ADD: HW KEY SUPPLEMENTAL DATA	The SOFTWARE KEY is the default Advance System Key option that ships standard on all APX products. You cannot order software key QA01749. The HARDWARE KEY QA01648 can be ordered instead. Be sure to enter the CORRECT SYSTEM OWNER ID in the supplemental data. If an INCORRECT ID is entered, a FLASHport order is required to fix the error. Order HARDWARE KEY (QA01648) if required to operate/program on a trunking system. Not compatible with conventional.	QA01648AA	0655	\$5.00

Algorithm Types(Optional)

All APX 8000 Radios ship P25 “clear” (QA05751 will internally generate) unless an encryption option is ordered.

AES 256 is the only approved encryption algorithm by P25 CAP and SAFECOM.

Description	Full Description	Nomenclature	APC	Price
ENH: DVP-XL ENCRYPTION	Compatible with Digital and Analog (25kHz Only) operations. ADP Privacy ships standard with Single Key. Multikey is required for multiple algorithms, such as ADP/AES or ADP/DES . Non-P25 CAP Compliant option	H797	655	\$487.00
ENH: DES,DES-XL,DES-OFB ENCRYPTION	Multikey is required for use of more than one key. Non-P25 CAP Compliant option. Includes ADP(Analog 25 khz) / DES-OFB (Digital 12.5 khz Only)	Q625	655	\$599.00
ENH: AES ENCRYPTION	Requires digital operation. P25 CAP Compliant option. Includes ADP.	Q629	655	\$475.00
ADD: AES/DES-XL/DES-OFB ENCRYPTION AND ADP	NOT compatible with Q629 or Q625. Must order multikey if you want to use both algorithms.	Q15AJ	0655	\$799.00
ADD: ADP ONLY (NON-P25 CAP COMPLIANT)	Provides for ADP ONLY, a Non-P25 CAP compliant, non-FIPS compliant option. If another encryption is required, please order that option which will internally generate ADP.	Q667	430	\$0.00

Software and Services

WI-FI

APX 8000H supports Wi-Fi 802.11 b/g/n with WPA2/WPA (PSK), and WEP security protocols. Wi-Fi can be used with the Radio Management SW in order to do codeplug updates, firmware refreshes, and FLASHport upgrades over a Wireless Network (WLAN). The radio will only connect to available Wi-Fi networks which have been pre-provisioned in the radio codeplug via CPS. The radio can be pre-provisioned with up to 20 SSIDs.

The Wi-Fi feature requires ordering option QA09001. The Wi-Fi feature is also available aftermarket as a FLASHport upgrade if not ordered out of the factory.

Radio Management (RM) is required in order to take advantage of the Wi-Fi capabilities on APX 8000H.

OUT OF THE BOX WI-FI PROVISIONING

If a radio is ordered the Wi-Fi option (QA09001) and the customer wishes to provision the radios out of the box using Wi-Fi, the radio must also be ordered with the Out of the Box Wi-Fi Provisioning option (QA09007).

A radio ordered with the Wi-Fi option and the Out of the Box Provisioning over Wi-Fi option will come with the following default codeplug configuration relative to Wi-Fi:

- a. Wi-Fi will be enabled.
- b. There will be one pre-configured network with the Network SSID set to “MyNetwork” and security type will be set to “None”.
- c. The default state of Wi-Fi will be “on”.

A Wi-Fi router is required for connecting the Wi-Fi capable radio to the Device Programmer. The Wi-Fi router is to be procured by the agency programming the radios and must be provisioned with the Network SSID set to “MyNetwork” (case sensitive) with no password enabled.

For more details regarding the Out of the Box Wi-Fi Provisioning process, please refer to the [Out of the Box Wi-Fi Provisioning Leaflet](#).

Bluetooth 4.0 & Emergency Find Me

With Bluetooth 4.0 wireless technology and our APX™ Mission Critical Wireless portfolio, users can now connect a variety of Bluetooth audio accessories and data devices with their APX™ radio.

Bluetooth 4.0 also enables Emergency Find Me, a feature providing personnel with an added level of security by improving response time in emergencies. Once an emergency is activated on the APX 8000H, a Bluetooth beacon signals other Bluetooth-enabled APX radios within range. Based on bluetooth signal strength, nearby APX radios will receive an emergency alert via intelligent lighting and a text message with users Radio ID along with signal strength status (excellent, poor, fair) to determine proximity, and will guide the nearest personnel to the user in distress.

FLASHPORT AFTERMARKET UPGRADES

The APX 8000H P25 Portable Radios are part of the FLASHport Program. This means that APX 8000H hardware models can be loaded with different software packages that provide the features and functionalities that our customers require.

System Enhancement Options can be loaded at the time of radio purchase or at a later date through the use of software field upgrades. The APX 8000H portable can be upgraded electronically in the field with new features in the current system or to new systems operation by ordering upgrade kits.

FLASHport upgrades are supported via Wi-Fi using Radio Management (RM) on APX 8000H.

JUMP TO ...[MODEL](#)[UPDATES](#)[ORDERING INFORMATION](#)[CONFIGURATION](#)[SOFTWARE AND SERVICES](#)[SHIP CARD](#)**Model****APX™ 8000HXE P25 All-Band Portable Radio****700/800 MHz****VHF****UHF R1 & UHF R2****Updates**

Effective March 5th, 2020: All U.S. orders will book as P25 CAP Compliant by internally generating the P25 “clear” non-encryption option QA05751 (Disable Encryption) if no other encryption is selected. ADP will no longer ship standard. It will now be an orderable option (G193 for mobiles, Q667 for portables). Units shipped with QA05751 are not field-upgradable for encryption and any changes will require units to be sent to a depot. Further ordering changes are captured in the Encryption Algorithm and Multikey sections below.

HAZARDOUS LOCATION

The APX 8000HXE will ship standard with PMNN4547. The APX 8000HXE is certified by Underwriters' Laboratory when properly equipped with the standard battery, PMNN4547. There is no option to delete this battery on this model.

When equipped with Motorola Battery PMNN4547, the APX 8000HXE models are certified as intrinsically safe for use in ANSI/TIA 4950-A ; Classification Rating Class I, Division 1, Groups C, D; Class II, Division 1, Group E, F, G; Class III, Hazardous (Classified) Locations. ANSI/ISA 12.12.01-2015 and CAN/CSA C22.2 No.213-15; Class I, Division 2, Groups A, B, C, D; T3C. Tamb = -25° C to +60° T3C.

Canada Customers: When equipped with Motorola Battery PMNN4547, the APX 8000HXE models are certified as intrinsically safe for use in CAN/CSA C22.2 NO. 157-92; Classification Rating Class I, Division 1, Group D; Class II, Division 1, Group E, F, G; Class III, Hazardous (Classified) Locations. ANSI/ISA 12.12.01-2015 and CAN/CSA C22.2 No.213-15; Class I, Division 2, Groups A, B, C, D; T3C. Tamb = -25° C to +60° T3C.

Special Note for United States - State & Local Markets Only

In accordance with FCC mandate, the APX 8000HXE all band radio is restricted to 12.5 KHz operation only and does NOT support 25 KHz in the VHF and UHF Bands (excluding T-Band). This applies to customers under Rule Part 90. Customers with FCC waivers can contact their Business Development Representative.

DHS Project 25 Compliance Assessment Program (CAP) has defined a "CAP Encryption Requirements compliant radio" as a radio that can be ordered without encryption or one that can be ordered with AES256. << [Click to learn more](#)>>

Standard Features

All ASTRO Digital APX 8000HXE models include the following features:

- All-Band Capability (UHF, VHF, 7/800)
- Adaptive Audio Engine
- GPS Software & Hardware (QA00782)
- Mission Critical Wireless Bluetooth® 4.0 (LE) (QA00583)
- ADP Privacy - Single Key
- Radio Packet Data (Q947)
- Software Key (QA01749)
- Extreme 1-Sided Noise Reduction (QA01833)
- One Touch/Status Message (H46)
- Radio Trace/Remote Monitor (H43)
- Enhanced Zone Bank (QA01768)
- 3 Programmable Side Buttons
- Orange Programmable Button
- 16 Position Mode Rotary Select Switch
- Angled On/Off Volume Knob
- 1 Top Mounted Programmable 3 Position Toggle Switch
- Top Display: 1 line of text, 1 line of icons, 0 menu lines
- Dual Microphone
- 3 Watt Rated Audio
- Carry Holder (PMLN7954)
- IMPRES 2 Battery (PMNN4547)
- All-Band Antenna (KT000026A01)
- Models 2.5 & 3.5:
 - Unified Call List
 - Front Color Display: 4 Lines of Text, 2

- Lines of Icons
 - Radio Profiles
 - 3 Programmable Buttons
 - 4-Way Navigation
 - Home & Data Buttons
- Model 3.5: 4 X 3 Alpha-Numeric Keypad
- MIL-STD Delta-T, IP68 submersion (2m, 4hr)

Description	Full Description	Nomenclature	APC	Price
DEL: DELETE 7/800 MHZ BAND	-	QA05507AA	0579	(\$800.00)
DEL: DELETE VHF BAND	-	QA05508AA	0579	(\$800.00)
DEL: DELETE UHF BAND	Deletes both UHF R1 and UHF R2 frequency bands	QA05509AA	0579	(\$800.00)

System Enhancement Options (Optional)

Description	Full Description	Nomenclature	APC	Price
ADD: P25 LINK LAYER AUTHENTICATION	Requires P25 Trunking (Q361)	QA01767	655	\$100.00
ADD: TDMA OPERATION	Requires Q806, H38, Q361. A SOFTWARE or HARDWARE KEY or WACN KEY is REQUIRED to be purchased with any APX Radio operating in trunking. HARDWARE KEY or WACN KEY will still REQUIRE a DVN4046 to be purchased.	QA00580	655	\$450.00
ADD: PROGRAMMING OVER P25 (OTAP)	Requires Digital and IV&D. Compatible with P25 Trunking and Conventional Operation. POP25 requires AES encryption for ASTRO Conventional operation. To do in field POP25 programming must use Advanced System Key (DVN4046A).	G996	655	\$100.00
ADD: MULTICAST VOTING SCAN	Requires Q806 (ASTRO DIGITAL CAI OPERATION)	Q387	655	\$200.00
ADD: DVRS PSU ACTIVATION	Enables DVRS Enhanced PSU functionality on APX Mobile Radios. Requires Digital Operation. QA00631 is to be ordered for radios that are not connected directly to a DVR. If you are connecting your radio directly to a DVR then order GA00631.	QA00631	655	\$100.00
ADD: FRONT PANEL	The APX radio can do FPP on a Trunking equipped radio only on			

PROGRAMMING & CLONING	conventional channels. Requires FPP HW dongle (NNTN7526A) to be purchased.	Q53	655	\$150.00
ADD: FRONT PANEL PROGRAMMING & CLONING (FEDERAL)	-	Q52	655	\$150.00
ADD: SITE SELECTABLE ALERT FOR P25 TRUNKING	-	QA00982	656	\$150.00
ADD: MISSION CRITICAL GEOFENCING	Requires GPS (QA00782).	QA09012	426	\$150.00
ADD: DIGITAL TONE SIGNALING	-	QA09000	656	\$150.00
ADD: GROUP SERVICES	Group Services offers Conventional Alias updates, Trunking Alias updates and Trunking Group Messaging. This option requires G/Q806 for Conventional only capabilities and G/Q361 for any Trunking only capabilities. You can now also do Over the Air Firmware Updates with this feature. (requires digital)	QA09008	655	\$150.00
ADD: MANDOWN OPERATION	-	QA01843	655	\$150.00
ADD: APX Personnel Accountability	This feature now also allows the user to use a side button of the radio as a method to transmit the acknowledgement of an Evacuation instead of using PTT button.	Q445	481	\$150.00
ADD: ENHANCED DATA	Digital (Q806/G806), Smartzone (H38/G51), IV&D (Q947) and P25 Trunking (Q361/G361) are required when ordering	QA03399	656	\$150.00

	QA03399 (Enhanced Data)			
ENH: TACTICAL RADIO STW-STUN/KILL	Tactical Stun Kill is not compatible with DVRs QA00631.	H02	481	\$75.00
ADD: WIFI CAPABILITY	Enables Wi-Fi capability in the radio. Supports codeplug updates, firmware refreshes, and FLASHport upgrades over pre-provisioned wireless networks. Requires Radio Management SW (ordered separately). Must order Out of the Box Wi-Fi Provisioning option (QA09007) if provisioning the radios out of the box using Wi-Fi is desired.	QA09001	579	\$300.00
ADD: OUT OF THE BOX WIFI PROVISIONING	Requires Wi-Fi (QA09001). Must be added if provisioning the radios out of the box using Wi-Fi is desired. Refer to the 'Out of the Box Wi-Fi Provisioning' section above for details.	QA09007	579	\$0.00
ADD: DATA MODEM TETHERING	Requires WiFi (QA09001).	GA09011	681	\$100.00

System Key Software (Optional)

Description	Full Description	Nomenclature	APC	Price
ADD: HW KEY SUPPLEMENTAL DATA	The SOFTWARE KEY is the default Advance System Key option that ships standard on all APX products. You cannot order software key QA01749. The HARDWARE KEY QA01648 can be ordered instead. Be sure to enter the CORRECT SYSTEM OWNER ID in the supplemental data. If an INCORRECT ID is	QA01648AA	0655	\$5.00

	entered, a FLASHport order is required to fix the error. Order HARDWARE KEY (QA01648) if required to operate/program on a trunking system. Not compatible with conventional.			
--	--	--	--	--

Algorithm Types(Optional)

All APX 8000 Radios ship P25 “clear” (QA05751 will internally generate) unless an encryption option is ordered.

AES 256 is the only approved encryption algorithm by P25 CAP and SAFECOM.

Description	Full Description	Nomenclature	APC	Price
ENH: DVP-XL ENCRYPTION	Compatible with Digital and Analog (25kHz Only) operations. ADP Privacy ships standard with Single Key. Multikey is required for multiple algorithms, such as ADP/AES or ADP/DES	H797	655	\$487.00
ENH: DES,DES-XL,DES-OFB ENCRYPTION	(Analog 25 khz) / DES-OFB (Digital 12.5 khz Only) Non-P25 CAP Compliant option. Includes ADP.	Q625	655	\$599.00
ENH: AES ENCRYPTION	Requires digital operation. P25 CAP Compliant option. Includes ADP.	Q629	655	\$475.00
ADD: AES/DES-XL/DES-OFB ENCRYPTION AND ADP	NOT compatible with Q629 or Q625. Must order multikey if you want to use both algorithms.	Q15AJ	0655	\$799.00
ADD: ADP ONLY (NON-P25 CAP COMPLIANT)	Provides for ADP ONLY, a Non-P25 CAP compliant, non-FIPS compliant option. If another encryption is required, please order that option which will internally generate ADP	Q667	430	\$0.00

Multikey Types (Optional)

--	--	--	--	--

Description	Full Description	Nomenclature	APC	Price
ENH: MULTIKEY	-	H869	655	\$330.00
ENH: ASTRO 25 OTAR W/ MULTIKEY	Includes Tactical OTAR. Tactical OTAR can only be utilized when IV&D is purchased.	Q498	655	\$740.00

Antenna (Optional)

Description	Full Description	Nomenclature	APC	Price
DEL: DELETE STANDARD ANTENNA	Deletes the standard all-band (7/8/V/U) antenna (KT000026A01)	H112	579	(\$10.00)

Battery (Optional- Can Only Select One)

HAZLOC Approved

Description	Full Description	Nomenclature	APC	Price
ADD: BATT IMPRES 2 LIION TIA4950 IP68	This option will delete the standard battery and replace it with TIA4950 BATT IMPRES 2 LIION 4600MAH (PMNN4573A)	QA07576	673	\$165.00

Cable (Optional)

Description	Full Description	Nomenclature	APC	Price
ADD: APX DATA CABLE	PMKN4012B- Used to program the radio with Customer Programming Software and Tuner Software. PMKN4013C - Used to program and service the radio with Customer Programming Software and Tuner Software. Compatible on ALL APX Portable Radios	Q157	655	\$75.00

Belt Clips (Optional-Can Only Select One)

Description	Full Description	Nomenclature	APC	Price

DEL: DELETE BELT CLIP/BASIC CARRY HOLDER	This option deletes the XE carry holder, PMLN7954.	H301	655	(\$10.00)
--	--	------	-----	-----------

Packaging (Optional)

Description	Full Description	Nomenclature	APC	Price
ADD: SINGLE UNIT PACKING	-	H842	481	\$0.00

Service Options (Must Select One)

Description	Full Description	Nomenclature	APC	Price
ADD: 3Y ESSENTIAL SERVICE	-	Q58	185	\$110.00
ADD: 3Y ESSENTIAL ACCIDENTAL DAMAGE	-	HA00022AC	185	\$284.00
ADD: 5Y ESSENTIAL SERVICE	-	Q887	185	\$206.00
ADD: 5Y ESSENTIAL ACCIDENTAL DAMAGE	-	HA00025AH	185	\$437.00
ADD: 3Y ESSENTIAL SVC CANADA	Upgrades the standard warranty period to a full three (3) years of hardware service coverage on the internal components of your radio equipment. Repairs will be made only at Motorola authorized service centers. No discounts are allowed on this option.	HA00048	386	\$162.00
ADD: 5Y ESSENTIAL SVC CANADA	Upgrades the standard warranty period to a full five (5) years of hardware service coverage on the internal components of your radio equipment. Repairs will be made only at Motorola authorized service centers. No discounts are allowed on this	HA00049	185	\$222.00

	option.

Documentation (*Optional*)

Online copies of User Guides can be found in the Resources Tab

Description	Full Description	Nomenclature	APC	Price
ADD: DATA LINK MANAGER APP CD- PORTABLES	Option provides the NVN5424 Data CD. Please order this option if you would like the Data CD, and are unable to obtain it through other sources such as MOL.	QA00205	655	\$0.00
ADD: TEST RESULTS / RATED AUDIO PRINTOUT	-	H799BB	0579	\$10.00
ADD: APX8000H USER GUIDE	-	H88	673	\$25.00

Software and Services

WI-FI

APX 8000HXE supports Wi-Fi 802.11 b/g/n with WPA2/WPA (PSK), and WEP security protocols. Wi-Fi can be used with the Radio Management SW in order to do codeplug updates, firmware refreshes, and FLASHport upgrades over a Wireless Network (WLAN). The radio will only connect to available Wi-Fi networks which have been pre-provisioned in the radio codeplug via CPS. The radio can be pre-provisioned with up to 20 SSIDs.

The Wi-Fi feature requires ordering option QA09001. The Wi-Fi feature is also available aftermarket as a FLASHport upgrade if not ordered out of the factory.

Radio Management (RM) is required in order to take advantage of the Wi-Fi capabilities on APX 8000HXE.

OUT OF THE BOX WI-FI PROVISIONING

If a radio is ordered the Wi-Fi option (QA09001) and the customer wishes to provision the radios out of the box using Wi-Fi, the radio must also be ordered with the Out of the Box Wi-Fi Provisioning option (QA09007).

A radio ordered with the Wi-Fi option and the Out of the Box Provisioning over Wi-Fi option will come with the following default codeplug configuration relative to Wi-Fi:

- a. Wi-Fi will be enabled.
- b. There will be one pre-configured network with the Network SSID set to “MyNetwork” and security type will be set to “None”.
- c. The default state of Wi-Fi will be “on”.

A Wi-Fi router is required for connecting the Wi-Fi capable radio to the Device Programmer. The Wi-Fi router is to be procured by the agency programming the radios and must be provisioned with the Network SSID set to “MyNetwork” (case sensitive) with no password enabled.

For more details regarding the Out of the Box Wi-Fi Provisioning process, please refer to the [Out of the Box Wi-Fi Provisioning Leaflet](#).

Bluetooth 4.0 & Emergency Find Me

With Bluetooth 4.0 wireless technology and our APX™ Mission Critical Wireless portfolio, users can now connect a variety of Bluetooth audio accessories and data devices with their APX™ radio.

Bluetooth 4.0 also enables Emergency Find Me, a feature providing personnel with an added level of security by improving response time in emergencies. Once an emergency is activated on the APX 8000HXe, a Bluetooth beacon signals other Bluetooth-enabled APX radios within range. Based on bluetooth signal strength, nearby APX radios will receive an emergency alert via intelligent lighting and a text message with users Radio ID along with signal strength status (excellent, poor, fair) to determine proximity, and will guide the nearest personnel to the user in distress.

FLASHPORT AFTERMARKET UPGRADES

The APX 8000HXE P25 Portable Radios are part of the FLASHport Program. This means that APX 8000HXE hardware models can be loaded with different software packages that provide the features and functionalities that our customers require.

System Enhancement Options can be loaded at the time of radio purchase or at a later date through the use of software field upgrades. The APX 8000H portable can be upgraded electronically in the field with new features in the current system or to new systems operation by ordering upgrade kits.

FLASHport upgrades are supported via Wi-Fi using Radio Management (RM) on APX 8000HXE.

APX™ 8000XE P25 All-Band Portable Radio

**700/800 MHz
VHF
UHF R1 & UHF R2**

Updates

Effective March 5th, 2020: All U.S. orders will book as P25 CAP Compliant by internally generating the P25 “clear” non-encryption option QA05751 (Disable Encryption) if no other encryption is selected. ADP will no longer ship standard. It will now be an orderable option (G193 for mobiles, Q667 for portables). Units shipped with QA05751 are not field-upgradable for encryption and any changes will require units to be sent to a depot. Further ordering changes are captured in the Encryption Algorithm and Multikey sections below.

Ordering Information

Standard Features

All ASTRO Digital APX 8000XE models include the following features:

- All-Band Capability (UHF, VHF, 7/800)
- Adaptive Audio Engine
- 3 Programmable Side Buttons
- Orange Programmable Button

- GPS Software & Hardware (QA00782)
- Mission Critical Wireless Bluetooth® 4.0 (LE) (QA00583)
- ADP Privacy - Single Key
- Radio Packet Data (Q947)
- Software Key (QA01749)
- Extreme 1-Sided Noise Reduction (QA01833)
- One Touch/Status Message (H46)
- Radio Trace/Remote Monitor (H43)
- Enhanced Zone Bank (QA01768)
- 16 Position Mode Rotary Select Switch
- Angled On/Off Volume Knob
- 1 Top Mounted Programmable 3 Position Toggle Switch
- Top Display: 1 line of text, 1 line of icons, 0 menu lines
- Dual Microphone
- 3 Watt Rated Audio
- Detachable Belt Clip (Model 1.5) / Carry Holder (Models 2.5 & 3.5)
- IMPRES 2 Battery with UL Certification for ISA 12.12.01-2015 and CAN /CSA C22.2 No. 213-15 (PMNN4504)
- MIL-STD Delta-T, IP68 (2 m, 4 hr)
- All-Band Antenna (KT000026A01)
- Models 2.5 & 3.5:
 - Unified Call List
 - Front Color Display: 4 Lines of Text, 2 Lines of Icons
 - Radio Profiles
 - 3 Programmable Buttons
 - 4-Way Navigation
 - Home & Data Buttons
- Model 3.5: 4 X 3 Alpha-Numeric Keypad

Description	Full Description	Nomenclature	APC	Price
ADD: ANALOG OPERATION	-	Q241	579	\$0.00
ADD: SMARTZONE OPERATION	A SOFTWARE or HARDWARE KEY or WACN KEY is REQUIRED to be purchased with any APX Radio operating in trunking. HARDWARE KEY or WACN KEY will still REQUIRE a DVN4046 to be purchased.	H38	655	\$1,500.00

2E: Analog Conventional

Description	Full Description	Nomenclature	APC	Price
ADD: ANALOG OPERATION	-	Q241	579	\$0.00
ADD: CONVENTIONAL OPERATION	-	H35	655	\$800.00

Options

3: Housing (Optional-Can Only Select One)

Description	Full Description	Nomenclature	APC	Price
ALT:APX 8000 HOUSING YELLOW	-	H64	579	\$25.00
ALT:APX 8000 HOUSING GREEN	-	QA01427	579	\$25.00

4: Delete Frequency Bands (Optional. Can select a MAXIMUM of TWO)

Description	Full Description	Nomenclature	APC	Price
DEL: DELETE 7/800 MHZ BAND	-	QA05507AA	0579	(\$800.00)
DEL: DELETE VHF BAND	-	QA05508AA	0579	(\$800.00)
DEL: DELETE UHF BAND	Deletes both UHF R1 and UHF R2 frequency bands	QA05509AA	0579	(\$800.00)

5: RFID Enabled Volume Knob (Optional)

Description	Full Description	Nomenclature	APC	Price
ADD: RFID KNOB	<p>Compatible with APX6000, APX7000 & APX8000. Portable radio volume knob with embedded RFID tag making it easier to track assets. When option is ordered, RFID Volume knob will come in the box with the portable radio and other ordered accessories but RFID knob will not be assembled to the radio. AFTERMARKET purchase through Parts department for fielded radios NNTN8646 (APX6000/APX7000/APX8000) and NNTN8647 (APX6000XE/APX7000XE/APX8000XE). See RFID Solution Partner link for information on partners that can provide customers with scanner hardware and back end asset management solutions.</p>	QA04526	655	\$25.00

6: System Enhancement Options (Optional)

--	--	--	--	--

Description	Full Description	Nomenclature	APC	Price
ADD: P25 LINK LAYER AUTHENTICATION	Requires P25 Trunking (Q361)	QA01767	655	\$100.00
ADD: TDMA OPERATION	Requires Q806, H38, Q361. A SOFTWARE or HARDWARE KEY or WACN KEY is REQUIRED to be purchased with any APX Radio operating in trunking. HARDWARE KEY or WACN KEY will still REQUIRE a DVN4046 to be purchased.	QA00580	655	\$450.00
ADD: PROGRAMMING OVER P25 (OTAP)	Requires Digital and IV&D. Compatible with P25 Trunking and Conventional Operation. POP25 requires AES encryption for ASTRO Conventional operation. To do in field POP25 programming must use Advanced System Key (DVN4046A).	G996	655	\$100.00
ADD: MULTICAST VOTING SCAN	Requires Q806 (ASTRO DIGITAL CAI OPERATION)	Q387	655	\$200.00
ADD: ENHANCED DATA	Digital (Q806/G806), Smartzone (H38/G51), IV&D (Q947) and P25 Trunking (Q361/G361) are required when ordering QA03399 (Enhanced Data)	QA03399	656	\$150.00
ADD: DVRS PSU ACTIVATION	Enables DVRS Enhanced PSU functionality on APX Mobile Radios. Requires Digital Operation. QA00631 is to be ordered for radios that are not connected directly to a DVR. If you are connecting your radio directly to a DVR then order GA00631.	QA00631	655	\$100.00
	The APX radio can do FPP on a Trunking equipped			

ADD: FRONT PANEL PROGRAMMING & CLONING	radio only on conventional channels. Requires FPP HW dongle (NNTN7526A)to be purchased.	Q53	655	\$150.00
ADD: SITE SELECTABLE ALERT FOR P25 TRUNKING	-	QA00982	656	\$150.00
ADD: MISSION CRITICAL GEOFENCING	Requires GPS (QA00782).	QA09012	426	\$150.00
ADD: DIGITAL TONE SIGNALING	-	QA09000	656	\$150.00
ADD: GROUP SERVICES	Group Services offers Conventional Alias updates, Trunking Alias updates and Trunking Group Messaging. This option requires G/Q806 for Conventional only capabilities and G/Q361 for any Trunking only capabilities. You can now also do Over the Air Firmware Updates with this feature. (requires digital)	QA09008	655	\$150.00
ADD: MANDOWN OPERATION	-	QA01843	655	\$150.00
ADD: APX Personnel Accountability	This feature now also allows the user to use a side button of the radio as a method to transmit the acknowledgement of an Evacuation instead of using PTT button.	Q445	481	\$150.00
ENH: TACTICAL RADIO STW-STUN/KILL	Tactical Stun Kill is not compatible with DVRs QA00631.	H02	481	\$75.00
	Enables Wi-Fi capability in the radio. Supports codeplug updates, firmware refreshes, and FLASHport upgrades over pre-provisioned wireless networks. Requires			

ADD: WIFI CAPABILITY	Radio Management SW (ordered separately). Must order Out of the Box Wi-Fi Provisioning option (QA09007) if provisioning the radios out of the box using Wi-Fi is desired.	QA09001	579	\$300.00
ADD: OUT OF THE BOX WIFI PROVISIONING	Requires Wi-Fi (QA09001). Must be added if provisioning the radios out of the box using Wi-Fi is desired. Refer to the 'Out of the Box Wi-Fi Provisioning' section above for details.	QA09007	579	\$0.00
ADD: DATA MODEM TETHERING	Requires QA09001 (WiFi)	GA09011	681	\$100.00

7: Advanced System Key (Optional)

Description	Full Description	Nomenclature	APC	Price
ADD: HW KEY SUPPLEMENTAL DATA	The SOFTWARE KEY is the default Advance System Key option that ships standard on all APX products. You cannot order software key QA01749. The HARDWARE KEY QA01648 can be ordered instead. Be sure to enter the CORRECT SYSTEM OWNER ID in the supplemental data. If an INCORRECT ID is entered, a FLASHport order is required to fix the error. Order HARDWARE KEY (QA01648) if required to operate/program on a trunking system. Not compatible with conventional.	QA01648AA	0655	\$5.00

8: Algorithm Types (Optional)

All APX 8000 Radios ship P25 "clear" (QA05751 will internally generate) unless an encryption option is ordered.

AES 256 is the only approved encryption algorithm by P25 CAP and SAFECOM.

Description	Full Description	Nomenclature	APC	Price
-------------	------------------	--------------	-----	-------

ENH: DVP-XL ENCRYPTION	Multikey is required for use of more than one key. Includes ADP. Non-P25 CAP Compliant option.	H797	655	\$487.00
ENH: DES,DES-XL,DES-OFB ENCRYPTION	Multikey is required for use of more than one key. Non-P25 CAP Compliant option.	Q625	655	\$599.00
ENH: AES ENCRYPTION	Requires digital operation. P25 CAP Compliant option. Includes ADP.	Q629	655	\$475.00
ADD: AES/DES-XL/DES-OFB ENCRYPTION AND ADP	Multikey is required for use of more than one key. AES and DES-OFB Operation require digital operation. P25 CAP Compliant option. Includes ADP.	Q15AJ	0655	\$799.00
ADD: ADP ONLY (NON-P25 CAP COMPLIANT)	Provides for ADP ONLY, a Non-P25 CAP compliant, non-FIPS compliant option. If another encryption is required, please order that option which will internally generate ADP.	Q667	430	\$0.00

9: Multikey Types (Optional)

Description	Full Description	Nomenclature	APC	Price
ENH: MULTIKEY	-	H869	655	\$330.00
ENH: ASTRO 25 OTAR W/ MULTIKEY	Includes Tactical OTAR. Tactical OTAR can only be utilized when IV&D is purchased.	Q498	655	\$740.00
ADD: MULTI SYSTEM OTAR	Requires Q498 ASTRO 25 OTAR W/ MULTIKEY	QA07680	655	\$150.00

10: Antenna (Optional)

Description	Full Description	Nomenclature	APC	Price

DEL: DELETE STANDARD ANTENNA	Deletes the standard all-band (7/8/V/U) antenna (KT000026A01)	H112	579	(\$10.00)
---------------------------------	--	------	-----	-----------

11: Battery (Optional)

Division 2 Approved

Description	Full Description	Nomenclature	APC	Price
ALT: BATT IMPRES 2 LIION DIV2 4850	This option will delete the standard battery and replace it with UL2054 DIV2 IMPRESS 2 LIION 4850 MAH (PMNN4505).	QA05595	579	\$145.00

Not Compatible if Division 2 Certification is Required

Description	Full Description	Nomenclature	APC	Price

Software and Services

General Information

Special Note for United States - State & Local Markets Only

In accordance with FCC mandate, the APX 8000XE all band radio is restricted to 12.5 KHz operation only and does NOT support 25 KHz in the VHF and UHF Bands (excluding T-Band). This applies to customers under Rule Part 90. Customers with FCC waivers can contact their Business Development Representative.

DHS Project 25 Compliance Assessment Program (CAP) has defined a "CAP Encryption Requirements compliant radio" as a radio that can be ordered without encryption or one that can be ordered with AES256. << [Click to learn more](#)>>

The Master Key Start-Up Kit (DVN4046) is required to use the Hardware Key (QA01648) or to operate on a third-party trunking system if the customer does not already possess one, or if theirs has expired. [Please CLICK HERE](#) for further details regarding the DVN4046 Kit.

WI-FI

APX 8000XE supports Wi-Fi 802.11 b/g/n with WPA2/WPA (PSK), and WEP security protocols. Wi-Fi can be used with the Radio Management SW in order to do codeplug updates, firmware refreshes, and FLASHport upgrades over a Wireless Network (WLAN). The radio will only connect to available Wi-Fi networks which have been pre-provisioned in the radio codeplug via CPS. The radio can be pre-provisioned with up to 20 SSIDs.

The Wi-Fi feature requires ordering option QA09001. The Wi-Fi feature is also available

aftermarket as a FLASHport upgrade if not ordered out of the factory.

Radio Management (RM) is required in order to take advantage of the Wi-Fi capabilities on APX 8000XE.

OUT OF THE BOX WI-FI PROVISIONING

If a radio is ordered the Wi-Fi option (QA09001) and the customer wishes to provision the radios out of the box using Wi-Fi, the radio must also be ordered with the Out of the Box Wi-Fi Provisioning option (QA09007).

A radio ordered with the Wi-Fi option and the Out of the Box Provisioning over Wi-Fi option will come with the following default codeplug configuration relative to Wi-Fi:

- Wi-Fi will be enabled.
- There will be one pre-configured network with the Network SSID set to “MyNetwork” and security type will be set to “None”.
- The default state of Wi-Fi will be “on”.

A Wi-Fi router is required for connecting the Wi-Fi capable radio to the Device Programmer. The Wi-Fi router is to be procured by the agency programming the radios and must be provisioned with the Network SSID set to “MyNetwork” (case sensitive) with no password enabled.

For more details regarding the Out of the Box Wi-Fi Provisioning process, please refer to the [Out of the Box Wi-Fi Provisioning Leaflet](#).

BLUETOOTH 4.0 & EMERGENCY FIND ME

With Bluetooth 4.0 wireless technology and our APX™ Mission Critical Wireless portfolio, users can now connect a variety of Bluetooth audio accessories and data devices with their APX™ radio.

Bluetooth 4.0 also enables Emergency Find Me, a feature providing personnel with an added level of security by improving response time in emergencies. Once an emergency is activated on the APX 8000XE, a Bluetooth beacon signals other Bluetooth-enabled APX radios within range. Based on bluetooth signal strength, nearby APX radios will receive an emergency alert via intelligent lighting and a text message with users Radio ID along with signal strength status (excellent, poor, fair) to determine proximity, and will guide the nearest personnel to the user in distress.

FLASHPORT AFTERMARKET UPGRADES

The APX 8000XE P25 Portable Radios are part of the FLASHport Program. This means that APX 8000XE hardware models can be loaded with different software packages that provide the features and functionalities that our customers require.

System Enhancement Options can be loaded at the time of radio purchase or at a later date through the use of software field upgrades. The APX 8000 portable can be upgraded electronically in the field with new features in the current system or to new systems operation by ordering upgrade kits.

FLASHport upgrades are supported via Wi-Fi using Radio Management (RM) on APX 8000XE.

Fleet Management software was previously distributed on DVDs shipped out of Elgin. It is now downloadable from motsolutions.com at the link below. Look at the right edge of the page under Resources Spotlight. The first link is the Order Guide which tells you what you need. The second link is a free 90 day trial version that they can download and evaluate free for 90 days. The third link is the actual program, you need to purchase a license to use it (explained in the order guide).

Updates

DHS Project 25 Compliance Assessment Program (CAP) has defined a "CAP Encryption Requirements compliant radio" as a radio that can be ordered without encryption or one that can be ordered with AES256. << [Click to learn more](#)>>

Ordering Information

Standard Features

All ASTRO Digital APX 8000XE models include the following features:

- All-Band Capability (UHF, VHF, 7/800)
- Adaptive Audio Engine
- GPS Software & Hardware (QA00782)
- 3 Programmable Side Buttons
- Orange Programmable Button
- 16 Position Mode Rotary Select Switch
- Angled On/Off Volume Knob

Mission Critical Wireless Bluetooth® 4.0 (LE) (QA00583)

- ADP Privacy - Single Key
- Radio Packet Data (Q947)
- Software Key (QA01749)
- Extreme 1-Sided Noise Reduction (QA01833)
- One Touch/Status Message (H46)
- Radio Trace/Remote Monitor (H43)
- Enhanced Zone Bank (QA01768)
- 1 Top Mounted Programmable 3 Position Toggle Switch
- Top Display: 1 line of text, 1 line of icons, 0 menu lines
- Dual Microphone
- 3 Watt Rated Audio
- Detachable Belt Clip (Model 1.5) / Carry Holder (Models 2.5 & 3.5)
- IMPRES 2 Battery with UL Certification for ISA 12.12.01-2015 and CAN /CSA C22.2 No. 213-15 (PMNN4504)
- MIL-STD Delta-T, IP68 (2 m, 4 hr)
- All-Band Antenna (KT000026A01)
- Models 2.5 & 3.5:
 - Unified Call List
 - Front Color Display: 4 Lines of Text, 2 Lines of Icons
 - Radio Profiles
 - 3 Programmable Buttons
 - 4-Way Navigation
 - Home & Data Buttons
- Model 3.5: 4 X 3 Alpha-Numeric Keypad

Description	Full Description	Nomenclature	APC	Price
-------------	------------------	--------------	-----	-------

ADD: P25 LINK LAYER AUTHENTICATION	Requires P25 Trunking (Q361)	QA01767	655	\$100.00
ADD: TDMA OPERATION	Requires Q806, H38, Q361. A SOFTWARE or HARDWARE KEY or WACN KEY is REQUIRED to be purchased with any APX Radio operating in trunking. HARDWARE KEY or WACN KEY will still REQUIRE a DVN4046 to be purchased.	QA00580	655	\$450.00
ADD: PROGRAMMING OVER P25 (OTAP)	Requires Digital and IV&D. Compatible with P25 Trunking and Conventional Operation. POP25 requires AES encryption for ASTRO Conventional operation. To do in field POP25 programming must use Advanced System Key (DVN4046A).	G996	655	\$100.00
ADD: MULTICAST VOTING SCAN	Requires Q806 (ASTRO DIGITAL CAI OPERATION)	Q387	655	\$200.00
ADD: ENHANCED DATA	Digital (Q806/G806), Smartzone (H38/G51), IV&D (Q947) and P25 Trunking (Q361/G361) are required when ordering QA03399 (Enhanced Data)	QA03399	656	\$150.00
ADD: DVRS PSU ACTIVATION	Enables DVRS Enhanced PSU functionality on APX Mobile Radios. Requires Digital Operation. QA00631 is to be ordered for radios that are not connected directly to a DVR. If you are connecting your radio directly to a DVR then order GA00631.	QA00631	655	\$100.00
	The APX radio can do			

ADD: FRONT PANEL PROGRAMMING & CLONING	FPP on a Trunking equipped radio only on conventional channels. Requires FPP HW dongle (NNTN7526A) to be purchased.	Q53	655	\$150.00
ADD: FRONT PANEL PROGRAMMING & CLONING (FEDERAL)	-	Q52	655	\$150.00
ADD: SITE SELECTABLE ALERT FOR P25 TRUNKING	-	QA00982	656	\$150.00
ADD: MISSION CRITICAL GEOFENCING	Requires GPS (QA00782).	QA09012	426	\$150.00
ADD: DIGITAL TONE SIGNALING	-	QA09000	656	\$150.00
ADD: GROUP SERVICES	Group Services offers Conventional Alias updates, Trunking Alias updates and Trunking Group Messaging. This option requires G/Q806 for Conventional only capabilities and G/Q361 for any Trunking only capabilities. You can now also do Over the Air Firmware Updates with this feature. (requires digital)	QA09008	655	\$150.00
ADD: MANDOWN OPERATION	-	QA01843	655	\$150.00
ADD: APX Personnel Accountability	This feature now also allows the user to use a side button of the radio as a method to transmit the acknowledgement of an Evacuation instead of using PTT button.	Q445	481	\$150.00
ENH: TACTICAL RADIO STW-STUN/KILL	Tactical Stun Kill is not compatible with DVRs QA00631.	H02	481	\$75.00

ADD: WIFI CAPABILITY	Enables Wi-Fi capability in the radio. Supports codeplug updates, firmware refreshes, and FLASHport upgrades over pre-provisioned wireless networks. Requires Radio Management SW (ordered separately). Must order Out of the Box Wi-Fi Provisioning option (QA09007) if provisioning the radios out of the box using Wi-Fi is desired.	QA09001	579	\$300.00
ADD: OUT OF THE BOX WIFI PROVISIONING	Requires Wi-Fi (QA09001). Must be added if provisioning the radios out of the box using Wi-Fi is desired. Refer to the 'Out of the Box Wi-Fi Provisioning' section above for details.	QA09007	579	\$0.00
ADD: DATA MODEM TETHERING	Requires QA09001 (WiFi)	GA09011	681	\$100.00

7: Advanced System Key (Optional)

Description	Full Description	Nomenclature	APC	Price
ADD: HW KEY SUPPLEMENTAL DATA	The SOFTWARE KEY is the default Advance System Key option that ships standard on all APX products. You cannot order software key QA01749. The HARDWARE KEY QA01648 can be ordered instead. Be sure to enter the CORRECT SYSTEM OWNER ID in the supplemental data. If an INCORRECT ID is entered, a FLASHport order is required to fix the error. Order HARDWARE KEY (QA01648) if required to operate/program on a trunking system. Not compatible with conventional.	QA01648AA	0655	\$5.00

8: Algorithm Types (Optional)

Description	Full Description	Nomenclature	APC	Price
ADD: NO ADP FOR P25 CAP	Customers who require compliance with DHS Project 25 CAP Encryption Requirements and who requires a clear radio with no encryption enabled will need to select option QA05751. The radios will need to be sent to the Motorola Depot if Encryption is needed in the future.	QA05751	655	\$0.00
ENH: DVP-XL ENCRYPTION	Compatible with Digital and Analog (25kHz Only) operations. ADP Privacy ships standard with Single Key. Multikey is required for multiple algorithms, such as ADP/AES or ADP/DES .	H797	655	\$487.00
ENH: DES,DES-XL,DES-OFB ENCRYPTION	(Analog 25 khz) / DES-OFB (Digital 12.5 khz Only)	Q625	655	\$599.00
ENH: AES ENCRYPTION	-	Q629	655	\$475.00
ADD: AES/DES-XL/DES-OFB ENCRYPTION AND ADP	NOT compatible with Q629 or Q625. Must order multikey if you want to use both algorithms.	Q15AJ	0655	\$799.00

9: Multikey Types (Optional)

Description	Full Description	Nomenclature	APC	Price
ENH: MULTIKEY	-	H869	655	\$330.00
ENH: ASTRO 25 OTAR W/ MULTIKEY	Includes Tactical OTAR. Tactical OTAR can only be utilized when IV&D is purchased.	Q498	655	\$740.00
ADD: MULTI SYSTEM OTAR	Requires Q498 ASTRO 25 OTAR W/ MULTIKEY	QA07680	655	\$150.00

10: Antenna (Optional)

Description	Full Description	Nomenclature	APC	Price
DEL: DELETE STANDARD ANTENNA	Deletes the standard all-band (7/8/V/U) antenna (KT000026A01)	H112	579	(\$10.00)

11: Battery (Optional)

Division 2 Approved

Description	Full Description	Nomenclature	APC	Price
ALT: BATT IMPRES 2 LIION DIV2 4850	This option will delete the standard battery and replace it with UL2054 DIV2 IMPRESS 2 LIION 4850 MAH (PMNN4505).	QA05595	579	\$145.00

Not Compatible if Division 2 Certification is Required

Software and Services

General Information

Special Note for United States - State & Local Markets Only

In accordance with FCC mandate, the APX 8000XE all band radio is restricted to 12.5 KHz operation only and does NOT support 25 KHz in the VHF and UHF Bands (excluding T-Band). This applies to customers under Rule Part 90. Customers with FCC waivers can contact their Business Development Representative.

DHS Project 25 Compliance Assessment Program (CAP) has defined a "CAP Encryption Requirements compliant radio" as a radio that can be ordered without encryption or one that can be ordered with AES256. << [Click to learn more](#)>>

The Master Key Start-Up Kit (DVN4046) is required to use the Hardware Key (QA01648) or to operate on a third-party trunking system if the customer does not already possess one, or if theirs has expired. [Please CLICK HERE](#) for further details regarding the DVN4046 Kit.

WI-FI

APX 8000XE supports Wi-Fi 802.11 b/g/n with WPA2/WPA (PSK), and WEP security

protocols. Wi-Fi can be used with the Radio Management SW in order to do codeplug updates, firmware refreshes, and FLASHport upgrades over a Wireless Network (WLAN). The radio will only connect to available Wi-Fi networks which have been pre-provisioned in the radio codeplug via CPS. The radio can be pre-provisioned with up to 20 SSIDs.

The Wi-Fi feature requires ordering option QA09001. The Wi-Fi feature is also available aftermarket as a FLASHport upgrade if not ordered out of the factory.

Radio Management (RM) is required in order to take advantage of the Wi-Fi capabilities on APX 8000XE.

OUT OF THE BOX WI-FI PROVISIONING

If a radio is ordered the Wi-Fi option (QA09001) and the customer wishes to provision the radios out of the box using Wi-Fi, the radio must also be ordered with the Out of the Box Wi-Fi Provisioning option (QA09007).

A radio ordered with the Wi-Fi option and the Out of the Box Provisioning over Wi-Fi option will come with the following default codeplug configuration relative to Wi-Fi:

- Wi-Fi will be enabled.
- There will be one pre-configured network with the Network SSID set to “MyNetwork” and security type will be set to “None”.
- The default state of Wi-Fi will be “on”.

A Wi-Fi router is required for connecting the Wi-Fi capable radio to the Device Programmer. The Wi-Fi router is to be procured by the agency programming the radios and must be provisioned with the Network SSID set to “MyNetwork” (case sensitive) with no password enabled.

For more details regarding the Out of the Box Wi-Fi Provisioning process, please refer to the [Out of the Box Wi-Fi Provisioning Leaflet](#).

BLUETOOTH 4.0 & EMERGENCY FIND ME

With Bluetooth 4.0 wireless technology and our APX™ Mission Critical Wireless portfolio, users can now connect a variety of Bluetooth audio accessories and data devices with their APX™ radio.

Bluetooth 4.0 also enables Emergency Find Me, a feature providing personnel with an added level of security by improving response time in emergencies. Once an emergency is activated on the APX 8000XE, a Bluetooth beacon signals other Bluetooth-enabled APX radios within range. Based on bluetooth signal strength, nearby APX radios will receive an emergency alert via intelligent lighting and a text message with users Radio ID along with signal strength status (excellent, poor, fair) to determine proximity, and will guide the nearest personnel to the user in distress.

FLASHPORT AFTERMARKET UPGRADES

The APX 8000XE P25 Portable Radios are part of the FLASHport Program. This means that APX 8000XE hardware models can be loaded with different software packages that provide the features and functionalities that our customers require.

System Enhancement Options can be loaded at the time of radio purchase or at a later date

through the use of software field upgrades. The APX 8000 portable can be upgraded electronically in the field with new features in the current system or to new systems operation by ordering upgrade kits.

FLASHport upgrades are supported via Wi-Fi using Radio Management (RM) on APX 8000XE.

Fleet Management software was previously distributed on DVDs shipped out of Elgin. It is now downloadable from motsolutions.com at the link below. Look at the right edge of the page under Resources Spotlight. The first link is the Order Guide which tells you what you need. The second link is a free 90 day trial version that they can download and evaluate free for 90 days. The third link is the actual program, you need to purchase a license to use it (explained in the order guide).

Product Specifications

Firefighters said they wanted equivalent extreme features as the APX XE Series including a larger display, exaggerated control knobs and the capability to communicate with surrounding municipalities within an all-band radio solution. The APX 8000XE brings together not only these requirements, but also the integration of WiFi for programming flexibility.

The APX 8000XE is redefining mission critical communications by delivering an ultra-durable radio that combines unlimited interoperability, loud audio and secure WiFi connectivity. With a dedicated channel knob and ability to withstand 500°F (260°C) heat exposure, the [APX XE500 Remote Speaker Microphone](#) is the perfect companion to the APX 8000XE. When combined, the APX 8000XE All-Band Portable Radio and XE500 Remote Speaker Microphone create the ultimate mission critical solution designed for safety personnel in extreme environments.

For APX 8000XE Radios

Updates

NOTE: only the accessories listed below have been certified with APX 8000XE radios

Ordering Information

General Information

The APX P25 mission critical two-way radio series redefines safety in portable communication. From the fire line to the factory line, APX puts the right devices into the hands of the right user. Every feature and function is designed with its users in mind - from the rugged, easy to operate design to the loudest, clearest audio. The result is the ability to keep your people and community safer than ever before.

Extend the power and reliability of your radio with the only complete line of accessories designed, tested and certified for optimal performance with APX portables. This flexible portfolio offers solutions that meet your customers' specific needs. This includes a robust and complete portfolio of remote speaker microphones including the XE Remote Speaker Microphone which has been designed specifically for harsh conditions for the fireground. And the APX Mission Critical Wireless portfolio delivers best-in-class Bluetooth® wireless designed specifically for first responders. While our IMPRES smart battery and charger solutions ensure your responders have a battery that is ready to go at the moment they need it.

Every Motorola battery, charger, audio accessory, carry case and antenna is best-in-class technology, designed and optimized specifically for your APX portable.

961 - 972	794 - 794.075
1909 - 1920	805.925 - 806

ALL ITEMS REQUIRE AN EXPORT LICENSE TO BE EXPORTED FROM THE UNITED STATES/CANADA

General Information

Operating Modes

ASTRO Digital APX 8500 Radio Models are capable of operating in four different voice communication modes:

- Normal Analog (clear voice)
- 3.6KB ASTRO Digital (both clear and coded voice)
- 9.6 KB ASTRO 25 Digital (both Clear and Coded voice)
- 9.6KB 12.5kHz 2 slot digital TDMA (both clear and coded voice).
- Will be capable of APCO25 Phase 2 functionality in future software releases.

MULTI BAND/SINGLE BAND

APX 8500 meets P25 public safety specifications for seamless multi-agency collaboration by offering the option to operate in four separate band configurations. APX 8500 capable of operating in 700MHz, 800MHz & VHF* and UHF R1 and R2 and can act as 2 APX7500 radios in one; enabling instant, interoperable communications for improved coordination, response, and first responder safety. Public safety officials can now reduce the amount of equipment responders must carry and maintain.

TDMA

FDMA (Frequency Division Multiple Access) is a proven technology that is widely used today in radio systems and is part of APCO 25 Project 25 Phase 1 standard. FDMA carries one call per channel. TDMA (Time Division Multiple Access) will be part of P25 Phase 2 standard and provides double the voice capacity as 2 calls can share 1 channel. Customers can add more users to their systems without the need of additional frequencies or infrastructure. The APX radios support both P25 Phase 1 and TDMA technologies seamlessly. Using Motorola's unique Dynamic Dual Mode (DDM) capability, the radios dynamically switch between FDMA and TDMA without the user having to change channels. This provides interoperability on demand with existing and future networks.

FLASHport AFTERMARKET UPGRADES

The ASTRO Digital APX 8500 Mobile Series Radios are part of the FLASHport Program. This means that ASTRO Digital APX 8500 hardware models can be loaded with different software packages that provide the features and functionalities that our customers require.

System Enhancement Options can be loaded at the time of radio purchase or at a later date through the use of software field upgrades (a USB cable is required for all software upgrades.) The ASTRO Digital APX 8500 Mobile can be upgraded electronically in the field with new features in the current system or to new systems operation (contingent upon remaining within the same RF sub-band) by ordering upgrade kits.

Standard Features

- All Band support
- Up to 3000 Channels
- G170 Remote Monitor
- G683 Trunked One Touch
- Narrow and wide bandwidth digital receiver
- Text Messaging
- (6.25kHz/12.5kHz/25kHz) programing
- Intergrated Voice and Data
- Integrated GPS capable (requires digital operation and an GPS antenna)
- Seamless wideband scan
- Intelligent lighting
- Radio profiles
- Unified Call List
- Meets applicable MIL-specs 810C, D, E, F and G
- Ships standard IP56 when remote
- Utilizes Windows 7, 8 and 10 Customer Programming Software (CPS)
- Supports USB Communications
- Built in FLASHport™ support
- Re-use of most accessories
- Standard Advanced Digital Privacy
- Voice Announcements

Optional Features

Can be found in product catalog and may require specific software and or hardware

- WIFI
- Data Modem Tethering

- Over The Air Re-Key (OTAR)

- RFID

- FLASHPORT®

All ASTRO Digital APX 8500 Mobiles are part of the FLASHport® program and ship standard with a FLASH EE Prom, which allows for feature and system upgrades (contingent upon remaining within the current RF capabilities of the radio)

Ordering Requirements

A minimum of one selection from the below 12 sections is required for a valid APX8500 order. Additional compatible options can be added once the required 12 choices are selected.

1	Model AX8500	M37TSS9PW1AN
2	Select Operation Mode	G806 or G241
3a	Select System Enhancement Software	G48 or G51
3b	Select an Optional System Enhancement	G173, G361, GA00580 or QA01648
4	Select Control Head Hardware	GA00804, G72, G442, GA00805, or GA00245
5	Select Control Head Software	Must select G444, G138 motorcycle is optional
6	Select Mounting Type	G66, G67 (G138 motorcycle is optional only if G67 is selected)
7	Select Antenna	Motorcycle requires one choice per active band U1 and U2 are considered a singleband. Vehicle options are GA01513 or G89.
8	Select GPS Antenna	GA00226,GA00269 or GA00235
9	Select Microphone	G90, W20, W22,G892, G874,GA00221, GA01354. GA01438, or GA1439
10	Select Speaker	G831,G832,B18,GA01203 or W432
11	Select if J600 is needed for DVRs or Motorola Siren use	GA01515 or GA01517
12	Select Required Minimum 3 year Warranty	G78,GA0318,GA00249 or GA00255

CHANNEL SPACING

There are no maximum frequency separation conditions that must be adhered to on the APX 8500 Mobile series. Separation of frequencies can be as wide as the allowable band per radio model with no degradation of any performance specifications. If an incorrect antenna is used, degraded performance may be experienced.

PROJECT 25 ENCRYPTION

The mode of operation is programmed on a channel-by-channel basis. With the coded/clear switch set to the clear mode, the ASTRO Digital APX8500 radio is capable of transmitting clear analog voice or clear (unencrypted) ASTRO Digital voice, depending on the channel programming. With the

coded/clear switch set to the coded mode, the ASTRO Digital APX 8500 radio will transmit ASTRO Digital encryption depending on the channel programming. ASTRO Digital encryption provides secure communications. ASTRO Digital Encryption (operation in encrypted mode while also operation in 3.6KB or 9.6KB and TDMA ASTRO mode) is capable of XL type encryptions; ASTRO Digital Encryptions does not operate with non-XL encryptions.

An encryption option is not required for either clear analog operation or clear ASTRO Digital operation. Encryption can be ordered with the ASTRO Digital APX 8500 radio either as a factory installed option or separate from the radio for later field installation. ASTRO Digital APX 8500 radio functions include selected ASTRO digital signaling and digital speech coding.

When ordering any of the Encryption Algorithms:

- The DES-OFB and AES encryption algorithms offered are compliant with digital Project 25 standards and does not support analog encryption operation.
- **Requires** the ASTRO Digital CAI (G806) to operate the DES-OFB and AES encryption.

If ordering a Dual Encryption:

- The non-OFB encryption (XL versions) can be operated in either analog, or CAI digital mode, but will not be Project 25 compliant.
- **Requires** the Multikey (W969).

When used in CAI mode, the non-OFB Encryption will not be Project 25 compliant.

- Encryption Algorithms can be ordered later via Flash Port.

FIPS 140-2 Compliance

Encryption Modules equipped with AES are FIPS 140-2 compliant. Details regarding the certification, and copies of the relevant certificates, can be obtained on the NIST website at: <http://csrc.nist.gov/groups/STM/cmvp/validation.html>.

Further information regarding FIPS 140-2 certification may be found using the following link - FIPS 140-2 Crypto Module Validation Program (CMVP) <http://csrc.nist.gov/groups/STM/cmvp/index.html>

ASTRO Text Messaging Service

ASTRO Text Messaging Service is available on the ASTRO 25 APX 8500 mobile radios with the O5 control head (single and multi-control head) and O3 control head. Text Messaging Service (TMS) allows subscriber users to send and receive text messages to other subscribers or dispatch operators. Users can select messages and addresses from a predefined list or enter freeform text messages and addresses via the keypad. Text Messaging Service is available on ASTRO Trunked IV&D Systems and Subscribers.

For full Text Messaging functionality, including freeform text messaging and addressing, must order O3 Control Head or O5 Control Head with Keypad Microphone. O5 Control Head without the Keypad Microphone supports Limited Text Messaging functionality such as selecting predefined messages or addresses from a list programmed in the radio.

Ordering requirements for APX 8500 Mobile:

- Requires O5 Control Head (G442) or O3 Control Head (G72)
- Full functionality including free form messaging requires the Keypad Microphone (W20) for O5 Control Head
- ASTRO Digital CAI Operation (G806)
- SmartZone Operation (G51)
- ASTRO Project 25 Trunking 9600 Software (G361)
- Packet Data Interface (W947)

NOTE: There is no specific option to order for the Text Messaging Service on the subscribers as the functionality is included in the Packet Data option.

Outdoor Personnel Location Global Positioning Satellite (GPS) Feature

The personnel outdoor location tracking GPS feature enables a dispatcher the ability to locate on-foot patrols and out of the vehicle officers who are involved in life threatening situations. The radio user's GPS position information is sent over the ASTRO 25 Integrated Voice & Data (IV&D) network and is delivered to the dispatch operator using a third party mapping display application at the dispatch center (Mapping Application is not yet available through Motorola at this time, however an Application Developers Tool Kit is available for 3rd party vendors to use to modify existing applications. See link below for more details.) It is possible to the user to determine their own location (latitude/longitude) through the use of the location menu.

For further information regarding System Requirements, go to the location solutions price pages at: <http://ecat.comm.mot.com/ecat/pricebooks/dup/ALLOCATION.htm>

Ordering GPS for APX 8500 Mobile Requires:

- A GPS ANTENNA
- DIGITAL OPERATION

NOTE:

The GPS feature uses radio signals from earth orbiting satellites, to establish the location co-ordinates maximizing your view of clear. Unobstructed sky is essential for optimum performance. When adequate signals from multiple satellites are not available, (usually because you cannot establish a wide area view of the sky), the GPS feature WILL NOT WORK. Such situations include but are not limited to:

- Underground locations
- Inside of buildings, trains, or other covered vehicles
- Under any other metal or concrete roof or structure
- Between tall buildings or under dense tree-cover

VHF SELF-QUIETING SPURS

Frequencies (MHz)
153.6 MHz
410.4 MHz
456 MHz
510.6 MHz

Note: There are no self-quieting spurs for 700/800 MHz.

CPS INFORMATION

****Please note that a NEW version of CPS (RVN5224) is required for initial customer orders for this product. This new version of CPS is required for the APX radio shipments. ****

Update History

Starting January 1 2015.The SOFTWARE KEY (QA01749) is the default Advance System Key, it ships by default on all APX products; The HARDWARE KEY can be ordered instead by using QA01648. The DVN4046 Master Key Starter Kit is required for the Hard Key or to operate on a third-party Trunking system. The CORRECT System Owner ID will be required upon ordering the Hard Key or DVN Kit. Details can be found on the [Advanced System Keys-ASK for RSD Subscriber](#) ECAT page Be sure to enter the CORRECT SYSTEM OWNER ID when supplemental data is required. If an INCORRECT ID is entered, a FLASHport order is required to fix the error

**

Updates

Effective March 5th, 2020: All U.S. orders will book as P25 CAP Compliant by internally generating the P25 “clear” non-encryption option QA05751 (Disable Encryption) if no other encryption is selected. ADP will no longer ship standard. It will now be an orderable option (G193 for mobiles, Q667 for portables). Units shipped with QA05751 are not field-upgradable for encryption and any changes will require units to be sent to a depot. Further ordering changes are captured in the Encryption Algorithm and Multikey sections below.

Effective April 24, 2020: The E5 Control Head will ship accept on June, 2020. Mobile radio orders with the E5 Control Head will remain on hold until the control head is ship accepted.

Effective August 26, 2019: Multi-System OTAR (GA01620) is available. Users who frequently move from one secure system to another will benefit from the ease and speed that radio keys are shared and updated. Our Multi-System Over-the-Air Rekeying (Multi-System OTAR) feature supports over-the-air-rekeying with up to 19 different secure systems, key sharing across profiles and seamless migration of fielded radios. The customer must order OTAR W/ MULTIKEY as a prerequisite for MS-OTAR.

Effective October 25, 2018: All APX 8500 HP Models produced after Oct. 25, 2018 contain WiFi hardware that can be activated at purchase or later via a FLASHport order using GA09001.

Effective June 18th, 2018:

APX 8500 HP/MP ORDERS WITH DVRS ACTIVATION (GA00631) WILL GO ON HOLD TO VERIFY THE FOLLOWING:

Please be aware that depending upon the equipment installation and frequency usage, additional equipment may be required to assure optimal performance between the APX™8500 and DVR/VRX1000. More specifically, when using an APX™8500 with an antenna (all band or with a triplexer) that includes the same frequency range as the DVRS / VXR1000, this additional equipment will help to assure the desired performance between these two products.

This addresses all new sales that combine an APX™8500 with a DVR/VRX1000 as well as any replacements of an existing MSU (Mobile Subscriber Unit) with the APX™8500 where the DVR/VRX1000 may already be deployed.

Please contact sales@futurecom.com for more information. To assist Futurecom sales with assessing a particular configuration, the following information will be needed:

1. MSU band(s) and frequencies if known
2. DVR/VRX1000 frequencies
3. Which MSU band(s) will the DVR/VRX1000 be used with?
4. MSU Antenna type (single band vs all band)?

Ordering Information

Please Read All Option Descriptions Before Making Your Selection

Required Selection:

- 1) Main Model
- 2) Mounting (Not required for APX 8500 HP, which is only available in remote mount)
- 3) Control Head Selection
- 4) RF Antenna
- 5) Operation Mode
- 6) Feature Antenna(s)
- 7) Remote Mount Cables (if remote mount is selected)
- 8) Microphone
- 9) Speaker
- 10) Service

Additional Ordering Information for Service Options

[SmartConnect End to End Ordering Guide](#)

Configuration

1. Main Model (Must Select One)

Description	Full Description	Nomenclature	APC	Price
APX8500 ALL BAND MP MOBILE	-	M37TSS9PW1 N	681	\$4,770.00
APX8500 ALL BAND HP MOBILE	APX 8500 HP only comes in remote mount. No mounting option is required.	M37TXS9PW1 N	681	\$5,620.00

Delete Frequency Bands (Optional. Can select a Maximum of Two)

Special Note for United States - State & Local Markets: In accordance with FCC mandate, the U1/U2 Mid Power and U1/7-800 band combinations for this product are restricted to not allow programming for 25 KHz operation. These frequencies are restricted to 12.5 KHz operation only.

Description	Full Description	Nomenclature	APC	Price
DEL: DELETE 7/800MHZ BAND	-	GA05507	681	(\$800.00)
DEL: DELETE VHF BAND	-	GA05508	681	(\$800.00)
DEL: DELETE UHF BAND	Deletes both UHF R1 and UHF R2 frequency bands.	GA05509	681	(\$800.00)

2. Mounting (Must Select Either Dash or Remote Mount for APX 8500 MP)

If a remote mount cable other than 5 meters (17ft) is desired for Remote Mount, please reference the "Remote Mount Cables" section.

The O3 dash and remote mount configurations are the same except that the dash mount configurations do not come with the 17ft extension cable, PMLN4958.

Description	Full Description	Nomenclature	APC	Price
-------------	------------------	--------------	-----	-------

ADD: DASH MOUNT	Not available on APX 8500 HP. Required for Control Station Operation. An O3 Control Head ordered with a Dash Mount Configuration is the same as the O3 Remote Mount configuration, but it does not come with the 17ft extension cable, PMLN4958A.	G66	656	\$125.00
ADD: REMOTE MOUNT MID POWER	Not required for selection on APX 8500 HP. G138 is required for Motorcycle Configuration. Motorcycle Remote Mount Option is \$400 DUP.	G67	656	\$297.00

Motorcycle Mounting (Optional)

HMN1079 (Motorcycle Mic) and HSN4031 (Speaker) are mandatory selections with motorcycle configurations. Motorcycle mount requires the O2, O5, E5, or O7 Control Head and Remote Mount (G67). CAN cables are not compatible with motorcycle. This option includes a weatherized harness. Incompatible with DVRS MSU operation (GA00631)

Description	Full Description	Nomenclature	APC	Price
ADD: APX MOTORCYCLE CH SFWR	Requires G67 (Remote Mount)	G138	656	\$0.00
ADD:REMOTE MOUNT MOTORCYCLE	Requires G138 (Motorcycle)	G67BA	656	\$400.00

Control Station Operation (Optional)

Mid Power Model Only

O2, O5, E5 & O7 Control Heads Only. Must select one.

Requires Dash Mount (G66)

Some microphones are not compatible with Control Station Operation. Please read descriptions carefully.

Although the Power Supply is optional, it is needed for a full Control Station solution. The APX 8500 requires a higher capacity power supply KT000254A01.

Description	Full Description	Nomenclature	APC	Price
	Requires a O2, E5, O5, O7 Control Head Requires Dash			

ADD: CONTROL STATION OPERATION	Mount (G66) Some microphones are not compatible with Control Station Operation. Please read descriptions carefully.	W665	656	\$70.00
ADD: CONTROL STATION POWER SUPPLY	Although the Power Supply is optional, it is needed for a full Control Station solution. The APX 8500 requires a higher capacity power supply KT000254A01.	G91	656	\$269.00

3A Control Head Software (Required)

Description	Full Description	Nomenclature	APC	Price
ADD: APX CONTROL HEAD SOFTWARE	-	G444	656	\$0.00

3B Control Head Options (Must select one)

O2 Control Head Options

Description	Full Description	Nomenclature	APC	Price
ADD: APX O2 CONTROL HEAD	-	GA00804	656	\$492.00
ADD:IMPACT GREEN COLOR HOUSING (O2)	When ordered in conjunction with GA00804 you will get a green colored O2 housing.	G201	656	\$25.00
ADD: SCHOOL SERURITY ENHANCEMENT PACKAGE	Education O2 Emergency Push Button	GA01056	514	\$50.00

O3 Control Head Options

Description	Full Description	Nomenclature	APC	Price
ADD: APX O3 HANDHELD CH	Requires No Microphone (G90). If Lights & Siren Keypad and Software is required, order GA00806.	G72	656	\$946.00

ADD:CH SIREN & LIGHTS KEYPAD	Available on O3 (G72) and O7 (GA00805) Control Heads.	GA00806	656	\$50.00
------------------------------	---	---------	-----	---------

E5 Control Head Option

Description	Full Description	Nomenclature	APC	Price
ADD: APX E5 CONTROL HEAD	Shipping June 2020	GA01670	471	\$572.00

O5 Control Head Option

Description	Full Description	Nomenclature	APC	Price
ADD: O5 CONTROL HEAD	-	G442	656	\$432.00

O7 Control Head Options

Description	Full Description	Nomenclature	APC	Price
ADD: APX O7 CONTROL HEAD.	If Lights & Siren Keypad and Software is required, order GA00806.	GA00805	656	\$632.00
ADD:CH SIREN & LIGHTS KEYPAD	Available on O3 (G72) and O7 (GA00805) Control Heads.	GA00806	656	\$50.00

No Control Head Options

Description	Full Description	Nomenclature	APC	Price
ADD: NO O3 CONTROL HEAD	If you plan to use this model with an O3 Control Head but already have a control head and don't require it, select GA00001. Requires remote mount (G67).	GA00001	656	\$0.00
ADD: APX MOBILE NO CONTROL HEAD	If you plan to use this model with an O2, E5, O5, O7 Control Head but already have a control head and don't require it, select G88. Requires remote mounting option (G67 or W665).	G88	681	\$0.00

Multi-Control Head Options

The APX 8500 mobile can support up to four control heads on a single transceiver. This allows control of a single APX 8500 transceiver from two different control head locations.

Multi-Control Head options require Remote Mount.

When ordering a multi-control head option, only one type of control head can be selected.

Only available with O2, O5, E5, O7 Control Heads.

Multi-control head options require an equal number of microphones, speakers, and CAN cables.

Multi-control head options are incompatible with the multi-radio options.

Description	Full Description	Nomenclature	APC	Price
ADD: APX DUAL-CONTRL HD HARDWARE	Requires either O2, E5, O5, O7 Control Head. Requires a remote mount configuration. Requires a selection of 2 for microphones, speakers and CAN cables.	GA00092	656	\$570.00
ADD: APX TRI-CONTROL HARDWARE (07 ARABIC)	Requires either O2, E5, O5, O7 Control Head. Requires a remote mount configuration. Requires a selection of 3 for microphones, speakers and CAN cables.	GA00093	656	\$1,000.00
ADD: APX QUAD-CONTROL HARDWARE (07 ARABIC)	Requires either O2, E5, O5, O7 Control Head. Requires a remote mount configuration. Requires a selection of 4 for microphones, speakers and CAN cables.	GA00094	656	\$1,300.00

4. RF Antenna (Required)

The APX 8500 has one QMA style LMR antenna port. Any additional connections will require vehicle multiplexer EQ000103A02 that allows up to 3 QMA antenna connections. We will offer this multiplexer and Adapters through our Parts Division.

Examples are Mini U to QMA CB000091A03, QMA to QMA CB000091A02 and SMA to QMA CB000091A04. Aftermarket Antennas are certified for use on the APX 8500 but do require CB000091A02.

Description	Full Description	Nomenclature	APC	Price
MULTIPLEXER QMA	Order on a separate line. Provides for EQ000103A02 that allows up to 3 QMA antenna connections.	H1919	681	\$250.00

Must Select One of the Following:

No Antenna Requested

Description	Full Description	Nomenclature	APC	Price
ADD: NO RF ANTENNA NEEDED	-	G89	656	\$0.00

All-Band Antenna

Description	Full Description	Nomenclature	APC	Price
ADD: ALL BAND MOBILE ANTENNA (7/8/V/U)	Corresponding kit: AN000131A01. Does not provide a multiplexer.	GA01513	681	\$95.00
ADD: NO RF ANTENNA NEEDED	-	G89	656	\$0.00

Motorcycle Antenna Choices

Motorcycle radio orders require an antenna selection for each enabled band (UHF R1 and R2 are considered one band) and comes with multiplexer EQ000103A01.

Dual Radio Operation Options

The APX Dual Radio Feature offers the capability to control **TWO** (2) APX8500, APX7500, APX6500, or APX6500Li mobile radios from **ONE** (1) O7 or E5 control head. APX Dual Radio allows for mixing and matching of radios across tiers (i.e. APX 8500 with APX 6500) and power levels (High Power with Mid Power).

Each radio in an APX Dual Radio system must be ordered independently.

The mobiles in a dual radio solution can be single or dual band. Both radios can be on the

same or different frequency bands.

One radio must be ordered with the Primary Radio option (GA01113) and the other with the Secondary Radio option (GA01117). This will include both the SW and HW required for dual radio operation.

Although each radio must be ordered as either a Primary or Secondary radio, each radio can be configured to work as a Primary, Secondary, or a Standalone radio.

Only one speaker can be connected to the control head and it will play audio from the primary radio. A 30 ft. speaker extension cable is included on the secondary radio to connect the second speaker directly to the secondary radio. If a longer cable is needed, a 131 ft. version can be purchased from AAD (part # HKN6251)

The Dual Radio feature is incompatible with the multi-control head options.

Description	Full Description	Nomenclature	APC	Price
ENH: DUAL RADIO OPERATION (PRIMARY RADIO)	The Primary radio must be ordered with an O7 or E5 CH. APX Dual Radio is not compatible with any other control head. The primary radio includes a short dual radio CAN cable (HKN6245) to connect both radios together. If the stack mount trunnion is ordered, a right-angle version of this cable (HKN6249) will ship instead to facilitate stack mounted installations. If a different length is desired, the standard remote mount control head cables can also be used to connect both radios together.	GA01113	656	\$650.00
ENH: DUAL RADIO OPERATION (SECONDARY RADIO)	The secondary radio must be ordered with no control head (G88)	GA01117	656	\$650.00

Dual Radio Options

Description	Full Description	Nomenclature	APC	Price
ADD: DUAL RADIO STACKABLE MP TRUNNION	If the stack mount trunnion is ordered, a right-angle version of this cable (HKN6249) will	GA01115	656	\$297.00

	ship instead to facilitate stack mounted installations.			
ADD: DUAL RADIO AUDIO COMBINER	-	GA01116	656	\$1,200.00

5. Operation Mode (Must Select One)

5A: Digital Trunking (SN/SZ P25 Phase I Interop)

Description	Full Description	Nomenclature	APC	Price
ENH: ASTRO DIGITAL CAI OP APX	Incompatible with G241.	G806	681	\$515.00
ENH: SMARTZONE OPERATION APX	-	G51	656	\$1,500.00
ENH: P25 TRUNKING SOFTWARE APX	Requires G51 & G806. Internally generate G173. APX digital radios require Advanced System Keys (ASK- DVN4046A) to be configured to operate on a trunking system.	G361	656	\$300.00

5B: Digital Trunking (SN/SZ)

Description	Full Description	Nomenclature	APC	Price
ENH: ASTRO DIGITAL CAI OP APX	Incompatible with G241.	G806	681	\$515.00
ENH: SMARTZONE OPERATION APX	-	G51	656	\$1,500.00
ADD: SMARTZONE OMNILINK	Automatic Zoning Across Zones, Zone Registration, Trespass Protection, Over the Air Site Alias, 32 Preferred Sites, FastStart and AllStart Call Setup.	G173	656	\$200.00

5C: Digital Conventional (P25)

Description	Full Description	Nomenclature	APC	Price

ENH: CONVENTIONAL OPERATION	Limited Conventional features-see matrix	G48	656	\$800.00

System Enhancement Options (Optional)

The APX 8500 comes standard with G170 Radio Trace and G683 Trunked One Touch

The following options are **optional** and will provide additional capabilities, if required.

Description	Full Description	Nomenclature	APC	Price
ADD: DIGITAL TONE SIGNALING	-	GA09000	656	\$150.00
ADD: DVRS MSU ACTIVATION	Orders will go on hold pending confirmation that Futurecom has verified the APX 8500 + DVRS configuration (see above). Requires a depot to change a mobile from a PSU to an	GA00631	656	\$250.00

	MSU.			
ADD: DVRS PSU ACTIVATION	Enables DVRS Enhanced PSU functionality on APX Mobile Radios. Requires Digital Operation. QA00631 is to be ordered for radios that are not connected directly to a DVR. If you are connecting your radio directly to a DVR then order GA00631. Allows the mobile subscriber to be used as a PSU (Client). An APX Mobile is still required as an MSU (host). Incompatible with GA00631. Requires a depot to change a mobile from a PSU to an MSU. This option is incompatible with the Motorcycle configuration.	QA00631	655	\$100.00
ADD: ENHANCED DATA	Digital (Q806/G806), Smartzone (H38/G51), IV&D (Q947) and P25 Trunking (Q361/G361) are required when ordering QA03399 (Enhanced Data)	QA03399	656	\$150.00
ADD: FPP & CLONE APX	-	G53	656	\$150.00
ADD: GROUP SERVICES	Group Services offers Conventional Alias updates, Trunking Alias updates and Trunking Group Messaging. This option requires G/Q806 for Conventional only capabilities and G/Q361 for any Trunking only capabilities. You can now also do Over the Air Firmware Updates with this feature.	GA09008	656	\$150.00
ADD: MISSION CRITICAL GEOFENCING	Requires GPS (GA09012)	GA09012	471	\$150.00
ADD: MULITCAST VOTING	This feature allows for			

SCAN	voting of the Conventional Channels ONLY.	G387	656	\$200.00
ADD: APX MOBILE RADIO AUTHENTICAT	Requires Trunking	GA01767	527	\$100.00
ADD: MOBILE PERSONAL ACCOUNTABILITY SW	-	G445	571	\$150.00
ENH: OVER THE AIR PROVISIONING	Requires P25 Digital Trunking. To do in field POP25 programming must use Advanced System Key (DVN4046A).	G996	656	\$100.00
ADD: SITE SELECTABLE ALERT FOR P25 TRUNKING	-	GA00982	656	\$150.00
ADD: TDMA OPERATION APX	When ordering an APX6500Li model this option requires QA02756 software package	GA00580	656	\$450.00
ADD: WI-FI CAPABILITY	Requires a WiFi antenna. GA09001 enables WiFi capability in the radio which supports codeplug updates, firmware refreshes, and FLASHport upgrades over pre-provisioned wireless networks. Requires Radio Management SW (ordered separately). Must order Out of the Box Wi-Fi Provisioning option (GA09007) if provisioning the radios out of the box using WiFi is desired.	GA09001	681	\$300.00
ADD: OUT OF THE BOX WI-FI PROVISIONING	-	GA09007	681	\$0.00
ADD: DATA MODEM TETHERING	Requires Remote Mount G67; includes GA01545 mutually exclusive with DVR MSU GA00631. Comes with the aftermarket cable: KT000247A01	GA09011	681	\$100.00

ADD: SMARTCONNECT	<p>Requires P25 9600 Trunking G361, and Service offering SSV01S01663A. Requires either GA09001 (WiFi), or GA09011 (Data Modem Tethering). SmartConnect is incompatible with the DVRS MSU option in mobiles. SmartConnect can be ordered with DVRS PSUs but will not support seamless switching to broadband and will require users to do a manual mode change to a SmartConnect capable channel.</p>	GA01630	681	\$0.00
ENH: TACTICAL RADIO STW-STUN/KILL	<p>Requires digital (G806), IV&D, and a encryption (not including ADP-only).</p>	H02	481	\$75.00

6. Feature Antennas

Must select from either Multi-function section or Single function GPS section and Single Function WI-FI section (if GA09001 is ordered)

Multifunction Antennas (Must Select One in Multifunction is Selected)

Description	Full Description	Nomenclature	APC	Price
ADD: WIFI/GNSS FLEXIBLE CABLE LMR195	Corresponding Kit: Vehicle: AN000163A01 Motorcycle: AN000163A02	GA00250	681	\$100.00
ADD: NO GPS/WI-FI ANTENNA NEEDED	No feature antenna needed.	GA01606AA	681	\$0.00

GPS Antennas (Must select one if single function GPS is required)

Description	Full Description	Nomenclature	APC	Price
ADD: COVERT GNSS GLASSMOUNT LMR100	Corresponding kit: PMAN4109	GA01580AA	681	\$70.00
	Corresponding kit: PMAN4010			

ADD: GPS/GNSS MAG MOUNT ANTENNA	(antenna) & CB000091A04 (QMA to SMA adaptor)	GA01305	656	\$60.00
ADD: NO GPS ANTENNA NEEDED	No GPS Antenna Needed	GA00235	656	\$0.00

Wifi Antennas (Must select one if single function WiFi is requested)

Description	Full Description	Nomenclature	APC	Price
ADD: COVERT WIFI GLASSMOUNT LMR195	Corresponding kit: PMAN5101	GA01579AA	681	\$70.00
ADD: NO WI-FI ANTENNA NEEDED	-	GA01607AA	681	\$0.00

Advanced System Key (Optional)

Description	Full Description	Nomenclature	APC	Price
ADD: HW KEY SUPPLEMENTAL DATA	The software key is the default Advance System Key option that ships standard on all APX products. You cannot order software key QA01749. The hardware key (QA01648) can be ordered instead. Be sure to enter the correct system owner ID in the supplemental data. If an incorrect ID is entered, a FLASHport order is required to fix the error. Order QA01648 if it is required to operate/program on a trunking system. Not compatible with conventional.	QA01648AA	0655	\$5.00

Encryption Algorithms (Optional)

All APX 8500 Mobile Radios ship P25 "clear (QA05751 will internally generate) unless an encryption option is ordered. (AES 256 is the only approved encryption algorithm by P25 CAP and SAFECOM)

Description	Full Description	Nomenclature	APC	Price
	Requires digital operation.			

ADD: AES ENCRYPTION APX	P25 CAP Compliant option. Includes ADP.	G843	656	\$475.00
ADD: AES/DES-XL/DES-OFB ENCRYPTION	Multikey is required for use of more than one key. AES and DES-OFB Operation require digital operation. P25 CAP Compliant option. Includes ADP.	G851	656	\$799.00
ADD: DES/DES-XL/DES-OFB ENCRYPTION	Multikey is required for use of more than one key. Non-P25 CAP Compliant option. Includes ADP.	G625	656	\$599.00
ADD: DVP-XL ENCRYPTION APX7500	Includes ADP. Non-P25 CAP Compliant option.	W797	656	\$487.00
ADD: ADP ONLY (NON-P25 CAP COMPLIANT)	Provides for ADP ONLY, a Non-P25 CAP Compliant, non-FIPS compliant option. If another encryption is required, please order that option which will internally generate ADP.	G193	430	\$0.00

Multikey (Optional)

All multikey options require an encryption algorithm selection.

Description	Full Description	Nomenclature	APC	Price
ADD: MULTIPLE KEY ENCRYPTION OPERATION	Required when using more than one encryption algorithm or encryption key.	W969	656	\$330.00
ENH: ASTRO 25 OTAR W/ MULTIKEY	Not compatible with ADP-Only. Includes multikey, trunking OTAR, and Tactical OTAR. Tactical OTAR can only be utilized when IV&D is purchased. Requires AES.	G298	656	\$740.00
ADD: MULTI SYSTEM OTAR	Requires ASTRO 25 OTAR W/ MULTIKEY (G298)	GA01620	656	\$150.00

7. Remote Mount Cables (17 FT STD)

Description	Full Description	Nomenclature	APC	Price
ADD:CBL REMOTE MOUNT 10 FEET	Corresponding kit: HKN6170	G618	656	\$10.00
ADD: REMOTE MOUNT CBL 17 FEET	Included at no charge with Single Control Head Remote Mount installations and High Power. Corresponding kit: HKN6169	G628	656	\$15.00
ADD: REMOTE MOUNT CBL 30 FEET	Corresponding kit: HKN6168	G610	656	\$25.00
ADD: REMOTE MOUNT CBL 50 FEET	Corresponding kit: HKN6167	G609	656	\$35.00
ADD:CBL REMOTE MOUNT 75 FEET	Corresponding kit: HKN6166A	G607	656	\$45.00
ADD:REMOTE MOUNT CBL 115 FEET	Corresponding kit: HKN6165	G879	656	\$55.00
ADD: REMOTE MOUNT CABLE 128 FT	***For Dual/Tri/Quad configurations, the total cable length may not be greater that 131 ft (40 meters). Therefore, this cable should not be used with a dual, tri, or quad control radio*** Corresponding kit: HKN6164	G582	656	\$65.00
DEL: NO REMOTE CABLE NEEDED	-	GA00179	500	\$0.00

Data/Programming Cable (Optional)

Description	Full Description	Nomenclature	APC	Price
ADD: USB DATA INTFC CABLE-DASH	6 FT USB W/IGNITION SENSE Corresponding kit: HKN6163B. Can be used to program APX Mobile Radios.	G308	656	\$50.00
	16.5 FT USB W/IGNITION			

ADD:USB DATA INTFC CABLE-TRK	SENSE Corresponding kit: HKN6172B. Can be used to program APX Mobile Radios.	G309	656	\$50.00
---------------------------------	--	------	-----	---------

J600 Adapter (Optional)

The APX 8500's new one-sided design removed the J600 port used for DVR and Motorola Siren (SLIM does not require this). Required for remote mount and DVRS support.

Description	Full Description	Nomenclature	APC	Price
ADD: J600 ADAPTER CABLE	Accessory Kit: KT000247A01	GA01515	681	\$95.00
DEL: NO J600 ADAPTER CABLE NEEDED	-	GA01517	681	\$0.00

Cable Accessories (Optional)

Description	Full Description	Nomenclature	APC	Price
ADD: EXTERNAL ALARM RELAY AND CABLE	For either HORN or LIGHTS. NOT both	W116	656	\$75.00
ADD:BUZZER 110MA APX	-	B116	656	\$50.00
ADD: CABLE URC TO TRANSCIVER	Connects Universal Relay Controller to APX Transceiver via a RJ45 and CGAI connection.	GA00260	656	\$15.00
ADD:REMOTE MOUNT VIP CBL APX	Park/Kill, Gunlock, 'Horn Ring/Horn Transfer' or Horn/Lights Park/Kill and Horn 'Ring/Horn Transfer' only available with Motorola Siren. Gunlock supported on O9 Control Head Only. CORRESPONDING KIT: (HKN6196B)	G322	656	\$35.00
ADD: UNIVERSAL RELAY CONTROLLER	Required to Control Vehicle Lights with the O3, 07 and O9 Control Heads.Requires URC Cable GA00260.	GA00259	656	\$250.00

ADD: GCAI EXTENSION CABLE 2 FT	For use with 07, 09 Control Heads and GCAI style Mic. KIT #PMKN4093A.	GA00589	656	\$30.00
ADD: KEY LOCK MOUNT APX	Remote Mount Mid Power Only.	W81	471	\$33.00

8. Microphones (Must Select One)

Description	Full Description	Nomenclature	APC	Price
ENH: HAND MIC,GCAI WATER RESISTANT	Corresponding kit HMN1089A	G892	656	\$72.00
ADD: MODEL III GCAI KEYPAD HANDSET	Corresponding kit: HMN4097A	GA00221	656	\$295.00
ADD: NO MICROPHONE NEEDED	Select this option when ordering O3 Handheld Control Head (G72). If ordering with Motorcycle G138 the DB 25 connector on harness needs to be sealed to prevent corrosion.	G90	656	\$0.00
ADD: KEYPAD MIC GCAI	Corresponding kit: HMN4079	W20	471	\$180.00

Please visit the [In-Vehicle Router Based Solutions Product Page](#). It includes the catalog pages for Sierra Wireless' MG90, the MP70 and the RV55.

Advanced Messaging Solution

The ASTRO 25 Advanced Messaging Solutions is the latest messaging platform from Motorola Solutions and will replace ASTRO Text Messaging Service (TMS). As a complete end-to-end solution it leverages the core assets of ASTRO 25 IV&D/CID networks, ASTRO 25 radios, Integrated Command Center applications and Unified Network Services. The application allows responders to send/receive messages and run database queries from ASTRO 25 data enabled portable radios, extending real-time information access to the field so dispatchers and first responders can be more efficient and achieve safer outcomes.

AWS provides functional parity with TMS and leverages the PremierOne messaging services platform, offering multiple configurations to enhance and extend core messaging functionality that can include queries and dispatch notifications. Based upon the configuration chosen, ASTRO 25 Advanced Messaging Solution extends Computer Aided Dispatch (CAD) information beyond the vehicle to select ASTRO 25 Portable radios.

Many Public Safety agencies have experienced the benefits of messaging and sharing important information to/from the communication center (dispatch) and vehicles equipped with MDT's. With ASTRO 25 Advanced Messaging Solution we are extending that capability to responders when Outside the Vehicle.

Ordering ASTRO Advanced Messaging Solution for APX Mobiles Require: (Note: some control heads are not available on all main models)

O7, E5, O5, O3 or O2 Control Heads

With E5, O2 or O5 Control Heads Require Keypad Mic (W20)

ASTRO Digital CAI Operation (G806)

P25 Conventional (G48)

Packet Data Interface (W947)

OR

O9, O7, O5, E5, O3 or O2 Control Heads

With E5, O2 or O5 Control Heads Require Keypad Mic (W20)

ASTRO Digital CAI Operation (G806)

SmartZone Operation (G51)

ASTRO Project 25 Trunking Software (G361)

Packet Data Interface (W947)

NOTE: There is no specific option to order for the Advanced Messaging Solution on the subscribers as the functionality is included in the Packet Data option. Also, the text messaging functionality carries a per-radio charge on the server side of \$50 (one time license fee to access messaging services) per radio. When adding query the fee is \$125 per radio. For additional ordering guidelines of the AMS feature which includes the server and radio license fees, please visit - [ASTRO25 Advanced Messaging](#)

ASTRO® Digital APX 8500
FLASHport® Aftermarket Upgrades
Secure and Trunked Radio Systems

Updates

Effective August 26, 2019: Multi-System OTAR (GA01620) is available. Users who frequently move from one secure system to another will benefit from the ease and speed that radio keys are shared and updated. Our Multi-System Over-the-Air Rekeying (Multi-System OTAR) feature supports over-the-air-rekeying with up to 19 different secure systems, key sharing across profiles and seamless migration of fielded radios. The customer must order OTAR W/ MULTIKEY as a prerequisite for MS-OTAR.

Ordering Information

General Information

FLASHport® Aftermarket Software is used to upgrade to the latest version of your System Enhancement Software Package to upgrade to a different System Enhancement Software Package or to order enhancements for existing for existing ASTRO® Digital APX 8500 radios in the field. FLASHport® upgrade kits contain upgrade software, USB Dongle or software license and upgrade documentation

There is a new way to upgrade radios in the field. The current method, which makes use of

the FLASHport USB dongle, will be supported, but for those looking for a more convenient way, the new online method supported in Radio Management (RM) offers the following advantages:

- Reduce wait time by retrieving the order electronically, rather than via the FLASHport USB dongle
- Work more efficiently by using RM to automatically filter for those radios to which the upgrade order can be applied
- Work in parallel because you are no longer limited by the number of physical FLASHort USB dongles you have

NOTE: Radio Management must be deployed to manage your fleet of APX radios before you can use the online FLASHport method in Radio Management to upgrade radios. **For more information on Radio Management please refer to the [ASTRO Radio Management page](#).**

Ordering Requirements

1. **Specify** the *current* System Enhancement Software Package that represents the software in the radio as the main line item (T8422, T8423, T8424, T8425, T8426)
2. If you choose to use Radio Management to perform the upgrade enter the online delivery method (UA0083AA) as a sub-item, quantity of 1 only. No selection is needed if using the traditional USB dongle
3. **Select** the *desired* Operational Mode, System Enhancement Software Package, and/or System Enhancement Options and enter as sub-items.
4. **ALL** sub-items must have the same quantity listed (which equals the number of radios being upgraded) even though the main line is ALWAYS 1.
5. Radio Model number and **EXISTING** FLASHcode must be entered into designated COF fields. A separate line item must be entered for each different combination of Radio model and **EXISTING** FLASHcode.
6. "FLASH upgrades are not discountable"

NOTE: The FLASHcode can be read by using a USB cable.

Model

APX™ 6000 P25 Portable Radio
700/800 MHz Band
P25 Phase 2 Single Band Capable Radio

Updates

DHS Project 25 Compliance Assessment Program (CAP) has defined a "CAP Encryption Requirements compliant radio" as a radio that can be ordered without encryption or one that can be ordered with AES256. << [Click to learn more](#)>>

Effective February, 2018, the new standard 7/800 MHz whip antenna on the APX 6000 7/800 MHz model will be PMAF4040 instead of NAF5085. PMAF4040 is has a slightly thinner and more flexible form factor.

Effective March, 2018, PMNN4547 IMPRES 2 LIION 3100 MAH will be available for order on all of the APX 6000 models. This battery is slightly larger and will require a new holster, PMLN7901. This holster is now the standard carry holster for the Models 2.5 and Models 3.5 and will fit all of the current batteries in the portfolio. The legacy holster, PMLN5709 is no longer available.

Ordering Information

Features

All APX 6000 P25 Portable Radio models include the following features:

- Dual Microphone
- Integrated GPS*
- Mission-Critical Wireless Bluetooth® 4.0 (LE)*
- Detachable belt clip (Model 1.5 Only) / Carry Holster (Models 2.5 & 3.5)
- Li-ion 2550mAh IMPRES 2 Battery
- Antenna (Dependent on Frequency)
- Intelligent Lighting
- IP68
- Three programmable side buttons
- Orange programmable button
- 16-position mode rotary select switch
- Wi-Fi® 802.11 b/g/n*¹
- Angled on/off volume knob
- Low battery alert tone
- Noise cancellation software
- One top-mounted programmable three-position toggle switch
- Top display: one line of text, one line of icons, zero menu lines (8 characters)
- Advanced Digital Privacy (ADP) hardware/ software encryption ships standard w/ single key
- Emergency Find Me¹

APX 6000 P25 Portable Radio Limited Keypad and Full Keypad with Dual Display Model also includes:

- Universal carry holder
- Unified call list
- Front color display: four lines of text, two lines of icon (14 characters)
- Radio profiles
- Full keypad: 4x3 alphanumeric 3 programmable button, four-way navigation, home and data buttons

*Must purchase Software to ENABLE.

¹Features only available on the following models (Ship Acceptance August 6th, 2016): H98KGD9PW5BN, H98KGF9PW6BN, H98KGF9PW7BN

New RFID enabled volume knobs (QA04526) available for portable radios. See RFID Enabled Volume Knob section below for more information. See RFID Solution Partner link below for information on partners that can provide customers with scanner hardware and back end asset management solutions.

All APX 6000 P25 Portable Radios are part of the FLASHport® program and ship standard with a FLASH EE Prom, which allows for feature and system upgrades (contingent upon remaining within the current RF capabilities of the radio)

****NOTE: APX Portable and Mobile Radios ship standard with the Software Key (QA01749). The Hardware Key (QA01648) is available as an alternative option to purchase. The System ID is required to be entered as supplemental data when ordering the Hardware Key (QA01648). It is CRITICAL that the CORRECT SYSTEM ID is entered when placing the order as this will impact the radios' ability to operate on the intended system. If an incorrect System ID is entered, a FLASHport upgrade will be required in order to fix this error. The Master Key Start-Up Kit (DVN4046) is required to use the Hardware Key (QA01648) or to operate on a third-party trunking system if the customer does not already possess one, or if theirs has expired. [Please CLICK HERE](#) for further details regarding the DVN4046 Kit.

[ASK \(Advanced System Key\)](#)

General Information

Operating Modes

APX 6000 P25 Portable Radio Models are capable of operating in **FOUR** different voice communication modes:

1. Normal analog (clear voice)
2. 3.6 kB ASTRO digital (both clear and coded voice)
3. 9.6 kB ASTRO 25 digital (both clear and coded voice)
4. 9.6 kB 12.5kHz two-slot digital TDMA (both clear and coded voice)

TDMA

FDMA (Frequency Division Multiple Access) is a proven technology that is widely used today in radio systems and is part of Project 25 Phase 1 standard. FDMA carries one call per channel. TDMA (Time Division Multiple Access) is part of P25 Phase 2 standard and provides double the voice capacity as 2 calls can share 1 channel. Customers can add more users to their systems without the need of additional frequencies or infrastructure. The APX radios support both P25 Phase 1 and TDMA technologies seamlessly. Using Motorola's unique Dynamic Dual Mode (DDM) capability, the radios dynamically switch between FDMA

and TDMA without the user having to change channels. This provides interoperability on demand with existing and future networks.

Please note: TDMA X2 is not supported on the APX6000

New to APX6000 Models

Wi-Fi

APX 6000 supports Wi-Fi 802.11 b/g/n with WPA2/WPA (PSK), and WEP security protocols. Wi-Fi can be used with the Radio Management SW in order to do codeplug updates, firmware refreshes, and FLASHport upgrades over a Wireless Network (WLAN). The radio will only connect to available Wi-Fi networks which have been pre-provisioned in the radio codeplug via CPS. The radio can be pre-provisioned with up to 20 SSIDs.

The Wi-Fi feature requires ordering option QA09001. The Wi-Fi feature is also available aftermarket as a FLASHport upgrade if not ordered out of the factory.

Radio Management (RM) is required in order to take advantage of the Wi-Fi capabilities on APX 6000.

Out-of-the-box Wi-Fi Provisioning

If a radio is ordered the Wi-Fi option (QA09001) and the customer wishes to provision the radios out of the box using Wi-Fi, the radio must also be ordered with the Out of the Box Wi-Fi Provisioning option (QA09007).

A radio ordered with the Wi-Fi option and the Out of the Box Provisioning over Wi-Fi option will come with the following default codeplug configuration relative to Wi-Fi:

- a. Wi-Fi will be enabled.
- b. There will be one pre-configured network with the Network SSID set to "MyNetwork" and security type will be set to "None".
- c. The default state of Wi-Fi will be "on".

A Wi-Fi router is required for connecting the Wi-Fi capable radio to the Device Programmer. The Wi-Fi router is to be procured by the agency programming the radios and must be provisioned with the Network SSID set to "MyNetwork" (case sensitive) with no password enabled.

For more details regarding the Out of the Box Wi-Fi Provisioning process, please refer to the [Out of the Box Wi-Fi Provisioning Leaflet](#).

Bluetooth 4.0 & Emergency Find Me

With Bluetooth 4.0 wireless technology and our APX™ Mission Critical Wireless portfolio, users can now connect a variety of Bluetooth audio accessories and data devices with their APX™ radio.

Bluetooth 4.0 also enables Emergency Find Me, a feature providing personnel with an added level of security by improving response time in emergencies. Once an emergency is activated on the APX 6000, a Bluetooth beacon signals other Bluetooth-enabled APX radios within range. Based on bluetooth signal strength, nearby APX radios will receive an emergency alert via intelligent lighting and a text message with users Radio ID along with signal strength status (excellent, poor, fair) to determine proximity, and will guide the nearest personnel to the user in distress.

Adaptive Audio Engine

By selecting QA09006, the Adaptive Audio Engine option, the APX 6000 is equipped with a 3-watt speaker, 3 integrated microphones and the Adaptive Audio Engine. This changes the level of noise suppression, microphone gain, windporting and speaker equalization to produce clear and loud audio in any environment. QA09006 must be ordered in order to receive this feature.

IMPRES 2

Effective August 2016, the APX6000 comes standard with Q712AY, PMNN4485 SLIM IMPRES 2 LIION 2550MAH battery. Please see below for additional IMPRES 2 Battery Options available for the APX6000. The benefits of this IMPRES 2 technology requires both IMPRES 2 Batteries & IMPRES 2 Chargers. Please see the Accessories Catalog and Accessories ECAT pages for more information on IMPRES 2 technology.

Please note: QA01837 (NNTN7038), QA02021 (PMNN4403), QA00781 (NNTN7034), H335 (NNTN7037), QA02726 (NNTN7573) and Q393 (NNTN7036) are no longer be available on the APX6000.

RUGGED

The RUGGED option (H499JX) is ordered with APX 6000 Enhanced Model Numbers will now meet MIL-STD 512.X/I, IP68 submersion standards for 2 meters for 4 hours. Effective October, 2016, if H499 is selected, the standard battery is still PMNN4485A. If HAZLOC certification is required, please see the HAZLOC battery options below. The following APX6000 batteries are tested for Delta-T/Rugged standards when H499 is ordered: PMNN4485, PMNN4486, PMNN4487, PMNN4494A, NNTN8930, NNTN8921.

FLASHport AFTERMARKET UPGRADES

****PLEASE NOTE: The new APX6000 models will not share the same codeplugs as the previous APX6000 models (H98UCD9PW5AN, H98UCF9PW6AN, H98UCH9PW7AN). Direct cloning will not be available. New features, such as Wi-Fi, Bluetooth 4.0, and the Adaptive Audio Engine will not be available as a FLASHport upgrade on the previous APX6000 models (H98UCD9PW5AN, H98UCF9PW6AN, H98UCH9PW7AN).****

The APX 6000 P25 Portable Radios are part of the FLASHport Program. This means that APX 6000 hardware models can be loaded with different software packages that provide the features and functionalities that our customers require.

System Enhancement Options can be loaded at the time of radio purchase or at a later date through the use of software field upgrades (a USB cable is required for all software upgrades.) The APX 6000 portable can be upgraded electronically in the field with new features in the current system or to new systems operation (contingent upon remaining within the same RF sub-band) by ordering upgrade kits.

A new way to upgrade radios in the field launched in early 2015. The previous method, which makes use of the FLASHport USB dongle, will be supported, but for those looking for a more convenient way, a new online method will be supported in Radio Management (RM). **For more information, please select APX 6000/APX 6000XE FLASHport in the pulldown select list above.**

RADIO MANAGEMENT

Radio Management (RM) is a suite of software applications shipping with the APX Customer

Programming Software (CPS) that provides the ability to manage your entire fleet of ASTRO APX radios through one central database.

Radio Management (RM) can help reduce fleet programming time and improve overall radio asset management. Radio Management allows:

- Manage and track radio codeplugs through a central database
- Make changes to a shared codeplug template and push to multiple radios
- Manage and update radios without taking them out of service
- Schedule programming updates to radios ahead of time

Note: Radio Management is available only with Customer Programming Software Release 7.12, version R08.02.00 and later and can only be used with ASTRO® Digital APX radios. For more details regarding Radio Management and the Ordering Process, please refer to the [ASTRO Radio Management](#) page.

FCC Information

H98UCD9PW5BN, H98UCF9PW6BN, H98UCH9PW7BN Model Information

Band/Model	Power Output	Transmitter Certification	Emissions	Applicable Rules
700/800 (764-870MHz)	700 - 1 to 2.5W 800 - 1 to 3W	AZ489FT7086	8K10F1D, 8K10F1E, 8K10F1W, 11K0F3E, 16K0F3E, 20K0F1E, 20K0F1E	90

The FCC is mandating all Public Safety and Industrial/Business licensees convert existing 25 kHz efficiency operations in the VHF and UHF bands to minimum 12.5 kHz efficiency analog or digital operation, and that going forward they implement no more 25 kHz efficiency systems. To implement this mandate, the FCC developed rules and deadlines that impact both radio users and equipment providers.

RFID Solution Partner Information

Fleet Management software was previously distributed on DVDs shipped out of Elgin. It is now downloadable from motsolutions.com at the link below. Look at the right edge of the page under Resources Spotlight. The first link is the Order Guide which tells you what you need. The second link is a free trial version that they can download and evaluate free for 90 days. The third link is the actual program. You need to purchase a license to use it (explained in the order guide).

Accessories for APX 6000 can now be found in the select list pulldown above.

Channel Spacing

There are no maximum frequency separation conditions that must be adhered to on the APX 6000 P25 portable radio. Separation of frequencies can be as wide as the allowable band per radio model with no degradation of any performance specifications. If an incorrect antenna is used, degraded performance may be experienced.

Zoned Operation

This option converts APX 6000 P25 portable radios to Zone Operation radios.

For Top Display radios, a maximum of 16 channels (conventional RX and TX pairs or trunking talkgroups) are accessible in a zone. There is a maximum of six accessible zones (96 channels) when zone selection operation is programmed on the 3 position toggle switch and the Zone Bank feature is programmed on a button. The Zone Bank feature allows the 3 position toggle switch to access zones 1-3 or 4-6.

For the Top Display radio there is a maximum of 6 accessible zones, and 16 accessible channels per zone with the overall maximum of 96 channels. For the Dual Display Radios with Limited keypad or Full Keypad, there is a maximum of 50 zones, 625 channels per zone with the overall maximum of 1000 channels. These radios provide "ZONE" and "CHAN" menus that allows access to zones and channels not accessible via the switches.

***Note:** Top Display Radio code plugs can be programmed with the same zone/channel configuration as the Dual Display Radios even though not all of the zones and channels are accessible. This is useful for having a common zone/channel template that can be shared between the different radio models.

Project 25 Encryption

Encryption is available for Project 25 voice (Phase 1 FDMA and Phase 2 TDMA) and data communications. The mode of operation is programmed on a channel-by-channel basis. With the coded/clear switch set to the clear mode, the APX 6000 P25 Portable Radio is capable of transmitting clear analog voice or clear (unencrypted) ASTRO Digital voice, depending on the channel programming. With the coded/clear switch set to the coded mode, the APX 6000 P25 Portable Radio is capable of transmitting encrypted CVSD (analog) voice or encrypted ASTRO Digital encryption voice, depending on the channel programming.

An encryption option is not required for either clear analog operation or clear ASTRO Digital operation. Encryption can be ordered with the APX 6000 P25 Portable Radio either as a factory installed option or separate from the radio for later field installation. APX 6000 P25 Portable Radio functions include selected ASTRO digital signaling and digital speech coding.

When ordering any of the Encryption Algorithms:

- The DES-OFB and AES encryption algorithms offered are compliant with Project 25 standards, neither of which support CVSD (analog) encryption operation. These algorithms require ASTRO Digital CAI (Q806) to operate.
- The ADP, DES-XL, and DVP-XL encryption algorithms can operate in CAI digital mode, but will not be compliant with the APCO Project 25 standard.
- The DES, DES-XL, and DVP-XL encryption algorithms can operate in CVSD (analog) mode.
- If ordering multiple encryption options, the Multikey (H869) option is required for purchase.

Additional encryption algorithms can be ordered later via APX MACE Upgrades:

1. If using a KVL 4000, please [click here](#).
2. If using a KVL 3000 Plus, please [click here](#).

FIPS140-2 Compliance

Encryption Modules equipped with AES are FIPS 140-2 compliant. Details regarding the certification, and copies of the relevant certificates, can be obtained on the NIST website at: <http://csrc.nist.gov/groups/STM/cmvp/validation.html>.

Further information regarding FIPS 140-2 certification may be found using the following link - FIPS 140-2 Crypto Module Validation Program (CMVP) <http://csrc.nist.gov/groups/STM/cmvp/index.html>

Hazardous Location

UL

The APX 6000 is certified by Underwriters' Laboratory when properly equipped with alternate battery options QA05574, QA005575, QA06304, or QA06305. When equipped with Motorola Batteries NNTN8930A or NNTN8921A, the APX6000 models are certified as intrinsically safe for use in ANSI/TIA 4950-A and CAN/CSA C22.2 NO. 157-92; Classification Rating Class I, Division 1, Groups C, D; Class II, Division 1, Group E, F, G; Class III, Hazardous (Classified) Locations. ANSI/ISA 12.12.01-2015 and CAN/CSA C22.2 No.213-15; Class I, Division 2, Groups A, B, C, D; T3C. Tamb = -25° C to +60° T3C.

[APX Series Hazloc Fact Sheet](#)

ASTRO Text Messaging Service

ASTRO Text Messaging Service will be available on APX 6000 Dual Display Portable radios. Text Messaging Service (TMS) allows subscriber users to send and receive text messages to other subscribers or dispatch operators. Users can select messages and addresses from a predefined list or enter freeform text messages and addresses via the keypad. Text Messaging Service is available on ASTRO P25 Conventional and Trunked IV&D Systems and Subscribers.

Text Message is NOT supported on APX 6000 Top Display (Model 1.5) Portable radio.

Ordering ASTRO Text Messaging for APX 6000 Portable Requires:

- APX 6000 Dual Display
- ASTRO Digital CAI Operation (Q806)
- Conventional Operation (H35)

OR

- APX 6000 Dual Display
- ASTRO Digital CAI Operation (Q806)
- SmartZone Operation (H38)
- ASTRO Project 25 Trunking Software (Q361)

NOTE: There is no specific option to order for the Text Messaging Service on the subscribers as the functionality is included in the Packet Data option. Please order Digital Operation to receive Text Messaging ability as Packet Data is a standard feature on APX Portable and Mobile Radios.

Outdoor Personnel Location Global Positioning Satellite (GPS) Feature

The personnel outdoor location tracking GPS feature enables a dispatcher the ability to locate on-foot patrols and out of the vehicle officers who are involved in life threatening situations. The radio user's GPS position information is sent over the ASTRO 25 Integrated Voice & Data (IV&D) network and is delivered to the dispatch operator using a third party mapping display application at the dispatch center (Mapping Application is not yet available through Motorola at this time, however an Application Developers Tool Kit is available for 3rd party vendors to use to modify existing applications. See link below for more details.) On the Dual Display model only it is possible to the user to determine their own location (latitude/longitude) through the use of

the location menu.

During normal operation the radio battery capacity will be reduced by 10 to 16 percent.

In order to obtain an initial GPS fix position, the radio must be located in an open sky, outdoor environment with no barriers that could affect the signal around you or above you. During this initial fix, the radio should NOT be worn on the body as this may affect the process of acquiring signal and/or add additional time to first fix.

Note Limitations of Use:

GPS works best in an open sky (clear view of the sky with no obstructions) environment. Due to the limitations of the technology, there are certain situations which prevent GPS coverage. These situations include but are not limited to:

- Underground locations (tunnels, subways, etc.)
- Inside of buildings, elevators, parking garages, trains, other covered vehicles, etc.
- Under metal or concrete roof structures
- Urban canyons (between tall buildings or under dense tree coverage)

*****GPS Performance may be degraded when the radio is worn against the body and/or against the body within a vehicle.**

Due to the limitations mentioned above, GPS should only be utilized as a method to assist the user with location information but not as a means for mission critical communication. Therefore, in any emergency situation, the location should always be verbally reported to the dispatcher.

Ordering GPS for **APX 6000 P25 Portable Radios** requires:

- APX GPS Activation (QA00782)

700/800 MHz Self-quieting Spurs

700/800 Models (1.5, 2.5, 3.5)	AN Model Frequencies	BN Model Frequencies

CPS 3-Year Subscription Update

In addition to the traditional 3 Year DVD CPS software subscription (RVN5224 - List \$399), we will offer a download-only 3 Year CPS software subscription (HKVN4289A, - List \$299) which will provide access to CPS software through your Motorola Online account. Only one subscription per MOL account is needed. The original price of \$375 for RVN5224 will increase to \$399 on July 1, 2015.

How to order DVD CPS Subscription (RVN5224) through COF:

1. Sign and return the Software License Agreement
2. Order the software part number (RNN5224)
3. New releases on disk will be automatically sent for a three-year period.

How to order Download-Only CPS Subscription (HKVN4289A) through MOL:

1. Call [1-800-422-4210](tel:1-800-422-4210), option 4 (MOL Support Team) to request an MOL account or to add a CPS subscription to an existing account.
2. Sign and return the Software License Agreement through MOL
3. Order HKVN4289A
4. Provide a valid email address; as the 3 year subscription period ends subscription renewal reminders will be sent to this email address.

CPS downloads are only available on MOL for North America. Please see your regional MOL page for information on receiving CPS in other regions.

**ASTRO® Digital APX (8500, 8000, 7500, 7000, 6500, 6000, 4500, 4000, 3000)
FLASHport®
KVL 4000 MACE CD Upgrades
Secure/Conventional/Trunked Radio
Systems**

Ordering Information**General Information**

The ASTRO Digital APX Radio (8500, 8000, 7500, 7000, 6500, 6000, 4500, 4000, 3000) FLASHport Motorola Advanced Crypto Engine (MACE) upgrades allow secure customers to upgrade their basic software and algorithm software within a fielded MACE based encrypted ASTRO Digital APX Radio (8500, 8000, 7500, 7000, 6500, 6000, 4500, 4000, 3000) without having to replace the MACE. ASTRO Digital APX Radio (8500, 8000, 7500, 7000, 6500, 6000, 4500, 4000, 3000) upgrade kit (T7936) includes one CD and one Subscriber MACE Upgrade Manual.

Ordering Requirements

1. Order APX CD Motorola Advanced Crypto Engine (MACE) upgrade kit (T7936). Each upgrade kit consists of a single CD that can upgrade up to 100 individual MACE based ASTRO Digital APX Radio (8500, 8000, 7500, 7000, 6500, 6000, 4500, 4000, 3000).
2. Select the *desired* algorithm software upgrade option.
 - Only one (1) encryption algorithm type can be ordered per upgrade kit.
 - Specify the number of software upgrades required.
 - Each individual MACE based ASTRO Digital APX Radio (8500, 8000, 7500, 7000, 6500, 6000, 4500, 4000, 3000) requires a single upgrade; therefore, the quantity of each option should equal the number of upgrades to be performed.

- The algorithm software options must be ordered in equal number and can not exceed 100 per upgrade kit option.

3. The ASTRO Digital APX Radio (8500, 8000, 7500, 7000, 6500, 6000, 4500, 4000, 3000) FLASHport MACE upgrade requires the use of a key loading device (KVL 4000) and a CD to deliver the new software to the MACE.

Note: Tech Edit (TE) will request for KVL Serial Number; KVL Serial Number is REQUIRED

The following example will provide an upgrade CD to upgrade twenty (20) fielded MACE based ASTRO Digital APX Radio (8500, 8000, 7500, 7000, 6500, 6000, 4500, 4000, 3000) with the AES algorithm.

All encryption products, kits, software and technology require an approved export license prior to shipment. Contact the Sector Export Control office at +1 (847) 576-8163 to discuss any possible licensing restriction. The international use of encryption algorithms (except for DES, DES-XL, DES-OFB) is highly restricted by the U. S. Federal Government. License approvals are considered for export to a limited selection of countries and end users. Contact the Sector Export Control office at +1 (847) 576-8163 for licensing information before submitting bids, proposals, or accepting orders for algorithm based encryption products.

UPDATE HISTORY

SHIP CARD

APX NEXT™

In this Pricebook there are Subscription Services that require Subscription Service Terms and Conditions which have been included, please see the Subscriptions Services Agreement. *The purchase or use of any of the subscription services which are features available through the APX Next device will require an Amendment to Contract #4400016317 to incorporate the Subscription Services Terms and Conditions included here.*

Motorola Solutions' latest development in our mission to advance the lifeline for public safety communications, APX NEXT builds on the values of APX by delivering new and groundbreaking capabilities

MISSION-CRITICAL DEVICE

FirstNet Certified and designed to military standards for intrinsic ruggedness. The Gorilla Glass 3 touchscreen, combined with a user interface purpose-built for public safety, works with or without gloves - in heat, rain or snow. Every interaction is simple, fast and logical so you can stay focused on what matters most - your mission and your safety.

MOBILE CONNECTION TO INTELLIGENCE

SmartConnect automatically switches between LMR and LTE to extend radio communication beyond the boundaries of the radio system, so users can concentrate on their mission and not worry about coverage.

SmartLocate let's dispatchers see where everyone under their care is, so they can stay focused on critical situations.

SmartMapping enhances situational awareness by enabling radio users to see their own location on the radio front display, find an address, drop waypoints, and view the locations other colleagues at a glance, then tap the screen to instantly communicate with them.

SmartMessaging is a secure and convenient way to share texts, images, videos and voice notes across an extended team.

ViQi Virtual Partner enables natural

language database queries, rapidly giving field personnel vital information like driver's license and license plate lookups.

STREAMLINED OWNERSHIP EXPERIENCE

Radio Central, the cloud based provisioning system, lets you prepare radios before they even arrive and **SmartProgramming** allows for radio updates to be delivered over broadband regardless of geographic location.

MyView Portal provides direct access to subscriptions, entitlements, warranties and licenses to administer your fleet, and a range of services help you to manage your operations.

Updates

- **Core Bundle** includes AES + ADP encryption (Q629), however when selecting **Custom Configuration** be aware that **effective March 5th, 2020** all U.S. APX orders will book as P25 CAP Compliant by internally generating the P25 "clear" non-encryption option QA05751 (Disable Encryption) if no other encryption is selected. ADP will no longer ship standard. ADP will now be an orderable option (Q667 for portables). Units shipped with QA05751 are not field-upgradable for encryption and any changes will require units to be sent to a depot.
- APX NEXT radios can now be quoted and ordered in Canada. All APX NEXT radios shipping to Canada will be enabled with LTE service on the Bell Mobility network for Application Services. Order shipments will start in mid-May 2020.

Standard Features

All ASTRO Digital APX NEXT™ models include the following features:

- All-Band Capability (UHF, VHF, 7/800)
- Adaptive Audio Engine
- ADP Privacy - Single Key (Q667)
- Radio Packet Data (Q947)
- Software Key (QA01749)
- Front Display: 3.6" TFT Transflective, 24-bit Full Color
- User Interface: Capacitive Touch, immune to false actuation from water, snow, dirt or grease
- Top Color Display: 1 line of icons, 2 lines of text, 14 characters per line

- Enhanced Zone Bank (QA01768)
- GPS Software & Hardware (QA00782)
- Wireless Bluetooth® 5.0 (LE) (QA00583)
- LTE (FirstNet Certified)
- 16 Position Mode Rotary Select Switch
- Angled On/Off Volume Knob
- 4 Programmable Side Buttons
- Orange Programmable Button

NEW: For a limited time, every APX NEXT radio will ship with a 1 year free trial of 4 application services.*

Pick any 4 from the following services:

- SmartProgramming
- SmartConnect
- SmartLocate
- SmartMapping
- ViQi Virtual Partner
- SmartMessaging

- Top Mounted Programmable 3 Position Toggle Switch
- Dual Digital Wideband Audio Microphones
- 3 Watt Rated Audio
- IP68 (2 m, 2 hr)

SmartInsight (Device Diagnostics & Troubleshooting, Device Usage Trend and Battery Management & Prediction) will be available for APX NEXT on a preview basis, included standard for 1 year at no additional charge. During this time Motorola Solutions will be collecting customer feedback to enhance the service before the full market release.

Standard Radio configuration includes the following:

- IMPRES 2 Battery 4400 mAh IP68 (NNTN9216)
- All-Band Flexible Antenna (AN000297A01)
- Plastic Carry Holster (PMLN7947A) with 2.5" Belt Clip (NNTN8266)
- Side Connector Dust Cover (HW001924A01)

APX NEXT radios provide customers with a new ownership experience that allows radio configurations to be set up in a cloud hosted RadioCentral programming tool, even before the radios have physically arrived. On first power up, the APX NEXT radios will automatically connect over WiFi or LTE to the RadioCentral cloud database and download the preset codeplug configuration.

Default radio codeplugs are loaded into the customer's specific cloud database called Provisioning Agency, before the radios ship from the Motorola Solutions factory. A Provisioning Agency will automatically be set up for every customer the first time they

* The purchase or use of any of the subscription services which are features available through the APX Next device will require an Amendment to Contract #4400016317 to incorporate the Subscription Services Terms and Conditions included here.

purchase APX NEXT radios.

When an APX NEXT radio is first ordered, the email address of the administrator for the Provisioning Agency has to be entered. That person will receive an email from Motorola Solutions inviting him/her to access the MyView portal and set up other users with access to the Provisioning Agency, so they can program radios going forward.

Information that you will need to place an order:

- Name and Email address of the customer's **Technical Contact**

- **Provisioning Agency** name (if the customer has multiple)

- Specify **End User Type** of who will be the users of the radios for FirstNet Service Eligibility verification (US customers only).

Available categories are: Police Protection; Fire Protection; Ambulance or Other (describe in free-form text)

- **System ID** for the system on which the APX NEXT radios will be deployed. If not known, use "FFFF"

To ensure accuracy of APX NEXT configuration, please create Quotes and Request Orders in CPQ (access through <https://motorolasolutions.my.salesforce.com>).

Billing Options

Service Activation Delay

To accommodate the lead time sometimes required for new system deployments and radio configuration, customers may elect to delay the start of the Application Services and Device Managed Services contracts.

Service Activation Delay Choices are: 30, 60, 90, 120 days after the shipment of radios.

Billing Options

Device purchases are invoiced at the time of shipment.

Service billing options are: Immediate, Annually, Monthly in Arrears (Federal only)

Software and Provisioning

APX NEXT™ Out of the Box Provisioning

RadioCentral™ Factory default codeplugs for all APX NEXT radios will be made available to you in a secure cloud application. Motorola Solutions will set up a default account for your agency upon initial device purchase and invite you by email to access MyView (<https://myview.motorolasolutions.com>) to set up user accounts and download the RadioCentral programming application client.

If you already have an existing log-in for Motorola Online (MOL) or Learning Experience Portal (LXP), you can use the same credentials to access MyView and RadioCentral. Use this link to verify your Log-In ID or reset your password:

<http://myaccount.motorolasolutions.com>

Follow these steps after your MyView account is activated:

1- Log into MyView Use the credentials provided to you via email and download the latest RadioCentral application client.

2- Install the RadioCentral client and log into your database You will see the factory default codeplugs for your recently purchased APX NEXT radios.

3- Import and convert a legacy APX codeplug using RadioCentral Reuse your existing site and talkgroup information and configure new features specific to APXNEXT for example ViQi Voice Control, SmartConnect, ViQi Virtual Partner, SmartLocate and SmartMapping.

4- Schedule a programming job Apply the radio configuration to your devices. NOTE: To assure proper device deployment please ensure that your organization has received the radios before scheduling specific programming jobs.

5- Remove the radio from the box, insert a battery and turn on the radio

APX NEXT radios are enabled with LTE service and preset with default Wi-Fi SSID, to wirelessly download radio configurations and updates.

a. Upon power up, the radio will scan for the "Customer1" Network SSID access point with WPA/WPA2 security password of "MotorolaSolutions".

b. If "Customer1" is found, the radio will connect to secure hosted RadioCentral database and download any scheduled configuration. NOTE: Wi-Fi must be connected to the open Internet. If using a firewall, open port 443 for radio programming traffic.

c. If "Customer1" access point cannot be found, the radio will attempt to connect to LTE.

d. LTE connections are open to the internet by default, so if the radio is in LTE coverage, it will connect to secure RadioCentral database and download any pending configuration.

e. If neither Wi-Fi nor LTE is found, the radio will continue scanning for a broadband connection.

For security reasons, it is recommended that the first radio configuration update over "Customer1" access point would remove all default SSIDs and replace them with an agency secure network SSID and password.

For assistance, please call 800-MSI-HELP (800-674-4375).

Special Note for United States - State & Local Markets Only

In accordance with FCC mandate, the APX NEXT all band radio is restricted to 12.5 KHz operation only and does NOT support 25 KHz in the VHF and UHF Bands (excluding T-Band). This applies to customers under Rule Part 90. Customers with FCC waivers can contact their Business Development Representative.

The following LMR features are not supported in APX NEXT at this time

H02	TACTICAL RADIO STW-STUN/KILL
-----	------------------------------

QA09012	MISSION CRITICAL GEOFENCING
QA00982	SITE SELECTABLE ALERT FOR P25 TRUNKING

Ordering Information

General Information

The APX P25 mission critical two-way radio series redefines safety in portable communication. From the fire line to the factory line, APX puts the right devices into the hands of the right user. Every feature and function is designed with its users in mind - from the rugged, easy to operate design to the loudest, clearest audio. The result is the ability to keep your people and community safer than ever before.

Extend the power and reliability of your radio with the only complete line of accessories designed, tested and certified for optimal performance with APX portables. This flexible portfolio offers solutions that meet your customers' specific needs. This includes a robust and complete portfolio of remote speaker microphones including the XE Remote Speaker Microphone which has been designed specifically for harsh conditions for the fireground. And the APX Mission Critical Wireless portfolio delivers best-in-class Bluetooth® wireless designed specifically for first responders. While our IMPRES smart battery and charger solutions ensure your responders have a battery that is ready to go at the moment they need it.

Every Motorola battery, charger, audio accessory, carry case and antenna is best-in-class technology, designed and optimized specifically for your APX portable.

[APX NEXT APPLICATION SERVICES](#)

APX NEXT Application Services

Configuration

In this Pricebook there are Subscription Services that require Subscription Service Terms and Conditions which have been included, please see the Subscriptions Services Agreement. *The purchase or use of any of the subscription services which are features available through the APX Next device will require an Amendment to Contract #4400016317 to incorporate the Subscription Services Terms and Conditions included here.*

Select from the list below to extend the Standalone Application Services beyond the 1 year free trial.

If selecting 2 or more Standalone Application Services - consider using the Application Service Bundle. The duration (QTY) of all selected application services must be the same.

Quoting Standalone Application Services, instead of the Application Services Bundle, requires Area Sales Manager approval.

NOTE: Pricing shown is per month (i.e. Qty 12 = 12 months). Available choices are 12, 36 and 60 months.

Description	Full Description	Nomenclature	APC	Price
APX NEXT SMART PROG	SmartProgramming application service extension beyond the 1st year free trial.	SSV01S01407A	0712	\$12.00
APX NEXT SMART CONNECT	SmartConnect application service extension beyond the 1st year free trial.	SSV01S01406A	0712	\$12.00

APX NEXT VIQI	ViQi Virtual Partner application service extension beyond the 1st year free trial.	SSV01S01408B	0712	\$12.00

NOTE: Virtual Partner accesses sensitive CJIS data requiring strict access control policies that may vary from State to State.

The following 31 states have full functional support of Virtual Partner:

Alaska (AK),California (CA),Connecticut (CT),Florida (FL),Georgia (GA),Hawaii (ID),Illinois (IL),Indiana (IN),Iowa (IA),Kentucky (KY),Maine (ME),Massachusetts (MA), Minnesota (MN),Missouri (MO),Nebraska (NE),New Jersey (NJ),New York (NY),North Dakota (ND),Oregon (OR),Pennsylvania (PA),Rhode Island (RI),South Carolina (SC),South Dakota (SD),Tennessee (TN),Texas (TX),Virginia (VA),Washington (WA),West Virginia (WV),Wisconsin (WI),Wyoming (WY), District of Columbia (DC) (31)

Partial Supported States: Driver's License Query only: Arizona (AZ)

Partial Supported States: License Plate, Driver's License Query only. (No VIN support): Idaho (ID), New Mexico (NM) (2)

Virtual Partner is not supported in the following 17 states at this time:

Alabama (AL),Arkansas (AR),Colorado (CO),Delaware (DE),Kansas (KS),Louisiana (LA),Maryland (MD),Michigan (MI),Mississippi (MS),Montana (MT),Nevada (NV),New Hampshire (NH),North Carolina (NC),Ohio (OH),Oklahoma (OK),Utah (UT), and Vermont (VT)

SUBSCRIPTION SERVICES AGREEMENT

Motorola Solutions, Inc. ("Motorola") and _____ ("Customer") enter into this Subscription Services Agreement ("Agreement") pursuant to which Customer will purchase and Motorola will sell a subscription to access the subscription services described below. Motorola and Customer may be referred to individually as a "Party" and collectively as the "Parties."

The terms of the Agreement, including addendums, exhibits, and attachments combined with the terms of any applicable Incorporated Documents will govern the products and services offered pursuant to this Agreement. To the extent there is a conflict between the terms and conditions of the Agreement and the terms and conditions of the applicable Incorporated Documents, the Incorporated Documents take precedence.

1. DEFINITIONS

Capitalized terms used in this Agreement have the meanings set forth below. Any reference to the purchase or sale of software or other Intellectual Property shall mean the sale or purchase of a license or sublicense to use such software or Intellectual Property in accordance with this Agreement.

"Administrator" means Customer's designated system administrator who receives administrative logins for the Subscription Services and issues access rights to Customer's Users.

"Anonymized" means having been stripped of any personal or correlating information revealing original source or uniquely identifying a person or entity.

"Confidential Information" means any information that is disclosed in written, graphic, verbal, or machine-recognizable form, and is marked, designated, or identified at the time of disclosure as being confidential or its equivalent; or if the information is in verbal form, it is identified as confidential at the time of disclosure and is confirmed in writing within thirty (30) days of the disclosure. Confidential Information does not include any information that: is or becomes publicly known through no wrongful act of the receiving Party; is already known to the receiving Party without restriction when it is disclosed; is or becomes, rightfully and without breach of this Agreement, in the receiving Party's possession without any obligation restricting disclosure; is independently developed by the receiving Party without breach of this Agreement; or is explicitly approved for release by written authorization of the disclosing Party.

"Customer Data" means Native Data provided by Customer to Motorola hereunder to be processed and used in connection with the Subscription Services. Customer Data does not include data provided by third parties and passed on to Motorola.

"Deliverables" means all written information (such as reports, analytics, Solution Data, specifications, designs, plans, drawings, or other technical or business information) that Motorola prepares for Customer in the performance of the Services and is obligated to provide to Customer pursuant to the applicable Statement of Work. The Deliverables, if any, are more fully described in the Statement of Work.

"Documentation" means the technical materials provided by Motorola to Customer in hard copy or electronic form describing the use and operation of the Solution and Software, including any technical manuals, but excluding any sales, advertising or marketing materials or proposals.

"Effective Date" means the date of the last signature on this Agreement, unless access to the Subscription Service occurs later, in which case, the Effective Date will be the date when Customer first has access to the Subscription Services.

“Feedback” means comments or information, in oral or written form, given to Motorola by Customer, in connection with or relating to the Solution and Subscription Services.

“Force Majeure” which means an event, circumstance, or act that is beyond a Party’s reasonable control, such as an act of God, an act of the public enemy, an act of a government entity, strikes, other labor disturbances, supplier performance, hurricanes, earthquakes, fires, floods, epidemics, embargoes, war, riots, or any other similar cause.

“Licensed Product” means 1) Software, whether hosted or installed at Customer’s site, 2) Documentation; 3) associated user interfaces; 4) help resources; and 5) any related technology or other services made available by the Solution.

“Native Data” means data that is created solely by Customer or its agents.

“Proprietary Rights” means the patents, patent applications, inventions, copyrights, trade secrets, trademarks, trade names, mask works, know-how, ideas and concepts, moral rights, processes, methodologies, tools, techniques, and other intellectual property rights.

“Software” means the Motorola owned or licensed off the shelf software programs delivered as part of the Licensed Products used to provide the Subscription Services, including all bug fixes, updates and upgrades.

“Solution” means collectively, the Software, servers and any other hardware or equipment operated by Motorola and used in conjunction with the Subscription Services.

“Solution Data” means Customer Data that is transformed, altered, processed, aggregated, correlated or operated on by Motorola, its vendors or other data sources and data that has been manipulated or retrieved using Motorola know-how to produce value-added content that is made available to Customer with the Solution and Subscription Services.

“Statement of Work” If included, the Statement of Work (“SOW”) describes the Subscription Services, Deliverables (if any), Licensed Products and Solution that Motorola will provide to Customer under this Agreement, and the other work-related responsibilities that the parties owe to each other. The Statement of Work may contain a performance schedule.

“Subscription Services” means those subscription services to be provided by Motorola to Customer under this Agreement, the nature and scope of which are more fully described in the Documentation, proposal, SOW, or other Solution materials provided by Motorola, as applicable.

“Users” means Customer’s authorized employees or other individuals authorized to utilize the Subscription Services on behalf of Customer and who will be provided access to the Subscription Services by virtue of a password or equivalent security mechanism implemented by Customer.

2. SCOPE

21 **Subscription Services.** Motorola will provide to Customer the Subscription Services and Deliverables (if any). As part of the Subscription Services, Motorola will allow Customer to use the Solution described in the Statement of Work, Documentation, proposal, or other Solution materials provided by Motorola (“Incorporated Document(s)”), as applicable. Some Subscription Services will also be subject to additional terms unique to that specific Subscription Service. Such additional terms will be set forth in an Addendum. In the event of a conflict between an Addendum and the body of the

Agreement, the Addendum will govern resolution of the conflict. Motorola and Customer will perform their respective responsibilities as described in this Agreement and any applicable Incorporated Documents.

22 **Changes.** Customer may request changes to the Services. If Motorola agrees to a requested change, the change must be confirmed in writing and signed by authorized representatives of both parties. A reasonable price adjustment will be made if any change affects the time of performance or the cost to perform the Services.

23 **Non-solicitation.** During the term of this Agreement and for twelve (12) months thereafter, Customer will not actively solicit the employment of any Motorola personnel who is involved directly with providing any of the Services.

3. TERM

31 **Term.** Unless a different Term is set forth in an applicable Addendum or the Incorporated Documents, the Term of this Agreement begins on the Effective Date and continues for twelve (12) months. The Agreement automatically renews annually on the anniversary of the Effective Date, unless either Party notifies the other of its intention to not renew the Agreement (in whole or part) at least thirty (30) days before the anniversary date or until termination by either Party in accordance with the Termination section of this Agreement.

32 **Minimum Initial Term.** For certain Subscription Services, a minimum initial term greater than one year may be required ("Minimum Initial Term"). Following the Minimum Initial Term, this Agreement will automatically renew upon each anniversary of the Effective Date for a successive renewal term of the same duration as the Minimum Initial Term, unless either Party: 1) notifies the other of its intention to not renew the Agreement (in whole or part) at least thirty (30) days before the anniversary date; 2) requests an alternate term; or 3) terminates in accordance with the termination provision in the Agreement, including non-payment of fees for the renewal period by the anniversary date.

33 **Renewals.** The terms and conditions of the Agreement and will govern any renewal periods.

4. **CUSTOMER OBLIGATIONS.** Customer will fulfill all of its obligations in this Agreement, including applicable addendums and Incorporated Documents in a timely and accurate manner. Failure to do so may prevent Motorola from performing its responsibilities.

41 **Access.** To enable Motorola to perform the Subscription Services, Customer will provide to Motorola reasonable access to relevant Customer information, personnel, systems, and office space when Motorola's employees are working on Customer's premises, and other general assistance. Further, if any equipment is installed or stored at Customer's location in order to provide the Subscription Services, Customer will provide, at no charge, a non-hazardous environment with adequate shelter, heat, light, power, security, and full and free access to the equipment.

42 **Customer Information.** If the Documentation, Statement of Work, proposal, or other related documents contain assumptions that affect the Subscription Services or Deliverables, Customer will verify that they are accurate and complete. Any information that Customer provides to Motorola concerning the Subscription Services or Deliverables will be accurate and complete in all material respects. Customer will make timely decisions and obtain any required management and third party approvals or consents that are reasonably necessary for Motorola to perform the Subscription Services and its other duties under this Agreement. Unless the Statement of Work states the contrary, Motorola may rely upon and is not required to evaluate, confirm, reject, modify, or provide advice concerning any assumptions and

Customer-provided information, decisions and approvals described in this paragraph.

43 **Risk of Loss.** If any portion of the Solution resides on Customer premises or is under Customer's control in any way, Customer shall at all times exercise reasonable care in using and maintaining the Solution in accordance with Motorola's instructions for proper use and care. Risk of loss to any equipment in Customer's possession will reside with Customer until removed by Motorola or its agent or returned by Customer. Customer will be responsible for replacement costs of lost or damaged equipment, normal wear and tear excluded.

44 **Equipment Title.** Unless Customer is purchasing equipment pursuant to the terms in the Addendum entitled "Equipment Purchase" and unless stated differently in this Agreement or in the Incorporated Documents, title to any equipment provided to Customer in connection with the Subscription Services remains vested in Motorola at all times. Any sale of equipment pursuant to this Agreement will be governed by the terms and conditions set forth in the Equipment Purchase Addendum.

45 **Enable Users.** Customer will properly enable its Users to use the Subscription Services, including providing instructions for use, labeling, required notices, and accommodation pursuant to applicable laws, rules, and regulations. Unless otherwise agreed in the Incorporated Documents, Customer will train its Users on proper operation of the Solution and Licensed Products. Customer agrees to require Users to acknowledge and accept the limitations and conditions of use of the Licensed Products in this Agreement prior to allowing Users to access or use Subscription Services.

46 **Non-preclusion.** If, as a result of the Subscription Services performed under this Agreement, Motorola recommends that Customer purchase products or other services, nothing in this Agreement precludes Motorola from participating in a competitive opportunity or otherwise offering or selling the recommended products or other services to Customer. Customer represents that this paragraph does not violate its procurement or other laws, regulations, or policies.

5. **Subscription Fees.**

51 **Recurring Fees.** Unless stated differently in an applicable addendum, Incorporated Documents or otherwise arranged in writing with Motorola, Services will be provided in exchange for annual pre-paid Subscription Fees. Motorola will submit an invoice for the first year of subscription fees on the Effective Date. On each anniversary of the Effective Date, Motorola will issue an invoice for the annual subscription fees for the following year.

51.1 **No Purchase Order Requirement.** For a Subscription Services Term exceeding one year, Customer affirms that a purchase order or notice to proceed is not required for Motorola to proceed with the entire scope of work described in the Incorporated Documents for subsequent years, including but not limited to multi-year subscription agreements.

52 **Start Up Fees.** Start up fees apply to certain Subscription Services. If the Subscription Service includes start up fees, Motorola will submit an invoice for the start up fees on the Effective Date.

53 **Fee Change.** Motorola reserves the right to change the subscription fees at the end of each Subscription Services Term. Except for any payment that is due on the Effective Date, Customer will make payments to Motorola within thirty (30) days after the date of each invoice. Motorola reserves the right to terminate Service for non-payment of fees.

54 **No Price Guarantee.** Notwithstanding any language to the contrary, the pricing and fees associated with this Agreement will not be subject to any most favored pricing commitment or other similar low price guarantees.

55 **Taxes.** The Subscription Fees and start up fees do not include any excise, sales, lease, use, property, or other taxes, assessments or duties, all of which will be paid by Customer, except as exempt by law. If Motorola is required to pay any of those taxes, it will send an invoice to Customer and Customer will pay to Motorola the amount of the taxes (including any interest and penalties) within thirty (30) days after the date of the invoice. Motorola will be solely responsible for reporting taxes on its income or net worth.

6. ACCEPTANCE; SCHEDULE; FORCE MAJEURE

61 **Acceptance.** The Licensed Products will be deemed accepted upon the delivery of usernames and passwords or other validation mechanism to Customer. If usernames and passwords have been issued to Customer prior to the Effective Date, the Licensed Products will be deemed accepted on the Effective Date.

62 **Schedule.** All Subscription Services will be performed in accordance with the performance schedule included in the Statement of Work, or if there is no performance schedule, within a commercially reasonable time period.

63 **Force Majeure.** Neither Party will be liable for its non-performance or delayed performance if caused by a Force Majeure. Each Party will notify the other in writing if it becomes aware of any Force Majeure that will significantly delay performance. The notifying Party will give the notice promptly (but in no event later than fifteen (15) days) after it discovers the Force Majeure.

7. LIMITED LICENSE

7.1 **Licensed Products.** Use of the Licensed Products by Customer and its Users is strictly limited to use in connection with the Solution or Subscription Services during the Term. Customer and Users will refrain from, and will require others to refrain from, doing any of the following with regard to the Software in the Solution: (i) directly or indirectly, by electronic or other means, copy, modify, or translate the Software; (ii) directly or indirectly, by electronic or other means, reproduce, reverse engineer, distribute, sell, publish, commercially exploit, rent, lease, sublicense, assign or otherwise transfer or make available the Licensed Products or any part thereof to any third party, or otherwise disseminate the Licensed Product in any manner; (iii) directly or indirectly, by electronic or other means, modify, decompile, or disassemble the Software or part thereof, or attempt to derive source code from the Software; or (iv) remove any proprietary notices, labels, or marks on the Software or any part of the Licensed Products. Motorola Solutions reserves all rights to the Software and other Licensed Products not expressly granted herein, including without limitation, all right, title and interest in any improvements or derivatives conceived of or made by Motorola that are based, either in whole or in part, on knowledge gained from Customer Data. Customer agrees to abide by the copyright laws of the United States and all other relevant jurisdictions, including without limitation, the copyright laws where Customer uses the Solution. Customer agrees to immediately cease using the Solution if it fails to comply with this paragraph or any other part of this Agreement. If Software is subject to a click wrap, end user license agreement or is otherwise packaged with or subject to a separate end user license, such license will apply to the use of Software and Licensed Product.

7.2 **Proprietary Rights.** Regardless of any contrary provision in the Agreement, Motorola or its third party providers own and retain all of their respective Proprietary Rights in the Software, Solution, and Licensed Product. Nothing in this Agreement is intended to restrict their Proprietary Rights. All intellectual property developed, originated, or prepared by Motorola in connection with providing Services to Customer remain vested exclusively in Motorola, and this Agreement does not grant to Customer any shared development rights of intellectual property. No custom development work is to be performed under

this Agreement.

8. DATA AND FEEDBACK

81 **Solution Data.** To the extent permitted by law, Motorola, its vendors and licensors are the exclusive owners of all right, title, and interest, in and to the Solution Data, including all intellectual property rights therein. Motorola grants Customer a personal, royalty-free, non-exclusive license to: (i) access, view, use, copy, and store the Solution Data for its internal business purposes and, (ii) when specifically permitted by the applicable Statement of Work, publish Solution Data on its websites for viewing by the public.

82 **Customer Data.** To the extent permitted by law, Customer retains ownership of Customer Data. Customer grants Motorola and its subcontractors a personal, royalty-free, non-exclusive license to use, host, cache, store, reproduce, copy, modify combine, analyze, create derivatives from, communicate, transmit, publish, display, and distribute such Customer Data for the purpose of providing the Subscription Services to Customer, other Motorola Customers and end users, including without limitation, the right to use Customer Data for the purpose of developing new or enhanced solutions. In addition to the rights listed above, Customer grants Motorola a license to sell an Anonymized version of Customer Data for any purpose.

83 **Feedback.** Any Feedback given by Customer is entirely voluntary and, even if designated as confidential, will create no confidentiality obligation for Motorola. Motorola is free to use, reproduce, license or otherwise distribute and exploit the Feedback without any obligation to Customer. Customer acknowledges that Motorola's receipt of the Feedback does not imply or create recognition by Motorola of either the novelty or originality of any idea. The parties further agree that all fixes, modifications and improvement to the Licensed Product or Subscription Service conceived of or made by Motorola that are based, either in whole or in part, on the Feedback are the exclusive property of Motorola and all right, title and interest in and to such fixes, modifications or improvements to the Licensed Product or Subscription Service will vest solely in Motorola.

9 WARRANTY

9.1 **"AS IS".** THE SOLUTION AND SUBSCRIPTION SERVICES ARE PROVIDED "AS IS". MOTOROLA DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED. Customer acknowledges that the Deliverables may contain recommendations, suggestions or advice from Motorola to Customer (collectively, "Recommendations"). Motorola makes no warranties concerning those Recommendations, and Customer alone accepts responsibility for choosing whether and how to implement the Recommendations and the results to be realized from implementing them.

9.2 **Availability and Accuracy.** Customer acknowledges that functionality of the Solution as well as availability and accuracy of Solution Data is dependent on many elements beyond Motorola's control, including databases managed by Customer or third parties and Customer's existing equipment, software, and Customer Data. Therefore, Motorola does not guarantee availability or accuracy of data, or any minimum level of coverage or connectivity. Interruption or interference with the Subscription Services or Solution may periodically occur. Customer agrees not to represent to any third party that Motorola has provided such guarantee.

9.3 **Equipment Sale.** Warranty for any equipment sold pursuant to this Agreement will be set forth in Equipment Purchase Addendum.

10. DISCLAIMERS

10.1 **Existing Equipment and Software.** If Customer's existing equipment and software is critical to

operation and use of the Subscription Services, Customer is solely responsible for supporting and maintaining Customer's existing equipment and software. Connection to or interface with Customer's existing equipment and software may be required to receive Subscription Services. Any failures or deficiencies of Customer's existing equipment and software may impact the functionality of the Solution and the Subscription Services to be delivered. Any vulnerabilities or inefficiencies in Customer's system may also impact the Solution and associated Subscription Services.

102 **Privacy.** Customer bears sole responsibility for compliance with any laws and regulations regarding tracking; location based services; gathering, storing, processing, transmitting, using or misusing; or otherwise handling personally identifiable information ("PII"), including information about Users of the Solution or citizens in the general public. Further, it is Customer's sole responsibility to comply with any laws or regulations prescribing the measures to be taken in the event of breach of privacy or accidental disclosure of any PII. Enacting and enforcing any internal privacy policies for the protection of PII, including individual disclosure and consent mechanisms, limitations on use of the information, and commitments with respect to the storage, use, deletion and processing of PII in a manner that complies with applicable laws and regulations will be Customer's sole responsibility. Motorola will not evaluate the sufficiency of such policies and disclaims any responsibility or liability for privacy practices implemented by Customer, or lack thereof. Customer acknowledges and agrees that Subscription Services and the Solution are not designed to ensure individual privacy. Customer will inform Users that the Solution may enable visibility to PII, as well as physical location of individuals. Further, if the Solution or Subscription Services are available to the general public pursuant to this Agreement, Customer will provide the appropriate privacy notification. Neither Motorola nor Customer can provide any assurance of individual privacy in connection with the Solution. Further, Customer is solely responsible for determining whether and how to use data gathered from social media sources for the purpose of criminal investigations or prosecution. Customer will hold Motorola harmless from any and all liability, expense, judgment, suit, or cause of action, which may accrue against Motorola for causes of action for damages related to tracking, location based services, breach of privacy, and the use or misuse of PII provided that Motorola gives Customer prompt, written notice of any such claim or suit. Motorola shall cooperate with Customer in its defense or settlement of such claim or suit.

103 **Social Media.** If Customer purchases Subscription Services that utilize social media, Customer acknowledges and agrees that such Subscription Services are not designed to ensure individual privacy. In such case, Customer will inform Users that the Solution and Subscription Services may enable visibility to PII, as well as physical location of individuals. Further, if the Solution or Subscription Services are available to the general public pursuant to this Agreement, Customer will provide the appropriate privacy notification. Neither Motorola nor Customer can provide any assurance of individual privacy in connection with the Solution or Subscription Services utilizing social media. Further, Customer is solely responsible for determining whether and how to use data gathered from social media sources for the purpose of criminal investigations or prosecution. Customer will hold Motorola harmless from any and all liability, expense, judgment, suit, or cause of action, which may accrue against Motorola for causes of action for damages related to tracking, location based services, breach of privacy, and the use or misuse of PII provided that Motorola gives Customer prompt, written notice of any such claim or suit. Motorola shall cooperate with Customer in its defense or settlement of such claim or suit.

104 **Misuse.** Motorola reserves the right to discontinue service at any time without notice to Users that misuse the Service, jeopardize the Licensed Product or public safety in any way.

11. LIMITATION OF LIABILITY

11.1 **Liability Limit.** Except for personal injury or death, Motorola's total liability, whether for breach of contract, warranty, negligence, strict liability in tort, or otherwise, will be limited to the direct damages recoverable under law, but not to exceed the price of twelve (12) months of Subscription Services provided under this Agreement. **ALTHOUGH THE PARTIES ACKNOWLEDGE THE POSSIBILITY OF**

SUCH LOSSES OR DAMAGES, THEY AGREE THAT MOTOROLA WILL NOT BE LIABLE FOR ANY COMMERCIAL LOSS; INCONVENIENCE; LOSS OF USE, TIME, DATA, GOODWILL, REVENUES, PROFITS OR SAVINGS; OR OTHER SPECIAL, INCIDENTAL, INDIRECT, OR CONSEQUENTIAL DAMAGES IN ANY WAY RELATED TO OR ARISING FROM THIS AGREEMENT OR THE PERFORMANCE OF THE SUBSCRIPTION SERVICES BY MOTOROLA. This limitation of liability provision survives the expiration or termination of this Agreement and applies notwithstanding any contrary provision. No action for contract breach or otherwise relating to the transactions contemplated by this Agreement may be brought more than one (1) year after the accrual of the cause of action, except for money due upon an open account.

112 **Additional Disclaimers.** MOTOROLA DISCLAIMS ANY AND ALL LIABILITY FOR ANY AND ALL LOSS OR COSTS OF ANY KIND ASSOCIATED WITH 1) THE INTERRUPTION, INTERFERENCE OR FAILURE OF CONNECTIVITY, VULNERABILITIES OR SECURITY EVENTS, WHETHER OR NOT THEY ARE DISCOVERED BY MOTOROLA; 2) PERFORMANCE OF CUSTOMER'S EXISTING EQUIPMENT AND SOFTWARE OR ACCURACY OF CUSTOMER DATA; 3) IF ANY PORTION OF THE SOLUTION OR LICENSED PRODUCT RESIDES ON CUSTOMER'S PREMISES, DISRUPTIONS OF AND/OR DAMAGE TO CUSTOMER'S OR A THIRD PARTY'S INFORMATION SYSTEMS, EQUIPMENT, AND THE INFORMATION AND DATA, INCLUDING, BUT NOT LIMITED TO, DENIAL OF ACCESS TO A LEGITIMATE SYSTEM USER, AUTOMATIC SHUTDOWN OF INFORMATION SYSTEMS CAUSED BY INTRUSION DETECTION SOFTWARE OR HARDWARE, OR FAILURE OF THE INFORMATION SYSTEM RESULTING FROM THE PROVISION OR DELIVERY OF THE SERVICE; 4) AVAILABILITY OR ACCURACY OF SOLUTION DATA; 5) INTERPRETATION, USE OR MISUSE IN ANY WAY OF SOLUTION DATA; 6) IMPLEMENTATION OF RECOMMENDATIONS PROVIDED IN CONNECTION WITH THE SUBSCRIPTION SERVICES; 7) TRACKING, AND LOCATION BASED SERVICES, BREACH OF PRIVACY, AND THE USE OR MISUSE OF PERSONALLY IDENTIFIABLE INFORMATION.

113 **Essential term.** The parties acknowledge that the prices have been set and the Agreement entered into in reliance upon these limitations of liability and that all such limitations form an essential basis of the bargain between the parties.

12 DEFAULT AND TERMINATION

121 **Default By a Party.** If either Party fails to perform a material obligation under this Agreement, the other Party may consider the non-performing Party to be in default (unless a Force Majeure causes the failure) and may assert a default claim by giving the non-performing Party a written, detailed notice of default. Except for a default by Customer for failing to pay any amount when due under this Agreement which must be cured immediately, the defaulting Party will have thirty (30) days after receipt of the notice of default to either cure the default or, if the default is not curable within thirty (30) days, provide a written cure plan. The defaulting Party will begin implementing the cure plan immediately after receipt of notice by the other Party that it approves the plan. If Customer is the defaulting Party, Motorola may stop work on the project until it approves the Customer's cure plan.

122 **Failure To Cure.** If a defaulting Party fails to cure the default as provided above in Section 12.1, unless otherwise agreed in writing, the non-defaulting Party may terminate any unfulfilled portion of this Agreement. In the event of a termination for default, the defaulting Party will promptly return to the non-defaulting Party any of its Confidential Information. If Customer is the non-defaulting Party, terminates this Agreement as permitted by this Section, and procures the Services through a third party, Customer may as its exclusive remedy recover from Motorola reasonable costs incurred to procure the Services (but not additional or out of scope services) less the unpaid portion of the Contract Price. Customer agrees to mitigate damages and provide Motorola with detailed invoices substantiating the

charges.

123 **No Refund.** If a subscription is terminated for any reason prior to the end of the Subscription Services Term or other subscription period set forth in the Incorporated Documents or otherwise agreed to in writing by the Parties, no refund or credit will be provided.

124 **Cancellation Fee.** If an Initial Minimum Term applies and Customer terminates prior to the end of the Initial Minimum Term, Customer will be required to pay a cancellation fee of up to fifty percent (50%) of the remaining balance of subscription fees for the Initial Minimum Term.

125 **Return of Discount.** If Customer is afforded a discount in exchange for a term commitment longer than one year, early termination will result in an early termination fee, representing a return of the discount off of list price.

126 **Return Confidential Information.** Upon termination or expiration of the Agreement, Customer will return or certify the destruction of all Confidential Information and Solution Data.

127 **Connection Terminated.** Certain Subscription Services require a connection to Customer systems to access Customer Data (e.g. predictive or analytic services). Upon termination, connection to relevant data sources will be disconnected and Motorola will no longer extract any CustomerData.

128 **Equipment Return.** Any equipment provided by Motorola for use with the Subscription Services, must be returned within thirty (30) days of the date of termination, at Customer's expense. If equipment is not returned within this time frame, Motorola reserves the right to invoice the Customer for the purchase price of the unreturned equipment.

129 **Five Year Term.** Motorola provides equipment for use in connection with certain Subscription Services. Upon expiration and non-renewal of a five (5) year subscription Term, Title to the equipment will automatically transfer to Customer upon the subscription expiration date.

13. DISPUTES

13.1 **Settlement.** The parties will attempt to settle any dispute arising from this Agreement (except for a claim relating to intellectual property or breach of confidentiality) through consultation and a spirit of mutual cooperation. The dispute will be escalated to appropriate higher-level managers of the parties, if necessary. If cooperative efforts fail, the dispute will be mediated by a mediator chosen jointly by the parties within thirty (30) days after notice by one of the parties demanding non-binding mediation. The parties will not unreasonably withhold consent to the selection of a mediator, will share the cost of the mediation equally, may agree to postpone mediation until they have completed some specified but limited discovery about the dispute, and may replace mediation with some other form of non-binding alternative dispute resolution ("ADR").

13.2 **Litigation.** A Party may submit to a court of competent jurisdiction any claim relating to intellectual property, breach of confidentiality, or any dispute that cannot be resolved between the parties through negotiation or mediation within two (2) months after the date of the initial demand for non-binding mediation. Each Party consents to jurisdiction over it by that court. The use of ADR procedures will not be considered under the doctrine of laches, waiver, or estoppel to affect adversely the rights of either Party. Either Party may resort to the judicial proceedings described in this section before the expiration of the two-month ADR period if good faith efforts to resolve the dispute under these procedures have been

unsuccessful; or interim relief from the court is necessary to prevent serious and irreparable injury to the Party.

14. SECURITY.

14.1 **Industry Standard.** Motorola will maintain industry standard security measures to protect the Solution from intrusion, breach, or corruption. During the term of Agreement, if the Solution enables access to Criminal Justice Information (“CJI”), as defined by the Criminal Justice Information Services Security Policy (“CJIS”), Motorola will provide and comply with a CJIS Security Addendum. Any additional Security measure desired by Customer may be available for an additional fee.

14.2 **Background checks.** Motorola will require its personnel that access CJI to submit to a background check based on submission of FBI fingerprint cards.

14.3 **Customer Security Measures.** Customer is independently responsible for establishing and maintaining its own policies and procedures and for ensuring compliance with CJIS and other security requirements that are outside the scope of the Subscription Services provided. Customer must establish and ensure compliance with access control policies and procedures, including password security measures. Further, Customer must maintain industry standard security and protective data privacy measures. Motorola disclaims any responsibility or liability whatsoever for the security or preservation of Customer Data or Solution Data once accessed or viewed by Customer or its representatives. Motorola further disclaims any responsibility or liability whatsoever that relates to or arise from Customer's failure to maintain industry standard security and data privacy measures and controls, including but not limited to lost or stolen passwords. Motorola reserves the right to terminate the Service if Customer's failure to maintain or comply with industry standard security and control measures negatively impacts the Service, Solution, or Motorola's own security measures.

14.4 **Breach Response Plan.** Both parties will maintain and follow a breach response plan consistent with the standards of their respective industries.

15. CONFIDENTIAL INFORMATION AND PROPRIETARY RIGHTS

15.1. CONFIDENTIAL INFORMATION.

15.1.1. **Treatment of Confidential Information.** During the term of this Agreement, the parties may provide each other with Confidential Information. Licensed Products, and all Deliverables will be deemed to be Motorola's Confidential Information. Each Party will: maintain the confidentiality of the other Party's Confidential Information and not disclose it to any third party, except as authorized by the disclosing Party in writing or as required by a court of competent jurisdiction; restrict disclosure of the Confidential Information to its employees who have a “need to know” and not copy or reproduce the Confidential Information; take necessary and appropriate precautions to guard the confidentiality of the Confidential Information, including informing its employees who handle the Confidential Information that it is confidential and is not to be disclosed to others, but those precautions will be at least the same degree of care that the receiving Party applies to its own confidential information and will not be less than reasonable care; and use the Confidential Information only in furtherance of the performance of this Agreement or pursuant to the license granted immediately below.

15.1.2. **Ownership of Confidential Information.** The disclosing Party owns and retains all of its Proprietary Rights in and to its Confidential Information, except the disclosing Party hereby grants to the receiving Party the limited right and license, on a non-exclusive, irrevocable, and royalty-free basis, to use

the Confidential Information for any lawful, internal business purpose in the manner and to the extent permitted by this Agreement.

15.2 PRESERVATION OF PROPRIETARY RIGHTS.

15.2.1 Proprietary Solution. Customer acknowledges that the Licensed Products and any associated Documentation, data, and methodologies used in providing Services are proprietary to Motorola or its third party licensors and contain valuable trade secrets. In accordance with this Agreement, Customer and its employees shall treat the Solution and all Proprietary Rights as Confidential Information and will maintain the strictest confidence.

15.2.2. Ownership. Each Party owns and retains all of its Proprietary Rights that exist on the Effective Date. Motorola owns and retains all Proprietary Rights that are developed, originated, or prepared in connection with providing the Deliverables or Services to Customer, and this Agreement does not grant to Customer any shared development rights. At Motorola's request and expense, Customer will execute all papers and provide reasonable assistance to Motorola to enable Motorola to establish the Proprietary Rights. Unless otherwise explicitly stated herein, this Agreement does not restrict a Party concerning its own Proprietary Rights and is not a grant (either directly or by implication, estoppel, or otherwise) of a Party's Proprietary Rights to the other Party.

15.3 Remedies. Because Licensed Products contain valuable trade secrets and proprietary information of Motorola, its vendors and licensors, Customer acknowledges and agrees that any actual or threatened breach of this Section will constitute immediate, irreparable harm to Motorola for which monetary damages would be an inadequate remedy, and that injunctive relief is an appropriate remedy for such breach. Notwithstanding anything in this Agreement to the contrary, Motorola reserves the right to obtain injunctive relief and any other appropriate remedies from any court of competent jurisdiction in connection with any actual, alleged, or suspected breach of Section 3, infringement, misappropriation or violation of Motorola's Property Rights, or the unauthorized use of Motorola's Confidential Information. Any such action or proceeding may be brought in any court of competent jurisdiction. Except as otherwise expressly provided in this Agreement, the parties' rights and remedies under this Agreement are cumulative.

16. GENERAL

16.1 Future Regulatory Requirements. The Parties acknowledge and agree that this is an evolving technological area and therefore, laws and regulations regarding Subscription Services and use of the Solution may change. Changes to existing Subscription Services or Solution required to achieve regulatory compliance may be available for an additional fee. Any required changes may also impact the Fees for services.

16.2 Compliance with Applicable Laws. Each Party will comply with all applicable federal, state, and local laws, regulations and rules concerning the performance of this Agreement. Further, Customer will comply with all applicable export and import control laws and regulations in its use of the Licensed Products and Subscription Services. In particular, Customer will not export or re-export the Licensed Products without Motorola's prior written consent, and, if such consent is granted, without Customer first obtaining all required United States and foreign government licenses. Customer further agrees to comply with all applicable laws and regulations in providing the Customer Data to Motorola, and Customer warrants and represents to Motorola that Customer has all rights necessary to provide such Customer Data to Motorola for the uses as contemplated hereunder. Customer shall obtain at its indemnify expense

all necessary licenses, permits and regulatory approvals required by any and all governmental authorities as may from time to time be required in connection with its activities related to this Agreement. To the extent permitted by applicable law, Customer will defend, indemnify, and hold harmless Motorola from and against any violation of such laws or regulations by Customer or any of its agents, officers, directors, or employees.

16.3 **Audit.** Motorola reserves the right to monitor and audit use of the Subscription Services. Customer will cooperate and will require Users to cooperate with such monitoring or audit.

16.4 **Assignability.** Except as provided herein, neither Party may assign this Agreement or any of its rights or obligations hereunder without the prior written consent of the other Party, which consent will not be unreasonably withheld. Any attempted assignment, delegation, or transfer without the necessary consent will be void. Notwithstanding the foregoing, Motorola may assign this Agreement to any of its affiliates or its right to receive payment without the prior consent of Customer. In addition, in the event Motorola separates one or more of its businesses (each a "Separated Business"), whether by way of a sale, establishment of a joint venture, spin-off or otherwise (each a "Separation Event"), Motorola may, without the prior written consent of the other Party and at no additional cost to Motorola, assign this Agreement such that it will continue to benefit the Separated Business and its affiliates (and Motorola and its affiliates, to the extent applicable) following the Separation Event. Motorola may subcontract any of the work, but subcontracting will not relieve Motorola of its duties under this Agreement.

16.5 **Subcontracting.** Motorola may subcontract any portion of the Subscription Services without prior notice or consent of Customer.

16.6 **Waiver.** Failure or delay by either Party to exercise a right or power will not be a waiver of the right or power. For a waiver of a right or power to be effective, it must be in a writing signed by the waiving Party. An effective waiver of a right or power will not be construed as either a future or continuing waiver of that same right or power, or the waiver of any other right or power.

16.7 **Severability.** If a court of competent jurisdiction renders any part of this Agreement invalid or otherwise unenforceable, that part will be severed and the remainder of this Agreement will continue in full force and effect.

16.8 **Independent Contractors.** Each Party will perform its duties under this Agreement as an independent contractor. The parties and their personnel will not be considered to be employees or agents of the other Party. Nothing in this Agreement will be interpreted as granting either Party the right or authority to make commitments of any kind for the other. This Agreement will not constitute, create, or be interpreted as a joint venture, partnership or formal business organization of any kind.

16.9 **Headings.** The section headings in this Agreement are inserted only for convenience and are not to be construed as part of this Agreement or as a limitation of the scope of the particular section to which the heading refers. This Agreement will be fairly interpreted in accordance with its terms and conditions and not for or against either Party.

16.10 **Governing Law.** This Agreement and the rights and duties of the parties will be governed by and interpreted in accordance with the laws of the State of Illinois.

16.11 **Notices.** Notices required under this Agreement to be given by one Party to the other must be in writing and either personally delivered or sent to the address provided by the other Party by certified mail, return receipt requested and postage prepaid (or by a recognized courier service, such as Federal Express, UPS, or DHL), or by facsimile with correct answerback received, and will be effective upon receipt.

16.12 **Authority To Execute Agreement.** Each Party represents that it has obtained all necessary approvals, consents and authorizations to enter into this Agreement and to perform its duties under this Agreement; the person executing this Agreement on its behalf has the authority to do so; upon execution and delivery of this Agreement by the parties, it is a valid and binding contract, enforceable in accordance with its terms; and the execution, delivery, and performance of this Agreement does not violate any bylaw, charter, regulation, law or any other governing authority of the Party.

16.13 **Return of Equipment.** Upon termination of the contract for any reason, Customer shall return to Motorola all equipment delivered to Customer, if any.

16.14 **Survival Of Terms.** The following provisions survives the expiration or termination of this Agreement for any reason: if any payment obligations exist, Section 5 (Subscription Fees); Section 11 (Limitation of Liability); Section 12 (Default and Termination); Section 13 (Disputes); Section 15 (Confidential Information and Proprietary Rights);; and all General provisions in Section 16.

16.15 **ENTIRE AGREEMENT.** This Agreement and any Incorporated Documents or related attachments constitute the entire agreement of the Parties regarding the subject matter of this Agreement and supersedes all previous agreements, proposals, and understandings, whether written or oral, relating to this subject matter. This Agreement may be amended or modified only by a written instrument signed by authorized representatives of both Parties. The preprinted terms and conditions found on any Customer purchase or purchase order, acknowledgment or other form will not be considered an amendment or modification of this Agreement, even if a representative of each Party signs that document.

In witness whereof, the parties hereto have executed this Agreement as of the Effective Date.

Subscription Services Agreement

Exhibit A: FirstNet and AT&T Service Terms

Public Safety Entity (“Customer”) Responsibilities for access to and use of “First Net” Service as provided by AT&T

General. The Customer is responsible for complying with AT&T Acceptable Use Policy found at att.com/aup and applicable AT&T Service Guides found at att.com/servicepublications.

Privacy. The Customer is responsible for complying with all applicable privacy laws. The Customer is responsible for obtaining consent from and giving notice to its Users regarding Motorola’s and AT&T’s collection and use of User information in connection with a Service. The Customer will only make accessible or provide Personal Data to Motorola and AT&T when it has the legal authority to do so.

User Eligibility. The Customer shall verify, or assist Motorola and AT&T in verifying, as stated below, the eligibility of its Users to use the Service. The Customer is required to verify and confirm that its Users are authorized and eligible to use Service. The Customer must perform periodic audits on a regular, but not less than once per year, basis to identify any individuals who are no longer eligible for Service. The Customer must produce such information as may be requested through AT&T by the FirstNet Authority and the United States Government to verify eligibility of its users.

Limitations on the Service. THE CUSTOMER ACKNOWLEDGES THAT SERVICE IS MADE AVAILABLE ONLY WITHIN THE OPERATING RANGE OF THE NETWORKS. SERVICE MAY BE TEMPORARILY REFUSED, INTERRUPTED, OR LIMITED BECAUSE OF: (A) FACILITIES LIMITATIONS; (B) TRANSMISSION LIMITATIONS CAUSED BY ATMOSPHERIC, TERRAIN, OTHER NATURAL OR ARTIFICIAL CONDITIONS ADVERSELY AFFECTING TRANSMISSION, WEAK BATTERIES, SYSTEM OVERCAPACITY, MOVEMENT OUTSIDE A SERVICE AREA OR GAPS IN COVERAGE IN A SERVICE AREA AND OTHER CAUSES REASONABLY OUTSIDE OF MOTOROLA OR AT&T’S CONTROL SUCH AS, BUT NOT LIMITED TO, INTENTIONAL OR NEGLIGENT ACTS OF THIRD PARTIES THAT DAMAGE OR IMPAIR THE NETWORK OR DISRUPT SERVICE; OR (C) EQUIPMENT MODIFICATIONS, UPGRADES, RELOCATIONS, REPAIRS, AND OTHER SIMILAR ACTIVITIES NECESSARY FOR THE PROPER OR IMPROVED OPERATION OF SERVICE.

Limitations on Service of Carrier Partners. CARRIER PARTNER NETWORKS ARE MADE AVAILABLE AS-IS AND MOTOROLA AND AT&T MAKES NO WARRANTIES OR REPRESENTATIONS AS TO THE AVAILABILITY OR QUALITY OF ROAMING SERVICE PROVIDED BY CARRIER PARTNERS, AND MOTOROLA AND AT&T WILL NOT BE LIABLE IN ANY CAPACITY FOR ANY ERRORS, OUTAGES, OR FAILURES OF CARRIER PARTNER NETWORKS. ROAMING ON CARRIER PARTNER NETWORKS OUTSIDE THE FIRSTNET SERVICE AREA (IF ANY) SHALL BE AVAILABLE AS DESCRIBED IN THE SERVICE GUIDE.

User Disclosures. THE CUSTOMER UNDERSTANDS AND AGREES THAT IT: (1) HAS NO CONTRACTUAL RELATIONSHIP WITH THE UNDERLYING WIRELESS SERVICE CARRIER; (2) IS NOT A THIRD PARTY BENEFICIARY OF ANY AGREEMENT BETWEEN [CUSTOMER] AND THE UNDERLYING CARRIER; (3) THAT THE UNDERLYING CARRIER HAS NO LIABILITY OF ANY KIND TO [USER], WHETHER FOR BREACH OF CONTRACT, WARRANTY, NEGLIGENCE, STRICT LIABILITY IN TORT OR OTHERWISE; AND (4) THAT DATA TRANSMISSIONS AND MESSAGES MAY BE DELAYED, DELETED OR NOT DELIVERED, AND 911 OR SIMILAR EMERGENCY CALLS MAY NOT BE COMPLETED

Medical Devices (FDA and HIPAA Responsibilities). The Customer shall be responsible for FDA compliance as a “distributor” of the Device to its users. Except as necessary to provide the Service to the Customer, The Customer shall not convey any protected health information (“PHI”) to AT&T, as that term is defined in the Health Insurance Portability and Accountability Act (“HIPAA”) and the Health Information Technology for Economic and Clinical Health (“HITECH”) Act regulations. Motorola and/or AT&T shall not function as the Customer’s business associate in rendering the Services; such Services will be limited to providing conduit or mere data transmission services to the Customer in accordance with guidance on the “conduit exception” under HIPAA. Each Party shall bear its own costs associated with regulatory compliance.

Audits. Customer may be subject to occasional audits by AT&T or its agents to verify compliance with this Exhibit A.

AIS - Artificial Intelligence Survey

Ordering Information

General Information

The AI Survey (AIS) application tool is a passive, fast, wideband, cellular signal detection technique.

AIS accelerates the process of detecting and decoding parameters from 10's of minutes to 10's of seconds by prioritizing the

frequency 'search space' with ~99% precision.

Features

- Deep learning signal identification algorithm
- Surveys all technologies/bands in less than 5 minutes
- Survey range is user defined
- Leverages current generation SDR platform capabilities
- Frequency range from 380 MHz to 6000 MHz

Ordering Requirements

For ordering information please send an email to: BuyAT@MotorolaSolutions.com.

Configuration

Main Model

Description	Nomenclature	Price
AIS Upgrade	FDKT00338	\$30,000
AIS Software	FSFW00077	\$25,000

The AIS Upgrade contains the AIS SW, splitter, antennas, web browser device, and cables required for operation. The AIS Software contains the software CD.

Software & Services

Warranty

LIMITED WARRANTY

Motorola warrants the Product against significant defects in material and workmanship under normal use and service for a period of sixty (60) calendar days from the date of shipment from Motorola. Motorola, at its option, will at no charge, either repair the Product (with new or reconditioned parts), replace it with the same or equivalent Product (using new or reconditioned Product), or refund the purchase price of the Product for significant defects identified during the warranty period provided Motorola is notified of such significant defects no later than 14 calendar days after the expiration of the warranty period according to the terms of this warranty. Repaired or replaced Product is warranted for the balance of the original applicable warranty period. All replaced parts of the Product shall become the property of Motorola.

This warranty sets forth the full extent of Motorola's responsibilities regarding the Product. Repair, replacement or refund of the purchase price, at Motorola's option, is the exclusive remedy. THIS WARRANTY IS GIVEN IN LIEU OF ALL OTHER EXPRESS WARRANTIES. MOTOROLA DISCLAIMS ALL OTHER WARRANTIES OR CONDITIONS, EXPRESS OR IMPLIED, INCLUDING THE IMPLIED WARRANTIES OR CONDITIONS OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. IN NO EVENT SHALL MOTOROLA BE LIABLE FOR DAMAGES IN EXCESS OF THE PURCHASE PRICE OF THE PRODUCT, FOR ANY LOSS OF USE, LOSS OF TIME, INCONVENIENCE, COMMERCIAL LOSS, LOST PROFITS OR LOST SAVINGS OR OTHER INCIDENTAL, SPECIAL, INDIRECT OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE SUCH PRODUCT, TO THE FULL EXTENT SUCH MAY BE

DISCLAIMED BY LAW.

Project 25 (P25) standard-based MCC 7500 IP Dispatch Console

Features

All MCC 7500 Dispatch Consoles include the following features:

System Level Features

- Seamless IP Connectivity with Radio System
- Full Participation in Radio System Fault Management
- Compatible with MKM 7000 Console Alias Manager
- Configured via Radio System Configuration Manager
- Full Participation in Radio System Agency Partitioning
- Full Participation in Radio System Dynamic System Resilience (DSR)

ASTRO 25 Trunking Features

- Full Access to ASTRO 25 Trunked Radio

General Console Features

- Intuitive, Easy-to-Use Graphical User Interfaces (Elite or IED)
- Up to 8 Speakers
- Desk Microphone
- Instant Recall Recorder Port for Radio Audio
- Local Logging Recorder Port
- General Transmit
- Select/Unselect
- 15 Customizable Alert Tones (Trunking & Conventional)
- VU Meter (On Screen)

- System
- Patch (Standard & Permanent)
- Full Support for Project 25 FDMA (Phase I) Operation
- ACIM Link to Console
- Trunked Talk Group Calls
- Elite GUI is Highly Configurable to meet Unique Customer Needs
- Trunked Private Calls
- Up to 2 Headsets
- Trunked Emergency Alarms
- Footswitch
- Trunked Tactical/Normal
- Instant Recall Recorder Port for Console Telephony Audio
- Trunked Remote Monitor
- Telephone Headset Port (for radio & telephone on one headset)
- IMBE/AMBE Vocoder for ASTRO 25 Resources
- Instant Transmit
- Full Support for Project 25 TDMA (Phase II) Operation
- Multi-Select
- Trunked Announcement Group Calls
- Channel Marker (Trunking & Conventional)
- Trunked Call Alerts
- Integrated Tone Paging Encoder
- Trunked Emergency Calls
- Generic Auxiliary Inputs & Outputs
- Trunked Repeater On/Off
- Trunked PTT ID and Alias

ASTRO 25 Conventional Features

- PTT ID and Alias
- Emergency Alarm and Call
- Voice Selective Call
- Secure Key Select
- Received Key Display
- Momentary Key Override
- Radio Status Display
- Radio Message Display
- Remote Monitor
- Call Alert
- Mixed Mode (Analog/Digital) Operation
- Secure Call
- Secure Keypad Select
- Manual Individual Pages
- Manual Group Pages
- Sequential Paging Operation
- Quick Page Buttons
- PL Stripping
- Quick Call II B - Tone & Voice
- Quick Call II D - Battery Saver
- Quick Call I
- Touch Code
- Single Tone 0.5
- Digital Dial 1 (1500 Hz)
- Digital Dial 3 (1500/2805)
- ASTRO 25 Conventional Call Alert
- Pre-Defined Individual Pages

Integrated Tone Paging Encoder Features

- Autokey Key Display
- Radio Enable/Disable
- Radio Status Request
- Radio Check
- Ignore Mobile to Mobile Calls

MDC 1200 Conventional Features

- PTT ID and Alias
- Emergency Alarm
- Voice Selective Call
- Radio Status Display
- Radio Message Display
- Remote Monitor
- Call Alert
- Emergency Call
- Radio Enable/Disable
- Radio Status Request
- Radio Check
- Ignore Mobile to Mobile Calls

Analog Conventional Features

- Tone Remote Control
- Analog Talk & Listen
- Private Line (PL) Selection
- Wild Card I & II
- Monitor
- Supervisor Takeover (via Relay)
- RF Cross Mute
- E & M Control
- Frequency Selection
- Repeater On/Off

- Pre-Defined Group Pages
- Simultaneous Paging Operation
- Talk Extend
- "Selected Channel" Paging
- Quick Call II C - Tone Only
- Quick Call II E - Competitive
- Knox
- Motorola 5/6 Tone
- Single Tone 1.5
- Digital Dial 2 (2805 Hz)
- Trunked Call Alert
- MDC 1200 Call Alert

Enhanced Console Telephony Features

- Supports POTS and/or E1/T1 Connections
- Dialing Keypad
- Caller ID
- Call Forwarding
- Speed Dials
- Patch Radio & Telephone
- Answer/Initiate Calls from Console GUI
- Configurable Ring Tones
- Call Hold
- Call Transfer
- Phone Books
- Patch Go-Ahead Tones

VPM Features

- Supports up to 8 Speakers
- Supports one Desktop Microphone

- Mute Second Receiver
- Line Operated Busy Light (LOBL)
- Main/Alternate Conventional Interfaces
- RF Cross Busy
- Telephone Headset Port (for radio & telephone on one headset)
- Instant Recall Recorder Port for Console Telephony Audio
- Local Logging Recorder Port

General Secure Features

- Supports up to 60 Encrypted Calls Simultaneously
- AES Algorithm
- DES-XL Algorithm
- DVP-XL Algorithm
- Multi-Select Cross-Mode Alert
- Receive Cross-Mode Indication
- Key Management via KVL
- Key Management via OTEK (Over The Ethernet Keying)
- Supports up to 6 Encryption Algorithms Simultaneously
- DES-OFB Algorithm
- ADP Algorithm
- DVI-XL Algorithm
- Patch Cross-Mode Alert
- Clear Audio Alert
- Key Management via Store and Forward (KMF with KVL)
- Supports up to 2 Headsets
- Supports one Footswitch
- Dedicated Private Auxiliary Inputs & Outputs
- Instant Recall Recorder Port for Radio Audio
- External Paging Encoder Port
- Multiple Mounting Options

Ordering Requirements

Supported Ordering Systems

1. This equipment is ordered directly in COF or OMAR. Note that no checking of the design itself is done in COF or OMAR.
2. Motorola On-Line may not be used to order complete console systems.

Don't Forget These Items for Each Dispatch Console

1. VPM, Speaker, Microphone, Headset Jack

2. AC Line Cords
3. Monitor
4. Software License

Also includes 1 keyboard, 1 optical mouse, 2 DisplayPort to DVI adapters, 2 DisplayPort to VGA adapters and 1 MOSI CD.</p> <p>NOTE: THE Z440 WORKSTATION WITH WINDOWS 7 IS NOT COMPATIBLE WITH A7.17 SYSTEMS AND IS NOT RETURNABLE (REALLY!!)</p>	TT2833	708	\$2,950.00
<p>Z440 WORKSTATION WINDOWS 10 IOT ENT (NON RETURNABLE)</p> <p>Provides one HP Z440 computer with Windows 10 Enterprise LTSB 2015 64 bit. Also includes 1 keyboard, 1 optical mouse, 2 DisplayPort to DVI adapters, 2 DisplayPort to VGA adapters and disk(s) to allow for rebuild / recovery of your PC if ever needed.</p> <p>NOTE THE Z440 WORKSTATION WITH WINDOWS 10 IS REQUIRED FOR A7.17 SYSTEMS AND IS NOT RETURNABLE (REALLY!!).</p>	TT3106	708	\$3,500.00

VPM

<p>MOTOROLA VOICE PROCESSOR MODULE</p> <p>Provides one Voice Processor Module</p>	B1933	443	\$11,920.00
---	-------	-----	-------------

(VPM) unit for an MCC 7500 console.

Requires appropriate software license option (CA01642AA or CA00288AB) and AC line cord option (CA00140AA, AB, AC or AF).

When ordered for a secure-capable MCC 7500 console, also requires the CA0147AF Secure Operation License option and at least one encryption algorithm.

Software Items

Description	Nomenclature	APC	Price
MCC 7500 ASTRO 25 SOFTWARE Provides a CD ROM containing the application software for the MCC 7500 dispatch console and MCC 7500 Archiving Interface Server. Does NOT include the licenses required to use the software. Licenses can be purchased by using - CA01642AAB or CA00288AB with the B1933	B1905	443	\$250.00

Note: The B1925 is no longer used to order the SDK for the MCC 7500 Dispatch API. Please see the "Dispatch API Software Development Kit" section above for information on how to obtain the SDK.

Important Notice About Motorola Solutions Software Support Policy

In line with the Software Support Policy (SwSP) for ASTRO based system software, orderability rules now include alignment to this Software Support Policy which sets a new framework of three periods of support from Ship Acceptance for that specific release.

The policy provides for a 4-year period of time, referred to as the 'Standard Support' period, during which access to qualified software defect repairs and system expansions for that specific release of system software are provided.

Then there is an additional 3-year period of time, referred to as the 'Extended Support' period, during this time no software defect repair, no system expansions and no Security Update/Monitoring Services support are available for that specific release of system software.

After the 4 + 3 year support periods have expired, the system release enters the 'End of Support' period. At this time, no software defect repair, no system expansions no Security Update/Monitoring Services and no service offerings are available for that specific release of system software.

Customers may choose to upgrade or migrate to a supported release at anytime during their system lifecycle.

Historical milestones, such as the date that a system ships, reaches beneficial use, or achieves final acceptance have no impact on the system software dates of support.

Reminder: Under the new SwSP, system expansions are only allowed in the standard support window for a system release. If your customer desires an expansion that would occur toward the end of the standard support period, it is highly recommended that you have them upgrade/migrate first and then expand their system to ensure the customer receives the full warranty time period.

Additional information can be found here: [Software Support Policy Site](#)

VPM-Based Dispatch Consoles Items

The items which comprise a complete VPM-based dispatch console are available for purchase via the models, options and accessories described below. A combination of these items is required to create a complete VPM-based dispatch console as described in the following paragraphs.

Dispatch Console PC

A VPM-based dispatch console uses a dropship workstation PC together with a VPM. The dropship workstation PC comes with a Windows operating system, keyboard and mouse. It does not include a monitor or Ethernet cable. These items must be ordered separately.

Each PC used with a dispatch console also requires the Symantec Anti-Virus application. [Network Security Price Page](#)

Note that the PC ships with a North American AC line cord.

VPM and Licenses

When used with a MCC 7500 dispatch console, the VPM requires a *MCC 7500 Basic Console Functionality Software License* (CA01642AA) and one of the AC line cord options (CA00140AA, AB, AC, AF or AG).

The basic console functionality software license grants the customer the right to use the features supported by the dispatch console application software except for the features covered by the following licenses. Note that it also includes the right to use the API portion of the software.

Depending on the features desired on the dispatch console, one or more of the following license options may also have to be ordered with the VPM.

- *ADD: MCC 7500 Trunking Operation License* (CA01643AA) - This option is required if the dispatch console will be used to control ASTRO 25 trunking resources, SmartZone trunking resources (via a SmartX site converter) or SMARTNET trunking resources (via a SmartX site converter).
- *ADD: MCC 7500 Advanced Conventional Operation License* (CA01644AA) - This option is required if the dispatch console will be used to control ASTRO 25 conventional channels, MDC 1200 channels and/or consolettes connected via ACIM Link.
- *ADD: MCC 7500 Inbound Event Display (IED) License* (CA01645AA) - This option is required if the dispatch console will use the Inbound Event Display (IED) graphical user interface.
- *ADD: MCC 7500 Enhanced Console Telephony Operation License* (CA02073AA) - This

option is required if the dispatch console will use any of the enhanced console telephony features.

- *ADD: MCC 7500 Advanced SECURENET Operation License (CA01972AA)* - This option is required if the dispatch console will be used to control Advanced SECURENET channels.

The VPM does not include the following items. These must be ordered separately if required.

- Speakers
- Desktop Microphone
- Headset Jacks
- Footswitch
- Ethernet Cable

Secure Options

The VPM is capable of supporting up to 6 different encryption algorithms simultaneously. When secure operation is desired, order the *ADD: MCC 7500 Secure Operation License* option (CA00147AF) and from 1 to 6 encryption algorithm options (CA00143AC, CA00144AC, CA00145AC, CA00146AC, CA00182AB or CA00245AA).

A particular type of encryption algorithm may only be ordered once with a particular VPM. That is, up to 6 algorithms may be ordered with a VPM, but they must all be different algorithms.

If remote secure key management across the radio system's IP network from a KMF is desired, order the *ADD: Over The Ethernet Keying (OTEK) Operation License* option (CA01220AA).

The TKN8531C cable is used to connect a KVL to a VPM for programming/managing secure key material.

"The Peripherals"

The peripherals are the items which provide interfaces between the VPM and the external environment. These are:

- Speaker (B1912) - Max of 8 per VPM
- Desktop Microphone (B1914) - Max of 1 per VPM
- Headset Jack (B1913) - Max of 2 per VPM
- Footswitch (DSTWIN6328A) - Max of 1 per VPM

The speakers, microphone, headset jacks and footswitch are optional depending on the customer's needs.

Each MCC 7500 dispatch console requires 1 and only 1 VPM.

The VPM is 1 Rack Unit high and is capable of being mounted in a 19" rack. It may also be mounted beneath a writing surface or placed on top of a writing surface. Mounting hardware is included with the VPM.

Each VPM requires an AC line cord option (CA00140AA, AB, AC, AF or AG).

Ordering information for the VPM is provided in the Models, Options and Accessories sections below. The price page for the rest of the peripherals may be found by clicking on

this link: [Peripheral Devices Price Page](#)

Dual Instant Recall Recorder (IRR)

The dual IRR is compatible with VPM-based dispatch consoles. The dual IRR is capable of recording and playing back the audio from two different sources (e.g., radio and telephone), but may be used to record a single source if desired. If the IRR will be used to record the audio from only one source, the sound card does not need to be ordered. If the IRR will be used to record the audio from two sources, the sound card must be ordered. Only one set of PC speakers needs to be ordered regardless of whether the IRR is recording one or two sources of audio.

Please refer to the [IRR Price Page](#) for information about ordering IRRs for use with MCC 7500 consoles.

Dropship Items

The following dropship items are compatible with VPM-based dispatch consoles. The dropship items are accessories which are not manufactured by Motorola. These include:

- Monitor [Monitor Price Page](#)
- Trackball (See Accessories section below)
- Ethernet Cable [Ethernet Cable Price Page](#)
- Headset [Peripheral Devices Price Page](#)
- Dual IRR [IRR Price Page](#)

Note: Headsets certified for use with the MCC 7500 dispatch console are only available from Motorola. While other headsets may work, Motorola cannot guarantee the quality of the audio, especially dispatcher transmit audio, if they are used.

Order the desired dropship items for each dispatch console. Use the links next to the items above to see the ECAT Pages for them. They may also be ordered for use as spares.

Enhanced Console Telephony Media Gateways

Two versions of the media gateway are available.

- The DDN1405 *Media Gateway with 8 FXO Ports* provides a media gateway with 8 analog POTS line ports. The gateway allows up to 50 dispatch positions to access the phone lines.
- The DDN1404 *Media Gateway with 2 E1/T1 Ports* provides a media gateway with 2 E1/T1 ports. The gateway allows up to 100 dispatch positions to access the phone lines.

The E1/T1 version can support up to 60 phone calls when using the E1 ports and up to 48 phone calls when using the T1 ports.

Multiple media gateways can be used to increase the capacity if needed. Up to two media gateways can be located at a console site and up to 63 media gateways can be supported in a zone.

Field Replaceable Units (FRUs)

The following items are available directly from the Radio Products and Services Division (RPSD, formerly AAD). None of these items can be ordered in COF; they must be ordered directly from RPSD. Also see the circuit board FRUs listed in the Accessories section at the bottom of this page.

- 3085322Y01 - H.100 Cable (connects voice card and secure card together; one required per dispatch position)
- 0785669Y01 - Secure Card Support Bracket (used to support the secure card inside the PC; one required per secure card)
- 0310943J15 - Support Bracket Screws (used to fasten the support bracket to the PC chassis, two required per support bracket)
- 3082534Y18 - VPM/GPIOM to Speaker Cable
- 3071113H01 - VPM/GPIOM to Headset Jack Permanent Cable
- 3071114H01 - VPM/GPIOM to Headset Jack Extension Cable
- 0183734Y01 - VPM/GPIOM to Microphone Cable
- 3085550Y02 - GPIOM to Voice Card Cable
- 01009513004 - VPM/GPIOM Power Supply (w/o DC cable or AC line cord, not orderable in COF)**
- 30009351001 - VPM/GPIOM DC Power Cable (connects 01009513001 power supply to VPM or GPIOM)**
- 3082933N08 - AC Line Cord (North American)
- 3082933N13 - AC Line Cord (UK)
- 3082933N09 - AC Line Cord (Continental European)
- 3508800G96 - Microphone Wind Screen
- 3684434Y01 - Speaker Volume Knob
- 60009256001 - Secure Key Retention Battery (for VPM, not orderable in COF)
- 0310907A98 - Screws for VPM Rack Mounting Bracket (two screws required for each bracket)
- 0771936H01 - VPM Rack Mounting Bracket (two brackets required for each VPM)

The following are FRUs for the enhanced console telephony media gateways

- 01009704002 - Fan module for 2911
- 01009704003 - AC Power Supply
- 01009704004 - Fan module for 2921
- 01009704005 - 2-Port 3rd Gen Multiflex Trunk Voice/WAN Card – T1/E1
- 01009704006 - VIC2-4FXO Four-Port Voice Interface
- 01009704007 - 16-channel High-density voice and video DSP module
- 01009704008 - 512MB DRAM module
- 01009704009 - 2921/2951 AC Power Supply
- 01009704010 - 256MB Compact Flash

** Note that the 0183650Y03 GPIOM/VPM Power Supply has been replaced with a Level V energy efficiency compliant model. The 0183650Y03 power supply has a non-detachable DC power cable, but the new supply has a detachable DC power cable. Please order both the 01009513004 Power Supply and 30009351001 DC Power Cable when replacing a 0183650Y03.

The various board-level FRUs for the MCC 7500 dispatch console are orderable via the accessory numbers shown below.

Manuals

The various manuals for the MCC 7500 dispatch console are included in the ASTRO 25 Radio System Documentation Set. The individual manuals (or the complete documentation set) can be downloaded from the [ASTRO 25 Documentation Web Site](#).

MCC 7500 Product Planner and Ordering Guide

The MCC 7500 Product Planner and Ordering Guide is available on the [High Tier Consoles wiki page](#).

Programming Cables

CABLE FOR RNC, DIU MGEG Keyloading cable for APX 7500, XTL 5000, XTL 2500, and ASTRO Spectra. Correct keyloading cable adaptor must be ordered seperately: -HKN6182 for APX 7500, XTL 5000 (O series control head), and XTL 2500. -TRN7414 for XTL 5000 (W series control head) and ASTRO Spectra.	TKN8531C	201	\$110.00
--	----------	-----	----------

Field Replacement Units

Note: We've been seeing a significant number of VPM FRUs being returned to the Repair Depot because they don't have the necessary encryption algorithms. Please read the note text under the B1934 below and make sure any required encryption algorithms are ordered when the VPM FRU is ordered.

MCC 7500 VOICE PROCESSOR MODULE FRU Provides the housing and circuit board used	B1934	443	\$11,830.00
---	-------	-----	-------------

for the B1933 VPM. Does not include the power supply, AC power cord, or DC power cord. Each of these items must be ordered separately from RPSD. If secure capability is required, then order the following options with the B1934:

- the secure operation option (CA00147AF)
 - from 1-6 encryption algorithm options
- Order as a main line item.

DESKTOP SPEAKER CIRCUIT BOARD FRU	BLN1275	443	\$180.00
-----------------------------------	---------	-----	----------

Provides the circuit board used in the B1912 speaker. Does not include housing, speaker cone or cables. Order as a main line item.

DESKTOP MIC CIRCUIT BOARD FRU	BLN1276	443	\$38.00
-------------------------------	---------	-----	---------

Provides the circuit board used in the B1914 microphone. Does not include housing, switches, gooseneck shaft, microphone cartridge or cables. Order as a main line item.

HEADSET JACK CIRCUIT BOARD FRU	BLN1277	443	\$114.00
--------------------------------	---------	-----	----------

Provides the circuit board used in the B1913 headset jack. Does not include housing, PJ7 connectors or cables. Order as a main line item.

SHIELD,VPM SHIELD KIT	BLN1324	443	\$0.00
-----------------------	---------	-----	--------

Provides one complete shield kit to replace the encryption engine shields on a Voice Processor Unit (VPM). Instructions for replacing the shields are also provided. When ordering, divide the quantity needed into multiple lines so that no line contains more than 9 BLN1324's.

For example, if 30 kits are needed, create 3 lines of 9 each and 1 line of 3.

COMPUTER, Z440 WORKSTATION WINDOWS 7 (NON RETURNABLE)	TT2833	708	\$2,950.00
--	--------	-----	------------

Provides one HP Z440 computer with 64 bit Windows 7. Also includes 1 keyboard, 1 optical mouse, 2 DisplayPort to DVI adapters, 2 DisplayPort to VGA adapters and 1 MOSI CD.

NOTE: THE Z440 WORKSTATION WITH WINDOWS 7 IS NOT COMPATIBLE WITH A7.17 SYSTEMS AND IS NOT RETURNABLE (REALLY!!)

Z440 WORKSTATION WINDOWS 10 IOT ENT (NON RETURNABLE)	TT3106	708	\$3,500.00
---	--------	-----	------------

Provides one HP Z440 computer with Windows 10 Enterprise LTSB 2015 64 bit. Also includes 1 keyboard, 1 optical mouse, 2 DisplayPort to DVI adapters, 2 DisplayPort to

VGA adapters and disk(s) to allow for rebuild / recovery of your PC if ever needed.

NOTE THE Z440 WORKSTATION WITH WINDOWS 10 IS REQUIRED FOR A7.17 SYSTEMS AND IS NOT RETURNABLE (REALLY!!).

Algorithm Upgrades/Field-Adds

MCC 7500 SECURE VPM ALGORITHM UPGRADE FOR KVL 4000	T8063	443	\$250.00
---	-------	-----	----------

Provides a CD that is used to add new algorithms to existing Telephone Media Gateways (TMGs), VPM-based MCC 7500 consoles and VPM-based AISs. Also used to upgrade existing algorithms in existing VPM-based MCC 7500 consoles or AISs. Requires sufficient algorithm options to cover every added/upgraded algorithm in every console or AIS that is affected. The CD is only compatible with the KVL 4000 Key Variable Loader. The serial number of the KVL 4000 keyloader is required to be entered into the ordering system when ordering the T8063. Order as a main line item.

Data Compiled 04-Jan-2017 using DUP and all prices in USD

Options

Software License

Description	Nomenclature	APC	Price
ADD: MCC 7500 BASIC CONSOLE FUNCTIONALITY SOFTWARE LICENSE Provides a license for using the MCC 7500 Dispatch Console Software. A software license is required for each dispatch position being ordered. Covers basic console features such as non-signaling analog conventional, patch, multi-select, paging, aux i/os, alert tones, channel marker, using the API, etc. Order as a sub-item to the B1933.	CA01642AA	443	\$12,000.00

Upgrade Software Licenses

ADD: MCC 7500 DISPATCH CONSOLE SOFTWARE REFRESH LICENSE	CA00899AA	443	\$3,000.00
---	-----------	-----	------------

Provides a license for upgrading to the latest version of the MCC 7500 Dispatch Console Software. One is required for each dispatch console being upgraded. Order as a sub-item to the B1905.

ADD: MCC 7500 AIS SOFTWARE REFRESH LICENSE	CA00900AA	443	\$2,700.00
--	-----------	-----	------------

Provides a license for upgrading to the latest version of the MCC 7500 AIS Software. One is required for each AIS being upgraded. Order as a sub-item to the B1905.

Trunking & Advanced Conventional Operation

ADD: MCC 7500 / MCC 7100 TRUNKING OPERATION	CA01643AA	443	\$5,000.00
---	-----------	-----	------------

Required when the MCC 7500 or MCC 7100 dispatch position is used to control trunking resources (ASTRO 25, SmartZone via SmartX or SMARTNET via SmartX). Order as a sub-item to the B1933 for MCC 7500 and as a sub-item to B1939 for MCC 7100.

ADD: MCC 7500 /MCC 7100 ADV CONVL OPERATION	CA01644AA	443	\$3,000.00
---	-----------	-----	------------

Required when the MCC 7500 or MCC 7100 dispatch position is used to control ASTRO 25 conventional channels, MDC 1200 channels or ACIM Link channels. Order as a sub-item to the B1933 for MCC 7500 and as a sub-item to the B1939 for MCC 7100.

Advanced SECURENET Operation

ADD: ADVANCED SECURENET OPERATION	CA01972AA	443	\$50,000.00
-----------------------------------	-----------	-----	-------------

Required when the MCC 7500 dispatch position is used to control Advanced SECURENET resources (Conventional channels using an Advanced SECURENET CIU device). Order as a sub-item to the B1933.

Secure Operation

ADD: MCC 7500 SECURE OPERATION	CA00147AF	443	\$3,250.00
Order when secure capabilities are required in a VPM-based dispatch console or AIS. Order as a sub-item to the B1933.			
ADD: MCC 7500 / MCC 7100 OTEK OPERATION	CA01220AA	443	\$3,350.00
Order when remote key management capabilities are required on a VPM-based dispatch console or AIS. Order as a sub-item to the B1933 for MCC 7500. Note that OTEK does not support the ADP encryption algorithm.			

Secure Algorithms

ADD: DES-OFB ALGORITHM	CA00143AC	443	\$750.00
Provides factory programming for the DES-OFB encryption algorithm. Order as a sub-item to the appropriate MGEG, MCC 7500 Dispatch Console, MCC 7500 Archiving Interface Server, VPM FRU or Secure Card FRU model.			
ADD: DES-XL ALGORITHM	CA00144AC	443	\$750.00
Provides factory programming for the DES-XL encryption algorithm. Order as a sub-item to the appropriate MGEG, MCC 7500 Dispatch Console, MCC 7500 Archiving Interface Server or VPM FRU.			
ADD: DVI-XL ALGORITHM	CA00145AC	443	\$750.00
Provides factory programming for the DVI-XL encryption algorithm. Order as a sub-item to the appropriate MGEG, MCC 7500 Dispatch Console, MCC 7500 Archiving Interface Server, VPM FRU or Secure Card FRU model.			
ADD: DVP-XL ALGORITHM	CA00146AC	443	\$750.00
Provides factory programming for the DVP-XL encryption algorithm. Order as a sub-item to the appropriate MGEG, MCC 7500 Dispatch Console, MCC 7500 Archiving Interface Server or VPM FRU model.			
ADD: AES ALGORITHM	CA00182AB	443	\$750.00
Provides factory programming for the AES encryption algorithm. Order as a sub-item to the appropriate MGEG, MCC 7500 Dispatch Console, MCC 7500 Archiving Interface			

Server, VPM FRU or Secure Card FRU model.

ADD: ADP ALGORITHM CA00245AA 443 \$300.00

Provides factory programming for the ADP encryption algorithm. Order as a sub-item to the appropriate MGEG, MCC 7500 Dispatch Console, MCC 7500 Archiving Interface Server, VPM FRU or Secure Card FRU model.

Inbound Event Display GUI

ADD: MCC 7500/MCC 7100 IED OPERATION CA01645AA 443 \$4,200.00

Required when the MCC 7500 or MCC 7100 dispatch position uses the Inbound Event Display GUI. Order as a sub-item to the B1933 for MCC 7500 and as a sub-item to the B1939 for MCC 7100

Enhanced Console Telephony

ADD: MCC 7500 Enhanced Console Telephony Operation License CA02073AA 443 \$1,200.00

Required when the MCC 7500 dispatch position is used to control enhanced console telephony phone lines. Order as a sub-item to the B1933.

Power Cords

ADD: AC LINE CORD, NORTH AMERICAN CA00140AA 443 \$0.00

Adds one AC line cord with a North American plug.

ADD: AC LINE CORD, EUROPEAN CA00140AB 443 \$0.00

Adds one AC line cord with a continental European plug (Schuko plug).

ADD: AC LINE CORD, UK CA00140AC 443 \$0.00

Adds one AC line cord with a United Kingdom plug.

ADD: AC LINE CORD, AUSTRALIA CA00140AF 277 \$0.00

Adds one AC line cord with an Australian plug.

ADD: AC LINE CORD, BRAZIL CA00140AG 277 \$0.00

Adds one AC line cord with a Brazilian plug.

API Technical Support

FIELD ADD MCC 7500 SDK TECHNICAL SUPPORT	QLN3437	443	\$1,000.00
--	---------	-----	------------

Provides one hour of technical support for the SDK from the factory. May be ordered multiple times if more than one hour of support is required. May be ordered to add additional technical support for software developers who are already using the SDK. Note that this is a billable item only (BB item) and must be ordered by itself on its own order.

Software & Services

Software and Software Refresh Items

The software used on the dispatch console is available for purchase via the model and options shown below. The *MCC 7500 ASTRO 25 Software* (B1905) is a CD which contains the application software for both the dispatch console and the archiving interface server. The two refresh license options (CA00899AA and CA00900AA) provide licenses for using new versions of the dispatch console or archiving interface server software.

These items may be used in the following scenarios.

Buying a New Console System

The dispatch consoles and archiving interface servers come with the appropriate software installed on their computer hard disks, but they do not come with a copy of the software on CD or DVD. It is strongly suggested that at least one *MCC 7500 ASTRO 25 Software* model (B1905) be ordered for each console system as a backup copy.

It is not necessary to order either of the software refresh license options when buying a new console system. They are used when upgrading an existing console system.

Upgrading an Existing MCC 7500 Console System

Upgrade an existing Motorola MCC 7500 console system to the latest version of software as follows.

- Order the desired number of *MCC 7500 ASTRO 25 Software* models (B1905) (at least one is required, but more may be ordered if the customer wants them)
- Order one *ADD: Dispatch Console Software Refresh License* option (CA00899AA) for each dispatch console being upgraded
- Order one *ADD: Archiving Interface Server Software Refresh License* option (CA00900AA) for each archiving interface server being upgraded

The two software refresh license options provide licenses for using the new versions of the dispatch console or archiving interface server software. They must be ordered as sub-items to the *MCC 7500 ASTRO 25 Software* model. The quantities of the software refresh license

options may (and most likely will) exceed the quantity of the main model.

Note that the version of software used in the dispatch consoles and AISs must match the versions of software in all the other products in the radio system (zone controller, network manager, CCGWs, Aux I/O servers, etc.). It is usually not possible to upgrade just the dispatch consoles and AISs themselves.

Buying Additional Copies of the Software

If a customer wishes to have additional copies of the dispatch console or archiving interface server software, then the *MCC 7500 ASTRO 25 Software* model (B1905) may be ordered by itself.

Adding Operational Licenses to Fielded Dispatch Consoles and AISs

The following licenses are for use with fielded MCC 7500 dispatch consoles and archiving interface servers. The BLN1316 and BLN1317 are used only with customers who are either converting a SmartX Site Converter VPM into a MCC 7500 VPM or who are using FRUs to build a MCC 7500 dispatch console or archiving interface server. The rest of the licenses are used when adding the indicated functionality to a fielded dispatch console or archiving interface server, when converting a SmartX Site Converter VPM into a MCC 7500 VPM or when using FRUs to build a MCC 7500 dispatch console or archiving interface server.

Note that the CA01221AA and CA01221AB options are the equivalent of the BLN1316 + BLN1311 + BLN1312, so these do not need to be ordered if the CA01221AA or CA01221AB was ordered with the original dispatch console.

Note also that the CA00288AA and CA00288AB options are the equivalent of the BLN1317, so it does not need to be ordered if the CA00288AA or CA00288AB was ordered with the original archiving interface server.

Adding Basic Dispatch Operation to a Dispatch Console being built from a Converted SmartX VPM or a VPM FRU

Field-assembled VPM-based dispatch consoles can add the licensing for basic console operation by ordering the *Basic Console Operation Field-Add License* (BLN1316) for each dispatch console being assembled in the field.

Adding AIS Software License to an AIS being built from a Converted SmartX VPM or a VPM FRU

Field-assembled VPM-based archiving interface servers can add the AIS license by ordering the *AIS Software Field-Add License* (BLN1317) for each archiving interface server being assembled in the field.

Adding Secure Operation

Existing dispatch consoles and archiving interface servers can add the licensing for secure operation by ordering the *Secure Operation Field-Add License* (BLN1304) for each dispatch console and/or archiving interface server that needs the feature. Note that this license does not provide any required hardware or encryption algorithms. They must be ordered separately.

Adding OTEK Operation

MCC 7500 dispatch consoles and archiving interface servers can support Over the Ethernet

Keying (OTEK) operation beginning in the 7.7 system release. Existing systems that are 7.7 or later can add the licensing for OTEK operation by ordering the *Over the Ethernet Keying (OTEK) Operation Field-Add License* (BLN1302) for each dispatch console and/or archiving interface server that needs the feature.

Adding Trunking Operation

Existing dispatch consoles can add the licensing for trunking operation by ordering the *MCC 7500 Trunking Operation Field-Add License* (BLN1311) for each dispatch console that needs the feature.

Adding Advanced Conventional Operation

Existing dispatch consoles can add the licensing for advanced conventional operation by ordering the *MCC 7500 Advanced Conventional Operation Field-Add License* (BLN1312) for each dispatch console that needs the feature.

Adding Inbound Event Display Operation

Existing dispatch consoles can add the licensing for IED operation by ordering the *MCC 7500 Inbound Event Display (IED) Operation Field-Add License* (BLN1313) for each dispatch console that needs the feature.

Adding or Upgrading Encryption Algorithms on VPM-Based Dispatch Consoles and AISs using a KVL 3000 Plus

Due to obsolete part issues, it is no longer possible to use KVL 3000 Plus KVLs to add algorithms to MCC 7500 consoles. A KVL 4000 KVL must be used. Please see the following section.

Adding or Upgrading Encryption Algorithms on VPM-Based Dispatch Consoles and AISs using a KVL 4000

If a customer wishes to add new encryption algorithms to existing secure-capable VPM-based MCC 7500 dispatch consoles and/or archiving interface servers using a KVL 4000 KVL, the *MCC 7500 VPM Secure Algorithm Upgrade for KVL 4000* (T8063) should be ordered along with the desired algorithm options. This provides a CD containing the desired numbers and types of encryption algorithms. The CD is then used in conjunction with a KVL 4000 Key Variable Loader (KVL) to add the algorithms to secure cards. The KVL 4000 keyloader must have at least the R02.05.03 (also listed as 1.3.0000.174) version of software to be able to load algorithms in VPMs.

Note: The serial number of the KVL 4000 keyloader must be entered into the ordering system when ordering the T8063. This serial number will be loaded on the CD by the factory. The CD can only be used by the keyloader with the matching serial number.

The *MCC 7500 VPM Secure Algorithm Upgrade* may also be used to upgrade encryption algorithms to the latest versions in existing secure-capable VPM-based MCC 7500 dispatch consoles and/or archiving interface servers.

Order one algorithm option for each VPM that is being upgraded. For example, to add the ADP algorithm to three VPMs, order one T8063 with three CA00245AA options.

Multiple types of algorithm options may not be ordered on the same T8063. For example, to add the DES-OFB and AES algorithms to twenty-four VPMs, order two T8063s with twenty-

four CA00143AC options on one and twenty-four CA00182AB options on the other.

The T8063 can support up to 100 copies of any single algorithm option.

When adding algorithms to a VPM on a 7.7 system, make sure the VPM has the 7.7 SER or later version of software (VPM_R7.7.00.23). Earlier versions of the 7.7 VPM software do not allow algorithms to be added in the field. Contact Upgrade Operations to obtain the 7.7 SER software. VPMs on 7.8 and later systems do not have any special software version requirements.

Dispatch API Software Development Kit

The Software Development Kit (SDK) for the MCC 7500 Dispatch API requires a license agreement to be executed between the software developer and Motorola Solutions. The license agreement, and instructions for completing it, can be found on the [MCC 7500 wiki page](#). After the license agreement has been signed by both parties, an invoice will be issued for payment of the license fee (\$5000.00). After payment has been received, the SDK will be shipped to the developer. The B1925 is no longer used to order the SDK. **Please note that the licensing process typically takes around 8 weeks to complete. Please plan accordingly.**

The SDK is required when a customer wishes to use the MCC 7500 Dispatch API to allow 3rd party software to communicate with the MCC 7500 dispatch console or if they wish to use a custom graphical user interface (GUI) on the dispatch console.

The right to use the Dispatch API is covered by the console software license (CA01221AA, CA01221AB, CA01222AA or CA01642AA) which must be purchased with each dispatch console, so no additional licenses are required.

Technical support for the SDK may be ordered using the QLN3437 *Field Add MCC 7500 SDK Technical Support* which provides one hour of technical support. Multiple quantities of the QLN3437 may be ordered if more than one hour of support is desired. The QLN3437 is a "billing only" item (a BB item) and therefore must be on a factory order by itself.

Note that if the QLN3437 is not ordered, no plant technical support will be provided for the software developers using the SDK.

ASTRO 25 Edge Availability Ordering Information

Ordering Information

Overview

The Edge Availability architecture will increase the resiliency of ASTRO 25 Trunking systems by adding a new fallback feature. If a failure occurs at the Master Site, or with the links to the Master Site, Edge Availability will pass call control outward from the central core to the edges. Control at the edge will maintain trunking Voice operations to regional users by enhancing the Site Trunking fallback mode. Data and Network Management applications will not be available during this fallback mode. The regional dispatch and RF sites utilizing Edge Availability will benefit from:

- Multi-site voice operation across local RF and dispatch sites
- Talkgroup roaming across local RF sites
- Wireline dispatch capability providing emergency alarm with aliases, console priority, and access to all talkgroups without using control stations
- Same talkgroup/user access control for site registrations as in normal wide-area mode

Typical fallback modes for when the Master Site is compromised, like Site Trunking, cause the Dispatch and RF sites to become isolated from the rest of the system. Users who typically operate within a subset of the overall radio system's geography can maintain that regional operation during the failure with an Edge subsystem (also referred to as Trunking Sybssystem, or Tsub). Communications with the users outside of the regional area will resume once the Master Site becomes available.

The Edge Availability architecture provides the flexibility to be sized from one to many Edge subsystems within an ASTRO 25 system. Each regional Edge subsystem can include a combination of Dispatch Sites, ASTRO 25 Repeater Sites, and a Simulcast subsystem. The architecture is compatible with Master Site Geographic Redundancy (DSR) and Geographic Redundant Simulcast Prime Sites. Redundant Edge Prime Sites are supported even if there is no Simulcast subsystem.

Ordering Requirements

With the new Edge Availability subsystem architecture, the only new hardware unique to this architecture is an Edge Controller server. The Edge Controller uses a server that is very similar to the Core servers.

If the Edge Availability subsystem contains a Simulcast Cell, the Edge Controller server and software will be the only new equipment. The transport equipment for the Simulcast Prime Site will be utilized as specified for the Prime Site.

If the Edge Availability subsystem only contains ASR Repeater Sites and Dispatch Sites, a physical location will have to be designated as the "Edge Prime Site". The Edge Controller server will be located at this site along with new transport equipment. The transport equipment required is the same as for a Simulcast Prime Site and should be ordered as directed by the System Planner and the Network Transport section of PCAT.

If the Edge subsystem will only contain one Dispatch and one RF site (2 total sites), only the EDGE CONTROLLER BASE SOFTWARE is required. For subsystems with more than 2 total sites the EDGE CONTROLLER MULTI-SITE SOFTWARE is required.

Dynamic Transcoding

Dynamic Transcoding functionality is also an option to the Edge Controller. If the ASTRO 25 system is enabled with Dynamic Transcoding for optimal TDMA/FDMA operations, you may also want to enable Dynamic Transcoding when operating in the Edge Availability subsystem fallback mode. The Dynamic Transcoder option installs the software on the Edge Controller server for use when in the Edge fallback mode, and will allow up to the same number of Transcoded Simultaneous Calls that are licensed in the system, up to a maximum of 100 Simultaneous Calls. The Transcoded Simultaneous Calls license is not required to be purchased again for the Edge Availability subsystem.

Submitting the Order

Personality information is required, just like when ordering a Master Site. **The following information must be included before placing the order:**

1. **System ID.** Four digit hexadecimal number used to uniquely identify a system. For new systems, this will be assigned by the System Engineer using the Trunked Data Repository (TDR) process. Expansions to existing systems will use the existing System ID.
2. **Zone ID.** Number used to uniquely identify each zone in a system. Zone ID will always be 0001 for M1/M2 systems. For M3 systems, values may range from 0001 to 0007.
3. **System Extension ID.** Four digit hexadecimal number, typically 0000. Introduced in 7.15 to address the rare case where a customer has intentionally chosen to use the same system ID across multiple systems. For such rare cases, customers or account teams inputting the order shall provide unique system extension IDs across the systems that have same system ID (e.g. 0001, 0002, etc).
4. **Valid Email Address.** This email will be used to deliver all software licensing entitlements to the customer.

Configuration

Main Model

Description	Full Description	Nomenclature	APC	Price

EDGE CONTROLLER SERVER	Requires CA03120AA, CA03120AB or CA03120AC	SQM01SUM0299	424	\$20,000.00
------------------------	--	--------------	-----	-------------

Options

Order the Base Software option for the specific ASTRO system release (**Required**)

Description	Full Description	Nomenclature	APC	Price
ADD: EDGE CONTROLLER BASE SOFTWARE	Required option for A7.17.x systems. Only supports subsystems with 1 RF Site max. and 1 Dispatch Site max. Includes Gen9 Edge Controller Server.	CA03120AA	877	\$45,000.00
ADD: EDGE CONTROLLER BASE SW A7.18	Required option for A7.18 systems. Only supports subsystems with 1 RF Site max. and 1 Dispatch Site max. Includes Gen10 Edge Controller Server	CA03120AB	877	\$45,000.00
ADD: EDGE CONTROLLER BASE SW 2019.2	Required option for A2019.2 systems. Only supports subsystems with 1 RF Site max. and 1 Dispatch Site max. Includes Gen10 Edge Controller Server	CA03120AC	877	\$45,000.00

If the Edge subsystem will have more than one Dispatch Site or more than one RF Site, then the MULTI-SITE SOFTWARE is also required.

Description	Full Description	Nomenclature	APC	Price
ADD: EDGE CONTROLLER MULTI-SITE SW	For subsystems with more than 1 RF Site or more than 1 Dispatch Site. Base SW (CA03120xx also required.)	CA03121AA	877	\$30,000.00

If Dynamic Transcoding functionality is enabled for the system and is desired when operating in the Edge Availability fallback mode, order the following option based on system release.

Description	Full Description	Nomenclature	APC	Price
	For ASTRO System Release			

ADD: DYNAMIC TRANSCODER	7.17.x (Requires MULTI-SITE SW CA03121AA)	CA03122AA	877	\$20,000.00
ADD: DYNAMIC TRANSCODER A7.18	For ASTRO System Release 7.18. (Requires MULTI-SITE SW CA03121AA)	CA03122AB	877	\$20,000.00
ADD: DYNAMIC TRANSCODER A2019.2+	For ASTRO System Release 2019.2. (Requires MULTI-SITE SW CA03121AA)	CA03122AC	877	\$20,000.00

Mounting Options

Mounting options are available for either a rack or a cabinet.

Description	Full Description	Nomenclature	APC	Price
ADD: LXN 6000 OPEN RACK INSTALL KIT	-	CA03082AA	060	\$115.00
ADD: LXN 6000 CABINET RACKING INSTALL KIT	-	CA03083AA	060	\$20.00

Local Backup for Domain Controllers

Select the NAS below if you would like to be able to locally backup files for the Edge Prime Site DC (e.g., DC logs). This has typically only been a requirement for some of our Federal customers.

Software Add-ons

If you want to add capabilities to an existing Edge Controller Server, start with the following item.

Description	Full Description	Nomenclature	APC	Price
EDGE CONTROLLER SW UPGRADE	-	T8380	877	\$0.00

The following software options can be added to an existing Edge Controller Server.

If the Edge subsystem will have more than one Dispatch Site or more than one RF Site, then the MULTI-SITE SOFTWARE is also required.

Description	Full Description	Nomenclature	APC	Price
ADD: EDGE CONTROLLER	For subsystems with more than 1 RF Site or more than 1			

MULTI-SITE SW	Dispatch Site. Base SW (CA03120xx also required.)	CA03121AA	877	\$30,000.00
---------------	--	-----------	-----	-------------

If Dynamic Transcoding functionality is enabled for the system and is desired when operating in the Edge Availability fallback mode, order the following option.

Description	Full Description	Nomenclature	APC	Price
ADD: DYNAMIC TRANSCODER	For ASTRO System Release 7.17.x (Requires MULTI-SITE SW CA03121AA)	CA03122AA	877	\$20,000.00
ADD: DYNAMIC TRANSCODER A7.18	For ASTRO System Release 7.18. (Requires MULTI-SITE SW CA03121AA)	CA03122AB	877	\$20,000.00
ADD: DYNAMIC TRANSCODER A2019.2+	For ASTRO System Release 2019.2. (Requires MULTI-SITE SW CA03121AA)	CA03122AC	877	\$20,000.00

Spares

Description	Full Description	Nomenclature	APC	Price

ASTRO 25 PDEG ENCRYPTION UNIT

Ordering Information

General Information

The PDEG Encryption Unit is a component of the Encrypted Integrated Data (EID) feature that is located within the Customer Enterprise Network (CEN). The EID feature provides data encryption services for dedicated ASTRO 25 Trunked Integrated Voice and Data applications between the CEN and subscriber radios. The EID feature uses IPsec to provide AES encryption, decryption, and authentication of packet data between each EID enabled subscriber radio and a PDEG Encryption Unit. Using the EID feature, users can secure data sent between CEN applications and the subscriber radio's internal or external applications.

Features

- ASTRO 25 IV&D data transmissions are protected over-the-air and in the Radio Network Infrastructure
- Encrypts, decrypts, and authenticates data traffic entering and leaving the Customer Enterprise Network (CEN) using AES encryption
- FIPS-140-2 level 3 Security
- Centrally managed using an ASTRO 25 Key Management Facility (KMF) server in the CEN

APCO Project 25 Compliant Algorithms

- AES-OFB

FIPS 140-2 Certified Algorithms

- AES-OFB

Further information regarding FIPS 140-2 certification may be found using the following links:

[FIPS 140-2 Crypto Module Validation Program \(CMVP\)](#)

[NIST Cryptographic Module Validation Lists](#)

Ordering Requirements

Ordering a new PDEG Encryption Unit with Encrypted Integrated Data Feature and AES Encryption:

1. Orders for a new PDEG Encryption Unit must first select main hardware model (T7539).
2. Must select at least one (1) RS232 Cable (DLN6693) per PDEG Encryption Unit.
3. Must Select one (1) required AES Encryption Kit (CA00182AT).
4. Must select one (1) required ASTRO 25 Encrypted Integrated Data Operation (CA01483AA)

The following items are shipped with the ASTRO 25 PDEG Encryption Unit Hardware (T7539) :

- 2 Ethernet Cables
- 1 AC Power Supply
- 1 Desk mount hardware

NOTE: A second Unit should be ordered if redundancy is a requirement.

Accessory Information:

Customers must order one TKN9282 Rack Mount Plate for every three PDEG Encryption Units to be installed in a rack or cabinet

Customers must order one TKN9283 Rack Mount Bracket for every six PDEG Encryption Units to be installed in open racks

Customers must order at least one TKN8531C Keyloader Cable for loading encryption keys on Encryption Unit, if utilizing the KVL 3000 Plus.

If spares are required please order an additional unit.

Products, kits, components and software that contain encryption functions or features, and technology related to the development or implementation of encryption functions or features, will generally require an approved export license prior to export. If required, export license approvals will be based on the algorithms involved, the country of final destination and the specific end user. Depending on the location of the entity making the sale and the source location of the encryption items it may be necessary to obtain licensing from more than one country for the same sale. Contact your Local Export Control office if you are unfamiliar with the licensing process or to

discuss any possible licensing restrictions before submitting bids, proposals, or accepting orders for encryption products.

Configuration

Upgrades

An Existing PDEG can be upgraded to the latest software. This is required for ASTRO customers upgrading to A7.16 or higher, who currently have PDEGs purchased prior to A7.16. For upgrade with KVL 4000, Order the following to upgrade PDEG software:

Description	Full Description	Nomenclature	APC	Price
PDEG ENCRYPTION/CD SOFTWARE UPGRADE KIT	-	T8210	137	\$50.00

ASTRO 25 Security Monitoring Service

Ordering Information

General Information

ASTRO 25 Security Monitoring is **only available for ASTRO 25 System Release 6.5 and above systems. This Service supports the current shipping Release and three previous System Releases.** Security Monitoring Service is an integration of the existing Network Monitoring service with Security Monitoring that includes the monitoring of radio system infrastructure as well as monitoring and managing the Motorola security equipment present on the Customers System.

Motorola's ASTRO 25 Security Monitoring is a complete solution that provides peace of mind and reduces the risk that your network availability will be impacted by a security threat. The solution includes uninterrupted monitoring of the radio network security elements by experienced, specialized security technologists with years of experience working with communications networks like yours. Motorola security technologists keep continuous eyes on your network to detect, analyze, and respond remotely or on-site to security events. This level of service will ensure that the operational impact that any security event may cause to your network is kept to a minimum, and in many instances, eliminated. For highly complex or unusual security events, our technologists have direct and immediate access to Motorola engineers for rapid resolution.

Features

- Customer Support Management
- Remote Diagnostic & Monitoring
- 24 Hour Monitoring of System & Security Elements
- Escalation Management
- Report Metrics
- 24 Hour/365 Day Service Availability

Statement of Work

One of the primary business objectives of the North American Group (NAG) is to promote the sales of STANDARD service products. Standards help to ensure consistent and profitable delivery of our service products to our customers. To that end, the customer Statement of Work for this Standard Service Product **CANNOT** be modified. All requests for modifications to STANDARD service products or the development of "custom" service products should be routed through the Solutions Planning process. Your first point of contact for these requests is your local Area Service Manager.

Definitions:

Capitalized terms used in this Statement of Work and not otherwise defined within the Statement of Work or Communications System Agreement have the following meanings: [Definitions](#)

ASTRO 25 Security Monitoring [SOW](#):

ASTRO 25 Security Monitoring w/Customer Technician Dispatch [SOW](#):

Ordering Requirements

1. **This product cannot be ordered directly through COF at this time.** This product must be ordered using the Services Lifecycle (SLC) contract system. Please contact your local Area Service Manager (ASM) or Customer Support Manager (CSM) if you are interested in ordering this product.
2. Options for this product are based on the component parts of the complete system. Pricing is based on the size and complexity of the customer's system configuration such as the type of system, number of sites and number of security elements. **To ensure accurate pricing, orders will not be processed or accepted if they do not include all system components.**
3. Enter the main line item as quantity one.
4. Options are required as sub-items, with the quantity equal to the option description.
5. All dollar amounts reflect an annual one year pricing.
6. P
7. Both
8. When ASTRO 25 Security Monitoring Service is purchased, other service offerings are also required to price the service appropriately. Please refer to the below chart.

	Security Monitoring	Network Monitoring	SUS	Technical Support	Dispatch Service	Customer Technician Dispatch	OnSite Infrastructure Response
Motorola Maintained	Required	Required	Required	Not Required	Required	N/A	Required
Customer Maintained (COAM)	Required	Required	Required	Suggested	N/A	Required	N/A

1. A Customer Support Plan must be created to provide detailed information to the customer regarding delivery of this service.

ASTRO® 25 Trunking

**L NON-REDUNDANT/L REDUNDANT
Core Upgrades**

Ordering Information

NOTE: For detailed information on Orderability and Option Descriptions please check the [Ordering Guide](#)

General Information

L Core is an ASTRO 25 trunking solution targeted at small scale trunking customers. It offers fielded SMARTNET, SmartWorks, StartSite, or conventional customers an affordable Motorola P25 trunked system. L Core allows customers to interface scaled trunking solutions to MCC 7500 or MCC 7100 IP Wireline Consoles. It is supported by a mission critical grade Network Management suite that allows customers to manage users on their system. L Core also enables access to a powerful, scalable, modular ASTRO 25 Portfolio.

Optional Features & Subsystems

L Core configurations can be ordered in a 7 foot rack or cabinet mount. Other options that can be added include Additional Radio User or Site licenses, Encrypted Integrated Data, HA Data, Redundancy, Link Encryption, Air Traffic Information Access, Computer Aided Dispatch Interface, and MOSCAD GMC Manager. Also, various Information Assurance and Security features such as Radio Authentication, Multifactor Authentication and Anti-Malware Service Server may be specified.

Optional subsystems that can be ordered include RF Sites, IP Simulcast, MCC 7500 or MCC 7100 Dispatch Console, Enhanced Telephone Interconnect (ETI), ISSI.1 interface to other P25 systems, and various data applications like Fire Station Alerting, Text Messaging, Outdoor Location etc.

Additional information on L Core can be found at: <http://compass.mot-solutions.com/web/l-core>

General Ordering Information

These pages below will lead you through the necessary steps required to order an upgrade and /or expansion to your ASTRO 25 L Core system. Please be sure to read each step carefully and supply the personality information required for the different model numbers to assure the factory will correctly build the product.

The following information must be included on the order for all SQM model numbers:

System ID - This would have been assigned when the original system was purchased.

ASTRO® 25 Trunking

**L NON-REDUNDANT/ L REDUNDANT
Core – A7.16 New & Expansion**

Ordering Information

NOTE: For detailed instructions on orderability or option descriptions please check the Ordering Guide at [7.16 L-Core New and Expansion Guide](#).

General Information

L Core is an ASTRO 25 trunking solution targeted at small scale trunking customers. It offers fielded SMARTNET, SmartWorks, StartSite, or conventional customers an affordable Motorola P25 trunked system. L Core allows customers to interface scaled trunking solutions to MCC 7500 or MCC 7100 IP Wireline Consoles. It is supported by a mission critical grade Network Management suite that allows customers to manage users on their system. L Core also enables access to a powerful, scalable, modular ASTRO 25 portfolio.

Capacity

The L core supports 5 sites. Two of these sites can be simulcast subsystems. The maximum number of remote simulcast RF sites in a L core is 10. These 10 simulcast remote RF sites can be part of a single simulcast cell or can be distributed across the 2 simulcast cells. Each repeater site can have 28 trunking channels. Conventional channels are supported as mutual aid channels and limited to 8 digital or 8 analog channels. Conventional channels at dispatch sites are supported with CCGW's. Standard MCC7500 Conventional channels dispatch capacity rules apply. Conventional only sites are not supported in L Core. There is a total system limitation of 150 channels (stations). Up to 50 MCC 7500 or MCC 7100

console positions can be included in an L Core system.

L1 system stands for Non-Redundant Core while L2 stands for Redundant Core Configuration

Simplified Ordering

Supermodels have been created which contain all main components required for a single site system. The supermodel bundle includes core hardware and gateways, the ASTRO 25 Trunking Operational license (FDMA and TDMA), a single ASTRO 25 voice site license (FDMA, TDMA or Mixed FDMA/TDMA), as well as licenses for 500 radio users and 5 dispatch consoles. Additionally Windows OS Hardening Kit, baseline backup and Anti-Malware licenses for windows PCs and servers within the core are in the supermodel bundle.

L1-non-redundant core includes:

- Core VMS Server
- ISSI8000 VMS Server (also used for Dynamic Transcoding; ISGW virtualized, use ISSI8000 ECAT page to order roaming licenses)
- CEN VMS Server (WAVE virtualized; use WAVE ECAT page to order licenses if your customer wants WAVE)
- DAS
- 48-port LAN switch
- 24-port Backhaul Switch
- 2-GGM 8000 Gateways
- GGSN, Border Gateway and Switch (CEN Hardware)
- 2-Firewalls (1 for ISSI/WAVE Enablement and 1 for Data Apps in the CEN)

L2-redundant core includes:

- 2 Core VMS Servers (ISGW virtualized, use ISSI8000 ECAT page to order roaming licenses)
- CEN VMS Server (WAVE virtualized; use WAVE ECAT page to order licenses if your customer wants WAVE)
- DAS
- 2 48-port LAN switches
- 2 24-port Backhaul Switches
- 4-GGM 8000 Gateways
- GGSN, Border Gateway and Switch (CEN Hardware)
- 2-Firewalls (1 for ISSI/WAVE Enablement and 1 for Data Apps in the CEN)

Network Management

A single NM license is included for Network Management operation. The NM Client resides on the VMS server and can be accessed from a console op or a dedicated NM workstation. There is an option to add a second NM client to the system.

NM applications included as a part of the core supermodels are Provisioning Manager, Unified Event Manager, Unified Network Configurator, Zone Watch, Historical Reports – single license each. An additional license can be purchased for each for a maximum of 2 concurrent licenses. The core supermodel also includes 3 licenses for Radio Control Manager. UEM application handles fault management of all devices. Similarly, the UNC application is used for the configuration management of transport and remote RF site

devices.

Optional Features & Subsystems

L Core configurations can be ordered in a 7 foot rack or cabinet mount. Other options that can be added include Additional Radio User or Site licenses, Encrypted Integrated Data, HA Data, Redundancy, Link Encryption, Air Traffic Information Access, Computer Aided Dispatch Interface, and UEM Fault Manager. Also, various Information Assurance and Security features such as Radio Authentication, Multifactor Authentication and Anti-Malware Service Server may be specified.

Optional subsystems that can be ordered include RF Sites, IP Simulcast, MCC 7500 or MCC 7100 Dispatch Console, Enhanced Telephone Interconnect (ETI), ISSI8000 interface to other P25 systems, and various data applications like MACH Alert, Text Messaging, Outdoor Location etc.

[ASTRO 7.16 System Planner](#)

General Ordering Information

These pages below will lead you through the necessary steps required to order your new ASTRO 25 L Core system. Please be sure to read each step carefully and supply the personality information required for the different model numbers to assure the factory will correctly build the product.

The first choice to be made on the ordering sequence is what size of a system does the customer desire and what functionality will be needed on the system? For example, do they need a redundant configuration (L2) or a non-redundant configuration (L1)? Will it be a voice only system or will they need Integrated Data? Will the system need any MCC 7500 or MCC 7100 Dispatch Consoles?

A Master System Key Starter Kit package (DVN4046) should be ordered with every L Core system. This will be automatically added to engineering equipment lists generated from the REC tool.

All L Core systems will need to be staged in Motorola CCSi facility. Please be sure to include Level 6 staging in your SI Configurator.

Ordering Requirements

The following information must be included before placing the order:

- 1. System ID.** Four digit hexadecimal number used to uniquely identify a system. For new systems, this will be assigned by the System Engineer using the Trunked Data Repository (TDR) process. Expansions to existing systems will use the existing System ID.
- 2. Zone ID.** Number used to uniquely identify each zone in a system. Zone ID will always be 0001 for L1/L2 systems.
- 3. System Extension ID.** Four digit hexadecimal number, **typically 0000**. Introduced in 7.15 to address the rare case where a customer has intentionally chosen to use the same system ID across multiple systems. For such rare cases, customers or account teams inputting the order shall provide unique system extension IDs across the systems that have same system ID (e.g. 0001, 0002, etc).

4. **Valid Email Address.** This email will be used to deliver all software licensing entitlements to the customer.

NOTE: Software licenses are automatically generated based on the System, Zone and System Extension ID provided on the order. **It is critical that valid information is entered on the order, otherwise software licenses will fail to install.**

Please verify ID information using the following guidelines before submitting an order.

- **New System:** Follow the Trunked Data Repository (TDR) process to request a new System ID (<http://tdr.corp.mot.com/TDRPRD/>). System Extension ID should always be set to 0000 except for rare cases when the same System ID is shared across multiple customer systems.
- **Existing System:** Login to the License Manager application from an NM Client Workstation and locate the Device ID at the bottom right of the screen. The Device ID will be in the following format: System ID - Zone ID - System Extension ID - xxxx -xxxx - xxxxxxxxxxxx
- *For example, Device ID 09FF-0003-0000-0001-9283-130493454762 corresponds to System ID 09FF, Zone ID 0003, and System Extension ID 0000.*

If software licenses are generated with invalid System ID information, contact SSC and open a case to resolve the issue.

ENH: 500 ENHANCED TRUNKED DATA USER LICENSES	Trunked Data user license packs based upon the number of Enhanced Trunked Data equipped radios in the zone.(Note: The maximum number of Data users is dependent upon the system configuration and type of Data users. Please consult the System Planner before ordering.)	CA02473AA	877	\$2,000.00
--	---	-----------	-----	------------

Optional: Order Anti-Virus

Anti-Virus / Anti Malware

Order 1 for each Windows based client in the system that will be managed by the AntiMalware server. Note that the Anti-Malware client is a license and software is included. The T model listed below is another copy of the software for products that do not embed Anti Malware in their server. It does not need to also be ordered if you are ordering a Master Site system.

The CSMS is the server on which the anti malware server application resides but it can also host the RSA management application as well as the IDS management application if a customer purchases this option. The CSMS can also host the front end for the Firewall management application. NOTE this is the front end client to access the Firewall Management Server and NOT the actual FMS.

Description	Full Description	Nomenclature	APC	Price
MCAFEE WINDOWS AV CLIENT	This is a standalone installer for Windows operating systems. This should only be ordered for Consoles and MOSCAD products that do no embed the client license.	T7885	708	\$165.00
ADD: ANTI-MALWARE DEF UPDATE LIC	Provides protection to Windows/Linux based devices against viruses, spyware and other software born threats. This is a license for all client/devices. Order one per Windows/Linux client/device managed by the server except for Consoles/AIS and MOSCAD NFM devices that DO NOT embed MCAfee.	CA02193AA	877	\$165.00

ASTRO® 25 Trunking

**L NON-REDUNDANT/L REDUNDANT
Core - A7.16 Upgrades**

Ordering Information

General Information

L Core is an ASTRO 25 trunking solution targeted at small scale trunking customers. It offers fielded SMARTNET, SmartWorks, StartSite, or conventional customers an affordable Motorola P25 trunked system. L Core allows customers to interface scaled trunking solutions to MCC 7500 or MCC 7100 IP Wireline Consoles. It is supported by a mission critical grade Network Management suite that allows customers to manage users on their system. L Core also enables access to a powerful, scalable, modular ASTRO 25 Portfolio.

General Ordering Information

These pages below will lead you through the necessary steps required to order an upgrade to your ASTRO 25 L Core system. Please be sure to read each step carefully and supply the personality information required for the different model numbers to assure the factory will correctly build the product.

The following information must be included on the order for all SQM model numbers:

System ID - This would have been assigned when the original system was purchased.

ASTRO® 25 Trunking L NON-REDUNDANT/ L REDUNDANT Core – A7.17 New & Expansion

For detailed instructions on orderability or option descriptions please check the Ordering Guide at [7.17 L-Core New and Expansion Guide](#).

Ordering Information

General Information

L Core is an ASTRO 25 trunking solution targeted at small scale trunking customers. It offers fielded SMARTNET, SmartWorks, StartSite, or conventional customers an affordable Motorola P25 trunked system. L Core allows customers to interface scaled trunking solutions to MCC 7500 or MCC 7100 IP Wireline Consoles. It is supported by a mission critical grade Network Management suite that allows customers to manage users on their system. L Core also enables access to a powerful, scalable, modular ASTRO 25 portfolio.

Capacity

The L core supports 5 sites. Two of these sites can be simulcast subsystems. The maximum number of remote simulcast RF sites in a L core is 10. These 10 simulcast remote RF sites can be part of a single simulcast cell or can be distributed across the 2 simulcast cells. Each repeater site can have 28 trunking channels. Conventional channels are supported as mutual aid channels and limited to 8 digital or 8 analog channels. Conventional channels at dispatch sites are supported with CCGW's. Standard MCC7500 Conventional channels dispatch capacity rules apply. There is a total system limitation of 150 channels (stations). Up to 50 MCC 7500 or MCC 7100 console positions can be included in an L Core system.

L1 system stands for Non-Redundant Core while L2 stands for Redundant Core Configuration

Simplified Ordering

Supermodels have been created which contain all main components required for a single site system. The supermodel bundle includes core hardware and gateways, the ASTRO 25 Trunking Operational license (FDMA and TDMA), a single ASTRO 25 voice site license (FDMA, TDMA or Mixed FDMA/TDMA), as well as licenses for 500 radio users and 5 dispatch consoles. Additionally Windows OS Hardening Kit, baseline backup and Anti-Malware licenses for windows PCs and servers within the core are in the supermodel bundle.

L1-non-redundant core includes:

- Core VMS Server
- ISSI8000 VMS Server (also used for Dynamic Transcoding; ISGW virtualized, use ISSI8000 ECAT page to order roaming licenses)
- CEN VMS Server (WAVE virtualized; use WAVE ECAT page to order licenses if your customer wants WAVE)
- DAS
- 48-port LAN switch
- 24-port Backhaul Switch
- 2-GGM 8000 Gateways
- GGSN, Border Gateway and Switch (CEN Hardware)
- 2-Firewalls (1 for ISSI/WAVE Enablement and 1 for Data Apps in the CEN)

L2-redundant core includes:

- 2 Core VMS Servers (ISGW virtualized, use ISSI8000 ECAT page to order roaming licenses)
- CEN VMS Server (WAVE virtualized; use WAVE ECAT page to order licenses if your customer wants WAVE)
- DAS
- 2 48-port LAN switches
- 2 24-port Backhaul Switches
- 4-GGM 8000 Gateways
- GGSN, Border Gateway and Switch (CEN Hardware)

Network Management

A single NM license is included for Network Management operation. The NM Client resides on the VMS server and can be accessed from a console op or a dedicated NM workstation. There is an option to add a second NM client to the system.

NM applications included as a part of the core supermodels are Provisioning Manager, Unified Event Manager, Unified Network Configurator, Zone Watch, Historical Reports – single license each. An additional license can be purchased for each for a maximum of 2 concurrent licenses. The core supermodel also includes 3 licenses for Radio Control Manager. UEM application handles fault management of all devices. Similarly, the UNC application is used for the configuration management of transport and remote RF site devices.

Optional Features & Subsystems

L Core configurations can be ordered in a 7 foot rack or cabinet mount. Other options that can be added include Additional Radio User or Site licenses, Encrypted Integrated Data, HA Data, Redundancy, Link Encryption, Air Traffic Information Access, Computer Aided

Dispatch Interface, and UEM Fault Manager. Also, various Information Assurance and Security features such as Radio Authentication, Multifactor Authentication and Anti-Malware Service Server may be specified.

Optional subsystems that can be ordered include RF Sites, IP Simulcast, MCC 7500 or MCC 7100 Dispatch Console, Enhanced Telephone Interconnect (ETI), ISSI8000 interface to other P25 systems, and various data applications like MACH Alert, Text Messaging, Outdoor Location etc.

ASTRO 7.17 System Planner

General Ordering Information

These pages below will lead you through the necessary steps required to order your new ASTRO 25 L Core system. Please be sure to read each step carefully and supply the personality information required for the different model numbers to assure the factory will correctly build the product.

The first choice to be made on the ordering sequence is what size of a system does the customer desire and what functionality will be needed on the system? For example, do they need a redundant configuration (L2) or a non-redundant configuration (L1)? Will it be a voice only system or will they need Integrated Data? Will the system need any MCC 7500 or MCC 7100 Dispatch Consoles?

A Master System Key Starter Kit package (DVN4046) should be ordered with every L Core system. This will be automatically added to engineering equipment lists generated from the REC tool.

All L Core systems will need to be staged in Motorola CCSi facility. Please be sure to include Level 6 staging in your SI Configurator.

Ordering Requirements

The following information must be included before placing the order:

NOTE: Software licenses are automatically generated based on the System, Zone and System Extension ID provided on the order. **It is critical that valid information is entered on the order, otherwise software licenses will fail to install.**

Please verify ID information using the following guidelines before submitting an order.

If software licenses are generated with invalid System ID information, contact SSC and open a case to resolve the issue.

1. System ID. Four digit hexadecimal number used to uniquely identify a system. For new systems, this will be assigned by the System Engineer using the Trunked Data Repository (TDR) process. Expansions to existing systems will use the existing System ID.

2. Zone ID. Number used to uniquely identify each zone in a system. Zone ID will always be 0001 for L1/L2 systems.

3. System Extension ID. Four digit hexadecimal number, **typically 0000**. Introduced in 7.15 to address the rare case where a customer has intentionally chosen to use the same system ID across multiple systems. For such rare cases, customers or account

teams inputting the order shall provide unique system extension IDs across the systems that have same system ID (e.g. 0001, 0002, etc).

4. Valid Email Address. This email will be used to deliver all software licensing entitlements to the customer.

NOTE: Software licenses are automatically generated based on the System, Zone and System Extension ID provided on the order. **It is critical that valid information is entered on the order, otherwise software licenses will fail to install.**

Please verify ID information using the following guidelines before submitting an order.

New System: Follow the Trunked Data Repository (TDR) process to request a new System ID (<http://tdr.corp.mot.com/TDRPRD/>). System Extension ID should always be set to 0000 except for rare cases when the same System ID is shared across multiple customer systems.

Existing System: Login to the License Manager application from an NM Client Workstation and locate the Device ID at the bottom right of the screen. The Device ID will be in the following format: System ID - Zone ID - System Extension ID - xxxx -xxxx -xxxxxxxxxxxx

For example, Device ID 09FF-0003-0000-0001-9283-130493454762 corresponds to System ID 09FF, Zone ID 0003, and System Extension ID 0000.

If software licenses are generated with invalid System ID information, contact SSC and open a case to resolve the issue.

Additional Console Licenses

Description	Full Description	Nomenclature	APC	Price
ADD: MCC7500 CONSOLE LICENSES (QTY 5)	A license should be purchased for each MCC7500, MCC7100 and AIS position.	UA00156AA	877	\$5,000.00

Order the appropriate number of licenses based upon the number of MCC7500/MCC7100 consoles in the system. Once license pack or five (5) operator position licenses come standard with the L Core supermodels. You may order up to nine (9) more MCC7500/MCC 7100 console position license packs. Each option ordered provides a license for five (5) physical console positions. Example: If a system has ten (10) MCC7500/MCC7100 console positions, the order should include a quantity of one (1) MCC7500/MCC7100 console licenses option. If an additional ten (10) MCC7500/MCC7100 console positions are being added to the system, a quantity of two (2) MCC7500/MCC7100 license packs should appear on the upgrade order.

User Licenses

Quantity 500 UA00152AA licenses come standard with the L Core supermodels. Maximum quantity 31 (15,500 licenses) of these options can be ordered in addition to the 500 licenses that come standard. There is a maximum quantity of 16,000 radio user licenses permitted.

Description	Full Description	Nomenclature	APC	Price
ADD:500 RADIO USER LICENSES	-	UA00152AA	877	\$7,500.00
ADD: 500 VISITING RADIO USER LICENSES	Each option ordered provides a license for 500 trunked radio users that are "home" to another radio system. These are meant to be radios that are not daily users of the system	UA00664AA	877	\$1,000.00

Integrated Data

Trunked Integrated Data is Standard on new 7.17 systems. DO NOT choose CA01786AD for a new 7.17 zone. If you are expanding a system that did not ship with a PDG, then order one with CA02648AC.

Integrated Data Site Licenses

Description	Full Description	Nomenclature	APC	Price
ADD: ENHANCED DATA-P25 TRNK SITE	-	UA00408AA	595	\$4,160.00

ADD: SECURITY BUNDLE	-	CA01741AF	425	\$20,000.00

Host-Based CSMS

Description	Full Description	Nomenclature	APC	Price
ADD: HOST BASED CSMS (A7.17.3)	Optional feature which enables product specific firewalls for Windows products. This option includes the ASTRO 25 Security Server Hardware and Software needed to support Host-Based CSMS. NOTE: Host-Based CSMS device licenses need to be ordered separately for each Windows device in the system.	CA03584AA	877	\$80,000.00
ADD: HOST BASED CSMS DEVICE LICENSES	This option is required when "Host-Based CSMS" (CA03584AB) is ordered. Must order (1) for each Windows device in the system.	UA00726AA	877	\$200.00

Radio Authentication and Licenses

Description	Full Description	Nomenclature	APC	Price
ADD:RADIO AUTHENTICATION	-	CA02472AD	877	\$11,300.00
ADD: RADIO AUTH 500 USER LIC	-	UA00165AA	877	\$5,000.00
ADD: SITE SELECTABLE ALERTS TRUNKING LICENSE	This license gives the ability for the ASTRO 25 system to signal alerts at user-selected trunking sites.	CA02413AA	877	\$20,000.00

IPv6

Description	Full Description	Nomenclature	APC	Price
IPv6	Optional feature which enables IPv6 connectivity at the Zone Core. If you choose to order this optional feature, you are required to order one per zone (including Astro 25 Conventional Only	CA01417AA	877	\$50,000.00

	systems). NOTE: There is a corresponding IPv6 site license that must be ordered. The site license is not needed for an ASTRO 25 Conventional Only system.			
ADD: IPV6 SITE LICENSE	Optional feature which enables IPv6 connectivity at remote sites. Each option ordered provides an IPv6 license for one (1) Remote Site of any type (e.g. A25 IV&D Sites, Dynamic Dual Mode/X2-TDMA Sites, and HPD sites). Example: If a system has eighteen (18) A25 IV&D Sites that require IPv6 connectivity, the order should include a quantity of eighteen (18) IPv6 Site Licenses. If an additional two (2) sites of any type are being added to the system, a quantity of two (2) IPv6 Site Licenses should appear on the upgrade order. Note: If the system consists of one (1) simulcast system (one prime) and four (4) simulcast sub-sites, then four (4) IPv6 licenses must be ordered.	CA01418AA	877	\$15,000.00

700/800 Mixed Site

Description	Full Description	Nomenclature	APC	Price
ADD: 700/800 MIXED SITE OPERATION	This feature enables ASTRO 25 systems with both 700 and 800 frequencies to better utilize 700 RF channels when radio talk groups contain 800-only radios and 700/800-capable radios. It distributes talk paths across 700 and 800 MHz channels thus lowering channel congestion and reducing system busies.	CA01395AA	877	\$15,000.00

Configuration Features

System Management

Terminal Server

Description	Full Description	Nomenclature	APC	Price
ADD: TERMINAL SERVER	Encryption	CA01750AA	425	\$6,500.00

Encryption

GGM 8000 Encryption

Description	Full Description	Nomenclature	APC	Price
ADD: COMMON CRITERIA	Encryption (CA02087AA) is required with this option. Order one per each GGM 8000 gateway.	CA02134AA	147	\$500.00
ADD: ENCRYPTION (7.12 OR LATER)	Order one per each GGM 8000 gateway.	CA02087AA	147	\$1,500.00

SMART-X Licenses

Description	Full Description	Nomenclature	APC	Price
SMARTX 3600 SYSTEM LICENSE	This license gives the ability to use a SmartX Migration with your ASTRO 25 zone. NOTE: SmartX 3600 SITE LICENSE and 500 RADIO USER LICENSES are required with this, as well as	CA01403AA	877	\$10,000.00

	ASTRO 25 FDMA TRUNKING OPERATION or P25 PHASE 2 TDMA TRUNKING OPERATION ZONE LICENSE			
SMARTX 3600 SITE LICENSE	This license is required when the SmartX 3600 System License is ordered. One license is required per Simulcast Subsystem and/or IR site. This option licenses the customer to add a 3600 site to their ASTRO 25 zone. Note: IV&D Site license is NOT required.	CA01404AA	877	\$0.00

Anti-Virus

Anti-Virus

Step 10: Anti Malware

Order 1 for each Windows based client in the system that will be managed by the AntiMalware server. Note that the Anti-Malware client is a license and software is included. The T model listed below is another copy of the software for products that do not embed Anti Malware in their server. It does not need to also be ordered if you are ordering a Master Site system.

The CSMS is the server on which the anti malware server application resides but it can also host the RSA management application as well as the IDS management application if a customer purchases this option. The CSMS can also host the front end for the Firewall management application. NOTE this is the front end client to access the Firewall Management Server and NOT the actual FMS.

Description	Full Description	Nomenclature	APC	Price
ADD: ANTI-MALWARE DEF UPDATE LIC	Provides protection to Windows/Linux based devices against viruses, spyware and other software born threats. This is a license for all client/devices. Order one per Windows/Linux client/device managed by the server except for Consoles/AIS and MOSCAD NFM devices that DO NOT embed McAfee.	CA02193AA	877	\$165.00
MCAFFEE WINDOWS AV CLIENT	This is a standalone installer for Windows operating systems. This should only be ordered for Consoles and MOSCAD products that do no embed the client license.	T7885	708	\$165.00

ASTRO 25 7.17 Upgrade
L Non-Redundant/L Redundant Core

Ordering Information

General Information

PLEASE NOTE:

In line with the Software Support Policy (SwSP) for ASTRO based system software, orderability rules now include alignment to the policy which sets a new framework of three periods of support from Ship Acceptance for that specific release.

To ensure adherence to the Software Support Policy, there is a change to how Upgrades are ordered on the L Core for customers that do not have an SMA or SUA Lifecycle Contract.

It is recommended that all upgrades are to an ASTRO release that is still within the Standard Support Period.

Effective 1/1/17

To get an Upgrade quote, please contact your:

- Lifecycle Management Consultant; to quote an upgrade via a one-time or multiyear SUA
- It is recommended that all upgrades are performed via a certified path

Once you have a quote, then contact:

- Upgrade Operations; to request a system upgrade - [Project Request for Upgrade Operations](#)
- UO will not provide a la carte upgrade quotes

For more information on the Software Support Policy check here: [Software Support Policy](#)
For more information on the orderability changes check here: [SwSP Orderability Changes](#)

For **Pre-Sales purposes only** - an Upgrade Guide can be found here: [Pre-Sales Only Upgrade Ordering Guide](#)

ORDERING GUIDELINES FOR UPDATING TO 7.17.3 FROM 7.17 OR 7.17.1

In order to use any new capabilities introduced in the 7.17.3 release, the new 7.17.3 version of the software for the applicable components must be installed.

The 7.17.3 Update model number below (T8485) will contain CD(s) with the new software version for the 7.17.3 impacted products. Each impacted product has to be updated before new functionality is enabled.

Updating a 7.17 or 7.17.1 system to 7.17.3 is a 2-step process. Before a 7.17 or 7.17.1 system can be updated to 7.17.3, the system must be updated to 7.17.2. Both kits below are required to be ordered to update a 7.17 or 7.17.1 system to 7.17.3. Note: It is possible to remain at 7.17.2 if the capabilities introduced in 7.17.3 are not needed.

To update to 7.17.3 from 7.17.2, see section below.

Upgrades from 7.15 or 7.16 to 7.17.3 are quoted by the Lifecycle Management Consultants.

7.17.3 Update from 7.17 or 7.17.1 (both models are required)

ORDERING GUIDELINES FOR UPDATING to 7.17.3 FROM 7.17.2

In order to use any new capabilities introduced in the 7.17.3 release, the new 7.17.3 version of the software for the applicable components must be installed.

The model number below will contain CD(s) with the new software version for the 7.17.3 impacted products. Each impacted product has to be updated before new functionality is enabled.

Upgrades from 7.15 or 7.16 to 7.17.3 are quoted by the Lifecycle Management Consultants.

7.17.3 Update from 7.17.2

The T8485 contains 7.17.3 Update Software CDs for the following products:

RF SITE KIT

- GTR 8000, Conventional
- GCP 8000 Conventional Site Controller
- GSLC (GPW Link Converter SW)
- GPW 8000, Conventional Receiver app
- GRV & GCM 8000, Conventional Comparator
- ALL SDM CONFIG AND FW TO A7.17.3
- MOSCAD NFM VIRTUAL APP A7.17.3
- MOSCAD NFM GMC/GWS A7.17.3

CONSOLES KIT

- Voice Dispatch API
- MCC7500
- MCC7500E
- PRX 7000
- Voice Dispatch Assistant

CALL PROCESSING KIT

- ISSI/CSSI 8000

NETWORK TRANSPORT KIT

- Motorola Network Router and Gateway EOS
- HP Procurve OS

PLATFORM KIT

- Domain Controller Plugin Media
- CSMS Supplementary CD
- Virtual Appliance - CSMS - Disk 1
- Virtual Appliance - CSMS - Disk 2
- Window Supplemental Full Config
- Window Supplemental Trans Config
- Windows Supplemental Common Config
- McAfee Standalone Media
- McAfee Software Media

PROVISIONING and FAULT MANAGEMENT KIT

- ATR SW w/AES-128
- UEM SW w/AES-128
- ZDS SW w/AES-128
- UCS SW w/AES-128
- PMI API Documentation
- UNC DS Virtual App w/AES-128
- UNC w/AES-128
- Configuration Manager SW
- NM Client w/ AES-128
- Configuration services SW
- MKM 7000 CAM or A7.17

Ordering Information

General Information

PLEASE NOTE: The Standard Support Period for the 7.11 Release ends on June 30, 2017. Any software and hardware expansions on this release will no longer be supported after this date.

Click [here](#) for additional information.

Looking for Upgrade Information? [Click here](#).

These pages will lead you through the necessary steps to add-on additional licensed options to an existing 7.11 system. Please be sure to read each step carefully and supply the personality information required for the different model numbers to assure the factory will correctly build the product.

P25 Phase 2 TDMA & Dynamic Options: Phase 2 TDMA licenses enable an ASTRO 25 system to operate with the spectrally-efficient Project 25 Phase 2 TDMA air interface.

Optional Dynamic capabilities can be added to a Phase 2 TDMA system to provide further FDMA/TDMA interoperability and grade-of-service enhancements. The Phase 2 TDMA licenses can be ordered for select stations, sites, and zones that require the 2:1 spectrum-efficient "6.25e" capability. Separately, Dynamic options can be added to the system (and also independently): Dynamic Channel Assignment and Dynamic Talkgroup Assignment.

Dynamic Channel Assignment provides improved station efficiency and grade of service by enabling dynamic switching between Phase 1 FDMA mode and Phase 2 TDMA

mode for a given station based on the needs for the call assigned to the station. Dynamic Channel Assignment can be ordered for select stations as needed, and if ordered, must include the zone-level Dynamic Channel option. Dynamic Talkgroup Assignment improves interoperability by seamlessly switching APX subscribers between Phase 1 FDMA and Phase 2 TDMA modes without user intervention depending on the capabilities of the affiliated subscribers. As Dynamic Talkgroup Assignment is a system-wide feature, if this capability is needed, licenses must be purchased for all sites and zones in the system. The combination of these two options, termed "Dynamic Dual Mode", provides optimal grade-of-service and efficiency for Phase 1 FDMA/Phase 2 TDMA interoperability.

Ordering Requirements

The following information must be included on the order for all SQM model numbers:

- **System ID** - This would have been assigned when the original system was purchased.
- **Zone ID** - This is a three digit number used to identify each zone in a system and is used by the factory to consolidate the equipment for each zone.

ASTRO 25 Outdoor Location Solution

Application Programming Interfaces (APIs) for Unified Network Services (UNS)

Ordering Information

Important Information

Motorola's ASTRO 25 Outdoor Location Solution does not contain a mapping application. The solution contains an Application Programming Interface to connect to mapping applications in the Customer Enterprise Network (CEN). Additionally, when used on the High Performance Data (HPD) network, a Software Development Kit (SDK) is available for third party application developers to interface to applications located on a mobile data terminal (MDT).

Outlined below is important information for ordering and working with APIs and SDKs.

Interfacing with the UNS API

In order to interface with either the API or the SDK, one of the following must occur:

1. The customer must be willing and capable to perform the integration work himself and willing to sign the license agreement as-is, or
2. The customer must be willing to contract the integration work with a third-party integrator who is willing to sign the license agreement as-is, or
3. The field team must be willing to contract the integration work with a third-party integrator who is willing to sign the license agreement as-is, or
4. The field team may contact a mapping application provider who has already done the integration work or is part of the ASTRO 25 Application Partner Program.

NOTE: If a customer wishes to do the integration work themselves (i.e. be the integrator who writes the code to their own mapping application), it is required by the Law Department that the UNS API Licensing Agreement be agreed upon by the customer. **It is highly discouraged that the customer act as the integrator.**

NOTE: *An ASTRO 25 Location Application Programming Interface (API) license agreement with the application developer MUST be fully executed before any request for the API or SDK will be processed.*

The following six pieces of information are needed to draft the UNS API Agreement:

1. Legal Company Name
2. State of Incorporation

3. Principal Business Address (Mailing address, not a PO Box)
4. Address to send legal notices to, to whose attention, with phone and fax numbers
5. Name and title of the person who will be signing the agreement
6. Name and email of person who will be coordinating obtaining the signatures, if different than in #5

Once the license agreement has been signed by both the third party application developer and Motorola, then the API or SDK will be shipped.

Configuration

Ordering Instructions

ASTRO 25 Location HPD Mobile Data Terminal Software Development Kit (SDK):

(This component should be ordered only when In-Vehicle Mapping is desired on the MDT. It is only for the HPD Network.)

The ASTRO 25 Location HPD Mobile Data Terminal SDK contains all the necessary interface software and documentation that a third party application developer needs to receive location data from the HPD1000 Data Modem. The SDK notifies the third party mobile application when new location data messages are available in near real time and allows support for remote commands through a set of function calls that can be sent to the HPD1000.

NOTE: Order one SDK *per each* Location-enabled MDT.

Model

NOTE in June 2019: DISCONTINUED

**ASTRO® Digital XTL 2500 Mobile
764 - 870 MHz Band
Secure and Trunked Radio Systems**

Ordering Information

General Information

NOTE in June 2019: DISCONTINUED

The XTL 2500 Mobile Line offers 1 radio hardware model:

Hardware Mode	Modes	Alphanumeric Display
		Lines/Characters
		per Line
CH	512	4/14

OPERATING MODES

XTL 2500 Radio Models are capable of operating in three different voice communication modes:

- normal analog (clear voice)
- 3.6kb ASTRO Digital (both clear and coded voice)

- 9.6KB ASTRO Digital (both clear and coded voice)

The mode of operation is programmed on a channel-by-channel basis. The XTL 2500 is capable of transmitting clear analog voice or clear (unencrypted) ASTRO digital voice, depending on the channel programming. XTL 2500 radio functions include ASTRO Digital signaling and digital coding.

COMMON SOFTWARE FEATURES SUPPORTED BY			
G51 "SmartZone®"

CHANNEL SPACING

There are no maximum frequency separation conditions that must be adhered to on the XTL

2500 Mobile Radio Series. Separation of frequencies can be as wide as the allowable sub-band

per radio model with no degradation of any performance specifications. **If an incorrect antenna is used, degraded performance may be experienced.**

COMMON AIR INTERFACE

Conventional channels are P25 compliant with the ASTRO Digital CAI Operation Software (G806). ASTRO P25 Trunking Software (G361) **must** be added for P25 compliance in trunked systems.

PROJECT 25 ENCRYPTION

When ordering any of the Encryption Algorithm:

- **MUST** order the Encryption UCM Hardware (G159)
- The DES-OFB and AES-OFB Encryption offered is compliant with Project 25 standards and does not support analog encryption operation.
 - REQUIRES the ASTRO Digital CAI (G806) to operate the DES-OFB or AES-OFB Encryption
- If ordering a non-OFB (XL version) Encryption:
 - The non-OFB encryption (XL versions) can be operated in either analog or CAI digital mode but will not be Project 25 compliant.
 - **Requires** the Multikey (W969)
- When used in CAI mode, the non-OFB Encryption will not be Project 25 compliant.
 - Encryption UCM Hardware (G159) module may be ordered without an Encryption Algorithm for later upgrade in the field.

FIELD INSTALLED PROJECT 25 ENCRYPTION

The DES-OFB and AES-OFB Encryption offered is compliant with Project 25 standards. Operation of DES-OFB and/or AES-OFB encryption requires the ASTRO Digital CAI (G806). Radios can be upgraded via FLASHport to CAI operation.

- If ordering a Dual Encryption:
 - The non-OFB encryption can be operated in either analog or CAI mode (only XL version can operate in either digital mode.).
 - **Requires** the Multikey (W969).
- When used in CAI mode, the non-OFB Encryption will not be Project 25 compliant.

FIPS 140-2 COMPLIANCE

Encryption Modules equipped with DES-OFB and/or AES-OFB are FIPS 140-2 compliant. Details regarding the certification, and copies of the relevant certificates, can be obtained on

the NIST website at: <http://csrc.nist.gov/cryptval/140-1/1401val2003.htm>.

IMPORTANT UPDATE AES OTAR FIPS APPROVED: On December 16, 2003 NIST and CSE issued a joint statement accepting AES OTAR as a FIPS approved mode of operation. The AES OTAR option (Q14 with Q498 or Q15 with Q498) is now validated to FIPS 140-2 given that the current P25 AES OTAR standard has now been approved by NIST. Any order to Motorola for this option no longer needs a prior determination by the Government that the requirements of FIPS 140-2 are either not applicable or have been properly waived. Further information regarding FIPS 140-2 certification may be found using the following links: [FIPS 140-2 Crypto Module Validation Program \(CMVP\)](#)

[NIST Cryptographic Standard Validation Lists](#)

[NIST Guidance on Project 25 AES-OTAR](#)

Guideline

**All items require an export license to be exported from the united states/canada
Ç Canada personnel refer to Section A under CANADA ONLY information.**

This price page consists of the following sections:

1. Required Main Models and Options for standard operation (Steps 1-9)
2. Control Station
3. Optional Features

4. Aftermarket Accessories

Configuration

Section A: Required Main Model and Options

For standard Radio Operation **Steps 1 - 9** must be selected.

PLEASE READ ALL OPTION DESCRIPTIONS BEFORE MAKING YOUR SELECTION

1: Main Model (Must Select)

2: Operation Mode (Must Select One)

3: System Enhancement Software (Must Select One)

4: Control Head Hardware (Must Select One)

5: Control Head Software (Must Always Select G444)

6: Mounting (Must Select One)

******If a remote mount cable other than 5 meters (17ft) is desired for the G67, please reference the "Remote Mount Cables" section below in Section C: Optional Features******

7: Antenna (Must Select One)

8: Microphones (Must Select One)

9: Speakers (Must Select One)

******G142 NO SPEAKER Required for Control Station******

Section B: Control Station

CONTROL STATION OPERATION

I. First, you must review your selection of the following options from "Section 1: Required Options".

Step 1 (Note: Main Model)

Step 2 (Note: All listed options are compliant)

Step 3 (Note: All listed options are compliant)

Step 4 (Note: XTL 2500 Control Head **OR** "No Control Head Needed" are compatible with Control Station Application- Must only select one).

Step 5 (Note: Must Select G444. The XTL 2500 Control Head Software is compatible with Control Station Application).

Step 6 (Note: Must Select G66. Control Station operation is only offered in Dash mount configuration)

Step 7 (Note: All listed options are compliant)

Step 8 (Note: Select desired microphone option and if no microphone is needed, G90 must be selected).

Step 9 (Note: Must Select G142 - No Speaker Needed)

II. You Must Select ONE of the Following "Specific Control Station Options":

SPECIFIC CONTROL STATION OPTIONS

Control Station Operation and Power Supply (*Must Select BOTH*)

III. Features listed in "Section C: Optional Features" are optional, if applicable. Please read the option's description to determine compatibility.

Section C: Optional Features

The following features are **optional** and will provide additional capabilities, if required.

System Enhancement Options

Algorithm Options

Software Encryption

Remote Mount Cables

(The 5 meter (17 FT) Cable Ships Standard)

ASTRO®
Digital Interface Unit (DIU) 3000 Refurbished

Ordering Information

V.24/hybrid Link Interface	ACIM Link Interface for ASTRO® Signaling to/from CCII_ or Gold Series Console
RNC Link Interface for Conventional Integrated Voice and Data	RS232 Interface capable of Accommodating either an External Printer, Computer or Radio Service Software Terminal
16 Button Keypad and 8 Character LCD Display for Service Functionality	5 LED Indicators (Transmit, Receive, Link Busy, Battery, Key Erase)
Power Supply for 110/120 V 50/60 Hz. Operation	

General Information

The Digital Interface Unit (DIU) 3000 unit is used equipment that has been fully refurbished and has a one year Motorola warranty.

The refurbished Digital Interface Unit (DIU) 3000 will only be shipped with Conventional Software. If Trunking software is required model F2047 - ASTRO DIU trunk software upgrade - will need to be ordered for an additional cost. This upgrade will require the use of the Configuration Service Software (CSS) or Radio Service Software (RSS) to reconfigure the DIU3000 refurbished unit. For more information please refer to the ASTRO® Digital Unit (DIU) FLASHport® Aftermarket Upgrades price page.

The ASTRO® DIU3000 refurbished unit is an infrastructure device that provides the interface between Motorola conventional and trunked ASTRO® digital radio infrastructure and the following analog devices: 1) Radio Network Controllers (RNC) for conventional ASTRO® data, 2) telephone interconnect units, and 3) consoles.

The DIU3000 refurbished unit is a full duplex unit that performs analog to digital conversions in an ASTRO® system. It can operate in the clear analog mode, the clear digital mode, and is capable of providing secure ASTRO® communications when an appropriate encryption cartridge is ordered. The DIU3000 refurbished unit does **NOT** support 12 Kb SECURENET® encryption.

The DIU3000 refurbished unit allows analog tone remote control (TRC) console products that use standard Motorola function tones to support inbound and outbound ASTRO® voice operation as well as basic console control operations. It allows CENTRACOM Series II Plus (CCII+) and Gold Series consoles to operate trunking and advanced conventional signaling features. Digital keying is also supported between the DIU3000 and Gold Series console via the ACIM link.

The DIU3000 refurbished unit is designed to be inserted in a card cage (model CHN1009) and mounted in a rack or cabinet that will need to be ordered (not included). Each card cage accommodates up to four DIU3000 units. A Desktop Mounting Kit (model CLN1336) is also available for smaller systems where racks or cabinets will not be used.

NOTE: Effective 1/1/00 ASTRO® OTAR features are available for ASTRO® Conventional 3.1 Systems. ASTRO® CAI is required for ASTRO® OTAR.

Ordering Requirements

1.
 1. The DIU3000 refurbished unit will not ship with an instruction manual.
 2. One Card cage (model CHN1009) can be ordered for every one to four DIU3000 units for rack or cabinet mounting; or one Desktop Mounting Kit can be ordered for each DIU3000, if a rack or cabinet will not be used. The card cage or desktop mounting kit is not included and must be ordered separately (see below under Accessories).
 3. Programming software is not included and must be ordered separately. Please refer to the software section below.
 4. If an ASTRO modem is required part number TLN3265, will need to be ordered. The ASTRO modem will need to be installed into the DIU in the Field. Part number FKN4028A will also need to be ordered.
 5. The DIU Refurbished unit, HKUN4101A, does ship standard with an adapter box, part number FLN5462A. It does **not** ship with a battery revert cable, part number FKN4095A. If this is needed, it will need to be ordered separately.
 6. The DIU ships standard with a power supply, part number FPN5580A. This power supply is adjustable (auto-senses), 110/220, 15 volt 3.5 amp. It ships standard with a US AC line cord with a US plug.
 7. All DIUs are shipped with IMBE vocoders after June 30, 2003 . Therefore, the X806 (ASTRO CAI OPERATION) is included when the DIU 3000 hardware is ordered.
 8. Any DIU operating with Host Software Release 6.25 or later (4Q02 or later) will require the use of (Radio Service Software (RVN4053) Release 7.01.20 or later (4Q02 or later) or the latest version of DIU 3000 Configuration Service Software (CSS).
 9. For Conventional Telephone Interconnect, the ZETRON Model 30 and the ASTRO DIU 3000 Interface Cable are required. Please refer to the ZETRON Price page for ordering information.
 10. Remote DIU Link to the RNC 3000 in ASTRO Systems.
 - Order a pair (quantity 2) of Standalone Modems (L3170)

Order a quantity of one (1) RNC-DIU Modem Link Cable (DDN7107 or DDN7108) for DIU to Modem link.

- If the DIU 3000 uses the adapter "W" Cable, this must be replaced with the Adapter Box (FLN5462A).

NOTES:

1.

- All refurbished DIU 3000 orders will no longer ship with the adapter "W" cable. Every refurbished DIU 3000 will automatically receive the new 4 port adapter with Comm. Boards. If the "W" cable is desired in the place of the new adapter, order option U446.
- The 9.6 Kbps ASTRO modem is NOT part of the HKUN4101 refurbished DIU 3000 basic model. The modem is a model that must be ordered separately (see below under Modem).

**ASTRO® Digital Interface Unit (DIU)
Crypto Module (CM)
DIU CM FLASHport®
Universal Crypto Module (UCM) Upgrades**

Ordering Information

General Information

The DIU Crypto Module (DIU CM) FLASHport Universal Crypto Module (UCM) Upgrades allow secure customers to upgrade their basic software and algorithm software within a fielded DIU CM without having to replace the Crypto Module. The DIU CM upgrade kit (T6774A) includes one PCMCIA card and one DIU CM upgrade manual. The DIU CM does NOT support VSELP operation.

NOTE: FOR ALL ORDERS, IT IS REQUESTED THAT THE PCMCIA CARDS BE RETURNED TO MOTOROLA, WHEN UPGRADING IS COMPLETE.

PCMCIA CARDS MAY BE RETURNED TO:

Motorola Solutions
c/o: David Horn
1301 E. Algonquin Rd.
Schaumburg, IL
60196

Ordering Requirements

1. Order DIU Crypto Module Software Upgrade kit (T6774A). Each upgrade kit consists of a single PCMCIA card that can upgrade up to 100 individual DIU Crypto Module (DIU CM).
2. Select the *desired* software upgrade option, basic software refresh or algorithm upgrade.
 - Only one upgrade type (basic software or encryption kit) can be ordered per upgrade kit (T6774A). As the encryption kits include the basic software refresh, the basic software option, CA00147AA, should not be ordered on the same upgrade kit as any encryption algorithm.
 - Only one (1) encryption algorithm type can be ordered per upgrade kit, T6774A.

NOTE: Encryption Algorithms have been certified and can co-exist on the DIU Crypto Module in the following combinations only: DES OFB and DVP XL; DES XL and DVP XL; DVI XL and DVP XL; AES and any existing encryption algorithm supported by DIU CM. It is the field team's responsibility to know which encryption algorithm their customer currently has when ordering an algorithm upgrade.

- Specify the number of software upgrades required.
- Each individual DIU Crypto Module requires a single upgrade; therefore, the quantity of

- each option should equal the number of upgrades to be performed.
- The software and algorithm options can not exceed 100 per upgrade kit (T6774A).

3. The DIU Crypto Module FLASHport UCM upgrade requires the use of a key loading device (a KVL 3000 Plus-and only this model key loader), and a PCMCIA card to deliver the new software to the UCM. When upgrading the UCM module with AES Encryption, a KVL 3000 Plus is required to FLASH upgrade the module (KVL 3000 Plus does not support AES).

4. AES was certified for voice only operation on Conventional 3.1 and ASTRO SmartZone Release 4.1 in 2Q02 SER and was certified on SMARTNET 3.0 and SMARTNET 3.2 in the 3Q02 SER. Adding the AES Encryption algorithm to one of these system configurations will require an upgrade to the DIU Host to software Release 6.15 or later (2Q02 or later). See the [ASTRO® DIU FLASHport Upgrades](#) page for specific DIU Host upgrade ordering requirements.

The following example will provide an upgrade card to upgrade twenty (20) fielded DIU Crypto Modules with the AES algorithm.

<u>Item Number</u>	<u>Quantity</u>	<u>Part Number</u>	<u>Description</u>
1	1	T6774A	DIU CRYPTO MODULE SOFTWARE UPGRADE
1a	20	CA00182AD	ADD: AES Encryption Software

Products, kits, components and software that contain encryption functions or features, and technology related to the development or implementation of encryption functions or features, will generally require an approved export license prior to export. If required, export license approvals will be based on the algorithms involved, the country of final destination and the specific end user. Depending on the location of the entity making the sale and the source location of the encryption items it may be necessary to obtain licensing from more than one country for the same sale. Contact your Local Export Control office if you are unfamiliar with the licensing process or to discuss any possible licensing restrictions before submitting bids, proposals, or accepting orders for encryption products.

NOTE: FOR ALL ORDERS, IT IS REQUESTED THAT THE PCMCIA CARDS BE RETURNED TO MOTOROLA, WHEN UPGRADING IS COMPLETE.

PCMCIA CARDS MAY BE RETURNED TO:

ASTRO® DIU ENCRYPTION Refurbished

Ordering Information

General Information

The Digital Interface Unit Crypto Module (DIU CM) is used equipment that has been fully refurbished and has a one year Motorola warranty.

The refurbished Digital Interface Unit Crypto Module (DIU CM) is utilized by customers who purchase the DIU 3000 and requires secure data and voice communications. The DIU CM is responsible for message formatting from the DIU 3000 and for performing encryption and decryption necessary to transmitting and receiving those messages. The DIU CM is equipped with Universal Crypto Module (UCM) technology. The UCM technology provides great flexibility in regards to easily accommodating new algorithms and security features. The DIU CM does NOT support VSELP operation.

Ordering Requirements

1. When ordering the refurbished DIU Crypto Module, you must order the Crypto Module refurbish part number, HKUN4102. The refurbished crypto module will ship with the most current software, but without any algorithms. The algorithms will need to be ordered for an additional cost, and upgraded in the Field. For further information please refer to the ASTRO Digital Interface Unit (DIU) Crypto Module (CM) DIU CM FLASHport Universal Crypto Module (UCM) Upgrades price page at: [Digital Interface Unit \(DIU\)](#)

Note: The CA00147AA, basic software option will not need to be ordered, as the refurbished DIU Crypto module will ship with the most recent software version.

Note: A KVL3000 Plus (and only this model key loader) will need to be used to upgrade the algorithms in the Field.

1. Encryption Algorithms can co-exist on the DIU Crypto Module in the following combinations only: DES OFB and DVP XL; DES XL and DVP XL; DVI XL and DVP XL; AES and any existing algorithm supported by DIU CM.
2. All ASTRO® DIU Crypto Modules are full duplex.
3. Operation of the DIU Crypto Module requires an upgrade to the DIU Host to software Release 6.09 or later (1Q02 or later) NOTE: See the ASTRO DIU FLASHport Upgrades page for specific DIU Host upgrade ordering requirements.
4. It is recommended to upgrade the DIU Radio Service Software (RSS) to

the most current shipping version when ordering the DIU CM for the first time.

5. Any non-VSELP system currently operating with DIU EMCs may add DIU Crypto Modules to their system to allow for secure channel add-ons per each system's life cycle plan. These configurations will require an upgrade to the existing DIU EMCs to software Release 7.3 or later (1Q02 or later) and upgrade to the DIU Host to software Release 6.09 or later (1Q02 or later). See the ASTRO DIU FLASHport Upgrades page for specific DIU Host upgrade ordering requirements. See below for DIU EMC upgrade ordering kits.
6. AES was certified for voice only operation on Conventional 3.1 and ASTRO SmartZone Release 4.1 in 2Q02 SER and was certified on SMARTNET® 3.0 and SMARTNET 3.2 in the 3Q02 SER. Adding the AES Encryption algorithm to one of these system configurations will require upgrades to the following:
 - DIU Host to software Release 6.15 or later (2Q02 or later). See the ASTRO DIU Upgrades Page for specific DIU Host upgrade ordering requirements.
 - Existing DIU CM will require an upgrade to software Release 8.1 (RSS will display 81) or later (2Q02 or later). See the ASTRO DIU CM FLASHport UCM Upgrades Page for specific DIU CM upgrade ordering requirements.

NOTE: The DIU EMC does not support AES Encryption. Secure systems operating with both DIU EMCs and DIU CMs will require replacement of the DIU EMCs with DIU CMs prior to upgrading to AES Encryption.

Products, kits, components and software that contain encryption functions or features, and technology related to the development or implementation of encryption functions or features, will generally require an approved export license prior to export. If required, export license approvals will be based on the algorithms involved, the country of final destination and the specific end user. Depending on the location of the entity making the sale and the source location of the encryption items it may be necessary to obtain licensing from more than one country for the same sale. Contact your Local Export Control office if you are unfamiliar with the licensing process or to discuss any possible licensing restrictions before submitting bids, proposals, or accepting orders for encryption products.

ASTRO®
Digital Interface Unit (DIU)
FLASHport® Aftermarket Upgrades

Ordering Information

General Information

FLASHport Aftermarket Upgrades are used to upgrade a Digital Interface Unit to the latest version of System Software, or to add features to an existing unit in the field.

Ordering Requirements

1. As the main line item, specify the model number of the upgrade kit that represents the software version currently in the DIU. F2046 will represent Conventional software versions, and F2047 will represent Trunked software versions. For customers upgrading from conventional to trunked software, please order model F2047.
2. All of the upgrades shown below will require the use of the Configuration Service Software (CSS) and/or Radio Service Software (RSS) to reconfigure the DIU after installation.
3. Refer to DIU upgrade manual (6802947C24A or 6802949C95A) for installing all software upgrades.
4. All DIU Encryption Module versions purchased before 4Q99 are not compatible with DIU3000 host version 5.16 or higher and MUST receive the latest FLASHport Upgrade (F2046 or F2047).
5. Operation of the DIU Crypto Module requires an upgrade to the DIU Host to Software Release 6.09 or later (1Q02 or later). Any non-VSELP system currently operating with DIU EMCs may add DIU Crypto Modules to their system to allow for secure channel add-ons per each system's life cycle plan. These configurations require DIU EMCs to have Software Release 7.3 or later (1Q02 or later).
6. Aftermarket software is not DISCOUNTABLE.
7. Any DIU operating with Host Software Release 6.25 or later (4Q02 or later) will require the use of Radio Service Software (RSS) Release 7.01.20 or later (4Q02 or later) or the latest version of DIU 3000 Configuration Service Software (CSS).

***ENCRYPTION--**All encryption products, kits, software and technology require an approved export license prior to shipment. Contact the Sector Export Control office at +1 (847) 576-8163 to discuss any possible licensing restriction. The international use of encryption

algorithms (except for DES, DES-XL, & DES-OFB) are highly restricted by the U. S. Federal Government. License approvals are considered for export to a limited selection of countries and end users. Contact the Sector Export Control office at +1 (847) 576-8163 for licensing information before submitting bids, proposals, or accepting orders for algorithm based encryption products.

ASTRO® 25 SOFTWARE SOLUTIONS INFRASTRUCTURE SOFTWARE ADD-ON BUNDLES

Ordering Information

General Information

ASTRO 25 Software Solutions Feature Bundles :

The ASTRO 25 Software Solutions program was created to help create more focus on adding features to the existing systems. Since there are many optional features available that may not have been purchased with the initial system purchase, feature bundles were created to make it easier to discuss the benefits, as well as provide an incentive to purchase more features.

Available add-on features are bundled into six different Software Sleeves. The Feature Bundles are offered in Gold, Silver, and Bronze level tiers for both APX Radios and the ASTRO 25 Infrastructure. Silver tiers include the Bronze features and Gold tiers include both the Silver and Bronze features.

OVERVIEW

ENHANCE YOUR EXISTING ASTRO 25 NETWORK TO MEET NEW CHALLENGES OR SIMPLY OPERATIONS

AVAILABLE ADD-ON FEATURES ARE BUNDLED INTO **SIX** DIFFERENT SOFTWARE SLEEVES

FEATURE BUNDLES OFFERED AT **GOLD, SILVER AND BRONZE** LEVEL TIERS FOR BOTH RADIO AND INFRASTRUCTURE

➔

ENABLES BETTER FOCUS ON FEATURES THAT **ENHANCE YOUR UNIQUE OPERATION**

PROVIDES THE **BEST VALUE** BASED ON YOUR AGENCY NEEDS

- RESILIENCY** MAXIMIZE UPTIME AND ENSURE CONTINUITY OF OPERATIONS, EVEN IN THE EVENT OF SYSTEM FAILURE
- DATA** EASILY AUGMENT YOUR MISSION CRITICAL VOICE COMMUNICATIONS TO ENABLE DATA FOR A SAFER, QUICKER AND MORE EFFECTIVE RESPONSE
- SECURITY** PROTECT YOUR MISSION CRITICAL RADIO SYSTEMS WITH PROACTIVE THREAT DETECTION, REALTIME RESPONSE AND CORRECTION
- OPERATIONAL ASSURANCE** MAXIMIZE YOUR OPERATIONAL READINESS AND SAFETY WITH BETTER SYSTEM VISIBILITY AND CONTROL OF CRITICAL ASSETS
- TDMA** DOUBLE YOUR CAPACITY WITHOUT ADDING NEW EQUIPMENT OR FREQUENCIES
- ISSI** EXTEND COMMUNICATION AND COLLABORATION ACROSS INTEROPERABLE PROJECTS NETWORKS

SALES FEATURE GUIDE	ASTRO 25 Software Solution Sales Feature Guide					
SOFTWARE QUOTING TOOL	Radio Online Web Edition					

Order Requirements

All of the optional add-on features can still be ordered in the usual a-la-carte fashion when not being sold as part of a Feature Bundle. The ordering details and requirements can be found on each of the respective features' ECAT pages, ordering guides, and System Planners.

The best way to quote a Feature Bundle is to use the **Radio Online Web Edition** tool <https://rol.mot.com/ROLWeb>. This will create equipment lists for each feature bundle based on the specific parameters of your customer's existing system. The model number structure for the features hasn't changed; a Feature Bundle simply groups them together on the equipment list. System Integration services can also be quoted using this tool. The next step is to work with the Pricing and Profitability team to apply the appropriate bundle discount level as well as the specific customer discounts.

When entering an order for a Feature Bundle, a few simple rules must be followed. A separate model number called a "T-Model" has been set up for each Bundle Tier. These model numbers are listed below and will appear on the equipment list generated from the ROLWeb tool. If you are ordering multiple bundles, each bundle must be ordered on a **separate Factory Order (F.O.)**. The T-Model for the bundle must remain on the equipment list with the feature model numbers. This is used for order identifying/tracking purposes.

FLASHport AFTERMARKET UPGRADES

The APX Radios are part of the FLASHport Program. This means that hardware models can be loaded with different software packages that provide the features and functionalities that our customers require.

Remove any feature already enabled in the existing radios' codeplug to avoid order failure. You cannot order an upgrade for an already enabled feature.

System Enhancement Options can be loaded at the time of radio purchase or at a later date through the use of software field upgrades (upgrades can be completed either via a FLASH dongle or through Radio Management.) Radios can be upgraded electronically in the field with new features in the current system or to new systems operation (contingent upon remaining within the same RF sub-band) by ordering upgrade kits.

ASTRO25 EXPRESS SERVICES**Ordering Information**

Executive Summary

ASTRO 25 Express is a modular approach to Project 25 interoperability, providing right sized solutions for mission critical communications.

A cost-effective, single remote site P25 voice system rapidly delivered and deployed with the capability to grow within the ASTRO 25 portfolio as customer needs change. ASTRO 25 Express System with a GTR 8000 Expandable Site Subsystem is a single-site, standalone FDMA or TDMA trunking system supporting up to 18 channels.

ASTRO Express is designed to optimize channel capacity requirements operating in the following bands:

700 MHz / 800 MHz / 900 MHz / UHF R1 (380-435 MHz) / UHF R2 (435-524 MHz) / VHF (136-174 MHz)

Day to day radio network management is critical to ensure our customers systems are operational at all times. The following support services offer the critical coverage for all ASTRO 25 Express Remote Sites.

Product Description**Overview**

ASTRO 25 Express Services are backed by Motorola's global integrated services and best in class technical support technicians, 900 Motorola Service Providers, and certified repair facilities. Adding Motorola premier services to your ASTRO 25 system provides proactive protection for your system and is available in multi-year agreements.

Technical Support

Technical Support service provides continuous centralized remote telephone support for technical issues that require a high level of ASTRO 25 solutions expertise or troubleshooting on ASTRO 25 Express equipment. Once a trouble call is received from the customer technical resource, Motorola immediately begins diagnosis of the event. This may also include remotely connecting and interrogating the ASTRO 25 Express system, running appropriate diagnostics, characterizing the problem, and remotely restoring the affected device or subsystem. If a remote fix is not possible, if the customer has a current Onsite Infrastructure Response & Dispatch service contract, a field technician will be dispatched to the site. Motorola will engage relevant engineering resources, as required, to resolve the issue.

Infrastructure Repair & Infrastructure Repair with Advance Replacement

Infrastructure Repair service covers all Motorola Solutions, Inc-manufactured equipment, as well as equipment from select third-party infrastructure vendors. Factory trained and certified technicians troubleshoot, analyze, test, and repair your equipment at Motorola's IDO.

Infrastructure Repair with Advance Replacement will provide a customer with an Advanced Replacement unit(s) or FRU(s) in exchange for Customer's malfunctioning FRU(s), if stock is available. Non-standard configurations, Customer-modified Infrastructure and certain third party Infrastructure are excluded from Advanced Replacement service. Malfunctioning FRU (s) will be evaluated and repaired by IDO and returned to IDO FRU inventory upon completion of repair.

Replacement units and Field Replaceable units will be shipped directly to the Customer. Shipments will be made to customer prior to receiving the Customer's damaged unit in the service center. In NA calls must be received before 7 p.m. (EST) for the Infrastructure to ship the day the call is placed (excludes MSI-observed

holidays).

Onsite Infrastructure Response - Standard, Premier & Limited Options

Motorola OnSite Infrastructure Response provides local, trained and qualified technicians who arrive at your location to diagnose and restore a customer's communications network. All they have to do is make one phone call and their system response and restoration process begins immediately. Following proven response and restore processes, Motorola Dispatch (requires Dispatch Service) contacts the local authorized service center in their area and dispatches a qualified technician to their site. An automated escalation process ensures that technician site arrival and system restoration comply with contracted response times. The field technician will restore the system by performing first level trouble-shooting on-site. If the local technician is unable to resolve the problem, the escalation process includes intervention by Motorola System Support Center technologists or product engineering teams as needed (requires Technical Support service).

Dispatch Service

With Motorola Dispatch Service, all a customer has to do is make one phone call and their system response and restoration process begins immediately. Dispatch ensures that local, trained and qualified technicians will arrive at their location within hours to diagnose and restore their communications network. Following proven response and restoration processes, Motorola Dispatch contacts the local authorized service center in their area and dispatches a qualified technician to their site. An automated escalation process ensures that technician site arrival and system restoration comply with contracted response and restore times. Once the issue has been addressed, the System Support Center verifies resolution and with the customer's approval, closes the case. Activity records are also available to provide a comprehensive history of site performance, issues, and resolution.

Network Preventative Maintenance

Network Preventative Maintenance is a service that will provide an operational test and alignment, as applicable, on the customer's equipment (infrastructure or fixed network equipment only) to ensure the equipment meets original manufacturer's specifications. Motorola's large network of service helps the customer plan and schedule the annually preventative maintenance of their network to meet their operational timelines.

Network Preventative Maintenance assures that the customer's network is up and running in top condition. This service proactively detects those potential issues that may result if the equipment is not meeting original manufacturer's specifications. Customers can help prevent a system malfunction and minimize their costly repairs, thus managing their maintenance budget.

Motorola's technicians have immediate access to engineering design teams and multiple technology experts. The technicians are equipped with detailed checklists describing what and how the pieces of equipment need servicing. The customer can take advantage of the Network Preventative Maintenance service to maximize their network uptime.

Over 600 customers have entrusted their network support to Motorola with the Network Preventative Maintenance service. Many of these customers (Federal, State & Local Government, Police & Fire entities, etc) rely on this service to keep their systems performing consistently. Enhance the value of Motorola's service offerings by offering the customer such complementary services as Technical Support, OnSite Infrastructure Response, Infrastructure Repair, Network Monitoring, or many others.

NOTE: The terms and conditions of all Statement of Works (SOW) are an integral part of Motorola's Service Terms and Conditions or other applicable agreement to which it is attached and made a part thereof by this reference.

Statement of Work

One of the primary business objectives of the North American Group (NAG) is to promote the sales of STANDARD service products. Standards help to ensure consistent and profitable delivery of our service products to our customers. To that end, the customer Statement of Work for this Standard Service Product **CANNOT** be modified. All requests for modifications to STANDARD service products or the development of "custom" service products should be routed through the Solutions Planning process. Your first point of contact for these requests is your local Area Service Manager.

Definitions

Capitalized terms used in this Statement of Work and not otherwise defined within the Statement of Work or Communications System Agreement have the following meanings: [Click here](#)

All SOW's can be found on Insite ([Click here](#)) and will also be loaded and linked to the appropriate models in Services Life Cycle (SLC)

Ordering Requirements

This product cannot be ordered directly through COF at this time. This product must be ordered using the Service Lifecycle Application (SLC). Please contact your local Territory Service Lead (TSL), Customer Support Manager (CSM) or System Manager (SM) if you are interested in ordering this product.

Options for this product are based on the component parts of the complete system. Pricing is based on the size and complexity of the customer's system configuration such as the type of system, number of sites and number of products. To ensure accurate pricing, orders will not be processed or accepted if they do not include all systems components.

1. Enter the main line item as quantity one.
2. Options are required as sub-items, with the quantity equal to the option description.
3. All dollar amounts reflect an annual one year pricing.
4. A Customer Support Plan must be created to provide detailed information to the customer regarding delivery of this service.

Site ID & Technology Information

Site ID Prefix:

· AEXXXX – The letter "AE" should be used for all Astro 25 Express customers

Technology: All Sites should use **ASTRO EXPRESS** as the technology in order to build Install Base and price all SLC Contracts correctly.

ASTRO 25 Outdoor Location Solution

GPS Hardware

Ordering Information

General Information

Motorola's ASTRO 25 Outdoor Location Solution supports a variety of GPS units, a description of each is provided below. The units that are supported are outlined below:

Components	Integrated GPS	GPS RSM	Cellocator Olympic	Trimble Placer Gold APU	Trimble Placer Gold DRU Plus
Portable Radios					
APX 7000	x	N/A	N/A	N/A	N/A
XTS 5000	N/A	x	N/A	N/A	N/A
XTS 2500	N/A	x	N/A	N/A	N/A
Mobile Radios					
APX 7500	x	N/A	N/A	N/A	N/A
XTL 5000	N/A	N/A	x	x	x
XTL 2500	N/A	N/A	x	x	x
XTL 1500	N/A	N/A	x	x	x
ASTRO Spectra Plus	N/A	N/A	x	x	x
HPD1000 Modem w/	x	N/A	N/A	N/A	N/A

GPS					
-----	--	--	--	--	--

LIMITATIONS OF USE:

GPS works best in an open sky (clear view of the sky with no obstructions) environment. It should be noted that there are certain situations where there is no GPS coverage. This is due to the limitation of the GPS technology itself. Such situations include but are not limited to:

- In underground locations
- Inside of buildings, trains, or other covered vehicles
- Under any other metal or concrete roof or structure
- Between tall buildings or under dense tree-cover

Note: See the respective [APX 7000](#), [APX 7500](#), and [HPD1000](#) Price Pages for complete ordering instructions regarding their integrated GPS units.

Configuration

Ordering Instructions

This section will lead you through the necessary ordering steps required to add the GPS units to ASTRO 25 Outdoor Location Solution. For the APX series and HPD1000 Data Modem that have an integrated GPS, please consult their Price Page for Ordering Instructions.

GPS for Portable Radios: GPS Remote Speaker Microphones:

(One Remote Speaker Microphone is required for each XTS 2500 or XTS 5000 Portable Radio needing to be tracked, refer to the table at the bottom of this ECAT page for additional information.)

Description	Full Description	Nomenclature	APC	Price
SPKR MIC NON-SUBMSBL, GPS RSM	HMN4084 has the Earjack. Not compatible with Man-Down Side connector (NTN7660) or Clamshell Battery Holder (Q495, Q496, NTN9177, NTN9183). When used with XTS 2500, requires B version board. INCLUDES GPS RSM User guide (6881098C03).	HMN4084	372	\$350.00

Releasing Late Q1 2011: Updated GPS Remote Speaker Microphones:

(The two Motorola Part Numbers below are not yet orderable and will be direct substitutions to the RSM part numbers listed above. There is no change in pricing for this new version and the

items below are direct substitutions. One Remote Speaker Microphone is required for each XTS 2500 or XTS 5000 Portable Radio needing to be tracked, refer to the table at the bottom of this ECAT page for additional information.)

Available Late Q1 2011: HMN4106 (Replacement for HMN4080): GPS Remote Speaker Microphone without audio jack, submersible.

Available Late Q1 2011: HMN4107 (Replacement for HMN4084): GPS Remote Speaker Microphone with audio jack, IP54

GPS for Mobile Radios:

The GPS units for mobile radios listed below are third party hardware devices. They can be considered mix and match – you can mix and match the type of devices on the system, if desired. One GPS unit of any type listed below is required per mobile radio.

The following vehicle location solutions are available on ASTRO 25 Conventional IV&D and ASTRO 25 Trunking IV&D Systems. Subscribers must have version R09.00.00 or later of both Customer Programming Software (CPS) and Radio software and the W947 Data Option. For further ordering instructions, please refer to the Price Page for the Mobile Radio.

OPTION 1: Cellocator™ Olympic for ASTRO GPS and Telemetry Unit

The Cellocator™ Olympic for ASTRO GPS unit provides both GPS location and telemetry data. With five digital sensor inputs, including ignition on/off plus 4 variable inputs and an analog input to monitor the vehicle battery, the unit provides the ability for event-based reporting in your application. It communicates the location and telemetry information to the radio, which is sent to the dispatch operator. Configurations with a dashmount and roofmount antennas are available for purchase.

Click [HERE](#) for Brochure.

Step 1:

Order a Cellocator Olympic for ASTRO GPS Dashmount Installation Kit (*one kit is required per mobile radio*):

Description	Full Description	Nomenclature	APC	Price
ASTRO CELLOCATOR OLYMPIC DM GPS KIT	-	HKCN4001B	222	\$495.00

OR

Order a Cellocator Olympic for ASTRO GPS Roofmount Installation Kit (*one kit is required per mobile radio*):

Description	Full Description	Nomenclature	APC	Price
CELLOCATOR ASTRO EXT GPS KIT	-	HKLN4474	222	\$575.00

NOTE: The Cellocator Olympic for ASTRO GPS kit contains the GPS unit, vehicle harness, and either a dash or roof mount antenna. A separate RS-232 data cable for the mobile radio is required - please refer to the ECAT Price Page for your mobile radio for ordering instructions.

To add an external roof mount antenna to replace an existing dash mount installation, order part number HKAN4001A.

Description	Full Description	Nomenclature	APC	Price
CELLOCATOR EXTERNAL MOUNT GPS ANT	This item is for the Cellocator External Antenna only and is to be ordered to convert an existing Dashmount installation to a Roofmount installation.	HKAN4001	222	\$150.00

Step 2:

Order a Cellocator Olympic for ASTRO Programming Kit (*a minimum of one kit is required per system, but it is recommended that back-ups are purchased*). General rule of thumb - order 5% of the total number of Cellocator Olympic for ASTRO GPS Kits ordered in Step 1 above. Trimble and Cellocator Programming Parts are not interchangeable.

Description	Full Description	Nomenclature	APC	Price
CELLOCATOR PROGRAMMING KIT	Recommended to order 1 programming kit per 20 Cellocator Hardware models ordered.	HK1613B	222	\$45.00

NOTE: The Programming Kit contains the Cellocator Programming Cross Plug and the Cellocator Documentation / Software CD, which is required for the installation and configuration of the Cellocator GPS units.

A separate data cable for the mobile radio is required - please refer to the ECAT Price Page for your mobile radio for ordering instructions.

ASTRO 25
7.9 K, L, & M THROUGH 7.16 SUPPORT SERVICES

Ordering Information

Executive Summary

ASTRO 25® - Project 25 voice and data solution. Designed for mission critical users. Day to day radio network management is critical to ensure our customers systems are operational at all times

From single site to country-wide deployments, ASTRO 25 is a flexible, modular network with advanced call processing capabilities that is designed to meet the needs of public safety. ASTRO 25 can adapt and change to accommodate additional users, increased geographic coverage, enhanced data applications, and connectivity to other networks to ensure an efficient and cost effective future-ready solution.

The following support services offer critical coverage for all ASTRO 25 systems..

Service Description

Overview

ASTRO 25 Services are backed by Motorola's global integrated services and best in class technical support technicians, 900 Motorola Service Providers, and certified repair facilities. Adding Motorola premier services to your ASTRO 25 system provides proactive protection for your system and is available in multi-year agreements.

Technical Support

Technical Support service provides continuous centralized remote telephone support for technical issues that require a high level of ASTRO 25 solutions expertise or troubleshooting on ASTRO 25 equipment. Once a trouble call is received from the customer technical resource, Motorola immediately begins diagnosis of the event. This may also include remotely connecting and interrogating the ASTRO 25 system, running appropriate diagnostics, characterizing the problem, and remotely restoring the affected device or subsystem. If a remote fix is not possible, if the customer has a current Onsite Infrastructure Response & Dispatch service contract, a field technician will be dispatched to the site. Motorola will engage relevant engineering resources, as required, to resolve the issue.

Technical Infrastructure Repair & Infrastructure Repair with Advance Replacement

Infrastructure Repair service covers all Motorola Solutions, Inc-manufactured equipment, as well as equipment from select third-party infrastructure vendors. Factory trained and certified technicians troubleshoot, analyze, test, and repair your equipment at Motorola's IDO.

Infrastructure Repair with Advance Replacement will provide a customer with an Advanced Replacement unit(s) or FRU(s) in exchange for Customer's malfunctioning FRU(s), if stock is available. Non-standard configurations, Customer-modified Infrastructure and certain third party Infrastructure are excluded from Advanced Replacement service. Malfunctioning FRU (s) will be evaluated and repaired by IDO and returned to IDO FRU inventory upon completion of repair.

Motorola service differentiator: For customers that purchase Advanced replacement also receive a "Loaner" option for no service additional* charge. This allows customers to get a temporary FRU while we repair their original. Customers can keep their own components for asset tracking and inventory management.

*one-way shipping charges apply, see shipping charge matrix for more information.

Replacement units and Field Replaceable units will be shipped directly to the Customer. Shipments will be made to customer prior to receiving the Customer's damaged unit in the service center. In NA calls must be received before 7 p.m. (EST) for the Infrastructure to ship the day the call is placed (excludes MSI-observed holidays).

Onsite Infrastructure Response - Standard, Premier & Limited Options

Motorola OnSite Infrastructure Response provides local, trained and qualified technicians who arrive at your location to diagnose and restore a customer's communications network. All they have to do is make one phone call and their system response and restoration process begins immediately. Following proven response and restore processes, Motorola Dispatch (requires Dispatch Service) contacts the local authorized service center in their area and dispatches a qualified technician to their site. An automated escalation process ensures that technician site arrival and system restoration comply with contracted response times. The field technician will restore the system by performing first level trouble-shooting on-site. If the local technician is unable to resolve the problem, the escalation process includes intervention by Motorola System Support Center technologists or product engineering teams as needed (requires Technical Support service).

Onsite Infrastructure Response with Local Dispatch - Standard, Premier & Limited Options

With OnSite Infrastructure Response with Local Dispatch, Limited Option, technicians are dispatched from the MSS/FSO location directly to the customer site to perform diagnostics, remove failed components, and reinstall new or reconditioned components to restore the system.

Dispatch Service

With Motorola Dispatch Service, all a customer has to do is make one phone call and their system response and restoration process begins immediately. Dispatch ensures that local, trained and qualified technicians will arrive at their location within hours to diagnose and restore their communications network. Following proven response and restoration

processes, Motorola Dispatch contacts the local authorized service center in their area and dispatches a qualified technician to their site. An automated escalation process ensures that technician site arrival and system restoration comply with contracted response and restore times. Once the issue has been addressed, the System Support Center verifies resolution and with the customer's approval, closes the case. Activity records are also available to provide a comprehensive history of site performance, issues, and resolution.

Network Preventative Maintenance

Network Preventative Maintenance is a service that will provide an operational test and alignment, as applicable, on the customer's equipment (infrastructure or fixed network equipment only) to ensure the equipment meets original manufacturer's specifications. Motorola's large network of service helps the customer plan and schedule the annually preventative maintenance of their network to meet their operational timelines.

Network Preventative Maintenance assures that the customer's network is up and running in top condition. This service proactively detects those potential issues that may result if the equipment is not meeting original manufacturer's specifications. Customers can help prevent a system malfunction and minimize their costly repairs, thus managing their maintenance budget.

Motorola's technicians have immediate access to engineering design teams and multiple technology experts. The technicians are equipped with detailed checklists describing what and how the pieces of equipment need servicing. The customer can take advantage of the Network Preventative Maintenance service to maximize their network uptime. Over 600 customers have entrusted their network support to Motorola with the Network Preventative Maintenance service. Many of these customers (Federal, State & Local Government, Police & Fire entities, etc) rely on this service to keep their systems performing consistently. Enhance the value of Motorola's service offerings by offering the customer such complementary services as Technical Support, OnSite Infrastructure Response, Infrastructure Repair, Network Monitoring, or many others.

NOTE: The terms and conditions of all Statement of Works (SOW) are an integral part of Motorola's Service Terms and Conditions or other applicable agreement to which it is attached and made a part thereof by this reference.

Statement of Work

One of the primary business objectives of the North American Group (NAG) is to promote the sales of STANDARD service products. Standards help to ensure consistent and profitable delivery of our service products to our customers. To that end, the customer Statement of Work for this Standard Service Product **CANNOT** be modified. All requests for modifications to STANDARD service products or the development of "custom" service products should be routed through the Solutions Planning process. Your first point of contact for these requests is your local Area Service Manager.

Definitions

Capitalized terms used in this Statement of Work and not otherwise defined within the Statement of Work or Communications System Agreement have the following meanings: [Click here](#)

All SOW's can be found on the Astro25 Services Wiki ([Click here](#)) and will also be loaded and linked to the appropriate models in Oracle Services Life Cycle (SLC) 111

Ordering Requirements

This product cannot be ordered directly through COF at this time. This product must be ordered using the Service Lifecycle Application (SLC). Please contact your local Territory Service Lead (TSL), Customer Support Manager (CSM) or System Manager (SM) if you are interested in ordering ASTRO 25 services.

Service options are based on the component parts of the complete system. Pricing is based on the size and complexity of the customer's system configuration such as the type of system, number of sites and number of products. To ensure accurate pricing, orders will not be processed or accepted if they do not include all systems components.

1. Enter the main line item as quantity one.
2. Options are required as sub-items, with the quantity equal to the option description.
3. All dollar amounts reflect an annual one year pricing.
4. A Customer Support Plan must be created to provide detailed information to the customer regarding delivery of this service.

Note: Service Dependencies and Incompatibilities can be found on the eFlipbook.

Site ID & Technology Information

Site ID Prefix:

· AXXXX – The letter "A" should be used for all Astro 25 customers

Technology: All Sites should use ASTRO 25 along with a version release as the technology in order to build Install Base and price all SLC Contracts correctly.

Example: ASTRO25 7.15 M CORE

For more information on Site id's please refer to our [Service Enablement Converge Page](#)

General Information

ASTRO25 Systems Service Offering

- **ESSENTIAL** Technical support when and where you need it so you can maintain and restore your system.
- **ADVANCED** Rely on us to monitor & update your network, providing improved network response & continuity.
- **PREMIER** Transfer day-to-day accountability to us to operate and optimize all or part of your system to maximize performance and reduce risk.

Essential Services for ASTRO25 Systems

Essential Services provides support for your technicians when needed.

24x7x365 Technical Support: Gain access to Motorola system technologists to help troubleshoot and resolve network issues.

Network Hardware Repair: Factory-trained and certified technicians troubleshoot, analyze, test and repair all Motorola-manufactured and select third-party equipment at our centralized facility.

Self-Installed Security Patches: Provides the latest security updates pre-tested on a factory lab system running the same software version as your network to ensure no service disruption. Once validated, you can download and install when you're ready.

Contact your local CSM to know more or quote the above service package.

Essential Plus provides added field services to minimize network downtime.

Onsite Support: When remote resolution is not possible, a local field technician will be dispatched to the affected site to resolve the issue.

Annual Preventive Maintenance: Routine test and alignment of your infrastructure helps improve system efficiency and minimize network downtime.

Use [My View Portal](#) to get real-time insights on the health of your network, case management and performance trending reports to maximize network uptime and efficiency.

Contact your local CSM to know more or quote the above service package.

Advanced Services for ASTRO25 Systems

Advanced Services provides fast response to network issues by our qualified technicians who analyze and diagnose your network, as well as deliver routine maintenance.

Network Event Monitoring: Motorola connects securely and seamlessly to your infrastructure, and our dedicated, highly-trained staff proactively detects, troubleshoots and rapidly resolves network issues.

Annual Preventive Maintenance: Routine test and alignment of your infrastructure helps improve system efficiency and minimize network downtime.

Onsite Support: When remote resolution is not possible, a local field technician will be dispatched to the affected site to resolve the issue.

Remote Security Patch Installation: Proactive security updates are remotely applied by Motorola to help maintain operational integrity of your network and minimize cybersecurity risk.

Network Hardware Repair: Factory-trained and certified technicians troubleshoot, analyze, test and repair all Motorola-manufactured and select third-party equipment at our centralized facility.

24x7x365 Technical Support: Gain access to Motorola's system technologists to help troubleshoot and resolve network

Contact your local CSM to know more or quote the above service package.

Advanced Plus helps extend the lifespan of your network with planned upgrades in a cost effective way.

Network Upgrades: Get the necessary network upgrades, implementation and change management services required to maintain your network at the highest level of support. Upgrading your network ensures you attain the most value from your ASTRO 25 investment with the latest features and security enhancements.

Use [MyView Portal](#) to get real-time insights on the health of your network, case management and performance trending reports to maximize network uptime and efficiency.

Contact your local CSM to know more or quote the above service package.

Premier Services for ASTRO25 Systems

Description: Infrastructure Premier Services is a full set of managed services where Motorola takes care of day to day management and maintenance of your LMR network

Full Description: Premier Services provides you with a full set of services that address the support, maintenance, changes, management, repair, monitoring, cybersecurity, software and hardware upgrades required to keep your network operating at your target performance levels. Working with you, we define measurable service level agreements (SLAs) and key performance indicators (KPIs) so you can rest assured that your performance expectations are being met.

These services are delivered with industry-leading tools and ITIL based processes to ensure faster resolution of network issues, minimize interruptions and outages and proactively improve your overall experience of the services received.

They include:

Service Assurance • Problem Management • 24x7x365 Technical Support • Advanced Replacement for Network Hardware Repair • Remote Security Patch Installation • Onsite Support with Restoration SLA • Enhanced Preventive Maintenance • Network Upgrades • Change and Configuration Management • System Provisioning • Security Monitoring • Cybersecurity Risk Assessment • Backhaul Monitoring • Service Delivery Management • Performance Reporting

As a Premier Service customer, you will receive in-depth performance management reports to help you assess your overall system health. These reports are derived from terabytes of data contained in your system which we analyze to better act on potential faults, identify affected network elements, conduct root- cause analysis and improve the overall performance of your ASTRO 25 system.

Use [MyView Portal](#) to get real-time insights on the health of your network, case management and performance trending reports to maximize network uptime and efficiency.

Contact your local CSM to know more or quote the above set of premier services.

Configuration

Upgrade and/or Expand Existing K Core

These pages will lead you through the necessary steps to upgrade your ASTRO 25 7.9 or ASTRO 25 7.11, ASTRO 7.12 system to an ASTRO 25 7.13 system or to add-on additional features to an existing system. Please be sure to read each step carefully to ensure the factory will correctly build the product.

1. K-Core Upgrade and/or Expansion Supermodel

The following supermodel must be ordered for an upgrade or expansion to either a K1 or K2 configuration.

Description	Full Description	Nomenclature	APC	Price
K Core Upgrade or Expansion	-	SQM01SUM0250	405	\$0.00

IF you are only expanding from K1 to K2 and not upgrading, skip to step 9.

Choose the following option in order to upgrade your existing K Core. This provides the current release software for the core equipment: GCP 8000 Site Controller, GGM 8000 Gateway, and LAN switch.

Description	Full Description	Nomenclature	APC	Price
K CORE SOFTWARE UPGRADE	-	CA02257AA	425	\$4,700.00

2. Data

Choose the following option if your existing K Core system uses data. This will provide the current release software for the PDG and GGSN.

Description	Full Description	Nomenclature	APC	Price
ADD: INTEGRATED DATA UPGRADE	-	CA01888AB	425	\$14,000.00

3. Terminal Server

Choose the following option if your system uses a terminal server. This provides the current release software for the Terminal Server.

4. Firewall

Choose the following option if your system uses a firewall. This provides the current release software for the Firewall.

Description	Full Description	Nomenclature	APC	Price
FIREWALL UPGRADE	-	CA01887AA	425	\$100.00

5. MOSCAD NFM GMC

Choose the following option if your system uses a MOSCAD NFM GMC server. This provides the current release software for the MOSCAD NFM GMC.

Description	Full Description	Nomenclature	APC	Price
ADD: MOSCAD NFM 7.13 SW UPGRADE	Upgrade to A7.13	CA02155AA	382	\$12,800.00

Add-on Opportunities for Existing ASTRO 25 K Core

6. Add Integrated Data and/or MOSCAD NFM

This provides the hardware for the Integrated Data and MOSCAD NFM applications listed below

Description	Full Description	Nomenclature	APC	Price
-------------	------------------	--------------	-----	-------

DATA ENABLEMENT	-	CA02258AA	425	\$20,000.00
-----------------	---	-----------	-----	-------------

MOSCAD NFM GMC

This provides the current release software for the MOSCAD NFM GMC.

Description	Full Description	Nomenclature	APC	Price
MOSCAD NFM VIRT APP A7.13 A3.1	The MOSCAD NFM GMC Device Manager compliments the UEM by adding additional levels of device management. The GMC provides chassis view graphics of the equipment at the site, user defined historical alarm reports, equipment metering information, graphic display of analog data and remote control capability. Please see the MOSCAD NFM ordering guide for required client hardware & software and for the SDM3000 RTU and licenses. For M1 Cores, you can order a maximum quantity of two (2). For M2/M3 cores, you can order a maximum quantity of four (4).	CA02102AA	382	\$28,453.00

The **Add: Conventional Integrated Data** provides the GGSN, border gateway, DMZ switch, and all associated software. This option also includes your first 8 site licenses. If additional sites are needed, purchase the CA01534AA 8-Site License option.

Description	Full Description	Nomenclature	APC	Price
ADD: CONVENTIONAL INTEGRATED DATA	-	CA01740AB	425	\$75,450.00

If a firewall is not already present in the system, a firewall & firewall software will be required. (Step 8)

Order the following kit if data encryption is required for the GGSN.

Description	Full Description	Nomenclature	APC	Price
S6000 ENCRYPTION MODULE	Add Encryption	ST6016	454	\$1,000.00

Add Encryption

7. Add Encryption

GGM 8000 Encryption

If encryption is required on the GGM 8000 Gateway, order the TYN4000A for the Gateway Encryption module.

The quantities of encryption options for the core gateway must equal quantity one for ASTRO 25 K1 Cores and quantity two for ASTRO 25 K2 Cores. If the core has Integrated Data, an additional quantity of one will need to be ordered for the border gateway.

PDG Encryption

If your system has Integrated Data and data encryption is required, order the CDEM

Description	Full Description	Nomenclature	APC	Price
RS232 CABLE FOR CRYPTR	-	DLN6693	454	\$160.00
ASTRO 25 CONVENTIONAL DATA ENCRYPTION UNIT	-	T7618	137	\$750.00

Required Software:

Description	Full Description	Nomenclature	APC	Price
ADD: ASTRO 25 CDEM OPERATION	-	CA01535AA	137	\$6,500.00
ADD: DES-OFB DATA ENCRYPTION KIT	Optional: Add Other Core Equipment	CA00143AD	137	\$750.00
ADD: AES DATA ENCRYPTION	-	CA00182AT	137	\$750.00

Must select at least (1) single Encryption Kits:

- Select (1) AES Data Encryption Kit (CA00182AT)
- Select (1) DES-OFB Data Encryption Kit (CA00143AD)

CDEM Encryption Algorithms

If your system currently has the CDEM and you'd like to add AES or DES-OFB encryption algorithms, please refer to the CDEM Encryption Upgrade Kits in the price catalog.

Optional: Add Other Core Equipment

8. Other core equipment available for add-on or upgrade to your existing core:

Terminal Server

Description	Full Description	Nomenclature	APC	Price
TERMINAL SERVER	(16 Port)	T7385	147	\$6,500.00
SWITCH ROUTER TERMINAL SERVER SW	Software for the SRC, used for upgrading from release to release.	T7472	147	\$50.00

Firewall

Description	Full Description	Nomenclature	APC	Price
JUNIPER/FIREWALL GATEWAY	-	T7376	147	\$1,200.00
JUNIPER FIREWALL RECOVERY MEDIA	(For A7.13 and A7.14)	T7413	877	\$100.00

Interface Module (Channel Gateway) -

Available for K1 – Non-Redundant Core

Description	Full Description	Nomenclature	APC	Price
ANALOG/V.24 INTERFACE KIT	CCGW for Astro releases 7.11 and earlier	TYN4002	147	\$2,000.00
FRU: GGM 8000 ENCRYPTION (7.9 OR 7.11)	-	TYN4000	147	\$1,500.00

Expansion Opportunities for Existing ASTRO 25 K Core

1. Expand from a K1 to a K2 core (Add Redundancy)

Option CA0xxxx below will provide a GCP 8000 Site Controller, and the GGM 8000 Transport Gateway.

NOTE: In A7.13 the LAN and Backhaul switch is a HP 2620. In prior releases the LAN and Backhaul Switch was an HP 2610. Please select the appropriate switch for your system.

Description	Full Description	Nomenclature	APC	Price
-------------	------------------	--------------	-----	-------

ADD: Redundancy	-	CA02259AA	425	\$20,000.00
-----------------	---	-----------	-----	-------------

YOU must order a LAN switch and optional backhaul switches. Please order the appropriate FRU under a separate line item.

Description	Full Description	Nomenclature	APC	Price
2620-24 ETHERNET SWITCH	-	CLN1856	454	\$2,250.00

In addition, the following Cable/Mounting Hardware Kits are available to mount this equipment in your existing rack or cabinet. Must order one of these options.

Description	Full Description	Nomenclature	APC	Price
K CORE EXPANSION RACK KIT	-	DLN6853	425	\$250.00
K CORE EXPANSION CABINET KIT	Accessories / FRUs	DLN6854	425	\$250.00

Accessories / FRUs

Description	Full Description	Nomenclature	APC	Price
2620-24 ETHERNET SWITCH	-	CLN1856	454	\$2,250.00
ADD: AC POWER	-	CA01616AA	147	\$0.00
SPARE CABINET ASTRO 7.9 & BEYOND	Additional Resources	CVN6565	280	\$5,600.00
FRE: DL380 G8p LC 600-600	-	DVN4292	280	\$16,000.00
DVD DRIVE	-	DLN6866	280	\$136.00
FRU: DL380 G8p POWER SUPPLY	-	DLN6864	280	\$436.00
600 GB HARD DRIVE	Hard Drive for DL380 Server	DLN6865	454	\$761.00

FRU: POWER SUPPLY	This replaces DLN6568A and DLN6568B	DLN6781	112	\$2,200.00
GGM 8000 GATEWAY	-	SQM01SUM0205	147	\$5,250.00

Model

ASTRO® 25 Conventional**K1/K2 Core**

Ordering Information

General Information

The ASTRO®25 K1/K2 Core is targeted at small capacity conventional customers who require an ASTRO®25 conventional only system. The K-core allows customers to interface channels to an IP based MCC 7500 Console, provides a migration path for customers with fielded Motorola Conventional solutions, and allows the flexibility for customers to join a larger system in the future while maximizing their equipment investment.

The K-core is an IP capable solution from the RF channel to the operator position, and has been architected to provide flexibility in design in order to meet the needs of varying customers. Customers have the ability to add channels or sites, migrate channels, or join a regional system, all while utilizing their initial investment.

Capacity

The K Core will support the following capacities:

- 1-20 Consoles
- 1-5 Console sites
- 1-25 RF sites
- 1-30 ASTRO 25 Gateways
- 1-50 channels

Redundancy

Customers can optionally add redundancy to both the core equipment and site links. The K Core components in a non-redundant configuration (K1) include: one GCP 8000 Site Controller, one ASTRO 25 Gateway, and one LAN switch. A redundant configuration includes: redundant GCP 8000 Site Controllers, redundant ASTRO 25 Gateways, and two LAN switches.

System ID Information

In order to obtain a system ID for a K Core system:

The CSP short form needs to be completed for warranty support only IF no additional System Support Center services are purchased to establish an ID in the Clarify DB/system for Astro K-Core. The link to CSP short form and instructions are available at the following site: <http://compass.mot-solutions.com/go/233837513>.

Customer name, technical contacts as well as warranty start dates need to be included. The customer ID would follow this format: CVKxxxx (CVK is the prefix and the 'xxxx' would be the actual alpha-numeric ID assigned by the NSS Team).

If there will be additional services, the CSM needs to fill out an Install Base Template and submit to their regional NSS analyst.

Additional Information

For additional information on the K Core see: <http://compass.mot-solutions.com/web/astro25kcore>

Ordering Requirements

Required:

1. Order **redundant or non-redundant core**.
2. Order **rack or cabinet**. This includes all mounting hardware and cables.

Optional:

1. **Analog/v.24 Interface kit**. This is an option only for the non-redundant (K1) core. For a redundant (K2) core, or if additional channel capacity is required, additional GGM 8000 Gateway(s) with Analog/v.24 kits must be ordered via the GGM 8000 ECAT price page.
2. **Integrated Data / MOSCAD NFM**. This provides the hardware for the Integrated Data and MOSCAD NFM applications.
3. **Backhaul Switch**. NOTE: In 7.11 or later the backhaul switch for K Cores are optional (previously this was structured to supermodels SQM01SUM0237A and SQM01SUM0236A). If a backhaul switch is required, for K1 order Qty 1 backhaul switch, for K2 order Qty 2.
4. **Terminal Server**. This provides remote access into the system. Firewall is required if the Terminal Server is selected.
5. **Firewall**. This is required if either Integrated Data or a Terminal Server is selected.
6. **Encryption**. In the K Core, there are two types of encryption available: GGM 8000 Encryption and Data Encryption.

- GGM 8000 Encryption:

Gateway Encryption module must be ordered to encrypt the GGM 8000.

FIPS 140-2 Level 2 / Common Criteria Encryption must be ordered in addition to the gateway encryption module.

The quantities of encryption options must match the number of GGM 8000 gateways in the core configuration. Please see the table below for detailed guidance.

Core Type	Standard Encryption	FIPS 140-2 Level 2 Encryption
K1 (non-redundant)	Qty 1 CA02087AA	Qty 1 CA02087AA Qty 1 CA02134AA

K2 (redundant)	Qty 2 CA02087AA	Qty 2 CA02087AA Qty 2 CA02134AA
K1 + Integrated Data	Qty 2 CA02087AA	Qty 2 CA02087AA Qty 2 CA02134AA
K2 + Integrated Data	Qty 3 CA02087AA	Qty 3 CA02087AA Qty 3 CA02134AA

Data Encryption:

Integrated Data must be selected in order to select these data encryption options.

CDEM. This module encrypts the PDG (Packet Data Gateway).

AES and/or **DES-OFB.** One or both of these algorithm kits can be selected. One is required.

GGSN Encryption.

8. . If Anti-Virus is required, and you add console ops or put Configuration Manager on a standalone computer, you will need additional software and licenses. For every computer or server you add to the core, order quantity one (1) Symantec Endpoint Protection as a separate line item from the K1 or K2 supermodel. This provides both the Anti-Virus software and license.

9. **Windows Hardening.** The K core supports Windows Transparent Hardening. Order the Windows Transparent Hardening Supplemental CD to apply to your Windows servers and computers.

Configuration

Required: Order the Core

Redundant or Non-Redundant Core

One of the following main supermodels must be ordered.

Choose SQM01SUM0237A for a non-redundant core. This will generate the following equipment: one GCP 8000 Site Controller, one GGM 8000 Gateway, one LAN switch, Configuration Manager software and all associated software.

Choose SQM01SUM0236A for a redundant core. This will generate the following equipment: redundant GCP 8000 Site Controllers, redundant GGM 8000 Gateways, two LAN switches,

Configuration Manager software and all associated software.

Please note: The main supermodel does not include backhaul switch(es). The backhaul switch(es) must be ordered through the option CA01896AA

Description	Full Description	Nomenclature	APC	Price
SINGLE ZONE CONV NON-RED CORE	-	SQM01SUM0237	405	\$24,950.00
SINGLE ZONE CONV RED CORE -K2	Required: Order Rack or Cabinet	SQM01SUM0236	405	\$43,500.00

Required: Order Rack or Cabinet

Rack or Cabinet

Description	Full Description	Nomenclature	APC	Price
ADD: RACK	-	CA01663AB	183	\$495.00
ADD: CABINET	Optional: Order Additional Features	CA01664AB	183	\$3,000.00

Optional: Order Additional Features

Analog/v.24 Interface Kit

Provides the interface between the MCC 7500 console and ASTRO 25 Conventional (digital) base stations for digital conventional operation. Provides four (4) V.24 digital ports and four (4) 4-Wire with E&M analog ports.

Note the K1 core gateway can support a CCGW, but the K2 core gateways cannot support the CCGW. This option is not compatible with a K2 core.

If Conventional Integrated Data (CA01740AC) is needed for your system configuration, then do not order this option (CA01618AA) under the SQM01SUM0237A model. Order the Interface Kit from the GGM 8000 price pages. This must be placed on the same order to ensure staging will install the module.

Enhanced Conventional Gateway

The Enhanced Conventional Gateway modules provide increased port density for customers that require additional capacity. Also supported is the ability to directly connect analog audio to an analog logging solution without the use of an audio bridge, and migration to MCC 7500 consoles for customers with existing Centracom Gold consoles.

The Low Density ECCGW provides four (4) V.24 digital ports and four (4) 4-Wire with E&M analog ports. The High Density ECCGW provides eight (8) V.24 digital ports and eight (8) 4-

Wire with E&M analog ports.

Note the K1 core gateway can support a CCGW, but the K2 core gateways cannot support the CCGW. This option is not compatible with a K2 core.

If Conventional Integrated Data (CA01740AC) is needed for your system configuration, then do not order options (CA02141AA & CA02086AA) under the SQM01SUM0237A model. Order the Enhanced CCGW module from the GGM 8000 price pages. This must be placed on the same order to ensure staging will install the module.

Description	Full Description	Nomenclature	APC	Price
ADD: LOW DENSITY ENH CONV GATEWAY	4 port CCGW for Astro releases 7.12 and later	CA02141AA	147	\$3,000.00
ADD: HIGH DENSITY ENH CONV GATEWAY	8 port CCGW for Astro releases 7.12 and later	CA02086AA	147	\$6,000.00

Add Integrated Data and/or MOSCAD NFM

This provides the hardware for the Integrated Data and MOSCAD NFM applications listed below

Description	Full Description	Nomenclature	APC	Price
DATA ENABLEMENT	-	CA02258AA	425	\$20,000.00

If you select CA02258AA you will need to select one or both of the options listed below for MOSCAD or Integrated Data.

MOSCAD NFM GMC

This provides the current release software for the MOSCAD NFM GMC.

Description	Full Description	Nomenclature	APC	Price
ADD: MOSCAD NFM VIRTUAL APP A7.14_A3.1	The MOSCAD NFM GMC Device Manager compliments the UEM by adding additional levels of device management. The GMC provides chassis view graphics of the equipment at the site, user defined historical alarm reports, equipment metering information, graphic display of analog data and remote control capability. Please see	CA02399AA	382	\$28,453.00

	the MOSCAD NFM ordering guide for required client hardware & software and for the SDM3000 RTU and licenses. For M1 Cores, you can order a maximum quantity of two (2).			
--	--	--	--	--

Conventional Integrated Data

The **Add: Conventional Integrated Data** provides the GGSN, border gateway, DMZ switch, and all associated software. This option also includes your first 8 site licenses. If additional sites are needed, purchase the CA01534AA 8-Channel License option.

Description	Full Description	Nomenclature	APC	Price
ADD: CONVENTIONAL INTEGRATED DATA	Optional: Order Encryption	CA01740AC	405	\$75,450.00

If a firewall is not already present in the system, a firewall & firewall software will be required.

Optional: Order Encryption

If encryption is required on the GGM 8000 Gateway, order the CA02087AA option for the Gateway Encryption. If Common Criteria certification is required, also order CA02134AA. The CA02134AA option will also include FIPS 140-2 Level 2 Encryption.

If the option for Gateway Encryption (CA02087AA) is ordered along with Integrated Data (CA01740AC), order an additional quantity of one for the encryption options to add encryption capability to the border gateway.

For example, if Encryption and Common Criteria certification is required in a K2 redundant configuration, quantity 2 of CA02087AA and quantity 2 of CA02134AA must be ordered. If Integrated Data is also required, quantity 3 of CA02087AA and quantity 3 of CA02134AA must be ordered.

When these options are ordered, the quantity of the Encryption option (CA02087AA) and Common Criteria (CA02134AA) must be equal.

GGM 8000 Encryption

Description	Full Description	Nomenclature	APC	Price
ADD: ENCRYPTION (7.12 OR LATER)	Order one per each GGM 8000 gateway.	CA02087AA	147	\$1,500.00
ADD: COMMON CRITERIA	Encryption (CA02087AA) is required with this option. Order one per each GGM 8000 gateway.	CA02134AA	147	\$500.00

--	--	--	--	--

DATA Encryption

If Integrated Data is ordered, and data encryption is required, order the CDEM (CA01749AA) and select the appropriate encryption algorithm(s). Both algorithms may be selected.

Description	Full Description	Nomenclature	APC	Price
ADD: DATA ENCRYPTION	-	CA01749AA	425	\$7,300.00
ADD: AES DATA ENCRYPTION	-	CA00182AT	137	\$750.00
ADD: DES-OFB DATA ENCRYPTION KIT	-	CA00143AD	137	\$750.00

Terminal Server

Choose the following option if a terminal server is required.

Description	Full Description	Nomenclature	APC	Price
ADD: TERMINAL SERVER	-	CA01750AA	425	\$6,500.00

Firewall

Choose the following option if a terminal server is required. A Firewall is required if either integrated data or a terminal server is ordered. If a firewall is not already present in the system, a firewall & firewall software will be required. The CA01751AA option provides both.

Description	Full Description	Nomenclature	APC	Price
ADD: FIREWALL	-	CA01751AA	425	\$1,200.00

Backhaul Switch

Choose the following option if a backhaul switch is required. Ethernet Use Only. Non-redundant (K1) cores should order one (1); redundant (K2) cores should order two (2).

Description	Full Description	Nomenclature	APC	Price
ADD: BACKHAUL SWITCH	Accessories / FRUs	CA01896AB	425	\$2,250.00

Model

**ASTRO® 25 Conventional
K1/K2 Core Upgrade / Expansions**

Configuration

Upgrade and/or Expand Existing K Core

These pages will lead you through the necessary steps to upgrade your ASTRO 25 7.11 or ASTRO 25 7.12, ASTRO 7.13 system to an ASTRO 25 7.14 system or to add-on additional features to an existing system. Please be sure to read each step carefully to ensure the factory will correctly build the product.

1. K-Core Upgrade and/or Expansion Supermodel

The following supermodel must be ordered for an upgrade or expansion to either a K1 or K2 configuration.

Description	Full Description	Nomenclature	APC	Price
K Core Upgrade or Expansion	-	SQM01SUM0250	405	\$0.00

IF you are only expanding from K1 to K2 and not upgrading, skip to step 9.

Choose the following option in order to upgrade your existing K Core. This provides the current release software for the core equipment: GCP 8000 Site Controller, GGM 8000 Gateway, and LAN switch.

Description	Full Description	Nomenclature	APC	Price
K CORE SOFTWARE UPGRADE	-	CA02257AA	425	\$4,700.00

2. Data

Choose the following option if your existing K Core system uses data. This will provide the current release software for the PDG and GGSN.

Description	Full Description	Nomenclature	APC	Price
ADD: INTEGRATED DATA UPGRADE	-	CA01888AC	405	\$14,000.00

3. Terminal Server

Choose the following option if your system uses a terminal server. This provides the current release software for the Terminal Server.

4. Firewall

Choose the following option if your system uses a firewall. This provides the current release software for the Firewall.

Description	Full Description	Nomenclature	APC	Price
FIREWALL UPGRADE	-	CA01887AA	425	\$100.00

5. MOSCAD NFM GMC

Choose one of the following option if your system uses a MOSCAD NFM GMC server. This provides the current release software for the MOSCAD NFM GMC for your upgrade path. You need to determine first if you have EMB or OEM software and order the appropriate option:

Description	Full Description	Nomenclature	APC	Price
ADD: MOSCAD NFM VIRTUAL APP UPGRADE A7.13 EMB TO A7.14_A3.1 EMB	-	CA02408AA	382	\$12,800.00
ADD: MOSCAD NFM VIRTUAL APP UPGRADE A7.13 OEM TO A7.14_A3.1 EMB	Add-on Opportunities for Existing ASTRO 25 K Core	CA02410AA	382	\$12,800.00
ADD: MOSCAD NFM VIRTUAL APP UPGRADE A7.11 OEM TO A7.14_A3.1 EMB	-	CA02406AA	382	\$12,800.00

Add-on Opportunities for Existing ASTRO 25 K Core

6. Add Integrated Data and/or MOSCAD NFM

This provides the hardware for the Integrated Data and MOSCAD NFM applications listed below

Description	Full Description	Nomenclature	APC	Price
DATA ENABLEMENT	-	CA02258AA	425	\$20,000.00

If you select CA02258AA you will need to select one or both of the options listed below for MOSCAD or Integrated Data. This option is compatible with A7.13 and newer systems only. If adding Data to a release prior to A7.13 please contact your System Engineer.

MOSCAD NFM GMC

This provides the current release software for the MOSCAD NFM GMC.

Description	Full Description	Nomenclature	APC	Price
ADD: MOSCAD NFM VIRTUAL APP A7.14_A3.1	The MOSCAD NFM GMC Device Manager compliments the UEM by adding additional levels of device management. The GMC provides chassis view graphics of the equipment at the site, user defined historical alarm reports, equipment metering information, graphic display of analog data and remote control capability. Please see the MOSCAD NFM ordering guide for required client hardware & software and for the SDM3000 RTU and licenses. For M1 Cores, you can order a maximum quantity of two (2).	CA02399AA	382	\$28,453.00

Conventional Integrated Data

Provides the GGSN, border gateway, DMZ switch, and all associated software. This option also includes your first 8 site licenses. If additional sites are needed, purchase the CA01534AA 8-Site License option.

Description	Full Description	Nomenclature	APC	Price
ADD: CONVENTIONAL INTEGRATED DATA	-	CA01740AC	405	\$75,450.00

If a firewall is not already present in the system, a firewall & firewall software will be required. (Step 8)

Order the following kit if data encryption is required for the Border Gateway.

Description	Full Description	Nomenclature	APC	Price
-------------	------------------	--------------	-----	-------

S6000 ENCRYPTION MODULE	Add Encryption	ST6016	454	\$1,000.00
-------------------------	----------------	--------	-----	------------

Add Encryption

7. Add Encryption

GGM 8000 Encryption

If encryption is required on the GGM 8000 Gateway, order the TYN4000A for the Gateway Encryption module.

The quantities of encryption options for the core gateway must equal quantity one for ASTRO 25 K1 Cores and quantity two for ASTRO 25 K2 Cores. If the core has Integrated Data, an additional quantity of one will need to be ordered for the border gateway.

Description	Full Description	Nomenclature	APC	Price
FRU: GGM 8000 ENCRYPTION (7.9 OR 7.11)	-	TYN4000	147	\$1,500.00

PDG Encryption

If your system has Integrated Data and data encryption is required, order the CDEM.

Required Hardware:

Description	Full Description	Nomenclature	APC	Price
ASTRO 25 CONVENTIONAL DATA ENCRYPTION UNIT	-	T7618	137	\$750.00
RS232 CABLE FOR CRYPTR	-	DLN6693	454	\$160.00

If Integrated Data is ordered, and data encryption is required, order the CDEM (CA01749AA) and select the appropriate encryption algorithm(s). Both algorithms may be selected.

Description	Full Description	Nomenclature	APC	Price
ADD: DATA ENCRYPTION	-	CA01749AA	425	\$7,300.00
ADD: AES DATA ENCRYPTION	-	CA00182AT	137	\$750.00

ADD: DES-OFB DATA ENCRYPTION KIT	Optional: Add Other Core Equipment	CA00143AD	137	\$750.00
----------------------------------	------------------------------------	-----------	-----	----------

Required Software:

Description	Full Description	Nomenclature	APC	Price
ADD: ASTRO 25 CDEM OPERATION	-	CA01535AA	137	\$6,500.00
ADD: AES DATA ENCRYPTION	-	CA00182AT	137	\$750.00
ADD: DES-OFB DATA ENCRYPTION KIT	Optional: Add Other Core Equipment	CA00143AD	137	\$750.00

Must select at least (1) single Encryption Kits:

- Select (1) AES Data Encryption Kit (CA00182AT)
- Select (1) DES-OFB Data Encryption Kit (CA00143AD)

CDEM Encryption Algorithms

If your system currently has the CDEM and you'd like to add AES or DES-OFB encryption algorithms, please refer to the CDEM Encryption Upgrade Kits in the price catalog.

Optional: Add Other Core Equipment

8. Other core equipment available for add-on or upgrade to your existing core:

Terminal Server

Description	Full Description	Nomenclature	APC	Price
TERMINAL SERVER	(16 Port)	T7385	147	\$6,500.00
SWITCH ROUTER TERMINAL SERVER SW	Software for the SRC, used for upgrading from release to release.	T7472	147	\$50.00

Firewall

Description	Full Description	Nomenclature	APC	Price
JUNIPER/FIREWALL GATEWAY	-	T7376	147	\$1,200.00

JUNIPER FIREWALL RECOVERY MEDIA	(For A7.13 and A7.14)	T7413	877	\$100.00
---------------------------------	-----------------------	-------	-----	----------

Interface Module (Channel Gateway) -

Available for K1 – Non-Redundant Core

Note the K1 core gateway can support a CCGW, but the K2 core gateways cannot support the CCGW. This option is not compatible with a K2 core. CA02141AA and CA02186AA are only compatible with A7.13 and beyond.

Description	Full Description	Nomenclature	APC	Price
ANALOG/V.24 INTERFACE KIT	CCGW for Astro releases 7.11 and earlier	TYN4002	147	\$2,000.00

Expansion Opportunities for Existing ASTRO 25 K Core

1. Expand from a K1 to a K2 core (Add Redundancy)

Option CA02259AA below will provide a GCP 8000 Site Controller, and the GGM 8000 Transport Gateway. When expanding a K1 core to a K2 core redundant configuration, the core GGM8000 gateways cannot be used as CCGWs. As a result, if the existing K1 core has the core GGM8000 being used as a CCGW, a dedicated GGM8000 with CCGW will need to be ordered to interface to those conventional channels.

Description	Full Description	Nomenclature	APC	Price
ADD: Redundancy	-	CA02259AA	425	\$20,000.00

YOU must order a LAN switch and optional backhaul switches. Please order the appropriate FRU under a separate line item.

NOTE: In A7.13 the LAN and Backhaul switch is a HP 2620. In prior releases the LAN and Backhaul Switch was an HP 2610. Please select the appropriate switch for your system.

Description	Full Description	Nomenclature	APC	Price
2620-24 ETHERNET SWITCH	-	CLN1856	454	\$2,250.00

In addition, the following Cable/Mounting Hardware Kits are available to mount this equipment in your existing rack or cabinet. Must order one of these options.

Description	Full Description	Nomenclature	APC	Price
K CORE EXPANSION RACK KIT	-	DLN6853	425	\$250.00

K CORE EXPANSION CABINET KIT	Accessories / FRUs	DLN6854	425	\$250.00

Model

**ASTRO® 25 Conventional
7.15 K Core**

Ordering Information

[Ordering Guide](#)

General Information

The ASTRO®25 K Core is targeted at small capacity conventional customers who require an ASTRO®25 conventional only system. The K-core allows customers to interface channels to an IP based MCC 7500 Console, provides a migration path for customers with fielded Motorola Conventional solutions, and allows the flexibility for customers to join a larger system in the future while maximizing their equipment investment.

The K-core is an IP capable solution from the RF channel to the operator position, and has been architected to provide flexibility in design in order to meet the needs of varying customers. Customers have the ability to add channels or sites, migrate channels, or join a regional system, all while utilizing their initial investment.

Capacity

The K Core will support the following capacities:

- 1-20 Consoles
- 1-5 Console sites
- 1-25 RF sites
- 1-30 ASTRO 25 Gateways
- 1-50 channels

Redundancy

Customers can optionally add redundancy to both the core equipment and site links. The K Core components in a non-redundant configuration include: one GCP 8000 Site Controller, one ASTRO 25 Gateway, and one LAN switch. A redundant configuration includes: redundant GCP 8000 Site Controllers, redundant ASTRO 25 Gateways, and two LAN switches.

System ID Information

In order to obtain a system ID for a K Core system:

The CSP short form needs to be completed for warranty support only IF no additional System Support Center services are purchased to establish an ID in the Clarify DB/system for Astro K-Core. The link to CSP short form and instructions are available at the following

site: <http://compass.mot-solutions.com/go/233837513>.

Customer name, technical contacts as well as warranty start dates need to be included. The customer ID would follow this format: CVKxxxx (CVK is the prefix and the 'xxxx' would be the actual alpha-numeric ID assigned by the NSS Team).

If there will be additional services, the CSM needs to fill out an Install Base Template and submit to their regional NSS analyst.

Additional Information

For additional information on the K Core see: <http://compass.mot-solutions.com/web/astro25kcore>

Ordering Requirements

Required:

1. Order **redundant or non-redundant core**.
2. Order **rack or cabinet**. This includes all mounting hardware and cables.

Optional:

1. **Analog/v.24 Interface kit**. This is an option only for the non-redundant (K1) core. For a redundant (K2) core, or if additional channel capacity is required, additional GGM 8000 Gateway(s) with Analog/v.24 kits must be ordered via the GGM 8000 ECAT price page.
2. **Integrated Data / MOSCAD NFM**. This provides the hardware for the Integrated Data and MOSCAD NFM applications.
3. **Backhaul Switch**. NOTE: In 7.11 or later the backhaul switch for K Cores are optional (previously this was structured to supermodels SQM01SUM0237A and SQM01SUM0236A). If a backhaul switch is required, for K1 order Qty 1 backhaul switch, for K2 order Qty 2.
4. **Terminal Server**. This provides remote access into the system. Firewall is required if the Terminal Server is selected.
5. **Firewall**. This is required if either Integrated Data or a Terminal Server is selected.
6. **Encryption**. In the K Core, there are two types of encryption available: GGM 8000 Encryption and Data Encryption.

- GGM 8000 Encryption:

Gateway Encryption module must be ordered to encrypt the GGM 8000.

FIPS 140-2 Level 2 / Common Criteria Encryption must be ordered in addition to the gateway encryption module.

The quantities of encryption options must match the number of GGM 8000 gateways in the core configuration. Please see the table below for detailed guidance.

Core Type	Standard Encryption	FIPS 140-2 Level 2 Encryption Qty 1
-----------	---------------------	-------------------------------------

K1 (non- redundant)	Qty 1 CA02087AA	CA02087AA Qty 1 CA02134AA Qty 2
K2 (redundant)	Qty 2 CA02087AA	CA02087AA Qty 2 CA02134AA Qty 3
K1 + Integrated Data	Qty 3 CA02087AA	CA02087AA Qty 3 CA02134AA Qty 4
K2 + Integrated Data	Qty 4 CA02087AA	CA02087AA Qty 4 CA02134AA

Data Encryption:

Integrated Data must be selected in order to select these data encryption options.

CDEM. This module encrypts the PDG (Packet Data Gateway).

AES and/or DES-OFB. One or both of these algorithm kits can be selected. One is required.

GGSN Encryption.

8. . If Anti-Virus is required, and you add console ops or put Configuration Manager on a standalone computer, you will need additional software and licenses. For every computer or server you add to the core, order quantity one (1) Symantec Endpoint Protection as a separate line item from the K1 or K2 supermodel. This provides both the Anti-Virus software and license.

9. **Windows Hardening.** The K core supports Windows Transparent Hardening. Order the Windows Transparent Hardening Supplemental CD to apply to your Windows servers and computers.

[GGM 8000 Gateway Page](#)

Configuration

Required: Order the Core

Redundant or Non-Redundant Core

The following main supermodel must be ordered.

No Redundant K Core will generate the following equipment: one GCP 8000 Site Controller, one GGM 8000 Gateway, one LAN switch, Configuration Manager software and all associated software.

Choose CA02259AA for a redundant core. This will generate the following equipment: redundant GCP 8000 Site Controllers, redundant GGM 8000 Gateways, two LAN switches, Configuration Manager software and all associated software. When expanding a Non-Redundant K Core to a Redundant K Core configuration, the core GGM 8000 gateways cannot be used as CCGWs.

Description	Full Description	Nomenclature	APC	Price
SINGLE ZONE CONV NON-RED CORE	-	SQM01SUM0237	405	\$24,950.00
ADD: Redundancy	Required: Order Rack or Cabinet	CA02259AA	425	\$20,000.00

Required: Order Rack or Cabinet

Rack or Cabinet

Description	Full Description	Nomenclature	APC	Price
ADD: RACK	-	CA01663AB	183	\$495.00
ADD: CABINET	Optional: Order Additional Features	CA01664AB	183	\$3,000.00

Optional: Order Additional Features

Analog/v.24 Interface Kit

Provides the interface between the MCC 7500 console and ASTRO 25 Conventional (digital) base stations for digital conventional operation. Provides four (4) V.24 digital ports and four (4) 4-Wire with E&M analog ports.

Note the K1 core gateway can support a CCGW, but the K2 core gateways cannot support the CCGW. This option is not compatible with a K2 core.

If Conventional Integrated Data (CA01740AC) is needed for your system configuration, then do not order this option (CA01618AA) under the SQM01SUM0237A model. Order the Interface Kit from the GGM 8000 price pages. This must be placed on the same order to ensure staging will install the module.

Enhanced Conventional Gateway

The Enhanced Conventional Gateway modules provide increased port density for customers

that require additional capacity. Also supported is the ability to directly connect analog audio to an analog logging solution without the use of an audio bridge, and migration to MCC 7500 consoles for customers with existing Centracom Gold consoles.

The Low Density ECCGW provides four (4) V.24 digital ports and four (4) 4-Wire with E&M analog ports. The High Density ECCGW provides eight (8) V.24 digital ports and eight (8) 4-Wire with E&M analog ports.

Note the K1 core gateway can support a CCGW, but the K2 core gateways cannot support the CCGW. This option is not compatible with a K2 core.

If Conventional Integrated Data (CA01740AC) is needed for your system configuration, then do not order options (CA02141AA & CA02086AA) under the SQM01SUM0237A model. Order the Enhanced CCGW module from the GGM 8000 price pages. This must be placed on the same order to ensure staging will install the module.

Description	Full Description	Nomenclature	APC	Price
ADD: LOW DENSITY ENH CONV GATEWAY	4 port CCGW for Astro releases 7.12 and later	CA02141AA	147	\$3,000.00
ADD: HIGH DENSITY ENH CONV GATEWAY	8 port CCGW for Astro releases 7.12 and later	CA02086AA	147	\$6,000.00

Add Integrated Data and/or MOSCAD NFM

This provides the hardware for the Integrated Data and MOSCAD NFM applications listed below

Description	Full Description	Nomenclature	APC	Price
DATA ENABLEMENT	-	CA02258AA	425	\$20,000.00

If you select CA02258AA you will need to select one or both of the options listed below for MOSCAD and/or Integrated Data. In addition you will need to order Qty 1 of T8177 - VMWARE VSPHERE 1-CPU License.

MOSCAD NFM GMC

This provides the current release software for the MOSCAD NFM GMC.

Description	Full Description	Nomenclature	APC	Price
ADD: MOSCAD NFM VIRTUAL APP A7.15_A3.1	-	CA02634AA	382	\$28,453.00

Conventional Integrated Data

The **Add: Conventional Integrated Data** provides the GGSN, border gateway, DMZ switch, and all associated software. This option also includes your first 8 site licenses. If additional sites are needed, purchase the CA01534AA 8-Channel License option.

Description	Full Description	Nomenclature	APC	Price
ADD:CONVENTIONAL INTEGRATED DATA	Optional: Order Encryption	CA01740AD	405	\$75,450.00

If a firewall is not already present in the system, a firewall & firewall software will be required.

Optional: Order Encryption

If encryption is required on the GGM 8000 Gateway, order the CA02087AA option for the Gateway Encryption. If Common Criteria certification is required, also order CA02134AA. The CA02134AA option will also include FIPS 140-2 Level 2 Encryption.

If the option for Gateway Encryption (CA02087AA) is ordered along with Integrated Data (CA01740AC), order an additional quantity of one for the encryption options to add encryption capability to the border gateway.

For example, if Encryption and Common Criteria certification is required in a K2 redundant configuration, quantity 2 of CA02087AA and quantity 2 of CA02134AA must be ordered. If Integrated Data is also required, quantity 3 of CA02087AA and quantity 3 of CA02134AA must be ordered.

When these options are ordered, the quantity of the Encryption option (CA02087AA) and Common Criteria (CA02134AA) must be equal.

GGM 8000 Encryption

Description	Full Description	Nomenclature	APC	Price
ADD: ENCRYPTION (7.12 OR LATER)	Order one per each GGM 8000 gateway.	CA02087AA	147	\$1,500.00
ADD: COMMON CRITERIA	Encryption (CA02087AA) is required with this option. Order one per each GGM 8000 gateway.	CA02134AA	147	\$500.00

DATA Encryption

If Integrated Data is ordered, and data encryption is required, order the CDEM (CA01749AA)

and select the appropriate encryption algorithm(s). Both algorithms may be selected.

Description	Full Description	Nomenclature	APC	Price
ADD: DATA ENCRYPTION	-	CA01749AA	425	\$7,300.00
ADD: DES-OFB DATA ENCRYPTION KIT	-	CA00143AD	137	\$750.00
ADD: AES DATA ENCRYPTION	-	CA00182AT	137	\$750.00

Terminal Server

Choose the following option if a terminal server is required.

ADD: TERMINAL SERVER

Description	Full Description	Nomenclature	APC	Price
ADD: TERMINAL SERVER	-	CA01750AA	425	\$6,500.00

Firewall

Choose the following option if a terminal server is required. A Firewall is required if either integrated data or a terminal server is ordered. If a firewall is not already present in the system, a firewall & firewall software will be required. The CA02635AA option provides both.

Description	Full Description	Nomenclature	APC	Price
ADD: Fortinet Firewall Appliance	-	CA02635AA	425	\$3,300.00

Backhaul Switch

Choose the following option if a backhaul switch is required. Ethernet Use Only. Non-redundant (K1) cores should order one (1); redundant (K2) cores should order two (2).

Description	Full Description	Nomenclature	APC	Price
ADD: BACKHAUL SWITCH	Accessories / FRUs	CA01896AB	425	\$2,250.00

Model

**ASTRO® 25 Conventional
K1/K2 Core Upgrade / Expansions**

Configuration

Upgrade and/or Expand Existing K Core

NOTE: For detailed information on Orderability and option descriptions check the Ordering Guide at http://compass.mot-solutions.com/doc/469104796/K1K2_Upgrade_Expansion_Ordering_Guide_7_15.doc

These pages will lead you through the necessary steps to upgrade your ASTRO 25 7.11 or ASTRO 25 7.12, ASTRO 7.13 system, ASTRO 25 7.14 to an ASTRO 25 7.15 system or to add-on additional features to an existing system. Please be sure to read each step carefully to ensure the factory will correctly build the product.

1. K-Core Upgrade and/or Expansion Supermodel

The following supermodel must be ordered for an upgrade or expansion to either a K1 or K2 configuration.

Description	Full Description	Nomenclature	APC	Price
K Core Upgrade or Expansion	-	SQM01SUM0250	405	\$0.00

IF you are only expanding from K1 to K2 and not upgrading, skip to step 9.

Choose the following option in order to upgrade your existing K Core. This provides the current release software for the core equipment: GCP 8000 Site Controller, GGM 8000 Gateway, and LAN switch.

Description	Full Description	Nomenclature	APC	Price
K CORE SOFTWARE UPGRADE	-	CA02257AA	425	\$4,700.00

2. Data

Choose the following option if your existing K Core system uses data. This will provide the current release software for the PDG and GGSN.

--	--	--	--	--

Description	Full Description	Nomenclature	APC	Price
ADD: INTEGRATED DATA UPGRADE	-	CA01888AD	405	\$14,000.00

3. Terminal Server

Choose the following option if your system uses a terminal server. This provides the current release software for the Terminal Server.

4. Firewall

Choose the following option if your system uses a firewall. This provides the current release software for the Firewall.

Description	Full Description	Nomenclature	APC	Price
FIREWALL UPGRADE	-	CA01887AA	425	\$100.00

5. MOSCAD NFM GMC

Choose one of the following option if your system uses a MOSCAD NFM GMC server. This provides the current release software for the MOSCAD NFM GMC for your upgrade path. You need to determine first if you have EMB or OEM software and order the appropriate option:

Description	Full Description	Nomenclature	APC	Price
ADD:MOSCAD NFM VIRTUAL APP UPGRADE 7.14 EMB TO 7.15 EMB	-	CA02665AA	382	\$12,800.00
ADD:MOSCAD NFM VIRTUAL APP UPGRADE 7.13 OEM TO 7.15 EMB	Add-on Opportunities for Existing ASTRO 25 K Core	CA02666AA	382	\$12,800.00

Add-on Opportunities for Existing ASTRO 25 K Core

6. Add Integrated Data and/or MOSCAD NFM

This provides the hardware for the Integrated Data and MOSCAD NFM applications listed below

Description	Full Description	Nomenclature	APC	Price
DATA ENABLEMENT	-	CA02258AA	425	\$20,000.00

If you select CA02258AA you will need to select one or both of the options listed below for MOSCAD or Integrated Data. This option is compatible with A7.13 and newer systems only. If adding Data to a release prior to A7.13 please contact your System Engineer.

MOSCAD NFM GMC

This provides the current release software for the MOSCAD NFM GMC.

Description	Full Description	Nomenclature	APC	Price
ADD: MOSCAD NFM VIRTUAL APP A7.15_A3.1	-	CA02634AA	382	\$28,453.00

Conventional Integrated Data

Provides the GGSN, border gateway, DMZ switch, and all associated software. This option also includes your first 8 site licenses. If additional sites are needed, purchase the CA01534AA 8-Site License option.

Description	Full Description	Nomenclature	APC	Price
ADD:CONVENTIONAL INTEGRATED DATA	Add Encryption	CA01740AD	405	\$75,450.00

Add Encryption

7. Add Encryption

GGM 8000 Encryption

If encryption is required on the GGM 8000 Gateway, order the TYN4000A for the Gateway Encryption module.

The quantities of encryption options for the core gateway must equal quantity one for ASTRO 25 K1 Cores and quantity two for ASTRO 25 K2 Cores. If the core has Integrated Data, an additional quantity of one will need to be ordered for the border gateway.

Description	Full Description	Nomenclature	APC	Price
FRU: GGM 8000 ENCRYPTION (7.9 OR 7.11)	-	TYN4000	147	\$1,500.00

PDG Encryption

If your system has Integrated Data and data encryption is required, order the CDEM.

Required Hardware:

Description	Full Description	Nomenclature	APC	Price
ASTRO 25 CONVENTIONAL DATA ENCRYPTION UNIT	-	T7618	137	\$750.00
RS232 CABLE FOR CRYPTR	-	DLN6693	454	\$160.00

If Integrated Data is ordered, and data encryption is required, order the CDEM (CA01749AA) and select the appropriate encryption algorithm(s). Both algorithms may be selected.

Description	Full Description	Nomenclature	APC	Price
ADD: DATA ENCRYPTION	-	CA01749AA	425	\$7,300.00
ADD: DES-OFB DATA ENCRYPTION KIT	Optional: Add Other Core Equipment	CA00143AD	137	\$750.00
ADD: AES DATA ENCRYPTION	-	CA00182AT	137	\$750.00

Required Software:

Description	Full Description	Nomenclature	APC	Price
ADD: ASTRO 25 CDEM OPERATION	-	CA01535AA	137	\$6,500.00
ADD: DES-OFB DATA ENCRYPTION KIT	Optional: Add Other Core Equipment	CA00143AD	137	\$750.00
ADD: AES DATA ENCRYPTION	-	CA00182AT	137	\$750.00

Optional: Add Other Core Equipment

8. Other core equipment available for add-on or upgrade to your existing core:

Terminal Server

Description	Full Description	Nomenclature	APC	Price
-------------	------------------	--------------	-----	-------

TERMINAL SERVER	(16 Port)	T7385	147	\$6,500.00
SWITCH ROUTER TERMINAL SERVER SW	Software for the SRC, used for upgrading from release to release.	T7472	147	\$50.00

Firewall

Description	Full Description	Nomenclature	APC	Price
FORTINET FIREWALL RECOVERY MEDIA	(For A7.15 and later)	T8128	147	\$100.00
FORTINET FIREWALL APPLIANCE	(Firewall for A7.15 and later)	T8126	147	\$3,200.00

Interface Module (Channel Gateway) -

Available for K1 – Non-Redundant Core

Note the K1 core gateway can support a CCGW, but the K2 core gateways cannot support the CCGW. This option is not compatible with a K2 core. CA02141AA and CA02186AA are only compatible with A7.13 and beyond.

Description	Full Description	Nomenclature	APC	Price
ANALOG/V.24 INTERFACE KIT	CCGW for Astro releases 7.11 and earlier	TYN4002	147	\$2,000.00

Expansion Opportunities for Existing ASTRO 25 K Core

1. Expand from a K1 to a K2 core (Add Redundancy)

Option CA02259AA below will provide a GCP 8000 Site Controller, and the GGM 8000 Transport Gateway. When expanding a K1 core to a K2 core redundant configuration, the core GGM8000 gateways cannot be used as CCGWs. As a result, if the existing K1 core has the core GGM8000 being used as a CCGW, a dedicated GGM8000 with CCGW will need to be ordered to interface to those conventional channels.

Description	Full Description	Nomenclature	APC	Price
ADD: Redundancy	-	CA02259AA	425	\$20,000.00

YOU must order a LAN switch and optional backhaul switches. Please order the appropriate

FRU under a separate line item.

When the cores is expanded with option CA02259AA, an additional backhaul switch is required

Description	Full Description	Nomenclature	APC	Price
ADD: BACKHAUL SWITCH	-	CA01896AB	425	\$2,250.00

In addition, the following Cable/Mounting Hardware Kits are available to mount this equipment in your existing rack or cabinet. Must order one of these options.

Description	Full Description	Nomenclature	APC	Price
K CORE EXPANSION RACK KIT	-	DLN6853	425	\$250.00
K CORE EXPANSION CABINET KIT	Accessories / FRUs	DLN6854	425	\$250.00

Accessories / FRUs

Model

ASTRO® 25 Conventional
7.16 K Core

Ordering Information

[Ordering Guide](#)

General Information

The ASTRO®25 K Core is targeted at small capacity conventional customers who require an ASTRO®25 conventional only system. The K-core allows customers to interface channels to an IP based MCC 7500 Console, provides a migration path for customers with fielded Motorola Conventional solutions, and allows the flexibility for customers to join a larger system in the future while maximizing their equipment investment.

The K-core is an IP capable solution from the RF channel to the operator position, and has been architected to provide flexibility in design in order to meet the needs of varying customers. Customers have the ability to add channels or sites, migrate channels, or join a regional system, all while utilizing their initial investment.

Capacity

The K Core will support the following capacities:

- 1-20 Consoles
- 1-5 Console sites
- 1-25 RF sites
- 1-30 ASTRO 25 Gateways
- 1-75 channels

Redundancy

Customers can optionally add redundancy to both the core equipment and site links. The K Core components in a non-redundant configuration include: one GCP 8000 Site Controller, one ASTRO 25 Gateway, and one LAN switch. A redundant configuration includes: redundant GCP 8000 Site Controllers, redundant ASTRO 25 Gateways, and two LAN switches.

System ID Information

In order to obtain a system ID for a K Core system:

The CSP short form needs to be completed for warranty support only IF no additional System Support Center services are purchased to establish an ID in the Clarify DB/system for Astro K-Core. The link to CSP short form and instructions are available at the following

site: [CSP Short Form and Instructions](#).

Customer name, technical contacts as well as warranty start dates need to be included. The customer ID would follow this format: CVKxxxx (CVK is the prefix and the 'xxxx' would be the actual alpha-numeric ID assigned by the NSS Team).

If there will be additional services, the CSM needs to fill out an Install Base Template and submit to their regional NSS analyst.

Configuration

Required: Order the Core

Redundant or Non-Redundant Core

The following main supermodel must be ordered.

Non Redundant K Core will generate the following equipment: one GCP 8000 Site Controller, one GGM 8000 Gateway, one LAN switch, Configuration Manager software and all associated software.

Choose CA02259AA for a redundant core. This will generate the following equipment: redundant GCP 8000 Site Controllers, redundant GGM 8000 Gateways, two LAN switches, Configuration Manager software and all associated software. When expanding a Non-Redundant K Core to a Redundant K Core configuration, the core GGM 8000 gateways cannot be used as CCGWs.

Description	Full Description	Nomenclature	APC	Price
SINGLE ZONE CONV NON-RED CORE	-	SQM01SUM0237	405	\$24,950.00
ADD: Redundancy	Required: Order Rack or Cabinet	CA02259AA	425	\$20,000.00

Required: Order Rack or Cabine

Rack or Cabinet

Description	Full Description	Nomenclature	APC	Price
-------------	------------------	--------------	-----	-------

ADD: RACK	-	CA01663AB	183	\$495.00
ADD: CABINET	Optional: Order Additional Features	CA01664AB	183	\$3,000.00

Optional: Order Additional Features

Analog/v.24 Interface Kit

Provides the interface between the MCC 7500 console and ASTRO 25 Conventional (digital) base stations for digital conventional operation. Provides four (4) V.24 digital ports and four (4) 4-Wire with E&M analog ports.

Note the K1 core gateway can support a CCGW, but the K2 core gateways cannot support the CCGW. This option is not compatible with a K2 core.

If Conventional Integrated Data (CA01740AE) is needed for your system configuration, then do not order this option (CA01618AA) under the SQM01SUM0237A model. Order a GGM and the Interface Kit from the GGM 8000 price pages. >

Enhanced Conventional Gateway

The Enhanced Conventional Gateway modules provide increased port density for customers that require additional capacity. Also supported is the ability to directly connect analog audio to an analog logging solution without the use of an audio bridge, and migration to MCC 7500 consoles for customers with existing Centracom Gold consoles.

The Low Density ECCGW provides four (4) V.24 digital ports and four (4) 4-Wire with E&M analog ports. The High Density ECCGW provides eight (8) V.24 digital ports and eight (8) 4-Wire with E&M analog ports.

Note the K1 core gateway can support an ECCGW, but the K2 core gateways cannot support an ECCGW. This option is not compatible with a K2 core.

If Conventional Integrated Data (CA01740AE) is needed for your system configuration, then do not order options (CA02141AA & CA02086AA) under the SQM01SUM0237A model. Order a GGM with the Enhanced CCGW module from the GGM 8000

Description	Full Description	Nomenclature	APC	Price
ADD: LOW DENSITY ENH CONV GATEWAY	4 port CCGW for Astro releases 7.12 and later	CA02141AA	147	\$3,000.00
ADD: HIGH DENSITY ENH CONV GATEWAY	8 port CCGW for Astro releases 7.12 and later	CA02086AA	147	\$6,000.00

Add Integrated Data and/or UEM Fault Management

This provides the hardware for the Integrated Data and UEM Fault Management applications

listed below. The VMWARE license is also needed with this option.

Description	Full Description	Nomenclature	APC	Price
ADD: APPLICATION SERVER	-	CA02258AB	425	\$20,000.00
VMWARE LICENSE	-	T8208	405	\$0.00

UEM Fault Management

This provides the current release software for the UEM Fault Management.

Description	Full Description	Nomenclature	APC	Price
ADD: UEM LITE SESSION	-	UA00247AA	877	\$25,000.00

Optional features to add on to the UEM Fault Manager.

NOTE: The features below require SDM3000 Remote Terminal Units to be ordered and installed at the K-core and RF sites. Refer to the ASTRO Fault Management Ordering Guide for instructions on how to order SDM3000 units.

Description	Full Description	Nomenclature	APC	Price
ADD: UEM LITE ENHANCED NAVIGATION	-	UA00240AA	877	\$45,000.00
ADD: UEM LITE MICROWAVE MAP AND SEGMENT VIEW	-	UA00241AA	877	\$12,000.00
ADD: UEM LITE EMAIL NOTIFICATION	-	UA00256AA	877	\$5,000.00

Conventional Integrated Data

Conventional Integrated Data provides the GGSN, border gateway, a switch, and all associated software.

Description	Full Description	Nomenclature	APC	Price
ADD: CONVENTIONAL INTEGRATED DATA	Optional: Order Encryption	CA01740AE	405	\$75,450.00

Optional: Order Encryption

If encryption is required on the GGM 8000 Gateway, order the CA02087AA option for the Gateway Encryption. If Common Criteria certification is required, also order CA02134AA. The CA02134AA option includes FIPS 140-2 Level 2 Encryption.

The quantities of encryption options must match the number of GGM 8000 gateways in the core configuration. Please see the table below for detailed guidance.

Core Type	Standard Encryption	FIPS 140-2 Level 2 Encryption
K1 (non-redundant)	Qty 1 CA02087AA	Qty 1 CA02087AA Qty 1 CA02134AA
K2 (redundant)	Qty 2 CA02087AA	Qty 2 CA02087AA Qty 2 CA02134AA
K1 + Integrated Data	Qty 3 CA02087AA	Qty 3 CA02087AA Qty 3 CA02134AA
K2 + Integrated Data	Qty 4 CA02087AA	Qty 4 CA02087AA Qty 4 CA02134AA

When these options are ordered, the quantity of the Encryption option (CA02087AA) and Common Criteria (CA02134AA) must be equal.

GGM 8000 Encryption

Description	Full Description	Nomenclature	APC	Price
ADD: ENCRYPTION (7.12 OR LATER)	Order one per each GGM 8000 gateway.	CA02087AA	147	\$1,500.00
ADD: COMMON CRITERIA	Encryption (CA02087AA) is required with this option. Order one per each GGM 8000 gateway.	CA02134AA	147	\$500.00

Data Encryption

If Integrated Data is ordered, and data encryption is required, order the CDEM (CA01749AA) and select the appropriate encryption algorithm(s). Both algorithms may be selected.

Description	Full Description	Nomenclature	APC	Price
ADD: DATA ENCRYPTION	-	CA01749AA	425	\$7,300.00
ADD: AES DATA ENCRYPTION	-	CA00182AT	137	\$750.00
ADD: DES-OFB DATA ENCRYPTION KIT	-	CA00143AD	137	\$750.00

Terminal Server

Choose the following option if a terminal server is required.

Description	Full Description	Nomenclature	APC	Price
ADD: TERMINAL SERVER	-	CA01750AA	425	\$6,500.00

Firewall

A Firewall is required if either integrated data or a terminal server is ordered. If a firewall is not already present in the system, a firewall & firewall software are required. The CA02635AA option provides both.

Description	Full Description	Nomenclature	APC	Price
ADD: Fortinet Firewall Appliance	-	CA02635AA	425	\$3,300.00

Backhaul Switch

Choose the following option if a backhaul switch is required. Ethernet Use Only. Non-redundant (K1) cores should order one (1); redundant (K2) cores should order two (2).

Description	Full Description	Nomenclature	APC	Price
ADD: BACKHAUL SWITCH	Accessories / FRUs	CA01896AB	425	\$2,250.00

**ASTRO® 25 Conventional
K1/K2 Core Upgrade / Expansions**

Configuration

[Ordering Guide](#)

Upgrade and/or Expand Existing K Core

These pages will lead you through the necessary steps to upgrade your ASTRO 25 7.14 or ASTRO 25 7.15 system to an ASTRO 25 7.16 system or to add-on additional features to an existing system. Please be sure to read each step carefully to ensure the factory will correctly build the product.

1. K-Core Upgrade and/or Expansion Supermodel

The following supermodel must be ordered for an upgrade or expansion to either a K1 or K2 configuration.

Description	Full Description	Nomenclature	APC	Price
K Core Upgrade or Expansion	-	SQM01SUM0250	405	\$0.00

2. Expand or Upgrade the K-Core

Choose one of the following:

Description	Full Description	Nomenclature	APC	Price
ADD: K CORE SOFTWARE UPGRADE	-	CA02257AB	425	\$4,700.00
ADD: K-CORE EXPANSION	-	CA02911AA	425	\$0.00

UPGRADE OPTIONS: Choose the following options to upgrade K-Core features to the latest release. Skip to step 7 for add-ons.

3. Data

Choose the following option if your existing K Core system uses data. This will provide the current release software for the PDG and GGSN.

Description	Full Description	Nomenclature	APC	Price
ADD: INTEGRATED DATA UPGRADE	-	CA01888AE	425	\$14,000.00

4. Terminal Server

Choose the following option if your system uses a terminal server. This provides the current release software for the Terminal Server.

Description	Full Description	Nomenclature	APC	Price
ADD: ADD: TERMINAL SERVER UPGRADE	-	CA01886AB	425	\$50.00

5. Firewall

Description	Full Description	Nomenclature	APC	Price
FIREWALL UPGRADE	Add-on Opportunities for Existing ASTRO 25 K Core	CA01887AA	425	\$100.00

6. MOSCAD NFM GMC

Use model SQM01SUM0291A (Standalone Fault Management Upgrade) to order a 7.16 MOSCAD upgrade.

Add-on Opportunities for Existing ASTRO 25 K Core

7. Add Integrated Data and/or UEM Fault Management

This provides the hardware for the Integrated Data and UEM Fault Management applications listed below. The VMWARE license is also needed with this option.

Description	Full Description	Nomenclature	APC	Price
ADD: APPLICATION SERVER	-	CA02258AB	425	\$20,000.00
VMWARE LICENSE	-	T8208	405	\$0.00

If you select CA02258AB you will need to select one or both of the options listed below for Integrated Data or UEM Fault Management. This option is compatible with 7.14, 7.15 and 7.16 systems.

UEM Fault Management

This provides the current release software for the UEM Fault Management.

Description	Full Description	Nomenclature	APC	Price
ADD: UEM LITE SESSION	-	UA00247AA	877	\$25,000.00

Optional features to add on to the UEM Fault Manager

Description	Full Description	Nomenclature	APC	Price
ADD: UEM LITE ENHANCED NAVIGATION	-	UA00240AA	877	\$45,000.00
ADD: UEM LITE MICROWAVE MAP AND SEGMENT VIEW	-	UA00241AA	877	\$12,000.00

Conventional Integrated Data

Provides the GGSN, border gateway, a switch, and all associated software.

Description	Full Description	Nomenclature	APC	Price
ADD:CONVENTIONAL INTEGRATED DATA	Add Encryption	CA01740AD	405	\$75,450.00

Add Encryption

8. Add Encryption

GGM 8000 Encryption

If encryption is required on the GGM 8000 Gateway, order the TYN4000A for the Gateway Encryption module.

The quantities of encryption options for the core gateway must equal quantity one for ASTRO 25 K1 Cores and quantity two for ASTRO 25 K2 Cores. If the core has Integrated Data, an additional quantity of one will need to be ordered for the border gateway.

Description	Full Description	Nomenclature	APC	Price
FRU: GGM 8000 ENCRYPTION (7.9 OR 7.11)	-	TYN4000	147	\$1,500.00

Data Encryption

If your system has Integrated Data and data encryption is required, order the CDEM.

Required Hardware:

Description	Full Description	Nomenclature	APC	Price
ASTRO 25 CONVENTIONAL DATA ENCRYPTION UNIT	-	T7618	137	\$750.00
RS232 CABLE FOR CRYPTR	-	DLN6693	454	\$160.00

If Integrated Data is ordered, and data encryption is required, order the CDEM (CA01749AA) and select the appropriate encryption algorithm(s). Both algorithms may be selected.

Description	Full Description	Nomenclature	APC	Price
ADD: AES DATA ENCRYPTION	-	CA00182AT	137	\$750.00
ADD: DATA ENCRYPTION	-	CA01749AA	425	\$7,300.00
ADD: DES-OFB DATA ENCRYPTION KIT	Optional: Add Other Core Equipment	CA00143AD	137	\$750.00

Required Software:

Description	Full Description	Nomenclature	APC	Price
ADD: AES DATA ENCRYPTION	-	CA00182AT	137	\$750.00
ADD: DES-OFB DATA ENCRYPTION KIT	Optional: Add Other Core Equipment	CA00143AD	137	\$750.00
ADD: ASTRO 25 CDEM OPERATION	-	CA01535AA	137	\$6,500.00

Optional: Add Other Core Equipment

9. Other core equipment available for add-on or upgrade to your existing core:

Terminal Server

Description	Full Description	Nomenclature	APC	Price
TERMINAL SERVER	(16 Port)	T7385	147	\$6,500.00
SWITCH ROUTER TERMINAL SERVER SW	Software for the SRC, used for upgrading from release to release.	T7472	147	\$50.00

Firewall

Description	Full Description	Nomenclature	APC	Price
FORTINET FIREWALL APPLIANCE	(Firewall for A7.15 and later)	T8126	147	\$3,200.00
FORTINET FIREWALL RECOVERY MEDIA	(For A7.15 and later)	T8128	147	\$100.00

Interface Module (Channel Gateway)-

Available for K1 – Non-Redundant Core

Note the K1 core gateway can support a CCGW, but the K2 core gateways cannot support the CCGW. This option is not compatible with a K2 core.

Description	Full Description	Nomenclature	APC	Price
ANALOG/V.24 INTERFACE KIT	CCGW for Astro releases 7.11 and earlier	TYN4002	147	\$2,000.00

Expansion Opportunities for Existing ASTRO 25 K Core

10. Expand from a K1 to a K2 core (Add Redundancy)

Option CA02259AA below will provide a GCP 8000 Site Controller, a GGM 8000 Gateway and LAN switch. When expanding a K1 core to a K2 core redundant configuration, the core GGM8000 gateways cannot be used as CCGWs. As a result, if the existing K1 core has the core GGM8000 being used as a CCGW, a dedicated GGM8000 with CCGW will need to be ordered to interface to those conventional channels.

Description	Full Description	Nomenclature	APC	Price

ADD: Redundancy	-	CA02259AA	425	\$20,000.00
-----------------	---	-----------	-----	-------------

When the K-Core is expanded with option CA02259AA, an additional backhaul switch may be required.

Description	Full Description	Nomenclature	APC	Price
ADD: BACKHAUL SWITCH	-	CA01896AB	425	\$2,250.00

In addition, the following Cable/Mounting Hardware Kits are available to mount this equipment in your existing rack or cabinet. Must order one of these options.

Description	Full Description	Nomenclature	APC	Price
K CORE EXPANSION RACK KIT	-	DLN6853	425	\$250.00
K CORE EXPANSION CABINET KIT	Accessories / FRUs	DLN6854	425	\$250.00

Accessories / FRUs

Model

ASTRO 25 Conventional
2019.2 K-Core

Updates

Ordering Information

Refer to Ordering Guidelines for ASTRO 25 K Core New and Expansion [2019.2](#) for detailed ordering information and option descriptions.

Configuration

Choose this Main Model for a new K-Core

Description	Full Description	Nomenclature	APC	Price
SINGLE ZONE CONV NON-RED CORE	This will generate: one GCP 8000 Site Controller chassis with the "Site Controller 1" module, one SRX1500 Hub Router, one Aruba 2930-24 Core LAN switch, the Configuration Manager software application, and all associated software.	SQM01SUM0237	405	\$24,950.00

Add Redundancy

Description	Full Description	Nomenclature	APC	Price
	Choose CA02259AA in addition to SQM01SUM0237A for a redundant core.			

ADD: Redundancy	This will generate the following additional equipment: the redundant GCP 8000 Site Controller chassis with the "Site Controller 2" module, the redundant SRX1500 Hub Router, the redundant Aruba 2930-24 Core LAN switch with 2 DAC cables, and all associated software.	CA02259AA	425	\$20,000.00
--------------------	--	-----------	-----	-------------

Choose this Main Model for an Expansion to an existing K-Core

Choose SQM01SUM0250A and CA3201AA to expand the capabilities for an existing K-Core.

Description	Full Description	Nomenclature	APC	Price
K Core Upgrade or Expansion	-	SQM01SUM0250	405	\$0.00
ADD: K-CORE EXPANSION 2019.1	-	CA03201AC	425	\$0.00

Add UEM Fault Management and / or Integrated Data

Order the required Application Server hardware for UEM and/or Data. Then choose UEM Lite and optional UEM Lite options if needed. Then choose Conventional Integrated data if needed. Refer to Ordering Guide for more detail.

Description	Full Description	Nomenclature	APC	Price
ADD: APPLICATION SERVER	-	CA02258AE	425	\$20,000.00
ADD: UEM LITE SESSION	-	UA00247AA	877	\$25,000.00
ADD: UEM LITE MICROWAVE MAP AND SEGMENT VIEW	-	UA00241AA	877	\$12,000.00
ADD: UEM LITE EMAIL NOTIFICATION	-	UA00256AA	877	\$5,000.00
ADD: CONVENTIONAL INTEGRATED DATA	-	CA01740AH	405	\$75,450.00

Link Encryption

If encryption is required, order the CA03587AA option for the SRX 1500 Hub Router (quantity 2 for redundant K Cores) . If FIPS certification is required, also order CA03588AA (2 for redundant K Cores), which will provide FIPS 140-2 Level 2 Encryption for the Hub Routers. If Integrated Data (CA01740AH) is ordered and Link Encryption is required, order quantity 2 of the CA02087AA for the GGM 8000 GGSN and GGM 8000 Border Router. If FIPS is also required,

also order quantity 2 of CA02134AA for the GGM 8000s.

Description	Full Description	Nomenclature	APC	Price
ADD: ENCRYPTION, SRX ROUTER	-	CA03587AA	147	\$1,500.00
ADD: FIPS 140-2 LEVEL 2 ENCRYPTION CERTIFICATION, SRX ROUTER	-	CA03588AA	147	\$500.00
ADD: ENCRYPTION (7.12 OR LATER)	-	CA02087AA	147	\$1,500.00
ADD: COMMON CRITERIA	-	CA02134AA	147	\$500.00

Data Encryption

If Integrated Data is ordered, and data encryption is required, order the CDEM (CA01749AA) and select the appropriate encryption algorithm(s). Both algorithms may be selected.

Description	Full Description	Nomenclature	APC	Price
ADD: DATA ENCRYPTION	-	CA01749AA	425	\$7,300.00
ADD: AES DATA ENCRYPTION	-	CA00182AT	137	\$750.00
ADD: DES-OFB DATA ENCRYPTION KIT	-	CA00143AD	137	\$750.00

Terminal Server

Description	Full Description	Nomenclature	APC	Price
ADD: TERMINAL SERVER	-	CA01750AA	425	\$6,500.00

Firewall

Required if Terminal Server or Integrated Data is ordered

Description	Full Description	Nomenclature	APC	Price
ADD: Fortinet Firewall Appliance	-	CA02635AA	425	\$3,300.00

Backhaul Switch

Choose the following option if a backhaul switch is required. Non-redundant K Core should order one (1) CA01896AB; Redundant K Core should order two (2) CA01896AB (which will generate 2 DAC Cables).

Description	Full Description	Nomenclature	APC	Price
ADD: BACKHAUL SWITCH	-	CA01896AB	425	\$2,250.00

Rack or Cabinet (required)

Description	Full Description	Nomenclature	APC	Price
ADD: RACK	-	CA01663AB	183	\$495.00
ADD: CABINET	-	CA01664AB	183	\$3,000.00

Accessories / FRUs

Description	Full Description	Nomenclature	APC	Price

[SHIP CARD](#)

Model

ASTRO® 25 Conventional
7.17 K Core

Ordering Information

[Ordering Guide](#)

General Information

The ASTRO®25 K Core is targeted at small capacity conventional customers who require an ASTRO®25 conventional only system. The K-core allows customers to interface channels to an IP based MCC 7500 Console, provides a migration path for customers with fielded Motorola Conventional solutions, and allows the flexibility for customers to join a larger system in the future while maximizing their equipment investment.

The K-core is an IP capable solution from the RF channel to the operator position, and has been architected to provide flexibility in design in order to meet the needs of varying customers. Customers have the ability to add channels or sites, migrate channels, or join a regional system, all while utilizing their initial investment.

Capacity

The K Core will support the following capacities:

- 1-20 Consoles
- 1-5 Console sites
- 1-25 RF sites
- 1-30 ASTRO 25 Gateways
- 1-75 channels

Redundancy

Customers can optionally add redundancy to both the core equipment and site links. The K Core components in a non-redundant configuration include: one GCP 8000 Site Controller, one ASTRO 25 Gateway, and one LAN switch. A redundant configuration includes: redundant GCP 8000 Site Controllers, redundant ASTRO 25 Gateways, and two LAN switches.

System ID Information

In order to obtain a system ID for a K Core system:

The CSP short form needs to be completed for warranty support only IF no additional System Support Center services are purchased to establish an ID in the Clarify DB/system for Astro K-Core. The link to CSP short form and instructions are available at the following

site: [CSP Short Form and Instructions](#).

Customer name, technical contacts as well as warranty start dates need to be included. The customer ID would follow this format: CVKxxxx (CVK is the prefix and the 'xxxx' would be the actual alpha-numeric ID assigned by the NSS Team).

If there will be additional services, the CSM needs to fill out an Install Base Template and submit to their regional NSS analyst.

Additional Resources

[GTR 8000 Page](#)

[MCC 7500 Dispatch Console Page](#)

[GGM 8000 Gateway Page](#)

Configuration

Required: Order the Core

Redundant or Non-Redundant Core

The following main supermodel must be ordered.

Non Redundant K Core will generate the following equipment: one GCP 8000 Site Controller, one GGM 8000 Gateway, one LAN switch, Configuration Manager software and all associated software.

If the Configuration Manager is not co-habbed with a console position, CAM, or UEM-lite then a PC must be ordered as a separate line item.

Choose CA02259AA for a redundant core. This will generate the following equipment: redundant GCP 8000 Site Controllers, redundant GGM 8000 Gateways, two LAN switches, Configuration Manager software and all associated software. When expanding a Non-Redundant K Core to a Redundant K Core configuration, the core GGM 8000 gateways cannot be used as CCGWs.

Description	Full Description	Nomenclature	APC	Price
ADD: Redundancy	Required: Order Rack or Cabinet	CA02259AA	425	\$20,000.00
SINGLE ZONE CONV NON-RED CORE	-	SQM01SUM0237	405	\$24,950.00

Required: Order Rack or Cabinet

Rack or Cabinet

Description	Full Description	Nomenclature	APC	Price
ADD: CABINET	K-Core Expansions	CA01664AB	183	\$3,000.00
ADD: RACK	-	CA01663AB	183	\$495.00

K-Core Expansions

Use both of the following options to expand/add-on to an existing 7.17 K-core

Description	Full Description	Nomenclature	APC	Price
ADD: K-CORE EXPANSION 7.17	Order Additional Features	CA03201AA	425	\$0.00
K Core Upgrade or Expansion	-	SQM01SUM0250	405	\$0.00

Order Additional Features

Analog/v.24 Interface Kit

Provides the interface between the MCC 7500 console and ASTRO 25 Conventional (digital) base stations for digital conventional operation. Provides four (4) V.24 digital ports and four (4) 4-Wire with E&M analog ports.

Note the K1 core gateway can support a CCGW, but the K2 core gateways cannot support the CCGW. This option is not compatible with a K2 core.

If Conventional Integrated Data (CA01740AE) is needed for your system configuration, then do not order this option (CA01618AA) under the SQM01SUM0237A model. Order a GGM and the Interface Kit from the GGM 8000 price pages. >

Enhanced Conventional Gateway

The Enhanced Conventional Gateway modules provide increased port density for customers that require additional capacity. Also supported is the ability to directly connect analog audio to an analog logging solution without the use of an audio bridge, and migration to MCC 7500 consoles for customers with existing Centracom Gold consoles.

The Low Density ECCGW provides four (4) V.24 digital ports and four (4) 4-Wire with E&M analog ports. The High Density ECCGW provides eight (8) V.24 digital ports and eight (8) 4-Wire with E&M analog ports.

Note the K1 core gateway can support an ECCGW, but the K2 core gateways cannot support an ECCGW. This option is not compatible with a K2 core.

If Conventional Integrated Data (CA01740AF) is needed for your system configuration, then do

not order options (CA02141AA & CA02086AA) under the SQM01SUM0237A model. Order a GGM with the Enhanced CCGW module from the GGM 8000 price pages.

Description	Full Description	Nomenclature	APC	Price
ADD: HIGH DENSITY ENH CONV GATEWAY	8 port CCGW for Astro releases 7.12 and later	CA02086AA	147	\$6,000.00
ADD: LOW DENSITY ENH CONV GATEWAY	4 port CCGW for Astro releases 7.12 and later	CA02141AA	147	\$3,000.00

Add Integrated Data and/or UEM Fault Management

This provides the hardware for the Integrated Data and UEM Fault Management applications listed below.

Description	Full Description	Nomenclature	APC	Price
ADD: APPLICATION SERVER	-	CA02258AC	425	\$20,000.00

UEM Fault Management

This provides the current release software for the UEM Fault Management.

Description	Full Description	Nomenclature	APC	Price
ADD: UEM LITE SESSION	-	UA00247AA	877	\$25,000.00

Optional features to add on to the UEM Fault Manager.

NOTE: The features below require SDM3000 Remote Terminal Units to be ordered and installed at the K-core and RF sites. Refer to the ASTRO Fault Management Ordering Guide for instructions on how to order SDM3000 units.

Description	Full Description	Nomenclature	APC	Price
ADD: UEM LITE EMAIL NOTIFICATION	-	UA00256AA	877	\$5,000.00
ADD: UEM LITE ENHANCED NAVIGATION	-	UA00240AA	877	\$45,000.00
ADD: UEM LITE MICROWAVE MAP AND SEGMENT VIEW	-	UA00241AA	877	\$12,000.00

Conventional Integrated Data

Conventional Integrated Data provides the GGSN, border gateway, a switch, and all associated software.

Description	Full Description	Nomenclature	APC	Price
ADD: CONVENTIONAL INTEGRATED DATA	-	CA01740AF	405	\$75,450.00

Enhanced GeoSelect

Required for each K-core system when the customer's mapping application uses the Enhanced GeoSelect functionality of the UNS API.

Description	Full Description	Nomenclature	APC	Price
ENH: GEOSELECT	Order Encryption	UA00486AA	877	\$40,000.00

Order Encryption

If encryption is required on the GGM 8000 Gateway, order the CA02087AA option for the Gateway Encryption. If Common Criteria certification is required, also order CA02134AA. The CA02134AA option includes FIPS 140-2 Level 2 Encryption.

The quantities of encryption options must match the number of GGM 8000 gateways in the core configuration. Please see the table below for detailed guidance.

Core Type	Standard Encryption	FIPS 140-2 Level 2 Encryption
K1 (non-redundant)	Qty 1 CA02087AA	Qty 1 CA02087AA Qty 1 CA02134AA
K2 (redundant)	Qty 2 CA02087AA	Qty 2 CA02087AA Qty 2 CA02134AA
K1 + Integrated Data	Qty 3 CA02087AA	Qty 3 CA02087AA Qty 3 CA02134AA
K2 + Integrated Data	Qty 4 CA02087AA	Qty 4 CA02087AA Qty 4 CA02134AA

When these options are ordered, the quantity of the Encryption option (CA02087AA) and Common Criteria (CA02134AA) must be equal.

GGM 8000 Encryption

Description	Full Description	Nomenclature	APC	Price
-------------	------------------	--------------	-----	-------

ADD: ENCRYPTION (7.12 OR LATER)	Order one per each GGM 8000 gateway.	CA02087AA	147	\$1,500.00
ADD: COMMON CRITERIA	Encryption (CA02087AA) is required with this option. Order one per each GGM 8000 gateway.	CA02134AA	147	\$500.00

Data Encryption

If Integrated Data is ordered, and data encryption is required, order the CDEM (CA01749AA) and select the appropriate encryption algorithm(s). Both algorithms may be selected.

Description	Full Description	Nomenclature	APC	Price
ADD: DES-OFB DATA ENCRYPTION KIT	-	CA00143AD	137	\$750.00
ADD: DATA ENCRYPTION	-	CA01749AA	425	\$7,300.00
ADD: AES DATA ENCRYPTION	-	CA00182AT	137	\$750.00

Terminal Server

Choose the following option if a terminal server is required.

Description	Full Description	Nomenclature	APC	Price
ADD: TERMINAL SERVER	-	CA01750AA	425	\$6,500.00

Firewall

A Firewall is required if either integrated data or a terminal server is ordered. If a firewall is not already present in the system, a firewall & firewall software are required. The CA02635AA option provides both.

Description	Full Description	Nomenclature	APC	Price
ADD: Fortinet Firewall Appliance	-	CA02635AA	425	\$3,300.00

Backhaul Switch

Choose the following option if a backhaul switch is required. Ethernet Use Only. Non-

redundant (K1) cores should order one (1); redundant (K2) cores should order two (2).

Description	Full Description	Nomenclature	APC	Price
ADD: BACKHAUL SWITCH	Accessories / FRUs	CA01896AB	425	\$2,250.00

Accessories / FRUs

**ASTRO® 25 Conventional
K1/K2 Core Upgrade**

Updates

PLEASE NOTE:

In line with the Software Support Policy (SwSP) for ASTRO based system software, orderability rules now include alignment to the policy which sets a new framework of three periods of support from Ship Acceptance for that specific release.

To ensure adherence to the Software Support Policy, there is a change to how Upgrades are ordered on the K Core for customers that do not currently have a SMA or SUA Lifecycle contract.

Effective 3/1/17

To get an Upgrade quote, please contact your:
Lifecycle Management Consultant; to quote an upgrade via a one-time or multiyear SUA

It is recommended that all upgrades are performed via a certified path and to a release within the Standard Support Period.

Once you have a quote, then proceed to order the upgrade items listed below.

For more information on the Software Support Policy check here: [Software Support Policy](#)
For more information on the orderability changes check here: [SwSP Orderability Changes](#)

Configuration

[Ordering Guide](#)

Upgrade K Core

These pages will lead you through the necessary steps to upgrade your ASTRO 25 7.15 or ASTRO 25 7.16 system to an ASTRO 25 7.17 system. Please be sure to read each step carefully to ensure the factory will correctly build the product.

1. K-Core Upgrade Supermodel

The following supermodel must be ordered for an upgrade for either a K1 or K2 configuration.

--	--	--	--	--

Description	Full Description	Nomenclature	APC	Price
K Core Upgrade or Expansion	-	SQM01SUM0250	405	\$0.00

2. Upgrade the K-Core

Choose the following:

Description	Full Description	Nomenclature	APC	Price
ADD: K CORE SOFTWARE UPGRADE	-	CA02257AC	425	\$4,700.00

UPGRADE OPTIONS: Choose the following options to upgrade K-Core features to the latest release.

3. Data

Choose the following option if your existing K Core system uses data. This will provide the current release software for the PDG and GGSN.

Description	Full Description	Nomenclature	APC	Price
ADD: INTEGRATED DATA UPGRADE	-	CA01888AF	405	\$14,000.00

4. UEM Lite

Choose the following option if your existing K Core system uses UEM Lite. This will provide the current release software for the application.

Description	Full Description	Nomenclature	APC	Price
UEM LITE UPGRADE 7.16 TO 7.17	-	CA03182AA	382	\$2,000.00

5. Application Server

Choose the following option if your existing K Core system has an Application Server.

Description	Full Description	Nomenclature	APC	Price
ADD: APPLICATION SERVER UPGRADE	-	CA03200AA	425	\$2,000.00

This option is for a 7.15 system that already has a DL380 G9 server. When upgrading to 7.17 this options is needed:

--	--	--	--	--

Description	Full Description	Nomenclature	APC	Price
IP PACKET CAPTURE EXPANSION	-	T8303	877	\$0.00

6. Terminal Server

Choose the following option if your system uses a terminal server. This provides the current release software for the Terminal Server.

Description	Full Description	Nomenclature	APC	Price
ADD: ADD: TERMINAL SERVER UPGRADE	-	CA01886AB	425	\$50.00

7. Firewall

Choose the following option if your system uses a firewall. This provides the current release software for the Firewall.

Description	Full Description	Nomenclature	APC	Price
FIREWALL UPGRADE	Accessories / FRUs	CA01887AA	425	\$100.00

8. MOSCAD NFM GMC

Use model SQM01SUM0291A (Standalone Fault Management Upgrade) to order a 7.16 MOSCAD upgrade.

ASTRO Intrusion Detection System (IDS) - Juniper-Based Solution

Intrusion Detection System (IDS) is an optional feature that monitors ASTRO® 25 network traffic for potential security threats using signature-based detection and anomaly-based detection. In signature-based detection, the IDS uses its attack-signature database to match the traffic with the predefined attack patterns called signatures. For anomaly-based detections, IDS looks for any irregularities in the protocol used for transferring the data.

The IDS feature collects network traffic from Ethernet switch monitor (aka mirror, SPAN) ports via IDS appliance (SRX1500). The IDS solution can inspect non-encrypted traffic in an IP-IP tunnel. Inspection of encrypted traffic is not supported. If suspicious activity is detected, the IDS appliance will send alerts to the Unified Event Manager (UEM), and syslog to the Centralized Event Logging Server (if present in the system).

The initial offer of IDS (Juniper-Based) solution is targeted towards ASTRO 25 Trunking customers who need a customer-managed IDS solution.

Supported System Releases: A7.17.0; A7.17.3; A7.18; A2019.2 and later

Supported System Configurations: ASTRO® 25 Trunking Systems (M-Core, and Simplified Core)

Updates

IMPORTANT NOTE:

The IDS (Juniper-Based) solution is currently under development.

Orders can now be placed for but ALL orders will go on E3 Hold until D2/D1 is achieved for North America.

Target for D2 (Product Readiness) & NA Regional Ship Acceptance (D1) is the end of Jan 2020.

Ordering Information

To add IDS (Juniper-Based) solution to an ASTRO 25 Trunking System (M-Core) or Simplified Core, please refer to the [IDS Ordering Guide](#).

Configuration

Step 1: Order the IDS Kit (Required)

Description	Full Description	Nomenclature	APC	Price
IDS INTRUSION DETECTION SYSTEM KIT	The IDS kit model includes the IDS Appliance Hardware (SRX1500), certified version of Junos OS software, and the SRX1500 software subscription license for IDS signature updates.	SQM01SUM0327	147	\$40,000.00

Step 2: Select the appropriate system release option (Required)

Description	Full Description	Nomenclature	APC	Price
ADD: IDS (A7.17.0)	This option contains the required system software for the UEM, UNC, and Domain Controller to support IDS on A7.17.0.	CA03598AA	147	\$0.00
ADD: IDS (A7.17.3)	This option contains the required system software for the UEM, UNC, and Domain Controller to support IDS on A7.17.3.	CA03598AB	147	\$0.00
ADD: IDS (A7.18)	This option contains the required system software for the UEM, UNC, and Domain Controller to support IDS on A7.18.	CA03598AC	147	\$0.00
ADD: IDS (A2019.X)	This option contains the required system software for the UEM, UNC, and Domain Controller to support IDS on A2019.2.	CA03598AD	147	\$0.00

Step 3: Order the Internetworking Firewall (Optional)

Note: Internetworking Firewall is required for "Automatic Signature Updates".

If the customer requires "Automatic Online Signature updates". Then the models below are mandatory and must be ordered.

Description	Full Description	Nomenclature	APC	Price
FORTINET FIREWALL APPLIANCE	-	T8586	877	\$3,300.00

FORTINET FIREWALL RECOVERY MEDIA	-	T8128	147	\$100.00
----------------------------------	---	-------	-----	----------

Step 4: Order Misc Items if needed (Optional)

IDS Appliance Recovery Media - This is a CD that contains the certified version of Junos OS used with the IDS Appliance. Note: IDS Kit does contain this software.

Description	Full Description	Nomenclature	APC	Price
IDS APPLIANCE RECOVERY MEDIA	This model contains certified version of Junos OS used with the IDS Appliance (SRX1500).	T8684	147	\$100.00

IDS Appliance Spare / FRU - If an "IDS Appliance" spare or FRU needs to be order, below is the part number to order.

Note: The IDS Appliance spare only contains the hardware.

The spare unit does not include the following software that is required to enable IDS: Junos OS software, SRX1500 SW subscription license for IDS signature updates, along with the updated ASTRO 25 system software (UEM, UNC, DC).

Description	Full Description	Nomenclature	APC	Price
IDS APPLIANCE	This model only contains the hardware.	T8668	147	\$10,900.00

ASTRO 25 Release 2019.2

ASTRO 25 MASTER SITE *(Replacement for L-Core and M-Core / SRC 7500)*

New Orders and Expansions

Updates

Ordering Information

Follow the below steps for ordering a complete new Zone for a **ASTRO 25 2019.2 Master Site**, or for expanding an existing Zone. If adding **Dynamic System Resiliency**, skip to the **DSR** section. For further clarification, refer to the **ASTRO 25 Master Site [Ordering Guide](#)**.

The following information must be included before placing the order:

- 1. System ID.** Four digit hexadecimal number used to uniquely identify a system. For new systems, this will be assigned by the System Engineer using the Trunked Data Repository (TDR) process. Expansions to existing systems will use the existing System ID.
- 2. Zone ID.** Number used to uniquely identify each zone in a system. Zone ID will always be 0001 for M1/M2 systems. For M3 systems, values may range from 0001 to 0007.
- 3. System Extension ID.** Four digit hexadecimal number, **typically 0000**. Introduced in 7.15 to address the rare case where a customer has intentionally chosen to use the same system ID across multiple systems. For such rare cases, customers or account teams inputting the order shall provide unique system extension IDs across the systems that have same system ID (e.g. 0001, 0002, etc).
- 4. Valid Email Address.** This email will be used to deliver all software licensing entitlements to the customer.

Configuration

STEP 1: ORDER THE MASTER SITE MAIN MODEL (REQUIRED)

IN OMAR (not in COF) USE PTO MODEL 'ASTROMASTERSITE'

Description	Full Description	Nomenclature	APC	Price
ASTRO MASTER SITE	-	SQM01SUM0323	877	\$0.00

STEP 2: CHOOSE 1 CONFIGURATION OPTION (REQUIRED)

Description	Full Description	Nomenclature	APC	Price
ADD: NEW ZONE CORE	Includes 2 each: Core Servers, Core LAN Ethernet Switches, Edge Routers, Backhaul Switches. Includes 1 each: PDG, GDG (Trunking), GGSN, Border Router, DMZ/LAN Switch, CEN LAN Switch, CEN Server, 48-port Terminal Server, ISGW, RNI/DMZ Firewall, ISSI 8000 Firewall. Includes 1 licence each: Zone Controller, UNC, Provisioning Manager, UEM (+ Email Notifications), Event Logging (Syslog), Windows Supplemental Transparent Configuration, Baseline Backup. For Zone Controller redundancy also order REDUNDANCY CA03512AB in step 3. For ATR or Data redundancy, order REDUNDANCY and HIGH AVAILABILITY option	CA03515AA	877	\$220,000.00
ADD: ADD ON ZONE	Includes 2 each: Core Servers, Core LAN Ethernet Switches, Edge Routers, Backhaul Switches, Zone Controller license. Includes 1 each: PDG, GDG (Trunking), GGSN, Border Router, DMZ/LAN Switch, CEN LAN Switch, 48-port Terminal Server, ISGW, RNI/DMZ Firewall, ISSI 8000 Firewall, UEM (+ Email Notifications), Event Logging (Syslog), Windows Supplemental Trans Config, Baseline Backup. Requires 1 CA01416AG System Statistics Server to be ordered per system	CA03516AA	877	\$380,000.00
ADD: CORE EXPANSION	Choose this configuration option to add features or capacity licenses to existing ASTRO release 2019.2 systems	CA03517AB	877	\$0.00

STEP 3: CHOOSE SOFTWARE REDUNDANCY

Order with CA03515AA to enable redundancy on Zone 1. Optional for single zone systems that will not require high availability (HA) options. Mandatory (must order) on Zone 1 for MultiZone systems.

Description	Full Description	Nomenclature	APC	Price
ADD: REDUNDANCY	Enables redundant Zone Controller on single zone systems. Mandatory to be ordered on Zone 1 for MultiZone systems. Not applicable for Add-On Zones (zones 2-7) which always ship with redundant Zone Controller software	CA03512AB	877	\$180,000.00

STEP 4: SELECT RACK OR CABINET (MUST CHOOSE 1)

Options include mounting hardware for all standard core components

Description	Full Description	Nomenclature	APC	Price
ADD: RACK	-	CA03507AA	877	\$0.00
ADD: CABINET	-	CA03508AA	877	\$3,000.00

STEP 5: ORDER OPERATIONAL AND CAPACITY OPTIONS PER ZONE

Operational Licenses, Trunking

Order applicable license for every standalone RF Site, Simulcast Remote Site and RX-only site in the zone, unless otherwise noted. Trunked Classic Data is included per site when FDMA or TDMA is ordered per site.

Description	Full Description	Nomenclature	APC	Price
ADD: P25 FDMA TRUNKING OPERATION SITE	-	UA00153AB	877	\$30,000.00
ADD: P25 PHASE 2 TDMA TRKNG OP SITE LIC	-	UA00159AB	877	\$30,000.00
ADD: PHASE 2 DYNAMIC TG ASGNMT SITE LIC	-	UA00160AA	877	\$18,000.00
ADD: ENHANCED DATA-				

P25 TRNK SITE	-	UA00408AA	595	\$4,160.00
ADD: P25 PHASE 2 TDMA SW BASE RADIO LIC	Order 1 for every TDMA Base Radio in the Zone	UA00161AA	877	\$3,000.00
ADD: PHASE 2 DYNAMIC CH BASE RADIO LIC	Order 1 for every Base Radio in the Zone that has the option for Dynamic Channel Assignment	UA00162AA	877	\$2,000.00

Operational Licenses, Conventional Only

Order per Zone. CA01207AA requires at least one UA00712AA, 8 RF CHANNEL CONVENTIONAL DATA, option.

NOTE: The following are not applicable in Conventional Only systems: UA00149AA (RCM), UA00151AA (Affiliation User Reports), UA00148AA (Dynamic Freq Blocking), UA00140AA (Dynamic Shared Services), UA00134AA (Channel Partitioning), UA00142AA (CADI), UA00145AA (System Historical Reports).

Description	Full Description	Nomenclature	APC	Price
ADD: ASTRO 25 CONVENTIONAL	-	CA01207AA	877	\$15,000.00
ADD: 8 RF CHAN CONV DATA	Order 1 for every eight (8) digital conventional channels in the Zone	UA00712AA	877	\$20,000.00
ADD: CONVENTIONAL PORT LICENSES (QTY 25)	-	UA00155AA	877	\$1,000.00

Console Licenses

Description	Full Description	Nomenclature	APC	Price
ADD: MCC7500 CONSOLE LICENSES (QTY 5)	Order 1 for every 5 MCC 7500/MCC 7500E operator positions in the zone	UA00156AA	877	\$5,000.00

DSR Notification

Description	Full Description	Nomenclature	APC	Price

ADD:DSR NOTIFICATION	Must be ordered when ordering DSR for the first time.	CA01499AB	877	\$10,000.00
----------------------	---	-----------	-----	-------------

Switches and Routers for Added Capacity

Description	Full Description	Nomenclature	APC	Price
ADD: ADD'L 48 PORTS CORE LAN	Order when more than 96 Core LAN Switch ports are needed. Adds an additional 48 Ports LAN Switch. Order up to two.	CA03510AA	877	\$5,000.00
ADD: EDGE ROUTER PAIR	Order when additional Edge Router Capacity is needed. Non DSR: Up to 3 can be ordered for a total of 4 Pairs (8 routers). DSR systems: Up to 6 additional Edge Router pairs can be ordered for expanded capacity - for a total of 8 pairs (16 routers).	CA03509AA	877	\$41,400.00

Encryption and FIPS

Description	Full Description	Nomenclature	APC	Price
ADD: ENCRYPTION	Includes encryption for all routers in the Core. Order 1 per Zone	CA03513AB	877	\$6,000.00
ADD: COMMON CRITERIA	Includes Common Criteria (FIPS) for all encrypted routers in the Core. Order 1 per Zone. Requires Encryption option.	CA03514AB	877	\$2,000.00

STEP 6: ORDER SYSTEM LEVEL CAPACITY OPTIONS

User Licenses

Description	Full Description	Nomenclature	APC	Price
ADD:500 RADIO USER LICENSES	Provides license for 500 trunked radio users that are "home" to this radio system. Order up to 300 of a total of UA00152AA and UA00664AA PER ZONE and up to 500 of a	UA00152AA	877	\$7,500.00

	total of UA00152AA and UA00664AA PER MULTIZONE SYSTEM			
ADD: 500 VISITING RADIO USER LICENSES	Provides a license for 500 trunked radio users that are "home" to another radio system. These are meant to be radios that are not daily users of the system. Order up to 300 of a total of UA00152AA and UA00664AA PER ZONE and up to 500 of a total of UA00152AA and UA00664AA PER MULTIZONE SYSTEM	UA00664AA	877	\$1,000.00

OPTIONAL STEP 7: CHOOSE SYSTEM LEVEL OPTIONAL FEATURES

System Management: Provisioning and Configuration

Description	Full Description	Nomenclature	APC	Price
ADD: PROVISIONING MANAGER	Quantity 1 license is included standard	UA00147AA	877	\$5,000.00
ADD: UNIFIED NETWORK CONFIGURATOR (UNC)	The UNC application can manage up to 5,000 devices in a system. If the system exceeds this limit, the High Capacity UNC (CA02637AD) must be implemented. Quantity 1 UNC UA00136AA license is included standard	UA00136AA	877	\$20,000.00
ADD: UNC ADDTL DEVICE LIC (QTY 10)	Required if the # of Channels + Comparators per site exceeds a total of 10. Formula for qty needed per zone (x = # of objects; y = of sites): $(x/y - 10) * y/10 = \#$ of 10 packs that need to be ordered. Ex: (12 channels per site -10) times 4 sites = 8 divided by 10 = .80 Customer would need to order quantity 1 pack of 10 licenses *Be advised this is just a guide for ordering additional UNC Device	CA01316AA	877	\$500.00

	Licenses. Customer systems are unique in design, and once configured, there may be a need for additional device licenses.			
ADD: HIGH CAPACITY UNC	This option includes the G10 Server, JBOD, and Software needed to support the UNC object handling capacity increase from 5000 managed devices to 15,000. A managed object includes base radios, comparators, switches, routers, core servers, VPM's, GGM gateways, site controllers.	CA02637AE	877	\$30,000.00

System Management: Performance and Accounting

Description	Full Description	Nomenclature	APC	Price
ADD: SYSTEM STATISTICS SERVER	Includes up to 10 licenses for System Historical reports Note: One per system Mandatory for MultiZone systems.	CA01416AG	877	\$60,000.00

Radio Authentication

Description	Full Description	Nomenclature	APC	Price
ADD:RADIO AUTHENTICATION	Ordered per SYSTEM.	CA02472AF	877	\$11,300.00
ADD: RADIO AUTH 500 USER LIC	Ordered per Zone. Required per Zone when CA02472AF is ordered. Up to 300 can be ordered per zone (Max of 500 per System). Requires CA02472AF for new Zone Core.	UA00165AA	877	\$5,000.00

Host-Based CSMS

Description	Full Description	Nomenclature	APC	Price

ADD: HOST BASED CSMS (A2019.X)	This option includes the ASTRO 25 Security Server Hardware and Software needed to support "Host-Based CSMS"	CA03584AC	877	\$85,000.00
ADD: HOST BASED CSMS DEVICE LICENSES	Required when "Host-Based CSMS" (CA03584AC) is ordered. Must order (1) for each Windows device in system.	UA00726AA	877	\$200.00

Location Services

Description	Full Description	Nomenclature	APC	Price
ADD : LOCATION ON PTT 500 USER LICENSE	Includes Location on PTT and Location on RX. Location on RX requires TDMA.	UA00482AA	877	\$3,000.00

Group Services

Description	Full Description	Nomenclature	APC	Price
ADD: GROUP SERVICES	Includes: 500 RADIO ALIAS GROUP DOWNLOAD LICENSES (UA00236) with USER LOGIN ALIAS UPDATE (UA00533), 50 TALKGROUP TEXT LICENSES (UA00245), and 10 CONSOLE GROUP TEXT LICENSES (UA00235). Order additional bundles as needed	UA00700AA	877	\$10,000.00

Conventional Talkgroups

Description	Full Description	Nomenclature	APC	Price
ADD: CONVENTIONAL TALKGROUPS CORE	This license allows a digital conventional channel to be logically partitioned into talkgroups.	CA02681AA	877	\$20,000.00
ADD: CONVENTIONAL	Allows an ASTRO 25 conventional digital system to interoperate with third			

TALKGROUPS VIA ISSI/CSSI	party digital consoles and base stations through the conv TG and CSSI interfaces	UA00223AA	226	\$20,000.00
--------------------------	--	-----------	-----	-------------

SmartConnect

SmartConnect requires Application Subscription. Refer to [SmartConnect End-to-End Ordering Guide](#) for full solution ordering and deployment details

Personnel Accountability

Important Note: Additional items are required when ordering Personnel Accountability. Please visit APX Personnel Accountability price

page: https://www.motorolasolutions.com/en_us/product-catalog/ref-page-display.html?refPath=/catalog/dup/products/apx_personnel_accountability/apx_personnel_accountability#pro

Description	Full Description	Nomenclature	APC	Price
ADD: PERSONNEL ACCOUNTABILITY	Important Note: Additional items are required when ordering Personnel Accountability. Please visit APX Personnel Accountability price page.	UA00421AA	877	\$49,000.00

Site Selectable Trunking Alerts

Description	Full Description	Nomenclature	APC	Price
ADD: SITE SELECTABLE ALERTS TRUNKING LICENSE	-	CA02413AA	877	\$20,000.00

Two-Factor Authentication

Description	Full Description	Nomenclature	APC	Price
PURCHASED SOFTWARE,FORTITOKEN PACK	-	DDN1933	708	\$560.00
FORTITOKENMOBILE - PACK OF 5 SOFT-T	-	DDN1881	708	\$272.00

OPTIONAL STEP 8: CHOOSE ZONE LEVEL OPTIONAL FEATURES AND LICENSES

Dynamic Transcoding

Both options are required.

Description	Full Description	Nomenclature	APC	Price
ADD: DYNAMIC TRANSCODING	-	CA03586AA	877	\$40,000.00
ADD: TRANSCODED SIMULTANEOUS CALLS (QTY 5)	-	UA00222AA	877	\$10,000.00

Security

Description	Full Description	Nomenclature	APC	Price
ADD: WINDOW SUPPLEMENTAL FULL	Replaces standard Supplemental Trans Configuration	CA02836AD	877	\$0.00
ADD: BACKUP & RECOVERY (BAR)	Replaces standard Baseline Backup	CA01724AH	877	\$15,000.00
ADD: ANTI-MALWARE DEF UPDATE LIC	Provides protection to Windows/Linux devices against viruses, spyware and other software born threats. Order one per Windows/ Linux client/device managed by the server except for Consoles	CA02193AB	877	\$165.00
QNAP J3455 QUAD CORE BAY DRIVE WITH 4 SEAGATE HDD 64MB	Required when BAR (CA01724AH) is ordered or if Baseline Backup that ships standard will be used. Can be used in place of backing up files to DVD. Useful on systems that require	DSTS453BE4GUS	708	\$1,485.00

	regular backup and offsite storage of BAR data.			
MCAFEE FOR WINDOWS CLIENT, A2019.2	-	T8742	708	\$165.00

High Availability

Description	Full Description	Nomenclature	APC	Price
ADD: HIGH AVAILABILITY DATA	Includes HA SW and redundant PDG, GDG, GGSN, Border Router, DMZ/LAN Switch, CEN LAN Switch, RNI/DMZ Firewall. Requires Redundancy option CA03512AB.	CA03511AB	877	\$98,000.00
ADD: HA ATR SOFTWARE	Includes HA SW and redundant Border Router, DMZ/LAN Switch, CEN LAN Switch, RNI/DMZ Firewall. Requires Redundancy option CA03512AB.	CA02649AC	877	\$53,000.00

System Management: Provisioning and Configuration

Description	Full Description	Nomenclature	APC	Price
ADD:CHANNEL PARTITIONING	-	UA00134AA	877	\$50,000.00
ADD: SECURITY PARTITIONING	-	UA00143AA	877	\$20,000.00
ADD: DYNAMIC FREQUENCY BLOCKING	-	UA00148AA	877	\$90,000.00
ADD: DYNAMIC SHARED SERVICES ALGORITHM CAPABILITY	-	UA00140AA	877	\$7,500.00
ADD: PROVISIONING MANAGER INTERFACE	Includes 20 hours technical assistance.	UA00135AA	877	\$28,000.00

System Management: Fault Management

--	--	--	--	--

Description	Full Description	Nomenclature	APC	Price
ADD: UNIFIED EVENT MANAGER (UEM)	Quantity 1 license is included standard.	UA00146AA	877	\$20,000.00
ADD: UEM ENHANCED NAVIGATION	Includes MICROWAVE MAP VIEW (UA00226) NOTE: Requires SDM 3000 Remote Terminal Units at the Master and RF Sites in order to view Digital I/O, Analog Inputs and Metering information in the UEM.	UA00225AA	877	\$50,000.00
ADD: UEM SNMP ELEMENT MANAGEMENT TOOLKIT (QTY 10)	-	UA00227AA	877	\$20,000.00
ADD: NORTHBOUND INTERFACE	Requires ZA00104AA for Technical Assistance	UA00139AA	877	\$15,000.00
ENH: TECHNICAL ASSISTANCE, FORTY HRS	Required for UA00142AA and UA00139AA (quantity 1 each)	ZA00104AA	285	\$12,000.00

System Management: Performance and Accounting

Description	Full Description	Nomenclature	APC	Price
ADD: RADIO CONTROL MANAGER	-	UA00149AA	877	\$15,000.00
ADD: DYNAMIC REPORTS	Includes Affiliation User Reports license (UA00151). Order up to 5 per Zone	UA00150AA	877	\$15,000.00
ADD: ZONEWATCH GRID & CTRL	Includes Zone Historical Reports license (UA00144). Order up to 10 per Zone	UA00141AA	877	\$25,000.00
SAP CRYSTAL REPORTS 2016	-	DDN3135	708	\$930.00
ADD: FLEXIBLE ATIA	Includes 10 hours technical	UA00138AA	877	\$20,000.00

	assistance			
ADD: CADI SOFTWARE OPTION	Requires ZA00104AA for Technical Assistance	UA00142AA	877	\$45,000.00
ENH: TECHNICAL ASSISTANCE, FORTY HRS	Required for UA00142AA and UA00139AA (quantity 1 each)	ZA00104AA	285	\$12,000.00

Order the Client Workstation

Description	Full Description	Nomenclature	APC	Price
Z2 MINI WORKSTATION 258G 8G NON RET	-	TT3225	708	\$2,500.00
USB EXTERNAL DVD DRIVE	-	DSF2B56AA	708	\$172.00
ASTRO 2019.1 CLIENT	-	T8597	877	\$850.00
ASTRO 25 RADIO AUTHENTICATION	-	T8598	877	\$5,000.00
MCAFFEE FOR WINDOWS CLIENT, A2019.2	-	T8742	708	\$165.00

ORDERING DYNAMIC SYSTEM RESILIENCE (DSR)

STEP 1: ORDER THE DSR MAIN MODEL (REQUIRED FOR DSR)

Description	Full Description	Nomenclature	APC	Price
DYNAMIC SYSTEM RESILIENCE	If ordered on any zone, all zones must order DSR (up to six zones max) NOTE: You must order DSR System Notification (CA01499AB) on the Primary Core when ordering DSR for the first time.	SQM01SUM0324	877	\$0.00

STEP 2: CHOOSE 1 CONFIGURATION OPTION (REQUIRED)

--	--	--	--	--

Description	Full Description	Nomenclature	APC	Price
ADD: DSR ZONE CORE	Includes 2 each: Core Servers, Core LAN Ethernet Switches, Edge Routers, Interzone Edge Routers, Backhaul Switches. Includes 1 each: PDG, GDG (Trunking), GGSN, Border Router, DMZ/LAN Switch, CEN LAN Switch, 48-port Terminal Server, ISGW, RNI/DMZ Firewall, ISSI 8000 Firewall. Includes 1 each of the following licenses: Zone Controller, UNC, Provisioning Manager, UEM (with Email Alarm Notifications), Event Logging (Syslog), Windows Supplemental Transparent Configuration, Baseline Backup For software redundancy also order REDUNDANCY, CA03512AB.	CA03520AA	877	\$250,000.00
ADD: DSR ADD ON ZONE	Includes 2 each: Core Servers, LAN Switches and cables, Edge Routers, Interzone Edge Routers, Backhaul Switches, Data Switches, Firewalls, Zone Controller license; 1 each: MultiZone Operational License, PDG, GDG (Trunking), GGSN, Border Router, 48-port Terminal Server, UEM with Email Alarm Notifications, Event Logging (Syslog), Windows Supplemental Trans Config, Baseline Backup. REDUNDANCY is standard.	CA03519AA	877	\$460,000.00

STEP 3: CHOOSE SOFTWARE REDUNDANCY (OPTIONAL FOR DSR CORE IN SINGLE ZONE SYSTEMS)

Description	Full Description	Nomenclature	APC	Price
ADD: REDUNDANCY	Enables redundant Zone Controller on single zone systems. Mandatory to be ordered on Zone 1 for MultiZone systems. Not applicable for Add-On Zones (zones 2-7) which always ship with redundant Zone Controller software	CA03512AB	877	\$180,000.00

STEP 4: SELECT RACK OR CABINET (MUST CHOOSE 1)

Description	Full Description	Nomenclature	APC	Price
-------------	------------------	--------------	-----	-------

ADD: RACK	-	CA03507AA	877	\$0.00
ADD: CABINET	-	CA03508AA	877	\$3,000.00

STEP 5: ORDER OPTIONAL LICENSES

If option was ordered for Primary Core, must also be ordered for Backup (DSR) Core.

Description	Full Description	Nomenclature	APC	Price
ADD: ASTRO 25 CONVENTIONAL	-	CA01207AA	877	\$15,000.00
ADD:RADIO AUTHENTICATION	Ordered per SYSTEM.	CA02472AF	877	\$11,300.00
ADD: HIGH AVAILABILITY DATA	Includes HA SW and redundant PDG, GDG, GGSN, Border Router, DMZ/LAN Switch, CEN LAN Switch, RNI/DMZ Firewall. Requires Redundancy option CA03512AB.	CA03511AB	877	\$98,000.00
ADD: HA ATR SOFTWARE	Includes HA SW and redundant Border Router, DMZ/LAN Switch, CEN LAN Switch, RNI/DMZ Firewall. Requires Redundancy option CA03512AB.	CA02649AC	877	\$53,000.00
ADD: SYSTEM STATISTICS SERVER	Includes up to 10 licenses for System Historical reports Note: One per system Mandatory for MultiZone systems.	CA01416AG	877	\$60,000.00
ADD: BACKUP & RECOVERY (BAR)	Replaces standard Baseline Backup	CA01724AH	877	\$15,000.00
ADD: WINDOW SUPPLEMENTAL FULL	Replaces standard Supplemental Trans Configuration	CA02836AD	877	\$0.00
	This option includes the G10 Server, JBOD, and Software			

ADD: HIGH CAPACITY UNC	needed to support the UNC object handling capacity increase from 5000 managed devices to 15,000. A managed object includes base radios, comparators, switches, routers, core servers, VPM's, GGM gateways, site controllers.	CA02637AE	877	\$30,000.00
ADD: DYNAMIC TRANSCODING	-	CA03586AA	877	\$40,000.00
ADD: HOST BASED CSMS (A2019.X)	This option includes the ASTRO 25 Security Server Hardware and Software needed to support "Host-Based CSMS"	CA03584AC	877	\$85,000.00

Switches and Routers for Added Capacity

Description	Full Description	Nomenclature	APC	Price
ADD: ADD'L 48 PORTS CORE LAN	Order when more than 96 Core LAN Switch ports are needed. Adds an additional 48 Ports LAN Switch. Order up to two.	CA03510AA	877	\$5,000.00
ADD: EDGE ROUTER PAIR	Order when additional Edge Router Capacity is needed. Non DSR: Up to 3 can be ordered for a total of 4 Pairs (8 routers). DSR systems: Up to 6 additional Edge Router pairs can be ordered for expanded capacity - for a total of 8 pairs (16 routers).	CA03509AA	877	\$41,400.00

Encryption and FIPS

Description	Full Description	Nomenclature	APC	Price
ADD: ENCRYPTION	Includes encryption for all routers in the Core. Order 1 per Zone	CA03513AB	877	\$6,000.00
ADD: COMMON CRITERIA	Includes Common Criteria (FIPS) for all encrypted routers in the Core. Order 1 per Zone. Requires Encryption option.	CA03514AB	877	\$2,000.00

Ordering Information

It is highly recommended that detailed information of the system configuration is available before quoting or ordering the ASTRO CAC/PIV Smart Card Authentication feature.

To add or enable CAC/PIV Authentication on ASTRO Infrastructure, please refer to the New Deployment Ordering

Guide: <https://docs.google.com/document/d/1pacplQjGcsG3SezdfFHuLivroxnaGlsC15bAvdX46rs/edit?usp=sharing>

To expand to an existing and operational CAC/PIV PKI Infrastructure, please refer to the Upgrade Ordering

Guide: <https://docs.google.com/document/d/1jmvFq9fpTPvYlyX4tkBp3YMcWEi0nQCUDbjrUVDv3D8/edit?usp=sharing>

**Master Site Network Management / Zone Controller
ASTRO 25 7.15 Upgrade**

Ordering Information

**NOTE: FOR MORE DETAILS ON OPTIONS AND ORDERABILITY DESCRIPTIONS
PLEASE CHECK THE ORDERING GUIDE:**

[http://compass.mot-
solutions.com/doc/469085800/M_Core_NM_Ordering_Guide_7_15_Upgrade_Orders.doc](http://compass.mot-solutions.com/doc/469085800/M_Core_NM_Ordering_Guide_7_15_Upgrade_Orders.doc)

General Information

For Upgrades:

These pages will lead you through the necessary steps to upgrade your ASTRO 25 7.13 or ASTRO 25 7.14 system to an ASTRO 25 7.15 system. If you want to add feature/functionality to an existing 7.15 system please see the New 7.15 ordering guide or ECAT page. If you want to order an ADDITIONAL ZONE for your 7.15 system or add DSR to your existing system, please proceed to the New 7.15 ordering guide or Ecat page. Please be sure to read each step carefully and supply the personality information required for the different model numbers to assure the factory will correctly build the product.

Ordering Requirements

The following information must be included on the order for all SQM model numbers:

1. **System ID.** Four digit hexadecimal number used to uniquely identify a system. For new systems, this will be assigned by the System Engineer using the Trunked Data Repository (TDR) process. Expansions to existing systems will use the existing System ID.
2. **Zone ID.** Number used to uniquely identify each zone in a system. Zone ID will always be 0001 for M1/M2 systems. For M3 systems, values may range from 0001 to 0007.
3. **System Extension ID.** Four digit hexadecimal number, **typically 0000**. Introduced in 7.15 to address the rare case where a customer has intentionally chosen to use the same system ID across multiple systems. For such rare cases, customers or account teams inputting the order shall provide unique system extension IDs across the systems that have same system ID (e.g. 0001, 0002, etc).
4. **Valid Email Address.** This email will be used to deliver all software licensing entitlements to the customer.

Configuration

Upgrading to 7.15 System

Step 1: Order the Master Site Upgrade model

Order the upgrade model as separate line items PER ZONE

Description	Full Description	Nomenclature	APC	Price
MASTER SITE CONFIG UPGRADE	This will include one soft copy of the System Manual. If you would like a hardcopy set of the manual documentation, see the FRU section below.	SQM01SUM0239	877	\$0.00

Step 2: Order Master Site hardware for 7.15

IF COMING FROM 7.13 M3/M2 WITH T5220-BASED CORE or if you require the new Fortinet Firewall for your system)

Skip this step if a new 7.13 or 7.14 system was ordered or if the system was upgraded to 7.13 previously (and T5220 Servers were replaced with HP DL380 Servers).

For a spare unit of DAS, please order from the FRU section. If you are ordering this as a complete spare to be used for piece parts, the unit will have to be "de-configured" and then have a procedure created for the field team/CCSI.

M2/M3 First Zone -

Must order quantity 2 of High Capacity servers (DLN6961A), quantity 1 of the DAS 4.8TB Dual SC (T8186), quantity 4 of the SAS cable and quantity 4 of DLN6878A.

Description	Full Description	Nomenclature	APC	Price
NAS EXTENDER CABLE AND PANEL	-	CKN6964	877	\$50.00
SAS CABLE 1M	-	CKN6952	454	\$96.00

FRE: DL380G8 2X2.6GHZ 128GH 3QN 1X3HD WD	-	DLN6961	877	\$20,000.00

DAS - 600 GB SAS HARD DRIVE	-	DLN6878	454	\$941.00
-----------------------------	---	---------	-----	----------

Must order quantity 1 of the Low Capacity server (DLN6962A), quantity 1 of the High Capacity server (DLN6961A), quantity 1 of the DAS 3TB Dual SC (T8187), quantity 4 of the SAS cable and quantity 4 of DLN6878A.

Description	Full Description	Nomenclature	APC	Price
FRE: DL380G8 1X2.6GHZ 64GH 3QN 1X3HD WD	-	DLN6962	877	\$15,000.00
NAS EXTENDER CABLE AND PANEL	-	CKN6964	877	\$50.00
SAS CABLE 1M	-	CKN6952	454	\$96.00
DAS 3.6 TB ADDITIONAL	-	T8187	877	\$20,500.00
FRE: DL380G8 2X2.6GHZ 128GH 3QN 1X3HD WD	-	DLN6961	877	\$20,000.00
DAS - 600 GB SAS HARD DRIVE	-	DLN6878	454	\$941.00

Step 3: Order the Upgrade Software (per zone)

Step 3: Order the Upgrade Software (per zone)

Make sure to order the correct upgrade depending on what release your customer is upgrading from.

For M2/M3 Customers:

Pick the appropriate System Configuration Upgrade option(s). If upgrading M2 or the first zone of a M3 system, the System Upgrade SW option must be purchased.

Description	Full Description	Nomenclature	APC	Price
ADD: UCS UPGRADE SW FOR 7.15- REPLACE	-	CA01747AH	877	\$2,300.00
ADD:SSS UPGRADE SW FOR 7.15 - REPLACE SERVER	-	CA01461AK	877	\$1,400.00
ADD: NM/ZC ZONE UPGRADE SW M2/3 7.13-7.15 REPLACE	-	CA02670AA	877	\$300,000.00

Purchase the requisite operational upgrades per zone.

Description	Full Description	Nomenclature	APC	Price
ADD: ASTRO FDMA TRUNKING UPGRADE	Order if you purchased the ASTRO 25 with IV&D operational license on the original purchase	CA01577AB	877	\$15,000.00
ADD: ASTRO 25 CONV UPGRD LICENSE	-	CA01579AB	877	\$4,500.00
ADD: 700/800 MIXED SITE UPGRD LICENSE	-	CA01580AB	877	\$4,500.00

Choose either transparent OR full configuration per customers system.

Description	Full Description	Nomenclature	APC	Price
ADD: WINDOWS SUPPLEMENTAL FULL CONFIG	Full Element Hardening is an ensemble of Windows OS configuration settings that implement a higher level of security.	CA01472AA	877	\$0.00
ADD: WINDOWS SUPPLEMENTAL TRANS CONFIG	Transparent Element Hardening includes an ensemble of Windows OS configuration settings that implement good security practices, but do not harden the Windows computers to the extent required for system FISMA certification.	CA01471AA	877	\$0.00

Choose one of the following back up upgrade options:

Description	Full Description	Nomenclature	APC	Price
ADD: BASELINE BACK-UP UPGRADE 7.15 - REPLACE	-	CA01760AF	877	\$100.00
ADD: FULL BAR UPGRADE 7.15 -				

REPLACE	-	CA01761AJ	877	\$4,500.00
---------	---	-----------	-----	------------

Step 4: Order the License Key

Upgrades: This Key is required for all upgrades.

Description	Full Description	Nomenclature	APC	Price
ADD: ZONE LEVEL UPGRADE KEY 7.15	-	CA02671AA	877	\$0.00

Step 5: Order the Optional Features Upgrades

If these optional features are currently on your customers system, the upgrade version is required. Please make sure to check that you are ordering the correct upgrade.

Description	Full Description	Nomenclature	APC	Price
ADD: RADIO AUTHENTICATION UPGRADE - 7.15	-	CA01561AJ	877	\$3,400.00
ADD: PDG SOFTWARE UPGRADE CONVENTIONAL IV&D	-	CA02145AC	877	\$14,000.00
ADD: PDG SOFTWARE UPGRADE IV&D	-	CA02143AC	877	\$14,000.00
ADD: EVENT LOGGING 7.15	-	CA01762AM	877	\$7,200.00
ADD: INFOVISTA SW UPG 7.15	-	CA01765AF	877	\$2,000.00

ASTRO 25 7.16
-- New Orders --

Ordering Information

Detailed Information on Options

For detailed information and description of orderables options please check the Ordering Guide: [7.16 M-Core New and Expansion Guide](#).

General Information

The ASTRO 25 solution has continued to mature and offer a feature rich solution to provide mission critical voice and multiple data solutions. Motorola will continue to introduce new and expanded functionality.

The first choice to be made on the ordering sequence is what size of a system does the customer desire and what functionality is needed on the system? For example, how many sites do they need? Will it be a voice only system? Does the customer plan to use data applications that require IVD? Is it a conventional only system?

Operational Licenses

The required customer functionality will be ordered as a operational licenses. At least one operational license must be purchased or any combination of them.

ASTRO 25 FDMA Trunking - This license is for a Project 25 FDMA Phase 1 compliant solution. This license supports both P25 Trunking and Conventional Phase 1 CAI voice operation. Analog conventional operation is also supported.

ASTRO 25 Conventional - This license is for an ASTRO 25 Conventional only solution. This license supports Project 25 Conventional voice and/or analog conventional voice.

HPD and Integrated Data - Operational licenses for HPD, Trunked Integrated Data and Conventional Integrated Data are now included in the price of the Data Capabilities options. No separate operational license is required for HPD or Integrated Data.

NOTE: Trunked Integrated Data or Conventional Integrated Data is now Mandatory are all new cores.

P25 Phase 2 TDMA & Dynamic Options - Phase 2 TDMA licenses enable an ASTRO 25 system to operate with the spectrally-efficient Project 25 Phase 2 TDMA air interface. The Phase 2 TDMA licenses can be ordered for select zones, sites and stations that require the 2:1 spectrum-efficient "6.25e" capability. Optional Dynamic capabilities can be added to a

Phase 2 TDMA system to provide further FDMA/TDMA interoperability and grade-of-service enhancements. Those options are: Dynamic Channel Assignment and Dynamic Talkgroup Assignment

Dynamic Channel Assignment provides improved station efficiency and grade of service by enabling dynamic switching between Phase 1 FDMA mode and Phase 2 TDMA mode for a given station based on the needs for the call assigned to the station. Dynamic Channel Assignment can be ordered for select stations as needed.

Dynamic Talkgroup Assignment improves interoperability by seamlessly switching APX subscribers between Phase 1 FDMA and Phase 2 TDMA modes without user intervention depending on the capabilities of the affiliated subscribers. Dynamic Talkgroup Assignment can be ordered for select sites that will be using this functionality.

The combination of these two options provides optimal grade-of-service and efficiency for Phase 1 FDMA/Phase 2 TDMA interoperability. If Dynamic options are purchased, then ASTRO 25 FDMA Site licenses and P25 Phase 2 TDMA Site license are required.

Capacity Licenses

To support the operational functionality required, specific capacity licenses have also been set up. Licenses are available for the following:

- Users - ASTRO 25 FDMA and HPD (does not apply to ASTRO 25 Conventional-only systems)
- Sites - ASTRO 25 Voice, HPD, DDM, SmartX & IPv6
- Channels - ASTRO 25 Conventional only systems
- MCC7500/MCC7100 console positions
- Refer to the ordering section below for further detail on the user, site and console license options.

For further detail related to features and functionality, please visit the links below:

[ASTRO 7.16 System Planner](#)

Field Replaceable Units (FRUs)

Field replaceable units (FRUs) are orderable via the accessory numbers shown below.

Ordering Requirements

These pages will lead you through the necessary steps required to order your new ASTRO 25 7.16 system. Please be sure to read each step carefully and supply the personality information required for the different model numbers to assure the factory will correctly build the product.

The following information must be included before placing the order:

1. **System ID.** Four digit hexadecimal number used to uniquely identify a system. For new systems, this will be assigned by the System Engineer using the Trunked Data Repository (TDR) process. Expansions to existing systems will use the existing System ID.
2. **Zone ID.** Number used to uniquely identify each zone in a system. Zone ID will always be 0001 for M1/M2 systems. For M3 systems, values may range from 0001 to 0007.
3. **System Extension ID.** Four digit hexadecimal number, **typically 0000**. Introduced in 7.15 to address the rare case where a customer has

intentionally chosen to use the same system ID across multiple systems. For such rare cases, customers or account teams inputting the order shall provide unique system extension IDs across the systems that have same system ID (e.g. 0001, 0002, etc).

4. **Valid Email Address.** This email will be used to deliver all software licensing entitlements to the customer.

NOTE: Software licenses are automatically generated based on the System, Zone and System Extension ID provided on the order. **It is critical that valid information is entered on the order, otherwise software licenses will fail to install.**

Please verify ID information using the following guidelines before submitting an order.

- **New System:** Follow the Trunked Data Repository (TDR) process to request a new System ID (<http://tdr.corp.mot.com/TDRPRD/>). System Extension ID should always be set to 0000 except for rare cases when the same System ID is shared across multiple customer systems.
- **Existing System:** Login to the License Manager application from an NM Client Workstation and locate the Device ID at the bottom right of the screen. The Device ID will be in the following format: System ID - Zone ID - System Extension ID - xxxx -xxxx -xxxxxxxxxxx
- *For example, Device ID 09FF-0003-0000-0001-9283-130493454762 corresponds to System ID 09FF, Zone ID 0003, and System Extension ID 0000.*

System level licenses must always be ordered on the same Zone as the User Configuration Server (UCS) with Unified Network Configurator (UNC) & Provisioning Manager (PM).

When ordering a DSR backup core, a duplicate software license file will be automatically generated based on the primary core with matching System, Zone and System Extension ID. Software licenses do not need to be re-ordered on the DSR backup core unless explicitly noted in the DSR ordering instructions.

If software licenses are generated with invalid System ID information, contact SSC and open a case to resolve the issue.

Configuration

Ordering Your Zone

Step 1: Order the Master Site Model (Required)

Description	Full Description	Nomenclature	APC	Price
MASTER SITE CONFIGURATION	-	SQM01SUM0273	877	\$0.00

Step 2a: Order the Required Configuration

For a new zone, choose a M1, M2 or M3 Configuration. For expansions/add-ons choose the M Expansion option.

M1 Configuration (24 sites or less)

Description	Full Description	Nomenclature	APC	Price
ADD: INCREASED CAPACITY	Increases site capacity for M1/M2 up to 75 sites, 500 channels and 125 Console Operator Positions. The following all count towards the site capacity: RF Repeater Sites, Simulcast Subsites, HPD Sites, Receive Only Sites, Console Sites, Remote Network Managment Sites, CCGWs, ISSI.1 Gateway, or SmartX Convertor. Need to order CA02830AA, CA02831AA or CA02845AA with this option for a new system. Also available on expansion orders.	UA00237AA	877	\$40,000.00
ADD: M1 SYSTEM (24 SITES OR LESS)	-	CA02830AA	877	\$66,280.00

M2 Configuration (24 sites or less)

Description	Full Description	Nomenclature	APC	Price
ADD: INCREASED CAPACITY	Increases site capacity for M1/M2 up to 75 sites, 500 channels and 125 Console Operator Positions. The following all count towards the site capacity: RF Repeater Sites, Simulcast Subsites, HPD Sites, Receive Only Sites, Console Sites, Remote Network Managment Sites, CCGWs, ISSI.1 Gateway, or SmartX Convertor. Need to order CA02830AA, CA02831AA or CA02845AA with this option for a new system. Also available on expansion orders.	UA00237AA	877	\$40,000.00
ADD: M2 SYSTEM WITH				

REDUNDANCY	-	CA02831AA	877	\$136,280.00
------------	---	-----------	-----	--------------

M3 Configuration (25-100 sites)

Description	Full Description	Nomenclature	APC	Price
ADD: M3 SYSTEM (1-150 SITES)-1ST ZONE	-	CA02832AA	877	\$206,280.00
ADD: M3 SYSTEM (1-150 SITES)-ADDTL ZONE	-	CA02833AA	877	\$146,280.00

M Expansion

Description	Full Description	Nomenclature	APC	Price
ADD: EXPAND 7.16 M CORE	Use this option to expand an existing 7.16 zone. Order this along with the additional capabilities being added to the system.	CA02629AB	877	\$0.00

Step 2b: Required for New Trunking Cores Only

Description	Full Description	Nomenclature	APC	Price
ADD: INTEROPERABILITY ENABLEMENT 7.16	<p>This is a mandatory option for Trunking Zone Level operation only. If selecting CA01207AA - ASTRO 25 Conventional, this is optional.</p> <p>CA02950AA includes virtualized ISGW application, a Fortinet Firewall and an Enablement Server that resides in the CEN. The ISGW application is virtualized on the M-Core Servers. Roaming licenses are NOT included for ISSI.</p> <p>WAVE trial licenses are loaded on the Enablement Server. If your customer wants WAVE, see the WAVE ordering guide for additional ordering instructions. If</p>	CA02950AA	877	\$40,000.00

	ordered, UNS can also cohab on the Enablement server. Firewall is used for WAVE and ISSI.			
ADD: NM/ZC CABINET	Only valid for M1/M2. M3 ships standard with cabinet.	CA02839AA	877	\$3,000.00
ADD: NM/ZC RACK	Only valid for M1/M2. M3 ships standard with cabinet.	CA02838AA	877	\$0.00

Step 3: Order the Zone Level Operational Licenses

If you desire voice capability, at least one operational license must be purchased per zone. Data site licenses are now a part of the G-series ordering guide.

Description	Full Description	Nomenclature	APC	Price
ADD: ASTRO 25 CONVENTIONAL	<p>This license is for a Project 25 Phase 1 compliant conventional only solution. This license supports both voice and integrated data. Analog conventional is also supported.</p> <p>NOTE: The following applications are not applicable in ASTRO 25 Conventional</p> <p>Only systems: RCM, Affiliation User Reports, Dynamic Freq Blocking, Dynamic Shared Services, Channel Partitioning, CADI and System Historical Reports.</p>	CA01207AA	877	\$15,000.00
ADD: PHASE 2 TDMA TRKG OP ZONE LIC	-	UA00158AA	877	\$25,000.00
ADD: ASTRO 25 FDMA	<p>ASTRO 25 FDMA TRKG OPERATION This license is for a Project 25 Phase 1 compliant trunking solution. This license also supports ASTRO 25 Conventional voice operation and Analog Conventional. This is not required for a conventional only operation or for TDMA-only systems. It is required if a system is</p>			

TRKG OPERATION	operating with the combination of TDMA and Dynamic Dual Mode (Dynamic Talkgroup Assignment and/or Dynamic Channel Assignment) because Dynamic Dual Mode utilizes both TDMA and FDMA modes of operation. No longer includes IV&D Operation. See the Trunked Integrated Data License below.	CA02113AA	877	\$35,000.00
----------------	---	-----------	-----	-------------

Order Dynamic Transcoding capabilities for your zone

Description	Full Description	Nomenclature	APC	Price
ADD: DYNAMIC TRANSCODER M2/L2	Required to transcode audio at the zone level when a call is granted at TDMA only and FDMA only sites. Need UA00160AA - Phase 2 Dynamic Talkgroup Assignment Site License and UA00222AA - 5 Simultaneous Transcoded Calls Two servers are included with this option.	CA02919AA	877	\$40,000.00
ADD: DYNAMIC TRANSCODER	Required to transcode audio at the zone level when a call is granted at TDMA only and FDMA only sites. Need UA00160AA - Phase 2 Dynamic Talkgroup Assignment Site License and UA00222AA - 5 Simultaneous Transcoded Calls One server is needed for Dynamic Transcoding, which ships as standard on L1/M1. ISSI8000 and Dynamic Transcoding cohab on this server.	CA02834AA	877	\$20,000.00
ADD: DYNAMIC TRANSCODER M3	Required to transcode audio at the zone level when a call is granted at TDMA only and FDMA only sites. Need UA00160AA - Phase 2 Dynamic Talkgroup Assignment Site License and UA00222AA - 5 Simultaneous Transcoded Calls Two servers are included with this option.	CA02920AA	877	\$45,000.00

Order data capabilities for your zone

Description	Full Description	Nomenclature	APC	Price
ADD: INTERSYSTEM DATA - CONNECTED CEN	-	UA00163AA	877	\$20,000.00
ADD:HIGH PERFORMANCE DATA	-	CA02082AD	222	\$113,000.00
ENH: TRUNKED ENHANCED DATA	Requires Trunked Integrated Data.	CA02389AA	222	\$12,000.00
ADD: CONVENTIONAL INTEGRATED DATA	-	CA02080AD	222	\$83,000.00
8 RF CHANNEL LICENSE	Conventional Integrated Data can support up to the 510 channels, where a channel is defined as a conventional repeater channel or a conventional simulcast, voting, or multicast channel.	CA01534AA	222	\$20,000.00
ADD:TRUNKED INTEGRATED DATA	-	CA02081AD	222	\$114,000.00

Choose all optional capabilities that apply for your zone

Description	Full Description	Nomenclature	APC	Price
ADD:EVENT LOGGING 7.16	-	CA01725AE	877	\$12,000.00
IPV6	Optional feature which enables IPv6 connectivity at the Zone Core. If you choose to order this optional feature, you are required to order one per zone (including Astro 25 Conventional Only systems). NOTE: There is a corresponding IPV6 site license that must be ordered. The site license is not needed for an ASTRO 25 Conventional Only system.	CA01417AA	877	\$50,000.00

700/800 mixed site operation is not required. If ordered, you must order it per zone.

Description	Full Description	Nomenclature	APC	Price
ADD: 700/800 MIXED SITE OPERATION	This feature enables ASTRO 25 systems with both 700 and 800 frequencies to better utilize 700 RF channels when radio talk groups contain 800-only radios and 700/800-capable radios. It distributes talk paths across 700 and 800 MHz channels thus lowering channel congestion and reducing system busies.	CA01395AA	877	\$15,000.00

Order High Availability capabilities at the master site (this is not applicable to High Availability Simulcast sites, either prime or remote). This option is utilized to enable your system/1st zone and your add-on zone for High Availability services (such as HA Data). Requires a redundant system configuration, i.e. not applicable to M1.

NOTE: This option does not include additional CNI (Customer Network Interface) equipment, such as, firewalls, border routers, switches, etc., or additional GGSN units.

Description	Full Description	Nomenclature	APC	Price
ADD: HIGH AVAILABILITY SYSTEM	-	CA02837AA	877	\$20,000.00

If you have chosen to order High Availability capabilities you can now choose the services you would like to deploy in a High Availability configuration.

Description	Full Description	Nomenclature	APC	Price
ADD: HA ATR SOFTWARE	-	CA02649AA	222	\$33,000.00
ENH: HA HIGH PERFORMANCE DATA	Provides High Availability for the HPD PDG.	CA02396AA	222	\$53,000.00
ENH: HA CONVENTIONAL INTEGRATED DATA	-	CA02632AA	222	\$45,000.00
ENH: HA TRUNKED DATA	Provides High Availability for the Trunked Integrated Data PDG. Option comes with	CA02397AA	222	\$59,000.00

	Enhanced Integrated Data capability.			
--	--------------------------------------	--	--	--

Choose one of the two backup solutions below:

Baseline backup will backup only the Network Management Database and the Zone Controllers, Full backup solution will back up critical files form other system elements to allow for a more rapid recovery if a complete box failure occurs. For a full list of system devlices that are covered by the full back up soltuion, consult the BAR manual.

Description	Full Description	Nomenclature	APC	Price
ADD: BASELINE BACK UP 7.16	-	CA01723AE	877	\$500.00
ADD: BACK UP & RECOVERY (BAR) 7.16	-	CA01724AE	877	\$15,000.00

Choose either transparent OR full configuration per customers system.

Description	Full Description	Nomenclature	APC	Price
ADD:WINDOW SUPPLEMENTAL FULLCONFIG 7.16	-	CA02836AA	877	\$0.00
ADD:WINDOW SUPPLEMENTAL TRANSCONFIG 7.16	-	CA02835AA	877	\$0.00

Step 4: Order the System Level Options

Description	Full Description	Nomenclature	APC	Price
ADD: CONVENTIONAL TALKGROUPS CORE	This license allows a digital conventional channel to be logically partitioned into talkgroups.	CA02681AA	877	\$20,000.00
ADD: SITE SELECTABLE ALERTS TRUNKING LICENSE	This license gives the ability for the ASTRO 25 system to signal alerts at user-selected trunking sites.	CA02413AA	877	\$20,000.00
ADD: FORTINET FIREWALL MANAGER 7.16	-	CA02638AB	877	\$9,000.00

ADD: CONVENTIONAL TALKGROUPS VIA ISSI/CSSI	Allows an ASTRO 25 conventional digital system to interoperate with third party digital consoles and base stations through the conventional talkgroup and CSSI interfaces. Need: UA00224AA Conventional Talkgroups via CSSI per Base Radio License	UA00223AA	226	\$20,000.00
ADD: DSR SYSTEM NOTIFICATION	This license provides notification to the license keys that the system/zones include DSR. This option is valid for adding Full DSR to an M1 or M3 System. NOTE: You must order CA01499AA when ordering DSR for the first time.	CA01499AA	877	\$10,000.00
ADD:RADIO AUTHENTICATION	-	CA02472AC	877	\$11,300.00
SMARTX 3600 SYSTEM LICENSE	This license gives the ability to use a SmartX Migration with your ASTRO 25 zone. NOTE: SmartX 3600 SITE LICENSE and 500 RADIO USER LICENSES are required with this, as well as ASTRO 25 FDMA TRUNKING OPERATION or P25 PHASE 2 TDMA TRUNKING OPERATION ZONE LICENSE	CA01403AA	877	\$10,000.00

If ordering Two-Factor Authentication, order as a separate line item

Description	Full Description	Nomenclature	APC	Price
PURCHASED SOFTWARE,FORTITOKEN PACK	-	DDN1933	708	\$560.00
	(For A7.15 and			

FORTITOKENMOBILE - PACK OF 5 SOFT-T	beyond)Internet and SMS capabilities (iOS or Android smartphone/tablet) are required to activate token. The RNI-DMZ firewall must have internet connectivity, Email/SMS server settings will need to be configured for token provisioning.	DDN1881	708	\$272.00
-------------------------------------	--	---------	-----	----------

Step 5: Order the Associated Capacity Licenses

IMPORTANT NOTE: Every RF site or simulcast sub-site (INCLUDING receive-only sites) will count as ONE site. It is important that the site count is accurate so that the customer will receive the proper number of managed object licenses. Quote the capacity licenses required remembering that as the system grows new licenses can be purchased. Do not quote an unnecessary high number of licenses up front. Capacity licenses for Integrated Data are now ordered with the GTR8000 Site Subsystem site controller.

Order the number of site licenses needed for your Trunking zone. For Trunking systems, you must order at least one of these (required).

Description	Full Description	Nomenclature	APC	Price
ADD: UNC ADDTL DEVICE LIC (QTY 10)	Add up the number of Trunking channels, Conventional channels, and number of Comparators. Then, divide by the number of sites. If your total is more than 10, the purchase of additional UNC licenses is required. # of objects = x # of sites = y	CA01316AA	877	\$500.00
ADD: HPD SITE	-	UA00154AA	877	\$8,000.00
ADD: P25 PHASE 2 TDMA TRKNG OP SITE LIC	-	UA00159AA	877	\$12,000.00
SMARTX 3600 SITE LICENSE	This license is required when the SmartX 3600 System License is ordered. One license is required per Simulcast Subsystem and/or IR site. This option licenses the customer to add a 3600 site to their ASTRO 25 zone. Note: IV&D Site license is NOT required.	CA01404AA	877	\$0.00

ADD: IPV6 SITE LICENSE	Optional feature which enables IPv6 connectivity at remote sites. Each option ordered provides an IPv6 license for one (1) Remote Site of any type (e.g. A25 IV&D Sites, Dynamic Dual Mode/X2-TDMA Sites, and HPD sites). Example: If a system has eighteen (18) A25 IV&D Sites that require IPv6 connectivity, the order should include a quantity of eighteen (18) IPv6 Site Licenses. If an additional two (2) sites of any type are being added to the system, a quantity of two (2) IPv6 Site Licenses should appear on the upgrade order. Note: If the system consists of one (1) simulcast system (one prime) and four (4) simulcast sub-sites, then four (4) IPv6 licenses must be ordered.	CA01418AA	877	\$15,000.00
ADD: PHASE 2 DYNAMIC TG ASGNMT SITE LIC	-	UA00160AA	877	\$18,000.00
ADD: ASTRO 25 FDMA SITE LICENSE	-	UA00153AA	877	\$17,000.00

of objects = x

of sites = y

If $x/y < 10$ = No further action is required

If $x/y > 10$ = Additional UNC device licenses need to be ordered

Formula used to determine how many packs need to be ordered: $(x/y - 10) y / 10 = \#$ of 10 packs that need to be ordered

Ex:(12 channels per site -10) times 4 sites = 8 divided by 10 = .80

Customer would need to order 1 qty. pack of 10

*Please be advised this is guide for ordering additional UNC Device Licenses. Customer systems are unique in design, and once configured, there may be a need for additional device licenses.

Order the console licenses for your Trunking Zone.

Description	Full Description	Nomenclature	APC	Price
ADD: MCC7500 CONSOLE LICENSES (QTY 5)	A license should be purchased for each MCC7500, MCC7100 and AIS position.	UA00156AA	877	\$5,000.00

P25 Phase 2 TDMA Base Radio Licenses (Required if ordering Phase 2 TDMA)

Description	Full Description	Nomenclature	APC	Price
ADD: P25 PHASE 2 TDMA SW BASE RADIO LIC	-	UA00161AA	877	\$3,000.00
ADD: PHASE 2 DYNAMIC CH BASE RADIO LIC	-	UA00162AA	877	\$2,000.00

Dynamic Transcoded Calls

Description	Full Description	Nomenclature	APC	Price
ADD: TRANSCODED SIMULTANEOUS CALLS (QTY 5)	-	UA00222AA	877	\$10,000.00

Conventional Talkgroup via CSSI per Base Radio License

Order the number of Trunking Radio and HPD User licenses needed for your system.

For single zone systems, the sum of radio IDs below cannot exceed 64,000. For multi-zone systems, the sum of the radio IDs below cannot exceed 128,000.

A radio ID is defined as an ID with or without an associated alias in the UCS. One physical radio can have multiple radio ids:

Home trunking radio IDs.

Interoperability trunking radio IDs

digital conventional radio IDs.

MDC1200 radio IDs.

MCC 7100 / MCC 7500consoles that access trunking resources .

MCC 7100 / MCC 7500consoles that access digital conventional resource

MCC 7100 / MCC 7500consoles that access MDC1200 resource

HPD radio IDs

From the above list only trunking and data user licenses have a fee but all radio IDs are counted towards the system limits.

If your system has 40,000 radio users each with a trunking radio IDs and digital conventional

radio IDs, you will need to purchase qty 80 of UA00152AA option (there are no user licenses required for conventional radio IDs). The system database will see a total of 80,000 ids (requiring a M3 multizone system). Any interoperability users belonging to a neighboring ASTRO 25 system, will count towards this database capacity, additional user licenses may be needed for those users.

Note: User license fees apply only to trunked radio IDs and HPD radio IDs as detailed in the options below.

Description	Full Description	Nomenclature	APC	Price
ADD:500 RADIO USER LICENSES	-	UA00152AA	877	\$7,500.00
ADD: 500 HPD USER LICENSES	-	UA00157AA	877	\$10,000.00
ENH: 500 ENHANCED TRUNKED DATA USER LICENSES	Order the appropriate number of Enhanced Trunked Data user license packs based upon the number of Enhanced Trunked Data equipped radios in the zone.(Note: The maximum number of Data users is dependent upon the system configuration and type of Data users. Please consult the System Planner before ordering.)	CA02473AA	877	\$2,000.00
ADD: RADIO AUTH 500 USER LIC	-	UA00165AA	877	\$5,000.00

Order the number of capacity licenses needed for Group Services

Description	Full Description	Nomenclature	APC	Price
ADD: MCC7500/MCC7100 CONSOLE GROUP TEXT LICENSES	-	UA00235AA	877	\$250.00
ADD: 50 TALK GROUP TEXT LICENSES	-	UA00245AA	877	\$3,000.00
ADD: 500 RADIO ALIAS UPDATE LICENSES	-	UA00236AA	877	\$5,000.00

Order the number of capacity licenses needed for your ASTRO 25 Conventional only zone. For ASTRO 25 Conventional only systems, you must order at least one of these.

Description	Full Description	Nomenclature	APC	Price
ADD: MCC7500 CONSOLE LICENSES (QTY 5)	A license should be purchased for each MCC7500, MCC7100 and AIS position.	UA00156AA	877	\$5,000.00
ADD: UNC ADDTL DEVICE LIC (QTY 10)	Add up the number of Trunking channels, Conventional channels, and number of Comparators. Then, divide by the number of sites. If your total is more than 10, the purchase of additional UNC licenses is required. # of objects = x # of sites = y	CA01316AA	877	\$500.00
ADD: CONVENTIONAL PORT LICENSES (QTY 25)	-	UA00155AA	877	\$1,000.00

of objects = x

of sites = y

If $x/y < 10$ = No further action is required

If $x/y > 10$ = Additional UNC device licenses need to be ordered

Formula used to determine how many packs need to be ordered: $(x/y - 10) y / 10 = \# \text{ of } 10 \text{ packs that need to be ordered}$

Ex: (12 channels per site -10) times 4 sites = 8 divided by 10 = .80

Customer would need to order 1 qty. pack of 10

*Please be advised this is guide for ordering additional UNC Device Licenses. Customer systems are unique in design, and once configured, there may be a need for additional device licenses.

Step 6: Order the Required System Management Application User Licenses

Description	Full Description	Nomenclature	APC	Price
-------------	------------------	--------------	-----	-------

ADD: UNIFIED NETWORK CONFIGURATOR (UNC)	-	UA00136AA	877	\$20,000.00
ADD: HIGH CAPACITY UNC 7.16	-	CA02637AB	877	\$25,000.00
ADD: PROVISIONING MANAGER	-	UA00147AA	877	\$5,000.00

Step 7: Order the Required Zone Management Application User Licenses

Description	Full Description	Nomenclature	APC	Price
ADD: UNIFIED EVENT MANAGER (UEM)	-	UA00146AA	877	\$20,000.00

Step 8: Enhance your Network Management Capabilities

The following options enhance the capability of the Fault Management applications.

Description	Full Description	Nomenclature	APC	Price
ADD: EMAIL ALARM NOTIFICATIONS	Order one per zone.	UA00137AA	877	\$5,000.00
ADD: UEM SNMP ELEMENT MANAGEMENT TOOLKIT (QTY 10)	-	UA00227AA	877	\$20,000.00

ADD: INFOVISTA 7.16	-	CA01989AD	877	\$153,000.00

Step 9: Order the NM Client

Order the Personal Computer (PC) workstations that serve as the client terminal. The mouse and keyboard are included but the PC hardware and monitor are sold separately; please be sure to include all items when ordering.

Certified Network Management Workstation Statement

Description	Full Description	Nomenclature	APC	Price
ASTRO CLIENT APPL SW 7.16	-	T8206	877	\$850.00
ASTRO 7.16 RADIO AUTHENTICATION CLIENT SOFTWARE	-	T8205	877	\$5,000.00

Step 10: Order the Anti Malware

Order 1 for each Windows/Linux based device in the system that will be managed by the AntiMalware server. Note that the Anti-Malware client is a license and software is included. The T model listed below is another copy of the software for products that do not embed Anti Malware in their server. It does not need to also be ordered if you are ordering a Master Site system.

Description	Full Description	Nomenclature	APC	Price
ADD: ANTI-MALWARE DEF UPDATE LIC	Provides protection to Windows/Linux based devices against viruses, spyware and other software born threats. This is a license for all client/devices. Order one per Windows/Linux client/device managed by the server except for Consoles/AIS	CA02193AA	877	\$165.00

	and MOSCAD NFM devices that DO NOT embed McAfee.			
MCAFFEE WINDOWS AV CLIENT	This is a standalone installer for Windows operating systems. This should only be ordered for Consoles and MOSCAD products that do not embed the client license.	T7885	708	\$165.00

Step 11: Custom Reports (Optional)

Description	Full Description	Nomenclature	APC	Price
CRYSTAL REPORTS	Works in conjunction with Historical Reports application to allow users to modify existing report templates or create new templates according to their specific requirements.	DDN9657	708	\$994.00

Step 12: Order the Monitor, Mouse, Keyboard

Order the monitors and peripherals for your Network Management clients. The monitor, keyboard and mouse may also be ordered for use with the Transport Network Performance Server.

Description	Full Description	Nomenclature	APC	Price
CERTIFIED KEYBOARD FOR RSD SERVERS AND WORKSTATIONS	Order as a main line item.	L3225A	708	\$42.00
CERTIFIED OPTICAL WHEEL MOUSE FOR RSD SERVERS AND WORKSTATIONS	Order as a main line item.	L3226A	708	\$30.00

Step 13: Common Platform Hardware

Order this common platform hardware if a separate remote Domain Controller or ZCP Logging functionality is required. This is only applicable if you are ordering Zone Core Protection (part of IA ordering guide/ECAT page) and Event Logging (CA01725AE)

Description	Full Description	Nomenclature	APC	Price
ADD: COMMON PLATFORM HW 7.16	-	CA03189AA	877	\$20,000.00

Choose one of these options:

Description	Full Description	Nomenclature	APC	Price
ADD: DC STANDALONE 7.16	-	CA03190AA	877	\$0.00
ADD: ZCP SYSLOP 7.16	-	CA03191AA	877	\$11,052.00

Only required when ordering DC Stand Alone. Choose either transparent OR full configuration per customers system. One must be ordered per Windows OS.

Description	Full Description	Nomenclature	APC	Price
ADD: WINDOWS SUPPLEMENTAL FULL CONFIG	Full Element Hardening is an ensemble of Windows OS configuration settings that implement a higher level of security.	CA01472AA	877	\$0.00
ADD: WINDOWS SUPPLEMENTAL TRANS CONFIG	Transparent Element Hardening includes an ensemble of Windows OS configuration settings that implement good security practices, but do not harden the Windows computers to the extent required for system FISMA certification.	CA01471AA	877	\$0.00

System Expansions

When ordering a System Expansion, the M Expansion option is needed. The following options only contain software.

Description	Full Description	Nomenclature	APC	Price
ADD: INCREASED CAPACITY	Increases site capacity for M1/M2 up to 75 sites, 500 channels and 125 Console Operator Positions. The following all count towards the site capacity: RF Repeater Sites, Simulcast Subsites, HPD Sites, Receive Only Sites, Console Sites, Remote Network	UA00237AA	877	\$40,000.00

	Management Sites, CCGWs, ISSI.1 Gateway, or SmartX Converter. Need to order CA02830AA, CA02831AA or CA02845AA with this option for a new system. Also available on expansion orders.			
ADD:M2-M3 CORE EXPANSION	-	CA02682AA	877	\$68,000.00
ADD:M2-M3 CORE EXPANSION ADDITIONAL ZONE	-	CA02683AA	877	\$10,000.00
ENH: L TO M MIGRATION	-	CA02606AA	425	\$150,000.00

Ordering Additional Zones

When ordering additional zones, skip steps 4,6 and 10.

You may now choose to add the optional System Statistics Server and System Historical Reports

Note: SSS is only available for M3 Multi-zone **Trunking** Customers only

Description	Full Description	Nomenclature	APC	Price
ADD: SYSTEM STATISTICAL SERVER	-	CA01416AD	877	\$40,000.00
ADD: SYSTEM HISTORICAL REPORTS	-	UA00145AA	877	\$10,000.00

Ordering Dynamic System Resilience (DSR)

This section will lead you through the necessary steps required to order your ASTRO 25 7.13 DSR feature. Please be sure to read each step carefully and supply the personality information required to assure the factory will correctly build the product.

NOTE: You are required to order DSR System Notification option (CA01499AA) with your main core the first time you order DSR.

The following information must be included on the order:

1. System ID. For new systems, this will be assigned by the System Engineer using the Trunked Data Repository (TDR) process. Enhancements to existing systems will use the

existing System ID.

2. Zone ID. This is a three digit number used to identify each zone in a system and is used by the factory to consolidate the equipment for each zone.

If Adding M1 or M3 DSR, follow steps 1-3

Step 1: Order M1/M3 with Full DSR

Description	Full Description	Nomenclature	APC	Price
ADD: INCREASED CAPACITY	Increases site capacity for M1/M2 up to 75 sites, 500 channels and 125 Console Operator Positions. The following all count towards the site capacity: RF Repeater Sites, Simulcast Subsites, HPD Sites, Receive Only Sites, Console Sites, Remote Network Management Sites, CCGWs, ISSI.1 Gateway, or SmartX Convertor. Need to order CA02830AA, CA02831AA or CA02845AA with this option for a new system. Also available on expansion orders.	UA00237AA	877	\$40,000.00
DSR VOICE	-	CA01511AA	877	\$0.00
ADD: M3 ADDITIONAL ZONE DSR 7.16	-	CA02847AA	877	\$146,280.00
ADD: M3 1ST ZONE DSR 7.16	-	CA02846AA	877	\$206,280.00
ADD: NM/ZC CABINET	Only valid for M1/M2. M3 ships standard with cabinet.	CA02839AA	877	\$3,000.00
DSR DATA	If you utilize data on your system, you must first order this option. Not valid for M1 systems with Voice-only DSR	CA01512AA	877	\$0.00
ADD: M1 ZONE DSR 7.16	-	CA02845AA	877	\$66,280.00

ADD: NM/ZC RACK	Only valid for M1/M2. M3 ships standard with cabinet.	CA02838AA	877	\$0.00
DYNAMIC SYSTEM RESILIENCE	If ordered on any zone, all zones must order DSR functionality (up to six zones maximum)	SQM01SUM0231	877	\$20,000.00

Step 2: Order System Level Licenses

If these were ordered in your primary system, they must be ordered in your secondary.

Description	Full Description	Nomenclature	APC	Price
ADD: SYSTEM STATISTICAL SERVER	-	CA01416AD	877	\$40,000.00
ADD: DSR MULTI-ZONE OPERATIONAL LICENSE	-	CA01513AA	877	\$75,000.00
ADD:RADIO AUTHENTICATION	-	CA02472AC	877	\$11,300.00

You may now choose to order Infovista. It is not required to order this even if it exists in your primary system.

Description	Full Description	Nomenclature	APC	Price
ADD: INFOVISTA 7.16	-	CA01989AD	877	\$153,000.00

Step 3: Order Zone Level Licenses

If these were ordered in your primary master site, they must be ordered in your secondary master site.

Description	Full Description	Nomenclature	APC	Price
ADD: DSR CAPABILITY CONVENTIONAL INTEGRATED DATA	-	CA02631AB	222	\$45,000.00
ADD:EVENT LOGGING 7.16	-	CA01725AE	877	\$12,000.00
	Required to transcode audio at the zone level			

ADD: DYNAMIC TRANSCODER M2/L2	when a call is granted at TDMA only and FDMA only sites. Need UA00160AA - Phase 2 Dynamic Talkgroup Assignment Site License and UA00222AA - 5 Simultaneous Transcoded Calls Two servers are included with this option.	CA02919AA	877	\$40,000.00
ADD:DSR CAPABILITY TRKD INT DATA	-	CA02077AD	222	\$59,000.00
ADD: DYNAMIC TRANSCODER	Required to transcode audio at the zone level when a call is granted at TDMA only and FDMA only sites. Need UA00160AA - Phase 2 Dynamic Talkgroup Assignment Site License and UA00222AA - 5 Simultaneous Transcoded Calls One server is needed for Dynamic Transcoding, which ships as standard on L1/M1. ISSI8000 and Dynamic Transcoding cohab on this server.	CA02834AA	877	\$20,000.00
ADD:DSR CAPABILITY HPD	-	CA02398AC	222	\$53,000.00
ADD: DYNAMIC TRANSCODER M3	Required to transcode audio at the zone level when a call is granted at TDMA only and FDMA only sites. Need UA00160AA - Phase 2 Dynamic Talkgroup Assignment Site License and UA00222AA - 5 Simultaneous Transcoded Calls Two servers are included with this option.	CA02920AA	877	\$45,000.00

Order High Availability capabilities at the master site (this is not applicable to High Availability Simulcast sites, either Prime or remote). This option is utilized to enable your secondary

master site for High Availability services (such as HA Data). If this was ordered in your primary master site, it must be ordered in your secondary master site. Not Valid for M1 DSR

NOTE: This option does not include additional CNI (Customer Network Interface) equipment, such as, firewalls, border routers, switches, etc., or additional GGSN units.

Master Site Network Management / Zone Controller
ASTRO 25 7.16 Upgrade

Updates

NOTE: FOR MORE DETAILS ON OPTIONS AND ORDERABILITY DESCRIPTIONS PLEASE CHECK THE ORDERING GUIDE: [7.16 M-Core Upgrade Ordering Guide](#).

Ordering Information

General Information

For Upgrades:

These pages will lead you through the necessary steps to upgrade your ASTRO 25 7.14 or ASTRO 25 7.15 system to an ASTRO 25 7.16 system. Please be sure to read each step carefully and supply the personality information required for the different model numbers to assure the factory will correctly build the product.

**Please note the changes to the NM/ZC upgrade options and prices. There are now two NM/ZC upgrade options for systems upgrading either from 7.14 to 7.16, or from 7.15 to 7.16.

Ordering Requirements

The following information must be included on the order for all SQM model numbers:

1. **System ID.** Four digit hexadecimal number used to uniquely identify a system. For new systems, this will be assigned by the System Engineer using the Trunked Data Repository (TDR) process. Expansions to existing systems will use the existing System ID.
2. **Zone ID.** Number used to uniquely identify each zone in a system. Zone ID will always be 0001 for M1/M2 systems. For M3 systems, values may range from 0001 to 0007.
3. **System Extension ID.** Four digit hexadecimal number, **typically 0000**. Introduced in 7.15 to address the rare case where a customer has intentionally chosen to use the same system ID across multiple systems. For such rare cases, customers or account teams inputting the order shall provide unique system extension IDs across the systems that have same system ID (e.g. 0001, 0002, etc).
4. **Valid Email Address.** This email will be used to deliver all software licensing entitlements to the customer.

Configuration

Upgrading your System

REQUIRED UPGRADES FOR ALL SYSTEMS:

Step 1: Order the Master Site Upgrade model

Description	Full Description	Nomenclature	APC	Price
MASTER SITE UPGRADE MODEL	-	SQM01SUM0288	877	\$0.00
ADD: UPGRADE TO 7.16	-	CA02901AA	877	\$0.00

Step 2: Order the Software Upgrade (per zone)

Make sure to order the correct upgrade depending on what release your customer is upgrading from.

Description	Full Description	Nomenclature	APC	Price
ENH: ZONE UPG SOFTWARE FOR 7.15-7.16	-	CA02898AA	877	\$150,000.00
ENH: ZONE UPG SOFTWARE FOR 7.14-7.16	-	CA02897AA	877	\$300,000.00

Order 1 per System. If upgrading M1, M2 or the Primary M3 Zone, the System Upgrade SW option CA01747AJ must be purchased.

Description	Full Description	Nomenclature	APC	Price
ADD: UCS UPGRADE SW FOR 7.16	-	CA01747AJ	877	\$2,300.00
ADD:SSS UPGRADE SW FOR 7.15	-	CA01461AL	877	\$1,400.00

Purchase the requisite operational upgrades per zone.

Description	Full Description	Nomenclature	APC	Price
-------------	------------------	--------------	-----	-------

ADD: 700/800 MIXED SITE UPGRD LICENSE	-	CA01580AB	877	\$4,500.00
ADD: ASTRO 25 CONV UPGRD LICENSE	-	CA01579AB	877	\$4,500.00
ADD: ASTRO FDMA TRUNKING UPGRADE	Order if you purchased the ASTRO 25 with IV&D operational license on the original purchase	CA01577AB	877	\$15,000.00

Choose either transparent OR full configuration per customers system.

Description	Full Description	Nomenclature	APC	Price
ADD:WINDOW SUPPLEMENTAL FUL LCONFIG 7.16	-	CA02836AA	877	\$0.00
ADD:WINDOW SUPPLEMENTAL TRANS CONFIG 7.16	-	CA02835AA	877	\$0.00

Choose one of the following back up upgrade options:

Description	Full Description	Nomenclature	APC	Price
ADD: BASELINE BACK-UP UPGRADE 7.15	-	CA01760AH	877	\$100.00
ADD: FULL BAR UPGRADE 7.16	-	CA01761AL	877	\$4,500.00

Step 3: Order the Optional Features Upgrades

If these optional features are currently on your customers system, the upgrade version is required. Please make sure to check that you are ordering the correct upgrade.

Description	Full Description	Nomenclature	APC	Price
ADD: EVENT LOGGING 7.16	-	CA01762AN	877	\$7,200.00
ADD: PDG SOFTWARE UPGRADE CONVENTIONAL IV&D	-	CA02145AD	877	\$14,000.00

ADD: INFOVISTA SW UPG 7.16	-	CA01765AG	877	\$2,000.00
ADD: NORTHBOUND INTERFACE UPGRADE	-	CA02910AA	877	\$5,000.00
ADD: MOSCAD VIRTUAL APP UPGRADE 7.14_15 TO.16	-	CA02908AA	382	\$12,800.00
ADD: PDG SOFTWARE UPGRADE IV&D	-	CA02143AD	877	\$14,000.00
ADD: RADIO AUTHENTICATION UPGRADE - 7.15	-	CA01561AJ	877	\$3,400.00
ADD: PDG SOFTWARE UPGRADE HPD	-	CA02144AD	877	\$15,000.00

Step 3: Order the Optional Features Upgrades

If these optional features are currently on your customers system, the upgrade version is required. Please make sure to check that you are ordering the correct upgrade.

Description	Full Description	Nomenclature	APC	Price
ADD: EVENT LOGGING 7.16	-	CA01762AN	877	\$7,200.00

Ordering Information

Detailed Information on Options

For detailed information and description of orderable options please reference the Ordering Guide: [7.17 M-Core New and Expansion Guide](#).

General Information

Ordering Requirements

These pages will lead you through the necessary steps required to order your new ASTRO 25 7.17 system. Please be sure to read each step carefully and supply the personality information required for the different model numbers to assure the factory will correctly build the product.

The following information must be included before placing the order:

- 1. System ID.** Four digit hexadecimal number used to uniquely identify a system. For new systems, this will be assigned by the System Engineer using the Trunked Data Repository (TDR) process. Expansions to existing systems will use the existing System ID.
- 2. Zone ID.** Number used to uniquely identify each zone in a system. Zone ID will always be 0001 for M1/M2 systems. For M3 systems, values may range from 0001 to 0007.
- 3. System Extension ID.** Four digit hexadecimal number, **typically 0000**. Introduced in 7.15 to address the rare case where a customer has intentionally chosen to use the same system ID across multiple systems. For such rare cases, customers or account teams inputting the order shall provide unique system extension IDs across the systems that have same system ID (e.g. 0001, 0002, etc).
- 4. Valid Email Address.** This email will be used to deliver all software licensing entitlements to the customer.

Configuration

Ordering Your Zone

Order the Master Site Model (Required)

Description	Full Description	Nomenclature	APC	Price
MASTER SITE CONFIGURATION	-	SQM01SUM0273	877	\$0.00

New A7.17 Cores are no longer available

If expanding an existing 7.17 system, proceed to the M Expansions/Add-on Section.

Order the Zone Level Operational Licenses

Description	Full Description	Nomenclature	APC	Price
ADD: ASTRO 25 FDMA TRKG OPERATION	<p>ASTRO 25 FDMA TRKG OPERATION This license is for a Project 25 Phase 1 compliant trunking solution. This license also supports ASTRO 25 Conventional voice operation and Analog Conventional. This is not required for a conventional only operation or for TDMA-only systems. It is required if a system is operating with the combination of TDMA and Dynamic Dual Mode (Dynamic Talkgroup Assignment and/or Dynamic Channel Assignment) because Dynamic Dual Mode utilizes both TDMA and FDMA modes of operation. No longer includes IV&D Operation. See the Trunked Integrated Data License below.</p>	CA02113AA	877	\$35,000.00
ADD: PHASE 2 TDMA TRKG OP ZONE LIC	-	UA00158AA	877	\$25,000.00
	<p>This license is for a Project 25 Phase 1 compliant conventional only solution. This license supports both voice and integrated data. Analog conventional is also supported.</p>			

ADD: ASTRO 25 CONVENTIONAL	NOTE: The following applications are not applicable in ASTRO 25 Conventional Only systems: RCM, Affiliation User Reports, Dynamic Freq Blocking, Dynamic Shared Services, Channel Partitioning, CADI and System Historical Reports.	CA01207AA	877	\$15,000.00
-------------------------------	---	-----------	-----	-------------

Data Capabilities

Trunked Integrated Data or Conventional Integrated Data is Standard on the Primary Core for new 7.17 systems. Whether your system is equipped with a Trunking or Conventional PDG is based on the Zone Voice Operational License chosen for this zone.

DO NOT choose CA02081AE or CA02080AE for a new 7.17 zone. If you are expanding a system that did not ship with the desired PDG, then you can order one or both of those with CA02629AC.

Description	Full Description	Nomenclature	APC	Price
ADD: TRUNKED INTEGRATED DATA	-	CA02081AE	877	\$114,000.00
ENH: TRUNKED ENHANCED DATA	Requires Trunked Integrated Data.	CA02389AA	222	\$12,000.00
ADD: CONVENTIONAL INTEGRATED DATA	-	CA02080AE	877	\$83,000.00
8 RF CHANNEL LICENSE	Conventional Integrated Data can support up to the 510 channels, where a channel is defined as a conventional repeater channel or a conventional simulcast, voting, or multicast channel.	CA01534AA	222	\$20,000.00
ADD: INTERSYSTEM DATA - CONNECTED CEN	-	UA00163AA	877	\$20,000.00

ADD: ANTI-MALWARE DEF UPDATE LIC	Provides protection to Windows/Linux based devices against viruses, spyware and other software born threats. This is a license for all client/devices. Order one per Windows/Linux client/device managed by the server except for Consoles/AIS and MOSCAD NFM devices that DO NOT embed McAfee.	CA02193AA	877	\$165.00
	This is a standalone installer			

MCAFEE WINDOWS AV CLIENT	for Windows operating systems. This should only be ordered for Consoles and MOSCAD products that do not embed the client license.	T7885	708	\$165.00
--------------------------	---	-------	-----	----------

High Availability Data

Order High Availability capabilities at the master site (this is not applicable to High Availability Simulcast sites, either prime or remote).

This option is utilized to enable your system/1st zone and your add-on zone for High Availability services.

Requires a redundant system configuration, i.e. not applicable to M1.

This option DOES NOT include the redundant CNI (Customer Network Interface) equipment (Firewall, GGSN, border router, switch etc.)

Description	Full Description	Nomenclature	APC	Price
ADD: HIGH AVAILABILITY SYSTEM	-	CA02837AB	877	\$20,000.00
ADD: HA ATR SOFTWARE	-	CA02649AA	222	\$33,000.00
ENH: HA TRUNKED DATA	Provides High Availability for the Trunked Integrated Data PDG. Option comes with Enhanced Integrated Data capability.	CA02397AA	222	\$59,000.00
ENH: HA CONVENTIONAL INTEGRATED DATA	-	CA02632AA	222	\$45,000.00
ENH: HA HIGH PERFORMANCE DATA	Provides High Availability for the HPD PDG.	CA02396AA	222	\$53,000.00

Other Optional Zone Capabilities

Description	Full Description	Nomenclature	APC	Price
IPV6	Optional feature which enables IPv6 connectivity at the Zone Core. If you choose to order this optional feature, you are required to order one per zone (including Astro 25 Conventional Only systems). NOTE: There is a	CA01417AA	877	\$50,000.00

	<p>corresponding IPv6 site license that must be ordered. The site license is not needed for an ASTRO 25 Conventional Only system.</p>			
ADD: IPV6 SITE LICENSE	<p>Optional feature which enables IPv6 connectivity at remote sites. Each option ordered provides an IPv6 license for one (1) Remote Site of any type (e.g. A25 IV&D Sites, Dynamic Dual Mode/X2-TDMA Sites, and HPD sites).</p> <p>Example: If a system has eighteen (18) A25 IV&D Sites that require IPv6 connectivity, the order should include a quantity of eighteen (18) IPv6 Site Licenses.</p> <p>If an additional two (2) sites of any type are being added to the system, a quantity of two (2) IPv6 Site Licenses should appear on the upgrade order. Note: If the system consists of one (1) simulcast system (one prime) and four (4) simulcast sub-sites, then four (4) IPv6 licenses must be ordered.</p>	CA01418AA	877	\$15,000.00
ADD: EVENT LOGGING 7.17	-	CA01725AF	877	\$12,000.00
ADD: 700/800 MIXED SITE OPERATION	<p>This feature enables ASTRO 25 systems with both 700 and 800 frequencies to better utilize 700 RF channels when radio talk groups contain 800-only radios and 700/800-capable radios. It distributes talk paths across 700 and 800 MHz channels thus lowering channel congestion and reducing system busies.</p>	CA01395AA	877	\$15,000.00

Order the System Level Features

Personnel Accountability

Enables Personnel Accountability operation over the ASTRO IV&D Infrastructure. Additional items are required for a complete Personnel Accountability solution. Please visit APX Personnel Accountability price page:

APX Personnel Accountability PCAT page

Host-Based CSMS

Description	Full Description	Nomenclature	APC	Price
ADD: HOST BASED CSMS (A7.17.3)	Optional feature which enables product specific firewalls for Windows products. This option includes the ASTRO 25 Security Server Hardware and Software needed to support Host-Based CSMS. NOTE: Host-Based CSMS device licenses need to be ordered separately for each Windows device in the system.	CA03584AA	877	\$80,000.00
	This option is required when			

ADD: HOST BASED CSMS DEVICE LICENSES	"Host-Based CSMS" (CA03584AA) is ordered. Must order (1) for each Windows device in the system	UA00726AA	877	\$200.00
---	---	-----------	-----	----------

Conventional Talkgroups

Description	Full Description	Nomenclature	APC	Price
ADD: CONVENTIONAL TALKGROUPS CORE	This license allows a digital conventional channel to be logically partitioned into talkgroups.	CA02681AA	877	\$20,000.00
ADD: CONVENTIONAL TALKGROUPS VIA ISSI/CSSI	Allows an ASTRO 25 conventional digital system to interoperate with third party digital consoles and base stations through the conventional talkgroup and CSSI interfaces.	UA00223AA	226	\$20,000.00

Firewall Management Service

Description	Full Description	Nomenclature	APC	Price
ADD: FORTINET FIREWALL MANAGER 7.17	-	CA02638AC	877	\$9,000.00

DSR Notification

Description	Full Description	Nomenclature	APC	Price
ADD: DSR SYSTEM NOTIFICATION	This license provdies notification to the license keys that the system/zones include DSR. This option is valid for adding Full DSR to an M1 or M3 System. NOTE: You must order CA01499AA when ordering DSR for the first time.	CA01499AA	877	\$10,000.00

SmartX Operation

--	--	--	--	--

Description	Full Description	Nomenclature	APC	Price
SMARTX 3600 SYSTEM LICENSE	This license gives the ability to use a SmartX Migration with your ASTRO 25 zone. NOTE: SmartX 3600 SITE LICENSE and 500 RADIO USER LICENSES are required with this, as well as ASTRO 25 FDMA TRUNKING OPERATION or P25 PHASE 2 TDMA TRUNKING OPERATION ZONE LICENSE	CA01403AA	877	\$10,000.00
SMARTX 3600 SITE LICENSE	This license is required when the SmartX 3600 System License is ordered. One license is required per Simulcast Subsystem and/or IR site. This option licenses the customer to add a 3600 site to their ASTRO 25 zone. Note: IV&D Site license is NOT required.	CA01404AA	877	\$0.00

Site Selectable Trunking Alerts

Description	Full Description	Nomenclature	APC	Price
ADD: SITE SELECTABLE ALERTS TRUNKING LICENSE	This license gives the ability for the ASTRO 25 system to signal alerts at user-selected trunking sites.	CA02413AA	877	\$20,000.00

Two-Factor Authentication

Description	Full Description	Nomenclature	APC	Price
PURCHASED SOFTWARE,FORTITOKEN PACK	-	DDN1933	708	\$560.00
FORTITOKENMOBILE - PACK OF 5 SOFT-T	(For A7.15 and beyond)Internet and SMS capabilities (iOS or Android smartphone/tablet) are required to activate token. The RNI-DMZ firewall must have internet connectivity, Email/SMS server settings	DDN1881	708	\$272.00

	will need to be configured for token provisioning.			
--	--	--	--	--

Order System Level Capacity Licenses

Order the number of Trunking Radio and HPD User licenses needed for your system.

For M1/M2 systems, the sum of radio IDs cannot exceed 16,000.

For M3 systems, the sum of radio IDs per zone cannot exceed 150,000.

For multi-zone systems, the sum of the radio IDs cannot exceed 250,000.

A radio ID is defined as an ID with or without an associated alias in the UCS. One physical radio can have multiple radio ids:

- Â· Home trunking radio IDs,
- Â· Interoperability trunking radio IDs
- Â· digital conventional radio IDs,
- Â· MDC1200 radio IDs,
- Â· MCC 7100 / MCC 7500 consoles that access trunking resources ,
- Â· MCC 7100 / MCC 7500 consoles that access digital conventional resource
- Â· MCC 7100 / MCC 7500 consoles that access MDC1200 resource
- Â· HPD radio IDs

From the above list only trunking and data user licenses have a fee but all radio IDs are counted towards the system limits.

If your system has 40,000 radio users each with a trunking radio IDs and digital conventional radio IDs, you will need to purchase qty 80 of UA00152AA option (there are no user licenses required for conventional radio IDs). The system database will see a total of 80,000 ids (requiring a M3 multizone system). Any interoperability users belonging to a neighboring ASTRO 25 system, will count towards this database capacity, additional user licenses may be needed for those users.

Note: User license fees apply only to trunked radio IDs and HPD radio IDs as detailed in the options below.

Description	Full Description	Nomenclature	APC	Price
ADD:500 RADIO USER LICENSES	-	UA00152AA	877	\$7,500.00
ADD: 500 VISITING RADIO	Each option ordered provides a license for 500 trunked radio users that are "home" to another	UA00664AA	877	\$1,000.00

USER LICENSES	radio system. These are meant to be radios that are not daily users of the system			
ENH: 500 ENHANCED TRUNKED DATA USER LICENSES	Order the appropriate number of Enhanced Trunked Data user license packs based upon the number of Enhanced Trunked Data equipped radios in the zone.(Note: The maximum number of Data users is dependent upon the system configuration and type of Data users. Please consult the System Planner before ordering.)	CA02473AA	877	\$2,000.00
ADD: 500 HPD USER LICENSES	-	UA00157AA	877	\$10,000.00
ADD: UNC ADDTL DEVICE LIC (QTY 10)	Add up the number of Trunking channels, Conventional channels, and number of Comparators. Then, divide by the number of sites. If your total is more than 10, the purchase of additional UNC licenses is required. # of objects = x # of sites = y	CA01316AA	877	\$500.00
ADD: 500 RADIO ALIAS UPDATE LICENSES	-	UA00236AA	877	\$5,000.00
ADD: 50 TALK GROUP TEXT LICENSES	-	UA00245AA	877	\$3,000.00
ADD: MCC7500/MCC7100 CONSOLE GROUP TEXT LICENSES	-	UA00235AA	877	\$250.00

Order capacity licenses for ASTRO 25 Conventional only systems

Description	Full Description	Nomenclature	APC	Price
-------------	------------------	--------------	-----	-------

ADD: CONVENTIONAL PORT LICENSES (QTY 25)	-	UA00155AA	877	\$1,000.00
ADD: MCC7500 CONSOLE LICENSES (QTY 5)	A license should be purchased for each MCC7500, MCC7100 and AIS position.	UA00156AA	877	\$5,000.00
ADD: WAVE ADC SEAT LICENSE	Required for each WAVE Advanced Desktop Communicator seat purchased to provide communications on Conventional systems through the WAVE 5000 Gateway. **Available on 7.17.2 or later releases.**	UA00663AA	877	\$7,000.00
ADD: UNC ADDTL DEVICE LIC (QTY 10)	Add up the number of Trunking channels, Conventional channels, and number of Comparators. Then, divide by the number of sites. If your total is more than 10, the purchase of additional UNC licenses is required. # of objects = x # of sites = y	CA01316AA	877	\$500.00

Add up the number of Trunking channels, Conventional channels, and number of Comparators. Then, divide by the number of sites. If your total is more than 10, the purchase of additional UNC licenses is required.

of objects = x

of sites = y

If $x/y < 10$ = No further action is required

If $x/y > 10$ = Additional UNC device licenses need to be ordered

Formula used to determine how many packs need to be ordered: $(x/y - 10) y / 10 = \#$ of 10 packs that need to be ordered

Ex: $(12 \text{ channels per site} - 10) \text{ times } 4 \text{ sites} = 8$ divided by 10 = .80

Customer would need to order 1 qty. pack of 10

*Please be advised this is guide for ordering additional UNC Device Licenses. Customer systems are unique in design, and once configured, there may be a need for additional device licenses.

Ordering Dynamic System Resilience (DSR)

This section will lead you through the necessary steps required to order your ASTRO 25 7.17 DSR feature. Please be sure to read each step carefully and supply the personality information required to assure the factory will correctly build the product.

NOTE: You are required to order DSR System Notification option (CA01499AA) with your main core the first time you order DSR.

The following information must be included before placing the order:

1. System ID. Four digit hexadecimal number used to uniquely identify a system. For new systems, this will be assigned by the System Engineer using the Trunked Data Repository (TDR) process. Expansions to existing systems will use the existing System ID.
2. Zone ID. Number used to uniquely identify each zone in a system. Zone ID will always be 0001 for M1/M2 systems. For M3 systems, values may range from 0001 to 0007.
3. System Extension ID. Four digit hexadecimal number, typically 0000. Introduced in 7.15 to address the rare case where a customer has intentionally chosen to use the same system ID across multiple systems. For such rare cases, customers or account teams inputting the order shall provide unique system extension IDs across the systems that have same system ID (e.g. 0001, 0002, etc).
4. Valid Email Address. This email will be used to deliver all software licensing entitlements to the customer.

When ordering a DSR backup core, a duplicate software license file will be automatically generated based on the primary core with matching System, Zone and System Extension ID. Software licenses do not need to be re-ordered on the DSR backup core unless explicitly noted in the DSR ordering instructions.

If software licenses are generated with invalid System ID information, contact SSC and open a case to resolve the issue.

OrderM1/M3 with Full DSR

--	--	--	--	--

Description	Full Description	Nomenclature	APC	Price
DYNAMIC SYSTEM RESILIENCE	If ordered on any zone, all zones must order DSR functionality (up to six zones maximum)	SQM01SUM0231	877	\$20,000.00
DSR VOICE	-	CA01511AA	877	\$0.00
DSR DATA	If you utilize data on your system, you must first order this option. Not valid for M1 systems with Voice-only DSR	CA01512AA	877	\$0.00
ADD: DSR - NON-REDUNDANT M1(UP TO 24 SITES	-	CA02845AB	877	\$15,000.00
ADD: DSR HW - NON-REDUNDANT M1	-	CA03141AA	877	\$51,280.00
ADD: NM/ZC RACK	Only valid for M1/M2. M3 ships standard with cabinet.	CA02838AA	877	\$0.00
ADD: NM/ZC CABINET	Only valid for M1/M2. M3 ships standard with cabinet.	CA02839AA	877	\$3,000.00
ADD: M3 1ST ZONE DSR 7.17	-	CA02846AB	877	\$140,000.00

Master Site Network Management / Zone Controller ASTRO 25 7.17 Upgrade

Ordering Information

General Information

PLEASE NOTE:

In line with the Software Support Policy (SwSP) for ASTRO based system software, orderability rules now include alignment to the policy which sets a new framework of three periods of support from Ship Acceptance for that specific release.

To ensure adherence to the Software Support Policy, there is a change to how Upgrades are ordered on the Master Site for customers that do not have an SMA or SUA Lifecycle Contract.

It is recommended that all upgrades are to an ASTRO release that is still within the Standard Support Period.

Effective 1/1/17

To get an Upgrade quote, please contact your:

- Lifecycle Management Consultant; to quote an upgrade via a one-time or multiyear SUA
- It is recommended that all upgrades are performed via a certified path

Once you have a quote, then contact:

- Upgrade Operations; to request a system upgrade - [Project Request for Upgrade Operations](#)
- UO will not provide a la carte upgrade quotes

For more information on the Software Support Policy check here: [Software Support Policy](#)

For more information on the orderability changes check here: [SwSP Orderability Changes](#)

For **Pre-Sales purposes only** - an Upgrade Guide can be found here: [Pre-Sales Only Upgrade Ordering Guide](#)

Configuration

ORDERING GUIDELINES FOR UPDATING TO 7.17.3 FROM 7.17 OR 7.17.1

In order to use any new capabilities introduced in the 7.17.3 release, the new 7.17.3 version of the software for the applicable components must be installed.

The 7.17.3 Update model number below (T8485) will contain CD(s) with the new software version for the 7.17.3 impacted products. Each impacted product has to be updated before new functionality is enabled.

Updating a 7.17 or 7.17.1 system to 7.17.3 is a 2-step process. Before a 7.17 or 7.17.1 system can be updated to 7.17.3, the system must be updated to 7.17.2. Both kits below are required to be ordered to update a 7.17 or 7.17.1 system to 7.17.3. Note: It is possible to remain at 7.17.2 if the capabilities introduced in 7.17.3 are not needed.

To update to 7.17.3 from 7.17.2, see section below.

Upgrades from 7.15 or 7.16 to 7.17.3 are quoted by the Lifecycle Management Consultants.

7.17.3 Update from 7.17 or 7.17.1 (both models are required)

Description	Full Description	Nomenclature	APC	Price

ASTRO 25 7.18
M-CORE MASTER SITE
-- New Orders and Expansions --

Updates

Ordering Information

For detailed ordering information and description of options please reference the [7.18 M-Core New and Expansion Ordering Guide](#).

These pages will lead you through the necessary steps required to order your new ASTRO 25 7.18 system. Please be sure to read each step carefully and supply the personality information required for the different model numbers to assure the factory will correctly build the product.

The following information must be included before placing the order:

- 1. System ID.** Four digit hexadecimal number used to uniquely identify a system. For new systems, this will be assigned by the System Engineer using the Trunked Data Repository (TDR) process. Expansions to existing systems will use the existing System ID.
- 2. Zone ID.** Number used to uniquely identify each zone in a system. Zone ID will always be 0001 for M1/M2 systems. For M3 systems, values may range from 0001 to 0007.
- 3. System Extension ID.** Four digit hexadecimal number, **typically 0000**. Introduced in 7.15 to address the rare case where a customer has intentionally chosen to use the same system ID across multiple systems. For such rare cases, customers or account teams inputting the order shall provide unique system extension IDs across the systems that have same system ID (e.g. 0001, 0002, etc).
- 4. Valid Email Address.** This email will be used to deliver all software licensing entitlements to the customer.

Configuration

Order the Master Site Model (Required)

Description	Full Description	Nomenclature	APC	Price
MASTER SITE CONFIGURATION	-	SQM01SUM0273	877	\$0.00

Order the Required Configuration

For a new zone, choose a M1, M2 or M3 Configuration. Need to select both the Software and the Hardware option.

All configurations include Integrated Voice and Data (IV&D). There is no need to order IV&D. The Core Enablement Server and ISGW is also included with each configuration below.

Event Logging (Syslog) which was previously optional (as option CA01725) is now standard per zone with each configuration and does not need to be ordered.

System Management user licenses for UNC, PM, and UEM are required to be ordered for primary zones (M1, M2 and M3 zone 1). System Management user license for UEM only is required to be ordered for an add-on zone.

For M1 or M2, choose a rack or cabinet option. M3 ships standard in a cabinet.

If expanding an existing 7.18 system, proceed to the M-Core Expansions / Add-on Section.

M1 Configuration (24 sites or fewer)

Description	Full Description	Nomenclature	APC	Price
ADD: M1 NON REDUNDANT ZONE (24 SITES OR LESS)	-	CA02830AC	877	\$148,000.00

M-Core Expansions / Add-on

Description	Full Description	Nomenclature	APC	Price
ADD: EXPAND 7.18 M CORE	-	CA02629AD	877	\$0.00

ORDER THE ZONE LEVEL OPERATIONAL LICENSES

Trunked Integrated Data or Conventional Integrated Data is Standard and no longer needs to be ordered for new 7.18 systems. The Zone Voice Operational License chosen for this zone determines whether the system is equipped with a Trunking or Conventional PDG.

There is no need to order CA02081 - Trunked Integrated Data or CA02389 - Trunked Enhanced Data or CA02080 - Conventional Integrated Data for a 7.18 Zone.

Description	Full Description	Nomenclature	APC	Price
ADD: ASTRO 25 FDMA TRKG OPERATION	-	CA02113AA	877	\$35,000.00
ADD: PHASE 2 TDMA TRKG				

OP ZONE LIC	-	UA00158AA	877	\$25,000.00
ADD: ASTRO 25 CONVENTIONAL	This license is for a Project 25 Phase 1 compliant conventional only solution. This license supports both voice and integrated data. Analog conventional is also supported. NOTE: The following applications are not applicable in ASTRO 25 Conventional Only systems: RCM, Affiliation User Reports, Dynamic Freq Blocking, Dynamic Shared Services, Channel Partitioning, CADI and System Historical Reports.	CA01207AA	877	\$15,000.00
ADD: INTERSYSTEM DATA - CONNECTED CEN	-	UA00163AA	877	\$20,000.00

ORDER ZONE LEVEL FEATURES / CAPACITIES

Site Licenses

Choose FDMA and/or TDMA per site. For TDMA also choose TDMA per Base Radio. Data is standard at the Core level but still needs to be ordered per site for Trunking or per additional 8 RF Channels for Conventional.

Description	Full Description	Nomenclature	APC	Price
ADD: ASTRO 25 FDMA SITE LICENSE	-	UA00153AA	877	\$17,000.00

Ordering Additional Zones

If an additional zone is desired:

Order the Master Site Model and M3 Additional Zone Config.

Order the appropriate Zone and System Level features.

NOTE: If Channel Partitioning or Security Partitioning were ordered on the Primary Zone, they must be ordered for any additional zones as well.

Order the desired Network Management Zone Level Features.

If additional System Level Licenses are needed, purchase those on a different order with the Master Site Model and the M-Core Expansion option.

You may now choose to add the optional System Statistics Server and System Historical Reports

Description	Full Description	Nomenclature	APC	Price
ADD: SYSTEM STATISTICS SERVER	-	CA01416AF	877	\$40,000.00
ADD: SYSTEM HISTORICAL REPORTS	-	UA00145AA	877	\$10,000.00

Dynamic System Resilience (DSR)

This section will lead you through the necessary steps required to order your ASTRO 25 7.18 DSR feature. Please be sure to read each step carefully and supply the personality information required to assure the factory will correctly build the product.

NOTE: You are required to order the DSR System Notification option CA01499AA with your main core the first time you order DSR.

The following information must be included on the order:

1. System ID. Four digit hexadecimal number used to uniquely identify a system.
2. Zone ID. Number used to uniquely identify each zone in a system.

3. System Extension ID. Four digit hexadecimal number, typically 0000.
4. Valid Email Address. This email will be used to deliver all software licensing entitlements to the customer.

Description	Full Description	Nomenclature	APC	Price
DYNAMIC SYSTEM RESILIENCE	If ordered on any zone, all zones must order DSR functionality (up to six zones maximum)	SQM01SUM0231	877	\$20,000.00

M1 DSR

Configuration includes Integrated Voice and Data (IV&D). There is no need to order IV&D. Event Logging (Syslog), which was previously optional (as option CA01725), is now standard with M1 DSR and does not need to be ordered.

Both SW and HW options need to be ordered for an M1 DSR, plus a Rack or Cabinet option

Description	Full Description	Nomenclature	APC	Price
ADD: DSR - NON-REDUNDANT M1(UP TO 24 SITES)	-	CA02845AC	877	\$15,000.00
ADD: DSR HW - NON-REDUNDANT M1	-	CA03141AB	877	\$51,280.00
ADD: NM/ZC RACK	-	CA02838AA	877	\$0.00
ADD: NM/ZC CABINET	-	CA02839AA	877	\$3,000.00

M3 DSR

Configuration includes Integrated Voice and Data (IV&D). There is no need to order IV&D. Event Logging (Syslog), which was previously optional (as option CA01725), is now standard per DSR zone and does not need to be ordered.

Both options need to be ordered for an M3 DSR

ASTRO® Digital Spectra Plus and Consolette™
FLASHport® Aftermarket Upgrades
VHF, UHF, and 800 MHz Bands
Secure/Conventional/ Trunked Radio Systems

Ordering Information

General Information

FLASHport Aftermarket Software is used to upgrade to the latest version of your System Enhancement Software Package, to upgrade to a different System Enhancement Software Package, or to order enhancements for existing ASTRO Digital Spectra Plus radios in the field. FLASHport Upgrade Kit contains upgrade software and upgrade documentation.

Ordering Requirements

1. Specify the current System Enhancement Software Package that represents the software in the radio as your main line item (T6766, T6767, T6768, T6769, T6929, or T6930), and order quantity 1 at \$0 (No Charge).
2. Choose the desired Operational Mode, System Enhancement Software Package, and/or System Enhancement Option (s) and enter as sub-items.
3. FLASH Model (factory model number) and FLASHcode must be entered into designated COF fields. A separate line item must be entered for each different combination of Radio Model and FLASHcode. (FLASHcode can be read from using ASTRO Digital Spectra Plus Flash/programming cable (HKN6155) and CPS (RVN4165/RVN4166) and/or from the radio display in service mode.)
4. ALL Sub-items must have the same quantity listed (which equals the number of radios being upgraded) even though the main line is ALWAYS 1.

CURRENT SYSTEM SOFTWARE PACKAGE						
	T6929	T6930	T6766	T6767	T6768	T6769
	ANALOG CONVENTIONAL PKG	DIGITAL CONVENTIONAL	ANALOG SMARTNET®	DIGITAL SMARTNET	ANALOG SMARTZONE®	DIGITAL SMARTZONE

ADD: ID Display (8 Numeric Characters) G114 NOTE 2	X	X	X	X	X	X
ENH: RS232 ASTRO Data W947 NOTE 4	X	X	X	X	X	X
ENH: Radio Trace G170	X	X	X	X	X	X
ENH: SmartZone OmniLink™ Operation G173 NOTE 3	N/A	N/A	N/A	N/A	N/A	X
ENCRYPTION ENHANCEMENT OPTIONS (List as sub items) - Radios must contain Encryption to add Encryption Enhancement Options NOTE 1						
ADD: Multikey Operation W969	X	X	X	X	X	X
ADD: ASTRO P25 and MDC OTAR (includes Multikey) G298	X	X	X	X	X	X

NOTE 1: See Encryption Field Upgrade Kits' Section under the General Information on the ASTRO Digital Spectra Plus 800MHz page, if radios do not currently contain encryption.

NOTE 2: ID Display uses ASTRO Signaling in digital mode and MDC™ signaling in analog model. Consequently, it is not available in Trunked analog modes.

NOTE 3: For Feature Details, see Mobile Section under the General Information page, for System Enhancement Software Feature Packages on ASTRO Digital Spectra Plus Mobile.

NOTE 4: SmartZone operation (either G51 from factory or G347 from FLASHport) and IMBE ASTRO

Digital (either G806 from factory or G806 or G808 from FLASHport) must reside in radio for operation of this feature set. The G173 (OmniLink) option is included at "No Charge" with this option.

NOTE 5: High power ASTRO Digital Spectra Plus modes may require a hardware upgrade. Installation must be quoted separately.

An ASTRO Digital Spectra Plus Mobile programming cable is required to "FLASH" the FLASHport Software into the ASTRO Digital Spectra Plus (see Field Programming section for pricing and ordering information.) The existing HKN6155 is required along with the CPS to program the ASTRO Digital Spectra Plus and it does support FLASHport.

Aftermarket Software below is **NOT** discountable and **DO NOT** include field programming. Pricing reflects per radio upgrade charge.

ASTRO-TAC®
ASTRO-TAC 3000™ COMPARATOR
FLASHport® UPGRADES

Ordering Information

General Information

1. FLASHport® Upgrades are used to upgrade an ASTRO-TAC® Comparator to a different version of System Software, or to add features to existing comparators in the field.
2. FLASHport® Upgrades are also used to upgrade an ASTRO-TAC 3000™ Comparator to software download capability.
 - T6340 ASTRO-TAC 3000® FLASHport® upgrade.
 - New wireline cards (input/output port X223 - X230) may be required to upgrade to software download capability.
3. All of the upgrades shown will require the use of the Radio Service Software (RSS) to reconfigure the station after upgrade installation.
 - It is recommended that the current version of RSS should also be ordered when ordering an upgrade.

Ordering Requirements

1. If upgrading an ASTRO-TAC 3000™ to an ASTRO-TAC 3000™ with software download capability is desired, please order the following:
 - T6340 as the main line item.
 - If the wireline boards kits in the existing ASTRO-TAC 3000™ in the field are NOT CLN6883 OR CLN1269, please select U454aa (ENH: SOFTWARE DOWNLOAD CAP W/WL & ICS) as the FIRST sub-item.
 - The appropriate Input/Output option (X223 - X230) as the second sub-item.
 - If the wireline board kits in the existing ASTRO-TAC 3000™ in the field ARE CLN6883 OR CLN1269, please select U455aa (ENH: SOFTWARE DOWNLOAD CAP IC) as the FIRST sub-item. The Input/Output option is not required with U455aa option.
2. If upgrading an ASTRO-TAC 3000™ with software download capability to the next version of software is desired, please order the following:
 - T6341 as the main line item (quantity of 1).
 - CA00007aa ADD: SOFTWARE UPGRADE as the first sub-item.

ALL ITEMS REQUIRE AN EXPORT LICENSE TO BE EXPORTED FROM THE UNITED STATES/CANADA

SHIP CARD

Model

**ASTRO-TAC® RECEIVER
CONVENTIONAL - FLASHport® AFTERMARKET UPGRADES**

Ordering Information

Ordering Requirements

FLASHport® Aftermarket Upgrades are used to upgrade ASTRO-TAC® receiver to a different version of System Software, or to add features to existing receiver in the field.

- 1. Order** the model number for the upgrade kit that represents the software version currently in the receiver as the Main-line item (T5756).
- 2. Select** a Station Control Board (SCB) as the first sub-item (X793)
 - The current selection is limited to the 'EPIC Board already in use' option (X793).
 - Both conventional and 6809 trunked ASTRO-TAC receivers have only used a version of the EPIC Station Control Board to date.
- 3. Select** a single station capability option as the second sub-item (U222, U223).
 - If the receiver is currently operating with 3.0 or a later version of the system software or Software Download (X980) has been ordered previously, then the receiver has software download capability (U222).
 - If the receiver is currently operating with pre 3.0 system software or Software Download (X980) has not been ordered previously, then the receiver does not have software download capability (U223).
4. Below are the kit numbers which appear on the SCB to help identify what version of SCB is currently being used within an existing receiver in the field.

System Type	SCB	EPIC I	EPIC II
Conv/6809 Trunked		TTN4094	CLN6873

5. The Serial Number for ASTRO-TAC® Receiver is REQUIRED when ordering any FLASHport® System or Feature upgrade package.

- The COF user will be prompted to enter the receiver serial number after ordering the main model for a FLASHport® upgrade.
- The serial number can be obtained through the use of the Radio Service Software, or from the label on the back of the receiver, or from the original invoice.

6. The SCB Number for ASTRO-TAC® Receiver is REQUIRED when ordering any FLASHport® System or Feature upgrade package.

- The COF user will be prompted to enter the SCB number after ordering the main model for a FLASHport® upgrade.
- The SCB# will be used to check that the correct SCB option (shown below) is ordered. It can be obtained by pulling the board.

7. The Station Identification Number (or Backplane ID#) for ASTRO-TAC® Receiver is REQUIRED when Software Download Capable (U222) is selected.

NOTE

All of the upgrades shown below will require the use of the Radio Service Software (RSS) to reconfigure the receiver after installation. It is strongly recommended that the current version of RSS should also be ordered when ordering any upgrade.

ASTRO-TAC® 9600
Comparator
For Project 25 Systems

Ordering Information

General Information

One comparator unit is required for each group of base stations on a single inbound RF frequency in a ASTRO®25 Trunked simulcast system. In multiple inbound frequency systems, a separate comparator is required for each frequency. The ASTRO-TAC 9600 comparator will vote or process ASTRO® (digital) signals only with ASTRO 25 systems using compatible stations and receivers, e.g. STR 3000, ASTRO-TAC Receiver, QUANTAR® ISR. The ASTRO-TAC 9600 comparator is **NOT** compatible with existing analog equipment using status tone. It is also **NOT** compatible with mixed mode or SECURENET® systems.

Ordering Requirements

1. ASTRO-TAC 9600 Comparator hardware has been cancelled. Software upgrades to the final certified release are still available.

**AVIGILON
VIDEO
SURVEILLANCE**

AVIGILON VIDEO SURVEILLANCE

Acquired by Motorola Solutions on March 28, 2018, Avigilon offers video surveillance and door access control systems. This page contains the video surveillance products, including high resolution cameras, Video Management Software, Video Analytic Software, video storage, and ancillary components for video surveillance systems.

ORDERING INFORMATION

Products that are available for direct ordering in COF are noted in the appropriate column on the [product spreadsheet](#). If you require an item that is not yet set up in COF, please contact Marian Cosmides (847-576-0572) or Luis Germoso (847-576-0577) for assistance. Once your ordering requirements are finalized, the process generally takes 48 hours to complete.

Once available in COF, Avigilon products can be ordered and delivered in the same manner as any radio product.

CONFIGURATION

A training video is available [at this link](#) to obtain a high level familiarity with Avigilon, its

products and the primary markets they serve.

Opportunities for Avigilon sales should be registered at avoleads.motorolasolutions.com

Complete product descriptions and marketing materials can be found at Avigilon's website at: <http://avigilon.com/products/>

Local sales and engineering design support may be arranged by registering your opportunity at avoleads.motorolasolutions.com, or by contacting the local Avigilon Sales Representative for your area. A complete contact list is available [at this link](#).

GENERAL INFORMATION

BUILDINGS AND SHELTERS

For product/ordering information or questions, contact the Product Planner, [Luis Germoso](#) (847-344-0574).

Motorola's building offerings are completely customizable, allowing the customer to only pay for their specific needs. The Motorola Standard Building (MSB) & and Motorola Alternate Building (MAB) enclosures are designed to maximize space, which allows the customer to purchase what they need with the ability to expand in the future. Motorola provides a complete end to end solution for the customer.

MSB vs MAB

MSB

- All inclusive concrete shelter with the ability to delete a few major items, such as UPS, generator, etc.
- Ships fully assembled.
- 2 year Interior Warranty & 10 year Structural.

MAB

- Lightweight fiberglass "aggregate" panel shelter with wood floor & concrete floor option.
- Contains basic R56 components w/ lengthy list of options to add based on desired level of compliance.
- 2 year Interior Warranty & 2 year Structural.

Product Comparison

-

MSB (Motorola Standard Building)	Description	MAB (Motorola Alternative Building)
300 psf concrete waffle design	Floor and loadings	200psf wood with i-beam skid perimeter (upgrade to concrete)
150 psf solid concrete	Roof and loading	100 psf Galvaneal steel with membrane
150 MPH wind loading; 4" solid concrete with exposed aggregate exterior; level 4 bullet resistant; 2 hour fire rated	Walls and loadings	120 MPH wind loading; galvaneal steel with exposed aggregate fiberglass panels exterior
300 psf floor;150 psf roof;150MPH Wall	Loadings	200psf floor;100psf roof;120MPH Wall
Exposed aggregate	Exterior	Exposed aggregate fiberglass panels

Redundant (2 units) system	HVAC	Fresh air, thermostat controlled exhaust fan system (optional upgrade to single or dual HVAC units)
Utility power panel, TVSS, enclosed circuit breakers as safety disconnect all separate components	Electrical service	Utility power panel with separate MOV/SAD Type 1 TVSS required. An Integrated Load Center may be used and is acceptable.
R-4	Insulation (R-factor) floor	R-11
Standard	Generator	(Optional Upgrade)
Standard	UPS	(Optional Upgrade)
24" wide	Cable tray size	18" Wide
Standard set	Alarms	(Optional Upgrade)
Eye wash and first aid kit and (2) fire extinguishers per room	Safety Equipment	Eye wash and first aid kit (optional upgrade to add both fire extinguishers) per room
Meets or exceeds R-56	Grounding	Meets or exceeds R-56
10 year structural, 2 year HVAC, 2 year generator set, 2 year TVSS, 2 year UPS	Warranty	2 year structural, 2 year HVAC, 2 year generator set, 2 year TVSS, 2 year UPS

Below are examples of standard products.

Motorola Model Number	Description	List Price
TT1000	MSB, 12' X 16' CONCRETE BLDG, INCLS UPS & GENERATOR, FULLY COMPLETE	\$143,929.60
TT1004	MSB, 12' X 10' CONCRETE BLDG, INCLS UPS & GENERATOR, FULLY COMPLETE	\$126,859.20

Motorola competitively bids every custom shelter quote with 3 suppliers to obtain the best cost.

CAC/PIV Security Update Service (SUS) and CAC/PIV Support Services

Command Access Card (CAC), Personal Identity Verification(PIV)

SECURITY UPDATE SERVICE (SUS)

CAC/PIV SUS is an additional option in addition to SUS. Customer must be have an active SUS contract addition to CAC/PIV SUS. CAC/PIV Security Update Service supports ASTRO 7.17.3 System Release (SR) and follows the Services Lifecycle Support Policy. Motorola reserves the right to adjust which releases are supported as business conditions dictate. Contact your Customer Service Manager for the latest supported releases.

CAC/PIV SUS is available for any L or M core system in a supported release.

Systems that have non-standard configurations that have not been certified by Motorola Systems Integration and Testing (SIT) are specifically excluded from this Service unless otherwise agreed in writing by Motorola.

CAC/PIV SUS services includes clients and servers to enable CAC/PIV capability.

Benefits

- Maintain Compliance
- Protect Continuity of System Operations
- Minimize Risk and Cost
- Increased network availability
- Reduce the vulnerabilities addressed by security patches and increase the safeguards of confidentiality, integrity, and availability of mission-critical systems.
- Reduced maintenance costs
- Dramatically reduce potential for system downtime; resulting in fewer maintenance costs to restore the system back to proper operational state.
- Assurance
- Motorola assumes responsibility to verify security updates without unnecessary burden to your staff.
- Better use of technical resources

- Keep staff focused on core responsibilities relying on Motorola to deliver the expertise and support for a proper cybersecurity regimen.

Statement of Work

Ordering Requirements

Applicable to an ASTRO 7.17.3 system release. Complete the Quote Tool for all applicable pricing.

CAC/PIV SUPPORT SERVICES ASTRO25 SYSTEM ADVANCED PLUS PACKAGE

Motorola's Advanced Plus Services are designed for customers who would benefit from Motorola's support experience. Advanced Plus Services are delivered through a combination of centralized resources within Motorola's Solutions Support Center (SSC) collaborating with authorized local field services delivery resources that are experienced in managing mission-critical networks and associated technologies. The MSI SSC operates 24 x 7 x 365, leveraging field resources that are either dedicated to the network or engaged as needed.

Advanced Plus Services applies to fixed end communications network equipment located at the network core, RF site, and dispatch sites. Advanced Plus Services do not include maintenance of mobile or portable devices or network backhaul.

Model

CAI Data Encryption Module (CDEM)

Ordering Information

General Information

The CAI Data Encryption Module (CDEM) is an optional component that provides data encryption and decryption services for the ASTRO® 25 Conventional with Integrated Data feature. The CDEM is located in the Radio Network Infrastructure (RNI) and connects to the Packet Data Gateway (PDG). The CDEM performs packet data encryption and decryption for inbound and outbound datagrams. This unit provides secure communications between the endpoints of the subscriber unit and the PDG. Packet data is in the form of Common-Air-Interface datagrams. The CDEM supports centralized key management via store and forward using Key Variable Loader (KVL) as well as Over-the-Ethernet Keying (OTEK).

Features

- Supports DES-OFB and AES 256 Encryption Algorithms
- FIPS-140-2 level 3 Security
- Easy installation with standard RJ-45 Ethernet ports for network interfaces
- Data encryption keys can be centrally managed using a Key Management Facility (KMF)
- Easy to configure
- Low Power Consumption
- Small size/light weight

APCO Project 25 Compliant Algorithms

- AES 256
- DES-OFB

FIPS 140-2 Certified Algorithms

- AES 256

Further information regarding FIPS 140-2 certification may be found using the following links:

[FIPS 140-2 Crypto Module Validation Program \(CMVP\)](#)

[NIST Cryptographic Module Validation Lists](#)

Ordering Requirements

When requiring data encryption in a Conventional system, please select the following items for the CAI Data Encryption Module (CDEM):

1. Orders for a new CDEM Unit must select main hardware model (T7618A).
2. Must select at least one (1) RS232 Cable (DLN6693) per CDEM Unit.
3. Must select one (1) required ASTRO 25 CDEM Operation (CA01535AA).
4. Must select at least (1) of the single Encryption Algorithm Kits listed below:
5. Select one (1) AES Encryption Kit (CA00182AT) or (1) DES-OFB Encryption Kit (CA00143AD) or (1) of both Encryption Kits.

The following items are shipped with the ASTRO 25CDEM Unit Hardware (T7618A) :

- 2 Ethernet Cables
- 1 AC Power Supply

Accessory Information:

Customers must order one TKN9284 Rack/Cabinet Mounting Tray if the CDEM unit is to be installed in a rack or cabinet with PDG unit.

Customers must order at least one TKN8531C Keyloader Cable for loading encryption keys on Encryption Unit, if utilizing the KVL 3000 Plus.

Note: In order to perform encrypted only key fill on the CDEM (which is required to operate the CDEM in a FIPS 140-2 Level 3 compliant mode), a Key Variable Loader which supports encrypted key fill is required. A KVL 3000 Plus with software version R03.52.45 or later, or KVL 4000 with any software version is necessary to support encrypted only key fill.

If spares are required please order an additional unit.

Products, kits, components and software that contain encryption functions or features, and technology related to the development or implementation of encryption functions or features, will generally require an approved export license prior to export. If required, export license approvals will be based on the algorithms involved, the country of final destination and the specific end user. Depending on the location of the entity making the sale and the source location of the encryption items it may be necessary to obtain licensing from more than one country for the same sale. Contact your Local Export Control office if you are unfamiliar with the licensing process or to discuss any possible licensing restrictions before submitting bids, proposals, or accepting orders for encryption products.

RS232 CABLE FOR CRYPTR	-	DLN6693	454	\$160.00
---------------------------	---	---------	-----	----------

CDEM Upgrade Kits

An Existing CDEM can be upgraded to the latest software. This is required for ASTRO customers upgrading to A7.15 of higher, who currently have CDEMs purchased prior to A7.16.

For upgrade with KVL 4000, Order the following to upgrade CDEM software:

Description	Full Description	Nomenclature	APC	Price
CDEM ENCRYPTION/ CD SOFTWARE UPGRADE KIT	-	T7666	137	\$50.00
ADD: CDEM SOFTWARE UPGRADE	-	CA01847AA	137	\$50.00

CDEM Encryption Upgrade Kits

An existing CDEM user can add on an AES or DES-OFB algorithm kit to their fielded unit by using a Key Variable Loader (KVL) 4000 unit.

Below is the Encryption Upgrade Kit that needs to be ordered when using a KVL 4000 unit:

1. Must order (1) CDEM Encryption Upgrade Kit (T7666)
2. Must choose only (1) AES (CA00182AT) or (1)DES-OFB (CA00143AD) algorithm option with model T7666

Description	Full Description	Nomenclature	APC	Price
CDEM ENCRYPTION/ CD SOFTWARE UPGRADE KIT	-	T7666	137	\$50.00
ADD: AES DATA ENCRYPTION	-	CA00182AT	137	\$750.00
ADD: DES-OFB DATA ENCRYPTION KIT	-	CA00143AD	137	\$750.00

NOTE: KVL3000 flashport upgrade has been cancelled, effective September 30, 2015

Model

**NEN 2000 - Calypso**

Ordering Information

General Information

The NEN 20000 - CALYPSO is a highly capable and robust software-defined radio (SDR) transceiver that eliminates the need to carry multiple pieces of equipment to support varying mission types. The NEN 20000 - CALYPSO provides the technical agility to process multiple radio technologies and frequencies from TETRA to LTE all in a single, low SWaP platform.

The platform allows for generic transmission and reception for the rapid prototyping and development of custom and commercial radio technologies residing in the 70 MHz thru 6 GHz spectrum. Demonstrated waveforms include: GSM, UMTS, CDMA2K, LTE, 802.11b/g, and TETRA.

Features

- Gigabit Ethernet for command and control
- Status LEDs
 - Ethernet Link
 - Ethernet Activity
- Locking custom 9 pin antenna connector
 - 1 GPS connection
 - 8 generic half-duplex RF connections

- Communication and Power for connection to custom antennas
- Locking DC Power (+5VDC)
- eSATA port
- uSD interface
- uUSB port
- Supported Bands
 - Tunable from 70 MHz thru 6 GHz
 - 56 MHz instantaneous bandwidth per transceiver
- Internal GPS
- Freescale i.MX6 Quad-Core processor @1.0 GHz/core
- Xilinx Virtex-7 VX485T-2
- Size: 6.9"x 3"x 1.25" Weight: 1.1lbs

Ordering Requirements

For ordering information please send an email to: BuyAT@MotorolaSolutions.com.

Main Model

Description	Nomenclature	Price
Calypso SDR (Kit)	EDKT00162	\$40,150

One (1) Calypso unit consisting of an advanced, state-of-the-art, small-form-factor Software Defined Radio (SDR), utilizing modern embedded microprocessor and FPGA technology suitable to handle complex radio applications in the 70-6000 MHz spectrum. Each Calypso unit provides the user with the following:

- (1) locking custom 9-pin antenna connector providing:
 - (1) GPS connection
 - (8) generic half-duplex RF connections
- (1) 10/100/1000 Ethernet connector (RJ45)
- (1) +9 to +36VDC power input connector (Custom Ruggedized)
- (1) eSATA port

One (1) Calypso power cable consisting of a Tin leaded 36" power cable with mating connector to Calypso unit.

- One (1) CD with RF Recorder application (Version 2.4 or later)

Product description: The RF Recorder application provides the end user with a capability to view and record RF spectrum. It provides an easy to use graphical interface that allows the user to select the center frequency and bandwidth of interest and save the captured digital base-band I/Q data. It also allows the user to play back saved files for later analysis.

Warranty

LIMITED WARRANTY

Motorola warrants the Product against significant defects in material and workmanship under normal use and service for a period of sixty (60) calendar days from the date of shipment from Motorola. Motorola, at its option, will at no charge, either repair the Product (with new or reconditioned parts), replace it with the same or equivalent Product (using new or reconditioned Product), or refund the purchase price of the Product for significant defects identified during the warranty period provided Motorola is notified of such significant defects no later than 14 calendar days after the expiration of the warranty period according to the terms of this warranty. Repaired or replaced Product is warranted for the balance of the original applicable warranty period. All replaced parts of the Product shall become the property of Motorola.

This warranty sets forth the full extent of Motorola's responsibilities regarding the Product. Repair, replacement or refund of the purchase price, at Motorola's option, is the exclusive remedy. THIS WARRANTY IS GIVEN IN LIEU OF ALL OTHER EXPRESS WARRANTIES. MOTOROLA DISCLAIMS ALL OTHER WARRANTIES OR CONDITIONS, EXPRESS OR IMPLIED, INCLUDING THE IMPLIED WARRANTIES OR CONDITIONS OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. IN NO EVENT SHALL MOTOROLA BE LIABLE FOR DAMAGES IN EXCESS OF THE PURCHASE PRICE OF THE PRODUCT, FOR ANY LOSS OF USE, LOSS OF TIME, INCONVENIENCE, COMMERCIAL LOSS, LOST PROFITS OR LOST SAVINGS OR OTHER INCIDENTAL, SPECIAL, INDIRECT OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE SUCH PRODUCT, TO THE FULL EXTENT SUCH MAY BE DISCLAIMED BY LAW.

Calypso-3U-VPX

Ordering Information

General Information

CALYPSO-3U-VPX Software Defined Radio is

Open Architecture, Low cost,

Robust, Highly capable,

Powerful, Low power consumption

Right for your mission.

CALYPSO-3U-VPX Software Defined Radio is available in 2 form factors (options); the standard **CALYPSO-3U-VPX** form factor and the **CALYPSO-3U-VPX-MORA** form factor.

Technically agile solution. The **CALYPSO-3U-VPX** has a flexible front end giving the user the agility to process a variety of radio technologies from TETRA to LTE with a single, compact piece of hardware. Perform a variety of missions using the **CALYPSO-3U-VPX** integrated RF solution using either form factor.

MORA compliant option:

The **CALYPSO-3U-VPX-MORA** is the latest addition to the **CALYPSO** small-form factor

SDR family. The **CALYPSO-3U-VPX-MORA** product supports the U.S. Army's Modular Open RF Architecture (MORA) initiative. The unit is a MORA compliant RF system implemented in the popular OpenVPX™ module form factor. The **CALYPSO-3U-VPX-MORA** low-SWaP software defined radio addresses the size, weight, and power consumption (SWaP) constraints of today's ground vehicles and aircraft.

Features

- CALYPSO-3U-VPX-MORA connectors
 - P0 and P1 - power, utility, data, control
 - 1000Base-BX and 10GBASE-KX4 on P1
 - OpenVPX
 - MORA 2.0 Compliant
 - Compliant with ANSI/VITA 65 and 67.2
 - 8RF Transceiver connections per VITA 67.2
 - Multiple I/O Options per VITA/MORA standards

- Generic Transmission and Reception - 70 MHz thru 6 GHz
- Supports Instantaneous Bandwidth Rx: 56MHz, Tx: 40MHz
- Freescale i.MX6 Quad-Core processor @1.0 GHz/core
- Xilinx Virtex-7 VX485T-2
- Power Output: -4 to 18 dBm
- RX Gain: 53 to 78 dB
- Input Voltage: 12 volts
- Idle Current: 0.5 to 1.5 amps
- Max Current: 2.1 amps
- Size: 170.6mm x 100mm Weight: 1.1lbs

SUPPORTED APPLICATIONS/TECHNOLOGIES

- Direction Finding/Line of Bearing
 - GSM, CDMA2K, UMTS, LTE, WiMax

- Rapidly Deployable Base Station
 - GSM, CDMA2K, UMTS, LTE-FDD

- RF spectrum record and playback

TARGET ENVIRONMENTS

- FIXED SITE
- GROUND VEHICLES
- AIRBORNE

Ordering Requirements

For ordering information please send an email to: BuyAT@MotorolaSolutions.com.

Cambium Networks PTP and PMP Maintenance Services

Ordering Information

Executive Summary

Cambium Networks Point-to-Multipoint (PMP) and Point to Point (PTP) solutions help municipalities and government agencies of all sizes realize the benefits of high-speed wireless connectivity. PMP and PTP systems can be deployed faster, easier and more cost-effectively, helping communities connect underserved areas, improve community safety with video surveillance, save tax dollars, empower public works and public safety departments to be more effective. PTP and PMP solution are available in a variety of Unlicensed and Licensed bands which enable wireless broadband to send data, voice, and/or video simultaneously. These solutions are cost effective, easy to deploy, reliable, and can be configured in a way that best suits your customer's needs. The PMP and PTP solution is a build-as-you-grow for your Motorola system. Its advanced scalability allows you to quickly accommodate changing needs, wider geographical areas, larger populations and higher traffic volumes. In addition, its high tolerance for interference and its directional antennas assure that adding additional transmitters increases capacity without degradation of performance.

Product Description

Overview

Cambium Networks 1st Year All Risk Advance Maintenance Service

This is an enhanced maintenance service that would replace the 12 month standard warranty that a customer would normally receive when purchasing this equipment. The All risk Advance Maintenance will entitle a customer to receive a replacement unit and all accidental damages are covered. The replaced unit will ship out same business day if the unit is reported to the call center by 3PM EST. If the call center receives the request after 3PM EST then the unit will be shipped out next business day. This service also entitles the customer to remote monitoring and 7X24 technical supports.

Cambium Networks Hardware Repair Maintenance Service

This Service will enable for a customer to send their unit back for repair services. The repair services will only cover manufacturer's defects. If the unit is deemed to be irreparable, then the unit will be the supplier's responsibility to replace the unit with a refurbished unit. The average cycle time for Point-to-Point and Point-to Multi-Point repairs is 30 days.

Cambium Networks All Risk Advance Maintenance Service

The All risk Advance Maintenance will entitle a customer to receive a replacement unit and

all accidental damages are covered. The replaced unit will ship out same business day if the unit is reported to the call center by 3PM EST. If the call center receives the request after 3PM EST then the unit will be shipped out next business day. This service also entitles the customer to remote monitoring and 7X24 technical support.

Statement of Work

One of the primary business objectives of the North American Group (NAG) is to promote the sales of STANDARD service products. Standards help to ensure consistent and profitable delivery of our service products to our customers. To that end, the customer Statement of Work for this Standard Service Product **CANNOT** be modified. All requests for modifications to STANDARD service products or the development of "custom" service products should be routed through the Solutions Planning process. Your first point of contact for these requests is your local Area Service Manager.

MODEL

CirrusCentral Management

GENERAL INFORMATION

CirrusCentral Management provides users with tools that will increase troubleshooting efficiency of system network faults and provide better insights so customers can make better decisions about their network. These applications are not a replacement of any ASTRO P25 system management applications that our customers rely on today, but rather a complementary set of modern applications that enhance the current network management suite and can be accessed from anywhere. Customers will still be able to access all of their current on-premise applications that they rely on today.

CirrusCentral cloud-based system management will support the following customers:

WHO?

Commercial, Utility, & Public Safety

* Federal Customers will be supported in future release due to FedRAMP certifications

SYSTEM CONFIGURATION

Minimum Requirements:

Trunked ASTRO P25

A7.17+

Single Zone Only

1-50 Sites

* Further design and performance considerations will need to be made for multi-zone & conventional systems

WHERE?

UNITED STATES

* US Hosted Cloud → international customers not currently supported due to requirement of cloud instances hosted in their home country

FEATURES

- **System Health Dashboard:** An at-a-glance view of the customers system health. This view includes fault status for each RF site in the system and trends for the last two hours.
- **Alarm & Event Lists:** Provides customers a list of alarms and events in their system.
- **System Topology Drill Down:** Provides customers the ability to view their system in a drill down menu and determine which infrastructure devices are triggering alarms along with information on what those alarms are.
- **Alarm Aggregations & Filtering:** To prevent alarm flooding, alarm aggregation groupings are created through predefined rules. In addition, customers will have the ability to create their own alarm aggregation groupings to address use cases that are not covered by the predefined rules. This feature also adds alarm filtering so the user can easily locate specific alarms of interest.
- **Call Monitoring & Affiliations:** Provides customers with the ability to monitor call activity and get insights into the faults associated with call activity in a new modern web-based user interface. With this feature, customers will also have insights into their affiliations in their system by site and talkgroup.
- **System Performance Reporting:** Provides customers with reporting capability to make better decisions about their system network. Customers will have insights into their system's radio activity, system and site availability, system busies & rejects, and limited anomaly detection (cloned radio) reports.
- **Email & SMS Fault Notifications:** Provides customers the ability to subscribe to notifications based on the user's preference. These notifications are configurable based on the user's preferences.

- **System Load View:** Provides customers the ability to see their site loading at a glance. Customers can visually see how close to busy they are along with the trunking status at each site.

For more information about CirrusCentral Management, visit www.motorolasolutions.com/cirruscentral or refer to Motorola Solutions Sales for additional information.

ORDERING REQUIREMENTS

Please contact CirrusPdM@motorolasolutions.com if you have questions that this ordering guide does not cover - or if you need any further clarification.

The CirrusCentral Management solution will be offered as a pure subscription model. A subscription to CirrusCentral Management includes 3 main elements.

- Software Subscription Licenses
- Minimal on-premise hardware
- Connectivity transport (LTE) to the CirrusCentral Cloud

Software Subscription Licenses:

Customers who subscribe to CirrusCentral Management will have the option of choosing the Basic or Advanced Package via a yearly subscription. The subscription will be billed on an annual recurring basis until the customer elects to end their subscription. If the customer elects to end their software subscription, the software subscription will be deactivated and the customer and all users associated with that system will no longer have access to the software.

Both packages include the CirrusCentral Management hardware cloud enablement package which is included in the cost of the subscription. The CirrusCentral Management hardware cloud enablement package includes the following hardware:

- Sierra Wireless MP70 modem with Verizon LTE SIM card for transport to the cloud. The monthly subscription to Verizon is included in the cost of the software subscription.
- Dell 3930 and network cables required for connecting to the customer's DMZ firewall

No additional standalone hardware is required.

CirrusCentral Management also requires the Provisioning Manager Interface and North Bound Interface - these two licenses are included with each subscription.

The CirrusCentral Management basic package includes the following features:

- System Health Dashboard
- System Performance Trends

- Alarm & Event Lists
- System Topology Drill Down
- System Monitoring for up to 10 RF sites
- Support for up to 5 Users
- 90 days historical data storage

Description	Full Description	Nomenclature	APC	Price
CirrusCentral Management Basic Software Subscription	Annual software subscription for CirrusCentral Basic System Management	SSV02S01931A	360	\$35,000.00

The CirrusCentral Management basic package comes with RF site monitoring for up to 10 sites. To add additional RF site monitoring, order the quantity of RF sites that you have minus 10. The max number of RF sites that CirrusCentral Management supports is 50.

Description	Full Description	Nomenclature	APC	Price
ADD: Monitoring for 1 RF site	Monitoring for 1 additional RF site	SSV01S01932A	360	\$1,000.00

The CirrusCentral Management basic package comes with 5 user accounts. To add additional user accounts, order the following:

Description	Full Description	Nomenclature	APC	Price
ADD: Cirrus access for 1 user	Access to Cirrus for 1 additional user	SSV01S01933A	360	\$1,000.00

*NOTE: There is no maximum to the number of accounts a customer can have.

The CirrusCentral Management basic package comes with 90 days of historical data storage. If you would like to add additional data storage, please order Quantity 1 for each additional year:

Description	Full Description	Nomenclature	APC	Price
ADD: 1 Year historical data storage	Add 1 additional year of historical data storage	SSV01S01934A	360	\$5,000.00

*NOTE: Customer can add up to 10 years of historical data storage.

The following feature add-on options are available with CirrusCentral Management Basic package:

Description	Full Description	Nomenclature	APC	Price
ADD: Call monitoring and affiliations	Feature option for CirrusCentral call monitoring and affiliations.	SSV01S01935A	360	\$15,000.00
ADD: System performance reporting	Feature option for CirrusCentral system performance reporting	SSV01S01936A	360	\$10,000.00
ADD: Alarm aggregations and filtering	Feature option for CirrusCentral alarm aggregations and filtering	SSV01S01937A	360	\$10,000.00
ADD: Site load view	Feature option for CirrusCentral site load view	SSV01S01938A	360	\$10,000.00
ADD: Email and SMS fault notifications	Feature option for CirrusCentral email and SMS fault notifications	SSV01S01939A	360	\$7,000.00

The CirrusCentral Management Advanced package includes the following features:

- System Health Dashboard
- System Performance Trends
- Alarm & Event Lists
- System Topology Drill Down
- **Alarm Aggregations**
- **Call Monitoring & Affiliations**
- **System Performance Reporting**
- **System Monitoring for up to 20 RF sites**
- **Unlimited User Accounts**
- **1 year historical data storage**

* Items in **bold** indicate features above and beyond the basic package.

Co-Channel and Adjacent Channel Interference Analysis Service

Ordering Information

General Information

Co-channel and adjacent channel interference will address the interference performance of a radio system with recommendations on mitigating harmful interference. This study will identify the risks associated with undesired co-channel and adjacent channels for the radio system technology used or proposed and aid in the development of plans for radio technology solution choices, system growth, expansion, and how to manage the system technology. Harmful interference will impact the radio system by reducing useable radio coverage, causing repeated transmissions which results in wasting time and compromising safety. This analysis will help lead to a radio system that operates in a highly reliable manner at reasonable cost.

For more information, please review the [Solution Resource Guide](#).

Ordering Requirements

- This product requires an authorized quotation from the service delivery organization. Contact your local Area Service Manager (ASM) or Customer Support Manager (CMS) for more details.
- **This product CANNOT be ordered directly through COF at this time.** This product must be ordered using the Services Pricing Configurator. Please contact your local ASM or CSM if you are interested in ordering this product. For a listing of ASMs/CSMs [click here](#).
- A Customer Support Plan must be created to provide detailed information to the customer regarding delivery of this service.

CommandCentral Analytics

Ordering Information

General Information

CommandCentral Analytics can help extrapolate meaningful intelligence quickly and easily

Use powerful data analytics, visualization, and information sharing to enable your agency to make better intelligence-led decisions at every level with CommandCentral Analytics. Your analyst and detectives can access the web-based tool from any internet-connected device to effortlessly turn crime data into intelligence, identify strategic priorities, and break down information silos. Visualize the data in heat maps, graph analytics, and geospatial views in the powerful and intuitive crime analytics dashboard. Automatically create reports for roll call, trendcasting, time-of-day (TOD)/day-of-week (DOW) reporting and more that can be shared with anyone.

Features

- **Real-Time Analytics:** Executive-style dashboards, roll call, trendcasting, heat maps, area breakdowns, crime-type analysis, time of day/day of week analysis and more.
- **Robust, Sharable Reporting:** Create ad hoc or scheduled reports and graphics custom to your organization's needs and send them to any email recipient.
- **Data Quality and Validation:** Eliminate common data entry errors such as mismatched and misclassified crimes. The Data Quality and Validation (DQV) tool includes built-in notifications regarding data fidelity, click-to-correct mismatched crimes, and rule assignments to ensure mismappings are fixed and prevented in the future.
- **Interjurisdictional Data Sharing:** Interjurisdictional Data Sharing is a premium module for CommandCentral Analytics. It gives users the ability to compile, review, and analyze data across two or more law enforcement jurisdictions at the same time. Switching from your agency's data to all shared data is as simple as the click of an on/off switch.
- **Shape File Support:** Segment your policing jurisdictions into separate beats or zones in order to provide staff with crime map reports detailing the criminal activity that occurred during their off time.
- **Unlimited Custom Analysis Tabs:** In addition to five preconfigured views, users can create an unlimited number of custom analysis tabs each allowing them to customize their preferred layout, what information they want to see, and how they want to see it.
- **Full Narrative Case Reports:** There are no restrictions on narrative length so you get a more complete and detailed understanding of incidents.

- **Vendor Agnostic:** Integrate CAD and RMS data from any existing vendor.
- **Device Agnostic:** Work seamlessly from desktop to mobile, regardless of device type or operating system used.
- **NOTE:** More information can be found on the Motorola Solutions Website found [here](#).

Ordering Requirements

CommandCentral can currently only be ordered via SLC 11i.

1. This product cannot be ordered directly through COF at this time. This product must be ordered using the Service Lifecycle Application. Please contact your local Territory Service Lead (TSL), Customer Support Manager (CSM) or System Manager (SM) if you are interested in ordering this product.
2. CommandCentral Analytics is Software as a Service (SaaS) delivered by Public Engines via our Smart Public Safety Solutions.
3. Enter the main service line
4. Service is subcontracted to Public Engines
5. Customer site will be loaded as sub-option
6. Population options can be found under pricing attributes
7. All dollar amounts reflect an annual one year pricing

CommandCentral Analytics Plus, powered by LexisNexis

Motorola Solutions (“Motorola”) is pleased to offer a next-generation crime analysis and intelligence solution which will help you uncover more actionable insights to more effectively allocate resources and fight crime. CommandCentral Analytics Plus, powered by LexisNexis, integrates with your existing data sources, leverages a nationwide network of interjurisdictional data and includes integrated search of billions of public records from over 10,000 sources. It is designed to provide role-based experiences with purpose-built tools for users across your agency.

By investing in CommandCentral Analytics Plus, analysts can quickly identify crime trends with robust, but easy to use visualization tools. Detectives can use link analysis across datasets to easily track down leads. And, with the ability to seamlessly share insights across your agency you and your team can develop proactive initiatives to effectively allocate resources to address crime and better protect the community.

This is a cloud-based product, subscribed to as-a-service. It is highly accessible and cost-effective with predictable pricing. Product updates are seamless with new capabilities being delivered regularly. And, the cloud also provides proven security, reliability and availability that keeps you operationally ready.

CommandCentral Analytics Plus includes a professional services engagement for implementation and deployment, and is built upon our operational expertise, tools and best practices, perfected over our 90+ year history of working side-by-side with public safety.

Key Features and Functionality:

- Agnostic CAD / RMS Integration
- Configurable, Role-Based Experiences
- Robust Analytic Visualization
- Advanced Searching
- Accurint for Law Enforcement License
- Nationwide Public Safety Data Exchange
- Cloud-Based & Delivered as-a-Service
- Simple Visualization Controls
- LexID Link Analysis
- Easy Insight Sharing
- Access 10,000+ Public Records Sources
- Unlimited Dashboard Creation
- Granular Incident Data Detail
- Investigative Project Creation
- Reporting & Data Export

The CommandCentral Platform:

CommandCentral Analytics Plus is your path forward for uncovering more actionable data insights. But, it’s also a part of something more. We build software for mission-critical environments where every second matters. By unifying big data and streamlining workflows

from call to case closure, our CommandCentral Platform puts your information to better use, improves safety for critical personnel and helps keep your focus on the communities you serve. With 90 years of experience and proven public safety leadership, our suite is transforming public safety with a focus on evolution, not revolution, in order to help you digitally transform your operation.

Ordering Information

General Information

CommandCentral Analytics Plus can currently be ordered via CPQ in the Analytics model.

Analytics Plus is sold based on the # of First Responders (or # Sworn Officers).

CommandCentral Predictive

Ordering Information

General Information

CommandCentral Predictive solution can help predict 30% of next-day crime.

Utilize the power of analytics and prediction to identify where, when and what type of crimes will occur with CommandCentral Predictive. Using your Records Management System (RMS) data, the system "learns" from historical data specific to your jurisdiction and creates a prediction model for future crime. You receive daily, targeted crime forecasts in areas that are one-third smaller than their average patrol area, field tested to accurately predict on average 30% of next-day crime. Your officers receive detailed information on each prediction area, including full narratives, giving them the information required to take action in the field.

Features

- **Targeted Area Predictions (TAP):** Focused predictions are created by day, area and shift so they are relevant for each officer. Prediction boxes as small as 500' x 500' are easy to patrol and prioritized to help officers better understand where to spend their time.
- **Detailed Prediction Information:** Only CommandCentral Predictive tells officers where to look, and also what and who to look for. Summary data provides crime type, time frame and location, and is paired with detailed information including area crime history and full report narratives.
- **Data Quality and Validation:** Eliminate common data entry errors such as mismatched and misclassified crimes. The Data Quality and Validation (DQV) tool includes built-in notifications regarding data fidelity, click-to-correct mismatched crimes, and rule assignments to ensure mismappings are fixed and prevented in the future.
- **Vendor Agnostic:** Integrate Computer-Aided Dispatch (CAD) and RMS data from any existing vendor.
- **Device Agnostic:** Work seamlessly from desktop to mobile, regardless of device type or operating system used.
- **Street View:** Quickly and easily see a street-level view of prediction areas, centered at the point of the last crime, for greater situational awareness before heading out on the street.
- **CommandCentral Analytics Integration:** Built on the same platform with the same user interface, you can seamlessly switch between Predictive and Analytics for more efficient workflows.

NOTE: More information can be found on the Motorola Solutions Website found [here](#).

**GENERAL
INFORMATION**

CONFIGURATION

Model

Command Central Aware Alerts

General Information

CommandCentral Aware provides a complete operating picture, integrating real-time intelligence in the command center to remotely assist officers in the field. Simplify your operational view by consolidating your resources into one single pane of glass. Support officer safety by monitoring CAD incidents, responder location and real-time alerts. Alerts indicating a weapon draw, vest pierce or other emergency display the location and type of incident in real time on the consolidated map, helping dispatchers provide immediate support and improving officer and citizen safety.

MONITOR ACTIVITY FROM ANYWHERE

View all of your location-based data together, in real-time, on a single map display. This common operating picture can be accessed anywhere, from any internet-connected device.

ACT WITH THE NECESSARY CONTEXT

Communicate a more informed response to a critical incident and enhance responder safety for those in the field by accessing a common operating picture through CommandCentral Aware - directly from your agency's map.

COLLABORATE WITHOUT DISTRACTION

Control specific viewing permissions based on groups of users to ensure a focused

response from every team member during a critical event. Filter your view to only the datasets you need in the moment.

Further information can be found [here](#).

RESPOND QUICKLY TO ESCALATING INCIDENTS

Aware Alerts automatically show the command center what's happening to officers during an incident, whether that be an emergency, weapon drawn, vest pierce, man down alerts, and more. Alerts showing the location and type of incident on the consolidated map help personnel enhance situational awareness and improve officer and citizen safety.

Features

- **Command Central Aware Mapping:** Alerts inherits all functionality and capability of the Command Central Aware Mapping offer. CommandCentral Aware automatically informs the command center that a situation has escalated, with alert type, location and user identification without further action by the officer
- **Weapon Draw Alert and Conducted Electrical Weapon (Stun Gun) Draw Alert:** Sensors can be retrofitted to the most common holsters used and will send notifications when an officer un-holsters and re-holsters a weapon.
- **Weapon Fired Alert (Handguns Only):** This sensor can be retrofitted to certain handguns to send an alert that the weapon has been discharged. The sensor is located in the grip of the handgun.
- **Vehicle Impact Alert:** When a responder vehicle, equipped with APX mobile radios, experiences significant impact, an emergency alert will notify the command center of the situation and location.
- **Man Down Alert:** A man down emergency alert generated by all enabled APX portable radios appears as a notification when the radio is at an angle and there is no movement based on user parameters.
- **Vest Pierce Alert:** When a piercing event is detected, such as a shot or stab, an emergency alert is transmitted to notify command staff that a responder may be incapacitated and needs help. Insert sensors into existing body armor.
- **Si500 Contextual Activation:** Sensor activates Motorola Solutions' Si500 Video Speaker Microphone, a body-worn camera solution used for capturing, storing, and analyzing crucial video evidence, to start recording for post-event analysis.

For more information about CommandCentral Aware, visit motorolasolutions.com/aware or refer to Motorola Solutions Sales for additional information.

Ordering Information

The solution provides mapping of responder location and alerts. This offer also includes Enhanced Data Network and IMW Software Upgrades. If users also have ASTRO 25 consoles MC7200 and MC7500 on their system, the alert will also be sent to the consoles.

On an ASTRO 25 system release of 7.18 or higher, the customer will differentiate the

emergency event notification received. For example: If user pressed the orange emergency button, it will receive an emergency, but if emergency alert was activated from a vest pierced event, the console as well as CommandCentral Aware will be able to show vest pierced alert type and icon instead of emergency only.

Weapon Drawn, Conducted Electrical Weapon drawn and weapon fired alerts require sensors that are connected via Bluetooth Low Energy (BT LE) to a hub device (radio) Vest Pierce alert sensor connects to BT 2.1 capable radios. Vehicle Impact and Man Down are available within the APX 8500 mobile and APX subscribers respectively and do not require Bluetooth connectivity.

Data is sent from APX subscriber or mobile over ASTRO P25 Network to Command Central Aware.

	ASTRO
Network	ASTRO 7.16+
Data Capability	Enhanced Data
APX Radios	Radio Firmware required is 7.18.8 or beyond;. Vest Pierced is available on APX subscribers with Bluetooth Capabilities. Vehicle Impact is available on APX 8500 radios. CommandCentral Aware Mapping

General Information

CommandCentral Aware provides a complete operating picture, integrating real-time intelligence in the command center to remotely assist officers in the field. Simplify your operational view by consolidating your resources into one single pane of glass. Support officer safety by monitoring responders and real time incident information.

MONITOR ACTIVITY FROM ANYWHERE

View all of your location-based data together, in real-time, on a single map display. This common operating picture can be accessed anywhere, from any internet-connected device.

ACT WITH THE NECESSARY CONTEXT

Communicate a more informed response to a critical incident and enhance responder safety for those in the field by accessing a common operating picture through CommandCentral Aware - directly from your agency's map.

COLLABORATE WITHOUT DISTRACTION

Control specific viewing permissions based on groups of users to ensure a focused response from every team member during a critical event. Filter your view to only the datasets you need in the moment.

Features

- **Unified Mapping:** Utilizing a common Esri base map, geographically locate real-time events such as CAD incidents, device and unit location, alert and alarms, tactical decision data and camera locations. Incorporate other Esri-based map layers from your agency for enriched spatial orientation such as property boundaries, landmarks, buildings, and asset locations. In addition, streaming and stationary weather layers are provided to enhance visual situational awareness. Organize your devices through group management to further refine ownership to adhere to logical inter agency and intra agency configurations. Manage the content seen by these agencies via groups of users provisioned and authorized to see specific mapping layers.
- **Desktop & Mobile Accessibility:** Work seamlessly from desktop to mobile. CommandCentral Aware is accessible via a web browser on any computer as well as from any tablet or smartphone with an internet connection.

- **Data Layer Filtering:** Show or hide data layers, such as CAD incidents, by selecting or deselecting them in the data layer panel, ensuring your teams are seeing only what they need in that moment. Data layers can also be prioritized to ensure certain information takes visual precedence on the map.
- **Critical Information Display:** Associate critical information with each event or resource on the map display.
- **Team-Based Permissions:** Restrict what personnel see based on what their team needs to be most effective, while still ensuring that consistent and relevant information is being referenced from a shared common operating picture.
- **“View-Only” Information Access:** Ensure workflows are unhindered by access to information in the simplest form possible.
- **CAD Integration** CommandCentral Aware integrates with PremierOne CAD or Spillman Flex CAD to provide a CAD status and event monitor capability. The CAD status monitor will allow the user to see a listing of incidents that includes: event type, location incidents, narrative, priority, status, geographic area, location of devices or units. The application consumes event driven data from multiple CAD systems allowing for real time assessment with other relevant data published to the platform such as officer location, alarms, alerts, tips, tactical information, voice and video.

Command Central Mid Tier Video Aware SaaS

General Information

The Motorola CommandCentral Aware provides an aggregated user-configurable console view integrating multiple disparate public safety systems. CommandCentral Aware provides real-time intelligence for a complete operating picture with major components including mapping, video, and event monitoring. CommandCentral Aware provides a complete operating picture, integrating real-time intelligence in the command center to remotely assist officers in the field. This offer covers video and video analytics, workflow configuration and key software integrations.

Features:

Place eyes on the scene within seconds of a critical incident, communicating a more informed response and enhance responder safety through the common operating picture via CommandCentral Aware providing information via:

- Receiving incident locations, alerts and analytic notifications and identifies cameras in vicinity so that intelligence analyst can view a live stream from the area in real time.
- Visualize critical 911 call information on the map, along with the relevant information (location of interest) and related live video streams, video analytics to enhance details provided to CAD.
- Video Analytics from Avigilon Control Center (ACC) and Blue highlight a capability to

alert a CommandCentral Aware user to video that put eyes on the scene in seconds. Avigilon brings with it a wide swath of analytics to the fixed VMS that define rules that set triggers on breaches by bounded area, object detection, motion detection, path crossed, directional pattern changes. Avigilon ACC and Blue allows for video analytics with motion detection sending alerts to CommandCentral Aware.

- Real-Time Video Streaming: Virtually patrol your community or get eyes on scene of an event in seconds by viewing cameras simultaneously from video feeds via any supported video management system you currently use. Easily reference the video source, date, time and location as well as customize camera groups for quicker access to particular locations

For more information about CommandCentral Aware, visit motorolasolutions.com/aware or refer to Motorola Solutions Sales for additional information.

Command Central Aware On Premise

Ordering Information

General Information

Shape your response more appropriately with CommandCentral Aware's real-time video access and notifications, which allow PSAP fusion operators or intelligence analysts to access nearby video feeds from within the consolidated map for greater visibility into an escalating situation. CommandCentral Aware brings users' attention to key video content, enhancing officer safety and boosting productivity

Features:

- **Geospatial Event Mapping:** Include camera locations, CAD incidents, personnel status and location, open-source data alerts, sensors and more, on a single map that can be customized with any of your agency's other data layers.
- **Alerts:** Alerts indicating a weapon draw, vest pierce or other emergency display the location and type of incident in real time on the consolidated map, helping dispatchers provide immediate support and improving officer and citizen safety.
- **Activity Monitor:** View a real-time feed of alerts and incident occurrences as they populate on the map. Each event can be viewed in detail with information drawn from additional data sources pertaining to that specific event.

Workflow Configuration: Automate workflows by associating related data together from disparate systems to get a comprehensive picture of the incident or threat occurrence. This can include video sources, related open-source data alerts, a CAD incident, sensor alarms, and more.

- **Real-Time Video Streaming:** Virtually patrol your community and quickly get eyes on the scene of an event by viewing cameras simultaneously from fixed or mobile video feeds via any video management system. Easily reference the video source, date, time, and location as well as customize camera groups for quicker access to particular locations.
- **Communications integration:** CommandCentral Aware has the capability to interface with Motorola's ASTRO 25 MCC 7500E Dispatch Console solution. This allows the customer to integrate radio dispatch capabilities into CommandCentral Aware client workstation without requiring an alternate method to perform (i.e. a handheld radio).
- **Security Compliance:** Rely on applications secured and compliant to CJIS, security standards.

For more information about CommandCentral Aware, visit motorolasolutions.com/aware or refer to Motorola Solutions Sales for additional information.

Motorola CommandCentral AXS Dispatch Console

Ordering Information

[Ordering Guide](#)

General Information

Ordering a Motorola CommandCentral AXS dispatch console requires ordering hardware, software licenses and the annual AXS console subscription agreement.

- The hardware includes speakers, microphones, headset jacks, footswitches, monitors, keyboards, mice and hubs used in the dispatch clients as well as the servers used in the cluster.
- The software licenses include the dispatch client licenses, the various feature licenses, the capacity licenses and the RAN gateway licenses.
- The mandatory annual AXS console subscription agreement is required for all AXS consoles. The subscription includes a contract that covers all the dispatch clients and clusters on the order and subscription enablement licenses for each cluster. The contract's price is based on the number of dispatch clients on the order. A subscription enablement license is automatically generated for each cluster covered by the contract. The subscription enablement license is a time-limited license with start and stop dates that match the start and stop dates of the subscription contract. A cluster must have a valid subscription enablement license installed before it will allow console application software to be installed or upgraded. The initial subscription is for a period of one year, but additional years may be added if desired.

The Stratus Radio On Line (ROL) tool is used by the presale teams to generate an equipment list and quote for the AXS console's hardware and software licenses. ROL can also include the console site networking equipment as well as other equipment associated with dispatch centers in the equipment list and quote. Once that quote has been created in ROL, a quote for the AXS console subscription agreement must be created in CPQ. The field team must then manually combine the ROL quote and CPQ quote into a single quote for presentation to the customer.

After the customer has issued a purchase order for the console/subscription, the hardware and software license items are ordered through COF in the standard way. The subscription is ordered through CPQ, but the order is not immediately booked. Instead, it is placed on hold until the customer is ready to start beneficial use of the AXS console. At that time, the Customer Service Manager (CSM) must contact someone on the presales team to have

them go into CPQ to enter the start date for the subscription and release the subscription order from hold.

Email address(es) must be entered into COF and CPQ for the various licenses associated with the AXS console. A license entitlement file will be emailed to the provided email address(es). This entitlement file is used to activate the licenses and associate them with a cluster. Do not lose this email!

The AXS console subscription agreement allows the AXS product software to be downloaded from the MyView portal. The AXS product software is not directly orderable. It must be obtained via a subscription.

Additional ordering information may be found in the [CommandCentral AXS Dispatch Console Ordering Guide](#).

Ordering Requirements

The AXS console must be ordered in COF and CPQ. It is not orderable in OMAR or MOL.

An email address is required for the software licenses and the subscription licenses. The license entitlement files for those licenses will be sent to the email address.

The following information is required to order the subscription agreement:

- The date the subscription should start.
- The duration, in years, of the subscription.
- The email address the subscription entitlement license file should be mailed to.
- The system ID of the ASTRO 25 system the console is connected to.
- The site name where the console is installed.
- The address of the location where the cluster is installed.

The software subscription agreement contract is mandatory for each AXS console. Without it, it is not possible to install or upgrade console software.

Tech Edit will put all orders for the AXS console on E3 hold for Product Management review.

Configuration

Cluster Hardware

In its initial releases, an AXS cluster consists of three servers and supports up to ten dispatch clients. Later releases will support additional servers per cluster for increased capacities.

All the servers within a cluster are physically identical.

Order a server using the DSDL20G10SVR part number. A cluster requires three DSDL20G10SVRs.

The servers do not include keyboards, mice or monitors. The DSB07000819 rackmount KVM switch and DSB078101USB1 server interface unit can be used to provide access to the servers for installation, servicing and maintenance. One DSB07000819 KVM switch can be used with up to eight servers. Each server connected to the DSB07000819 KVM switch requires a

DSB078101USB1 interface unit.

Description	Full Description	Nomenclature	APC	Price
COMPUTER, DL20 G10	Provides one DL20 server for use in an AXS cluster. Includes a friction rail mounting kit. Does not include monitor, keyboard or mouse. A cluster requires three servers.	DSDL20G10SVR	708	\$4,150.00
8-PORT CONSOLE CAT5 KVM SWITCH 1U RM 19IN LCD RACKMOUNT	Provides one rack mounted, 8-port KVM switch with keyboard, touchpad and folding display. Requires one DSB078101USB1 server interface unit for each server connected to the KVM switch.	DSB07000819	708	\$1,469.00
USB SINGLE SRVR INTERFACE UNIT VIRTUAL MEDIA KVM SWITCH HD15 USB RJ4	Provides one server interface unit to enable one server to connect to a DSB07000819 KVM switch. One required for each server connected to the KVM switch.	DSB078101USB1	708	\$93.00

Cluster Enablement Licenses

Each AXS cluster requires a HKVN4728A license when it is connected to an ASTRO 25 radio system. One HKVN4728A is required per cluster per ASTRO 25 system. An email address must be entered into the ordering system for the HKVN4728A.

Each AXS cluster also requires a HKVN4828A license to be able to do the initial installation of software on the cluster's servers. This is a time-limited license with a lifetime of 15 months, starting when the license is first shipped. It is intended to cover the staging and deployment before the customer begins beneficial use of the console. Once the console is ready for beneficial use, this license is replaced by the license associated with the SSV01S01669A item (see Subscription section below for more details).

Description	Full Description	Nomenclature	APC	Price
	One HKVN4728A is			

LICENSE,AXS ASTRO 25 SYSTEM WI	required for each ASTRO 25 system that is connected to an AXS cluster. Each cluster needs it own HKVN4728A if it is connected to an ASTRO 25 system.	HKVN4728	504	\$0.00
LICENSE,AXS ASTRO 25 SYSTEM WIRELINE GATEWAY LICENSE	One KHVN4828A is required for each cluster. This license enables the cluster to do the initial installation of software on the cluster. When the customer starts beneficial use of the console, this license will be replaced by the license that is generated by the SSV01S01669A.	HKVN4828	504	\$0.00

Dispatch Client Feature and Capacity Enablement Licenses

The dispatch client feature licenses and dispatch client capacity licenses are installed on the cluster. Each cluster needs to have the appropriate set of licenses for the dispatch clients that will be logging into it.

The licenses are “pooled” on the cluster. That is, they are not dedicated to any particular dispatch client. When dispatch clients log into the cluster, they are assigned licenses for the features they will be using based on their screen configurations. Make sure to order enough licenses to cover the maximum number of dispatch clients that are expected to be simultaneously logged into a cluster.

If a dispatch client will connect to different clusters at different times (main and backup clusters, for example), each cluster needs to have the appropriate set of licenses to support the client. That is, the licenses are not transferable between clusters.

An email address is required to be entered into the ordering system for the licenses.

The HKVN4729 AXS Dispatch Client License is required for each dispatch client accessing a cluster. As mentioned above, if a client will be connecting to different clusters at different times, it needs to have a HKVN4729 license on each cluster.

Description	Full Description	Nomenclature	APC	Price
AXS DISPATCH CLIENT LICENSE	One HKVN4729A is required per AXS dispatch client that will be accessing the cluster.	HKVN4729	504	\$7,900.00

The feature licenses (HKVN4730 thru HKVN4736) are only needed if the dispatch client will use

the functionality associated with a license. Each dispatch client needs to have feature licenses for the features it will use.

Description	Full Description	Nomenclature	APC	Price
LICENSE,AXS TRUNKING SERVICES	One HKVN4730A is required per AXS dispatch client that will be monitoring trunking resources on one or more ASTRO 25 systems.	HKVN4730	504	\$6,600.00
LICENSE,AXS ADVANCED CONVENTION	One HKVN4731A is required per AXS dispatch client that will be monitoring advanced conventional resources on one or more ASTRO 25 conventional and/or MDC 1200 channels.	HKVN4731	504	\$3,960.00
LICENSE,AXS SECURE VOICE SERVICES	One HKVN4732A is required per AXS dispatch client that will be using voice encryption functionality on trunking and/or conventional resources.	HKVN4732	504	\$6,340.00
LICENSE,AXS SECURE OTEK SERVICE	One HKVN4739A is required per AXS dispatch client that will be using OTEK functionality on trunking and/or conventional resources.	HKVN4739	504	\$4,420.00
LICENSE,AXS CHANNEL BASED IRR	One HKVN4733A is required per AXS dispatch client that will be using Channel Based IRR functionality.	HKVN4733	504	\$3,200.00
LICENSE,AXS MULTIPLE GUI WINDOWS	One HKVN4734A is required per AXS dispatch client that will be displaying its GUI in multiple web browser windows.	HKVN4734	504	\$7,975.00
LICENSE,AXS INBOUND EVENT DISPLAY	One HKVN4735A is required per AXS dispatch client that will be using Inbound Event Display functionality.	HKVN4735	504	\$6,300.00
	One HKVN4736A is required per AXS dispatch client that will			

LICENSE,AXS AMBE+2 VOCODER ROY	be monitoring trunking resources on one or more ASTRO 25 systems.	HKVN4736	504	\$50.00
-----------------------------------	---	----------	-----	---------

Each dispatch client requires at least one radio resource capacity license (HKVN4737 or HKVN4738).

The HKVN4737 enables a dispatch client to affiliate with up to 160 radio resources. Only one HKVN4737 may be used with a dispatch client. The HKVN4737 cannot be used with the HKVN4748 on the same dispatch client.

The HKVN4738 enables a dispatch client to affiliate with up to 15 radio resources. The HKVN4738 licenses are “additive” to enable a dispatch client's capacity to be scaled up to 150 radio resources in increments of 15. The HKVN4738 cannot be used with the HKVN4737 on the same dispatch client.

Description	Full Description	Nomenclature	APC	Price
LICENSE,AXS STANDARD LEVEL RADIO	Enables an AXS dispatch client to affiliate with up to 160 radio resources (trunked + conventional). Each AXS dispatch client requires a radio resource capacity license (HKVN4737A or HKVN4738A).	HKVN4737	504	\$20,700.00
LICENSE,AXS VALUE LEVEL RADIO	Enables an AXS dispatch client to affiliate with up to 15 radio resources (trunked + conventional). Each AXS dispatch client requires a radio resource capacity license (HKVN4737A or HKVN4738A).	HKVN4738	504	\$3,850.00

Dispatch Client Hardware

The CommandCentral Hub is an appliance that can be used with AXS dispatch clients. It contains a workstation class computer motherboard, thirteen USB ports, a number of analog inputs and outputs for connecting various devices and four 24 VDC power ports for powering up to four B1952 speakers. The thirteen USB ports consist of ten Type A ports, one Type B port and two Type C ports. A dispatch client is capable of supporting a single hub.

The hub provides the computing platform for the AXS dispatch client along with USB and analog interfaces for the various peripheral devices that can be connected to a dispatch position client.

A line cord option must be ordered with the hub.

If desired, up to four 24VDC power cables can be ordered for use in powering B1952 speakers

directly from the hub. The CA03548AA option provides two cables. The CA03583AA option provides four cables.

A mounting kit can be ordered using the CA03547AA option. The mounting kit allows the hub to be mounted in a 19" rack or to a flat surface. Order one kit per hub.

It is strongly recommended to order the BHN6114A cable retention bracket for the hub. This allows the cables that are connected to the rear of the hub to be secured to prevent accidental disconnection. It also provides strain relief for the cables.

The hub does not come with a keyboard or mouse or monitor. These must be ordered separately.

The hub and its optional items are shown below.

Description	Full Description	Nomenclature	APC	Price
PERIPHERAL DEVICES HUB	Provides one CommandCentral Hub with integrated PC workstation.	B1956	754	\$5,250.00
ADD: AC LINE CORD, NORTH AMERICA	Provides one North American AC line cord.	CA03553AA	754	\$13.00
ADD: CABLE, POWER 24VDC	These cables are used to connect B1952 speakers to the 24 VDC power ports on the hub. This option provides two cables which allow two B1952 speakers to be powered from the hub.	CA03548AA	754	\$75.00
ADD: FOUR CABLES, POWER 24VDC	These cables are used to connect B1952 speakers to the 24 VDC power ports on the hub. This option provides four cables which allow four B1952 speakers to be powered from the hub.	CA03583AA	754	\$150.00
ADD: BRACKET, MOUNTING 2RU	Mounting brackets for the CommandCentral Hub. Can be used to mount the hub in a 19" rack or on a flat	CA03547AA	754	\$30.00

	surface.			
FRU: BRACKET, CABLE RETENTION	Cable retention bracket and mounting screws for the CommandCentral Hub. This bracket is used to secure and strain relieve the various cables that connect to the rear of the hub.	BHN6114	754	\$65.00
CERTIFIED KEYBOARD FOR RSD SERVERS AND WORKSTATIONS	Keyboard	L3225A	708	\$42.00
CERTIFIED OPTICAL WHEEL MOUSE FOR RSD SERVERS AND WORKSTATIONS	Mouse	L3226A	708	\$30.00

Monitors that may be used with AXS dispatch clients are shown below. The CommandCentral Hub has two DisplayPort++ ports and one HDMI port for supporting up to three monitors.

Description	Full Description	Nomenclature	APC	Price

Up to one USB microphone can be connected to a CommandCentral Hub. The B1951 USB microphone requires a USB cable to connect it to the hub. Either the CA03412AA or

CA03413AA option may be used to order the USB cable.

Description	Full Description	Nomenclature	APC	Price
MICROPHONE, DESKTOP, USB	Provides one headset jack. Includes separate volume controls for radio and telephone audio, a 6 foot permanently attached cable and a 6 foot extension cable. Ships from the factory configured for use with 6-wire headsets. Can be field-modified to work with 4-wire headsets.	B1951	754	\$445.00
ADD: USB CABLE, TYPE C TO TYPE C, 4.5M	Adds a 4.5 M Type C to Type C USB cable with a thumb screw on one end. Order as a sub-item to either MSI Purpose-Built Mic (B1951) or Speaker (B1952).	CA03412AA	754	\$39.00
ADD: USB CABLE, TYPE A TO TYPE C, 4.5M	Adds a 4.5 M Type A to Type C USB cable with a thumb screw on the "C" end. Order as a sub-item to either MSI Purpose-Built Mic (B1951) or Speaker (B1952).	CA03413AA	754	\$29.00

Up to ten USB speakers can be connected to a CommandCentral Hub. The B1952 USB speaker requires a USB cable to connect it to the hub. Either the CA03412AA or CA03413AA option may be used to order the USB cable. The hub can provide 24VDC power to up to four speakers (see CommandCentral Hub section above). If more than four speakers are used, the CA03405AA option can be used to provide 24VDC power supplies for the additional speakers. One power supply is used per speaker. An AC line cord option must also be ordered for each power supply.

Description	Full Description	Nomenclature	APC	Price
SPEAKER, DESKTOP, USB	The B1952 speaker is specifically designed for use with the AXS console. The B1952 provides a single USB-based desktop speaker that connects directly to the dispatch positions's hub or PC. Each speaker has its own	B1952	754	\$485.00

	individual volume control and can be used with an optional external power supply for up to 20 Watts of output power.			
ADD: POWER SUPPLY WITH DC CORD	Provides an external power supply brick for use with the B1952 speaker. Requires an AC Line Cord option to also be ordered.	CA03405AA	754	\$75.00
ADD: AC LINE CORD, NORTH AMERICA	Adds a North American AC line cord.	CA03406AA	754	\$13.00
ADD: USB CABLE, TYPE C TO TYPE C, 4.5M	Adds a 4.5 M Type C to Type C USB cable with a thumb screw on one end. Order as a sub-item to either MSI Purpose-Built Mic (B1951) or Speaker (B1952).	CA03412AA	754	\$39.00
ADD: USB CABLE, TYPE A TO TYPE C, 4.5M	Adds a 4.5 M Type A to Type C USB cable with a thumb screw on the "C" end. Order as a sub-item to either MSI Purpose-Built Mic (B1951) or Speaker (B1952).	CA03413AA	754	\$29.00

Up to two headset jack boxes can be connected to a CommandCentral Hub. The B1913 provides one headset jack box.

Description	Full Description	Nomenclature	APC	Price
MCC SERIES HEADSET JACK	Provides one headset jack. Includes separate volume controls for radio and telephone audio, a 6 foot permanently attached cable and a 6 foot extension cable. Ships from the factory configured for use with 6-wire headsets. Can be field-modified to work with 4-wire headsets.	B1913	443	\$200.00

Up to one "analog" footswitch can be connected to a CommandCentral Hub. The DSTWIN6328A provides one dual pedal "analog" footswitch.

Description	Full Description	Nomenclature	APC	Price

PROVIDES ONE DUAL PEDAL FOOTSWITCH FOR USE WITH MOTOROLA MCC 7500 DISP	Provides one dual pedal footswitch.	DSTWIN6328A	708	\$290.00
--	-------------------------------------	-------------	-----	----------

The certified headsets used with AXS dispatch clients are described below. Order the desired number of headset tops and bases from the list below. Both a top and base are required to form a complete headset.

Description	Full Description	Nomenclature	APC	Price
HDST MODULE BASE W/PTT, 15 FT CBL	Provides one headset base. Requires a headset top (RMN5150A or RMN5151A) to form a complete headset.	RLN6098	706	\$210.00
HDST MODULE BASE W/PTT, 25 FT CBL	Provides one headset base. Requires a headset top (RMN5150A or RMN5151A) to form a complete headset.	RLN6099A	706	\$242.00
OVER-THE-HEAD, MONAURAL, NOISE-CANCELING HEADSET	Provides one headset top. Requires a headset base (RLN6098A or RLN6099A) to form a complete headset.	RMN5150A	706	\$149.00
OVER-THE-HEAD, BINAURAL, NOISE-CANCELING HEADSET	Provides one headset top. Requires a headset base (RLN6098A or RLN6099A) to form a complete headset.	RMN5151A	706	\$156.00

Dispatch Client Spares and Field Replaceable Units (FRUs)

It is generally recommended that one set of spares and FRUs be ordered for each dispatch center location. Spares of some items (for example, headsets, monitors and footswitches) may be ordered using the part numbers in the sections above.

FRUs for the CommandCentral Hub may be ordered using the part numbers below.

Description	Full Description	Nomenclature	APC	Price
GR500 AC POWER CORD	Provides one North American AC line cord.	3082933N08	454	\$33.25

CABLE - MCD 5000 DESKSET TO LOGGER	Provides one cable with an RJ45 connector on one end and individual stripped and tinned wires on the other end. May be used with the three audio output ports, the Aux I/O port or the EPI port on the CommandCentral Hub.	FKN8696	202	\$40.00
FRU: POWER CABLE, 24VDC	Provides one cable for connecting a B1952 speaker to a 24 VDC power port on the CommandCentral Hub.	BKN2002	754	\$35.00
FRU: MOUNTING BRACKET KIT, PDH	Mounting kit for mounting the CommandCentral Hub in a 19" rack or to a flat surface. Includes two brackets and the screws required to attach them to the hub. Does not include any screws for attaching to the rack.	BLN1325	754	\$40.00
FRU: COVER, FRONT PDH	Front cover for the CommandCentral Hub	BHN1024	754	\$90.00

FRUs for the USB speaker, USB microphone and analog headset jack box can be ordered using the part numbers below.

Description	Full Description	Nomenclature	APC	Price
FRU, MICROPHONE, DESKTOP, USB	Complete microphone, but does not include the USB cable.	BMN2000	754	\$445.00
FRU, SPEAKER, DESKTOP, USB	Complete speaker, but does not include the USB cable or an external power supply.	BSN2000	754	\$485.00
FRU, USB CABLE, TYPE C TO TYPE C, 4.5M	USB Type C to Type C cable with a thumb screw on one of the ends.	BKN2000	754	\$79.00
FRU, USB CABLE, TYPE A TO TYPE C, 4.5M	USB Type C to Type A cable with a thumb screw on the "C" end.	BKN2001	754	\$29.00

FRU, POWER SUPPLY WITH DC CORD	Power supply with DC cable for USB speaker. Does not include an AC line cord.	BPN1030	754	\$150.00
HEADSET JACK CIRCUIT BOARD FRU	Provides the circuit board used in the B1913 headset jack. Does not include housing, PJ7 connectors or cables. Order as a main line item.	BLN1277	443	\$250.00
CABLE ASSY, 16 PIN CONNECTOR	Cable, CommandCentral Hub to Headset Jack Box (for B1913)	3071113H01	443	\$108.00
CABLE ASSY, EXTENDER	Cable, Extender, Headset Jack Box (for B1913)	3071114H01	443	\$97.50

Subscription Agreement

The AXS console requires a subscription agreement. The subscription has an annual fee that is based on the number of dispatch clients being used in the console.

The subscription is quoted and ordered in CPQ. Once a quote has been created, it will remain in “draft” mode until the customer is ready to start beneficial use of the console (this is typically the time the warranty wrap for the AXS console takes place). At that time, the Customer Service Manager (CSM) must contact someone on the presales team and have them go into CPQ to update and release the order for the subscription. The following information will be required to be verified or updated when this is done:

- The number of clusters to be covered by the subscription.
- The number of servers to be covered by the subscription.
- The number of dispatch clients to be covered by the subscription.
- The date the subscription should start.
- The duration, in years, of the subscription.
- The email address the subscription entitlement license file should be mailed to.
- The system ID of the ASTRO 25 system the console is connected to.
- The site name where the console is installed.
- The address of the location where the cluster is installed.

CPQ will automatically generate three part numbers (SSV01S01669A, SSV01S01900A and SSV01S01774A) that are used to create the subscription contract.

- One SSV01S01669A ASTRO AXS CLUSTER SUBSCRIPTION is generated per cluster. The SSV01S01669AA will trigger an enablement license to be generated by the factory. This

enablement license must be installed on the cluster. The AXS software cannot be installed without this license.

- One SSV01S01900A ASTRO AXS SERVER SUBSCRIPTION is generated per server. The SSV01S01900A is used to track the annual subscription payments Motorola Solutions must make for the anti-malware software used on the servers. It does not generate any enablement licenses.

- One SSV01S01774A ASTRO AXS CLIENT SUBSCRIPTION is generated per dispatch client. The SSV01S01774A is used to track the annual subscription payments Motorola Solutions must make for some of the 3rd party software used in the AXS console. The price of the SSV01S01774A is per client. The actual price of the SSV01S01774A depends on the number of years being ordered for the subscription contract. CPQ will show the price when the quote is created. The SSV01S01774A does not generate any enablement licenses.

Only one subscription agreement may be ordered at a time in CPQ due to the requirement for the address of the cluster location. If a customer has multiple locations with clusters, then multiple quotes will need to be generated in CPQ.

Description	Full Description	Nomenclature	APC	Price
ASTRO AXS CLUSTER SUBSCRIPTION	Each cluster requires a SSV01S01669A to be able to install and upgrade its software. This SSV will automatically generate an enablement license that must be installed on the AXS cluster. The AXS software cannot be installed without this license.	SSV01S01669A	0823	\$0.00
ASTRO AXS SERVER SUBSCRIPTION	One SSV01S01900A is required for each AXS server that is being ordered. It is NOT a license that needs to be installed on the AXS cluster.	SSV01S01900A	0823	\$0.00
ASTRO AXS CLIENT SUBSCRIPTION	One SSV01S01774A is required for each AXS client that is being ordered. It is NOT a license that needs to be installed on the AXS cluster.	SSV01S01774A	0823	\$3,500.00

SaaS**

General Information

The Motorola CommandCentral Aware provides an aggregated user-configurable console view integrating multiple disparate public safety systems. CommandCentral Aware provides real-time intelligence for a complete operating picture with major components including mapping, video, and event monitoring. CommandCentral Aware provides a complete operating picture, integrating real-time intelligence in the command center to remotely assist officers in the field.

This offer covers video and video analytics, workflow configuration and key software integrations.

Features:

Place eyes on the scene within seconds of a critical incident, communicating a more informed response and enhance responder safety through the common operating picture via CommandCentral Aware providing information through:

- Receiving incident locations, alerts and analytic notifications and identifies cameras in vicinity so that intelligence analyst can view a live stream from the area in real time.
- Visualize critical 911 call information on the map, along with the relevant information

(location of interest) and related live video streams, video analytics to enhance details provided to CAD.

- Video Analytics from Avigilon Blue highlight a capability to alert a CommandCentral Aware user to video that put eyes on the scene in seconds. Avigilon brings with it a wide swath of analytics to the fixed VMS that define rules that set triggers on breaches by bounded area, object detection, motion detection, path crossed, directional pattern changes. Blue allows for cloud based video analytics with motion detection sending alerts to CommandCentral Aware.
- Real-Time Video Streaming: Virtually patrol your community or get eyes on scene of an event in seconds by viewing cameras simultaneously from video feeds via any supported video management system you currently use. Easily reference the video source, date, time and location as well as customize camera groups for quicker access to particular locations

For more information about CommandCentral Aware, visit motorolasolutions.com/aware or refer to Motorola Solutions Sales for additional information.

How to Order

COMPASSCOM Location Application

Ordering Information

General Information

CompassCom Empowers On Premise Real-Time Tracking With Motorola ASTRO 25 Radio Networks. CompassCom is an authorized partner and provider of real time GPS tracking and fleet management solutions leveraging the Motorola ASTRO 25 IV&D and Outdoor Location Solutions. The enterprise software solution is configured as a Common Operational Picture and is integrated side-by-side with Motorola infrastructure to track in-vehicle terminals, portable and mobile radios enabled with GPS. Based in an Esri GIS environment, real-time vehicle, handset and sensor information is viewed on CompassTrac® desk top and browser based solutions enables our clients to view map information and telemetry data. The CompassTrac6, Javascript API, is the web based viewing software that shows real-time location, status and the state of your mobile assets. On the fly digitizing of geofences, custom alerts via pop-up, SMS or e-mail, route validation, engine diagnostics and replay are a few of CompassTrac 6 functions. CompassReports, based on SQL Reports, is an easy way to get accurate information on fleet or vehicle use, performance, history or after action accountability. CompassReports provides Standard, Customized or Scheduled Reports. The CompassCom solution enables supervisors, field managers and commanders to make meaningful decisions that save lives, improves customer service, ensure worker accountability and drives more efficient operations while leveraging their investment in Motorola technology

NOTE: ESRI mapping is not part of this solution. It is assumed that the customer already has the mapping application. If mapping application other than ESRI is needed, please contact Renata Oiticica Lampert for details.

This solution is also available for OFF NETWORK usage.

Features

- Interfaces with ASTRO 7.X Integrated Voice and Data Networks Interfaces with ASTRO 25 Outdoor Location Server
- On Premise Solution with open architecture for 3rd party integration
- CompassTrac map display supports desktop, web based and mobile deployment
- Support ESRI and ArcGIS Online map data
- Displays vehicle positions, speed, heading and status in real-time
- Customizable vehicle icons
- Supports geocoding and reverse geocoding
- Provides map zoom and pan capabilities
- Breadcrum rules allowing view choices ranging from 0 to 24 hours
- Playback mode
- Geofencing
- Monitor vehicle/asset inputs and attached sensors
- Supports in-vehicle GPS
- Locate portable and mobile radios in real-time or last reported location
- User definable reports
- Monitor driver safety

Ordering Requirements

Step 1 - Complete Questionnaire

- In order to get a formal quote on the Compasscom application please fill out the questionnaire below with your customers information.
- Please return completed Questionnaire to your local BdM or directly to Mike Kovacs (Compasscom) for processing
- [Link to Questionnaire](#)
- **Request Pre Sales Business Manager (PBM) quote for MSI deployment services**

Step 2 - Radio required options

- GPS needs to be enabled
- Enhanced Data must be enabled (Version 7.14+)
- Location on PTT is recommended (Version 7.17+)

FLASHport Option - If the portable radios already exist in the field, please go to the corresponding FLASH port upgrades page and select appropriate T-Model.

Step 3 - System Requirement

- IMW version 5.2 or above is required

CONTROL STATION COMBINERS

This page contains parts information for MSI preferred vendors including TXRX, RFI, and DBSPECTRA.

For non preferred vendors, contact the vendor directly. You will need an approved Exception Request to use equipment from a non preferred vendor. See link below.

Public Safety and Private LTE

Core L2/L3 Switch (AC Power)

Ordering Information

General Information

The Core Switch/Router enables network elements and applications within the Private LTE network to communicate with one another.

Features

The LTE Core Switch/Router has the following attributes:

- The Extreme Networks X670-G2 Series provides high-density Layer 2/3 10Gb networking with low latency cut-through switching, IPv4 & IPv6 unicast and multicast routing in a 1 RU form factor.
- Redundant (3) fan modules
- Redundant (2) AC power supplies and cables
- 48 ports of 1/10Gb SFP+ with 4 ports of 10/40Gb QSFP+, The X670-G2-48x-4q supports four QSFP+ ports of 40 GbE. Each 40 Gigabit Ethernet port can be independently configured as 40 Gigabit Ethernet or 4 x 10 Gigabit Ethernet.
- ExtremeXOS® feature set supporting switching and routing
- Optional MPLS feature pack: MPLS provides the ability to implement traffic engineering and multiservice networks, and improve network resiliency. The MPLS protocol suite provides the ability to deploy services based on L2VPNS (VPLS/VPWS), BGP-based L3VPNS; LSP Establishment based on LDP, RSVP-TE, Static provisioning; Integrated OAM tools like VCCV, BFD and CFM; And MPLS Fast Reroute to support rapid local convergence around network failures.

For additional information, search on model number X670-G2 at www.extremenetworks.com

The listed equipment is recommended by the MSI engineering product team. Because this recommendation is new, system management and full integration of the equipment in MSI engineering labs are roadmap items. The target level of system management is fault management by the Unified Event Manager and security monitoring of syslog events by the LXN SIEM.

In advance of a software update to the UEM to provide FM support, the field may make use of the UEM fault management toolkit to integrate supplier's traps into a Device Definition Package that can then be loaded into the UEM.

Golden configs are part of the product team's roadmapped integration effort. This means that before completion of that effort, that the field will need to supply their own configurations for the networking equipment.

Ordering Requirements

For the following deployment types, the switch/router is a mandatory function provided by Motorola Solutions or the Customer.

- LXN 6000 Deployment (Nomadic Deployable + Colocated MSI/Customer App(s) - More than 1 eNB deployment, Bubble Coverage): Order one switch/router per deployment for non-locally redundant transport or two switch/routers per deployment for locally redundant transport.
- LXN 7100 Local Redundancy Deployment: Order one switch/router per deployment for non-redundant transport or two switch/routers per deployment for locally redundant transport.
- LXN 7100 Geo Redundancy Deployment: Order one switch/router per geographic location for non-locally redundant transport or two switch/routers per geographic location for locally redundant transport.

For the following deployment type, the switch/router is optional:

- LXN 6000 Deployment (Nomadic Deployable + Colocated Customer App(s) - Single eNB, trailer type deployment - Bubble Coverage): Order one switch/router per deployment for non-locally redundant transport or two switch/routers per deployment for locally redundant transport.

For the following deployment type, the switch/router is not required:

- LXN 6000 Deployment (Nomadic Deployable + Single Colocated MSI App - Single eNB, trailer type deployment - Bubble Coverage)

For each instance of Motorola Solutions provided switch/router, please order the following models and options:

- qty 1 TT3685A Summit X670-G2-48x-4q-Base-Unit
- qty 3 TT06560AA Summit X670 fan module FB
- qty 2 TT06561AA Summit 550W AC PSU FB
- qty 1 TT06562AA Summit X670 Series Core License
- qty 2 TT06564AA Pwr Cord, 10A, CEE 7/7, C13

If the optional MPLS feature pack is desired, order qty 1 of the following for each instance of switch/router:

- qty 1 TT06563AA Summit X670 MPLS Feature Pack.

Year One of Maintenance and Support for each switch/router must be ordered through iProcurement. Please contact [Product Management](#) to obtain a current Maintenance and Support quote.

For LXN 8100 transport ordering information, please contact [Product Management](#).

Public Safety and Private LTE

Core/EPC Firewall

Ordering Information

General Information

The FortiGate Security Gateway is located in the LTE Core network and can be used for the following functions, depending on the deployment use case and LXN product line:

1. OAM Firewall
2. PDN Firewall
3. RAN Firewall. Note: For LXN 6000 & 7100, the RAN Firewall function can be provided as a RAN Firewall Virtual Domain or provided internally by the EPC, which currently can terminate IPsec towards up to 15 eNBs per the default call profile.

For high availability, order the FortiGate Security Gateway in pairs for local redundancy. All models are fully scalable. If higher capacity is required, additional units can be added. Private Broadband [LTE Product Management](#) should be consulted before adding additional capacity to ensure proper configuration.

The listed equipment is recommended by the MSI engineering product team. Because this recommendation is new, system management and full integration of the equipment in MSI engineering labs are roadmap items. The target level of system management is fault management by the Unified Event Manager and security monitoring of syslog events by the LXN SIEM.

In advance of a software update to the UEM to provide FM support, the field may make use of the UEM fault management toolkit to integrate supplier's traps into a Device Definition Package that can then be loaded into the UEM.

Golden configs are part of the product team's roadmapped integration effort. This means that before completion of that effort, that the field will need to supply their own configurations for the networking equipment.

Specifications

FortiGate Security Gateway 500E specifications (for LXN 6000):

- Firewall Throughput (1518/512/64 byte UDP): 36 / 36 / 22 Gbps
- Interfaces: 2x 10 GE SFP+, 10x GE RJ45, 8x GE SFP, 2 SFP (SX 1 GE) transceivers included
- Power Supplies: Single

- Rack Units: 1

FortiGate Security Gateway 1500D specifications (for LXN 7100):

- Firewall Throughput (1518/512/64 byte UDP): 80 / 80 / 55 Gbps
- Interfaces: 8x 10GE SFP+/GE SFP, 16x GE SFP, 18x GE RJ45, 2 SFP+ (SR 10GE) transceivers included
- Power Supplies: Dual
- Rack Units: 2

FortiGate Security Gateway 3100D specifications (for LXN 8100):

- Firewall Throughput (1518/512/64 byte UDP): 80 / 80 / 55 Gbps
- Interfaces: 32x 10G SFP+/GE SFP Slots, 2x GE RJ45, 2 SFP+ (SR 10 GE) transceivers included
- Power Supplies: Dual
- Rack Units: 2

Note that certification and system management of the FortiGate Security Gateway 500E and 1500D models are being finalized, and related capabilities will be available in future LXN releases.

For additional features and specifications, please visit <http://www.fortinet.com> and search on the model number:

- For LXN 6000, search on “500E”.
- For LXN 7100, search on “1500D”.
- For LXN 8100, search on “3100D”.

Ordering Information

LXN 6000

A firewall is not required when the LXN 6000 is deployed in a trailer type deployment with a single eNB providing bubble coverage. The firewall is optional for all other LXN 6000 deployment types.

If local redundancy is not needed, order one FortiGate Security Gateway 500E firewall with each LXN 6000:

Qty 1 TT3706 FIREWALL FG-500

If local redundancy is needed, order two FortiGate Security Gateway 500E firewalls with each LXN 6000:

Qty 2 TT3706 FIREWALL FG-500

If required by project needs, order 10GE SFP+ transceiver modules (short range for all systems with SFP+ and SFP/SFP+ slots):

DDN2585 10 GE SFP+ TRANSCEIVER MODULE, SHORT RANGE

LXN 7100

The firewall is optional for the LXN 7100.

If local redundancy is not needed, order one FortiGate Security Gateway 1500D firewall with each LXN 7100:

Qty 1 TT3298 FIREWALL FG-1500D

If local redundancy is needed, order two FortiGate Security Gateway 1500D firewalls with each LXN 7100:

Qty 2 TT3298 FIREWALL FG-1500D

If required by project needs, order 10GE SFP+ transceiver modules (short range for all systems with SFP+ and SFP/SFP+ slots):

DDN2585 10 GE SFP+ TRANSCEIVER MODULE, SHORT RANGE

LXN 8100

Please contact [LTE Product Management](#) for a custom configuration of the FortiGate Security Gateway 3100D based on your project requirements.

Critical Connect

The MSI Critical Connect solution is a platform that enables the seamless exchange of information, voice, data, and video, between disparate networks, applications and agencies. With one secure interface, agencies get virtual direct connections to other agencies or personnel outside of their LMR coverage – providing seamless, interoperable communication across town, across state, or across the nation.

The initial offering of the Critical Connect Platform is focused on providing interoperable PTT communication between different ASTRO®25 land mobile radio networks and between ASTRO®25 networks and MSI carrier-integrated broadband PTT. Additional capabilities will be offered as they become available.

Critical Connect is orderable in CPQ, and sold as a subscription for **3, 4, or 5 years**.

Customer Programming Software (CPS)

Ordering Information

BASIC PAK MODEL

The Customer Programming Software (CPS) is a single user utility disk designed to function with standard off the shelf Radio Service Software (RSS). The CPS enables this software to program trunking system related features and unit IDs into subscriber radio code plugs. The CPS is designed for customers who want radio code plug programming capabilities, but who have a strategy to manage their subscriber radio fleetmap without using Motorola's Local Assignment System (LAS) product offering.

PLEASE NOTE! Pak customers will be required to order subscriber mobile and portable radios from the factory using the "add field programming" option. Radio fleetmap information for CPS customers will not be maintained in TCMS, and existing fleetmap information will be removed.

Ordering Requirements

If the CPS is to be used for an existing trunking system, include the Trunking System ID as an **"Item Note"** to the CPS model number. If the CPS is to be used for more than one trunking system, all Trunked System ID's must be listed on the order.

Since there is no executable software or stored data on the CPS disk, a signed license agreement from the customer is not required.

If a Trunked System ID is not assigned to the CPS customer, then a letter from the trunking system owner(s) authorizing inclusion of their ID(s) into the CPS must be attached to the order and received before an order for the CPS can be processed.

Order the appropriate Radio Service Software (RSS) packages for programming trunking subscriber radios from Aftermarket Accessory Division.

Customer Technician Dispatch Service

Ordering Information

General Information

Customer Technician Dispatch Service is a variation of Dispatch Service specifically design for Customer Owned and Maintained (COAM) customers who are providing their own on-site response for infrastructure. Motorola will dispatch the customer's technicians to the appropriate site when necessary. This service is for our COAM customers who want Network Monitoring Service, but do not want Motorola to provide the on-site response.

The Call Center Operation (CCO) at Motorola's SSC will provide a central point of contact for technical customer service requests 7-days per week, 24 hours per day, 365 days per year. The CCO is staffed with customer support representatives who will coordinate the appropriate service response and resources to Customer. Service requests are tracked and monitored by Motorola from creation of a Case through an electronic Case process.

Features

- Escalation Management
- 24 Hour/365 Day Service Availability
- Single Point of Contact
- Toll Free Service Number
- (800) 221-7144
- Activity Reporting
- Computer Aided Dispatch
- Electronic Case Tracking
- Dispatch of customer's own field technicians

Statement of Work

One of the primary business objectives of the North American Group (NAG) is to promote the sales of STANDARD service products. Standards help to ensure consistent and profitable delivery of our service products to our customers. To that end, the customer Statement of Work for this Standard Service Product **CANNOT** be modified. All requests for modifications to STANDARD service products or the development of "custom" service products should be routed through the Solutions Planning process. Your first point of contact for these requests is your local Area Service Manager.

Statement of Work

Ordering Requirements

1. **This product cannot be ordered directly through COF at this time.** This product must be ordered using the Services Lifecycle (SLC) contract system. Please contact your local Area Service Manager (ASM) or Customer Support Manager (CSM) if you are interested in ordering this product.
2. Options for this product are based on the component parts of the complete system. Pricing is based on the size and complexity of the customer's system configuration such as the type of system, number of sites and number of base stations. **To ensure accurate pricing, orders will not be processed or accepted if they do not include all system components.**
3. Enter the main line item as quantity one.
4. Options are required as sub-items, with the quantity equal to the option description.
5. All dollar amounts reflect an annual one year pricing.
6. Customer Technician Dispatch Service requires the purchase of Network Monitoring Service. Do not purchase Dispatch Service if purchasing Customer Technician Dispatch Service. See below.

	Network Monitoring Service	Technical Support	Dispatch Service	Customer Technician Dispatch	OnSite Infrastructure Response
Motorola Maintained	Required	Suggested	Required	N/A	Required
Customer Maintained (COAM)	Required	Suggested	N/A	Required	N/A

7. A Customer Support Plan must be created to provide detailed information to the customer regarding delivery of this service.

Cybersecurity Professional Services

Ordering Information

General Information

The digital world has brought to life unprecedented ways to increase productivity, maximize value, and ultimately improve the lives of billions of people. At the same time, an explosion of cyber security incidents has brought unique challenges to businesses and government agencies alike. Today, polymorphic attacks capable of modifying themselves with every execution are ubiquitous. While many organizations would like to think their most sensitive mission-critical information is inoculated; it is becoming increasingly clear that no one is immune. Cyber security goes beyond hacker attacks and technical controls.

The cyber security regulatory and enforcement landscape is also dynamic and rapidly evolving, creating more challenges in complying with a myriad of industry standards while managing appropriate security controls. As mission-critical networks evolve into dynamic systems of interconnected networks with more open-source platforms and cloud-based solutions, governance and oversight throughout the system's operational lifecycle is required. This encompasses a coordinated and regular re-evaluation of people, processes and technology to assure organizational readiness to protect, detect and respond to evolving threats.

Motorola's Cyber Security Professional Services provide a comprehensive and systematic process for identifying, assessing and managing cyber security risk throughout enterprise systems. With Cyber Security Professional Services, you will be able to fully understand your cyber security risk posture related to your organization's operational environment. Motorola provides a comprehensive assessment of your attack surface profile; a cost/benefit evaluation and detailed remediation recommendations. With ever-changing technologies and business processes, security threats are always changing and your organization's security posture is never static. Periodic security posture assessments help to maintain a current record of vulnerabilities and help to prioritize remediation activities necessary based on overall risk to your operations.

In 2014, the National Institute of Standards and Technology (NIST) issued the Framework for Improving Critical Infrastructure Cybersecurity for organizations to achieve specific cyber security outcomes. The Framework comprises leading practices from various standards bodies that have proved to be successful when implemented. Motorola Solutions participated alongside government and industry partners to help develop this framework. As a result, Motorola's assessment leverages the NIST recommendations by mapping the NIST Cybersecurity Framework to your organization's current risk management processes and procedures to determine your current cyber security profile risk levels and recommendations.

Features

Scope Only applicable controls spanning Technical, Management and Operational categories are selected to conduct a tailored risk analysis. Mitigation steps such as security architecture changes, integration of specific products or implementation of procedural control are recommended and discussed with the stakeholders only after the environment is methodically evaluated, risks are identified, analyzed, clearly understood and risk prioritized.

Approach Using physical observation, in-person interviews, manual, computerized, commercially available and custom tools, Motorola will evaluate potential threat scenarios and assess potential risk implications to confidentiality, integrity and availability of the organization's mission.

Methodology All applicable risk factors are considered and taken into account prior and during the assessment. After capturing all necessary data pertaining to the scope of the assessment, a threat profile is developed and prepared as a Risk Scorecard report indicating low, moderate, high and critical values for each finding/issue identified. A remediation or risk acceptance recommendation will follow each finding/issue. Using physical observation, in-person interviews, manual, computerized, commercially available and custom tools, Motorola will evaluate potential threat scenarios and assess potential risk implications to confidentiality, integrity and availability of the organization's mission. Only applicable controls spanning Technical, Managed and Operational categories are selected to conduct a tailored risk analysis. Mitigation steps such as security architecture changes, integration of specific products or implementation of procedural control are recommended and discussed with the stakeholders only after the environment is methodically evaluated, risks are identified, analyzed, clearly understood and risk prioritized.

CYBERSECURITY PROFESSIONAL SERVICES DISCIPLINES

Management

- Business Impact Analysis
- Asset Identification Classification
- NIST Framework Readiness Assessment
- Framework Governance Structure and Institutionalization
- Cyber Risk Scorecard and Organizational Key Performance Indicators (KPIs)
- Organizational Policy and Standards Development
- Operational Processes Effectiveness
- Threat Modeling/Threat Intelligence
- Intellectual Property Risk Assessment
- Off-shore Manufacturing and Software Development Risk Evaluation
- Secure Development Lifecycle
- Threat Analysis/Research
- Regulatory Compliance Impact Evaluation
- Third-Party Vendor Management Policy Process
- Training and Awareness

Operational

- Ad-Hoc Customer Inquires
- Operational Security Assistance
- Incident Response Assistance
- Digital Forensics Investigation
- Tailored Security Monitoring
- Customized Anomaly Detection Monitoring

Social Engineering Testing

Technical

- Technical Risk Cyber Security Assessments
 - Vulnerability Scans
 - Web Application Security
 - LAN and Wireless Penetration Testing
 - Physical Penetration Testing
 - Cloud Implementation Assessment
- Compliance Evaluation
- Network Architecture Review
- Third-Party Connectivity Evaluation
- SCADA Environment Risk Assessment
- Network Architecture Review
- Application Audit/Code Review
- Security Reference Architecture
- Enterprise Architecture Security
- Cryptographic Services
- Secure Mobile Technology Adoption
- "Honey Pot" Deployment and Monitoring
- Open Source Software Licensing Compliance

Statement of Work

Cybersecurity Professional Services will be unique to each customer's operational environment. As such, it will be highly customizable. Please reach out to security services offer management team for specifics.

DC POWER SYSTEMS, BATTERIES and GENERATORS

Ordering Information

General Information

Additional information on DC Power Systems can be found on the SIO 3rd Party Drop Ship wiki at <http://compass.mot-solutions.com/web/3rdpartydropship>.

DC POWER, BATTERIES AND GENERATORS

Motorola supplies DC power systems, batteries, and generators through leading technology third party suppliers.

DC Power System Preferred Suppliers include Eltek, Alpha Technologies, and Weldy Lamont (Distributor for La Marche)

The National Site Design and Integration Team (NSDIT) can provide information on site design and MSI R56 standards compliance (click here for [NSDIT contacts](#)).

To request a DC Power System quote, please complete this [form](#) and email it to Tim Shevlin at timothy.shevlin@motorolasolutions.com.

Configuration

DC Power Systems

Motorola supplies DC Power Systems through leading technology third party suppliers. Power Suppliers include Eltek, Alpha Technologies, and Weldy Lamont

The National Site Design and Integration Team (NSDIT) can provide information on site design and MSI R56 standards compliance (click here for [NSDIT contacts](#)).

To request a custom Power Systems quote, please contact our preferred suppliers Eltek, Alpha Technologies, and Weldy Lamont

[DEVICE MANAGEMENT SERVICE PACKAGES AND INFORMATION](#)

[LEGACY RADIO MANAGEMENT LICENSES](#)

[ORDERING INFORMATION](#)

[INCLUDED IN THE BASE MODEL](#)

Model: Device Management Service

Ordering Information

General Information

The Device Management Service (DMS) for the North America/ASTRO market is a package with options for some of the most desirable device features available such as APX radio programming, Radio Management database hosting, Device Preventive Maintenance and the MyView Portal dashboard. The DMSO package is designed to support a range of customer types from self-maintained to managed. To meet that need, package tiers have been created along a service continuum with three steps called Essential, Advanced and Premier.

The Essential package is a baseline starting point - designed for customers who want to limit their service investment to Device warranty support. Advanced is ideal for customers who wish to remain self-maintained but want to receive the tools and training necessary to provision/program and maintain their devices. Premier is a managed service experience with a tailored 'concierge' approach to accept new tasks for completion and perform maintenance activities on the customer's behalf.

Benefits of Device Management Service

- Coverage for device maintenance & configuration
- Essential, Advanced, and Premier offers meeting customer needs from self-maintained to MSI-managed
- Better Management of Agency Costs
- The opportunity for an OPEX operating model to better meet agency budgets
- More robust radio inventory operations
- Remote hosting & MyView Portal provide radio inventory repository with attributes and radio status

Device Management Service Packages and Information

Device Management is offered as a subscription and pricing will be different for a Current Radio Management Customer who is Transitioning to DMS vs a New Customer. Pricing is per device per year unless otherwise noted

THE DMS Configurator is now available on Converge

[DMS Quote configurator](#)

Legacy Radio Management Licenses

As of January 2019, Legacy Radio Management (Cap Ex) licenses are no longer orderable for new Radio Management Customers, The Legacy Radio Management Catalog page references Licenses but these are only for add-ons for existing Radio Management Customers who are not transitioning to DMS and have invested beyond the 100 free trial licenses originally provided with DMS.

Please reference the APX Radio Management Page for add-on Radio Management Licenses.

[APX Radio Management](#)

Ordering Information

Advanced Package:

With this package the customer will have a “do it yourself with MSI support” approach will be employed for fulfilment. MSI will provide a subscription to the Radio Management Programming Tool and the customer will then self-maintain their codeplugs/fleetmaps (including any associated jobs) and contact the SSC for failure of the Programming Tool. In order to facilitate a stronger user experience, Motorola also offers three options which can be added to the Standard Base of the Advanced Package.

- Advanced is now a base STANDARD offer with three optional adders
- Pricing is offered in one-year increments (except Hardware Repair offered in 3yr)
- Note that pricing differs for Current RM and Non-RM Customers
- Option 1 is offered as a one-time charge per unit and it requires a 500-unit minimum order quantity
- Option 3 pricing is standard Hardware Repair Warranty in Lite or Comprehensive versions
- Option 3 is priced for a 3yr standard term where the rest of the offer is 1yr term
- No additional network consulting or radio template creation work is included with this offer

DMS-Advanced APX Portables or Mobiles: Current RM Customer

Description	Model	APC	List Price-One time charge	List Price Per Year Per Device
Base Model: Includes Radio Management licensing & Tech Support	LSV01S01034A	700		\$10.00
OPTION 1: Includes Onsite Setup, 2-day Radio Commissioning and Training (500-unit minimum)	LSV01S01030A	700	\$40.00	
OPTION 2: Radio Management MSI Database				

Hosting and MyView Portal	LSV01S01033A	700		\$5.00
OPTION 3a: Hardware Repair (SFS Lite) - 3yr	See next sheet	700	\$110.00	
OPTION 3b: Hardware Repair (SFS Comprehensive) - 3yr	See next sheet	700	\$310.00	

DMS-Advanced APX Portables or Mobiles: New RM Customer

Description	Model	APC	List Price- One time charge	List Price Per Year Per Device
BASE MODEL: Includes Radio Management licensing & Tech Support	LSV01S01034A	700		\$32.00
OPTION 1: Includes Onsite Setup, 2-day Radio Commissioning and Training (500-unit minimum)	LSV01S01030A	700	\$60.00	
OPTION 2: Radio Management NOC-based Database Hosting and MyView Portal	LSV01S01033A	700		\$13.00
OPTION 3a: Hardware Repair (SFS Lite) - 3yr	See next sheet	700	\$110.00	
OPTION 3b: Hardware Repair (SFS Comprehensive) - 3yr	See next sheet	700	\$310.00	

DMS-FAST TRACK Advanced APX Portables or Mobiles: New RM Customer

This package only applies to new RM customers and is only valid for customers who want the Base Model Package only ; Options 1 and 2 are incompatible.

It is a paid in full 5 year non serialized alternative. Non serialized means serial number collection is not required prior to obtaining licenses.

This package can be placed through COF or MOL and does not require the standard SAOF form.

- **5 year on prem RM licenses**
- **Does not support hosted RM service or on site set up and training options**
- **Invoiced upfront for the 5 years and a standard duration of 5 years.**
- **No serial number collection/no contract**
- **COF or MOL Order, Ordering done Outside NSS; no SAOF required**
- **Only available on Advanced DMS**

Note: Both Model Numbers below MUST be on the order

HKVN4691A WILL ALWAYS BE QUANTITY OF 1

HKVN4692A WILL BE QUANTITY OF DEVICES

Description	Model	APC	List Price- One time charge	List Price Per Year Per Device
5YR PREPAID DMS ADVANCE APX RM SUBSCRIPTION	HKVN4691A	700	\$0	
5YR PREPAID DMS ADVANCE APX RM LICENSE	HKVN4692A	700		\$160.00

Hardware for Advanced Packages:

Hardware for Advanced Packages are not part of the DMS offer. There is a list of hardware specifications in RM System Planner. Sales/CSM's can quote hardware listed and order via a standard drop ship order, or obtain specifications and work with the hardware vendor directly.

Premier Package:

With this package , a “concierge service” approach will be employed for fulfilment with the customer and their supporting partner shop. MSI will perform initial consultation with customer to understand the initial state of the customer’s current codeplugs and make a plan to read/write each radio into the Radio Management Tool. MSI will then perform commissioning of the radio management database, customer site deployment of remote radio programming equipment and provisioning/programming of entire radio fleet. Training will be made available to customers (or their service shop as proxy) in the amount of 3 class seats per each 500-unit DMS purchase. Motorola Data Center Operation will maintain existing customer codeplugs, accepting requests for adds/deletes/modifications to codeplugs/templates in the quantity of 12 tasks per year (with additional tasks available for purchase as required by customer).

- Premier is offered as a 3yr program, expandable to 5 or more
- Minimum order quantity for DMSO-Premier is 500 units
- No additional network consulting or initial radio template creation work is included with this offer

Included in the Base Model

- Radio Management Programming License per Radio
- Onsite Setup & Commissioning of Radios and On-Premise Hardware
- Technical Support for Radio Hardware & Software
- Essential Services (SFS) - Comprehensive 3yr
- Radio Management User Database Hosting at NOC
- Radio Management Training Course Seats (3 per every 500 subscriptions)

- On-Demand Radio Provisioning & Programming - 12 tasks/yr standard
- Annual Radio Preventive Maintenance - 25% of fleet/yr standard
- MyView Portal Dashboard

DMS-Premier APX Portables or Mobiles

Description	Model	APC	List Price- per device per month	List Price Per device Per year
BASE MODEL: Premier 3 yr See above for inclusions	MSV01S00843A	700	\$24.00	\$864.00

JUMP TO ...[DEVICE MANAGEMENT SERVICE OFFER](#)[EXECUTIVE SUMMARY](#)[ADDITIONAL DOCUMENTATION](#)[SERVICE OFFER DESCRIPTION](#)[SERVICE OFFER PART NUMBERS, PRICING AND CONFIGURATION](#)

Device Management Service Offer

Executive Summary

The Device Management Service Offer (or DMSO) for North America Market and APX Radios is new to our Services category and available for sale in 2Q2017 via Direct Sale and MR Sale. It features Essential, Advanced and Premier packages of some of our most popular device service features plus some new and innovative ones that will help us reach the needs of more customers. Each of the packages is additive, meaning that Advanced includes everything from Essential and Premier includes everything from Advanced and Essential. DMSO may be sold with existing 4000-8000 series APX radios or in sale with new radios.

Additional Documentation

Additional information on the Device Management Service Offer may be found at www.motorolasolutions.com/sales, select Services and then Devices. Included at this site are a Sales Planning Guide, Product Description, FAQ, Price Configuration Matrix, Presentations and other materials to assist you in the learning and selling processes.

Service Offer Description

DMSO is available in a 3-year or 5-year term and can be sold via a monthly OpEx model or bulk CapEx model. Current Service-from-the-Start or Radio Management customers may join a DMSO package and will receive full remaining value for their previous investment (for more, please see the Current Customer Transition Plan section). Below you will find a descriptive diagram of Essential, Advanced and Premier offerings for DMSO, followed by a description of each:

Essential	Advanced	Premier
Extended Warranty Support (formally SFS-Lite or Comp)	Radio Mgt Software License per Radio	Radio Mgt Software License per Radio
Technical Support	Radio Mgt Training	Radio Mgt Training
	Radio Mgt User Database	Radio Mgt User Database

	Hosting	Hosting
	Technical Support	NOC Concierge Technical Support
	My View Portal (available 24x7)	Premier My View Portal (available 24x7)
	DMSO-Essential (formally SFS-Lite or Comp)	On-Demand Provisioning & Programming
		Preventive Maintenance per Radio
		DMSO-Essential (formally SFS-Comp)

DMSO Essential

This is the base offer, and rebrands the Service from the Start extended warranty program.

Simplicity is the goal here, introducing Essential as a direct transition without the addition of any other features. The remaining value of any current customer Service from the Start investments will be transferred directly into the Essential, Advanced or Premier packages they choose. Essential is recommended for existing Service from the Start customers as well as those who prefer to remain primarily self-maintained.

DMSO Advanced

This offer is one step up from Essential and recommended for customers who are currently self-maintained and prefer to remain so. The baseline of what's included in the Advanced package is everything from Essential, i.e. Hardware Extended Warranty Support. Additional features include Radio Management licenses and user training, Radio Management user database hosting, tech support and the advanced version of the MyView Portal. Advanced is primarily recommended for self-maintained customers or those who receive regular and significant support from a service partner. Once again, current customer investments in Service from the Start or Radio Management will be transferred directly into the Essential, Advanced or Premier packages they choose.

DMSO Premier

Premier is our highest tier Device Management offer, providing a 'concierge-like' experience for customers who wish to leave the management of their radio fleets to us. DMSO-Premier includes everything from Advanced plus an on-demand radio programming service, annual radio preventive maintenance, concierge-level tech support and a premier version of the MyView Portal. Premier Services are recommended for customers who want to have someone else take responsibility for the management of the radios in their inventory. Once again, current customer investments in Service from the Start or Radio Management will be transferred directly into the Essential, Advanced or Premier packages they choose.

Service Offer Part Numbers, Pricing and Configuration

DEVICE MANAGEMENT SERVICE OFFER PART NUMBERS & PRICING

Part numbers and Pricing for DMSO-Essential (formerly SfS) configurations can be found on the APX radio pages and are rebranded as DMSO-Essential. Parts and Pricing for Advanced and Premier versions can be found in the matrix below:

Public Safety LTE Device Manager 'DM'

Ordering Information

General Information

Motorola's Public Safety LTE Device Manager is no longer available for new deployments. The ordering instructions below are applicable only to existing deployments.

For new LTE deployments requiring a Device Manager solution, the recommended solution is VMware's Workspace ONE (formerly branded as Airwatch). LTE Infrastructure will not productize the Workspace ONE solution; but product management can provide product information, cost structure, and recommended pricing. Regions will need to procure, deploy, and support new Device Manager solutions within the region. Please contact product management for more details at LTEWS1@motorolasolutions.com.

Detailed Ordering Information

If you already have a DMS and capacity expansion is needed, then order expansion packs under T8058A. Please ensure that the total UE licenses after expansion is limited to 100K.

CA03233AA: ADD: 1K to 5K CLIENT UPGRD

CA03234AA: ADD: 5K to 10K CLIENT UPGRD

CA03235AA: ADD: 10K to 25K CLIENT UPGRD

CA03236AA: ADD: 25K to 50K CLIENT UPGRD

CA03237AA: ADD: 50K to 100K CLIENT UPGRD

For example, if expansion is required from 1K to 10K UEs, then order both CA03233AA (first 5K) and CA03234AA (second 5K).

For expansions to an existing redundant node, order T8058A (Expansion Packs), THEN select the expansion client license tier(s):

CA03233AA: ADD: 1K TO 5K CLIENT EXPANSION

CA03234AA: ADD: 5K TO 10K CLIENT EXPANSION

CA03235AA: ADD: 10K TO 25K CLIENT EXPANSION

CA03236AA: ADD: 25K TO 50K CLIENT EXPANSION

CA03237AA: ADD: 50K TO 100K CLIENT EXPANSION

To UPGRADE to BSR 4.3, order CVN7263A. The upgrade kit includes the DM software (no licenses).

Diameter Routing Agent (DRA)

Ordering Information

General Information and Features

The Diameter Routing Agent (DRA) is the key network component to secure and centralize Diameter communication with other roaming partners and to increase the operational efficiency and reliability of the internal Diameter signaling network. DRA is also needed in a geo-redundant core configuration for routing diameter traffic, in the event of a core element failure that has diameter interfaces.

RFC 6733 introduced Diameter agents to define distinguished roles, based on how the DRA should handle incoming messages. The four types of agents are relay agent, proxy agent, redirect agent and translation agent, although the DRA currently implements only relay agent and proxy agent.

DRA has three modes of operation, comprised in the same physical node: Diameter Agent (DA), Diameter Routing Agent, and Diameter Edge Agent. In general, DRA acts as a Diameter Agent (DA), routing messages between the clients and servers, where its peers are typically applications using the Diameter protocol or another DSC (Diameter Signaling Controller) in the path to the client or server. 3GPP has defined a new logical Diameter entity in the PCC (Policy and Charging Control) architecture. This is called Diameter Routing Agent (DRA). The LTE roaming guidelines (GSMA PRD IR.88) defines a logical Diameter entity called Diameter Edge Agent (DEA) to simplify the roaming interface.

The DRA provides the following functions:

Signaling aggregation through the Diameter Agent (DA)

- Remote peer connection
- Touring
- Network level load balancing
- Overload protection
- HSS Address resolution

LTE Roaming through the Diameter Edge Agent (DEA)

- Topology hiding
- Roaming relations
- Message screening

- Transit traffic management
- Diameter policing
- Diameter accounting and statistics

PCRF binding through the Diameter Routing Agent (DRA)

- Gx/Rx session binding
- PCRF selection
- Session verification

DSC capacity dimensioning will be determined by the following factors, but should be based on the call model of the specific customer:

- Number of interfaces that will connect to the DSC - S6a, Gx, Rx, Cx, Sh
- Number of subscribers for LTE/VoLTE
- Examples of EPS events for DSC dimensioning:
 - Total frequency of LTE attached per SAU/BH
 - Frequency of selective authentication
 - Frequency of Gx user reports per SAU/BH
 - Frequency of ULI reports per SAU/BH

For additional information, please see the product spec sheet at: http://compass.mot-solutions.com/doc/490040993/Product_SPEC_SHEET_DRA.pdf

Configuration

New System Ordering Guidelines

A new DRA system can be ordered as a package/bundle of both software and hardware. The DRA is licensed based upon the number of messages per second (MPS). MPS per system deployment can vary greatly, depending on system complexity and configuration. Before ordering the licenses below, please contact [GDSE and Product Management](#)

Please choose from one of the following options when ordering a new DRA system:

Description	Full Description	Nomenclature	APC	Price
DRA HW/SW 500 MPS	-	TT2795	054	\$160,550.00
DRA HW/SW 1K MPS	-	TT2796	054	\$177,540.00

DRA HW/SW 2.5K MPS	-	TT2797	054	\$228,500.00
DRA HW/SW 5K MPS	-	TT2798	054	\$312,670.00
DRA HW/SW 10K MPS	-	TT2799	054	\$476,930.00
DRA HW/SW 25K MPS	-	TT2800	054	\$932,110.00
DRA HW/SW 50K MPS	-	TT2801	054	\$1,564,770.00
DRA HW/SW 100K MPS	-	TT2802	054	\$2,862,600.00

Existing System Capacity Expansion Guidelines

When ordering a DRA user license capacity expansion for an existing system, please choose from one of the following options. Please note that capacity expansions can only occur as mentioned below. If the capacity expansion needs to span multiple steps, then all steps in between need to be accounted for. For example, if a capacity expansion is needed for 5K to 25K, then 5K to 10K and 10K to 25K needs to be accounted for.

Description	Full Description	Nomenclature	APC	Price
DRA HW/SW FROM 500 TO 1K	-	TT2803	054	\$27,200.00
DRA HW/SW FROM 1K TO 2.5K	-	TT2804	054	\$66,250.00
DRA HW/SW FROM 2.5K TO 5K	-	TT2805	054	\$103,530.00
DRA HW/SW FROM 5K TO 10K	-	TT2806	054	\$197,110.00

Futurecom Systems Group, ULC is committed to offering quality products and service and greatly appreciates your continued business and support.

NEW DECEMBER 2, 2019:

Please note, orders cannot be on hold indefinitely on FUTURECOM SYSTEMS. If required information (supplemental form) is not received within 60 days of the PO receipt date, the PO will be cancelled from Futurecom's system.

Futurecom's production queue has reached capacity to ship orders in Q4 2019. All new orders will be scheduled with the best possible ship date in Q1 2020, based on material availability and production capacity at the time of an order. The standard delivery lead time for all Futurecom products (DVR, VRX1000, PDR8000, SLIM) is 10-12 weeks.

NEW May 29, 2019: All new DVRS orders must be purchased with an APX interface option (TT05715AA, TT05716AA or TT06279AA).

If XTL interface is required, this order code DQDVR2012 must be ordered.

If a unit has been downgraded from APX to XTL, and the Customer would like to revert back to APX, they will need purchase DDN1715A.

The APX mobile platform is now fully certified for integration with the DVR. Please note the new ordering options required to distinguish APX from XTL applications.

When operating in system mode, the DVR utilizes a special interface between its host mobile in the following configurations:

XTL

- Remote Mount XTL 5000 with O3 or O5 control heads
- Remote Mount XTL 2500 with M5 control head
- If any ASTRO digital functionality will be used end-to-end, the mobiles will require the G806 option (ASTRO operation). This option is not required if operating in analog-only mode.

APX

- Remote Mount APX 6500 or APX 7500 with O2, O3, O5, O7, or O9 control heads
- Transportable configurations are not available for use with O9 control heads
- APX mobiles must be configured with the DVR MSU Activation option GA00631 when used as the host for the DVR.

General Ordering Information:

- One mobile Operation Mode options is required for all In-Band and Cross-Band DVR models (but not for Tactical DVRs which do not utilize a mobile)
- Subscriber units must be loaded with the most current version of software to enable all DVR features.
- APX Portable Radios operating through a DVR utilizing the enhanced DVR digital feature set, require subscriber option QA00631. No special option is required for XTS Portable Radios.
- The DVR programming software (called Tweaker) is compatible with Windows 2000, XP, and Windows 7. Vista has not been certified.
- Standard lead time for this product is approximately 10 weeks upon approved orders - See ordering requirements below.
- Vehicular Mount (Side-by-Side) units can be ordered with the DVR-to-Mobile cable from 3-25 ft in length. Please specify this value in the order entry process.
- Due to FCC regulations, Fixed Mount DVRs operating in the 806-809 / 851-854MHz range in the US and Canada require a mandatory High Stability Oscillator - item DQDVR1017. Fixed Mount DVRs operating from 809-816 / 854-861MHz do NOT require this extra option.
- High power VHF mobile radios - M20KTS9PW1 (XTL5000), M21KTM9PW1 (XTL2500), M25KTS9PW1 (APX6500), M30KTS9PW1 (APX7500) - are NOT compatible with Transportable or Fixed Mount DVR models.

For questions regarding appropriate DVR equipment lists or verifying frequency plans, you may contact Futurecom Systems Group directly at: sales@futurecom.com or 1-800-701-9180 (ask for DVR Sales Support)

The Ordering Guide link above gives a pictorial view of how the DVR needs to be isolated from the accompanying mobile. To prevent interference between the two devices, a certain amount of frequency separation is required. In-Band DVR orders require a manual validation step by the vendor to verify that the frequency plan can be accommodated by the standard DVR models listed below.

IMPORTANT NOTE: To ensure that the DVR solution will function properly once fielded, all DVR orders must be validated

prior to manufacturing. The form linked below is required to complete this step in the sales process for all DVR orders, AND is required before any In-Band DVR model is released from E3 hold. [DVR Supplemental Frequency Information Form](#)

IMPORTANT NOTE: FUTURECOM DOES NOT HOLD INVENTORY, THERE ARE LEAD TIMES FOR THE SPECIFIC ITEMS, IF A SUPPLEMENTAL FORM HAS NOT BEEN FILLED OUT WITH FREQS REQUIREMENTS, THIS WILL IMPACT DELIVERY OF ORDERS. FUTURECOM WILL DO THEIR BEST TO EXPEDITE, BUT IN SOME CASES THE DELIVERY IS BASED ON THEIR SUPPLIER'S ABILITY TO DELIVER, ESPECIALLY IF IT IS A CUSTOM FILTER ORDER. PLEASE BE AWARE THAT FILTER MANUFACTURING AND HAND TUNING IS A LABOUR INTENSIVE PROCESS THAT WILL NOT BEGIN UNTIL THE EXACT FREQS. ARE KNOWN.

NOTE: For Delivery outside of US/Canada, please contact Futurecom for delivery schedule prior to placing order.

Repair Process: The repair process is to initiate a case with Futurecom. Futurecom will then contact the technical support team within Futurecom. Futurecom will require the serial numbers of the units, and a detailed description of the problem(s) reported. It is best if technical support at Futurecom speaks with the customer directly to assist with troubleshooting. After diagnostics, they will advise if an RMA needs to be issued. If so, Futurecom will send the RMA number and return documents to the customer.

Please visit Futurecom's website for support contact information:

Futurecom Systems Group, ULC is committed to offering quality products and service and greatly appreciates your continued business and support.

NEW DECEMBER 2, 2019:

Please note, orders cannot be on hold indefinitely on FUTURECOM SYSTEMS. If required information (supplemental form) is not received within 60 days of the PO receipt date, the PO will be cancelled from Futurecom's system.

Futurecom's production queue has reached capacity to ship orders in Q4 2019. All new orders will be scheduled with the best possible ship date in Q1 2020, based on material availability and production capacity at the time of an order. The standard delivery lead time for all Futurecom products (DVR, VRX1000, PDR8000, SLIM) is 10-12 weeks.

NEW May 29, 2019: All new DVRS orders must be purchased with an APX interface option (TT05715AA, TT05716AA or TT06279AA).

If XTL interface is required, this order code DQDVR2012 must be ordered.

If a unit has been downgraded from APX to XTL, and the Customer would like to revert back to APX, they will need purchase DDN1715A.

The APX mobile platform is now fully certified for integration with the DVR. Please note the new ordering options required to distinguish APX from XTL applications.

When operating in system mode, the DVR utilizes a special interface between its host mobile in the following configurations:

XTL

- Remote Mount XTL 5000 with O3 or O5 control heads
- Remote Mount XTL 2500 with M5 control head
- If any ASTRO digital functionality will be used end-to-end, the mobiles will require the G806 option (ASTRO operation). This option is not required if operating in analog-only mode.

APX

- Remote Mount APX 6500 or APX 7500 with O2, O3, O5, O7, or O9 control heads
- Transportable configurations are not available for use with O9 control heads
- APX mobiles must be configured with the DVR MSU Activation option GA00631 when used as the host for the DVR.

General Ordering Information:

- One mobile Operation Mode options is required for all In-Band and Cross-Band DVR models (but not for Tactical DVRs which do not utilize a mobile)
- Subscriber units must be loaded with the most current version of software to enable all DVR features.
- APX Portable Radios operating through a DVR utilizing the enhanced DVR digital feature set, require subscriber option QA00631. No special option is required for XTS Portable Radios.
- The DVR programming software (called Tweaker) is compatible with Windows 2000, XP, and Windows 7. Vista has not been certified.
- Standard lead time for this product is approximately 10 weeks upon approved orders - See ordering requirements below.
- Vehicular Mount (Side-by-Side) units can be ordered with the DVR-to-Mobile cable from 3-25 ft in length. Please specify this value in the order entry process.
- Due to FCC regulations, Fixed Mount DVRs operating in the 806-809 / 851-854MHz range in the US and Canada require a mandatory High Stability Oscillator - item DQDVR1017. Fixed Mount DVRs operating from 809-816 / 854-861MHz do NOT require this extra option.
- High power VHF mobile radios - M20KTS9PW1 (XTL5000), M21KTM9PW1 (XTL2500), M25KTS9PW1 (APX6500), M30KTS9PW1 (APX7500) - are NOT compatible with Transportable or Fixed Mount DVR models.

For questions regarding appropriate DVR equipment lists or verifying frequency plans, you may contact Futurecom Systems Group directly at: sales@futurecom.com or 1-800-701-9180 (ask for DVR Sales Support)

The Ordering Guide link above gives a pictorial view of how the DVR needs to be isolated from the accompanying mobile. To prevent interference between the two devices, a certain amount of frequency separation is required. In-Band DVR orders require a manual validation step by the vendor to verify that the frequency plan can be accommodated by the standard DVR models listed below.

IMPORTANT NOTE: To ensure that the DVR solution will function properly once fielded, all DVR orders must be validated prior to manufacturing. The form linked below is required to complete this step in the sales process for all DVR orders, AND is required before any In-Band DVR model is released from E3 hold. [DVR Supplemental Frequency Information Form](#)

IMPORTANT NOTE: FUTURECOM DOES NOT HOLD INVENTORY, THERE ARE LEAD TIMES FOR THE SPECIFIC ITEMS, IF A SUPPLEMENTAL FORM HAS NOT BEEN FILLED OUT WITH FREQS REQUIREMENTS, THIS WILL IMPACT DELIVERY OF ORDERS. FUTURECOM WILL DO THEIR BEST TO EXPEDITE, BUT IN SOME CASES THE DELIVERY IS BASED ON THEIR SUPPLIER'S ABILITY TO DELIVER, ESPECIALLY IF IT IS A CUSTOM FILTER ORDER. PLEASE BE AWARE THAT FILTER MANUFACTURING AND HAND TUNING IS A LABOUR INTENSIVE PROCESS THAT WILL NOT BEGIN UNTIL THE EXACT FREQS. ARE KNOWN.

NOTE: For Delivery outside of US/Canada, please contact Futurecom for delivery schedule prior to placing order.

Repair Process: The repair process is to initiate a case with Futurecom. Futurecom will then contact the technical support team within Futurecom. Futurecom will require the serial numbers of the units, and a detailed description of the problem(s) reported. It is best if technical support at Futurecom speaks with the customer directly to assist with troubleshooting. After diagnostics, they will advise if an RMA needs to be issued. If so, Futurecom will send the RMA number and return documents to the customer.

Please visit Futurecom's website for support contact information:

Futurecom Systems Group, ULC is committed to offering quality products and service and greatly appreciates your continued business and support.

NEW DECEMBER 2, 2019:

Please note, orders cannot be on hold indefinitely on FUTURECOM SYSTEMS. If required information (supplemental form) is not received within 60 days of the PO receipt date, the PO will be cancelled from Futurecom's system.

Futurecom's production queue has reached capacity to ship orders in Q4 2019. All new orders will be scheduled with the best possible ship date in Q1 2020, based on material availability and production capacity at the time of an order. The standard delivery lead time for all Futurecom products (DVR, VRX1000, PDR8000, SLIM) is 10-12 weeks.

NEW May 29, 2019: All new DVRS orders must be purchased with an APX interface option (TT05715AA, TT05716AA or TT06279AA).

If XTL interface is required, this order code DQDVR2012 must be ordered.

If a unit has been downgraded from APX to XTL, and the Customer would like to revert back to APX, they will need purchase DDN1715A.

The APX mobile platform is now fully certified for integration with the DVR. Please note the new ordering options required to distinguish APX from XTL applications.

When operating in system mode, the DVR utilizes a special interface between its host mobile in the following configurations:

XTL

- Remote Mount XTL 5000 with O3 or O5 control heads
- Remote Mount XTL 2500 with M5 control head
- If any ASTRO digital functionality will be used end-to-end, the mobiles will require the G806 option (ASTRO operation). This option is not required if operating in analog-only mode.

APX

- Remote Mount APX 6500 or APX 7500 with O2, O3, O5, O7, or O9 control heads
- Transportable configurations are not available for use with O9 control heads
- APX mobiles must be configured with the DVR MSU Activation option GA00631 when used as the host for the DVR.

General Ordering Information:

- One mobile Operation Mode options is required for all In-Band and Cross-Band DVR models (but not for Tactical DVRs which do not utilize a mobile)
- Subscriber units must be loaded with the most current version of software to enable all DVR features.
- APX Portable Radios operating through a DVR utilizing the enhanced DVR digital feature set, require subscriber option QA00631. No special option is required for XTS Portable Radios.
- The DVR programming software (called Tweaker) is compatible with Windows 2000, XP, and Windows 7. Vista has not been certified.
- Standard lead time for this product is approximately 10 weeks upon approved orders - See ordering requirements below.
- Vehicular Mount (Side-by-Side) units can be ordered with the DVR-to-Mobile cable from 3-25 ft in length. Please specify this value in the order entry process.
- Due to FCC regulations, Fixed Mount DVRs operating in the 806-809 / 851-854MHz range in the US and Canada require a mandatory High Stability Oscillator - item DQDVR1017. Fixed Mount DVRs operating from 809-816 / 854-861MHz do NOT require this extra option.
- High power VHF mobile radios - M20KTS9PW1 (XTL5000), M21KTM9PW1 (XTL2500), M25KTS9PW1 (APX6500), M30KTS9PW1 (APX7500) - are NOT compatible with Transportable or Fixed Mount DVR models.

For questions regarding appropriate DVR equipment lists or verifying frequency plans, you may contact Futurecom Systems Group directly at: sales@futurecom.com or 1-800-701-9180 (ask for DVR Sales Support)

The Ordering Guide link above gives a pictorial view of how the DVR needs to be isolated from the accompanying mobile. To prevent interference between the two devices, a certain amount of frequency separation is required. In-Band DVR orders require a manual validation step by the vendor to verify that the frequency plan can be accommodated by the standard DVR models listed below.

IMPORTANT NOTE: To ensure that the DVR solution will function properly once fielded, all DVR orders must be validated prior to manufacturing. The form linked below is required to complete this step in the sales process for all DVR orders,

AND is required before any In-Band DVR model is released from E3 hold. [DVR Supplemental Frequency Information Form](#)

IMPORTANT NOTE: FUTURECOM DOES NOT HOLD INVENTORY, THERE ARE LEAD TIMES FOR THE SPECIFIC ITEMS, IF A SUPPLEMENTAL FORM HAS NOT BEEN FILLED OUT WITH FREQS REQUIREMENTS, THIS WILL IMPACT DELIVERY OF ORDERS. FUTURECOM WILL DO THEIR BEST TO EXPEDITE, BUT IN SOME CASES THE DELIVERY IS BASED ON THEIR SUPPLIER'S ABILITY TO DELIVER, ESPECIALLY IF IT IS A CUSTOM FILTER ORDER. PLEASE BE AWARE THAT FILTER MANUFACTURING AND HAND TUNING IS A LABOUR INTENSIVE PROCESS THAT WILL NOT BEGIN UNTIL THE EXACT FREQS. ARE KNOWN.

NOTE: For Delivery outside of US/Canada, please contact Futurecom for delivery schedule prior to placing order.

Repair Process: The repair process is to initiate a case with Futurecom. Futurecom will then contact the technical support team within Futurecom. Futurecom will require the serial numbers of the units, and a detailed description of the problem(s) reported. It is best if technical support at Futurecom speaks with the customer directly to assist with troubleshooting. After diagnostics, they will advise if an RMA needs to be issued. If so, Futurecom will send the RMA number and return documents to the customer.

Please visit Futurecom's website for support contact information:

Futurecom Systems Group, ULC is committed to offering quality products and service and greatly appreciates your continued business and support.

NEW DECEMBER 2, 2019:

Please note, orders cannot be on hold indefinitely on FUTURECOM SYSTEMS. If required information (supplemental form) is not received within 60 days of the PO receipt date, the PO will be cancelled from Futurecom's system.

Futurecom's production queue has reached capacity to ship orders in Q4 2019. All new orders will be scheduled with the best possible ship date in Q1 2020, based on material availability and production capacity at the time of an order. The standard delivery lead time for all Futurecom products (DVR, VRX1000, PDR8000, SLIM) is 10-12 weeks.

NEW May 29, 2019: All new DVRS orders must be purchased with an APX interface option: (TT05715AA, TT05716AA or TT06279AA). If XTL interface is required, this order code DQDVR2012 must be ordered. If a unit has been downgraded from APX to XTL, and the Customer would like to revert back to APX, they will need purchase DDN1715A.

The APX mobile platform is now fully certified for integration with the DVR. Please note the new ordering options required to distinguish APX from XTL applications.

When operating in system mode, the DVR utilizes a special interface between its host mobile in the following configurations:

XTL

- Remote Mount XTL 5000 with O3 or O5 control heads
- Remote Mount XTL 2500 with M5 control head
- If any ASTRO digital functionality will be used end-to-end, the mobiles will require the G806 option (ASTRO operation). This option is not required if operating in analog-only mode.

APX

- Remote Mount APX 6500 or APX 7500 with O2, O3, O5, O7, or O9 control heads
- Transportable configurations are not available for use with O9 control heads
- APX mobiles must be configured with the DVR MSU Activation option GA00631 when used as the host for the DVR.

General Ordering Information:

- One mobile Operation Mode options is required for all In-Band and Cross-Band DVR models (but not for Tactical DVRs which do not utilize a mobile)
- Subscriber units must be loaded with the most current version of software to enable all DVR features.
- APX Portable Radios operating through a DVR utilizing the enhanced DVR digital feature set, require subscriber option QA00631. No special option is required for XTS Portable Radios.
- The DVR programming software (called Tweaker) is compatible with Windows 2000, XP, and Windows 7. Vista has not been certified.
- Standard lead time for this product is approximately 10 weeks upon approved orders - See ordering requirements below.
- Vehicular Mount (Side-by-Side) units can be ordered with the DVR-to-Mobile cable from 3-25 ft in length. Please specify this value in the order entry process.
- Due to FCC regulations, Fixed Mount DVRs operating in the 806-809 / 851-854MHz range in the US and Canada require a mandatory High Stability Oscillator - item DQDVR1017. Fixed Mount DVRs operating from 809-816 / 854-861MHz do NOT require this extra option.
- High power VHF mobile radios - M20KTS9PW1 (XTL5000), M21KTM9PW1 (XTL2500), M25KTS9PW1 (APX6500), M30KTS9PW1 (APX7500) - are NOT compatible with Transportable or Fixed Mount DVR models.

For questions regarding appropriate DVR equipment lists or verifying frequency plans, you may contact Futurecom Systems Group directly at: sales@futurecom.com or 1-800-701-9180 (ask for DVR Sales Support)

The Ordering Guide link above gives a pictorial view of how the DVR needs to be isolated from the accompanying mobile. To prevent interference between the two devices, a certain amount of frequency separation is required. In-Band DVR orders require a manual validation step by the vendor to verify that the frequency plan can be accommodated by the standard DVR models listed below.

IMPORTANT NOTE: To ensure that the DVR solution will function properly once fielded, all DVR orders must be validated prior to manufacturing. The form linked below is required to complete this step in the sales process for all DVR orders, AND is required before any In-Band DVR model is released from E3 hold. [DVR Supplemental Frequency Information](#)

Form

IMPORTANT NOTE: FUTURECOM DOES NOT HOLD INVENTORY, THERE ARE LEAD TIMES FOR THE SPECIFIC ITEMS, IF A SUPPLEMENTAL FORM HAS NOT BEEN FILLED OUT WITH FREQS REQUIREMENTS, THIS WILL IMPACT DELIVERY OF ORDERS. FUTURECOM WILL DO THEIR BEST TO EXPEDITE, BUT IN SOME CASES THE DELIVERY IS BASED ON THEIR SUPPLIER'S ABILITY TO DELIVER, ESPECIALLY IF IT IS A CUSTOM FILTER ORDER. PLEASE BE AWARE THAT FILTER MANUFACTURING AND HAND TUNING IS A LABOUR INTENSIVE PROCESS THAT WILL NOT BEGIN UNTIL THE EXACT FREQS. ARE KNOWN.

NOTE: For Delivery outside of US/Canada, please contact Futurecom for delivery schedule prior to placing order.

Repair Process: The repair process is to initiate a case with Futurecom. Futurecom will then contact the technical support team within Futurecom. Futurecom will require the serial numbers of the units, and a detailed description of the problem(s) reported. It is best if technical support at Futurecom speaks with the customer directly to assist with troubleshooting. After diagnostics, they will advise if an RMA needs to be issued. If so, Futurecom will send the RMA number and return documents to the customer.

Please visit Futurecom's website for support contact information:

Dispatch Service

Ordering Information

General Information

With Motorola Dispatch Service, all a customer has to do is make one phone call and their system response and restoration process begins immediately. Dispatch ensures that local, trained and qualified technicians will arrive at their location within hours to diagnose and restore their communications network. Following proven response and restoration processes, Motorola Dispatch contacts the local authorized service center in their area and dispatches a qualified technician to their site. An automated escalation process ensures that technician site arrival and system restoration comply with contracted response and restore times. Once the issue has been addressed, the System Support Center verifies resolution and with the customer's approval, closes the case. Activity records are also available to provide a comprehensive history of site performance, issues, and resolution.

Features

- Escalation Management
- 24 Hour/365 Day Service Availability
- Single Point of Contact
- Toll Free Service Number (800) 221-7144
- Activity Reporting
- Computer Aided Dispatch
- Electronic Case Tracking

Statement of Work

One of the primary business objectives of the North American Group (NAG) is to promote the sales of STANDARD service products. Standards help to ensure consistent and profitable delivery of our service products to our customers. To that end, the customer Statement of Work for this Standard Service Product **CANNOT** be modified. All requests for modifications to STANDARD service products or the development of "custom" service products should be routed through the Solutions Planning process. Your first point of contact for these requests is your local Area Service Manager.

Definitions

Capitalized terms used in this Statement of Work and not otherwise defined within the Statement of Work or Communications System Agreement have the following meanings: [Click here](#)

Statement of Work

Dispatch and OnSite Infrastructure Response Service SOW can be found on the following page:

Ordering Requirements

1. **This product cannot be ordered directly through COF at this time.** This product must be ordered using the Services Lifecycle (SLC) contract system. Please contact your local Area Service Manager (ASM) or Customer Support Manager (CSM) if you are interested in ordering this product.
2. Options for this product are based on the component parts of the complete system. Pricing is based on the size and complexity of the customer's system configuration such as the type of system, number of sites and number of base stations. **To ensure accurate pricing, orders will not be processed or accepted if they do not include all system components.**
3. Enter the main line item as quantity one.
4. Options are required as sub-items, with the quantity equal to the option description.
5. All dollar amounts reflect an annual one year pricing.
6. Dispatch Service requires the purchase of one of the OnSite Infrastructure Response options (Regular, Limited, Premier).
7. Dispatch Service is required if purchasing Network Monitoring Service and customer is Motorola maintained. See below.

	Network Monitoring Service	Technical Support	Dispatch Service	Customer Technician Dispatch	OnSite Infrastructure Response
Motorola Maintained	Required	Not Required	Required	N/A	Required
Customer Maintained (COAM)	Required	Suggested	N/A	Required	N/A

8. A Customer Support Plan must be created to provide detailed information to the customer regarding delivery of this service

General Information

Distributors

Motorola utilizes distributors to fill gaps in the drop ship portfolio when there is no direct relationship with the supplier.

Benefits of Utilizing a Distributor

- Enables Motorola to offer a variety of products from a wide supplier base
- Added technical and engineering support
- Ability to efficiently respond to emergency product requirements
- Multiple locations around the country allow for quick delivery
- Distributors Have the Logistics in Place to Pick, Pack and Ship the Volume of Orders Individual End Users Could Generate

Preferred Distributors

[Black Box](#)

[Graybar](#)

[SHI](#)

[Tessco](#)

How to obtain a quote

1. If you know the distributor's part number, use the [Part Number Lookup Tool](#) to verify if the item is already setup and available
2. If the part is not setup, provide the product planner with the supplier and vendor part number
3. The product planner will obtain a quote from the distributor
4. The product planner will get the costs approved by procurement
5. Once approved, the product planner will provide a Motorola List Price
6. If you want to purchase, the planner will setup the Motorola part number to order

Please refer to the [SIO Drop Ship Contact List](#) for product planner contact information.

SOFTWARE-BASED, DUAL INSTANT RECALL RECORDER

Ordering Information

General Information

PLEASE NOTE: The Standard Support Period for the 7.11 Release ended on June 30, 2017. Any software and hardware expansions on this release will no longer be supported after this date.

Click [here](#) for additional information.

The Dual Instant Recall Recorder (IRR) software (CD format) allows users to record two channels, radio, telephone, radio **and** telephone conversations, digitally on a personal computer (the software can also be configured to operate as a single channel IRR). The system uses an individual PC where the recording files are stored on the PC's hard drive. The Instant Recall Recorder keeps a database of all recordings, which allows for convenient "point and click" search and playback of any recordings. Once the software is installed on your PC, the functions are controlled through a Graphical User Interface (GUI) icon.

In addition, the Instant Retrieval Recorder has numerous special features; such as the ability to attach text documents to recordings, a security system, multiple playback (which allows the user to playback more than one recording at the same time), and real time audio monitor (which allows the user to listen to the last ten minutes of a recording in progress without being required to stop recording to be able to listen).

The Instant Retrieval window allows the user to immediately access the recordings. The Instant Retrieval window initially opens on the newest recordings, but allows access to any recordings on the system. The recording can also be saved to the .WAV file that the user specifies. This is useful if the user wants to save a specific recording to a CD or hard disk.

The product ships standard with a USB version HASP Key.

Configuration

Ordering Requirements

Ordering Instructions:

1. Motorola does not guarantee compatibility or performance of this software if it is not run on a Motorola certified PC.
2. To operate in the dual mode, a customer must have 2 **different** sound cards. When used on a workstation, one additional sound card is required as the on-board sound card is also used. On servers used as an "Op" position, two sound cards are required. DDN1895 is not compatible with the Z440 workstation - order DDN2134.
When using a Z2 Mini, you must order DSICUSBAUDIO7D.
3. Only ONE (1) Software-Based Dual Instant Recall Recorder can be ordered per workstation.
4. One Operation/Installation manual softcopy is included with each Instant Recall Recorder CD ordered.
5. Can **not** have more than TWO (2) Channels **per** workstation. (One Software-Based, Dual Instant Recall Recorder per PC).
6. **Important:** The HASP protection key is very expensive to replace. Ensure that the customer is aware and that they take care not to misplace it.
7. If IRR is being used on Z400 workstations (or any workstation where only PCI-E card slots are available), then the PCI-E card is required.
8. IRR -48 version is for use with Windows 10 (A7.17 release) - see below for specific MIP 5000 / MCC 5500 release compatibility.

Upgrades:

1. If the customer upgrades their system and requires a **newer version of IRR software**, this can be obtained from Vito Giuliano in UOST. The free upgrade is only available if the IRR has been purchased within the last 12 months. If the IRR software was purchased more than one year ago then the appropriate upgrade (DDN7994, DDN9655, DDN1243, etc.) must be ordered.

Instant Recall Recorder For Use On MIP 5000 Release 4.3 or later, MCC 5500 Release (TBD) or later, MCC 7500 A7.17 or later systems.

Individual Items:

Description	Full Description	Nomenclature	APC	Price
TELEPHONE ADAPTER	Used with most telephone styles, provides a simple means of connecting your Computer Sound Card so that it can monitor both sides of all conversations that take place on the handset or headset of your telephone. Automatically starts recorder when handset is lifted.	DDN6489	229	\$242.00
CABLE FOR TELEPHONE ADAPTER	Cable - RJ-11 to 1/8 in. mini plug. Allows connection from the Telephone Adapter to the PC.	DDN6490	229	\$85.00
HOOK SWITCH CABLE FOR MIDI PORT	Used to send a signal that triggers the Instant Recall Recorder software to start recording when off hook condition is detected. The MIDI cable is used to link your computer to your radio equipment, through the MIDI port (Joystick) of your Sound Blaster Sound Card.	DDN6491	229	\$92.00

HOOK SWITCH CABLE FOR COM PORT	Used to send a signal that triggers the IRR software to start recording when off hook condition is detected. The COM port cable is used to link your computer to your radio equipment, through one of the COM port located on every PC.	DDN6492	229	\$87.00
SOUND BLASTER AUDIGY FX PCIE SOUND CARD-NOT COMPAT WITH Z2 MINI	For use with Z440 and Z420 PC's.	DDN2134	229	\$67.00
6FT STEREO AUDIO PATCH CABLE 3.5MM	-	DDN7279	229	\$33.00
PC DESKTOP SPEAKERS	Creative Lab speakers includes 110V AC power supply.	CDN6673	708	\$45.75
INSTANT RECALL RECORDER CABLE FOR MCC 7500	Cable for use with GPIOM/VPM using a RJ45 with a 3.5mm connector, 6 feet long.	DDN9649	229	\$95.00

ASTRO® Digital APX 4000™ Portable Series

700/800 MHz Band

P25 Phase 2 Single Band Capable Radio

Updates

Announcements:

Please Note: Effective January 16th, all quotes should include at minimum the 3 year Service from the Start Lite option.

Factory Mutual (FM) Certification will no longer be offered as of January 1, 2016.

MSI announced the cancellation of the FM approved battery options for the APX 4000 subscribers. Radios approved to the FM3610_88 standard can only be manufactured through the end of December 2015. This is an industry-wide mandate that affects all radio manufacturers.

The APX4000 FM battery options QA00582AF and QA00582AD are no longer available.

When ordering APX4000 with UL battery, make sure you choose the 2 knob option QA04865 and the UL battery Option QA00582AJ. Refer to the HAZLOC section down below for more details.

One Knob Configuration will no longer be offered as of July 1, 2016.

Effective February 2015, APX 4000 now ships standard with Radio Packet Data (Q/W947), Mission Critical Bluetooth (QA00583), and Software Key (QA01749).

Starting Q1 SER 2015, CPS will be available to purchase as either a Download-Only 3-Year Subscription (HKVN4289A, \$299) or DVD/Download 3-Year Subscription (RVN5224, \$399-One Subscription Per Customer Account). Order details below in CPS Information Section

Effective May 02, 2016, for user guides, manuals and other product information, please visit motorolasolutions.com and search for this product using the name or manual number. **To add a manual, please order H88.**

Effective February 22nd, 2016, the APX 4000 will ship standard with GPS Activation (QA00782). GPS requires Q947 (IV&D which already comes standard as well) to operate.

Effective February 22nd, 2016, APX 4000 Radio Sales Model Price will increase by \$150.

Ordering Information

[Ordering Guide](#)

Features

All ASTRO Digital APX 4000 models include the following features:

- Dual Microphone
- 0.5 Watt Rated Audio
- Integrated GPS Hardware Capable*
- Integrated Bluetooth Hardware Capable*
- 2" Belt Clip
- Lilon 1900 mAh Battery (NNTN8128)
- Antenna (Dependent on Frequency Band and Type)
- IP67 ships standard with every radio model
- 3 Programmable Side Buttons
- Orange Programmable Button
- Continuous rotary multifunction knob
- Low Battery Alert Tone
- Noise Cancellation Software
- Intelligent Lighting

ASTRO Digital APX 4000 Limited Keypad and Full Keypad also includes:

- Unified Call List
- Front Color Display: 2 lines of text, 2 lines of icon
- Radio Profiles
- Full Keypad: 4 x 3 alpha-numeric 3 programmable button, 4 way navigation, home and data buttons

*** Must purchase Software to ENABLE.**

All ASTRO Digital APX 4000 Portables are part of the FLASHport® program and ship

standard with a FLASH EE Prom, which allows for feature and system upgrades (contingent upon remaining within the current RF capabilities of the radio)

New RFID enabled volume knobs (QA04526) available for portable radios. See RFID Enabled Volume Knob section below for more information. See RFID Solution Partner link below for information on partners that can provide customers with scanner hardware and back end asset management solutions.

******NOTE: APX Portable and Mobile Radios ship standard with the Software Key (QA01749). The Hardware Key (QA01648) is available as an alternative option to purchase. The System ID is required to be entered as supplemental data when ordering the Hardware Key (QA01648). It is CRITICAL that the CORRECT SYSTEM ID is entered when placing the order as this will impact the radios' ability to operate on the intended system. If an incorrect System ID is entered, a FLASHport upgrade will be required in order to fix this error. The Master Key Start-Up Kit (DVN4046) is required to use the Hardware Key (QA01648) or to operate on a third-party trunking system if the customer does not already possess one, or if theirs has expired. Please [CLICK HERE](#) for further details regarding the DVN4046 Kit. Pavithra**

<http://ecat.comm.mot.com/ecat/pricebooks/dup/ASK.htm>

General Information

The ASTRO Digital APX 4000 Portable Line offers TWO different radio hardware models:

Hardware Model	Modes	Alphanumeric Display Lines/Characters	Keypad	Navigation Pad
ASTRO APX 4000 Limited Keypad	512	14 (front)	-	Yes
ASTRO APX 4000 Full Keypad	512	14 (front)	4 x 3	Yes

Operating Modes

ASTRO Digital APX 4000 Radio Models are capable of operating in four different voice communication modes:

- Normal Analog (clear voice)
- 3.6KB ASTRO Digital (both clear and coded voice)
- 9.6 KB ASTRO 25 Digital (both Clear and Coded voice)
- 9.6KB 12.5kHz 2 slot digital TDMA (both clear and coded voice)

TDMA

FDMA (Frequency Division Multiple Access) is a proven technology that is widely used today in radio systems and is part of APCO 25 Project 25 Phase 1 standard. FDMA carries one call per channel. TDMA (Time Division Multiple Access) will be part of P25 Phase 2 standard and provides double the voice capacity as 2 calls can share 1 channel. Customers can add

more users to their systems without the need of additional frequencies or infrastructure. The APX radios support both P25 Phase 1 and TDMA technologies seamlessly. Using Motorola's unique Dynamic Dual Mode (DDM) capability, the radios dynamically switch between FDMA and TDMA without the user having to change channels. This provides interoperability on demand with existing and future networks.

FLASHport AFTERMARKET UPGRADES

The ASTRO Digital APX 4000 Portable Series Radios are part of the FLASHport Program. This means that ASTRO Digital APX 4000 hardware models can be loaded with different software packages that provide the features and functionalities that our customers require.

System Enhancement Options can be loaded at the time of radio purchase or at a later date through the use of software field upgrades (a USB cable is required for all software upgrades.) The ASTRO Digital APX 4000 portable can be upgraded electronically in the field with new features in the current system or to new systems operation (contingent upon remaining within the same RF sub-band) by ordering upgrade kits.

Launching in early 2015, there will be a new way to upgrade radios in the field. The current method, which makes use of the FLASHport USB dongle, will be supported, but for those looking for a more convenient way, a new online method will be supported in Radio Management (RM). For more information, please refer to the APX 4000 FLASHport ECAT page

RADIO MANAGEMENT

Radio Management (RM) is a suite of software applications shipping with the APX Customer Programming Software (CPS) that provides the ability to manage your entire fleet of ASTRO APX radios through one central database.

Radio Management (RM) can help reduce fleet programming time and improve overall radio asset management. Radio Management allows:

- **Manage and track radio codeplugs through a central database**
- **Make changes to a shared codeplug template and push to multiple radios**
- **Manage and update radios without taking them out of service**
- **Schedule programming updates to radios ahead of time**

NOTE: Radio Management is available only with Customer Programming Software Release 7.12, version R08.02.00 and later and can only be used with ASTRO® Digital APX radios.

Ordering Requirements

Ordering procedure is as follows:

Steps	Required Options	Comments
1	APX 4000 700/800 MHz Main Model	APX Digital Portable Radio- a. H51UCF9PW6AN- APX 4000 700/800 MODEL 2 b. H51UCH9PW7AN- APX 4000 700/800 MODEL 3

2	Operation Mode	a. QA02756- ENH: 3600 OR 9600 TRUNKING BAUD SINGLE SYSTEM b. Q811- ENH: SOFTWARE P25 CONVENTIONAL c. QA02829- ANALOG CONVENTIONAL d. Q443- ENH: SOFTWARE ANALOG 3600 BAUD
3	System Enhancement (Optional)	a. G996- ADD: PROGRAMMING OVER P25 (OTAP) b. QA00580- ADD: TDMA OPERATION

1. Order the APX 4000 Portable Series as the main line item.

- Each hardware model MUST be ordered with one operation mode.
- Default battery is Lilon 1900mAh
- Default 2" belt clip
- Default Antenna is the single appropriate antenna for your RF configuration.

2. Select software package for radio.

- Note - APX Radio ships with 12 month standard warranty.

CHANNEL SPACING

There are no maximum frequency separation conditions that must be adhered to on the APX 4000 portable series. Separation of frequencies can be as wide as the allowable band per radio model with no degradation of any performance specifications. If an incorrect antenna is used, degraded performance may be experienced.

ZONED OPERATION

This option converts MODE-ONLY ASTRO Digital APX 4000 portables to Zone Operation radios.

For the Limited keypad and Full Keypad radios there is a maximum of 50 zones, with 512 channels per zone.

PROJECT 25 ENCRYPTION

The mode of operation is programmed on a channel-by-channel basis. With the coded/clear switch set to the clear mode, the ASTRO Digital APX4000 radio is capable of transmitting clear analog voice or clear (unencrypted) ASTRO Digital voice, depending on the channel programming. With the coded/clear switch set to the coded mode, the ASTRO Digital APX 4000 radio will transmit ASTRO Digital encryption depending on the channel programming. ASTRO Digital encryption provides secure communications. ASTRO Digital Encryption (operation in encrypted mode while also operation in 3.6KB or 9.6KB and TDMA ASTRO mode) is capable of XL type encryptions; ASTRO Digital Encryptions does not operate with non-XL encryptions.

An encryption option is not required for either clear analog operation or clear ASTRO Digital operation. Encryption can be ordered with the ASTRO Digital APX 4000 radio either as a factory installed option or separate from the radio for later field installation. ASTRO Digital APX 4000 radio functions include selected ASTRO digital signaling and digital speech coding.

When ordering any of the Encryption Algorithms:

- The AES encryption algorithms offered are compliant with digital Project 25 standards and does not support analog encryption operation.
- **Requires** the ASTRO Digital CAI (Q806) to operate the AES encryption.
- Encryption Algorithms can be ordered later via Flash Port.

FIPS 140-2 Compliance

Encryption Modules equipped with AES are FIPS 140-2 compliant. Details regarding the certification, and copies of the relevant certificates, can be obtained on the NIST website at: <http://csrc.nist.gov/groups/STM/cmvp/validation.html>.

Further information regarding FIPS 140-2 certification may be found using the following link - FIPS 140-2 Crypto Module Validation Program (CMVP) <http://csrc.nist.gov/groups/STM/cmvp/index.html>

HAZARDOUS LOCATION

FM

The APX4000 FM battery options QA00582AF and QA00582AD are not longer available for order after DECEMBER 31, 2015. The last ship date will be DECEMBER 31, 2015. This is an industry-wide mandate that affects all radio manufacturers.

UL

APX 4000 Portable Radio **WITH 2 Knob (option QA04865)** when properly equipped with **QA00582AJ or QA04934AA** is Underwriters Laboratory (UL/CSA) Approved. APX 4000 (Two-Knob) UL Approval certified to standards TIA4950. CAN/CSA C22.2 NO. 157-92. Div 1, Class I, Groups C, D, Class II groups E, F, G, Class III.

APX Series Hazloc Fact Sheet

ASTRO Advanced Messaging Solution (ASM)

The ASTRO 25 Advanced Messaging Solutions is the latest messaging platform from

Motorola Solutions and will replace ASTRO Text Messaging Service (TMS). As a complete end-to-end solution it leverages the core assets of ASTRO 25 IV&D/CID networks, ASTRO 25 radios, Integrated Command Center applications and Unified Network Services. The application allows responders to send/receive messages and run database queries from ASTRO 25 data enabled portable radios, extending real time information access to the field so dispatchers and first responders can be more efficient and achieve safer outcomes.

Provides functional parity with TMS and leverages the PremierOne messaging services platform, offering multiple configurations to enhance and extend core messaging functionality that can include queries and dispatch notifications. Based upon the configuration chosen, ASTRO 25 Advanced Messaging Solution extends Computer Aided Dispatch (CAD) information beyond the vehicle to select ASTRO 25 Portable radios.

Many Public Safety agencies have experienced the benefits of messaging and sharing important information to/from the communication center (dispatch) and vehicles equipped with MDT's. With ASTRO 25 Advanced Messaging Solution we are extending that capability to responders when Outside the Vehicle.

Ordering ASTRO Text Messaging for APX 4000 Portable Requires:

1. APX 4000 Radio
2. P25 Digital Conventional (Q811)

OR

1. APX 4000 Radio
2. 9600 or 3600 Digital Trunking (QA02756)

NOTE: *There is no specific option to order for the Advanced Messaging Solution on the subscribers as the functionality is included in the Packet Data option. Please order Digital Operation to receive Text Messaging ability as Packet Data is a standard feature on APX Portable and Mobile Radios.*

Outdoor Personnel Location Global Positioning Satellite (GPS) Feature

The personnel outdoor location tracking GPS feature enables a dispatcher the ability to locate on-foot patrols and out of the vehicle officers who are involved in life threatening situations. The radio user's GPS position information is sent over the ASTRO 25 Integrated Voice & Data (IV&D) network and is delivered to the dispatch operator using a third party mapping display application at the dispatch center (*Mapping Application is not yet available through Motorola at this time, however an Application Developers Tool Kit is available for 3rd party vendors to use to modify existing applications. See link below for more details.*) On the Dual Display model only it is possible to the user to determine their own location (latitude/longitude) through the use of the location menu.

During normal operation the radio battery capacity will be reduced by 10% to 16%.

In order to obtain an initial GPS fix position, the radio must be located in an open sky, outdoor environment with no barriers that could affect the signal around you or above you. During this initial fix, the radio should NOT be worn on the body as this may affect the process of acquiring signal and/or add additional time to first fix.

NOTE LIMITATIONS OF USE:

GPS works best in an open sky (clear view of the sky with no obstructions) environment. Due to the limitations of the technology, there are certain situations which prevent GPS coverage. These situations include but are not limited to:

- Underground locations (tunnels, subways, etc.)
- Inside of buildings, elevators, parking garages, trains, other covered vehicles, etc.
- Under metal or concrete roof structures
- Urban canyons (between tall buildings or under dense tree coverage)

***GPS Performance may be degraded when the radio is worn against the body and/or against the body within a vehicle.

Due to the limitations mentioned above, GPS should only be utilized as a method to assist the user with location information but not as a means for mission critical communication. Therefore, in any emergency situation, the location should always be verbally reported to the dispatcher.

700/800 Models (2, 3)	Frequencies
700 MHz	767.950
700 MHz	772.800
800 MHz	856.800
800 MHz	863.025

*within +/-25kHz of the specified frequency

REBANDING Frequency Range for 700/800MHz in the CPS:

700 MHz:

Rx/Tx: 764.006250 to 775.993750

Tx Only: 794.006250 to 805.993750

800 MHz

Tx Only: 806.000000 to 824.993750

Rx/Tx: 851.000000 to 869.993750

CPS INFORMATION

****Please note that NEW version of Customer Programming Software (CPS) is required for initial customer orders for APX radios. ****

**** APX CPS version CPS R12.00.00 and greater ordered after June 2014 will only support Windows 7 and 8. ****

How to order RVN5224 through COF:

1. **Sign and return the Software License Agreement**
2. **Order the software part number**
3. **New releases on disk will be automatically sent for a three-year period.**

A downloadable version of the CPS will be available for the Q1 SER 2015 Release

If a customer prefers to download, call 1-800-422-4210 to request an MOL account or have their existing account enabled.

- **Order HKVN4289A in MOL**
- **Provide Email Address**
- **Sign and return the Software License Agreement**
- **License is valid for 3 years**
- **Reminder to renew license will be sent to the provided Email Address**

Integrated Command and Control System (ICCS) Gateway - SR6.x to SR7.1; DSS R3.0 to R4.1
E2EE ICCS Gateway SR6.x/R3.0 to SR8.0

Ordering Information

General Information

Note That Clear ICCS for new SR8.0 Systems now uses the Dispatch Communications Server (DCS). Please refer to the DCS ECAT page.

An Integrated Command and Control System (ICCS) typically refers to a large and often complicated customer control room. The ICCS Gateway (GW) is the interface between MCC7500 console and 3rd party applications and systems in a remote control site.

The APIs provided by the ICCS Gateway allow customers to develop their own command and control system using the feature set provided by MCC 7500 consoles (Voice Nodes). The Customer's GUI application runs on the customer supplied ICCS PCs using a Common Object Request Broker Architecture (CORBA) on a Secure Socket Layer (SSL) interface to signal control messages to the Voice Nodes.

In this release, in addition to the Clear ICCS present in previous releases, an E2EE MCC 7500S console solution is developed to provide end to end communication between radios and consoles.

The three key items of the ICCS Gateway are:

- A Voice Node PC.
- A voice card.
- The GPIOM, being identical to that used with the MCC 7500 Dispatch Console. (Note: The ICCS GW PC together with a GPIOM is called a Voice Node (VN).)
- The ICCS Gateway Multiplexer which is used to multiplex the analogue audio from the GPIOM into an E1 stream for onward connection to the customer's ICCS.

The Voice Node PC is configured for headless operation (no mouse, keyboard, and screen). A KVM can be provided for local support operation if desired.

The ICCS Gateway Components

The Voice Node PC

The PC used for the ICCS GW PC is a 1U rack mountable pyramid server running the Console Dispatch PC software. A voice card must be added to each PC. The GW PC and

the GPIOM have to be collocated because they are connected using IEEE1394 Firewire. The maximum FireWire cable length of 4.5 metres defines this limitation.

The GPIOM

The GPIOM is the same General Purpose I/O Module unit as used with the MCC 7500 Dispatch Console Processing Package. Please refer to the [MCC 7500 Peripherals](#) page for more details.

The ICCS Gateway Multiplexer

The ICCS Gateway Multiplexer consists of the chassis, a common logic module, E1 modules, voice modules and a redundant power supply.

The full specification can be seen here: [GMDN0244](#)

Each multiplexer chassis unit has redundant power supplies and CPUs. Each multiplexer should be equipped with a minimum of one VC16 voice module and one E1 main link module.

- The maximum number of Voice Nodes supported by each ICCS-Gateway implementation is 50.
- Each Voice Node supports up to four audio outputs (i.e. 2 pairs of speakers) and one audio input ("microphone"). The audio input shares the first channel with the audio output. This setup consumes four channels of a VC16 voice module allowing a total of four Voice Nodes to be connected to one VC16 voice module. Where only 1 pair of speakers are used then 8 voice nodes can connect to a VC16 voice module

ICCS Interface

There are two types of traffic traversing the ICCS interface between the Motorola Equipment Room and customer Dispatch Room: Analogue traffic (mainly Audio) and IP traffic (Data and control messages).

- Analogue traffic will be aggregated on the Multiplexer and then transmitted over E1 cables.
- For the IP traffic there are two configuration options.
 1. A WAN interface, an E1 cable, to connect the border router to the multiplexer This consumes one additional E1 link of the ICCS GW multiplexer and one time slot on the E1 link to the customers ICCS multiplexer.
 2. A LAN interface to connect the border router directly to the customer's LAN switch.

Clear ICCS Gateway configuration

The Excel worksheet found [here](#) can be used to calculate the required MUX equipment for a number of analogue configurations of the Voice Nodes (VN).

The E2EE ICCS Gateway Components

In this release, E2EE MCC 7500S console solution is developed to provide end to end communication between radios and consoles. It is similar to the clear version of the ICCS except that the components are based upon the MCC 7500S E2EE console configuration. As illustrated in the figure an E2EE MCC 7500S console solution which is composed of three main entities:

- Call Control Entity (CCE), [Dispatch PC with mouse & keyboard].
- Voice Encryption/Decryption entity (VED), also known as the Console CryptR.
- Audio Processing Entity (APE), also known as the Audio Module.

In addition the ICCS GW Multiplexer which is used to multiplex the analogue audio from the GPIOM into an E1 stream is required as in the Clear ICCS although the configuration will be different.

In contrast to the clear MCC 7500 console, this solution requires 2 Ethernet ports on the control site switch for each E2EE console. The KVL shown in the figure is not used in daily operation, but only used to load security keys to the VED.

Voice Node CCE (Call Control Entity) PC

The PC used for the E2EE Voice Node CCE PC is a 1U rack mountable Pyramid (SuperMicro) server used for the MCC 7500S.

The Voice Encryption/Decryption Entity (VED)

The VED is a standalone device used to encrypt and decrypt audio. It contains a CryptR module. A metal bracket is provided with the VED to allow secure mounting of the device. An external power supply is provided. Three versions of the VED are available each with a different algorithm. The Voice Encryption/Decryption Entity (VED) is the same device as used in the MCC 7500S E2EE dispatch consoles.

The Audio Processing Entity (APE)

The APE provides a similar configuration as the General Purpose I/O Module unit when used with the MCC 7500 Dispatch Console Processing Package. However in this application it is a rack mount version of the MCC 7500S APE and provides the audio interfaces. It includes a SuperMicro PC with Digigram soundcard, cable and XLR extension cable

The ICCS Gateway Multiplexer

The ICCS Gateway Multiplexer consists of the chassis, a common logic module, E1 modules, voice modules and a redundant power supply similar to that for the Clear ICCS described above.

E2EE ICCS Gateway configuration

The Excel worksheet found [here](#) can be used to calculate the required MUX equipment for a number of analogue configurations of the Voice Nodes (VN).

Export Control Requirements

IMPORTANT NOTE FOR ALL ENCRYPTED ITEMS

All Motorola TETRA (Dimetra) encrypted infrastructure and encrypted subscriber, as well as encryption key distribution and encryption key management hardware and software products, including kits, spare parts and encryption upgrades are controlled for export and will generally require an approved export licence prior to shipment from the Motorola factory to any customer.

Export Licence approvals are based on the country of final destination and the specific end user. Certain countries and certain end users will not be eligible for approval.

Any items that require an export licence are highlighted in the sections below. Contact your Local Export Control office if you are unfamiliar with the licensing process or to discuss any possible licensing restrictions before submitting bids, proposals, or accepting orders for encryption products.

Current contact information can be found at <http://exportcontrols.mot.com/>

Ordering Requirements

Ordering in Oracle 12

If ordering in Oracle 12 then enter <**DIP-CONTROL**> into the <**Product**> field in Oracle R12 and then launch the configurator. Make selections as required. The information below can be used to check the resulting lists.

Note That Clear ICCS for new SR8.0 Systems now uses the Dispatch Communications Server (DCS). Please refer to the DCS ECAT page.

Configuration

Clear ICCS Gateway Components (Legacy Systems ONLY) Step C1: Voice Node PC

Step C1: Voice Node PC

Between 2 and 50 Voice Node PCs are allowed for each ICCS Gateway. Order a B1909 plus Option CA01379 for the processing for each package required. Each PC includes a Windows operating system. If ordering in COF a GMEN4002 voice card should also be ordered. If ordering in Oracle R12 then the voice card will be automatically added by the SBOM Configurator. The PC can be ordered in either a rack-mountable or tower configuration. For the ICCS GW application the rack-mountable configuration should be chosen using Option CA01318. Order one AC line cord CA00140AB or CA140AC for each Voice Node PC. Also add CA02459AB for the Win XP OS.

Description	Full Description	Nomenclature	APC	Price
ADD: OS LICENSE WINXP	-	CA02459AB	597	\$0.00
ADD: AC LINE CORD, UK	Adds one AC line cord with a United Kingdom plug.	CA00140AC	597	\$0.00
ADD: AC LINE CORD,	Adds one AC line cord with a continental European plug	CA00140AB	597	\$0.00

EUROPEAN	(Schuko plug).			
ADD: MCC7500 DIM IP PROC PKG	-	CA01379AA	597	\$0.00
ADD: TOWER PC	-	CA01319AC	597	\$12,400.00
MCC7500 DIMETRA IP PROC PKG	-	B1909	597	\$100.00

Step C2: GPIOM

Each Voice Node PC requires one GPIOM for use with the ICCS Gateway PC. Order a GM0158 for each GPIOM required.

Each GPIOM requires an AC line cord option (CA00140AB or AC). This AC line cord is in addition to the AC line cord ordered with the processing package.

Description	Full Description	Nomenclature	APC	Price
ADD: AC LINE CORD, UK	Adds one AC line cord with a United Kingdom plug.	CA00140AC	597	\$0.00
ADD: AC LINE CORD, EUROPEAN	Adds one AC line cord with a continental European plug (Schuko plug).	CA00140AB	597	\$0.00

If GPIOM is to be rack mounted then also order the fixing bolts for the PSU. Order one GMDN2373 per rack mounted GPIOM.

Description	Full Description	Nomenclature	APC	Price
RITTAL FIXING BOLTS PACK=4	-	GMDN2373A	078	\$23.00

If a shelf is required for the PSUs then GMDN2372A may be suitable - [spec sheet here](#). This can accommodate up to four PSUs.

Description	Full Description	Nomenclature	APC	Price
RITTAL SHELF 400MM DEPTH	-	GMDN2372A	078	\$61.00

Step C3: ICCS Gateway Multiplexer.

Now order the ICCS Gateway Multiplexer. Note: The quantities of Options shown below are for each multiplexer. Use the configuration worksheet at the link [here](#) to calculate your total specific system level requirements.

ICCS Gateway Multiplexer Main Unit.

Order the ICCS Gateway Multiplex Main unit under nomenclature GMDN0244.

Description	Full Description	Nomenclature	APC	Price
RAD MUX EQUIPMENT - MODEL	-	GMDN0244	597	\$0.00

ICCS Gateway Multiplexer Chassis.

Order 1 of the ICCS Gateway Multiplex chassis using Option TG00001AA ON EACH MODEL GMDN0244 to provide a fully redundant CL & PSU each with 12 I/O slots.

Description	Full Description	Nomenclature	APC	Price
ADD: MEGAPLEX 2100 MUX - MAIN UNIT	-	TG00001AA	597	\$8,103.00

Dual E1 Link

Description	Full Description	Nomenclature	APC	Price
ADD: DUAL E1 LINK MEGAPLEX2100	-	TG00004AA	597	\$2,493.00

16 Port Voice Module

The VC16 voice module has 16 channels and requires one I/O slot in the multiplexer chassis. Order between 1 & 7 of the modules ON EACH MODEL by ordering Option TG00021AA

Description	Full Description	Nomenclature	APC	Price
ADD: 16 PORT VOICE MODULE	-	TG00021AA	597	\$2,493.00

Octopus Cables

Two octopus cables are required for each VC16 voice module (1 cable covers 8 channels). Order between 1 & 13 of the cables ON EACH MODEL by ordering Option TG00036AA.

Description	Full Description	Nomenclature	APC	Price
ADD: KM-2000 CBL FOR 8 ANLG CH	-	TG00036AA	597	\$249.00

Step C4: Order the ICCS Voice Node PC Application and API Software (mandatory).

The ICCS Voice Node PC provides its services via a CORBA remote API. It is necessary to install the appropriate application software on each PC. See the relevant ECAT page for Software Ordering for the System Release required.

E2EE ICCS Gateway Components (Still Current for SR8.0)

Step E1: E2EE Voice Node CCE (Call Control Entity)

Between 2 and 50 Voice Node CCE PCs are allowed for each ICCS Gateway. The CCE includes a PC with a Windows operating system but without a voice card. Order a GMLN1159 plus option CA01381 for each processing package required. The CCE can be ordered in either a rack-mountable or standard configuration. For the CCE application, the rack mountable configuration should normally be chosen using Option CA01338. Alternatively standard PCs can be ordered using CA01380. A European AC Line Cord is included. For a UK AC line cord order CA00140AC for each processing package. For a China AC line cord order CA00140AN. In addition, order the OS, For R7.0 onwards this is CA02460AA for Windows 7.

Description	Full Description	Nomenclature	APC	Price
ADD: MCC7500S CCE DIM IP PR PKG	-	CA01381AA	530	\$0.00
AC LINE CORD CHINA	-	CA00140AN	443	\$0.00
MCC 7500S CCE	-	GMLN1159	597	\$100.00
ADD: AC LINE CORD, UK	Adds one AC line cord with a United Kingdom plug.	CA00140AC	597	\$0.00

Step E2: Order the Console CryptR (mandatory)

Follow either Step E2a OR E2b for R7.0 and R6.2 systems respectively:

Step E2a: R7.0 Systems

Order one Console CryptR for each Dispatch Console. For R7.0 systems order one GM0215 with ONE algorithm option CA01389 - AES128, CA01390 - AES256 or CA01391 D6.1 EG UK. Note that the latter is for restricted use in the UK only. Each CryptR requires an AC Line Cord Option. Order one AC line cord CA02064AA or CA02065AA.

Description	Full Description	Nomenclature	APC	Price
AC Line Cord, UK	-	CA02064AA	137	\$0.00

AC Line Cord, European	-	CA02065AA	137	\$0.00
D7.X/D8.X CONSOLE CRYPTR	-	GM0215B	532	\$4,687.00
ADD:AES-256	-	CA01390AA	532	\$0.00
ADD:D6.1 EG UK	-	CA01391AA	532	\$0.00
ADD:AES-128	-	CA01389AA	532	\$0.00

Step E2b: R6.2 Systems

Order one Console CryptR for each Dispatch Console. For R6.2 systems order one GM0175 with ONE algorithm option CA01389 - AES128, CA01390 - AES256 or CA01391 D6.1 EG UK. Note that the latter is for restricted use in the UK only. Each CryptR requires an AC Line Cord Option. Order one AC line cord CA02064AA or CA02065AA.

Description	Full Description	Nomenclature	APC	Price
AC Line Cord, UK	-	CA02064AA	137	\$0.00
AC Line Cord, European	-	CA02065AA	137	\$0.00
ADD:AES-256	-	CA01390AA	532	\$0.00
ADD:D6.1 EG UK	-	CA01391AA	532	\$0.00
ADD:AES-128	-	CA01389AA	532	\$0.00

Step E4: ICCS Gateway Multiplexer

Now order the ICCS Gateway Multiplexer. Refer to Step C3. Use the configuration worksheet at the link [here](#) to calculate your total specific system level requirements.

Step E3: Ordering the Audio Processing Entity (APE)

The Audio Processing Entity (APE) PC that provides the audio interfaces. It includes a rack mount PC with Digigram soundcard, cable and XLR extension cable. Order a GMLN1160 plus Option CA01383 for each processing package required. The APE can be ordered in either a rack-mountable or standard configuration. For the ICCS GW APE application the rack-mountable configuration should be chosen using Option CA01339. Alternatively standard PCs can be ordered using CA001382. A European AC Line Cord is included. For a UK AC line cord order CA00140AC for each processing package. For a China AC line cord order CA00140AN. In addition, order the OS, For R7.0 onwards this is CA02460AA for Windows 7.

Description	Full Description	Nomenclature	APC	Price
-------------	------------------	--------------	-----	-------

AC LINE CORD CHINA	-	CA00140AN	443	\$0.00
ADD: AC LINE CORD, UK	Adds one AC line cord with a United Kingdom plug.	CA00140AC	597	\$0.00
ADD: MCC7500S APE DIM IP PR PKG	-	CA01383AA	530	\$0.00

Step E5: Order the E2EE ICCS GW CCE Application and API Software (mandatory)

The ICCS GW CCE provides its services via a CORBA remote API. It is necessary to install the appropriate application software on each PC. See the relevant ECAT page for Software Ordering for the System Release required.

Rack Orderables

The ICCS Gateway components including the GPIOM and PC can be accommodated in a 38U rack. The type of rack that can be used would be similar to that employed elsewhere in the Dimetra system and follows the same form factor. Of the 38U available only a maximum of 26U will be used to ensure adequate cooling performance. The rack configuration is project specific. The SIC should be contacted to discuss your individual requirements.

When populating the rack with the components the following factors should be considered:

- One Voice Node (Voice Node PC & GPIOM) requires 2U..
- A maximum of 12 Voice Nodes plus a KVM switch can and should be put in one rack.
- A MUX main unit requires 4U.
- A 32-port patch panel requires 2U.
- Ethernet switches, Control room border routers, control site routers and firewalls have to be considered

Below is the list of required orderables for the ICCS Gateway Rack. All the items in the list are on a per rack basis. The default mains distribution block configuration is included in the rack model number. No additional or alternative distribution blocks are needed or allowed. Further details on the rack model can be viewed [here](#). Contact the SIC for the quantity of customised cables required.

PART NUMBER	DESCRIPTION
GMDN1164A	INTERCONNECT RACK DIMETRA 6.X

E-Government Update

February 17, 2003

Memo Distribution Sales Teams
to:

Rich Baidis, Mary Bottie, Doug Heck, Chuck Jackson, Brian Kemper, Jeff
Copy Kremer, Ed Leisten, Dan McGowan, Grant Milner, Carol Moore, Ellen
to: O'Hara, Lou Paolillo, John Piumbroeck, Nick Rendone, Jim Sarallo, Jody
Sweet, Bill Turkaly, Ron Voigt, Jim Widick, Steve Young

From: Ken Denslow, Mark Moon, Rick Neal

The E-Government Act of 2002 was signed into law on December 17, 2002. One of the provisions of this Act allows for the possibility of "cooperative purchasing" by state and local governments, enabling them to use the General Services Administration (GSA) Group 70 Federal Supply Schedules to purchase supplies and services when GSA implements this program. Participation will be voluntary on the part of the contractor, as well as the state and/or local purchasing agencies. Some Motorola two-way radio products and services are included on a GSA Group 70 Schedule Contract.

The actual "cooperative purchasing" program has not yet been implemented, and as such, purchasing under Group 70 Schedules cannot yet occur. In January, GSA published proposed regulations to implement this Act and requested public comments on this proposal. GSA will receive comments and questions until March 24, 2003, after which they will formulate a final rule. This process is expected to be complete by April 17, 2003, but could take longer depending on the comments received.

GSA conducted a public hearing on February 4, which Motorola attended. Based on our assessment of the proposed regulations and comments made at the hearing, GSA needs to address a number of fundamental issues. One key question is how to accommodate state and local purchasing terms and conditions that differ from the terms and conditions on the GSA schedule.

Based on the information currently available, Motorola believes it will be unlikely that "cooperative purchasing" will work effectively for our customers. This is due to the extensive revision of the proposed regulations and resolution of many questions regarding contract terms and conditions.

Until the final ruling is released, it is difficult to answer many questions surrounding this proposal. We are actively involved in discussions in order to fully understand the impact of this option on our customers and our distribution channel. We appreciate your patience and will keep you informed.

Emergency Button/Quick Action Button

Ordering Information

Features

At Motorola Solutions, we constantly focus on assisting responders during emergencies, and on reducing the response duration. Emergency Button/Quick Action Button is the latest feature in our broad and innovative product portfolio that allows a responder to initiate a phone call, send a text notification, or both, by just pressing a button (hard/soft) on a handheld device. The responder has the handheld device pre-configured, based on his/her specific requirements, which are sent while pressing the Emergency Button/Quick Action Button.

The Emergency Button/Quick Action Button application supports the following actions:

- **Initiate a phone call:** A responder can pre-configure the application to initiate an E911 call, or initiate a call to a customized phone number, with a press of the button.
- **Send an SMS notification (with/without GPS):** A responder can pre-configure the application to send an SMS notification to customized numbers. Location coordinates (if available) of LTE handset and information about paired (if paired) Land Mobile Radio (LMR) is also sent as part of the text message.
- **Initiate a phone call and send an SMS notification (with/without GPS):** A responder can pre-configure application to perform both actions with a press of the button.

Emergency Button/Quick Action Button is a client only feature.

NOTE: User will require a voice and text plan to use call and SMS notification functionality.

Device and Operating System Supported

SUPPORTED DEVICES/CLIENTS:

LEX755 (Android Jellybean), LEX L10 (KitKat), LEX L10i

Ordering Requirements And Steps

Emergency Button/Quick Action Button app is pre-loaded on all Motorola LTE handheld devices.

- **LEX 755:**

Quick Action Button on LEX755 is part of Application Central client pre-loaded on device and can be activated by purchasing license (UA00115AA \$0 price). This is a free app on LTE device.

- Option T8081A must be selected followed by Qty 'n' of required client licenses UA00115AA.
- **LEX L10, LEX L10i:**

Emergency Button/Quick Action Button is a separate app on LEX L10 and LEX L10i. This is a free app on LTE device. No ordering required for LTE device.

General Information

Motorola® End-User Software License Agreement

1. Scope. Licensee may acquire from Motorola's CGISS Radio Communication products ("Products") that contain embedded or pre-loaded Motorola software such as in a ROM, PROM, or EPROM, or other Motorola software provided on media such as a floppy disk, tape, diskette, or CD-ROM. All such software (including Radio Service Software (RSS) and FLASHport® Software) is referred to as "Motorola Software." This Agreement contains the terms under which Licensee may use Motorola Software acquired from CGISS.
2. Grant of License. Motorola hereby grants to Licensee a personal, non-exclusive license under Motorola's applicable proprietary rights to use Motorola Software in accordance with the terms of this Agreement.
3. Limitations on Use. Licensee may use Motorola Software only for Licensee's internal business purposes and only as described in the Motorola Software or Product documentation. Any other use of Motorola Software is strictly prohibited and will be deemed a breach of this Agreement. Licensee may not copy, modify, adapt, merge with other software, reverse engineer, or disassemble any Motorola Software for any reason, except that Licensee may make at most two copies of Motorola Software provided with infrastructure equipment for back-up purposes. Licensee must purchase a copy of Radio Service Software for each site at which Licensee uses Radio Service Software; Licensee may make one additional copy for each computer owned or controlled by Licensee at each such site. Licensee may temporarily use Radio Service Software on portable or lap-top computers at other sites. Prior to acquiring any Radio Service Software or upon Motorola's request, Licensee must provide a written list of all sites where Licensee uses or intends to use Radio Service Software. Licensee must reproduce all Motorola copyright and trademark notices on all copies of Motorola Software.
4. Transfers. If Licensee transfers ownership of Products to a third party, Licensee may assign its rights to use Motorola Software (other than Radio Service Software and FLASHport® Software) embedded in or furnished for use with those Products provided that (a) Licensee transfers all copies of such Motorola Software to the new owner and (b) Motorola receives a transfer form (which Motorola will provide upon request) completed and signed by the new owner. Otherwise, Licensee may not transfer or make available any Motorola Software to any third party.
5. Ownership and Title. Title to all copies of Motorola Software in any form, including all rights in patents, copyrights, trade secrets, and other intellectual properties, remains vested exclusively in Motorola.
6. Confidentiality. Licensee acknowledges that all Motorola Software contains valuable proprietary information and trade secrets and that unauthorized dissemination, distribution, modification, reverse engineering, disassembly,

or other improper use of Motorola Software will result in irreparable harm to Motorola for which monetary damages would be inadequate. Accordingly, Licensee will limit access to Motorola Software to those of its employees and agents who need to use Motorola Software for Licensee's internal business purposes, and Licensee will take appropriate action with those employees and agents to preserve the confidentiality of Motorola Software.

7. Maintenance and Support. No maintenance or support is provided under this Agreement. Maintenance or support, if available, will be provided under a Motorola Software Maintenance and Support Agreement.
8. Limited Warranty. For the first 120 days after initial shipment of Motorola Software, Motorola warrants that the Motorola Software, when used properly, will be free from reproducible defects that materially vary from its published specifications. Motorola does not warrant that Licensee's use of the Motorola Software or the Products will be uninterrupted or error-free or that the Motorola Software or the Products will meet Licensee's particular requirements. MOTOROLA'S TOTAL LIABILITY, AND LICENSEE'S SOLE REMEDY, FOR ANY BREACH OF THIS WARRANTY WILL BE LIMITED TO, AT MOTOROLA'S OPTION, REPAIR OR REPLACEMENT OF THE MOTOROLA SOFTWARE OR PAYMENT OF LICENSEE'S ACTUAL DAMAGES UP TO THE AMOUNT PAID TO MOTOROLA FOR THE MOTOROLA SOFTWARE OR THE INDIVIDUAL PRODUCT IN WHICH THE MOTOROLA SOFTWARE IS EMBEDDED OR FOR WHICH IT WAS PROVIDED. THIS WARRANTY EXTENDS ONLY TO THE FIRST LICENSEE; SUBSEQUENT TRANSFEREES MUST ACCEPT THE MOTOROLA SOFTWARE "AS IS" AND WITH NO WARRANTIES OF ANY KIND. MOTOROLA DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.
9. Limitation of Liability. IN NO EVENT WILL MOTOROLA BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.
10. Term and Termination. Licensee's right to use Motorola Software will begin when Licensee sends a duly executed copy of this Agreement to Motorola, and either (a) Motorola returns a fully executed Agreement to Licensee or (b) Motorola ships Motorola Software or a Product containing Motorola Software to Licensee, and will continue in perpetuity unless terminated as follows. Licensee's right to use Motorola Software will terminate without notice upon a breach of this Agreement by Licensee. In addition, if Motorola reasonably believes that Licensee intends to breach this Agreement with respect to Radio Service Software or FLASHport® Software, Motorola may, by notice to Licensee, terminate Licensee's right to use such Motorola Software. Upon termination, Motorola will be entitled to immediate injunctive relief without proving damages and, unless Licensee is a sovereign government entity, Motorola will have the right to repossess all Radio Service Software and FLASHport® Software in Licensee's possession. Within thirty days after termination of Licensee's right to use any Motorola Software, Licensee must certify in writing to Motorola that all copies of such Motorola Software have been returned to Motorola or destroyed.

THIS END-USER SOFTWARE LICENSE AGREEMENT IS PRINTED FOR REFERENCE ONLY. EACH CUSTOMER SHOULD HAVE A SIGNED COPY ON FILE. CONTACT LOCAL CONTRACTS AND COMPLIANCE DEPARTMENT FOR COPY OF LICENSE AGREEMENT.

MOTOROLA, MOTO, MOTOROLA SOLUTIONS and the Stylized M Logo are trademarks or registered trademarks of Motorola Trademark Holdings, LLC and are used under license. All other trademarks are the property of their respective owners. © 2018 Motorola Solutions, Inc. All rights reserved.

Enhanced Telephone Interconnect for ASTRO 25 Systems A7.17.3 and later releases

The Enhanced Telephone Interconnect (ETI) solution is designed for Motorola's ASTRO 25 Trunked Radio Systems at A7.17.3 and beyond. Existing ETI-containing systems upgraded to A7.17.3 may retain their existing ETI hardware, but subsequent expansions will be based on the refreshed solution.

The NEC Gateways are JITC Compliant.

Important Note: Legacy ETI hardware A7.9 to A7.17.2 is cancelled. Please refer to ETI Lifecycle Notice [here](#)

Enhanced Telephony Interconnect Oredring Guide - [Link](#)

Ordering Information

General Information

These pages will lead you through the necessary steps to include the Enhanced Telephone Interconnect Solution to your ASTRO 25 7.17.3 systems and beyond. Please be sure to read each step and order carefully to assure the correct build of the product.

The ETI solution can be enabled to use legacy PSTN lines (analog and/or digital T1/E1) OR enabled as a Voice over Internet Protocol (VoIP) solution using a Session Initiation Protocol (SIP) control plane to the Zone Controller and a Real-Time Protocol (RTP) media stream from a new Telephone Media Gateway (TMG). These are industry standard protocols.

The ETI Solution allows a radio user of an ASTRO 7.17.3 systems and beyond to dial telephone numbers, cellular phones included, and initiate a half duplex phone conversation. Likewise, a landline/cellular user will be able to initiate half duplex calls to subscriber radios using one of two techniques:

1. A telephone user can directly dial a subscriber using a telephone number explicitly reserved for that subscriber radio.
2. A telephone user can dial a central number for the system and then use over-dialing to enter the subscriber ID to initiate the call.

ETI Capabilities

The ASTRO 25 system supports a maximum of one ETI subsystem per zone. The ETI

subsystem is located at a master site and is directly connected to the zone core. The maximum number of simultaneous calls supported by the ETI subsystem is 120, provided there are enough TMG's and other telephony resources (ex. Digital Media Gateways, Analog Media Gateways, licenses).

ETI System Planner:

The ETI System Planner is available at: [ETI System Planner](#). A list of supported functionalities is available in ETI System Planner.

The Enhanced Telephone Interconnect solution does not support the following:

- DID on analog lines
- Call Failure Announcements
- Phone calls to Talkgroups- only calls to individual subscribers are supported
- Audio Logging
- Conventional analog
- Digital Mutual Aid
- SmartX Site Converter (for 3600 remote sites)
- DSR Configurations (ETI will not switchover upon Master Core Failure)

Telephony Firewall Requirements: For every ETI solution that is configured to use SIP Trunking, a firewall **MUST** be purchased.

Ordering Requirements

The following information must be included on the order for all ETI solutions ordered:

*** The System ID - This would have been assigned when the original system was purchased.**

Note: ALL NEW ETI systems must ship through CCSI.

FIRST SECTION: ORDER FOR CAPACITY AND POSSIBLE ENCRYPTION

Step 1: Order the Master Enhanced Telephone Interface Model - **SQM01SUM0206A**

- This is the ETI core. Included is the capacity for 3 simultaneous calls and ability to expand. Included is also a single Telephone Media Gateway (TMG which also comes with a North American power cord(s)).

Step 2: [OPTIONAL] Order Additional Capacity - **CA01778AA**

- For each ETI solution, the customer can order additional capacity with the "Capacity

Option", each providing capacity for 3 additional simultaneous calls (see 2nd section for an explanation).

Step 3: [OPTIONAL] Order Encryption: If encryption is required for over-the-air security, select one type of optional encryption:

- CA00182AU AES Algorithm
- CA00143AE DES-OFB Algorithm
- CA00245AB ADP Algorithm
- CA00145AL DVI-XL Algorithm
- CA00146AM DVP-XL Algorithm
- CA00144AD DES-XL Algorithm

Note: Each encryption algorithm impacts the capacity of the Telephony Media Gateways (TMG) supplied with this solution. Multiple TMGs may be built in, depending upon capacity ordered. Each TMG is 1RU. The following are the capacities for each TMG respective to the algorithm:

- 15 simultaneous calls per TMG for DES-OFB, AES, ADP, or no encryption
- 12 simultaneous calls per TMG for DES-XL
- 6 simultaneous calls per TMG for DVI-XL or DVP-XL

Please consider rack/cabinet space depending upon how many TMG's are built with your order.

SECOND SECTION: ORDER IP PBX Server, LICENSING, AND OPTIONAL MEDIA GATEWAYS and FIREWALL

Step 4: First, order the server.

Second, order the license bundle, which comes with licensing for up to 3 simultaneous calls to add additional capacity.

a. Order the ETI IP PBX Server [NEC IP-PBX Bundle - 3 Line System(Server, OS,) NEC 3C Software Univerge - Includes 2 years support]- **TT3315**

b. Order the ETI IP PBX 3 Line Motorola J1TC Compliant Add-on to NEC IP-PBX Bundle(Includes 2 years support)- **TT3316**

Step 5: [OPTIONAL] Order additional capacity for 3 call lines (ETI licenses) - TT05501AA

For the ETI IP PBX, customers can order additional lines in bundles of 3. The capability of additional calls is determined by the TMG call capacity (CA01778AA) and IP PBX call licensing (TT05501AA). When ordering the additional capacity the quantity of TT05501AA and CA01778AA must be equal.

As an example, a system that requires 14 simultaneous calls will require:

- Quantity 4 TT05501AA to provide up to 12 additional IP PBX Licenses
- Quantity 4 CA01778AA to provide TMG call capacity for up to 12

Since three calls come standard with a new ETI order, Qty-4 of call (CA01778AA) and Qty-4 of license (TT05501AA) options will provide a total of 15 simultaneous calls.

For 3rd party Media Gateways be cautious of how many ports are in operation.

Note: Additional licenses ordered here **MUST** match the additional capacity ordered in Step 2 (CA01778AA).

Step 6: [OPTIONAL] Order Analog and/or Digital Media Gateways - TT3317, TT3318

Customers may choose to configure their ETI solution to support legacy lines, analog (TT05502AA) and/or digital (TT05503AA). If so, choose the appropriate Media Gateway(Analog or Digital). A maximum of 4 Media Gateways can be ordered per ETI IP PBX.

Note:

1. If the customer is ordering international AND connecting directly to the PSTN, please refer to the planner for type approval information on the part numbers, and contact product management for other type approval needs.
2. The ETI IP PBX is not supported by Motorola to be configured with both legacy (analog/digital) lines AND a direct SIP connection to CPE.

Step 7: Order mandatory certification option (Choose One).

- Non- JITC Certification for Analog/Digital Media Gateways - CVN7288A
- JITC Certification for Analog/Digital Media Gateways - CVN7289A

Step 8: Order Appropriate ETI firewall.

Customers utilizing SIP Trunking **MUST** purchase the ETI firewall. The firewall is required with 3rd party Media Gateways. The firewall is not necessary if customers utilize the digital or analog media gateways in Step 6.

Order the following firewall based on system need:

1. For a customer requiring a firewall, the Fortinet FG-101E firewall (T8586A) is the certified, telephony firewall.
2. For NGI systems, ETI will use the Fortinet FG-101E Firewall part of the overall system architecture.

Note: An international customer utilizing an alternate Media Gateway (i.e. a Media Gateway not offered by NEC) AND connecting directly to the PSTN **MUST** also order and utilize the appropriate firewall.

RELATED ACCESSORIES AND FIELD REPLACEMENT UNITS

For alternative cabinets or racks, please consider using:

- HDW, ASTRO MASTER SITE CABINET - **CVN6508A**
- RACK, 7.5' FRU - **THN1013A**

For alternative/replacement power cords (for the TMG), consider using:

- AC Line Cord, North America - **3082933N08**
- AC Line Cord, UK - **3082933N13**
- AC Line Cord, Continental Europe - **3082933N09**

Should a spare Telephony Media Gateway (TMG) for ETI be needed, please go through Steps 1 & 3 again, ordering:

- * quantity 1 **SQM01SUM0206A**
- * quantity 1 respective encryption (if any)

This will generate quantity 1 TMG - **CA01777AA**.

eNodeB Band Class 14**Features**

GENERAL INFORMATION

The LTE Radio System is a modular system that enables Public Safety LTE (PS-LTE) and Mission Critical (MC) operators, amongst others, to address Mobile Broadband (MBB) driven opportunities and transform their radio access networks (RANs) by leveraging a multi-standard, multi-band and multi-layer architecture, as applicable. This is complemented by delivering industry-leading performance on the smallest site footprint with the lowest energy consumption. This system consists of hardware and software for radio, baseband, power and enclosure. The LTE Radio System is packaged for Indoor or Outdoor configurations, in AC or DC power, with scalable battery backup options. Antenna and site solutions complete these RAN offering and can be found under Product Catalog 'eNodeB Antenna' page and in Product Catalog 'Site Ancillary for Public Safety LTE,' respectively.

A baseline 3-sector eNB site consists of one baseband (BB) and three radios in Band 14 (B14). The radios are four-port radios. Each port is transmit/receive (Tx/Rx) capable. It is capable of up to 4X4 MIMO configuration (subject to HW and SW license enablement).

The cabinets, rack deployables or enclosures, are as follows:

- Indoor open rack deployable eNodeB (-48V DC) BB 6620.
- Outdoor cabinet eNodeB (-48V DC) RBS 6101. AC version available.
- Outdoor cabinet eNodeB (AC) Power 6135 BB 6620.
- Outdoor cabinet eNodeB Enclosure 6160 6620. AC version available.
- Compact Outdoor cabinet eNodeB (-48V DC) RBS 6301. AC version available.

- 3GPP Compliant Air Interface on LTE and LTE-Advanced.
- Standard Indoor and Outdoor Enclosures - Commercial grade zone 4 approved standard enclosures for indoor and outdoor deployments of PS LTE eNodeB
- Default configuration consists of
 - 3-sector eNB site, including one baseband (BB) and three radios in Band 14 (B14).
 - 5MHz UL and 5 MHz DL
 - Support for either 2-Transmit and 4-Receive (2T4R) or 4-Transmit and 4-Receive (4T4R)
 - To fully utilize 4T or 4R, additional quad antenna support features are required

 - Configurations with Basebands ((BBs) 5212 or 6620 with baseline capacity of 75 Mbps DL and 37.5 Mbps UL
 - Up to 40W of power configurable per radio
 - Base Software including the Basic Motorola VP

- Features are classified in value packages (VPs). Multiple features can be in a VP.

Sometimes, if applicable, VPs can be the feature's name itself.

- Basic Motorola VP including the following subset VPs (part of default configuration):
 - LTE Base Package
 - Differentiated Mobile Broadband
 - IPv6
 - Location Support
 - RAN Data Collection
 - Self-organizing Networks
 - VoLTE
 - High Speed UE

- CoMP VP
- VoLTE Performance VP
- CS Fallback VP
- High Load Handling VP
- 4X2 Downlink MIMO VP
- 4-way Receiver Diversity VP
- Integrated IP Security VP
- Secure OAM and Security Logging VP
- Large eNodeB VP
- Multicarrier Load Management VP
- Combined Cell VP
- Carrier Aggregation VP
- Maximum Cell Range, up to 100 km VP

Ordering Information

ORDERING REQUIREMENTS:

Best practices on RBS HW, SW, antenna and site solutions selection - The subsections in this page either provide the items needed or points to the page(s) where the items can be found to fulfill the following requirements to:

1. Determine base terminal equipment (BTE) requirements (LAN, fiber, MPLS...)
2. Determine site synchronization requirements (GPS eNB site and NTP at the core...)
3. Determine AC or DC, indoor or outdoor and battery backup time requirements
4. Select RBS and mounting options (as applicable)
5. Select RBS features (radio power, eNB capacity, channel BW requirements and optical features...)
6. Determine external alarm requirements.
7. Determine site solutions/ancillaries and antenna requirements
8. Determine surge protection and lightning (SPD for DC power and/or OVP for RF) requirements, based in RBS selection and site solution.

Unless otherwise specified, for RBS items and/or features or VPs, either Order Quantity 1 per site, or Order Quantity 1 per RRU is specified. When it is Order Quantity 1 per RRU and a default RBS model is selected, since the default RBS consists of 3 RRUs. Order Quantity 3, in total.

Alternatively, select a pre-configured package of the above items in the Enclosure 6160.

The MSI region must contact regional Ericsson to obtain a quote to have the eNodeBs commissioned. When requesting these services from Ericsson, the recommended software load is 18.Q4.3, which is compatible with the latest releases for LXN 6000, LXN 7100, LXN 8000, and LXN 81000. End of Support for this load from Ericsson is 2021-08-31. In 2020, the Broadband product team is certifying the latest Ericsson eNodeB release, which will be available in future off-ramps.

Configuration

BASE TERMINAL EQUIPMENT REQUIREMENTS:

If using Multi-protocol Label Switching (MPLS) termination, every eNodeB model requires a Base Terminal Equipment (BTE) device. Go to the "eNodeB L2 Switch" pCAT page to view the different options for this device.

DC power cable(s) will be required between the switch and the eNB if using copper for backhaul. Order Quantity One per BTE power supply:

Description	Full Description	Nomenclature	APC	Price
DC POWER CABLE 2-POLE OPEN END 1.5	-	DDN2471	051	\$50.00

SITE SYNCHRONIZATION REQUIREMENTS:

The Global Positioning System (GPS) receives a GPS timing signal that is used for synchronization of the eNodeB. GPS Antenna Kit consists of a GPS active antenna, GPS receiver unit, surge arrestor, grounding kit, sealing set, clamp kit, earthing cable, GPS mounting support. MSI RAN solution requires every eNodeB model to have a GPS kit. Order Quantity 1 per site of GPS Antenna Kit.

Based on site requirements 2 lengths of 1/4 " LDF will be needed (**ANT**| Nm -----1/4"LDF-----
-7/16DINm|**Lightning Protection**|7/16DINm ----- 1/4"LDF ----- SMAm|**GPS Rvr**) . Go to the Product Catalog "Transmission Line 1/4 Super Flexible Kits" page to order the feeder, based on the length required and the connectors, on both sides of the feeder.

If GPS mounting is needed for the GPS receiver unit, order Quantity 1 per site for the Din Rail Mounting Set.

Description	Full Description	Nomenclature	APC	Price
-------------	------------------	--------------	-----	-------

GPS ANTENNA KIT	-	DDN1884	051	\$572.00
SET OF MATERIALS/DIN RAIL MOUNTING SET	-	DDN1335	051	\$10.00

RBS INDOOR OR OUTDOOR ENVIRONMENT, POWER AND BATTERY BACKUP TIME REQUIREMENTS:

Site specifics on power plants will drive the power plant selection to be provided by the eNB.

The cabinets, rack deployables or enclosures are as follows to support the RBS selection, based on their indoor or outdoor suitability, DC or AC and battery backup availabilities:

- Indoor open rack deployable eNodeB (-48V DC) BB 6620. DC version available.
- Outdoor cabinet eNodeB (-48V DC) RBS 6101. Both DC and AC versions available. Battery backup in AC option.
- Outdoor cabinet eNodeB (AC) Power 6135 BB 6620. AC version available.
- Outdoor cabinet eNodeB Enclosure 6160 6620. AC version available. Battery backup included.
- Compact Outdoor cabinet eNodeB (-48V DC) RBS 6301. Both DC and AC version available. Battery backup in AC option.

Note that for outdoor configurations, BBS/BBU battery blocks are charged with -48V by the eNB (RBS) rectifiers. Therefore, when ordering a BBU/BBS RBS solution, an AC eNodeB should be selected. Note that PBC solutions are to be used for indoor DC configuration(s).

Go to Product Catalog 'eNodeB Battery Backup' page to order, based on the different options for this cabinet in its respective section(s).

RBS SELECTION:

The structure for B14 is based on either 2-Transmit, 4-Receive (2T4R) usage or 4-Transmit, 4-Receive (4T4R) usage in either DC or AC for outdoor or indoor configurations. The default RBS configuration comes with 3 remote radio units (RRUs), a radio for each sector, configurable to be radiating up to 40W per radio. It also comes standard with basic Motorola Value Pack covering 3 sectors. For mounting options for the RRUs, please refer to the Product Catalog 'Site Ancillary' page.

For customers that want to initially prepare for or deploy 4T4R, choose the 4T4R configuration.

For customers that want to initially deploy 2T2R or 2T4R, choose the 2T4R configuration.

*If the customer later chooses to deploy the additional 2T for 4T4R configuration, a HW license is required, That is, in addition to SW features for using spatial multiplexing or transmit diversity with 4-Transmit Ports. The HW license to upgrade to 4T4R is:

Description	Full Description	Nomenclature	APC	Price
HW SUPPORT LICENSE FULL 4T4R CAPACITY IN RADIO 4478 B14 (PER RADIO)	-	DDN2421	051	\$8,890.00

OUTDOOR CONFIGURATIONS (DC):

OUTDOOR CONFIGURATIONS (AC):

2T2R configuration Enclosure 6160:

Order quantity 1 of TT3702A for an eNodeB in an Enclosure 6160 with baseband 6620.

Each TT3702A model is a package is comprised of the Enclosure 6160, Two 6613 Li 50Ah battery packs, Three Radio 4478 with HWAC and installation material, one Baseband 6620 with installation material, and LTE Base and Value Packages (10MHz+10MHz and 40W sector power), an additional rectifier for redundancy, the fiber overlength unit, shelf for the single 100Ah battery string, 3 SPDs for the RRU power cables and DIN rail for mounting. Detailed BOM for TT3702A with quantities follow:

- AC SPD 1
- Battery breaker 2pol 200A (max. 250A) 1
- Enclosure 6160 AC 1
- DC Cables to Basebands 1,5m 1
- Cylinder lock 1
- Grounding cable set, 6 m 1
- DC Heater Enclosure 6160 1
- DC Output Bullet CB w Alarm 15A 1
- DC Output Bullet CB w Alarm 25A 3
- Outdoor power cable, 50 mm2, 9 M 1
- Service Outlet Enclosure 6160/6360 1
- Dummy plate Rectifier 7
- Generic Base Frame Enclosure 6160 1
- Rectifier 230VAC, 3.5kW 6160/6360 2
- Smoke detector Enclosure 6160/6360 1
- Temp sensor 10m (Use SP-KET 109 70/2 for spare parts) 1

- Laptop shelf/optical fiber storage 1
- Battery 6613 Li 50Ah 2U 2C UL 2
- Battery cable 0VDC 2
- Battery cable -48VDC 2
- Communication cable 1
- L-Support 2
- Radio 4478 (4T4R) (incl. 20 W Total Output Power) 3
- Circular Power cable connector 2-pos 10mm2 3
- 2-wire DC Adapter 3
- Common Installation material - Main remote 1
- Marking Set Main Remote 3-Sector 1
- Sealing Set, Feeder Connectors 6
- SFP+ SM 10.3Gb/s 1.4km 1310nm 6
- 16mm2, GNYE, 2m, 1 lug with 2 M6 holes, angle 90 3
- Single ERS Steel Bracket, pole/wall 3
- Bandwidth 5+5 MHz 6
- Output Power HWAC 20W incr.steps (per RU) 3
- Baseband 6620 incl. 75Mbps DL / 37 Mbps UL 1
- SIGNAL CABLE 1
- External Alarm Cable, 15m (MU) 2
- MOUNTING SET/RACK SCREW KIT 1
- ALM 8 1
- SIGNAL CABLE (Use SP-RPM 777 143/00750 for spare parts) 2
- Motorola Basic Package 3
- Secure OAM and Security Logging 3
- VoLTE Performance 3
- Integrated IP Security 3

Outdoor Configurations (AC):

4T4R configuration RBS6101:

Order Quantity 1 per site:

Description	Full Description	Nomenclature	APC	Price
6101 OUTDOOR -48VDC 3SECTOR, BB5212, 3RRU BC14, 40W, 4T4R MIMO 5+5 MHZ	-	TT3245	051	\$73,450.00
-48V DC TO 230VAC FOR RBS 6101	-	DDN2426	051	\$2,240.00

A global base frame is required for non-battery backup solutions. Order Quantity 1 per site:

Description	Full Description	Nomenclature	APC	Price
GBF 6101 BASE FRAME, SIDE INLETS	-	DDN2429	051	\$430.00

If battery backup is required, order Quantity 1 per site of the following. Go to the Product Catalog "eNodeB Battery Backup" page to order, based on the different options for this cabinet in its respective section(s):

Description	Full Description	Nomenclature	APC	Price
PREPARE OUTDOOR AC 1BAY ENODEB FOR	-	DDN2665	051	\$570.00

If BBS6101 is selected as a battery backup solution, order Quantity 2 per site of the following. One for the RBS6101 cabinet, one for the BBS6101 enclosure:

Description	Full Description	Nomenclature	APC	Price
GBF 6101 BASE FRAME, SIDE INLETS	-	DDN2429	051	\$430.00

Support for Maximum Cell Range up to 100 km:

Description	Full Description	Nomenclature	APC	Price
MAXIMUM CELL RANGE, UP TO 100 KM FEATURE	-	DDN2424	051	\$1,810.00

External Alarm Requirements:

If the operator requires that external alarms be interconnected through the eNodeB, then a System Alarm Unit (SAU) must be purchased.

For the eNodeB types, one can have up to 32 separate external alarms. Order Quantity 1 of DDN1431 per site for 8 external alarms. In addition, order Quantity 1 per site of DDN1434 as an option, if requirement is for 32 external alarms.

Description	Full Description	Nomenclature	APC	Price
SAU - SUPPORT ALARM UNIT KIT (8 ALARMS) INCLUDING OVP KIT	-	DDN1431	051	\$90.00
SAU KIT, DF-OVP V3, 10M (32 ALARMS)	-	DDN1434	051	\$130.00

SITE SOLUTIONS, ANTENNAS AND ANCILLARIES REQUIREMENTS:

Go to Product Catalog 'Site Ancillary for Public Safety LTE' for ancillary items and associated ordering rules. Go to Product Catalog 'eNodeB Antenna' page for antennas.

SURGE PROTECTION REQUIREMENTS:

As power is fed separately on copper cables, surge protection on the DC cables between the BB and RRU near the eNB requires Surge Protection Device (SPD) kits. Note that SPDs differ among the RBS models as follows.

For the outdoor RBS 6101 or RBS 6301 eNodeB types, order Quantity 1 of the SPD kit.

Description	Full Description	Nomenclature	APC	Price
-------------	------------------	--------------	-----	-------

SURGE PROTECTION DEVICE, SPD KIT -4	-	DDN2596	051	\$120.00
--	---	---------	-----	----------

For the Indoor BB6620 with RRUs, order Quantity 1 per site of DDN2403 DC Surge Protection, assuming 3 sectors per site:

Description	Full Description	Nomenclature	APC	Price
DC SURGE PROTECTION, 3 RRU	-	DDN2403	051	\$290.00

The RRUs themselves are equipped with SPDs for (i) overvoltage/overcurrent protection for the external alarm ports (ii) overvoltage/overcurrent protection for the ALD (RET) port, and (iii) DC power input protection from lightning currents.

Spares

NOTE: Recommended quantities are one per market, except for the Baseband and Remote Radio Unit, which are 1 for every 50 hardware units deployed.

JUMP TO ...[MODEL](#)[FEATURES](#)[CONFIGURATION](#)[SHIP CARD](#)**MODEL**

eNodeB Band Class 20**Features**

General Information

The LTE Radio System is a modular system that enables Public Safety-LTE (PS-LTE) and Mission Critical (MC) Operators, amongst others, address Mobile Broadband (MBB) driven opportunities and transform their radio access networks (RANs) by leveraging a multi-standard, multi-band and multi-layer (as applicable) architecture. This is complemented by delivering industry-leading performance on the smallest site footprint with the lowest energy consumption. This system consists of hardware and software for radio, baseband, power and enclosure. The LTE Radio System is packaged for Indoor or Outdoor configurations, in AC or DC power with scalable battery backup options. Antenna and site solutions complete these RAN offerings and can be found under Antenna System (please refer to "Public Safety LTE" eCAT page under the Radio Access Network/Antenna System) and Site Ancillary (please refer to "Public Safety LTE" eCAT page under the Radio Access Network/Site Ancillary), respectively.

A baseline 3-sector eNB site consists of one baseband (BB) and three radios in Band-20. The radios are two port radios. Each port is transmit/receive (Tx/Rx) capable for upto 2x2 MIMO configuration per radio. Note that while the radio covers the span of the specified bands, licenses are required to support the necessary channel bandwidth requirements.

The cabinets, rack deployables or enclosures are as follows:

- Indoor open rack deployable eNodeB (-48V DC) BB 6620
- Outdoor cabinet eNodeB (-48V DC) RBS 6101. AC version available
- Outdoor cabinet eNodeB (AC) Power 6135 BB 6620
- Compact Outdoor cabinet eNodeB (-48V DC) RBS 6301. AC version available.

Feature Inclusions:

- 3GPP Compliant Air Interface on LTE and LTE-Advanced
- Standard Indoor and Outdoor Enclosures - Commercial grade zone 4 approved standard enclosures for indoor and outdoor deployments of PS LTE eNodeB
- Default configuration consists of:
 - 3-sector eNB site including one baseband (BB) and three radios in Band-20.
 - 5 MHz UL and 5 MHz DL
 - Support for 2-Transmit and 2-Receive (2T2R)
 - Configurations with Basebands (BBs) 5212 or 6620 with baseline capacity of 75

Mbps DL and 37.5 Mbps UL

- o Up to 40W of power configurable per radio
- o Base Software including the Basic Motorola VP
- Features are classified in value packages (VPs). Multiple features can be in a VP. Sometimes, if applicable, VPs can be the feature's name itself.
 - o Basic Motorola VP including the following subset VPs (part of default configuration):
 - § LTE Base Package
 - § Differentiated Mobile Broadband
 - § IPv6
 - § Location Support
 - § RAN Data Collection
 - § Self-Organizing Networks
 - § VoLTE
 - § High Speed UE
 - o CoMP VP
 - o VoLTE Performance VP
 - o CS Fallback VP
 - o High Load Handling VP
 - o 4x2 Downlink MIMO VP
 - o 4-Way Receiver Diversity VP
 - o Shared Networks VP
 - o Integrated IP Security VP
 - o Secure OAM and Security Logging VP
 - o Large eNodeB VP
 - o Multicarrier Load Management VP
 - o Combined Cell VP
 - o Carrier Aggregation VP
 - o Maximum Cell Range, up to 100 km VP
 - o Extended Cell Range 15-30 km VP

Ordering Information

Ordering Requirements:

Best practice on RBS HW, SW, antenna and site solutions selection - The sub-sections in this page either provide the items needed or points to the page(s) where the items can be found to fulfill the following requirements to:

- 1) Determine base terminal equipment (BTE) requirements (LAN, fiber, MPLS...)
- 2) Determine site synchronization requirements (GPS eNB site and NTP at the core...)
- 3) Determine AC or DC, indoor or outdoor and battery backup time requirements
- 4) Select RBS and mounting options (as applicable)
- 5) Select RBS features (radio power, eNB capacity, channel BW requirements and optional features...)
- 6) Determine external alarm requirements
- 7) Determine site solutions/ancillaries and antenna requirements
- 8) Determine surge protection and lightning (SPD for DC power and/or OVP for RF) requirements based on RBS selection and site solution

Unless otherwise specified, for RBS items and/or features or VPs, either order quantity 1 per site or order quantity 1 per RRU is specified. When it is order quantity 1 per RRU and a default RBS model is selected, since the default RBS consists of 3 RRUs, Order quantity 3 in total.

The MSI region must contact regional Ericsson to obtain a quote to have the eNodeBs commissioned. When requesting these services from Ericsson, the recommended software load is 18.Q4.3, which is compatible with the latest releases for LXN 6000, LXN 7100, LXN 8000, and LXN 81000. End of Support for this load from Ericsson is 2021-08-31. In 2020, the Broadband product team is certifying the latest Ericsson eNodeB release, which will be available in future off-ramps.

Configuration

BASE TERMINAL EQUIPMENT REQUIREMENTS:

If using Multi-protocol Label Switching (MPLS) termination, every eNodeB model requires a Base Terminal Equipment (BTE) device. Go to the "eNodeB L2 Switch" pCAT page to view the different options for this device.

DC power cable(s) will be required between the switch and the eNB if using copper for

backhaul. Order Quantity One per BTE power supply:

Description	Full Description	Nomenclature	APC	Price
DC POWER CABLE 2-POLE OPEN END 1.5	-	DDN2471	051	\$50.00

SITE SYNCHRONIZATION REQUIREMENTS:

The Global Positioning System (GPS) receives a GPS timing signal that is used for synchronization of the eNodeB. GPS Antenna Kit consists of a GPS active antenna, GPS receiver unit, surge arrestor, grounding kit, sealing set, clamp kit, earthing cable, GPS mounting support. MSI RAN solution requires every eNodeB model to have a GPS kit. Order Quantity 1 per site of GPS Antenna Kit.

Based on site requirements 2 lengths of 1/4 " LDF will be needed (**ANT**| Nm -----1/4"LDF-----
-7/16DINm|**Lightning Protection**|7/16DINm ----- 1/4"LDF ----- SMAm|**GPS Rvr**) . Go to the Product Catalog "Transmission Line 1/4 Super Flexible Kits" page to order the feeder, based on the length required and the connectors, on both sides of the feeder.

If GPS mounting is needed for the GPS receiver unit, order Quantity 1 per site for the Din Rail Mounting Set.

Description	Full Description	Nomenclature	APC	Price
GPS ANTENNA KIT	-	DDN1884	051	\$572.00
SET OF MATERIALS/DIN RAIL MOUNTING SET	-	DDN1335	051	\$10.00

RBS INDOOR OR OUTDOOR ENVIRONMENT, POWER AND BATTERY BACKUP TIME REQUIREMENTS:

Site specifics on power plants will drive the power plant selection to be provided by the eNB.

The cabinets, rack deployables or enclosures are as follows to support the RBS selection, based on their indoor or outdoor suitability, DC or AC and battery backup availabilities:

- Indoor open rack deployable eNodeB (-48V DC) BB 6620. DC version available.
- Outdoor cabinet eNodeB (-48V DC) RBS 6101. Both DC and AC versions available. Battery backup in AC option.
- Outdoor cabinet eNodeB (AC) Power 6135 BB 6620. AC version available.
- Compact Outdoor cabinet eNodeB (-48V DC) RBS 6301. Both DC and AC version available. Battery backup in AC option.

Note that for outdoor configurations, BBS/BBU battery blocks are charged with -48V by the eNB

(RBS) rectifiers. Therefore, when ordering a BBU/BBS RBS solution, an AC eNodeB should be selected. Note that PBC solutions are to be used for indoor DC configuration(s).

Go to the Product Catalog "eNodeB Battery Backup" page to order, based on the different options for this cabinet in its respective section(s).

RBS SELECTION:

The structure for B20 is based on either 2-Transmit, 2-Receive (2T2R) usage in either DC or AC for outdoor or indoor configurations. The default RBS configuration comes with 3 remote radio units (RRUs), a radio for each sector, configurable to be radiating up to 40W per radio. It also comes standard with basic Motorola Value Pack covering 3 sectors. For mounting options for the RRUs, please refer to the Product Catalog "Site Ancillary for Public Safety LTE" page.

OUTDOOR CONFIGURATIONS (DC):

RBS6101:

Order Quantity 1 per site:

Description	Full Description	Nomenclature	APC	Price
6101 OUTDOOR -48VDC 3SECTOR, BB5212, 3RRU BC20, 40W, 2X2 MIMO 5+5 MHZ	-	TT3265	051	\$48,020.00

For mounting the site over the generic base frame (GBF) which itself connects to the site ground, use the following. Order Quantity 1 per site:

Description	Full Description	Nomenclature	APC	Price
GBF 6101 BASE FRAME, SIDE INLETS	-	DDN2429	051	\$430.00

RBS6301:

Order quantity 1 per site:

Description	Full Description	Nomenclature	APC	Price
6301 OUTDOOR -48VDC 3SECTOR, BB5212, 3RRU BC20, 40W, 2X2 MIMO 5+5 MHZ	-	TT3267	051	\$47,530.00

For mounting the site to a wall, use the following kit. Order Quantity 1 per site:

Description	Full Description	Nomenclature	APC	Price
-------------	------------------	--------------	-----	-------

WALL MOUNT KIT REAR FOR RBS 6301 AND BBS 6301	-	DDN2401	051	\$640.00
--	---	---------	-----	----------

For mounting the site over the GBF, which itself connects to the site ground, use the following.
Order Quantity 1 per site:

Description	Full Description	Nomenclature	APC	Price
GENERIC BASE FRAME FOR RBS 6301 AND	-	DDN2402	051	\$400.00

OUTDOOR CONFIGURATIONS (AC):

RBS6101:

Order Quantity 1 per site:

Description	Full Description	Nomenclature	APC	Price
6101 OUTDOOR -48VDC 3SECTOR, BB5212, 3RRU BC20, 40W, 2X2 MIMO 5+5 MHZ	-	TT3265	051	\$48,020.00
-48V DC TO 230VAC FOR RBS 6101	-	DDN2426	051	\$2,240.00

A global base frame is required for non-battery backup solutions. Order Quantity 1 per site:

Description	Full Description	Nomenclature	APC	Price
GBF 6101 BASE FRAME, SIDE INLETS	-	DDN2429	051	\$430.00

If battery backup is required, order Quantity 1 per site of the following. Go to the Product Catalog "eNodeB Battery Backup" page to order, based on the different options for this cabinet in its respective section(s):

Description	Full Description	Nomenclature	APC	Price
PREPARE OUTDOOR AC 1BAY ENODEB FOR	-	DDN2665	051	\$570.00

If BBS6101 is selected as a battery backup solution, order Quantity 2 per site of the following, one for the RBS6101 cabinet, one for the BBS6101 enclosure:

Description	Full Description	Nomenclature	APC	Price
GBF 6101 BASE FRAME, SIDE INLETS	-	DDN2429	051	\$430.00

RBS6301:

Order Quantity 1 per site:

Description	Full Description	Nomenclature	APC	Price
6301 OUTDOOR -48VDC 3SECTOR, BB5212, 3RRU BC20, 40W, 2X2 MIMO 5+5 MHZ	-	TT3267	051	\$47,530.00
-48V DC TO 230VAC FOR RBS 6301	-	DDN2428	051	\$2,100.00

For mounting the site to a wall, use the following kit. Order Quantity 1 per site:

Description	Full Description	Nomenclature	APC	Price
WALL MOUNT KIT REAR FOR RBS 6301 AND BBS 6301	-	DDN2401	051	\$640.00

For mounting the site over the GBF, which itself connects to the site ground, use the following. Order Quantity 1 per site:

Description	Full Description	Nomenclature	APC	Price
GENERIC BASE FRAME FOR RBS 6301 AND	-	DDN2402	051	\$400.00

Power 6135:

Order Quantity 1 per site:

--	--	--	--	--

Description	Full Description	Nomenclature	APC	Price
6135 OUTDOOR ENCL 3SECTOR, BB6620, 3RRU BC20, 40W, 2X2 MIMO 5+5 MHZ	-	TT3266	051	\$48,120.00

Go to the Product Catalog page "eNodeB Battery Backup" to order, based on the different battery backup options for this cabinet in its respective sections(s).

Indoor Configurations (DC):

Go to the Product Catalog "eNodeB Battery Backup" page to order, based on the different battery backup options for this cabinet in its respective sections(s).

BB6220 with RRU:

Order Quantity 1 per site:

Description	Full Description	Nomenclature	APC	Price
6620 INDOOR -48VDC 3SECTOR, 3RRU BC20, 40W, 2X2 MIMO 5+5 MHZ	-	TT3269	051	\$43,790.00

Go to the Product Catalog page "eNodeB Battery Backup" to order, based on the different battery backup options for this cabinet in its respective sections(s).

If a 19" rack is needed, the following 2.35 ft. rack (in height) can be used. Order Quantity 1 per site:

Description	Full Description	Nomenclature	APC	Price
RACK FRAME 19, BASIC KIT WALL, 16U	-	DDN2447	051	\$120.00

FEATURE SELECTION:

All the following features or VPs are priced per sector and per 20 MHz carrier (order quantity 1 per RRU):

License to Increase Bandwidth by 5+5 MHz Increment

Order Quantity 1 per RRU:

License to Increment Radio Power by 20W

Order Quantity 1 per RRU:

All the following features or VPs are priced per sector and per 20MHz carrier (order

Quantity 1 per RRU):

Support for IP Security:

VoLTE Performance Package:

Description	Full Description	Nomenclature	APC	Price
VOLTE PERFORMANCE LICENSE, PER ENODE B SECTOR	-	TT2840	051	\$320.00

Support for CS Fallback:

Description	Full Description	Nomenclature	APC	Price
CS FALLBACK	-	TT3093	051	\$130.00

Support for High Load Handling:

Description	Full Description	Nomenclature	APC	Price
HIGH LOAD HANDLING	-	TT3092	051	\$620.00

Support for Coordinated Multi-Point Transmission (CoMP):

Description	Full Description	Nomenclature	APC	Price
COORDINATED MULTIPOINT TRANSMISSION FEATURE	-	DDN2422	051	\$900.00

Quad Antenna Support 4X2 Downlink MIMO:

Description	Full Description	Nomenclature	APC	Price
4 X 2 DOWNLINK MIMO	-	TT3095	051	\$500.00

Quad Antenna Support 4-Way Receiver Diversity:

Description	Full Description	Nomenclature	APC	Price
-------------	------------------	--------------	-----	-------

4 WAY RECEIVE DIVERSITY SOFTWARE	-	TT2763	051	\$1,000.00
----------------------------------	---	--------	-----	------------

Support for Shared Networks:

Description	Full Description	Nomenclature	APC	Price
SHARED NETWORKS	-	TT3096	051	\$3,440.00

Support for Secure OAM and Security Logging:

Description	Full Description	Nomenclature	APC	Price
SECURE OAM AND SECURITY LOGGING	-	DDN2448	051	\$50.00

Support for Large eNodeB, starting with the 7th cell and beyond:

Description	Full Description	Nomenclature	APC	Price
LARGE ENODEB FEATURE	-	DDN2423	051	\$50.00

Support for Multi-Carrier Load Management:

Description	Full Description	Nomenclature	APC	Price
MULTICARRIER LOAD MANAGEMENT	-	TT3094	051	\$780.00

Support for Combined Cell:

Description	Full Description	Nomenclature	APC	Price
COMBINED CELL	-	DDN2449	051	\$1,070.00

Support for Carrier Aggregation:

Description	Full Description	Nomenclature	APC	Price
CARRIER AGGREGATION FEATURE	-	DDN2425	051	\$1,010.00

Support for Maximum Cell Range up to 100 km:

Description	Full Description	Nomenclature	APC	Price
MAXIMUM CELL RANGE, UP TO 100 KM FEATURE	-	DDN2424	051	\$1,810.00

EXTERNAL ALARM REQUIREMENTS:

If the operator requires that external alarms be interconnected through the eNodeB, then a System Alarm Unit (SAU) must be purchased.

For the eNodeB types, one can have up to 32 separate external alarms. Order Quantity 1 of DDN1431 per site for 8 external alarms. In addition, order Quantity 1 per site of DDN 1434 as an option, if the requirement is for 32 external alarms

Description	Full Description	Nomenclature	APC	Price
SAU - SUPPORT ALARM UNIT KIT (8 ALARMS) INCLUDING OVP KIT	-	DDN1431	051	\$90.00
SAU KIT, DF-OVP V3, 10M (32 ALARMS)	-	DDN1434	051	\$130.00

SITE SOLUTIONS, ANTENNAS AND ANCILLARIES REQUIREMENTS:

Go to the Product Catalog page "Site Ancillary for Public Safety LTE" for ancillary items and associated ordering rules. Go to the Product Catalog "eNodeB Antenna" page for antennas.

SURGE PROTECTION REQUIREMENTS:

As power is fed separately on copper cables, surge protection on the DC cables between the BB and RRU near the eNB requires Surge Protection Device (SPD) kits. Note that SPDs differ among the RBS models as follows.

For the outdoor RBS 6101 or RBS 6301 eNodeB types, order Quantity 1 of the SPD kit.

Description	Full Description	Nomenclature	APC	Price
SURGE PROTECTION DEVICE, SPD KIT -4	-	DDN2596	051	\$120.00

For the Indoor BB6620 with RRUs, order Quantity 1 per site of DDN2403 DC Surge Protection,

assuming 3 sectors per site:

Description	Full Description	Nomenclature	APC	Price
DC SURGE PROTECTION, 3 RRU	-	DDN2403	051	\$290.00

The RRUs themselves are equipped with SPDs for (i) overvoltage/overcurrent protection for the external alarm ports (ii) overvoltage/overcurrent protection for the ALD (RET) port, and (iii) DC power input protection from lightning currents.

Spares

NOTE: Recommended quantities are one per market, except for the Baseband and Remote Radio Unit, which are 1 for every 50 hardware units deployed. For the fan tray, it is recommended to procure Quantity 1 for every 10 radios deployed.

RBS6101 and RBS6301

eNodeB Band Class 26**FEATURES**

GENERAL INFORMATION

The LTE Radio System is a modular system that enables Public Safety LTE (PS-LTE) and Mission Critical (MC) operators, amongst others, to address Mobile Broadband (MBB) driven opportunities and transform their radio access networks (RANs) by leveraging a multi-standard, multi-band and multi-layer architecture, as applicable. This is complemented by delivering industry-leading performance on the smallest site footprint with the lowest energy consumption. This system consists of hardware and software for radio, baseband, power and enclosure. The LTE Radio System is packaged for Indoor or Outdoor configurations, in AC or DC power, with scalable battery backup options. Antenna and site solutions complete these RAN offering and can be found on Product Catalog page "eNodeB Antenna" and Product Catalog page "Site Ancillary for Public Safety LTE".

A baseline 3-sector eNB site consists of one baseband (BB) and three radios in Band 26D (B26D) UL:814-835, DL:859-880 MHz.. The radios are two-port radios. Each port is transmit/receive (Tx/Rx) capable for up to 2X2 MIMO configuration per radio. Note that while the radio covers the span of the specified bands, licenses are required to support the necessary channel bandwidth requirements.

The cabinets, rack deployables or enclosures, are as follows:

- Indoor open rack deployable eNodeB (-48V DC) BB 6620.
- Outdoor cabinet eNodeB (-48V DC) RBS 6101. AC version available.
- Outdoor cabinet eNodeB (AC) Power 6135 BB 6620.
- Compact Outdoor cabinet eNodeB (-48V DC) RBS 6301. AC version available.

FEATURE INCLUSIONS

- 3GPP Compliant Air Interface on LTE and LTE-Advanced.
- Standard Indoor and Outdoor Enclosures - Commercial grade zone 4 approved standard enclosures for indoor and outdoor deployments of PS LTE eNodeB
- Default configuration consists of
 - 3-sector eNB site, including one baseband (BB) and three radios in Band 26 (B26).
 - 5MHz UL and 5 MHz DL
 - Support for either 2-Transmit and 4-Receive (2T4R) or 4-Transmit and 4-Receive (4T4R)
 - To fully utilize 4T or 4R, additional quad antenna support features are required
- Configurations with Basebands ((BBs) 5212 or 6620 with baseline capacity of 75 Mbps DL and 37.5 Mbps UL
- Up to 40W of power configurable per radio
- Base Software including the Basic Motorola VP

- Features are classified in value packages (VPs). Multiple features can be in a VP. Sometimes, if applicable, VPs can be the feature's name itself.
 - Basic Motorola VP including the following subset VPs (part of default configuration):
 - LTE Base Package
 - Differentiated Mobile Broadband
 - IPv6
 - Location Support
 - RAN Data Collection
 - Self-organizing Networks
 - VoLTE
 - High Speed UE
 - CoMP VP
 - VoLTE Performance VP
 - CS Fallback VP
 - High Load Handling VP
 - 4X2 Downlink MIMO VP
 - 4-way Receiver Diversity VP
 - Integrated IP Security VP
 - Secure OAM and Security Logging VP
 - Large eNodeB VP
 - Multicarrier Load Management VP
 - Combined Cell VP
 - Carrier Aggregation VP
 - Maximum Cell Range, up to 100 km VP

Ordering Information

Best practices on RBS HW, SW, antenna and site solutions selection - The subsections in this page either provide the items needed or points to the page(s) where the items can be found to fulfill the following requirements to:

1. Determine base terminal equipment (BTE) requirements (LAN, fiber, MPLS...)
2. Determine site synchronization requirements (GPS eNB site and NTP at the core...)
3. Determine AC or DC, indoor or outdoor and battery backup time requirements
4. Select RBS and mounting options (as applicable)
5. Select RBS features (radio power, eNB capacity, channel BW requirements and optical features...)
6. Determine external alarm requirements.
7. Determine site solutions/ancillaries and antenna requirements
8. Determine surge protection and lightning (SPD for DC power and/or OVP for RF) requirements, based in RBS selection and site solution.

Unless otherwise specified, for RBS items and/or features or VPs, either order Quantity 1 per site, or order Quantity 1 per RRU is specified. When it is Order Quantity 1 per RRU and a default RBS model is selected, since the default RBS consists of 3 RRUs. Order Quantity 3, in total.

The MSI region must contact regional Ericsson to obtain a quote to have the eNodeBs commissioned. When requesting these services from Ericsson, the recommended software load is 18.Q4.3, which is compatible with the latest releases for LXN 6000, LXN 7100, LXN 8000, and LXN 81000. End of Support for this load from Ericsson is 2021-08-31. In 2020, the Broadband product team is certifying the latest Ericsson eNodeB release, which will be available in future off-ramps.

Configuration

Ordering Requirements and Models

BASE TERMINAL EQUIPMENT REQUIREMENTS:

If using Multi-protocol Label Switching (MPLS) termination, every eNodeB model requires a Base Terminal Equipment (BTE) device. Go to the "eNodeB L2 Switch" pCAT page to view the different options for this device.

DC power cable(s) will be required between the switch and the eNB if using copper for backhaul. Order Quantity One per BTE power supply:

Description	Full Description	Nomenclature	APC	Price
DC POWER CABLE 2-POLE OPEN END 1.5	-	DDN2471	051	\$50.00

SITE SYNCHRONIZATION REQUIREMENTS:

The Global Positioning System (GPS) receives a GPS timing signal that is used for synchronization of the eNodeB. GPS Antenna Kit consists of a GPS active antenna, GPS receiver unit, surge arrestor, grounding kit, sealing set, clamp kit, earthing cable, GPS mounting support. MSI RAN solution requires every eNodeB model to have a GPS kit. Order Quantity 1 per site of GPS Antenna Kit.

Based on site requirements 2 lengths of 1/4 " LDF will be needed (**ANT| Nm -----1/4"LDF-----
-7/16DINm|Lightning Protection|7/16DINm ----- 1/4"LDF ----- SMAm|GPS Rvr**) . Go to the Product Catalog "Transmission Line 1/4 Super Flexible Kits" page to order the feeder, based on the length required and the connectors, on both sides of the feeder.

If GPS mounting is needed for the GPS receiver unit, order Quantity 1 per site for the Din Rail Mounting Set.

Description	Full Description	Nomenclature	APC	Price

GPS ANTENNA KIT	-	DDN1884	051	\$572.00
SET OF MATERIALS/DIN RAIL MOUNTING SET	-	DDN1335	051	\$10.00

Based on site requirements, a 1/4" feeder with N-Type Male connectors at both sides of the feeder would be required between the surge arrestor and the GPS active antenna. Go to the Product Catalog "Transmission Line 1/4" Super Flexible Kits" page to order the feeder, based on the length required and the N-type male connectors, on both sides of the feeder.

If GPS mounting is needed for the GPS receiver unit, order Quantity 1 per site of the following:

Description	Full Description	Nomenclature	APC	Price
SET OF MATERIALS/DIN RAIL MOUNTING SET	-	DDN1335	051	\$10.00

RBS INDOOR OR OUTDOOR ENVIRONMENT, POWER AND BATTERY BACKUP TIME REQUIREMENTS:

Site specifics on power plants will drive the power plant selection to be provided by the eNB.

The cabinets, rack deployables or enclosures are as follows to support the RBS selection, based on their indoor or outdoor suitability, DC or AC and battery backup availabilities:

- Indoor open rack deployable eNodeB (-48V DC) BB 6620. DC version available.
- Outdoor cabinet eNodeB (-48V DC) RBS 6101. Both DC and AC versions available. Battery backup in AC option.
- Outdoor cabinet eNodeB (AC) Power 6135 BB 6620. AC version available.
- Compact Outdoor cabinet eNodeB (-48V DC) RBS 6301. Both DC and AC version available. Battery backup in AC option.

Note that for outdoor configurations, BBS/BBU battery blocks are charged with -48V by the eNB (RBS) rectifiers. Therefore, when ordering a BBU/BBS RBS solution, an AC eNodeB should be selected. Note that PBC solutions are to be used for indoor DC configuration(s).

Go to the Product Catalog "eNodeB Battery Backup" page to order, based on the different options for this cabinet in its respective section(s).

RBS SELECTION:

The structure for B26 is based on 2-Transmit, 2-Receive (2T2R) usage in either DC or AC for outdoor or indoor configurations. The default RBS configuration comes with 3 remote radio units (RRUs), a radio for each sector, configurable to be radiating up to 40W per radio. It also comes standard with basic Motorola Value Pack covering 3 sectors. For mounting options for the RRUs, please refer to the Product Catalog "Site Ancillary for Public Safety LTE" page.

OUTDOOR CONFIGURATIONS (DC):

RBS6101:

Order Quantity 1 per site:

Description	Full Description	Nomenclature	APC	Price
6101 OUTDOOR -48VDC 3SECTOR, BB5212, 3RRU BC26D, 40W, 2X2 MIMO 5+5 MHZ	-	TT3270	051	\$48,020.00

For mounting the site over the generic base frame (GBF) which itself connects to the site ground, use the following. Order Quantity 1 per site:

Description	Full Description	Nomenclature	APC	Price
GBF 6101 BASE FRAME, SIDE INLETS	-	DDN2429	051	\$430.00

RBS6301:

Order quantity 1 per site:

Description	Full Description	Nomenclature	APC	Price
6301 OUTDOOR -48VDC 3SECTOR, BB5212	-	TT3272	051	\$47,530.00

For mounting the site to a wall, use the following kit. Order Quantity 1 per site:

Description	Full Description	Nomenclature	APC	Price
GENERIC BASE FRAME FOR RBS 6301 AND	-	DDN2402	051	\$400.00

For mounting the site over the GBF, which itself connects to the site ground, use the following. Order Quantity 1 per site:

Description	Full Description	Nomenclature	APC	Price
GENERIC BASE FRAME FOR RBS 6301 AND	-	DDN2402	051	\$400.00

OUTDOOR CONFIGURATIONS (AC):

RBS6101:

Order Quantity 1 per site:

Description	Full Description	Nomenclature	APC	Price
6101 OUTDOOR -48VDC 3SECTOR, BB5212, 3RRU BC26D, 40W, 2X2 MIMO 5+5 MHZ	-	TT3270	051	\$48,020.00
-48V DC TO 230VAC FOR RBS 6101	-	DDN2426	051	\$2,240.00

A global base frame is required for non-battery backup solutions. Order Quantity 1 per site:

Description	Full Description	Nomenclature	APC	Price
GBF 6101 BASE FRAME, SIDE INLETS	-	DDN2429	051	\$430.00

If battery backup is required, order Quantity 1 per site of the following. Go to the Product Catalog "eNodeB Battery Backup" page to order, based on the different options for this cabinet in its respective section(s):

Description	Full Description	Nomenclature	APC	Price
PREPARE OUTDOOR AC 1BAY ENODEB FOR	-	DDN2665	051	\$570.00

If BBS6101 is selected as a battery backup solution, order Quantity 2 per site of the following, one for the RBS6101 cabinet, one for the BBS6101 enclosure:

Description	Full Description	Nomenclature	APC	Price
GBF 6101 BASE FRAME, SIDE INLETS	-	DDN2429	051	\$430.00

RBS6301:

Order Quantity 1 per site:

Description	Full Description	Nomenclature	APC	Price
6301 OUTDOOR -48VDC 3SECTOR,				

BB5212	-	TT3272	051	\$47,530.00
-48V DC TO 230VAC FOR RBS 6301	-	DDN2428	051	\$2,100.00

For mounting the site to a wall, use the following kit. Order Quantity 1 per site:

Description	Full Description	Nomenclature	APC	Price
WALL MOUNT KIT REAR FOR RBS 6301 AND BBS 6301	-	DDN2401	051	\$640.00

For mounting the site over the GBF, which itself connects to the site ground, use the following. Order Quantity 1 per site:

Description	Full Description	Nomenclature	APC	Price
GENERIC BASE FRAME FOR RBS 6301 AND	-	DDN2402	051	\$400.00

Power 6135:

Order Quantity 1 per site:

Description	Full Description	Nomenclature	APC	Price
6135 OUTDOOR ENCL 3SECTOR, BB6620, 3RRU BC26D, 40W, 2X2 MIMO 5+5 MHZ	-	TT3271	051	\$48,120.00

Go to the Product Catalog "eNodeB Battery Backup" page to order, based on the different battery backup options for this cabinet in its respective sections(s).

Indoor Configurations (DC):

Go to the Product Catalog "eNodeB Battery Backup" page to order, based on the different battery backup options for this cabinet in its respective sections(s).

BB6220 with RRU:

Order Quantity 1 per site:

Description	Full Description	Nomenclature	APC	Price
-------------	------------------	--------------	-----	-------

6620 INDOOR -48VDC 3SECTOR, 3RRU BC26D, 40W, 2X2 MIMO 5+5 MHZ	-	TT3274	051	\$43,790.00
--	---	--------	-----	-------------

Go to the Product Catalog "eNodeB Battery Backup" to order, based on the different battery backup options for this cabinet in its respective sections(s).

If a 19" rack is needed, the following 2.35 ft. rack (in height) can be used. Order Quantity 1 per site:

Description	Full Description	Nomenclature	APC	Price
RACK FRAME 19, BASIC KIT WALL, 16U	-	DDN2447	051	\$120.00

FEATURE SELECTION:

License to Increase Throughput (75 Mbps CL/37.5 Mbps UL Increment)

Order Quantity 1 per site:

Description	Full Description	Nomenclature	APC	Price
5212/6620 HW UTILIZATION PACKAGE 75	-	DDN2450	051	\$3,170.00

License to Increase Bandwidth by 5+5 MHz Increment

Order Quantity 1 per RRU:

Description	Full Description	Nomenclature	APC	Price
INCREMENT BY 5+5 MHZ BANDWIDTH FOR LTE ENB	-	DDN2667	051	\$450.00

All the following features or VPs are priced per sector and per 20 MHz carrier (order Quantity 1 per RRU):

Support for IP Security:

Description	Full Description	Nomenclature	APC	Price
INTEGRATED IP SECURITY	-	DDN2666	051	\$150.00

VoLTE Performance Package:

Description	Full Description	Nomenclature	APC	Price
VOLTE PERFORMANCE LICENSE, PER ENODE B SECTOR	-	TT2840	051	\$320.00

Support for CS Fallback:

Description	Full Description	Nomenclature	APC	Price
CS FALLBACK	-	TT3093	051	\$130.00

Support for High Load Handling:

Description	Full Description	Nomenclature	APC	Price
HIGH LOAD HANDLING	-	TT3092	051	\$620.00

Support for Coordinated Multi-Point Transmission (CoMP):

Description	Full Description	Nomenclature	APC	Price
COORDINATED MULTIPOINT TRANSMISSION FEATURE	-	DDN2422	051	\$900.00

Quad Antenna Support 4X2 Downlink MIMO:

Description	Full Description	Nomenclature	APC	Price
4 X 2 DOWNLINK MIMO	-	TT3095	051	\$500.00

Quad Antenna Support 4-Way Receiver Diversity:

Description	Full Description	Nomenclature	APC	Price
4 WAY RECEIVE DIVERSITY SOFTWARE	-	TT2763	051	\$1,000.00

Support for Shared Networks:

Description	Full Description	Nomenclature	APC	Price
SHARED NETWORKS	-	TT3096	051	\$3,440.00

Support for Secure OAM and Security Logging:

Description	Full Description	Nomenclature	APC	Price
SECURE OAM AND SECURITY LOGGING	-	DDN2448	051	\$50.00

Support for Large eNodeB, starting with the 7th cell and beyond:

Description	Full Description	Nomenclature	APC	Price
LARGE ENODEB FEATURE	-	DDN2423	051	\$50.00

Support for Multi-Carrier Load Management:

Description	Full Description	Nomenclature	APC	Price
MULTICARRIER LOAD MANAGEMENT	-	TT3094	051	\$780.00

Support for Combined Cell:

Description	Full Description	Nomenclature	APC	Price
COMBINED CELL	-	DDN2449	051	\$1,070.00

Support for Carrier Aggregation:

Description	Full Description	Nomenclature	APC	Price
CARRIER AGGREGATION FEATURE	-	DDN2425	051	\$1,010.00

Support for Maximum Cell Range up to 100 km:

Description	Full Description	Nomenclature	APC	Price
-------------	------------------	--------------	-----	-------

Description	Full Description	Nomenclature	APC	Price
MAXIMUM CELL RANGE, UP TO 100 KM FEATURE	-	DDN2424	051	\$1,810.00

EXTERNAL ALARM REQUIREMENTS:

If the operator requires that external alarms be interconnected through the eNodeB, then a System Alarm Unit (SAU) must be purchased.

For the eNodeB types, one can have up to 32 separate external alarms. Order Quantity 1 per site of DDN 1431 for 8 external alarms. In addition, order Quantity 1 per site of DDN1434 as an option, if the requirement is for 32 external alarms.

Description	Full Description	Nomenclature	APC	Price
SAU - SUPPORT ALARM UNIT KIT (8 ALARMS) INCLUDING OVP KIT	-	DDN1431	051	\$90.00
SAU KIT, DF-OVP V3, 10M (32 ALARMS)	-	DDN1434	051	\$130.00

SITE SOLUTIONS, ANTENNAS AND ANCILLARY REQUIREMENTS:

Go to the Product Catalog page "Site Ancillary for Public Safety LTE" for ancillary items and associated ordering rules. Go to the Product Catalog "eNodeB Antenna" page for antennas.

SURGE PROTECTION REQUIREMENTS:

As power is fed separately on copper cables, surge protection on the DC cables between the BB and RRU near the eNB requires Surge Protection Device (SPD) kits. Note that SPDs differ among the RBS models as follows.

For the outdoor RBS 6101 or RBS 6301 eNodeB types, order Quantity 1 of the SPD kit.

Description	Full Description	Nomenclature	APC	Price
SURGE PROTECTION DEVICE, SPD KIT -4	-	DDN2596	051	\$120.00

For the Indoor BB6620 with RRUs, order Quantity 1 per site of DDN2403 DC Surge Protection, assuming 3 sectors per site:

--	--	--	--	--

Description	Full Description	Nomenclature	APC	Price
DC SURGE PROTECTION, 3 RRU	-	DDN2403	051	\$290.00

The RRUs themselves are equipped with SPDs for (i) overvoltage/overcurrent protection for the external alarm ports (ii) overvoltage/overcurrent protection for the ALD (RET) port, and (iii) DC power input protection from lightning currents.

Spares

NOTE: Recommended quantities are one per market, except for the Baseband and Remote Radio Unit, which are 1 for every 50 hardware units deployed. For the fan tray, it is recommended to procure Quantity 1 for every 10 radios deployed.

RBS6101 and RBS6301

Description	Full Description	Nomenclature	APC	Price
SPARE BASEBAND 5212 INITIAL HW PACK	-	TT3300	051	\$15,820.00
SPARE RADIO 2217 B26D	-	TT3302	051	\$8,320.00
GPS 03 01, GPS RECEIVER UNIT	-	DDN2595	051	\$3,810.00
FAN TRAY, 24 VDC, 1,0 A	-	DDN2593	051	\$1,720.00
PDU 03 01, POWER DISTRIBUTION UNIT	-	DDN2594	051	\$930.00

RBS6135 and BB6620 with RRUs

Description	Full Description	Nomenclature	APC	Price
SPARE BASEBAND 6620 INITIAL HW PACK	-	TT3301	051	\$10,820.00
SPARE RADIO 2217 B26D	-	TT3302	051	\$8,320.00
GPS 03 01, GPS RECEIVER UNIT	-	DDN2595	051	\$3,810.00
FAN TRAY, 24 VDC, 1,0 A	-	DDN2593	051	\$1,720.00

For the Indoor BB6620 with RRUs, order Quantity 1 per site of DDN2403 DC Surge Protection, assuming 3 sectors per site:

Description	Full Description	Nomenclature	APC	Price
DC SURGE PROTECTION, 3 RRU	-	DDN2403	051	\$290.00

The RRUs themselves are equipped with SPDs for (i) overvoltage/overcurrent protection for the external alarm ports (ii) overvoltage/overcurrent protection for the ALD (RET) port, and (iii) DC power input protection from lightning currents.

Model

eNB L2 Switch - DC Power

Ordering Information

Features

ERICSSON:

- The Router 6471/2 (R6471/2) and Router 6371 (R6371) combines multiple functions into a single platform that provides Layer 3 (IP) routing and Layer 2 (Ethernet) network aggregation, as well as advanced services for applications. The R6x71 series provides carrier-class reliability, scalability, performance, and an optimal power footprint.
 - R6371 is an outdoor rated and hardened router intended to be deployed with Baseband 6303 and remote radios.
 - R6471/2 is to be deployed inside outdoor or indoor enclosures or indoor in open rack deployments.
- The R6x71 platform supports the following functions:
 - Comprehensive range of interior and exterior gateway routing protocols.
 - Peering, edge aggregation.
 - End-to-end Ethernet transport services with direct connection to the access layer of the network.
 - Traffic management with Quality of Service (QoS) and traffic shaping.
 - Direct connection to the access layer of the network, which eliminates unnecessary network layers and reduces complexity.

EXTREME NETWORKS:

- The X460-G2 enables service providers to offer Ethernet/IP services cost-effectively for Evolved Radio Systems (ERS) Enclosure 6135 and baseband 6620 with remote radios on open racks, for deployments of 4G base stations.
- The 1RY size of the X460-G2 allows economical installation in cell site locations where space is limited. All Extreme Networks advanced routing and switching features, including IPv6, are available on this compact and powerful platform.

General Information

ERICSSON:

The eNB L2/L3 R6471/2 switch DC power supports IP/MPLS features, and comes with the following characteristics:

- • 2x GE / 10GE SFP+ ports unpopulated ports
- • 4x GE SFP ports unpopulated ports
- • 4x 100 / 1000 Base-T RJ45 ports
- • Operating Temp -40C to +55C
- • 1 RU and fits inside Ericsson eNB cabinet capable of handling depth 9.85 in

(25cm).

The eNB L2/L3 R6471/2 switch - DC power can support copper or fiber interfaces. If the switch is supporting fiber interfaces, then fiber plug-ins are to be ordered.

The eNB L2/L3 R6371 switch DC power supports IP/MPLS features, and comes with the following characteristics:

- 2x GE / 10GE SFP+ ports unpopulated ports
- 4x GE SFP ports unpopulated ports
- 1x 10 / 100 / 1000 Base-T Ethernet for Out-of-Band Management
- Operating Temp -40C to +46C
- Un-protected Environments Directly Exposed to Weather, IP65
- Dimensions of outdoor rated Router R6371 (H x W x D): 12.5 in x 7.9 in x 2.5 in (31.5cm x 20.0cm x 6.3cm).
- It is intended to be deployed with Outdoor Baseband 6303 eNodeB

The eNB L2/L3 R6371/2 switch - DC power is supporting fiber interfaces and fiber plug-ins are to be ordered.

EXTREME NETWORKS:

The eNB L2/L3 X460-G2 DC power switch supports the following features:

- MPLS Support, Dynamic Routing (OSPF), Full G.8032V2 Support
- IPv4/IPv6, VRF - Virtual Router Support
- 24x 10/100/1000 BASE-T (RJ-45) – 4 ports are combo ports
- 8 x 100/1000BASE-X (SFP) unpopulated ports (i.e. SFP connectors required) – 4 ports are combo ports
- 4 x 1GBASE-X SFP (unpopulated ports i.e. SFP connectors required)
- Operating Temp -0C to +50C
- 1 RU and fits inside *selected* Ericsson eNB cabinet capable of handling depth 16.94 in (43.03 cm).

Ordering Requirements

Ericsson eNB R6471/2 Switch: Recommended if MPLS is required at the eNB switch and for flexibility in deploying this switch with MSI approved eNodeB cabinets or in indoor open rack configurations:

1. There is a minimum quantity of 1 for the eNB switch
2. Router comes packaged with Base Package (including IP/MPLS) and Synchronization Services VP.
3. Baseline configuration includes 10 x 1G interfaces and 1 x 10G port capacity license.
4. Router can be mounted on 19" hosting shelf. This shelf can be integrated in the MSI approved enodeB enclosures.
5. Baseline also includes power cable, 19" hosting shelf and panel, one SFP+ (SFP+ SM 10.3Gb/s 1.4km 1310nm)
6. The use of additional capacity on the traffic ports requires SW licenses outside of what is in the baseline configuration.

Ericsson eNB R6371 Switch (With IP/MPLS Support): Recommended if MPLS is required at the eNB switch and for flexibility in deploying this switch with MSI approved eNodeB outdoor baseband 6303:

1. There is a minimum quantity of 1 for the eNB switch
2. Router comes packaged with Base Package (including IP/MPLS) and Synchronization Services VP.
3. Baseline configuration includes 6 x 1G interfaces and 1 x 10G port capacity license.
4. Baseline also includes power cable , one SFP+ (SFP+ SM 10.3Gb/s 1.4km 1310nm), one SFP (100/1000 TX SSR)
5. The use of additional capacity on the traffic ports requires SW licenses outside of what is in the baseline configuration.
6. R6371 can be mounted on pole or wall. This is outside of what is in the baseline configuration.

Extreme Networks eNB X460-G2 Switch: Recommended if MPLS is required at the eNB switch and if greater port capacity needed.

1. There is a minimum quantity of 1 for the eNB switch
2. If IP/MPLS support is required, qty 1 per switch of MPLS feature pack is required and to be ordered separately.
3. The X460-G2 can support up to four fiber SFP ports if fiber interface support is required. Order the SFP with the required distance support from the list of Extreme Networks SFP Spares below.

Configuration

Configuration

This subsection for each vendor switch contains:

- a) **Hardware** which includes: Switch Hardware, fan and power modules (if not packaged) and switch mounting (where applicable)
- b) **Options** which includes: SW features and Optics
- c) **Spares**

Models

Hardware

Ericsson Switch:

For R6471/2, order Quantity 1 per eNodeB Site:

Description	Full Description	Nomenclature	APC	Price

R6471 DC PACKAGE FROM ERS	-	TT3511	051	\$3,220.00
---------------------------	---	--------	-----	------------

Cabinet or open rack mounting is already included in the R6471 DC package. For R6371, order Quantity 1 per eNodeB Site.

Description	Full Description	Nomenclature	APC	Price
R6371 DC PACKAGE FROM ERS	-	TT3506	051	\$3,750.00

For R6371, outdoor mounting options can be either on a pole or a wall, depending on the option. Please select one or the other of the following:

For mounting on a pole, order Quantity 1 per R6371:

Description	Full Description	Nomenclature	APC	Price
POLE INSTALLATION KIT, 6371	-	DDN2817	051	\$220.00

For mounting on a wall, order Quantity 1 per R6371.

Description	Full Description	Nomenclature	APC	Price
WALL AND POLE MOUNTING KIT,6371	-	DDN2818	051	\$160.00

Extreme Network Switch:

For X460-G2, order Quantity 1 of the following per eNodeB site:

Description	Full Description	Nomenclature	APC	Price
X460-G2-24T-GE4-BASE DC VERSION	-	TT3500	055	\$2,890.00
SUMMIT FAN MODULE FB	-	DDN2811	055	\$230.00

For X460-G2, order Quantity 2 of the following per eNodeB site:

Description	Full Description	Nomenclature	APC	Price
SUMMIT 300W +24V/-48V DC POWER SUPPLY UNIT	-	DDN2810	055	\$620.00

Options

Ericsson Switch Optics:

Order Quantity 1 per switch port, depending on the port to be used in consideration of its characteristics:

Description	Full Description	Nomenclature	APC	Price
SFP+ SM 10.3GB/S 1.4KM 1310NM	-	DDN2377	051	\$40.00
100/1000 TX SSR, SFP	-	DDN2812	051	\$120.00

Extreme Switch Features:

Order Quantity 1 per switch:

Description	Full Description	Nomenclature	APC	Price
CORE LIC FROM ADV EDGE - X460/-G	-	TT3501	055	\$1,450.00
MPLS FEATURE PACK - X460/-G2	-	TT3502	055	\$1,450.00

Order Quantity 1 per switch port, depending on the port to be used in consideration of its characteristics:

Description	Full Description	Nomenclature	APC	Price
10/100/1000BASE-T SFP, HI	-	DDN1893	055	\$230.00

EPC NTP Server

Ordering Information

Features

The Network Timing Protocol Server (NTP) has the following characteristics:

- <15 ns RMS to UTC (USNO)
- <1X10⁻¹² Frequency accuracy
- Most popular timing signal inputs/outputs are standard in the base Timing I/O module (IRIG B, 10 MHz, 1 PPS, etc.)
- Four GbE ports standard, all with patented NTP hardware timestamping
- Web-based management with high security cipher suite.
- IPv6/IPv4 on all ports

For additional product information, please see Microsemi Model Number S650 at www.microsemi.com

General Information

The Microsemi Timing Protocol (NTP) SyncServer may be used for time synchronization of all eNBs (cell sites) in the LTE network when GPS is not available. It is a high reliability, secure appliance, utilizing multi-port network interfaces and multiple time reference technology.

The NTP server has FlexPort timing technology that efficiently and cost-effectively adds innovative "any signal, any connector" technology, eliminating the wasted space inherent with legacy style fixed-signal modules/BNCs.

The NTP S650 appliance has four dedicated and isolated GbE Ethernet ports, each equipped with NTP hardware time stamping. These are connected to a very high-speed microprocessor with microsecond accurate time stamps to assure high-bandwidth NTP performance. This more than meets the need of servicing 10,000 NTP requests per second.

Ordering Requirements

1. The NTP Timing Server must be ordered in a minimum quantity of 2 for redundancy. When ordering an NTP Timing Server, the first year of maintenance and support must be purchased per appliance. This should be done through Tigers. Please contact [Product Management](#) to obtain a current Maintenance and Support quote.
2. When NTP is ordered, an NTP Server Security Protocols Options must be ordered, also at a minimum quantity of 2 for redundancy.
3. When NTP is ordered, an NTP Server IO Timing Flex Module must be ordered, also at a

minimum quantity of 2 for redundancy.

4. When NTP is ordered, an NTP SS S6XX 50 ft. Cbl with Lightning Arrest and Antenna Kit must be ordered, also at a minimum quantity of 2 for redundancy.

5. The NTP Coax Cable TNC-BNC 100 ft. is optional and should be ordered if a 100 ft. coax cable is required.

6. If a cable length of greater than 100 ft. is required, please contact LTE Product Management or Engineering.

7. Order the standalone GPS antenna only if a spare is required.

Model

EVOLVED PACKET GATEWAY (EPG)

Ordering Information

General Information

It is a state-of-the-art SAE (System Architecture Evolution) gateway that combines Serving Gateway and Packet Data Network Gateway functions. The Serving Gateway (SGW) is the entity that terminates the interface towards the RAN and is the local mobility anchor for UEs (User Equipment).

The SGW maintains a buffer for each idle UE and holds the packets until the UE is paged and an RF channel re-established. The SGW maintains a connection to a PGW (Packet Data Network Gateway) for each UE. The PGW interfaces with the existing enterprise network. It is responsible for UE address assignment and is the source of packet based charging records for the UE. If a UE needs to be quarantined for security, device management or usage resolution issues, the PGW is used to restrict the UE to a specified address or subnet.

IP sessions are calculated based on the number of APNs (Access Point Names) that are required for the network. For example, if there is a default APN and IMS APN, you will need 2 IP sessions per subscription. This has to be worked with the design engineer who is working the deal.

With regard to power requirements, please note that the SSR 8020 platform will always be equipped with 8 PEMs.

** Please note that, as of System Release 7.0, the Converged Packet Gateway (CPG) will be superseded by the Evolved Packet Gateway (EPG). For additional information, please access the Intent-to-Cancel document at: http://compass.mot-solutions.com/doc/488523954/CPG_Intent_to_Cancel_Notice.pdf

For additional information, please review the EPG spec sheet at: http://compass.mot-solutions.com/doc/488594849/Product_SPEC_SHEET_EPG_Draft.pdf

Features

- EPS (Evolved Packet System) Bearer Management of Packet Data Network (PDN) connections.
- APN Management (multiple PDN per UE and APN based routing/QoS (Quality of Service)).
- QOS policy execution.
- UE IP address allocation.
- Servicing Gateway reselection.
- Idle mode support (buffer downlink and trigger paging procedure).

- Operations and Maintenance support: Configuration Management, Fault Management, Performance Management, Security Management, Software Management, Network Planning and Analysis, and Traffic Shaping.

Configuration

New System Order Guidelines

A new EPG system can be ordered as a package/bundle of both SW and HW. The EPG is licensed based upon the number of IP sessions. Please choose from one of the following when ordering a new EPG system:

Description	Full Description	Nomenclature	APC	Price
EPG SERVING AND PACKET GW 5K IP SESSIONS BUNDLE	-	TT2710	053	\$710,430.00
EPG SERVING AND PACKET GW 10K IP SESSIONS BUNDLE	-	TT2711	053	\$766,290.00
EPG SERVING AND PACKET GW 25K IP SESSIONS BUNDLE	-	TT2712	053	\$794,290.00
EPG SERVING AND PACKET GW 50K IP SESSIONS BUNDLE	-	TT2713	053	\$811,430.00
EPG SERVING AND PACKET GW 100K IP SESSIONS BUNDLE	-	TT2714	053	\$840,000.00
EPG SERVING AND PACKET GW 250K IP SESSIONS BUNDLE	-	TT2700	053	\$954,420.00
EPG SERVING AND PACKET GW 500K IP SESSIONS BUNDLE	-	TT2701	053	\$1,074,290.00
EPG SERVING AND PACKET GW 1M IP SESSIONS BUNDLE	-	TT2702	053	\$1,480,000.00

Existing System Capacity Expansion Guidelines

When ordering an EPG user license capacity expansion for an existing system, please choose from one of the following item numbers listed below. Please note that capacity expansions can only occur as mentioned. If the capacity expansion needs to span multiple steps, then all steps

in between need to be accounted for. For example, if a capacity expansion is needed for 5K to 25K, then 5K to 10K and 10K to 25K need to be accounted for:

Description	Full Description	Nomenclature	APC	Price
EPG HW/SW FROM 5K TO 10K IP SESSIONS	-	TT05853AA	053	\$77,140.00
EPG HW/SW FROM 10K TO 25K IP SESSIONS	-	TT05854AA	053	\$81,000.00
EPG HW/SW FROM 25K TO 50K IP SESSIONS	-	TT05855AA	053	\$85,050.00
EPG HW/SW FROM 50K TO 100K IP SESSIONS	-	TT05856AA	053	\$89,300.00
EPG HW/SW FROM 100K TO 150K IP SESSIONS	-	TT05857AA	053	\$89,300.00

General Information

FACTORY MUTUAL

UNDERWRITERS' LABORATORIES, MINE SAFETY & HEALTH ADMINISTRATION

FACTORY MUTUAL (FM) and UNDERWRITERS' LABORATORIES (UL)

Equipment approved by Factory Mutual and Underwriters' Laboratories as Intrinsically Safe and/or Non-incendive is generally accepted by code enforcing authorities for use in hazardous locations. Intrinsically Safe equipment is suitable for Division 1 & 2 locations. Non-incendive equipment is only suitable for Division 2 locations. Hazardous Locations are defined in Article 500 of the National Electrical Code (NEC) available from the National Fire Protection Association as NFPA/70.

HAZARDOUS (CLASSIFIED) LOCATIONS

Locations are classified depending on the properties of the flammable vapors, liquids or gases, or combustible dusts or fibers, which may be present and the likelihood that a flammable or combustible concentration or quantity is present.

The nature and degrees of a hazard existing at a particular location is denoted by specifying the location as being of Class I, II or III; Groups A, B, C, D, E, F, or G; and Division 1 or 2. The classes define the generic nature of the materials and Division the degree of hazard in the location.

CLASS I locations, flammable gas or vapor, are subdivided into Groups A, B, C and D. Article 500 of the NEC Provides a list of flammable gas or vapor within each group.

CLASS II locations, combustible dust, are subdivided into Groups E, F, and G. Group E contains metal dusts including aluminum and magnesium; Group F includes the coke, coal and charcoal dusts and Group G, the grain dusts.

CLASS III locations contain easily ignitable fibers or fillings in quantities to produce ignitable mixtures. Easily ignitable fibers and fillings include rayon, cotton, isle, jute, hemp, okum, and other similar materials.

DIVISION 1: Locations where the particular hazardous materials are present in the air in potentially flammable concentrations continuously, frequently, or intermittently under normal operating conditions. Division 1 approved equipment can also be used in Division 2 locations.

DIVISION 2: Locations, which might become hazardous in the event of a mechanical breakdown, accidental failure, or the abnormal operation of equipment.

TEMPERATURE CODES

In addition to being approved for use in a particular Class, Group and Division, equipment must be marked with Maximum Safe Operation Temperatures or Temperature Codes if a surface temperature exceeds 100°F. This further defines the acceptability of equipment for a

specified location depending on the ignition temperature of the material in the location.

UNDERWRITERS' LABORATORIES LISTED PRODUCTS UL

Listing is offered as an alternate to FM Approval for customers with UL preference. Most code enforcing authorities will accept FM or UL Approval.

MINE SAFETY and HEALTH ADMINISTRATION (MSHA)

MSHA is an agency of the federal government who employs Intrinsically Safe testing techniques to approve products for use in gassy mines or tunnels. The tests are similar to those used by FM and UL but limited to methane gas and coal type dust, which are, found in mine environments. Products approved for use by MSHA require a special identification label with the MSHA logo, approval number, product model and the words Permissible Radio Device.

BATTERIES

Factory Mutual, Underwriters' Laboratories, and Mine Safety and Health Administration ALL REQUIRE THAT ONLY THE BATTERIES THEY SPECIFY BE USED WITH APPROVED RADIOS. Use of non-specified batteries voids these approvals. Batteries approved by one agency are not acceptable to another agency. The approved batteries are specified on the radio labels.

OPTIONS AND ACCESSORIES

Options are Motorola's means of ordering the addition or omission of internal radio features, and of ordering the addition, omission, or substitution of accessories. Most internal features and alternate accessories ordered by options are included in the FM, UL, and MSHA approvals. Accessory kits used in option are also separately listed for convenience in ordering spares and replacements. Both options and accessory kits, which are FM, UL, or MSHA approved, are identified on equipment listing pages in this section of the price book by these symbols.

SPECIAL PRODUCTION (SP) MODELS

These are models with variations or modifications of internal features, accessories, or both which are beyond the scope of option handling. MOST SP MODELS ARE NOT FM, UL or MSHA APPROVED. Contact product marketing for details of approval versus SP modification.

RADIO ONLY MODELS

Portable Products are offered both as complete package models including antenna, battery, carrying accessory, and some models as "radio only" models less all these accessories. Factory Mutual approvals apply to specific models using appropriate batteries. APPROVED audio accessories and internal options may be substituted or added as required.

FACTORY MUTUAL (FM) APPROVAL

LTS 2000 Radios are Factory Mutual Approved as follows:

The LTS 2000 radios when ordered with H236 (HNN9701) and H73 (HNN9808) are rated as Intrinsically Safe

for us in Classes I, II & III, Division I, Groups C, D, E, F and G. Approved as Non-Incendive for use in Class I,
Division 2, Groups A, B, C and D.

MTS 2000 Radios are Factory Mutual Approved as follows:

All MTS radios packaged models when ordered with H236 (NTN7147) are rated as Intrinsically safe for use in Classes I, II and III, Division I, Groups D, F and G. Approved as Non-Incendive for use in Class I, Division 2, Groups A, B, C and D. And when ordered with H223 (NTN7341) are rated as Intrinsically safe for use in Classes I, II and III, Division I, Groups C, D, E, F and G. Approved as Non-Incendive for use in Class I, Division 2, Groups A, B, C and D.

XTS 3000 Radios are Factory Mutual Approved as follows:

The XTS3000 portable radio when properly equipped with options H223 and Q393 are Approved by Factory Mutual Research Corporation (FMRC) as intrinsically safe for use in Class I, II, III, Division I, Group C, D, E, F and G. It is also Approved for non-incendive use in Class I, Division 2, Group A, B, C and D.

Note:

The XTS3000 Portables equipped with encryption modules and options H223BF and Q393AC are Approved as Intrinsically Safe, for use in Class I, II, III, Division I, Group D, F, and G. And non-incendive for use in Class I, Division 2, Group A, B, C, D only.

Federal Depot Subscriber Upgrade Service

Ordering Information

Executive Summary

This is a Federal Government only specific service and is not applicable to any State and Local or Civilian entity that is not funded by the Federal Government. Federal Depot Subscriber Upgrade Services are only performed at the Federal Technical Support Center (FTC), Guam Service Center (GSC), Korea Service Center (KSC), Japan Service Center (JSC), European Technical Center (ETC, Motorola Managed Services Center (MMSC) and DEA Support Center (DSC).

Features

Federal Depot Subscriber Upgrade Service adds software and hardware features to applicable radios that were originally manufactured without, such as Encryption, Trunking Capabilities and Data Features.

Statement of Work

One of the primary business objectives of the North American Group (NAG) is to promote the sales of STANDARD service products. Standards help to ensure consistent and profitable delivery of our service products to our customers. To that end, the customer Statement of Work for this Standard Service Product CANNOT be modified. All requests for modifications to STANDARD service products or the development of "custom" service products should be routed through the Solutions Planning process. Your first point of contact for these requests is your local Territory Service Manager.

Federal Managed Zone Core

Ordering Information

General Information

Motorola's Federal Managed Zone Core Service offers a unique and cost effective pathway to the features and benefits of a Project 25 compliant voice and data communications system. Those benefits include delivering an operational system faster, and at a fraction of the cost, of replacing an existing system.

In a typical scenario, customers provide the RF sites, subscriber radios and dispatch consoles, if needed. Motorola then integrates this equipment at the customer's location and provides access to the Managed Zone Core at Motorola's facility.

***THIS SPECIFIC SOLUTION IS ONLY FOR FEDERAL GOVERNMENT CUSTOMERS. Please see the State/Local Managed Zone Core ECAT page for information about the State/Local service offering.

Features

This cost-effective marriage delivers flexible solutions, such as trunked or conventional communications, close-in radio coverage or wide-area operation, and P25 functionality, including the ability to interoperate with other agencies and systems. Immediately, radio users benefit from the features of the most advanced P25 systems—without the administrative and capital outlay involved in procuring a state-of-the-art P25 zone core.

Statement of Work

One of the primary business objectives of the North American Group (NAG) is to promote the sales of STANDARD service products. Standards help to ensure consistent and profitable delivery of our service products to our customers. To that end, the customer Statement of Work for this Standard Service Product **CANNOT** be modified. All requests for modifications to STANDARD service products or the development of "custom" service products should be routed through the Solutions Planning process. Your first point of contact for these requests is your local Area Service Manager.

Federal Managed Zone Core Statement of Work:

Ordering Requirements

1. This product must be ordered using the current version of the Services Pricing Configurator. Please contact your local Area Service Manager (ASM) or Customer Support Manager (CSM) if you are interested in ordering this product.
2. Options for this product are based on the component parts of the complete system. Pricing is based on the size and complexity of the customer's system configuration such as the type of system, number of anti-virus clients, and barriers (firewalls and intrusion detection sensors). **To ensure accurate pricing, orders will not be processed or accepted if they do not include all system components.**
3. Enter the main line item as quantity one.
4. Options are required as sub-items, with the quantity equal to the option description.
5. All dollar amounts reflect an annual one year pricing.
6. A Customer Support Plan must be created to provide detailed information to the customer regarding delivery of this service.

Network Products - Firewalls

Firewalls - There are feature specific firewalls which ensure that only legitimate traffic from external networks can access to radio system. They protect the system from unauthorized connections, restrict traffic to known applications and protocols, and ensure that network resources cannot be accessed from external systems unless authorized.

Firewall Recovery Media - This is a CD that contains the certified version of FortiOS for the FG-100D Fortinet Firewall and FG 101E Fortinet Firewalls. This CD is included with the purchase of a new zone but it may need to be ordered for expansions or add-ons.

Firewall Management Service (FMS) - The Firewall Manager Server (FortiManager) is installed as a virtual container on the Common Platform Hardware at the core. FortiManager is only supported with Fortigate 100D firewalls. FortiManager provides logging of firewall events. Configuration and fault management of the Fortinet firewalls are managed by the UNC and UEM applications respectively.

FortiManager is available for M3 Core with Zone Core Protection (ZCP) only. It is not available for L1/L2, M1/M2 or K-Core systems. FortiManager includes support for 30 FortiGate devices. Only one FortiManager is required in a system.

Two Factor Authentication - Compliments the standard Central Authentication functionality in ASTRO 25 systems to authenticate the identity of a person or other entity attempting to access the system remotely via a VPN connection (from CEN, Internet or through DMZ terminal server). Two-factor authentication requires the user to possess a token in addition to their Active Directory credentials.

The RNI-DMZ firewall is configured with VPN users and when a user connects, the firewall authenticates the user with Active Directory.

Two Factor Authentication requires either hardware (Hard tokens) or software (iOS or Android app) based FortiTokens be ordered in conjunction with the RNI-DMZ FortiGate 100D/101E firewall(s) which acts as the authentication service (tied in with AD). Please note: This does not apply to control room firewalls.

Updates

Function	ASTRO 25 System Type	Existing Model	Replacement Model
RNI/DMZ Firewall	K1/K2; L1/L2; M1/M2/M3	Fortinet FG-100D	Fortinet FG-101E
Control Room Firewall	K1/K2; L1/L2; M1/M2/M3	Fortinet FG-100D	Juniper SRX345
Telephony Firewall1	L1/L2; M1/M2/M3	Fortinet FG-100D	Fortinet FG-101E
ISSI.1/MPTT Firewall2	L1/L2; M1/M2/M3	Fortinet FG-100D	Fortinet FG-101E
ISSI 8000/CSSI 8000 Firewall1	L1/L2; M1/M2/M3	Fortinet FG-100D	Fortinet FG-101E
LMP Firewall	M1/M2/M3	Fortinet FG-100D	Fortinet FG-101E
ZCP Firewall3	M3	Fortinet FG-100D	None
Dispatch Console Site Firewall 3	M3	Fortinet FG-100D	None

Firewall Constraints

- ZCP firewalls (Fortigate 100D) must be the same model within a zone.
- ZCP firewalls (Fortigate 100D) within a DSR pair of zones must be the same model.
- A DSR pair of ISSI 8000 firewalls or combined ISSI8000 / Telephony firewalls must be the same model.
- HA RNI-DMZ Firewalls must be the same model.
- RNI-DMZ Firewalls within a DSR pair of zones must be the same model.
- HA Control Room Firewalls must be the same model.

Ordering Information

The ordering guide for the firewalls can be found [here](#).

Beginning with ASTRO 25 A2019.1, new systems should be ordered with Fortinet (FortiGate) 101E Firewalls or Juniper SRX345 as the Fortinet FortiGate 100D model Firewalls are moving to Legacy support. Refer to [Lifecycle Support Notice for Fortinet FortiGate](#) for more details.

- For RNI-DMZ firewalls for K or ASTRO Core (SRC), please refer to their individual ordering guides / price pages for ordering instructions.
- For Site and Hub Router/Firewalls (AC/DC), please refer to ordering guide/Price pages for Network Products ordering guide.
- For all other firewall functions, you may order the standalone options contained below:

FSA4000 and FSA4000 I/O

Ordering Information

General Information

FSA4000 Lifecycle on ASTRO

No New System Sales

A7.13

- 1st Yr. Support for Add-ons and expansions of existing FSA4000 systems
- New FSA systems - MACH Alert system from DCR

A7.14

- 2nd Yr. (final Yr.) Support for Add-ons and expansions of existing FSA4000 systems

A7.15

- Migration of FSA4000 to MACH Alert from DCR

FSA4000 is available in two tiers - FSA4000 Client/Server & FSA4000 Aux-I/O:

(High Tier) FSA4000 Client/Server contains the following H/W & S/W components:

AMC (Alerting Master Computer)

- Server for the FSA4000 Client/Server system

ALC (Alerting LAN Computer)

- Client for the FSA4000 Client/Server system
- Standalone or Co-Hab on MCC7500 or Gold Elite clients

FEP (Front End Processor)

- A minimum of one FEP is required per system. The system supports a maximum of 3 FEPs. Each FEP can have a second redundant identical FEP. If redundant FEP operation is required order two identical FEPs.

- The FEP comes equipped with two IP ports to support the "Dual Link" feature, one IP port to connect to the ASTRO 25 IV&D CEN and one IP port to connect to the customer wired IP communications link.

RTU (Remote Terminal Unit)

- One located at each of the Fire Stations in system.

(Low Tier) FSA4000 Aux-I/O - A Lower Cost Solution than Client/Server:

For this application the FEP is wired to the Console AUX I/O interface.

The FEP requires I/O modules to interface to the Console AUX I/O.

One 32 DI module and two 16 DO modules

- **V959** (Qty 1) 32 Digital Input Module
- The FPN1653 24V reference power supply is required for each V959 DI module. The FPN1653 power supply kit is field installed into the V959 Module.
- **V516** (Qty 2) 16 Digital Output Relay module (2A)

FSA4000 CONFIGURATION APPLICATION S/W UPGRADE TO V7	-	F5580	382	\$10,000.00

Complement CD's:

Fiber Cable from FEP to AMC & from FEP to CAD

RS232 to Fiber Converter:

The use of Fiber Optic cable between the AMC and FEP & CAD and FEP allow the distance between the devices to be greater than 20ft.

The use of Fiber Optic cable significantly reduces data errors caused by external interference imposed on standard RS232 cables.

Two RS232 to Fiber Converters are required for each Fiber Optic cable. (One RS22 to Fiber Converter at each end.)

Select the DSLDLF386837 unit for 110/240VAC operation.

Select the DSTPST388166 unit for 12VDC operation.

Select the DSTORK386842 Rack Shelf (supports up to 3 converters).

NOTE - Cables from AMC and FEP to converter are supplied by CCSI during staging. Cable drawings are included in FSA documentation for field deployments.

Fiber Optic Cable:

Select the DSEFN110SCSC for 100 foot cable.

Select the DSEFN110SCSC200 for 200 foot cable.

ARTA CABLE Assembly (This Cable is required when the ARTA Feature is Ordered) (for the list of individual parts that make up this Kit, go to the FSA Ordering

INSTRUCTIONS TO OBTAIN InTouch LICENSE INFORMATION:

****For the following steps, close down Intouch WindowViewer, if running****

I. Document Version of Intouch

- 1) Go to Start -> Programs -> Wonderware FactorySuite -> Intouch
- 2) When Intouch starts up, go to Help -> About Application Manager
- 3) Record the version number

II. Document Version of Intouch Application

- 1) Go to Start -> Programs -> Wonderware FactorySuite -> Intouch
- 2) When Intouch starts up, locate the Name and Path of your application
- 3) Locate the column labeled Description and Record the Version

****Intouch WindowViewer can now be restarted by going to Start -> Programs -> Wonderware FactorySuite -> InTouch WindowViewer****

III. Document Intouch License Serial Number

- 1) Double-click the My Computer icon on the Desktop
- 2) Go to (C:) -> Program Files -> FactorySuite -> Common -> License
- 3) Double-click wwsuite.lic
- 4) Record the Serial Number from the first line of the file

GCM 8000 Comparator

Ordering Information

Features

- Software configurable, upgradable, and convertible hardware ensures long hardware lifespan
- Software-only installations can enable new features
- Remote system software upgrades and patching includes system release migration and security updates
- Easy to service - only front access is required and modules are hot-swap capable
- Two comparator modules per chassis means comparators are smaller than ever
- Daisy-chainable power supplies among comparator chassis ensures seamless operation
- AC/DC -48V power supplies with integrated battery revert and charging enables elimination of UPS installations in many site designs
- Chassis is 3 RU
- Size: 5.25" x 19" x 18"

General Information

The GCM 8000 Comparator supports Motorola's trunking multisite/simulcast operation and ASTRO 25 Conventional voting and simulcast/voting operation across all frequency bands. The GCM 8000 utilizes a frame-by-frame voting method assemble the best quality voice signal possible by creating a new signal using the best parts of each of the received signals.

Ordering Requirements

Beginning July 2017, the G-Series product family will implement a new, mandatory system version option into the orderability rules. Only the currently supported system releases will be listed, one of which must be chosen for every new model ordered. These are no-charge options and will not affect the pricing.

Only the versions that are within the system support period (dictated by the [ASTRO System Support Policy - 2016](#)) are available. Additional information can be found here: [Software Support Policy Site](#)

NOTE: Units will ship from the factory with the latest system software release regardless of which option is selected. Selecting the system version option does not imply that the unit has that version installed. CD packages inside the shipment will only include previous versions that are still under support.

For additional information please refer to the [G-Series Ordering Guide](#).

GCP 8000 Site Controller

Ordering Information

Features

- Software configurable, upgradable, and convertible hardware ensures long hardware lifespan
- Software-only installation can enable new features
- Remote system software upgrades and patching includes system release migration and security updates
- Easy to service - only front access is required and modules are hot-swap capable
- Daisy-chainable power supplies ensure seamless resources availability in the event of a power supply issue
- Compact and integrated design for versatile and efficient use of site space
- AC/DC -48V power supplies with integrated battery revert and charging enables elimination of UPS installations in many site designs
- Chassis is 3RU
- Supports Motorola's ASTRO 25 Trunking Simulcast/multisite and 25 kHz High Performance Data operation
- Size: 5.25" x 19" x 18"

General Information

The GCP 8000 Site Controller is used at ASTRO 25 Trunking sites to assign voice and data channels and manage and report alarms on site resources. The GCP 8000 Site Controller supports ASTRO 25 trunking simulcast/multisite and Motorola's 25 kHz High Performance Data system operations. The design enables redundancy either within the chassis (in the

case of HPD) or by using two chassis (in the case of trunking simulcast). Constant communication between the active and standby/redundant site controllers allows the standby/redundant controller to automatically take over the site link or site control operations should the active GCP 8000 fail.

Model

**GENWATCH3-ATIA (Multi-Site)
ENHANCED PERFORMANCE MANAGEMENT**

Updates

Ordering Information

Overview

The GenWatch3-ATIA empowers system administrators to monitor, manage, and report on Motorola Solutions P25 voice and data systems from multiple sources in multi-site enterprise networks. It uses GenGET (Genesis Global Enterprise Tool) utility to capture data from sources such as ATIA (radio traffic), GGSN (IV&D and Enhanced Data), GPS (Motorola Solutions IMW), SNMP, and UEM. GenWatch-ATIA then distributes that data to desired connection points.

GenWatch3-ATIA is certified, sold, and supported directly through Motorola Solutions.

Configuration

Step 1: Choose the appropriate the GW3-ATIA Model

Models

New GW3-ATIA Model (TT2234)

This model is used when ordering a new GenWatch3-ATIA.

TT2234 includes:

Licensing:

1 GW3-ATIA Connection

5 GW3-ATIA Client Connections

Unlimited Archiving

1 Year Maintenance and Total Support

GenGET Reader, DataProc and DB Server

Core Modules:

Alias Manager

Security Manager

ATIA Input Manager

ATIA Processing and Archiving

Raw Data Archiving

Trigger Module

Live Views:

All Activity Screen

Channel Status Display

System Activity Summary

SysVista Performance Dashboard

Activity by Talkgroup

Base Reports:

Full Suite of 30+ ATIA Based Reporting

Description	Full Description	Nomenclature	APC	Price
GENWATCH3 ATIA BASE	Includes: 1.MAIN GenSZAI Reader - Reader module resides on a PC at the zone controller to receive the ATIA stream UDP packet from the zone controller and passes them on to GW3. 2.MAIN GenSZAI DataProc - co-resides with the Database server at the Network Ops Center to process the ATIA stream from the Reader 3.MAIN GenSZAI Database Server - Database Server module co-resides with the DataProc at the Network Ops Center to	TT2234	708	\$51,480.00

	<p>store the decoded ATIA stream from the DataProc The ATIA data stream ordered independently. Professional installation services must be ordered from GenCore Candeo (1047777 - aka Genesis) via Tigers for ALL GenWatch3-ATIA based solutions purchased. Please contact Kelley Clarida kclarida@genesisworld.com for any professional services quotations</p>			
--	---	--	--	--

Fielded GW3-ATIA Model (TT2266)

This model is used when adding to a GenWatch3-ATIA in the field.

Description	Full Description	Nomenclature	APC	Price
GENWATCH3 ATIA ADD-ON	ONLY valid with a licensed copy of GenWatch3 software. This is a zero dollar model used for adding on options after purchasing GenWatch3 license. This model ordered alone includes NOTHING.	TT2266	708	\$0.00

Step 2: Order Additional Zones (or DSR) GW3-ATIA Software if required

This option is needed to support additional zones or DSR.

Requires (1) per additional zone or DSR.

Description	Full Description	Nomenclature	APC	Price
SOFTWARE FOR ADDITIONAL GENWATCH3 ATIA ZONES	Additional Zone (or DSR) GenWatch-ATIA Software * Requires (1) per DSR or additional zone	TT05394AA	708	\$25,750.00

Step 3: Order GW3-ATIA "Optional Enhancements" if desired

Additional GW3-ATIA Client Connection Licenses - (Optional Enhancement)

This option provides a bundle of 5 additional simultaneous client connections to GW3-ATIA.

Description	Full Description	Nomenclature	APC	Price
GW3-ATIA CLIENT LICENSES (SOLD IN	sold in packs			

GROUPS OF 5)	of 5	TT05417AA	708	\$6,600.00
--------------	------	-----------	-----	------------

GenWatch3 Data Warehouse - (Optional Enhancement)

The GenWatch3 Data Warehouse solution optimizes multi-zone two-way network analytics by consolidating data into a single centralized storage archive. With GenWatch3 Reports, data is available on demand for viewing and analysis.

Description	Full Description	Nomenclature	APC	Price
ADD: DATA WAREHOUSE SOFTWARE	Data Warehouse for long term storage	TT06065AA	708	\$15,840.00

Centralized Manager of Agency Filters (CMAF) - (Optional Enhancement)

The CMAF filters ATIA data and distributes it to agencies by zone, talkgroup, and/or subscriber ID. In the event of an interruption, the data stream is buffered, so no data is lost. It is the perfect solution for multi-zone networks with member agencies who want to manage and report on their own subscribers.

Description	Full Description	Nomenclature	APC	Price
ADD: CMAF - CENTRALIZED MANAGER FOR AGENCY FILTERS	Centralized Manager for Agency Filters Allows system owners to filter data to be sent to member agencies for monitoring, management, archiving and reporting. This includes the capability for creating ONE filter.	TT06063AA	708	\$7,200.00
ADD: CMAF - ADDITIONAL FILTERS	Allows ONE additional Filter to be created.	TT06064AA	708	\$2,160.00

Genesis ATIA Forwarder Enhancement - (Optional Enhancement)

Genesis ATIA Forwarder receives data from the ASTRO 25 Core, then sends it unchanged to multiple destinations within and outside of the Customer Enterprise Network (CEN). The ATIA Forwarder is a reliable, hand-off solution that not only forwards raw ATIA data, but remains running as a background service. As long as the host PC is on, the ATIA Forwarder is up and active. Even in the event of an outage, the service will automatically re-start once the computer reboots. It is useful in helping eliminate wasted time and preventing lost data.

Description	Full Description	Nomenclature	APC	Price

GW3-ATIA FORWARDER FOR FIRST ZONE	ATIA Forwarder allows the forwarding of unaltered, native ATIA data to additional devices - either inside or outside of the CEN.	TT05704AA	708	\$6,600.00
GW3-ATIA FORWARDER FOR ADDITIONAL ZONES	Additional ATIA Forwarder per zone.	TT05705AA	708	\$3,300.00

Genesis ATIA Replay Enhancement - (Optional Enhancement)

Genesis ATIA Replay make it possible to revisit chosen moments in time, as selected from data sets in the SQL database. ATIA Replay provides a look back to specified moments in time. Rewind, fast-forward, loop, pause, speed up, or slow down the action.

Description	Full Description	Nomenclature	APC	Price
ADD: ATIA REPLAY SOFTWARE	ATIA Replay - Replay Data Set from the GenWatch database through the Activity and Channel Screens in GW3 and SkyViewII. **Must run on a separate GW3 Computer**	TT06133AA	708	\$16,500.00

Genesis SAM (CloneWatch) Enhancement - (Optional Enhancement)

SAM - Subscriber Access Manager, formerly known as CloneWatch, is a powerful add-on tool to Genesis' industry-standard performance management solution GenWatch3. It identifies and helps eliminate the threat of cloned radios. SAM monitors resources (groups and radios) for suspicious activity. A suspect is a resource (radio ID or group) that breaks a predefined rule or expected behavior. Suspect resources are added to a list where the suspect's activities are then displayed and recorded in details.

Description	Full Description	Nomenclature	APC	Price
CLONEWATCH	Optional module for GW3. Dynamically find and show radios suspected of being cloned.	TT05415AA	708	\$12,540.00

GenSPOut (Genesis Specified Packet Output) Enhancement - (Optional Enhancement)

GenSPOut splits complex trunking network data, filters and distributes it to its desired destinations. It is a powerful specialty module for GenWatch3. GenSPOut formats decoded Control Channel or ATIA data and passed it to a variety of external devices, such as specialized CAD systems, consoles, voice recorders, alarm devices and more! Note: Not all GenSPOut output packets are available from all input sources. Contact Genesis for full details.

Description	Full Description	Nomenclature	APC	Price
-------------	------------------	--------------	-----	-------

GW3 GENSPOUT	Allows a customizable data feed from GenWatch3 to other devices such as voice recorders, consoles, etc. This is a one way data feed via TCP/IP, COM, etc. Includes (1) connection.	L3580	708	\$6,360.00
ADD: GENSPOUT - ADDITIONAL CONNECTI	Additional licensed connections for GenSPOut.	TT06067AA	708	\$1,320.00

GenWatch3 iVista Web-Based Agency Reporting - (Optional Enhancement)

iVista Web-Based Agency Reporting allows Administrators to filter data by Agency so member agencies can run their own reports.

Description	Full Description	Nomenclature	APC	Price
IVISTA WEB BASED AGENCY REPORTING	iVista Web-based Agency Reporting Tool allows Administrator to filter data by Agency so member agencies can run their own reports. Includes Administrator package + (1) Agency Filter.	TT05679AA	708	\$13,860.00
IVISTA ADDITIONAL AGENCY FILTER	iVista Web-based Agency Reporting Tool - Additional Agency Filters. Must have ordered TT05679AA previously.	TT05680AA	708	\$4,620.00

GenWatch3-DATA: IV&D and Enhanced Data Enhancement - (Optional Enhancement)

GenWatch3-ATIA can be enhanced by adding data inputs for Monitoring, Management and Reporting. GenWatch3-DATA receives and archives GGSN feeds from the ASTRO 25 IV&D and Enhanced Data networks to provide in-depth, forensic reporting and analysis.

The following options are for use with ASTRO 25 IV&D:

Description	Full Description	Nomenclature	APC	Price
GGSN INTEGRATION	Archiving and Reporting for Motorola IV&D.	TT05628AA	708	\$12,000.00

The following options are for use with ASTRO 25 Enhanced Data:

Description	Full Description	Nomenclature	APC	Price
GENESIS ENHANCED DATA ADD-ON	Genesis Archiving and Reporting Tool for Enhanced Data statistics (requires existing TT2233, TT05414AA or TT05628AA)	TT05757AA	708	\$12,000.00

Genesis UEM Enhancement - (Optional Enhancement)

The Genesis UEM Enhancement views the health of a system's hardware, then analyzes trends that might not be evident with the snapshot view from the ASTRO 25 UEM. It receives UEM traps through a connection to the North Bound Interface (NBI) and archives every scrap of data into MS SQL database for as long as desired.

Description	Full Description	Nomenclature	APC	Price
UEM-NBI INTEGRATION	UEM Data Archiving, Reports, and Live Display (alarm & event integration) *The NBI must be enabled. This is ordered independently. Qty 1 must be ordered per NBI connected to GenWatch3*	TT05630AA	708	\$33,000.00
UEM-NBI INTEGRATION ADDITIONAL LICENSES	UEM Data Archiving, Reports, and Live Display (alarm & event integration) *The NBI must be enabled. After Qty 1 of TT05630AA is ordered, subsequent NBI are licensed using TT05678AA	TT05678AA	708	\$16,500.00

Genesis Location Services - (Optional Enhancement)

Genesis Location Services extends the functionality of the ASTRO 25 Location Tracking Solution. It displays the GPS location of subscriber units, as reported by Motorola Solutions Intelligent Middleware (IMW). Genesis Location Services captures and archives location information on subscribers for live views and reporting.

Description	Full Description	Nomenclature	APC	Price
IMW ENHANCEMENT	MUPS Archiving, Reports, and Live Display (outdoor location/GPS integration) *The MUPS must be enabled. This is ordered	TT05629AA	708	\$45,600.00

	independently. Qty 1 must be ordered per MUPS connected to GenWatch3*			
ADD: IMW ENHANCEMENT FOR ADDITIONAL ZONE OR DSR	Requires one IMW Connection per additional zone and/or DSR.	TT06090AA	708	\$22,800.00

GenWatch3 CADI Enhancement - (Optional Enhancement)

The GenWatch3 Multi-CADI Enhancement allows multiple CAD clients access to ASTRO 25 systems. With the CADI enhancement, CAD clients can send radio commands, and receive PTT IDs and Emergencies. The solution is very flexible in that it overcomes the radio system limitation of being able to connect to only one CAD client.

Description	Full Description	Nomenclature	APC	Price
ADD: GENESIS INTERFACE TO ASTRO 25 CADI	Integrates with ASTRO 7.x CADI Port and serves as a full CAD client for sending radio commands (Selective Radio Inhibit, Radio Check, Regroup, Database Snapshot, Call Alert, Emergency ACK, Statuses and Messages). Replicates the 7.x CADI Port seamlessly to multiple agencies with filtering available via GW3. Comes with (1) CADI Connection. **Requires one CADI Connection per primary zone**.	TT05878AA	708	\$32,340.00
ADD: ADDITIONAL CONNECTIONS GENESIS INTERFACE TO ASTRO 25 CADI	Additional CADI Client Connections.	TT05879AA	708	\$4,620.00

Advanced Power Monitor (APM) Enhancement - (Optional Enhancement)

Genesis performance management solutions are modular and have the ability to provide a comprehensive view of much more than just the APM. On ASTRO 25 systems, Genesis correlates call activity, busies, system health, and a vast amount of additional data, along with RF power information from the APM. This means that system owners have an unparalleled view of the user's call experience from multiple angles.

--	--	--	--	--

Description	Full Description	Nomenclature	APC	Price
ADV PWR MONITOR LIC	GenWatch3 displays and reports power levels at user-defined intervals from the APM. The levels are shown as they are reported, and can be filtered and color-coded for easy viewing. Includes 5 APM Connection Licenses.	TT05721AA	708	\$3,300.00
ADV PWR MONITOR ADD CONN	Include a connection to the APM to receive current power levels at user-defined intervals. **Requires one connection license per APM**.	TT05722AA	708	\$264.00

Genesis Provisioning Manager Interface (PMI) Enhancement - (Optional Enhancement)

A GenWatch3 add-on, the Genesis PMI Enhancement works as a standalone solution, integrates with other Genesis performance management solutions, or integrates with third-party accounting and billing/asset management applications. It allows system operators to manage various system applications and assets through a single point of entry. The Genesis PMI enhancement makes it possible for simple remote provisioning through the ASTRO 25 PMI and synchronization with third-party management and accounting software. With one intuitive interface, securely exchange information across multiple applications.

Description	Full Description	Nomenclature	APC	Price
PROVISIONING PORTAL BUNDLE	The Genesis PMI Enhancement makes it possible for simple remote provisioning on the Motorola Provisioning Manager Interface and synchronization with third party asset management and accounting software (with the addition of GENIIB) **NOTE: THIS DOES NOT INCLUDE ANY POSSIBLE MOTOROLA FEES THAT MIGHT BE NECESSARY TO ACTIVATE THE UCS PROVISIONING FEATURE IN THE SWITCH.	TT05697AA	708	\$70,200.00

Genesis Interoperability Information Broker (GenIIB) Enhancement - (Optional Enhancement)

GenIIB is the main integration point between the Genesis Suite of network management, reporting and billing products and third party applications. GenIIB allows completely disparate systems to interact with one or more of the systems already connected to one or more Genesis products.

Description	Full Description	Nomenclature	APC	Price
ADD: GENESIS INTEROPERABILITY BROKER	GenIIB includes a programming API that can be used by third party external devices or software programs to pull live or stored information from the Genesis Databases and push customer driven information or instructions back to those systems and back into the database as well.	TT05880AA	708	\$39,600.00

Step 4: Choose GenWatch-ATIA Hardware

GW3-ATIA Base Hardware (TT05413AA)

GW3-ATIA (GG) MAIN Reader Computer Includes: Rack Mount Intel Pentium Dual Core, 8 GB+ RAM, 500 GB 7200 RPM Hard Drive - RAID 1 configuration, rails for rack mount, single power supply, 5 Year Next Business Day Service Warranty. Monitor not included. **Includes Required Software: Windows Server 2012R2 (or newer).**

GW3-ATIA (GG) MAIN Data Processor and Database Server Computer Includes: Rack Mount server, Intel Xeon E5-2640, 32GB RAM, Hardware RAID controller with write caching ability, 2 TB of available storage space in redundant TAID with 10k RPM HDD or SDD External USB Hard Drive for Back up, Versa Rails for Rack Mount, Dual Hot Pluggable, Redundant Power Supply, 5 Year Next Business Day Service Warranty ** Monitor is not included with server** **Includes Required Software: Windows Server 2012R2 (or newer), MS SQL Server 2016 (or newer) and MS Excel 2016.**

GW3-ATIA Client Computer Includes: Intel™ Pentium® Quad Core Processor, 1GB Graphics, Dual Monitor Capable Graphics Card, 16GB SDRAM Memory, CD/DVD-ROM, 500GB SATA, 10K RPM Hard Drive, COM Port, Monito, Sound plus basic speakers, Keyboard, Mouse, External UPS, 5 Year Next Business Day Service Warranty. **Includes Required Software: Windows 10, MS Excel 2016.**

Description	Full Description	Nomenclature	APC	Price
	1. Rack Mount Reader: Dell PowerEdge R210 II, Intel Pentium G850 2.9 GHz, 4GB, SATA 500 GB 7200 RPM Hard drive, Ready Rails 2-post/4-post 1U Static Rails, DVD-ROM, NO Keyboard, Mouse or Monitor. Windows Server OS, 3 Year			

GENWATCH3 ATIA BASE HARDWARE	<p>Next Business Day Service</p> <p>2.Rack Mount Data Processor / Database Server: Dell PowerEdge R720 server, Intel Xeon E5-2620 2.0 GHz, Ready Rails 2-post/4-post, RAID 6, 6x146GB Hard Drives, DVD-ROM, NO Keyboard, Mouse or Monitor, Window Server OS, MS SQL Server, 3 Year Next Business Day Service 3.</p> <p>GenWatch3-ATIA Host Computer: Dell Precision T3600, Quad Core Processor, 512MB Graphics Card, 6GB RAM, CD/DVD ROM, 500GB SATA Hard Drive, 23" flat panel monitor, Mouse, Keyboard, Windows OS, MS Office Basic, 3 Year Next Business Day Service</p>	TT05413AA	708	\$30,400.00
---------------------------------	---	-----------	-----	-------------

GW3-ATIA Hardware for Additional Zones (or DSR)

Description	Full Description	Nomenclature	APC	Price
GW3-ATIA HARDWARE FOR ADDITIONAL ZONES	<p>Rack Mount Reader: Dell PowerEdge R210 II, Intel Pentium G850 2.9 GHz, 4GB, SATA 500 GB 7200 RPM Hard drive, Ready Rails 2-post/4-post 1U Static Rails, DVD-ROM, NO Keyboard, Mouse or Monitor. Windows Server OS, 3 Year Next Business Day</p>	TT05416AA	708	\$5,800.00

GW3-ATIA (GG) SECONDARY Data Processor and Database Server

Description	Full Description	Nomenclature	APC	Price
	<p>GW3-ATIA MAIN DATA PROCESSOR / DATABASE SERVER Computer</p> <p>Includes - Rack Mount server, Intel Xeon E5-2640, 32GB RAM, Hardware RAID controller with write caching ability, 2 TB of available</p>			

ADD: GW3-ATIA (GG) DATA WAREHOUSE HARDWARE	storage space in redundant TAID with 10k RPM HDD or SDD External USB Hard Drive for Back up, Versa Rails for Rack Mount, Dual Hot Pluggable, Redundant Power Supply, 5 Year Next Business Day Service Warranty ** Monitor is not included with server** Includes Required Software: Windows Server 2016, MS SQL Server 2016 and MS Excel 2016.	TT06066AA	708	\$18,200.00
--	--	-----------	-----	-------------

GW3-ATIA (GG) Data Warehouse

Description	Full Description	Nomenclature	APC	Price
ADD: GW3-ATIA (GG) DATA WAREHOUSE HARDWARE	GW3-ATIA MAIN DATA PROCESSOR / DATABASE SERVER Computer Includes - Rack Mount server, Intel Xeon E5-2640, 32GB RAM, Hardware RAID controller with write caching ability, 2 TB of available storage space in redundant TAID with 10k RPM HDD or SDD External USB Hard Drive for Back up, Versa Rails for Rack Mount, Dual Hot Pluggable, Redundant Power Supply, 5 Year Next Business Day Service Warranty ** Monitor is not included with server** Includes Required Software: Windows Server 2016, MS SQL Server 2016 and MS Excel 2016.	TT06066AA	708	\$18,200.00

GW3-ATIA Client Workstation

Description	Full Description	Nomenclature	APC	Price
	GW3-ATIA Client Includes: Dual Core Processor, 8GB SDRAM Memory, CD/DVD-ROM, Minimum			

GW3-ATIA CLIENT HARDWARE	160GB SATA, 7200 RPM Hard Drive, Native COM Port, Moitor, Sound plus basic speakers, Keyboard, Mouse, Modem, 5 Year Next Business Day Service Warranty. Includes Required Software: Windows 10 and MS Excel 2016.	TT05418AA	708	\$5,400.00

Model

**GENWATCH3-OTA (Single Site)
ENHANCED PERFORMANCE MANAGEMENT**

Ordering Information

Overview

The GenWatch3 solution empowers system administrators to monitor, manage, and report on Motorola Solutions voice and data systems for commercial, private and public safety agencies. One integrated tool pulls together all system-wide data to display real-time activity, send critical notifications, and archive data for forensic reporting and comprehensive analysis. GenWatch3 significantly reduces the amount of time spent assembling or dissecting data from various sources while substantially increasing the amount of information readily available. This provides system administrators the ability to proactively measure and meet system performance metrics. GenWatch3 is certified, sold, and supported directly through Motorola Solutions.

Configuration

Step 1: Choose the appropriate the GW3-OTA Model

Models

New GW3-OTA Model (TT2264)

This model is used when order a new GenWatch3-OTA.

TT2264 includes:

Licensing:

1 GW3 RF Site Connection (3600 or P25)

1 GW3 Client Connection

2 Months Archiving

1 Year Software Warranty

Core Modules:

Alias Manager

Security Manager

Site Input Manager

Model

GPW 8000 Receiver

Ordering Information

Features

- Software configurable, upgradable, and convertible hardware ensures long hardware lifespan
- Software-only installation can enable new features
- Remote system software upgrades and patching includes system release migration and security updates
- Easy to service - only front access is required and modules are hot-swap capable
- Compact and integrated design for versatile and efficient use of site space
- AC/DC -48V power supplies with integrated battery revert and charging enables elimination of UPS installations in many site designs
- Supports Motorola's ASTRO 25 Conventional voting and simulcast/voting system topologies
- Chassis is 3RU
- Size: 5.25" x 19" x 18"

General Information

The GPW 8000 Receiver supports Motorola's ASTRO 25 Conventional voting and simulcast/voting system topologies. The receiver is used to increase in-bound signal coverage for infrastructure systems so that mobile or portable coverage can be improved without deploying a full-size transmit and receive site.

Ordering Requirements

Beginning July 2017, the G-Series product family will implement a new, mandatory system version option into the orderability rules. Only the currently supported system releases will be listed, one of which must be chosen for every new model ordered. These are no-charge options and will not affect the pricing.

Only the versions that are within the system support period (dictated by the [ASTRO System Support Policy - 2016](#)) are available. Additional information can be found here: [Software Support Policy Site](#)

NOTE: Units will ship from the factory with the latest system software release regardless of which option is selected. Selecting the system version option does not imply that the unit has that version installed. CD packages inside the shipment will only include previous versions that are still under support.

For additional information please refer to the [G-Series Ordering Guide](#).

GRIP - Graphical Record I/Q and Playback

Ordering Information

General Information

The GRIP (Graphical Record I/Q and Playback) is an application for capturing streams of generic RF signals, converting the signals to

baseband I/Q samples, and storing the captured samples in a non-volatile storage device. Captured RF signals can be subsequently

re-transmitted. The GRIP application provides I/Q capture of multiple RF receivers simultaneously with synchronous start.

For optimum recording capability, the preferred device for storing RF signals is a solid state hard drive (SSD)

connected to the eSATA port, using a SATA III cable.

Features

- 160 MHz total RF input to baseband I/Q capture over 4 independent receivers at 40 MHz per path
- Supports synchronous start of record
- Adjustable sample rate; 220 kHz to 40 MHz
- Record time ~30 minute using 1 TB SSD recording 160 MHz Bandwidth

- Leverages commercial SATA III SSD for capture speed
- 80 MHz total RF transmit via 2 simultaneous paths using playback feature
- Visualization types include FFT, Waterfall, Time Domain, and Constellation
- Web browser User Interface for command and control
- Visualization while recording: 1 RF path
- Control and command via WiFi to tablet, phone, or laptop
- Operational frequency range: 70 MHz - 6 GHz

Ordering Requirements

For ordering information please send an email to: BuyAT@MotorolaSolutions.com.

Warranty

LIMITED WARRANTY

Motorola warrants the Product against significant defects in material and workmanship under normal use and service for a period of sixty (60) calendar days from the date of shipment from Motorola. Motorola, at its option, will at no charge, either repair the Product (with new or reconditioned parts), replace it with the same or equivalent Product (using new or reconditioned Product), or refund the purchase price of the Product for significant defects identified during the warranty period provided Motorola is notified of such significant defects no later than 14 calendar days after the expiration of the warranty period according to the terms of this warranty. Repaired or replaced Product is warranted for the balance of the original applicable warranty period. All replaced parts of the Product shall become the property of Motorola.

This warranty sets forth the full extent of Motorola's responsibilities regarding the Product. Repair, replacement or refund of the purchase price, at Motorola's option, is the exclusive remedy. THIS WARRANTY IS GIVEN IN LIEU OF ALL OTHER EXPRESS WARRANTIES.

MOTOROLA DISCLAIMS ALL OTHER WARRANTIES OR CONDITIONS, EXPRESS OR IMPLIED, INCLUDING THE IMPLIED WARRANTIES OR CONDITIONS OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. IN NO EVENT SHALL MOTOROLA BE LIABLE FOR DAMAGES IN EXCESS OF THE PURCHASE PRICE OF THE PRODUCT, FOR ANY LOSS OF USE, LOSS OF TIME, INCONVENIENCE, COMMERCIAL LOSS, LOST PROFITS OR LOST SAVINGS OR OTHER INCIDENTAL, SPECIAL, INDIRECT OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE SUCH PRODUCT, TO THE FULL EXTENT SUCH MAY BE DISCLAIMED BY LAW.

GRV 8000 Comparator

Ordering Information

Features

- Software configurable, upgradable, and convertible hardware ensures long hardware lifespan
- Software-only installations can enable new features
- Remote system software upgrades and patching includes system release migration and security updates
- Easy to service - only front access is required and modules are hot-swap capable
- Two comparator modules per chassis means comparators are smaller
- Daisy-chainable power supplies among comparator chassis ensures seamless operation
- AC/DC -48V power supplies with integrated battery revert and charging enables elimination of UPS installations in many site designs
- Chassis is 3 RU
- Size: 5.25" x 19" x 18"

General Information

The GRV 8000 Comparator supports Motorola's ASTRO 25 Conventional voting and simulcast/voting operation across all frequency bands. The GRV 8000 utilizes a frame-by-frame voting method assemble the best quality voice signal possible by creating a new signal using the best parts of each of the received signals.

Ordering Requirements

Beginning July 2017, the G-Series product family will implement a new, mandatory system version option into the orderability rules. Only the currently supported system releases will be listed, one of which must be chosen for every new model ordered. These are no-charge options and will not affect the pricing.

Only the versions that are within the system support period (dictated by the [ASTRO System Support Policy - 2016](#)) are available. Additional information can be found here: [Software Support Policy Site](#)

NOTE: Units will ship from the factory with the latest system software release regardless of which option is selected. Selecting the system version option does not imply that the unit has that version installed. CD packages inside the shipment will only include previous versions that are still under support.

G-Series Software Licensing

Ordering Information

General Information

New G-Series equipment ordered on an ASTRO 7.17 system will now require licenses for many of the G-Series software options. This will require the software licenses below to be ordered for G-Series equipment on any 7.17 and forward M-Core and L-Core. The ASTRO Express, K-Cores, and standalone conventional systems do not require licenses.

When ordering the G-Series licenses, personality information is required, just like when ordering a Master Site. In order to add the licenses to the correct License Manage, it is critical the following information is correctly entered before placing the order.:

1. **System ID.** Four digit hexadecimal number used to uniquely identify a system. For new systems, this will be assigned by the System Engineer using the Trunked Data Repository (TDR) process. Expansions to existing systems will use the existing System ID.
2. **Zone ID.** Number used to uniquely identify each zone in a system. Zone ID will always be 0001 for M1/M2 systems. For M3 systems, values may range from 0001 to 0007.
3. **System Extension ID.** Four digit hexadecimal number, **typically 0000**. Introduced in 7.15 to address the rare case where a customer has intentionally chosen to use the same system ID across multiple systems. For such rare cases, customers or account teams inputting the order shall provide unique system extension IDs across the systems that have same system ID (e.g. 0001, 0002, etc).
4. **Valid Email Address.** This email will be used to deliver all software licensing entitlements to the customer.

NOTE: Software licenses are automatically generated based on the System, Zone and System Extension ID provided on the order. It is critical that valid information is entered on the order, otherwise software licenses will fail to install. Please follow the same guidelines when ordering an ASTRO 25 Core Site to verify ID information. If software licenses are generated with invalid System ID information, contact SSC and open a case to resolve the issue.

IMPORTANT NOTICE ABOUT MOTOROLA SOLUTIONS SOFTWARE SUPPORT POLICY

In line with the Software Support Policy (SwSP) for ASTRO based system software, orderability rules now include alignment to this Software Support Policy which sets a new framework of three periods of support from Ship Acceptance for that specific release.

The policy provides for a 4-year period of time, referred to as the "Standard Support" period, during which access to qualified software defect repairs and system expansions for that specific release of system software are provided.

Then there is an additional 3 year period of time, referred to as the "Extended Support" period, during this time no software defect repair, no system expansions and no Security Update/Monitoring Services support are available for that specific release of system software.

Additional information can be found here: [Software Support Policy Site](#)

Ordering Requirements

For additional information please refer to the [G-Series Ordering Guide](#).

JUMP TO ...[MODEL](#)[ORDERING INFORMATION](#)[CONFIGURATION](#)[SHIP CARD](#)**Model****GTR 8000 Base Radio****Ordering Information****Features**

- Software configurable, upgradable, and convertible hardware ensures long hardware lifespan
- Software-only installation can enable new features
- Remote system software upgrades and patching includes system release migration and security updates
- Easy to service - only front access is required and modules are hot-swap capable
- AC/DC -48V power supplies with integrated battery revert and charging enables elimination of UPS installations in many site designs
- Supports AC and DC power
- Chassis is 3RU
- Size: 5.25" x 19" x 18"

General Information

Each GTR ships with a transceiver, power supply and power amplifier. One base radio is needed per channel at each site, however it only occupies 3 rack units of space. This small size allows for efficient use of site space.

Power Supply: The standard power supply allows operation from both AC and DC power. Also, standard battery revert and charging eliminates the need for an Uninterruptible Power Supply (UPS) in many installations. (Note: Battery revert is not available in the power

efficient power supply)

Front Serviceability: The front serviceability allows for improved installation and serviceability.

Ordering Requirements

Beginning July 2017, the G-Series product family will implement a new, mandatory system version option into the orderability rules. Only the currently supported system releases will be listed, one of which must be chosen for every new model ordered. These are no-charge options and will not affect the pricing.

Only the versions that are within the system support period (dictated by the [ASTRO System Support Policy - 2016](#)) are available. Additional information can be found here: [Software Support Policy Site](#)

NOTE: Units will ship from the factory with the latest system software release regardless of which option is selected. Selecting the system version option does not imply that the unit has that version installed. CD packages inside the shipment will only include previous versions that are still under support.

For additional information please refer to the [G-Series Ordering Guide](#).

Model

GTR 8000 Site Subsystem

Ordering Information

[Ordering Guide](#)

Features

- Provides equal coverage for HPD systems to voice coverage
- Supports AC and DC power
- Integrates redundant GCP 8000 Site Controllers
- Supports 25 KHz for Motorola's High Performance Data Operation
- Battery revert and charging for backup power supply
- Size: 5.25" x 19" x 18"

General Information

The GTR 8000 Site Subsystem is a prepackaged solution incorporating a base radio, redundant GCP 8000 Site Controllers, duplexer, dual circulator, site preselector and receiver multicoupler in a short open rack. The base radio includes a transceiver, AC and 48DC power supply, and a power amplifier. It supports Motorola's 25 KHZ High Performance Data (HPD) systems providing equivalent HPD coverage to voice coverage.

Power Supply: The standard power supply allows operation from both AC and DC power. Also, standard battery revert and charging eliminates the need for an Uninterruptible Power Supply (UPS) in many installations.

Front Serviceability: The front serviceability allows for improved installation and serviceability.

IMPORTANT NOTICE ABOUT MOTOROLA SOLUTIONS SOFTWARE SUPPORT POLICY

In line with the Software Support Policy (SwSP) for ASTRO based system software, orderability rules now include alignment to this Software Support Policy which sets a new framework of three periods of support from Ship Acceptance for that specific release.

The policy provides for a 4-year period of time, referred to as the "Standard Support" period, during which access to qualified software defect repairs and system expansions for that specific release of system software are provided.

Then there is an additional 3 year period of time, referred to as the "Extended Support" period, during this time no software defect repair, no system expansions and no Security Update/Monitoring Services support are available for that specific release of system software.

After the 4 + 3 year support periods have expired, the system release enters the "End of Support" period. At this time, no software defect repair, no system expansions no Security Update/Monitoring Services and no service offerings are available for that specific release of system software.

Customers may choose to upgrade or migrate to a supported release at anytime during their system lifecycle.

Historical milestones, such as the date that a system ships, reaches beneficial use, or achieves final acceptance have no impact on the system software dates of support.

Reminder: Under the new SwSP, system expansions are only allowed in the standard support window for a system release. If your customer desires an expansion that would occur toward the end of the standard support period, it is highly recommended that you have them upgrade/migrate first and then expand their system to ensure the customer receives the full warranty time period. The SwSP takes precedence over warranties extended for any system expansions.

Additional information can be found here: [Software Support Policy Site](#)

Ordering Requirements

G-Series Ordering Guidelines are available through the **Motorola Online (MOL) Resource Center**. Browse to the *Price Book Information --> ASTRO 25 RF Site Products folder*.

Internally at Motorola, the G-Series Ordering Guidelines are also available on the [G-Series Wiki Site](#).

G-Series Software Upgrade

Ordering Information

[Ordering Guide](#)

General Information

The G-Series Software Upgrade model allows customers to software upgrade an existing GTR 8000 Base Radio, GTR 8000 Site Subsystem, GTR 8000 Expandable Site Subsystem, GCP 8000 Site Controller, GCM 8000 Comparator, GPW 8000 Receiver, or GPB 8000 Reference Distribution Module to current release software. In some cases, the software can be used to migrate the hardware to a new system type.

GTR 8000 Expandable Site Subsystem

Ordering Information

[Ordering Guide](#)

Features

Market-leading channel availability - no single point of failures (SPOF) can remove more than one channel from service in a Site Repeater or High Availability Simulcast GTR 8000 Expandable Site Subsystem.

- Market-leading redundancy: distributed power increases availability of site controllers - including integrated site LAN switches, RMCs, GGM 8000 Gateways, and frequency references
- All equipment is full temperature range specification: -30C to +60C
- Turn-key RF site: stations, controllers, frequency references, site LAN switches, routers, TX combiners/filters, RX preselectors/multicouplers

Software Flexibility

- Software configurable, upgradable, and convertible hardware ensures long hardware lifespan
- Software-only installation can enable new features
- Remote system software upgrades and patching includes system release migration and security updates

Compact, Light Weight, and Easy to Service

- AC/DC -48V power supplies with integrated battery revert and charging enables elimination of UPS installations in many site designs
- Field Replaceable Modules weigh ~18 lbs - ensuring that they are easily serviced by one person
- Only front access is required
- Modules are hot-swap capable
- High-reliability fans are rated for 10 years of continuous use or will provide an alarm 7 days prior to failure, allowing for less expensive scheduled maintenance
- Junction Panel wiring interface simplifies installation and future site expansion or service

General Information

A space-efficient, single rack footprint, the GTR 8000 Expandable Site Subsystem, integrates up to six GTR 8000 Base Radios, redundant GCP 8000 Site Controllers or GPB 8000 Reference Distribution Modules, redundant Ethernet LAN switches, redundant network gateways, transmit combiners, and receiver multicouplers. This enables a highly resilient architecture that provides industry-leading protection against single-points-of failure at the RF sites while providing a turn-key site solution that minimizes site cabling connections and installation effort.

It supports ASTRO 25 Simulcast & Site Repeater Trunking operation, 25 kHz High Performance Data, and Conventional operation when co-located with Trunking.

When ordered as an ASTRO 25 Express System, the GTR 8000 Expandable Site Subsystem is the industry's only turn-key, single-site Project 25 Trunking solution. ASTRO 25 Express Systems are a specific configuration of the GTR 8000 Expandable Site Subsystem that are certified to operate in a single-site mode without a separate Master Site. ASTRO 25 Express Systems are limited to 18 channels or three GTR 8000 Expandable Site Subsystems per site. Software specific to the ASTRO 25 Express System must be purchased to operate in this configuration.

Ordering Requirements

Beginning July 2017, the G-Series product family will implement a new, mandatory system version option into the orderability rules. Only the currently supported system releases will be listed, one of which must be chosen for every new model ordered. These are no-charge options and will not affect the pricing.

Only the versions that are within the system support period (dictated by the [ASTRO System Support Policy - 2016](#)) are available. Additional information can be found here: [Software Support Policy Site](#)

NOTE: Units will ship from the factory with the latest system software release regardless of which option is selected. Selecting the system version option does not imply that the unit has that version installed. CD packages inside the shipment will only include previous versions that are still under support.

For additional information please refer to the [G-Series Ordering Guide](#).

**GTR 8000 Expandable Site Subsystem
Channel Addition****Ordering Information**

General Information

The GTR 8000 Expandable Site Subsystem Channel Addition allows customers to add channels to an existing GTR 8000 Expandable Site Subsystem.

For HPD, the GTR 8000 Expandable Site Subsystem may contain a maximum of 5 base radios.

For Site Repeater, Multisite (simulcast), and for configurations with conventional channels co-located in the GTR 8000 Expandable Site Subsystem, each cabinet or rack can contain a maximum of 6 channels.

Ordering Requirements

Beginning July 2017, the G-Series product family will implement a new, mandatory system version option into the orderability rules. Only the currently supported system releases will be listed, one of which must be chosen for every new model ordered. These are no-charge options and will not affect the pricing.

Only the versions that are within the system support period (dictated by the [ASTRO System Support Policy - 2016](#)) are available. Additional information can be found here: [Software Support Policy Site](#)

NOTE: Units will ship from the factory with the latest system software release regardless of which option is selected. Selecting the system version option does not imply that the unit has that version installed. CD packages inside the shipment will only include previous versions that are still under support.

For additional information please refer to the [G-Series Ordering Guide](#).

General Information

Housing

If customer racks and cabinet space are not available, standalone units may be ordered for site installations with one or more LTE servers.

Ordering Requirements

1. For two post telco-style racks, a 7.0' open rack is available. Please order THN1013A.
2. For an enclosed four-post cabinet environment, a 1,000mm deep server-grade cabinet is available. Please order CVN6565A.
3. All PS LTE DL380 G8 server hardware is shipped with brackets, adapters, and hardware required for installation in either two post telco racks or four post cabinets, as applicable, with the exception of the HSS/PCRF DL380 G8 server.
4. For HSS/PCRF only, a separate installation kit must be ordered for the two post telco rack environment (the four post cabinet hardware is still bundled with the DL380 G8 server). For this feature, a DLN6918A kit must be ordered for each DL380 G8 (a total of two installation kits is required for a redundant configuration).

Model

HPD1000 Modem
764-870 MHz
High Performance Data Systems

Ordering Information

Features

All HPD 1000 Modems include the following standard features:

- High Performance Data in 25 kHz in 764-870 MHz
- 10 watt average power in HPD mode; 35 watt power in APCO 800 MHz
- Data transmission rates of 32 kbps, 64 kbps or 96 kbps
- Half and Full Duplex operation
- Ethernet and USB 2.0 connectivity
- 4 Front Panel LEDs to indicate Power-up/Modem Status, RX/TX status, GPS status
- Remote Mount only
- User/Installation manual
- 20 ft. DC Power Cable
- Trunnion with Mounting Hardware

All HPD 1000 modems are part of the FLASHport® program and ship standard with a FLASH EE Prom, which allows for feature and system upgrades.

General Information

The HPD 1000 Modem is a data only, mobile radio modem which provides connectivity between a vehicle-mounted data device and the customer's host computer through Motorola's High Performance Data (HPD) radio network. It is designed to support High Performance Data speeds at 32 kbps, 64kbps or 96 kbps within the 700/800 MHz frequency bands. This is a data only modem that does not support any voice communication.

The HPD 1000 is a 25 kHz, 10 watt average radio modem with an optional integrated GPS receiver providing connectivity between a Motorola's™ mobile workstations, laptop computers, portable tablet along with other third party data devices supporting a PPP interface over either USB or Ethernet connection.

The HPD 1000 is qualified to meet MILITARY STANDARD 810 C, D, E & F specifications for shock, vibration, rain, dust and salt environments. It is available in a remote mount installation only and requires a 12 Vdc negative ground source from the vehicle, connected through its standard automotive power connector. It is configurable for either half duplex or full duplex operation (using 2 antennas).

RELATIVE RADIATED RECEIVE SENSITIVITY

The relative radiated receive sensitivity test (formerly referred to as self-quieters) measures

the sensitivity from 764-870 MHz in 12.5kHz steps. The radio is set to 25kHz channel mode. These measurements were taken in a shielded environment so that degraded sensitivity at discrete frequencies is known to be due to the radio's self-interference (as opposed to external interference). The following list contains frequencies which were consistently found to have severely degraded performance on all measured radios (secure and non-secure):856.662, 856.8000, 861.2625, 861.5000, 861.5125, 861.5250, 862.3125.

[HPD 1000 Specification Sheet](#)

Ordering Requirements

The following items are **REQUIRED** when ordering the HPD 1000 Modem:

Step #1: MUST select the HPD 1000 main model:	M26UGA9PW1_N
Step #2: MUST select at least ONE Data Cable for connectivity to the Mobile Data device:	G651 ADD: Data Cable 10â€™™, Ethernet w/ Ignition Sense, 10 ft G652 ADD: Data Cable 18â€™™, Ethernet w/ Ignition Sense, 18 ft G308 ADD: USB Data Cable w/ Ignition Sense, 1.5 meters G309 ADD: Data Cable, USB w/ Ignition Sense, 4.5 meters
Step #3: MUST select at least one ANTENNA: If using Half Duplex operation ONE (1) antenna is required, if using FULL DUPLEX operation TWO (2) antennas are required. Antennas require minimum of 3-5 feet horizontal separation on vehicle. Less separation needed if do not choose gain antenna	W484 ALT: ANTENNA 3DB GAIN 762-870MHz (HAF4017A) G335 ADD: ANTENNA 1/4 WAVE 762-870MHz (HAF4016A) G174 ADD: ANT 3dB LOW-PROFL 762-870 MHz (HAF4013A) G175 ADD: ANT 3dB ELEVATED FEED 762-870MHz (HAF4014A)

The following items are **OPTIONAL** features of the HPD 1000 Modem:

GPS (requires both the Software option and the GPS antenna option)	G440 ADD: GPS Operation G619 ADD: GPS Antenna
--	---

The following items are **REQUIRED** for Programming the HPD 1000 Modem:

HPD 1000 Customer Programming Software (CPS)	RVN4185
Programming Cable The same USB Data cables for connectivity to the Mobile Data Device can be used for programming.	G308 ADD: USB Data Cable w/ Ignition Sense, 1.5 meters (HKN6177) G309 ADD: Data Cable, USB w/ Ignition Sense, 4.5 meters (HKN6178)

Home Subscriber Server (HSS)

Ordering Information

Features

- The Home Subscriber Service (HSS) is the master repository that contains subscriber/device profile and state information. It supports authentication, authorization and mobility management functions in LTE. The rich subscriber data management capabilities of Subscriber Data Broker are leveraged to enable subscriber identity management, service profile management, static and dynamic QoS management, and state and usage tracking. The HSS supports a standards-based 3GPP interface to the LTE HSS (S6a).
- HSS can optionally access the Home Location Register (HLR) holding GSM/WCDMA subscriber data in order to obtain authentication, location or user state-type data on IMS scenarios.
- HSS provides user management functions for EPS users, as specified in 3GPP for S6a and SWx interfaces. EPS represents the evolution in terms of user-service experience, improving latency, capacity and throughput. In the access network, LTE can utilize existing 2G and 3G spectrum as well as new spectrum. EPS addresses cost-efficient deployment and operations for public safety market usage of IP services, as well as improvements in the integration of non-3GPP access technologies.
- HSS provides support for Voice Over LTE (VoLTE) offering.
- HSS is the authentication server for EAP-SIM and EAP-AKA based authentication mechanisms, according to relevant IETF and IEEE specifications.

General Information

The Motorola HSS is an integrated system that provides LTE standard subscriber management (HSS). The Motorola HSS provides the capability of managing the IP Multimedia Subsystem (IMS) and new access to the LTE/Evolved Packet Core (EPC) with one single node.

The Motorola HSS supports the following network domains with a modular architecture. The supported domains are:

- IMS - HSS contains the IP Multimedia subscription related information to support the network entities actually controlling the Multimedia sessions.
- EPS - HSS supports the LTE (E-UTRAN) accesses in the context of the Third Generation Partnership Project (3GPP) Evolved Packet System (EPS) specifications, providing mechanisms for the subscription, authentication and mobility management related to the EPS network solution for customers, targeting the modernization of networks towards an all-IP infrastructure domain.

HSS follows the relevant 3GPP, Internet Engineering Task Force (IETF), Third Generation Partnership Project 2 (3GPP2), Packet Cable and Open Mobile Alliance (OMA) specifications.

Configuration

New System Ordering Guidelines

A new HSS system can be ordered as a package/bundle of both software and hardware. The HSS is licensed based upon the number of subscribers. Please choose from one of the following options when ordering a new HSS system:

If IMS support is required along with the HSS, please choose from one of the following options:

Description	Full Description	Nomenclature	APC	Price
HSS IMS MODULE 5K BUNDLE	-	TT2621	053	\$37,500.00
HSS IMS MODULE 25K BUNDLE	-	TT2623	053	\$47,880.00
HSS IMS MODULE 100K TO 150K	-	TT05734AA	053	\$32,870.00

Existing System Capacity Expansion Guidelines

When ordering an HSS user license capacity expansion for an existing system, please choose from one of the following options. Please note that capacity expansions can only occur as mentioned below. If the capacity expansion needs to span multiple steps, then all steps in between need to be accounted for. For example, if a capacity expansion is needed for 5K to 25K, then 5K to 10K and 10K to 25K need to be accounted for.

Description	Full Description	Nomenclature	APC	Price
-------------	------------------	--------------	-----	-------

HSS HW/SW FROM 750K TO 1M	-	TT05877AA	053	\$296,520.00
---------------------------	---	-----------	-----	--------------

When ordering an IMS add-on user license capacity expansion for an existing system, please choose from one of the following options:

Description	Full Description	Nomenclature	APC	Price
HSS IMS MODULE 100K TO 150K	-	TT05734AA	053	\$32,870.00
HSS IMS MODULE 750K TO 1M	-	TT05881AA	054	\$82,450.00

Spares

The recommended HSS spare parts package for an EBS system includes one of each of the following:

**iSDL - Integrated Data Solutions Laboratory
Laboratory Time and Engineering Consulting Services**

Ordering Information

General Information

iDSL- Integrated Data Solutions Laboratory

The iDSL is a laboratory facility offering the following services: Application and Product Development Support, Application and Product Verification within a system environment, Software Integration, Third Party Product Integration, Solution Verification, Evaluation of non-Motorola Solutions, and Training. The iDSL also contains the following system and product resources: radios, radio modems/wireless modems, user terminals (laptop computers, Motorola FORTE and MW-520 terminals), complete Private DataTAC systems (UHF, 800 MHz, and 900 MHz), complete ASTRO Integrated Voice and Data systems (UHF, 800 MHz, and VHF), and one 800 MHz analog data-on-trunking system.

The iDSL contains three separate functional areas - the Alliance Area, the Engineering Area, and the Training Room. The Alliance Area is available to partners, vendors, and customers for development, integration, and verification activities. The Engineering Area contains the fixed network equipment necessary for all services, and is typically available only to Motorolans. The Training Room is available as an office, training, or conference facility to Motorolans and to partners, vendors, and customers that are using the Alliance Area. The hours of the iDSL are from 8:00am to 6:00pm, Central Time, on standard business workdays.

Configuration

Ordering Requirements

No orders will be processed until services are scheduled.

NOTE1: For AirMobile & WLAN installation, site survey, and training services, please do not use the table below. Instead, use the following link: [WLAN and AirMobile Service Quote Guidelines](#).

NOTE2: A signed copy of the Motorola Non-Disclosure Agreement must be received before any order will be processed. Send the signed copy to Motorola, 1301 E. Algonquin Rd.

Schaumburg, IL 60196 Attn: Mobile Data Customer Solutions Engineering Room 0509B or FAX at 847-538-2770.

All quotations for **Laboratory Time** and **Engineering Consulting Services** are to be selected from the following list. No additions or modifications will be allowed.

1. All orders will be placed on D1 HOLD for MDCSE review.
2. Enter all orders with expedite code = "BB" (billing purposes only).
3. All orders must be placed under a separate Factory Order Number that does not include items other than MDCSE Laboratory Time and Engineering Consulting Services.
4. All quotations for Laboratory Time and Engineering Consulting Services are to be selected from the following list. No additions or modifications will be allowed.

**Intelligent Middleware
(Release 5.2.3)**

Ordering Information

General Information

Intelligent Middleware (IMW, formally UNS) is the Motorola Solutions software platform that provides a set of common services of LMR Networks like (Presence, Location, Messaging, Mission Critical Geofence and Group Management) for applications to integrate and use the information. For example, applications like Mapping applications, CAD applications use IMW services to track location, monitor LMR devices/users, communicate with them using text messaging. These services can be requested on a per device basis or for an entire group. Application can use IMW Group Management services to create dynamic groups to track, monitor or text message users within that group.

Note: MSI developed mapping applications are not included with IMW services; however, a mapping application (MSI or third party mapping applications, CAD applications, or any other location/presence enabled application) is a REQUIRED separate purchase for the system features to be fully functional.

APIs are available to Third Party Application Developers looking to build applications on the IMW platform.

Product Description

The main components of Intelligent Middleware includes but may not be limited to the following:

Intelligent Middleware Software (SW):

- **Presence Services:** Status of a specific device(s) on a network (online/offline).
- **Location Services:** Real time determination of a radio's geographic location that mapping applications can leverage.
- **Messaging Service:** Send a message to any user, group or device.
- **Mission Critical Geofence:** Capability for applications, using IMW APIs, to define dynamic geofences and associate actions that APX subscribers will take when subscribers enter / exit the geofence boundary.
- **Group Management Service:** Create, query, notify and subscribe to a defined group. The specified number of devices provisioned for the IMW service is controlled via licensing. The license is not a floating license. Order the correct number of licenses for the radios that will be provisioned in the IMW for each of the services.

The specified number of devices provisioned for the IMW service is controlled via licensing.

The license is not a floating license. Order the correct number of licenses for the radios that will be provisioned in the IMW.

Intelligent Middleware Hardware (HDW):

Starting IMW 5.2.3, IMW is certified on HP Gen10 hardware platform. All new customers or new orders will ship with HP Gen10 server. Upgrading customers having IMW on Gen9 can upgrade to IMW 5.2.3 on their existing HP Gen9 server. Upgrading customers with IMW on HP Gen8 must update the hardware to new HP Gen10 to upgrade the software to IMW 5.2.3.

IMW 5.2.3 is not supported on HP Gen8 server. IMW Intelligent Middleware deployed on HP Gen 9 hardware can upgrade to IMW 5.2.3 only supports a high capacity server.

Non-redundant and redundant server options are available to order based on the specific customer configuration. Please consult the system planner (<https://learning.motorolasolutions.com/feature-guide/60569enus><https://learning.motorolasolutions.com/feature-guide/6343enus>) for more information on capacity requirements.

A low tier IMW can be deployed on ASTRO Core Enablement Server, if desired. ASTRO Core Enablement Server is included as part of ASTRO Master Site Order. IMW deployed on ASTRO Core Enablement Server will support services upto 10000 Devices and services are non-redundant.

Configuration

Models

In Oracle R12 (OMAR) please use the PTO model "UNS" to order IMW. Use the part numbers shown below to check the items generated.

SUPPLEMENTAL CD OPTION (REQUIRED FOR ASTRO; OPTIONAL FOR OTHER RADIO ACCESS NETWORKS)

Description	Full Description	Nomenclature	APC	Price
ADD: SUPPLEMENTAL CD IA (IMW)	-	CA02053AE	232	\$0.00

ASTRO MESSAGING

ASTRO Advanced Messaging System A1 configuration (Text Messaging to ASTRO Radios) is offered as part of IMW product.

Text Messaging to ASTRO Radios is provided by IMW/AMS Software that gets included when IMW Messaging License options are ordered.

Messaging to Radios can be achieved by

1. Using Messaging Client called AMS Smart Client (see T7747 below for ordering information) OR
2. External Applications, like 3rd Party (non-MSI) CAD can use IMW Messaging APIs to integrate text messaging to one of more ASTRO Radios from CAD position.

Talkgroup Text Messaging is enabled using MCC7100 Gateway Console, via the AMS Smart Client. With this feature, text messages can be sent to a talkgroup. All affiliated members of a Talkgroup will receive the text message.

Talk Group Messaging Option REQUIRES ordering a dedicated MCC7100 Gateway Console for AMS. Refer to the MCC7100 Price Pages for Ordering Information. IMW Network Services (SQM01SUM0257), High Capacity Server, IA Supplemental CD are also required.

NOTE: GEO REDUNDANCY OR HIGH AVAILABILITY FEATURE IS NOT SUPPORTED WHEN USING AMS A1 MESSAGING FOR ASTRO.

Description	Full Description	Nomenclature	APC	Price
MCCP Smart Client Software	-	T7746	068	\$2,600.00
ADD: TALK GROUP MESSAGING	Must order exact same quantity of CA03066AA AND T7746 Smart Client. Requires AMS R4.1 and ASTRO A7.16 and higher.	CA03066AA	068	\$500.00

MISSION CRITICAL GEOFENCE

Intelligent Middleware provides capability for external applications, using IMW APIs, to define dynamic geofences and associate actions that APX subscribers will take when subscribers enter / exit the geofence boundary. Since the actions are evaluated and taken by the subscribers dynamically, this is termed as Mission Critical Geofence.

Mission Critical Geofence API capability is enabled on a per device basis. Please order Mission Critical Geofence licenses using model T8108 - UNS RESOURCE EXPANSION available at IMW Expansion Catalog https://www.motorolasolutions.com/en_us/product-catalog/ref-page-display.html?refPath=/catalog/dup/products/intelligent-middleware--imw-/imw_expansions_andupgrades#productcat

TELEMETRY SERVICE (RADIO BATTERY LEVEL MONITORING)

Intelligent Middleware provides the capability to report APX Radio Battery Level to applications interested in battery level monitoring. Personnel Accountability Offer and IMPRES Battery Fleet Management's APX Over-the-Air Battery Management feature requires IMW Telemetry Services licenses.

Telemetry Service is applicable for ASTRO Radios only. Telemetry Service license ordering is currently available as IMW Expansion Option. Please order telemetry licenses using model T8108 - UNS RESOURCE EXPANSION available at IMW Expansion Catalog https://www.motorolasolutions.com/en_us/product-catalog/ref-page-display.html?refPath=/catalog/dup/products/intelligent-middleware--imw-/imw_expansions_andupgrades#productcat

Intelligent Middleware (IMW) Expansions and Upgrades

Ordering Information

General Information

Ordering instruction in this document is intended for the following scenarios

- Upgrade existing IMW system to the latest shipping IMW software release
- Expand existing IMW to add devices or resources (capacity licenses) to already enabled services like Presence, location, etc.
- Expand existing IMW to add new services and purchase capacity licenses to enable newly added services. (e.g. add location service for 500 devices. Location service does not exist previously on the system)

IMW Upgrade

There are hardware and software considerations when upgrading the IMW System.

IMW 5.2.3 release is certified on HP Gen10 and HP Gen9 servers platforms. Table below indicates various upgrade paths and their respective hardware migration requirements

Note: To order a new Intelligent Middleware, please search "IMW" in the product catalog search bar.

Upgrading From	Upgrading To	Hardware Impact	Software Impact
IMW 5.2 or IMW 5.2.1 on HP Gen8 Server	IMW 5.2.3	Replace Server with HP Gen10 Server	- Order IMW Software CA03101AA - Order 3rd Party Software Kit CA03610AA - Order ESXi 6.x License CA03612AA - Order HP Gen 10 Firmware CA03611AA
IMW 5.2.2 on HP Gen8 Server	IMW 5.2.3	Replace Server with HP Gen10 Server	- Order IMW Software CA03101AA - Order 3rd Party Software Kit CA03610AA - Order HP Gen 10 Firmware CA03611AA
IMW 5.1 or Older on HP Gen8	IMW 5.2.3	Replace Server with HP Gen10	- Order License Upgrade Kit CA03240AA - Order HP Gen 10 Firmware CA03611AA

Server		Server	
IMW 5.2 or IMW 5.2.1 on HP Gen9 Server	IMW 5.2.3	No Impact	- Order IMW Software CA03101AA - Order 3rd Party Software Kit CA03610AA - Order ESXi 6.x License CA03612AA
IMW 5.2.2 on HP Gen9 Server	IMW 5.2.3	No Impact	- Order IMW Software CA03101AA - Order 3rd Party Software Kit CA03610AA
IMW 5.1 or Older on HP Gen9 Server	IMW 5.2.3	No Impact	- Order IMW Software CA03101AA - Order License Upgrade Kit CA03240AA

Ordering Instructions

In Oracle R12 (OMAR) please use the PTO Model “UNSEXPANSION”. Do NOT use “UNSEXPANSIONS”. Use the part numbers shown below to check the items generated.

Device or Service Expansions: These options are used to add devices to an existing IMW in the field and will allow additional device to be activated.

You will need to choose the correct option based on the release of software that your customers Fielded/Existing IMW is on.

1. Choose model number T8108
3. Choose the option for adding ADDITIONAL RESOURCES to an existing Service (IMW already fielded) CA03096
2. Choose the option which correlates to the number of additional devices needed.

Service Expansions: These options also allow a service to be added. For example, if presence was ordered on the original IMW and the customer now wants to add location. Please note that IGAM was only available for Dimetra and is now covered under Group Management.

1. Choose the model number T8108
2. Choose the option for adding a NEW SERVICE to an existing IMW CA03097
3. Choose the option which correlates to the number of devices needed.

Latest Shipping Software:

This model will provide the customer with the latest shipping version of software. This will not include any functionality that is "optioned" for an additional fee. Depending on the version of software that the IMW/UNS is currently on, it may require a hardware upgrade as well. See table above for hardware and software requirements.

1. Choose the model number.
2. Choose the appropriate Software License Upgrade Kit if you have existing IMW Server

TELEMETRY SERVICE OPTIONS (BATTERY LEVEL MONITORING)

Intelligent Middleware provides the capability to report APX Radio Battery Level to applications interested in battery level monitoring. Personnel Accountability Offer and IMPRES Battery Fleet Management's APX Over-the-Air Battery Management feature requires IMW Telemetry Services licenses.

Telemetry Service is applicable for ASTRO Radios only.

Order the following option with quantity equal to the number of devices requiring battery level monitoring. Presence license is mandatory for telemetry services. That is, Presence licenses should either already exist or need to be purchased for the devices requiring battery level monitoring. For more information ordering presence license, see PRESENCE RESOURCE OPTIONS section.

For orders greater than quantity of 5000 users or devices, please contact Ramesh Rangappa (rameshr@motorolasolutions.com) for a custom quote

Description	Full Description	Nomenclature	APC	Price
ADD : RESOURCES FOR TELEMETRY SERVICES	-	UA00473AA	232	\$0

MISSION CRITICAL GEOFENCE

Intelligent Middleware provides capability for external applications, using IMW APIs, to define dynamic geofences and associate actions that APX subscribers will take when subscribers enter / exit the geofence boundary. Since the actions are evaluated and taken by the subscribers dynamically, this is termed as Mission Critical Geofence.

Mission Critical Geofence API capability is enabled on a per device basis. Order the following option with quantity equal to the number of devices to be enabled for Dynamic Geofence on IMW

Nomenclature: CA03597AA (ADD : RESOURCES FOR MISSION CRITICAL GEOFENCE)

Infrastructure Repair Service

Ordering Information

General Information

Infrastructure Repair with Advanced Replacement service covers all Motorola-manufactured equipment, as well as equipment from select third-party infrastructure vendors. Factory trained and certified technicians troubleshoot, analyze, test, and repair your equipment at Motorola's IDO.

For more information, contact your Motorola representative.

Features

- Extensive inventory on Motorola and custom parts used for repairs
- Access to Motorola engineers and product groups
- Motorola equipment tested by laboratory simulation using state-of-the-art test equipment
- Manage OEM (Original Equipment Manufacturer) repair process, coordination, and testing

Statement of Work

One of the primary business objectives of the North American Group (NAG) is to promote the sales of STANDARD service products. Standards help to ensure consistent and profitable delivery of our service products to our customers. To that end, the customer Statement of Work for this Standard Service Product **CANNOT** be modified. All requests for modifications to STANDARD service products or the development of "custom" service products should be routed through the Solutions Planning process. Your first point of contact for these requests is your local Area Service Manager.

Statement of Work

Ordering Requirements

1. **This product cannot be ordered directly through COF at this time.** This product must be ordered using the Service Lifecycle Application. Please

contact your local Territory Service Manager (TSM) or Customer Support Manager (CSM) if you are interested in ordering this product.

2. This Service **cannot** be order in conjunction with Infrastructure Repair with Advanced Replacement SVC01SVC1101.
3. Options for this product are based on the component parts of the complete system. Pricing is based on the size and complexity of the customer's system configuration such as the type of system, number of sites and number of base stations. **To ensure accurate pricing, orders will not be processed or accepted if they do not include all system components.**
4. Enter the main line item as quantity one.
5. Options are required as sub-items, with the quantity equal to the option description.
6. All dollar amounts reflect an annual one year pricing.
7. A Customer Support Plan must be created to provide detailed information to the customer regarding delivery of this service.

Infrastructure Repair with Advanced Replacement Service

Ordering Information

General Information

Infrastructure Repair with Advanced Replacement service covers all Motorola-manufactured equipment, as well as equipment from select third-party infrastructure vendors. Factory trained and certified technicians troubleshoot, analyze, test, and repair your equipment at Motorola's IDO.

When available, Motorola will provide Customer with an Advanced Replacement unit(s) or FRU(s) in exchange for Customer's malfunctioning FRU(s). Non-standard configurations, Customer-modified Infrastructure and certain third party Infrastructure are excluded from Advanced Replacement service. Malfunctioning FRU (s) will be evaluated and repaired by IDO and returned to IDO FRU inventory upon completion of repair.

For more information, contact your Motorola representative.

Features

- Extensive inventory on Motorola and custom parts used for repairs
- Equipment tested by laboratory simulation using state-of-the-art test equipment
- New or reconditioned FRU sent next day air to replace malfunctioning units
- Access to Motorola engineers and product groups
- Manage OEM (Original Equipment Manufacturer) repair process, coordination, and testing

**Infrastructure Software
Installation Service**

Ordering Information

General Information

Infrastructure Software Installation Service provides the installation of one Motorola Software Enhancement Release and the additional hardware required.

Features

- - Access to Motorola Technical Expertise
 - Hardware and Software Installation

Statement of Work

One of the primary business objectives of the North American Group (NAG) is to promote the sales of STANDARD service products. Standards help to ensure consistent and profitable delivery of our service products to our customers. To that end, the customer Statement of Work for this Standard Service Product **CANNOT** be modified. All requests for modifications to STANDARD service products or the development of "custom" service products should be routed through the Solutions Planning process. Your first point of contact for these requests is your local Area Service Manager.

Statement of Work

Definitions

Capitalized terms used in this Statement of Work and not otherwise defined within the Statement of Work or Communications System Agreement have the following meanings: [Click here](#)

1.0 Description of Service

Infrastructure Software Installation provides the technical resources to install and activate one (1) Enhancement Release per year. Subscriber software installation is not included in this service.

The terms and conditions of this Statement of Work (SOW) are an integral part of Motorola's Service Terms and Conditions or other applicable Agreement to which it is attached and made a part thereof by this reference.

2.0 Motorola has the following responsibilities:

- 2.1 Install Enhancement Release on infrastructure equipment only that has been provided pursuant to the Software Subscription Statement of Work.

2.2 Install additional hardware and software as required by the Enhancement Release.

3.0 Customer has the following responsibilities:

- 3.1 Purchase additional Equipment needed to implement an Enhancement Release.
- 3.2 If travel is required beyond two (2) hours or one hundred twenty (120) miles by vehicle from the prime site to a remote site to deliver this service, the Customer is responsible for incremental travel and expenses incurred.
- 3.3 Inform System users of upgrade plans and scheduled System downtime. Perform appropriate system backups and make them readily available during the installation of the Enhancement Release.
- 3.4 Properly store and make available purchased software and hardware needed for installation of the Enhancement Release.
- 3.5 Cooperate with Motorola and perform all acts that are reasonable or necessary to enable Motorola to provide these services to Customer.

Date Approved by Motorola Legal 09/01/03

Ordering Requirements

- This product requires an authorized quotation from the service delivery organization. Contact your local Area Service Manager(ASM) or Customer Support Manager(CSM) for more details.
- **This product cannot be ordered directly through COF at this time.** This product must be ordered using the Services Pricing Configurator. Please contact your local ASM or CSM if you are interested in ordering this product. For a listing of ASMs/CSMs [click here](#).
- A Customer Support Plan must be created to provide detailed information to the customer regarding delivery of this service.

Motorola ASTRO®25 Conventional w/IP Release 3.1 Systems

Ordering Information

Features

Motorola ASTRO®25 Conventional with IP systems support the following features.

System Level Features

- Seamless IP Connectivity in Radio System Infrastructure
- Centralized Radio System Fault Management
- End to End Encryption
- Voice Selective Calls
- Emergency Alarms
- PTT ID
- AES Algorithm
- Key Management via OTAR (for radios) & OTEK (for consoles)
- Agency Partitioning
- Centralized Radio System Configuration Management
- IMBE Vocoder for ASTRO 25 Resources
- Call Alerts
- Emergency Calls
- PTT ID Alias
- DES-OFB Algorithm
- Key Management via Store and Forward (KMF with KVL)

General Information

The following information applies only to ASTRO 25 Conventional Release 3.1 systems. There are three areas that are addressed here:

- MCC 7500 Console and supporting equipment
- IP Connectivity for an ASTRO 25 Conventional 3.1 system
- Parallel audio between dispatch centers that is implemented via new software for the ASTRO-TAC 3000 Comparator

Please contact the system planner for your region for ordering information. Most items have extended delivery.

Configuration

Information for MCC 7500 Console and Supporting Equipment

To put an MCC 7500 Console on an ASTRO 25 3.1 system requires more than just the Console equipment. Supporting equipment is necessary to configure the console and control the audio between the console and the base stations.

The ASTRO 25 Conventional Controller and Network Manager provide the audio control and configuration capabilities. The Network Manager brings a new level of fault management to a conventional system. A Personal Computer (PC) workstation serves as the client terminal for the Network Manager.

The Digital Interface Unit (DIU) is no longer used with the MCC 7500 console in a conventional system. A new interface product is used called the Digital Conventional Channel Gateway (DCCGW). The DCCGW provides the interface between the base station and the Console.

If existing consoles need to have parallel audio with the new MCC 7500 Console then an ASTRO-TAC 3000 Comparator with the right version of software will be needed for each channel that both consoles need to use.

Step 1: Order the MCC 7500 Console equipment. Please refer to the [MCC 7500 Dispatch Consoles, Peripheral Devices, MCC 7500 Archiving Interface Server, IP Logging Recorder](#) and [Auxiliary Input/Output Server](#) catalog pages for information on how to order this equipment.

Note: Please use the CA01222AA software licenses shown below instead of the CA00287AA software license listed on the ECAT pages mentioned above.

Description	Full Description	Nomenclature	APC	Price
ADD: MCC 7500 DISPATCH CONSOLE STANDARD CAPACITY SOFTWARE LICENSE	Used when consoles are part of an ASTRO 25 system that uses the ARC 4000 controller. Order as a sub-item to the B1907 and/or B1908.	CA01222AA	443	\$14,000.00

Note: To order the OTEK feature on an operator position or archiving interface server, please use the CA01220AA option shown below.

Description	Full Description	Nomenclature	APC	Price
ADD: MCC 7500 / MCC 7100 OTEK OPERATION	Required for each dispatch console and archiving interface server that will be managed via OTEK. Order as	CA01220AA	443	\$4,020.00

	a sub-item to the B1908 and/or B1918.			
--	--	--	--	--

Step 2: Order the Digital Conventional Channel Gateway (DCCGW) equipment for digital conventional base stations that interface to the MCC 7500 Console. Please contact the system planner for your region for ordering information.

Step 3: Order the Conventional Channel Gateway (CCGW) equipment for analog conventional base stations that interface to the MCC 7500 Console. Please refer to the [Conventional Channel Gateway](#) page for information on how to order this equipment.

Information for IP Connectivity on an ASTRO 25 3.1 System

IP Connectivity between the major elements of an ASTRO 25 Conventional 3.1 system enables customers to reduce their cost of ownership by leveraging IP networks instead of expensive leased lines. Circuit to packet Converter (CTP) products can be used to connect the major products of an ASTRO 25 Conventional 3.1 system through an IP network that has been properly designed for this application. The links that are supported are:

Digital Conventional:

- Base Radio to Digital Interface Unit (DIU)
- Receiver or Base Radio to ASTRO-TAC 3000 Comparator
- ASTRO-TAC 3000 Comparator to Remote DIU

Analog Conventional:

- Base Radio (Tone Remote Control only) to Central Electronics Bank (CEB)

Conventional Data:

- Radio Network Controller (RNC) to Remote DIU (serial link)

<p>Note: The configurations above are the <u>only</u> configurations supported. Please note that IP connectivity is <u>not</u> supported for mixed mode or digital simulcast stations. The use of ASTRO Modems with IP connectivity is also <u>not</u> supported.</p>
--

Circuit to Packet (CTP) converters used for the link applications shown above have been carefully selected for these specific applications. Proper operation depends on the correct configuration of the circuit to packet converters and the use of an IP network with the required characteristics. For detailed information about the circuit to packet converter configuration and the IP network characteristics, please see the IP Specifications for Analog and ASTRO Conventional document (Available in July of 2008).

There are two-port models for supporting base station sites. There are 4-port and 24-port chassis and interface modules for supporting larger sites. The two-port models are recommended for base station sites with one or two stations. The 4-port models are recommended for base station sites with 3 or 4 stations. When 3 to 12 ports are needed at a given location it is best to use multiple 4-port models. Beyond 12 ports it is best to use the 24-port chassis with 1, 2 or 3 8-port cards.

The two-port models come with two different interfaces. The TT2015A model is for products using a V.24 interface. The products that use the V.24 interface are digital conventional base stations and receivers, Digital Interface Units (DIU) and the ASTRO-TAC 3000 Comparator. The RNC uses a serial interface. The TT2016A model is primarily for products using a 4-wire

Trunk Only (4WTO) interface. The products that use 4WTO interfaces are analog conventional base stations. If a mixture of V.24 and 4WTO interfaces is needed in one circuit to packet converter, then the TT2016A can be used. Each TT2015A or TT2016A comes with the operating system software. Each port has a DB-25 connector. Standard cables for these models are not available. Plan on including custom cable build costs. Each unit comes with hardware for rack mounting. The TT2015A and TT2016A operate on 100-240 VAC, 50-60 Hz over 0-40°C and 5-90% non-condensing humidity.

The 4-port models come with two different interfaces just like the two-port models. The TT2017A provides 4 interface ports for V.24 product connection. The TT2028A provides 4 interface ports that can be software configured for either V.24 product connection or 4WTO connection. The I/O ports use the TT05144AA RS-232 to 4 DB-25 breakout cables since each 100-pin RS-232 port supports 4 device connections. The cable is 9 feet long. Cable extensions may be needed for your specific situation. Plan on including custom cable build costs. Each unit comes with hardware for rack mounting. TT2017A and TT2028A operate on 100-132 VAC or 200-240 VAC over 0-40°C and 5-90% non-condensing humidity.

The 24-port chassis can be optioned to include two different types of 8-port cards for interfacing to the circuit side of the circuit to packet converter and one of two different interface cards for the network side of the circuit to packet converter. On the network side of the circuit to packet converter the standard connection is a dual “copper” connection. There are two fiber connection options. The TT05137AA provides dual 1000BaseFX SC Multimode fiber gigabit PCI Mezzanine Card (PMC) connections. The TT5038A provides dual 100BaseFX SC Multimode fiber fast Ethernet connections. On the circuit side the TT5139AA provides 8 interface ports that can be software configured for V.24 product connection. The TT05140AA provides 8 interface ports that can be software configured for either V.24 product connection or 4WTO connection. Up to 3 interface cards (any combination of the TT05139AA or TT05140AA) can be installed in the TT2018A 24-port chassis. The I/O ports use the TT05144AA RS-232 to 4 DB-25 breakout cables since each 100-pin RS-232 port supports 4 device connections. Cable extensions may be needed for your specific situation. Plan on including custom cable build costs. Each unit comes with hardware for rack mounting. TT2018A operates on 100-240 VAC, 50-60 Hz over 0-40°C and 5-90% non-condensing humidity.

Application	V.24 Circuit to Packet Converters			4WTO and/or V.24 Circuit to Packet Converters		
	2-port	4-port	24-port	2-port	4-port	24-port
Digital Station to DIU	TT2015A	TT2017A	TT2018A w/ TT05139AA			
Digital Station or Receiver to Comparator	TT2015A	TT2017A	TT2018A w/ TT05139AA			
Comparator to Remote DIU	TT2015A	TT2017A	TT2018A w/ TT05139AA			
RNC to Remote DIU	TT2015A	TT2017A	TT2018A w/ TT05139AA			

Analog Station to CEB		TT2016A	TT2028A	TT2018A w/ TT05140AA
Note: While the 4WTO / V.24 circuit to packet converters could be used for any application listed above, these recommendations are generally the lowest cost selections.				

The TT2018A 24-port chassis may be order with a TT05142AA Redundant Power Supply option for improved reliability. The 24-port chassis has a suite of spares that can also be ordered if desired.

If firewall protection is desired, the T7376 Firewall can be used. The firewall connects between the IP side of any of the circuit to packet converters and the IP network on the other side. The T7376 Firewall performance can support 25 to 40 IPSec tunnels. If more than 40 tunnels are needed at one site, then multiple firewalls may be needed. A 6' cable and shelf rack mounting kit come standard with the firewall.

To effectively manage the circuit to packet converter equipment and determine the performance of the network it is necessary to order the CTP Network Management Server DDN9458. The DDN9458 allows customers to monitor performance over time and adjust buffer sizes in the circuit to packet converters to accommodate Ethernet network changes. The Server can reach any of the specified circuit to packet converters as long as there is connectivity through the network. A minimum of 1 is required and generally that is all that you will need unless you have more than one independent network. The DDN9458 is a one rack unit high Dell dual core processor server with two hard drives. The software comes preloaded on the server. If you need an Ethernet Switch to connect the DDN9458 to the network you can order the CLN1836 HP Procurve Switch 2610-24.

NOTE: For the circuit to packet converter descriptions below, v.24 interface is a subset of the EIA530 interface.

Ordering Requirements

Please contact the system planner for your region for ordering information. Most items have extended delivery.

CTP stands for Circuit To Packet. Unforecasted CTP orders are 16 weeks ARO for quantities that are 15 or greater of a given model or for quantities that are 30 or greater for a collection of CTP products.

Be sure to contact the Service team to get support options quoted for the CTP Converters and the Firewall. They may have to contact Juniper directly to get the quote.

2-Port and 4-Port Configurations

8-Port to 24-Port Configurations

Mandatory Network Management Server

Accessories

Spares

Firewall

Description	Full Description	Nomenclature	APC	Price
JUNIPER/FIREWALL GATEWAY	Secure Services Gateway with RS-232 Aux backup	T7376	147	\$1,200.00

Information for Parallel Audio Between Dispatch Centers

Parallel Audio between dispatch centers can be achieved through the use of an ASTRO-TAC Comparator with the correct version of software. This parallel operation can be achieved between tone remote control Motorola Consoles (Gold Elite, MCC5500). It also can be provided between tone remote control Motorola Consoles (Gold Elite, MC5500) and the MCC 7500 for conventional base stations. There is an extended delivery time until the new version of Comparator software will be ready for shipment. Please contact the system planner for your region for ordering information. Most items have extended delivery.

For ASTRO-TAC 3000 Comparators that are FLASH capable order:

Description	Full Description	Nomenclature	APC	Price
ADD: SOFTWARE UPGRADE	Order with T6341 only. Backplane IDs required. Backplane IDs must be entered in the same quantity as the option quantity.	CA00007AA	729	\$1,800.00
SOFTWARE UPGRADE DISK ONLY	-	T6341	729	\$0.00

If the ASTRO-TAC 3000 Comparator isn't FLASH capable (shipments prior to around 1999/2000), then a hardware upgrade is required. To upgrade an ASTRO-TAC 3000 to an ASTRO-TAC 3000 with software download capability order:

Description	Full Description	Nomenclature	APC	Price
SW SWNLD CAP FOR ATAC3K	Upgrades ASTRO-TAC 3000 to ASTRO-TAC 3000 with software download capability.	T6340	729	\$0.00

AND if the wire-line boards ARE CLN6883 or CLN1269, then order:

Description	Full Description	Nomenclature	APC	Price
ENH: SOFTWARE DOWNLOAD CAP	Order with T6340	U455AA	729	\$400.00

IC	only.			
----	-------	--	--	--

AND if the wire-line boards are NOT CLN6883 or CLN1269, then order:

Description	Full Description	Nomenclature	APC	Price
ENH: 8 I/O SW DNLD CAP UPGR	Software Download Capable Input/Output port option. For Astro-TAC to ASTRO-TAC 3000 upgrades, order with T5730 and U445. For ASTRO-TAC 3000 upgrades, order with T6340 and U454 or U455.	X226AH	729	\$4,000.00
ENH: 10 I/O SW DNLD CAP UPGR	Software Download Capable Input/Output port option. For Astro-TAC to ASTRO-TAC 3000 upgrades, order with T5730 and U445. For ASTRO-TAC 3000 upgrades, order with T6340 and U454 or U455.	X227AH	729	\$5,000.00
ENH: 12 I/O SW DNLD CAP UPGR	Software Download Capable Input/Output port option. For Astro-TAC to ASTRO-TAC 3000 upgrades, order with T5730 and U445. For ASTRO-TAC 3000 upgrades, order with T6340 and U454 or U455.	X228AH	729	\$6,000.00

ENH: 6 I/O SW DNLD CAP UPGR	Software Download Capable Input/Output port option. For Astro-TAC to ASTRO-TAC 3000 upgrades, order with T5730 and U445. For ASTRO-TAC 3000 upgrades, order with T6340 and U454 or U455.	X225AH	729	\$3,000.00

GTR 8000 Base Radio

STEP 1: MAIN MODEL

The following main model must be ordered for a GTR 8000 Base Radio.

Description	Full Description	Nomenclature	APC	Price
GTR 8000 Base Radio	-	T7039	112	\$0.00

NOTE: Only order a quantity of one of the T7039A per line item. This model number will automatically generate internally added options for all hardware components that are not part of an orderable option (such as cabling).

STEP 2: FREQUENCY BAND AND POWER LEVEL

Enter the Frequency Band option:

Description	Full Description	Nomenclature	APC	Price
ADD: 700/800 MHZ	-	CA00855AA	112	\$6,300.00
ADD: UHF R2 (435-524 MHZ)	-	X640AL	112	\$6,300.00
ADD: VHF (136-174 MHZ)	-	X530BG	112	\$6,300.00
ADD: UHF R1 (380-435 MHZ)	-	X448AA	112	\$6,300.00

One TX and one RX frequency must be specified and will be collected at the main model level.

Frequency Rules for CA00855AA

RX Range: 794.00625 - 824.99375 MHz. TX Range: 764.00625 - 775.99375 MHz and 851.00625 - 869.99375 MHz.

If Freq (TX) is 764.00625 - 775.99375 MHz, then Freq (Rx) = TX + 30 If Freq (TX) is 851.00625 - 869.99375 MHz, then Freq (Rx) = TX – 45. All frequencies must be divisible by 6.25 kHz.

Note: Currently, 800.000 MHz and 820.000 MHz are not supported for Rx.

Frequency Rules for X640AL

RX Range: 435.0000-524.0000 MHz. TX Range: 435.0000-524.0000 MHz.

If Freq (TX) is 435-524 MHz, then Freq (Rx) $\geq \pm .25$ MHz TX All frequencies must be divisible by 6.25 kHz.

Note: Currently, 440 MHz, 454.5 MHz, 460 MHz, 474.6375 MHz, 480 MHz, 500 MHz, 520 MHz are not supported for Rx.

Frequency Rules for X448AA

RX Range: 380.0000 – 435.0000 MHz. TX Range: 380.0000 – 435.0000 MHz

If Freq (TX) is 380-435 MHz, then Freq (Rx) $\geq \pm .25$ MHz TX. All frequencies must be divisible by 6.25 kHz.

Note: Currently, 380 MHz, 400 MHz and 420 MHz are not supported for Rx.

Frequency Rules for X530BG

RX Range: 136.0000 – 174.0000 MHz. TX Range: 136.0000 – 174.0000 MHz.

If Freq (TX) is 136 - 174 MHz, then Freq (Rx) $\geq \pm .25$ MHz TX. All frequencies must be divisible

by 6.25, 5.000, 3.125, or 2.500 MHz.

Note: Currently the following frequencies are not supported for Rx: 140.00000, 148.08250, 152.00750, 153.00750, 153.49250, 154.37125, 154.46375, 154.47125, 154.47875, 154.50250, 160.00000, 169.17200, 169.80700, 173.20375, 173.39625, and 173.43570 MHz.

STEP 3: SOFTWARE SYSTEM OPERATION

Choose the appropriate system software option to provide the base radio with system software.

STEP 4: SOFTWARE SYSTEM CONFIGURATION

Choose the appropriate optional software system configuration if required.

Description	Full Description	Nomenclature	APC	Price
ADD: ASTRO 25 CONVENTIONAL SIMULCAST SOFTWARE	-	CA01502AA	595	\$1,000.00
ADD: ASTRO 25 CONVENTIONAL VOTING SOFT	-	CA01505AA	595	\$300.00

STEP 5: OPTIONAL FEATURES

Choose the appropriate optional system feature options if required.

Description	Full Description	Nomenclature	APC	Price
ADD: INTERNAL FREQUENCY REFERENCE	-	CA01506AA	112	\$1,100.00
ADD: ANTENNA RELAY	-	CA01504AA	112	\$350.00
ADD: FALL BACK IN SIMULCAST CABINET REPEAT	-	CA01503AA	595	\$600.00

CA01504AA required for base stations with a single antenna.

CA01503AA allows the station to in-cabinet repeat as a fall back mode in a simulcast configuration.

CA01506AA provides an Ultra High Stability Oscillator module.

STEP 6: PERIPHERALS

Tx Filters and Duplexers: Tx filters are not compatible with Duplexers. The PMU functionality is currently disabled.

700/800 MHz: If the customer frequencies are in the 700 MHz frequency range (Tx: 764.00625 - 775.99375 MHz), the customer must order X182BW or CA00882AA per FCC licensing rules. If the customer frequencies are in the 800 MHz frequency range (Tx: 851.00625 - 869.99375 MHz), the following peripherals are optional.

UHF (R1 380-435 MHz, R2 435-524 MHz): The following peripherals are optional.

VHF (136-174 MHz): The following peripherals are optional. TX and RX frequencies must be at least 1.5 MHz apart if peripherals are desired.

Description	Full Description	Nomenclature	APC	Price
ADD: 800 MHZ TX FILTER W/PMU	-	CA00883AA	112	\$1,000.00
ADD: DUPLEXER, 158-174 MHZ	-	X182CA	112	\$1,380.00
ADD: DUPLEXER, 144-160 MHZ), THEN TX AND RX MUST BE 144-160	-	X182CB	112	\$1,380.00
ADD: DUPLEXER, 136-146 MHZ), THEN TX AND RX MUST BE 136-146	-	X182CC	112	\$1,380.00
ADD: DUPLEXER, 700 MHZ	-	X182BW	112	\$1,380.00
ADD: DUPLEXER, 800 MHZ	-	X182BX	112	\$1,380.00
ADD: DUPLEXER, UHF	-	X182BZ	112	\$1,380.00

X182BW provides the option of using the same antenna for receive and transmit in the 700 MHz standalone base radio configuration. This option provides the filtering required by the FCC for 700 MHz.

X182BX provides the option of using the same antenna for receive and transmit in the 800 MHz standalone base radio configuration.

X182BZ provides the option of using the same antenna for receive and transmit in the UHF standalone base radio configuration. If the X182BZ is ordered, X265AP (ADD: NARROW PRESELECTOR, 380-512 MHz) is required. The transmit frequencies must fall within one of the following subbands: 380-403, 403-435, 435-470, 470-494, and 494-512 MHz. Also, above 470 MHz, the Tx and Rx frequency separation should be at least 3.0 MHz. Below 470 MHz, the Tx and Rx frequency separation should be at least 5.0 MHz.

X182CC provides the option of using the same antenna for receive and transmit in the VHF (136-146 MHz) standalone base radio configuration. If the X182CC is ordered, the X265AN (ADD: NARROW PRESELECTOR, 136-154) is required. The Tx and Rx frequency separation must be at least 1.5 MHz.

X182CB provides the option of using the same antenna for receive and transmit in the VHF (144-160 MHz) standalone base radio configuration. If the X182CB is ordered, the X265AN (ADD: NARROW PRESELECTOR, 136-154) or X265AM (ADD: NARROW PRESELECTOR, 150-174) are required. The Tx and Rx frequency separation must be at least 1.5 MHz.

X182CA provides the option of using the same antenna for receive and transmit in the VHF (158-174 MHz) standalone base radio configuration. If the X182CA is ordered, the X265AM (ADD: NARROW PRESELECTOR, 150-174) is required. The Tx and Rx frequency separation must be at least 1.5 MHz.

CA00882AA provides the TX filtering of up to 12 combined 700 MHz transmitters. The Tx filter can be added after the cavity combiner.

CA00883AA provides the required TX filtering of up to 12 combined 800 MHz transmitters. The Tx filter can be added after the cavity combiner.

Narrow Preselector: The Base Radio Preselector rejects unwanted signals including the transmitter signals from overloading the receiver. If TIA102-CAAB Class A spurious response rejection (90 dB) specification is required, the Base Radio Preselector must be ordered. If a narrow preselector is required, order X265AJ, X265AH, X265AM, X265AN or X265AP based on the frequency band of the system. The filter is optional for the GTR 8000 Base Radio. If a duplexer is to be ordered also, a narrow preselector is required for UHF (X448AA or X640AL) or VHF (X530BG) systems.

Description	Full Description	Nomenclature	APC	Price
ADD: BR PRESELECTOR, 800 MHZ	-	X265AH	112	\$500.00
ADD: BASE RADIO PRESELECTOR, 700 MHZ	-	X265AJ	112	\$500.00
ADD: BR PRESELECTOR 380-512 MHZ	-	X265AP	112	\$500.00
ADD: NARROW PRESELCTOR, 136-154 MHZ	-	X265AN	112	\$500.00
BR PRESELCTOR, 150-174 MHZ	-	X265AM	112	\$500.00

X265AJ provides RX filtering in the 700 MHz standalone base radio configuration and is attached to the back side of the base radio.

X265AH provides RX filtering in the 800 MHz standalone base radio configuration and is attached to the back side of the base radio.

X265AN provides RX filtering in the VHF subband 136 - 154 MHz for the standalone base radio configuration and is attached to the back side of the base radio. When ordering this option, the frequency separation between the highest Rx frequency and the lowest Rx frequency can be no more than 4 MHz. Also, all Rx frequencies must fall within the following subband: 136 - 154

MHz.

X265AM provides RX filtering in the VHF subband 150 – 174 MHz for the standalone base radio configuration and is attached to the back side of the base radio. When ordering this option, the frequency separation between the highest Rx frequency and the lowest Rx frequency can be no more than 4 MHz. Also, all Rx frequencies must fall within the following subband: 150 – 174 MHz.

X265AP provides RX filtering in the UHF subband 380-512 MHz for the standalone base radio configuration and is attached to the back side of the base radio. When ordering this option, the frequency separation between the highest Rx frequency and the lowest Rx frequency can be no more than 4 MHz. Also, all Rx frequencies must fall within one of the following subbands: 380-435, 435-470, or 470-512 MHz.

Dual Circulator: If an external dual circulator is needed, order quantity one of X676BF, X676BG, X676BJ, X676BI, or X676BH based on the frequency of the system.L

NOTE: The dual circulator is not compatible when the base radio ordered is using Linear Simulcast Modulation (LSM) in the UHF (X640AL or X448AA) or the VHF frequency band (X530BG).

Description	Full Description	Nomenclature	APC	Price
ADD: EXT DUAL CIRCULATOR, 144-160 MHZ	-	X676BI	112	\$1,500.00
ADD: EXT DUAL CIRCULATOR, 158-174 MHZ	-	X676BH	112	\$1,500.00
ADD: 700/800 MHZ EXTERNAL DUAL CIRCULATOR	-	X676BF	112	\$1,000.00
ADD: EXT DUAL CIRCULATOR, 136-146 MHZ	-	X676BJ	112	\$1,500.00

X676BF adds 2 circulators and a low pass filter that are mounted on a 2 rack unit tray for the 700/800 MHz band. Since the power amplifier has one circulator, this option brings the total number of circulators to three.

X676BG adds 2 circulators and a low pass filter that are mounted on a 2 rack unit tray for the UHF band (380 – 524 MHz). Since the power amplifier has one circulator, this option brings the total number of circulators to three. All Tx frequencies must fall within one of the following subbands: 380-403, 403-470, or 470-512 MHz. This option is not compatible if the base radio will be used with Linear Simulcast Modulation (LSM).

X676BJ adds 2 circulators and a low pass filter that are mounted on a 2 rack unit tray for the VHF band (136 – 146 MHz). Since the power amplifier has one circulator, this option brings the total number of circulators to three. This option is not compatible if the base radio will be used with Linear Simulcast Modulation (LSM).

X676BI adds 2 circulators and a low pass filter that are mounted on a 2 rack unit tray for the VHF band (144 – 160 MHz). Since the power amplifier has one circulator, this option brings the total number of circulators to three. This option is not compatible if the base radio will be used with Linear Simulcast Modulation (LSM).

X676BH adds 2 circulators and a low pass filter that are mounted on a 2 rack unit tray for the VHF band (158 – 174 MHz). Since the power amplifier has one circulator, this option brings the total number of circulators to three. This option is not compatible if the base radio will be used with Linear Simulcast Modulation (LSM).

STEP 7: CABLES

A 12 foot AC power cable will come standard with the base radio. If a DC power cable is required, order option CA01400AA. If a region-specific AC power cable is required for international applications, please order one of the following power cables and it will be shipped instead of the domestic power cable.

The standard Battery Temperature Sensor is 40 feet long. The CA00975AA option offers an extension cable that provides a 50 foot extension. Up to 3 extensions can be ordered.

Description	Full Description	Nomenclature	APC	Price
ADD: POWER CABLE, DC	-	CA01400AA	112	\$0.00
ADD: BATTERY TEMP SENSOR EXTENSION CABLE	-	CA00975AA	112	\$200.00
ADD: POWER CABLE, EUROPE	-	X187AK	112	\$0.00
ADD: POWER CABLE, UK	-	X162AE	112	\$0.00
ADD: POWER CABLE, AUSTRALIA	-	X191AF	112	\$0.00

STEP 8: RACKMOUNT HARDWARE

Choose rack mount hardware, if required.

Description	Full Description	Nomenclature	APC	Price
ADD: RACK MOUNT HARDWARE	-	X153AW	112	\$50.00

X153AW provides rack mount hardware for the base radio as well as any associated optional/peripheral equipment. It should be selected if the base radio will be installed in standard 19-inch relay racks.

G-Series Receiver

STEP 1: MAIN MODEL

The following main model must be ordered for a G-SERIES Receiver.

Description	Full Description	Nomenclature	APC	Price
GPW 8000 RECEIVER	-	T7540	112	\$1,000.00

NOTE: Only order a quantity of one of the T7540A per line item. This model number will automatically generate internally added options for all hardware components that are not part of an orderable option (such as cabling).

STEP 2: FREQUENCY BAND AND POWER LEVEL

Enter the Frequency Band option:

Description	Full Description	Nomenclature	APC	Price
ADD: VHF (136-174 MHZ)	-	X530BH	112	\$3,200.00
ADD: UHF R1 (380-435 MHZ)	-	X448AB	112	\$3,200.00
ADD: UHF R2 (435-524 MHZ)	-	X640AN	112	\$3,200.00
ADD: 700/800 MHZ	-	CA00855AB	112	\$3,200.00

One RX frequency must be specified and will be collected at the main model level.

Frequency Rules for CA00855AB

RX Range: 794.00625 - 824.99375 MHz. All frequencies must be divisible by 6.25 kHz.

Note: Currently, 800.000 MHz and 820.000 MHz are not supported for Rx.

Frequency Rules for X640AN

RX Range: 435.0000-524.0000 MHz. All frequencies must be divisible by 6.25 kHz

Note: Currently, 440 MHz, 454.5 MHz, 460 MHz, 474.6375 MHz, 480 MHz, 500 MHz, 520 MHz are not supported for Rx.

Frequency Rules for X448AB

RX Range: 380.0000 – 435.0000 MHz. All frequencies must be divisible by 6.25 kHz.

Note: Currently, 380 MHz, 400 MHz and 420 MHz are not supported for Rx.

Frequency Rules for X530BH

RX Range: 136.0000 – 174.0000 MHz. All frequencies must be divisible by 6.25, 5.000, 3.125, or 2.500 MHz.

Note: Currently the following frequencies are not supported for Rx: 140.00000, 148.08250, 152.00750, 153.00750, 153.49250, 154.37125, 154.46375, 154.47125, 154.47875, 154.50250, 160.00000, 169.17200, 169.80700, 173.20375, 173.39625, and 173.43570 MHz.

STEP 3: SOFTWARE SYSTEM OPERATION

Choose the appropriate system software option to provide the satellite receiver with system software.

STEP 4: INTERNAL SITE REFERENCE

Choose the following optional item, if required.

Description	Full Description	Nomenclature	APC	Price
ADD: INTERNAL FREQUENCY REFERENCE	-	CA01506AB	112	\$1,000.00

STEP 5: PERIPHERALS

Narrow preselector: The Preselector rejects unwanted signals including the transmitter signals from overloading the receiver. If TIA102-CAAB Class A spurious response rejection (90dB) specification is required the preselector must be ordered.

Description	Full Description	Nomenclature	APC	Price
ADD: BR PRESELECTOR, 800 MHZ	-	X265AH	112	\$500.00
ADD: BASE RADIO PRESELECTOR, 700 MHZ	-	X265AJ	112	\$500.00
ADD: BR PRESELECTOR 380-512 MHZ	-	X265AP	112	\$500.00
ADD: NARROW PRESELCTOR, 136-154 MHZ	-	X265AN	112	\$500.00
BR PRESELCTOR, 150-174 MHZ	-	X265AM	112	\$500.00

X265AJ provides RX filtering in the 700 MHz standalone base radio configuration and is attached to the back side of the base radio.

X265AH provides RX filtering in the 800 MHz standalone base radio configuration and is

attached to the back side of the base radio. .

X265AN provides RX filtering in the VHF subband 136 - 154 MHz for the standalone base radio configuration and is attached to the back side of the base radio. When ordering this option, the frequency separation between the highest Rx frequency and the lowest Rx frequency can be no more than 4 MHz. Also, all Rx frequencies must fall within the following subband: 136 - 154 MHz.

X265AM provides RX filtering in the VHF subband 150 – 174 MHz for the standalone base radio configuration and is attached to the back side of the base radio. When ordering this option, the frequency separation between the highest Rx frequency and the lowest Rx frequency can be no more than 4 MHz. Also, all Rx frequencies must fall within the following subband: 150 – 174 MHz.

X265AP provides RX filtering in the UHF subband 380-512 MHz for the standalone base radio configuration and is attached to the back side of the base radio. When ordering this option, the frequency separation between the highest Rx frequency and the lowest Rx frequency can be no more than 4 MHz. Also, all Rx frequencies must fall within one of the following subbands: 380-435, 435-470, or 470-512 MHz.

STEP 6: CABLES

A 12 foot AC power cable will come standard with the base radio. If a DC power cable is required, order option CA01400AA. If a region-specific AC power cable is required for international applications, please order one of the following power cables and it will be shipped instead of the domestic power cable.

The standard Battery Temperature Sensor is 40 feet long. The CA00975AA option offers an extension cable that provides a 50 foot extension. Up to 3 extensions can be ordered.

Description	Full Description	Nomenclature	APC	Price
ADD: POWER CABLE, DC	-	CA01400AA	112	\$0.00
ADD: BATTERY TEMP SENSOR EXTENSION CABLE	-	CA00975AA	112	\$200.00
ADD: POWER CABLE, EUROPE	-	X187AK	112	\$0.00
ADD: POWER CABLE, UK	-	X162AE	112	\$0.00
ADD: POWER CABLE, AUSTRALIA	-	X191AF	112	\$0.00

STEP 7: RACK MOUNT HARDWARE

Choose rack mount hardware, if required.

Description	Full Description	Nomenclature	APC	Price
-------------	------------------	--------------	-----	-------

ADD: RACK MOUNT HARDWARE	-	X153AW	112	\$50.00
--------------------------	---	--------	-----	---------

X153AW provides rack mount hardware for the base radio as well as any associated optional/peripheral equipment. It should be selected if the base radio will be installed in standard 19-inch relay racks.

GCM 8000 Comparator

STEP 1: MAIN MODEL

The following main model must be ordered for a GCM 8000 Comparator.

Description	Full Description	Nomenclature	APC	Price
GCM 8000 COMPARATOR	-	T7321	112	\$3,000.00

NOTE: Only order a quantity of one of the GCM 8000 per line item. This model number will automatically generate internally added options for all hardware components that are not part of an orderable option (such as cabling).

STEP 2: COMPARATORS

Choose the quantity of comparators per chassis (T7321A). Comparators can be ordered two (2) per chassis. Comparators are not redundant, but the comparator power supplies can be wired together to provide redundant power supply operation.

The comparator chassis can hold two separate comparators to support two different channels. If two comparators are desired, order a quantity of two (2) of CA01183AA. If only one comparator per chassis is desired order quantity one (1) of CA01183AA.

STEP 3: SOFTWARE SYSTEM OPERATION

Order one comparator software option per comparator module ordered. The quantity of the CA01484AC must match the quantity of the CA01183AA option.

Description	Full Description	Nomenclature	APC	Price
ADD: ASTRO 25 CONVENTIONAL SOFTWARE	-	CA01484AC	595	\$10,500.00

STEP 4: SOFTWARE SYSTEM CONFIGURATION

Order one software system configuration option per comparator module ordered. The quantity of the CA01484AC must match the quantity of the CA01502AC or CA01505AC option.

Description	Full Description	Nomenclature	APC	Price
-------------	------------------	--------------	-----	-------

ADD: ASTRO 25 CONV SIMULCAST SW	-	CA01502AC	595	\$3,000.00
ADD: ADD: ASTRO 25 CONV VOTING SW	-	CA01505AC	595	\$2,000.00

STEP 5: POWER CABLES

A 12 foot AC power cable will come standard with the comparator. If a DC power cable is required, order option CA01400AA. If a region-specific AC power cable is required for international applications, please order one of the following power cables and it will be shipped instead of the domestic power cable.

The standard Battery Temperature Sensor is 40 feet long. The CA00975AA option offers an extension cable that provides a 50 foot extension. Up to 3 extensions can be ordered.

Description	Full Description	Nomenclature	APC	Price
ADD: POWER CABLE, DC	-	CA01400AA	112	\$0.00
ADD: BATTERY TEMP SENSOR EXTENSION CABLE	-	CA00975AA	112	\$200.00
ADD: POWER CABLE, EUROPE	-	X187AK	112	\$0.00
ADD: POWER CABLE, UK	-	X162AE	112	\$0.00
ADD: POWER CABLE, AUSTRALIA	-	X191AF	112	\$0.00

STEP 6: RACK MOUNT HARDWARE

Choose rack mount hardware, if required.

Description	Full Description	Nomenclature	APC	Price
ADD: RACK MOUNT HARDWARE	-	X153AW	112	\$50.00

X153AW provides rack mount hardware for the comparator. It should be selected if the comparator will be installed in standard 19-inch relay racks.

Information for Integrated Voice & Data (IVD) Packet Data Gateway (PDG)

For New 7.11 Conventional PDG: Order SQM01SUM0197A as a supermodel and select required option CA01521AA for IVD PDG Software. For additional RF Channel licenses, add

option CA01534AA.

New PDG Order

1. Order PDG supermodel (SQM01SUM0197A) as main line item*
2. Select IVD Conventional Software option (CA01521AA)**
3. Optional: Add 8 RF Channel license (CA01534AA)

Upgrade PDG Order

1. Order PDG software upgrade model (T7584A) as main line item.
2. Select IVD Conventional Software Upgrade option (CA01909AA).

Notes:

* Supermodel (SQM01SUM0197A) includes PDG server hardware that comes standard with US power cable.

** Conventional Software option (CA01521AA) includes the first 8 RF Channel license.

NEW PDG

Description	Full Description	Nomenclature	APC	Price
PACKET DATA GATEWAY (RACKMOUNT SERVER)	Provides one server with North American AC line cord.	SQM01SUM0197	222	\$48,000.00
ADD: IV&D CONVENTIONAL PDG SOFTWARE	-	CA01521AA	222	\$35,000.00
8 RF CHANNEL LICENSE	-	CA01534AA	222	\$20,000.00

UPGRADE PDG

Description	Full Description	Nomenclature	APC	Price
ASTRO 25 PDG SOFTWARE	-	T7584	222	\$5,000.00
ADD: IV&D CONVENTIONAL SOFTWARE UPGRADE	-	CA01909AA	222	\$9,000.00

CAI Data Encryption Module (CDEM)

Hardware:

Order (1) ASTRO 25 CAI Data Encryption Module (T7618A)

Select (1) required RS232 Cable (DLN6693A)

Software:

Must select (1) required ASTRO 25 CDEM Operation (CA01535AA)

Must select at least (1) of the below single Encryption Kits:

Select (1) AES Data Encryption Kit (CA00182AT)
 Select (1) DES-OFB Data Encryption Kit (CA00143AD)
 Accessories:

Key Loading Cable (TKN8531C)*

RS232 Cable for Encryption Unit (DLN6693A)

Rack and Cabinet Mounting Tray (TKN9284A)

Note: *Customer must order at least one TKN8531C Keyloader Cable for loading encryption keys on Encryption Unit, if utilizing the KVL 3000 Plus.

Description	Full Description	Nomenclature	APC	Price
ADD: DES-OFB DATA ENCRYPTION KIT	-	CA00143AD	137	\$750.00
ADD: ASTRO 25 CDEM OPERATION	-	CA01535AA	137	\$6,500.00
ADD: AES DATA ENCRYPTION	-	CA00182AT	137	\$750.00
CABLE FOR RNC, DIU MGEF	-	TKN8531C	362	\$260.00
ASTRO 25 CONVENTIONAL DATA ENCRYPTION UNIT	-	T7618	137	\$750.00
RS232 CABLE FOR CRYPTR	-	DLN6693	454	\$160.00

Information for S6000 Router and GGSN

Order the S6000 router for Border, Gateway, and GGSN. In order to complete the GGSN configuration you must also select the MNR GGSN software under accessories.

Models

IMS

Ordering Information

IMS and VoLTE Background Information

IMS Background:

- IMS-IP Multimedia Subsystem, a 3GPP standard service architecture framework for delivering IP-based converged, multimedia services (Voice, Video, Messaging, others)
- Adopted by leading operators as the next generation IP network and service delivery architecture
- Architecture provides flexibility to offer new, converged, multimedia services across multiple access methods, fixed/mobile networks
- Interoperability - across devices and networks
- VoLTE, SMS over IMS, Rich Communication Suite (RCS) services are based on IMS.

VoLTE (Voice over LTE) Background:

- Officially, GSMA profile for Voice and SMS over LTE (PRD IR.92)
- Minimum mandatory set of features for a UE and network to implement for guaranteed, high-quality IMS-based telephony service over LTE
- Voice over Long Term Evolution (VoLTE) utilizing IMS technology is recognized as the industry-agreed progression of voice services

MSI Solution and Key Features

Support for conversational voice telephony services is provided with the use of the leading industry standard, IP Multimedia Subsystem (IMS)-based Voice over LTE (VoLTE). VoLTE enables seamless evolution to advanced multimedia services such as video calling, rich communication suite services such as enhanced calling, enhanced IP messaging, and content sharing services. Motorola's solution is comprehensive, pre-integrated and standards compliant (3GPP, GSMA IR.92), enabling inter-operability with other VoLTE devices and networks.

The IMS/VoLTE solution is a standards-based solution and comprises a device IMS/VoLTE client on handheld devices, an IMS core, fully integrated with the LTE core and the Multi-Media Telephony (MMTel) application server, SMS application server, and a Voice Mail server. The IMS core application comprises an Application, Control, and Connectivity layer.

- The Application Layer is where the application servers reside in the IMS domain:
 - Multimedia Telephony Application Server (for VoLTE calling)
 - SMS over IMS Application Server
 - Voicemail Application Server.
- The Control Layer is in charge of call or session setup, modification and release. Call

Session Control Function (CSCF) and Session Border Gateway (SBG) are used with this layer.

- The Connectivity Layer includes routers, switches, media gateways and other user plane elements.

Key features of the Motorola VoLTE/IMS R9 solution include:

- LTE Voice Telephony - includes basic 1-to-1 voice (VoLTE) calling
- Advanced supplementary voice services - Call Hold, Call Waiting, Caller ID, Call Forwarding, Call Blocking, Ad-Hoc 3-way multi-party calling, etc.
- IMS Voice Mail
- SMS over IMS
- Video Calling, including ad-hoc video multi-party calling
- IMS/VoLTE to PSTN Interworking (for international/ETSI networks)
- IMS/VoLTE to SIP PBX interworking
- IMS Emergency Calling
- Support for Ut/XCAP interface and authentication for user self-administration of supplementary services, using an Authentication and Federation Gateway (AFG)
- Support for local and geographic redundancy
- Quality of Service (QoS) Enablement
- IMS Client application on LTE device - supported devices: L10i
- Introduction of virtualized IMS for some of the applications/capabilities (SMS, Voice Mail, Ut/XCAP)

IMS/VoLTE: Orderable Solution Summary

OFFERED INFRASTRUCTURE HARDWARE AND SOFTWARE

- IMS Core
 - Call Session Control Function (CSCF)
 - Session Border Control/Gateway (SBG)
 - Media Resource System (MRS, with Border Gateway Function/BGF and Media Resource Function Processor/MRFP) - needed only if media support (e.g. Voice/VoLTE or Video) is required
 - Media Gateway Controller
 - Media Gateway (a part of MRS)
 - Authentication Federation Gateway (AFG)
- IMS Application Servers
 - Multimedia Telephony Application Server (MTAS)
 - Short Messaging Service over IMS (SMS and IMS) Application Server
 - Voice Mail Application Server
- Networking and Security (Switching/Transport, DNS, etc.) equipment - listed here for reference. Please refer to the eCAT pages for LTE Networking and Transport Equipment and LTE Enhanced Packet Core (EPC) for additional details and ordering information.
 - Diameter Signaling Controller (DSC) - use from LTE Core (EPC).
 - Provides Diameter Agent (DA)/Diameter Routing Agent (DRA) functionality for diameter signaling.
 - DNS/ENUM for IMS Core - use from EPC
 - Enables translation of E.164 numbers to SIP URI for message routing purposes.
 - Ordering item: BlueCat Networks Model Number S-20 DNS/DHCP server.
 - DNS for IMS user space
 - Provides the AFG IP addresses for the UE
 - Ordering item: BlueCat Networks model number S-20 DNS/DHCP server

- NTP (Network Time Protocol) - use from EPC
 - Provide stable timing reference for the IMS core
- Core Router/Core Switches
 - Provides connectivity between IMS Core elements and EPC elements
 - Ordering items: 2 X Extreme 460 Switches (IMS core routers)
- Firewalls (optional)
 - Provides secure connectivity between IMS Core elements and EPC elements
 - Provide secure inter-geo site connectivity
- LTE Core/RAN - IMS add-on Licenses for: LTE Core, RAN, OSS. Please refer to these pages for additional guidance:
 - HSS catalog page - for HSS IMS add-on licenses (required): [Home Subscriber Service \(HSS\)](#) .
 - eNB catalog page - for eNB IMS/VoLTE add-on licenses - required and optional packages: [eNodeB Band Class 28](#). (see adjacent pages for B14 and B20).
 - OSS-RC catalog page - for OSS-RC add-on IMS licenses (required): [Operation Support System Radio and Core \(OSSRC\)](#) .

SUPPORTED LTE DEVICES, WITH IMS CLIENT APPLICATIONS (please refer to the pages for the respective LTE devices):

- LEX L10i

Ordering Guidelines

ORDERABLE ITEMS:

- Required: IMS Licenses Enabled in LTE Core and RAN: HSS, eNB, and OSS-RC
- Required: IMS HW and SW, ordered in fixed subscriber/capacity bundles, corresponding to 1K, 5K, 10K, 25K 50K, 100K, 250K, 500K or 1M users. 1K is minimum (except for SMS and Voice Mail - for these two applications, 10K is minimum). Each subscriber bundle (1K, 5K, 10K, etc.) has a corresponding node capacity measured in session/messaging units per busy hour (based on a standard IMS call model and dimensioning analysis done for PS-LTE IMS), periodically reviewed and maintained by MSI system engineering (for access to the call model, please contact [Product Management](#)).
- These IMS Core session elements are always required when there is an IMS network - CSCF, SBG
- IMS Core media elements - MRS - required for media/bearer (e.g. as in VoLTE)
- IMS Application Servers (AS) - required for specific application functions - MTAS for VoLTE video; SMS over IMS AS for offering SMS services, and Voice Mail AS for Voice Mail services
- Media Gateway Controller (MGC) and Media Gateway are required for IMS/VoLTE to PSTN (landline telephony) network interworking. Currently in R11.1, the international (ETSI) flavor of PSTN interworking is supported. ANSI/NA flavor is planned in a future release.
- Authentication Federation Gateway (AFG) is required for offering Ut interface and authentication support required for user self-administration of some supplementary services, such as call forwarding/blocking, etc.; if the device supports supplementary services code (SSC) mechanism (also known as star code dialing), Ut/AFG can be optional, depending on customer requirement.
- NOTE 1: In R11.1, MSI added a few optional packages (also known as "value packages") for some of the IMS network elements. The ordering guide below only shows the "Basic" and "Optional/Value Pack" feature packages, where applicable.

- Required: IMS Client application on a supported LTE device.
- NOTE 2: For IMS client on BYOD (non-MSI) or other LTE device types (e.g. tablets) - please contact [Product Management](#).
- In general, the BYOD category falls in one of the two:
 - A commercial device with an IMS client already built-in: can be supported based on a plan for interoperability testing (offered as a Service) to make sure the commercial device works with MSI IMS infrastructure.
 - A commercial or specialized device that does not have an IMS client. This is a roadmap item, and will depend on the specific devices (the solution strategy would be to partner with an IMS client vendor to provide a client for such devices).
- Required: IMS Core Routers and other Networks & Security equipment discussed above.
- Optional: Geo-Redundancy Option
 - Order hardware for two complete IMS systems
 - Order software license for stated number of subscribers must be ordered for each IMS network element (CSCF, SBG, MRS, MTAS, MGC, MGW, AFG, SMS, Voice Mail)
 - For all except Voice Mail, the geo-redundant (second) system added cost is for additional/redundant HW only; SW is at no additional cost. Voice Mail has a small additional cost for the geo-redundant SW and has separate geo-redundant software part numbers, indicated below.
 - A minimum of 2 X 2 or a total of 4 IMS Routers/Switches (2 for each geographic site).

1. New IMS System: Non-Redundant (or Locally Redundant) IMS Hardware and Software

A new IMS system can be ordered as a package/bundle of both software and hardware. The IMS system is licensed based upon the number of subscribers (each subscriber level also corresponds to a stated capacity in sessions/messages). In the sections below, each of the IMS network elements is listed and classified as Basic or (optional) Value Packages. A few of the network elements are only offered as non-redundant, the rest are available as Locally Redundant.

Locally Redundant - CSCF, SBG, MTAS, MRS, MGC, MGW, Voice Mail

Non-Redundant - SMS, AFG

2. New IMS System: Geo-Redundant IMS Hardware and Software

A new IMS Geo-Redundant system can be ordered as a pair of IMS systems, comprised of software and hardware.

- Order IMS hardware and software for two complete IMS systems
 - Hardware and software license for the stated number of subscribers must be ordered for each IMS network element or application (CSCF, SBG, MRS, MTAS, MGC, SMS, Voice Mail, AFG)
 - For all products - you will need to order the first (primary site) system with HW and SW for the stated capacity.
 - For the Geo-Redundant system, hardware must be ordered for all products, and for the same state capacity as the primary system. Part numbers are set up to address the HW capacity thresholds, where applicable.
 - For Geo-Redundant system software licenses, it varies, depending on the product.

- CSCF, SBG, MTAS, MRS, MGC, MGW, AFG, SMS - there is currently no additional software license cost for the geo-redundant system.
- Voice Mail - there is an additional cost for the geo-redundant software - part numbers are specifically set up for these licenses (you will need to order the geo-redundant SW licenses instead of the regular Locally Redundant licenses).
- A minimum of 2 X 2 or a total of 4 IMS routers/switches (2 for each geographic site) - typically need two IMS routers per site, but can vary based on deployments and associated IP transport design

3. Upgrade: Non-Redundant/Locally Redundant to Geo-Redundant IMS Hardware and Software

When upgrading from a non-redundant or locally redundant IMS system to a geo-redundant IMS system, additional HW and SW must be ordered. An IMS Geo-Redundant system is a pair (2) of IMS systems, comprised of software and hardware

1. Order IMS hardware and software for the geo-redundant system as described:
 - For the Geo-Redundant site system, hardware must be ordered for all products, and for the same stated capacity as the primary system. Part numbers are set up to address the HW capacity thresholds, where applicable.
 - For Geo-Redundant system software licenses, it varies, depending on the product.
 - CSCF, SBG, MTAS, MRS, MGC, MGW, AFG SMS - there are no part numbers specifically set up currently for the upgrade; please contact Product Management for this scenario.
 - IMS Core network element - always required
 - IMS Core network element - always required

G. AUTHENTICATION FEDERATION GATEWAY (AFG)

The Authentication Federation Gateway provides the required function of IMS/VoLTE Ut interface authentication and support required for Supplementary Services, for users to be authenticated before self-administering some of the Supplementary Services (such as Call Forwarding, Call Barring, etc.)

This capability is offered as a virtualized application software, running on MSI provided hardware and virtualization platform.

The hardware, platform/virtualization software and application software are the ordering elements.

Hardware and Platform/Virtualization Software

Ordering Item	Order this P/N	APC	Part Name	Quantity	Stated Capacity
Supermodel for IMS Virtualized Applications (AFG, SMS, Voice Mail)	SQM01SUM0266A	059	IMS App Servers, APP Software and Licenses	1	N/A
Hardware, OS and Virtualization Platform Software Bundle	CA02532AA	059	IMS App Server - Config 1 HW Kit	1 for Non-Redundant and 2 for Geo-Redundant	1 to 1M subs

***NOTE: You can order one or more of these three applications in the same SQM order: AFG, SMS, Voice Mail.

Application SW - AFG

The software can be ordered for the target application software capacity bundle (the same SW license covers both non-redundant or geo-redundant). Only Quantity (1) needs to be ordered for non-redundant or geo-redundant.

H. SMS over IMS

The Short Messaging Service (SMS) over IMS provides the PS-LTE operator the network capability of offering SMS messages on the LTE/IMS network and interworking with commercial SMS networks (this interworking is also called IP-SM gateway function).

The capability is offered as a virtualized application software running on MSI provided hardware and virtualized platform.

The hardware, platform/virtualization software and application software are the ordering elements.

Hardware and Platform/Virtualization Software

Ordering Item	Order this P/N	APC Part Name	Quantity	Stated Capacity

I. IMS Voice Mail Application

The IMS Voice Mail Application provides the PS-LTE operator the network capability of offering Voice Mail messaging services on the LTE/IMS network.

The capability is offered as a virtualized application software running on MSI provided hardware and virtualization platform.

The hardware, platform/virtualization software and application software are the ordering elements. The hardware can be ordered as locally redundant (a pair of servers per site, and a DAS unit) or geo-redundant (a pair of sites, with identical configurations), a.k.a. "IMS Voice Mail Geo-Redundant Disaster Recovery (DR) solution. The Voice Mail solution must be ordered with associated supplier-provided IP Design and Commissioning Services - and especially in the case of the geo-redundant solution, the supplier services include "callout" (backup/restore) scripts that are required for performing disaster recovery.

ISSI 8000 / CSSI 8000 P25 Interoperability Solutions

<https://drive.google.com/open?id=0BwRIjIR2dEIWcFI2WGJMMEs1VUE>

Price Pages -UPDATE in Progress !!

Ordering Information

Overview

- ISSI interoperability is nuanced, complex, and cannot be oversimplified as seamless mobility in a mission critical environment, particularly in a multi-vendor environment. Please step through specific interoperability scenarios to understand the capabilities and limitations imposed by subscriber fleet, infrastructure, consoles, inter-system links, and vendors on the solution.
- An ASTRO 25 system can support up to (24) P25 interfaces through the ISGW server. These interfaces can be ISSI roaming, CSSI, or WAVE 5000. In 7.13 and 7.14 these can be any combination of interfaces, though only one CSSI interface to a 3rd party console subsystems is allowed. In 7.15 the limitation of a single CSSI interfaces was removed. Any combination of ISSI, CSSI, and/or WAVE 5000 interfaces can be utilized, but the total cannot exceed 24.
- Interfaces can be mixed - can have automatic and manual roaming as separate connections.
- Please refer to the ISSI/CSSI 8000 wiki for system planners, interface standards,

presentation slides, solution briefs etc. <http://compass.mot-solutions.com/web/astro25issi8000>

ISSI / CSSI 8000 Trunking Core Compatibility Chart	7.13	7.14 & 7.15	7.16+
M1	No	Yes	Yes
M2	Yes	Yes	Yes
M3	Yes	Yes	Yes
L1	No	No	Yes
L2	No	No	Yes

- ISSI 8000 and CSSI 8000 are separate features within the same application that reside on a server. Once the hardware (ISGW server and firewall) is purchased, licenses for ISSI or CSSI interfaces can be added without having to order the hardware again.
- In release 7.16 and beyond, the ISGW server is no longer required as a piece of dedicated hardware. The ISSI 8000 application is virtualized on the M or L core server. However, the interface operating licenses are still required by ordering the T7776A model below.

IMPORTANT NOTE: A Data Collection Device (DCD) is highly recommended when implementing an ISSI 8000 interface to a foreign P25 system or a CSSI 8000 interface to a 3rd party console vendor's subsystem. This device will help with debugging the interface and help alleviate issues during the implementation phase. Please contact your service team for adding the DCD to the customers proposal.

Configuration

Ordering ISSI8000 / CSSI8000 for System Releases 7.16+

Beginning in system release 7.16, the ISSI application, gateway hardware, and firewall are included with the master site equipment. For 7.16 M-Cores, include option CA02950AA with Master Site supermodel SQM01SUM0273 to obtain the ISGW hardware and appropriate firewall. 7.16 L-Cores need no special ordering; these will ship with required hardware and software to enable ISSI/CSSI functionality.

The ISSI licenses to enable functionality are ordered using model T7776 plus the desired license options below.

Please refer to the master site price pages and ordering guides for more details about 'enabled' cores.

The SQM01SUM0227 supermodel is ONLY applicable for new M-cores or additions to existing M-cores up to and including system release 7.15 - see next section.

Description	Full Description	Nomenclature	APC	Price
ISSI 8000 / CSSI 8000 UPGRAGE Software Licenses	-	T7776	226	\$0.00

Ordering New ISSI8000 Hardware for System Releases 7.13 through 7.15

The SQM01SUM0227 supermodel is ONLY applicable for new M-cores or additions to existing M-cores up to and including system release 7.15.

Skip this step if you have already ordered an ISSI 8000 or CSSI 8000 solution and want to add an additional ISSI/CSSI license capacity.

The ISSI Server (ISGW) and firewall are required on the host system to utilize the ISSI solution. The ISGW supports a maximum of (24) P25 interfaces to foreign P25 RF systems, CSSI based Console subsystems, or WAVE 5000.

The server (ISGW) and the firewall used for ISSI 8000 or CSSI 8000 are different from those used in the older ISSI.1 NGW solution.

7.15 systems with Telephone Interconnect can share the Fortinet 100D firewall.

All UAxxxxxx software licenses must be ordered as options under the SQM01SUM0227 supermodel.

Description	Full Description	Nomenclature	APC	Price
ISGW SERVER USED FOR ISSI / CSSI	-	SQM01SUM0227	226	\$25,250.00
FORTINET FIREWALL APPLIANCE	(Firewall for A7.15 and later)	T8126	147	\$3,200.00
FORTINET FIREWALL RECOVERY MEDIA	(For A7.15 and later)	T8128	147	\$100.00
ISG 1000 FIREWALL W/ 2 YR SUPPORT	-	TT1932	708	\$40,000.00

Operating Licenses

The license options in this section are common to many of the ISSI ordering scenarios in this price page. They indicate the desire to 'appropriately' enable functionality inherent in the application software. Licenses can be ordered at initial sale, or when expanding capacity in the future.

For 7.16 systems and later, use model T7776 plus applicable licenses.

For new 7.13 - 7.15 deployments, use model SQM01SUM0227 plus applicable licenses...

where a dedicated ISSI server is being purchased for the first time as part of a new master site,
 OR
 when adding ISSI/CSSI hardware for the first time to an existing 7.13-7.15 system
 For adding licenses to any previously deployed configuration, use model T7776.

After selecting T7776 please choose the appropriate quantity of feature licenses such as:
 Manual Roaming, Automatic Roaming, Simultaneous Talkgroup Capacity, Console Operator
 Position License, etc.

Description	Full Description	Nomenclature	APC	Price
ISSI 8000 / CSSI 8000 UPGRAGE Software Licenses	-	T7776	226	\$0.00

Manual and Automatic Roaming Interface Licenses

ISSI 8000 Price Notification - 8/17/16

<https://drive.google.com/open?id=0BwRlJIR2dEIWcFI2WGWJMMes1VUE>

Manual Roaming

Manual roaming gives the user the ability to use the ISSI 8000 as a basic interoperability solution with similar capabilities to the older ISSI.1 NGW, and the ability to view PTT IDs and emergency alarms of the subscribers in the foreign system during an active call. This option enables users to monitor foreign Talkgroups on their MCC 7500/7100 dispatch consoles. Centracom Consoles are not able to monitor foreign TGs. Users have the option to upgrade to automatic roaming capability if they choose to in the future. For Manual roaming, subscribers will need to be provisioned in the foreign system as well, and users will have to manually change the mode on their radio when out of coverage of the home system. Each ISSI roaming license comes with the ability to process 10 simultaneous TG calls over the ISSI link. Increased call capacity can be added by ordering TG license packs below.

Description	Full Description	Nomenclature	APC	Price
ADD: ISSI Manual Roaming License	Each connection for systems 1-24 requires this option.	UA00004AA	226	\$2,000,000.00

Automatic roaming

Automatic roaming gives the user the ability to use the ISSI 8000 solution with automatic roaming capabilities, including the ability to view PTT IDs and emergency alarms of the subscribers in the foreign system during an active call. This is subject to the limitations that the foreign system supports automatic roaming. Automatic roaming is only supported on GTR 8000 sites in an ASTRO 25 system. Quantar or STR sites do not support automatic roaming. This option enables users to monitor foreign Talkgroups on their MCC 7500/7100 dispatch consoles as well as on their subscribers. Centracom Consoles are not able to monitor foreign

TGs.

Each ISSI roaming license comes with the ability to process 10 simultaneous TG calls over the ISSI link. Increased call capacity can be added by ordering TG license packs below. Multiple options are permitted and tiered by quantity. Order as many licenses as the number of desired systems to interface from the home system. Selecting 3 manual roaming licenses and 2 Automatic roaming licenses implies that your customer can finger-tip (manually) roam to 3 other systems and automatically roam into the coverage area of 2 other systems.

A maximum of (24) P25 interfaces are supported by ISSI 8000 including: Manual Roaming, Automatic Roaming, CSSI console subsystem, or WAVE 5000.

Description	Full Description	Nomenclature	APC	Price
ADD: ISSI Automatic Roaming License (for first system)	-	UA00005AA	226	\$2,000,000.00
ADD:ISSI AUTOMATIC ROAMING LICENSE (FOR SYSTEMS 2-5)	Each connection for systems 2-5 requires this option. It is not meant to imply that all 4 connections are included.	UA00184AA	226	\$2,000,000.00
ADD:ISSI AUTOMATIC ROAMING LICENSE (FOR SYSTEMS 6+)	Each connection for systems 6-24 requires this option. It is not meant to imply that all 19 connections are included.	UA00185AA	226	\$2,000,000.00

Simultaneous TalkGroup Call Capacity Licenses

This option applies only to Manual or Automatic Roaming.

Each ISSI roaming license includes the ability to operate 10 simultaneous calls across the ISSI link. Use this option to add additional capacity to your ISSI solution.

Order the appropriate number of Talkgroup license packs based upon the number of simultaneous Talkgroup registrations you want to have with a foreign system. You may order up to a maximum of nineteen (19) additional Talkgroup license packs per ISSI link - to enable support for up to 200 simultaneous calls through the ISSI interface. Each option ordered provides a license for 10 additional TGs. Example: If a system with a single roaming license requires 20 simultaneous foreign TG registrations, the order should include a quantity of one (1) additional Talkgroup license pack. If a system requires 30 foreign TG registrations, a quantity of two (2) Talkgroup license packs should be ordered.

It is important to understand that the simultaneous call capacity is a resource pool and not assigned to any particular system to system connection. Calls across any of the system connections will borrow resources from the pool and return them as calls are ended. This option is designed to allow planning for boundary conditions that exceed typical ISSI operation.

Description	Full Description	Nomenclature	APC	Price
-------------	------------------	--------------	-----	-------

ADD: ISSI +10 Addition simultaneous Talk Group Capacity License	-	UA00006AA	226	\$50,000.00
---	---	-----------	-----	-------------

CSSI: Select Number of Operator Position Licenses

The CSSI interface is used to connect a 3rd party console to an ASTRO 25 system. The CSSI license (connection) supports all of the console activity coming through a single 3rd party console subsystem link and is based on the number of operator positions utilizing the link.

Quantity of licenses here should match the number of console ops that a customer wants to add for CSSI interface

Description	Full Description	Nomenclature	APC	Price
ADD: CSSI Operator Position License	-	UA00009AA	226	\$30,000.00

Redundancy

In system releases 7.13-7.15, the Redundancy license indicates the presence of a 2nd, physical ISGW server that serves as a backup to the primary server. Backup / Redundant / DSR servers do not require operating licenses, which are purchased with the primary server. The Redundancy license is the only option that is purchased with the backup hardware units.

In system releases 7.16 and later, the ISSI application is virtualized within the master site servers and no longer runs on its own dedicated server. The Redundancy option is still required to track the instance of a backup ISSI application if DSR or Redundancy is designed into these systems, i.e. whenever there is a backup master site server in a ISSI-enabled system, the Redundancy option is required.

If Dynamic System Resiliency or a Redundant ISGW is desired, the operating licenses only need to be purchased 1 time with the primary ISSI gateway. Secondary units only require the UA00042AA Redundancy option to indicate that they are backup units should the primary unit fail.

A Redundant ISGW is highly recommended even for Non-DSR configurations especially if connecting to a non-Motorola ISSI gateway. Non-DSR ASTRO 25 system configuration however does not support a redundant firewall.

Description	Full Description	Nomenclature	APC	Price
ADD: ISSI 8000 / CSSI 8000 Redundancy Software License	-	UA00042AA	226	\$0.00

Upgrading existing ISSI / CSSI 8000 Systems

When upgrading to a specific release, please select the correct software from below.

Description	Full Description	Nomenclature	APC	Price

ISSI 8000 / CSSI 8000 7.14 SOFTWARE	-	T8023	226	\$10,000.00
ISSI 8000 / CSSI 8000 7.15 SOFTWARE	-	T8145	226	\$10,000.00
ISSI 8000 / CSSI 8000 7.16 SOFTWARE	-	CLN8973	226	\$10,000.00
ISSI 8000 / CSSI 8000 7.17 SOFTWARE	-	CLN9004	226	\$10,000.00

Migrations and Conversions

Migrating from ISSI.1 to ISSI 8000

Hardware used for ISSI 8000 (ISGW Server and Firewall) is different from ISSI.1 NGW. Customers may upgrade from ISSI.1 NGW to ISSI 8000 by swapping their server hardware, but without repurchasing manual roaming licenses for a new ISSI 8000. This will allow a customer to utilize the newer ISSI 8000 Solution when upgrading their ASTRO 25 system to release 7.13 or later, and receive the benefits of PTT ID being passed between systems. It also provides a path for upgrading to Automatic Roaming and taking advantage of more features available.

For existing ISSI.1 NGW users moving to ISSI 8000 on system releases 7.13-7.15 - These are systems that are assumed to have an HP DL380 G8 Master Site architecture:

Step 1: Order the hardware (ISGW Server and Firewall) New or add-on 7.13 - 7.15 systems at the top of the page.

Step 2: Order the appropriate quantity UA00007AA options based on the number of ISSI.1 applications previously purchased.

Provides 1 Manual Roaming ISSI 8000 interface with capacity for 30 simultaneous talkgroup calls. (New ISSI 8000 roaming licenses provide 10 simultaneous TG calls)

Step 3: Optionally, the new ISSI 8000 Manual Roaming license can be upgraded to Automatic Roaming by adding the UA00008AA conversion option noted below to the order.

An order with the ISSI.1 NGW to ISSI 8000 Manual Roaming upgrade option will go on product group hold. The order # for the existing ISSI.1 equipment will be required in order to verify previous purchase activity and transfer the licenses.

For existing ISSI.1 users migrating to system release 7.16 or later, but keeping G8 master site, follow the same instructions as above to get the required ISSI 8000 hardware.

For ISS.1 customers moving to ISSI 8000 on 7.16 or later systems AND converting the master site to the newer HP G9 server architecture, order model T7776A with the UA00007AA option.

Because of the virtualization in G9-based 7.16+ systems, there is no additional hardware required for ISSI. Only the new upgrade license is required.

Description	Full Description	Nomenclature	APC	Price
ADD: ISSI.1 TO ISSI 8000 Product Upgrade License	-	UA00007AA	226	\$0.00

Convert ISSI8000 Manual Roaming to Automatic Roaming

For users who have previously purchased Manual Roaming and want to upgrade to Automatic

Roaming

Orders for this option will go on product group hold to verify previous license purchase activity.

Description	Full Description	Nomenclature	APC	Price
ISSI 8000 / CSSI 8000 UPGRAGE Software Licenses	-	T7776	226	\$0.00
ADD: ISSI Manual to Automatic Roaming Upgrade License	This option is only valid if UA00004 has been previously purchased.	UA00008AA	226	\$125,000.00

Other Product Interactions

Upgrade XTS/XTL Subscribers to support Automatic Roaming

- This section is applicable only if Automatic Roaming is required. This is not applicable for Manual Roaming.
- These options enable select XTS/XTL subscribers (XTS5000, XTS2500 BN, XTS1500 BN, XTS4000, and all XTL models) to automatically roam onto a foreign system and maintain connectivity back to their home system as well as have access to communicate on foreign TalkGroups if they have the authorization to do so.
- Auto-Roaming capability is standard on all the APX series subscribers, however existing APX subscribers may still need to be flash upgraded to the latest version available (R09.00.00 is the minimum APX release for 7.13 where automatic roaming was first certified).
- Please remember that radios may need to be programmed with TG information from foreign systems if they want to communicate on foreign TGs. Radios can also be programmed with alias information from foreign systems via CPS to identify aliases of users in the foreign system.

IMPORTANT NOTE: *The options noted apply to subscriber upgrade models and are addressed elsewhere as part of the subscriber ordering structure*

Q369 License is applicable for XTS (Portable) Radios

G369 License is applicable for XTL (Mobile) Radios

InterSystem Data Operation

Allows configuration of InterSystem Data in the system. InterSystem Data (Connected CEN) provides packet data accessibility across ASTRO 25 systems (7.15 and later). Automatic Roaming is required for InterSystem Data.

IMPORTANT NOTE: This option (UA00163AA) is part of the Master Site ordering structure

Model**ASTRO® KMF Crypto Card
FLASHport® Universal Crypto Module (UCM) Upgrades**

Ordering Information**General Information**

The KMF Crypto Card FLASHport Universal Crypto Module (UCM) Upgrades allow secure customers the ability to upgrade their basic and algorithm software within a fielded KMF Crypto Card without having to replace the Crypto Card. The UCM software upgrade does require the use of a key loading device (KVL 3000 or KVL 3000 Plus) and a PCMCIA card to deliver the new software to the UCM. When Upgrading the UCM module with AES Encryption. A KVL 3000 Plus is required to FLASH upgrade the module (KVL 3000 does not support AES).

NOTE: FOR ALL ORDERS, IT IS REQUESTED THAT THE PCMCIA CARDS BE RETURNED TO MOTOROLA, WHEN UPGRADING IS COMPLETE.

PCMCIA CARDS MAY BE RETURNED TO:

Motorola Solutions
c/o: David Horn
1301 E. Algonquin Rd.
Schaumburg, IL
60196

[KEY MANAGEMENT FACILITY Specification Sheet](#)

Ordering Requirements

1. Order PCMCIA Universal Crypto Module (UCM) Upgrade Card (T6775A). Each upgrade kit consists of a single PCMCIA Card that can upgrade up to 100 individual KMF Crypto Cards.
2. Select a desired software upgrade option.
 - Only one (1) option number can be ordered with upgrade card (T6775A)
 - Specify the number of upgrades required
 - Each individual KMF Crypto Card requires a single upgrade; therefore, the quantity of each option should equal the number of upgrades to be performed.
 - The software options must be ordered in equal number and can not exceed 100 per upgrade option.
3. The KMF Crypto Card FLASHport UCM upgrade requires a key loading device (KVL 300/ KVL 3000 Plus (required for AES encryption)) for updating the basic software and adding a new encryption algorithm into a fielded KMF Crypto Card.

The following example will provide an upgrade card to upgrade twenty (20) fielded KMF Crypto Cards with the AES algorithm.

Item Number Quantity Part Number Description

1 1 T6775A PCMCIA Universal Crypto Module (UCM) Upgrade Kit

1a 20 CA00182AD ADD: AES Encryption Software

All encryption products, kits, software and technology require an approved export license prior to shipment. Contact the Sector Export Control office at +1 (847) 576-8163 to discuss any possible licensing restriction.

Encryption Modules equipped with AES are FIPS 140-2 compliant. Further information regarding FIPS 140-2 certification may be found using the following links:

[FIPS 140-2 Crypto Module Validation Program \(CMVP\)](#)

[NIST Cryptographic Module Validation Lists](#)

The international use of encryption algorithms (except for DES, DES-XL, DES-OFB) are highly restricted by the U. S. Federal Government. License approvals are considered for export to a limited selection of countries and end users. Contact the Sector Export Control office at +1 (847) 576-8163 for licensing information before submitting bids, proposals, or accepting orders for algorithm based encryption products.

NOTE: FOR ALL ORDERS, IT IS REQUESTED THAT THE PCMCIA CARDS BE RETURNED TO MOTOROLA, WHEN UPGRADING IS COMPLETE.

PCMCIA CARDS MAY BE RETURNED TO:

Features

Click [here](#) for additional information.

The Key Management Facility (KMF) provides encryption key management services for Motorola's systems including: ASTRO 25 7.14 (and beyond) and PSLTE R9 (and beyond). The following is a sample of the KMF's features and services:

- Over The Air Rekeying (OTAR)
- Over The Ethernet Keying (OTEK)
- Automatic Retry Opportunities
- Store and Forward
- Agency Partitioning
- Remote Inhibit/Enable/Zeorize
- KMF Hello
- KMF Redundancy

OTAR is utilized with ASTRO Subscribers and PSLTE LEX devices with CRYPTR micro. OTEK is used with Consoles, WAVE CRYPTR, and the PDEG/CDEM.

The information contained within applies to the High Tier KMF (64,000 users, 64 partitions) and the Mid Tier KMF (1,000 users (upgradeable to 64,000), 1 partition (upgradeable to 64)).

IMPORTANT NOTE: Instructor-led training and demo videos are available for customers. Participation is highly recommended. For more info, click [here](#).

General Information

The KMF consists of three major elements:

- A web based software application
- A KMF Server application
- A KMF CryptR

The three elements are shipped independently and need to be connected within the customer system. The Customer Center for System Integration (CCSI) may be contracted for integration, the customer may choose to integrate the three elements, or other third party solutions may be available at the customers' discretion.

The KMF CRYPTR is a device that performs encryption and decryption for all security critical key management messages. Encryption Modules equipped with AES are APCO Project 25 and FIPS 140-2 compliant. Further information regarding FIPS 140-2 certification may be found using the following links:

[FIPS 140-2 Crypto Module Validation Program \(CMVP\)](#)

[NIST Cryptographic Module Validation Lists](#)

KMF Redundancy allows for automatic database back up and automatic switch over from the main to the standby server in a system. Redundant servers can be co-located, or at a remote site while on the same subnet, to enhance failure recovery.

Configuration

NEW KMF – SERVER, CLIENT, CRYPTR, REDUNDANCY

KMF SERVER & CLIENT (REQUIRED)

REQUIRED FOR KMF SERVER & CLIENT:

Description	Full Description	Nomenclature	APC	Price
KEY MANAGEMENT FACILITY	-	T7688	137	\$0.00
ADD: KMF SERVER AND WEB CLIENT SW	(Note: Includes 1,000 users, 1 agency, 2 client licenses)	ZA01180AA	137	\$105,000.00
KMF DL360 G10 SERVER	-	T8698	137	\$14,500.00

OPTIONAL FOR KMF SERVER & CLIENT:

Software Options

Description	Full Description	Nomenclature	APC	Price
ADD: MORE THAN 1000 RADIO USERS	(Note: Provides up to 64,000 users)	ZA00861AA	137	\$75,000.00
64 AGENCY PARTITIONING	(Note: Provides the capability of dividing the KMF database into 64 agencies)	ZA00975AA	137	\$50,000.00

Client Licenses

Description	Full Description	Nomenclature	APC	Price
ADD: ADDITIONAL CLIENT LICENSE	(Note: Additional client licenses, up to an orderable quantity of 8, for total client licenses of 10 with the 2 included)	ZA00864AA	137	\$15,000.00
ADD: 11-32 Client Licenses	(Note: Client Option Bundle beyond 10 client licenses)	ZA00972AA	137	\$75,000.00
ADD: 33-65 Client Licenses	(Note: Client Option Bundle beyond 32 client licenses, maximum of 65 total client licenses)	ZA00973AA	137	\$75,000.00
ADD: 11- 65 Additional Client License	-	ZA00974AA	137	\$7,500.00

Anti-Virus Software For Server & Client

Description	Full Description	Nomenclature	APC	Price
MCAFFEE WINDOWS AV CLIENT	This is a standalone installer for Windows operating systems. This should only be ordered for Consoles and MOSCAD products that do not embed the client license.NOTE - MGECS DO NOT USE MCAFFEE SOFTWARE. THEY WILL STAY WITH EXISTING SYMANTEC SOFTWARE IN UNMANAGED MODE.	T7885	708	\$165.00

KMF CRYPTR (REQUIRED)

REQUIRED FOR KMF CRYPTR:

Description	Full Description	Nomenclature	APC	Price
RACK MOUNT KIT FOR CRYPTR II	-	TKN9285	811	\$135.00
KMF CRYPTR	-	SQM01SUM0222	137	\$750.00
ADD: BASIC SOFTWARE OPTION	-	CA00147AG	137	\$3,500.00

A single Encryption Algorithm Kit must be ordered with each KMF CRYPTR.
 Up to five (5) Encryption Algorithm Kits can be ordered with a single KMF CRYPTR.

Encryption Algorithm Kit choices are:

Description	Full Description	Nomenclature	APC	Price
ADD: DVI XL ENCRYPTION KIT	-	CA00145AM	137	\$750.00
ADD: DES XL ENCRYPTION KIT	-	CA00144AE	137	\$750.00
ADD: DES OFB ENCRYPTION KIT	-	CA00143AF	137	\$750.00
ADD: AES 256 ENCRYPTION KIT	-	CA00182AV	137	\$750.00
ADD: DVP XL ENCRYPTION KIT	-	CA00146AN	137	\$750.00

The PSLTE (CRYPTR micro) algorithm is only AES 256.

A line cord must be ordered with each KMF CRYPTR.

Line Cord choices are:

Description	Full Description	Nomenclature	APC	Price
AC Line Cord, UK	-	CA02064AA	137	\$0.00
AC Line Cord, Australia	-	CA02063AA	137	\$0.00
AC Line Cord, European	-	CA02065AA	137	\$0.00
AC Line Cord, North America	-	CA02066AA	137	\$0.00

The following items are shipped with a KMF CRYPTR Unit:

- 1 Mini USB Cable
- 1 Ethernet Crossover Cable
- 1 AC Power Supply w/AC Line Cord and power adapter cable
- 1 Transformer/ AC Adapter

Products, kits, components and software that contain encryption functions or features, and technology related to the development or implementation of encryption functions or

features, will generally require an approved export license prior to export. If required, export license approvals will be based on the algorithms involved, the country of final destination and the specific end user. Depending on the location of the entity making the sale and the source location of the encryption items it may be necessary to obtain licensing from more than one country for the same sale. Contact your Local Export Control office if you are unfamiliar with the licensing process or to discuss any possible licensing restrictions before submitting bids, proposals, or accepting orders for encryption products.

Accessories/Replacement Items

Description	Full Description	Nomenclature	APC	Price
CABLE FOR RNC, DIU MGEN	Keyloading cable for APX 7500, XTL 5000, XTL 2500, and ASTRO Spectra. Correct keyloading cable adaptor must be ordered separately: -HKN6182 for APX 7500, XTL 5000 (O series control head), and XTL 2500. -TRN7414 for XTL 5000 (W series control head) and ASTRO Spectra.	TKN8531C	362	\$260.00
TRANSFORMER/AC ADAPTER	-	DLN6732	811	\$35.00
MINI USB CABLE	-	DLN6735	811	\$25.00
POWER ADAPTER CABLE	-	DLN6739	811	\$65.00

KMF REDUNDANCY (OPTIONAL)

REQUIRED FOR KMF REDUNDANCY:

Description	Full Description	Nomenclature	APC	Price
RACK MOUNT KIT FOR CRYPTR II	-	TKN9285	811	\$135.00
ADD: KMF REDUNDANCY SOFTWARE	-	CA01229AA	137	\$14,000.00
KMF CRYPTR	-	SQM01SUM0222	137	\$750.00
ADD: BASIC SOFTWARE OPTION	-	CA00147AG	137	\$3,500.00

KMF DL360 G10 SERVER	-	T8698	137	\$14,500.00
----------------------	---	-------	-----	-------------

A single Encryption Algorithm Kit must be ordered with each KMF CRYPTR.
Up to five (5) Encryption Algorithm Kits can be ordered with a single KMF CRYPTR.

Encryption kits must match the main configuration.

Encryption Algorithm Kit choices are:

Description	Full Description	Nomenclature	APC	Price
ADD: DVI XL ENCRYPTION KIT	-	CA00145AM	137	\$750.00
ADD: DES XL ENCRYPTION KIT	-	CA00144AE	137	\$750.00
ADD: DES OFB ENCRYPTION KIT	-	CA00143AF	137	\$750.00
ADD: AES 256 ENCRYPTION KIT	-	CA00182AV	137	\$750.00
ADD: DVP XL ENCRYPTION KIT	-	CA00146AN	137	\$750.00

A line cord must be ordered with each KMF CRYPTR.

Line Cord choices are:

Description	Full Description	Nomenclature	APC	Price
AC Line Cord, UK	-	CA02064AA	137	\$0.00
AC Line Cord, Australia	-	CA02063AA	137	\$0.00
AC Line Cord, European	-	CA02065AA	137	\$0.00
AC Line Cord, North America	-	CA02066AA	137	\$0.00

UPGRADES

PLEASE NOTE: Any Software and Hardware expansions or upgrades are only supported for releases with the ASTRO Standard Support period.

IMPORTANT NOTE: Instructor-led training and demo videos are available for customers. Due to the scope of operational changes, customer participation is highly recommended. For more info, click [here](#).

KMF SERVER & WEB CLIENT SOFTWARE UPGRADES

Description	Full Description	Nomenclature	APC	Price
KMF SERVER & WEB CLIENT SW UPGRDE	-	T8631	137	\$0.00

ADD: KMF SERVER AND WEB CLIENT SW	ADD: KMF SERVER AND WEB CLIENT SW	CA03599AA	137	\$27,500.00

Note: The Client's Computer Operating System must be Windows 10, or later, with 2 GB of memory or it must be upgraded to this configuration.

KMF FEATURE UPGRADES

Description	Full Description	Nomenclature	APC	Price
KMF UPGRADE OPTIONS KIT	-	T7689	137	\$0.00
ADD: MORE THAN 1000 RADIO USERS	(Note: Provides up to 64,000 users)	ZA00861AA	137	\$75,000.00
64 AGENCY PARTITIONING	(Note: Provides the capability of dividing the KMF database into 64 agencies)	ZA00975AA	137	\$50,000.00
ADD: ADDITIONAL CLIENT LICENSE	(Note: Additional client licenses, up to an orderable quantity of 8, for total client licenses of 10 with the 2 included)	ZA00864AA	137	\$15,000.00
ADD: 11-32 Client Licenses	(Note: Client Option Bundle beyond 10 client licenses)	ZA00972AA	137	\$75,000.00
ADD: 33-65 Client Licenses	(Note: Client Option Bundle beyond 32 client licenses, maximum of 65 total client licenses)	ZA00973AA	137	\$75,000.00
ADD: 11- 65 Additional Client License	-	ZA00974AA	137	\$7,500.00

REQUIRED FOR CUSTOMERS WISHING TO ADD REDUNDANCY TO THEIR EXISTING KMF (WEB BASED THIN CLIENT):

Description	Full Description	Nomenclature	APC	Price
RACK MOUNT KIT FOR CRYPTR II	-	TKN9285	811	\$135.00
WEB KMF REDUNDANCY SW	-	DLN7003	137	\$57,150.00
KMF CRYPTR	-	SQM01SUM0222	137	\$750.00
ADD: BASIC SOFTWARE OPTION	-	CA00147AG	137	\$3,500.00
KMF DL360 G10 SERVER	-	T8698	137	\$14,500.00

A single Encryption Algorithm Kit must be ordered with each KMF CRYPTR.
Up to five (5) Encryption Algorithm Kits can be ordered with a single KMF CRYPTR.

The main KMF software must match the Redundancy software version.

Encryption Algorithm Kit choices are:

Description	Full Description	Nomenclature	APC	Price
ADD: DVI XL ENCRYPTION KIT	-	CA00145AM	137	\$750.00
ADD: DES XL ENCRYPTION KIT	-	CA00144AE	137	\$750.00
ADD: DES OFB ENCRYPTION KIT	-	CA00143AF	137	\$750.00
ADD: AES 256 ENCRYPTION KIT	-	CA00182AV	137	\$750.00
ADD: DVP XL ENCRYPTION KIT	-	CA00146AN	137	\$750.00

A line cord must be ordered with each KMF CRYPTR.

Line Cord choices are:

Description	Full Description	Nomenclature	APC	Price
AC Line Cord, Australia	-	CA02063AA	137	\$0.00
AC Line Cord, UK	-	CA02064AA	137	\$0.00

AC Line Cord, European	-	CA02065AA	137	\$0.00
AC Line Cord, North America	-	CA02066AA	137	\$0.00

KMF CRYPTR SOFTWARE UPGRADE

REQUIRED FOR CUSTOMERS WISHING TO UPGRADE THEIR KMF CRYPTR TO THE LATEST VERSION OF SOFTWARE:

Description	Full Description	Nomenclature	APC	Price
KMF CRYPTR SOFTWARE CD UPGRADE	-	T8209	137	\$100.00

KMF CRYPTR ENCRYPTION (ALGORITHM) UPGRADE

REQUIRED FOR CUSTOMERS WISHING TO ADD ALGORITHMS TO A FIELD KMF CRYPTR VIA THE KVL:

Description	Full Description	Nomenclature	APC	Price
KMF CryptR Encryption CD Upgrade Kit	-	T7766	137	\$50.00

You must choose only one (1) Encryption Option per T7766.

You must order one (1) encryption option per KMF CRYPTR needing upgrade.

You can order up to a qty of 20 of the Encryption Option.

Description	Full Description	Nomenclature	APC	Price
ADD: DES OFB ENCRYPTION KIT	-	CA00143AF	137	\$750.00
ADD: DES XL ENCRYPTION KIT	-	CA00144AE	137	\$750.00
ADD: DVI XL ENCRYPTION KIT	-	CA00145AM	137	\$750.00
ADD: DVP XL ENCRYPTION KIT	-	CA00146AN	137	\$750.00
ADD: AES 256 ENCRYPTION KIT	-	CA00182AV	137	\$750.00

KVL 4000 Description & Details

The KVL 4000 is a two piece handheld key fill device (PDA and security adaptor) that allows customers to create, store, and deliver encryption keys, authentication keys, and algorithms into their security compatible radios, devices, and other secure communication infrastructure equipment. The KVL (Key Variable Loader) is required to load keys for all secure equipped products (subscriber and infrastructure) containing AES, DES, ADP, DES-XL, DES-OFB, DVP-XL and DVI-XL cryptographic algorithms.

The KVL 4000 has three modes of operation available: ASTRO 25 Mode, Radio

Authentication Mode, and ASN Mode.

ASTRO 25 Mode

is required for P25 compliant systems, for ASTRO 25 (Conventional and Tactical) OTAR, and for any interactions with the Key Management Facility (KMF). ASTRO 25 mode provides Common Key Reference (CKR) key management. CKR key management eliminates the need to place a key in a specific memory location. All secure products that support CKR™ will access the same encryption keys independent of physical storage capabilities of the product.

NOTE: An Over-the-Air Rekeying (OTAR) system is a secure communications system in which encryption keys, managed by Key Management Facility (KMF), can be sent to subscriber units via radio transmission to a subscriber to load keys. Tactical OTAR allows the user, without the KMF, to wirelessly rekey radios within range of a radio modem connected to a KVL.

NOTE: If purchasing a KVL 4000 for use in LTE, you are required to use ASTRO 25 Mode.

Radio Authentication Mode

is required to enable the ability for the KVL to generate and send radio authentication keys. In Radio Authentication Mode The KVL 4000 generates a unique authentication key for each radio and synchronizes the authentication key information with the ASTRO 25 system remotely over a secure Virtual Private Network (VPN) connection without requiring the operator to travel to the ASTRO 25 core location.

The Radio Authentication key is a unique 128 bit AES key, defined by the Project 25 standard, is required for the authentication key. It is generated by the KVL 4000 and stored in the Authentication Center (AuC). To maximize integrity, the authentication key is never sent over the air and it cannot be read from the radio.

The Radio Authentication Center is a central database that stores the authentication keys for all radios in the system.

See

[Solution Brief](#)

for more details.

Advanced Securenet (ASN) Mode

is for customers utilizing Physical Identifier (PID) key management. ASN mode provides PID key management. PID key management identifies a physical memory slot where a key variable is stored in a unit. All products that support PID key management access the same encryption keys dependent on the physical storage capability of the product. PID key management provides support for all SECURENET, Secure ASTRO, and Secure ASTRO@25 systems

[NOTE: Regarding DIMETRA: The Dimetra (Air Interface Encryption-AIE) KVL 3000 Plus Key Variable Loader is used to store and transfer encryption keys from the Authentication Centre to Dimetra System infrastructure devices (i.e. Zone Controller, Tetra Site Controller, and the Base Radio Controller) and Mobile Stations.]

[NOTE: To keyload CRYPTRmicro you must have KVL 4000 version B; on the security adapter label it must read T7537B.]

When to quote KVL 4000

Quote a KVL 4000 to your customer if:

- The customer is going to use encryption on their radio channels
- They have a KMF
- They want to use OTAR
- They need to load encryption algorithms, aftermarket, on to their radios

Customer Considerations

Things for the customer to consider:

- What encryption algorithm you will need
 - How many KVLs you will need
1. How many locations will need to be able to load keys
 2. How many traveling technicians will need to be able to load keys
 3. Backup units
- Do you use Radio Authentication in your system?
 - Do you use ASN Mode?
 - If you are using in an LTE system order ASTRO 25 Mode
 - What cables you will need to keyload your radios
1. A list is provided; however, your specific radio manual will provide the most specific and accurate information on the keyloading cable needed

Ordering Requirements

Ordering KVL 4000 for ASTRO / P25

The following are

REQUIRED

to order KVL 4000 for ASTRO / P25, select the KVL 4000 (**T7537B**),
ASTRO 25 Mode Software (**U239AD**),
AES Encryption
(**CA00182AP**),
and applicable line cord.

REQUIRED KVL 4000 PARTS AND OPTIONS

Part Number	Description
T7537B	KVL 4000 (called KVL PDA Snap-On)
U239AD	ASTRO 25 Mode
CA00182AP	AES Encryption Software

The following options are

OPTIONAL

when ordering a KVL 4000:

ADDITIONAL OPERATION MODES

Part Number	Description
QA01767AA	Radio Authentication Mode Compatible with, and requires, ASTRO 25 Mode (U239AD)
X795AJ	ASN (Advanced Securenet) Mode Required for PID (Physical Identifier) Key Management

ADDITIONAL ALGORITHM OPTIONS

Part Number	Description
C793BM	DVI-XL ENCRYPTION SOFTWARE
CA00243AG	ADP PRIVACY
X423AF	DES/DES-XL/DES-OFB ENCRYPTION
X769AD	DVP-XL ENCRYPTION SOFTWARE

AC LINE CORDS (Picking one is required at time of order of KVL 4000)

Part Number	Description
DDN3094	PWR SUPPLY ADAPTOR PWR BRICK AC DC 3A UNDERGROUND 5.4V 16W (REQUIRED)
DDN3095	CABLE ASSEMBLY PWR 5.4VDC 3A PWR (REQUIRED)
XXX	ADD APPROPRIATE COUNTRY LINE CORD - SCROLL DOWN FOR PART NUMBERS
Part Number	Description
C542	ADD: CABLE FOR KVL TO KMC (KEYLOADING) Cable for CIU, SYNTOR, SYNTOR X, KMC.
C543	ADD: CABLE FOR RNC, DIU, MGEG Keyloading cable for KMF, MCC 7500, MGEG, CDEM, RNC, DIU 3000, and XTL 5000 Consolette.

C724	CABLE, KEYLOAD Keyloading cable for XTS 5000, XTS 2500, and XTS 3000. Not for XTS 4000
C725AA	ADD: KEYLOAD CABLE FOR APX PORTABLE Keyloading cable for APX 7000 and APX6000
CA01603AA	Communication (USB)/ Charging cable with cup for MC55 PDA
CA02186	ADD: KEYLOAD CABLE FOR CRYPTR MICRO
CA02187	ADD: KEYLOADING CABLE ADAPTER (GCAI)

To add a sleeve cover when ordering a KVL 4000 order:

Part Number	Description
CA01803	KVL 4000 SLEEVE COVER

Order KVL 4000 for LTE

The following are

REQUIRED

to order KVL 4000 for LTE systems, select the KVL 4000 **(T7537B)**,

ASTRO 25 Mode Software **(U239AD)**,

AES Encryption

(CA00182AP),

and applicable line cord.

REQUIRED KVL 4000 PARTS AND OPTIONS

Part Number	Description
T7537B	KVL 4000 (called KVL PDA Snap-On)
U239AD	ASTRO 25 Mode
CA00182AP	AES Encryption Software

The following options are

OPTIONAL

when ordering a KVL 4000:

Part Number	Description
QA01767AA	Radio Authentication Mode Compatible with, and requires, ASTRO 25 Mode (U239AD)

X795AJ	ASN (Advanced Securenet) Mode Required for PID (Physical Identifier) Key Management
--------	---

ADDITIONAL ALGORITHM OPTIONS

Part Number	Description
C793BM	DVI-XL ENCRYPTION SOFTWARE
CA00243AG	ADP PRIVACY
X423AF	DES/DES-XL/DES-OFB ENCRYPTION
X769AD	DVP-XL ENCRYPTION SOFTWARE

Part Number	Description
C542	ADD: CABLE FOR KVL TO KMC (KEYLOADING) Cable for CIU, SYNTOR, SYNTOR X, KMC.
C543	ADD: CABLE FOR RNC, DIU, MGEG Keyloading cable for KMF, MCC 7500, MGEG, CDEM, RNC, DIU 3000, and XTL 5000 Consolette.
C724	CABLE, KEYLOAD Keyloading cable for XTS 5000, XTS 2500, and XTS 3000. Not for XTS 4000
C725AA	ADD: KEYLOAD CABLE FOR APX PORTABLE Keyloading cable for APX 7000 and APX6000
CA01603AA	ADD: USB COMM/CHARGE CABLE W/ CUP Communication (USB)/ Charging cable with cup for MC55 PDA
CA02186	ADD: KEYLOAD CABLE FOR CRYPTR MICRO
CA02187	ADD: KEYLOADING CABLE ADAPTER (GCAI)

To add a sleeve cover when ordering a KVL 4000 order:

Part Number	Description
CA01803	KVL 4000 SLEEVE COVER

***ENCRYPTION--**All encryption products, kits, software, and technology require an approved

export license prior to shipment. Review the following link <http://exportcontrols.mot.com/> for any possible licensing restriction. The international use of encryption algorithms (except for DES, DES-XL, & DES-OFB) are highly restricted by the U. S. Federal Government. License approvals are considered for export to a limited selection of countries and end users. Review the above link, for a list of contacts, for the Global Trade Compliance Organization, for licensing information before submitting bids, proposals, or accepting orders for algorithm based encryption products.

Key Variable Loader

FLASHport® Aftermarket Upgrades

Ordering Information

General Information

FLASHport® Aftermarket Software is used to upgrade the existing System Software Package or to add Enhancement Options to existing KVL (Key Variable Loaders.) The FLASHport® Upgrade Kit contains:

- Relevant software on a CD-Rom
- Upgrade Instructions

The KVL Software Upgrade DOES require the use of a personal computer and programming cable. The software is delivered via the CD-Rom.

Ordering Requirements

1. **Each Upgrade Kit (T7586) consists of a CD-Rom that can upgrade one individual KVL.**
2. **Tech Edit will request for KVL Serial Number and Current Operation Mode Programmed in KVL - ASN Mode or ASTRO 25 Mode. Please have this information ready when ordering KVL Flashport.**
3. **REQUIRED to select REFRESH option of existing operation mode when upgrading KVL - CA01635AA, CA01636AA, CA02010AA.**
4. **REQUIRED to use USB communication charging cable for any operation mode upgrades or refresh - 25-108022-04R.**
5. **Modem (DSUSR5637MODEM) is required with ASTRO 25 Mode when using KVL-KMF communication remotely.**
6. **USB/ethernet adapter (DPSA1U1EE) is REQUIRED for -**
 - **ASTRO 25 MODE when using KVL-KMF communication remotely via IP connectivity**
 - **USB/ethernet adapter (DPSA1U1EE) is REQUIRED for Radio Authentication.**

REMINDER: When selecting an upgrade (e.g. CA01633AA or CA01798AA) you must also select Software Refresh options for any existing modes on your KVL4000 (e.g. CA01635AA, CA01636AA, CA02010AA)

REMINDER: You will be required to enter the Serial Number of the KVL you will be upgrading. KVL serial numbers begin with 201. Failure to enter the correct KVL serial number may result in a non-functional Upgrade CD.

REMINDER: The algorithm, DES, is only available on APX 6000 and above.

***ENCRYPTION--All encryption products, kits, software, and technology require an approved export license prior to shipment. Review the following link <http://exportcontrols.mot.com/> for any possible licensing restriction. The international use of encryption algorithms (except for DES, DES-XL, & DES-OFB) are highly restricted by the U. S. Federal Government. License approvals are considered for export to a limited selection of countries and end users. Review the above link, for a list of contacts, for the Global Trade Compliance Organization, for licensing information before submitting bids, proposals, or accepting orders for algorithm based encryption products.**

DIMETRA KVL4000 & KVL4000 upgrade

Key Variable Loader

Updates

NOTE: All prices shown are LIST PRICE before any discount

The TETRA Product portfolio is only available to Accredited Channel Partners and a specific discount structure applies to this portfolio. Accredited Channel Partners should be advised of the applicable discount structure via their Motorola account manager

Ordering Information

General Information

IMPORTANT NOTE FOR ALL ENCRYPTED ITEMS

The export of TETRA encryption algorithms used for Air Interface encryption (TEA1, TEA2 and TEA3) and TETRA End-to-End (AES) encryption are export restricted by the United States Federal Government, the European Union and the German Federal Government, as well as by the governments of many other nations. Depending on the country of destination, there may be applicable national import restrictions. Export License approvals are based on the country of final destination and the specific end user. Certain countries and certain end users will not be eligible for approval. Contact your Local Export Control office if you are unfamiliar with the licensing process before exporting or importing encryption products.

Key Variable Loaders are used for three different applications in Dimetra.

1. Authentication key loading
2. Air Interface Encryption key loading
3. End to End Encryption key loading

The Authentication key loading application is used to load an infrastructure key (Ki) to the Zone Controllers, TETRA Site Controllers, and Base Radio controllers. Ki is derived from the AuC (Authentication Centre) and loaded into the KVL, the KVL is also used to return a receipt to the AuC. When the KVL attaches to the AuC it is able to check the identity of that AuC, with the identity that it is expecting, and if they do not match the KVL will abort the session.

The Air Interface Encryption key loading application is used to transfer Static Cipher Key material, SCK/SCKN and SCKVN and also the Authentication Key (K) from the PrC (Provisioning Centre) to the subscriber Terminals.

Configuration

Models

STEP 1: KVL4000 AIE/E2EE (AES) or Authentication only

Description	Full Description	Nomenclature	APC	Price
DIMETRA KVL 4000 HARDWARE	-	T7863	201	\$4,900.00

Ordering Guide

For Ordering Guide; please go to Link: [KVL 5000 Ordering Guide](#)

The KVL 5000 allows programmers to generate, transport, and load encryption keys, securely and efficiently into secure communication products thereby enabling secure encrypted communications. Offering the only P25 keyloader with a Hardware Backed Keystore. Packaged in an easy to use one-handed design with an intuitive UI, the KVL 5000 integrates with Motorola's Key Management Facility (KMF) by provisioning radios to use Over The Air Rekeying (OTAR).

Please note the KVL 5000 does not yet have parity with the KVL 4000; parity is targeted for Q3 2020. If you need to use USB Key Fill, USB Key File Export, Tactical OTAR or Control Head Keyloading - then you will need to order a KVL 4000. All of these features will be released in the KVL 5000 - if you order a KVL 5000 now, in order to get the additional features you will need to upgrade your software to get the remaining feature set. If you order the KVL 5000 after all of these features have been released, then your KVL 5000 will automatically have these features.

*ENCRYPTION--All encryption products, kits, software, and technology require an approved export license prior to shipment. Review the following link <http://exportcontrols.mot.com/> for any possible licensing restriction. The international use of encryption algorithms (except for DES, DES-XL, & DES-OFB) are highly restricted by the U. S. Federal Government. License approvals are considered for export to a limited selection of countries and end users. Review the above link, for a list of contacts, for the Global Trade Compliance Organization, for licensing information before submitting bids, proposals, or accepting orders for algorithm based encryption products.

KVL 5000 Value

As one of the top providers in the secure communications industry, Motorola prides itself on producing reliable and quality products. Designed to meet the requirements of two-way radio programmers, the purpose-built KVL 5000 delivers a quick start and snappy response for easy and efficient key loading - without interrupting the rest of their workflow. The only keyloader that can protect keys with hardware protected keystore, the KVL 5000 provides users with the highest level of secure programming and information protection.

KVL 5000 Value

- Purpose built device

- One Piece Design
- Rugged (IP54, MIL-STD)
- Quick Startup
- Feature Parity with the KVL 4000 including:
 - Built on FIPS 140-2 Level 2 validated architecture
 - Hardware protected keystore
 - Auto Keyload
 - Ability to keyload while KVL is charging, no minimum charge required
 - Multiple keyload
 - Key generation
 - KMF support (UKEK provisioning, Store & forward)
- Enhancements
 - Increased Responsiveness
 - Increased Efficiency
 - Power Management
 - User Friendly Interface
 - Key sharing (KVL 4000 to KVL 5000, KVL 3000+ to KVL 5000)

When is the KVL 5000 Needed?

The KVL 5000 is needed when:

- Customer is going to use encryption on their radio channels
- Customer has a KMF
- Customer wants to use OTAR
- Customer is using Radio Authentication
- Customer needs to load encryption algorithms, aftermarket, on to their radios

When is the KVL 5000 Needed?

Things for the Customer to Consider:

Things for the customer to consider:

- How many KVLs will you need?
 - How many locations will need to be able to load keys
 - How many traveling technicians will need to be able to load keys
 - How many backup units are needed?
- What cables will you need to key load your radio?

Model

L2/L3 Aggregation Switch/Router (copper)

Ordering Information

Features

- Built for advanced, scalable carrier-grade Ethernet services and large data center applications.
- Wire-speed, non-blocking performance in all configurations.
- 24 port copper switch (4 fiber ports standard, fiber plug-in optional)
- Field-proven Brocade Multi-service IronWare OS provides an industry standard interface, support for robust routing protocols, MPLS VPNs, advanced security and simplified management.
- Comprehensive IPv4 and IPv6 routing, and virtual routing in non-MPLS environments, via Multi-VRF.

For additional information, see Brocade Model Number CES2024C at www.brocade.com

General Information

The L2/L3 Aggregation Switch/Router may be used as a aggregation point for other switches, or as a BTE switch, if Multiprotocol Label Switching (MPLS) is required at the eNB. It supports multiple eNB connections and can be used to provide end-to-end MPLS.

Ordering Requirements

DC Power:

1. There is a minimum quantity 1 required for the L2/L3 Switch (DC Power) - Copper.
2. When the L2/L3 Switch (DC Power) - Copper is ordered, you must also order L3/L3 Redundant DC Power, minimum quantity 1.
3. When the L2/L3 Switch (DC Power) - Copper is ordered, a license option must also be selected. The options are mutually exclusive and you may not order both options. Select either the L3 Premium License or the MPLS Metro Edge Premium License, minimum quantity 1.
4. When the L2/L3 Switch (DC Power) - Copper is ordered, one or more SFP Fiber Plug-ins may be ordered, at a maximum quantity of 4 (this is optional for combination ports). Options are not mutually exclusive. An order can be placed for all three options, and no minimum quantities are required. Note: the L2/L3 Switch (DC Power) - Copper has 24 copper ports

total, and 4 combination copper/fiber ports. If a combination port is used, whether for fiber or copper, a corresponding port will be disabled from the main port. This means that you will always have a total maximum of 24 ports.

5. Product FRUs must be used when ordering standalone items.

6. The first year of Maintenance and Support for each switch/router must be ordered through Tigers. Please contact [Product Management](#) to obtain a current Maintenance and Support quote.

AC Power:

1. There is a minimum quantity 1 required for the L2/L3 Switch (AC Power) - Copper.

2. When the L2/L3 Switch (AC Power) is ordered, you must also order L3/L3 Redundant AC Power Supply, minimum quantity 1.

3. When the L2/L3 Switch (AC Power) is ordered, a license option must also be selected. The options are mutually exclusive and you may not order both options. Select either the L3 Premium License or the MPLS Metro Edge Premium License, minimum quantity 1.

4. When the L2/L3 Switch (AC Power) - Copper is ordered, one or more SFP Fiber Plug-ins may be ordered, at a maximum quantity of 4 (this is optional for combination ports). Options are not mutually exclusive. An order can be placed for all three options, and no minimum quantities are required. Note: the L2/L3 Switch (AC Power) - Copper has 24 copper ports total, and 4 combination copper/fiber ports. If a combination port is used, whether for fiber or copper, a corresponding port will be disabled from the main port. This means that you will always have a total maximum of 24 ports.

5. The first year of Maintenance and Support for each switch/router must be ordered through Tigers. Please contact [Product Management](#) to obtain a current Maintenance and Support quote.

L2/L3 Remote EPG Switch - Copper

Ordering Information

Features

- Compact 1U IP/MPLS/VRF-enabled switch that is purpose-built for advanced Carrier Ethernet and large data center applications.
- Wire-speed, non-blocking performance in all configurations.
- 48-port configurations in both Hybrid Fiber (HF) and RJ45 versions to suit versatile access/aggregation media with two optional 10 GbE uplink ports.
- Powered by field-proven Brocade Multi-service IronWare OS that also runs on the Brocade MLX Series of high-performance routers.
- Integrated support for OpenFlow in true hybrid mode, enabling Software-Defined Networking (SDN) for programmatic control of the network.
- Advanced and highly scalable IPv4/IPv6 routing and Carrier Ethernet services, including E-LINE, E-LAN and E-TREE.
- MEF 9-, MEF 14- and MEF 21-certified, with comprehensive service OAM capabilities.

For additional information, see Brocade Model Number CES2048CX/FX (AC/DC power) at www.brocade.com

General Information

The L2/L3 Remote EPG Switch/Router enables a split equipment configuration, whereby the eNBs, EPG, security GW and application servers are located in-market. The remaining core components (MME, HSS/PCRF, and OSS-RC) are installed in a centralized location.

The Brocade CES2048CX or CES2048FX Series offers routing capabilities that are commonly required in edge aggregation and other applications within a provider's domain. These capabilities include advanced hardware-based routing technology, which ensures secure and robust wire-speed routing performance. It provides high performance IPv4, IPv6 and MPLS (Multiprotocol Label Switching) capabilities, as well as advanced Layer 2 switching.

Ordering Requirements

L2/L3 Remote EPG Copper - AC Power

1. There is a minimum quantity of 2 required for the L2/L3 Switch (AC Power) - Copper - 48 Ports.
2. When the L2/L3 Switch (AC Power) - Copper - 48 Ports is ordered, you must also order L2/L3 REDUNDANT AC POWER SUPPLY, minimum quantity 1 per switch, for a total of 2 for the 2 redundant switches.

3. If 10G Ethernet support is required, then order 1 10G XFP (FIBER PLUG-IN) for 1 10G port, and a maximum of 2 if 2 10G ports are required per switch, for a maximum quantity of 4 for the 2 redundant core switches.

4. Product FRUs must be used when ordering standalone items.

5. The first year of Maintenance and Support for each switch/router must be ordered through Tigers. Please contact [Product Management](#) to obtain a current Maintenance and Support quote.

L2/L3 Remote EPG Copper - DC Power

1. There is a minimum quantity of 2 required for the L2/L3 Switch (DC Power) - Copper - 48 ports.

2. When the L2/L3 Switch (DC Power) - Copper - 48 ports is ordered, you must also order L2/L3 REDUNDANT DC POWER SUPPLY, minimum quantity 1 per switch, for a total of 2 for the 2 redundant switches.

3. If 10G Ethernet support is required, then order 1 10G XFP (FIBER PLUG-IN) for 1 10G port, and a maximum of 2 if 2 10G ports are required per switch, for a maximum quantity of 4 for the 2 redundant core switches.

4. Product FRUs must be used when ordering standalone items.

5. The first year of Maintenance and Support for each switch/router must be ordered through Tigers. Please contact [Product Management](#) to obtain a current Maintenance and Support quote.

L2/L3 Remote EPG Switch - Fiber

Ordering Information

Features

- Compact 1U IP/MPLS/VRF-enabled switch that is purpose-built for advanced Carrier Ethernet and large data center applications.
- Wire-speed, non-blocking performance in all configurations.
- 48-port configurations in both Hybrid Fiber (HF) and RJ45 versions to suit versatile access/aggregation media with two optional 10 GbE uplink ports.
- Powered by field-proven Brocade Multi-service IronWare OS that also runs on the Brocade MLX Series of high-performance routers.
- Integrated support for OpenFlow in true hybrid mode, enabling Software-Defined Networking (SDN) for programmatic control of the network.
- Advanced and highly scalable IPv4/IPv6 routing and Carrier Ethernet services, including E-LINE, E-LAN and E-TREE.
- MEF 9-, MEF 14- and MEF 21-certified, with comprehensive service OAM capabilities.

For additional information, see Brocade Model Number CES2048CX/FX (AC/DC power) at www.brocade.com

General Information

The L2/L3 Remote EPG Switch/Router enables a split equipment configuration, whereby the eNBs, EPG, security GW and application servers are located in-market. The remaining core components (MME, HSS/PCRF, and OSS-RC) are located in a centralized location.

The Brocade CES2048CX or CES2048FX Series offers routing capabilities that are commonly required in edge aggregation and other applications within a provider's domain. These capabilities include advanced hardware-based routing technology, which ensures secure and robust wire-speed routing performance. It provides high performance IPv4, IPv6 and MPLS (Multiprotocol Label Switching) capabilities, as well as advanced Layer 2 switching.

Ordering Requirements

L2/L3 Remote EPG Fiber - AC Power

1. There is a minimum quantity of 2 required for the L2/L3 Switch (AC Power) - Fiber - 48 Ports.
2. When the L2/L3 Switch (AC Power) - Fiber - 48 Ports is ordered, you must also order L2/L3 REDUNDANT AC POWER SUPPLY, minimum quantity 1 per switch, for a total of 2 for the 2 redundant switches.

3. If 10G Ethernet support is required, then order 1 10G XFP (FIBER PLUG-IN) for 1 10G port, and a maximum of 2 if 2 10G ports are required per switch, for a maximum quantity of 4 for the 2 redundant core switches.

4. If the fiber switch AC power is ordered, one or more 1G SFP Fiber Plug-ins must be ordered, at a maximum quantity of 48. Three different options of SFP Plug-ins can be ordered, based on fiber length requirements, and these options are not mutually exclusive. Orders can be placed for all three options, if required.

5. Product FRUs must be used when ordering standalone items.

6. The first year of Maintenance and Support for each switch/router must be ordered through Tigers. Please contact [Product Management](#) to obtain a current Maintenance and Support quote.

Learning Management Systems

LMS will be available to order via CPQ.

Silver

Availability: Continual access to LMS, beginning at time of contract signing; end date is at a minimum of 2 years post go live date, with incentive for sales to sell as many out years as possible.

Content: Base content assigned per contracted applications and/or products; with the addition of all applicable new release training during contracted term.

Access to courses for LMS administrators to be able to add/modify users, run reports, and add/modify groups within the panorama.

Cost: \$24 per user license per year for length of contract.

Gold

Availability: Continual access to LMS for length of contract.

Content: Base content assigned per contracted applications and/or products; with the addition of all applicable new release training during contracted term. With ability to upload customer content and ability to track all learning.

Training: Remote training of 12 hours provided for up to 6 administrators covering the administration of their LMS instance. Pre Go Live consists of 10 hours; post go live (to be used no later than 180 days past go live) consists of 4 hours.

Cost: \$32 per user license per year for length of contract.

Platinum

Availability: Continual access to LMS for length of contract.

Content: Base content assigned per contracted applications and/or products; with the addition of all applicable new release training during contracted term. With ability to upload customer content and ability to track all learning.

Eight (8) hours of customized content included, with ability to add more as customer deems necessary.

Training: Remote training of 24 hours provided for up to 6 administrators covering the administration of their LMS instance. Pre Go Live consists of 12 hours; post go live (to be used no later than 365 days past go live) consists of 12 hours. Then 12 hours of continuing administrator training per year for the length of the maintenance and support contract.

Twenty-four (24) hours of on site training for up to 6 administrators; covering creation of content and LMS use/administration.

The LEX L10 Mission Critical LTE Handheld is purpose-built to deliver the Public Safety Experience (PSX) that responders need to work faster, safer and smarter. It addresses the unique requirements of public safety personnel by delivering the mission critical capabilities not available on consumer-grade smart phones. The device is equipped with the PSX User Interface that is customizable, role-based, and adaptive. It intelligently aggregates and prioritizes information to only present what is critical to the user, based on their current status and activity.

The sleek LEX L10 is ergonomically designed for one-handed operation with a no-slip grip and a 4.7 inch touch screen. It features best-in-class audio performance with dual 1-watt front-facing speakers, tri-microphone noise and echo cancellation, and a dedicated PTT button for fast voice collaboration. It can operate in covert mode and can be securely touch-paired with Motorola APX P25 radios via mission critical bluetooth. It uses a removable battery that enhances long-term usage in the field.

The LEX L10 is secured with hardware encryption and Security Enhanced Android OS. It works on Verizon 3G/4G and Public Safety LTE, ensuring seamless roaming and optimal coverage at all times.

For more information, please visit: <http://www.motorolasolutions.com/US->

General Information

The LEX L10 is a ruggedized handheld device that operates on an Android 4.4 Kit-Kat OS. This government grade interface solution is easily deployed to security and public safety teams. The LEX L10 (MIL-STD 810G) with an operating temperature of -10C to 55C. LEX L10 is built on Android Kit Kat 4.4.4 OS. Furthermore, it is IP67 sealed and ruggedized against everyday hazards like moisture, vibration, and temperature extremes.

LEX L10 has several key features, including dual SIM slots to support Verizon 3G/4G LTE and Public Safety LTE, ensuring seamless roaming and optimal coverage at all times. LEX L10 has a removable battery, which has a 10hr battery life (2340 mAH), in addition to an X-cap with a 20hr battery life (4680 mAH). It is ergonomically optimized for one-handed dedicated PTT button operation, and volume up and down operation. The LEX L10 comes with a battery, battery door, data/charging cable, and a heavy-duty 6W AC two-piece charger.

Please note: General lead times are 12-16 weeks.

LEX L11 LTE DEVICE

CERTIFIED FOR ATT/FIRSTNET NETWORK/VERIZON

Ordering Information

PRODUCT INFORMATION

When hardware, software, and accessories work seamlessly together, the result is a device that works seamlessly for you. The LEX L11 Mission-Critical LTE Device is designed with first responders in mind; it's the result of our tireless quest to understand the way you actually work. Every feature and function is thoughtfully considered, from the rugged, easy to operate design to the always loud and clear audio to the advanced end to end secure mobile platform and the enhanced accessibility provided by a suite of accessories. Rugged and durable yet streamlined and slim, you can count on the LEX L11 to perform when it's needed most.

The LEX L11 is equipped with a 5.0 in. touch screen display, WiFi, Bluetooth 4.2 LE, and ships with Android 7.1 Nougat OS. Users also have access to the Google Playstore which delivers millions of applications.

The LEX L11 is available with removable IMPRES™ 2 battery options: 2500 mAH standard or 5000 mAH high-capacity. The LEX L11 is designed for use in mission-critical situations; you need to keep your eyes in front of you and easily access key features using just one hand. With its ergonomic design, the LEX L11 places the most important buttons on the left-hand side, including a dedicated push-to-talk button and two programmable buttons. A talk group rocker switch and dedicated emergency button placed on the top provide quick access even when the device is holstered.

The LEX L11 includes Security Enhanced Android OS.

LINK Services

Ordering Information

Land mobile radio (LMR) system management has grown especially complex over the past two decades, as systems become more IP-based. LMR systems must seamlessly interact and connect with applications, software and broadband networks—all of which are moving targets. With unprecedented interoperability and performance requirements, keeping pace with evolving system capabilities and IP-based technology can be a time-consuming and expensive undertaking.

With LINK, Motorola assumes full responsibility for your existing ASTRO 25 assets and optimizes the coverage, capacity and availability for your entire region or state in a subscription-based model. We are also accountable for all technology improvements, interoperability, cybersecurity and much more, leaving your staff and resources free to focus on your core mission.

Benefits

From ever-increasing demands for system interoperability to new technology and security concerns, LMR systems create an array of critical challenges for today's system operators. LINK allows you to focus on your mission at a predictable cost without sacrificing the performance of the communication network that empowers your operations and users.

- Achieve savings over traditional methods of procurement and operations with economies of scale of a unified network platform and operations
- Eliminate unexpected expenses through a predictable service model
- Achieve agility with a flexible platform that has the ability to leverage and integrate disparate State and local networks and technologies
- Interoperate across agencies, regions and communication technologies.
- Gain access to the latest technology and features.
- Experience guaranteed, mission-critical performance.

Statement of Work

Link provides users with a Service Level Agreement (SLA) experience which are specific to each system. Service Level Agreements consist of Network Coverage, Network Capacity and

Network Availability commitments. These SLA's are enabled through an integrated delivery

model leveraging capabilities such as 24x7x365 network and security monitoring with end to end event management, technical support, help desk and ticketing, preventive maintenance, onsite services, performance management, and system and software provisioning and updates. Detailed descriptions of each of these capabilities are included in the Product Catalog. A LINK SLA must be provided for each customer. Contact your MSI Account Manager for more details.

Ordering Requirements

1. Inherent in the LINK structure is the ability to drive economies of scale as agencies join the network, creating cost efficiencies for users. As part of the LINK services, Motorola will maintain and manage the customer-owned system equipment, integrating it into the LINK network and enabling others to leverage the resources; which provides economies of scale for all. As more users join the network, pricing will have tiered reductions that provide cost savings to all agencies. These reductions may be tied to both individual agency user quantity reductions, as well as total network users. This pricing also provides an accessible platform for new, additional capabilities as they become available. The network becomes an efficient and effective model for shared services.
2. LINK Services are subject to mutually agreeable Terms and Conditions.
3. Motorola will provide to Customer the managed services and Deliverables (if any) set forth in the Service Level Agreement(s) or in Service Level Agreement executed by the Parties in the future (“Services”) in exchange for Monthly Service Fees and use of Customer’s existing communications equipment.

Configuration

Item	Description	APC	Price
* Services Setup (one-time fee for each LINK customer)	Includes all Hardware, Software, and labor required to integrate existing systems and set up the services to meet required Service level agreements.	989	\$10,000 /unit
** Recurring Monthly User Fees	Fees associated with providing ongoing services to meet coverage, capacity, availability, and resilience commitments. Includes infrastructure network and security operations services, software, and hardware.	989	Cat. A \$30 Cat. B \$50 Cat. C \$70 Cat. D \$90 Cat. E \$110

* Number of Service Setup Fee units are calculated based on existing customer systems, Service Level Agreements, and cutover requirements.

** Fees vary based on type of access and SLA's required for the system and different user categories.

The above is representative pricing only. Specific pricing for specific Service Level Agreements can be provided upon request.

LINK pricing is prepaid annual in advance. Billing will begin after the System is available for the Beneficial Use, or acceptance whichever comes first.

Subscription discounts are available based on the contract term (Years). Customer may be required to pay a minimum annual recurring charge ("ARC") independent of subscriber subscriptions on the system. Any miscellaneous items that are not included in the Annual Recurring Charge (ARC) will be labeled accordingly.

Local Device Combo Package

Ordering Information

General Information

The Local Device Combo Package provides the first echelon and component level repair services for your radios. The Motorola Local Service Provider makes the determination to repair the radio locally or utilize Motorola's Radio Support Center for the repair. The customer is responsible for bringing the radio to the local service facility for service.

On-site option: The on-site option (pick-up & delivery) provides for a Local Motorola Service Providers to be on-site at the customer's location. Equipment will be picked up and delivered to the customer's location within mutually agreed upon schedule.

Survey and Analysis Option: The Survey and Analysis optional add-on provides for annual testing to ensure equipment meets original manufacturer's specifications. It is the Customer's responsibility to schedule the Radio Survey and Analysis with the SSC.

Antenna Replacement Program for Portables Option: The Antenna Replacement provides for an antenna check and replacement service. Due to the nature of this Option, customer's entire inventory of portables must be covered by this Option. Any physical damage found that requires radio repair beyond a new antenna is charged to the customer at the prevailing time and material rates.

Remote Speaker Microphone Enhancement for Portables Option: The Remote Speaker Microphone Enhancement is an optional add-on to Local Radio Support. It provides for no-hassle remote speaker microphone replacement. Due to the nature of this Option, Customer's entire inventory of portables must be covered by this Option.

Remote Control Head Enhancement for Mobiles Option: The Remote Control Head option is required for each remote control head covered under the contract. The Remote Control Head option is also applicable to speaker microphone control heads and extended control units.

Features

- Single point of contact for radio servicing needs
- Local Motorola service locations for easy drop-off/pick-up of units
- Several options available to enhance the base service

Statement of Work

One of the primary business objectives of the North American Group (NAG) is to promote the sales of STANDARD service products. Standards help to ensure consistent and profitable delivery of our service products to our customers. To that end, the customer Statement of Work for this Standard Service Product **CANNOT** be modified. All requests for modifications to STANDARD service products or the development of "custom" service products should be routed through the Solutions Planning process. Your first point of contact for these requests is your local Territory Service Manager.

Local Radio Support Service

Ordering Information

General Information

Local Radio Support provides an operational check of subscriber Equipment. An operational check is an analysis of the Equipment to identify external or internal defects.

If the Equipment has an external defect, or can be restored without opening the radio case, the Equipment will be restored and returned to Customer. If the Equipment has an internal defect, or is not serviceable without opening the radio case, then the Equipment will require additional service not covered by this Service. This service does not include antennas, portable remote speaker microphones, mobile remote control heads, portable chargers, and mobile external speakers and cabling.

This Service has five options to provide additional services:

On-site option: The on-site option (pick-up & delivery) provides for a Local Motorola Service Providers to be on-site at the customer's location. Equipment will be picked up and delivered to the customer's location within mutually agreed upon schedule.

Survey and Analysis Option: The Survey and Analysis optional add-on provides for annual testing to ensure equipment meets original manufacturer's specifications. It is the Customer's responsibility to schedule the Radio Survey and Analysis with the SSC.

Antenna Replacement Program for Portables Option: The Antenna Replacement provides for an antenna check and replacement service. Due to the nature of this Option, customer's entire inventory of portables must be covered by this Option. Any physical damage found that requires radio repair beyond a new antenna is charged to the customer at the prevailing time and material rates.

Remote Speaker Microphone Enhancement for Portables Option: The Remote Speaker Microphone Enhancement is an optional add-on to Local Radio Support. It provides for no-hassle remote speaker microphone replacement. Due to the nature of this Option, Customer's entire inventory of portables must be covered by this Option.

Remote Control Head Enhancement for Mobiles Option: The Remote Control Head option is required for each remote control head covered under the contract. The Remote Control Head option is also applicable to speaker microphone control heads and extended control units.

Features

- Local Motorola service locations for easy drop-
- Packaging and handling services

Statement of Work

Ordering Information

Product Information

Important: the location services and presence services price pages will be deleted on 10/3/16. location services and presence service client is not cancelled, the location and presence services converged service client bundles are now part of the uns price pages. therefore, when you order the uns, access to the client is included. the client then needs to be downloaded from the google® play store. if a windows version of the client is required, order via the window converged services client option on the uns.

Contact Name: Cathal Tierney

Motorola's solution streamlines the location services to a single client that provides device location coordinates to a central database, which any application on the network can access via standards-based 3GPP compliant APIs. Location services consist of client and server software and respective server hardware and network fabric. When deployed, location service will allow a responder to see his location on a device. A dispatcher will be able to view the location of the responder and vehicles displayed on a map, and utilize this information to dispatch responders to incidents, etc. User equipment (UE) contains GPS hardware that determines its location and conveys this location information to the location client in UE. Applications in the agency can request device location from the location server using the device's address from the agency. The location server communicates with the location client in the device and retrieves the location information.

General Deployment Information

OFFERED HARDWARE:

Hewlett-Packard DL380 G9 server running Windows Server 2012 R2 and fully configured by Motorola.

SUPPORTED DEVICES/CLIENTS:

LEX 755: (Jellybean), LEX L10 (Kit Kat), LEX L10i, BYOD/Non-MSI Android devices, MDTs/Laptops: Windows 7

CAPACITY:

Location server (HW) supports 1000 updates per second or 10,000 users updating once every 10 seconds (10K devices on location server with best case of reporting 1000 users/sec). Additional servers should be ordered to support larger capacity requirements (exceed 10K active user requirement).

NOTE: When installing in an agency, additional accessories (firewall and switches) are needed. Please refer to the following Information page: [Agency Configuration](#) .

Ordering Information and Requirements

REQUIRED: Hardware, Server Capacity License and Client Licenses

1. **Hardware:** Priority Manager, Location Services and Presence Services share same hardware. Do not purchase/order separate server hardware if your customer already purchased Priority Manager or Presence Services. For ordering new hardware please refer to Priority Manager eCAT page: [PRIORITY MANAGER](#).
2. **Server Capacity License:** In order to activate Location Services on the server side, you must purchase licenses for UNS Location Services. For information on part numbers and prices, please refer to the UNS eCAT page: [UNS](#).
3. **Client Licenses:**

NOTE: App Central client will be branded as Converged Services client going forward.

3.1 LEX 755:

The Location Services client is part of the App Central Client (App Central Client is a software package/bundle of Priority Manager client, Location Services client, Presence Services client, Quick Action Button client, and Radio Remote Control client. Each client/functionality is activated based on licensing, and customer needs to purchase each application separately).

App Central Client is pre-loaded on LEX 755 Android devices. In order to activate and use Location Services client, customer needs to order/purchase both client licenses stated below.

	Ordering Guide
LEX 755 Location Services Client License	Option T8080A must be selected followed by UA00126AA (\$0) with the required amount of client licenses. Please order T8326A, followed by the needed bundle below.

3.2 LEX L10, LEX L10i:

The Location Services client is part of the Converged Services Client (Converged Services Client is a software package/bundle of Priority Manager client, Location Services client and Presence Services client. Each client/functionality is activated based on licensing, and customer needs to purchase each application separately.)

In order to activate and use Location Services client, customer needs to purchase client license under T8326A. Please order T8326A, followed by the needed bundle below.

3.3 Generic/BYOD/Non-MSI Android:

The Location Services client is part of the Generic/BYOD Converged Services Client

available on Google® Play Store (Converged Services Client for generic/BYOD Android devices is a software package/bundle of Location Services client and Presence Services client. Each client/functionality is activated based on licensing, and customer needs to purchase each application separately.)

In order to activate and use Location Services client, customer needs to purchase client license under T8326A. Please order T8326A, followed by the needed bundle below.

3.4 Windows 7:

App Central client is a post-load application, and in order to use Location Services client, customer needs to purchase and load App Central Client on MDT/laptop. One software CD will be shipped (NOTE: App Central Client may already be loaded on MDT/laptop if your customer already uses Priority Manager and/or Presence Services. You still need to order/purchase both below licenses to use Location Services Functionality).

	Ordering Guide
Windows Location Services Client License	Option T8080A must be selected, followed by CA02614AA (0\$) with the required amount of client licenses. Please order T8326A, followed by the needed bundle below.

Please order T8326A, followed by the needed bundle below.

	Ordering Guide
Add: Location Services Client - 1 License	Please order T8326A, followed by UA00322AA
Add: Location Services Client - Bundle of 10 Licenses	Please order T8326A, followed by UA00323AA
Add: Location Services Client - Bundle of 100 Licenses	Please order T8326A, followed by UA00324AA
Add: Location Services Client - Bundle of 250 Licenses	Please order T8326A, followed by UA00325AA
Add: Location Services Client - Bundle of 500 Licenses	Please order T8326A, followed by UA00326AA
Add: Location Services Client - Bundle of 1,000 Licenses	Please order T8326A, followed by UA00327AA
Add: Location Services Client - Bundle of 2,000 Licenses	Please order T8326A, followed by UA00328AA

Add: Location Services Client - Bundle of 5,000 Licenses	Please order T8326A, followed by UA00329AA
Add: Location Services Client - Bundle of 7,500 Licenses	Please order T8326A, followed by UA00330AA
Add: Location Services Client - Bundle of 10,000 Licenses	Please order T8326A, followed by UA00331AA
Add: Location Services Client - Bundle of 25,000 Licenses	Please order T8326A, followed by UA00332AA
Add: Location Services Client - Bundle of 50,000 Licenses	Please order T8326A, followed by UA00333AA
Add: Location Services Client - Bundle of 100,000 Licenses	Please order T8326A, followed by UA00334AA

If you have questions, please contact [Divyesh Oza](#) or [Jay Schaper](#).

LTE Customer Dispatch Call Management Service

Ordering Information

General Information

The Motorola Customer Dispatch Call Management Service provides a central point of contract (via a toll free telephone number) to receive customer technical service requests. Upon receiving the customer call, the Dispatch representative contacts the assigned customer technical support resources and dispatches them to the site per specified service level agreement following a documented process for prioritizing and assigning service calls and requests.

The types of service calls included in the LTE Customer Dispatch Call Management Service may include but are not limited to opening a Return Materials Authorization (RMA), dispatching technicians for scheduled preventive maintenance service or dispatching technicians to a network location.

The terms and conditions of this Statement of Work (SOW) are an integral part of Motorola's Service Terms and Conditions or other applicable agreement to which it is attached and made a part thereof by this reference.

Features

- Escalation Management
- Activity Reporting
- 24 Hour/365 Day Service Availability
- Computer Aided Dispatch
- Single Point of Contact
- Electronic Case Tracking
- Toll Free Service Number (800) 221-7144

Statement of Work

One of the primary business objectives of the North American Group (NAG) is to promote the sales of STANDARD service products. Standards help to ensure consistent and profitable delivery of our service products to our customers. To that end, the customer Statement of Work for this Standard Service Product **CANNOT** be modified. All requests for modifications to STANDARD service products or the development of "custom" service products should be routed through the Solutions Planning process. Your first point of contact for these requests is your local Area Service Manager.

LTE Customer Dispatch Call Management Service SOW

Ordering Requirements

1. **This product cannot be ordered directly through COF at this time.** This product must be ordered using the Services Lifecycle (SLC) contract system. Please contact your local Area Service Manager (ASM) or Customer Support Manager (CSM) if you are interested in ordering this product.
2. Options for this product are based on the component parts of the complete system. Pricing is based on the size and complexity of the customer's system configuration such as the type of system, number of sites and number of base stations. **To ensure accurate pricing, orders will not be processed or accepted if they do not include all system components.**
3. Enter the main line item as quantity one.
4. Options are required as sub-items, with the quantity equal to the option description.
5. All dollar amounts reflect an annual one year pricing.
6. Dispatch Service requires the purchase of one of the OnSite Infrastructure Response options (Regular, Limited, Premier).
7. Dispatch Service is required if purchasing Network Monitoring Service and customer is Motorola maintained. See below.

	Network Monitoring Service	Technical Support	Dispatch Service	Customer Technician Dispatch	OnSite Infrastructure Response
Motorola Maintained	Required	Not Required	Required	N/A	Required
Customer Maintained (COAM)	Required	Suggested	N/A	Required	N/A

1. A Customer Support Plan must be created to provide detailed information to the customer regarding delivery of this service.

LTE Fault Monitoring

Ordering Information

General Information

Through this service, LTE systems are fault monitored 24x7x365. The LTE unified event manager sends Simple Network Management Protocol (SNMP) events to a Manager of Managers so that fault notifications from the entire Motorola system are integrated. When an event is detected, trained technologists acknowledge and assess the situation and initiate an appropriate response per the Customer Support Plan. Appropriate responses could include, but are not limited to, continuing to monitor the event for further development, dispatching of a local field technician, or transferring the event to Technical Support. If dispatched, the field technician will respond at the customer location based on pre-defined severity levels as set forth below.

The LTE Fault Monitoring service provides integration of fault notifications from the entire Motorola system offering and presentation of alarms via a unified alarm manager. When an Event is detected, trained technologists utilizing sophisticated tools for remote monitoring and event characterization will acknowledge and initiate an appropriate response per the Customer Support Plan (CSP).

The terms and conditions of this Statement of Work (SOW) are an integral part of Motorola's Service Terms and Conditions or other applicable agreement to which it is attached and made a part thereof by this reference.

Features

- Customer Support Manager
- Remote Diagnostic & Monitoring
- 24 Hour Monitoring of System
- Escalation Management
- Report Metrics
- 24 Hour/365 Day Service Availability

LTE Hardware Maintenance Plan (HMP)

Ordering Information

General Information

Hardware Maintenance is a repair service for Motorola and select third party equipment. Hardware may be repaired down to the component level, as applicable, at the Motorola Repair Depot. At Motorola's discretion, select third party Hardware will be sent to the original equipment manufacturer or third party vendor for repair. If Hardware is no longer supported by the original equipment manufacturer or third party vendor, Motorola will replace Hardware with similar Hardware, when possible.

Hardware components are defined as all fixed equipment. Hardware repair is provided through Motorola's centralized repair depot, eliminating the need to send equipment to multiple locations. Hardware repair will be performed on field replaceable units (FRU) or field replaceable entities (FREs) for both Motorola and select third party Hardware. At Motorola's discretion, select third party Hardware may be sent to vendor/OEM for repair. If Hardware is no longer supported by the original equipment manufacturer

Features

- Manage Original Equipment Manufacturer (OEM) repair process, coordination, and testing

LTE On-Site Infrastructure Response Service

Ordering Information

General Information

Motorola On-Site Infrastructure Response provides local, trained and qualified technicians who arrive at your location to diagnose and restore a customer's communications network. All they have to do is make one phone call and their system response and restoration process begins immediately. Following proven response and restore processes, Motorola Dispatch (requires Dispatch Service) contacts the local authorized service center in their area and dispatches a qualified technician to their site. An automated escalation process ensures that technician site arrival and system restoration comply with contracted response times. The field technician will restore the system by performing first level trouble-shooting on-site. If the local technician is unable to resolve the problem, the escalation process includes intervention by Motorola System Support Center technologists or product engineering teams as needed (requires Technical Support service).

Features

- Motorola Technical Expertise
- 24 Hour/365 day service availability
- On-site Motorola Authorized Servicer
- Preventative maintenance check

Statement of Work

One of the primary business objectives of the North American Group (NAG) is to promote the sales of STANDARD service products. Standards help to ensure consistent and profitable delivery of our service products to our customers. To that end, the customer Statement of Work for this Standard Service Product **CANNOT** be modified. LTE SIM Card

Ordering Information

Features

Standard SIM (2FF)

- Second Generation Form Factor, plug-in SIM (Subscriber Identification Module)
- Compatible with all Motorola Class A, B, and C devices
- Hardened plastic and electronics for use in harsh environments
- Operating temperature -40°C to +105°C
- 512K flash
- Fully compliant with 3GPP Standards
- Optimized for use on a Motorola Public Safety or Private LTE network
- USIM (Universal Subscriber Identification Module) for LTE service
- ISIM (IP Multimedia Services Identity Module) for IMS service
- Programmed/encoded with a custom SIM profile

Triple SIM (2FF/3FF/4FF)

- Triple SIM form factor, plug-in SIM (Subscriber Identification Module)
- Compatible with all Motorola Class A, B, and C devices
- Operating temperature -25°C to +85°C
- 512K flash memory
- Fully compliant with 3GPP Standards
- Optimized for use on a Motorola Public Safety or Private LTE network
- USIM (Universal Subscriber Identity Module) for LTE service
- ISIM (IP Multimedia Services Identity Module) for IMS service
- Programmed/encoded with a custom SIM profile

General Information

The SIM card, also known as a Universal Integrated Circuit Card (UICC), is a next generation subscriber identification module used in 3G and 4G devices. The SIM/UICC is a type of smart card, used in mobile or wireless devices, which contains an on-board computer or microprocessor, as well as its own data storage/memory and software.

The SIM is your "identity" for the Public Safety or Private LTE network. The USIM application, resident on the SIM card, is used to authenticate a device/user to the LTE network, and identifies who the user is and his/her service plan. Once authenticated, the user is granted LTE service. The SIM card also contains an application for storing personal contact information and preferred roaming partners, as well as user confidential information, such as network authentication keys. The ISIM application, also resident on the SIM card, is used to authenticate a device/user to the IMS (IP Multimedia Subsystem) network. Once authenticated, the user is granted IMS service. Both USIM and ISIM applications co-exist on

the same SIM card.

In addition to the USIM and ISIM applications, each SIM card contains a unique, optimized and personalized SIM profile, designed to operate on a Motorola Solutions Public Safety or Private LTE network. The SIM profile is personalized with network specific information, including but not limited to, the PLMN (Public Land Mobile Network) ID, IMSI, network authentication keys, and algorithm constants.

SIM profile creation is a joint effort between Motorola Solutions and the LTE Operator. The network operator and Motorola work together to define the personalization parameters for the SIM profile. Once defined, the customized profile will be programmed/encoded each time a SIM card is ordered. All devices operating on a Motorola LTE network require a SIM card. Motorola SIM cards should ONLY be used with Motorola LTE devices. The SIM card can be ordered when a new device is purchased, or independent of any device orders.

All Motorola Band Class 14 VML devices use a Standard SIM card (2FF). Most of the Motorola Band Class 14 LTE hand held devices use a Triple SIM card.

Motorola Band Class 13 devices do not use an LTE SIM card from Motorola. For Band Class 13 devices, the SIM card must be provided by the Band Class 13 network operator. Please reference the device pricing page for additional information.

Ordering Requirements

When ordering only one SIM card profile for a given SIM card (2FF or Triple SIM), please follow the steps below:

1. Contact [LTE Product Management](#) to identify which SIM profile option is required for the customer.
2. Select model T7770B, and specify the quantity of SIM cards required.
3. Enter the SIM profile option that was provided to you by Product Management.
 - Only one SIM profile option can be entered when ordering model T7770B
4. Specify the quantity for the selected SIM profile option
 - The quantity for the SIM profile option MUST equal the quantity that was entered for model T7770B (LTE SIM card). See example below:

Example:

Order Line 1: (Quantity 5) T7770B (LTE SIM Card)

Order Line 1a: (Quantity 5) VAxxxxxAB (LTE Profile Option)

For the above example, five (5) SIM cards will be programmed and shipped. The quantities are the same for both model (T7770B) and profile option (VAxxxxxAB).

When ordering multiple SIM profiles for multiple SIM cards (2FF and/or Triple SIM), please follow the steps below:

1. Contact [LTE Product Management](#) to identify which SIM profile option is required for the customer.
2. Select model T7770B, and specify the quantity of SIM cards required.
3. Enter the SIM profile option that was provided to you by Product Management.
 - Only one SIM profile option can be entered when ordering model T7770B

4. Specify the quantity for the selected SIM profile option
 - The quantity for the SIM profile option MUST equal the quantity that was entered for model T7770B (LTE SIM card).

5. For each additional SIM card and SIM profile, repeat steps #2, #3, and #4.
 - Each new SIM card and SIM profile MUST be entered as separate line items. See example below.

Example:

Order Line 1: (Quantity 4) T7770B (LTE SIM Card)

Order Line 1a: (Quantity 4) VAxxxxxAB (SIM Profile Option)

Order Line 2: (Quantity 15) T7770B (LTE SIM Card)

Order Line 2a: (Quantity 15) VAxxxxxAB(SIM Profile Option)

For the above example, four (4) SIM cards with SIM profile option VAxxxxxAB, and fifteen (15) SIM cards with SIM profile option VAxxxxxAB, will be programmed and shipped. The quantities are the same for both model and profile options.

LTE Site Preventive Maintenance Service

Ordering Information

General Information

The Motorola Site Preventive Maintenance Service provides scheduled inspection and correction of minor problems at LTE eNB sites to minimize the possibility of failure on an LTE network. The purpose of preventive maintenance service is to ensure that the LTE eNB base stations and their installation as well as the surrounding site continue to meet original manufacturer specifications and to confirm that all critical parts of the site are fully operational.

Preventive maintenance service will be performed approximately once per year for each site as part of the overall Operations and Maintenance program for an LTE network.

Motorola's technicians have access to engineering design teams and multiple technology experts. The technicians are equipped with detailed checklists.

The terms and conditions of this Statement of Work (SOW) are an integral part of Motorola's Service Terms and Conditions or other applicable agreement to which it is attached and made a part thereof by this reference.

Features

- Trained Technical Experts on-site
- Preventive Maintenance Check List
- Access to local Motorola servicer
- Provides interface to Motorola

Statement of Work

One of the primary business objectives of the North American Group (NAG) is to promote the sales of STANDARD service products. Standards help to ensure consistent and profitable delivery of our service products to our customers. To that end, the customer Statement of Work for this Standard Service Product **CANNOT** be modified. All requests for modifications to STANDARD service products or the development of "custom" service products should be routed through the Solutions Planning process. Your first point of contact for these requests is your local Area Service Manager.

Definitions

Capitalized terms used in this Statement of Work and not otherwise defined within the Statement of Work or Communications System Agreement have the following meanings: [Click here](#)

LTE Technical Support Service

Ordering Information

General Information

Technical Support service provides continuous centralized remote telephone support for technical issues that require a high level of LTE communications system expertise for troubleshooting on LTE equipment. Once a trouble call or a monitoring event is received, Motorola begins diagnosis of the event by interrogating the LTE system, running appropriate diagnostics, characterizing the problem, and remotely restoring the affected device or subsystem. If a remote fix is not possible, a field technician will be dispatched to the site. The field technician contacts Technical Support to obtain the current status, available diagnostic results, and the assessment of the failure. Motorola will engage internal and Vendor engineering resources, as required, to resolve the issue.

The terms and conditions of this Statement of Work (SOW) are an integral part of Motorola's Service Terms and Conditions or other applicable agreement to which it is attached and made a part thereof by this reference.

Features

- Remote Diagnostic & Troubleshooting
- Access to Motorola Technical Expertise
- Laboratory Simulation of System Issues
- 24 Hour/365 Day Service Availability

Statement of Work

Ordering and Contractual Documents

This product cannot be ordered directly through COF at this time. This product must be ordered using the Service Lifecycle Application. Please contact your local Customer Support Manager (CSM) if you are interested in ordering this product.

1. Technical Support can be supported and configured **only** on a complete system basis. Please include all sites when quoting a system for Technical Support. Technical Support cannot be ordered on standalone components or selected sites. Options for this product are based on the component parts of the complete system. Pricing is based on the size and complexity of the customer's system configuration such as the type of system, number of sites and number of base stations. **To ensure accurate pricing, orders will not be processed or accepted if they do not include all system components.**
2. Enter the main line item as quantity one.
3. Options are required as sub-items, with the quantity equal to the option description.
4. All dollar amounts reflect an annual one year pricing.
5. A Customer Support Plan must be created to provide detailed information to the customer regarding delivery of this service.

LXN 6000 LTE Deployable Infrastructure

Ordering Information

Features

The LTE Deployable provides a scalable solution that quickly delivers LTE connectivity where and when you need it.

- **Supports Mission Critical Operations:** Provides access to fast mobile broadband connectivity with real-time access to voice, video, data and chat.
- **Fast Deployment:** Set up and go live in less than one hour.
- **Standards-Based Technology:** Ensure operability with equipment from multiple vendors.
- **Scalability and Expandability:** Operate standalone or connect to another network.
- **Superior RF Coverage:** High performance LTE devices and macro base stations provide significantly greater coverage.
- **Centralized Operations and Management:** A comprehensive and centralized network configuration, subscriber provisioning, network performance & monitoring and provisioning solution, along with local alarm monitoring capability.
- **High Availability:** The high reliability of the Evolved Packet Core and base station together contributes to greater than 98% availability.

For complete product information, please see the Deployable spec document: <http://compass.mot-solutions.com/doc/514185246/lte-deployable-infrastructure-solutions-data-sheet.pdf>

General Information

When disaster occurs, either man-made or natural, the existing commercial carrier infrastructure can quickly become overloaded, damaged or completely destroyed. It is in times like this when public safety and government agencies, and various federal civilian and commercial operations, rely on their networks the most. These networks need to be restored quickly and or augmented so that first responders and other personnel can proceed with intelligence and get the job done quicker, safer, and smarter.

In order to augment an overloaded, damaged or destroyed network, Motorola Solutions offers a robust deployable infrastructure platform capable of being deployed in various form factors, to quickly and easily create an ad hoc standalone network, or used to add capacity and coverage of an existing network to a disaster zone, incident area or special event.

Ordering Requirements

The deployable system consists of Deployable Server Hardware Kits, and a Software Kit, which is installed on the hardware kits. These two items are mandatory when ordering the LTE Deployable system.

For a new/greenfield set-up, order the supermodel SQM01SUM0297A. This includes:

(Qty 1) Deployable Server Hardware Kits

(Qty 1) Deployable Software Kit

In addition, please select the following mandatory items:

- Deployable Software Licenses
 - Please see the table below for LTE Deployable Software Tiers and select the appropriate license tier that is required.
- LTE Deployable EMS - Per eNB Licenses
 - Please select the correct number of EMS licenses based on the number of eNBs that are being connected to the deployable system.

Please also order a switch if there are multiple eNBs that will be connected to the Deployable system. The product offering may be found under PS LTE "Networking & Transport" in eCAT.

* **Please note:** Power is not included.

**Average lead time, from point of order placement, is 6 weeks (this does not include eNodeB).

Configuration

Models

* **Please Note:** Applications are not included in this pricing and will be priced separately.

Essential Service For Broadband Infrastructure**Ordering Information**

Executive Summary

The Essential Service for Broadband Infrastructure is a new Services Package offer for the LTE Infrastructure products, including: RAN, Core, OSS, transport, and Priority Manager products plus additional infrastructure items such as IMS/VoLTE, SIM card management, etc. The package includes Hardware Maintenance, Remote Technical Support, and Software Maintenance Agreement (SMA) services. It is available as of July 1, 2017 in the Americas and Asia/Pacific regions.

Additional Documentation

Additional information on the Essential Service for Broadband Infrastructure Service Offer may be found at www.motorolasolutions.com/sales <select Services and then Infrastructure>. Included at this site are presentations and other materials to assist you in the learning and selling processes.

Service Offer Description

The Services Package offer for the LTE Infrastructure products, including: RAN, Core, OSS, transport, and Priority Manager products plus additional infrastructure items such as IMS/VoLTE, SIM card management, etc. The package includes Hardware Maintenance, Remote Technical Support, and Software Maintenance Agreement (SMA) services.

Hardware Maintenance support includes on-site repair and/or repair and replacement services depending on the network element type. There is no Advanced Exchange service in the current package.

Remote Technical Support includes Motorola Service Desk, SSC, and Level 3 Engineering Support from the CSE Organization. Where applicable, support is also provided by our 3rd Party Vendors Technical Support Organization. It is important to have remote connectivity to the SSC for effective and efficient troubleshooting. CSMs should notify the on-boarding team shortly after the customer support agreement is complete and request delivery of the Juniper 250 router. CSMs should also make sure that customers account for preparation of an Internet Service Provider (ISP) and MVPN in preparation for service delivery. In the instance where remote connectivity is not permitted, customers should purchase a dispatch service. This services provides Motorola services to dispatch a Motorola technician to address diagnostic and recovery activities.

Software Maintenance Agreement (SMA) provides Software Updates (Patches) and Upgrades (Major Releases) for the Motorola sold Infrastructure. Labor is not included and must be quoted separately. LTE Updates and Upgrades are released per Motorola's

roadmap at our discretion.

Currently there is no formal SwSP for Broadband Infrastructure; however, the following guidelines apply and are expected to be adopted:

LTE RAN/Core	Standard Support	Y+18 months
	Extended Support	Y+24 months
Motorola Products	Standard Support	Y+12 months
(ex OSP, Priority Mngr)	Extended Support	Y+18 months

Note that Broadband Infrastructure SMA DOES NOT include Self Installed security patches as with Astro. Security updates are evaluated by engineering on a quarterly basis and included in SW Updates per Motorola's roadmap. The package also does not currently include MyView Essential. MyView will be provided upon service availability.

Refer to the North America Managed and Support Services website for the Package SOW. <https://sites.google.com/a/motorolasolutions.com/lifecycle-support-services/> (under Infrastructure Services > Support Packages > Broadband Infrastructure) for further details.

Configuration

Service Offer Part Numbers

The following part numbers reflect the primary Essential Service for Broadband Infrastructure package offers. LTE Essential requires item 1 (SMA) and either Item 2 or 3. Items 3a/3b/3c are options when no remote connectivity is available. CSMs should include an on-site service unless the customer has strong and proven LTE technical support services. Item 4 is required for all OnSite options.

Note that the LTE Services Configurator is managed by the Vipul Shah presale Capture Management team. All request for services quotes shall be initiated into this team based on your regional representatives.

Due to the nature of our 3rd Party Vendor costs - LTE Essential services support agreements must be for a minimum of 1 year and customer P.O.s must be non-cancellable.

ORDERING REQUIREMENTS

MODEL

LXN 7100 LTE ENTRY LEVEL FIXED CORE INFRASTRUCTURE

GENERAL INFORMATION

Motorola Solutions LXN 7100 LTE Entry Level Fixed Core is a framework for virtualizing the functions required to converge voice and data on 4G Long-Term Evolution (LTE) networks. vEPC moves the core network's individual components that traditionally run on dedicated hardware to software that operates on low-cost commercial off-the-shelf (COTS) servers. What differentiates vEPC from the evolution of EPC itself is the decoupling of software from hardware. vEPC breaks apart from the purpose built solutions of the past. Motorola Solutions LXN 7100 LTE Entry Level Fixed Core started from a clean slate instead of simply transforming and augmenting the functionality of legacy purpose built software as the mobile network evolved from 3G to 4G. The design and implementation is a solution that naturally fits into the decoupled architecture envisioned in the NFV model expected of modern solutions. By virtualizing evolved packet core (EPC) functionality, Motorola Solutions can customize networks to meet the unique requirements of individual customers, mixing and matching individual network components as needed. vEPC can also lower Capex and Opex by reducing reliance on specialized hardware, while speeding service delivery and allowing for on-demand scalability and responding to real-time network conditions and user needs. The virtual EPC abstracts and decomposes the various EPC functions and allows them to run in unique combinations on standard COTS servers.

FEATURES

The LTE Entry Level Fixed Core Infrastructure provides a scalable solution that is well suited for an entry level core infrastructure complete with features and competitive in the market.

- **Standards-Based Technology:** Ensure operability with equipment from multiple vendors.
- **Scalability and Expandability:** Starts small and can be expanded as needed based on customer demands.
- **Superior RF Coverage:** High performance LTE devices and macro base stations provide significantly greater coverage.
- **Centralized Operations and Management:** A comprehensive and centralized network configuration, subscriber provisioning, network performance & monitoring and provisioning solution, along with local alarm monitoring capability.
- **High Availability:** Provides local or geo redundancy for unplanned outages. The high reliability of the Evolved Packet Core and base station together contributes to greater

than 98% availability.

- Centralized syslog message collection within LXN 7100 and from remote instances (eNodeBs and other RAN transport equipment)
- Forwarding syslog messages to an optional external customer-provided syslog server
- Maximum of 2000 users/subscribers supported.
- Throughput supported is upto 500 Mbps.
- LXN 7100 supports upto 50 eNodeBs at the maximum.
- Supports Mission Critical Operations: Provides access to fast mobile broadband connectivity with real-time access to voice, video, data and chat.
- Support for roaming and MVNO architecture.

LXN 7100 HARDWARE

The LXN 7100 Hardware servers are the most flexible, reliable, and performance-optimized rack servers providing industry-leading compute innovations. The LXN 7100 server comes with flexible choices and versatile design, along with improved energy efficiencies, ultimately lowering your TCO. Integrated with a simplified, but comprehensive management suite and industry-leading support, the LXN 7100 server delivers a more reliable, fast, and secure infrastructure solution, helps increase productivity, and accelerate service delivery. In addition, the LXN 7100 server hardware is performance-optimized for multi-application workloads to significantly increase the speed of operations and enable customers to respond to business needs of any size, faster.

LXN 7100 hardware specifications:

- CPU Two – 2.5GHz/12-core/30MB/120W
- Main Memory 128GB
- Storage 1TB SSD
- Networking 4 x 1 GbE embedded
- Power and Cooling Hot Plug Power, High Performance Fans
- Dimensions 1.7" (4.32cm) Height x 17.11" (43.47cm)
- Width x 27.5" (69.85cm) Length
- Weight 27 lbs (12.25 kg)
- Form Factor 1U
- Throughput 500 Mbps

For complete product information, please see the spec document: xxxxxxxx

ORDERING REQUIREMENTS

The LXN 7100 LTE Entry Level Fixed Core Infrastructure system consists of Server Hardware Kits, and a Software Kit, which is installed on the hardware kits, software license and the high availability options. These three items are mandatory when ordering the LTE Deployable system.

For a new/greenfield set-up, order the supermodel SQM01SUM0325A.

This includes:

(Qty 2) Server Hardware Kits

(Qty 1) Software Kit

In addition, please select the following mandatory items:

- High Availability Options: Local or Geo Redundant
- Software Licenses Tiers
 - Please see the table below for LTE Software Tiers and select the appropriate license tier that is required.
- LTE EMS - Per eNB Licenses
 - Please select the correct number of EMS licenses based on the number of eNBs that are being connected to the system.

* Please note: Power is not included.

**Average lead time, from point of order placement, is 8 weeks (this does not include eNodeB).

LTE On-Site Infrastructure Response Limited and Dispatch Service

Ordering Information

General Information

Motorola On-Site Infrastructure Response Limited provides local, trained and qualified technicians who arrive at your location to diagnose and restore a customer's communications network. All they have to do is make one phone call and their system response and restoration process begins immediately. Following proven response and restore processes, Motorola Dispatch (requires Dispatch Service) contacts the local authorized service center in their area and dispatches a qualified technician to their site. An automated escalation process ensures that technician site arrival and system restoration comply with contracted response times. The field technician will restore the system by performing first level trouble-shooting on-site. If the local technician is unable to resolve the problem, the escalation process includes intervention by Motorola System Support Center technologists or product engineering teams as needed (requires Technical Support service).

Features

- Motorola Technical Expertise
- On-Site Motorola Authorized Servicer
- Preventive maintenance check
- 8 x 5 business days per week
- Regular business hours service availability

Statement of Work

One of the primary business objectives of the North American Group (NAG) is to promote the sales of STANDARD service products. Standards help to ensure consistent and profitable delivery of our service products to our customers. To that end, the customer Statement of Work for this Standard Service Product **CANNOT** be modified. All requests for modifications to STANDARD service products or the development of "custom" service products should be routed through the Solutions Planning process. Your first point of contact for these requests is your local Area Service Manager.

Definitions

Capitalized terms used in this Statement of Work and not otherwise defined within the Statement of Work or Communications System Agreement have the following meanings: [Click here](#)

[On-Site Limited and Dispatch Service SOW](#)

Ordering Requirements

1. This product cannot be ordered directly through COF at this time. Please contact your local Area Service Manager (ASM) or Customer Support Manager (CSM) if you are interested in ordering this product.
2. Options for this product are based on the component parts of the complete system. Pricing is based on the size and complexity of the customer's system configuration such as the type of system, number of sites and number of base stations. **To ensure accurate pricing, orders will not be processed or accepted if they do not include all system components.**
3. Enter the main line item as quantity one.
4. Options are required as sub-items, with the quantity equal to the option description.
5. All dollar amounts reflect an annual one year pricing.
6. You may purchase Network Monitoring Service along with OnSite Infrastructure Response. however, you **MUST** purchase Dispatch Service when you purchase OnSite Infrastructure Response.
7. A Customer Support Plan must be created to provide detailed information to the customer regarding delivery of this service.

Public Safety LTE

Rekeying Utility 'RKU'

Ordering Information

Features

UICC Personalization for High Security Conscious Customers:

The Rekeying Utility (RKU) gives Public Safety Broadband customers sole control over SIM card programming. The RKU was created as a way for customers to personalize and manage universal subscriber identity module (USIM) cards for mobile network users. Specifically, the RKU allows customers to create USIM card electronic profiles for a wireless network and its users, edit those profiles or retire them when they are no longer active, and personalize USIM cards to a particular owner. The LTE SIM cards used for RKU are preloaded with a generic profile that is personalized by the customer. Please contact the Product Manager if the RKU customer requires a new generic profile (requires SW update, Test, and new LTE SIM cards with the new profile).

Features and Specifications:

The RKU has three types of users: Operators; Administrators; Super Administrators. The three roles, in the order presented, grant increasing access to RKU functionality. Each user's basic responsibilities, permissions, and relevant end user documentation are presented below.

The RKU Client

The RKU Client is where Operators take generic USIM cards purchased from a vendor and personalize them for distribution to mobile network users.

The RKU Web Interface

The RKU Web Interface is where high-level users manage RKU data behind the scenes. The Web Interface is a browser-based extension to the RKU that allows administrative users to manage RKU data and to generate reports and queries. The tasks a user can perform depend on whether he or she is a Super Administrator, Administrator, or Operator.

Components in the RKU Solution

The RKU can be divided into frontend or backend components depending on where they are physically located. The client-server structure of the RKU means that one backend system is capable of supporting multiple frontends. The backend consists of the following components: a Database; a SafeNet Hardware Security Module (HSM); and a RKU Server. The backend

is located in a secure environment and is connected to the frontend.

For the personalization process, the RKU Server retrieves and stores all the information requested by the RKU Client from both the Database and the SafeNet HSM. Once the personalization job is completed, the RKU Server generates the necessary output files for provisioning of the cards. The frontend consists of the following components: one or more RKU Clients used to personalize cards; the Fargo HDP5000 Card Printer with an internal card encoder for personalizing the digital information of a card, and an optional graphical personalization tool for displaying visuals on the card body.

Communication Methods:

Users can configure each customer profile to send output files in one of three methods: email; manual; Google Drive ®. The method used determines how the RKU Client prompts a user following a successful USIM card personalization job.

Hardware Security Modules

High security conscious customers using the RKU, will use the hardware security modules to generate random keys for provisioning encryption, decryption. authentication to protect transactions, identities, and applications because the HSM excels at securing cryptographic keys and provisioning encryption, decryption, authentication, and digital signing services for a wide range of application. The HSM is a dedicated system that physically and logically secures cryptographic keys and cryptographic processing. As a standalone network-attached application, it is a crucial element in protecting digitized information.

As purpose built appliances, the HSM automatically include the hardware and firmware (i.e. software) necessary for these functions in an integrated package. Physical and logical protection of the appliance is supported by a tamper resistant/evident shell; and protection from logical threats, supported by integrated firewall and intrusion prevention defenses.

In the RKU solution, and HSM is used to perform the following:

- [P] Key generation
- [P] Key derivation
- [P] Encryption of data
- [P] Signature generation
- [P] Secure storage of the Master Personalization Key
- [P] Secure storage of customer's OP value

As part of the personalization process, the HSM generates all the keys, PINs, PUKs, and authentication parameters for personalization of USIM cards. In addition, the HSM secures the data requested by the RKU Client via an encryption and authentication key so that at no point is sensitive data exposed during the personalization process.

The SafeNet Luna SA 1700 (Ethernet-attached Hardware Security Module (FIPS L3)) is recommended for use with the RKU. For information on its functionalities and specifications, visit <https://safenet.gemalto.com/data-encryption/hardware-security-modules-hsms>.

Printer/Encoder

The card printer is the component where the electrical and graphical personalization is performed. The RKU Client, after receiving and processing all the necessary data from the RKU Server, connects to the card printer for personalization of a card.

[P] The printer supports a single or dual hopper to accommodate different card form factors.

[P] The printer supports a single or dual output stacker.

[P] A card reader is supported for personalization with encoding without printing.

The Fargo HDP5000 High Definition Printer/Encoder is recommended for use with the RKU Client. For information on its functionalities and specifications, refer to the manufacturer documentation included with the RKU installation package or visit <https://www.hidglobal.com/products/card-printers/fargo/hdp5000>.

General Information

RKU Client describes the core functionality of the RKU - personalizing USIM Cards for use by customers. There are specific operating requirements required for the RKU solution. To get your computer ready to install and run the RKU, the following hardware and software is recommended for each component of the RKU:

Component	Manufacturer	Model	Description
Card Printer	HID	Fargo HDP5000	Card printer and encoder with 64-bit OS support
HSM	SafeNet	SAFENET Luna 1700	Ethernet-attached Hardware Security Module (FIPS L3)
Database	MariaDB	MariaDB	Standard 64-bit database
RKU Server	Microsoft	Windows Server 2012 R2	
RKU Client	Microsoft	Windows 7, 8, 8.1, or 10	
Web Browsers	Microsoft, Mozilla, or Google	Internet Explorer	
	Mozilla	Firefox	
	Google	Chrome	
Software Framework	Microsoft	.Net Framework 3.5	
Barcode Scanner	INATEK	BCST-20	

Ordering Information

Order the supermodel **SQM01SUM0306A** for Software and Capacity licenses.

Select the Rekeying Utility Application license (T8415A), and then select the application license (UA00531AA). See below:

- 1 - T8415A - REKEYING UTILITY (RKU) APPLICATION
- 1 - UA00531AA - RKU APPLICATION LICENSE

Next, order the SIM Capacity license (T8417A), and then select the number of subscriber SIM Cards to be provisioned according to the selected capacity license. Minimum quantity is 1. Price reductions are reflected after 50,000 SIM capacity licenses are purchased. Contact PdM for quantities beyond 100,000 per customer account.

- 1 - T8417 - RKU SIM CAPACITY LICENSE & OPTIONS
- PER - UA00529AA - SIM CAPACITY LICENSE 1-49,999
- PER - UA00530AA - SIM CAPACITY LICENSE 50,000-100,000

Then, order the below Hardware components:

- 1 - DDN2277A - SAFENET LUNA SA 1700 LOCAL PED BNDL
- 1 - DDN2278A - SAFENET HSM MODULE POWER CABLE
- 1 - DDN2281A - HID FARGO HDP5000 BASE MODEL PRINTER/ENCODER, W/DUAL INPUT HOPPER
- 1 - DDN2280A - FARGO PRINTER CLEANING KIT
- 1 - DDN2295A - OMNIKEY 3121 SMART CARD READER (SCR) (OPTIONAL)

Then, based on the quantity of SIM cards required, order:

- 1 - DDN2320A - FARGO YMCKH FULL COLOR RIBBON (prints Quantity 500 of cards)
- 1 - DDN2305A - HID FARGO PRINTER RETRANSFER FILM (prints Quantity 1500 of cards)

* Please note that when ordering DDN2279 RKU PRINTER YMCKK RIBBON F/HDP500 and DDN2305 HID FARGO PRINTER RETRANSFER FILM, that user will need to calculate the quantity of ribbons required, based on SIM Capacity required for the customer.

Part Number and Description Prints per Ribbon	Approx. Number of
DDN2279 - SKU PRINTER YMCKK RIBBON F/HDP500	500
DDN2305 - HID FARGO PRINTER RETRANSFER FILM	1500

VML750 LTE
Vehicular Modem

Updates

Ordering Information

Product Information

Public Safety LTE B14, VzW 3G/4G, AT&T 3G/4G, Private LTE B20, WiFi Access Point supporting 32 users, WiFi Client mode, geo-fencing, GPS NMEA and TAIP, RJ45 LAN connectivity, micro USB, MVPN client, micro CRYPR support, external/roof mounted antennas.

General Information

The VML750 is a trunk-mounted modem operating at 13.8V DC power and connected to a low profile roof-mounted antenna. The VML750 supports Ethernet connectivity to end user devices such as laptop or MDT. Further, the VML750 supports the following modulation/spectrum schemes: 700Mhz LTE FDD D block, 5 or 10Mhz configurable in B14 (DL763-768/UL793-798 or DL758-768/UL788-798 respectively) at 200mW; 700Mhz LTE FDD C block, 10Mhz in B13 (DL746-747/UL777-787) at 200mW; 3GPP2 DO Rev A 800 & 1900Mhz, 802.11 b/g/n WLAN at 20mW. The VML750 is ruggedized (MIL SPEC 810G and IP66) with an operating temp of -30C to +60C. It contains internal GPS and supports two

physical SIM cards for Public Safety LTE B14 UICC/SIM and/or VzW/AT&T UICC/SIM.

LXN 505 LTE ULTRA PORTABLE

Lightweight, Miniaturized and Full-power Broadband Network

Ordering Information

General Information

DELIVER REAL-TIME BROADBAND INFORMATION ANYWHERE, ANYTIME.

Your operations demand continuous high-speed broadband coverage, yet traditional cell sites can't always reach everywhere you need to be. Weighing only 12 pounds and with activation timeframes of less than five minutes from power on, LXN 505 LTE Ultra Portable Infrastructure is our smallest, lightest and full power broadband network.

Covering a spectrum of use cases from backpack to in-vehicle to in-building and fixed sites, with LXN 505 you bring the network with you to quickly deliver the secure LTE coverage and capacity you need, anywhere, anytime. This current release only supports the LXN 505 as a vehicle kit. The backpack and in-building kits will be supported in the next release.

Please note that the lead time on LXN 505 is 120 days, can be shortened if the hardware vendor has parts in inventory. Please contact the Product Manager for more details.

Features

ALL-IN-ONE SYSTEM

Full power LTE system with eNB+EPC+APPs (optional)

APPLICATIONS HOSTING

Optional standalone capability hosts applications locally for situations where backhaul cannot be established.

COVERAGE AND CAPACITY

Create an LTE bubble up to 1km on demand and host up to 100 subscribers.

DESIGNED FOR HARSH ENVIRONMENTS

The IP65 ready, solid-state, fanless, ruggedized design withstands heat, cold, rain, humidity, dust and vibration.

FAST AND EASY SET-UP

Seconds can make all the difference. Power on and create an almost instant PS LTE network for you and your team. In service time is possible in less than 5 minutes from power on.

INFORMATION ACCESS

Coverage and capacity on demand delivers critical video and other rich media application information at the point of engagement.

MINIATURIZED AND PORTABLE

The miniaturized form factor is perfectly suited for bringing the network with you to establish LTE broadband connectivity anytime, anywhere.

VERSATILITY

Deploy a variety of form factors ranging from backpack, tactical case, vehicular or fixed. Let your imagination decide where and when you will use it.

Ordering Information and Requirements

The LXN 505 system consists of a single box, which includes Hardware Kits, a Software Kit and optional Applications.

For a new/greenfield set-up, order the band class (either Band 14 or 28B) and the EPC software license. In addition, you also need to order the accessories for LXN 505 from the table below. You may also optionally order the applications (WAVE 5000 and/or DragonForce).

Please refer to [flowchat](#) for ordering LXN 505, accessories and applications.

10 SIMs with Default Profile (PLMN 325 111) are included with every order for FREE.

For additional SIMs or specific SIM profile please contact Prasad Walawalkar at walawalkar@motorolasolutions.com +1 (847) 4526257

LXN 505 BAND OPTIONS

LXN 505 currently supports one band per unit and the band needs to be selected. The frequency per band is listed below:

BAND	BANDWIDTH	FREQUENCY RANGE
28 (FDD)	5, 10, 20	UL:703 - 748, DL:758 - 803

Configuration

**Please note that Year 1 Support for LXN 505 is included in the price of the hardware and software license. For subsequent years of support, please contact the Product Manager for a quote, which must be paid through iProcurement.

LXN 505 APPLICATION KITS

LXN 505 WAVE 5000 KIT

The LXN 505 includes two optional applications that can be embedded within the system.

WAVE 5000 SYSTEM

This is an optional application on LXN 505. If WAVE 5000 is required, then the models and options listed below need to be ordered, in addition to the "WAVE 5K Kit".

The number of talk groups and mobile clients needs to be selected, according to customer requirements. Annual Service (ARUS) must also be selected, which is listed below. Please note that the following must be entered in the customer email address section for receiving the WAVE 5K licenses: LXN505Wave5K@motorolasolutions.com

Description	Full Description	Nomenclature	APC	Price
NEW WAVE SYSTEM	-	TT3142	892	\$0.00
SOFTWARE,WAVE SERVER LICENSING	-	TT06266AA	892	\$9,995.00

ARUS - 1 YEAR - WAVE MOBILE COMMUNICATOR (ANDROID OR IOS)	-	TT06208AA	551	\$53.00

Windows 2012 licenses are required for Wave 5K installation. This is a mandatory item if you are ordering the Wave 5000 application on the LXN 505. Please order Quantity 2 per LXN 505. Please put the following ship to address for the windows license as this is required for staging:

Attn: Deepak Elandassery, Motorola Solutions Inc. , 500 West Monroe Street, 41st Floor, Chicago, IL 60661, USA.

Description	Full Description	Nomenclature	APC	Price
-------------	------------------	--------------	-----	-------

WIN SERVER 2012 R2 STD 2 CPU ** FOR LTE LXN 505 ONLY **	-	DS6FA002351PK	569	\$1,145.00
--	---	---------------	-----	------------

FOR EMEA: Please note that the EMEA region does not offer ARUS 1 Year and this option is blocked. Also please note that the WAVE5000 kit in question only provides a pre-installed copy of Windows Server 2012.

LXN 505 DRAGONFORCE APPLICATION KIT

DragonForce is a Team Collaboration application that provides:

- * Command and Control
- * Shared Situational Awareness
- * Incident Management

Key features include:

- * Real-time personnel tracking on maps
- * Collaborative whiteboards and situation reports (images, maps, floor plans and diagrams can be used as a collaborative whiteboards for mission planning and operations)
- * Instant messaging among individuals and groups
- * Online storage and sharing of frequently used files, maps and images
- * After-action reporting - every message, location report and file is logged

DragonForce can be used in many operations:

- * Day-to-day policing, security and campus safety and first responder operations
- * Specialized tactical and emergency response teams (SWAT, Hazmat, K-9, Bomb Squad, Disaster Response)
- * Special event and emergency management
- * Search and Rescue missions
- * Any operation requiring team tracking and coordination

DragonForce operates on the following devices:

- * Android
- * iPhone
- * iPad
- * Toughpad
- * Web browsers (Chrome, Firefox, Safari, IE)

Description	Full Description	Nomenclature	APC	Price
DRAGONFORCE USER LICENSES (QUANTITY 100)	-	DDN2858	569	\$15,000.00

** Please note that Year 1 support for the DragonForce application is included in the price of the license. For subsequent years of support, please contact the Product Manager for a quote, which must be paid through iProcurement.

MACH Alert Fire Station Alerting

Ordering Information

General Information

- The MACH Alert FSA system is A TOTAL SYSTEM SOLUTION capable of managing virtually any station alerting task from small systems consisting of a few fire stations with a single dispatch center, to complex FSA systems involving over one hundred stations and multiple control center sites connected via radio, Ethernet and/or wireless broadband networks.
- The MACH Alert Fire Station Automation and Alerting (FSAA) system serves as a cornerstone for the successful operation of the Fire and Rescue alerting process. This comprehensive alerting system will help manage resources with proven hardware and software, leading to a reduction in emergency response times, while reducing firefighter stress and automating turnout procedures.
- The system was designed for rapid response, integration with existing communication systems, redundancy, and the ability to gracefully migrate into new features, auxiliary station functions, and additional sites. It utilizes innovative technologies allowing installations to be tailored to your specific Fire and EMS needs.
- The MACH Alert FSAA system is based on the Motorola ACE3600 high-performance controller with integrated XTL2500 radio for data operation.
- Validated for operation on Motorola ASTRO 25 Integrated Voice and Data infrastructure.

For additional information, see the MACH Alert Wiki site at [MACH Alert Wiki](#)

Features

Reduce First Responder Stress:

- Ramped heart-saver Alert Tones
- Ramped bunkroom and egress LED Lighting
- LCD Incident display boards with count-down timer
- Incident-based color-coded LED lighting per zone

System Reliability

- NFPA 1221 Recommendations compliant
- Provides two CAD ports for inputs from two different CAD systems
- Alerts are sent over up to three communications links simultaneously
- Backup station alerting from dispatch positions if CAD should fail

Competitive features

- Text to Speech - CAD text output converted to Speech in the Fire Station
- Bunkroom Alerting - Alerts are directed to zones of speakers based on company/incident
- WEB Server with low cost client solution
- Zone switch in bunkroom for personnel to select type of alert sent to that bunkroom

Ordering Requirements

1. The MACH Alert solution is sourced from DCR Engineering.
DCR Engineering provides Motorola with the list of DCR equipment and services required to be ordered from DCR.
2. To initiate a proposal fill out the questionnaire located on the WIKI site at [MACH Alert Wiki](#)
Request a conference call with DCR and send the completed questionnaire engineering at fire-info@dcreng.com.
3. DCR personnel will work with Motorola to define the equipment list and will provide part numbers for DCR hardware/software, DCR extended warranty, DCR upgrade program, and Motorola ACE3600 hardware and DCR services.
DCR will assist Motorola in defining the additional hardware/software as needed.
4. Part numbers for the DCR hardware/software, DCR extended warranty, and DCR upgrade program are located on this price page.
Part numbers for the Motorola ACE3600 hardware are located on the ACE3600 price page.
DCR services are margined up by SI.
5. Note regarding DCR extended warranty pricing “ DCR can also provide

cost pricing to the service organization so that these items can be margined up by service.

- Review the documentation on the WIKI site for roles and responsibilities for DCR and Motorola as well as the SOW.

Model

MC Series DESKTOP CONTROLLERS

Ordering Information

General Information

The MC1000 can control a single radio providing, providing selection of up to four frequencies with Tone Remote Control. The unit requires no RSS for programming.

The MC2500 controls up to 4 radios, and includes a paging encoder, Stat-Alert™ signaling with the ability to patch and multi-select channels. All channels are capable of Tone Remote Control (16 frequency), one channel can be DC Controlled (4 frequencies). Programming the unit is via RSS.

Each unit ships complete with a power supply and manual. The MC1000 ships with a 110V, 60Hz unit and the MC2500 ships with an 110/220V, 50/60Hz unit.

Units can be connected in parallel, allowing multiple controllers to be connected to the same radio. Parallel units will see a busy indication when other controllers are active and an intercom facility between the units is provided. A maximum of 10 units can be connected in parallel when using DC or Tone Remote Control.

The MC2500 Unselect Speaker port is designed to support a passive speaker only.

Features

MC1000 Model (Non-Signaling)

Include:

- 4 Frequency Station Control
- 2 or 4 Wire

MC2500 Model (Multi-Channel)

Include:

- All basic model features plus:
- 4 Base Station Control
- 16 Frequency Station Control
- Stat-Alert™ Encode
 - PTT Unit ID
 - Voice Selective Call
 - Call Alert

- Radio Check
- Radio Enable/Disable
- Handset with Push-to-Talk
- Stat-Alert™ Decode
 - PTT Unit ID
 - Voice Selective Call
 - Call Alert
 - Emergency Alarm
 - Status Message
- Speaker
- Recent User Stack
- Unselect Speaker Connector
- Individual Channel Volume Control
- All Mute
- Dedicated per Channle Logging Recorder Output
- Radio Patch
- Multi-Select
- LOTL / LOBL
- RS232 Serial Printer Port
- Volume Control/Transmit LED
- Paging Encoder
 - QC II
 - 5/6 Tone
 - GE 99
 - Digital Dial
 - Reach 1+1
 - DTMF
 - Custom
- Black Color
- Alias for Pages (250 max.)
- Internal Mic (for use without handset)
- 2 Line X20 Character backlit Display
- Line Select
- Aux I/O's
- Monitor Switch
- 18 Programmable Buttons
- Operator Cross Mute
- Securenet Coded / Clear Operation
- Intercom
- 110 / 220 V AC - 50/60Hz Power Supply
- LTR Compatible
- 120V AC - 60Hz Power Supply
- Service Manual

Ordering Guide

For each Deskset order the appropriate model number form the list below.

DC Control

If the radio unit is capable of DC control then nothing other than the Deskset is required. If the radio unit is not capable then order the DC Remote Adapter (L3277) and the appropriate cable to connect this to the radio (DDN6338, DDN6699 or DDN6340). The installation team will need to provide the cable to connect the controller to the termination point for the bearer circuits.

Tone Remote Control

If the radio unit is cable of Tone Remote Control (TRC) then nothing other than the Deskset is required. If the radio unit is not then order the Tone Remote Adapter (L3276) and the appropriate cable to connect this to the

radio (DDN6338, DDN6699 or DDN6340). The installation team will need to provide the cable to connect the controller to the termination point for the bearer circuits.

Accessories

If headset operation is required then order the Audio Accessory Jack Box (DDN6516). This connects to the audio port on the back of the unit and provides a standard 2-prong headset connection.

A rackmount shelf (DDN6335) is available to mount Junction Boxes and Remote Adapters. Each shelf supports two units.

A copy of the Radio Service Software (RVN4178), available from AAD, is required to program the MC2500 and there is a choice of two cables for connection to the PC (DDN6124 and DDN6367).

Documentation

The following hard copy manuals and Quick Connect Guides are available from AAD:

- 6880309L14 MC2500 Multi-channel Deskset Operator and Installation manual
- 6880309K75 MC1000 Tone Control Deskset Operator and Installation manual
- 6880802B90 Tone Remote Adapter Manual
- 6880802B95 DC Remote Adapter Manual

Model

MCC 5500 DISPATCH CONSOLE

Ordering Information

General Information

Motorola Solutions MCC 5500 Dispatch Console is a full-featured conventional radio system dispatch console designed to handle dispatch requirements for small to medium sized communication centers. It is a PC-based console that seamlessly integrates radio, paging, and telephony allowing dispatch operators to effectively manage and communicate more effectively with field personnel over numerous channels in a wide area system.

The MCC 5500 is a digital, modular radio dispatch console with an easy-to-use graphical user interface (GUI) running under Microsoft Windows 7 Pro SP1 (32 or 64-bit), Windows 8/8.1 Pro (64-bit) Windows 10 Pro (64-Bit), or Windows 10 Enterprise IoT LTSC 2015/2016 (64-Bit) operating system. Each console system can support up to 36 dispatch operator positions and 128 resources (radio channels and analog telephone lines). The maximum number of telephone lines supported is 72 (2 per CES shelf).

The MCC 5500 Dispatch Console allows users to:

- Control conventional, digital, and mobile radio channels
- Receive and make calls on regular telephone lines
- Use the Call Director to route telephone calls to a headset
- Send pages, either through an internal paging encoder or optional external encoder
- Operate a voter/comparator system by receiving comparator audio and by providing status and control to each receiver
- Decode and dispatch Push-To-Talk (PTT) identifications with Stat-Alert (MDC-1200),

ASTRO, GE-STAR, DTMF, and iDEN signaling systems.

SUPPORTED CONVENTIONAL RADIO SYSTEMS:

- Stat-Alert (MDC-1200)
- Securenet (code/clear only)
- GE-STAR
- ASTRO 25 Conventional (P25 Compliant - digital)

The MCC 5500 Dispatch Console supports a variety of trunked radio systems as a wireless console using mobile radios as control stations. In most cases, MCC 5500 dispatch operators can access the full set of features supported on the mobile radio unit, but with the mobile radio located where needed for proper RF coverage.

SUPPORTED WIRELESS CONSOLE INTERFACE:

- SMARTNET
- SmartZone
- SmartZone Omnilink
- ASTRO 25 Trunking
- PassPort/LTR Trunking
- iDEN

Functionality as a wireless console is dependent upon the method of interface and radio. The main choices of a wireless console interface are:

- TRC - provides limited functionality within the system
- Serial Link - ASTRO radio only (ASTRO Consolette W7 model and APX 7500 Consolette) - provides PTT ID, Emergency Call.
- NOTE: The APX 7500 Consolette provides additional features beyond PTT ID and Emergency Call. Refer to MCC 5500 Dispatch Console Product Planner for more details.
- SB9600 - provides full control of the radio.

CONSOLE ADD-ON OPTIONS:

The MCC 5500 dispatch console can integrate with other control room operations such as:

- Instant Recall Recorder (IRR)
- VESTA Pallas E-9-1-1
- MOSCAD Fire Station Alerting (FSA)

MCC 5500 DISPATCH CONSOLE KEY COMPONENTS:

1. **Dispatch Operator Position** - PC, Dispatch Application Program, Console Audio Box (CAB), Operator Accessories
2. **Backroom Electronics** - Console Electronic Shelf (CES), Console Processor (COP), Digital Audio Processor (DAP II) Modules, I/O Shelf.
3. **System Management Software** Console System Database Manager (CSDM) program and Alias Database Manager (ADM) program

Dispatch Operator Position - The MCC 5500 dispatch operator position is the interface between the dispatcher and the console system. Each operator position consists of PC, dispatch application program, CAB, and operator accessories. The operation is controlled via a mouse and/or touch screen monitor. It provides a means for a dispatcher to communicate to field units and telephone caller. It also allows dispatchers to control and monitor multiple channels of radio activity, patch various channels together, and send pages. Each operator

position is connected to a CAB and CES.

Workstation - The MCC 5500 dispatch operator positions are Windows 7 and/or Windows 10-certified workstations. Each workstation connects to a CAB. The workstations do not come with monitors; these must be ordered separately.

NOTE: Motorola will no longer be shipping NEW workstations with Vista OS (TT2289) or Win 7 OS (TT2833) for the MCC 5500 Dispatch Console (Operator Position and CSDM). New workstations (TT3225) ordered for the MCC 5500 Dispatch Console (Operator Position and CSDM) will ship with Windows 10 Enterprise IoT LTSB 2016 (64-Bit) OS.

Dispatch Application Program - features an intuitive, easy-to-use Graphical User Interface (GUI) that runs under Microsoft Windows 7 Pro SP1 (32 or 64-bit) or Windows 8/8.1 Pro (64-bit) or Windows 10 Pro (64-bit) or Windows 10 Enterprise IoT LTSB 2015/2016 (64-Bit) operating system utilizing the industry standard PC platform. The GUI is extremely flexible and can be tailored to any given operation and can be configured on a per operator basis.

CAB - provides the interface between the MCC 5500 dispatcher PC and CES. It is the connection point for the operator accessories. There is one CAB per console position. The CAB uses an external power supply (similar to the power supplies used with laptop computers) which must be connected to an AC power source. Power is provided by a single 120/240Vac, 50/60Hz external power supply. The CAB connects to the CES using either a 50' or 100' cable. However, there are many cases when other lengths are more suitable, in these instances the project team would obtain a cable independently. The maximum cable length supported is 4000'. For cable specification please consult the [MCC 5500 Product Planner](#).

Operator Accessories - Operator accessories are sold separately from CAB.

- **Desktop Speakers (required)** - at least 2 external speakers at each OP (select and unselect), up to 6 monitor speakers can be connected to each CAB.
- **Microphones (at least one is required)** - MCC Series Desktop Gooseneck Microphone w/PTT at the base or Standard Gooseneck Microphone.
- **Headset Jack Box (optional)** - supports up to 2, required for headset operation.
- **Headsets (optional)** - requires headset jack box.
- **Dual-Pedal Foot Switch (optional)**
- **Instant Recall Recorder (IRR) (optional)**

Backroom Electronics - consists of one or more CESs with interface cards. Each CES shelf contains a COP, up to three DAP II modules, power supply, optional: dual telephone interface (2 CO) and connection to two I/O shelves.

CES Shelf - consists of console processor (COP) module to manage communications and digital audio processor (DAP) modules to interface external analog circuits. The module facilitate communications between console operators, radio channels, voice recorders, and any other external device connected to the console.

COP Module - it executes the main operating system including the call processing software.

DAP II Module - is designed to interface with radio channels. Each DAP II module is capable of supporting up to four channels if it is equipped with the licensing iButtons required to enable all the channels. By default the DAP II module contains NO iButtons and supports two conventional analog channels. A DAP II module can be equipped to support any combination of two models:

- Four Analog channels
- Four Mobile (SB9600) channels

- Four Digital channels
- Four iDEN channels
- Two Analog and two Mobile (SB9600) channels
- Two Analog and two Digital channels
- Two Digital and two Mobile (SB9600) channels
- Two Analog and two iDEN channels
- Two Digital and two iDEN channels
- Two Mobile (SB9600) and two iDEN channels

I/O Shelf - can be used for voting comparators, remote operation of doors, alarms, Main/Standby operation and visual indicators from the console control at the MCC 5500 operator position. Each MCC 5500 dispatch console supports up to two fully configured I/O shelves with four I/O module cards each, for a total of 48 relay contacts and 96 opto-coupled inputs. Each CES has two I/O connectors, each of these connectors can support one I/O shelf with up to four modules in it. The basic shelf includes the processor card and the first I/O module. Three additional modules can be ordered as options to the I/O shelf. The I/O shelf is rack-mountable.

System Management Software - consists of the Console System Database Manager (CSDM) and Alias Database Manager (ADM).

CSDM - a powerful configuration and maintenance tool for the MCC 5500 dispatch console and is a requirement for every customer site. The CSDM is used to configure an MCC 5500 dispatch console system, to access the customer configuration database, to upgrade software, to monitor the system, and to troubleshoot console problems. The CSDM is located on a dedicated PC that runs Windows 7 Pro SP1 (32 or 64-bit), Windows 8/8.1 Pro (64-bit), Windows 10 Pro (64-Bit) or Windows 10 Enterprise IoT LTSC 2015/2016 (64-Bit) operating system. The CSDM terminal is located in the backroom.

ADM - is a program for managing centralized server-based access to Caller ID aliases. The ADM provides simple aliasing of radio unit IDs, status members, and message numbers. This is an optional component and not required in all architectures. The ADM program can be installed on a MCC 5000 operator position or on a separate customer provided PC Server that runs Window Server 2008 R2 Standard (64bit) operating system or Windows Server 2012 R2 (64-Bit). A network is required to operate ADM using standard networking techniques.

Features

The MCC 5500 dispatch console provides a comprehensive feature set as listed below.

SIGNALING: MDC, ASTRO CAI, and iDEN signaling are supported with the following capabilities:

MDC

- | | |
|---|---|
| <ul style="list-style-type: none"> • OUTBOUND MESSAGES <ul style="list-style-type: none"> • Call Alert • PTT ID • Radio Check • Radio Disable • Radio Enable • Radio Status Request • Remote Monitor | <ul style="list-style-type: none"> • INBOUND MESSAGES <ul style="list-style-type: none"> • Call Alert • Emergency Alarms • Emergency Call • PTT ID • Radio Message • Radio Status |
|---|---|

ASTRO

OUTBOUND MESSAGES

- Call Alert
- PTT ID
- Radio Check
- Radio Inhibit
- Radio Status Request
- Radio Uninhibited
- Remote Monitor

INBOUND MESSAGES

- Call Alert
- Emergency Alarms
- Emergency Call
- PTT ID
- Radio Message
- Radio Status
- Status Query Response

iDEN

- OUTBOUND MESSAGES
 - Call Alert Encode
 - Emergency Call Encode
 - Group Call
 - Private Call
 - Outbound PTT ID

- INBOUND MESSAGES
 - Call Alert Decode
 - Emergency Call Decode
 - Inbound PTT ID
 - Private Call

PAGING: Both manual and pre-programmed pages are supported with the capability of sequential checklist paging. Pre-programmed lists can be created to provide Group Paging and any pre-programmed page (single or group) can be assigned to a paging button that can be placed on the GUI. The paging formats listed below are available:

- 5/6 Tone
- 256 custom Quik-Call II Formats (Customize, Tone, Duration, Inter-Tone Gap)
- Customer Formats
- Digital Dial 1500 Hz
- Digital Dial 2805 Hz
- Quik-Call
- Quik-Call II Tone and Voice
- Quik-Call II Tone Only
- Quik-Call II Battery Saver
- Single Tone
- Touch Code (DTMF)
- Knox

PATCHING and MULTISELECT: Each operator position can support up to 11 patches and 11 multiselects, each one supporting 16 members, a resource cannot be a member of more than one active patch or multiselect.

CHANNEL CONFIGURATIONS: MCC 5500 shall support the following Channel configurations with 4 wire, 600 audio connection. All channels support analog operation with MDC signaling if configured.

Type	# TX	# TX Frequency	# RX	#RX Frequency	NOTES
R1	0	0	1	1	Receive Only
T1R1	1	1	1	1	
T2R2	1	2	1	2	2 Frequency Station

T4R4	1	4	1	4	4 Frequency Station
T8R8	1	8	1	8	8 Frequency Station
T12R12	1	12	1	12	12 Frequency Station
T14R14	1	14	1	14	14 Frequency Station
T16R16	1	16	1	16	16 Frequency Station
T22R	1	2	2	1 per RX	
T44R	1	4	4	1 per RX	Requires 8 wires minimum

In addition there will be the ability to support 6-wire T22R and 10-wire T44R configurations.

iDEN signaling was introduced in MCC 5500 Release 2.5. The MCC 5500 Console can connect to a public iDEN network via a connection to an iDEN control station (i325 or i365IS radio) via direct connect cables. Please see the Product Planner and Ordering Requirements below for more details.

BASE STATION KEYING: TRC, relay, DC (hardware option) ASTRO and Digital (SB9600) keying of channels are available. For TRC, Guard Tone levels and frequencies are configurable. For DC the current for each function is configurable, as is the type of control - pulsed or latched current.

TELEPHONY: MCC 5500 supports connection to external analog, loop-start POTS lines with Caller-ID. Also available are Flash Hook, Hold, and assisted transfer between Operator positions.

GENERAL: Channel Marker and three different Alert tones are available. There is the ability to have a configurable Talk-Extend time after the Alert Tone has been sent. If the channel that the Channel Marker or Alert Tones are being sent out on is part of an active patch, all channels within the patch will transmit the Channel Marker or Alert Tone.

For Radio resources parallel status will be maintained among the Operator positions for frequency, PL, repeater ON/OFF, Repeat-Through-Console, Wild Cards I/II, and common I/Os. Main/Standby (2w and 4w) via relays is supported, as is Main/Alternate.

MCC 5500 RELEASE 2.7.3 FEATURES / ENHANCEMENTS

- Now certified for use with APX8500 Mid Power Control Station, Remote mount 05 Control Head
- Console Op and CSDM certified on Microsoft Windows 10 Professional (64-Bit)
- Console Op and CSDM certified on Microsoft Windows 10 Enterprise IoT LTSB 2015/2016 (64-Bit)
- **NEW** IA OS Hardening CDs for TT3106 PC (Microsoft Windows 10 Enterprise IoT LTSB 2015/2016 (64-Bit) OS)
- ADM certified on Microsoft Windows Server 2012 R2 (64-Bit)

MCC 5500 RELEASE 2.7 - NEW FEATURES / ENHANCEMENTS:

- **APX 7500 Console with ACIM link support of 255 modes / frequencies** - increased the number of supported modes / frequencies from 16 to 255 when connected to an APX 7500 Console via ACIM link.
- **APX Mobile in Tray (O5 Control Head, Remote Mount) using SB9600** - virtual control head support of the APX 7500 Mobile in a tray (O5 Control Head, Remote Mount) using SB9600, similar to the digital interface between the MCC 5500 and the XTL 5000 W9 Console. The MCC 5500 Dispatch Console mimics the APX 7500 Mobile (O5 Control Head, Remote Mount) and the keypad microphone..
- **Multi-Touch Monitor Support** - on Windows 7 Pro SP1 (32 or 64-bit) and Windows 8/8.1 Pro OS (64-bit).
- **Microsoft Windows 8/8.1 Pro OS (64-bit) Support** - in addition to Windows 7 Pro SP1 (32 or 64-bit) OS.
- **Support for New Docking Format** - R2.7 now supports docking windows framework that provides a user with Supervisor access with more flexibility in setting up how the dispatch console user workspace is composed and displayed to the dispatch console user.
- For more information on the MCC 5500 Release 2.7 features, please refer to the [MCC 5500 Product Planner](#).

PLEASE NOTE:

ADM: The ADM application post Release 2.5 is no longer dependent on the Microsoft SQL Server or MSDE to manage the Caller ID database. Consequently, the MCC 5500 will no longer continue to support the SQL Server.

Please note that legacy MCC 5500 systems may continue to use Microsoft SQL Server 2005; however, the MCC 5500 is not certified with Microsoft SQL Server 2008.

INFORMATION ASSURANCE (IA): Windows PC Operating System Hardening is available for MCC 5500 for PCs purchased from Motorola. If IA is required, element hardening must be applied to every box (Op PCs, CSDM PC, ADM PC). MCC 5500 offers two types of IA Hardening CDs depending on OS version: IA Transparent CD or IA Full Hardened CD.

NOTE: Customers who desire information assurance should not utilize the ADM program or the domain controller, as these programs have not verified to be IA compliant.

Manuals

The following Manuals are available from AAD:

6881005Y60	User Guide
6881005Y65	Installation and Service Manual
6881005Y70	Configuration Manual
6871013P84	Windows Supplemental Configuration Manual

Soft copies are also available on the Motorola Online or from the [LMS Documentation Web Site](#).

Ordering Requirement

SUPPORTED ORDERING SYSTEMS:

Going forward, MCC 5500 systems must be ordered using the REC Tool (Motorola Configurator). The iMPACT design tool cannot support configuration for Release 2.5 or greater systems.

DON'T FORGET:

The MCC 5500 does not ship with Punch Blocks or cables as standard, these should be ordered as required.

ORDERING REQUIREMENTS WHEN USING APX 7500 CONSOLETTA VIA ACIM --- WITH THE MCC 5500 DISPATCH CONSOLE :

The MCC 5500 Dispatch Console R2.6 or greater supports the APX 7500 Consolette via digital control (ACIM).

In this configuration the dispatcher will have the following capabilities at the MCC 5500 Dispatch Console Operator Position:

- Channel Select Mode (maximum is 255)*
- PTT ID
- Emergency Alarm
- Emergency Call
- Aliasing of IDs
- Coded/Clear
- Encryption Key (CKR) Select
- Frequency Select
- Call Alerts (Conventional Only)

* NOTE: Support of 255 modes / frequencies is available in MCC 5500 R2.7 or greater.

For this configuration the following is required:

1. APX 7500 Consolette requires option G806 (ASTRO Digital Operation) and if required GA00469AA for extended dispatch operation.
2. MCC 5500 Dispatch Console System must be running at release R2.6 or greater.
3. MCC 5500 DAP II (L3550 or L3551) with ASTRO DAP iButton (TT05249AA or DDN9681) and channel must be configured in the CSDM for ASTRO signaling.
4. 2 custom cables are required to go from the punch block to the RJ45 on the APX 7500 Consolette. The 2 custom cables must be made in the field. Each of the custom cables consists of a CAT5 cable, terminate one end in a standard RJ45 connection and strip the other end to go to the punchblock. For cable specifications on the 2 custom cables please refer to the MCC 5500 Dispatch Console Installation and Service Manual Revision (221560G-10) contained on MOL under the Resource Center / Product Information / Manuals / Dispatch Consoles / MCC 5500 Dispatch Console.

ORDERING REQUIREMENTS WHEN USING APX 8500 MOBILE IN A TRAY (O5 CONTROL HEAD / REMOTE MOUNT) --- WITH THE MCC 5500 DISPATCH CONSOLE :

APX 8500 Remote Mount Mid Power Model with the MCC 5500 is now a certified solution.

The MCC 5500 Dispatch Console R2.7.3 and beyond supports the APX 8500 Mobile in a Tray (O5 Control Head, Remote Mount). However, in this configuration the use of a Digital Junction Box (DJB) is not supported only direct connection is supported.

In this configuration the MCC 5500 Dispatch Console acts a Virtual Control Head for the APX 8500 Mobile in a Tray (O5 Control Head, Remote Mount) supporting the following features:

- ASTRO IDs
- All mode changes
- All soft keys programmed on the radio
- PTT ID or Alias will display in the Activity Log Window

NOTE: In this configuration, all decoding of MDC 1200 and ASTRO IDs is done at the radio and not the MCC 5500 Dispatch Console. The MCC 5500 Dispatch Console will only display what is displayed on the control head of the radio.

For this configuration the following is required:

1. APX 8500 Mobile required options: G67 (Remote Mount) -- must have.
2. MCC 5500 Dispatch Console R2.7.3 or greater
3. MCC 5500 DAP II (L3550 or L3551) with SB9600 iButton (TT05248AA or DDN9680)
4. APX Direct Connect Cable (DDN1463)

IMPORTANT NOTE: The APX 8500 Mobile dash-mount configuration is **NOT** supported with the MCC 5500. The O5 Control Head (G442) is optional and not required for connecting to the MCC 5500.

ORDER INSTRUCTIONS FOR APX 8500 MOBILE IN A TRAY (REMOTE MOUNT) to be used with the MCC 5500 Dispatch Console:

Below is a guide, for the 12 groups of required selections, to order an APX 8500 mobile.

1. Main Model: Select *M37TSS9PW1_N APX 7500 All-Band MP Mobile*

2. Operation Mode: Select either Operation Mode option, *G241 or G806. (Choose ONE)*

3A. System Enhancement Software: Select option to match your system, *G51 or G48. (Choose ONE)*

3B. Optional System Enhancement Software: Select, if needed to match your system, *G173, G361, GA00580, or QA01648*

4. Control Head Hardware: Select *G88 - APX NO O5 CH NEEDED.*

(Note: G442 - APX O5 CONTROL HEAD can be ordered for visual use of the control head but is not required for connecting to a MCC 5500.)

5. Control Head Software: Select *G444 - CONTROL HEAD SOFTWARE*

6. Mounting: Select *G67 - REMOTE MOUNT MID POWER*

(Note: The remote mount mobile is the only configuration for use with the MCC 5500.)

7. RF Antenna: Select appropriate antenna option, *G89 or GA01513 (Choose ONE)*

Note: G89 - NO RF ANTENNA NEEDED should be ordered if G88 selected in Step 4.

8. GPS Wi-Fi Antenna: Select appropriate antenna option: *GA00226, GA00269, or GA00235 (Choose ONE)*

Note: GA00235 - NO GPS/Wi-Fi ANTENNA NEEDED should be ordered for most applications.

9. Microphone: Select appropriate microphone option, *G892, G90, W20, W22, or W382 (Choose ONE)*

Note: G90 - NO MICROPHONE NEEDED should be ordered if G88 selected in Step 4

10. Speakers: Select appropriate speaker option, *B18, G142, G831, G832, or W432 (Choose ONE)*

Note: G142 - NO SPEAKER NEEDED should be ordered if G88 selected in Step 4

11. J600 Adapter: Select *GA01517 - NO J600 Adapter Cable needed*

12. Service Option: Select desired Service From Start option, *G78, GA00318, GA00249, or GA00255 (Choose ONE)*

OTHER Required Items:

A- Order power supply for mobile - *KT000254A01*

Note: The power supply is not included with the mobile, this part must be ordered separately. Legacy power supplies do not supply sufficient current for the APX 8500. The APX 8500 requires the high capacity KT000254A01 power supply

B- Order RF Adapter Cable - *CB000091A03* (QMA to Mini-UHF, Female)

Note: APX8500 RF Antenna port on the rear panel is QMA.

C- Don't forget the MCC 5500 DAP II (L3550 or L3551) with SB9600 iButton (TT05248AA or DDN9680) and APX Radio Interface Cable - DDN1463

ORDERING iDEN INTERFACE:

On a New MCC 5500 System

One i325 or i365IS radio is required for each iDEN channel to be interfaced. Also, one of each in the below table is required. The only exception to this rule is the iDEN iButton (TT05245AA), which can support up to two iDEN channels.

2 iDEN Channels with License	TT05245AA
Radio Audio Cable	DDN9648A
Audio Interface Board	QTN6050C
RS232 Data Cable	NNTN5406B (available thru Tessco)
Rapid Power Charger	NNTN4963B
Audio Cable and Audio/Data Cable Kit	DDN9659A

On an Existing MCC 5500 System

Existing MCC 5500 Consoles may add an iDEN interface as long as DAP II modules are used. The MCC 5500 must be running CSDM software at R2.5 version or greater.

One i325 or i365IS radio is required for each iDEN channel to be interfaced. Also, one of each in the below table is required. The only exception to this rule is the iDEN iButton (DDN9658), which can support up to two iDEN channels.

Spare 2 iDEN Channels with License	DDN9658
Radio Audio Cable	DDN9648A
Audio Interface Board	QTN6050C
RS232 Data Cable	NNTN5406B (available thru Tessco)
Rapid Power Charger	NNTN4963B
Audio Cable and Audio/Data Cable Kit	DDN9659A

Please see the Ordering Guidelines in the Product Planner for more details.

CANCELLATION INFORMATION - REGARDING iBUTTONS:

Effective Sep 23rd, 2009, the iButton options for the MCC 5500 Dispatch Console were replaced. The iButtons in R2.5 changed so the part #'s for the iButton Options and Spares differ from those of past releases (R2.0 thru R2.4.1).

Take special care when ordering iButton spares as the former iButtons will be offered for a limited time through AAD in parallel with the current iButtons. See below for more details.

IMPORTANT NOTE REGARDING iBUTTONS:

The CSDM software (R2.5 or greater) is compatible with the old version of iButtons. So there is no need to replace old iButtons with new iButtons when upgrading to the latest release (R2.7.1).

Previous software versions (R2.0 thru R2.4.1), however, do not support the new iButtons. If new iButtons are installed, the system must be upgraded to the latest release (R2.7.1).

For this reason, if adding on an operator position to an existing system (R2.0 thru 2.4.1) and the new iButtons (R2.5 or greater) are ordered, an upgrade to the latest release (R2.7.1) software is required. First upgrade the system, then connect the add-on operator position.

INSTRUCTIONS ON ORDERING iBUTTONS FOR NEW MCC 5500 SYSTEMS OR ADDING ON TO FIELDED MCC 5500 CONSOLE (R2.5 or greater):

Ordering iButtons for a brand new MCC 5500 Dispatch Console system (R2.5 or greater) - below are the iButton options that are available to order with either L3550 or L3551:

2 Analog Channels with License	TT05247AA
2 SB9600 Channels with License	TT05248AA
2 ASTRO Channels with License	TT05249AA
2 iDEN Channels with License	TT05245AA

Ordering SPARE iButtons - below are the R2.5 or greater (New) iButton Spares that are used with either L3550 or L3551

2 Analog Channels with License	DDN9679
2 SB9600 Channels with License	DDN9680
2 ASTRO Channels with License	DDN9681
2 iDEN Channels with License	DDN9658

INSTRUCTIONS ON ORDERING PRE-R2.5 i-BUTTONS FOR FIELDED MCC 5500 DISPATCH CONSOLE FOR PAST RELEASES (R2.0 thru 2.4.1):

If the fielded MCC 5500 Dispatch Console System is pre-Release 2.5 (R2.0 thru R2.4.1) than

below are the steps that need to taken to add additional DAPs to the fielded system without having to upgrade the system to the latest release (R2.7).

1. Order the DAP II Module - Two different DAP modules are available depending on whether or not the customer uses DC-Control

- L3550 - DAP II Module for Non-DC Control
- L3551 - DAP II Module for DC Control --- requires option TT04090AA

2. Order the PreR2.5 iButtons Spares from AAD - see part #'s below

2 Analog Channels with License	DDN7933
2 SB9600 Channels with License	DDN8242
2 ASTRO Channels with License	DDN8243

HOW TO CHECK FIELDLED DISPATCH CONSOLE SOFTWARE VERSIONS:

The best way to find out what software version the fielded MCC 5500 Dispatch Console is currently at is thru the CSDM software. Within the CSDM software pull down "Help" and select "About". There will be a number of software version numbers displayed. Checked the software versions against the table below:

MCC 5500 RELEASE #	CSDM	COP	PC CONSOLE		DAP iBUTTON TYPE COMPATIBILITY
R02.00.00	4211059- 20 SR1	4211064- 15 SR1	3211997- 32 SR1		Pre-R2.5 iButtons

HOW TO OBTAIN MCC 5500 SOFTWARE UPGRADES TO LATEST RELEASE (R2.7.3):

The upgrade to MCC 5500 R2.7.3 provides the latest features and support for the MCC 5500. An upgrade kit can be ordered free of charge by calling Motorola Solutions System Support Center (SSC) and opening a Software upgrade case referencing MCC 5500 R2.7.3. NOTE: The software upgrade kit to R2.7.3 is free but Motorola Solutions does NOT cover the cost to upgrade the customer's Operation System (OS) or any labor costs to perform the upgrade.

IMPORTANT NOTE: MCC 5500 Release 2.7.3 ONLY supports the following Operating Systems (OS):

MCC 5500 CONSOLE	MCC 5500 RELEASE 2.7.3 SUPPORTED OS
------------------	-------------------------------------

APPLICATIONS	
Console Op, CSDM - Workstations	Windows 7 Professional SP1 (32 or 64-bit) Windows 8 or 8.1 Professional (64-bit) Windows 10 Professional (64-Bit) Windows 10 Enterprise IoT LTSB 2015/2016 (64-Bit)
ADM - Server	Windows Server 2008 R2 Standard w.SP1 (64-bit) Windows Server 2012 R2 (64-Bit)

ORDERING INFORMATION ASSURANCE FOR MCC 5500:

MCC 5500 does offer Windows PC Operating System Hardening CD Kits for Motorola supplied PCs ONLY based on OS type. Element hardening must be applied to every box in the MCC 5500 System (Console Op, CSDM, ADM). The table below summarizes the IA Hardening CD based Applications and OS.

IA HARDENING CDS	SUPPORTED OS	IA HARDENING CD COMPLIANT ONLY WITH MOTOROLA SUPPLIED PC	MCC 5500 CONSOLE APPLICATIONS
TT2483 Win 7 - IA Transparent CD TT3194 Win 10 - IA Transparent CD	Windows 7 Pro SP1 (32 or 64-bit); Windows 10 Enterprise IoT LTSB 2015/2016 (64-Bit); Windows Server 2008 R2 Standard w.SP1 (64-bit); Windows Server 2012 R2 (64-Bit)	TT2833 - Z440 Win 7 Workstation; TT3106 - Z440 Win 10 Workstation TT3225 - Z2 Mini Win 10 Workstation	Console Op CSDM ADM
TT2482 Win 7 - IA Full Hardened CD TT3195 Win 10 - IA Full Hardened CD	Windows 7 Pro SP1 (32 or 64-bit); Windows 10 Enterprise IoT LTSB 2015/2016 (64-Bit); Windows Server 2008 R2 Standard w.SP1 (64-bit); Windows Server 2012 R2 (64-Bit)	TT2833 - Z440 Win 7 Workstation; TT3106 - Z440 Win 10 Workstation TT3225 - Z2 Mini Win 10 Workstation	Console Op CSDM ADM

IMPORTANT NOTE: Motorola Solutions no longer supplies PCs with Microsoft Windows Vista (TT2289) or Windows 7 (TT2833) or Server 2003 (TT2288) OS.

The IA Hardening CDs (TT2144 or TT2145) are ONLY compliant with the following Motorola supplied PCs TT2289 and TT2288.

TT2385 (Z400 Workstation), TT2537 (Z420 Workstation), TT2833 (Z440 Win 7) and TT3106 (Z440 Win 10) were replaced with TT3225 (Z2 Mini Workstation).

TT2322 (ML110 G7 Server), TT2605 (ML310E G8 Server) and TT2739 (ML310E G8 V2 Server) are no longer available.

Configuration

Dispatch Console System

Dispatch Console Position(s)

Each MCC 5500 Dispatch position requires a CAB (L3359) and a CES (L3358). Each CES can support up to 12 channels, if the capacity of the systems as defined by the number of dispatch console positions is not sufficient for the number of channels required, additional CES units should be ordered.

Description	Full Description	Nomenclature	APC	Price
MCC 5500 OP CAB II / PS CALIFORNIA COMPLIANT	Includes 10 in. cable connection to PC, power supply unit, and operator license. Speakers are NOT included with this model, they are to be ORDERED separately (B1912). This model is for R2.0 and beyond. NOTE: 50 in. Cable for CES is	L3359AC	322	\$8,433.00

	NO LONGER automatically included with L3359. Must order TT05088AA for the 50 in. Cable for CES. Note: CAB II PSU IS CALIFORNIA COMPLIANT.			
CONSOLE ELECTRONIC SHELF (CES) II	Includes COP and power supply. This model is for R2.0 and beyond.	L3358	322	\$9,500.00

CAB (L3359AC) - Cable Options

Description	Full Description	Nomenclature	APC	Price
ADD: 50' CES/CAB CABLE	Order with L3359 to add 50 in. CAB/CES cable	TT05088AA	322	\$150.00

Motorola MCC 7500 Dispatch Console
-- Logging Solution --

Ordering Information

General Information

IMPORTANT NOTICE ABOUT MOTOROLA SOLUTIONS SOFTWARE SUPPORT POLICY

In line with the Software Support Policy (SwSP) for ASTRO based system software, orderability rules now include alignment to this Software Support Policy which sets a new framework of three periods of support from Ship Acceptance for that specific release.

The policy provides for a 4-year period of time, referred to as the **Standard Support** period, during which access to qualified software defect repairs and system expansions for that specific release of system software are provided.

Then there is an additional 3 year period of time, referred to as the **Extended Support** period, during this time no software defect repair, no system expansions and no Security Update/Monitoring Services support are available for that specific release of system software.

After the 4 + 3 year support periods have expired, the system release enters the **End of Support** period. At this time, no software defect repair, no system expansions no Security Update/Monitoring Services and no service offerings are available for that specific release of system software.

Customers may choose to upgrade or migrate to a supported release at anytime during their system lifecycle.

Historical milestones, such as the date that a system ships, reaches beneficial use, or achieves final acceptance have no impact on the system software dates of support.

Reminder: Under the new SwSP, system expansions are only allowed in the standard support window for a system release. If your customer desires an expansion that would occur toward the end of the standard support period, it is highly recommended that you have them upgrade/migrate first and then expand their system to ensure the customer receives the full warranty time period.

Additional information can be found here: [Software Support Policy Site](#)

MCC 7500 Product Planner and Ordering Guide

The MCC 7500 Product Planner and Ordering Guide also covers the Archiving Interface Server (AIS).

The MCC 7500 Product Planner and Ordering Guide is available on the [High Tier Dispatch Console wiki page](#).

Ordering Requirements

Supported Ordering Systems

1. This equipment is ordered directly in COF or OMAR. Note that no checking of the design itself is done in COF or OMAR.
2. Motorola On-Line may not be used to order complete console systems.
3. Please note that the latest available release of software and hardware will be provided when ordering through the system. If earlier release versions are required then a case must be opened with the System Support Center (SSC) to obtain the desired version from Upgrade Operations (UO).

Don't Forget These Items for Each Dispatch Console

1. PC, Monitor, Speakers, Microphone, and other accessories.
2. Software Entitlement Licenses

Recorders and Replay Stations

Each AIS requires a recorder. Refer to the [MCC 7500 IP Logging Recorder](#) page for information about the recorders and how to order them.

Replay stations are required to replay the recorded audio. Refer to the [MCC 7500 IP Logging Recorder](#) page for information about the replay stations and how to order them.

Links to Other Elements of the Console Sub-System

1. [MCC Series PC, Monitor, and accessories](#) (also available in pulldown box above)
2. [Manuals](#)
3. Please see [Information Assurance \(IA\) PCAT page](#) for Control Room Firewall media, Element Hardening, and other IA features.
4. [MCC 7500 IP Dispatch Console](#)
5. [MCC 7500E IP Dispatch Console](#)
6. [MCC 7500 IP Logging Recorder](#) (includes Dual IRR in it's pulldown box).
7. Also see the pulldown box at the top of this page for other elements.

Configuration

Order Dispatch PC Equipment, Accessories, Spares, and FRUs if desired (more VPM specific FRU's below)

Please see the [MCC Series PC, Monitor, and accessories](#) in the pulldown box above.

VPM

Description	Full Description	Nomenclature	APC	Price
MOTOROLA VOICE PROCESSOR MODULE	Provides one Voice Processor Module (VPM) unit for an MCC 7500 console. Requires appropriate software license option (CA01642AA or CA00288AB) and AC line cord option (CA00140AA, AB, AC or AF). When ordered for a secure-capable MCC 7500 console, also requires the CA0147AF Secure Operation License option and at least one encryption algorithm.	B1933	443	\$11,920.00

Order the MCC 7500 Archiving Interface Server (AIS) SW Application

Description	Full Description	Nomenclature	APC	Price
MCC 7500 ASTRO 25 SOFTWARE	Provides a CD ROM containing the application software for the MCC 7500 dispatch console and MCC 7500 Archiving Interface Server. Does NOT include the licenses required to use the software. Licenses can be purchased by using - CA01642AAB or CA00288AB with the B1933	B1905	443	\$250.00

Software Licenses

--	--	--	--	--

Description	Full Description	Nomenclature	APC	Price
ADD: MCC 7500 ARCHIVING INTERFACE SERVER SOFTWARE LICENSE	Provides a license for using the MCC 7500 VPM-based AIS Software. One is required for each AIS being ordered. Order as a sub-item to the B1933.	CA00288AB	443	\$18,072.00

Upgrade Software Licenses

Description	Full Description	Nomenclature	APC	Price
ADD: MCC 7500 AIS SOFTWARE REFRESH LICENSE	Provides a license for upgrading to the latest version of the MCC 7500 AIS Software. One is required for each AIS being upgraded. Order as a sub-item to the B1905.	CA00900AA	443	\$2,700.00

Secure Operation

Description	Full Description	Nomenclature	APC	Price
ADD: MCC 7500 SECURE OPERATION	Order when secure capabilities are required in a VPM-based dispatch console or AIS. Order as a sub-item to the B1933.	CA00147AF	443	\$3,900.00
ADD: MCC 7500 / MCC 7100 OTEK OPERATION	Order when remote key management capabilities are required on a VPM-based dispatch console, AIS, or MCC 7100. Order as a sub-item to the B1933 for MCC 7500 or as a sub-item to the B1939 for MCC 7100. Note that OTEK does not support the ADP encryption algorithm.	CA01220AA	443	\$4,020.00

Secure Algorithms

Description	Full Description	Nomenclature	APC	Price
-------------	------------------	--------------	-----	-------

ADD: DES-OFB ALGORITHM	Provides factory programming for the DES-OFB encryption algorithm. Order as a sub-item to the appropriate MGEG, MCC 7500 Dispatch Console, MCC 7500 Archiving Interface Server, VPM FRU or Secure Card FRU model.	CA00143AC	443	\$900.00
ADD: DVP-XL ALGORITHM	Provides factory programming for the DVP-XL encryption algorithm. Order as a sub-item to the appropriate MGEG, MCC 7500 Dispatch Console, MCC 7500 Archiving Interface Server or VPM FRU model.	CA00146AC	443	\$900.00
ADD: DES-XL ALGORITHM	Provides factory programming for the DES-XL encryption algorithm. Order as a sub-item to the appropriate MGEG, MCC 7500 Dispatch Console, MCC 7500 Archiving Interface Server or VPM FRU.	CA00144AC	443	\$900.00
ADD: ADP ALGORITHM	Provides factory programming for the ADP encryption algorithm. Order as a sub-item to the appropriate MGEG, MCC 7500 Dispatch Console, MCC 7500 Archiving Interface Server, VPM FRU or Secure Card FRU model.	CA00245AA	443	\$900.00
ADD: AES ALGORITHM	Provides factory programming for the AES encryption algorithm. Order as a sub-item to the appropriate MGEG, MCC 7500 Dispatch Console, MCC 7500 Archiving Interface Server, VPM FRU or Secure Card FRU model.	CA00182AB	443	\$900.00
ADD: DVI-XL ALGORITHM	Provides factory programming for the DVI-XL encryption algorithm. Order as a sub-item to the appropriate MGEG, MCC 7500 Dispatch Console, MCC 7500 Archiving Interface Server, VPM FRU or Secure Card FRU model.	CA00145AC	443	\$900.00

VPM Power Cords

Description	Full Description	Nomenclature	APC	Price
ADD: AC LINE CORD, EUROPEAN	Adds one AC line cord with a continental European plug (Schuko plug).	CA00140AB	597	\$0.00
ADD: AC LINE CORD, BRAZIL	Adds one AC line cord with a Brazilian plug.	CA00140AG	277	\$0.00
ADD: AC LINE CORD, UK	Adds one AC line cord with a United Kingdom plug.	CA00140AC	597	\$0.00
ADD: AC LINE CORD, NORTH AMERICAN	Adds one AC line cord with a North American plug.	CA00140AA	443	\$0.00
ADD: AC LINE CORD, AUSTRALIA	Adds one AC line cord with an Australian plug.	CA00140AF	277	\$0.00

Field-Add Software Licenses

Description	Full Description	Nomenclature	APC	Price
MCC 7500 AIS SOFTWARE FIELD-ADD LICENSE	-	BLN1317	443	\$18,072.00
OVER THE ETHERNET KEYING (OTEK) OPERATION FIELD-ADD LICENSE	-	BLN1302	443	\$4,020.00
SECURE OPERATION FIELD-ADD LICENSE	-	BLN1304	443	\$3,900.00

KVL Programming Cable

The cable used to connect the KVL to the VPM in the dispatch position and the archiving interface server is the TKN8531.

Description	Full Description	Nomenclature	APC	Price
CABLE FOR RNC, DIU MGEG	-	TKN8531C	362	\$260.00

Field Replacement Units (VPM Specific)

Note: We've been seeing a significant number of VPM FRUs being returned to the Repair Depot because they don't have the necessary encryption algorithms. Please read the note text under the B1934 below and make sure any required encryption algorithms are ordered when the VPM FRU is ordered.

The items listed in this section are specific to MCC 7500. Please also see the FRUs and other accessories listed in the [MCC Series PC, Monitor, and accessories](#) pulldown menu.

Description	Full Description	Nomenclature	APC	Price
MCC 7500 VOICE PROCESSOR MODULE FRU	Provides the housing and circuit board used for the B1933 VPM. Does not include the power supply, AC power cord, or DC power cord. Each of these items must be ordered separately from RPSD. If secure capability is required, then order the following options with the B1934: - the secure operation option (CA00147AF) - from 1-6 encryption algorithm options Order as a main line item.	B1934	443	\$11,830.00
SHIELD,VPM SHIELD KIT	Provides one complete shield kit to replace the encryption engine shields on a Voice Processor Unit (VPM). Instructions for replacing the shields are also provided. When ordering, divide the quantity needed into multiple lines so that no line contains more than 9 BLN1324 in.s. For example, if 30 kits are needed, create 3 lines of 9 each and 1 line of 3.	BLN1324	443	\$0.00

Algorithm Upgrades/Field-Adds

Description	Full Description	Nomenclature	APC	Price
	Provides a CD that is used to add new algorithms to existing Telephone Media Gateways (TMGs), VPM-			

MCC 7500 SECURE VPM ALGORITHM UPGRADE FOR KVL 4000	based MCC 7500 consoles and VPM-based AISs. Also used to upgrade existing algorithms in existing VPM-based MCC 7500 consoles or AISs. Requires sufficient algorithm options to cover every added/upgraded algorithm in every console or AIS that is affected. The CD is compatible with the KVL 4000 and KVL 5000 Key Variable Loaders. The serial number of the KVL keyloader is required to be entered into the ordering system when ordering the T8063. Order as a main line item.	T8063	443	\$250.00

Motorola MCC 7500 Dispatch Console
-- Auxiliary Input/Output Items --

Ordering Information

Features

The Motorola MCC 7500 Dispatch Console is a high tier IP dispatch console for use with ASTRO 25 radio systems. It supports an evolving feature set which includes the following features.

Aux I/O Types

- Latched Relay Outputs
- Momentary Relay Outputs
- Latched Input Buffers
- Momentary Input Buffers
- Interlocked Relay Groups
- Channel-Associated Aux I/Os

General Information

Overview

Auxiliary inputs and outputs (Aux I/Os) allow customers to control external devices via relay closures and sense the state of external devices via input buffers from the dispatch position. The Motorola MCC 7500 and MCC 7100 consoles support Aux I/Os by accessing and controlling SDM 3000 Basic RTUs and displaying the status of the RTUs' inputs and outputs on the dispatch position graphical user interface (GUI). The graphical user interface displays the inputs and outputs by using the same icons that are used with inputs and outputs on CENTRACOM Gold Series dispatch positions. A separate GUI to display the RTU inputs and outputs is not required on the dispatch position.

Multiple dispatch positions may monitor and control the same relay output and/or external inputs. In this case, state changes are indicated across all dispatch positions simultaneously.

Individual relay outputs can be configured so that they require a safety switch to be pressed before they respond to any commands from the dispatcher. A relay output on one dispatch position can be protected by a safety switch while the same relay output on a different dispatch position isn't. The resetting of latched inputs may also be protected by using the safety switch.

Supported Aux I/O Types

The following Aux I/O configurations are supported.

- **Momentary Input** - This is an input where the user interface always shows the true state of the input. If the input is active, it is shown as active. If it is not active, it is shown as not active.
- **Latched Input** - This is an input where the user interface doesn't necessarily show the true state of the input. When the input goes active, the user interface shows the state as active. The display will continue to show the state as active even if the input changes to the inactive state. A dispatcher must manually reset the display to return it to the inactive state. Note that a dispatcher cannot clear the display until the input itself is in the inactive state.
- **Momentary Output** - This is an output relay which is activated when the dispatcher presses the button on the user interface and deactivated when the dispatcher releases the button.
- **Latched Output** - This is an output relay which changes state only when the dispatcher presses the button. The release of the button has no effect on the state of the relay. One press activates the relay; the next press deactivates the relay.
- **Interlocked Latched Output** - This is a latched output relay which is part of a group of latched output relays. Only one of the relays in the group may be active at a time. Pressing the button for a relay automatically deactivates the previously active relay. Pressing the same button twice does not deactivate that relay. There is always one and only one relay active in the group at all times. Interlocked relays work in a "break before make" fashion; that is, the previously active relay is deactivated before the new relay is activated. The maximum number of relays that can be grouped together in an interlocked group is the number of relays in the RTU hosting the interlocked group.

SDM 3000 Basic RTUs

The F4543 SDM3000 Basic RTU is used to support most console Aux I/O needs. The RTU is rack mountable in a standard 19 inch rack and is one rack unit high.

The RTU is capable of supporting up to 16 outputs and 48 inputs. Expansion chassis (each being the same physical size as the SDM3000 RTU) can be added to increase the number of inputs and outputs. The supported configurations are as follows.

- A single SDM 3000 Basic RTU supports 16 Relay Outputs and 48 Input Buffers
- A single SDM 3000 Basic RTU with 1 expansion chassis supports 32 Relay Outputs and 96 Input Buffers
- A single SDM 3000 Basic RTU with 2 expansion chassis supports 48 Relay Outputs and 144 Input Buffers

Two options are available for powering the RTU. One of the following power options must be ordered with each RTU. These are not needed with the expansion chassis.

- VA00905 - ADD: +/- 24/48 VDC Power Operation
- V266 - ADD: AC Power Operation

The VA00874 ADD: Aux I/O Server Firmware Current ASTRO Release option should be ordered with the RTU to add the required application software.

If desired, punch blocks may be ordered with the RTU by using the V592 ADD: Punch Blocks option.

MCC Series I/O Shelf

The MCC Series I/O Shelf can be used with the SDM3000 RTU to provide any required external relays and/or inverters. The MCC Series I/O Shelf interfaces to the SDM3000 RTU via the RTU's relay outputs and input buffers. There is no data communication link between the two units. It is merely acting as a translator to translate the RTU's relays into Form B, Form C or double-pole or to translate an active low signal into an active high signal that can

be properly detected by the RTU. Please see the MCC 7500 Product Planner and Ordering Guide for more information on this.

The MCC Series I/O Shelf is rack mountable in a standard 19 inch rack and is one rack unit high. It consists of a metal chassis, an internal power supply, a controller module and between one and four I/O modules. Each I/O module contains six double pole Form C relays.

The MCC Series I/O Shelf comes standard with one I/O module already in it. Up to three additional I/O modules can be added to provide up to a total of 24 relays. If more than twentyfour relays pairs are needed, additional MCC Series I/O Shelves should be ordered.

RTU Software Upgrades/Downgrades

When upgrading a MCC 7500 console to a newer system release, the software in any SDM 3000 RTUs being used as Aux I/O servers also needs to be upgraded. This is done by ordering the T7955 All Configuration Software and Firmware to Current Version model with the appropriate option on it. The T7955 provides a single CD containing the desired software, regardless of how many of the following options are ordered with it.

- When upgrading to the current shipping release, the CA02411AA Aux I/O Server Firmware Upgrade option is used. One CA02411AA must be ordered for each Aux I/O server being upgraded. A maximum of 100 of this option can be ordered with a single T7955.
- When upgrading to an older release, the CA02405AA Aux I/O Server Firmware Downgrade option is used. One CA02405AA must be ordered for each Aux I/O server being downgraded. A maximum of 100 of this option can be ordered with a single T7955. There is no need to specify which older release is needed because the CD will contain software for all the older releases.

Manuals

The various manuals for the MCC 7500 dispatch console are included in the ASTRO 25 Radio System Documentation Set. The individual manuals (or the complete documentation set) can be downloaded from the ASTRO 25 Documentation Web Site.

MCC 7500 Product Planner and Ordering Guide

The MCC 7500 Product Planner and Ordering Guide is available on the [MCC 7500 wiki page](#).

Ordering Requirements

Orderable Item Descriptions

- Auxiliary inputs and outputs are supported via the SDM3000 Basic Site Manager Remote Terminal Unit (RTU). The RTU can support up to 48 inputs and 16 outputs. If additional inputs or outputs are required, then one or two SDM3000 IO Expansion Chassis may be ordered with the RTU.
- An SDM3000 IO Expansion Chassis supports 48 inputs and 16 outputs. One RTU can support up to two expansion chassis for a maximum of 144 inputs/48 outputs per RTU. The SDM3000 IO Expansion Chassis may be ordered by themselves for expanding RTUs which are already installed in the field.
- One power option (24/48 VDC or AC) per RTU is required. They are not required for expansion chassis.
- The Aux I/O Server Firmware Current ASTRO Release option is used to configure the

RTUs being used for dispatch position auxiliary inputs and outputs. One option per RTU is required.

- When upgrading or downgrading a RTU, order the T7955 with either the Aux I/O Server Firmware Upgrade or Aux I/O Server Firmware Downgrade option.
- The MCC Series I/O Shelf provides 6 double-pole, Form C relays. Additional relays can be ordered in groups of 6 by ordering the MCC Series I/O Module. A shelf can support a maximum of 24 relays.
- Note that a MCC Series I/O Shelf always requires a SDM3000 RTU when part of a MCC 7500 console system.

-- Conventional Channel Gateway and Related Items --

Ordering Information

General Information

GGM 8000 Enhanced Conventional Channel Gateway (Enhanced CCGW) (For use in 7.13 and later system releases)

In 7.13 and later system releases, the GGM 8000 Enhanced CCGW is available for interfacing to conventional channels. The GGM 8000 Enhanced CCGW can support combinations of analog, MDC 1200, ACIM Link, digital and mixed mode channels simultaneously. Low density and high density versions of the GGM 8000 Enhanced CCGW are available.

The low density version contains four analog ports and four V.24 ports plus an Ethernet port. Up to eight conventional channels can be connected to the analog and V.24 ports. The eight channels can be mixtures of analog, MDC 1200, ACIM Link, digital or mixed mode. In addition to the eight channels connected to ports, up to sixteen IP based channels can be supported. This brings the total number of channels supported on the low density version to twenty four.

The high density version contains eight analog ports and eight V.24 ports plus an Ethernet port. Up to sixteen conventional channels can be connected to the analog and V.24 ports. The sixteen channels can be mixtures of analog, MDC 1200, ACIM Link, digital or mixed mode. In addition to the sixteen channels connected to ports, up to sixteen IP based channels can be supported. This brings the total number of channels supported on the high density version to thirty two.

The GGM 8000 Enhanced CCGW may be used in 7.13 and later systems. It cannot be used in pre 7.13 systems.

Please refer to the [GGM 8000 ECAT price page](#) for ordering information.

Conventional Site Controller

The Conventional Site Controller (CSC) provides MCC 7500 dispatch consoles with the ability to access and control stations connected to CCGWs that are located at the console site if the dispatch consoles lose connectivity to the trunking system's controller.

The CSC is based on the CGP 8000 Site Controller hardware, but uses different software to allow it to handle the CCGWs and MCC 7500 dispatch consoles. A complete CSC requires the following:

- One GCP 8000 Site Controller Chassis model (T7038)
- One Site Controller Module option (CA00303AA)
- One Rack Mount Hardware option (X153AW)
- One MCC 7500 Conventional Site Operation Software option (CA01136AA)

Order only one Site Controller Module option per conventional site controller; redundant modules are not supported. Note that only one GCP 8000 Site Controller Chassis (T7038) can be ordered per line. If more than one is required, they must be ordered on separate lines.

Ordering information for the MCC 7500 Conventional Site Operation Software option (CA01136AA) is shown in the Options section below.

Upgrading a CSC from an older system release to the currently-shipping system release is done using the MCC7500 Conventional Site Controller Upgrade option (CA01246AA). The CA01246AA is ordered as a sub-item to the T7140. Refer to the Options section below for further information about the CA01246AA.

For ordering information for the rest of the CGP 8000 Site Controller items, please refer to the [GCP 8000 price pages](#).

MCC 7500 Product Planner and Ordering Guide

More information about conventional channels on the MCC 7500 console can be found in the MCC 7500 Product Planner and Ordering Guide. The ordering guide is available on the [MCC 7500 wiki page](#).

Ordering Requirements

Supported Ordering Systems

1. This equipment is ordered directly in COF. Note that no checking of the design itself is done in COF.
2. Motorola On-Line may not be used to order complete console systems.

Configuration

Options

Controller Software

Description	Full Description	Nomenclature	APC	Price
MCC 7500 CONVEN SITE OPER	Required when using the GCP 8000 as a conventional site controller for the MCC 7500 console. Order as a sub-item to the T7038 site controller chassis.	CA01136AA	595	\$6,500.00

Controller Software Upgrade

Description	Full Description	Nomenclature	APC	Price
ADD: MCC 7500 CONV SITE UPGRADE	Order one CA01246AA for each conventional site controller being upgraded. Order as a sub-item to the T7140.	CA01246AA	112	\$1,200.00
