola IV&D ASTRO® 25 GPS enabled data directly into your existing CAD or AVL system

Secure Dispatch Communications Server (S-DCS)

DIMETRA X Core D9.0.1 and

DIMETRA IP Scalable SR8.2

Ordering Information

General Information

SECURE DISPATCH COMMUNICATIONS SERVER (S-DCS) SUBSTEM

The Secure Dispatch Communications Server subsystem (S-DCS), is a End to End Encrypted (E2EE) Integrated Command and Control System (ICCS) Gateway subsystem used to provide secure connectivity from E2EE subscribers, right up to the Control Room. For this reason, the S-DCS is only deployed in a remote Control Site and not at the MSO (as is normally the case with clear DCS). The S-DCS is the interface between the DIMETRA X Core or DIMETRA IP Scalable MSO and third party Customer Control Room applications, e.g. ICCS.

Based on the MCC 7500S Dispatch System, the S-DCS comprises a Call Control Entity (CCE) server that provides 10 CCE nodes that handle the call processing between the Zone Controller and the ICCS clients and up to 10 Audio Processing Entities (APEs) and associated Console CryptRs and that handle the encrypted audio between the DIMETRA X Core System and the ICCS clients. Up to 5 S-DCS servers (one for every 10 CCE nodes) per remote control site are supported.

The E2EE Console CryptR modules and APEs used by the S-DCS are based on those used in the MCC 7500S ICCS Gateway.

The S-DCS subsystem comprises the following equipment:

- Secure Dispatch Communications Servers (S-DCSs)
- Control Site Switch (2 for redundancy)
- Control Site DMZ Switch (2 for redundancy)
- Control Site Router (2 for redundancy)
- Control Site Border Router (2 for redundancy)
- Control Site Firewall (2 for redundancy)
- Control Site Multiplexer (RAD Megaplex 2100) (2 for Redundancy)
- Rack(s), KVM Switch(es)

Further details and descriptions can be found in the Component section of the D9.0.1 [D9.0.1 System Planners](#) or the SR8.2 System Planners.

There is no redundancy as such for S-DCSs but by deploying more than one server and

distributing the ICCS clients between them, so that in case of one server failure, then the S-DCS service will not then be lost entirely. Only those ICCS clients which are working via the failing server will go out of service. The service will continue with reduced capacity through other ICCS clients that are working together with another S-DCS.

Each Zone can support up to 110 S-DCS servers across a maximum of 55 Control Sites. However, the total S-DCS/ DCS CCE Nodes plus MCC 7500C/MCC 7500S consoles must not exceed 500 in a Zone and 2000 in a Cluster. For other constraints/details please refer to the Performance and Capacity section of the [D9.0.1 System Planners](#) or the SR 8.2 Planners.

Export Control Requirements

IMPORTANT NOTE FOR ALL ENCRYPTED ITEMS

All Motorola TETRA (Dimetra) encrypted infrastructure and encrypted subscriber, as well as encryption key distribution and encryption key management hardware and software products, including kits, spare parts and encryption upgrades are controlled for export and will generally require an approved export licence prior to shipment from the Motorola factory to any customer.

Export Licence approvals are based on the country of final destination and the specific end user. Certain countries and certain end users will not be eligible for approval.

Any items that require an export licence are highlighted in the sections below. Contact your Local Export Control office if you are unfamiliar with the licensing process or to discuss any possible licensing restrictions before submitting bids, proposals, or accepting orders for encryption products.

Current contact information can be found at <http://exportcontrols.mot.com/>.

Oracle R12 Order Management System

OM/COF Product Catalog pages

This page are provided as an ordering guide. If ordering using Oracle R12 Quoting then you can use the System BoM <**DIP-CONTROL**> to order an D9.0.1 S-DCS subsystem. DIP-CONTROL has been updated for D9.0.1; do NOT use DIP-CONTROL for SR8.2 S-DCS. For SR8.2 please use the part numbers below directly into the Quote. Some items can only be ordered using either DIP-CONTROL or an SBoM (e.g. GGM 8000 and RAD Mux). These are shown in the individual items below.

When a valid configuration has been completed the resulting equipment list can be checked by using the ordering information below in conjunction with the [D9.0.1 System Planners](#) or SR8.2 planners.

Following are some useful System BoM and SBoM names for S-DCS items:

DIP-CONTROL (System BoM)	DIM-9-0-SW	DIM-MCC7500-HW	DIMETRA-GGM8000
DIM-CRYPTR	DIM-NWS	DIM-RAD-MUX	DIM-LK

Configuration

Ordering Requirements

The part numbers below can be used to check the output of the DIP-CONTROL configuration.

If ordering in COF, just use the part numbers defined below.

Item 1: Cabinet, Cables and KVM Switches (mandatory)

Order quantity 1 of GMHN4567 for each rack required. Order one hundred (100) of EDN7977A for each rack for the cabling.

One GMLN4204C combined keyboard, monitor, touchpad/trackball and Keyboard Video Mouse switch is required in each rack to manage the servers.

Description	Full Description	Nomenclature	APC	Price
R8.0-CNE CABINET	-	GMHN4657A	558	\$8,280.00
SIC CUSTOMIZED SITE CABLE SET	-	EDN7977A	078	\$36.50
BLACKBOX KVM SWITCH ROHS COMPL	-	GMLN4204C	558	\$4,270.00

Item 2: Terminal server and diagnostic modem (optional)

Terminal Servers

Remote configuration and management is recommended for support of the S-DCS remote Control site equipment. Order one In-Reach Terminal Servers (GMDN1101). One terminal server can handle up to 48 devices.

Description	Full Description	Nomenclature	APC	Price
INREACH TS LX4048T INT MODEM	-	GMDN1101B	078	\$5,710.00

Modem

If required, order 1 Multi-Tech Systems MT9234ZBA modem per terminal server. Order each Multi-Tech modem GMDN1157 with appropriate option TG00104 for destination country. See the specification sheet to be found [here](#) for full details of options.

Description	Full Description	Nomenclature	APC	Price
DIMETRA DATA MODEM	-	GMDN1157B	558	\$256.00

Item 3: Secure Dispatch Communications Server (S-DCS) (mandatory)

Up to 5 DL360 Gen 9 servers, GMDN6422A, can be supported on each Remote Control Site. Each server can provide up to 10 CCE Nodes.

Item 4: Order the Audio Processing Entity (APE) (mandatory)

The Audio Processing Entity (APE) PC provides the audio interfaces for the ICCS. It includes a 'Pyramid' rackmount PC with Digigram soundcard, cable and XLR extension cable. Order one GMLN1160 plus options CA01383, CA02460 or CA03338 and CA01339 for each APE required. A European AC Line Cord is included. For a UK AC line cord order CA00140AC for each APE. For a China AC line cord order CA00140AN.

Up to ten APEs can be supported by one S-DCS. Each APE requires a Console CryptR, see below.

Note that in COF the quantity of GMLN1160 cannot exceed 6 per order line. In Oracle R12, these can only be ordered from within System BoM DIP-CONTROL or via SBoM DIM-MCC7500-HW.

Description	Full Description	Nomenclature	APC	Price
ADD: MCC7500S APE DIM IP PR PKG	-	CA01383AA	530	\$0.00
ADD: RACKMOUNTABLE APE	-	CA01339AC	530	\$8,700.00
ADD: AC LINE CORD, UK	Adds one AC line cord with a United Kingdom plug.	CA00140AC	597	\$0.00
AC LINE CORD CHINA	-	CA00140AN	443	\$0.00

Item 5: Order the Console CryptR (mandatory)

Order one Console CryptR for each APE. Order one GM0215 with ONE algorithm option CA01389 - AES128, CA01390 - AES256 or CA01391 D6.1 EG UK. Note that the latter is for restricted use in the UK only. Each CryptR requires an AC Line Cord Option. Order one AC line cord CA02064 or CA02065.

In Oracle R12, these can be ordered using System BoM DIP-CONTROL or SBoMs DIM-MCC7500-HW (in conjunction with the APE) or DIM-CRYPTR.

Description	Full Description	Nomenclature	APC	Price
D7.X/D8.X CONSOLE CRYPTR	-	GM0215B	532	\$4,687.00

ADD:AES-128	-	CA01389AA	532	\$0.00
ADD:AES-256	-	CA01390AA	532	\$0.00
ADD:D6.1 EG UK	-	CA01391AA	532	\$0.00
AC Line Cord, UK	-	CA02064AA	137	\$0.00
AC Line Cord, European	-	CA02065AA	137	\$0.00

Add the CryptR rack mounting bracket if required:

Description	Full Description	Nomenclature	APC	Price
CRYPTO BRACKET	-	07015022001	558	\$100.00

Item 6: Control Site Routers (mandatory)

One or, for redundancy, two GGM 8000 gateways(s) is/are deployed per S-DCS. In Oracle R12 these devices can only be ordered through the DIMETRA-GGM8000 SBoM.

Description	Full Description	Nomenclature	APC	Price
DIMETRA GGM8000 BASE MODEL	-	GM0240B	558	\$5,494.00

Item 7: Control Site Switches (mandatory)

One or, for redundancy, two LAN switches are deployed per S-DCS. Order two GMLN2544A (D9.0.1) or GMDN2544C (SR8.2) Switches.

Description	Full Description	Nomenclature	APC	Price
DIMETRA LAN SWITCH 2930	-	GMLN2544A	302	\$1,880.00
DIM LAN SWITCH PROC.2620_48	-	GMDN2544C	302	\$3,500.00

Item 8: S-DCS Border Routers (mandatory)

One or, for redundancy, two Border Routers are deployed per S-DCS subsystem. Order one or two GM0240 Gateways. In Oracle R12 these devices can only be ordered through the DIMETRA-GGM8000 SBoM.

Description	Full Description	Nomenclature	APC	Price
-------------	------------------	--------------	-----	-------

DIMETRA GGM8000 BASE MODEL	-	GM0240B	558	\$5,494.00

Item 9: S-DCS Firewalls (recommended)

A redundant pair of Fortinet Firewalls are recommended per S-DCS subsystem. Redundancy is optional but failure of one non-redundant Firewall will lead to loss of the Control Site. Perimeter protection at the MSO is mandatory with the S-DCS subsystem, though the full Network Security suite is not.

Description	Full Description	Nomenclature	APC	Price
DIMETRA FIREWALL (FORTINET)	-	GM0288A	558	\$2,720.00

Item 10: DMZ Switches (optional)

One or, for redundancy, two LAN switches are deployed per S-DCS. Order one or two GMLN2544A Switches for D9.0.1 or GMDN2544C for SR8.2.

Description	Full Description	Nomenclature	APC	Price
DIMETRA LAN SWITCH 2930	-	GMLN2544A	302	\$1,880.00
DIM LAN SWITCH PROC.2620_48	-	GMDN2544C	302	\$3,500.00

Item 11: S-DCS Multiplexer

The S-DCS Multiplexer is the same RAD Megaplex 2100 item as that used by the ICCS Gateway used for previous releases. Note: The quantities of Options shown below are for each multiplexer. Use the configuration worksheet found [here](#) to calculate your total specific system level requirements.

In Oracle R12 these items can only be ordered using the System BoM DIP-CONTROL or SBoM DIM-RAD-MUX.

Multiplexer Main Unit

Order the Multiplexer Main unit under nomenclature GMDN0244 For a fully redundant Multiplexer order two GMDN0244 models with the required options.

Description	Full Description	Nomenclature	APC	Price
RAD MUX EQUIPMENT - MODEL	-	GMDN0244	597	\$0.00

Multiplexer Chassis.

Order 1 of the Multiplexer chassis using Option TG00001AA ON EACH MODEL GMDN0244 to provide one Multiplexer Chassis with 12 I/O card slots.

Description	Full Description	Nomenclature	APC	Price
ADD: MEGAPLEX 2100 MUX - MAIN UNIT	-	TG00001AA	597	\$8,103.00

Dual E1 Link

The E1 main link module has 2 E1 ports and requires one I/O slot in the multiplexer chassis. Order either between 1 or 2 modules for the (LAN link) or 1-3 modules for the (WAN link) ON EACH MODEL by ordering Option TG00004AA.

Description	Full Description	Nomenclature	APC	Price
ADD: DUAL E1 LINK MEGAPLEX2100	-	TG00004AA	597	\$2,493.00

16 Port Voice Module

The VC16 voice module has 16 channels and requires one I/O slot in the multiplexer chassis. Order between 1 & 7 of the modules ON EACH MODEL by ordering Option TG00021AA

Description	Full Description	Nomenclature	APC	Price
ADD: 16 PORT VOICE MODULE	-	TG00021AA	597	\$2,493.00

Octopus Cables

Two octopus cables are required for each VC16 voice module (1 cable covers 8 channels). Order between 1 & 13 of the cables ON EACH MODEL by ordering Option TG00036AA.

Description	Full Description	Nomenclature	APC	Price
ADD: KM-2000 CBL FOR 8 ANLG CH	-	TG00036AA	597	\$249.00

Item 12: Backhaul Firewalls (optional)

One or, for redundancy, two Fortinet Firewalls are deployed per S-DCS. Order one or two GM0288A.

Description	Full Description	Nomenclature	APC	Price
DIMETRA FIREWALL (FORTINET)	-	GM0288A	558	\$2,720.00

Item 13: Application Software, Operating Systems, Java License and

AntiVirus

Application software and Windows OS (bundled under one part number) and also VMWare, RHEL and a Java License are required for each S-DCS server. Application software and Windows OS (bundled under one part number) are required for each APE. Please refer to the relevant Software Ordering ECAT page for details.

You should also consider whether you need AntiVirus (AV) seat licenses. Two AV seats are required per standard S-DCS server hardware. If an S-DCS-UIS is to be added to one of the S-DCS servers, then this requires an additional AV license. Each APE requires a further AV license.

AntiVirus seats need to be added manually to your quote using the SBoM <DIM-NWS>, they are NOT added by DIP-CONTROL

Item 14: License Keys

License keys are required for S-DCS. Please refer to the D9.0.1 or SR8.2 License Keys catalog page for details.

Last Change: Updated System BoM information_19032018.

Ordering Information

[Ordering Guide](#)

All encryption products, kits, software and technology require an approved export license prior to shipment. Contact the Sector Export Control office at +1 (847) 576-8163 to discuss any possible licensing restriction. The international use of encryption algorithms (except for DES, DES-XL, DES-OFB) is highly restricted by the U. S. Federal Government. License approvals are considered for export to a limited selection of countries and end users. Contact the Sector Export Control office at +1 (847) 576-8163 for licensing information before submitting bids, proposals, or accepting orders for algorithm based encryption products.

Security Update Service (SUS) & Security Update Remote Delivery Service

Ordering Information

General Information

Security Update Service (SUS) provides the customer with peace of mind that the 3rd party SW security patches ASTRO uses are vetted for issues before they are applied to their live ASTRO system. These 3rd party patches include weekly anti-malware definition updates, monthly "Patch Tuesday " Microsoft Windows updates, and other operating system patches as they are released.

This service is only available for ASTRO25 System Releases according to this matrix. Is it critical that this be considered in planning for the duration of a contract and that upgrades be planned for continued support. Motorola reserves the right to discontinue support for any release (or component within a release) at any time.

System Release Estimated End Date

7.6	Ended 11/2013
7.7	Ended 9/2015
7.8*	Ended 11/2014
7.9	11/2016
7.11	11/2016
7.13	11/2018
7.14	11/2019
7.15	11/2020
7.16	11/2021
7.17	11/2022

*7.8 was a limited release, so support is ending earlier than typical. Note that 7.7 is a year longer than typical.

- This SUS was formerly known as Pre-tested Software Subscription or PTSS
- SUS Platinum was eliminated. The 3 key components were 1. IAVM reports 2. STIG Backporting and 3. Unix AV
 1. The IAVM reports actually come from the DoD and those require Federal access rights. Motorola takes those reports and pulls specific public information that maps the threats to the patches that come out. This will be made available to SUS customers that request it. There must be a need-to-know however.
 2. STIG backporting will be renamed to Security Updates Windows Configs and a separate model. It has its own eCAT page.
 3. Unix/Linux AV comes standard on all 7.13 CSA and all later systems. It is assumed that customers on 7.13 non-CSA and 7.11 and previous releases who need this have it by now.
- K-core based systems may now receive SUS updates for MCC 7500 consoles.
- The N-4 and N-5 options were eliminated.
- In the past, Intrusion Detection Systems (IDS) was an option. That option has been eliminated regardless of if the customer has an IDS or not.

Security Update Remote Delivery Service

Motorola's dedicated staff remotely installs the security updates onto your radio network as an additional option to SUS. Vulnerabilities from third party software are addressed as soon as the validation of recommended patches is completed. We will also provide reports outlining updates made for your team's review and awareness.

Features

- Weekly testing of anti-virus definition updates
- Monthly testing of Windows patches
- Quarterly testing of Solaris, Red Hat Linux, VMWare ESxi, and database security patches
- Email notification when updates are available
- Continuous monitoring of Information Assurance Vulnerability Management (IAVM) Alerts
- On-line availability of latest pre-tested updates and recommended remediation reports

Security Update Service [SOW](#):

Ordering Requirements

For Security Update Service or SUS with Security Update Remote Delivery Service

1. This service must be ordered through the SLC system.
2. For K, L, M systems, please ensure correct technology is selected in Install Base
3. For M Core, select the same number of Master sites as zones.
4. For customers sharing an L or M core, it is up to the CSM to divide the charges between the customers. An example might be one customer has the Master site and a Dispatch site and the other customer has no Master site and 2 dispatch sites.
5. For any core, input the dispatch site. Add any additional ops position to expanding systems as needed.

6. All dollar amounts reflect an annual one year pricing.
7. A Customer Support Plan must be created to provide detailed information to the customer regarding delivery of this service.

NOTE: Security Update Service is required if Security Update Remote Delivery is also ordered. Remote Delivery is optional.

Security Configuration Updates

Ordering Information

General Information

Security Configuration Updates was formerly known as STIG Updates.

The Defense Information Systems Agency (DISA) creates Information Assurance configuration standards for DOD IT systems and devices. These standards are known as Security Technical Implementation Guides (STIGs) and there are numerous STIGS. Currently we are providing STIG updates only for Windows but in the future other operating systems like Linux may be offered.

In every ASTRO release, Windows security configurations are assessed against the STIGs and modified accordingly. The purpose of Security Configuration Updates is to apply those newer updates in older releases to the extent possible. For example, when ASTRO 7.15 comes out, the security configurations in Windows will contain Motorola's latest STIG updates. Those updates are then translated into the older releases (according to the matrix below) so a customer with, say 7.11, can get to the same or nearly the same security updates to their Windows configuration.

This service is only available for ASTRO® 25 System Releases according to this matrix. Is it critical that this be considered in planning for longer-term contracts so that upgrades are included for continued support. Motorola reserves the right to discontinue support for any release (or component within a release) at any time.

System Release	Estimated End Date
Astro25 7.6	Ended 11/2013
Astro25 7.7	Ended 11/2014

General Information

Service from the Start (SfS) Comprehensive with Radio Purchase SOW

Service from the Start (SfS) Comprehensive with Radio Purchase is an optional service plan available in conjunction with Motorola's standard Commercial Warranty for select Motorola manufactured two-way subscriber equipment. This plan is available for purchase at the time of an equipment order. The plan is paid in full at the time of purchase and is non-cancelable and non-refundable.

Description of Service from the Start (SfS) Comprehensive:

Service From The Start (SFS) Comprehensive provides all-component level service for the Equipment that is specifically named in the applicable agreement to which this Statement of Work (SOW) is attached or any of the agreement's subsequent revisions. Services are performed at the Radio Support Center (RSC), or Federal Technical Support Center.

SFS Comprehensive is only applicable on XTS®, XTL™, APX™, and some MOTOTRBO™ model radios. A radio model may be added to an SFS Comprehensive service agreement while it is currently being manufactured by Motorola, or for up to one (1) year after manufacturer cancellation date of said model

SFS Comprehensive includes:

- replacement of cracked housings, frames, covers, crushed components, shields, missing components, circuit boards, warped circuit boards
- Damage to LCD screens (cracks to screen, or any damage that does not pass Motorola test parameters)
- Damaged foils/traces/lands
- Electrical damage
- Water/chemical corrosion
- Contaminants visible which cannot be cleaned up reliably

The customer will incur additional charges at the prevailing rates for any of the following activities, which are NOT covered under SfS Comprehensive with Radio Purchase:

1. Replacement of consumable parts or accessories, as defined by product, such as batteries, antennas, and other similar items
2. Damages from natural or man-made disasters where normal use of the product was not a factor, such as but not limited to fire, theft, and floods that would cause internal and external component damage or destruction.
3. Non-remedial work, such as but not limited to firmware or protocol upgrades, reprogramming, and product configuration

4. Repair of non-covered products

5. Damages caused by using the device outside of the product's operational and environmental specifications

6. Damages caused as a result of the device being modified or repaired by a third party

Motorola reserves the right to monitor the customer's repair history under this SFS Comprehensive service agreement. Motorola may take appropriate action if the customer's repair history under this SFS Comprehensive service appears to be in violation of this Statement of Work.

MOTOTRBO, XTS, XTL and APX model radios that are presently on a standard service agreement may be transferred to an SFS Comprehensive service agreement. These transferred units must either be models that are currently being manufactured by Motorola or models where manufacturing by Motorola was canceled within the prior 364 days.

Customers who wish to add MOTOTRBO, XTS, XTL and APX model radios that are currently being manufactured by Motorola that are not presently on a standard service agreement must be operating in accordance with Motorola specifications, and are not damaged. If Customer attempts to add radios to the SFS Service Agreement that are not operating in accordance with Motorola specifications or are damaged, Motorola may either terminate the Service Agreement, as provided in the Service Terms and Conditions, or in its sole discretion, Motorola may terminate just those services covered by this SFS Comprehensive Statement of Work.

Motorola recommends a Preventative Maintenance check be completed on radios that are not currently under an SFS service agreement so the customer can confirm radios are operational and aligned with Motorola specifications, and are not damaged.

In addition to Equipment specifically named in the applicable agreement to which this Statement of Work is attached, Service From the Start Comprehensive includes single mobile control heads provided that they are required for normal operation of the Equipment and are included at the point of manufacture.

SFS Comprehensive excludes repairs to: optional accessories; standard mobile palm microphones; non-standard mobile microphones; iDEN mobile microphones; portable remote speaker microphones; optional or additional control heads; mobile external speakers; mobile power and antenna cables; and power supplies. Engraving service is not covered under SFS Comprehensive.

SFS Comprehensive is non-cancelable and non-refundable. If Equipment is added to the agreement subsequent to the Start Date, these units are also non-cancelable and non-refundable for the agreement duration. Equipment may only be added to the agreement, via a customer signed or emailed Motorola Inventory Adjustment Form (IAF). Complete and accurate serial numbers and model descriptions must be supplied.

All inventory adjustment requests for add-on subscriber units received prior to the 15th of the month will be effective the 1st of the following month. Equipment add-on requests received after the 15th of the month will be effective the 1st of the next succeeding month.

Equipment deletions from the agreement may only be deleted under the following limited conditions:

- a) Equipment was stolen and proof of theft is provided to Motorola; or
- b) Motorola determines Equipment is damaged beyond repair; or
- c) Motorola determines Equipment is no longer supportable or is obsolete; or
- d) Equipment had already been under a previous contract for at least the twelve month requirement.

Equipment deletions, where applicable, will be effective at the end of the month in which the request was received.

The terms and conditions of this Statement of Work are an integral part of the Motorola Service Agreement or other applicable agreement to which it is attached and made a part thereof by this reference. If there are any inconsistencies between the provisions of the Motorola Service Agreement or other applicable agreement and this Statement of Work, the provisions of this Statement of Work shall prevail.

Motorola has the following responsibilities:

1. Test and Restore the Equipment to Motorola factory specifications, including Factory Mutual (FM), and Mine Hazard Safety Association (MHSA).
2. Reprogram Equipment to original operating parameters based on the Customer template, if retrievable, or from a Customer supplied backup. If the Customer template is not usable, a generic template or code plug utilizing the latest Radio Service Software (RSS) or Customer Programming Software (CPS) version for that Equipment will be used. The Equipment will require additional programming by the Customer to restore the original template. All Firmware is upgraded to the latest release for each individual product line.
3. Clean external housing of the Equipment. External components of unit will only be replaced when functionality has been diminished.
4. Replace currently manufactured Equipment if it is determined that the Equipment is unrepairable. Motorola will contact the customer to inform them if Equipment needs to be replaced and that the cycle time may be increased because of the replacement. If unrepairable Equipment is no longer manufactured, the customer will have the option of having the radio returned unrepairs to them.
5. Pay the outbound freight charges. Motorola will pay for outbound shipping via Motorola's published ship card. Motorola will pay the inbound freight charges if the Customer uses the Motorola designated delivery service.
6. Provide Customer with the Motorola repair request form and Inventory Adjustment Form (IAF).
7. Perform covered services as requested by Customer on the Motorola repair request form.

Process inventory adjustment requests received by email or fax from Customer. If the request is received by email, Motorola will email an acknowledgement to the sender.

9. If applicable, notify Customer of changes in Motorola designated inventory adjustment email address or fax number.

Customer has the following Responsibilities:

1. Supply Motorola complete and accurate serial numbers and model description.
2. Utilize the Motorola designated deliver service program to obtain Motorola payment for inbound shipping.
3. Access the Motorola repair request form through Motorola On Line
4. Initiate service request via Motorola On Line or complete a Motorola repair request form with contract number referenced, and submit it with each unit of Equipment sent in for service. Mobile control heads or palm microphones sent in must reference the serial number of the main unit.
5. If desired, supply Motorola with a backup Software template or programming in order to assist in return the Equipment to original operating parameters. this step must be completed for Equipment that will not power up. If applicable, record the current flashcode for each radio.
6. If Motorola must utilize a generic template or code plug to Restore Equipment to operating condition, Customer is responsible for any programming required to Restore Equipment to desired parameters.
7. Provide a signed or emailed Motorola Inventory Adjustment Form (IAF) fro all Equipment additions.

Service Repair Bank Service

Ordering Information

General Information

Services Repair Bank (SRB) is a prepaid, discounted flat rate repair account based on a debit card concept which allows customers to purchase \$2500, \$5000, or \$10,000 worth of RSC or IDO services at a tiered discount rate. The discount will be taken up front and when the customer sends in radios or Infrastructure equipment to the RSC or IDO for repair or requests other RSC or IDO services; the standard flat rate will be deducted from the customer's SRB account. No discounts will be allowed beyond the standard program's tiered discount level. There is no term limit. The account will be valid for as long as funds remain in the account. Funds from customer's SRB account will be available not only for repairs, but can also be used for programming, physical damage, engraving, and any other service provided by the RSC or IDO. Web-based tracking of account status will be available to customers via the existing authorized service web site and authorized dealer web site. Email notifications will be sent out when 1) account is near expiration; and 2) account is near depletion.

Features

- Up front discount
- Free outbound shipping for subscriber units
- No term limit
- Account status availability
- No hassles with multiple purchase orders
- Additional service capacity and technical expertise

Statement of Work

One of the primary business objectives of the North American Group (NAG) is to promote the sales of STANDARD service products. Standards help to ensure consistent and profitable delivery of our service products to our customers. To that end, the customer Statement of Work for this Standard Service Product **CANNOT** be modified. All requests for modifications to STANDARD service products or the development of "custom" service products should be routed through the Solutions Planning process. Your first point of contact for these requests is your local Territory Service Manager.

Definitions

Capitalized terms used in this Statement of Work and not otherwise defined within the Statement of Work or Communications System Agreement have the following meanings: [Definitions](#)

General Information

Shipping Information, Safety Notice And Warranty Information

SHIPPING INFORMATION

MODELS LISTED IN PRICE BOOK

The NORMAL shipping cycle for equipment listed in this price book is carried in the COMMUNICATIONS PRODUCTS SHIPPING SCHEDULE (Shipping Card), which is mailed monthly to price book users.

MODELS NOT LISTED IN PRICE BOOK

Shipping schedules for ANY models, including P, Q, and SP model series, which are not listed in this price book must be negotiated with the Product group.

SAFETY NOTICE

Liquefied Petroleum (LP) gas fueled vehicles: Section 381 of the National Fire Protection Association Standard No. 58 requires (in part) that the passenger-carrying compartment and any space containing radio equipment shall be isolated by a seal from the space in which LP-gas container and its fittings are located.

MOTOROLA MOBILE RADIO EQUIPMENT MUST NOT BE INSTALLED ON THE LP-GAS CONTAINER SIDE OF THE SEAL.

WARRANTY INFORMATION

All products appearing in section 1.0 are backed by Motorola's **ONE YEAR PARTS AND LABOR WARRANTY** for protection against defects in material and workmanship. Selected Mobiles offer optional coverage through the Extended Service Plan. Please refer to specific mobile option pages for further details.

Site Ancillary for Public Safety LTE

Ordering Information

General Information

This section consists of site ancillaries, including cables and connectors, accessories including grounding kit and mounting options for Public Safety LTE eNodeB sites. The typical deployment will consist of 1/2" jumper cables coming from the antenna to RRUs, SFP connectors, power adapters for fiber and power jumper connectivity between the BB/RBS and RRUs, as applicable. The configuration is sub-divided into cables, connectors and accessories.

Configuration

CABLES:

1/2" Jumper Cable

Jumper cable on the antenna and RRU side.

Order Quantity 2 per RRU on 2T2R configurations.

Order Quantity 4 per RRU on 2T4R configurations.

DC Power Cable:

The 2-wire power cable between RBS and RRUs, typical assumption may be 50m per radio, total length spooled across all eNBs:

Description	Full Description	Nomenclature	APC	Price
100M DC POWER CABLE, 2X10 MM2, SUP	100 m	DDN2373	051	\$690.00
300M DC POWER CABLE, 2X10 MM2, SUPP	300 m	DDN2374	051	\$1,870.00
500M DC POWER CABLE, 2X10 MM2, SUPP	500 m	DDN2378	051	\$2,800.00

NOTE: On non-hybrid solutions for DC power and fiber, although the cables are outdoor rated, local site installers are suggested to be consulted for conduit installation.

NOTE: Refer to Product Catalog page eNodeB Band Class XX, sub-section Base Terminal Equipment Requirements for DC power cable between the switch and the eNB.

CONNECTORS:

With 2-wire power cables connecting the RBS to the RRUs, the following is mandatory. Order Quantity 1 per RRU:

	Full			
--	------	--	--	--

Description	Description	Nomenclature	APC	Price
CIRCULAR POWER CABLE CONNECTOR 2-POS 10MM2	-	DDN2445	051	\$30.00
2-WIRE DC ADAPTER	-	DDN2446	051	\$30.00

SFP connector is required for CPRI interface between BB and RRUs. In this case, up to 9.8 Gbps/SM/1.4m is offered. Order Quantity 2 per RRU:

Description	Full Description	Nomenclature	APC	Price
SFP+ SM 10.3GB/S 1.4KM 1310NM	-	DDN2377	051	\$40.00

ACCESSORIES:

Cable clamps:

Orderable unit comes as pack of 10 clamps. One clamp is suggested per RRU:

Description	Full Description	Nomenclature	APC	Price
CABLE CLAMPS FOR 3 RRU, 10 PC	-	DDN2407	051	\$50.00

Weatherproofing for connectors:

The suggested quantity is 1 per 2T2R radio or 2 per 2T4R or 4T4R RRU:

Description	Full Description	Nomenclature	APC	Price
221213 CABLE WRAP WEATHERPROOFING	Supplier # 221213	TDN9289	351	\$19.00

Fiber overlength box:

Cable winder box holds up to 30 m optical cable excess length. It can mount to a wall, tower leg, etc. and possible to stack onto each other.

Suggested quantity is 1 per site:

Description	Full Description	Nomenclature	APC	Price
FIBER OVERLENGTH BOX	-	DDN2420	051	\$40.00

Jumper grounding kit:

Standard grounding kit for corrugated coaxial cable and elliptical waveguide.

Suggested quantity is 1 per site:

Description	Full Description	Nomenclature	APC	Price
241088-2 5/8" AND 7/8" 2 HOLE GROUNDING KIT	-	DS2410882	351	\$30.00

GPS Kit:

Refer to Refer to Product Catalog page under eNodeB Band Class XX sub-section Site Synchronization Requirements.

Surge Protection:

Refer to Refer to Product Catalog page under eNodeB Band Class XX sub-section Surge Protection Requirements.

RRU Mounting:

Universal Single RRU pole bracket for installation on mast, tower, wall or other vertical and horizontal structures.

Order Quantity 1 per RRU:

Description	Full Description	Nomenclature	APC	Price

Antenna Site Audit

Ordering Information

General Information

Antenna Site Audit is designed to evaluate the condition and characteristics of antenna sites, towers and site equipment. Highly skilled technical resources will perform a one-time comprehensive audit to help determine compliance with local, state, federal and industry standards and guidelines. A detailed report, including digital photographs, will be prepared with recommendations for achieving compliance and improving critical issues. Motorola will then work with the customer to coordinate servicers and implement recommendations. Repairs and maintenance costs are not included in this service

Features

- Trained technical expertise on-site
- Digital photos of site conditions
- Accurate and organized site documentation binder
- Site Audit per R56 Standards
- Summary report with detailed recommendations

Statement of Work

One of the primary business objectives of the North American Group (NAG) is to promote the sales of STANDARD service products. Standards help to ensure consistent and profitable delivery of our service products to our customers. To that end, the customer Statement of Work for this Standard Service Product **CANNOT** be modified. All requests for modifications to STANDARD service products or the development of "custom" service products should be routed through the Solutions Planning process. Your first point of contact for these requests is your local Area Service Manager.

Futurecom Systems Group, ULC is committed to offering quality products and service and greatly appreciates your continued business and support.

SLIM - SIREN AND LIGHTS INTERFACE MODULE

SIMPLER, SAFER, CENTRALIZED Emergency vehicles are a complex environment. Loaded with specialized equipment and controls, it's not easy to know where to look. An overloaded cockpit can lead to user distraction in critical moments. Motorola Solutions has collaborated with Futurecom Systems Group, ULC, an innovative company of experienced radio professionals, to deliver the Siren and Lights Interface Module (SLIM).

The SLIM creates a single touch point to operate all mission critical equipment in an emergency vehicle. It enables APX™ control heads to operate light bars and sirens while also delivering a common microphone for PA and radio communications. Now you have a cleaner, simpler workplace that provides a safer and more efficient emergency vehicle experience. Simple and compact, the SLIM module is installed in the trunk of the vehicle, where it interconnects the APX mobile radio with products from most of the leading lights and sirens manufacturers.

Integrated Control Head: integrated design reduces the amount of equipment required in the vehicle, providing officers with more cabin space and easier access to all controls.

Software & Services

In North America, the NA Centralized Managed & Support Operations (CMSO) Service Desk (800-221-7144) will provide Tier 1 support to the customer. The NA CMSO Service Desk will open a Technical Support case and warm transfer the call to Futurecom (800-701-9180) or 647-642-5548) in Ontario, Canada. Technical Support is available 5 days a week, 9am to 7pm Eastern Time (ET) under standard warranty. 24x7 technical support will be provided for Severity 1 issues. The CMSO team may not be used as setup/deployment means to backfill unsold integration services.

Before warm transferring caller to Futurecom, the Service Desk must gather answers to the following script questions, and then provide these answers to Futurecom at warm transfer.

Ø What is the issue? Please describe what is not working.

Ø What is the serial number on the unit?

[ADDITIONAL ORDERING REQUIREMENTS AND OPTIONS](#)

[SHIP CARD](#)

General Information

SmartX to MCC 7500 Dispatch Console VPM Conversion Service

Customers migrating from SMARTNET and SmartZone Trunking systems to ASTRO ®25 have been able to make the transition in a more economically and operationally effective way due to availability of Motorola SmartX site converters. However, upon completion of the migration customers are faced with the decision of what to do with their SmartX converter. This service solves that problem by converting SmartX site converters to Voice Processor Modules (VPMs) that can be used with the MCC 7500 IP Dispatch Console.

By having Motorola convert the software of the SmartX converter and simply re-using the hardware, the product takes on new functionality that is relevant to current needs. The price to convert the SmartX converter is less expensive than purchasing a brand new VPM for the MCC 7500 dispatch console.

Statement of Work

Motorola has invested significantly in its centralized, ISO9001 and TL9000-certified Infrastructure Depot Operations (IDO). We are a trusted partner for the repair and maintenance of thousands of customers' critical communications networks. This conversion service which is also offered through Motorola's IDO, expands our customer support capabilities and, more importantly, helps you to maximize your equipment investment. The economy of scale generated by a centralized service facility means you can take advantage of expert, high-quality reliable support at an economical price.

[SmartX Conversion to MCC 7500 VPM Statement of Work](#)

Ordering the Service

1. Customer contacts our System Support Center (SSC) and requests the SmartX conversion.
2. Customer provides the SSC representative (minimally)with a site ID and P.O. number.
3. The SSC representative provides the customer with a return material authorization number (RMA #).
4. Customer ships their SmartX Site Converter (s) to IDO. (Customer to cover inbound shipping charges)
5. IDO ships the MCC 7500 Dispatch Console VPM (converted SmartX) back to the

customer. (Customer to cover outbound shipping charges)

Additional Ordering Requirements and Options

Please note that in order for customers to fully build out their MCC 7500 Dispatch Consoles a **MCC 7500 Basic Console Functionality Software License** MUST be purchased.

Additional license options may be required depending on the features desired on the dispatch console (e.g. Trunking, Conventional and Inbound Event Display – IED).

Also, if secure operation is required then a Secure Operation License must be ordered along with the desired algorithm (option).

Peripheral equipment such as speakers, microphones, headset jacks and footswitches are also available for purchase depending upon the customer's needs.

Please refer to the MCC 7500 Dispatch Console price pages for specific options and pricing on all the above hardware, software and license items that are either required or need to be considered for the MCC 7500 console.

Model

QUANTAR®

Software and Hardware FLASHport® Upgrades

Base Stations and Repeaters

VHF, UHF, 800 and 900 MHz

Update

NOTICE: Beginning Q4, 2016, most of the Quantar Upgrade items in this section will no longer be available. At that time, only the upgrade path to convert a legacy station to a P25 station - which includes a control board change - will be offered. All other system conversion paths, enhancements, or upgrades requiring hardware components (cables, wireline cards, IR terminators, etc.) will be cancelled. Software-only refreshes for existing stations will still be available via the T6693 upgrade model.

Ordering Information

Ordering Requirements

This Model should be ordered when:

- Customers are **NOT** FLASH capable **OR**
- Customers are FLASH or NON-FLASH capable and are changing System Types as shown below:

1. Determine your station's FLASH capabilities.

Stations are FLASH capable if they meet all the following criteria:

1. Operating in 3.0 system release later
2. Station with a ship date of 01/01/97 or later
3. EPIC II or EPIC III Control Board in use (see table below)

System Type	SCB	EPIC I	EPIC II	EPIC III
Conv/6809 Trunked	TRN7475	TTN4094	CLN6961	CLN1614
INTELLIREPEATER	TRN7760	TRN7900	CLN6960	N/A

4. Wireline II Board in use (see table below)

Wireline Type	Wireline I	Wireline II
4 Wire (Standard)	TRN7477	CLN6955

5. Wireline Software version, **WL_020_09_015 thru WL_020_10_021**
This may be found in the Radio Service Software (RSS)

2. Gather the following information

- **Station Serial Number:**

The serial number for the QUANTAR station is REQUIRED when ordering any FLASHport System or Feature upgrade package. The COF user will be prompted to enter the station serial number after ordering the main model for a FLASHport upgrade. The serial number can be obtained through the use of the Radio Service Software, or from the label on the back of the station, or from the original station ship invoice.

- **Control Board Number**

The number for the QUANTAR station is REQUIRED when ordering any FLASHport System or Feature upgrade package. The COF user will be prompted to enter the number after ordering the main model for a FLASHport upgrade. The number will be used to check that the correct station control board option (shown below) is ordered. It can be obtained by pulling the board.

- **Backplane ID**

All of the upgrades shown below will require the use of the Radio Service Software (RSS) to reconfigure the station after installation. It is strongly recommended that the current version of RSS should also be ordered when ordering any upgrade. For 3.0 system software upgrades, it is REQUIRED that the latest version of RSS be ordered at the same time.

3. Select Model

- If you are not FLASH capable or are migrating from a Conventional or 6809 Trunked station to an INTELLIREPEATER or vice versa, then order the model listed below:

SQM01SUM0130A - Hardware & Software Upgrade Kit

4. Determine your current System Software Type

- X788 - Conventional
- CA00134 - 6809 Trunked
- CA00135 - INTELLIREPEATER

5. Select a Software option

- Customer will be selecting either the latest shipping SW, a System Software or a Feature Enhancement option.

6. Select Control Board option

- X791 - This control board option is for Conventional and 6809 Trunked stations. Select only if station is remaining Conventional/ 6809 Trunked or converting to Conventional/6809 Trunked.
- X792 - This control board option is for INTELLIREPEATER stations. Select only if stations is remaining INTELLIREPEATER or converting to INTELLIREPEATER.

7. Select Wireline Board option

- X216 - This is the 4 Wire Wireline board, which is the standard Wireline Board.
- X797 - This is the 8 Wire Wireline Board and is required when ordering options X157, X144 or C115

8. **Select other options** - Other items may be required, such as Cables or FTP Software

Software Upgrade Design Service

Ordering Information

General Information

Software Upgrade Design includes design services for Enhancement Releases only. Motorola will review System audit data along with an equipment list to insure there will be no Software incompatibilities between equipment that is not being upgraded versus equipment which is being upgraded with an Enhancement Release. Motorola will identify additional equipment and engineering that is required as a result of the upgrade and will recommend a plan for installation.

Features

- Configuration Management
- Access to Motorola Technical Expertise

Statement of Work

One of the primary business objectives of the North American Group (NAG) is to promote the sales of STANDARD service products. Standards help to ensure consistent and profitable delivery of our service products to our customers. To that end, the customer Statement of Work for this Standard Service Product **CANNOT** be modified. All requests for modifications to STANDARD service products or the development of "custom" service products should be routed through the Solutions Planning process. Your first point of contact for these requests is your local Area Service Manager.

Statement of Work

Definitions

Capitalized terms used in this Statement of Work and not otherwise defined within the Statement of Work or Communications System Agreement have the following meanings: [Click here](#)

1.0 Description of Service

Software Upgrade Design includes design services for Enhancement Releases only. Motorola will review System audit data (when this service is performed by Motorola) along with an equipment list to avoid potential Software incompatibilities between equipment that is not being upgraded versus equipment which is being upgraded with an Enhancement Release. Motorola will identify additional equipment and engineering that is required as a result of the upgrade and will recommend a plan for installation of this additional equipment. Implementation of this installation plan is not included with the Software Upgrade Design.

The terms and conditions of this Statement of Work (SOW) are an integral part of

Motorola's Service Terms and Conditions or other applicable Agreement to which it is attached and made a part thereof by this reference.

2.0 Motorola has the following responsibilities:

- 2.1 Review Infrastructure System audit data as needed..
- 2.2 Identify additional System equipment needed to implement an Enhancement Release.
- 2.3 Complete a proposal defining the Enhancement Release, equipment requirements, installation plan, and impact to System users that will fulfill the Customer's upgrade requirements.
- 2.4 Advise Customer of probable impact to System users during the actual field upgrade implementation.

3.0 Customer has the following responsibilities:

- 3.1 Contact Motorola upon receiving a bulletin to engage the appropriate Motorola resources for an Enhancement Release or Core Release.
- 3.2 Cooperate with Motorola and perform all acts that are reasonable or necessary to enable Motorola to provide Software Upgrade Design services to Customer.
- 3.3 Maintain subscriber configuration data.

Approved by Motorola Contracts & Compliance 09/01/03

Ordering Requirements

- This product requires an authorized quotation from the service delivery organization. Contact your local Area Service Manager(ASM) or Customer Support Manager(CSM) for more details.
- **This product cannot be ordered directly through COF at this time.** This product must be ordered using the Services Pricing Configurator. Please contact your local ASM or CSM if you are interested in ordering this product. For a listing of ASMs/CSMs [click here](#).
- A Customer Support Plan must be created to provide detailed information to the customer regarding delivery of this service.

Model

QUANTAR®
SOFTWARE Only FLASHport® Upgrades
Base Stations and Repeaters
VHF, UHF, 800 and 900 MHz

Ordering Information

Ordering Requirements

This Model should be ordered when:

- Customers are FLASH capable **OR**
- Customers are FLASH capable and are changing System Types as shown below:

INTELLIREPEATER®-----> 6809 Trunked/Conventional

1. Determine your station's FLASH capabilities.

Stations are FLASH capable if they meet all the following criteria:

1. Operating in 3.0 system release later
2. Station with a ship date of 01/01/97 or later
3. EPIC II or EPIC III Control Board in use (see table below)

System Type	SCB	EPIC I	EPIC II	EPIC III
Conv/6809 Trunked	TRN7475	TTN4094	CLN6961	CLN1614
INTELLIREPEATER	TRN7760	TRN7900	CLN6960	N/A

4. Wireline II Board in use (see table below)

Wireline Type	Wireline I	Wireline II
4 Wire (Standard)	TRN7477	CLN6955
8 Wire (Optional)	TRN7667	CLN6856

5. Wireline Software version, **WL_020_09_015 thru WL_020_10_021**
 This may be found in the Radio Service Software (RSS)

2. Gather the following information

- **Station Serial Number**

The serial number for the QUANTAR station is REQUIRED when ordering any FLASHport System or Feature upgrade package. The COF user will be prompted to enter the station serial number after ordering the main model for a FLASHport upgrade. The serial number can be obtained through the use of the Radio Service

Software, from the label on the back of the station, or from the original station ship invoice.

- **Control Board Number**

The station control board number for the QUANTAR station is REQUIRED when ordering any FLASHport System or Feature upgrade package. The COF user will be prompted to enter the station control board number after ordering the main model for a FLASHport upgrade. The station control board number will be used to check that the correct station control board option (shown below) is ordered. It can be obtained by pulling the board.

- **Backplane ID**

All of the upgrades shown below will require the use of the Radio Service Software (RSS) to reconfigure the station after installation. It is strongly recommended that the current version of RSS should also be ordered when ordering any upgrade. For 3.0 system software upgrades, it is REQUIRED that the latest version of RSS be ordered at the same time.

3. **Select Model**

- If you are FLASH capable or are migrating from a Conventional to 6809 Trunked station or vice versa, then order the **T6693 Software Download Upgrade Kit**

4. **Determine your current System Software Type**

- X788 – Conventional
- CA00134 – 6809 Trunked
- CA00135 – INTELLIREPEATER

5. **Select a Software option**

- Customer will be selecting either the latest shipping SW, a System Software, or a Feature Enhancement option.

6. **Order Hardware FRU** - If there are any cable requirements or any other hardware requirements when ordering T6693, they should be ordered as a FRU on a separate line item. All FRUs are listed under the accessories.

ADD: SINGLE CORE MASTER SITE CONNECTIVITY (CWR)	Intent to Cancel Date:t31-Dec-2019	CA02653AA	147	\$40,000.00
ADD: INTERZONE CAPABILITY CWR	SRC 7500 M-Core High Availability Data Expansion Intent to Cancel Date:t31-Dec-2019	CA01358AA	147	\$70,000.00

SRC 7500 M-Core High Availability Data Expansion

A7.16 systems ship with a GGSN and a VPN/Firewall standard in each SRC 7500. High Availability Data requires a second GGSN and a second firewall.

Description	Full Description	Nomenclature	APC	Price
ADD: GGSN	Provides a GGSN to support IV&D and HPD.	CA01361AA	147	\$16,000.00
ADD: SECOND FIREWALL AND HA FUNCTIONALITY	(Replaces CA02197AA)	CA02688AA	147	\$2,800.00

SRC 7500 M-Core Encryption/FIPS 140-2 Expansion (GGM 8000 Only)

These options add encryption and/or FIPS to new GGM 8000s only. Refer to the FRU section to order the appropriate S6000 options. Order one option for each new GGM 8000 router in SRC, i.e. If adding one Core router (ethernet) and one GGSN, order 2 CA02087AA, if FIPS is also required then include 2 CA02134AA as well. Refer to the FRU section to order encryption for existing routers. It is not recommended to add FIPS 140 Level 2 encryption certification to existing routers, a new router must be order with both options below if the encryption certificate must be current.

Description	Full Description	Nomenclature	APC	Price
ADD: ENCRYPTION (7.12 OR LATER)	Order one per each GGM 8000 gateway.	CA02087AA	147	\$1,500.00
ADD: COMMON CRITERIA	Encryption (CA02087AA) is required with this option. Order one per each GGM 8000 gateway.	CA02134AA	147	\$500.00

SRC 7500 M-Core Backhaul Switch Expansion

Description	Full Description	Nomenclature	APC	Price
ADD: CORE BACKHAUL SWITCH	Provides a backhaul switch to connect Ethernet links, e.g. point-to-point Ethernet links, or to connect to multiple ports on the Ethernet WAN transport network	CA01424AA	147	\$2,250.00

SRC 7500 M-Core Fiber Connectivity Expansion

Description	Full Description	Nomenclature	APC	Price

Description	Full Description	Nomenclature	APC	Price
ADD: FIBER CONN 2 SWITCHES	Provides fiber connectivity for two core LAN switches; replaces the trunked connections.	CA01362AA	147	\$3,200.00
ADD: FIBER CONTVTY BTWN 3 SWITCHES	-	CA01491AA	147	\$4,800.00
ADD: FIBER CONN 4 SWITCHES	Provides fiber connectivity for two core LAN switches and two backhaul switches; replaces the trunked connections.	CA01364AA	147	\$6,400.00
ADD: FIBER CONTVTY BTWN 5 SWITCHES	Provides fiber connectivity between three Core LAN switches and two Backhaul switches; replaces the trunked connections.	CA01489AA	147	\$8,000.00

SRC 7500 UPGRADE CONFIGURATIONS

SRC 7500 System Release (Mandatory)

These options will ensure the appropriate licenses are generated for the options ordered applicable to a system release.

Description	Full Description	Nomenclature	APC	Price
ADD: SRC 7500 7.15 UPGRADE	-	CA02935AA	358	\$1,400.00
ADD: SRC 7500 7.16 UPGRADE	SRC 7500 M-Core Gateway License	CA02936AA	358	\$1,400.00

SRC 7500 M-Core Gateway License

Description	Full Description	Nomenclature	APC	Price
ADD: SRC 7500 GATEWAY ROUTER UPGRADE	SRC 7500 M-Core Ethernet/CWR Core Router License	CA02937AA	358	\$500.00

SRC 7500 M-Core Ethernet/CWR Core Router License

Order one upgrade option for each Core router in an SRC 7500. This option is applicable to upgrade GGM 8000 and S6000 routers.

Please note: Last date for T1 System Release support is 12/31/2022.

Description	Full Description	Nomenclature	APC	Price
ADD: SRC 7500 CORE ROUTER UPGRADE	SRC 7500 M-Core Ethernet/CWR Interzone Router License	CA02938AA	358	\$500.00

SRC 7500 M-Core Ethernet/CWR Interzone Router License

Order one upgrade option for each Exit router in an SRC 7500. This option is applicable to upgrade GGM 8000 and S6000 routers. Available for M1 and M3 only.

Please note" Last date for T1 System Release support is 12/31/2022.

Description	Full Description	Nomenclature	APC	Price
ADD: SRC 7500 EXIT ROUTER UPGRADE	SRC 7500 M-Core GGSN License	CA02939AA	358	\$500.00

SRC 7500 M-Core GGSN License

Order one upgrade option for each GGSN in an SRC 7500.

Description	Full Description	Nomenclature	APC	Price
ADD: SRC 7500 GGSN UPGRADE	SRC 7500 M-Core Site Router License	CA02940AA	358	\$500.00

SRC 7500 M-Core Site Router License

Order one upgrade option for each site routers in a zone. This option is applicable to upgrade S2500 and GGM 8000 routers.

Description	Full Description	Nomenclature	APC	Price
ADD: MOTOROLA NETWORK SITE ROUTER UPGRADE	SRC 7500 M-Core Ethernet Switch License	CA02941AA	358	\$300.00

SRC 7500 M-Core Ethernet Switch License

Order one upgrade option per zone to upgrade HP Ethernet switches (including HP Backhaul

switches purchased through Motorola).

Description	Full Description	Nomenclature	APC	Price
ADD: HP ETHERNET SWITCH UPGRADE	SRC 7500 M-Core Additional Media CDs	CA02942AA	358	\$500.00

SRC 7500 M-Core Additional Media CDs

If additional Router, GGSN, Ethernet Switch or Firewall media CDs are required due to equipment installed in multiple locations or other reason, order the additional quantity needed (CA02935AA or CA02936AA are required on the order).

Description	Full Description	Nomenclature	APC	Price
ADD: MNR SOFTWARE UPGRADE ADDITIONAL CD	-	CA02943AA	358	\$50.00
ADD: MNR SOFTWARE UPGRADE ADDITIONAL CD	-	CA02944AA	358	\$50.00
ADD: HP SWITCH SOFTWARE UPGRADE ADDITIONAL CD	-	CA02946AA	358	\$50.00

SRC 7500 Expansions FRU Kits

Provides a redundant pair of core routers for use in systems with T1/E1 or FT1/FE1 site links, including one relay panel and four cables. This kit is also used as the Simulcast Subsite Access Routers deployed at the Prime site within an IP Simulcast Subsystem.

Ordering Information

SRC 7500 ALL M-CORE CONFIGURATIONS

Please refer to the current [SRC 7500 A7.17 Expansions Ordering Guide](#) and [SRC 7500 A7.17 Upgrades Ordering Guide](#) for detailed ordering instructions

Refer to K-Core & L-Core price pages to expand/upgrade Networking Transport equipment.

Configuration

SRC 7500 Expansions and Upgrades Main Model (Mandatory)

Order the model below to expand or upgrade an existing SRC 7500.

Description	Full Description	Nomenclature	APC	Price
SRC7500 SWITCHING ROUTING CENTER SOFTWARE UPGRADE/EXPANSION	-	SQM01SUM0294	147	\$0.00

SRC 7500 EXPANSION CONFIGURATIONS

SRC 7500 System Release Expansions (Mandatory)

These options will ensure the appropriate licenses are generated for the options ordered applicable to a system release.

Description	Full Description	Nomenclature	APC	Price
ADD: SRC 7500 FOR 7.17	SRC 7500 M-Core Gateway Expansion	CA03130AA	147	\$0.00

SRC 7500 M-Core Gateway Expansion

Description	Full Description	Nomenclature	APC	Price
ADD: SINGLE GATEWAY ROUTER STANDARD	Provides a single Gateway Routers; does not support Gold Elite or DTI 1000 Telephone Interconnect.	CA01421AA	147	\$15,700.00

SRC 7500 M-Core Ethernet Core Router Expansion

The number of Core routers allowed per zone varies per system release, refer to the ordering guide for more details.

Description	Full Description	Nomenclature	APC	Price
ADD: SINGLE CORE ROUTER ETH	Provides a core router for use in systems with Ethernet Site links only. This option will not support the use of T1/E1 or FT1/FE1 site links.	CA01423AA	147	\$20,700.00
ADD: QTY 1 PAIR CORE ROUTERS ETH	Provides a redundant pair of core routers for use in systems with Ethernet Site links only. This option will not support the use of T1/E1 or FT1/FE1 site links.	CA01350AA	147	\$41,400.00

SRC 7500 M-Core CWR Core Router Expansion

The number of Core routers allowed per zone varies per system release, refer to the ordering guide for more details.

Last date of Shipments 12/31/2017.

Description	Full Description	Nomenclature	APC	Price
ADD: SINGLE CORE ROUTER CWR	Intent to Cancel Date:t31-Dec-2019	CA01422AA	147	\$40,000.00
ADD: QTY 1 PAIR CORE ROUTERS CWR	SRC 7500 M-Core Ethernet Interzone Router Expansion Intent to Cancel Date:t31-Dec-2019	CA01346AA	147	\$70,000.00

SRC 7500 M-Core Ethernet Interzone Router Expansion

Available for M1 and M3 only. A combined Core-Exit Router available in Ethernet only, may be ordered to consolidate the number of Routers in the SRC.

Description	Full Description	Nomenclature	APC	Price
ADD: SINGLE CORE MASTER SITE CONNECTIVITY (ETHERNET)	-	CA02654AA	147	\$20,700.00
ADD: SINGLE COMBINED CORE-EXIT CONNECTIVITY (ETHERNET)	-	CA02866AA	147	\$33,120.00
ADD: INTERZONE CAPABILITY ETHERNET	Provides router gear for Interzone connectivity via Ethernet.	CA01359AA	147	\$41,400.00
ADD: COMBINED CORE-EXIT ROUTER INTERZONE CAPABILITY (1 PAIR)	SRC 7500 M-Core CWR Interzone Router Expansion	CA02867AA	147	\$66,420.00

SRC 7500 M-Core CWR Interzone Router Expansion

Available for M1 and M3 only.

Last date of Shipments 12/31/2017.

Description	Full Description	Nomenclature	APC	Price
ADD: SINGLE CORE MASTER SITE CONNECTIVITY (CWR)	Intent to Cancel Date:t31-Dec-2019	CA02653AA	147	\$40,000.00
ADD: INTERZONE CAPABILITY CWR	SRC 7500 M-Core High Availability Data Expansion Intent to Cancel Date:t31-Dec-2019	CA01358AA	147	\$70,000.00

SRC 7500 M-Core High Availability Data Expansion

A7.16 & A7.17 systems ship with a GGSN and a VPN/Firewall standard in each SRC 7500. High Availability Data requires a second GGSN and a second firewall.

Description	Full Description	Nomenclature	APC	Price

ADD: GGSN	Provides a GGSN to support IV&D and HPD.	CA01361AA	147	\$16,000.00
ADD: SECOND FIREWALL AND HA FUNCTIONALITY	(Replaces CA02197AA)	CA02688AA	147	\$2,800.00

SRC 7500 M-Core Encryption/FIPS 140-2 Expansion (GGM 8000 Only)

These options add encryption and/or FIPS to new GGM 8000s only. Refer to the FRU section to order the appropriate S6000 options. Order one option for each new GGM 8000 router in SRC, i.e. If adding one Core router (ethernet) and one GGSN, order 2 CA02087AA, if FIPS is also required then include 2 CA02134AA as well. Refer to the FRU section to order encryption for existing routers. It is not recommended to add FIPS 140 Level 2 encryption certification to existing routers, a new router must be order with both options below if the encryption certificate must be current.

Description	Full Description	Nomenclature	APC	Price
ADD: ENCRYPTION (7.12 OR LATER)	Order one per each GGM 8000 gateway.	CA02087AA	147	\$1,500.00
ADD: COMMON CRITERIA	Encryption (CA02087AA) is required with this option. Order one per each GGM 8000 gateway.	CA02134AA	147	\$500.00

SRC 7500 M3 Zone Core Protection (ZCP) bundle Expansion

This option contains 2 firewalls with ZCP licenses and 2 mediation switches required for each zone. If IDS is needed, order one additional switch CLN1856A as a separate line item.

Description	Full Description	Nomenclature	APC	Price
ADD: ZCP BUNDLE	SRC 7500 M-Core Backhaul Switch Expansion	CA03129AA	147	\$19,500.00

SRC 7500 M-Core Backhaul Switch Expansion

Description	Full Description	Nomenclature	APC	Price
ADD: CORE BACKHAUL SWITCH	Provides a backhaul switch to connect Ethernet links, e.g. point-to-point Ethernet links, or to connect to multiple ports on the Ethernet WAN transport network	CA01424AA	147	\$2,250.00

SRC 7500 M-Core Fiber Connectivity Expansion

Description	Full Description	Nomenclature	APC	Price
ADD: FIBER CONN 2 SWITCHES	Provides fiber connectivity for two core LAN switches; replaces the trunked connections.	CA01362AA	147	\$3,200.00
ADD: FIBER CONTVTY BTWN 3 SWITCHES	-	CA01491AA	147	\$4,800.00
ADD: FIBER CONN 4 SWITCHES	Provides fiber connectivity for two core LAN switches and two backhaul switches; replaces the trunked connections.	CA01364AA	147	\$6,400.00
ADD: FIBER CONTVTY BTWN 5 SWITCHES	Provides fiber connectivity between three Core LAN switches and two Backhaul switches; replaces the trunked connections.	CA01489AA	147	\$8,000.00

SRC 7500 UPGRADE CONFIGURATIONS

SRC 7500 System Release (Mandatory)

These options will ensure the appropriate licenses are generated for the options ordered applicable to a system release.

Description	Full Description	Nomenclature	APC	Price
ADD: SRC 7500 7.17 UPGRADE	SRC 7500 M-Core Gateway License	CA03226AA	358	\$1,400.00

Model

Switching and Routing Center (SRC 7500)

ASTRO 25 7.17 (Updated for A7.17.2) New Systems

Configuration

SRC 7500 ALL M-CORE CONFIGURATIONS

Please refer to the current SRC 7500 Ordering Guide for detailed ordering instructions - [SRC 7500 7.17.2 Ordering Guide](#)

Refer to K-Core & L-Core price pages to order Networking Transport equipment.

SRC 7500 Main Model (Mandatory)

Hardware required for Integrated Data will ship standard (GGSN, Border Gateway, and CEN Switch)

Description	Full Description	Nomenclature	APC	Price
SRC7500 SWITCHING ROUTING CENTER (7.13 AND BEYOND)	-	SQM01SUM0238	147	\$1,200.00

Description	Full Description	Nomenclature	APC	Price
ADD: SRC 7500 FOR 7.17.2	-	CA03332AA	147	\$0.00

SRC 7500 M1 CONFIGURATIONS

SRC 7500 M1 Core LAN Switch Option (Mandatory)

CA03323AA includes one 48 Ethernet port core LAN switch, one GGSN, one Border Router, one CEN Switch, one 16 port terminal server, and one VPN/Firewall. CA03328AA includes two 48 Ethernet port core LAN switches, one 16 port terminal server, and one VPN/Firewall.

Description	Full Description	Nomenclature	APC	Price

ADD: SINGLE CORE LAN SWITCH	-	CA03323AA	147	\$14,300.00
ADD: SRC FOR M1 ADDITIONAL CORE CAPACITY	-	CA03328AA	147	\$22,400.00

SRC 7500 M1 Gateway Router Option (Mandatory)

Description	Full Description	Nomenclature	APC	Price
ADD: SINGLE GATEWAY ROUTER STANDARD	Provides a single Gateway Routers; does not support Gold Elite or DTI 1000 Telephone Interconnect.	CA01421AA	147	\$15,700.00

SRC 7500 M1 Core Router Option (Ethernet)

One Core Router Option is mandatory (Ethernet or CWR.) Systems may support up to four core Routers per location with added capacity and there may be a mix of CWR or Ethernet (Non-DSR Only).

Description	Full Description	Nomenclature	APC	Price
ADD: SINGLE CORE ROUTER ETH	Provides a core router for use in systems with Ethernet Site links only. This option will not support the use of T1/E1 or FT1/FE1 site links.	CA01423AA	147	\$20,700.00
ADD: QTY 1 PAIR CORE ROUTERS ETH	Provides a redundant pair of core routers for use in systems with Ethernet Site links only. This option will not support the use of T1/E1 or FT1/FE1 site links.	CA01350AA	147	\$41,400.00
ADD: THREE SINGLE CORE ROUTERS ETHERNET	-	CA02862AA	147	\$62,100.00
ADD: QTY 2 PAIRS CORE ROUTERS ETH	Provides two redundant pairs of core routers for use in systems with Ethernet Site links only. This option will not support the use of T1/E1 or FT1/FE1 site links.	CA01351AA	147	\$82,800.00

SRC 7500 M1 Core Router Option (CWR)

One Core Router Option is mandatory (Ethernet or CWR.) Systems may support up to four core Routers per location and there may be a mix of CWR or Ethernet (Non-DSR Only)

Last date of Shipments 12/31/2017.

Description	Full Description	Nomenclature	APC	Price
ADD: SINGLE CORE ROUTER CWR	Provides a core router & relay panel for use in systems with T1/E1 or FT1/FE1 site links Intent to Cancel Date: 31-Dec-2019	CA01422AA	147	\$40,000.00
ADD: TWO CORE ROUTERS CWR (1 PAIR)	Intent to Cancel Date: 31-Dec-2019	CA02859AA	147	\$80,000.00
ADD: THREE CORE ROUTERS CWR	Intent to Cancel Date: 31-Dec-2019	CA02860AA	147	\$120,000.00
ADD: FOUR CORE ROUTERS CWR (2 PAIR)	Intent to Cancel Date: 31-Dec-2019	CA02861AA	147	\$160,000.00

SRC 7500 M1 Interzone Options (Required for DSR)

Description	Full Description	Nomenclature	APC	Price
ADD: SINGLE CORE MASTER SITE CONNECTIVITY (ETHERNET)	-	CA02654AA	147	\$20,700.00
ADD: SINGLE COMBINED CORE-EXIT CONNECTIVITY (ETHERNET)	-	CA02866AA	147	\$33,120.00
ADD: SINGLE CORE MASTER SITE CONNECTIVITY (CWR)	Intent to Cancel Date: 31-Dec-2019	CA02653AA	147	\$40,000.00

SRC 7500 M1 Encryption/FIPS (GGM 8000 Only)

These options add encryption and/or FIPS to GGM 8000s only. Refer to the FRU section to order the appropriate S6000 options. Order one option for each GGM 8000 router in SRC, i.e. If SRC contains one Core router (Ethernet), one Gateway, and one GGSN, order 3 CA02087AA, if FIPS is also required, then include 3 CA02134AA as well. All routers must have encryption including GGSN when choosing this option. If FIPS 140-2 Level 2 encryption is required, both options must be ordered.

--	--	--	--	--

Description	Full Description	Nomenclature	APC	Price
ADD: ENCRYPTION (7.12 OR LATER)	Order one per each GGM 8000 gateway.	CA02087AA	147	\$1,500.00
ADD: COMMON CRITERIA	Encryption (CA02087AA) is required with this option. Order one per each GGM 8000 gateway.	CA02134AA	147	\$500.00

Note: Please make sure to count the GGSN and Border routers that come with the options above to order the correct quantity of encryption on the routers.

SRC 7500 M1 Core Backhaul Switch Option

Description	Full Description	Nomenclature	APC	Price
ADD: CORE BACKHAUL SWITCH FOR M1	Provides a backhaul switch to connect Ethernet links, e.g. point-to-point Ethernet links, or to connect to multiple ports on the Ethernet WAN transport network.	CA03333AA	147	\$2,500.00

SRC 7500 M1 Fiber Connectivity Option

Description	Full Description	Nomenclature	APC	Price
ADD: FIBER CONN 2 SWITCHES	Provides fiber connectivity for two core LAN switches; replaces the trunked connections.	CA01362AA	147	\$3,200.00

SRC 7500 M2 CONFIGURATION

SRC 7500 M2 Core LAN Switch Option (Mandatory)

CA03322AA includes two 48 Ethernet port core LAN switches, one GGSN, one Border Router, one CEN Switch, one 16 port terminal server, and one VPN/Firewall. CA03329AA includes two 48 Ethernet port core LAN switches, one 48 port terminal server, and one VPN/Firewall.

Description	Full Description	Nomenclature	APC	Price
ADD: DUAL CORE LAN SWITCHES	-	CA03322AA	147	\$22,300.00

ADD: SRC FOR M2 ADDITIONAL CORE CAPACITY	-	CA03329AA	147	\$25,600.00
--	---	-----------	-----	-------------

SRC 7500 M2 Gateway Router (Mandatory)

Description	Full Description	Nomenclature	APC	Price
ADD: DUAL GATEWAY ROUTERS STANDARD	Provides two Gateway Routers; does not have support to interface with Gold Elite or DTI 1000 Telephone Interconnect.	CA01345AA	147	\$31,400.00

SRC 7500 M2 Core Router Option (Ethernet)

One Core Router Option is mandatory (Ethernet or CWR). Systems may support up to eight core Routers per location with added capacity and they may be a mix of CWR or Ethernet (Non-DSR Only).

Description	Full Description	Nomenclature	APC	Price
ADD: QTY 1 PAIR CORE ROUTERS ETH	Provides a redundant pair of core routers for use in systems with Ethernet Site links only. This option will not support the use of T1/E1 or FT1/FE1 site links.	CA01350AA	147	\$41,400.00
ADD: QTY 2 PAIRS CORE ROUTERS ETH	Provides two redundant pairs of core routers for use in systems with Ethernet Site links only. This option will not support the use of T1/E1 or FT1/FE1 site links.	CA01351AA	147	\$82,800.00
ADD: QTY 3 PAIRS CORE ROUTERS ETH	Provides three redundant pairs of core routers for use in systems with Ethernet Site links only. This option will not support the use of T1/E1 or FT1/FE1 site links.	CA01352AA	147	\$124,200.00
ADD: QTY 4 PAIRS CORE ROUTERS ETH	Provides four redundant pairs of core routers for use in systems with Ethernet Site links only. This option will not	CA01353AA	147	\$165,600.00

	support the use of T1/E1 or FT1/FE1 site links.			
--	---	--	--	--

SRC 7500 M2 Core Router Option (CWR)

One Core Router Option is mandatory (Ethernet or CWR). Systems may support up to eight core Routers per location with added capacity and they may be a mix of CWR or Ethernet (Non-DSR Only).

Last date of Shipments 12/31/2017.

Description	Full Description	Nomenclature	APC	Price
ADD: QTY 1 PAIR CORE ROUTERS CWR	Provides a redundant pair of core routers for use in systems with T1/E1 or FT1/FE1 site links. Intent to Cancel Date: 31-Dec-2019	CA01346AA	147	\$70,000.00
ADD: QTY 2 PAIRS CORE ROUTERS CWR	Provides two redundant pairs of core routers for use in systems with T1/E1 or FT1/FE1 site links. Intent to Cancel Date: 31-Dec-2019	CA01347AA	147	\$140,000.00
ADD: QTY 3 PAIRS CORE ROUTERS CWR	Provides three redundant pairs of core routers for use in systems with T1/E1 or FT1/FE1 site links. Intent to Cancel Date: 31-Dec-2019	CA01348AA	147	\$210,000.00
ADD: QTY 4 PAIRS CORE ROUTERS CWR	Provides four redundant pairs of core routers for use in systems with T1/E1 or FT1/FE1 site links. Intent to Cancel Date: 31-Dec-2019	CA01349AA	147	\$280,000.00

SRC 7500 M2 Dual T1/E1 or FT1/FE1 Site Links Option

Description	Full Description	Nomenclature	APC	Price
ADD: DUAL LINK 1 PAIR CWR	Adds dual T1/E1 or FT1/FE1 site link capability; not for use with Ethernet Core Routers. Intent to Cancel Date: 31-Dec-2019	CA01354AA	147	\$7,500.00
	Adds dual T1/E1 or FT1/FE1 site			

ADD: DUAL LINK 2 PAIRS CWR	link capability; not for use with Ethernet Core routers. Intent to Cancel Date: 31-Dec-2019	CA01355AA	147	\$15,000.00
-------------------------------	---	-----------	-----	-------------

SRC 7500 M2 High Availability Data Option

The GGSN and VPN/Firewall are included standard for the primary and backup SRC 7500. High Availability Data requires a second GGSN and a second firewall. Both options must be ordered.

Description	Full Description	Nomenclature	APC	Price
ADD: GGSN	Provides a GGSN to support IV&D and HPD.	CA01361AA	147	\$16,000.00
ADD: SECOND FIREWALL AND HA FUNCTIONALITY	(Replaces CA02197AA)	CA02688AA	147	\$2,800.00

SRC 7500 M2 Encryption Option (GGM 8000 Only)

These options add encryption and/or FIPS to GGM 8000s only. Refer to the FRU section to order the appropriate S6000 options. Order one option for each GGM 8000 router in SRC, i.e. If SRC contains two Core routers (Ethernet), two Gateways, and one GGSN, order 5 CA02087AA; if FIPS is also required, then include 5 CA02134AA as well. All routers must have encryption including GGSN when choosing this option. If FIPS 140-2 Level 2 encryption is required both options must be ordered.

Description	Full Description	Nomenclature	APC	Price
ADD: ENCRYPTION (7.12 OR LATER)	Order one per each GGM 8000 gateway.	CA02087AA	147	\$1,500.00
ADD: COMMON CRITERIA	Encryption (CA02087AA) is required with this option. Order one per each GGM 8000 gateway.	CA02134AA	147	\$500.00

Note: Please make sure to count the GGSN and Border routers that come with the options above to order the correct quantity of encryption on the routers.

SRC 7500 M2 Core Backhaul Switch Option

This option provides a pair of redundant backhaul switches.

Description	Full Description	Nomenclature	APC	Price
-------------	------------------	--------------	-----	-------

ADD: CORE BACKHAUL SWITCHES	Provides backhaul switches to connect Ethernet site links and/or Ethernet interzone links.	CA03334AA	147	\$5,400.00
-----------------------------	--	-----------	-----	------------

SRC 7500 M2 Fiber Connectivity Options

Description	Full Description	Nomenclature	APC	Price
ADD: FIBER CONN 2 SWITCHES	Provides fiber connectivity for two core LAN switches; replaces the trunked connections.	CA01362AA	147	\$3,200.00

SRC 7500 M3 CONFIGURATION

SRC 7500 M3 Mounting Options (Mandatory)

SRC's for M3's must choose one mounting option.

Description	Full Description	Nomenclature	APC	Price
ADD: MOUNT SRC IN 7.5FT OPEN RACK	-	CA02873AA	147	\$495.00
ADD: MOUNT SRC IN 42 RU CABINET	-	CA02874AA	147	\$3,000.00

SRC 7500 M3 Core LAN Switch Options (Mandatory)

CA03324AA includes two 48 Ethernet port core LAN switches, one GGSN, one Border Router, one CEN Switch, one 48 port terminal server, and one VPN/Firewall. CA03325AA includes three 48 Ethernet port core LAN switches, one 48 port terminal server, and one VPN/Firewall.

DSR: Include the same option for the primary and backup SRC 7500

Description	Full Description	Nomenclature	APC	Price
ADD: HIGH TIER CORE LAN SWITCHES (96 PORTS)	-	CA03324AA	147	\$24,100.00
ADD: HIGH TIER CORE LAN SWITCHES (144 PORTS)	-	CA03325AA	147	\$29,100.00

SRC 7500 M3 Gateway Router Option (Mandatory)

--	--	--	--	--

Description	Full Description	Nomenclature	APC	Price
ADD: DUAL GATEWAY ROUTERS STANDARD	Provides two Gateway Routers; does not have support to interface with Gold Elite or DTI 1000 Telephone Interconnect.	CA01345AA	147	\$31,400.00

SRC 7500 M3 Core Router Options (Ethernet)

At least one Core Router Option is mandatory (Ethernet or CWR.) Systems may support up to eight core Routers per location with added capacity and they may be a mix of CWR or Ethernet (Non-DSR Only)

Description	Full Description	Nomenclature	APC	Price
ADD: QTY 1 PAIR CORE ROUTERS ETH	Provides a redundant pair of core routers for use in systems with Ethernet Site links only. This option will not support the use of T1/E1 or FT1/FE1 site links.	CA01350AA	147	\$41,400.00
ADD: QTY 2 PAIRS CORE ROUTERS ETH	Provides two redundant pairs of core routers for use in systems with Ethernet Site links only. This option will not support the use of T1/E1 or FT1/FE1 site links.	CA01351AA	147	\$82,800.00
ADD: QTY 3 PAIRS CORE ROUTERS ETH	Provides three redundant pairs of core routers for use in systems with Ethernet Site links only. This option will not support the use of T1/E1 or FT1/FE1 site links.	CA01352AA	147	\$124,200.00
ADD: QTY 4 PAIRS CORE ROUTERS ETH	Provides four redundant pairs of core routers for use in systems with Ethernet Site links only. This option will not support the use of T1/E1 or FT1/FE1 site links.	CA01353AA	147	\$165,600.00

SRC 7500 M3 Core Router Options (CWR)

At least one Core Router Option is mandatory (Ethernet or CWR.) Systems may support up to eight core Routers per location with added capacity and they may be a mix of CWR or Ethernet

(Non-DSR Only)

Last date of Shipments 12/31/2017.

Description	Full Description	Nomenclature	APC	Price
ADD: QTY 1 PAIR CORE ROUTERS CWR	Provides a redundant pair of core routers for use in systems with T1/E1 or FT1/FE1 site links. Intent to Cancel Date: 31-Dec-2019	CA01346AA	147	\$70,000.00
ADD: QTY 2 PAIRS CORE ROUTERS CWR	Provides two redundant pairs of core routers for use in systems with T1/E1 or FT1/FE1 site links. Intent to Cancel Date: 31-Dec-2019	CA01347AA	147	\$140,000.00
ADD: QTY 3 PAIRS CORE ROUTERS CWR	Provides three redundant pairs of core routers for use in systems with T1/E1 or FT1/FE1 site links. Intent to Cancel Date: 31-Dec-2019	CA01348AA	147	\$210,000.00
ADD: QTY 4 PAIRS CORE ROUTERS CWR	Provides four redundant pairs of core routers for use in systems with T1/E1 or FT1/FE1 site links. Intent to Cancel Date: 31-Dec-2019	CA01349AA	147	\$280,000.00

SRC 7500 M3 Dual T1/E1 or FT1/FE1 Site Links Options

Description	Full Description	Nomenclature	APC	Price
ADD: DUAL LINK 1 PAIR CWR	Adds dual T1/E1 or FT1/FE1 site link capability; not for use with Ethernet Core Routers. Intent to Cancel Date: 31-Dec-2019	CA01354AA	147	\$7,500.00
ADD: DUAL LINK 2 PAIRS CWR	Adds dual T1/E1 or FT1/FE1 site link capability; not for use with Ethernet Core routers. Intent to Cancel Date: 31-Dec-2019	CA01355AA	147	\$15,000.00
ADD: DUAL LINK 3 PAIRS CWR	Adds dual T1/E1 or FT1/FE1 site link capability; not for use with Ethernet Core routers. Intent to	CA01356AA	147	\$22,500.00

	Cancel Date: 31-Dec-2019			
ADD: DUAL LINK 4 PAIRS CWR	Adds dual T1/E1 or FT1/FE1 site link capability; not for use with Ethernet Core routers. Intent to Cancel Date: 31-Dec-2019	CA01357AA	147	\$30,000.00

SRC 7500 M3 Interzone Options (Required for DSR)

A combined Core-Exit Router may be ordered to consolidate the number of Routers in the SRC. Multizone may have a different Interzone Connectivity option in each zone.

Description	Full Description	Nomenclature	APC	Price
ADD: INTERZONE CAPABILITY ETHERNET	Provides router gear for Interzone connectivity via Ethernet.	CA01359AA	147	\$41,400.00
ADD: COMBINED CORE-EXIT ROUTER INTERZONE CAPABILITY (1 PAIR)	-	CA02867AA	147	\$66,420.00
ADD: INTERZONE CAPABILITY CWR	Provides router gear for Interzone connectivity via T1/E1 Intent to Cancel Date: 31-Dec-2019	CA01358AA	147	\$70,000.00

SRC 7500 M3 High Availability Data Option

The GGSN and VPN/Firewall are included standard for the primary and backup SRC 7500. High Availability Data requires a second GGSN and a second firewall. Both options must be ordered.

Description	Full Description	Nomenclature	APC	Price
ADD: GGSN	Provides a GGSN to support IV&D and HPD.	CA01361AA	147	\$16,000.00
ADD: SECOND FIREWALL AND HA FUNCTIONALITY	(Replaces CA02197AA)	CA02688AA	147	\$2,800.00

SRC 7500 M3 Encryption/FIPS Options (GGM 8000 Only)

These options add encryption and/or FIPS to GGM 8000s only. Refer to the FRU section to order the appropriate S6000 options. Order one option for each GGM 8000 router in SRC, i.e. If

SRC contains two Core routers (Ethernet), two Gateways, and one GGSN, order 5 CA02087AA; if FIPS is also required then include 5 CA02134AA as well. All routers must have encryption including GGSN when choosing this option. If FIPS 140-2 Level 2 encryption is required both options must be ordered.

Description	Full Description	Nomenclature	APC	Price
ADD: ENCRYPTION (7.12 OR LATER)	Order one per each GGM 8000 gateway.	CA02087AA	147	\$1,500.00
ADD: COMMON CRITERIA	Encryption (CA02087AA) is required with this option. Order one per each GGM 8000 gateway.	CA02134AA	147	\$500.00

Note: Please make sure to count the GGSN and Border routers that come with the options above to order the correct quantity of encryption on the routers.

SRC 7500 M3 Zone Core Protection (ZCP) bundle

This option contains 2 firewalls with ZCP licenses, 2 mediation switches required for each zone, and 2 DAC cables.. If IDS is needed, order one additional switch CLN1856A, and 2 more DAC cables (CLN1866A) as a separate line item.

Description	Full Description	Nomenclature	APC	Price
ADD: ZCP BUNDLE	-	CA03129AA	147	\$19,500.00

SRC 7500 M3 Core Backhaul Switch Option

This option provides a pair of redundant backhaul switches.

Description	Full Description	Nomenclature	APC	Price
ADD: CORE BACKHAUL SWITCHES	Provides backhaul switches to connect Ethernet site links and/or Ethernet interzone links.	CA03334AA	147	\$5,400.00

SRX™ 2200 P25 Portable Radio Series

P25 Phase 2 Single Band Capable Radio

Updates

Announcements

Effective March, 2018:

- **PMNN4547 IMPRES 2 LIION 3100 MAH** will be available as an option, **QA07577**, on the SRX 2200. This battery is slightly larger and will require a new holster, **PMLN7901**. This holster is now the standard carry holster for the Models 2.5 and Models 3.5 and will fit all of the current batteries in the portfolio. The legacy holster, **PMLN5709** is no longer available
- Battery option **QA05574**, which provided for **NNTN8930**, will no longer be available.
- The new standard 7/800 MHz whip antenna on the SRX 2200 will be **PMAF4040** instead of **NAF5085**. **PMAF4040** is has a slightly thinner and more flexible form factor. **PMAF4040** supports GPS operation.
- High Cap Battery **NNTN8921 (QA05575 & QA06304)** has been replaced by **NNTN4753 (QA07576 & QA07739)**

Ordering Information

Standard Features

All SRX 2200 models include the following features:

- Mission Critical Wireless Bluetooth® 4.0 (LE) (QA00583)
- ADP Privacy - Single Key
- Software Key (QA01749)
- 3 Programmable Side Buttons
- Orange Programmable Button
- 16 Position Mode Rotary Select Switch
- Angled On/Off Volume Knob
- 1 Top Mounted Programmable 3 Position Toggle Switch
- Top Display: 1 line of text, 1 line of icons, 0 menu lines
- Dual Microphone
- 3 Watt Rated Audio (Requires QA09006 to enable)
- Carry Holder (Models 2.5 & 3.5)
- Coyote Brown Delta-T, Saltwater Battery (NNTN8182)
- Single-Band Antenna (dependent on model/frequency selected)
- Models 2.5 & 3.5:
 - Unified Call List
 - Front Color Display: 4 Lines of Text, 2 Lines of Icons
 - Radio Profiles
 - 3 Programmable Buttons
 - 4-Way Navigation
 - Home & Data Buttons
- Model 3.5: 4 X 3 Alpha-Numeric Keypad

Software & Services

Wi-Fi

SRX 2200 supports Wi-Fi 802.11 b/g/n with WPA2/WPA (PSK), and WEP security protocols. Wi-Fi can be used with the Radio Management SW in order to do codeplug updates, firmware refreshes, and FLASHport upgrades over a Wireless Network (WLAN). The radio will only connect to available Wi-Fi networks which have been pre-provisioned in the radio codeplug via CPS. The radio can be pre-provisioned with up to 20 SSIDs.

The Wi-Fi feature requires ordering option QA09001. The Wi-Fi feature is also available aftermarket as a FLASHport upgrade if not ordered out of the factory.

Radio Management (RM) is required in order to take advantage of the Wi-Fi capabilities on SRX 2200.

Out of the Box WiFi Provisioning

If a radio is ordered the Wi-Fi option (QA09001) and the customer wishes to provision the radios out of the box using Wi-Fi, the radio must also be ordered with the Out of the Box Wi-Fi Provisioning option (QA09007).

A radio ordered with the Wi-Fi option and the Out of the Box Provisioning over Wi-Fi option

will come with the following default codeplug configuration relative to Wi-Fi:

- a. Wi-Fi will be enabled.
- b. There will be one pre-configured network with the Network SSID set to “MyNetwork” and security type will be set to “None”.
- c. The default state of Wi-Fi will be “on”.

A Wi-Fi router is required for connecting the Wi-Fi capable radio to the Device Programmer. The Wi-Fi router is to be procured by the agency programming the radios and must be provisioned with the Network SSID set to “MyNetwork” (case sensitive) with no password enabled.

For more details regarding the Out of the Box Wi-Fi Provisioning process, please refer to the [Out of the Box Wi-Fi Provisioning Leaflet](#)

Bluetooth 4.0 & Emergency Find Me

With Bluetooth 4.0 wireless technology and our APX™ Mission Critical Wireless portfolio, users can now connect a variety of Bluetooth audio accessories and data devices with their APX™ radio.

Bluetooth 4.0 also enables Emergency Find Me, a feature providing personnel with an added level of security by improving response time in emergencies. Once an emergency is activated on the APX 6000, a Bluetooth beacon signals other Bluetooth-enabled APX radios within range. Based on bluetooth signal strength, nearby APX radios will receive an emergency alert via intelligent lighting and a text message with users Radio ID along with signal strength status (excellent, poor, fair) to determine proximity, and will guide the nearest personnel to the user in distress.

ASTRO® Digital SRX 2200
FLASHport® Aftermarket Upgrades
Secure and Trunked Radio Systems

Ordering Information

GENERAL INFORMATION

FLASHport® Aftermarket Software is used to upgrade to the latest version of your System Enhancement Software Package to upgrade to a different System Enhancement Software Package or to order enhancements for existing for existing ASTRO® Digital SRX 2200 radios in the field. FLASHport® upgrade kits contain upgrade software, FLASHkey, and upgrade documentation.

There is a new way to upgrade radios in the field. The current method, which makes use of the FLASHport USB dongle, will be supported, but for those looking for a more convenient way, the new online method supported in Radio Management (RM) offers the following advantages:

- **Reduce wait time by retrieving the order electronically, rather than via the FLASHport USB dongle**
- **Work more efficiently by using RM to automatically filter for those radios to which the upgrade order can be applied**
- **Work in parallel because you are no longer limited by the number of physical FLASHort USB dongles you have**

NOTE: Radio Management must be deployed to manage your fleet of APX radios before you can use the online FLASHport method in Radio Management to upgrade radios. For more information on Radio Management please refer to the [ASTRO Radio Management](#) page.

Ordering Requirements

1. **Specify** the current System Enhancement Software Package that represents the software in the radio as the main line item (T7985A, T8013A, T7989A)
2. If you choose to use Radio Management to perform the upgrade, enter the online delivery method (UA00083AA) as a sub-item, quantity of 1 only. No selection is needed if using the traditional USB dongle.
3. **Select** the desired Operational Mode, System Enhancement Software Package, and/or System Enhancement Options and enter as sub-items.
4. **IMPORTANT:** If you are remaining at the same System Enhancement Software Package, use the column of the current System Enhancement Software Package to determine price and availability of System Enhancement Options.
5. **ALL** sub-items must have the same quantity listed (which equals the number of radios being upgraded) even though the main line is ALWAYS 1.
6. Radio Model number and **EXISTING** FLASHcode must be entered into designated COF fields. A separate line item must be entered for each different combination of Radio model and **EXISTING** FLASHcode.
7. "FLASH upgrades are not discountable"

NOTE: The FLASHcode can be read by using a USB cable.

	T7985A	T8013A	T7989A

Standard Definitions for Service Products

1.0 Definitions

These defined terms might not apply to every Statement of Work. Capitalized terms below and not otherwise defined within the Statement of Work, or in the Communications System Agreement or other applicable agreement (collectively, "Agreement") have the following meanings:

- 1.1 **Box Unit Test:** Unit is tested in a fixture that simulates the functions for which it was designed, engineered, or manufactured to insure that it meets manufacturer specifications.
- 1.2 **Case:** Electronic tracking document for requests for service through the Motorola System Support Center.
- 1.3 **Case Status:** Identifier of the status of a Case from beginning to end.
- 1.4 **Component(s):** Motorola new or refurbished parts of equal quality.
- 1.5 **Configuration Change Support:** A change in a user-defined parameter, which may include a change in the placement of a dispatch console talkgroup window. Fleetmapping is not included in Configuration Change Support.
- 1.6 **Connectivity:** Establishment of remote access to the System via dial up or fixed dedicated links.
- 1.7 **Continuously/Continuous:** Seven (7) days per week, twenty-four (24) hours a day, including holidays.
- 1.8 **Customer:** The end-user Customer as identified in the Agreement.
- 1.9 **Customer Support Plan:** A document mutually developed by Motorola and the Customer that provides information about the Customer and the System and describes the specific processes by which Motorola will deliver and the Customer will receive the services described in this Statement of Work.
- 1.10 **Elements:** Those device types present on the Customer's System whose status may be communicated to the SSC.
- 1.11 **Equipment:** The equipment specified in the Equipment List as set forth in the Agreement, including any additions to the Equipment List during the Warranty Period.
- 1.12 **Enhanced System Support (ESS) Period:** The 12 month period commencing at the start of the Warranty Period for Equipment and Software as defined by the Agreement.
- 1.13 **Event:** An alarm or informational notification received by Motorola through the Network Management tools.
- 1.14 **Feature:** A Software functionality.

- 1.15 Federal Technical Center: A Motorola facility, the purpose which serves as Motorola's centralized location for radio repair for United States Federal Government Customers.
- 1.16 Firmware: Software in object code form that is implanted or embedded in hardware.
- 1.17 FRU: Field Replaceable Unit, typically a board or module, contained within the Infrastructure.
- 1.18 Infrastructure: The fixed Equipment excluding mobiles, portables, and accessories.
- 1.19 Infrastructure Depot Operations (IDO): A Motorola facility which serves as Motorola's centralized location for infrastructure repair.
- 1.20 Loaner: Infrastructure that is owned by Motorola and serves as a temporary replacement while the Customer's Infrastructure is being repaired.
- 1.21 Maintenance: The process for determining the cause of Equipment failure, removing, repairing, or replacing Components necessary to conform the Equipment with the manufacturer's specifications along with system-specific specifications, delivering and reinstalling the Components, and placing the Equipment back into operation.
- 1.22 MCNS: Mission Critical Network Services.
- 1.23 Motorola Software: Software whose copyright is owned by Motorola or its affiliated company.
- 1.24 Non-Motorola Software: Software whose copyright is owned by a party other than Motorola or its affiliated company.
- 1.25 Notification: The point in time when the Customer contacts Motorola and requests service.
- 1.26 Optional Feature: An additional Feature issued with a System Release that is available to Customer at additional cost.
- 1.27 Radio Support Center (RSC): A Motorola facility which serves as Motorola's centralized location for radio repair.
- 1.28 Response: The event when a technician, a remote systems technologist or a remote network specialist begins actively to work on the technical issue, remotely or on-site, as determined by Motorola.
- 1.29 Restore/Restoration/Restoral: The effort required to bring Equipment to the level for which it was designed, engineered and adjusted for performance in accordance with the manufacturer's published specifications, although such Equipment may not necessarily be malfunctioning.
- 1.30 Servicer: A Motorola Authorized Service Station or Motorola Field Service personnel.
- 1.31 Severity Level: The degree of adverse impact of an issue or Event.
- 1.32 Software: The software furnished with the System, including any Motorola Software and Non-Motorola Software.

- 1.33 Software License Agreement: The agreement or portion of an agreement pursuant to which Motorola licenses Software to Customer, including System Releases.
- 1.34 Special Product Feature: A Feature that is specially developed for Customer and which contains a functionality that is unique to Customer.
- 1.35 Standard Business Day: Monday through Friday, 8:30 a.m. to 4:30 p.m., local time, excluding Motorola holidays.
- 1.36 Standard Feature: A software functionality for components of Customer's System that is available to Customer in the standard software release.
- 1.37 Start Date: Effective start date as listed on the Agreement.
- 1.38 System: The communications system as defined in the Communications System Agreement or other applicable Agreement.
- 1.39 System Acceptance: Unless otherwise defined in the Communications System Agreement, the date upon which Motorola has successfully completed all of the System Tests as described in the acceptance test plan.
- 1.40 System Support Center (SSC): A Motorola facility which serves as Motorola's centralized system support facility to compliment the field support resources.
- 1.41 System Release: One software version release on a particular platform. ASTRO 25 6.3 example is where 6 is the platform indicator and .3 is software version release indicator.
- 1.42 System Test: Unit is tested in a Motorola manufactured system of similar type from which the unit was designed to test all functionality of the unit to insure that it meets manufacturer specifications.
- 1.43 Systemic: A recurring Software or hardware defect that significantly affects the operation of the System.
- 1.44 Technical Support Operations (TSO): A centralized telephone support help desk that provides technical support for Motorola customers who have purchased products from Motorola (Networks & Enterprise) or who have a contract for technical support services.
- 1.45 Vendor: Any manufacturer (other than Motorola) or third party that services or repairs Infrastructure or subscriber equipment.
- 1.46 Verification: Contacting the appropriate designated person to verify the System is operational (original problem resolved) and closing the Case.
- 1.47 Work-around: A change in the followed procedures or data supplied by Vendor to avoid error without substantially impairing use of the Equipment.
- 1.48 Work Flow: A step-by-step process including instruction or direction for routing, handling, and processing information at a given agency.

Quarterly Standard Technical Implementation Guidelines (STIGs) Update

Quarterly STIGs (Standard Technical Implementation Guidelines) Updates for Microsoft Windows, RedHat Linux (RHEL), and ESXi.

The Defense Information Systems Agency (DISA) creates Information Assurance configuration standards for DOD IT systems and devices. These standards are known as Standard Technical Implementation Guides (STIGs).

Once tested, Motorola will post the updates to a secured extranet website and send an email notification to the customer. If there are any recommended configuration changes, warnings, or workarounds, Motorola will provide detailed documentation along with the updates on the website. Customer will be responsible for the download and deployment of these updates to their ASTRO System.

For more information, contact your Motorola representative.

Ordering Requirements

Applicable to an ASTRO 7.17.3 system. Complete the Quote Tool for pricing.

Benefits

- DHS/Dod compliance

Statement of Work

Configuration

Pricing is based on system configuration and number of the below devices:

Windows	RHEL	ESXi	Switch	Router (includes CCGW)	RF/VPM/Misc/anything with an IP Address not listed elsewhere
---------	------	------	--------	------------------------------	---

NOTE: If Edge Availability is used, Edge includes: Qty-1 Windows Domain Controller, Qty-2 RHEL (IPCAP & Zone Controller), Qty-1 ESXi VM Host. Don't forget to add these devices to counts.

NOTE: The GGM8000 box is part of the router count, not the CCGW module. A CCGW counts as a router. A site router with CCGW module would only count as 1 router.

NOTE: Verint Logging solution typically includes a Windows TLR server and a Windows Central Archive Server

NOTE: Verint Logging solution also uses a Windows AIS and a VPM.

**STR 3000 Base Radio sub-system
FLASHport® Aftermarket Upgrades**

Ordering Information

Ordering Requirements

FLASHport Aftermarket Upgrades are used to upgrade an STR 3000 Base Radio to the latest version of the Astro 25 system software.

800 MHz STR 3000

1. Order the T6759A (STR 3000 Software Migration) as the Main Model
 - This model quantity cannot exceed one. If more than one CD is desired, divide the number of stations being upgraded into several line items.
2. Order the X870AA in the same quantity as the number of base radios being upgraded.
 - Example: You are upgrading 200 radios then you will need to order 200 X870AA.

700 MHz STR 3000

1. Order the T6956A, T6957A or T6958A (STR 3000 Software Migration) as the Main Model.
 - This model quantity cannot exceed one. If more than one CD is desired, divide the number of stations being upgraded into several line items.
2. Order the X870AA in the same quantity as the number of base radios being upgraded.
 - Example: You are upgrading 200 radios then you will need to order 200 X870AA.

Subscriber Diagnostics Service

Updates

NOTE: No pricing discounts allowed on any of the products or services listed on this site.

If you have any questions please contact [Alex Cordova](#)

Ordering Information

Executive Summary

Keeping existing equipment operating at peak performance is now more critical to help control costs. Motorola Solutions now offers a Subscriber Diagnostics Service to trunked system users. This service provides an over-the-air radio waveform analyzer that monitors frequency performance to determine if individual subscribers are functioning properly and meeting FCC performance requirements. This service proactively identifies problems before they become an issue thus saving time and money associated with subscriber downtime and maintenance.

Features

- Minimizes subscriber downtime by identifying and only taking down subscribers that fail

while leaving functioning subscribers in the field.

- Lower costs as technicians will not waste time checking good subscribers and can focus on the out of spec subscribers.
- Proactively obtain diagnostics that are quick and concise, which will increase operational readiness.

Statement of Work

The customer Statement of Work for this Standard Service Product **CANNOT** be modified. All requests for modifications to STANDARD service products or the development of "custom" service products should be routed through the Solutions Planning process. Your first point of contact for these requests is your local Area Service Manager.

[Exhibit C: Statement of Work](#)

Ordering Requirements

Subscriber Diagnostic "Box" Order:

This product must be ordered using an internal Installation Agreement (IA).

[IA Form](#)

The documents below will outline both the Implementation process and the ongoing maintenance order process which begins in year two.

Support Service Packages

Ordering Information

General

Motorola offers Support Service Packages during customers' warranty period that can help keep their network operational and lower their costs, including monitoring, managing and securing their solutions or obtaining day-to-day technical and repair support. We recognize agency needs vary; therefore, we have designed three Support Service Packages which combine Motorola's primary network services to provide a consistent, integrated support process that will help to protect their communication's investment.

Note: ESS was discontinued August 8th. These materials are to be used as a reference for existing ESS contracts or for customer quotes that included ESS prior to discontinuing.

Benefits

In purchasing a communications system, a sizeable resource investment is required – i.e. people, time and money. Customers who purchase these systems want to ensure they are always available, maximize efficiency and extend the life of their equipment while adhering to an established budget. Some of the specific needs of our customers are:

- Network availability and increased capacity
- Optimized performance
- Timely response
- Consistent support and resolution
- Budgeted repairs
- Replacement units in exchange for malfunctioning units
- Improved security and reliability
- Improved patch compatibility
- Lower total cost of ownership

Statement of Work

Please refer to the corresponding wiki page for the services as applicable to the desired Support Service Package (Bronze, Silver or Gold).

Ordering Requirements

1. This product must be ordered using the Services Lifecycle (SLC) contract system. Please contact your local Area Service Manager (ASM) or Customer Support Manager (CSM) if you are interested in ordering this product.
2. Options for this product are based on the component parts of the complete system.
3. Enter the main line item as quantity one.
4. Options are required as sub-items, with the quantity equal to the option description.
5. All dollar amounts reflect an annual one year pricing.
6. A Customer Support Plan must be created to provide detailed information to the customer regarding delivery of this service.

System Manager

Ordering Information

Executive Summary

- Your Motorola System Manager is dedicated to your network and coordinates all aspects related to the support, monitoring, and maintenance of your network, from day-to-day routine upkeep of the system to managing quick response for emergency service calls, coordinating additional technical support and following up on repairs. System Managers can assist with database management, oversee the implementation of system upgrades, and coordinate user training.
- Interfacing with your user groups and conducting regular meetings to review system performance are routine parts of the job. The review includes a portfolio of reports that System Managers create from raw system data that will help you make informed daily operational and critical planning decisions relative to future network expansion and technology migration.

Features

A dedicated System Manager plays a key role in maintaining your system, enabling you to focus on your organization's goals, reduce the customer's investment risk, and shifts accountability of system performance to Motorola. Just some of the benefits of an on-site Motorola System Manager include:

- **Single point of contact:** Responsible for total, end-to-end network support
- **Rapid restoration:** Direct access to all Motorola support teams to resolve complex network issues
- **Reduced risk:** Significantly reduced Mean Time to Repair
- **Increased network availability:** Monitored compliance to Service Level Agreement
- **Reduced inventory costs:** Accurate, up-to-date asset inventory management
- **Leveraged system capability:** Providing expertise in feature operation and implementation
- **Tailored skill sets:** Specifically to meet individual customer needs and requirements

Statement of Work

One of the primary business objectives of the North American Group (NAG) is to promote the sales of STANDARD service products. Standards help to ensure consistent and profitable delivery of our service products to our customers. To that end, the customer Statement of Work for this Standard Service Product **CANNOT** be modified. All requests for modifications to STANDARD service products or the development of "custom" service products should be routed through the Solutions Planning process. Your first point of contact for these requests is your local Area Service Manager.

System Manager **SOW** and Addendum:

Ordering Requirements

1. This product cannot be ordered directly through COF at this time. This product must be ordered using the Service Lifecycle Application. Please contact your local Territory Service Manager (TSM) or Customer Support Manager (CSM) if you are interested in ordering this product.
2. Options for this product are based on the component parts of the complete system. Pricing is based on the number of sites
3. Enter the main line item as quantity one.
4. Customer Support Plan must be created to provide detailed information to the customer regarding delivery of this service.
5. Committed System Manager, Level I may not be discounted.
6. Committed System Manager, Level I is for customers who have 0 to 2 remote sites.
7. Committed System Manager, Level II is for customers who have 3 or more remote sites.
8. Shared System Manager is for any customer who would like to obtain the services of a Shared System Manager, regardless of the number of remote sites.
9. The pricing listed on this page is applicable to services being performed only in the 48 continental states in the United States. Pricing for customers in Hawaii, Alaska, or international customers may contain an additional SP equating to add additional funds for international travel needs, higher cost of goods, etc...

Technical Support Service

Ordering Information

General Information

Motorola centralized Technical Support service provides an additional layer of support through centralized, telephone consultation for technical issues that require a high level of communications network expertise and troubleshooting capabilities. Technical Support is delivered by the Motorola System Support Center (SSC) and staffed with trained, skilled technologists specializing in the diagnosis and swift resolution of network performance issues. With access to a solutions database, as well as access to in house test labs and Motorola development engineers, Technical Support helps solve even the most challenging network issues. Support is just a phone call away and ensures that any network issue is professionally and consistently handled in the shortest possible timeframe. Continuously monitored against stringent inbound call management and case management standards recognized as industry best-in-class, Technical Support service translates into measurable, customer-specific metrics for assured network performance and system availability.

Features

- Remote Diagnostic & Troubleshooting
- Laboratory Simulation of System Issues
- Access to Motorola Technical Expertise
- 24 Hour/365 Day Service Availability

Statement of Work

The customer Statement of Work for this Standard Service Product *CANNOT* be modified. All requests for modifications to STANDARD service products or the development of "custom" service products should be routed through the Solutions Planning process. Your first point of contact for these requests is your local Area Service Manager.

Ordering and Contractual Documents

Initial Purchase & Ongoing Maintenance Orders use model **SVC01SVC1104**

This product cannot be ordered directly through COF at this time. This product must be ordered using the Service Lifecycle Application. Please contact your local Territory Service

Lead (TSL), Customer Support Manager (CSM) or System Manager (SM) if you are interested in ordering this product. For a listing of TSLs, CSMs and SMs [click here](#).

1. Technical Support can be supported and configured **only** on a complete system basis. Please include all sites when quoting a system for Technical Support. Technical Support cannot be ordered on standalone components or selected sites. Options for this product are based on the component parts of the complete system. Pricing is based on the size and complexity of the customer's system configuration such as the type of system, number of sites and number of base stations. **To ensure accurate pricing, orders will not be processed or accepted if they do not include all system components.**
2. Enter the main line item as quantity one.
3. Options are required as sub-items, with the quantity equal to the option description.
4. All dollar amounts reflect an annual one year pricing.
5. A Customer Support Plan must be created to provide detailed information to the customer regarding delivery of this service.

Test Equipment Rental Service

Ordering Information

General Information

Test Equipment Rental rents Motorola manufacturing test equipment for short or long-term periods. For more information, please review the [Solution Resource Guide](#).

Test Equipment Rental is covered in the Technical Services brochure (RC-110-2000) available through [Literature Distribution Center \(LDC\)](#).

Features

- Rental assistance on an emergency basis within 24 hours of request
- Technical assistance if needed
- Unique test equipment available as needed

Ordering Requirements

- This product requires an authorized quotation from the service delivery organization. Contact your local Area Service Manager (ASM) or Customer Support Manager (CSM) for more details.
- **This product CANNOT be ordered directly through COF at this time.** This product must be ordered using the Services Pricing Configurator. Please contact your local ASM or CSM if you are interested in ordering this product. For a listing of ASMs/CSMs [click here](#).
- A Customer Support Plan must be created to provide detailed information to the customer regarding delivery of this service.

General Information

Towers

Motorola competitively bids every tower quote with two suppliers to obtain the best cost. Additional suppliers are currently being evaluated.

What Influences the Price of a Tower:

- Tower Height
- Wind Speed
- Soil Type
- Foundation
- Importance Factors: Rating the hazard to human life or property level
- Exposure Factors: Location of the tower
- Topographical Factors: Terrain and wind speed
- Antenna/ Dish Loading & position
- Steel price

Preferred Suppliers:

[Valmont](#)

[Sabre](#)

How to obtain a quote

You will need the following information: Tower Type, Tower Height, Antenna, Feed line, & Mount Loading (size, quantity, and location on tower), Site location/Coordinates, any additional customer requirements

Fill out the [Tower Request Form](#) and send to the product planner

Please refer to the [SIO Drop Ship Contact List](#) for product planner contact information.

General Information

For technical questions, please contact [Gary Owens](#).

For ordering/pricing questions, please contact the product planner [Tim Martin](#).

For more information on Filtronic products, please see the [Filtronic portal](#) (PW IS MSI2020) or contact Walter Magiera at walter.magiera@filtronic.com (407-399-3630).

For more information on TXRX products, please see the [TXRX portal](#) or contact Mike Ryan at MRyan@txrx.com (312-632-9620).

For more information on RFI products, please see the [RFI portal](#) or contact [Sean Johnson](#) at 330-486-0706 x 302.

Note: For every configuration, you must order the correct corresponding part number for the same supplier. Refer to the notes below the part number.

TXRX TTA COMPATIBLITY MATRIX

TXRX has published (8/28/2019) a spreadsheet with a TTA product matrix. This matrix is designed to help guide users to the proper TTA as older models become obsolete. If you have questions, contact the TXRX account manager (details above).

Below is a link to the matrix document.

https://aem-prod-author.motorolasolutions.com/assetdetails.html/content/dam/msi/secure/productcatalog/ordering_guides/TX%20RX%20TTA%20Compatibility%20Matrix%20for%20Customers%2007%2029%2019.pdf

For ordering/pricing questions, please contact the product planner [Tim Martin](#)

For more information on TXRX products, please see the [TXRX portal](#) or contact Mike Ryan at MRyan@txrx.com (312-632-9620).

For more information on RFI products, please see the [RFI portal](#) or contact Sean Johnson at 330-486-0706 x 302.

TXRX TTA COMPATIBILIY MATRIX

TXRX has published (8/28/2019) a spreadsheet with a TTA product matrix. This matrix is designed to help guide users to the proper TTA as older models become obsolete. If you have questions, contact the TXRX account manager (details above).

Below is a link to the matrix document.

https://aem-prod-author.motorolasolutions.com/assetdetails.html/content/dam/msi/secure/productcatalog/ordering_guides/TX%20RX%20TTA%20Compatibility%20Matrix%20for%20Customers%2007%2029%2019.pdf

Training Bank

Ordering Information

Overview

The Motorola Training Bank is a pre-paid, non-expiring account allocated to the portfolio of educational products and services provided by Motorola Solutions North America Learning Organization. It is discounted up front and may be rolled over to the following year. Motorola's Training programs are designed to build technical product and systems knowledge, as well as skills and expertise of your Motorola mission or business critical communication network. The dollars in a Training Bank may be used toward most training provided by Motorola Solutions North America Learning Organization, including but not limited to:

- Self Paced Online
- Virtual Instructor-Led
- Instructor-Led Resident Lab Courses
- Instructor-Led Tailored Field Courses
- Interactive End User Tool Kits

Features

MAXIMUM SYSTEM VALUE Educated technicians and systems managers can minimize downtime and leverage the system's full set of capabilities.

FLEXIBLE DELIVERY OPTIONS Classes are available at your location or ours; they are also available as instructor-led, on-line or self-paced on-line courses.

SPEED TO LEARNING Experiential, hands-on learning reduces the time it takes to come up to speed, and increases retention after the class is over.

WORLD-CLASS INSTRUCTORS Facilitators are experienced with backgrounds on the latest technologies and receive over 100 hours of annual training.

INCREASED KNOWLEDGE RETENTION Actual system documentation and hands-on learning helps technicians learn faster and increase retention.

COST EFFECTIVE Training Banks provide discounted prices and help budget for training costs.

Training Bank Features

Up-front discount on training products and

User Benefits

Savings on your operator and technical

services	training needs
Pre-paid account used as debit	No hassle with multiple approvals and budgeting
No term limit; account does not expire	Ability to use funds year after year
E-mail notification when account funds are low	Ensures funding is available when you need training

Ordering Requirements

This product cannot be ordered directly through COF at this time.

There are 2 ways Training Banks can be purchased:

1. Contact the Call Center at 800-422-4210 and place an order for the applicable part number. Once the order is processed, the customer will receive an email with the Training Bank account number
2. If monies are left over from a project, the Customer Support Manager can roll funds into a Training Bank for future use. Contact the CSM for more details

Terms & Conditions

Training Bank Terms & Conditions - need to add link

Note: The Training Bank is non-transferable and non-refundable. Training Bank funds can not be used for travel & expenses

How to Utilize

1. Log into the [Learning Management System](#)
2. Search for a Course
3. Add to Cart
4. Select "TRAINING BANK" as the payment method
5. Check out
6. A training representative will verify the training bank account
7. After training is delivered, funds are debited from the account

Contact the help desk at 855-619-9714 if there are any questions

NEON Indoor Location Increases Situational Awareness and Enhances User Safety By Providing Location Indoors

Ordering Information

Features

Motorola has partnered up with TRX Systems to provide an Indoor Location system compatible with the Motorola LEX L10 and LEX L10G

Real-time Location of Personnel

2D and 3D location and tracking of all personnel both indoors and out

Centralized 3D mapping and visualization

Cloud connected Command software provides remote, real-time situational awareness

Precise Detail on Personnel Movement and Activity

Clear views of personnel activity and status (moving, motionless, prone)

Effective After-Action Review

Location and track storage in Cloud for all personnel supports training and after action reviews

Scalable and Easy to Use

Cloud connected solution allows fast building rendering and rapid on-scene initialization

The TRX NEON Indoor Location System locates and tracks personnel operating indoors where GPS is unavailable and in urban areas where GPS is unreliable. Wearing NEON Tracking Units in conjunction with the LEX L10, personnel can be located and tracked real time in both 2D and 3D.

NEON fuses gyroscope, accelerometer, pressure, compass, Wi-Fi, and ranging sensor information along with inferred map and building data to deliver reliable GPS-denied location. Rapidly deployable BLE beacons and floor plan information may be used in fixed site applications to enhance precision.

Enhanced Tracking Performance

NEON sensor fusion and mapping algorithms deliver accurate location within buildings even where ranging, inertial, magnetic and pressure sensors can provide erroneous measurements due to interference from building infrastructure or from sensor drift. Operating without GPS coverage, NEON provides differential location (position relative to a starting point) in real time. Starting point initialization can be obtained via GPS, BLE Beacons, manually check-ins, waypoint selection, and NFC Check-Ins. Overall location accuracy is affected by accuracy of the start location, sensor integrity and map information. For fixed sites, location integrity can be enhanced with pre-planning and use of beacons in choke points and other strategic locations.

NEON Markets

- Industrial Personnel Tracking
- Security Officers and VIPs
- Police and Public Safety
- Corrections Officers and Employees
- Training Applications

Product Information

Neon Location Service

- Android based software providing 3D location data to UI and Cloud Service
- NEON Location Engine uses check-ins, inertial and magnetic data, BT and Wi-Fi signals and learned building constraints to compute location

Neon Command Software

- Map Editor Tool for user input of building outlines and floor plans
- UI for remote real-time viewing, instant replay, and after action review of location
- Centralized access to the NEON Cloud Service to access logged location info

NEON Cloud Service

- Cloud-based location data and 3D map database

System Components

INU-8B Specifications:

Dimensions (H x W x D) 60 x50 x15mm (2.4 x 2.0 x 0.6in)

Operating Temperature -20 to 60 °C (-4 to 140 °F)

Battery *Lithium Polymer, 8+ hours*

Android connection *Bluetooth*

TX Application Software

Ordering Information

General Information

The TX Application is a mobile, portable, or laptop application which allows receipt of dispatches, query of databases, and entry of data into a host computer. TX offers several types of messages. Status conditions and routine text messages can be programmed. Free-format text provides a facility like electronic mail, while data entry forms provide fill-in the blank templates for most interactions with host computers. Pre-defined forms can be resident in the memory of the terminal/PC, while more frequently changed forms can be downloaded over the radio channel from the host computer. Received messages are divided into two logical types: waiting and stored. The TX application offers several levels of support for composing messages for transmission. Software operates in a Microsoft DOS/Windows operating environment, unless otherwise indicated.

"Application TX" is intended for customers having a device on which TX was not pre-loaded. Each user receives a User's Manual and Shrink-wrap Software License Agreement.

"Upgrade TX" is intended for customers having a device with a version of TX prior to TX0.33, TX1.14 or TX1.6. The Upgrade Kit includes Supplemental Notes outlining enhancements from the previous version(s), diskette, Installation Instructions and Shrink-wrap Software License Agreement

The TX Application is compatible with the Windows 3.1x (non-international) or Windows for Pen computing 1.0 operating systems. TX is not supported on Win 95 or Win NT operating systems. For Customers with Win 95 operating system, please see the WaveSoft-Link product.

TX CONFIGURATOR: One copy of the TX Configuration Software must be ordered at the same time as the INITIAL TX customer order. It is not necessary to re-order the Configurator software when placing TX add-on orders UNLESS it is the INITIAL MW520 add-on.

DATA TERMINAL SYSTEM CONFIGURATOR: One copy of the Data Terminal System Configuration Software must be ordered at the same time as the INITIAL customer order. It is not necessary to re-order the System Configurator software when placing add-on orders UNLESS it is the INITIAL MW520 add-on.

FORMGEN: One copy of the FormGen Software and Manual must be ordered at the same time as the INITIAL customer order. It is not necessary to re-order FormGen when placing TX add-on orders.

LICENSE AGREEMENT: When using this software, Licensee is subject to the terms of the

Motorola Software License Agreement.

FIELD PROGRAMMING: Software prices **DO NOT** include field programming.

WARRANTY: Operational warranty is limited to the cost of the software.

Ordering Requirements

ORDERING REQUIREMENT FOR FORTE AND LAPTOPS:

1. Specify the TX Application that is specific to the device it is to run on (F2190, F2195, F2191 or F2196) and enter as main line item and order quantity 1 at \$25.
2. Choose the appropriate TX License (Z255 or Z624) if ordering an Install (F2190 or F2191) or an Upgrade (F2195 or F2196). Enter as a sub-item. All sub-items must have a quantity listed that equals the number of devices that TX will be installed or upgraded on even though the main line item is ALWAYS 1.
3. MWCS (T5747) software is required for TX1.6 for Forte' and laptops. Order quantity one (1) of main model (T5747) for \$50 along with the software license option (Z254) for \$65. The quantity for the software license option (Z254) should equal the number of devices being installed. There is a maximum quantity of 100 licenses allowed per main line item (T5747). Contact MWCS Product Marketing with questions.
4. Choose Software Enhancement(s) for the device (Z167 and/or J654). Enter as a sub-item. All sub-items must have a quantity listed that equals the number of devices the Enhancement(s) will be installed on.
5. GPS option (Z167) is not compatible with radioless Forte' (F2160).

MINIMUM HARDWARE REQUIREMENTS FOR TX1.6 ON LAPTOPS:

OS: Windows 3.1x (non-international version) CPU: 386 ,486 or Pentium. Display: VGA, 640x480, 16 colors/gray levels.

RAM: 4 Mbyte free. DISK: 2 Mbyte free. COM port: Available COM port-connected to RF-modem.

RF-modem: Native mode 1.1 with MDC compatibility services.

ORDERING REQUIREMENT FOR 9100-T AND 9100-WS

6. Specify the TX Application upgrade (F2199, F3190 or F2194). Enter as the main line item with a quantity that equals the number of devices TX will be upgraded on.

7. Choose Software Enhancement(s), if applicable, for the device (Z167 and/or J654). Enter as a sub-item. All sub-items must have a quantity listed that equals the number of devices the Enhancement(s) will be installed on.
ORDERING REQUIREMENT FOR MW520:
8. Specify the TX Application as a Install (F3192) or an Upgrade (F3193) and enter as main line item and order quantity one (1) at \$25.
9. Choose the appropriate TX License (Z255 or Z624). Enter as a sub-item. All sub-items must have a quantity listed that equals the number of devices that TX will be installed or upgraded on even though the main line item is ALWAYS 1.
10. MWCS (T5747) software is required for TX1.6 for Forte' and laptops. Order quantity one (1) of main model (T5747) for \$50 along with the software license option (Z254) for \$65. The quantity for the software license option (Z254) should equal the number of devices being installed. There is a maximum quantity of 100 licenses allowed per main line item (T5747). Contact MWCS Product Marketing with questions.
11. Choose Software Enhancement (s) of the device (Z167 and/or J654). Enter as a sub-item. All sub-items must have a quantity listed that equals the number of devices the Enhancement(s) will be installed on.
INSTALLATION PROCEDURE:
12. For the Forte', 9100-WS and 9100-T, the diskette provided must be copied to a 2MB SRAM card.
13. Installation of TX1.65 on the MW520 can be done by either using the external floppy disk drive (CDN1280) or an SRAM PCMCIA card. Ordering instructions for the external floppy disk drive (CDN1280) are available on the MW520 price page.

General Information

For pricing/ordering issues contact the product planner, Tim Martin at tim.martin@motorolasolutions.com or 847-979-0413.

For technical assistance contact Gary Owens garyowens@motorolasolutions.com.

For Alive information, go to the Alive [website](#) or contact Jim Melia at jmelia@alivetele.com or at 708-603-6836.

For Amphenol Procom product information, go to the Amphenol Procom [website](#) or contact Kim Bramsgart at kb@amphenolprocom.com or at (815-218-8000).

For RFI information, go to the [RFI website](#) or contact Sean Johnson at sean.johnson@rfi.com.au or (330-541-6585).

For DBSPECTRA information, go to the DBSPECTRA [website](#) or contact Sandra Zachmeyer at szachmeyer@dbspectra.com (972-841-4893).

NOTE: In the Full Description field below, you will find the vendor part number, any vendor notes associated with that part, and a URL link to a vendor Spec sheet for that item.

UHF Band Receiver Multicouplers

This page contains information from MSi preferred vendors, including RFI, DBSPECTRA, and TXRX.

If you want to use equipment from a non preferred vendor, you must go through the Exception Request process (see link to form below).

EXCEPTION REQUEST LINK

Ordering Information

General Information

For general ordering and vendor information, contact the product planner [Tim Martin](#).

For technical assistance contact the lead RF engineer, [Gary Owens](#).

For information on RFI products go to the [RFI website](#) or contact [Sean Johnson](#) at 330-541-6585.

For information on DBSPECTRA products, go to the [DBSPECTRA](#) portal or contact [Sandra Zachmeyer](#) at szachmeyer@dbspectra.com (972 841-4893).

For information on TXRX products, go to the [TXRX](#) portal or contact [Mike Ryan](#) at MRyan@txrx.com (312-632-9620).

UHF CONTROL STATION ANTENNAS

This page contains parts information for MSI preferred vendors including Alive Telecom, Amphenol Procom, RFI, and DBSPECTRA.

For non preferred vendors, contact the vendor directly. You will need an approved Exception Request to use antennas from a non preferred vendor. See link below.

https://docs.google.com/document/d/1C34HXeD5mzvDDq9x_e_1gHVexlB2VRtyYzl0tA-wgtg/edit

ORDERING INFORMATION

For pricing/ordering issues contact the product planner, Tim Martin at tim.martin@motorolasolutions.com.

For technical assistance contact Gary Owens at garyowens@motorolasolutions.com.

For Alive Telecom product information go to the Alive [website](#) or contact Jim Melia at jmelia@alivetele.com (708-603-6836).

For Amphenol Procom product information, go to the Amphenol Procom [website](#) or contact Kim Bramsgart at kb@amphenolprocom.com (815-218-8000).

For RFI product information, go to the RFI [website](#), or contact Sean Johnson at sean.johnson@rfiamericas.com or (330-541-6585).

For DBSPECTRA product information, go to the DBSPECTRA [website](#) or contact Sandra Zachmeyer at szachmeyer@dbspectra.com or (972-841-4893).

NOTE: In the Full Description field below, you will find the vendor part number, any vendor notes associated with that part, and a URL link to a vendor Spec sheet for that item.

NEN 2500 - VENDETTA

Ordering Information

General Information

YOUR MISSION KNOWS NO BOUNDARIES, YOUR EQUIPMENT SHOULD NOT EITHER

The **NEN 2500 - VENDETTA SDR** is a highly capable, secure Software Defined Radio (SDR) with built-in power amplifiers, receiver circuitry, and an integrated front end. It is a rapidly deployable dual carrier Base-Transceiver-Station (BTS) which provides the **technical agility** to process a variety of radio technologies from GSM to LTE with a single, compact piece of hardware.

Purpose-built solution. With its rugged chassis and IP67 certification, the NEN 2500 - VENDETTA SDR sets a new standard in SWaP without compromising performance. NEN 2500 - VENDETTA is ideal for maritime use.

Portable and compact solution. Weighing in at 16.4 lbs without fans and 19.8 lbs with fans, the NEN 2500 - VENDETTA SDR is light enough to be transported and rapidly-deployed at the targeted environment. The NEN 2500 - VENDETTA SDR ideally suited for manned aerial vehicle, marine vehicle, vehicular, and man-portable missions.

Features

- Gigabit Ethernet and Wi-Fi for command and control
- Status LEDs

- Power
 - Ethernet Link
 - Health
 - TX on/off
- RX Antenna (survey/High-Band/Low-Band)
 - TX Antenna (survey/High-Band/Low-Band)
 - Four port auxiliary RF (generic RX/TX)
 - DC Power (+9 to +36 VDC) with remote on/off
 - Single Cell Power Consumption 170W (typical)
 - Dual Cell Power Consumption <300W (typical), 350W (max)
 - eSATA port
 - Supported Bands
 - Tunable from 730 MHz thru 2 GHz (amplified); 70 MHz thru 6 GHz (unamplified)
 - 56 MHz instantaneous bandwidth per transceiver
- Freescale i.MX6 Quad-Core processor @1.0 GHz/core
 - Xilinx Virtex-7 VX485T-2
 - Size (with fans): 18.1"x 10.1"x 2.7" Weight: 19.8lbs
 - Size (without fans): 14.9"x 10.1"x 2.7" Weight: 16.4lbs

SUPPORTED APPLICATIONS

- Rapidly Deployable Base Station : LTE-FDD, UMTS, DUAL CELL GSM, Dual Cell CDMA2K
- RF spectrum record and playback : LTE-FDD, UMTS, GSM, CDMA2K
- TACTICAL LTE Network

CUSTOM APPLICATIONS AVAILABLE upon request

TARGET ENVIRONMENTS

- MANNED AERIAL VEHICLE
- VEHICULAR
- MARINE VEHICULE
- MAN PORTABLE
- FIXED SITE

Ordering Requirements

Configuration

Main Models

Description	Nomenclature	Price
VENDETTA RDBS Kit	FDKT00230	\$96,200

The NEN 2500 - VENDETTA unit consists of an advanced, state-of-the-art, small-form-factor Software Defined Radio, utilizing modern embedded microprocessor and FPGA technology suitable to handle complex radio applications in the 70-3000 MHz spectrum. Each NEN 2500 - VENDETTA kit provides the user with the following:

- (1) NEN 2500 - VENDETTA SDR unit
- (1) +9 to +36 VDC power brick with customer power cable
- (1) eSATA cable
- (1) Custom IP67 10/100/1000 Ethernet cable (RJ45)
- (1) GPS Magnetic Mount Antenna
- (1) Wi-Fi Magnetic Mount Antenna

Additional components in the NEN 2500 - VENDETTA SDR

- (1) Custom Auxiliary RF cable for use with (4) auxiliary RF ports(generic RX/TX)
- (1) CD containing the following applications w/ associated documentation: RF Recorder and HW Test Utilities

Additional components in the NEN 2500 - VENDETTA RDBS

- (1) RF to SMA Cable
- (3) Wide Band Antennas, 698-2500MHz (survey/RX/TX)
- (2) 10' Megaphase RF Cable
- (2) 20' Megaphase RF Cable
- (4) Adapter, SMA to N Plug
- (4) Adapter, SMA to N Jack
- (1) Ruggedized Laptop OR Ruggedized Tablet

One (1) CD containing the Rapidly Deployable Base Station software

NEN 2500 - VENDETTA SDR Product description: The RF Recorder application provides the end user with a capability to view and record RF spectrum. It provides an easy to use graphical interface that allows the user to select the center frequency and bandwidth of interest and save the captured digital base-band I/Q data. It also allows the user to play back saved files for later analysis.

NEN 2500 - VENDETTA RDBS Product description: The Rapidly Deployable Base Station provides the end user with a capability to rapidly deploy a fully integrated secure, multi-technology Cellular BTS solution. It provides an easy to use graphical interface that allows the user to select the BTS type / technology of interest and configure the BTS as needed using the

antennas provided.

Software & Services

Warranty

LIMITED WARRANTY

Motorola warrants the Product against significant defects in material and workmanship under normal use and service for a period of sixty (60) calendar days from the date of shipment from Motorola. Motorola, at its option, will at no charge, either repair the Product (with new or reconditioned parts), replace it with the same or equivalent Product (using new or reconditioned Product), or refund the purchase price of the Product for significant defects identified during the warranty period provided Motorola is notified of such significant defects no later than 14 calendar days after the expiration of the warranty period according to the terms of this warranty. Repaired or replaced Product is warranted for the balance of the original applicable warranty period. All replaced parts of the Product shall become the property of Motorola.

This warranty sets forth the full extent of Motorola's responsibilities regarding the Product. Repair, replacement or refund of the purchase price, at Motorola's option, is the exclusive remedy. THIS WARRANTY IS GIVEN IN LIEU OF ALL OTHER EXPRESS WARRANTIES. MOTOROLA DISCLAIMS ALL OTHER WARRANTIES OR CONDITIONS, EXPRESS OR IMPLIED, INCLUDING THE IMPLIED WARRANTIES OR CONDITIONS OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. IN NO EVENT SHALL MOTOROLA BE LIABLE FOR DAMAGES IN EXCESS OF THE PURCHASE PRICE OF THE PRODUCT, FOR ANY LOSS OF USE, LOSS OF TIME, INCONVENIENCE, COMMERCIAL LOSS, LOST PROFITS OR LOST SAVINGS OR OTHER INCIDENTAL, SPECIAL, INDIRECT OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE SUCH PRODUCT, TO THE FULL EXTENT SUCH MAY BE DISCLAIMED BY LAW.

VERINT MEDIA RECORDER FOR PUBLIC SAFETY V5 - End of Sale (April 2019)

VERINT RECORDING FOR PUBLIC SAFETY V15.2 (FOR 7.17 OR LATER)

Audiolog 5000 series hardware not supported in A7.17 or later releases

Ordering Information

General Information

SERVICES ARE NOT INCLUDED IN THE MODELS BELOW. PRICE PAGE FOR **BUDGETARY QUOTES ONLY**

Verint Media Recorder for Public Safety is an advanced, digital multimedia recording, retrieval, and quality assurance solution designed to enhance the performance of public safety answering points (PSAPs), command and control centers, homeland security, transportation operations centers, correctional facilities, and emergency communication centers. It offers superior reliability in mission-critical environments, along with flexible, easy-to-use functionality that can help your organization meet the demands of Next Gen 9-1-1 and other evolving communications challenges by:

- Capturing audio, video, text, screen data, telematics, photos, and related data, such as telephone numbers and location, from a variety of sources
- Live monitoring of PSAP interactions to help ensure adherence to policies and procedures
- Reconstructing incident scenarios to understand the chain of events
- Protecting captured interactions from unauthorized access and tampering
- Evaluating and enhancing call taker, dispatcher, and manager performance
- Documenting and reporting results efficiently

The Verint solution set offers a broad range of functionality, including:

- **Robust Secure Architecture** - Verint Recorder for Public Safety is designed for use both as a stand-alone recorder/playback unit and as a specialized recording server within a networked environment. To promote superior reliability and availability and cost-effective operation, Verint Recorder for Public Safety is built on an open architecture and uses standard PC components, the Microsoft Windows platform, and the Microsoft SQL database.
- **Easy Upgrades** - The Verint Logging Solution does not require upgrade at the same time as an ASTRO upgrade. The Verint logger will keep recording through the upgrade and can be upgraded at a time conveniently after.
- **Talkgroup Pricing** - Verint prices systems by talkgroup, not by talk path.
- **Multimedia Call and Screen Recording** - Verint Recorder for Public Safety provides full-time recording, selective recording, recording on demand, and dial-in recording across digital and analog telephones, trunked and conventional radio systems, telephone lines and trunks, IP phones, short message service (SMS), and PC screens. In addition to

recording interactions, Verint Recorder for Public Safety can tag them with information from radio, ANI/ALI, CTI ICCS, CAD, SMS, and GIS systems to facilitate incident reconstruction.

- **Secure Storage and Retrieval** - Verint Recorder for Public Safety provides Insight Center, a powerful browser-based set of tools to search for and play recordings directly from the desktop. Captured interactions can be retrieved according to a wide variety of criteria, from date and time to caller ID, call taker name, DNIS, CAD incident number, radio ID, talkgroup or ANI/ALI. You can also reconstruct events and scenario by playing back multiple interactions simultaneously, all from a single workstation. Playback and monitoring rights help secure recordings from unauthorized access, and digital fingerprinting shows when a voice or radio recording has been tampered with. Optional AES-256 encryption protects voice and radio data. Audiolog can retain large volumes of calls online, as well as archive contacts to Blu-ray media, DVD-RAM, and network-based storage resources.
- **Quality Assurance Compliance** - Verint Recorder for Public Safety Interaction Quality is a quality assurance solution that simplifies the creation of evaluation forms and questions. Its intuitive, browser-based interaction assessment tool enables managers to play back and score calls easily, with only minimal training. A unique calibration feature can measure and compare quality evaluators' scores, showing how they deviate from averages or goals to foster more consistent scoring across your organization. Comprehensive reporting makes it easy to analyze the performance of call takers and managers.
- **Hardened RNI based solutions for Public Safety and Fed customers.**

The Verint audio portfolio is a certified solution for ASTRO versions 7.14 or later system releases. It can also be deployed with ASTRO versions 7.13 or earlier (see notes below), but on the CEN.

Ordering Requirements

Verint Recording for Public Safety V15.2 for 7.17 (or 7.17.3 for RNI deployments) or newer releases

The new Verint Recording for Public Safety V15.2 recorder delivers a significantly advanced architecture and feature set from the previous (original) V5 Media recorder. The Verint V5 recorder was formerly called the Trunked Logging Recorder (TLR).

Some enhancements include:

- Improved capacity and integration options
- Enhanced redundancy and resiliency options
- Better enterprise scalability
- New web based centralized system administration and monitor
- New web based Enterprise User Management
- Centralized database and search and replay application
- Same incident and quality mgmt. applications as used with the V5 Media Recorder

Specific features:

- Recording of up to 1000 channels per server
- Supports N+N and N+M failover options and various load balancing options
- 50+ adapters and 25+ telephony integrations and NG911 ready
- Windows 2016, SQL Server 2016

Verint Recording for Public Safety V15.2 requires 6000 series hardware. If the 6000 series hardware was originally sold with the V5 Media Recorder, the server will require component upgrades. Please see note below.

The Verint V5 and V15.2 Recorders require a Motorola Archiving Interface Server (AIS). The AIS model numbers can be found in **ECAT** under **Dispatch Solutions** in the **Motorola MCC 7500 Products** folder.

Key Information & Ordering Instructions:

Sales Support Process Includes

Verint Sales and Engineering resources are recommended to assist with the discovery and configuration process, and should be engaged to ensure proper design and sizing. Contacts are listed below and are available for discovery, conference calls, webinars, onsite demos, SOW's, and assistance with the procurement process as well as educational meetings with Motorola staff as requested. A Site Survey Questionnaire (SSQ) is required and can be found in the logging Wiki (link below) which contains the discovery questions that Verint needs to begin the quoting process. Step one to any successful sales process is to involve the appropriate channel manager. Quotes are available within 48 hours of a completed and finalized SSQ. Also, Verint must be engaged to provide a service and maintenance quotation for all equipment orders. ECAT models are for product only, services and maintenance must be quoted separately by Verint and ordered separately by the field team (equipment via COF, services via Tigers, maintenance via SLC).

Verint regional contacts are:

Bryan DeBarry - Account Manager - East (T3, T4)

bryan.debarry@verint.com

770-827-9640

Joe Mabbott - Strategic Account Manager - Feds (T1, T2, T5, Fed Gov't)

joe.mabbott@verint.com

847-344-3829

Matthew Varner - Director, Public Safety (T6, T7, T8, ROW)

matthew.varner@verint.com

512-656-9803

Solution Engineer

Larry Williston - Solutions Engineer

larry.williston@verint.com

203-893-3489

Verint Executive contacts are:

Clark Elmore - Public Safety Practice Leader

clark.elmore@verint.com

847-420-3840

Recorder Packages

Verint Recording for Public Safety V15.2 - Each recorder includes an Audiolog 6000-Series MAX-PRO/Quad-Core server, Intel-PRO/1000GT Dual Port Server Adapter, Server license for V15.2, Motorola P25 enabler, Mounting Rail Kits (4 Post), Insight Center license for replay (one per channel purchased), Internal Storage (up to 75,000 channel hours), dual Blu-ray backup drive, Software (Administrator, etc.). All specifications are subject to change.

General Notes:

1. The Verint V15.2 recorder is quoted by Verint.
2. The Verint solution is certified and hardened for use on the RNI starting with the ASTRO 7.14 release. Non-certified (supported & validated) configurations on CEN based deployments of one or more components is available as customer requirements dictate for pre-7.14 releases.
3. There is no additional charge for search and replay access. Incident Reconstruction software is bundled into the core package (Search & replay workstations are purchased separately).
4. Verint recorder specifics:
 1. Each Verint recorder requires an Archiving Interface Server (AIS)
 2. Verint recorders are priced/configured by talkgroup as opposed to talk path (V15.2 can be quoted as simultaneous calls)
 1. The Verint V15.2 recorder can support up to 650 simultaneous calls per recorder. When recording up to 650 simultaneous calls in one recorder a separate Data Center server is required.
 3. The Verint recorder is not generally used to record telephone inputs. If required, contact Verint to determine feasibility.
 4. If Encryption is required contact Verint for a quote for V15.2
7. UEM monitoring is not currently available for 7.15 or earlier releases. A firewall to the CEN will be required to port logging events outside for external monitoring.
 1. For 7.15 or earlier releases, Verint Audiolog Management Console application is

available for monitoring

2. For 7.16 or later releases, the UEM Toolkit can be used to allow monitoring of the Verint V5 logging recorder in the UEM. V15.2 support will be available in Q3 2019

8. CCSi staging for the solution is available and encouraged where possible.

9. SUA can be quoted by Verint. Solution does not include rack, KVM, UPS, or other environmental components.

10. Contact Verint for quoting of upgrades and expansions of existing systems. The Verint recorders and AIS are certified in Motorola's System Integration & Test (SIT) as part of the system release. The telephony solutions are not certified in ASTRO 25 releases.

11. Due to the size of the logging recorder(s), some customers may desire a cabinet for racking of the equipment. If mounting in a 2 post 19" rack, part number DDN9748A can be ordered. This is a black shelf.

Installation

1. Installation is ordered separately from the ECAT / DQ models. Verint cannot process the equipment order without the services PO (installation/training and maintenance).

2. Verint requests the PO for services / product 8 weeks prior to installation.

3. Equipment can be staged in CCSi, make sure that the Verint sales rep is aware of any staging requirements.

4. A trained Verint technician will install the recorder at the customer site. Installation occurs Monday-Friday 8-5 and includes:

1. Basic training

2. Rack and stack of hardware, installation, and testing

5. In North America, installation is coordinated through the appropriate Verint channel manager who will engage the proper resources to ensure a smooth installation. For geographies outside of North America, engage a Verint Executive contact above.

Warranty & Support

1. All Verint models in ECAT include 24x7 on-site 1st year warranty support.

2. Additional years of support must be ordered separately.

3. Verint requests remote access in order to provide optimal response.

4. Verint warranty starts at time of shipment. It is important to understand this and to work with Verint on any coverage that may be required to cover the delta between Verint shipment and system acceptance.

Upgrades & Expansion

1. Contact Verint for upgrade quotations. Verint does not require an upgrade of the logging recorder for releases 7.7 through 7.15. Verint does need to upgrade the thin client on the

AIS with each release.

2. Pre-7.14 systems can be migrated on the RNI, but additional installation fees may apply.
3. The Verint ASTRO recording system does not need to be upgraded at exactly the same time as the ASTRO release.

Fault Management

1. Verint recorders are not natively fault managed by the UEM. Verint recorders can be monitored via UEM if a customer has the UEM Toolkit for 7.16 or later releases. Please note that there is no NMO monitoring currently available, but it is planned for 2019.

Ordering Process

1. Motorola sales reps will forward the SSQ to Verint Presales
2. Verint presales will review the SSQ and assist in building the ECAT equipment list
3. Implementation services (installation and training) are ordered through iProcurement (formerly Tigers) and Verint will assist in building the SOW with the proper approved templates.
4. Service (Maintenance & Support) is available for order through SLC with a pre-approved SOW
5. DQ quoting process is available for special situations as needed

Lead Time

1. Verint published lead times are 8 weeks from the time the order is received by Verint.

Pricing Exceptions

1. Opportunities above \$500K require a P&L. Please contact Pricing and Profitability.
2. Opportunities \$500K or less require regional approval for all pricing exceptions.

Miscellaneous

1. KVM DSF1DC108H can be ordered. It is a Belkin 19" widescreen LCD rack console (only USB cable compatibility). USB KVM cables are DSF1D940106. The LCD drawer is 1 RU and 8 port KVM switch is 1 RU. The cable connects two PC's per cable. USB only, does not support PS/2 style.

Ordering Information

General Information

For pricing/ordering issues contact the product planner, Tim Martin at tim.martin@motorolasolutions.com.

For technical assistance contact Gary Owens at garyowens@motorolasolutions.com.

For Alive Telecom product information, go to the Alive [website](#) or contact Jim Melia at jmelia@alivetele.com (708-603-6836).

For RFI product information, go to the RFI [website](#), or contact Sean Johnson at sean.johnson@rfiamericas.com or (330-541-6585).

For DBSPECTRA product information, go to the DBSPECTRA [website](#) or contact Sandra Zachmeyer at szachmeyer@dbspectra.com or (972)-841-4893.

NOTE: In the Full Description field below, you will find the vendor part number, any vendor notes associated with that part, and a URL link to a vendor Spec sheet for that item.

COMBINERS](#)

VHF AND UHF TRANSMITTER COMBINERS

This page contains information from MSi preferred vendors, including DBSPECTRA, RFI, and TXRX.

If you want to use equipment from a non preferred vendor, you must go through the Exception Request process (see link to form below).

EXCEPTION REQUEST LINK URL:

https://docs.google.com/document/d/1C34HXeD5mzvDDq9x_e_1gHVexIB2VRtyYzl0tA-wgtg/edit

VHF and UHF combiners are frequency specific. Contact the respective manufacturer for quotes.

If you do not have frequencies you will have a caveat design, when the final frequencies are identified the design and price may change.

CONTACT INFORMATION

For general ordering and vendor information, contact the product planner [Tim Martin](#).

For technical assistance contact the lead RF engineer, [Gary Owens](#).

For information on DBSPECTRA products, go to the [DBSPECTRA](#) portal or contact [Sandra Zachmeyer](#) at szachmeyer@dbspectra.com (469-322-0080).

For information on TXRX products, go to the [TXRX](#) portal or contact [Mike Ryan](#) at MRyan@txrx.com (312-632-9620).

For information on RFI products, go to the [RFI website](#) or contact [Sean Johnson](#) at sean.johnson@rfiamericas.com (330-541-6585).

Data Not Available

DBSPECTRA UHF AND VHF COMBINERS

UHF/VHFcombiners come in many configurations. Below you will find different series of combiners with brief descriptions and links to spec sheets. For more detailed product information, contact the vendor (see Contact Information information above) directly or Tim Martin/Gary Owens.

DS4345 COMBINING SERIES, Requires Tx and rx frequencies when ordering, 148-174MHZ.

http://www.dbspectra.com/specifications/DS4345_Series.pdf

DS4345 COMBINING SERIES - DUAL CAVITY, Requires Tx and rx frequencies when ordering, 148-174MHZ.

[http://www.dbspectra.com/specifications/096000-053.D_\(DS4548D\).pdf](http://www.dbspectra.com/specifications/096000-053.D_(DS4548D).pdf)

DB4348 COMBINING SERIES, 148-160MHZ AND 160-174MHZ.

http://www.dbspectra.com/specifications/DB4348_Series.pdf

DB4368 COMBINING SERIES, Requires Tx and rx frequencies when ordering. 350-512MHZ

http://www.dbspectra.com/specifications/DB4368_Series.pdf

DB4368 (Public Safety Best Practices) COMBINING SERIES, Requires Tx and rx frequencies when ordering. 450-470MHZ

VHF CONTROL STATION ANTENNAS

This page contains parts information for MSI preferred vendors including Alive Telecom, Amphenol Procom, RFI, and DBSPECTRA.

For non preferred vendors, contact the vendor directly. You will need an approved Exception Request to use antennas from a non preferred vendor. See link below.

https://docs.google.com/document/d/1C34HXeD5mzvDDq9x_e_1gHVexIB2VRtyYzl0tA-wgtg/edit

ORDERING INFORMATION

For pricing/ordering issues contact the product planner, Tim Martin at tim.martin@motorolasolutions.com.

For technical assistance contact Gary Owens at garyowens@motorolasolutions.com.

For Alive Telecom product information go to the Alive [website](#) or contact Jim Melia at jmelia@alivetele.com (708-603-6836).

For Amphenol Procom product information, go to the Amphenol Procom [website](#) or contact Kim Bramsgart at kb@amphenolprocom.com (815-218-8000).

For DBSPECTRA product information, go to the DBSPECTRA [website](#) or contact Sandra Zachmeyer at szachmeyer@dbspectra.com or (972-841-4893).

For RFI product information, go to the RFI [website](#), or contact Sean Johnson at sean.johnson@rfiamericas.com or (330-541-6585).

NOTE: In the Full Description field below, you will find the vendor part number, any vendor notes associated with that part, and a URL link to a vendor Spec sheet for that item.

Futurecom Systems Group, ULC is committed to offering quality products and service and greatly appreciates your continued business and support.

NEW DECEMBER 2, 2019:

Please note, orders cannot be on hold indefinitely on FUTURECOM SYSTEMS. If required information (supplemental form) is not received within 60 days of the PO receipt date, the PO will be cancelled from Futurecom's system.

Futurecom's production queue has reached capacity to ship orders in Q4 2019. All new orders will be scheduled with the best possible ship date in Q1 2020, based on material availability and production capacity at the time of an order. The standard delivery lead time for all Futurecom products (DVR, VRX1000, PDR8000, SLIM) is 10-12 weeks.

NEW! The APX mobile platform is now fully certified for integration with the VRX. Please note the new ordering options required to distinguish APX Single Band and Dual Band applications.

When operating in system mode, the DVR utilizes a special interface between its host mobile in the following configurations:

APX

- Remote Mount APX 4500 (O2 CH), APX 6500 or APX 7500 with O2, O3, O5, O7, or O9 control heads
- Transportable configurations are not available with VRX1000.
- APX mobiles must be configured with the DVR MSU Activation option GA00631 when used as the host for the DVR.

General Ordering Information:

- One mobile Operation Mode options is required for all In-Band and Cross-Band VRX models
- Subscriber units must be loaded with the most current version of software to enable all VRX features.
- APX Portable Radios operating through a VRX utilizing the enhanced DVR digital feature set, require subscriber option QA00631. No special option is required for XTS Portable Radios.
- The VRX programming software (called Tweaker) is compatible with Windows 2000, XP, and Windows 7. Vista and Windows 8 have not been certified.
- Standard lead time for this product is approximately 10 weeks upon approved orders - See ordering requirements below.
- Vehicular Mount (Side-by-Side) units can be ordered with the VRX-to-Mobile cable from 3-25 ft in length. Please specify this value in the order entry process.

For questions regarding appropriate VRX equipment lists or verifying frequency plans, you may contact Futurecom Systems Group directly at: sales@futurecom.com or 1-800-701-9180 (ask for DVR Sales Support)

The Ordering Guide link above gives a pictorial view of how the VRX needs to be isolated from the accompanying mobile. To prevent interference between the two devices, a certain amount of frequency separation is required. In-Band VRX orders require a manual validation step by the vendor to verify that the frequency plan can be accommodated by the standard VRX models listed below.

IMPORTANT NOTE: To ensure that the VRX solution will function properly once fielded, all VRX orders must be validated prior to manufacturing. The form linked below is required to complete this step in the sales process for all VRX orders, AND is required before any In-Band VRX model is released from E3 hold. [DVR Supplemental Frequency Information Form](#)

IMPORTANT NOTE: FUTURECOM DOES NOT HOLD INVENTORY, THERE ARE LEAD TIMES FOR THE SPECIFIC ITEMS, IF A SUPPLEMENTAL FORM HAS NOT BEEN FILLED OUT WITH FREQS REQUIREMENTS, THIS WILL IMPACT DELIVERY OF ORDERS. FUTURECOM WILL DO THEIR BEST TO EXPEDITE, BUT IN SOME CASES THE DELIVERY IS BASED ON THEIR SUPPLIER'S ABILITY TO DELIVER, ESPECIALLY IF IT IS A CUSTOM FILTER ORDER. PLEASE BE AWARE THAT FILTER MANUFACTURING AND HAND TUNING IS A LABOUR INTENSIVE PROCESS THAT WILL NOT BEGIN UNTIL THE EXACT FREQS. ARE KNOWN.

NOTE: For Delivery outside of US/Canada, please contact Futurecom for delivery schedule prior to placing order.

Configuration

Section A: Required Main Model and Options

For standard Radio Operation Steps 1 - 6

PLEASE READ ALL OPTION DESCRIPTIONS BEFORE MAKING YOUR SELECTION

1: Main Model (Must Select One)

Description	Full Description	Nomenclature	APC	Price
VRX1000 - UHF 380-430/450-512 MHZ	***THIS UNIT WILL NOT BE SHIP ACCEPTED UNTIL 2ND HALF OF 2015*** Includes Power Cable, Analog Conventional Operation, Standard 3 ft control cable (Mobile Radio to VRX), Mounting Bracket. Requires either TT05715 or TT05716 be ordered with Model.	TT2793	571	\$3,350.00
VRX1000-7/800 769-775/851-869 MHZ	Includes Power Cable, Analog Conventional Operation, Standard 3 ft control cable (Mobile Radio to VRX), Mounting Bracket. Requires either TT05715 or TT05716 be ordered with Model.	TT2794	571	\$3,350.00
VRX1000 - VHF 136-174 MHZ	***THIS UNIT WILL NOT BE SHIP ACCEPTED UNTIL 2ND HALF OF 2015*** Includes Power Cable, Analog Conventional Operation, Standard 3 ft control cable (Mobile Radio to VRX), Mounting Bracket. Requires either TT05715 or TT05716 be ordered with Model.	TT2792	571	\$3,350.00

2: Operation Mode (Must Select One)

Description	Full Description	Nomenclature	APC	Price
DVR/VRX FOR USE WITH SINGLE BAND APX MOBILE	A mobile operation option is required for all In-Band and Cross-Band units. Software is loaded accordingly in the DVR. XTL capability is not-compatible with APX mobiles and vice-versa. Please select accurately. Use this option for single band APX mobiles OR dual-band capable APX mobiles that are only utilizing one band.	TT05715AA	571	\$0.00
DVR/VRX FOR USE WITH DUAL BAND APX MOBILE	A mobile operation option is required for all In-Band and Cross-Band units. Software is loaded accordingly in the DVR. XTL capability is not-compatible with APX mobiles and vice-versa. Please select accurately. Use this option for dual-band capable APX mobiles that are utilizing both bands.	TT05716AA	571	\$0.00

3: System Enhancement Software

Description	Full Description	Nomenclature	APC	Price
ADD: P25 PHASE 1 OPERATION	Adds P25 Digital Capability	TT05951AA	571	\$1,560.00
ADD: P25 ENHANCED TRUNKING FEATURES	Adds enhanced trunking feature set capabilities. Requires Digital Operation (TT05951AA) on VRX1000. APX Portables should have the Enhanced PSU DVRS Option (QA00631).	TT05953AA	571	\$1,680.00
ADD: P25 ENCRYPTION	Adds the ability to pass Digital Encryption. Requires Digital Operation (TT05951A)	TT05952AA	571	\$454.00

4: In-Band Options

Description	Full Description	Nomenclature	APC	Price
ADD: VRX1000 - IN-BAND FILTER KIT PLAN A - 7/800 (769-775/851-869)	For Plan 'A'. Comes Standard with Flat Mount Hardware. If you need stacked mount hardware order kit TT05955AA.	TT05949AA	571	\$2,150.00

ADD: VRX1000 - IN-BAND FILTER KIT PLAN B - UHF (380-430/450-512)	For Plan 'B'. Comes Standard with Flat Mount Hardware. If you need stacked mount hardware order kit TT05955AA.	TT05948AA	571	\$2,150.00
ADD: VRX1000 - IN-BAND FILTER KIT PLAN B - VHF (136-174)	For Plan 'B'. Comes Standard with Flat Mount Hardware. If you need stacked mount hardware order kit TT05955AA.	TT05946AA	571	\$2,150.00
ADD: VRX1000 - IN-BAND FILTER KIT PLAN A - VHF (136-174)	For Plan 'A'. Comes Standard with Flat Mount Hardware. If you need stacked mount hardware order kit TT05955AA.	TT05945AA	571	\$2,150.00
ADD: VRX1000 - IN-BAND FILTER KIT PLAN B - 7/800 (769-775/851-869)	For Plan 'B'. Comes Standard with Flat Mount Hardware. If you need stacked mount hardware order kit TT05955AA.	TT05950AA	571	\$2,150.00
ADD: VRX1000 - IN-BAND FILTER KIT PLAN A - UHF (380-430/450-512)	For Plan 'A'. Comes Standard with Flat Mount Hardware. If you need stacked mount hardware order kit TT05955AA.	TT05947AA	571	\$2,150.00

General Information

Watson Furniture

The Motorola/Watson Value Proposition

Full Solution Offerings - Customer Satisfaction - Log Credit

Why should you propose Watson furniture to your customer:

Watson Dispatch provides a broad range of console furniture, equipment, and accessories to meet the needs of communication centers and projects.

No headaches - Watson performs the work while you sell the customer. Watson offers a no-hassle sales process with field support from certified Rep firms throughout the US. After the sale is completed, Watson installs the furniture and maintains it under a 3 year comprehensive warranty - making sure the customer is satisfied with the purchase.

Sales Relationship History

Motorola and Watson sales have yielded over \$30 million in revenue, 500 installed sites, and includes hundreds of satisfied customers!

Look at some quotes from Motorola sales representatives and MR's regarding the Watson product:

- "The ability to have a Watson rep actually do the measurements and forms allows a speedy and accurate request for drawings and quote with little involvement from the Account Manager. Watson has been superb in turning these projects around in a timely fashion. Not only are there extra log dollars, but we control the entire installation of our console with the other vendors involved."

- Jack Fay on working with Watson

- "The detail is huge for an order like this. Watson did a wonderful job!"

- Eric Olson on Motorola Test Facility, Boulder, CO

- "Watson provided warranty repair in Santa Fe... This repair required a two day on site effort, new parts and refurbishing existing installed furniture, at no cost to the customer... resulting was a follow on sale even bigger than the initial installation."

- Dieter Schmidt on Santa Fe, NM

- "I have always had success selling Watson because their product and services are extremely high quality. When I ask for a quote they get it to me quickly and accurately. They produce the furniture in a timely manner, it is installed without problems, the customers love it and it looks great. I walk away with a happy customer and no problems from the sale!"

Communications, NC

Watson Sales Support Process Includes:

- Site Visit & Survey Form Completion
- Room Measurements
- Technology Evaluation
- CAD/Space Planning
- Quotation
- Installation Date Coordination
- Product Pre-building at Factory
- Delivery and Installation Coordination
- End User Training
- Excellent Customer Service and Support
- Post-sale Visits

Setting the industry standard, Watson Dispatch offers extremely high-quality dispatch console furniture, unique storage solutions, and a range of conferencing, administrative, and private office furnishing. SYNERGY is a complete family of products designed to enhance the entire communication center. It combines unparalleled structural integrity, full sit-to-stand ergonomic adjustability, improved environmental controls, easy technology access, power, voice, and data integration and simple, logical, effective wire management. Full-cavity designs stabilizes all movable and fixed surfaces. The "wedge" design includes a vertical interconnect for routing cables and wiring from the work surface to the electronic devices in the cavities. Easy technology access is achieved by pull out shelves either front or rear of console.

Watson's Total Comfort System (TCS) integrates all ergonomic adjustments and environmental controls into a single device, SPI (Single Point Interface), which encompasses major improvements in the crucial arena of telecommunicator comfort. Modular air circulation is provided by one to three quiet, yet powerful, repositionable fans that require no ducting. User adjustability and control of the console via the SPI allows users to replicate the sit-to-stand function at all positions.

Competitive Differentiator

Many competitors claim a limited life-time warranty, but the small print reveals 90 day coverage on electrical, one year on motors, etc. Watson's 3 year warranty is comprehensive and provides customers with investment protection.

Ordering Requirements

Ordering Instructions:

1. Motorola sales rep or MR contact a Watson sales coordinator for an initial consultation. Watson reps assist in gathering information from the clients, measuring the rooms, assimilating the inventory, and supplying scale drawings from a project manager assigned to the customer.
2. Watson will generate a quotation using Motorola list (DNUP) pricing based on the customer requirements.
3. Once the customer signs off on the drawings and color selections, Watson will provide the dropship product manager with quotations and signed documents. At that time the product manager will create a Motorola DQ model number in COF. Please note that services and freight are not included in the DQ model. These should be ordered through Tigers.
4. All Sales & Distribution questions should be directed to Mike Palmer.

WAVE Tactical

WAVE Tactical

WAVE Tactical is a communications interoperability and broadband push-to-talk (PTT) solution that delivers real-time voice and data securely over any network using any device. From two-way radios to smartphones, laptops to landlines, tablets to rugged handhelds, users can use the devices they already have and the networks they already subscribe to and PTT with other teams and individuals both inside and outside of their communication system.

WAVE website: <https://sites.google.com/motorolasolutions.com/wave-5000/wave-5000>

Extend Radio to Broadband: Extend workforce communications beyond radio to include modern devices and broadband networks for seamless communications in any location.

Deploy Broadband PTT: Secure, 'over-the-top' PTT connecting smart devices over 3/4G LTE and WiFi networks delivers greater choice and flexibility when choosing a non-radio, carrier-independent communications solution.

Connect Radio to Radio: Connect multiple, disparate two-way radio systems and remove barriers to communication interoperability and workforce collaboration.

Customer Responsible Prerequisites

Starting in WAVE 5.12, the TLS (Transport Layer Security) 1.2 standard is being utilized to provide enhanced security to all communication between servers and the mobile and web communicators. This enhanced security requires the WAVE Management Server and WAVE Proxy Servers to have a Fully Qualified Domain Name (FQDN) as well as the usage of certificates to facilitate TLS. Some customers may already possess an environment what utilizes

certificates and have the ability to provide a FQDN and the appropriate certificate(s). Depending on the security requirements of the customer, certificates can be in the form of a wildcard certificate, named certificates, or self-signed certificates. Customers that do not possess this environment can obtain wildcard and named certificates from a certificate authority for an annual subscription fee. A list of certificate authorities that provide certificates can be found at https://en.wikipedia.org/wiki/Certificate_authority. A wildcard certificate can be used on all Management and Proxy servers whereas separate certificates are required for each server if named certificates are used with the benefit of the highest level of security being provided. A customer can utilize a self-signed certificate, if desired, to avoid annual subscription fees with the knowledge that there are security and deployment tradeoffs with such an approach. Thus, prior to installation of WAVE 5.12, the customer must obtain or be able to provide the following:

- A Fully Qualified Domain Name for the WAVE Management Server
- One of the following:
 - A wildcard certificate to be used on the WAVE Management Server and all WAVE Proxy Servers in the form of either:
 - A certificate provided by a certificate authority (PREFERRED)
 - A self-signed certificate (DISCOURAGED)
 - Named certificates for the WAVE Management Server and each WAVE Proxy Server in the form of either:
 - Certificates provided by a certificate authority
 - Self-signed certificates (HIGHLY DISCOURAGED)

Ordering Information

WAVE ARUS Overview

All WAVE Tactical quotations must include a minimum of one year of ARUS (Annual Release and Update Subscription) as a required component for each chargeable option.

ARUS provides software updates and support for the quoted number of years and is the software maintenance component of WAVE Tactical. ARUS only applies to WAVE Tactical software items and is not charged on hardware or non-WAVE Tactical software. Additional information on ARUS can be found on the WAVE Tactical Google site:

<https://sites.google.com/a/motorolasolutions.com/wave-5000-release-resources/>

The price of ARUS is based upon the price of the software items purchased. Discount levels applied to the software item are applied to the ARUS associated with that software item and are not to be discounted further.

NOTE: ARUS - 1 YEAR Options are NOT available through OMAR-R12 for the EMEA region. A minimum of 2 years of ARUS is required.

The WAVE 5000 Ordering Guide is available on the enclosed compass link and is updated regularly:

<https://sites.google.com/a/motorolasolutions.com/wave-5000-release-resources/pricing-and-quoting/wave-5000-global-ordering-guide>

WAVE 5000 Release 5.10 System Planner (Dec 2016 release) for ASTRO 25, Dimetra, and MOTOTRBO Capacity Plus:

<https://drive.google.com/open?id=0BwfV63okeso0OTMzZI9iWFFPb00>

NEW orders for WAVE Tactical are placed via CPQ. Please review system components and requirements in the ordering guide for WAVE Tactical before you place your order: https://docs.google.com/document/d/1kKpjfMeJabPrI_6D2K_QvOrwX2zKNVeRaXSDhEjzKlC/edit#

Expansions

Expansion orders cannot be processed without the following pieces of information:

1. End Customer Name
2. E-mail Address
3. Serial Number

The email address is required to enable the updated WAVE Tactical software license key to be emailed upon order fulfillment. The serial number of the customer's existing WAVE Tactical system is required to ensure proper licensing quantities are updated. The serial number can be found using the following procedure:

1. Log in the WAVE Management Server as Administrator
2. Navigate to the System Menu and choose System Settings.
3. In the Licensing section at the top of the page, locate the Serial Number field. The serial number has the following format: XXXX-XXXX-XXXX-XXXXXXXX-XXXX-XXXX-XXXX.

The serial number that is entered into the order is the Serial Number with any dashes and spaces removed resulting in 32 characters for non-EMEA orders. For EMEA orders the complete serial number, including dashes, is to be entered resulting in 38 characters.

WAVE 7K Server

Ordering Information

Features

WAVE 7K Server supports:

- PTT Call Processing
- PTT Enterprise Management
- Database for Broadband Subscribers
 1. Up to 10,000 broadband subscribers
 2. Up to 5,000 broadband provisioned talk groups

General Information

PURPOSE AND SCOPE

To provide WAVE 7000 orderability instructions and part numbers.

WAVE 7000 Server is available for ordering.

The WAVE 7K Application Client for L10 international (Android KitKat 4.4.4) is available. WAVE 7K Application Client is distributed from MSI Device Manager. Subsequent software updates are managed via MSI Device Manager.

If you have questions pertaining to details of the software client download, please send email to [Ranjit Pradhan](#)

WAVE 7K General Feature Information

Intuitive Interface

- User programmable scan lists
- Nuisance Delete
- Presence info
- Call Log & Favorites
- Easy audio controls
- Widgets and carousels
- Client UI supports English by default, and Arabic, Hebrew, Portuguese (optional languages)

Call Capabilities

- Talkgroup Call
- Priority Scan
- Late Join / Re-Join
- Private Call
- Individual Alert Call
- Personal Group Call
- Ad Hoc Group Call
- Presence Status
- Floor Revoke for Denial of Service prevention
- Broadcast Call
- Secure PTT (FIPS hardware encryption): requires CryptrMicro hardware on device
- Server Geo Redundancy (optional)
- Interoperability with ASTRO 25

Best in Class Audio

- P25 vocoder, AMR-WB vocoder
- Device specific audio tuning

Ordering Requirements

1. To order WAVE 7K SERVER (SQM01SUM0298)
 - Order SQM01SUM0298 quantity 1 along with required server capacity. (You must order at least one of the capacity bundles. Multiple bundles can be selected.)
 1. WAVE 7K SERVER CAPACITY LICENSE BUNDLE OF 100
 2. WAVE 7K SERVER CAPACITY LICENSE BUNDLE OF 500
 3. WAVE 7K SERVER CAPACITY LICENSE BUNDLE OF 1500
 4. WAVE 7K SERVER CAPACITY LICENSE BUNDLE OF 2000
 5. WAVE 7K SERVER CAPACITY LICENSE BUNDLE OF 5000
 6. WAVE 7K SERVER CAPACITY LICENSE BUNDLE OF 10000
2. To order WAVE 7K USER ACCESS LICENSE (T8332) - One must know beforehand if Interoperability with ASTRO 25 is desired by the customer or not. If known, proceed.
 - If interoperability with ASTRO 25 is NOT desired, then please order the desired quantity from the following bundle(s). Multiple bundles can be selected:
 1. WAVE 7K ACCESS LICENSE BUNDLE OF 100
 2. WAVE 7K ACCESS LICENSE BUNDLE OF 500
 3. WAVE 7K ACCESS LICENSE BUNDLE OF 1500
 4. WAVE 7K ACCESS LICENSE BUNDLE OF 2000
 5. WAVE 7K ACCESS LICENSE BUNDLE OF 5000
 6. WAVE 7K ACCESS LICENSE BUNDLE OF 10000
 - If interoperability ASTRO 25 IS desired, then please order the desired quantity from the following bundle(s). Multiple bundles can be selected:
 1. WAVE 7K ACCESS LICENSE WITH AMBE-100
 2. WAVE 7K ACCESS LICENSE WITH AMBE-500
 3. WAVE 7K ACCESS LICENSE WITH AMBE-1500
 4. WAVE 7K ACCESS LICENSE WITH AMBE-2000
 5. WAVE 7K ACCESS LICENSE WITH AMBE-5000
 6. WAVE 7K ACCESS LICENSE WITH AMBE-10000
3. To order WAVE 7K_ASTRO P25 WIRELINE INTEROPERABILITY LICENSE (T8333) - One must contact Product Management ([Ranjit Pradhan](#)) before placing orders.
 - NOTE: Bundle options are mutually exclusive.

4. To order additional Server Capacity - Order WAVE 7K SERVER CAPACITY LICENSE (T8331) quantity 1 along with appropriate quantity of capacity bundle(s).
 - NOTE: For Greenfield WAVE 7K Orders, you already bought WAVE 7K SERVER (SQM01SUM0298) with Capacity bundle(s).
5. **Secure PTT License** - If you would like additional information on the secure PTT feature and pricing, please send email to ([Ranjit Pradhan](#)).
6. Consult ([Andre Salame](#)) in Product Management to order Extreme Routers for the WAVE 7K implementation.

JUMP TO ...[MODEL](#)[ORDERING INFORMATION](#)[CONFIGURATION](#)[SOFTWARE & SERVICES](#)[SHIP CARD](#)**Model****WDE1000 & WDE1100 - 4.9/2.4 GHz
Wireless Device Enabler****Ordering Information****General Information**

The WDE (Wireless Device Enabler) series addresses the wireless mobility needs of public safety customers in the broadband data market. The WDE1000 PCMCIA CardBus and WDE1100 Mini-PCI cards support 802.11a at 4.9 GHz licensed spectrum and 802.11b/g at 2.4 GHz unlicensed spectrum. The devices allow users to connect portable products to the MOTOMESH™ wireless broadband network operating at both 2.4 GHz and 4.9 GHz, bands. Moreover, they provide customers with a rugged, high performance alternative to typical PC wireless card devices.

Features

The following are primary features offered by the WDE1000 and WDE1100:

- 802.11a in the licensed 4.9 GHz band, to be used with Motorola MOTOMESH™ platform
- 802.11b/g in the unlicensed 2.4 GHz band, to be used with standard off the shelf WiFi AP's and the MOTOMESH™ platform

- Standard PCMCIA CardBus (WDE1000) and Mini-PCI (WDE1100) 32 bit interface
- Burst data rate of up to 54 Mbps
- 100 mW average output power in the 4.9 GHz band and 63mW in the 2.4 GHz band
- Diversity antenna connectivity for a wide coverage area
- Integrated high performance antenna (WDE1000 only)
- Ability to form peer-to-peer ad-hoc single-hop networks
- Selectable 5, 10, & 20 MHz Channel Bandwidths in the 4.9 GHz band
- Designed for outdoor rugged operation at –30 to +60°C
- Host driver for Windows 2000 (SP4), Windows XP (SP4), and Windows XP Tablet (SP2) operating systems
- Client utility application for user friendly activity monitoring via a system tray icon and user profile configuration
- Operability in BSS (Infrastructure) mode and IBSS (Ad-hoc) mode for incident scene communications where network access is unavailable
- Power management in infrastructure mode to increase battery life
- Security modes: WEP, AES, TKIP
- Authentication: Open, PEAP (EAP-MSCHAP V2), TLS, TTLS (802.1X Infrastructure/Client)
- Switch from 4.9 GHz to 2.4 GHz networks and vice-versa (manually) through the Motorola Client Utility application

The standard components included with this model are listed in the following high level BOM:

- 1 WDE1000 PCMCIA CardBus or WDE1100 Mini-PCI Card
- 1 Quick Reference Card for installation instructions at-a-glance
- 1 CD ROM containing Motorola Client Utility software, Host driver, and User Guide

Ordering Requirements

All orders must be entered into the Customer Order Fulfillment (COF) system.

Please consult <http://motomesh.comm.mot.com> to gain access to the System Planner document, system configuration tool(s), FAQ list, and other support documentation that is relevant to the MOTOMESH™ solutions prior to ordering.

Visit the MOTOMESH price pages for ordering network equipment:

[MOTOMESH Network Equipment](#)

Motorola rugged laptop ordering information can be found at:

ML900 Rugged Laptop

The following process outline should be followed when ordering a WDE1000 PCMCIA card or WDE1100 Mini-PCI card:

Step 1 - Order WDE1000 or WDE1100: Wireless Device Enabler: Order one WDE1000/1100 model for each of the portable devices that you plan to connect to the 2.4GHz / 4.9GHz network.

Note: The WDE1100 is designed for installation in an internal Mini-PCI slot - be sure to confirm compatibility. The WDE1000 fits into a standard PCMCIA slot.

WDE1000/1100 Model Contents

- 1 WDE1000/1100 Card
- 1 Quick Reference Card for installation instructions at-a-glance
- 1 CD ROM containing Motorola Client Utility software, Host driver, and User Guide

Step 2 – Software: Verify that the customer has a SWK7024 4.9 GHz 802.11 Enabler

option (TT04573AA) to turn on the 4.9 GHz side of their MOTOMESH MWR7300 or IAP7300, if they plan to immediately utilize the 4.9 GHz side of the WDE1000 card.

Step 3 - Service and Technical Support: Review customer needs for technical support and order as required. Service can be ordered directly through the Customer Support Manager. Contact your regional business service BDM to arrange for a quotation.

Step 4 - Training: Professional training classes for MOTOMESH and WMB are offered and conducted by Motorola's Worldwide Learning Services group. Contact Worldwide Learning Services at 847-538-7999 to obtain information about the training session offerings.

Configuration

Models

NOTE: For an order that includes more than 25 WDE1100 or WDE1000 cards, please see your Business Development Manager for special pricing. For large quantity orders of 18 or more WDE1100 or WDE1000 cards, order the Bulk Packaging option: ZA00568AA.

Options

Order the following option if you are buying 18 or more WDE1100 cards and would like them to be packaged in bulk rather than individual boxes:

Software & Services

Service

The WDE1000/1100 Standard 1 Year Warranty is included with the product and includes 8X5 technical support, software updates to address defect repair issues, and depot unit repair.

Non-warranty service and support can be ordered directly through your Customer Support Manager. Contact your regional business service BDM to arrange for a quotation.

Wireless Switches and Access Port

RF7000

Robust, scalable features for demanding enterprise networks

Designed for large scale, high bandwidth deployments, the RFS7000 Wireless Switch from Motorola provides robust, highly scalable support for seamless enterprise mobility. Motorola's Wi-NG architecture, optimized for enterprise mobility and multimedia applications, simplifies network deployment and management, provides superior performance, security and scalability, and supports emerging RF technologies. Built on this platform, the RFS7000 enables campus wide roaming across subnets, and offers powerful failover capabilities, exceptional quality of service (QoS) and increased voice capacity. Integrated security features include intrusion detection and protection, secure guest access and protection against denial of service attacks.

Raising the bar on enterprise-class performance

Taking advantage of multicore/multithreaded architecture, the RFS7000 is intended for large scale, high bandwidth enterprise deployments. It is designed to handle from 8,000 to 50,000 mobile devices, up to 256 802.11 dual-radio a/b/g access ports, up to 2500 dual radio a/b/g APs in a cluster and it will support upcoming 802.11n access ports. Failover capabilities and cluster management provide high availability, ensuring an "always-on" network. Whether your business requires wireless deployment across multiple buildings, high-capacity systems or deployment in large public access areas, the RFS7000 delivers it – efficiently and securely.

Converged RF management for cutting-edge enterprise mobility

In addition to providing enterprise-class performance, the RFS7000 is designed to support seamless mobile access to multiple RF networks, with the exceptional security and manageability that you've come to expect from Motorola.

Interfaces to locationing systems simplify asset tracking throughout your network, while Layer 3 roaming and external fixed/mobile convergence (FMC) solutions allow personnel to seamlessly roam from subnet to subnet, and from cellular to Wi-Fi networks. When used in concert with enterprise class application-intensive Wi-Fi handheld devices, the RFS7000 enhances fast roaming capabilities.

The RFS7000 provides comprehensive network security features that maintain constant

compliance of HIPAA and PCI standards, including integrated MAC-based authentication, intrusion detection, AAA/Radius server (for WPA/WPA2 termination on the box) and hotspot provisioning capabilities for secure guest access. The stateful packet inspection firewall offers protection against denial of service attacks while optimizing network traffic.

[More information on the RFS7000](#)

WS 5100

Wireless Switch WS 5100 is the high capacity (10x) version of the WS5000 with the same hardware and software architecture. Ideal for Medium to Large enterprises that need enterprise class security, management and availability. This is an overlay Wireless Switch solution that uses a "Centralized-intelligence" model with the WS 5100 in the core or distribution layer and access ports at the access layer to provide 802.11 (Wi-Fi) coverage.

High Performance Overlay Wireless Switch

Moving at the speed of business

The WS 5100 Wireless Switch provides enhanced support for enterprise mobility and multimedia applications, as well as increased security and manageability. Based on Wi-NG (Wireless Next Generation) architecture, the WS 5100 enables seamless campus-wide roaming, more robust failover capabilities, enhanced security, improved mobile client battery life, and increased voice capacity. Robust security features include integrated intrusion detection, an IPSec VPN gateway, and secure guest access provisioning. Automatic configuration and firmware updates, built-in process monitors, troubleshooting tools and a simple user interface make network deployment and management easy.

Robust enterprise mobility

Business needs should dictate network coverage, not the other way around. That's why the WS 5100 allows you to deploy "thin" access ports in Layer 3 network designs, and enables campus-wide roaming of mobile clients across Layer 3 boundaries - without requiring additional client software or hardware. Used in concert with handheld devices, the WS 5100 further enhances the fast roaming capabilities and extends client battery life. WMM (Wi-Fi Multimedia) with "power save" extensions also provides additional voice capacity. Supporting mobile workers has never been so easy. End-to-end layered security.

The WS 5100's comprehensive security includes integrated features such as intrusion detection, and IPSec VPN gateway, AAA/Radius server (for WPA/WPA2 termination on the box) and "hotspot" provisioning capabilities for secure guest access. The stateful packet inspection firewall offers protection against denial of service attacks while optimizing network traffic. With support for the wireless security standards of today and the ability to easily upgrade to tomorrow's standards, the WS 5100 delivers true value.

[More information on the WS5100](#)

WS 2000

Meet the needs of your smaller office with this market-leading integrated wireless and wired switch

The WS 2000 Wireless Switch is a market-leading powerful all-in-one solution that simplifies and reduces the costs of managing wired and wireless (802.11a/b/g) networks in enterprise

branch offices. The integrated router, gateway, firewall, Power-over Ethernet (PoE) and more eliminate the cost of purchasing and the complexity of managing multiple pieces of equipment. WS 2000 v2.1 introduces more value added functionality including support for Wi-Fi Multimedia extensions (WMM) that enables the WS 2000 to provide peak performance for even the most demanding voice and video applications and secondly, support for secure public wireless internet access (Hotspot). The ability to easily and cost-effectively scale to meet growing needs, as well as upgrade to support new security, radio and other standards provides the assurance that the WS 2000 will meet your needs today and tomorrow. The WS 2000 - enterprise class networking functionality, priced for the small to medium-sized business or enterprise branch office.

AP 300 802.11a/b/g Access Ports

Low-cost next-generation access point for powerful enterprise-level wireless LAN manageability and scalability

AP300 delivers rich 802.11a/b/g connectivity working in conjunction with wireless switches as the point of connection between your mobile devices and your wireless LAN. This thin next-generation access point is a low-cost device that is centrally and remotely managed through a wireless switch. Rapid configuration and the ability to quickly and easily upgrade the devices to support new functionality, feature and security protocols substantially reduces the cost of deploying, implementing and managing your wireless LAN, while significantly increasing features, functionality and security of your wireless LAN infrastructure.

Access Points

AP-5181's

802.11a/b/g outdoor MESH access point for near indoor coverage around and in between buildings

Rugged enterprise-class access point designed for harsh environments: Motorola's AP-5181 Access Point, specifically designed for outdoor use, delivers wireless networking in harsh environments. In addition to a NEMA 4X-modified housing, severe weather features include integrated lightning arrestors, surge protectors, extreme temperature range operation and an array of antenna and power accessories. The self-assembling, self-healing mesh capability supports Wi-Fi multimedia (WMM) extensions to ensure quality of service (QoS) while cost-effectively extending corporate networks beyond and between buildings — with no need to install additional Ethernet cable or fiber. With integrated router, firewall, DHCP, AAA and hotspot services, the AP-5181 offers a superior outdoor WLAN solution.

Extend the reach of your corporate network — cost-effectively: When used as either an access port or a mesh node, the AP-5181 can operate wirelessly, even in harsh conditions. Outdoor applications don't mean sacrificing security or manageability — support for today's standards-based security protocols helps ensure enterprise-level network protection, while a wide variety of administration options provides simple, yet powerful management tools. Because the AP-5181 operates wirelessly, all of this can be implemented outdoors without the added cost of installing network cable or fiber.

Mesh networking creates a flexible, easily-managed network: Using its mesh capability, the dual-radio AP-5181 can connect to other access points for data backhaul while providing network access to local users. Enabling an array of applications, from simple point-to-point bridges connecting two wired networks to complex multi-node, multi-link networks, this feature offers a simple way to extend the network to outdoor or remote locations. The self-

assembling and self-healing aspects of a mesh network make the network flexible and easy to manage. This, combined with the straightforward configuration interface, makes deploying and maintaining a secure wireless network of access points almost effortless.

Engineered to withstand the elements: Because the AP-5181 was specifically designed for outdoor use in harsh conditions, it can withstand wind, rain and extreme temperatures. It comes standard with integrated lightning arrestors and

AP-5131's

Secure enterprise-class networking for branch offices, remote and outdoor locations, and small businesses - in a single device

The AP 5131 delivers convenient, flexible, scaleable and cost-effective enterprise-level wired and wireless networking for a variety of business applications. Remote employees in branch offices, small businesses, and telecommuters working from home enjoy secure connectivity to the Internet, corporate private networks and more from desktops, laptops and other mobile devices. Enterprise users can take advantage of the AP 5131 Access Point's mesh features to extend corporate networks to difficult-to-cable-areas - both indoors and outdoors.

Simple to deploy, this all-in-one-solution offers 802.11a/b/g wireless networking flexibility, the latest wired and wireless security standards, and the speed required to support the most demanding applications - including voice and video. The AP 5131 has been engineered for rugged durability in nearly any environment, while being easy to manage either locally or remotely, making it the ideal total networking solution for both smaller and difficult-to-cable locations.

Client Solutions

CB 3000 Client Bridge

Extend affordable and secure 802.11a/b/g wireless connectivity to multiple Ethernet devices - including cash registers, scales, time clocks and more

CB 3000 Client Bridge provides affordable and reliable wireless connectivity for Ethernet devices that do not have a PC or PCI card slot. Connect everything from printers, scales and medical equipment, to manufacturing machinery, bar code readers, time clocks, cash registers and other data collection devices via an RJ-45 port. This cost-efficient connection point can support up to 16 wireless clients via an Ethernet hub. And advanced security capabilities protect your traffic from being deciphered and your network from unauthorized access.

Compact Flash Card

The Wireless Networker Compact Flash card delivers 802.11b wireless connectivity to today's pocket PCs, PDAs, computers and embedded equipment with CF sockets or CF-to-PC card adapters.

Management Solutions

Wireless IPS Sensor License

Next-generation split intelligence architecture proactively protects your wireless network,

mobile devices and traffic from attacks and unauthorized access.

Wireless Intrusion Protection System (IPS) is the choice for around-the-clock protection, guarding you 802.11a/b/g wireless network infrastructure, client devices and traffic from a wide variety of threats, and providing the monitoring capability to ensure peak WLAN performance every day. Attacks and unauthorized access to the network are reported in real time to enable immediate response to threats. Network vulnerabilities are also identified, enabling correction before potential security issues arise. And the latest technology innovations provide an architecture that is scalable, simple to deploy, and easy to upgrade; delivering outstanding investment protection and lowered overall cost of ownership to the customer.

Wireless Intrusion Protection System (IPS) provides location tracking, standard compliance reports, and around-the-clock security for 802.11a/b/g wireless networks, identifying attacks, rogues, and network vulnerabilities.

RF Management Software

Speed planning and monitoring of your Wi-Fi network

Empower network administrators with the ability to plan, manage, troubleshoot and monitor your Wi-Fi site from centralized easy-to-use browser-based application.

Features and benefits of the RF Management Software

- Graphical display of key performance indicators and real-time network statistics for fast, easy monitoring and troubleshooting.
- Full Wi-Fi network planning suite for fast, cost-efficient deployment (RF heat maps display optimal AP placement)
- Advanced device search speeds location of specific pieces of equipment
- Ability to export network data as a CSV-file spreadsheet facilitates data analysis

RF Management Software is an intuitive, browser-base, visual management tool for Wi-Fi site planning, management, troubleshooting and monitoring. RF heat maps display optimal AP placement as an aid to planning, while key performance indicator (KPI) graphs represent network health at a glance. Users can view the status and location of wireless infrastructure devices and clients, search for specific pieces of equipment, identify rogue APs, troubleshoot network issues, generate reports and export raw data. Statistics such as RF coverage, load balancing, redundancy, security threat level and network utilization are graphically displayed, allowing IT professionals to instantly assess network status.

ML-2499/5299 Omni Directional Antennas

Indoor/Outdoor High Performance OD 5 dBi

Part #: ML-2499-HPA3-01

Environment: Indoor/Outdoor Frequency: 2400-2500 MHz Gain: 5 dBi Beam Width: 32°
Mount Style: Mast Dimensions: 11.5 in./29.2 cm Weight: 0.3 lb/14 kg Connector and Cable Type: RBN-Male, 4 ft/1.2 m Plenum Coax Operating Temperature: -40° F to 158° F/-40°.

High Performance Fixed Point Dipole 3.5 dBi

Part #: ML-2499-APA2-01

Environment: Indoor Frequency: 2400-2500 MHz, Gain: 3.5 dBi Beam Width: 70° Mount Style: Fixed-Point Dimensions: 5.4 in/13.7 cm Weight: 1oz/28.4g Connector and Cable Type: RBN-Male Operating Temperature: -22° F to 158° F/-30° C to 70° C

High Performance Fixed Point Dipole 2dBi

Part #: ML-2499-APA1-01

Environment: Indoor Frequency: 5150-5350 MHz, 5725-5875 MHz Gain: 2 dBi Beam Width: 60° Mount Style: Fixed-Point Dimensions: 5.4 in/13.7 cm Weight: 1oz/0.3g Connector and Cable Type: RSMA-Female Operating Temperature: -22° F to 158° F/-30° C to 70° C

Indoor/Outdoor High Performance OD 5 dBi

Part #: ML-5299-HPA1-01

Environment: Indoor/Outdoor Frequency: 5150-5875 MHz Gain: 5 dBi Beam Width: 17° Mount Style: Mast Dimensions: 11.5 in./29.2 cm Weight: 4.2 oz/.12 kg Connector and Cable Type: RSMA-Female, 4 ft/1.2 m Plenum Coax Operating Temperature: -40° F to 158° F/-40°.

Model

This Radio is: **DISCONTINUED**

**ASTRO® XTL 1500 Digital Mobile™
FLASHport® Aftermarket Upgrades
Conventional and Trunked Radio
Systems**

Ordering Information

General Information

This Radio is: **DISCONTINUED**

FLASHport Aftermarket Software is used to upgrade to the latest version of your System Enhancement Software Package, to upgrade to a different System Enhancement Software Package, or to order enhancements for existing ASTRO XTL 1500 digital radios in the field. FLASHport Upgrade Kits contains upgrade software and upgrade documentation.

Ordering Requirement

1. Specify the *current* System Enhancement Software Package that represents the software in the radio as the main line item (T7190, T7191, T7192, T7193) and order quantity 1 at \$0 (No Charge).
2. Choose the *desired* System Enhancement Software Package and/or System Enhancement Options and enter as sub-items.
3. FLASH Model (factory model number) and **EXISTING** FLASH code must be entered into designated COF fields. A separate line item must be entered for each different combination of Radio Model and FLASH code. (**EXISTING** FLASH code can be read using the RS-232 Flash/programming cable (HKN6183) and CPS (RVN4185/RVN4186) and/or from the radio display in service mode.)

4. ALL Sub-items must have the same quantity listed (which equals the number of radios being upgraded) even though the main line is **always** 1.

*NOTE: A software option (G871) can be ordered to "enhance" your current mobile operation or along with a system software upgrade. G871 should be ordered if customers require any of the capacity and feature capabilities described below:

- Enhancements to a DIGITAL system include: 255 channels, ADP, Data Capability, 16 trunked systems, 16 trunked personalities, 20 call lists, 25 call list members, and 20 scan lists.

OR

- Enhancements to an ANALOG system include: 255 channels, 16 trunked systems, 16 trunked personalities, 20 call lists, 25 call list members, and 20 scan lists. Note: This enhancement package does NOT include ADP or Data capability.

NOTE in June 2019: DISCONTINUED

**ASTRO® XTL 2500 Digital Mobile™
FLASHport® Aftermarket Upgrades
Conventional and Trunked Radio System**

Ordering Information

General Information

NOTE in June 2019: DISCONTINUED

FLASHport Aftermarket Software is used to upgrade to the latest version of your System Enhancement Software Package, to upgrade to a different System Enhancement Software Package, or to order enhancements for existing ASTRO XTL 2500 Digital radios in the field. FLASHport Upgrade Kit contains upgrade software and upgrade documentation.

Ordering Requirements

1. Specify the current System Enhancement Software Package that represents the software in the radio as your main line item (**T7244, T7245, T7246 or T7247**), and order quantity 1 at \$0 (No Charge).
2. Choose the desired Operational Mode, System Enhancement Software Package, and/or System Enhancement Option (s) and enter as sub-items.
3. FLASH Model (factory model number) and FLASH code must be entered into designated COF fields. A separate line item must be entered for each different combination of Radio Model and **EXISTING** FLASH code. (**EXISTING** FLASH code can be read from using ASTRO Digital Spectra Plus Flash/programming cable (HKN6155) and CPS (RVN1465/RVN4166) and/or from the radio display in service mode.)

4. ALL Sub-items must have the same quantity listed (which equals the number of radios being upgraded) even though the main line is ALWAYS 1.

CURRENT SYSTEM SOFTWARE PACKAGE

	T7244	T7245	T7246	T7247
	<i>ANALOG CONVENTIONAL PKG</i>	<i>DIGITAL CONVENTIONAL</i>	<i>ANALOG SMARTZONE</i>	<i>DIGITAL SMARTZONE</i>
OPERATION MODES (List as sub items)				
ENH: ASTRO Digital CAI Operation G808	X	N/A	X	N/A
SYSTEM ENHANCEMENT SOFTWARE (List as sub items)				
ENH: Upgrade to Conventional G344	X	X	N/A	N/A
ENH: Upgrade to SmartZone® G347	X	X	X	X
SYSTEM ENHANCEMENT OPTIONS (List as sub items)				
ADD: ID Display (4- 8 Numeric Characters) G114 (NOTE 1)	X	X	X	X
ENH: SmartZone OmniLink™ Operation G173 (NOTE 2)	N/A	N/A	X	X
ENH: Project 25 9600 Baud Trunking G361 (NOTE 3)	N/A	N/A	N/A	X

ENCRYPTION ENHANCEMENT OPTIONS (List as sub items) - Radios must contain SECURENET® Encryption to add Encryption Enhancement Options (NOTE 4)				
ADD: Multikey Operation W969	X	X	X	X

NOTE 1: ID Display uses ASTRO Signaling in digital mode and MDC signaling in analog model. Consequently, it is not available in Trunked analog modes.

NOTE 2: For Feature Details, see Mobile Section under the General Information page, for System Enhancement Software Feature Packages on ASTRO XTL 2500 Digital Mobile.

NOTE 3: SmartZone operation (either G51 from factory or G347 from FLASHport) and IMBE ASTRO Digital (either G806 from factory G808 from FLASHport) must reside in radio for operation of this feature set. The G173 (OmniLink) is included at "No Charge" with this option.

NOTE 4: See Encryption Field Upgrade Kits' Section under the General Information on the ASTRO XTL 2500 700/800 MHz Digital Mobile page, if radios do not currently contain encryption.

Aftermarket Software below is NOT discountable and DO NOT include field programming. Pricing reflects per radio upgrade charge.

Ordering Information

General Information

FLASHport Aftermarket Software is used to upgrade to the latest version of your System Enhancement Software Package, to upgrade to a different System Enhancement Software Package, or to order enhancements for existing ASTRO XTL 5000 Digital radios in the field. FLASHport Upgrade Kit contains upgrade software and upgrade documentation.

Ordering Requirements

1. Specify the current System Enhancement Software Package that represents the software in the radio as your main line item (**T6995, T6996, T6997, T6998, T6999, or T7000**), and order quantity 1 at \$0 (No Charge).
2. Choose the desired Operational Mode, System Enhancement Software Package, and/or System Enhancement Option (s) and enter as sub-items.
3. FLASH Model (factory model number) and **EXISTING** FLASH code must be entered into designated COF fields. A separate line item must be entered for each different combination of Radio Model and FLASH code. (**EXISTING** FLASH code can be read from using ASTRO Digital Spectra Plus Flash/programming cable (HKN6155) and CPS

(RVN1465/RVN4166) and/or from the radio display in service mode.)

4. ALL Sub-items must have the same quantity listed (which equals the number of radios being upgraded) even though the main line is ALWAYS 1.

CURRENT SYSTEM SOFTWARE PACKAGE

ADD: ID Display (4-8 Numeric Characters) G114 NOTE 1	X	X	X	X	X	X
ENH: SmartZone OmniLink™ Operation G173 NOTE 2	N/A	N/A	N/A	N/A	X	X
ENH: Project 25 9600 Baud Trunking G361 NOTE 3	N/A	N/A	N/A	N/A	N/A	X
ENCRYPTION ENHANCEMENT OPTIONS (List						

as sub items) - Radios must contain SECURENET® Encryption to add Encryption Enhancement Options NOTE 4						
ADD: Multikey Operation W969	X	X	X	X	X	X
ADD: ASTRO P25 and MDC™ OTAR (includes Multikey) G298	X	X	X	X	X	X

NOTE 1: ID Display uses ASTRO Signaling in digital mode and MDC signaling in analog model. Consequently, it is not available in Trunked analog modes.

NOTE 2: For Feature Details, see Mobile Section under the General Information page, for System Enhancement Software Feature Packages on ASTRO XTL 5000 Digital Mobile.

NOTE 3: SmartZone operation (either G51 from factory or G347 from FLASHport) and IMBE ASTRO Digital (either G806 from factory G808 from FLASHport) must reside in radio for operation of this feature set. The G173 (OmniLink) is included at "No Charge" with this option.

NOTE 4: See Encryption Field Upgrade Kits' Section under the General Information on the ASTRO XTL 5000 700/800 MHz Digital Mobile page, if radios do not currently contain encryption.

Aftermarket Software below is NOT discountable and DO NOT include field programming. Pricing reflects per radio upgrade charge.

FCC Information

ALL MODELS ON THIS PAGE REQUIRE AN EXPORT LICENSE TO BE EXPORTED FROM THE US/CANADA

Ç Canada personnel refer to Section A under CANADA ONLY information.

Ordering Information

General Information

The ASTRO Digital XTL/XTL 5000, 2500, Consolette Mobile & Portable FLASHport Universal Crypto Module (UCM) upgrades allow secure customers to upgrade their basic software and algorithm software within a fielded UCM based encrypted ASTRO Digital XTL/XTS 5000, 2500, Consolette Mobile & Portable without having to replace the UCM. ASTRO Digital XTL/XTS 5000, 2500, Consolette Mobile & Portable upgrade kit (T6740)

includes one PCMCIA card and one Subscriber UCM Upgrade Manual.

NOTE: FOR ALL ORDERS, IT IS REQUESTED THAT THE PCMCIA CARDS BE RETURNED TO MOTOROLA, WHEN UPGRADING IS COMPLETE.

PCMCIA CARDS MAY BE RETURNED TO:

Motorola Solutions
c/o: David Horn
1301 E. Algonquin Rd.
Schaumburg, IL
60196

Ordering Requirements

1. Order PCMCIA UNIVERSAL CRYPTO MODULE (UCM) upgrade kit (T6740). Each upgrade kit consists of a single PCMCIA card that can upgrade up to 100 individual UCM based ASTRO Digital XTL/XTS 5000, 2500, Console Mobile & Portable.
2. Select the *desired* algorithm software upgrade option.
 - Only one (1) encryption algorithm type can be ordered per upgrade kit.
 - Specify the number of software upgrades required.
 - Each individual UCM based ASTRO Digital XTL/XTS 5000, 2500, Console Mobile & Portable requires a single upgrade; therefore, the quantity of each option should equal the number of upgrades to be performed.
 - The algorithm software options must be ordered in equal number and can not exceed 100 per upgrade kit option.
3. The ASTRO Digital XTL 5000/2500 Mobile FLASHport UCM upgrade requires the use of a key loading device (KVL 3000 or KVL 3000 Plus) and a PCMCIA card to deliver the new software to the UCM. When upgrading the UCM module with AES Encryption, a KVL 3000 Plus is required to FLASH upgrade the module (KVL 3000 does not support AES).

The following example will provide an upgrade card to upgrade twenty (20) fielded UCM based ASTRO Digital XTL/XTS 5000, 2500, Console Mobile & Portable with the AES algorithm.

<u>Item Number</u>	<u>Quantity</u>	<u>Part Number</u>	<u>Description</u>

Ordering Information

General Information

The ASTRO Digital New XTS/XTL FLASHport Universal Crypto Module (UCM) upgrades allow secure customers to upgrade their basic software and algorithm software within a fielded UCM based encrypted ASTRO Digital XTS 5000 Portables or XTL 5000 Mobiles or XTL 2500 Mobiles without having to replace the UCM. ASTRO Digital upgrade kit (T8065) includes one Upgrade CD.

Ordering Requirements

1. Order XTS/XTL MACE KVL 4000 upgrade kit (T8065). Each upgrade kit consists of a single CD that can upgrade up to 100 individual UCM based ASTRO Digital XTS 5000 Portables or , XTL 5000 Mobiles.
2. Select the *desired* algorithm software upgrade option.
 - Only one (1) encryption algorithm type can be ordered per upgrade kit.
 - Specify the number of software upgrades required.
 - Each individual UCM requires a single upgrade; therefore, the quantity of each option should equal the number of upgrades to be performed.
 - The algorithm software options must be ordered in equal number and can not exceed 100 per upgrade kit option.
3. The FLASHport UCM upgrade requires the use of a key loading device (KVL 4000) and a CD.

The following example will provide an upgrade card to upgrade twenty (20) fielded UCM based ASTRO Digital XTS 5000 Portables or XTL 2500, XTL 5000 Mobiles with the AES algorithm.

Item Number	Quantity	Part Number	Description

Model

ASTRO® Digital XTS 1500 Portable Series
700 / 800 MHz Band
Wide Area SmartZone® "Handie-Talkie™" Radio
Trunked Radio Systems

Ordering Information

Features

All ASTRO Digital XTS 1500 packaged models include the following hardware features:

- 3 Programmable Side Buttons
- Orange Emergency Button
- 16 Position Mode Rotary Select Switch
- On/Off Volume
- Low Battery Alert Tone
- Antenna (Bandsplit and Type Dependent on Band Option)
- Noise Reduction Software
- 1 Top Mounted Programmable Three Position Concentric Switch
- Weather Sealed Universal Connector
- Bi-Color LED Indicator
- IMPRES Nickel Metal Hydride Battery (NTN9858)
- Detachable Belt Clip
- ASTRO 25
- Audio Gain Control

All ASTRO Digital XTS 1500 Portables are part of the FLASHport program and ship standard with a FLASH EE Prom, which allows for feature and system upgrades (contingent upon remaining within the same RF deck.)

General Information

The ASTRO Digital XTS 1500 Portable Line offers a Model I radio:

Hardware Model	Modes	Alphanumeric Display - Lines/Characters Per Line	Keypad	Navigation Pad
ASTRO XTS 1500 Model I	48	None	None	No
ASTRO XTS 1500 Model 1.5	256	4 lines / 12 characters	None	No

Operating Modes

ASTRO Digital XTS 1500 Radio Models are capable of operating in three software packages listed below:

- 3.6KB ASTRO Digital/Analog Trunking
- 9.6KB ASTRO 25 Digital Trunking
- 9.6KB APCO P25 Digital Conventional

The ASTRO Digital XTS 1500 Portable is capable of 16 modes when the programmable Concentric Top Mounted Switch is used for Zone Operation. The mode of operation is programmed on a channel-by-channel basis.

There are no maximum frequency separation conditions that must be adhered to on the ASTRO Digital XTS 1500 Portable Radio Series. Separation of frequencies can be as wide as the allowable sub-band per radio model with no degradation of any performance specifications. Mutual Aid channels 821-824 will be supported. If an incorrect antenna is used, degraded performance may be experienced.

The ASTRO Digital XTS 1500 portable can be upgraded electronically (via RS232 cable or USB cable are required for all software upgrades) in the field with new systems operation (contingent upon remaining within the same RF sub-band) by ordering upgrade kits.

Please note that the XTS 1500 does NOT support FRED.

RELATIVE RADIATED RECEIVE SENSITIVITY

The relative radiated receive sensitivity test (formerly referred to as self-quieters) measure the sensitivity from 764MHz to 870Mhz in 12.5kHz steps. The radio is set to 25kHz channel mode. These measurements were taken in a shielded environment so that degraded sensitivity at discrete frequencies is known to be due to the radio's self-interference (as opposed to external interference.) The following list contains frequencies which were consistently found to have severely degraded performance on all measured radios: 856.3375, 857.7000, 860.7000, 862.2000, 863.7000, 867.3000, 864.0000.

FM INFORMATION

The XTS 1500 portable radio when properly equipped with options H223 and Q393 are Factory Mutual (FM/CSA) approved as intrinsically safe for use in, Division 1, Class I, II, III, Groups C, D, E, F, G, T3C without encryption modules.

The XTS 1500 portable radio when properly equipped with options H223 and Q393 are Factory Mutual (FM/CSA) approved as intrinsically safe for use in, Division 1, Class I, Class II, Class III, Groups D ,F, G, T3C with encryption modules.

Ordering Requirements

Ordering procedure is as follows:

1 H66UC_9PW5_N ASTRO XTS 1500 Portable

1A Qxxx **System Software**

1B etc **Other options**

1. Order the ASTRO Digital XTS 1500 Portable Series as the main line item (H66UCC9PW5 N).
2. Each hardware model **MUST** be ordered with one Operating Mode. One Operating Mode Package **MUST** be ordered for each radio unit ordered. Choose between 9600 Trunking, 3600 Analog/ Digital Trunking, 3600 Analog only and P25 Conventional Operation.

ALL ITEMS REQUIRE AN EXPORT LICENSE TO BE EXPORTED FROM THE UNITED STATES/CANADA

ASTRO Advanced Messaging Solution (AMS)

The ASTRO 25 Advanced Messaging Solutions is the latest messaging platform from Motorola Solutions and will replace ASTRO Text Messaging Service (TMS). As a complete end-to-end solution it leverages the core assets of ASTRO 25 IV&D/CID networks, ASTRO 25 radios, Integrated Command Center applications and Unified Network Services. The application allows responders to send/receive messages and run database queries from ASTRO 25 data enabled portable radios, extending real time information access to the field so dispatchers and first responders can be more efficient and achieve safer outcomes.

Provides functional parity with TMS and leverages the PremierOne messaging services platform, offering multiple configurations to enhance and extend core messaging functionality that can include queries and dispatch notifications. Based upon the configuration chosen, ASTRO 25 Advanced Messaging Solution extends Computer Aided Dispatch (CAD) information beyond the vehicle to select ASTRO 25 Portable radios.

Many Public Safety agencies have experienced the benefits of messaging and sharing important information to/from the communication center (dispatch) and vehicles equipped with MDT's. With ASTRO 25 Advanced Messaging Solution we are extending that capability to responders when Outside the Vehicle.

ASTRO Advanced Messaging Solution will be available on XTS 1500 Front Display Portable radios.

Ordering ASTRO Advanced Messaging Solution for XTS 1500 Portable Requires:

- XTS 1500 Front Display
- ASTRO Digital CAI Operation (Q806)
- P25 Conventional (Q811)
- Packet Data Interface (Q947)

OR

- XTS 1500 Front Display
- ASTRO Digital CAI Operation (Q806)
- ASTRO Project 25 Trunking Software (Q574)
- Packet Data Interface (Q947)

NOTE: There is no specific option to order for the Advanced Messaging Solution on the subscribers as the functionality is included in the Packet Data option. Also, the text messaging functionality carries a per-radio charge on the server side of \$50 (one time license fee to access messaging services) per radio. When adding query the fee is \$125 per radio. For additional ordering guidelines of the AMS feature which includes the server and radio license fees, please visit -

Model

ASTRO® Digital XTS 1500 Portable Series
UHF Range 1 and UHF Range 2
Wide Area SmartZone® "Handie-Talkie™" Radio
Trunked Radio Systems

Ordering Information

Features

All ASTRO Digital XTS 1500 packaged models include the following hardware features:

- 3 Programmable Side Buttons
- Orange Emergency Button
- 16 Position Mode Rotary Select Switch
- On/Off Volume
- Low Battery Alert Tone
- Antenna (Bandsplit and Type Dependent on Band Option)
- Noise Reduction Software
- 1 Top Mounted Programmable Three Position Concentric Switch
- Weather Sealed Universal Connector
- Bi-Color LED Indicator
- IMPRES Nickel Metal Hydride Battery (NTN9858)
- Detachable Belt Clip
- ASTRO 25
- Audio Gain Control

All ASTRO Digital XTS 1500 Portables are part of the FLASHport program and ship standard with a FLASH EE Prom, which allows for feature and system upgrades (contingent upon remaining within the same RF deck.)

General Information

The ASTRO Digital XTS 1500 Portable Line offers a Model I radio:

Hardware Model	Modes	Alphanumeric Display Lines/Characters Per Line	Keypad	Navigation Pad
ASTRO XTS 1500 Model I	48	None	None	No
ASTRO XTS 1500 Model 1.5	256	4 lines/12 characters	None	No

Operating Modes

ASTRO Digital XTS 1500 Radio Model is capable of operating in three software packages listed below:

- 3.6KB ASTRO Digital/Analog Trunking
- 9.6KB ASTRO 25 Digital Trunking
- 9.6KB APCO P25 Digital Conventional

The ASTRO Digital XTS 1500 Portables are capable of 16 modes when the programmable Concentric Top Mounted Switch is used for Zone Operation. The mode of operation is programmed on a channel-by-channel basis.

Please note that the XTS 1500 does NOT support FRED.

CHANNEL SPACING

There are no maximum frequency separation conditions that must be adhered to on the ASTRO Digital XTS 1500 Portable Radio Series. Separation of frequencies can be as wide as the allowable sub-band per radio model with no degradation of any performance specifications.

The ASTRO Digital XTS 1500 portable can be upgraded electronically (via RS232 cable or USB cable are required for all software upgrades) in the field with new systems operation (contingent upon remaining within the same RF sub-band) by ordering upgrade kits.

RELATIVE RADIATED RECEIVE SENSITIVITY

The relative radiated receive sensitivity test (formerly referred to as self-quieters) measures the sensitivity from 380-520 MHz in 12.5kHz steps. The radio is set to 25kHz channel mode. These measurements were taken in a shielded environment so that degraded sensitivity at discrete frequencies is known to be due to the radio's self-interference (as opposed to external interference). The following list contains frequencies which were consistently found to have severely degraded performance on all measured radios (secure and non-secure): 381.535 (secure), 386.400, 389.490 (secure), 393.195, 396.000, 396.300, 405.380 (secure), 413.330 (secure), 414.000, 415.500, 417.770, 420.000, 421.280 (secure), 426.600, 429.230 (secure), 432.000, 432.6125, 434.700, 436.800, 442.3438, 450.000, 453.600, 456.000, 460.800, 462.000, 466.920, 468.000, 470.400, 474.000, 480.000, 486.000, 487.200, 491.490, 492.000 (secure), 497.6950 (secure), 498.000, 502.200 (secure), 504.000, 512.400, 516.000, 516.070, 517.440, 519.120

FM INFORMATION

The XTS 1500 portable radio when properly equipped with options H223 and Q393 are Factory Mutual (FM/CSA) approved as intrinsically safe for use in, Division 1, Class I, II, III, Groups C, D, E, F, G, T3C without encryption modules.

The XTS 1500 portable radio when properly equipped with options H223 and Q393 are Factory Mutual (FM/CSA) approved as

intrinsically safe for use in, Division 1, Class I, Class II, Class III, Groups D ,F, G, T3C with encryption modules.

Ordering Requirements

Ordering procedure is as follows:

1	H66QD_9PW5_N	ASTRO XTS 1500 Portable UHF R1
1	H66SD_9PW5_N	ASTRO XTS 1500 Portable UHF R2
1A	Qxxx	System Software
1B	etc	Other options

1. Order the ASTRO Digital XTS 1500 Portable Series as the main line item (H66QDC9PW5 N or H66SDC9PW5 N).
2. Each hardware model MUST be ordered with one Operating Mode. One Operating Mode Package MUST be ordered for each radio unit ordered. Choose between 9600 Trunking, 3600 Analog/ Digital Trunking, 3600 Analog only and P25 Conventional Operation.

Update History

Special Note for United States - State & Local Markets only:

In accordance with FCC mandate, the XTS 1500 UHF R1 & UHF R2 products operating on Part 90 frequencies will be restricted to 12.5kHz or narrower operations on Jan. 1, 2013

XTS 1500 Last Order Entry Date : October 31, 2014

XTS 1500 Last Scheduled Ship Date: November 30, 2014

[XTS 1500 Notification of Intent to Cancel Memo](#)

**** Alternative product includes the APX Series ** - [APX1000 \(Available - December 2014\)](#)**

******Please note that NEW version of Customer Programming Software (CPS) (Part # RVN4181/ RVN4186) is required for initial customer orders for XTS radios. ******

Model

**ASTRO® Digital XTS 1500 Portable Series
VHF
Wide Area SmartZone® "Handie-Talkie™" Radio
Trunked Radio Systems**

Ordering Information

Features

All ASTRO Digital XTS 1500 packaged models include the following hardware features:

- 3 Programmable Side Buttons
- Orange Emergency Button
- 16 Position Mode Rotary Select Switch
- On/Off Volume
- Low Battery Alert Tone
- Antenna (Bandsplit and Type Dependent on Band Option)
- Noise Reduction Software
- 1 Top Mounted Programmable Three Position Concentric Switch
- Weather Sealed Universal Connector
- Bi-Color LED Indicator
- IMPRES Nickel Metal Hydride Battery (NTN9858)
- Detachable Belt Clip
- ASTRO 25
- Audio Gain Control

All ASTRO Digital XTS 1500 Portables are part of the FLASHport program and ship standard with a FLASH EE Prom, which allows for feature and system upgrades (contingent upon remaining within the same RF deck.)

General Information

The ASTRO Digital XTS 1500 Portable Line offers a Model I radio:

Hardware Model	Modes	Alphanumeric Display Lines/Characters Per Line	Keypad	Navigation Pad
ASTRO XTS 1500 Model I	48	None	None	No
ASTRO XTS 1500 Model 1.5	256	4 lines/12 characters	None	No

Operating Modes

ASTRO Digital XTS 1500 Radio Model is capable of operating in three software packages listed below:

- 3.6KB ASTRO Digital/Analog Trunking
- 9.6KB ASTRO 25 Digital Trunking
- 9.6KB APCO P25 Digital Conventional

The ASTRO Digital XTS 1500 Portables are capable of 16 modes when the programmable Concentric Top Mounted Switch is used for Zone Operation. The mode of operation is programmed on a channel-by-channel basis.

Please note that the XTS 1500 does NOT support FRED.

CHANNEL SPACING

There are no maximum frequency separation conditions that must be adhered to on the ASTRO Digital XTS 1500 Portable Radio Series. Separation of frequencies can be as wide as the allowable sub-band per radio model with no degradation of any performance specifications.

The ASTRO Digital XTS 1500 portables can be upgraded electronically (via RS232 cable or USB cable are required for all software upgrades) in the field with new systems operation (contingent upon remaining within the same RF sub-band) by ordering upgrade kits.

RELATIVE RADIATED RECEIVE SENSITIVITY

The relative radiated receive sensitivity test (formerly referred to as self-quieters) measures the sensitivity from 136.05MHz to 173.975MHz in 12.5kHz steps. The radio is set to 25kHz channel mode. These measurements were taken in a shielded environment so that degraded sensitivity at the discrete frequencies is known to be due to the radio's self-interference (as opposed to external interference.) The following list contains frequencies which were consistently found to have severely degraded performance on all measured radios: 147.4450, 147.4475, 147.4500, 151.1975, 151.2000, 153.6000, 161.9975, 162.000, 162.0025, 165.8975, 165.9000, 165.9025, 167.9975, 168.000, 168.0025, 172.0200, 172.0225.

FM INFORMATION

The XTS 1500 portable radio when properly equipped with options H223 and Q393 are Factory Mutual (FM/CSA) approved as intrinsically safe for use in, Division 1, Class I, II, III, Groups C, D, E, F, G, T3C without encryption modules.

The XTS 1500 portable radio when properly equipped with options H223 and Q393 are Factory Mutual (FM/CSA) approved as intrinsically safe for use in, Division 1, Class I, Class II, Class III, Groups D, F, G, T3C with encryption modules.

Ordering Requirements

Ordering procedure is as follows:

1 H66KD_9PW5_NASTRO XTS 1500 Portable

1A Qxxx **System Software**

1B etc **Other options**

1. Order the ASTRO Digital XTS 1500 Portable Series as the main line item (H66KDC9PW5 N).
2. Each hardware model MUST be ordered with one Operating Mode. One Operating Mode Package MUST be ordered for each radio unit ordered. Choose between 9600 Trunking, 3600 Analog/ Digital Trunking, 3600 Analog only and P25 Conventional Operation.

ASTRO Advanced Messaging Solution (AMS)

The ASTRO 25 Advanced Messaging Solutions is the latest messaging platform from Motorola Solutions and will replace ASTRO Text Messaging Service (TMS). As a complete end-to-end solution it leverages the core assets of ASTRO 25 IV&D/CID networks, ASTRO 25 radios, Integrated Command Center applications and Unified Network Services. The application allows responders to send/receive messages and run database queries from ASTRO 25 data enabled portable radios, extending real time information access to the field so dispatchers and first responders can be more efficient and achieve safer outcomes.

Provides functional parity with TMS and leverages the PremierOne messaging services platform, offering multiple configurations to enhance and extend core messaging functionality that can include queries and dispatch notifications. Based upon the configuration chosen, ASTRO 25 Advanced Messaging Solution extends Computer Aided Dispatch (CAD) information beyond the vehicle to select ASTRO 25 Portable radios.

Many Public Safety agencies have experienced the benefits of messaging and sharing important information to/from the communication center (dispatch) and vehicles equipped with MDT's. With ASTRO 25 Advanced Messaging Solution we are extending that capability to responders when Outside the Vehicle.

ASTRO Advanced Messaging Solution will be available on XTS 1500 Front Display Portable radios.

Ordering ASTRO Advanced Messaging Solution for XTS 1500 Portable Requires:

- XTS 1500 Front Display
- ASTRO Digital CAI Operation (Q806)
- P25 Conventional (Q811)
- Packet Data Interface (Q947)

OR

- XTS 1500 Front Display
- ASTRO Digital CAI Operation (Q806)
- ASTRO Project 25 Trunking Software (Q574)
- Packet Data Interface (Q947)

Update History

Special Note for United States - State & Local Markets only:

In accordance with FCC mandate, the XTS 1500 VHF products operating on Part 90 frequencies will be restricted to 12.5kHz or narrower operations on Jan. 1, 2013

XTS 1500 Last Order Entry Date : October 31, 2014

XTS 1500 Last Scheduled Ship Date: November 30, 2014

XTS 1500 Notification of Intent to Cancel Memo

**** Alternative product includes the APX Series **– APX1000 (Available - December 2014)**

******Please note that NEW version of Customer Programming Software (CPS) (Part # RVN4181/ RVN4186) is required for initial customer orders for XTS radios. ******

Model

ASTRO® Digital XTS 2500 Portable Series
700/800MHz Band
Wide Area SmartZone® "Handie-Talkie™" Radio
Trunked Radio Systems

Ordering Information

Features

All ASTRO Digital XTS 2500 packaged models include the following hardware features:

- 3 Programmable Side Buttons
- Orange Emergency Button
- 16 Position Mode Rotary Select Switch
- On/Off Volume
- Low Battery Alert Tone
- Antenna (Bandsplit and Type Dependent on Band Option)
- Noise Reduction Software
- 1 Top Mounted Programmable Three Position Concentric Switch
- Weather Sealed Universal Connector
- Bi-Color LED Indicator
- IMPRES Nickel Metal Hydride Battery (NTN9858)
- Detachable Belt Clip
- ASTRO 25
- Audio Gain Control

ASTRO Digital XTS 2500 Model I.5, II

and III also include:

- DTMF Telephone Interconnect Capability (Model III ONLY)
- 6 Lines Alphanumeric Display (No Model I)
- Date and Time Stamp
- Hardware Encryption (Not Available on Model
- Keypad Tone Mute (Model II and III ONLY)
- Large Navigational Keypad (Model II and III ONLY)
- Real Time Clock

All ASTRO Digital XTS 2500 Portables are part of the FLASHport program and ship standard with a FLASH EE Prom, which allows for feature and system upgrades (contingent upon remaining within the same RF deck.) **Please note that Models 1 and 2 are not available in the Asia Pacific Region**

Physiological Monitoring Solution

Physiological Monitoring is now available on the ASTRO 25 XTS5000 and XTS2500 portable radios. The Zephyr BioHarness™ BT couples the pioneering Smart Fabric sensor technology of the comfortable and unobtrusive BioHarness™ garment with the power and ubiquity of Bluetooth®. BioHarness™ BT enables the capture and transmission of comprehensive physiological data on the wearer exclusively via MOTOROLA ASTRO RADIOS – enabling genuine remote monitoring of human performance and condition in the real world.

The BioHarness™ BT can be used in a diverse range of areas including sports, defense, first responder and healthcare. Its professional-grade BioHarness™ system monitors conditions such as heat state, dehydration or injury by measuring vital signs including heart rate, breathing rate, skin temperature, posture and activity. Using the subject’s voice radio, the BioHarness communicates to monitoring software designed to give real-time alerts and post-event analysis.

BioHarness™ BT can be worn in virtually any environment – from combat situations to the training field. It maintains performance under extreme activity. Offering fast, accurate collection and analysis of high-quality, in-depth data, BioHarness™ BT is the definitive product for remote physiological monitoring in all conditions.

Zephyr Physiological Monitoring Ordering Guide

General Information

The ASTRO Digital XTS 2500 Portable Line offers four different radio hardware models:

Hardware Model	Modes	Alphanumeric Display	Keypad	Navigation Pad
		Lines/Characters		
		per Line		
ASTRO XTS 2500 Model I	48	None	None	No

ASTRO XTS 2500 Model 1.5	256	6/12/front mount	None	No
ASTRO XTS 2500 Model II	870	6/12/front mount	3 x 2	Yes
ASTRO XTS 2500 Model III	870	6/12/front mount	3 x 6	Yes

OPERATING MODES

ASTRO Digital XTS 2500 Radio Models are capable of operating in three different voice communication modes:

- Normal Analog (clear voice)
- 3.6KB ASTRO Digital (clear voice)
- 9.6KB ASTRO 25 Digital (clear voice)

The ASTRO Digital XTS 2500 Portable is capable of 48 modes when the programmable Concentric Top Mounted Switch is used for Zone Operation. The mode of operation is programmed on a channel-by-channel basis.

Please note that the XTS 2500 does NOT support FRED.

CHANNEL SPACING

There are no maximum frequency separation conditions that must be adhered to on the ASTRO Digital XTS2500 Portable Radio Series. Separation of frequencies can be as wide as the allowable sub-band per radio model with no degradation of any performance specifications. If an incorrect antenna is used, degraded performance may be experienced.

FIPS 140-2 Compliance

Encryption Modules equipped with AES are FIPS 140-2 compliant. Further information regarding FIPS 140-2 certification may be found using the following links:

[FIPS 140-2 Crypto Module Validation Program \(CMVP\)](#)

[NIST Cryptographic Module Validation Lists](#)

FLASHport® AFTERMARKET UPGRADES

The ASTRO Digital XTS 2500 Portable Series Radios are part of the FLASHport® Program. This means that ASTRO Digital XTS 2500 hardware models can be loaded with different software packages that provide the features and functionalities that your customers require. Three different hardware models are available in each band split.

The ASTRO Digital XTS 2500 portable can be upgraded electronically (via RS232 cable or USB cable are required for all software upgrades) in the field with new systems operation (contingent upon remaining within the same RF sub-band) by ordering upgrade kits.

FM INFORMATION

The XTS 2500 portable radio when properly equipped with options H223, Q393 or Q393SUBM are Factory Mutual (FM/CSA) approved as intrinsically safe for use in, Division 1, Class I, II, III, Groups C, D, E, F, G, T3 without encryption modules.

The XTS 2500 portable radio when properly equipped with options H223, Q393 or Q393SUBM are Factory Mutual (FM/CSA) approved as intrinsically safe for use in, Division 1, Class I, Class II, Class III, Groups D ,F, G, T3C with encryption modules.

ASTRO TEXT MESSAGING SERVICE

ASTRO Text Messaging Service will be available on ASTRO 25 XTS 5000, XTS 2500 Portable radios and ASTRO 25 XTL 5000, XTL 2500 Mobile radios. Text Messaging Service (TMS) allows subscriber users to send and receive text messages to other subscribers or dispatch operators. Users can select messages and addresses from a predefined list or enter freeform text messages and addresses via the keypad. Text Messaging Service is available on ASTRO Trunked IV&D Systems and Subscribers. Subscribers must have version R09.00.00 or later of both Customer Programming Software (CPS) and Radio software.

For full Text Messaging functionality, including freeform text messaging and addressing, must order Model III XTS2500 portables. Model II versions support Limited Text Messaging functionality such as selecting predefined messages or addresses from a list programmed in the radio. Text messaging service is NOT supported on Model I Portables.

Ordering requirements for XTS 2500 Portable:

- Requires Model II or Model III XTS 2500
- Software Trunking 9600 Baud (Q574)
- Packet Data Interface (Q947)

NOTE: *There is no specific option to order for the Text Messaging Service on the subscribers as the functionality is included in the Packet Data option.*

RELATIVE RADIATED RECEIVE SENSITIVITY

The relative radiated receive sensitivity test (formerly referred to as self-quieters) measure the sensitivity from 764MHz to 870Mhz in 12.5kHz steps. The radio is set to 25kHz channel mode. These measurements were taken in a shielded environment so that degraded sensitivity at discrete frequencies is known to be due to the radio's self-interference (as opposed to external interference.) The following list contains frequencies which were consistently found to have severely degraded performance on all measured radios: 856.3375, 857.7000, 860.7000, 862.2000, 863.7000, 867.3000, 864.0000.

UPDATED LIST OF FREQUENCIES NOT ALLOWED

When a Platform A radio is repaired with a Platform B RF board there will be additional frequencies that are not recommended to be used. The following list contains frequencies which were consistently found to have severely degraded performance on all measured radios (secure and non-secure):

VHF (136 to 174 MHz) 140.5, 144, 147.4475, 147.4575, 151.2*, 151.735*, 153.6*, 159.745, 162, 162.295, 165.9, 168*, 170.3975, 172.02

UHF Range 1 (380 to 470 MHz) 381.535, 384, 389.49, 393.195, 396*, 397.4375, 405.38, 413.33, 414*, 415.5, 417.77, 420*, 421.28, 429.23, 429.544, 431.1, 432*, 432.613, 437.18125, 442.344, 445.13125, 450*, 460.8, 466.92, 468*

UHF Range 2 (450 to 520 MHz) 450, 453.6*, 456*, 460.8*, 462, 466.91875, 468*, 469.425, 470.4*, 474, 475.5*, 480, 486*, 487.2*, 491.49375, 492, 497.705, 498, 502.2, 504, 510, 516, 516.065

700/800 MHz (764 – 776 MHz, 851 MHz – 870 MHz) 856.3375, 857.7000, 860.7000, 862.2000, 863.7000, 864.0000, 867.3000

Ordering Requirements

Ordering procedure is as follows:

- 1 H46UCH9PW7BN ASTRO XTS 2500 Portable**
- 1A Q574 9600 Trunking Digital Operation**
- 1B etc**

1. Order the ASTRO Digital XTS 2500 Portable Series as the main line item (H46UCH9PW7_N).
2. Each hardware model MUST be ordered with one Operating Mode. One Operating Mode Package MUST be ordered for each radio unit ordered. Choose between 9600 Trunking, 3600 Analog/ Digital Trunking, 3600 Analog or P25 Conventional Operation.

ALL ITEMS REQUIRE AN EXPORT LICENSE TO BE EXPORTED FROM THE UNITED STATES/CANADA

ASTRO Advanced Messaging Solution (AMS)

The ASTRO 25 Advanced Messaging Solutions is the latest messaging platform from Motorola Solutions and will replace ASTRO Text Messaging Service (TMS). As a complete end-to-end solution it leverages the core assets of ASTRO 25 IV&D/CID networks, ASTRO 25 radios, Integrated Command Center applications and Unified Network Services. The application allows responders to send/receive messages and run database queries from ASTRO 25 data enabled portable radios, extending real time information access to the field so dispatchers and first responders can be more efficient and achieve safer outcomes.

Provides functional parity with TMS and leverages the PremierOne messaging services platform, offering multiple configurations to enhance and extend core messaging functionality that can include queries and dispatch notifications. Based upon the configuration chosen, ASTRO 25 Advanced Messaging Solution extends Computer Aided Dispatch (CAD) information beyond the vehicle to select ASTRO 25 Portable radios.

Many Public Safety agencies have experienced the benefits of messaging and sharing important information to/from the communication center (dispatch) and vehicles equipped with MDT's. With ASTRO 25 Advanced Messaging Solution we are extending that capability to responders when Outside the Vehicle.

ASTRO Advanced Messaging Solution will be available on XTS 2500 Dual Display Portable radios. Advanced Messaging is NOT supported on XTS 2500 Top Display Portable radios.

Ordering ASTRO Advanced Messaging Solution for XTS 2500 Portable Requires:

- **XTS 2500 Dual Display**

· **P25 Conventional (Q811)**

· Packet Data Interface (Q947)

OR

· XTS 2500 Dual Display

· ASTRO Project 25 Trunking Software (Q574/Q575)

· Packet Data Interface (Q947)

Model

XTS 2500 Portable Series
900 MHz Band

Ordering Information

Features

All XTS 2500 packaged models include the following hardware features:

- 3 Programmable Side Buttons
- Orange Emergency Button
- 16 Position Mode Rotary Select Switch
- On/Off Volume
- Low Battery Alert Tone
- Antenna
- Noise Reduction Software
- 1 Top Mounted Programmable Three Position Concentric Switch
- Weather Sealed Universal Connector
- Bi-Color LED Indicator
- IMPRES Nickel Metal Hydride Battery (NTN9858)
- Detachable Belt Clip
- Audio Gain Control

XTS 2500 Model I.5 and III also include:

- DTMF Telephone Interconnect

- | | |
|---|--|
| Capability (Model III ONLY) | Keypad Tone Mute (Model III ONLY) |
| <ul style="list-style-type: none"> • 4 Lines Alphanumeric Display • Date and Time Stamp | <ul style="list-style-type: none"> • Large Navigational Keypad (Model III ONLY) • Manual Clock |

All XTS 2500 Portables are part of the FLASHport program and ship standard with a FLASH EE Prom, which allows for feature and system upgrades (contingent upon remaining within the same RF deck.). **Please note that Models 1 and 2 are not available in the Asia Pacific Region**

Physiological Monitoring Solution

Physiological Monitoring is now available on the ASTRO 25 XTS5000 and XTS2500 portable radios. The Zephyr BioHarness™ BT couples the pioneering Smart Fabric sensor technology of the comfortable and unobtrusive BioHarness™ garment with the power and ubiquity of Bluetooth®. BioHarness™ BT enables the capture and transmission of comprehensive physiological data on the wearer exclusively via MOTOROLA ASTRO RADIOS – enabling genuine remote monitoring of human performance and condition in the real world.

The BioHarness™ BT can be used in a diverse range of areas including sports, defense, first responder and healthcare. Its professional-grade BioHarness™ system monitors conditions such as heat state, dehydration or injury by measuring vital signs including heart rate, breathing rate, skin temperature, posture and activity. Using the subject’s voice radio, the BioHarness communicates to monitoring software designed to give real-time alerts and post-event analysis.

BioHarness™ BT can be worn in virtually any environment – from combat situations to the training field. It maintains performance under extreme activity. Offering fast, accurate collection and analysis of high-quality, in-depth data, BioHarness™ BT is the definitive product for remote physiological monitoring in all conditions.

Zephyr Physiological Monitoring Ordering Guide

General Information

The XTS 2500 Portable Line offers two different radio hardware models:

Hardware Model	Modes	Alphanumeric Display	Keypad	Display	Navigation Pad
		Lines/Characters			
		per Line			
XTS 2500 Model 1.5	256	6/12/front mount	None	Yes	No
XTS 2500 Model III	870	6/12/front mount	3 x 6	Yes	Yes

OPERATING MODES

XTS 2500 900 MHz Radio Models are capable of operating in Analog Conventional or Analog Trunking communication modes. The mode of operation is programmed on a channel-by-channel basis.

Please note that the XTS 2500 does NOT support FRED.

CHANNEL SPACING

There are no maximum frequency separation conditions that must be adhered to on the XTS2500 Portable Radio Series. Separation of frequencies can be as wide as the allowable sub-band per radio model with no degradation of any performance specifications. If an incorrect antenna is used, degraded performance may be experienced.

FLASHport® AFTERMARKET UPGRADES

The XTS 2500 Portable Series Radios are part of the FLASHport® Program. This means that XTS 2500 hardware models can be loaded with different software packages that provide the features and functionalities that your customers require.

The XTS 2500 portable can be upgraded electronically (via RS232 cable or USB cable are required for all software upgrades) in the field with new systems operation (contingent upon remaining within the same RF sub-band) by ordering upgrade kits.

RELATIVE RADIATED RECEIVE SENSITIVITY

The relative radiated receive sensitivity test (formerly referred to as self-quieters) measure the sensitivity from 896MHz to 940Mhz in 12.5kHz steps. The radio is set to 25kHz channel mode. These measurements were taken in a shielded environment so that degraded sensitivity at discrete frequencies is known to be due to the radio's self-interference (as opposed to external interference.) The following list contains frequencies which were consistently found to have severely degraded performance on all measured radios: 936 MHz, 939.3 MHz

Ordering Requirements

Ordering procedure is as follows:

1 H46WCD9PW5BN XTS 2500 Portable

**1A Q443 3600 Analog
 Operation**

1B etc

1. Order the XTS 2500 Portable Series as the main line item (H46WCD9PW5BN).
2. Each hardware model MUST be ordered with one Operating Mode. One Operating Mode Package MUST be ordered for each radio unit ordered. Choose between 3600 Analog, Trunking or Conventional Operation.

Legend:

Blue=Feature to be added in a Future Release

ASTRO Advanced Messaging Solution (AMS)

The ASTRO 25 Advanced Messaging Solutions is the latest messaging platform from Motorola Solutions and will replace ASTRO Text Messaging Service (TMS). As a complete end-to-end solution it leverages the core assets of ASTRO 25 IV&D/CID networks, ASTRO 25 radios, Integrated Command Center applications and Unified Network Services. The application allows responders to send/receive messages and run database queries from ASTRO 25 data enabled portable radios, extending real time information access to the field so dispatchers and first responders can be more efficient and achieve safer outcomes.

Provides functional parity with TMS and leverages the PremierOne messaging services platform, offering multiple configurations to enhance and extend core messaging functionality that can include queries and dispatch notifications. Based upon the configuration chosen, ASTRO 25 Advanced Messaging Solution extends Computer Aided Dispatch (CAD) information beyond the vehicle to select ASTRO 25 Portable radios.

Many Public Safety agencies have experienced the benefits of messaging and sharing important information to/from the communication center (dispatch) and vehicles equipped with MDT's. With ASTRO 25 Advanced Messaging Solution we are extending that capability to responders when Outside the Vehicle.

ASTRO Advanced Messaging Solution will be available on XTS 2500 Dual Display Portable radios. Advanced Messaging is NOT supported on XTS 2500 Top Display Portable radios.

Ordering ASTRO Advanced Messaging Solution for XTS 2500 Portable Requires:

- **XTS 2500 Dual Display**
- **P25 Conventional (Q811)**
- **Packet Data Interface (Q947)**

OR

- XTS 2500 Dual Display
- ASTRO Project 25 Trunking Software (Q574/Q575)
- Packet Data Interface (Q947)

Model

**ASTRO® Digital XTS 2500 Portable Series
UHF Range 1 and UHF Range 2
Wide Area SmartZone® "Handie-Talkie™" Radio
Trunked Radio Systems**

Ordering Information

Features

All ASTRO Digital XTS 2500 packaged models include the following hardware features:

- 3 Programmable Side Buttons
- Orange Emergency Button
- 16 Position Mode Rotary Select Switch
- On/Off Volume
- Low Battery Alert Tone
- Antenna (Bandsplit and Type Dependent on Band Option)
- Noise Reduction Software
- 1 Top Mounted Programmable Three Position Concentric Switch
- Weather Sealed Universal Connector
- Bi-Color LED Indicator
- Nickel Metal Hydride Battery (NTN9858)
- Detachable Belt Clip
- ASTRO 25
- Audio Gain Control

ASTRO Digital XTS 2500 Model I.5, II and III also include:

- DTMF Telephone Interconnect Capability (Model III ONLY)
- 6 Lines Alphanumeric Display (NO Model I)
- Date and Time Stamp
- Hardware Encryption (Not Available on Model 1)
- Keypad Tone Mute
- Large Navigational Keypad
- Real Time Clock

All ASTRO Digital XTS 2500 Portables are part of the FLASHport program and ship standard with a FLASH EE Prom, which allows for feature and system upgrades (contingent upon remaining within the same RF deck.) **Please note that Models 1 and 2 are not available in the Asia Pacific Region**

Physiological Monitoring Solution

Physiological Monitoring is now available on the ASTRO 25 XTS5000 and XTS2500 portable radios. The Zephyr BioHarness™ BT couples the pioneering Smart Fabric sensor technology of the comfortable and unobtrusive BioHarness™ garment with the power and ubiquity of Bluetooth®. BioHarness™ BT enables the capture and transmission of comprehensive physiological data on the wearer exclusively via MOTOROLA ASTRO RADIOS – enabling genuine remote monitoring of human performance and condition in the real world.

The BioHarness™ BT can be used in a diverse range of areas including sports, defense, first responder and healthcare. Its professional-grade BioHarness™ system monitors conditions such as heat state, dehydration or injury by measuring vital signs including heart rate, breathing rate, skin temperature, posture and activity. Using the subject's voice radio, the BioHarness communicates to monitoring software designed to give real-time alerts and post-event analysis.

BioHarness™ BT can be worn in virtually any environment – from combat situations to the training field. It maintains performance under extreme activity. Offering fast, accurate collection and analysis of high-quality, in-depth data, BioHarness™ BT is the definitive product for remote physiological monitoring in all conditions.

Zephyr Physiological Monitoring Ordering Guide

General Information

The ASTRO Digital XTS 2500 Portable Line offers three different radio hardware models:

Hardware Model	Modes	Alphanumeric Display	Keypad	Navigation Pad
		Lines/Characters		
		per Line		
ASTRO XTS 2500 Model I	48	None	None	No
ASTRO XTS 2500 Model 1.5	256	6/12/front mount	None	No
ASTRO XTS 2500 Model II	870	6/12/front mount	3 x 2	Yes
ASTRO XTS 2500 Model III	870	6/12/front mount	3 x 6	Yes

Operating Modes

ASTRO Digital XTS 2500 Radio Models are capable of operating in three different voice communication modes:

- Normal Analog (clear voice)
- 3.6KB ASTRO Digital (clear voice)
- 9.6KB ASTRO 25 Digital (clear voice)

The ASTRO Digital XTS 2500 Portable is capable of 48 modes when the programmable Concentric Top Mounted Switch is used for Zone Operation. The mode of operation is programmed on a channel-by-channel basis.

Please note that the XTS 2500 does NOT support FRED.

CHANNEL SPACING

There are no maximum frequency separation conditions that must be adhered to on the ASTRO Digital XTS 2500 Portable Radio Series. Separation of frequencies can be as wide as the allowable sub-band per radio model with no degradation of any performance specifications. If an incorrect antenna is used, degraded performance may be experienced.

FIPS 140-2 Compliance

Encryption Modules equipped with AES are FIPS 140-2 compliant. Further information regarding FIPS 140-2 certification may be found using the following links:

[FIPS 140-2 Crypto Module Validation Program \(CMVP\)](#)

[NIST Cryptographic Module Validation Lists](#)

FLASHport® AFTERMARKET UPGRADES

The ASTRO Digital XTS 2500 Portable Series Radios are part of the FLASHport Program. This means that ASTRO Digital XTS 2500 hardware models can be loaded with different software packages that provide the features and functionalities that your customers require. Three different hardware models are available in each

band split.

The ASTRO Digital XTS 2500 portable can be upgraded electronically (via RS232 cable or USB cable are required for all software upgrades) in the field with new systems operation (contingent upon remaining within the same RF sub-band) by ordering upgrade kits.

FM INFORMATION

The XTS 2500 portable radio when properly equipped with options H223, Q393 or Q393SUBM are Factory Mutual (FM/CSA) approved as intrinsically safe for use in, Division 1, Class I, II, III, Groups C, D, E, F, G, T3 without encryption modules.

The XTS 2500 portable radio when properly equipped with options H223, Q393 or Q393SUBM are Factory Mutual (FM/CSA) approved as intrinsically safe for use in, Division 1, Class I, Class II, Class III, Groups D, F, G, T3C with encryption modules.

ASTRO TEXT MESSAGING SERVICE

ASTRO Text Messaging Service will be available on ASTRO 25 XTS 5000, XTS 2500 Portable radios and ASTRO 25 XTL 5000, XTL 2500 Mobile radios. Text Messaging Service (TMS) allows subscriber users to send and receive text messages to other subscribers or dispatch operators. Users can select messages and addresses from a predefined list or enter freeform text messages and addresses via the keypad. Text Messaging Service is available on ASTRO Trunked IV&D Systems and Subscribers. Subscribers must have version R09.00.00 or later of both Customer Programming Software (CPS) and Radio software.

For full Text Messaging functionality, including freeform text messaging and addressing, must order Model III XTS2500 portables. Model II versions support Limited Text Messaging functionality such as selecting predefined messages or addresses from a list programmed in the radio. Text messaging service is NOT supported on Model I Portables.

Ordering requirements for XTS 2500 Portable:

- Requires Model II or Model III XTS 2500
- Software Trunking 9600 Baud (Q574)
- Packet Data Interface (Q947)

NOTE: There is no specific option to order for the Text Messaging Service on the subscribers as the functionality is included in the Packet Data option.

RELATIVE RADIATED RECEIVE SENSITIVITY

The relative radiated receive sensitivity test (formerly referred to as self-quieters) measures the sensitivity from 380-520 MHz in 12.5kHz steps. The radio is set to 25kHz channel mode. These measurements were taken in a shielded environment so that degraded sensitivity at discrete frequencies is known to be due to the radio's self-interference (as opposed to external interference). The following list contains frequencies which were consistently found to have severely degraded performance on all measured radios (secure and non-secure): 381.535 (secure), 386.400, 389.490 (secure), 393.195, 396.000, 396.300, 405.380 (secure), 413.330 (secure), 414.000, 415.500, 417.770, 420.000, 421.280 (secure), 426.600, 429.230 (secure), 432.000, 432.6125, 434.700, 436.800, 442.3438, 450.000, 453.600, 456.000, 460.800, 462.000, 466.920, 468.000, 470.400, 474.000, 480.000, 486.000, 487.200, 491.490, 492.000 (secure), 497.6950 (secure), 498.000, 502.200 (secure), 504.000, 512.400, 516.000, 516.070, 517.440, 519.120

UPDATED LIST OF FREQUENCIES NOT ALLOWED

When a Platform A radio is repaired with a Platform B RF board there will be additional frequencies that are not recommended to be used. The following list contains frequencies which were consistently found to have severely degraded performance on all measured radios (secure and non-secure):

VHF (136 to 174 MHz) 140.5, 144, 147.4475, 147.4575, 151.2*, 151.735*, 153.6*, 159.745, 162, 162.295, 165.9, 168*, 170.3975, 172.02

UHF Range 1 (380 to 470 MHz) 381.535, 384, 389.49, 393.195, 396*, 397.4375, 405.38, 413.33, 414*, 415.5, 417.77, 420*, 421.28, 429.23, 429.544, 431.1, 432*, 432.613, 437.18125, 442.344, 445.13125, 450*, 460.8, 466.92, 468*

UHF Range 2 (450 to 520 MHz) 450, 453.6*, 456*, 460.8*, 462, 466.91875, 468*, 469.425, 470.4*, 474, 475.5*, 480, 486*, 487.2*, 491.49375, 492, 497.705, 498, 502.2, 504, 510, 516, 516.065

700/800 MHz (764 – 776 MHz, 851 MHz – 870 MHz) 856.3375, 857.7000, 860.7000, 862.2000, 863.7000, 864.0000, 867.3000

Ordering Requirements

Ordering procedure is as follows:

- 1 H46QDC9PW7BN ASTRO XTS 2500 Portable**
- 1A Q574 9600 Trunking Digital Operation**
- 1B etc**

1. Order the ASTRO Digital XTS 2500 Portable Series as the main line item (H46QDC9PW7_N).
2. Each hardware model MUST be ordered with one Operating Mode. One Operating Mode Package MUST be ordered for each radio unit ordered. Choose between 9600 Trunking, 3600 Analog/ Digital Trunking, 3600 Analog and P25 Conventional Operation.

XTS 2500 PORTABLE RADIO SPEC SHEET

ASTRO Advanced Messaging Solution (AMS)

The ASTRO 25 Advanced Messaging Solutions is the latest messaging platform from Motorola Solutions and will replace ASTRO Text Messaging Service (TMS). As a complete end-to-end solution it leverages the core assets of ASTRO 25 IV&D/CID networks, ASTRO 25 radios, Integrated Command Center applications and Unified Network Services. The application allows responders to send/receive messages and run database queries from ASTRO 25 data enabled portable radios, extending real time information access to the field so dispatchers and first responders can be more efficient and achieve safer outcomes.

Provides functional parity with TMS and leverages the PremierOne messaging services platform, offering multiple configurations to enhance and extend core messaging functionality that can include queries and dispatch notifications. Based upon the configuration chosen, ASTRO 25 Advanced Messaging Solution extends Computer Aided Dispatch (CAD) information beyond the vehicle to select ASTRO 25 Portable radios.

Many Public Safety agencies have experienced the benefits of messaging and sharing important information to/from the communication center (dispatch) and vehicles equipped with MDT's. With ASTRO 25 Advanced Messaging Solution we are extending that capability to responders when Outside the Vehicle.

ASTRO Advanced Messaging Solution will be available on XTS 2500 Dual Display Portable radios. Advanced Messaging is NOT supported on XTS 2500 Top Display Portable radios.

Ordering ASTRO Advanced Messaging Solution for XTS 2500 Portable Requires:

- XTS 2500 Dual Display
- P25 Conventional (Q811)
- Packet Data Interface (Q947)

OR

- XTS 2500 Dual Display
- ASTRO Project 25 Trunking Software (Q574/Q575)
- Packet Data Interface (Q947)

Model

**ASTRO® Digital XTS 2500 Portable Series
VHF
Wide Area SmartZone® "Handie-Talkie™" Radio
Trunked Radio Systems**

Ordering Information

Features

All ASTRO Digital XTS 2500 packaged models include the following hardware features:

- 3 Programmable Side Buttons
- Orange Emergency Button
- 16 Position Mode Rotary Select Switch
- On/Off Volume
- Low Battery Alert Tone
- Antenna (Bandsplit and Type Dependent on Band Option)
- Noise Reduction Software
- **ASTRO Digital XTS 2500 Model I.5, II and III also include:**
- DTMF Telephone Interconnect
- 1 Top Mounted Programmable Three Position Concentric Switch
- Weather Sealed Universal Connector
- Bi-Color LED Indicator
- IMPRES Nickel Metal Hydride Battery (NTN9858)
- Detachable Belt Clip
- ASTRO 25
- Audio Gain Control
- Keypad Tone Mute (Model II and III)

Capability (Model III ONLY)

only)

- 6 Lines Alphanumeric Display (No Model I)
- Date and Time Stamp
- Hardware Encryption (Not Available on Model 1)
- Large Navigational Keypad (Model II and III only)
- Real Time Clock

All ASTRO Digital XTS 2500 Portables are part of the FLASHport program and ship standard with a FLASH EE Prom, which allows for feature and system upgrades (contingent upon remaining within the same RF deck.) **Please note that Models 1 and 2 are not available in the Asia Pacific Region**

Physiological Monitoring Solution

Physiological Monitoring is now available on the ASTRO 25 XTS5000 and XTS2500 portable radios. The Zephyr BioHarness™ BT couples the pioneering Smart Fabric sensor technology of the comfortable and unobtrusive BioHarness™ garment with the power and ubiquity of Bluetooth®. BioHarness™ BT enables the capture and transmission of comprehensive physiological data on the wearer exclusively via MOTOROLA ASTRO RADIOS – enabling genuine remote monitoring of human performance and condition in the real world.

The BioHarness™ BT can be used in a diverse range of areas including sports, defense, first responder and healthcare. Its professional-grade BioHarness™ system monitors conditions such as heat state, dehydration or injury by measuring vital signs including heart rate, breathing rate, skin temperature, posture and activity. Using the subject's voice radio, the BioHarness communicates to monitoring software designed to give real-time alerts and post-event analysis.

BioHarness™ BT can be worn in virtually any environment – from combat situations to the training field. It maintains performance under extreme activity. Offering fast, accurate collection and analysis of high-quality, in-depth data, BioHarness™ BT is the definitive product for remote physiological monitoring in all conditions.

Zephyr Physiological Monitoring Ordering Guide

General Information

The ASTRO Digital XTS 2500 Portable Line offers three different radio hardware models:

Hardware Model	Modes	Alphanumeric Display	Keypad	Navigation Pad
		Lines/Characters		
		per Line		
ASTRO XTS 2500 Model I	48	None	None	No
ASTRO XTS 2500 Model I.5	256	6/12/front mount	None	No

ASTRO XTS 2500 Model II	870	6/12/front mount	3 x 2	Yes
ASTRO XTS 2500 Model III	870	6/12/front mount	3 x 6	Yes

Operating Modes

ASTRO Digital XTS 2500 Radio Models are capable of operating in three different voice communication modes:

- Normal Analog (clear voice)
- 3.6KB ASTRO Digital (clear voice)
- 9.6KB ASTRO 25 Digital (clear voice)

The ASTRO Digital XTS 2500 Portable is capable of 48 modes when the programmable Concentric Top Mounted Switch is used for Zone Operation. The mode of operation is programmed on a channel-by-channel basis.

Please note that the XTS 2500 does NOT support FRED.

CHANNEL SPACING

There are no maximum frequency separation conditions that must be adhered to on the ASTRO Digital XTS 2500 Portable Radio Series. Separation of frequencies can be as wide as the allowable sub-band per radio model with no degradation of any performance specifications. If an incorrect antenna is used, degraded performance may be experienced.

FIPS 140-2 Compliance

Encryption Modules equipped with AES are FIPS 140-2 compliant. Further information regarding FIPS 140-2 certification may be found using the following links:

[FIPS 140-2 Crypto Module Validation Program \(CMVP\)](#)

[NIST Cryptographic Module Validation Lists](#)

FLASHport® AFTERMARKET UPGRADES

The ASTRO Digital XTS 2500 Portable Series Radios are part of the FLASHport Program. This means that ASTRO Digital XTS 2500 hardware models can be loaded with different software packages that provide the features and functionalities that your customers require. Three different hardware models are available in each band split.

The ASTRO Digital XTS 2500 portable can be upgraded electronically (via RS232 cable or USB cable are required for all software upgrades) in the field with new systems operation (contingent upon remaining within the same RF sub-band) by ordering upgrade kits.

FM INFORMATION

The XTS 2500 portable radio when properly equipped with options H223, Q393 or Q393SUBM are Factory Mutual (FM/CSA) approved as intrinsically safe for use in, Division 1, Class I, II, III, Groups C, D, E, F, G, T3 without encryption modules.

The XTS 2500 portable radio when properly equipped with options H223, Q393 or Q393SUBM are Factory Mutual (FM/CSA) approved as intrinsically safe for use in, Division 1, Class I, Class II, Class III, Groups D ,F, G, T3C with encryption modules.

ASTRO TEXT MESSAGING SERVICE

ASTRO Text Messaging Service will be available on ASTRO 25 XTS 5000, XTS 2500 Portable radios and ASTRO 25 XTL 5000, XTL 2500 Mobile radios. Text Messaging Service (TMS) allows subscriber users to send and receive text messages to other subscribers or dispatch operators. Users can select messages and addresses from a predefined list or enter freeform text messages and addresses via the keypad. Text Messaging Service is available on ASTRO Trunked IV&D Systems and Subscribers. Subscribers must have version R09.00.00 or later of both Customer Programming Software (CPS) and Radio software.

For full Text Messaging functionality, including freeform text messaging and addressing, must order Model III XTS2500 portables. Model II versions support Limited Text Messaging functionality such as selecting predefined messages or addresses from a list programmed in the radio. Text messaging service is NOT supported on Model I Portables.

Ordering requirements for XTS 2500 Portable:

- Requires Model II or Model III XTS 2500
- Software Trunking 9600 Baud (Q574)
- Packet Data Interface (Q947)

NOTE: *There is no specific option to order for the Text Messaging Service on the subscribers as the functionality is included in the Packet Data option.*

RELATIVE RADIATED RECEIVE SENSITIVITY

The relative radiated receive sensitivity test (formerly referred to as self-quieters) measures the sensitivity from 136.05MHz to 173.975MHz in 12.5kHz steps. The radio is set to 25kHz channel mode. These measurements were taken in a shielded environment so that degraded sensitivity at the discrete frequencies is known to be due to the radio's self-interference (as opposed to external interference.) The following list contains frequencies which were consistently found to have severely degraded performance on all measured radios: 147.4450, 147.4475, 147.4500, 151.1975, 151.2000, 153.6000, 161.9975, 162.000, 162.0025, 165.8975, 165.9000, 165.9025, 167.9975, 168.000, 168.0025, 172.0200, 172.0225.

UPDATED LIST OF FREQUENCIES NOT ALLOWED

When a Platform A radio is repaired with a Platform B RF board there will be additional

frequencies that are not recommended to be used. The following list contains frequencies which were consistently found to have severely degraded performance on all measured radios (secure and non-secure):

VHF (136 to 174 MHz) 140.5, 144, 147.4475, 147.4575, 151.2*, 151.735*, 153.6*, 159.745, 162, 162.295, 165.9, 168*, 170.3975, 172.02

UHF Range 1 (380 to 470 MHz) 381.535, 384, 389.49, 393.195, 396*, 397.4375, 405.38, 413.33, 414*, 415.5, 417.77, 420*, 421.28, 429.23, 429.544, 431.1, 432*, 432.613, 437.18125, 442.344, 445.13125, 450*, 460.8, 466.92, 468*

UHF Range 2 (450 to 520 MHz) 450, 453.6*, 456*, 460.8*, 462, 466.91875, 468*, 469.425, 470.4*, 474, 475.5*, 480, 486*, 487.2*, 491.49375, 492, 497.705, 498, 502.2, 504, 510, 516, 516.065

700/800 MHz (764 – 776 MHz, 851 MHz – 870 MHz) 856.3375, 857.7000, 860.7000, 862.2000, 863.7000, 864.0000, 867.3000

Ordering Requirements

Ordering procedure is as follows:

- 1 H46KDC9PW7BN ASTRO XTS 2500 Portable**
- 1A Q574 9600 Trunking Digital Operation**
- 1B etc**

1. Order the ASTRO Digital XTS 2500 Portable Series as the main line item (H46KDC9PW7_N).
2. Each hardware model MUST be ordered with one Operating Mode. One Operating Mode Package MUST be ordered for each radio unit ordered. Choose between 9600 Trunking and 3600 Analog/ Digital Trunking Operation.

ASTRO Advanced Messaging Solution (AMS)

The ASTRO 25 Advanced Messaging Solutions is the latest messaging platform from Motorola Solutions and will replace ASTRO Text Messaging Service (TMS). As a complete end-to-end solution it leverages the core assets of ASTRO 25 IV&D/CID networks, ASTRO 25 radios, Integrated Command Center applications and Unified Network Services. The application allows responders to send/receive messages and run database queries from ASTRO 25 data enabled portable radios, extending real time information access to the field so dispatchers and first responders can be more efficient and achieve safer outcomes.

Provides functional parity with TMS and leverages the PremierOne messaging services platform, offering multiple configurations to enhance and extend core messaging functionality that can include queries and dispatch notifications. Based upon the configuration chosen, ASTRO 25 Advanced Messaging Solution extends Computer Aided Dispatch (CAD) information beyond the vehicle to select ASTRO 25 Portable radios.

Many Public Safety agencies have experienced the benefits of messaging and sharing important information to/from the communication center (dispatch) and vehicles equipped with MDT's. With ASTRO 25 Advanced Messaging Solution we are extending that capability to responders when Outside the Vehicle.

ASTRO Advanced Messaging Solution will be available on XTS 2500 Dual Display Portable radios. Advanced Messaging is NOT supported on XTS 2500 Top Display Portable radios.

Ordering ASTRO Advanced Messaging Solution for XTS 2500 Portable Requires:

- XTS 2500 Dual Display
- P25 Conventional (Q811)
- Packet Data Interface (Q947)

OR

- XTS 2500 Dual Display

· ASTRO Project 25 Trunking Software (Q574/Q575)

· Packet Data Interface (Q947)

Model

ASTRO® Digital XTS 4000
FLASHport® Aftermarket Upgrades
VHF, UHF Bands
Trunked Radio Systems

Ordering Information

General Information

FLASHport Aftermarket Software is used to upgrade to the latest version of your System Enhancement Software Package or to upgrade to a different System Enhancement Software Package for existing ASTRO Digital XTS 4000 radios in the field. FLASHport Upgrade Kits contain upgrade software, FLASHkey, and upgrade documentation.

Ordering Requirements

1. Specify the *current* System Enhancement Software Package that represents the software in the radio as the main line item (T7455A or T7454A) and order quantity 1 at \$0 (No Charge).
2. Select the *desired* System Enhancement Software Package and enter as sub-items.
3. **IMPORTANT:** If upgrading to a new System Enhancement Software Package, you must use the column which represents that new System Enhancement Software Package to determine price and availability of System Enhancement Options. If you are remaining at the same System Enhancement Software Package, use the column of the current System Enhancement Software Package to determine price and availability of System Enhancement Options.
4. Each sub-items must have the same quantity listed (which equals the number of radios being upgraded) even though the main line is ALWAYS 1.
5. Radio Model number and FLASHcode must be entered into designated COF fields. A separate line item must be entered for each different combination of Radio Model and FLASHcode.

NOTE: The FLASHcode can be read by using the SRIB and RSS.

ASTRO® Digital XTS 5000 Portable Series
700/800 MHz Band
SMARTNET® "Handie-Talkie™" Radio
Conventional/ Secure/ Trunked Radio Systems

Ordering Information

Features

All ASTRO Digital XTS 5000 packaged models include the following hardware features:

- 3 Programmable Side Buttons
- 1 Top Mounted Programmable Button
- 16 Illuminated Position Mode Select Switch
- Angled On/Off Volume
- Low Battery Alert Tone
- Antenna (Band split and Type Dependent on Band Option)
- Smart Battery Technology
- Concentric Switch
- 1 Top Mounted Programmable Three Position Toggle Switch
- Weather Sealed Universal Connector
- Bi-Color LED Indicator
- Nickel Metal Hydride Battery
- ASTRO 25 Detachable Belt Clip

Noise Reduction
Software

Audio Gain Control

ASTRO Digital XTS 5000 Model III also include:

Full Keypad for
Private Call

Keypad Tone Mute

6 Lines Alphanumeric
Display

Large Navigational Keypad

Date and Time Stamp
Real Time Clock

All ASTRO Digital XTS 5000 Portables are part of the FLASHport® program and ship standard with a FLASH EE Prom, which allows for feature and system upgrades (contingent upon remaining within the same RF deck.)

Physiological Monitoring Solution

Physiological Monitoring is now available on the ASTRO 25 XTS5000 and XTS2500 portable radios. The Zephyr BioHarness™ BT couples the pioneering Smart Fabric sensor technology of the comfortable and unobtrusive BioHarness™ garment with the power and ubiquity of Bluetooth®. BioHarness™ BT enables the capture and transmission of comprehensive physiological data on the wearer exclusively via MOTOROLA ASTRO RADIOS – enabling genuine remote monitoring of human performance and condition in the real world.

The BioHarness™ BT can be used in a diverse range of areas including sports, defense, first responder and healthcare. Its professional-grade BioHarness™ system monitors conditions such as heat state, dehydration or injury by measuring vital signs including heart rate, breathing rate, skin temperature, posture and activity. Using the subject's voice radio, the BioHarness communicates to monitoring software designed to give real-time alerts and post-event analysis.

BioHarness™ BT can be worn in virtually any environment – from combat situations to the training field. It maintains performance under extreme activity. Offering fast, accurate collection and analysis of high-quality, in-depth data, BioHarness™ BT is the definitive product for remote physiological monitoring in all conditions.

[Zephyr Physiological Monitoring Ordering Guide](#)

General Information

The ASTRO Digital XTS 5000 Portable Line offers three different radio hardware models:

Hardware Model	Modes	Alphanumeric Display	Keypad	Navigation Pad
		Lines/Characters		
		Per Line		
ASTRO XTS 5000 Model I	48	None	None	No
ASTRO XTS 5000 Model	1000	6/12/front mount	3 x 2	Yes

ASTRO XTS 5000 Model 	1000	6/12/front mount	3 x 6	Yes

Operating Modes

ASTRO Digital XTS 5000 Radio Models are capable of operating in three different voice communication modes:

- Normal Analog (clear voice)
- 3.6KB ASTRO Digital (both clear and coded voice)
- 9.6KB ASTRO 25 Digital (both clear and coded voice) >

The mode of operation is programmed on a channel-by-channel basis. With the coded/clear switch set to the clear mode, the ASTRO Digital XTS 5000 radio is capable of transmitting clear analog voice or clear (unencrypted) ASTRO digital voice, depending on the channel programming. With the coded/clear switch set to the coded mode, the ASTRO Digital XTS 5000 radio will transmit ASTRO Digital Encryption depending on the channel programming. ASTRO digital encryption provides communications security. ASTRO Digital Encryption (operating in encrypted mode while also operating in the 3.6KB or 9.6 KB ASTRO mode) is capable of XL type encryptions; ASTRO Digital Encryption Does not operate with non-XL encryptions.

An Encryption Option is not required for either clear analog operation or clear ASTRO digital operation. Encryption can be ordered with the ASTRO Digital XTS 5000 radio either as a factory installed option or separate from the radio for later field installation. ASTRO Digital XTS 5000 radio functions include selected ASTRO digital signaling and digital speech coding.

Please note that the XTS5000 does NOT support FRED.

CHANNEL SPACING

There are no maximum frequency separation conditions that must be adhered to on the ASTRO Digital XTS5000 Portable Radio Series. Separation of frequencies can be as wide as the allowable sub-band per radio model with no degradation of any performance specifications. If an incorrect antenna is used, degraded performance may be experienced.

FLASHport AFTERMARKET UPGRADES

The ASTRO Digital XTS 5000 Portable Series Radios are part of the FLASHport Program. This means that ASTRO Digital XTS 5000 hardware models can be loaded with different software packages that provide the features and functionalities that your customers require. Three different hardware models are available in each band split.

System Enhancement Options can be loaded at the time of radio purchase or at a later date through the use of software field upgrades (a RS232 cable or USB cable are required for all software upgrades.) The ASTRO Digital XTS 5000 portable can be upgraded electronically in the field with new features in the current system or to new systems operation (contingent upon remaining within the same RF sub-band) by ordering upgrade kits.

Ordering Requirements

Ordering procedure is as follows...

1 H18UCH9PW N ASTRO XTS 5000 Portable

1A Q806 Digital Operation

1B H38 SmartZone® Operation

1C ETC

1. Order the ASTRO Digital XTS 5000 Portable Series as the main line item (H18UCH9PW7_N).
2. Each hardware model MUST be ordered with one Operating Mode. One Operating Mode for each radio unit ordered. Choose between Analog or Digital Operation.
3. Each Hardware model MUST be ordered with one System Software Package. One System Software Package for each radio unit ordered.
 - The matrix below list available radio wide, conventional features, and standard trunking features for SMARTNET(H37) and SmartZone(H38) System Packages.
 - The SmartZone features listed in the second matrix are available in the SmartZone(H38) package ONLY.
4. Select ANY desired System Enhancement Options
 - System Enhancement Options can be loaded at the time of radio purchase or at a later date through the use of software field upgrades (a RS232 cable or USB cable are required for all software upgrades.)

CONVENTIONAL FACTORY PROGRAMMING

ASTRO Digital XTS 5000 portables ship without customer specific factory programming unless a programming options is specified. **Programming of the following frequencies are not allowed: 772.8000, 774.0000, 856.8000, and 864.0000 MHz**

FREQUENCY AND SQUELCH CODES

Although some models of the ASTRO Digital XTS 5000 are capable of 512 channels, the factory can accommodate the programming of only 128 continuous channels in any one radio. If the programming of more than 128 continuous channels is desired, field

programming software must be used. **H477 ADD: Frequency & Squelch Data No Charge**

ZONED OPERATION

This option converts MODE-ONLY ASTRO Digital XTS 5000 portables to Zone Operation radios. A maximum of 16 RX and TX pairs can be placed into a zone. There is a maximum of three zones (48 modes) on the "I" Model, with zone operation programmed to the programmable top mounted two-position concentric switch. There is a maximum of 16 zones (512 modes) on the "II" and "III" models, and the zones will be programmed to be selected from the keypad. The factory can only accommodate the programming of only 128 continuous channels consisting of any combination of zones and channels and minimum of 32 channels with two zones on the "I" models. **When you ordering H477, H371 must be ordered. H371 ADD: ASTRO Digital XTS 5000 Zone Operation No Charge**

PROJECT 25 ENCRYPTION

When ordering any of the Encryption Algorithm:

- **Must** order the Encryption UCM Hardware (Q159)
 - The DES-OFB and AES encryptions offered are compliant with digital Project 25 standards and does not support analog encryption operation.
 - **Requires** the ASTRO Digital CAI (Q806) to operate the DES-OFB and AES encryption.
- If ordering a Dual Encryption:
 - The non-OFB encryption (XL versions) can be operated in either analog , or CAI digital mode, but will not be Project 25 compliant.
 - **Requires** the Multikey (H869).
- When used in CAI mode, the non-OFB Encryption will not be Project 25 compliant.
 - Encryption UCM Hardware (Q159) module may be ordered without an Encryption Algorithm for later upgrade in the field.

FIELD INSTALLED PROJECT 25 ENCRYPTION

The DES-OFB and AES encryptions offered are compliant with Project 25 standards. Operation of DES-OFB and/or AES encryption requires the ASTRO Digital CAI (Q806) option. Radios can be upgraded via FLASHport to CAI operation.

- If ordering a Dual Encryption:
 - The non-OFB encryption can be operated in analog or CAI mode (only XL versions operate in either digital mode).
 - **Requires** the Multikey (H869).
- When used in the CAI mode, the non-OFB encryption will not be Project 25 compliant.

FIPS 140-2 COMPLIANCE

Encryption Modules equipped with AES are FIPS 140-2 compliant. Further information regarding FIPS 140-2 certification may be found using the following links:

[FIPS 140-2 Crypto Module Validation Program \(CMVP\)](#)

[NIST Cryptographic Module Validation Lists](#)

FM INFORMATION

The XTS 5000 portable radio when properly equipped with options H223CC, H223RUGDCE, Q393AN, and Q393RUGDAR are Factory Mutual (FM/CSA) Approved as intrinsically safe for use in Class I, II, III, Division 1, Group C, D, E, F, and G and Nonincendive Class I, Division 2, Group A, B, C and D, when ordered without encryption modules.

The XTS 5000 portables equipped with UCM encryption modules and options H223CD, H223RUGDCF, Q393AP, and Q393RUGDAQ are FM Approved as Intrinsically Safe for use in Class I, II, III, Division 1, Group D, F, G and Nonincendive for use in Class I, Div 2, Group A, B, C, D only.

Type 1 is not offered on either the 700/800 or UHF R2 bands. XTS 5000 FM/CSA approved portable radio models installed with Type 1 encryption module (Q374 or Q400), are intrinsically safe for use in the Nonincendive, Class I, Division 2, Groups A, B, C, D, when used with Motorola FM/CSA approved battery options Q393AV and Q393RUGDAW or H223CP and H223RUGDCW.

ASTRO Text Messaging Service

ASTRO Text Messaging Service will be available on ASTRO 25 XTS 5000, XTS 2500 Portable radios and ASTRO 25 XTL 5000, XTL 2500 Mobile radios. Text Messaging Service (TMS) allows subscriber users to send and receive text messages to other subscribers or dispatch operators. Users can select messages and addresses from a predefined list or enter freeform text messages and addresses via the keypad. Text Messaging Service is available on ASTRO Trunked IV&D Systems and Subscribers. Subscribers must have version R09.00.00 or later of both Customer Programming Software (CPS) and Radio software .

For full Text Messaging functionality, including freeform text messaging and addressing, must order Model III XTS5000 portables. Model II versions support Limited Text Messaging functionality such as selecting predefined messages or addresses from a list programmed in the radio. Text messaging service is NOT supported on Model I Portables.

Ordering requirements for XTS 5000 Portable:

- Requires Model II or Model III XTS 5000
- ASTRO Digital CAI Operation (G806)
- SmartZone Operation (H38)
- ASTRO Project 25 Trunking Software (Q361)
- Packet Data Interface (Q947)

NOTE: *There is no specific option to order for the Text Messaging Service on the subscribers as the functionality is included in the Packet Data option*

Outdoor Personnel Location Global Positioning Satellite (GPS) Feature

The personnel outdoor location tracking GPS feature enables a dispatcher the ability to locate on-foot patrols and out of the vehicle officers who are involved in life threatening

situations. The radio user's GPS position information is sent over the ASTRO 25 Integrated Voice & Data (IV&D) network and is delivered to the dispatch operator using a third party mapping display application at the dispatch center (*Mapping Application is not yet available through Motorola at this time, however an Application Developers Tool Kit is available for 3rd party vendors to use to modify existing applications. See link below for more details.*)

This capability is now available on ASTRO 25 Conventional IV&D Systems and ASTRO 25 Trunking IV&D Systems on XTS 5000 Models I, II, III and Ruggedized with appropriate radio software (see below).

Required equipment for operating in ASTRO 25 Conventional IV&D and ASTRO 25 Trunking IV&D Systems is as follows:

	ASTRO 25 Conventional IV&D	ASTRO 25 Trunking IV&D
Radio Software	Version R09.00.00 or later	Version R09.00.00
Customer Programming Software (CPS)	Version R09.00.00 or later (RVN4181)	Version R09.00.00 or later (RVN4181)
ASTRO CAI operation	Q806	Q806
System Enhancement Software	H35 (or H37, H38 in Conventional Mode)	H38
ASTRO Project 25 Trunking Software		Q361
GPS Remote Speaker Microphone/GPS Remote Speaker Microphone with Earjack	HMN4080 or HMN4084	HMN4080 or HMN4084

For fielded XTS 5000 Portables that are already Conventional IMBE Digital Enabled or Trunking IMBE Digital Enabled, see FLASHport upgrade Price Pages to order a software refresh to get the GPS enabled software.

During normal operation the radio's battery capacity will be reduced by 10% to 16% based on 1 location update per minute.

NOT COMPATIBLE with Man -Down Side Connector (NTN7660), Clamshell Battery Holder (Q495, Q496, NTN9183).

NOTE:

The GPS technology uses radio signals from earth orbiting satellites, to establish the location co-ordinates, maximizing your view of clear, unobstructed sky is essential for

optimum performance. Where adequate signals from multiple satellites are not available, (usually because you cannot establish a view of a wide area of the sky), the GPS feature of your GPS RSM WILL NOT WORK. Such situations include but are not limited to:

In underground locations

Inside of buildings, trains, or other covered vehicles

Under any other metal or concrete roof or structure

Between tall buildings or under dense tree-cover

PUBLIC SAFETY SPEAKER MICROPHONES (PSM)

The RF switch has been removed from the XTS Radio to provide cost savings on the model. Therefore, the EXTERNAL RF SWITCH must be ORDERED and then ATTACHED to the radio in order for the PSM to operate. A wrench tool must be used to place the RF switch. These kits must be ordered separately. The RF switch and microphones are FM approved.

ASTRO Advanced Messaging Solution (AMS)

The ASTRO 25 Advanced Messaging Solutions is the latest messaging platform from Motorola Solutions and will replace ASTRO Text Messaging Service (TMS). As a complete end-to-end solution it leverages the core assets of ASTRO 25 IV&D/CID networks, ASTRO 25 radios, Integrated Command Center applications and Unified Network Services. The application allows responders to send/receive messages and run database queries from ASTRO 25 data enabled portable radios, extending real time information access to the field so dispatchers and first responders can be more efficient and achieve safer outcomes.

Provides functional parity with TMS and leverages the PremierOne messaging services platform, offering multiple configurations to enhance and extend core messaging functionality that can include queries and dispatch notifications. Based upon the configuration chosen, ASTRO 25 Advanced Messaging Solution extends Computer Aided Dispatch (CAD) information beyond the vehicle to select ASTRO 25 Portable radios.

Many Public Safety agencies have experienced the benefits of messaging and sharing important information to/from the communication center (dispatch) and vehicles equipped with MDT's. With ASTRO 25 Advanced Messaging Solution we are extending that capability to responders when Outside the Vehicle.

ASTRO Advanced Messaging Solution will be available on XTS 5000 Dual Display Portable radios. Advanced Messaging is NOT supported on XTS 5000 Top Display Portable radios.

Ordering ASTRO Advanced Messaging Solution for XTS 5000 Portable Requires:

- XTS 5000 Dual Display
- ASTRO Digital CAI Operation (Q806)
- P25 Conventional (H35)
- Packet Data Interface (Q947)

OR

- XTS 5000 Dual Display
- ASTRO Digital CAI Operation (Q806)
- SmartZone Operation (H38)
- ASTRO Project 25 Trunking Software (Q361)
- Packet Data Interface (Q947)

Model

ASTRO® Digital XTS 5000™ Portable Series
UHF RANGE 1 / TYPE 1 Encryption
SMARTNET® "Handie-Talkie™" Radio
Conventional/ Secure/ Trunked Radio Systems

Ordering Information

Features

All ASTRO Digital XTS 5000 packaged models include the following hardware features:

- 3 Programmable Side Buttons
- Orange Emergency Button
- Illuminated 16 Position Mode Rotary Select Switch
- Angled On/Off Volume
- Low Battery Alert Tone
- Antenna (Band split and Type Dependent on Band Option)
- Smart Battery Technology
- Noise Reduction Software
- 1 Top Mounted Programmable Two Position Concentric Switch
- 1 Top Mounted Programmable Three Position Toggle Switch
- Weather Sealed Universal Connector
- Bi-Color LED Indicator
- Nickel Metal Hydride Battery
- Detachable Belt Clip
- ASTRO 25
- Audio Gain Control

ASTRO Digital XTS 5000 Model III also include:

- Full Keypad for Private Call
- 6 Lines Alphanumeric Display
- Date and Time Stamp
- Keypad Tone Mute
- Large Navigational Keypad
- Real Time Clock

All ASTRO Digital XTS 5000 Portables are part of the FLASHport® program and ship standard with a FLASH EE Prom, which allows for feature and system upgrades (contingent upon remaining within the same RF deck.)

Physiological Monitoring Solution

Physiological Monitoring is now available on the ASTRO 25 XTS5000 and XTS2500 portable radios. The Zephyr

BioHarness™ BT couples the pioneering Smart Fabric sensor technology of the comfortable and unobtrusive BioHarness™ garment with the power and ubiquity of Bluetooth®. BioHarness™ BT enables the capture and transmission of comprehensive physiological data on the wearer exclusively via MOTOROLA ASTRO RADIOS – enabling genuine remote monitoring of human performance and condition in the real world.

The BioHarness™ BT can be used in a diverse range of areas including sports, defense, first responder and healthcare. Its professional-grade BioHarness™ system monitors conditions such as heat state, dehydration or injury by measuring vital signs including heart rate, breathing rate, skin temperature, posture and activity. Using the subject's voice radio, the BioHarness communicates to monitoring software designed to give real-time alerts and post-event analysis.

BioHarness™ BT can be worn in virtually any environment – from combat situations to the training field. It maintains performance under extreme activity. Offering fast, accurate collection and analysis of high-quality, in-depth data, BioHarness™ BT is the definitive product for remote physiological monitoring in all conditions.

Zephyr Physiological Monitoring Ordering Guide

General Information

The ASTRO Digital XTS 5000 Portable Line offers three different radio hardware models:

Hardware Model	Modes	Alphanumeric Display	Keypad	Navigation Pad
		Lines/Characters		
		Per Line		
ASTRO XTS 5000 Model I	48	None	None	No
ASTRO XTS 5000 Model II	1000	6/12/front mount	3 x 2	Yes
ASTRO XTS 5000 Model III	1000	6/12/front mount	3 x 6	Yes

Operating Modes

ASTRO Digital XTS 5000 Radio Models are capable of operating in three different voice communication modes:

- Normal Analog (clear voice)
- 3.6KB ASTRO Digital (both clear and coded voice)
- 9.6KB ASTRO 25 Digital (both clear and coded voice)

An Encryption Option is not required for either clear analog operation or clear ASTRO digital operation. Encryption can be ordered with the ASTRO Digital XTS 5000 radio either as a factory installed option or separate from the radio for later field installation. ASTRO Digital XTS 5000 radio functions include selected ASTRO digital signaling and digital speech coding.

Please note that the XTS5000 does NOT support FRED.

CHANNEL SPACING

There are no maximum frequency separation conditions that must be adhered to on the ASTRO Digital XTS 5000 Portable Radio Series. Separation of frequencies can be as wide as the allowable sub-band per radio model with no degradation of any performance specifications. If an incorrect antenna is used, degraded performance may be experienced.

FLASHport AFTERMARKET UPGRADES

The ASTRO Digital XTS 5000 Portable Series Radios are part of the FLASHport Program. This means that ASTRO Digital XTS 5000 hardware models can be loaded with different software packages that provide the features and functionalities that your customers require. Three different hardware models are available in each band split.

System Enhancement Options can be loaded at the time of radio purchase or at a later date through the use of software field upgrades (a RS232 cable or USB cable are required for all software upgrades.) The ASTRO Digital XTS 5000 portable can be upgraded electronically in the field with new features in the current system or to new systems operation (contingent upon remaining within the same RF sub-band) by ordering upgrade kits.

CONVENTIONAL FACTORY PROGRAMMING

ASTRO Digital XTS 5000 portables ship without customer specific factory programming unless a programming options is specified.

FREQUENCY AND SQUELCH CODES

Although some models of the ASTRO Digital XTS 5000 are capable of 512 channels, the factory can accommodate the programming of only 128 continuous channels in any one radio. If the programming of more than 128 continuous channels is desired, field programming software must be used. **Programming of the following frequencies is not allowed: 386.4000, 396.0000, 403.2000, 414.0000, 420.0000, 432.0000, 436.8000, 450.0000, 453.6000 and 468.0000.**

H477 ADD: Frequency & Squelch Data No Charge

ZONED OPERATION

This option converts MODE-ONLY ASTRO Digital XTS 5000 portables to Zone Operation radios. A maximum of 16 RX and TX pairs can be placed into a zone. There is a maximum of three zones (48 modes) on the "I" Model, with zone operation programmed to the programmable top mounted two-position concentric switch. There is a maximum of 16 zones (512 modes) on the "II" and "III" models, and the zones will be programmed to be selected from the keypad. The factory can only accommodate the programming of only 128 continuous channels consisting of any combination of zones and channels and minimum of 32 channels with two zones on the "II" models. **When you ordering H477, H371 must be ordered.**

PROJECT 25 ENCRYPTION

When ordering any of the Encryption Algorithm:

FIELD INSTALLED PROJECT 25 ENCRYPTION

The DES-OFB and AES encryptions offered are compliant with Project 25 standards. Operation of DES-OFB and/or AES encryption requires the ASTRO Digital CAI (Q806) option. Radios can be upgraded via FLASHport to CAI operation.

FIPS 140-2 Compliance

Encryption Modules equipped with AES are FIPS 140-2 compliant. Further information regarding FIPS 140-2 certification may be found using the following links:

[FIPS 140-2 Crypto Module Validation Program \(CMVP\)](#)

[NIST Cryptographic Module Validation Lists](#)

FM INFORMATION

The XTS 5000 portable radio when properly equipped with options Q393AN and Q393RUGDAR are Factory Mutual (FM/CSA) Approved as intrinsically safe for use in Class I, II, III, Division 1, Group C, D, E, F, and G and Nonincendive Class I, Division 2, Group A, B, C and D, when ordered without encryption modules.

The XTS 5000 portables equipped with UCM encryption modules and options Q393AP and Q393RUGDAQ are FM/CSA Approved as Intrinsically Safe for use in Class I, II, III, Division 1, Group D, F, G and Nonincendive for use in Class I, Div 2, Group A, B, C, D only.

XTS 5000 FM/CSA approved portable radio models installed with Type 1 encryption module (Q374 or Q400), are intrinsically safe for use in the Nonincendive, Class I, Division 2, Groups A, B, C, D, when used with Motorola FM/CSA approved battery options Q393AV and Q393RUGDAW or H223CP and H223RUGDCW. Type 1 is not offered on either the 700/800 or UHF R2 bands.

ASTRO Text Messaging Service

ASTRO Text Messaging Service will be available on ASTRO 25 XTS 5000, XTS 2500 Portable radios and ASTRO 25 XTL 5000, XTL 2500 Mobile radios. Text Messaging Service (TMS) allows subscriber users to send and receive text messages to other subscribers or dispatch operators. Users can select messages and addresses from a predefined list or enter freeform text messages and addresses via the keypad. Text Messaging Service is available on ASTRO Trunked IV&D Systems and Subscribers. Subscribers must have version R09.00.00 or later of both Customer Programming Software (CPS) and Radio software .

For full Text Messaging functionality, including freeform text messaging and addressing, must order Model III XTS5000 portables. Model II versions support Limited Text Messaging functionality such as selecting predefined messages or addresses from a list programmed in the radio. Text messaging service is NOT supported on Model I Portables.

Ordering requirements for XTS 5000 Portable:

NOTE: There is no specific option to order for the Text Messaging Service on the subscribers as the functionality is included in the Packet Data option.

• Outdoor Personnel Location Global Positioning Satellite (GPS) Feature

The personnel outdoor location tracking GPS feature enables a dispatcher the ability to locate on-foot patrols and out of the vehicle officers who are involved in life threatening situations. The radio user's GPS position information is sent over the ASTRO 25 Integrated Voice & Data (IV&D) network and is delivered to the dispatch operator using a third party mapping display application at the dispatch center (*Mapping Application is not yet available through Motorola at this time, however an Application Developers Tool Kit is available for 3rd party vendors to use to modify existing applications. See link below for more details.*)

This capability is now available on ASTRO 25 Conventional IV&D Systems and ASTRO 25 Trunking IV&D Systems on XTS 5000 Models I, II, III and Ruggedized with appropriate radio software (see below).

Required equipment for operating in ASTRO 25 Conventional IV&D and ASTRO 25 Trunking IV&D Systems is as follows:

	ASTRO 25 Conventional IV&D	ASTRO 25 Trunking IV&D
Radio Software	Version R09.00.00 or later	Version R09.00.00
Customer Programming Software (CPS)	Version R09.00.00 or later (RVN4181)	Version R09.00.00 or later (RVN4181)
ASTRO CAI operation	Q806	Q806
System Enhancement Software	H35 (or H37, H38 in Conventional Mode)	H38
ASTRO Project 25 Trunking Software		Q361
GPS Remote Speaker Microphone/GPS Remote Speaker Microphone with Earjack	HMN4080 or HMN4084	HMN4080 or HMN4084

For fielded XTS 5000 Portables that are already Conventional IMBE Digital Enabled or Trunking IMBE Digital Enabled, see FLASHport upgrade Price Pages to order a software refresh to get the GPS enabled software.

During normal operation the radio's battery capacity will be reduced by 10% to 16% based on 1 location update per minute.

NOT COMPATIBLE with Man -Down Side Connector (NTN7660), Clamshell Battery Holder (Q495, Q496, NTN9183).

NOTE:

The GPS technology uses radio signals from earth orbiting satellites, to establish the location co-ordinates, maximizing your view of clear, unobstructed sky is essential for optimum performance. Where adequate signals from multiple satellites are not available, (usually because you cannot establish a view of a wide area of the sky), the GPS feature of your GPS RSM WILL NOT WORK. Such situations include but are not limited to:

- *In underground locations*
- *Inside of buildings, trains, or other covered vehicles*
- *Under any other metal or concrete roof or structure*
- *Between tall buildings or under dense tree-cover*

PUBLIC SAFETY SPEAKER MICROPHONES (PSM)

The RF switch has been removed from the XTS Radio to provide cost savings on the model. Therefore, the EXTERNAL RF SWITCH must be ORDERED and then ATTACHED to the radio in order for the PSM to operate. A wrench tool must be used to place the RF switch. These kits must be ordered separately. The RF switch and microphones are FM approved.

SELF-QUIETING SPURS

- 16.8 MHz is radio's main Reference Oscillator used on RF and Vocon board as main frequency source. This

frequency is generously available on the Vocon board to the Patriot and Flipper ICs, and unfortunately a low level emitted frequency being picked up by the radio's receiver.

- 1.2, 1.5, 1.8 Hz are Abacus 3 frame sync clocks (programmable) for RX base band data transfer to Patriot. The values shown here are where the 3 frequency multiples intersect.

Self-Quieting Spurs

Frequency (MHz) Source

386.4000	multiple of 16.8 MHz
396.0000	multiple of 1.2, 1.5, and 1.8 MHz
396.0000	multiple of 1.2, 1.5, and 1.8 MHz
403.2000	multiple of 16.8 MHz
414.0000	multiple of 1.2, 1.5, and 1.8 MHz
420.0000	multiple of 16.8 MHz
432.0000	multiple of 1.2, 1.5, and 1.8 MHz
436.8000	multiple of 16.8 MHz
450.0000	multiple of 1.2, 1.5, and 1.8 MHz
453.6000	multiple of 16.8 MHz
468.0000	multiple of 1.2, 1.5, and 1.8 MHz

- 1. Order the ASTRO Digital XTS 5000 Portable Series as the main line item (H18UCH9PW7_N).
 2. Each hardware model MUST be ordered with one Operating Mode. One Operating Mode for each radio unit ordered. Choose between Analog or Digital Operation.
 3. Each Hardware model MUST be ordered with one System Software Package. One System Software Package for each radio unit ordered.
 - The matrix below list available radio wide, conventional features, and standard trunking features for SMARTNET (H37) and SmartZone (H38) System Packages.
 - The SmartZone features listed in the second matrix are available in the SmartZone (H38) package ONLY.
 4. Select ANY desired System Enhancement Options
 - System Enhancement Options can be loaded at the time of radio purchase or at a later date through the use of software field upgrades (a RS232 cable or USB cable are required for all software upgrades.)
 - **Must** order the Encryption UCM Hardware (Q159)
 - The DES-OFB and AES encryptions offered are compliant with digital Project 25 standards and does not support analog encryption operation.
 - **Requires** the ASTRO Digital CAI (Q806) to operate the DES-OFB and AES encryption.
 - If ordering a Dual Encryption:
 - The non-OFB encryption (XL versions) can be operated in either analog , or CAI digital mode, but will not be Project 25 compliant.
 - **Requires** the Multikey (H869).
 - When used in CAI mode, the non-OFB Encryption will not be Project 25 compliant.
 - Encryption UCM Hardware (Q159) module may be ordered without an Encryption Algorithm for later upgrade in the field.
 - If ordering a Dual Encryption:
 - The non-OFB encryption can be operated in analog or CAI mode (only XL versions operate in either digital mode).
 - **Requires** the Multikey (H869).
 - When used in the CAI mode, the non-OFB encryption will not be Project 25 compliant.
- Requires Model II or Model III XTS 5000
 - ASTRO Digital CAI Operation (G806)
 - SmartZone Operation (H38)
 - ASTRO Project 25 Trunking Software (Q361)
 - Packet Data Interface (Q947)

ASTRO Advanced Messaging Solution (AMS)

The ASTRO 25 Advanced Messaging Solutions is the latest messaging platform from Motorola Solutions and will replace ASTRO Text Messaging Service (TMS). As a complete end-to-end solution it leverages the core assets of ASTRO 25 IV&D/CID networks, ASTRO 25 radios, Integrated Command Center applications and Unified Network Services. The application allows responders to send/receive messages and run database queries from ASTRO 25 data enabled portable radios, extending real time information access to the field so dispatchers and first responders can be more efficient and achieve safer outcomes.

Provides functional parity with TMS and leverages the PremierOne messaging services platform, offering multiple configurations to enhance and extend core messaging functionality that can include queries and dispatch notifications. Based upon the configuration chosen, ASTRO 25 Advanced Messaging Solution extends Computer Aided Dispatch (CAD) information beyond the vehicle to select ASTRO 25 Portable radios.

Many Public Safety agencies have experienced the benefits of messaging and sharing important information to/from the communication center (dispatch) and vehicles equipped with MDT's. With ASTRO 25 Advanced Messaging Solution we are extending that capability to responders when Outside the Vehicle.

ASTRO Advanced Messaging Solution will be available on XTS 5000 Dual Display Portable radios. Advanced Messaging is NOT supported on XTS 5000 Top Display Portable radios.

Ordering ASTRO Advanced Messaging Solution for XTS 5000 Portable Requires:

- XTS 5000 Dual Display
- ASTRO Digital CAI Operation (Q806)
- P25 Conventional (H35)
- Packet Data Interface (Q947)

OR

- XTS 5000 Dual Display
- ASTRO Digital CAI Operation (Q806)
- SmartZone Operation (H38)
- ASTRO Project 25 Trunking Software (Q361)
- Packet Data Interface (Q947)

Model

ASTRO® Digital XTS 5000 Portable Series
VHF / TYPE 1 Encryption
SMARTNET® "Handie-Talkie™" Radio
Conventional/ Secure/ Trunked Radio Systems

Ordering Information

Features

All ASTRO Digital XTS 5000 packaged models include the following hardware features:

- 3 Programmable Side Buttons
- Orange Emergency Button
- Illuminated 16 Position Mode Rotary Select Switch
- Angled On/Off Volume
- Low Battery Alert Tone
- Antenna (Band split and Type Dependent on Band Option)
- 1 Top Mounted Programmable Two Position Concentric Switch
- 1 Top Mounted Programmable Three Position Toggle Switch
- Weather Sealed Universal Connector
- Bi-Color LED Indicator
- Nickel Metal Hydride Battery
- Detachable Belt Clip

- Smart Battery Technology
- Noise Reduction Software
- ASTRO 25
- Audio Gain Control

ASTRO Digital XTS 5000 Model III also include:

- Full Keypad for Private Call
- 6 Lines Alphanumeric Display
- Date and Time Stamp
- Keypad Tone Mute
- Large Navigational Keypad
- Real Time Clock

All ASTRO Digital XTS 5000 Portables are part of the FLASHport® program and ship standard with a FLASH EE Prom, which allows for feature and system upgrades (contingent upon remaining within the same RF deck.)

Physiological Monitoring Solution

Physiological Monitoring is now available on the ASTRO 25 XTS5000 and XTS2500 portable radios. The Zephyr BioHarness™ BT couples the pioneering Smart Fabric sensor technology of the comfortable and unobtrusive BioHarness™ garment with the power and ubiquity of Bluetooth®. BioHarness™ BT enables the capture and transmission of comprehensive physiological data on the wearer exclusively via MOTOROLA ASTRO RADIOS – enabling genuine remote monitoring of human performance and condition in the real world.

The BioHarness™ BT can be used in a diverse range of areas including sports, defense, first responder and healthcare. Its professional-grade BioHarness™ system monitors conditions such as heat state, dehydration or injury by measuring vital signs including heart rate, breathing rate, skin temperature, posture and activity. Using the subject’s voice radio, the BioHarness communicates to monitoring software designed to give real-time alerts and post-event analysis.

BioHarness™ BT can be worn in virtually any environment – from combat situations to the training field. It maintains performance under extreme activity. Offering fast, accurate collection and analysis of high-quality, in-depth data, BioHarness™ BT is the definitive product for remote physiological monitoring in all conditions.

Zephyr Physiological Monitoring Ordering Guide

General Information

The ASTRO Digital XTS 5000 Portable Line offers three different radio hardware models:

Hardware Model	Modes	Alphanumeric Display	Keypad	Navigation Pad
		Lines/Characters		
		Per Line		
ASTRO XTS 5000 Model I	48	None	None	No
ASTRO XTS 5000 Model				

II	1000	6/12/front mount	3 x 2	Yes
ASTRO XTS 5000 Model III	1000	6/12/front mount	3 x 6	Yes

Operating Modes

ASTRO Digital XTS 5000 Radio Models are capable of operating in three different voice communication modes:

- Normal Analog (clear voice)
- 3.6KB ASTRO Digital (both clear and coded voice)
- 9.6KB ASTRO 25 Digital (both clear and coded voice)

The mode of operation is programmed on a channel-by-channel basis. With the coded/clear switch set to the clear mode, the ASTRO Digital XTS 5000 radio is capable of transmitting clear analog voice or clear (unencrypted) ASTRO digital voice, depending on the channel programming. With the coded/clear switch set to the coded mode, the ASTRO Digital XTS 5000 radio will transmit ASTRO Digital Encryption depending on the channel programming. ASTRO digital encryption provides communications security. ASTRO Digital Encryption (operating in encrypted mode while also operating in the 3.6KB or 9.6 KB ASTRO mode) is capable of XL type encryptions; ASTRO Digital Encryption Does not operate with non-XL encryptions.

An Encryption Option is not required for either clear analog operation or clear ASTRO digital operation. Encryption can be ordered with the ASTRO Digital XTS 5000 radio either as a factory installed option or separate from the radio for later field installation. ASTRO Digital XTS 5000 radio functions include selected ASTRO digital signaling and digital speech coding.

Please note that the XTS5000 does NOT support FRED.

CHANNEL SPACING

There are no maximum frequency separation conditions that must be adhered to on the ASTRO Digital XTS5000 Portable Radio Series. Separation of frequencies can be as wide as the allowable sub-band per radio model with no degradation of any performance specifications. If an incorrect antenna is used, degraded performance may be experienced.

FLASHport AFTERMARKET UPGRADES

The ASTRO Digital XTS 5000 Portable Series Radios are part of the FLASHport Program. This means that ASTRO Digital XTS 5000 hardware models can be loaded with different software packages that provide the features and functionalities that your customers require. Three different hardware models are available in each band split.

System Enhancement Options can be loaded at the time of radio purchase or at a later date through the use of software field upgrades (a RS232 cable or USB cable are required for all software upgrades.) The ASTRO Digital XTS 5000 portable can be upgraded electronically in the field with new features in the current system or to new systems operation (contingent upon remaining within the same RF sub-band) by ordering upgrade kits.

RELATIVE RADIATED RECEIVE SENSITIVITY

The relative radiated receive sensitivity test (formerly referred to as self-quieters) measures the sensitivity from 136.05MHz to 173.975MHz in 12.5kHz steps. The radio is set to 25kHz channel mode. These measurements were taken in a shielded environment so that degraded sensitivity at discrete frequencies is known to be due to the radio's self-interference (as opposed to external interference). The following list contains frequencies which were consistently found to have severely degraded performance on all measured radios.

Block Out Frequencies	approximate degradation in dB (+/-5dB)
168.0000 MHz	33
144.0000 MHz	15
151.2000 MHz	20
162.0000 MHz	15
168.5250 MHz	9
169.0000 MHz	8
147.4625 MHz	10
167.4750 MHz	8
150.0125 MHz	10

Ordering Requirements

Ordering procedure is as follows...

1 H18UCH9PW N ASTRO XTS 5000 Portable

1A Q806

Digital Operation

1B H38

SmartZone® Operation

1C etc.

- Order the ASTRO Digital XTS 5000 Portable Series as the main line item (H18UCH9PW7_N).
- Each hardware model **MUST** be ordered with one Operating Mode. One Operating Mode for each radio unit ordered. Choose between Analog or Digital Operation.
- Each Hardware model **MUST** be ordered with one System Software Package. One System Software Package for each radio unit ordered.
 - The matrix below list available radio wide, conventional features, and standard trunking features for SMARTNET® (H37) and SmartZone(H38) System Packages.
 - The SmartZone features listed in the second matrix are available in the SmartZone(H38) package ONLY.
- Select ANY desired System Enhancement Options
 - System Enhancement Options can be loaded at the time of radio purchase or at a later date through the use of software field upgrades (a RS232 cable or USB cable are required for all software upgrades.)

MDC Call Lists (Call Alert / Select Call)	Yes
MDC Emergency	Yes

CONVENTIONAL FACTORY PROGRAMMING

ASTRO Digital XTS 5000 portables ship without customer specific factory programming unless a programming options is specified.

FREQUENCY AND SQUELCH CODES

Although some models of the ASTRO Digital XTS 5000 are capable of 512 channels, the factory can accommodate the programming of only 128 continuous channels in any one radio. If the programming of more than 128 continuous channels is desired, field programming software must be used. **H477 ADD: Frequency & Squelch Data No Charge**

ZONED OPERATION

This option converts MODE-ONLY ASTRO Digital XTS 5000 portables to Zone Operation radios. A maximum of 16 RX and TX pairs can be placed into a zone. There is a maximum of three zones (48 modes) on the "I" Model, with zone operation programmed to the programmable top mounted two-position concentric switch. There is a maximum of 16 zones (512 modes) on the "II" and "III" models, and the zones will be programmed to be selected from the keypad. The factory can only accommodate the programming of only 128 continuous channels consisting of any combination of zones and channels and minimum of 32 channels with two zones on the "I" models. **When you ordering H477, H371 must be ordered. H371 ADD: ASTRO Digital XTS 5000 Zone Operation No Charge**

PROJECT 25 ENCRYPTION

When ordering any of the Encryption Algorithm:

- **Must** order the Encryption UCM Hardware (Q159)
 - The DES-OFB and AES encryptions offered are compliant with digital Project 25 standards and does not support analog encryption operation.
 - **Requires** the ASTRO Digital CAI (Q806) to operate the DES-OFB and AES encryption.
- If ordering a Dual Encryption:
 - The non-OFB encryption (XL versions) can be operated in either analog , or CAI digital mode, but will not be Project 25 compliant.
 - **Requires** the Multikey (H869).
- When used in CAI mode, the non-OFB Encryption will not be Project 25 compliant.
 - Encryption UCM Hardware (Q159) module may be ordered without an Encryption Algorithm for later upgrade in the field.

FIELD INSTALLED PROJECT 25 ENCRYPTION

The DES-OFB and AES-OFB encryptions offered are compliant with Project 25 standards. Operation of DES-OFB and/or AES-OFB encryption requires the ASTRO Digital CAI (Q806) option. Radios can be upgraded via FLASHport to CAI operation.

- If ordering a Dual Encryption:
 - The non-OFB encryption can be operated in analog or CAI mode (only XL versions operate in either digital mode).
 - **Requires** the Multikey (H869).
- When used in the CAI mode, the non-OFB encryption will not be Project 25 compliant.

FIPS 140-2 Compliance

Encryption Modules equipped with AES are FIPS 140-2 compliant. Further information regarding FIPS 140-2 certification may be found using the following links:

[FIPS 140-2 Crypto Module Validation Program \(CMVP\)](#)

[NIST Cryptographic Module Validation Lists](#)

FM INFORMATION

The XTS 5000 portable radio when properly equipped with options Q393AN and Q393RUGDAR are Factory Mutual (FM/CSA) Approved as intrinsically safe for use in Class I, II, III, Division 1, Group C, D, E, F, and G and Nonincendive Class I, Division 2, Group A, B, C and D, when ordered without encryption modules.

The XTS 5000 portables equipped with UCM encryption modules and options Q393AP and Q393RUGDAQ are FM Approved as Intrinsically Safe for use in Class I, II, III, Division 1, Group D, F, G and Nonincendive for use in Class I, Div 2, Group A, B, C, D only.

XTS 5000 FM/CSA approved portable radio models installed with Type 1 encryption module (Q374 or Q400), are intrinsically safe for use in the Nonincendive, Class I, Division 2, Groups A, B, C, D, when used with Motorola FM/CSA approved battery options Q393AV and Q393RUGDAW or H223CP and H223RUGDCW. Type 1 is not offered on either the 700/800 or UHF R2 bands.

ASTRO Text Messaging Service

ASTRO Text Messaging Service will be available on ASTRO 25 XTS 5000, XTS 2500 Portable radios and ASTRO 25 XTL 5000, XTL 2500 Mobile radios. Text Messaging Service (TMS) allows subscriber users to send and receive text messages to other subscribers or dispatch operators. Users can select messages and addresses from a predefined list or enter freeform text messages and addresses via the keypad. Text Messaging Service is available on ASTRO Trunked IV&D Systems and Subscribers. Subscribers must have version R09.00.00 or later of both Customer Programming Software (CPS) and Radio software .

For full Text Messaging functionality, including freeform text messaging and addressing, must order Model III XTS5000 portables. Model II versions support Limited Text Messaging functionality such as selecting predefined messages or addresses from a list programmed in the radio. Text messaging service is NOT supported on Model I Portables.

Ordering requirements for XTS 5000 Portable:

- Requires Model II or Model III XTS 5000
- ASTRO Digital CAI Operation (G806)
- SmartZone Operation (H38)
- ASTRO Project 25 Trunking Software (Q361)
- Packet Data Interface (Q947)

NOTE: *There is no specific option to order for the Text Messaging Service on the subscribers as the functionality is included in the Packet Data option.*

Outdoor Personnel Location Global Positioning Satellite (GPS) Feature

The personnel outdoor location tracking GPS feature enables a dispatcher the ability to locate on-foot patrols and out of the vehicle officers who are involved in life threatening situations. The radio user's GPS position information is sent over the ASTRO 25 Integrated Voice & Data (IV&D) network and is delivered to the dispatch operator using a third party mapping display application at the dispatch center (*Mapping Application is not yet available through Motorola at this time, however an Application Developers Tool Kit is available for 3rd party vendors to use to modify existing applications. See link below for more details.*)

This capability is now available on ASTRO 25 Conventional IV&D Systems and ASTRO 25 Trunking IV&D Systems on XTS 5000 Models I, II, III and Ruggedized with appropriate radio software (see below).

Required equipment for operating in ASTRO 25 Conventional IV&D and ASTRO 25 Trunking IV&D Systems is as follows:

	ASTRO 25 Conventional IV&D	ASTRO 25 Trunking IV&D
Radio Software	Version R09.00.00 or later	Version R09.00.00
Customer Programming Software (CPS)	Version R09.00.00 or later (RVN4181)	Version R09.00.00 or later (RVN4181)
ASTRO CAI operation	Q806	Q806
System Enhancement Software	H35 (or H37, H38 in Conventional Mode)	H38
ASTRO Project 25 Trunking Software		Q361
GPS Remote Speaker Microphone/GPS Remote Speaker Microphone with Earjack	HMN4080 or HMN4084	HMN4080 or HMN4084

For fielded XTS 5000 Portables that are already Conventional IMBE Digital Enabled or Trunking IMBE Digital Enabled, see FLASHport upgrade Price Pages to order a software refresh to get the GPS enabled software.

During normal operation the radio's battery capacity will be reduced by 10% to 16% based on 1 location update per minute.

NOT COMPATIBLE with Man -Down Side Connector (NTN7660), Clamshell Battery Holder (Q495, Q496, NTN9183).

NOTE:

The GPS technology uses radio signals from earth orbiting satellites, to establish the location co-ordinates, maximizing your view of clear, unobstructed sky is essential for optimum performance. Where adequate signals from multiple satellites are not available,

(usually because you cannot establish a view of a wide area of the sky), the GPS feature of your GPS RSM WILL NOT WORK. Such situations include but are not limited to:

- - In underground locations
 - Inside of buildings, trains, or other covered vehicles
 - Under any other metal or concrete roof or structure
 - Between tall buildings or under dense tree-cover

PUBLIC SAFETY SPEAKER MICROPHONES (PSM)

The RF switch has been removed from the XTS Radio to provide cost savings on the model. Therefore, the EXTERNAL RF SWITCH must be ORDERED and then ATTACHED to the radio in order for the PSM to operate. A wrench tool must be used to place the RF switch. These kits must be ordered separately. The RF switch and microphones are FM approved.

ASTRO Advanced Messaging Solution (AMS)

The ASTRO 25 Advanced Messaging Solutions is the latest messaging platform from Motorola Solutions and will replace ASTRO Text Messaging Service (TMS). As a complete end-to-end solution it leverages the core assets of ASTRO 25 IV&D/CID networks, ASTRO 25 radios, Integrated Command Center applications and Unified Network Services. The application allows responders to send/receive messages and run database queries from ASTRO 25 data enabled portable radios, extending real time information access to the field so dispatchers and first responders can be more efficient and achieve safer outcomes.

Provides functional parity with TMS and leverages the PremierOne messaging services platform, offering multiple configurations to enhance and extend core messaging functionality that can include queries and dispatch notifications. Based upon the configuration chosen, ASTRO 25 Advanced Messaging Solution extends Computer Aided Dispatch (CAD) information beyond the vehicle to select ASTRO 25 Portable radios.

Many Public Safety agencies have experienced the benefits of messaging and sharing important information to/from the communication center (dispatch) and vehicles equipped with MDT's. With ASTRO 25 Advanced Messaging Solution we are extending that capability to responders when Outside the Vehicle.

ASTRO Advanced Messaging Solution will be available on XTS 5000 Dual Display Portable radios. Advanced Messaging is NOT supported on XTS 5000 Top Display Portable radios.

Ordering ASTRO Advanced Messaging Solution for XTS 5000 Portable Requires:

- XTS 5000 Dual Display
- ASTRO Digital CAI Operation (Q806)
- P25 Conventional (H35)
- Packet Data Interface (Q947)

OR

- XTS 5000 Dual Display
- ASTRO Digital CAI Operation (Q806)
- SmartZone Operation (H38)
- ASTRO Project 25 Trunking Software (Q361)
- Packet Data Interface (Q947)

XTVA

XTS Vehicular Adapter

for XTS 3000™ and XTS 5000™ Portable Radios

Updates

XTVA Last Order Entry Date : September 1, 2014

XTVA Last Scheduled Ship Date: September 30, 2014

[XTVA Notification of Intent to Cancel Memo](#)

Ordering Information

General Information and Ordering Requirements

The XTS Vehicular Adapter (XTVA) is compatible with all versions of the XTS 3000 and XTS 5000 series portable radios **not compatible with units equipped with Q242 Digital VSELP**. The XTVA unit provides the portable with in-vehicle radio battery charging (with the ability to transmit and receive) and potential mobile performance (with an optional RFPA)

NOTE: All IMBE users (Q806) and Analog users (Q241) with a ship date prior to Host versions 5.6.9 (4/1/99) will require a FLASHport® upgrade for each subscriber to obtain full XTVA capability. All units shipping with Host version 5.6.0 or later do not require the upgrade.

XTVA CONSOLES

XTVA models include a XTVA console, power supply cable and a swivel trunion mounting kit. For XTVA operation, a microphone and an RF switch (for each radio) are required. The XTVA is available in a closed faced Model which covers the face of the radio, and an open faced Model that allows access to the display and first two rows of keys when using a ASTRO XTS 3000 or XTS 5000 Model II or III radio Both XTVA models are available with either a mini-UHF or a BNC connector. (N1799, N2003, N2001, N2002)

NOTE: The XTVA will only work in an IMBE system. VSELP compatibility is not available.

XTVA ACCESSORIES

(Accessories required for XTVA operation)

NOTE: The HHCH is compatible with ASTRO XTS 3000 or XTS 5000 Model II or III radios, not compatible with Model I. The HHCH display information and keypad buttons have the

same functions as the ASTRO XTS 3000 or XTS 5000 Model II or III radios. A microphone is required to operate the XTVA.

NOTE: The wrench tool is required to apply the RF switch. It is recommended to order 1 tool per 10 radios ordered.

POWER AMPLIFIERS

The Power Amplifier Kits include a power amplifier and a 17 ft. RF/DC cable kit (NKN6516). The RFPA antenna connector is a mini-UHF. Order an antenna kit containing a mini-UHF antenna connector for RFPA Operation. Contact the Aftermarket and Accessories Division for pricing and ordering information regarding the antenna kit with the mini-UHF connector.

XTS 1500 Portable Series
900 MHz Band

Updates

XTS 1500 Last Order Entry Date : October 31, 2014

XTS 1500 Last Scheduled Ship Date: November 30, 2014

[XTS 1500 Notification of Intent to Cancel Memo](#)

**** Alternative product includes the APX Series **– [APX1000 \(Available - December 2014\)](#)**

****Please note that NEW version of Customer Programming Software (CPS) (Part # RVN4181/ RVN4186) is required for initial customer orders for XTS radios. ****

Ordering Information

Features

All XTS 1500 packaged models include the following hardware features:

- 3 Programmable Side Buttons
- Orange Emergency Button
- 16 Position Mode Rotary Select Switch
- On/Off Volume
- Low Battery Alert Tone
- Antenna
- Noise Reduction Software
- 1 Top Mounted Programmable Three Position Concentric Switch
- Weather Sealed Universal Connector
- Bi-Color LED Indicator
- IMPRES Nickel Metal Hydride Battery (NTN9858)
- Detachable Belt Clip
- Audio Gain Control
- 4 line alphanumeric display

All XTS 1500 Portables are part of the FLASHport program and ship standard with a FLASH EE Prom, which allows for feature and system upgrades (contingent upon remaining within the same RF deck.)

General Information

The XTS 1500 Portable Line offers a Model I.5 radio:

Hardware Model	Modes	Alphanumeric Display Lines/Characters Per Line	Keypad	Navigation Pad
XTS 1500 Model 1.5	256	4 lines / 12 characters	None	No

The XTS 1500 Portable is capable of 48 modes when the programmable Concentric Top Mounted Switch is used for Zone Operation. The mode of operation is programmed on a channel-by-channel basis.

There are no maximum frequency separation conditions that must be adhered to on the XTS 1500 Portable Radio Series. Separation of frequencies can be as wide as the allowable sub-band per radio model with no degradation of any performance specifications. If an incorrect antenna is used, degraded performance may be experienced.

The XTS 1500 portable can be upgraded electronically (via RS232 cable or USB cable are required for all software upgrades) in the field with new systems operation (contingent upon remaining within the same RF sub-band) by ordering upgrade kits.

Please note that the XTS 1500 does NOT support FRED.

RELATIVE RADIATED RECEIVE SENSITIVITY

The relative radiated receive sensitivity test (formerly referred to as self-quieters) measure the sensitivity from 896MHz to 940MHz in 12.5kHz steps. The radio is set to 25kHz channel mode. These measurements were taken in a shielded environment so that degraded

sensitivity at discrete frequencies is known to be due to the radio's self-interference (as opposed to external interference.) The following list contains frequencies which were consistently found to have severely degraded performance on all measured radios: 936 MHz, 939.3 MHz

Ordering Requirements

Ordering procedure is as follows:

1	H66WCD9PW5BN	XTS 1500 Portable
1A	Q443	System Software
1B	etc	Other options

1. Order the XTS 1500 Portable Series as the main line item (H66WCD9PW5BN).
2. The hardware model MUST be ordered with one Operating Mode. Choose between Analog conventional or 3600 Analog trunking.

Legend:

Blue=Feature to be added in a Future Release

Green=New XTS 1500 Features

Programming of the following frequencies are not allowed 936 MHz, 939.3 MHz

ASTRO Advanced Messaging Solution (AMS)

The ASTRO 25 Advanced Messaging Solutions is the latest messaging platform from Motorola Solutions and will replace ASTRO Text Messaging Service (TMS). As a complete end-to-end solution it leverages the core assets of ASTRO 25 IV&D/CID networks, ASTRO 25 radios, Integrated Command Center applications and Unified Network Services. The application allows responders to send/receive messages and run database queries from ASTRO 25 data enabled portable radios, extending real time information access to the field so dispatchers and first responders can be more efficient and achieve safer outcomes.

Provides functional parity with TMS and leverages the PremierOne messaging services platform, offering multiple configurations to enhance and extend core messaging functionality that can include queries and dispatch notifications. Based upon the configuration chosen, ASTRO 25 Advanced Messaging Solution extends Computer Aided Dispatch (CAD) information beyond the vehicle to select ASTRO 25 Portable radios.

Many Public Safety agencies have experienced the benefits of messaging and sharing important information to/from the communication center (dispatch) and vehicles equipped with MDT's. With ASTRO 25 Advanced Messaging Solution we are extending that capability to responders when Outside the Vehicle.

ASTRO Advanced Messaging Solution will be available on XTS 1500 Front Display Portable radios.

Ordering ASTRO Advanced Messaging Solution for XTS 1500 Portable Requires:

- XTS 1500 Front Display
- ASTRO Digital CAI Operation (Q806)
- P25 Conventional (Q811)
- Packet Data Interface (Q947)

OR

- XTS 1500 Front Display
- ASTRO Digital CAI Operation (Q806)
- ASTRO Project 25 Trunking Software (Q574)
- Packet Data Interface (Q947)

NOTE: There is no specific option to order for the Advanced Messaging Solution on the subscribers as the functionality is included in the Packet Data option. Also, the text messaging functionality carries a per-radio charge on the server side of \$50 (one time license fee to access messaging services) per radio. When adding query the fee is \$125 per radio. For additional ordering guidelines of the AMS feature which includes the server and radio license fees, please visit -

This Radio is: DISCONTINUED

**ASTRO® Digital XTS 1500
FLASHport® Aftermarket Upgrades
700/800MHz, VHF, UHF Bands
Trunked Radio Systems**

Ordering Information

General Information

This Radio is: DISCONTINUED

FLASHport Aftermarket Software is used to upgrade to the latest version of your System Enhancement Software Package or to upgrade to a different System Enhancement Software Package for existing ASTRO Digital XTS 1500 radios in the field. FLASHport Upgrade Kits contain upgrade software, FLASHkey, and upgrade documentation.

Ordering Requirements

1. Specify the *current* System Enhancement Software Package that represents the software in the radio as the main line item (T7016, T7017 or T7018) and order quantity 1 at \$0 (No Charge).
2. Select the *desired* System Enhancement Software Package and enter as sub-items.
- 3. IMPORTANT:** If upgrading to a new System Enhancement Software Package, you must use the column which represents that new System Enhancement Software Package to determine price and availability of System Enhancement Options. If you are remaining at the same System Enhancement Software Package, use the column of the current System Enhancement Software Package to determine price and availability of System Enhancement Options.

4. Each sub-items must have the same quantity listed (which equals the number of radios being upgraded) even though the main line is ALWAYS 1.
5. Radio Model number and **EXISTING** FLASHcode must be entered into designated COF fields. A separate line item must be entered for each different combination of Radio Model and **EXISTING**FLASHcode.
6. "FLASH upgrades are not discountable"

NOTE: The FLASHcode can be read by using the SRIB and RSS.

This Radio is DISCONTINUED
ASTRO® Digital XTS 2500
FLASHport® Aftermarket Upgrades
700/800MHz, VHF, UHF Bands
Trunked Radio Systems

Ordering Information

General Information

This Radio is DISCONTINUED

FLASHport Aftermarket Software is used to upgrade to the latest version of your System Enhancement Software Package or to upgrade to a different System Enhancement Software Package for existing ASTRO Digital XTS 2500 radios in the field. FLASHport Upgrade Kits contain upgrade software, FLASHkey, and upgrade documentation.

Ordering Requirements

1. Specify the *current* System Enhancement Software Package that represents the software in the radio as the main line item (**XTS2500 Model II/III**: T6810, T6811, T6992, or T6993 or **XTS 2500 Model I**:T7026, T7025, T7031, or T7032) and order quantity 1 at \$0 (No Charge).
2. Select the *desired* System Enhancement Software Package and enter as sub-items.
3. **IMPORTANT:** If upgrading to a new System Enhancement Software Package, you must use the column which represents that new System Enhancement Software Package to determine price and availability of System Enhancement Options. If you are remaining at the same System Enhancement Software Package, use the column of the current System Enhancement Software Package to determine price and availability of System Enhancement Options.

4. Each sub-items must have the same quantity listed (which equals the number of radios being upgraded) even though the main line is ALWAYS 1.
5. Radio Model number and **EXISTING** FLASHcode must be entered into designated COF fields. A separate line item must be entered for each different combination of Radio Model and **EXISTING**FLASHcode.
6. "FLASH upgrades are not discountable"

NOTE: The FLASHcode can be read by using the SRIB and RSS.

CURRENT SYSTEM SOFTWARE PACKAGE

	T6810, T7026 (MI)	T6811, T7025 (MI)	T6992, T7031 (MI)	T6993, T7032 (MI)
	<i>Digital 9600 Baud Trunking Package</i>	<i>Digital & Analog Limited 3600 Baud Trunking Package</i>	<i>Analog 3600 Baud Trunking Package</i>	<i>Digital P25 Conventional Package</i>
SYSTEM ENHANCEMENT SOFTWARE (List as sub items)				
ENH: Software Trunking 9600 Baud Q574	X	X	X	X
ENH: Software Trunking 3600 Baud Limited Q575	X	X	X	X
ENH: Software Trunking 3600 Baud Analog Q443*	-	-	X	-
ENH: Software P25 Digital Conventional Q811	-	-	-	X

*NOTE: The Programming Software does not support "downgrading" a Digital Radio to Analog.

Software Prices **BELOW DO NOT** include field programming.

ASTRO® Digital XTS 4000 Portable Series
UHF Range 1
Wide Area SmartZone® "Handie-Talkie™" Radio
Trunked Radio Systems

Ordering Information

General Information

The XTS 4000 is the ideal solution in surveillance covert type operations where reliable secure communications is a must. Designed to resemble the appearance of today's consumer cellular communication devices, the XTS 4000 allows agents to blend right into the crowd. Our digital ASTRO 25 portable radio delivers high quality communication in a light and discrete package for those critical undercover situations.

The following limitation must be considered before ordering:

- **Significant Coverage Reduction:** The radio has a maximum power output of **2W** and utilizes a small covert antenna. These design elements result in limited coverage as compared to XTS 2500 or XTS 5000.
- **Range:** The best case condition is with antenna up and the radio been used in front of the face. In this mode the range is approximately **2 miles range** depending on the surrounding environment. With the antenna down and the radio on the belt, the range will be reduced.
- **Battery Capacity:** Standard Battery capacity is 630 mAh (Lilon only) and offers about 4 hours at 5/5/90 duty cycle.
- **XTS 4000 has all unique Accessories and Cables:** XTS 4000 is NOT compatible with XTS 5000/2500/1500 accessories. Customers will need to purchase new programming cables, chargers, and keyloading cables for use with XTS 4000.
- **Band Availability:** Only offered in VHF (3 antenna splits) and UHF R1 380- 470 MHz.

Hydra Coverage Simulation:

It is highly recommended that customers interested in the XTS 4000 also engage the System Deployment team who can utilize tools to simulate the coverage offered by the XTS 4000 radio. Hydra, an engineering application used to model performance of wireless communications systems, can assist the customer in understanding the impact of the reduced footprint of the XTS 4000 on a customer system. This information could be instrumental in helping the customer identify if the XTS 4000 is the right product for them and whether a PDR3500 or DVRS solution would make sense. (Link to be added)

E3 Hold Notice:

Customer or sales must acknowledge that they are aware the transmit power is 2 watt max output, and the standard shipping Li-ion battery capacitance is 630 mAh which computes to 4 hrs of operating using a 5-5-90 duty cycle.

You may complete this acknowledgement form and submit to the product planner upon ordering to avoid delays. To view this document click [here](#)

Portable Repeater (optional)

The PDR 3500 is a single channel portable conventional repeater unit in a suitcase that allows range extension for conventional units. This solution can help with extending the conventional range of the XTS 4000 in low RF signal areas. For additional information, please refer to the PDR 3500 price pages located [here](#).

DVRS (optional)

The Digital Vehicular Repeater System (DVRS) is a single channel vehicle based on-scene repeater with system pass-through capabilities that allow system range extension for specially configured local radio units. This solution can help with extending the system or conventional range of the XTS 4000 in low RF signal areas. For additional information, please refer to the DVRS price pages located [here](#).

The links below go to the specific ECAT price pages for the different DVRS models. From those price pages information on specific model pricing and orderable options can be seen as well as ordering guide information.

Features

General Ordering Requirement and Information when ordering XTS 4000 Radio

All ASTRO Digital XTS4000 packaged models include the following hardware features:

- 2 Li Ion Batteries (NNTN6944)
- Plastic Holster
- Encryption Module equipped with DES-XL/DES-OFB/AES/DVP-XL and OTAR
- 1 Antenna 380-470 MHz
- User Guide/CD Manual
- Quick Starter Guide

Ordering Instruction

NOTE: XTS 4000 is offered in two different Digital packages (Conventional or Conventional & Trunking). Additional options are available, but not required.

Conventional Package (H44) includes the following:

- Digital ASTRO Conventional, PTT- ID, Remote Monitor One Touch, Repeater Access, Conventional Vote Scan, and Conventional Radio Cloning

Conventional & Trunking Package (H45) includes the following:

- 3600 Digital SmartZone, ASTRO 25 Trunking, PTT-ID, Remote Monitor, One Touch, Repeater Access, Omnilink
- All of the features included in the Conventional Package (H44)

NOTE: Please be advised of the Relative Radiated Received Sensitivity:

ASTRO Advanced Messaging Solution (AMS)

The ASTRO 25 Advanced Messaging Solutions is the latest messaging platform from Motorola Solutions and will replace ASTRO Text Messaging Service (TMS). As a complete end-to-end solution it leverages the core assets of ASTRO 25 IV&D/CID networks, ASTRO 25 radios, Integrated Command Center applications and Unified Network Services. The application allows responders to send/receive messages and run database queries from ASTRO 25 data enabled portable radios, extending real time information access to the field so dispatchers and first responders can be more efficient and achieve safer outcomes.

Provides functional parity with TMS and leverages the PremierOne messaging services platform, offering multiple configurations to enhance and extend core messaging functionality that can include queries and dispatch notifications. Based upon the configuration chosen, ASTRO 25 Advanced Messaging Solution extends Computer Aided Dispatch (CAD) information beyond the vehicle to select ASTRO 25 Portable radios.

Many Public Safety agencies have experienced the benefits of messaging and sharing important information to/from the communication center (dispatch) and vehicles equipped with MDT's. With ASTRO 25 Advanced Messaging Solution we are extending that capability to responders when Outside the Vehicle.

ASTRO Advanced Messaging Solution will be available on XTS 4000 Portable radios. Advanced Messaging is NOT supported on XTS 4000 Top Display Portable radios.

Ordering ASTRO Advanced Messaging Solution for XTS 4000 Portable Requires:

- XTS 4000 Dual Display
- ASTRO Digital CAI Operation (Q806)
- P25 Conventional (H44)
- Packet Data Interface (Q947)

OR

- XTS 4000 Dual Display
- ASTRO Digital CAI Operation (Q806)
- ASTRO Project 25 Trunking Software (H45)
- Packet Data Interface (Q947)

NOTE: There is no specific option to order for the Advanced Messaging Solution on the subscribers as the functionality is included in the Packet Data option. Also, the text messaging functionality carries a per-radio charge on the server side of \$50 (one time license fee to access messaging services) per radio. When adding query the fee is \$125 per radio. For additional ordering guidelines of the AMS feature which includes the server and radio license fees, please visit -

Features

General Ordering Requirement and Information when ordering XTS 4000

All ASTRO Digital XTS4000 packaged models include the following hardware features:

- 2 Li Ion Batteries (NNTN6944)
- 1 Antenna 164-174MHz. If this antenna is not desired you may choose one from the antenna section below.
- Plastic Holster
- Encryption Module equipped with DES-XL/DES-OFB/AES/DVP-XL and OTAR
- User Guide/CD Manual
- Quick Starter Guide

Ordering Instruction

NOTE: XTS 4000 is offered in two different Digital packages (Conventional or Conventional & Trunking). Additional options are available, but not required.

Conventional Package (H44) includes the following:

- Digital ASTRO Conventional, PTT-ID, Remote Monitor One Touch, Repeater Access, Conventional Vote Scan, and Conventional Radio Cloning

Conventional & Trunking Package (H45) includes the following:

- 3600 Digital SmartZone, ASTRO 25 Trunking, PTT-ID, Remote Monitor, One Touch, Repeater Access, Omnilink
- All of the features included in the Conventional Package (H44)

ASTRO Advanced Messaging Solution (AMS)

The ASTRO 25 Advanced Messaging Solutions is the latest messaging platform from Motorola Solutions and will replace ASTRO Text Messaging Service (TMS). As a complete end-to-end solution it leverages the core assets of ASTRO 25 IV&D/CID networks, ASTRO 25 radios, Integrated Command Center applications and Unified Network Services. The application allows responders to send/receive messages and run database queries from ASTRO 25 data enabled portable radios, extending real time information access to the field so dispatchers and first responders can be more efficient and achieve safer outcomes.

Provides functional parity with TMS and leverages the PremierOne messaging services platform, offering multiple configurations to enhance and extend core messaging functionality that can include queries and dispatch notifications. Based upon the configuration chosen, ASTRO 25 Advanced Messaging Solution extends Computer Aided Dispatch (CAD) information beyond the vehicle to select ASTRO 25 Portable radios.

Many Public Safety agencies have experienced the benefits of messaging and sharing important information to/from the communication center (dispatch) and vehicles equipped with MDT's. With ASTRO 25 Advanced Messaging Solution we are extending that capability to responders when Outside the Vehicle.

ASTRO Advanced Messaging Solution will be available on XTS 4000 Portable radios. Advanced Messaging is NOT supported on XTS 4000 Top Display Portable radios.

Ordering ASTRO Advanced Messaging Solution for XTS 4000 Portable Requires:

- XTS 4000 Dual Display
- ASTRO Digital CAI Operation (Q806)
- P25 Conventional (H44)
- Packet Data Interface (Q947)

OR

- XTS 4000 Dual Display
- ASTRO Digital CAI Operation (Q806)
- ASTRO Project 25 Trunking Software (H45)
- Packet Data Interface (Q947)

NOTE: There is no specific option to order for the Advanced Messaging Solution on the subscribers as the functionality is included in the Packet Data option. Also, the text messaging functionality carries a per-radio charge on the server side of \$50 (one time license fee to access messaging services) per radio. When adding query the fee is \$125 per radio. For additional ordering guidelines of the AMS feature which includes the server and radio license fees, please visit -

Ordering Information

General Information

This Radio is DISCONTINUED

FLASHport® Aftermarket Software is used to upgrade to the latest version of your System Enhancement Software Package to upgrade to a different System Enhancement Software Package or to order enhancements for existing for existing ASTRO® Digital XTS 5000 radios in the field. FLASHport® upgrade kits contain upgrade software, FLASHkey, and upgrade documentation.

Ordering Requirements

1. **Specify** the *current* System Enhancement Software Package that represents the software

in the radio as the main line item (T6748, T6749, T6750, or T6751.)

2. Select the *desired* Operational Mode, System Enhancement Software Package, and/or System Enhancement Options and enter as sub-items.

3. **IMPORTANT:** If upgrading to a new System Enhancement Software Package, you must use the column which represents that new System Enhancement Software Package to determine price and availability of System Enhancement Options. If you are remaining at the same System Enhancement Software Package, use the column of the current System Enhancement Software Package to determine price and availability of System Enhancement Options.

4. ALL sub-items must have the same quantity listed (which equals the number of radios being upgraded) even though the main line is ALWAYS 1.

5. Radio Model number and **EXISTING** FLASHcode must be entered into designated COF fields. A separate line item must be entered for each different combination of Radio model and **EXISTING** FLASHcode.

6. "FLASH upgrades are not discountable"

NOTE: The FLASHcode can be read by using the USB or RS232 cable.

CURRENT SYSTEM SOFTWARE PACKAGE

ADD: Multikey Operation H869 NOTE 4	X	X	X	X

Note 1: For feature details, see System Enhancement Software Packages Section under the General Information on the XTS 5000 800MHz page.

Note 2: See Encryption Field Upgrade Kits' Section under the General Information on the XTS 5000 800MHz page, if radios do not currently contain encryption.

Note 3: ID Display uses ASTRO® Signaling in digital mode and MDC™ signaling in analog model. Consequently, it is not available in Trunked analog modes. This option can only be used on Conventional channels when in analog mode.

Note 4: The radio requires NTN9738A (UCM) for use of this option.

An RS232 or Universal Serial Bus (USB) cable is required to "FLASH" FLASHport® software into the ASTRO®: Digital XTS 5000 radios.

Software Prices **BELOW DO NOT** include field programming.

ASTRO® Digital XTS/XTL 5000 Portable & Mobile
ASTRO® Digital XTL 2500 Mobile
FLASHport®
KVL 3000/3000PLUS Universal Crypto Module (UCM) Upgrades
Secure/Conventional/Trunked Radio Systems

Updates

PRODUCT HAS BEEN CANCELLED, EFFECTIVE SEPTEMBER 30, 2015

An Alternative Flashport Upgrade is available via the KVL 4000, order part #: T8065
See Corresponding Price Page for more details: [LINK](#)

NOTE: These upgrades **ONLY** apply to XTL/XTS 5000, and XTL 2500 subscribers with MACE UCMs with firmware version R07.xx.xx or higher.

General Information

The ASTRO Digital New XTS/XTL FLASHport Universal Crypto Module (UCM) upgrades allow secure customers to upgrade their basic software and algorithm software within a fielded UCM based encrypted ASTRO Digital XTS 5000 Portables or XTL 5000 Mobiles or XTL 2500 Mobiles without having to replace the UCM. ASTRO Digital upgrade kit (T7769) includes one PCMCIA card and one Subscriber UCM Upgrade Manual.

Ordering Requirements

1. Order PCMCIA UNIVERSAL CRYPTO MODULE (UCM) upgrade kit (T7769). Each upgrade kit consists of a single PCMCIA card that can upgrade up to 100 individual UCM based ASTRO Digital XTS 5000 Portables or , XTL 5000 Mobiles.

2. Select the *desired* algorithm software upgrade option.

- Only one (1) encryption algorithm type can be ordered per upgrade kit.
- Specify the number of software upgrades required.
- Each individual UCM requires a single upgrade; therefore, the quantity of each option should equal the number of upgrades to be performed.
- The algorithm software options must be ordered in equal number and can not exceed 100 per upgrade kit option.

3. The FLASHport UCM upgrade requires the use of a key loading device (KVL 3000 or KVL 3000 Plus) and a PCMCIA card to deliver the new software to the UCM. When upgrading the UCM module with AES Encryption, a KVL 3000 Plus is required to FLASH upgrade the module (KVL 3000 does not support AES).

The following example will provide an upgrade card to upgrade twenty (20) fielded UCM based ASTRO Digital XTS 5000 Portables or XTL 2500, XTL 5000 Mobiles with the AES algorithm.

<u>Item Number</u>	<u>Quantity</u>	<u>Part Number</u>	<u>Description</u>

All encryption products, kits, software and technology require an approved export license prior to shipment. Contact the Sector Export Control office at +1 (847) 576-8163 to discuss any possible licensing restriction. The international use of encryption algorithms (except for DES, DES-XL, DES-OFB) is highly restricted by the U. S. Federal Government. License approvals are considered for export to a limited selection of countries and end users. Contact the Sector Export Control office at +1 (847) 576-8163 for licensing information before submitting bids, proposals, or accepting orders for algorithm based encryption products.

**Zetron Model 30 Worldpatch
Radio Telephone Interconnect**

Ordering Information

Features

- Simplex and half-duplex interconnect for base stations, control stations, and repeaters
- Simplex audio control via VOX, sampling, or combined sampling with VOX
- Single phone line interface
- Compatible with end-to-end telco lines and analog PBX extensions
- Remote programmable from DTMF radio or Touch-Tone telephone
- Dial-up Remote Monitor
- Autodial (up to 50 stored numbers) and redial
- Autodial for non-DTMF subscribers using 4-click PTT
- Security password for Direct Air Access
- Digital Voice Delay for enhanced simplex operation
- 100-call and 1000-call 2-tone paging
- Up to 13 digit DTMF paging
- Convenience features including Morse code station ID, toll restrictions, timers, DTMF regeneration, programmable ANI codes, and courtesy tones
- Disconnect warning and "Go-Ahead-Talk" tones
- Call Alert to let mobile users know that the phone is ringing (dispatch operations)
- Hook Flash feature for call hold and call transferring
- Repeat audio and control for mobile to mobile calls
- 19" Rack Mountable, 1 RU (Rack Unit)
- FCC Part 68 Approval

Note: Zetron Model 30 is not type approved for use outside the United States.

General Information

The Model 30 Worldpatch is a compact, simplex or half-duplex telephone interconnect that allows a group of two-way radio users to place and receive telephone calls in a conventional system. It efficiently interfaces a telephone line (or analog PBX line) to a simplex base station, control station, or conventional repeater. The Model 30 Worldpatch distributed through Motorola ships standard with Zetron's Advanced Programming Operation, Digital Voice Delay and Selective Calling features. Prewired interface cables are available for MTR2000, Quantar, and DIU3000. Cables include power source for Model 30 and connect through "MRTI" port on stations. Model 30 ships standard with a User/Installation Manual.

Note: Zetron Model 30 is not type approved for use outside the United States.

Note: Zetron Model 30 is not type approved for use outside the United States.

General Information

The Model 30 Worldpatch is a compact, simplex or half-duplex telephone interconnect that allows a group of two-way radio users to place and receive telephone calls in a conventional system. It efficiently interfaces a telephone line (or analog PBX line) to a simplex base station, control station, or conventional repeater. The Model 30 Worldpatch distributed through Motorola ships standard with Zetron's Advanced Programming Operation, Digital Voice Delay and Selective Calling features. Prewired interface cables are available for MTR2000, Quantar, and DIU3000. Cables include power source for Model 30 and connect through "MRTI" port on stations. Model 30 ships standard with a User/Installation Manual.

Note: Zetron Model 30 is not type approved for use outside the United States.

Part Number Information
General Information

Motorola Solutions currently resells various products for the OEM suppliers listed in our IFB response with the P/Ns listed herein and as quoted for specific customer needs. Motorola Solutions is confident that these OEM suppliers will authorize Motorola Solutions' resale of products & services to the Commonwealth of Pennsylvania under IFB 6100039075 - Two Way Radio Equipment & Services. Motorola Solutions will work with the Commonwealth to identify specific product requirements and provide additional information for each product.

Lifecycle Support Notice

VX-264, VX-450 series, VX-2100, VX-2200

OVERVIEW

Motorola Solutions announces the cancellation of the VX-264 and VX-450 series portables and the VX-2100, VX-2200 mobiles.

MODELS TO BE CANCELLED

The following models will be cancelled:

Radio	Model	Description
VX-264	AC127N501-MOT-NA	VX-264 VHF 136-174 MHz / 128 CH
VX-264	AC127U502-MOT-NA	VX-264 UHF 400-470 MHz / 128 CH
VX-264	AC127U501-MOT-NA	VX-264 UHF2 450-512 MHz / 128 CH

VX-2200	AC061U532-MOT-NA	VX-2200-G7-45 450-520 UHF 45W

The last order date will be July 30 2019, or while supplies last. The last ship date will be October 30, 2019. Due to high demand, material is likely to run out prior to the last order date.

SUGGESTED PRODUCT REPLACEMENTS

Suggested replacement products below depend on the particular application and end user preference.

Legacy Radio Model	Suggested Replacement Model
VX-264 Portable	CP185, VX261 Portables
VX-450 Series Portable	CP185, VX-261, CP200d (analog) Portables
VX-2100 Mobile	CM200d Mobile
VX-2200 Mobile	CM300d Mobile

SERVICE SUPPORT

Aftermarket product support will be available for the VX-264 portable, VX-450 series portables and VX-2100/200mobile listed above via commercially reasonable efforts after cancellation through Motorola Solutions Customer Service.

Please contact your Motorola Solutions Account Representative for specific questions regarding this notice

US VERSION

DTR700

Standard Package Includes:

- DTR700 Radio
- Standard 2500mAh Li-Ion Rechargeable Battery
- Drop-In Charger w/ Power Adaptor
- Swivel Belt Holster
- Quick Reference Guide
- Two Year Warranty

Product Features:

- 50 Digital Channels
- License-free Communication on 900 MHz Digital ISM Band
- Enhanced Private Communication via FHSS (Frequency Hopping Spread Spectrum)
- Full graphic color display
- Long battery life up to 16.5 hours *
- Anti-microbial housing that prevents the growth of mold and germs
- Compact durable design that meets U.S. Military 810G standards for shock, vibration, water, dust
- Programmable button that can be used to quickly access call functions
- 4 Digit Profile ID for Non-Interference communication
- Extended Range with clear Communicate across 350,000 sq ft and up to 30 floors **
- Talk Permit Tone indicates when the channel is available to speak
- Home Channel Revert to automatically return after the end of a call on a different channel
- Clone radio configuration using the cloning cable (sold separately)
- CPS for custom configuration of programmable button, profile ID, channel alias, radio name, etc
- VibraCall vibration alert
- Power Saving Mode

Special Calling Features:

- Private Reply - respond with a one-to-one call to the person who last spoke
- Direct Call - one-to-one call to a pre-configured radio (e.g. manager, principal, security, etc.)
- Call All Available - group call across all channels to everyone not engaged in a call ***
- Page All Available - one-way announcement across all channels to everyone not in a call ***

Quantity Discount Program

This product is eligible for Quantity Discounts. Quantity discounts are calculated and granted at the time a new order is placed. Additional units added to the order after the fact will be a single unit price.

Deletion of units from order or cancellation of line items consequent on actual units shipped being less than requirement for quantity discount will result in a charge to dealer account for the difference in price.

Quantity Discount Program

You may “mix and match” any combination of SL300/CP185/CP200d portable models and/or CM200d/CM300d mobile models (“Radio Units”) on a single order and receive the appropriate quantity discount for each model. Quantity discounts are calculated and granted at the time a new order is placed (“Qualifying Order”). Additional Radio Units added to the Qualifying Order will be charged at the single Radio Unit price without discount. Deleting or cancelling Radio Units from a Qualifying Order will be viewed as a new Qualifying Order and reseller will receive the discount offered (if any) for the number of Radio Units actually shipped. All Radio Units must be shipped at the same time in order to qualify for the corresponding product models quantity discount. Change order requests or Radio Units returns that extend, stagger or otherwise change the number of Radio Units actually purchased in a single shipment, will result in a charge to the reseller’s account for the difference in price between the number of units purchased and the quantity discount reseller qualified under a Qualifying Order.

Service from the Start LITE

MOTOTRBO portable and mobiles radios ship with a standard 2-year parts and labor warranty. Additionally, they ship standard with a 1-year Service from the Start -LITE (SFS) option. If you desire additional years of SFS, you may choose one of the above general options. Please note that these plans are in addition to the 2-year standard warranty and 1 year SFS that ships standard with the unit. Repairs will be made only at the designated Motorola repair depot. Local services are not included. Motorola will pay the inbound shipping charges only with use of the Motorola designated delivery service. Motorola will pay for outbound shipping via Motorola’s normal shipping methods. No discounts are allowed on these options.

General Notes

The UHF Stubby standard antenna PMAE4003_R, provides a coverage range of 430 to 470 MHz. Should you need coverage up to 480 MHz, the QA01117 antenna option must be ordered

Essential Repair

MOTOTRBO portable and mobile radios ship with a standard 2-year parts and labor warranty. Additionally, they ship standard with a 1-Year Essential Repair option. If you desire additional years of Essential Repair, you may choose the 5-Year Essential Repair option instead. Essential Repair coverage starts on the day of shipment and continues for the term selected at the time of the device purchase. In addition to extending the device hardware repair coverage period, Essential Services also offers priority repair, with the same terms as the corresponding Service from the Start level: priority repair includes fast depot turnaround times and pre-paid, two-day air inbound shipping with use of Motorola Online (MOI) to initiate the repair. Terms are set at the length

FCC/IC Information:

(136-174 MHz) - AZ489FT3847 / 109U-89FT3847
(403-480 MHz) - AZ489FT4953 / 109U-89FT4953

Environmental Specifications:

Operating Temperature: -30° to +60° C (Radio Only)
Sealing: IP54

CP200d™ Portable

Standard Package Includes:

- Standard Battery (Lithium 2250 mAh 7.5V - NNTN4407-D)
- Standard Charger (CEC Compliant (90 Minute Rapid Rate - DMDN4173A)
- Standard Antenna (VHF Half-Wave MAD6502-D / UHF Whip DMAE4016)
- 2" Belt Clip (HIN82EE)
- 2 Year Warranty ± 1 Year Essential Repair

Product Features:

- 6.25s / 12.5 kHz only Channel Spacing
- 2 Programmable Side Buttons
- LED Battery Indicator

Analog Features:

- Commanding V-Band™ Technology
- Time-Out Timer
- Busy Channel Lockout
- Internal VOX
- Single Priority Scan
- Adjustable Power Levels
- MDC1200 DTT ID (Decode)
- Quik Call II Call Alert (Decode)
- Quik Call II Selective Call (Decode)

Digital Features:

- Optional for Analog models
- Standard for Digital models
- Radio Driven
- Radio Check (Decode)
- Remote Monitor (Decode)
- Radio Inhibit (Decode)
- Dual Priority Scan
- Transmit Interrupt (Decode)

Programmable Features:

- High / Low Power
- Channel Scan
- LED Battery Indicator
- Squelch Levels
- Beaconer / Talkaround
- Volume Set
- Tight / Normal Squelch
- VOX On / Off
- Nuicance Channel Delete
- Voice Announcement Scan (Digital Mode)

Quantity Discount Program

You may “mix and match” any combination of SL300/CP185/CP200d portable models and/or CM200d/CM300d mobile models (“Radio Units”) on a single order and receive the appropriate quantity discount for each model. Quantity discounts are calculated and granted at the time a new order is placed (“Qualifying Order”). Additional Radio Units added to the Qualifying Order will be charged at the single Radio Unit price without discount. Deleting or cancelling Radio Units from a Qualifying Order will be viewed as a new Qualifying Order and reseller will receive the discount offered (if any) for the number of Radio Units actually shipped. All Radio Units must be shipped at the same time in order to qualify for the corresponding product models quantity discount. Change order requests or Radio Units returns that extend, stagger or otherwise change the number of Radio Units actually purchased in a single shipment, will result in a charge to the reseller’s account for the difference in price between the number of units purchased and the quantity discount reseller qualified under a Qualifying Order.

Essential Repair

MOTOTRBO portable and mobile radios ship with a standard 2-year parts and labor warranty. Additionally, they ship standard with a 1-Year Essential Repair option. If you desire additional years of Essential Repair, you may choose the 5-Year Essential Repair option instead. Essential Repair coverage starts on the day of shipment and continues for the term selected at the time of the device purchase. In addition to extending the device hardware repair coverage period, Essential Services also offers priority repair, with the same terms as the corresponding Service from the Start level; priority repair includes fast depot turnaround times and pre-paid, two-day air inbound shipping with use of Motorola Online (MOI) to initiate the repair. Terms are set at the length

Quantity Discount Program

You may “mix and match” any combination of SL300/CP185/CP200d portable models and/or CM200d/CM300d mobile models (“Radio Units”) on a single order and receive the appropriate quantity discount for each model. Quantity discounts are calculated and granted at the time a new order is placed (“Qualifying Order”). Additional Radio Units added to the Qualifying Order will be charged at the single Radio Unit price without discount. Deleting or cancelling Radio Units from a Qualifying Order will be viewed as a new Qualifying Order and reseller will receive the discount offered (if any) for the number of Radio Units actually shipped. All Radio Units must be shipped at the same time in order to qualify for the corresponding product models quantity discount. Change order requests or Radio Units returns that extend, stagger or otherwise change the number of Radio Units actually purchased in a single shipment, will result in a charge to the reseller’s account for the difference in price between the number of units purchased and the quantity discount reseller qualified under a Qualifying Order.

Essential Repair

MOTOTRBO portable and mobile radios ship with a standard 2-year parts and labor warranty. Additionally, they ship standard with a 1-Year Essential Repair option. If you desire additional years of Essential Repair, you may choose the 5-Year Essential Repair option instead. Essential Repair coverage starts on the day of shipment and continues for the term selected at the time of the device purchase. In addition to extending the device hardware repair coverage period, Essential Services also offers priority repair, with the same terms as the corresponding Service from the Start level; priority repair includes fast depot turnaround times and one-visit, two-device inbound shipping with use of Motorola Online (MOI) to initiate the repair. Terms are set at the length of either

FCC/IC Information:

VHF (1.25W): DR799FT3090 / 109AR-99FT3090
VHF (25.45W): DR799FT3091 / 109AR-99FT3091
UHF (1.25W): DR799FT4092 / 109AR-99FT4092
UHF (25.40W): DR799FT4093 / 109AR-99FT4093

Environmental Specifications

Operating Temperature: -30° to +60° C
Sealing: IP54*

* With microphone sealing boot and rear accessory connector cover properly installed

US VERSION

CM300d™ Mobile

Standard Package Includes:

- Standard Microphone (DMMN1090)
- Standard Low Profile Mounting Bracket (R1 N6469)
- Standard Power Cable (HKM1137)
- 2 Year Warranty ± 1 Year Essential Repair

Product Features:

- 6.25e / 12.5 kHz Channel Spacing
- Alpha-Numeric Display
- White-lit Backlight
- 99 Channels
- 4 Programmable Buttons
- LED Indicators
- Radio Management (Optional)

Analog Features:

- Auto/Priority/Dual Priority Scan
- Quick Call II™ Call Alert/Selective Call (Decode)
- MDC1200 DTT ID (Numeric ID - Encode)
- Audio Indicator Tones
- Time-Out Timer
- VOX
- Busy Channel Lockout

Digital Features:

- Digital Conventional
- Optional for Analog models
- Standard for Digital models
- Radio Privacy
- Radio Check (Decode)
- Remote Monitor (Decode)
- Radio Inhibit (Decode)
- Dual Priority Scan
- Transmit Interrupt (Decode)
- Dual Capacity Direct Mode

Frequencies Not Allowed:

- 153 600 MHz ±1.0 kHz
- 172 800 MHz ±1.0 kHz
- 472 400 MHz

Programmable Features:

- Escalart
- Local/Distance Mode
- Repeater / Talkaround
- Silent Monitor
- Volume Set
- Voice Announcement
- High / Low Power
- Nuicance Channel Delete
- Scan On / Off
- Tight / Normal Squelch
- VOX On / Off
