**Xetra® Release 7.0**  
**Replacement of the 'xetraamfunc' File for the**  
**Xetra Release 7.0 Simulation/further important Information**  
**regarding the Simulation Start**

June 13, 2002

Dear Sir or Madam,

To repair a currently existing software problem, we will be providing you with the Xetra file 'xetraamfunc' which is necessary for the Xetra Release 7.0 simulation. The current file must be replaced on all MISSes.

The @Xetra users are not affected by this update, since this file must only be installed on MISSes.

The file will be sent to all MISSes this evening, June 13, 2002, via the Xetra network.

The relevant transfer directories are:

**SUN:** /opt/gate/transferdir/release52/sun/  
**Windows:** <ftp-root directory>release52\win

Chairman of the  
Supervisory Board  
Dr. Rolf-E. Breuer

Please ensure that the MISS(es) of your simulation environment are up and running as of this evening, June 13, 2002 until Friday morning, June 14, 2002 without interruption, so that the data transfer may be performed.

Executive Board  
Dr. Werner G. Seifert  
(CEO)  
Rudolf Ferscha  
Frank Gerstenschläger  
Mathias Hlubek  
Dr.-Ing. Michael Kuhn  
Christoph Lammersdorf  
Volker Potthoff

Deutsche Börse will monitor the status of the file transmission. Should the transmission not be successful, Deutsche Börse will automatically launch a second transmission on the following day.

E-Mail: [circular.xetra@deutsche-boerse.com](mailto:circular.xetra@deutsche-boerse.com), Internet: [www.xetra.de](http://www.xetra.de)

Under Windows, the file name is 'xetraamfunc.dll'. This file must be copied into the ,...**\opt\gate\base91\XETRA\bin**' directory to replace the current 'xetraamfunc.dll' file.

Under Sun, the file name is ,Xetraamfunc.so'. Please overwrite the current corresponding file under Sun in the ,...**/opt/gate/base91/lib**' directory.

Please also ensure that the read and write settings for files and folders are correct.

In addition, the files will be posted on the Xetra website [www.xetra.de](http://www.xetra.de) for download. On the Xetra website, please follow the links

*Members Only/ Xetra/ Xetra Software.*

Please note that replacement of the current files on all MISSEs is mandatory and must be completed prior to the Xetra Release 7.0 simulation start on June 17, 2002.

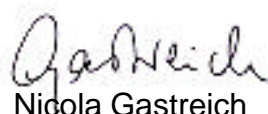

Furthermore, we would like to point out an important fact regarding the network configuration of the operating system on MISSEs and workstations. In simulation and production, the GATE 3.1 software requires that the host name of the computer be identical to the LAN host name. You can verify the configuration settings by using the utility 'nodeid' in ,.../opt/gate/base91/bin'. If the LAN host name of the computer is not displayed, the configuration is wrong. In this case, please contact the Xetra Technical Helpdesk immediately.

We would also like to inform the users of the graphics card ,Matrox Millenium G450 Dual Head' that the setting of the ,Hardware Acceleration' has to be changed in order to avoid graphical side-effects that occur together with the Xetra J-Trader. To do so, follow the links 'Start/Settings /Control Panel/ Display' and open the window ,Display Properties'. Then select Settings/Advanced /Troubleshoot. Now move the ,Hardware Acceleration' regulator from ,Full' one grade to the left.

For technical questions you may have, please do not hesitate to contact the Technical Helpdesk at +49(0)69-21 01-84 00.

Yours faithfully

  
Marcus Zickwolf

  
Nicola Gastreich
