## Low Voltage Wall Mounting Brackets

Ideal for any home theater or security system installation, these brackets accept any single or dual gang size wall plate. May be used for any Class 2 low voltage wiring application that does not require an electrical box. #28-6355 and #28-6356 have speed clips which allow easy mounting to existing wall board cut-out. #28-6357 and #28-6358 are designed for new construction use, and may be attached to either metal or wood studs. Open back design allows increased clearance, easing use with multiple conductor and coaxial cable.

## Channel Master® Satellite Diplexers

The 4001IFD and 4002IFD diplexers are used for separating or combining satellite signals at 950~2150MHz with VHF/UHF signals at 54~806MHz. A DC

power pass is provided from the satellite port to the common in order to pass satellite receiver LNB voltage. The 4001IFD is Channel Master's standard performance diplexer. The 4002IFD offers higher performance (much greater stopband rejection) necessary when combining satellite and VHF/UHF signals on to one cable because LNB noise extends down into the UHF spectrum and can degrade UHF TV reception if not adequately filtered out before connection to the distribution cable.

### VideoEase™ HDTV Component Video/Digital Audio Balun

The component video/audio balun allows one component video (Y/PbPr or RGB) signal and one audio signal to be transmitted via cost-effective unshielded twisted pair (UTP) cable in a point-to-point configuration. Used in pairs, the component digital balun supports 480i/p, 720p and 1080i/p video formats for hi-definition (HDTV) video applications. **Features:** •Supports 480i/p up to 1000' (305m) and 720p/1080i/p up to 500' (152m) via Cat 5 UTP, respectively •Available with color-coded RCA cable connectors •Supports either digital audio (5000050, or 500051), or analog audio (500052, or 500053) on fourth twisted pair •Modular shielded RJ-45 connector •Used in pairs, sold separately

## DATA COMM™ HDTV Adjustable Distribution Amplifier

•Instant cable provider signal strength indicator  
•Eliminates screw-on attenuators •Extends precise signal strength beyond typical "no-loss" distribution amplifiers  
•Specifically designed for HDTV broadcasting (VSB8 & QAM64) •Meets and/or exceeds cable modem and PPV requirements •Protects equipment against voltage insertion •Eight independent adjustable attenuators (range: 0~40dB) •Nominal gain per output: 3dB+  
•Forward bandwidth: 54~1.2GHz •Return bandwidth: 5~42MHz at 5dB gain •Maximum output on all 8 ports: +25dBmV/CH •Typical noise figure: < 4.5dB •Surge protection on all 8 ports: 6KV/3KA

## Stellar Labs™ SLV A/V RF Modulator

- ✓Accepts composite video/line level audio source
- ✓Selectable output on CH3 or CH4
- ✓Auto switching between antenna and A/V source

The mini RF modulator is a compact, inexpensive modulator that will convert any composite video source to VHF for viewing on your TV on either channel 3 or 4. Its low signal loss enables it to deliver excellent picture and sound quality. This modulator allows you to connect additional A/V components, such as a DVD player or a gaming system, to your TV when there are no available RCA jacks. **Inputs:** Three RCA (composite video and stereo audio), one "F".

## Audio/Video to Category 5 Balun System

This system allows installers to take advantage of Cat 5 (or higher) cable for interconnecting A/V components over long distances. Common signal formats such as composite video, RGB component video, S-video and line level audio can easily be sent considerable distances over UTP cable. Housed in compact ABS enclosures, baluns accept standard RJ-45 male connectors or terminated UTP cable. Completely passive design, these units require no power. **Sold individually, all baluns must be used in pairs.**

For complete information on all models, see MCMelectronics.com.

## Swingplate™ Feed Through Wall Plates

Designed specifically for the A/V installation industry, this unique feed through wall plate features a swivel door for ease of use and improved appearance. It is ideal for situations where multiple cables are to pass through a finished wall, and not terminated at the plate. This is especially useful in pre-wire applications, as the wire can remain tucked into the wall, with the swing door neatly closed, until it is time to install equipment. Available in single or double gang sizes, plates are white color, and are compatible with standard electrical boxes and low voltage brackets. Call for larger quantity pricing.

**Benchtop True RMS Multimeter with USB**

- ✓ 6,000 count LCD display
- ✓ True RMS measurement
- ✓ USB interface and data logging software
- ✓ AC and battery operation

Ideal for the service bench or in the classroom, this unit measures AC/DC voltage and current, resistance, capacitance, frequency, transistor h<sub>FE</sub> and temperature. It also provides diode and audible continuity test.

**Features:** •AC or battery operation •6000 count, 3 1/2 digit display •USB and RS-232 serial interfaces •Fused current measurement to 10A •AC or AC+DC TRMS measurement •Backlit display •10Mohm input impedance •Ultra sensitive 3,000Mohm input impedance on 600mV range •Switchable auto/manual range •Detailed 50 page instruction manual •Includes test leads, alligator clip adapters, temperature probe, RS-232 interface cables and software

## TENMA Digital Speaker Impedance Meter

Avoid costly service calls and amplifier damage by verifying actual speaker system impedance prior to operation. Unlike conventional volt/ohm meters, which measure DC resistance, this unit utilizes an internal 1KHz oscillator to measure true impedance. Accurately measure speaker lines that utilize impedance matching volume controls, switchers, transformers and

passive crossovers. Large digital display features 1" characters for easy viewing. Rotary selector provides x1 (0~20Ω), x10 (0~200Ω) and x100 (0~2KΩ) scales. Rugged, double insulated case is CATIII rated for use up to 100V. Dimensions: 8" (H) x 3 1/2" (W) x 2 1/4" (D). Includes test leads, carry case and owners manual. Requires six "AA" batteries (#292-015), not included.

## TENMA Non-Contact Infrared Thermometer

- ✓ 20:1 distance to spot ratio
- ✓ Measures -25°F-1200°F / -32°C-650°C
- ✓ Adjustable emissivity

Simply point the unit and squeeze the trigger to provide fast, accurate surface temperature measurement. Attached laser pointer provides immediate verification of aim **Features:** •°C/°F measurement •Backlit four digit display •Temperature data hold •MAX/MIN/DIF/AVG temperature display •Tripod mount •Sleep mode **Specifications:** •Display resolution: 0.1 •Display accuracy: ±1.8° or ±2% •Repeatability: ±0.5° or ±0.5% •Response time: 250mS •Spectral response: 8µm~14µm •Display hold: 8 seconds •Emissivity: Digitally adjustable from 0.10~1.0 by 0.01 •Requires one 9V battery (#292-035), included

## FLUKE 114/115/117 True-RMS Multimeters

Multimeters for every application! 114 is the electrical multimeter tool for troubleshooting and "go/no-go" testing. It includes a feature to eliminate inaccurate readings caused by "ghost" (stray) voltage. 115 is the multimeter for field service technicians and is the solution for a wide variety of electrical and electronic testing applications. 117 is the electrician's multimeter with integrated non-contact voltage detection. It's the ideal meter for demanding settings like

commercial buildings, hospitals and schools. **All three meters include:** •Resistance and continuity •Large white LED backlight to work in poorly lit areas •Min/max/average to record signal fluctuations •Cat III 600V safety rated •Digital display: 6000 counts, updates 4/sec

# Test Equipment

Tenma switch mode power supplies offer high efficiency in a compact, lightweight design.

## TENMA Switch Mode Laboratory DC Power Supplies

Precision adjustable supplies are ideal for test, measurement and service applications where tight voltage and current regulation are critical. Highly efficient switch mode design delivers outstanding performance from an extremely compact footprint. Unique separate output ON/OFF control allows voltage and current setting, with the supply output turned off. **Features:** •Backlit four digit LCD display •Simultaneous display of voltage and current •Auto selecting constant voltage (CV) and constant current (CC) modes •Ultra quiet convection cooling •Short circuit, overload, over voltage and thermal protection •84% efficiency at maximum output •RoHs compliant

## TENMA High Current Switch Mode Power Supplies

High current supplies are fully adjustable to 15VDC, making them suitable for communications racks, HAM radio stations, autotransformers and servicing. Efficient switch mode design provides high current, with minimal heat, in a compact lightweight package. Whisper quiet fan cooling ensures reliable, long-term operation. Dual digital display simultaneously shows output voltage and current. Front panel binding posts accepts banana plugs or spade terminals, providing convenient access. #72-7655 features banana jacks on the front panel for loads up to 5A, and heavy-duty stud posts on the rear panel handle loads to 60A. **Features:** •Bright LED display •Large 3/4" digits •Display accuracy to 0.1V, 0.1A •Excellent load and line regulation •Low ripple and noise •Overvoltage, overload, temperature and short circuit protection •Detachable IEC power cord •#72-7655 also provides remote sensing and voltage adjustment capability.

**Creep-Zit Fiberglass Wire Running Kit**

The Creep-Zit is "THE TOOL" that makes conventional fish tape obsolete and has a use in every wire/cable install job, residential or commercial. Consists of five 6' (30' total) green fiberglass rods .159" dia. retaining their memory to straight, making it go where you want, not where it wants. Four of them have a male connector on one end and a female connector on the other so they can be screwed together. The fifth one has a female connector on one end and a bullet shaped head with cross hole (bullnose) at the other end. The cross hole in the bullnose is designed to attach the wire (or the ball chain included in the kit when fishing inside walls) to it. An eggbeater (wisp) shaped head with male connector (also part of the kit) is used as a guide to keep the rods from getting stuck on obstacles and to provide a "wheel" to "creep" from side to side when turning the rod with your hand. The kit is stored in a convenient PVC heavy-duty carrying case. Rod end connectors are not covered under warranty.

# Tenma Soldering Equipment

Look to Tenma for the lowest prices on quality soldering products.

## Solder Fume Extractor

Electronic solders typically contain rosin-resin compounds and lead, which when heated may create noxious fumes. Prolonged exposure to these fumes is considered potentially harmful and may create health problems including headaches, nausea and eye irritation. The Tenma Solder Fume Extractor greatly reduces this hazard by utilizing a highly efficient fan, and an activated carbon filter. Unit includes one filter, replacement filters available. **Specifications:** •Absorption capacity: 1m<sup>3</sup>/minute •Power requirements: •110VAC 60Hz, 23W •Filter dimensions: 5.1" (H) x 5.1" (W) x 0.4" (D) •Overall dimensions: 10.6" (H) x 8.7" (W) x 6.6" (D)

Order #	Description	MSRP	Reg.	SALE

### Null Modem Cables

These cables allow two DTE or DCE devices to communicate with no conflict in data transmission. The transmit and receive signals are crossed to ensure proper data flow. Each cable is designed with a rugged, over-molded construction that provides extra strain relief and a solid connection. Foil-shielded for protection against EMI/RFI interference caused by surrounding office equipment and florescent lights. Available in a wide variety of lengths and gender combinations.

## SONY Cycle Energy Chargers and Rechargeable Batteries

Sony cycle energy rechargeable batteries are ideal for mid-drain hardware devices used frequently over long periods of time, and have an extremely low discharge rate. All cycle energy batteries are pre-charged for immediate use. The #BCG34HRE4K charger also uses a refresh technology that eliminates the "memory effect" left over by a battery that has been charged without first being fully discharged.
