English Names for Korean Native Plants

# 머리말

우리는 누구나 좋은 이름을 갖기를 원하고, 또 불리기를 원합니다. 아이가 태어나면 제일 먼저 뜻과 소리를 염두에 두고 이름을 짓습니다. 또한 나쁜 이름은 법적인 절차를 거쳐 바꾸기도 합니다. 이름이 가지는 힘을 믿기 때문일 것입니다. 이름을 불리춤으로서 의미있는 존재가 된다는 시인의 시구처럼, 이름은 단순히 정보를 제공하는데 그치지 않고, 그 이름을 가진 존재의 의미와 가치를 결정짓게 됩니다. 식물의 이름도 마찬가지입니다. 단순히 식물이 가지고 있는 특징을 나타내는 것을 넘어서, 그 식물의 생태적 가치, 자라는 지역의 역사적 의미와 민족의 문화를 모두 내포하고 있습니다. 이것이 산림청과 국립수목원이 광복 70주년을 맞이하여 ‘우리 소나무의 진정한 광복’을 준비하게 된 까닭입니다.

2014년 10월 『나고야 의정서(Nagoya Protocol)』가 발표되면서, 식물의 원산지 주권은 한층 강화되었습니다. 이런 상황에서 우리나라의 식물주권은 그 어느 때보다 중요해졌으며, 다양한 방법을 통해 우리 식물 주권을 확보할 필요가 있게 되었습니다.

우리 식물의 이름은 한반도의 아픈 역사를 그대로 반영하고 있습니다. 한반도의 식물이 일본이나 중국에 비해 100년 이상 늦게 알려진 것도 있지만, 일제 강점기를 통해 많은 식물들이 일본인 학자들에 의해 연구되고, 학계에 보고되면서, 뜻하지 않게 일본식 이름을 그대로 가져가게 되었습니다. 뒤늦게 이런 이름들을 고쳐보고자 하나, 학명이 가진 특수성 때문에 변경이 쉽지 않습니다. 그러나 누구나 흔히 부를 수 있는 이름, 즉, 일반명은 그렇지 않습니다.

이에, 국립수목원에서는 한반도를 대표하는 식물을 ‘코리아(Korea)의 식물’로 세계에 적극적으로 알릴 필요가 있다고 여겨, 한국식물분류학회

전문가들과 함께 『국가표준식물목록』 작성 사업에 이어, 우리 식물에 영어 이름을 지어주는 작업을 시작하게 되었습니다. 자생식물 4,173종의 영어이름을 검토하여, 2,500종에 대해 새롭게 이름을 붙이고, 특산식물은 한국어 원산지임을 알 수 있도록 하였습니다. 또한 우리 문화와 밀접한 관계가 있는 식물과 특산 속에 대해서는 한글이름이 그대로 영어이름이 되도록 하였습니다.

『한반도 자생식물 영어이름 목록집』 발간으로, 그 동안 일본 또는 다른 나라의 식물로만 인식되었던 우리 식물들의 제대로 된 이름을 찾아주고, 이름이 없었던 식물들은 새로운 영어이름을 가지게 됨으로서, 국제사회에 우리 식물임을 소개하는 계기가 될 것입니다. 이 이름들이 확산되기 위해서는 모두 합심하여, 학술논문, 자료집, 표찰, SNS 등을 통해 많이 사용해 주는 것이 필요하며, 이를 통해 우리 식물은 합당한 이름을 가지게 되고, 우리가 진정한 이름의 주인이 될 수 있을 것입니다.

본 목록집이 나오기 까지 애써주신 국가수목유전자원목록심의회와 한국식물분류학회 전문가분들에게 감사드리고, 국립수목원 관계자들의 노고를 치하하는 바입니다.

아무쪼록 본 목록집이 우리 식물의 주권 확보에 기여할 수 있기를 바라며, 국립수목원은 앞으로도 우리 자생식물에 대한 지속적인 연구와 지원을 아끼지 않을 것을 약속드립니다.

# FOREWORD

We all want to have a good name, and to be called by a good name. When a baby is born, the first thing we do is, give a name to the baby considering the meaning and the sound. This is because we believe in the power of the name. As a phrase of a poem of a poet, call out the name, we become a meaningful existence. The name does not only provide simple meaning, but also determine the significance and the value of the existing being with the name. It is likewise with the plant's name. Plant's name shows not only the characteristics of the plant, but also the ecological value, and contains the historical meaning and the national culture of their habitat. This is why and National Arboretum have prepared 'True Independence of our pine' commemorating the Independence Day 70th Anniversary.

At the announcement of the 『Nagoya protocol』 in Oct. 2014, the sovereignty of the plants was strengthened. In this circumstance, our plants' sovereignty became more important than ever, and we realized the necessity to secure our plants' sovereignty through various methods. The names of our plants reflect the painful history of Korean peninsula. The plants of Korean peninsula were known more than 100 years later than those of Japanese and Chinese, but through the Japanese Colonial Period, plants were researched and reported by Japanese scientists, unintendedly, the names were given in Japanese style. We have tried to modify the names, but it is not easy because of the peculiarity of the scientific names. But the names we call out, the common names, they are different.

Hence, Korea National Arboretum have recognized that, it is needed to inform actively Korean peninsula typical plants as 'The plants of Korea' to the world, we have started to give English names to our plants, following to the 『Korean Plant Names Index』 preparation business with the experts of The Korean Society of

Plant Taxonomists. We have reviewed 4,173 species of native plants, and gave new names to 2,500 species, indigenous plants' names showing that the plants origin is Korea. Moreover the names of the indigenous plants and indigenous species that are closely related to our culture, we have decided to give English names literally same as the Korean names.

The publication of 『English Names for Korean native plants』, will be the opportunity to introduce these plants as our plants globally, giving proper names to our plants those were perceived as Japanese or other countries' plants, and giving names to those, which did not have any names at all. To widespread these names, we will have to work together in using these names, in treatise, materials, labels, SNS. Through these activities, our plants will have the reasonable names, and we will be the real host of the names.

Thank you to the experts of 'Korea National Plant List Committee' and 'The Korean Society of Plant Taxonomists' who have made efforts for this book to be published, and I also want to appreciate to the persons concerned of Korea National Arboretum.

I hope this book will contribute in securing the sovereignty of our plants, and the Korea National Arboretum will provide continuous research and support on our native plants in the future.

동식물의 모든 종은 이름을 갖고 있습니다. 이름이 있어야 진정한 종의 정체성을 확보하게 되고, 그 이름으로 서로 무엇을 지칭하는지 정확하게 이해할 수 있기 때문에, 종을 처음 기재할 때는 세계적으로 통용되는 라틴어 학명을 부여합니다. 동시에 그 나라 국문으로 지정된 이름이 있고, 이외에 지역이나 민간에서 부르는 통속명이 있는데 종종 혼란을 초래하곤 합니다.

우리나라 식물의 학명과 국명은 식물도감을 보면 다 알 수 있습니다. 그러나 외국인들을 위해 국제어화 된 영어로는 이름이 있는 경우도 있지만 없는 것이 대부분입니다. 그래서 외국인들이 우리 식물의 영어 이름을 물으면 궁색했던 적이 많았습니다. 그래서 누군가 언젠가는 모든 종에 대해 영어명을 부여하면 했고, 그 일을 본인이 하고 싶은 바람을 갖고 있었습니다. 하지만 재직 시절엔 강의와 연구를 하느라 여유가 없었고, 퇴임을 하고서도 방대한 작업이라 막상 엄두도 못 내고 몇 해가 흘렀습니다.

그러던 차 국립수목원에서 우리나라 식물에 대해서 영명을 부여하는 프로젝트를 수립, 본인에게 그 주요 작업을 해달라는 제의를 받게 되었습니다. 정년을 해서 시간도 여유롭고, 하고 싶은 바람도 있었지만, 정말이지 분류학자로서 뜻 깊고 가치 있는 일이라 믿었기에 선뜻 응하게 되었습니다. 그러나 그간 모든 종에 대해 불러온 영명을 조사해야 하는 일이 큰일이라 걱정이 많았는데, 이 일은 국립수목원에서 다 해 놓았답니다. 옳거니! 그럼 일의 절반은 된 셈입니다.

한 종의 이름은 학명이던 국명이던 영명이던 하나만 있어야 하고, 한 이름은 하나의 종에만 부여되어야 혼란을 피할 수 있습니다. 이것은 영명에도 똑같이 적용됩니다. 따라서 영명을 부여하는 일도 간단한 일이 아닙니다. 혹 외국인이 그 종에 대해 사용하던 영어명이 있는지를 조사해야 하고, 그 이름이 적

합한지도 봐야하고, 여기에 라틴어로 된 학명과 국명이 무엇을 의미하는지도 알아야하며, 가급적 부르기도 좋고 뜻이 좋으며 주권적인 가치도 높은 이름을 붙여야 하기 때문입니다. 그래서 이름을 선정하고 새로 붙이는 일은 많은 시간과 노력을 요하는 작업이었습니다.

국립수목원의 이 훌륭한 프로젝트에 본인이 참여할 수 있게 된 것은 특권이었습니다. 저에게 이 일을 맡겨 주신 이유미 국립수목원장님께 감사드립니다. 그간의 영명을 모으는 기초작업을 해 주신 분들과, 본인의 영명을 일일이 검토하고 편집해주신 국립수목원 및 한국식물분류학회 관계자 여러분께도 감사드립니다.

# Editor-in-Chief's Preface

All species of plants and animals have their own names, by which their true identities are established and can be communicated perfectly. The names of all the species, with species described first, are given in Latin for a worldwide usage. A local name is also given in the author's language. Often vernacular names, if any, cause a confusion in the scientific community.

The scientific and Korean names of Korean plants appear in the flora books. Some Korean plants have English names, however, most do not. When foreigners asked me the names in English, now an international language, I have often been frustrated because they do not have English names. Thus I thought that English names should be given to all Korean plant species and wished to conduct the project giving them English names. While engaged as a professor, however, due to the burden of lectures and research, I was unable to progress in this work. After my retirement, few years passed without doing anything because the job was too colossal to conduct alone.

At that time the Korean National Arboretum planned a project to give English names to the Korean plants and proposed for me to have a major part in it. Since I was somewhat free in time owing to my retirement, and had interest in the job, I accepted the proposal. I did so happily because I believed, as a plant taxonomist, it would be truly meaningful and valuable to conduct the project. I worried about documenting previously used English names, but they said it was done already, that meant half the job was already finished.

To avoid a confusion, a species should have only one name, whether scientific or local, and one name should be given to only one species. In relation to English,

it is not a simple job to give one name to each species. We have to document the English names used so far, analyze if the names are appropriate, and understand the meaning of both Latin and local names. English names should be unique and natural to call, and they need to have good meaning and sovereign value as far as possible. Thus the job of selecting and giving the names required a fair amount of time and many challenging processes.

It was my privilege to participate in this great project with the Korean National Arboretum. I appreciate Dr. You Mi Lee, the General Director of the Arboretum, who gave me this opportunity, and those who helped with the basic documentation for the job. I would like to express my deep gratitude to the authorities of the Arboretum, and the Korean Plant Taxonomy Society, who examined and edited all of my English names of Korean plants.

# 일러두기

우리 민족과 함께해 온 소나무의 영어이름으로 재패니즈 레드 파인(Japanese red pine)이 사용되고 있습니다. '줄기가 붉은 일본의 소나무'라는 뜻입니다. 세계적으로 한반도가 소나무 분포의 중심이지만 일본의 소나무가 서양인들에게 먼저 알려진 탓입니다. 이제 소나무가 한반도 중심의 나무임을 알려야 합니다.

우리 식물이 다른 나라의 식물로 알려진 경우 외에도 영어이름이 없는 식물도 있습니다. 식물주권의 확보는 한반도를 대표하는 식물을 '코리아(Korea) 식물'로 부르도록 세계에 알리는 일에서 출발합니다.

산림청 국립수목원은 우리 식물의 정체성을 확립하고 그 가치를 세계에 알리기 위해 아래와 같이 한반도 자생식물의 영어이름을 새롭게 정리했습니다.

- 한반도가 식물분포의 중심지이나 다른 국가명이 들어간 식물
- 우리 문화생활과 밀접한 관계가 있는 식물
- 한반도에만 살고 있는 특산식물
- 세계적으로 넓게 분포함에도 불구하고 특정 국가명이 들어간 식물

- ❶ 우리나라에 자생하는 관속식물 4,173 종류를 대상으로 하였으며, 목록의 배열은 국명의 한글 및 학명의 알파벳 순으로 각각 표기하였다.
- ❷ 분류군에 대한 학명과 국명은 국가표준식물목록(KPNI, The Korean Plant Names Index)을 기준으로 하였으며, 일부 분류군의 계급의 변화나 이명 처리 등에 대해서는 Tropicos, The Plant List 와 기타 문헌을 이용하여 보완 및 수정하였다.
- ❸ 국명의 로마자는 국립국어원의 ‘국어의 로마자 표기법’에 따라 표기하였으며, 각 음절은 붙임표(-) 부호를 사용하여 구분하였다.

한라감자난초	(Han-ra-gam-ja-nan-cho)
광릉골무꽃	(Gwang-reung-gol-mu-kkot)

- ❹ 영문이름은 가능한 한자어나 일본어의 영향을 받은 용어를 배제하고, 학명, 국명, 식물의 형태, 생태적 특성 및 분포 등을 반영하여 작성함을 기본으로 하였으나, 이미 전 세계적으로 널리 통용되고 있을 경우 미국 농무부 자연 자원보전 서비스의 식물 데이터 베이스 (USDA, United States Department of Agriculture, Natural Resources Conservation Service, Plants Database), 위키백과(Wikipedia), 영국왕립원예 학회의 가드닝 사전 (The New RHS Dictionary of Gardening) 등을 참고하여 반영하였다. 다만, 여러 중에서 영문이름이 혼용되는 경우에는 일부 수정하여 사용하였다.

# 일러두기

- ⑤ 지명이 포함된 식물의 영문이름은 지명을 나타내는 단어의 첫 글자를 대문자로 표기하되, 국명에서 사용된 지명을 그대로 반영함을 원칙으로 하였다. 국명에는 지명이 표시되지 않았으나, 분포지역을 근거로 작성한 영문명의 경우, 지명 전체(~도, ~산)를 포함하여 영문이름에 표기하였다.

거문도닥나무 (Geo-mun-do-dak-na-mu)	Geomundo false ohelo
거문천남성 (Geo-mun-cheon-nam-seong)	Geomun jack-in-the-pulpit
한라산참꽃나무 (Han-ra-san-cham-kkot-na-mu)	Hallasan azalea
한라고들빼기 (Han-ra-go-deul-ppae-gi)	Halla lettuce
섬시호 (Seom-si-ho)	Ulleungdo hare's ear
섬매발톱나무 (Seom-mae-bal-top-na-mu)	Jejudo barberry

- ⑥ 영문이름 내에서 인명의 표기는 가급적 배제하였으나, 부득이한 경우 및 의미가 있는 경우에는 인명 뒤에 「s」를 붙여 표기하였다.

가는갓는쟁이 (Ga-neun-gaet-neun-jaeng-i)	Gmelin's saltbush
겨이삭여뀌 (Gyeo-i-sak-yeo-kkwi)	Taquet's smartweed
줄댕강나무 (Jul-daeng-gang-na-mu)	Taihyun's abelia
장대냉이 (Jang-dae-naeng-i)	Maximowicz's berteroella

- ⑦ 국내에서 일반인들에게 널리 알려져 있고 사용되는 분류군에 대한 영문이름의 경우, 이해를 돕기 위해 국명의 로마자 표기를 그대로 영문이름으로 사용하였으며, 일반 영어이름이 있는 경우 함께 표기하였다.

갈참나무 (Gal-cham-na-mu)	Galcham oak (Oriental white oak)
개나리 (Gae-na-ri)	Gaenari (Korean goldenbell tree)
고려엉겅퀴 (Go-ryeo-eong-geong-kwi)	Gondre (Korean thistle)

- ⑧ 영문이름의 첫글자만 대문자로 표기하되, 인물명이나 지명에 대한 용어의 첫 글자는 항상 대문자로 표기하였다.

팬나무 (Paeng-na-mu)	East Asian hackberry
좀깨묵 (Jom-kke-muk)	Small Maximowicz's hololeion
세모산부추 (Se-mo-san-bu-chu)	Triangular-leaf Thunberg's chive

- ⑨ 국제명명규약 (ICN, International Code of Nomenclature for Algae, Fungi, and Plants)에 따른 비합법적으로 발표된 이름과 비정당명에 대해서는 학명 앞에 별표(\*)로 표시하였다.

# INTRODUCTION

The pine tree that have shared the fate with Korean people is called a Japanese red pine in English. It means 'Japanese pine tree with red trunk'. Internationally, it is known that the Korean peninsula is the center of pine tree habitat, but the Japanese pine tree was reported to the world before. Now is the time to inform the world that the pine trees are the main tree of Korean peninsula.

Besides Korean plants known as other country's plants, there are plants without any English common names at all. To secure the plants' sovereignty, we have to start make the world understand that our plants 'Korean plants'.

The Korea National Arboretum have classified English names of Korean peninsula to establish the identity of our plants and to inform the world their value.

- The name of plants which their habitat is Korean peninsula, but have other country's name
- The name of plants closely related to our culture and our life
- The name of plants indigenous of Korean peninsula
- The name of plants widespread worldwide but have specific country's name

- ❶ It is targeted on the 4,173 species of vascular plants that inhabit in Korea, and the arrangement of the index is in Korean name order and alphabetic order of the scientific names.
- ❷ The scientific names and Korean names of the taxon are based on the Korean Plants Names Index, and in case of the change of class and giving a synonym to a part of taxon, we used the Tropicos, The Plant List and other documentary records for the complementation and revision.
- ❸ In case of romanization of Korean names, we have inscribed following the ‘Romanization of Korean’ and we used hyphen between syllables.

한라감자난초	(Han-ra-gam-ja-nan-cho)
광릉골무꽃	(Gwang-reung-gol-mu-kkot)

- ❹ In case of English names, we have excluded the Chinese and Japanese terms as possible, and we have worked based on the scientific names, Korean Names, morphological and, ecological characteristics and distribution, but if the names were already common around the world, we have referred to the USDA (United States Department of Agriculture, Natural Resources Conservation Service, Plants Database), Wikipedia, The New RHS Dictionary of Gardening. But in case of English names used in several species, we have partly modified the names.

# INTRODUCTION

⑤ In case of English names with geographical names, we have used the capital letter for the first letter of the geographical name, and we used the Korean geographical name literally same in English. In case of the English names based on the habitat but no geographical names within the Korean name, we have used full geographical names (~do, ~san) in English names.

Geo-mun-do-dak-na-mu (거문도닥나무)	Geomundo false ohelo
Geo-mun-cheon-nam-seong (거문천남성)	Geomun jack-in-the-pulpit
Han-ra-san-cham-kkot-na-mu (한라산참꽃나무)	Hallasan azalea
Han-ra-go-deul-ppae-gi (한라고들빼기)	Halla lettuce
Seom-si-ho (섬시호)	Ulleungdo hare's ear
Seom-mae-bal-top-na-mu (섬매발톱나무)	Jejudo barberry

⑥ We have excluded a person's name as possible in the English names, but if necessary and if needed in the meaning, we have put 「's」 after the person's name.

Ga-neun-gaet-neun-jaeng-i (가는갯는쟁이)	Gmelin's saltbush
Gyeo-i-sak-yeo-kkwi (겨이삭여뀌)	Taquet's smartweed
Jul-daeng-gang-na-mu (줄댕강나무)	Taihyun's abelia
Jang-dae-naeng-i (장대냉이)	Maximowicz's berteroella

⑦ In case of English names of the taxon used and known widely to domestic people, we used romanization of the Korean names literally same in English names in order to facilitate understanding, and specified common English names.

Gal-cham-na-mu (갈참나무)	Galcham oak (Oriental white oak)
Gae-na-ri (개나리)	Gaenari (Korean goldenbell tree)
Go-ryeo-eong-geong-kwi (고려엉겅퀴)	Gondre (Korean thistle)

- ⑧ We have used the capital letter in the first letter of English names, and always capital letter for a person's names or geographical names.

Geom-eun-gu-sang (검은구상)	Black-cone Korean fir
Paeng-na-mu (팽나무)	East Asian hackberry
Jom-kke-muk (좁게묵)	Small Maximowicz's hololeion
Se-mo-san-bu-chu (세모산부추)	Triangular-leaf Thunberg's chive

- ⑨ In case of the invalidly published and illegitimate names according to the ICN, International Code of Nomenclature for Algae, Fungi, and Plants, we have marked (\*) in front of the scientific name.
