

FIRST DRAFT

Title: Guidelines for micrometeorological measurements, quality control standards and data correction

Publisher: SPRINGER NATURE

Editors:

Branislava Lalic, University Novy Sad, branislava.lalic@polj.edu.rs

Josef Eitzinger, BOKU, Vienna, josef.eitzinger@boku.ac.at

Tamas Weidinger, Eötvös Loránd University, Budapest, weidi@staff.elte.hu

Thomas Foken, Universität Bayreuth, thomas.foken@uni-bayreuth.de

Table of contents

1. Introduction to atmospheric measurements
2. Methodical recommendations for micrometeorological applications
3. Good practices for single parameters
4. Quality control and recovery of (micro)meteorological data
5. Terms and processes explained - Glossary
6. Summary and concluding recommendations

Description of the Book

The book is intended for undergraduate, graduate students, and any other kind of interested users who want to deal with measurements in the field of agricultural and forest meteorology and urban meteorology. In addition to a brief introduction to the topic, relevant atmospheric processes and factors influencing the measurements are covered, and the various measured quantities and applications are assigned in tabular form. Simple and cost-effective measurement methods are described. Special emphasis is placed on quality management and quality control.
