SAMSUNG'S SOLID STATE DRIVES

# SPEED AND RELIABILITY IN A STATE OF THE ART DESIGN

Samsung SSDs are the easiest and most economical way to breathe new life into your existing PC.

The sophisticated storage devices use NAND-based flash memory instead of rotating magnetic disks, making them more durable, faster write/erase operations and have data storage integrity that will be maintained for years.

With major leaps forward in power efficiency, Samsung's SSDs boast the lowest idle power consumption resulting in a longer battery life, letting you get the most from your mobile PC experience.

With a simple 3-step process to upgrade to SSD, your existing data will be easily migrated over and you don't need to worry about wasting time or money on changing PCs to try to eliminate some of your PC performance woes.

With the Samsung SSD 840, you can carry on with multiple computing activities more quickly compared to using HDD, so it is ideal for laptop and desktop users.

- Start up your laptop 65% faster
- Open large Photoshop files in seconds
- Transfer and/or copy files in a fraction of the time

The Samsung SSD 840 PRO is the high-performance SSD, designed for power users or gamers who require ultimate performance when it matters most.

As the fastest and most-reliable SSD on the market, you will not only experience a more responsive game, but an altogether new PC experience.

Unbeatable performance with  
up to 300% upgraded speed.
