

## SAVING OUR SPECIES

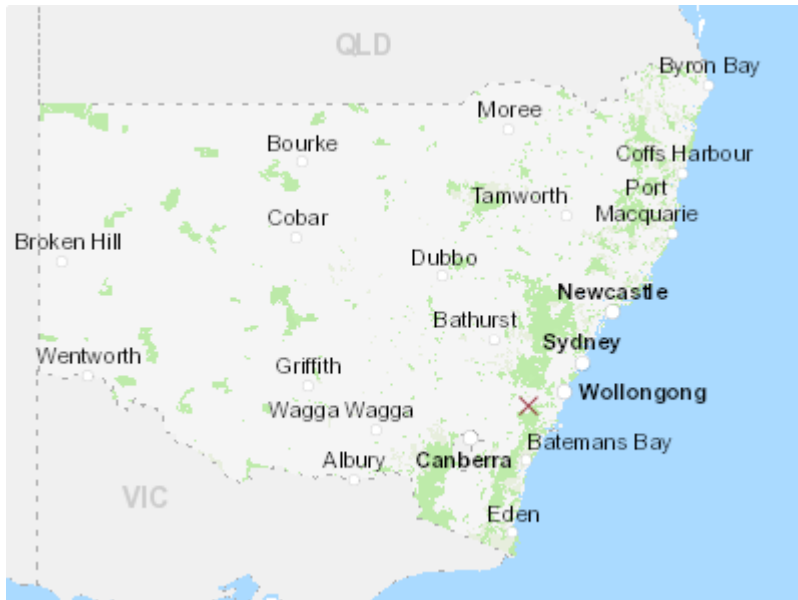

# Help save the Elusive Bush-pea

*Pultenaea elusa*

*Saving our Species* aims to improve knowledge of threatened species and increase understanding of how to manage threats critical to their survival. This data-deficient species strategy was developed by experts and identifies the priority research and/or survey actions required to address critical knowledge gaps currently inhibiting effective management of the species. The objective of this strategy is to fill those knowledge gaps to inform the development of a targeted management strategy.

*Saving our Species* is based on a cost-effective approach that maximises the number of threatened species and ecological communities conserved through on-ground management action. If you want to contact us please email [savingourspecies@environment.nsw.gov.au](mailto:savingourspecies@environment.nsw.gov.au)

**X** Species occurrence(\*)

## Priority research and survey actions for the Elusive Bush-pea

Knowledge gap	Priority action
Insufficient understanding of distribution and/or abundance	Compile data from previous surveys (including recent Office of Environment and Heritage survey failing to locate the species) to review its Threatened Species Conservation Act (1995) threat status.

### Conservation status in NSW:

Critically Endangered

### Commonwealth status:

Endangered

### Saving our Species management stream:

Data-deficient species

### Species profile:

<http://www.environment.nsw.gov.au/threatenedspeciesapp/profile.aspx?id=10713>

*Saving our Species* delivers on the NSW Government's legislative requirements under the *Biodiversity Conservation Act 2016*.

\*Recorded species sightings (BioNet).
