TRANSLATOR'S PREFACE.

THIS book is a translation of those parts of Schleicher's 'Compendium der vergleichenden Grammatik der Indo-germanischen sprachen' which treat directly of the Indo-European original language, Sanskrit, Greek, and Latin: it was undertaken for the use of students of Greek and Latin Philology, on the suggestion of Mr. Peile, M.A., of Christ's College, Cambridge, to whom I am indebted for several hints and corrections. My thanks are due to Herr Gustav Voigt also, for help kindly given.

I shall be glad if readers will point out any mistakes in the translation.

HERBERT BENDALL.

LIVERPOOL COLLEGE,
Oct. 1874.

99906

PREFACE TO THE FIRST EDITION.

THIS work is meant to be an elementary handbook for lectures and self-instruction. The want of such a work has been hitherto widely felt. The state of Indo-European Philology is now such that it has become possible to write a compendium of the comparative grammar of the Indo-European languages. After we have discarded that part which is still doubtful, there remains a large store of knowledge, embracing the different sides which language offers to scientific treatment: this knowledge will, in my opinion, stand unshaken for all time. The chief object of a compendium of the Indo-European languages is to collect and arrange in a short and appropriate form, and yet in an intelligible manner, these results of Indo-European Philology. Where, however, it is impossible to avoid mentioning what is obscure and doubtful, it will be expressly characterized as such.

It is no slight task to compose a first handbook of this kind treating of the formation of the Indo-European languages: whether the writer of the present work has succeeded in temporarily satisfying the want, others must decide; but he begs them to take it into consideration that his book is a first essay in the direction pointed out.

The following account of the origin of my book may to some extent at least show that I have honestly encountered the difficulties of the task.

I have been Academical Professor for fifteen years, and have lectured on Indo-European grammar from the outset; partly sketching out grammars of particular Indo-European languages, from a philological point of view, partly writing a grammar of the languages which collectively form a speech-stem, *i.e.* a so-called Comparative Grammar. To infer from the number of hearers whom even these latter lectures attracted, and from the perseverance and attention with which I was listened to, they must have treated the subject in a manner intelligible to beginners. I have remodelled my notes more than once. It was a real pleasure to work for my hearers and pupils here: I am indebted to their encouragement and participation for the heartiness with which I undertook the complete re-arrangement of my treatise on Comparative Grammar of Indo-European languages, which I had delivered in two sets of half-yearly lectures.

In these lectures on Indo-European grammar I felt the want of a printed elementary treatise, which should offer in the most appropriate way the necessary examples and comparative tables. Dictating, and continually writing on the black board, is wearisome both to hearers and to the lecturer. Hence the thought first occurred to me of having my paper multiplied in MS. for the use of my pupils. And from this arose by degrees what I have now completed, the composition

of a compendium especially for beginners. This book is therefore my notes repeatedly revised, and this is the point of view from which I desire it to be used and criticized.

It is to be understood that in my lectures I did not confine myself to the matter in the notes; what is printed here is merely that part which I used to dictate. Enlargements on particular points and excursus by the way I have never denied myself. Those who make use of this compendium will perhaps take this into consideration. The attempt to reduce the compass of the book to the narrowest limits possible made it a necessity to banish from it all discussions as regards different views. Generally I have attempted, whenever I could, to arrange the facts in such a way that they carried their proofs with them: moreover, the materials are so copious that even in the lectures it is difficult to find time for a controversial statement of details.

Circumstances unfortunately compelled me to finish the last preparation of the MS. for a printed compendium in a short time: but I hope that I have nevertheless written a useful book.

The design and execution of my work must speak for themselves; to discuss these points here would occupy too much space, and lengthen the compass of the preface to excess.

AUGUST SCHLEICHER.

JENA, *September*, 1861.

Lengthening of this <i>ι</i> to <i>ī</i>	35
Weakening of <i>a</i> to <i>υ</i>	35
§ 19. Fundamental vowel; <i>ε</i> = origl. <i>a</i>	36
<i>o</i> = origl. <i>a</i>	37

	PAGE
o beside a dialectically	37
a = origl. a	37
a beside ε	37
a = a + nasal	38
§ 20. Step-formations of a. First step: 1. ε	38
raised to o. 2. a raised to ā, η	39
Second step, ω	40
§ 21. 2. i-scale; fundamental vowel ι	40
Lengthening of ι to ī	41
§ 22. Step-formations of ι. First step: ι raised to ει, αι	41
Second step. ι raised to ου	42
§ 23. u-scale. Fundamental vowel υ. Lengthening of υ to ū.	42
<i>Note.</i> —ι in place of υ	43
§ 24. Step-formations of υ. First step, υ raised to ευ, αυ	43
Second step: υ raised to ου	44
αυ, ωυ, ω as second steps of υ	44
<i>Note.</i> —Initial ου, ευ = origl. va.	45
§ 25. Vowel Sound-laws: general	45
§ 26 a. Insertion of ι in preceding syllable in case of termina- tion -σι	46
§ 26 b. Vocalisation and transposition of γ, υ. 1. γ becomes ι, υ becomes υ	46
2. ε = γ	47
3. Transposition and assimilation of origl. γ and υ after υ, ζ, λ	48
§ 27. Loss of γ, υ, s; consequent vowel-accumulations and con- tractions	49
§ 28. Compensatory lengthening. 1. Compensatory lengthening after loss of n before s	50
2. Compensatory lengthening <i>in medio</i> after loss of s from after λ, μ, υ	50
3. Compensatory lengthening in nom. sing.	50

	PAGE
§ 29. 1. Vowel-insertion	51
2. Vowel-prefixure	52
§ 30. LATIN. Table of Sounds	53
§ 31. Vowels	54
§ 32. Examples—1. <i>a</i> -scale. 1. Loss	55
2. Weakening of <i>a</i> to <i>i</i>	56
3. Weakening of <i>a</i> to <i>u</i> ; decline of <i>a</i> to <i>o</i> , <i>u</i> , <i>ü</i> , <i>i</i>	57
<i>u</i> for the <i>o</i> of the older language	57
<i>o</i> retained after <i>v</i> , <i>u</i>	58
§ 33. Fundamental vowel. 1. <i>a</i> = origl. <i>a</i>	58
2. <i>o</i> = origl. <i>a</i>	58
<i>o</i> after <i>v</i>	58
<i>so</i> = origl. <i>sva</i>	58
<i>o</i> before <i>v</i> ; <i>o</i> in other combinations; <i>o</i> , later <i>u</i> , in final stem- and word-formative elements	59
3. <i>e</i> = origl. <i>a</i>	59
§ 34. Step-formations of origl. <i>a</i> . 1. <i>e</i> raised to <i>o</i>	60
2. <i>ē</i> = origl. <i>ā</i>	61
3. <i>ā</i> = origl. <i>ā</i>	61
4. <i>ō</i> = origl. <i>ā</i>	62
5. <i>ū</i> = origl. <i>ā</i>	62
§ 35. 2. <i>i</i> -scale	63
Fundamental vowel <i>i</i>	63
Dulling of <i>i</i> to <i>e</i>	63
First step: <i>i</i> raised to <i>ei</i> , <i>ī</i> , <i>ē</i> ; further to <i>ai</i> , <i>ae</i>	64
Second step: <i>i</i> raised to <i>oi</i> , <i>oe</i> , <i>ū</i>	65
§ 36. 3. <i>u</i> -scale	65
Fundamental vowel <i>u</i>	65
Weakening of <i>u</i> to <i>ü</i> , <i>i</i>	65
<i>Note</i> .— <i>ū</i> as a lengthening of <i>u</i>	66
First step: <i>u</i> raised to <i>eu</i> , for which occur <i>ou</i> , <i>ū</i>	66
<i>u</i> raised to <i>au</i>	67
Second step: <i>u</i> raised to <i>ou</i> , <i>ū</i> , coinciding with First step	67

	PAGE
§ 37. Vowel Sound-Laws	68
Hiatus; contraction; <i>u</i> and <i>i</i> , <i>e</i> remain before vowels . . .	68
§ 38. Assimilation: relationship of vowels to consonants	68
<i>o</i> near <i>u</i> , <i>v</i> ; <i>u</i> near labials, <i>m</i> , <i>l</i>	69
<i>e</i> in final syllables before nasals and two or more consonants;	
<i>o</i> before <i>r</i>	70
Fluctuation of <i>e</i> and <i>u</i> before <i>nt</i> , <i>nd</i> ; <i>i</i> before <i>n</i>	70
Dissimilation	70
§ 39. Final loss of consonants	70
1. Compensatory lengthening	71
2. Contraction	71
§ 40. Vowel-weakening	71
<i>a</i> weakened to <i>e</i> , <i>i</i> , to <i>u</i> ; <i>ā</i> to <i>ē</i>	72
<i>ae</i> to <i>ī</i> ; <i>au</i> to <i>ō</i> , <i>ū</i> : weakening and shortening of longer	
vowels and diphthongs to <i>i</i>	72
Weakening of <i>o</i> , <i>u</i> , to <i>i</i> before secondary suffixes and in	
compounds	72
§ 41. Shortening of vowels in unaccented final syllables	72
§ 42. Loss of final vowels	73
Medial loss of vowels	73
§ 43. Auxiliary vowels	74

b. Complete assimilation of following to foregoing sounds: of F, y, σ ; $\tau\tau = \tau y, \theta y, \kappa y, \chi y, \delta\delta = \delta y, \gamma y$. . .	117
c. Partial assimilation of foregoing to following sounds, before τ, σ , only mutes can stand, before δ only sonants, before θ only aspirates. Before ν labials pass over into their labial; ν before labials becomes μ ; τ, δ, θ , before μ often become σ ; κ, χ , before μ become γ ; aspiration before nasals, ρ, λ ; τ before ι becomes σ , sometimes also before ν	119
d. Partial assimilation of following to preceding sounds; $\delta y = \zeta$; aspiration of unaspirated consonants on acct. of preceding prolonged sounds.	121
e. Simultaneous assimilation, partial and complete, of sounds to one another; γy to ζ (ζ is not $= \beta y$); $\tau y,$ $\theta y, \kappa y, \chi y$ to $\sigma\sigma$	122
$\sigma\sigma$ apparently $= \gamma y$	123
$\sigma\sigma$ not $= \pi y$	123
f. Apparent sound-insertion between consonants coming together: $\nu\rho, \mu\rho, \mu\lambda$, become $\nu\delta\rho, \mu\beta\rho, \mu\beta\lambda$, for which $\beta\rho, \beta\lambda$ also occur ($\pi\tau$ in <i>initio</i> for π) . . .	123
g. Elision of σ between consonants; loss of τ, ν , between vowels	124
2. Dissimilation; dentals before τ, θ , to σ ; avoidance of two aspirates one after the other; avoidance of two similar or like consonants separated by vowels . . .	124
3. Aspirates; retrogression of aspiration upon τ beginning a root.	125
4. Law of reduplication.	125
§ 69. Termination. Only σ, ν and ρ end a word; τ cast off or changed into σ ; θ changed to σ	126
τ falls off, sometimes also other consonants; m becomes ν ; rejection of the last consonant from final groups of consonants; ν ἐφέλκυστικόν, etc.	126

INTRODUCTION.

I. Grammar forms one part of the science of language: this science is itself a part of the natural history of Man. Its method is in substance that of natural science generally; it consists in accurate investigation of our object and in conclusions founded upon that investigation. One of the chief problems of the science of language is the inquiry into, and description of the classes of languages or speech-stems, that is, of the languages which are derived from one and the same original tongue, and the arrangement of these classes according to a natural system. In proportion to the remainder but few speech-stems have hitherto been accurately investigated, so that the solution of this chief problem of the science must be looked for only in the future.

By grammar we mean the scientific comprehension and explanation of the sound, the form, the function of words and their parts, and the construction of sentences. Grammar therefore treats of the knowledge of sounds, or Phonology; of forms, or Morphology; of functions, or the science of meaning and relation, and syntax. The subject of grammar may be language in general, or one particular language or group of languages; grammar may be universal or special: it will in most cases be concerned in explaining the language as a product of growth, and will thus have to investigate and lay down the development of the language according to its laws. This is its exclusive province, and therefore its subject is the laying-down of the 'life of the language,' generally called historical grammar, or history of language, but more correctly 'science of the life of

a language' (of sound, form, function, and sentence), and this again may be likewise as well general as more or less special.

The grammar of the Indo-European languages is therefore a special grammar: because it treats of these languages as products of growth, and exhibits their earlier and earliest gradations, and would therefore be more accurately called a special historical grammar of Indo-European languages.

Note 1.—By comparative grammar is meant not that grammar which is merely descriptive, but that which throws light on speech-forms as far as possible, because as a rule it is not confined to the treatment of any one particular language.

Note 2.—The following work embraces only two parts, viz. scientific treatment of sounds and of forms. Indo-European function and sentence-formation we are not at present in a position to handle in the same way as in the case of the more external and intelligible branches—sounds and forms.

II. To assume one original universal language is impossible; there are rather many original languages: this is a certain result obtained by the comparative treatment of the languages of the world which have lived till now. Since languages are continually dying out, whilst no new ones practically arise, there must have been originally many more languages than at present. The number of original languages was therefore certainly far larger than has been supposed from the still-existing languages. The easiest preliminary distribution of languages which we can make is suggested by their morphological constitution.

There are—

1. Languages which are simply composed of invariable disjointed meaning-sounds, *Monosyllabic*, e.g. Chinese, Annamese, Siamese, Burmese. Such sounds we denote by *R* (radix). The Indo-European language would be in this stage of development when the word *ai-mi* (I go, εἶμι) was sounded not so, but as *i* or *i ma* (formula *R*, or *R+r*).

2. Languages which can link to these invariable sounds sounds of relation, either before, or after, or in the middle, or

III. The life of a language (generally called its 'history') falls under two heads—

1. *Development in prehistoric times.* As man has developed, so also has his language, *i.e.* the expression of his thoughts by sounds: even the simplest language is the product of a gradual growth: all higher forms of language have come out of simpler ones, the *C o n f i x a t i v e* out of the *M o n o s y l l a b i c*, the *I n f l e x i v e* out of the *C o n f i x a t i v e*.

2. *Decline in the historic period.* Language declines both in sound and in form, and in its decay changes of meaning take place alike in function and construction of sentences. The transition from the first to the second period is one of slower progress. To investigate the laws by which languages change during their life is a most important problem in the science of language, for unless we are acquainted with them we cannot possibly understand the languages in question, especially those which are still living.

Through different developments, at different points in the province of one and the same language, the self-same tongue branches out into the ramifications of the second period (whose beginning however is likewise earlier than the origin of historic tradition), and diverges into several languages (dialects): this process of differentiation may repeat itself more than once.

All these changes took place gradually and at long intervals in the life of the language, since generally all changes in language unfold themselves gradually.

The languages which spring immediately from an original language we call *f u n d a m e n t a l*; almost every *f u n d a m e n t a l*-*l a n g u a g e* has split up into *l a n g u a g e s*; all these last-named *l a n g u a g e s* may further branch into *d i a l e c t s*; and these *d i a l e c t s* into *s u b - d i a l e c t s*.

All the languages which are derived from one original-language form together a *c l a s s* of *s p e e c h* or *s p e e c h - s t e m*;

these again are sub-divided into families or branches of speech.

IV. The name of Indo-European has been given to a distinct set of languages belonging to the Asiatico-European division of the earth, and of a constitution so consistent internally, and so different from all other languages, that it is clearly and undoubtedly derived from one common original language.

Within this Indo-European class of speech however certain languages geographically allied point themselves out as more closely related to one another: thus the Indo-European speech-stem falls into three groups or divisions.

These are:

1. The Asiatic or Aryan division, comprising the Indian, Iranian (or more correctly Eranian), families of speech, very closely allied to one another. The oldest representative and fundamental-language of the Indo-European family, and generally the oldest known Indo-European language, is the Old-Indian, the language of the oldest portion of the Vêdas; later on, after it had become fixed in a more simplified form, and subject to certain rules, as a correct written language, in opposition to the peoples' dialects, called Sanskrit. We are not acquainted with Eranian in its original form: the oldest known languages of this stem are the Old-Bactrian or Zend (the Eastern), and the Old-Persian, the language of the Achaimenid cuneiform inscriptions (the western). To this family besides is related the Armenian, which we know only from a later date, and which must have branched off even in early times from the Eranian fundamental-language.

2. The south-west European division, composed of the Greek, next to which we must perhaps place the Albanian, preserved to us only in a later form; Italian (the oldest known forms of this language are the Latin,—especially important for us is the Old-Latin, as it was before the in-

roduction of the correct literary language formed under Greek influence,—the Umbrian and the Oscan), Keltic, of which family the best known, though already highly decomposed, language is the Old-Irish, Erse dating from 700 A.D. Italian and Keltic have more in common with one another than with the Greek.

3. The North-European division, composed of the Slavonic family with its closely-allied Lithuanian,—the most important language for us of this group,—and the German, widely separated from both. The oldest forms of this division are the Old-Bulgarian (Old Church-Slavonic in MSS. dating from 1100 A.D.): the Lithuanian (and of course the High-Lithuanian, South-Lithuanian, Prussian Lithuanian), first known to us 300 years ago, but clearly of far greater antiquity, and the Gothic from the fourth century. Beside the Gothic, however, are the oldest representatives of German and Norse, Old-High-German, and Old-Norse, which we may bring forward when they present earlier forms than Gothic.

The greatest number of archaic particulars in point of sounds and construction of language is found in the Asiatic division, and within it, in the Old-Indian; next in point of archaicisms (*i.e.* preservation of similarity to the original language, by having fewer strongly-developed and peculiar forms) comes the S.W.-division, in which Greek is found to be most faithful; and lastly the N.-European group, which, if regarded as a whole, may be shown to have the most characteristic development, and to be the least faithful to the original language.

By combining these facts with the above-named relationships of the Indo-European languages, and drawing inferences as to the process of separation of the Indo-European body of language in ancient times, we get the following result: The Indo-European original language differentiates first, through unequal development in different parts where it prevailed, into

two fundamental-languages, viz. the Sclavo-Teutonic, which afterwards divided itself into Teutonic and Sclavo-Lithuanian, and the Aryo-Graeco-Italo-Keltic, the remaining portion of the Indo-European language, which divided itself into Graeco-Italo-Keltic and Aryan; and the Graeco-Italo-Keltic soon split up into Greek and Italo-Keltic, while the first, the Aryan, remained undivided for some time. Later still the Sclavo-Lithuanian, the Aryan (Indo-Eranian) and Italo-Keltic, further divided themselves. It may be that at most or at all of the divisions there arose more languages than we now know of, since probably many Indo-European languages have died out through lapse of time. The further eastward an Indo-European people lives, the more archaicisms are found in its language: the further westward they have gone, the fewer archaicisms, and the more numerous new-formations are found in the language. From these and other indications we infer that the Sclavo-Teutonic race first began its wanderings westwards; next followed the Graeco-Italo-Keltic; and of the Aryans who remained behind, the Indians journeyed south-eastward, the Eranians south-westward. The home of the Indo-European original race must be sought in the highlands of Central Asia.

It is only of the Indians, who were the last to leave the parent stem, that it is quite certain that they expelled an aboriginal race from their later dwelling-place, a race of whose language much passed into their own: a similar process is highly probable in the case of many other Indo-European peoples.

The most ancient divisions of the Indo-European, up to the origin of the fundamental languages belonging to the families of speech formed from the speech-stem, may be seen in the following table (see next page). The length of the lines shows the duration of the periods, their distances from one another, the degrees of relationship.

Note.—In the present work an attempt is made to set forth the inferred Indo-European original language side by side with its really existent derived languages. Besides the advantages offered by such a plan, in setting immediately before the eyes of the student the final results of the investigation in a more concrete form, and thereby rendering easier his insight into the nature of particular Indo-European languages, there is, I think, another of no less importance gained by it, namely that it shows the baselessness of the assumption that the non-Indian Indo-European languages were derived from Old-Indian (Sanskrit), an assumption which has not yet entirely disappeared. This view has found supporters up to the present date, especially as regards Old-Baktrian (Zend). The term ‘Sanskritist,’ not seldom applied to Indo-European philologists (meaning that we concede to Sanskrit a position which it does not deserve, by deriving other languages from Sanskrit, or explaining them by it, instead of studying them fundamentally), is likewise shown to be quite inapplicable by the plan employed in the Compendium. The disadvantage of having in certain cases Indo-European original forms inferred which are more or less doubtful, does not weigh at all against the advantages which, according to our view, are attained by the arrangement of the subject used hereafter.

A form traced back to the sound-grade of the Indo-European original language, we call a fundamental-form [f.f.] (*e.g.* Lat. *generis*, f.f. *ganasas*; Gk. *γένους*, f.f. *ganasas*). Hence it is only when forms of different sound-grades are brought to one and the same sound-grade, that we can compare them with one another. When we bring forward these fundamental-forms, we do not assert that they really were once in existence.

GRAMMAR.

PHONOLOGY.

A. VOWELS.

INDO-EUROPEAN ORIGINAL-LANGUAGE.

§ 1.

Since in the citation of examples we make use not only of vowels but also of consonants, before we treat of the vowels we proceed to set forth a table of the speech-sounds collectively, arranged according to the physiology of sound, followed by the necessary remarks upon pronunciation, etc.

TABLE OF THE SOUNDS OF THE INDO-EUROPEAN ORIGINAL LANGUAGE, *i.e.* those sounds from which arose the sounds of the different Indo-European languages, according to the laws of sound-change which come into play during the life of a language, and to which accordingly, they may be traced as to a common source.

CONSONANTS.						VOWELS.
MOMENTARY SOUNDS.			PROLONGED SOUNDS.			
	UNASPIRATED. mute sonant	ASPIRATED. sonant	SPIRANTS. mute sonant	NASALS. sonant	r-SOUND. sonant	
Gutt.	<i>k</i>	<i>g</i>	<i>gh</i>			
Pal.				<i>y</i>		<i>i</i>
Ling.					<i>r</i>	
Dent.	<i>t</i>	<i>d</i>	<i>dh</i>	<i>s</i>	<i>n</i>	
Lab.	<i>p</i>	<i>b</i>	<i>bh</i>	<i>v</i>	<i>m</i>	<i>u</i>

aa, āa
ai, āi
au, āu

§ 1. *Note 1.*—The three aspirates and the vowel-diphthongs with \bar{a} (thus $\bar{a}a$, $\bar{a}i$, $\bar{a}u$) probably were wanting at an earlier period in the life of the Indo-European original language; in the most archaic state of the language, while it was yet uninflected, all the vowel-diphthongs were absent.

Thus the Indo-European original language probably possessed six momentary sounds, viz. three mutes, and three sonants; six consonantal prolonged sounds, viz. three spirants, and three so-called liquids, *i.e.* the two nasals n , m , and r (l is a secondary offshoot of r), and six vowels. At a later period, shortly before the first separation, there were nine momentary, and nine vowel-sounds. We must not overlook the numerical proportion belonging to the number of sounds.

Note 2.—Sonants (or medials) are those consonants in whose production the glottis gives a simultaneous sound: this is the case with all nasals and r - and l -sounds, whilst the momentary consonants and spirants can be pronounced with or without the accompaniment of the vocal-sound. Sonants thus have something of the vowel in their composition. The aspirates are double sounds; both sounds of which they consist, the preceding momentary consonant and the subsequent aspiration, must be heard in pronunciation.

Note 3.—The momentary consonant which precedes the pronunciation of an initial vowel—the so-called spiritus lenis, the aleph or hamza of the Semitic,—which is formed by the sudden separation of the vocal chords, should properly be represented here and in the other languages in the tables, and expressed by a special character (perhaps', after Gk. analogy). It is a consonant sound produced in the larynx alone, and must therefore be placed in a laryngal class of sounds (to which h also belongs, *v. post.* § 4). Nevertheless I have ventured to abide by the majority of Indo-European spelling-systems, and to leave this sound uncharacterized.

§ 2. VOWELS OF THE INDO-EUROPEAN LANGUAGE.

Fundamental vowel.	1st Step.	2nd Step.
1. a -scale a	$a + a = aa$	$a + aa = \bar{a}a$
2. i -scale i	$a + i = ai$	$a + ai = \bar{a}i$
3. u -scale u	$a + u = au$	$a + au = \bar{a}u$.

Note 1.—The second step occurs in the Asiatic, South-European, and North-European divisions of the Indo-European languages, and therefore in all probability traces its existence

§ 2. Goth. *guma*, i.e. **gumā*) we believe that we see an unoriginal phenomenon, which suitably to the nature of the case did not become developed in the different Indo-European languages till after their separation from the original language (not unfrequently the conformity is wanting even in this particular, cf. Sk. *bhāran*, Gr. *φέρων*, Lat. *ferens*, Goth. *baírands*, Slav. *bery*). In the original language we can cite here only the pure fundamental forms, i.e. the word preserved perfectly intact as regards all its parts (thus, e.g. *patars*, *dusmanass*, *akmans*).

EXAMPLES.

1. *a*-scale.

vak-mi (1 sg. pres.), √*vak* (speak), *va-vāk-ma* (1 sg. pf.), *vāk-s* (uox); *bhar-āmi*, *ba-bhar-mi* (I bear), *bhar-ta-s* (borne), √*bhar* (bear), *ba-bhār-ta* (3 sg. pf.), *bhār-a-s* (burden), *bhār-aya-ti* (3 sg. pres. caus. vb.; φορεῖ); *da-ta-s*, *da-tā* (datus, data), √*da* (give), *da-dā-mi* (1 sg. pres.); *dha-ta-s*, *dha-tā* (past part. pass. n. sg. m. f.), √*dha* (set), *da-dhā-mi* (1 sg. pres.), etc.

2. *i*-scale.

i-masi (1 pl. pres.), √*i* (go), *ai-mi* (I go); *vid-masi* (1 pl. pres.), √*vid* (see, know), *vaid-mi* (I see), *vaid-aya-ti* (3 sg. pres. caus. vb.), *vi-vāid-ma* (pf.); √*div* (shine), *div-am* (acc. sg. word-st. *div*, light, bright sky, Ζεύς), *dai-v-a-s* (shining, diuos, deus), etc.

3. *u*-scale.

bhug-na-s (past part. pass.), *a-bhug-am* (1 sg. aor.), √*bhug* (bend), *bhaug-āmi* (1 sg. pres.) *bu-bhāug-ma* (1 sg. pf.); *yug-a-m* (iugum), *yug-ta-s* (iunctus), √*yug* (iungere), *yu-yāug-ma* (1 sg. pf.), etc.

Note.—The agreement of Greek and Gothic proves the 2nd step in pf.; πέφευγα gives no evidence against the 2nd step, but is a Graecism for *πέφουγα; cf. forms like λέ-λοιπ-α, √λιπ, which therefore would lead us to expect ου here, because ει corresponds to ευ; v. sub Greek vowel-system.

§ 3.

VOWEL SOUND-LAWS

(i.e. influence of vowels and consonants on vowels) were not existent in the original Indo-European language.

A meeting of several vowels occurs but seldom, since hitherto

no consonants have been elided, and prepositions, like separable § 3. adverbs, stand before their verb. Nevertheless, if two vowels do come into contact with one another in consequence of word-formation, hiatus perhaps occurred in the most original state of the language; in early time, however, *a* may have become fused with following vowels: thus probably *i* (and *u*, but examples are wanting) after *a* becomes combined with it into a diphthong, in cases like *bharait* (3 sg. opt.), √*bhar* (bear), pres. st. *bhara-*, *i* is the sign of the opt.; the opt.-st. is thus *bharai-*, *t*=sf. of 3 sg. But the sequence of two vowels, of which the former is *i* or *u*, will not be considered as a hiatus, e.g. *i* and *u* (so also *ai*, *āi*, *au*, *āu*) remain unchanged before other vowels, as *i-anti* (3 pl. pres. √*i*, go), *ku-kru-anti* (3 pl. pf.) *krau-as* (neut. the hearing, √*kru*, hear).

Note.—The earliest Old-Indian points clearly to the non-avoidance of hiatus between *i*, *u* (and the diphthongs which have these vowels as their key-elements), and following vowels. We may nevertheless suppose that *iyanti*, *kukruvanti*, *krauvas* were pronounced, *i.e.* that *i* and *u* before vowels split up into *iy*, *uv*, as this pronunciation almost arises from them.

SANSKRIT.

TABULAR VIEW OF SANSKRIT SOUNDS.

§ 4.

CONSONANTS.							VOWELS.		
MOMENTARY.				PROLONGED.					
	UNASPIRATED.		ASPIRATED.		SPIRANTS.		NASALS.	<i>r</i> -& <i>l</i> -SOUND.	
	mute	sonant	mute	sonant	mute	sonant	sonant		
Gutt.	<i>k</i>	<i>g</i>	<i>kh</i>	<i>gh</i>	◌̥	<i>h</i>	<i>ñ</i>		<i>a ā</i> } <i>e āi</i> }
Pal.	<i>ḳ</i>	<i>g̣</i>	<i>kḥ</i>	<i>gḥ</i>	ç	<i>y(j)</i>	<i>ñ</i>		<i>i ī</i> }
Ling.	<i>ṭ</i>	<i>ḍ</i>	<i>tḥ</i>	<i>dḥ</i>	ṣ		<i>ṇ</i>	<i>r l</i>	<i>r r̄ l</i> } <i>ō āu</i> }
Dent.	<i>t</i>	<i>d</i>	<i>th</i>	<i>dh</i>	<i>s</i>		<i>n</i>		
Lab.	<i>p</i>	<i>b</i>	<i>ph</i>	<i>bh</i>		<i>v</i>	<i>m</i>		<i>u ū</i> }

§ 4. The nasalised pronunciation of vowels (as Fr. *en, on*) is indicated by $\tilde{\cdot}$ (\tilde{a} , \tilde{i} , etc.): this pronunciation arises through the change of a following nasal consonant according to sound-laws.

The accented syllable is marked '.

Note 1.—If we compare the above table with the table of Indo-European sounds in § 1, we shall find that the sounds collectively existed in the original language likewise (\tilde{e} =original *ai*, \tilde{o} =original *au*), but in addition to them we shall see a number of very similar unoriginal sounds, which have arisen from those original sounds according to the laws of language, and now stand side by side with them.

Note 2.—The doctrine of the Sanskrit alphabet belongs to Sanskrit special-grammar, as an appendix to the sound-rules.

Pronunciation. Known to us through the Hindu, which is on the whole a very good representative, and by means of the physiology of sounds, and the history of language.

The remarks on the pronunciation of the aspirates in § 1 hold good here also: they are distinct double sounds, and the *h* must be made audible after the momentary sounds.

We are accustomed to pronounce the momentary palatals k , g , k^h , g^h , like *tsch, dsch*, or, more accurately, like French *dj, tschh, djh*, a pronunciation which is correct only for a later state of the language; in the earlier period the correct pronunciation of k and g would be a close blending of *ky, gy*—almost like *k, g*, in German *kind, gieng* (in the case of the aspirates the aspiration is still naturally added). Our pronunciation of these sounds is nevertheless clumsy (especially before other sounds than *i, e*), and we therefore willingly abide by the somewhat incorrect traditional pronunciation, *i.e.* momentary dental + lingual spirant.

'Lingual,' for want of a better term, is used for that part of the mouth between the palate and the teeth. The momentary linguals are sounds like *t* and *d*, except that they are produced not by the teeth, but much further back towards the palate:

to effect this the tongue must be bent backwards : these sounds are called by the Hindus ' *head-sounds* ' (which has been mistranslated ' cerebral '): in the conventional European pronunciation they are not distinguished from the dentals.

Of the spirants, the exact pronunciation of ḥ (a variation fr. *s* acc. to sound-laws) is not known ; it has no equivalent in sound : we pronounce it either as *h* or not at all.

h is always audible and equivalent to a sonant, and is therefore like our *h*, but must, however, be sounded emphatically. The *h* is a fricative noise formed in the upper part of the larynx, and belongs (like ' , § 1, Note 3) to the class of laryngeal consonants. For convenience, here and in the other languages where it makes its appearance, we have placed it amongst ' Gutturals.' *h* can be produced either with or without vibration of the vocal chords, *i.e.* as a *sonant* or as a *mute*.

ç must be pronounced like *y*, but without its accompanying vocal-sound, and probably somewhat more sharply (with closer contraction of the organ), perhaps like *ch* in *sichel*; the conventional pronunciation as a sharp *sh* is wrong, and must be avoided ; ç has nothing in common with *s*.

ś = Germ. *sch*, Fr. *ch*.

Nasals. ṅ is the guttural nasal, and must therefore be pronounced like Germ. *n* in *enkel*, or *ng* in *lange* ; ṇ is the pal. nas., which must have been sounded as a close blending of *ny* (as Fr. *gn* in *campagne*) ; ṅ , the head-nasal, takes the place of formative *n*, where ṭ or ḍ follows : our pronunciation of it is unsuccessful, for we usually confuse it with *n*.

r and *l* as vowels are perhaps sounded as in Germ. *hadern*, *handeln*, pronounced with an inaudible *e* as *er*, *el* ; the existence of a strong vowel-sound in vowel *r* is expressly attested by Hindu grammarians (Benfey, *Or. und Occ.* iii. 25 *sqq.*). \bar{r} is = long *r*, and should therefore be distinguished from it by a more prolonged pronunciation. Also *r* before consonants was pronounced as a consonant, with a strongly perceptible vibration of

the chords (as in other languages, especially in Zend), which even appears in spelling as a perfect vowel (*a, i*) after *r*. (Benfey, *ib.* p. 32.)

Note.—The Bohemian likewise has *r, l*, as vowels; the Slovack dialect has, moreover, the long form of each sound.

SANSKRIT VOWELS.

Of special importance are the change of *a* to *i, ī*, and *u, ū*, and its total loss (the latter rarely happens in the case of the other vowels). In the latter cases *r* and *l* after consonants form syllables, and count as vowels; *r* is then even capable of being lengthened to *r̄* (as *i* and *u* to *ī* and *ū*).

Besides short *i* and *u*, Sanskrit has further their unoriginal lengthenings *ī, ū*; *ai* and *au* have been compressed into *ē* and *ō* (through approximation of *a* to *i* and *u*, whereby it became *e* and *o*; and through a further like assimilation of *i* and *u* to *a*, which thus passed into the same vowels *e* and *o*; from *ee, oo* arose *ē, ō*).

Here for the first time we are met by a very important law affecting the life of a language—the law of assimilation (partial and total), and by the no less frequent ‘vowel-weakening,’ a favourite change, especially in the case of *a*. The vowel-scales of the Sanskrit are now therefore as follows:—

	Weakening.	Fund.-vowel.	1st Step.	2nd Step.
1. <i>a</i> -scale	loss; <i>i, u; ī, ū</i> ;	<i>a</i>	<i>ā</i>	<i>ā</i>
2. <i>i</i> -scale		<i>i</i>	<i>ē</i>	<i>āi</i>
3. <i>u</i> -scale		<i>u</i>	<i>ō</i>	<i>āu</i>

Note.—The *a*-scale is thus enriched by one member: a negative step-formation (*i.e.* the weakening) has thereby placed itself in a parallel line with the positive.

EXAMPLES.

1. *a*-scale.

The weakening occurs principally through the influence of the accent; a similar influence is likewise exercised by assimi-

lation to *i*, *u* of the following syllable, or the preceding con- § 6. sonant has an effect equivalent to this assimilation.

Loss of *a* occurs most frequently before *r*, also after *r*, in which cases *ar* and *ra* followed by a consonant become vowel *r*; in parallel cases *al* becomes vowel *l*, *va*=*u*, *ya*=*i*; loss of *a* is however by no means confined to these instances.

Examples of complete loss of *a* are :

r=*ar*; √*bhar* (bear, pres. *bhár-āmi*, φέρω, fero), *bhr-tá-s* (n. sg. masc. part. perf. pass.); √*kar* (make, 3 sg. pres. *kar-ōti*), *krt-á-s* (made), *kā-kr-má* (1 pl. pf.); √*mar* (mori), *mrt-á-s* (mortuos, βροτός=*μρο-το-ς); st. *mā-tár-* (μητέρ-, mater), *mā-tr'-bhya-s* (matribus), *mā-tr'-śu* (μητράσι), etc.

This *r* is subsequently treated acc. to analogy of the other vowels, and thus is also lengthened; e.g. acc. pl. *mā-tr'-s* (matres, μη-τέρ-ας), *dā-tr'-n* (datores, δο-τῆρ-ας), st. *dā-tár-* (dator, δοτήρ).

l=*al* occurs only in √*kalp* (3 pres. med. *kálp-a-tē*, keep oneself right, succeed), which stands for original *karp* (v. 'Consonants'), *klp-tá-s* (n. sg. masc. past part. pass.).

r=*ra*; *prk'h-áti* (3 sg. pres.), √*prak'h* (pray, cf. Goth. *frah*, Lat. *prec*, e.g. in *prak-śyáti*, 3 sg. fut.); *prth-ú-s* (broad), √*prath* (cf. πλατ-ύ-ς, Lith. *plat-ù-s*), etc.

Note.—The Hindu grammarians treat *r*, *l*, as fundamental vowels, *ar*, *al*, as their first step-formations. As a vowel of the first step it is generally=*a* (for it often stands parallel to *ē*, *ō*, also), in the second it is perfectly=*ā*. The first step is called by the Hindu grammarians *guṇá-s* (masc. 'quality'), the second step *v'ṛddhi-s* (fem. 'increase,' √*vardh*, to increase, fmd. with sf. *ti*), expressions which have often been introduced into European works on language.

Loss of *a*, without admitting vocalisation of consonants, occurs not only before other consonants, but also before *r*, which is capable of being vocalised, in those cases where a vowel follows *r* (from *ar*); in which case, as in all others where *a* is lost before a consonant, the latter alone remains. Examples: *kā-kré*

§ 6. (1. 3. sg. pf. med.), \sqrt{kar} (make), for **kā-kar-ē*, and this fr. 1. **ka-kar-mē*, 3. **ka-kar-tē*; *kā-kr-ús* (3. pl. pf. act.), fr. **ka-kar-anti*.

Loss of *a* before other consonants, e.g. *gā-ghn-ús* (3. pl. pf.), \sqrt{han} , *ghan* (kill), for *gā-ghan-ús* (sg. *gā-ghān-a*); *gā-gm-ús* (3. pl. pf.), \sqrt{gam} (go), for **gā-gam-us* (sg. *gā-gām-a*); *s-ánti* (3. pl. pres.), \sqrt{as} (esse), for **as-anti* (as *s-unt* for **es-unt*); *s-yáti* (e.g. in *vy-ava-syáti*, he determines), for **as-yati*, \sqrt{as} , *sa*, so too *ç-yáti* for **aç-yati*, f.f. **ak-yati*, $\sqrt{aç}$, *ça* (acuere); *á-pa-pt-at* (3. sg. aor.) for **a-pa-pat-at*, \sqrt{pat} (fall, fly, $\pi\tau\text{-}\acute{\epsilon}\sigma\theta\alpha\iota$), etc.

u=va (*a* is lost and *v* becomes *u*); *uk-tá-s* (n. sg. masc. past part. pass.), \sqrt{vak} (speak, 3. sg. pres. *vák-ti*), *u-vāk-a* (3. sg. pf.) for **va-vāk-a*, *ūkús* (3 pl. pf.) for **va-vāk-ús*, f.f. **va-vak-anti*, *ávōkam* for **a-va-uk-am* (1. sg. aor.), f.f. **a-va-vak-am* (Gk. $\epsilon\acute{\iota}\pi\omicron\nu$ fr. * $\acute{\epsilon}\text{-}\text{F}\epsilon\text{-}\text{F}\epsilon\pi\text{-}\omicron\nu$); *sup-tá-s* (pf. part.), \sqrt{svap} (sleep; *sváp-iti* 3. sg. pres., *á-svap-am*, 1. sg. aor.); *urú-s* (wide, $\epsilon\upsilon\rho\acute{\upsilon}\varsigma$) for **varú-s* (comp. st. *vāriyās-*, superl. *vāriṣṭha-*), etc.

i=ya (*a* is lost and *y* becomes *i*); *iṣ-ṭá-s* (past part. pass.) for **yag-ta-s*, \sqrt{yag} (offer, worship; 3 sg. pres. *yág-ati*), *i-yāg-a* (3 sg. pf.) for **ya-yāg-a*, *iḡús* (3 pl. pf.) for **ya-yag-ús*, f.f. **ya-yag-anti*; *vidh-yati* (3 sg. pres.), \sqrt{vyadh} (wound, slay), *vi-vidh-ús* (3 pl. pf., 3 sg. = *vi-vyādh-a*), etc.

§ 7. Weakening of *a*—1. to *i* and *u* occurs before *r*, sometimes with assimilation to vowel of following syllable; weakening of *a* to *i* often occurs without influence of following sounds. *u* in certain cases corresponds to original *an*, *am* (the nasal is lost, after dulling the preceding *a* into *u*).

Examples. *gir-í-s* (mountain), \sqrt{gar} (be heavy), Zend *gairis*, both from **gar-i-s* (cf. Scl. *gor-a*, with another st.-termn.); *gur-ú-s* (heavy), cf. Gk. $\beta\alpha\rho\text{-}\acute{\upsilon}\text{-}\varsigma$, f.f. of both **gar-ú-s*, the original \sqrt{fm} . *gar* comes to light only in the Sk. step-forms of this word, e.g. *gár-iṣṭha-s* (superl. of *gurú-s*); *kur-ú* (2 imper. act.), *kur-u-tē* (3 sg. pres. med.), and other like forms of \sqrt{kar} (make),—these stand for **kar-u*, **kar-utē*, etc., whilst the latter again stand for **kar-nu*, **kar-nutē*, etc. (v. post. ‘Rules of Con-

§ 7. *stīr-ṇá-s* (past part. pass.) for *str-ṇá-s*, f.f. *star-na-s*, √*star* (strew); *dīrghá-s* for **drgha-s* (long), Zend *daregha-s*, Gk. *δολιχό-s*, etc., f.f. **dargha-s*, cf. compar. and superl. formed in Sk. with step-fmn. of √vowel *a*, compar. st. *drāgh-īyās-*, superl. st. *drāgh-iṣṭha-*.

ī as a weakening of *a* often occurs, especially in cases of roots in *a* (like its weakening to *i*), nevertheless it also often occurs in the case of a non-radical *a* belonging to formative affixes, e.g. *hī-ná-s* for **ha-na-s* (past part. pass.), √*ha* (leave, 3 sg. pres. *gá-hā-ti*); *pī-ta-s* (past part. pass.), √*pa* (drink, 3 sg. pres. *pība-ti* for **pī-pa-ti*, fr. **pa-pa-ti*); *yu-nī-más* for **yu-na-mas* (1 pl. pres.), cf. *yu-nā-ti* (3 sg. pres.), pres. st. *yu-na-*, √*yu* (iungere), etc.

Note 1.—Through this weakening are developed also roots with *i*, which originally were in *a*, e.g. Sk. *kri* (buy), e.g. pres. *krī-ṇā-ti*, fut. *krē-ṣyāti*, pf. *kīkrāy-a*, etc., thus with pure *i*, seems nevertheless to have come from original *kra=kar*, cf. Gk. *πέρ-νημι*, Lith. *perkù* (buy), where the √ with *k* is a further formation. The weakenings of original *a* are altogether not rarely formed by steps like original *i* and *u*; e.g. fr. *pī-tā-mahá-s* (masc. grandfather; on *pī-tar-*, √*pa*, v. supr.) is formed a st. *pāi-tā-maha-* (adj. grandfatherly); fr. st. *dhīr-a-* (adj. firm, stable), √*dhar* (hold), weakened to *dhīr*, sf. *-a-*, *dhāir-ya-m* (neut. stability); fr. *pur-ṇá-māsa-s* (masc. full-moon; on *pūr-ṇá-*, √*par*, v. supr.), *pāur-ṇa-māsá-* (adj. of a full-moon), etc. A change of *a*-scale to *i*- and *u*-scales is accordingly seen, especially in later formations, having arisen after the language-instinct had lost the root-forms.

Note 2.—Cf. the cases where *ī* apparently stands for *a*, though it really is a contraction of *ya*, *yā*, or an auxiliary vowel, § 15, c, f.

§ 8. The fundamental vowel *a* appears in Sk. as the commonest vowel in roots and relation-sounds, e.g. *ád-mi* (1 sg. pres.), √*ad* (edere); *ás-ti* (3 sg. pres.), √*as* (esse); *bhár-asi* (2 sg. pres.), *á-bhar-at* (3 sg. impf.), *bhár-antas* (φέρωντες, n. pl. masc. pres. part. act.), √*bhar* (bear); *áp-as* (opus), *áp-as-as* (operis); *mán-as* (μέν-ος), *mán-as-as* (**μεν-εσ-ος*, μένους); *áç-va-s*, f.f. *akvas* (equos, ἵππος for **ικFος*); *sa* (ὀ), *ta-m*, (τό-ν, *is-tu-m*); *çata-tamá-s* (centesimus), etc.

The step-formation of *a* to *ā* cannot further be analysed § 9. into first and second steps (as in Gk., Lat., Goth.), and, moreover, can scarcely—only by means of the analogy of completely corresponding words in *i* and *u*—be distinguished from lengthening. Therefore we hesitate to make the distinction between lengthening and step-formation in the case of f. vowel *a*, and accordingly probably admit many forms as steps, which would be more accurately denoted as lengthenings. The step-formation of *a* to *ā* occurs in roots and in relation-sounds.

Examples of step-formed roots with √vowel *a* are *ba-bhār-a* (3 sg. pf.) bes. *bhār-āmi* (1 sg. pres.), √*bhar* (bear); *u-vāk-a* (3 sg. pf.) bes. *vāk-ti* (3 sg. pres.), √*vak* (speak); *vās-as* (uestis) bes. *vas-tē* (3 sg. pres. med.), √*vas* (clothe); *kār-āyati* (3 sg. pres. causat. vb.) bes. *kar-ō-ti* (3 sg. pres.), √*kar* (make), etc.

Note.—The roots which end in *a* occur mostly in step-raised forms [whence arose the grammatic rule that roots in *a* appear only in pronominal functions, as *ta* (n. sg. masc. *sa*, acc. *ta-m* dem.), *ya* (n. sg. masc. ntr. *ya-s*, *ya-t* rel.), *ka* (n. acc. sg. masc. *ka-s*, *ka-m*), etc., whilst all verbal roots end in *ā*—acc. to Hindu grammarians in *ā*, *ē*, *āi*, *ō*]. Also the un-raised forms, indeed the shortened forms of these roots are not rare, e.g. *gī-gā-ti*, *gā-gā-ti* (3 sg. pres.), but *ga-tā-s* (past part. pass.), *ga-hi* (2 sg. imper.), *gā-kkhati*, f.f. *ga-skati* (3 sg. pres.), cf. *βέβαμεν*, *βάρης*, √*ga* (go); *dā-dā-mi* (1 sg. pres. *δί-δω-μι*), but *da-d-mās* for **da-da-mas* (1 pl. pres.), cf. *δί-δο-μεν*, *δό-σις*, *δο-τήρ*, *dāmus*, √*da* (give); *dā-dhā-mi* (1 sg. pres.), but *da-dh-mās*, fr. **da-dha-mas*, cf. *τί-θε-μεν*, *θέ-σις*, *θε-τός*, √*dha* (set); *ā-pā-t* (3 sg. aor.), *pā-syā-ti* (3 sg. fut.), but *pi-ba-ti* for **pi-pa-ti*, fr. **pa-pa-ti* (3 sg. pres.), cf. *πέ-πο-μαι*, *πό-σις*, √*pa* (drink); *pī-ti* (3 sg. pres.), but *pā-ti-s*, cf. *πό-σις*, Goth. *fa-th-s*, i.e. **fa-di-s*, Lith. *pā-t-s*, for **pa-ti-s* (lord), with weakening of *a* to *i* in *pi-tar-* (n. *pitā*), cf. *πα-τήρ*, f.f. *pa-tar-*, √*pa* (protect); *tī-śthā-mi*, *ΐ-στη-μι* (1 sg. pres.), but *ti-śtha-ti* for **sti-sta-ti*, fr. **sta-sta-ti* (3 sg. pres.), with weakening of *a* to *i* in *sthi-tā-s*, f.f. **sta-tā-s*, cf. *στᾶ-τός*, *stā-tu-s*, √*stha*, original *sta* (stare), etc. Here accordingly, as in many other like cases, the root-forms are evidently *ga*, *dha*, *da*, *pa*, *pa*, *stha*; so too *a* is everywhere to be assumed to be the root-sound, even where it happens that the raised forms only are seen in

§ 9. the existing language. Cf. my treatise on 'a-roots in Indo-germanic,' Beitr. ii. 92-99.

a as a sound expressing relation is found raised in termin. *a* of pres. st. *bhārā-mi* (1 sg. pres.), *bhārā-masi* (1 pl. pres.) bes. *bhāra-si* (2 sg. pres.), *bhāra-ti* (3 sg. pres.), etc., *bhāra-* is pres. st. of √ *bhar* (bear); in almost all cases of the fem. of *a-* st., e.g. *nāv-ā nāv-ām* (n. acc. sg. fem. nou-a, *véFa*) bes. *nava-s nava-m* (n. acc. sg. masc.), st. *nava-* (nouos); *áç-vā* (equa) bes. *áç-va-s* (equos), st. *áç-va-* (*ak-va-*), and generally before certain case-sff., e.g. *dēvā-s*, earlier *dē-vā-sas* (n. pl.) bes. *dēvā-s* (n. sg.), st. *dēvā-* (deus); further in final syllables of sundry consonantal noun-stems before certain case-sff., e.g. *dā-tār-am* (acc. sg.), *dā-tār-as* (n. pl.), fr. st. *dā-tār-* (da-tor), which appears pure in e.g. *dā-tār-i* (loc. sg.), in *dā-tr-bhis* (instr. pl.), *dā-tr-é* (d. sg.), and others it is weakened to *dā-tr*.

§ 10. 2. *i*-scale.

Fundamental vowel *i*; *i-más*, cf. *ἴ-μεν* (1 pl. pres.), √ *i* (*i-re*); *vid-más* (1 pl. pres.), cf. *ἴσ-μεν*, Hom. *ἴδ-μεν*, √ *vid* (*uid-ere*, *scire*); *viç-āti* (3 sg. pres.), *viç-as* (n. pl. people, husbandmen), √ *viç* (*go in*, *dwel*); *div-am div-ás* (acc. g. sg. of n. *dyāu-s*, *sky*), √ *div* (*shine*; cf. *ΔιF-ός*, similarly fr. *Ζεύς* = **Δyeus*); *pák-ti-s* (fem. coctio), cf. *πέπ-σι-ς* for **πεπ-τι-ς*, √ *pak*, *πεπ*, origl. *kak*, cf. Lat. *coc*, Lith. *kep* (*coquere*), formed through sf. *-ti-*, f.f. therefore *kak-ti-s*.

ī is not seldom a lengthening of genuine *i*, just as we have already found it to be a lengthening of *i* = *a*. The laws under which this lengthening takes place are not discovered in every instance. The lengthened *i* is often interchanged with the unlengthened *i*, and is subject to step-formation and change (to *iy*, *y*), like the latter.

In cases like *pátī-n* (acc. pl. msc.), f.f. *pati-ms*, st. *pāti-* (lord); *páktī-s* (acc. pl. fem.), f.f. *pakti-ms*, st. *pákti-* (coctio), we clearly see a compensatory lengthening, v. post. (§ 15, d), where also the lengthening bef. *y* is yet to be mentioned (§ 15, a), as

e.g. *ī-yāt* bes. *i-yāt* (3 sg. opt.) \sqrt{i} (ire). Bef. final *r* in noun-§ 10. stt., as bef. *r* folld. by a sf. which begins with a conson., lengthening occurs in the case of *i* and *u*, e.g. st. *gir-* (speech; acc. sg. *gir-am*), n. sg. *gīr* for **gir-s*, loc. pl. *gīr-śú*, instr. pl. *gīr-bhis* for **gir-su*, **gir-bhis*.

So also in roots *ī* appears bes. *i*, and is grammatically arbitrary, since in these cases the \sqrt{fm} . is usually characterized by the long vowel, as e.g. \sqrt{bhi} , not *bhī* (frighten), cf. *bi-bhi-más* and *bi-bhī-mas* (1 pl. pres.; 3 sg. *bi-bhē-ti*); in other roots it happens that only the lengthened vowel appears, e.g. *nī-tá-s* (past part. pass.), \sqrt{ni} (*nī* acc. to Grammarians and Dictt.; 'lead'); *prī-tá-s*, \sqrt{pri} (*prī*, delight), etc.

Note 1.—Root-fms. with final vowels are particularly often mentioned in the lengthened fm. in gramm. and dictt., because the lengthening was particularly popular in these cases. On the unoriginality of *ī* and *ū* in Indo-Eur., cf. my remarks in *Beitr.* i. 328–333.

Note 2.—On *tr-tīya-s* (*ter-tiu-s*), in wh. *tr* can be taken as a weakening fr. *tri* (st. of numeral 3), v. sub. 'Numerals.'

The 1st step of *i* is in Sk. *ē*, e.g. *ē-mi* (*εἶ-μι*), f.f. *ai-mi*, § 11. \sqrt{i} (ire); *véd-a* (*Foīda*), *véd-a-s* (n. sg.; sacred writings of the Hindus, *Vēda*), \sqrt{vid} (see, know); *vi-vēç-a* (3 sg. pf.), *vēc-a-s* (n. sg. house, cf. *Foīk-o-s*, *uīc-u-s*), f.f. *vaik-a-s*, $\sqrt{viç}$ (go in); *dēv-á-s* (deus), f.f. *daiv-a-s*, \sqrt{div} (shine); *pák-tē-s* (g. sg.), *pák-ti-s* (coctio), *pát-ē-s* (g. sg.), *pát-i-s* (lord); *bi-bhē-ti* (3 sg. pres. redupl.), \sqrt{bhi} (frighten); *nē-tra-m* (eye, lit. 'the guiding one'), *náy-ati* (3 sg. pres.), *nay*=*nē* (v. post. § 14, d), \sqrt{ni} (lead); *cé-tē* (*κεῖ-ται* 3 sg. pres. med.), $\sqrt{çi}$ (rest, lie), etc.

The 2nd step of *i* is in Sk. *āi*, e.g. *vāiç-ya-s* (man of third caste), $\sqrt{viç}$ (go in; cf. *vīç-as* and *vēç-a-s*); *vāid-ya-s* (vēdic, learned), \sqrt{vid} (see, know; cf. *Véd-a-s*); *dāiv-a-s* (godly), whence *dāiv-a-m* (destiny), st. *dēv-á-* (deus), \sqrt{div} (shine); *çāiv-a-s* (belonging to the god *Çiva*, *Çiva*-worshipper), fr. *Çivá-s* (the god *Çiva*); *vāiṣṇavá-s* (belonging to Vishnu, Vishnu-worshipper

§ 11. fr. *Vīṣṇu-s* (the god Vishnu); bef. vowels not *ai* but *ay* is found (§ 14), e.g. *nāy-aka-s* (masc. leader), *nāy-āya-ti* (3 sg. pres. causat. st.), \sqrt{ni} (lead), etc.

§ 12. 3. *u*-scale.

This scale, in all its parts, runs parallel to the *i*-scale, also the lengthening of *u* to \bar{u} occurs here, like *i* to \bar{i} above.

Fund. vowel *u*, e.g. *buddhá-s* for **budh-ta-s* (past part. pass.), *bu-budh-é* (1, 3 sg. pf. med.), \sqrt{budh} (learn, know); *tud-āti* (3 sg. pres.), \sqrt{tud} (thump); *yug-ā-m* (iugum, ζυγόν), *yuk-tá-s* (past part. pass.) for **yug-ta-s* (iunctus), *á-yuḡ-at* (3 sg. aor.), $\sqrt{yuḡ}$, *yug* (iungere); *su-tá-s* (past part. pass.), \sqrt{su} (produce, sow); *ṣru-tá-s*, κλυ-τό-ς (past part. pass.), *ṣru-dhí* (vēd. 2 sg. imper. aor. κλυ-θι), $\sqrt{ṣru}$ (hear), etc. In pres. st. *ṣr-ṇu-*, e.g. *ṣr-ṇó-mi* (1 sg. pres.), $\sqrt{ṣru}$ (hear), *ru* is exceptionally weakened to *r*, by complete loss of *u*.

The lengthening of *u* to \bar{u} occurs here, just as in the *i*-scale *i* becomes \bar{i} , e.g. *á-bhū-t* (ἔ-φν(τ), 3 sg. aor.), *bhū-tá-s*, *bhū-tá-m* (masc. ntr. past part. pass.), \sqrt{bhu} (*bhū*, be), cf. φῦ-τό-ν, *fū-turu-s*; *sū-nú-s* (son), cf. Lith. *sūnūs*, Goth. *sunus*, \sqrt{su} (bear, sow, sts. also given as *sū*); *sū-nū-n* fr. **su-nu-ns* (acc. pl.), Goth. *sununs*, st. *sūnú-* (n. sg. *sū-nú-s*, cf. § 15, d). Like *i*, so *u* bef. *r*, and bef. *r*+conson. in noun-stt. is lengthened (§ 10), e.g. st. *dhur-* (fore-part of a coach-pole, e.g. acc. sg. *dhúr-am*), n. *dhūr* for **dhur-s*, instr. pl. *dhūr-bhís* for **dhur-bís*, etc.

§ 13. 1. step \bar{o} , e.g. *bódh-ati* (3 sg. pres.), \sqrt{budh} (learn, know); *pra-tōd-a-s* (masc. goad), \sqrt{tud} (push); *yu-yóḡ-a* (1, 3 sg. pf.), *yóḡ-a-s* (joining, speculation), $\sqrt{yuḡ}$ (iungere); *bhāv-ati* (3 sg. pres.), *á-bhav-at* (3 sg. pf.), *bhav*=*bhō* (v. § 14, d), \sqrt{bhu} (be); *sōś-yáti* (3 sg. fut.), \sqrt{su} (bring forth); *cró-tra-m* (ntr. ear), $\sqrt{ṣru}$ (hear), *sū-nó-s* (g. sg.), st. *sūnú-* (n. sg. *sū-nú-s*, son), cf. Lith. *sūnaús*, Goth. *sunaus*, etc.

2. step \bar{au} , e.g. *bāuddhá-s* (masc. Buddhist) fr. *buddhá-s* (past part. pass. n. propr. *Buddha*), \sqrt{budh} (know); *á-tāut-sam* for **a-tāud-sam* (1 sg. aor.), \sqrt{tud} (push); *yāug-ika-s* (adj. fr. *yóḡa-s*

supr.), st. *yōga-* √*yug* (iungere); *bhāv-a-s* (being, nature), § 13. *bhāv*=*bhāu* (v. § 14, d), √*bhu* (be); *sāu-ti* (3 sg. pres.), *su-śāv-a* (1, 3 sg. pf.) for **su-sāv-a* (v. sub. consonn.), *sāv*=*sāu* (v. § 14, d), √*su* (bring forth); *á-ṣrāu-śam* (1 sg. aor. compos.), √*ṣru* (hear), etc.

Note.—“*ī* and *ū* are subject to step-formation only when they are at the end of roots,” is the rule of Sk. grammar, *i.e.* they are in these cases lengthenings of real *i*, *u*; as medial root-sounds however, they are felt by the language-instinct to be unorigl., and are therefore not treated like genuine *i*, *u*. Real *i* and *u* appear besides only before root-termns. which consist of one consonant.

VOWEL SOUND-LAWS.

§ 14.

Note.—Only the most important Sk. sound-laws are here mentioned—those which operate within the word: the changes undergone by the termn. of a word in consequence of its place in a sentence belong to the department of Sk. special-grammar, not to the Indo-Eur. (the so-called ‘Comparative’) Grammar.

1. Laws of the concurrence of vowels.

Fundamental law: Sk. permits hiatus in its earliest remains of language alone (in the Vēdic hymns), where we find even two like vowels in juxtaposition. In classical Sk. hiatus is avoided, a. by contraction, b. by loss of the former vowel, c. by separation, d. by change of vowel to corresponding spirant.

Contraction occurs when *a* happens to stand before another vowel, except in those cases where *a* is lost bef. the following vowel. Change to the consonn. takes place when *i*, *u* (including their furthest formations *ē*[=*ai*], *ō*[=*au*], *āi*, *āu*). This contrast between *a* and *i*, *u*, arises from the fact that *a* has no corresponding spirant, whereas *i*, *u*, have by their side *y*, *v*, which are only different from them through a slight distinction in pronunciation; the change from *i*, *u*, to *y*, *v*, is through intermediate *iy*, *uv*.

a. Exx. of contraction: pres. st. *bhāra-+i* of opt. mood = *bhārē-*, e.g. *bhārē-t* fr. **bhara-i-t* (3 sg. opt. pres., √*bhar*, bear);

§ 14. noun st. *áçva-+i* of loc. case=*áçvē* (loc. sg. of n. sg. *áçva-s*, equos), etc.

Note.—v. older peculiar contractions post. (§ 15, c).

b. Loss of *a* occurs e.g. in cases like *dhanín-* (rich, n. sg. masc. *dhaní*), fr. st. *dhána-* (neutr. n. sg. *dhána-m*, wealth)+sf. *in*; only bef. sf. *ya* is *a* regularly lost, e.g. st. *dhán-ya-* (adj. rich, n. sg. masc. *dhán-ya-s*), from same st. *dhána-*. Roots in *a* do permit this loss of *a* not unfrequently, e.g. *da-d-más*, *da-dh-más* (1 pl. pres. act.), fr. pres. stt. *da-da-*, *da-dha-* (1 sg. *dá-dā-mi*, *dá-dhā-mi*), \sqrt{da} (give), \sqrt{dha} (set); so also in pf. they lose their termn., and subsequently even assume an auxil. vowel *i*, as if they ended in a conson., *da-d-i-má*, *da-dh-i-má* (1 pl. pf.), like *tu-tud-i-má*, \sqrt{tud} (push), so that it becomes probable that *a* was lost bef. *i*, and not *ma*, but *ima*, etc., was considered to be the termn.

c. The splitting-up of *i* and *u* (and of their lengthenings \bar{i} , \bar{u} ,—perh. it is more correct to suppose no lengthening to take place before vowels) to *iy*, *uv*, is retained where these vowels are radical in monosyll. words, more rarely also in ordinary Sk. otherwise, i.e. when two consonn. stand before the vowel.

Exx. : *bhiy-i* (loc. sg.), cf. n. sg. *bhī-s* (fear), st. thus *bhī-*; *iy-áy-a* (3 sg. pf.), \sqrt{i} (go), fr. **i-āi-a*; *āi* is \sqrt{i} in 2nd step, *i* in fund. fm.

çu-çruv-ús (3 pl. pf.), $\sqrt{çru}$ (hear), f.f. *ku-kru-anti*; *āp-nuv-ānti* (3 pl. pres. fmd. by *nu* fr. $\sqrt{āp}$, work); *bhruv-i* (loc. sg.), n. sg. *bhrū-s* (\acute{o} - ϕ ρ \acute{u} \acute{s}), st. therefore *bhrū-*.

Note.—*y-anti* (3 pl. ind. pres.), \sqrt{i} , contrary to rule where we should have expected *iy-anti*; *i* is here exceptionally treated according to the plan laid down below.

d. The change into corresponding semi-vowel is regular in ordinary Sk., that is, occurs exclusively in the case of *i* and *u* as 2nd part of diphthongs *e* (= *ai*), *āi*, *ō* (= *au*), *āu*, e.g.

pákty-ā (instr. sg. of n. sg. *pákti-s*, coctio) for **pakti-ā*, *ni-ny-é* (1, 3 sg. pf. med.), \sqrt{ni} (*nī*, lead) for **ni-ni-ē*.

*Fair usage policy applies

§ 15. b. *iy* sometimes occurs instead of *y*, and also *īy* with the favourite vowel-lengthening bef. *y*.

After *a* in certain cases *iy* (with *a* or *ā* therefore *ēy*) instead of *y* (with *a* or *ā* therefore *ay*, *āy*), e.g. pres. st. in *a* † opt. element *ya* forms not *-a-ya*, but *-a-īya*, i.e. *-ēya*, e.g. *bōdhēyam* for **bōdha-ya-m* (1 sg. opt. pres.), pres. st. *bodha-*, √*budh* (learn, know); *dē-ya-s* (part. necessitatis, n. sg. masc.) for **dā-ya-s*, st. *dā-ya*, consisting of step-formed √*dā* (give), and sf. *ya*; *gāṅgēya-s* (found in or on the Ganges), fr. *gāṅgā* (nom. pr. Ganges), step-fmd. *gāṅgā* † sf. *ya*, for **gāṅgā-ya-s*.

Also after consonn. occurs *īy* for *y*, thus in compar. st. fmd. with origl. sf. *yans*, e.g. st. *lāghīyās-* (n. sf. masc. *lāghīyān*), fr. *lāghú-s* (light) = *é-λαχύ-s*, for **lāgh-yās-*, cf. *é-λάσσων* for **λαχ-γων*, and superl. *lāgh-iś-ṭha-s*, *é-λάχ-ισ-το-s*, where *is-* is a relic of *-yas-*, *-yās-*. So moreover the sf. *ya* has also a fm. *īya*, e.g. st. *karaṇ-īya-* (faciendus) for **karan-ya-*, st. *kāra-ṇa*, which loses its termn. bef. *ya* (§ 14, 1, b), etc.

Note.—*īy=y* is not developed in Indian until after the division of Aryan into Ind. and Eran.; the Zend, which stands so close to Old-Ind., still has *y=Sk. īy*.

c. *yā* was sometimes compressed into *ī*. So esp. in fem. stt. in *ī*, which prob. can only be = *yā*, e.g. *bhārantī* (the bearing one, f.) = **bharant-yā* = *φέρουσα* = **φεροντ-yā*; *gānitṛī* = **gānitṛ-yā* fr. **gān-i-tar-ya* (genetrix) = *γενέτειρα*, i.e. **γενετερ-ya*, etc., *ya-* stt. fr. usual masc. stt., Sk. *bhārant-*, *gāni-tār-*, Gk. *φέρουτ-*, *γενε-τήρ-*; *dēvī* = **dāivyā* (dea), cf. Lith. *deivė*, i.e. **deivyā*, f.f. *dāiv-yā* (once 'goddess,' now = 'ghost'), later fmn. fr. st. *dēvā-*, Lith. *dėva*, f.f. *dāiva-* (deus); Vēd. *āvī* (instr. sg. for Sk. *āvī-ā*, both fr. *āvīā* (*āvī-s*, *ois*, *ā* sf. of instr. sg.)), etc.: *ī* is clearly a weaker vowel-fm. for *yā* in opt., e.g. 3 sg. act. *bibhr-yā-t*, but 3 sg. med. *bibhr-ī-ta*, √*bhar* (bear, pres. st. *bibhar-*), etc.

Sometimes *ī* is a product of a similar earlier contraction of *i-a* or *ya* after loss of conson. betw. *i* and *a*, as in *sīd-āti* (3 sg. pres.), fr. **si-adati* for **si-sad-ati*, √*sad* (sit, pf. *sa-sād-a*, aor.

á-sad-at), like *ἴζω* fr. **iéζω* = **si-sed-yō*, f.f. *si-sad-yami*, Lat. *sīd-o* § 15. fr. **sisdo* for *si-sed-o*, f.f. **si-sad-ami* (with not unfreq. pres. redupln.), also the *īr* now used as a root, e.g. *īr-té* (3 pres. med., rises, causat. *īr-áyati*, he arouses), is recognized as a product of pres. redupln.; *īr* = **i-ar*, **iyar*, \sqrt{ar} (go), etc.

d. Compensatory lengthening. Esp. in declens.-fms. (n. sg., acc. pl.) is found lengthening of the foregoing vowel after loss of conson. Exx.:

N. sg. *rājā* for **rājan-s*, st. *rājan-* (masc. rex) † nom. sf. *s*, cf. *ποιμήν* for **ποιμεν-s*; *dhanī* for **dhanin-s*, st. *dhanin-* (rich); *mātā* for **mātar-s*, st. *mātar-* (mater), cf. *μήτηρ* for **μητερ-s*; *dūr-manās* for **dur-manas-s* (masc. fem. evil-minded, compounded of *dus*, evil, *mānas* ntr. mens), cf. *δυσμενής* for **δυσ-μενεσ-s*; *agnimān* for **agnimant-s* (fiery, st. *agni-*, ignis † sf. *-mant*). Notice *bhāran* without compens. lengthening for **bharant-s* (n. sg. part. pres. act., whilst the corresponding Gk. *φέρων* for **φεροντς* has the lengthening).

Acc. pl. *áçvān* for **açvan-s*, n. sg. *áçva-s* (equos); *pātīn* for **patin-s*, n. sg. *patis* (lord); *sūnūn* for **sūnun-s*, n. sg. *sūnú-s* (son); *mātīs* for **mati-ns*, n. sg. *māti-s* (fem. thought): *dhēnūs* for **dhēnun-s*, n. sg. *dhēnú-s* (milch cow).

Bef. sonant consonn. we ought prob. to consider *ō* to be a compens. lengthening = *as*, with dulling of the vowel, e.g. *mānōbhis*, instr. pl. for **manas-bhis*, fr. *mānas-* (neutr. mens, μένος) and *bhis* (sf. of instr. pl. consisting of *bhi* † pl. sf. *s*), etc. This change of *as* to *ō* often takes place in case of final *as*.

Note.—In the case of compens. lengthening in Sk. and in the other languages, we might make a more accurate distinction as follows: 1. \checkmark † conson. = $\bar{\quad}$ (cf. O.-Bulg instr. sg. *-mǐ* = origl. *bhi*, bes. instr. pl. *-mi*, i.e. *-mī* = origl. *-bhis*), in terminations; medially this case is not found: 2. \checkmark † conson. 1 † conson. 2 = $\bar{\quad}$ (e.g. *mātā* for **mātars*) in termn.: 3. \checkmark † conson. 1 † conson. 2 = $\bar{\quad}$ † conson. 2, final and medial (e.g. *matīs* for **matin-s*; Gk. *εἶμι* for **έσμι*; a subdivn. forms here \checkmark † cons. 1 † cons. 2 † cons. 3 = $\bar{\quad}$ † cons. 3 (e.g. *ίστās* for **ίσταντς*): 4. \checkmark †

§ 15. conson. 1 + cons. 2 = $\bar{\text{}}$ + cons. 1 (e.g. $\mu\eta\tau\eta\rho$ for $*\mu\eta\tau\epsilon\rho\varsigma$), or $\bar{\text{}}$ + cons. 1 + cons. 2 + cons. 3 = $\bar{\text{}}$ + cons. 1 (e.g. $\phi\acute{\epsilon}\rho\omega\nu$ for $*\phi\epsilon\rho\omicron\nu\tau\varsigma$, finally and medially, the latter, e.g. Gk. $\acute{\epsilon}\phi\eta\nu\alpha$ for $*\acute{\epsilon}\phi\alpha\nu\sigma\alpha$). The physiological explan. of this sound-process is difficult, esp. in case No. 4.

e. Dulling of \bar{a} to \bar{e} and $\bar{a}u$ bef. lost conson. and *in fine*. For \bar{a} there occurs a dulled fm. in \bar{e} , in certain cases in the middle of a word, when \bar{a} has been produced through compens. lengthening (§ 15, d), in the case of unusual and late consonantal loss: in termn. it occurs, but is likewise confined to certain cases; also we find \bar{e} for \bar{a} , like $\bar{a}u$ for \bar{a} , the latter of which is retained in the old lang. Exx.:

\bar{e} for \bar{a} when consonn. have been lost; thus in imperat. pres. $\bar{e}d\acute{h}i$ for $*\bar{a}-d\acute{h}i$, $*as-d\acute{h}i$ (\surd and pres. st. *as-*, esse, *dhi* termn. of 2 sg. imper.); $dh\bar{e}hi$ for $*dh\bar{a}hi$, with asp. (v. § 59) for Vedic $dadd\acute{h}i$ for $*dadh-d\acute{h}i$ (pres. st. *dadh*, \surd *dha*, set); $d\bar{e}hi$ for $*d\bar{a}hi$, fr. $*dad\acute{h}i$ for $dadd\acute{h}i$ (pres. st. *dad*, \surd *da*, dare); in pf. fm. as Sk. $p\bar{e}t-i-m\acute{a}$ for $*p\bar{a}t-i-ma$, Véd. $pap\bar{t}-i-m\acute{a}$ fr. $*pa-pat-ma$ (1 pl. act.; pf. st. *papat-*, \surd *pat*, fly, fall); $t\bar{e}n-i-r\acute{e}$ for $*t\bar{a}n-i-r\bar{e}$ fr. older $ta-t\bar{n}-i-r\bar{e}$ (3 pl. med.; pf. st. *tatan-*, \surd *tan*, stretch), etc.; finally in voc. of fem. *a-* st., e.g. $\acute{a}\check{c}r\bar{e}$ (but earlier still $\acute{a}\check{c}va$), voc. of $\acute{a}\check{c}v\bar{a}$ (equa). $\bar{a}u$ for earlier \bar{a} (cf. \bar{o} for *as* in termn. bef. sonants, § 15, d) occurs in n. acc. dual, e.g. $\acute{a}\check{c}v\bar{a}u$, earlier $\acute{a}\check{c}v\bar{a}$ (n. $\acute{a}\check{c}vas$, equos); further in 1, 3 sg. pf. act. of roots in *a*, e.g. $dad\bar{a}u$, archaic $dad\bar{a}$, \surd *da* (dare).

f. An auxil. vowel *i*, \bar{i} , occurs betw. stem-termns. and termns. which begin with a conson. in word-fmn., esp. in conjugation fms., in which origly. and partly still in the earlier lang., the termn. was added immediately to the stem-termn., e.g. pres. fm. of single vbs., as $sv\acute{a}p-i-mi$, $sv\acute{a}p-i-\check{s}i$, $sv\acute{a}p-i-ti$, $sv\acute{a}p-i-m\acute{a}s$ (1, 2, 3 sg., 1 pl. pres.), etc., for $*sv\acute{a}p-mi$, etc., \surd *svap* (sleep); in pf. this occurs regularly in case of certain persons, e.g. 1 pl. $tutud-i-m\acute{a}$, \surd *tud* (tundere), etc. Here we often see even now the older fms. without inserted *i*, partly even in ordinary Sk., as e.g. $kak\acute{a}r-tha$ (2 sg. pf.), \surd *kar* (facere), partly in the earlier lang.

of the Vēdas, in which a fm. *tutudmá*, etc., may be found. In § 15. fut. e.g. *gam-i-śyāmi* (1 sg. fut.), √*gam* (ire); in part. pres. pass., e.g. *vid-i-tá-s*, √*vid* (see, know), and many similar fmns., this insertion of *i* occurs in certain roots.

ī occurs as auxil. vowel in aor.-fms., e.g. 2 sg. *á-nāi-ś-ī-s*, √*n* (*nī*, lead), bes. 1 pl. *ánāi-ś-ma*; in pres. fms. as 1 sg. *bráv-ī-mi*, 3 sg. *bráv-ī-ti*, bes. 1 pl. *brū-más*, √*bru* (*brū*, speak), and in impf. fms., as *á-brav-ī-s*, *á-brav-ī-t* (2, 3 sg.) (id.); *ás-ī-s*, *ás-ī-t* (2, 3 sg.), √*as* (esse), etc.; *ghr-ī-tá-s* past part. pass., √*grah* (grasp), has likewise this *ī*, which is therefore used just like *i*, only not so often.

The Vēd. *ās* for **ās-t* (acc. to a sound-law of Old-Ind., which must be discussed under ‘Consonants’), instead of later *ás-ī-t*, favours the view that *ī* is an auxil. vowel inserted at a later time.

Note.—Since beside *sváp-i-mi* for **svapmi*, etc., we see *svápāmi*, etc., we must simply suppose that here, as often elsewhere, beside the pres. st. *svap-*, there was a pres. st. in *a*, *svapa-*.

GREEK.

SUMMARY OF SOUNDS.

CONSONANTS.						VOWELS.
MOMENTARY SOUNDS.			PROLONGED SOUNDS.			
	UNASPIRATED. mute sonant ¹	ASPIRATED. mute	SPIRANTS. mute sonant ¹	NASALS. sonant ¹	<i>r</i> -& <i>l</i> -SOUNDS. sonant ¹

Pal.						
Ling.					ρ λ	
Dent.	τ δ	θ	σ	ν		<i>o ω</i> } υ ῡ }
Lab.	π β	φ	(F)	μ		(ou) }

¹ Or medial.

§ 16. In this table only the indivisible sounds are mentioned.

ζ is a consonantal diphthong, namely *d* with the sonant dental spirant (e.g. Slavonian *z*). ψ, ξ, are only characters for two sounds πς, κς. The vowel-diphthongs are αι, ει, οι; αυ, ευ, ου (older pronunciation); υι; also α, η, ω (older pronunciation, by which the ι was still heard); āυ (perhaps in the word γρᾶῦς [γρηῦς], perhaps pronounced distinctly from αυ with short α), ηυ, ωυ.

Note 1.—υ at an earlier period of the language was equivalent to *u*, but became pronounced like *y*, *ü*, as early as classical times; ου in the earlier language was the genuine diphthong *ou*, but even in the classical period it had become equivalent to *ū*, as indeed it did in other languages, e.g. French, the older *ou* became *ū*, whilst the spelling retains the earlier sound-grade.

To pronounce Old-Greek after the fashion of modern Greek is a mistake, which arises from utter ignorance of the laws of development and phonology of a language.

We should be careful to distinguish αι from ει in pronunciation, because they are distinct sounds: they are pronounced as they are written, i.e. αι like German *ai* or *ei*, but ει like *e* + *i* tacked on, a diphthong, which is found dialectically in German, and characterized in other languages by *ey* (*ej*) (cf. Curt. Erl. § 8 sqq.).

Note 2.—Like most other written languages, the Greek does not characterize its long vowels throughout; in earlier Greek, however, they were not indicated at all: α serves as *a* and *ā*, ι for *i* and *ī*, υ for *ü* and *ū*, in the earlier writing ε for *e* and *ē* (η); ο for *o* and *ō* (ω). These incomplete indications of sounds have nothing to do with the language itself, τες, e.g., must be read τῆς, τει = τηι, i.e. τῆ, τοι = τωι, i.e. τῶ, etc.; in all cases the long vowels are derived from the original language. Cf. 'Declensions.'

The system of Greek writing belongs to Greek special-grammar, as an appendix to the phonology.

§ 17. THE GREEK VOWEL-SYSTEM.

The most important deviation from the original language lies in the colouring of *a* into *e* and *o*, which takes place alike in the case of *a* and *ā* by the side of the original vowel pre-

served: the archaic dialects (Dôric) have remained most faithful § 17. to the older order of sounds: *o* has a double duty; it is not only 1. the representative of the original *a*, but also 2. (opposed to $\epsilon = a$) the representative of the original \bar{a} .

Through the differentiation of \bar{a} into *o*, \bar{a} , η , ω , it became possible to separate ω as the second step from the first *o*, *a*, η .

The weakening of *a* into *ι* and *υ*, as well as loss of *a*, occurs comparatively seldom.

This same colouring of the *a*-sound into *e* and *o* occurs when it is combined with *i* and *u* in a diphthong; here too $\epsilon (= a)$ is the first, *o* ($= \bar{a}$) the second step, which however is replaced in the *u*-scale almost always by the first step ($\epsilon\iota$, $\epsilon\upsilon =$ original *ai*, *au*; *οι*, *ου* = original $\bar{a}i$, $\bar{a}u$). It is only wherever the language has lost the living variability of the vowels according to their scales, *αι* and *αυ* appear as steps raised from *ι* and *υ*.

A large number of vowel-sounds, especially diphthongs and long vowels, arise in Greek through the elision, permutation, and change of position of the original spirants *y*, *v*, *s*, which were entirely, or in certain combinations, unbearable to Greek pronunciation. The vowel-sounds so formed are consequently entirely unoriginal, being products of the peculiar sound-laws of the Greek language, and foreign to the original state of the language.

The Greek vowel-system, in many parts differing from the original one, reminds us in several respects of the Zend; whilst we find on the other hand the greatest conformity with that of the Latin language.

The vowel-scales of the Greek language are then as follows:

	Weakening.	Fundamental-vowel.	1st Step.	2nd Step.
<i>a</i> -scale	loss	<i>ι, υ</i>	ϵ, o, a	<i>o, ā, η</i> ω
<i>i</i> -scale			<i>ι</i>	$\epsilon\iota$ (<i>αι</i>) <i>οι</i>
<i>u</i> -scale			<i>υ</i>	$\epsilon\upsilon$ (<i>αυ</i>) <i>ου</i> ($\bar{a}\upsilon$)

Note.—More than one sound accordingly occurs here in different functions, as is the case with *i* and *u* in Sanskrit, and

§ 17. partly also in Zend. In the Greek, however, we meet with the ambiguity of the sounds for the first time to a greater extent; we may here therefore speak of it briefly. Besides the permutations shown above, *ι*=original *i* and *a*; *υ*=original *u* and *a*; *ο*=original *a* and *ā*: that is, the diphthongs are ambiguous because they stand, sometimes for scale-sounds, sometimes for results of contraction, sometimes for protracted vowels. e.g. *ει* in *εἶμι* (*eo, ibo*), fundamental-form *ai-mi*, originally distinct from *εἶμί* (*sum*), from **ἔσμι*, fund.-form *as-mi*; *ει* in *εἶπον* (*dixi*), fr. **ἔεπον*, **FeFeπον*, $\sqrt{Feπ}$; *ει* in *εἶην* (*opt. pres.*) for **ἔσγην*, f.f. *as-yā-m*; *κτείνω* (*kill*) for **κτενγω*; *ου* in *σπουδή* (*haste*; raised to *ευ* in *σπεύδω*, $\sqrt{σπυδ}$) is altogether different, as *ου* in *πούς* (*foot*) for **ποδ-ς*, f.f. *pad-s*; *ου* in *τούς* for *τους* (*acc. pl. of το-*), f.f. *tams*; *ου* in *νέου*, fr. **νέοο*, for *νέοιο*, **νεφοσγο*, f.f. *navasya* (*gen. sing. masc. and n. fr. νεο-*, *young*); *ου* in *γουνός* for **γουνος* (*gen. sing. fr. γόνυ*, *knee*):—similarly in the case of *οι*, *λοιπ-ός* (*remaining*), $\sqrt{λιπ}$, but *μοῖρα* (*lot, fate*) for **μορ-γα*, $\sqrt{μερ}$ (*divide*); *οἷς*, fr. *οῖς* (*older form ὄφης*, *Lat. ouis*); *αι* in *αἶθω* (*burn*), $\sqrt{ιθ}$, but *μέλαινα* (*nom. sing. fem. st. μελαν-*, *black*) for *μέλανγα*, etc.

§ 18.

EXAMPLES.

1. *a*-scale.

Weakening. Loss. e.g. *γί-γνο-μαι* (*become*) for **γι-γέν-ομαι*, $\sqrt{γεν}$, original *gan*; *πί-πτ-ω* for **πι-πετ-ω*, $\sqrt{πετ}$, original *pat* (*fall*); *ἔ-σχ-ον* (*1 sing. aor.*), fund.-form *a-sagh-am*, $\sqrt{σεχ}$, original \sqrt{sagh} ; *έ-σπ-όμην* (*1 sing. aor. έπ-ομαι*), $\sqrt{σεπ}$ (*follow*), original \sqrt{sak} , etc.

There takes place not unfrequently a complete loss of an original *a* in the elements of stem-formation, e.g. *πα-τρ-ός*, *πα-τρ-ί*, from stem *πατέρ-* (*father*), original *pa-tar-*, thus stand for *πατέρ-ος*, *πατέρ-ι* (*Homêric*), f.f. *patar-as*, *patar-i*, etc.

Note.—Loss of initial *a* in Greek is not common, cf. *έσ-μέν* (*we are*), f.f. *as-masi*, Sansk. *s-más*, and *Lat. s-umus*; *εἶην*=**ἔσγην*, f.f. *as-yām*, Sansk. *s-yām*, *Lat. s-iēm*; *εὔ* (*εύ*) for **ἔσύ*, f.f. *asu*, Sansk. *su* (*well*).

The weakening of original *a* to *ι* (cf. *Curt. Gk. Et.*, p. 641 sqq.) is not frequent or regular in roots, and occurs most often before two consonn., e.g. *ἴσ-θι*, f.f. *as-dhi* (*2 sing. imper.*),

§ 18. $\sqrt{\gamma\alpha\nu}$ (bring forth), cf. Sk. *gán-a-s* (mensch), *gánī* (wife), Gothic *kven-s* (wife, spouse); *κύκλος* (ring), cf. Sk. *kakrá-m*; *μύλ-ος*, *μύλ-η* (mola), \sqrt{mal} fr. *mar*, cf. *mola*, *molere*, Lith. *malù*, Gothic *malan*; *ἄν-ώνυμος* (nameless) beside *ὄνομα* (name), f.f. *gnāman*, etc.

Dialectically this change is more frequently observed, esp. in Aiolic, e.g. *ὄνυμα*=*ὄνομα*; *ὔμοιος*=*ὄμοιος*, f.f. *samaias*, from stem *sam*=Gk. *όμο* (*όμός*, like), the origin of which is found in the pronoml. origl. \sqrt{sa} =Gk. *ό*; Aiolic locative *ἄλλυι*, *τυῖδε*, for *ἄλλοι* (*ἄλλο-*, other), *τοιῖδε* (*το-* demonstr. pronoml. st.); Boiôtian *τύ* for **τυι=τοι* (n. pl. masc. same st.), *τῆς ἄλλυς*=**τυις *ἄλλυις=τοιῖς ἄλλοις* (dat. loc. pl.), by contraction of *υι* to *υ*.

Note.—I hold it inadmissible to separate from the rest those cases in which original *ka*, *ga*, become *κυ*, *γυ*, and to explain them collectively from *kva*, *gva*, with loss of *a*; neither will a fm. **κφακλος* seem to me to be Gk., and yet we must suppose some such form. No one, so far as I know, has had recourse to a fm. **νφαξ*, **ὀνφαξ*, **μφαλη*, in order to explain the *υ* in these words. Here *υ* must have arisen from *a* without passing through *va*, and the same process must have taken place after gutturals.

§ 19. Root-vowel *a* in the original language.

As a rule, *ε* is the representative of origl. *a* in roots; whilst *ο* generally takes its place in the stem-formative and word-formative particles, *a* is found in roots; in word-formative additions it is mostly dependent on a nasal now lost, but once in existence.

ε=a. *ἔδ-ω*, Sk. *ád-mi* (eat), $\sqrt{éd}$, origl. *ad* (edo); $\sqrt{éd}$ in *ἔζ-ομαι*=**σεδ-γομαι* (sed-eo), *ἔδ-ος* (sed-es), origl. *sad* (sit); $\sqrt{\gamma\epsilon\nu}$ in *γέν-ος* (gen-us), origl. *gan* (gi-gu-ere) of *gan-as*; *ἔσ-τι*, Sk. and origl. *ás-ti* ($\sqrt{és}$, origl. *as*, esse); *φέρω*, Sk. and origl. *bhár-āmi*, *ἔφερ-ον*, Sk. and origl. *á-bhar-am*, $\sqrt{\phi\epsilon\rho}$, origl. *bhar* (ferre), etc. So also *ε* is common in elements of relation, e.g. st. *πα-τέρ-* (n. sing. *πατήρ*, father), origl. *pa-tar-*; st. *μη-τερ-* (n. sing. *μήτηρ*, mater), origl. *mātar-*; st. *μέν-εσ-* (n. sing.

μένος, might), Sk. and origl. *mán-as*; φέρ-ετε, Sk. *bhár-atha*; § 19. origl. evidently *bhar-a-tasi* (2 pl. pres. act.), etc.

o=*a*. ποδ-ός, Sk. and origl. *pad-ás* (g. sing.), st. and √*pad* (foot, go), where of course, in accordance with the sensibility of the Greek, the *o* may also be considered as a raised step from *ε* in πεδ; ό, τό, origl. and Sk. *sa, ta-t*, root and st. *sa, ta* (pron. dem.); πό-σι-ς (lord)=origl. and Sk. *pá-ti-s* (lord); μέν-ος (n. acc.), μέν-ους (gen. sing.) for *μένεσ-ος, Sk. and origl. *mán-as, mán-as-as*; similarly in *a*-stems, *a* changes to *o*, as νέφο-ς (n. sing. masc.), νέφο-ν (acc. sing.)=Lat. *nouo-s, nouo-m*, Sk. and origl. *náva-s, náva-m*, etc.

Dialectically *o* takes the place of *a*. Aiolic βροχέως for βραχέως (adv.), from st. βραχύ- (brevis=*breguis*, short); Arkadian έκοτόν for έκατόν (100), f.f. of -κατον is *kata-m* or *kanta-m*, cf. Sk. *ḡatá-m*; Kyprian κόρζα=καρδία (heart), cf. Lat. *cord-*, f.f. of this stem is *kard-*; st. τεκταν- in τέκταινα, i.e. *τεκτανυα (fem.), τεκταίν-ομαι (build), i.e. *τεκτανυομαι stands by the form τέκτον- (n. sing. τέκτων, builder), f.f. *taktan-*; the older *a* is preserved in the Dôric *Ώίκατι* for the newer Attic *είκοσι* (twenty), f.f. of the second part of the word is (*da*)*kati*; in δια-κάτιοι for διακόσιοι (200), -κατιοι is derived from an origl. stem *kata-* or *kanta-* (100).

a=*a*. ακ-ωκ-ή (point), st. ακ-οντ- (n. ακων, dart), origl. √*ak* (Lat. *ac-*, *ac-utus*); αγ-ω (lead)=Lat. *ago*, Sk. *áḡ-āmi*, origl. √*ag*; άχος (grief), άχ-νυμαι (am grieved), origl. √*agh*; έ-λαχ-ύς (little), Sk. *lagh-ús* (old *ragh-ú-s*) (light); πλατύ-ς (broad, wide), Sk. *prthú-s*, origl. *pratu-s*; λα-μ-β-άνω (take), έ-λαβ-ον, Sk. *á-labh-am*, √*labh*, Sk. *labh-* (get); δάκ-νω (bite), έ-δακ-ον, cf. Sk. *dáḡ-āmi*, f.f. √*dak*; έ-λακ-ον (I spoke), cf. Lat. *loq-uor*, Sk. *láp-āmi* (cry out), √*lak*, origl. *rak*; st. πα-τέρ- (father)=Lat. *pa-ter-*, origl. *pa-tar-*; √*pa* (protect).

a stands beside *ε*, e.g. έ-ταμ-ον beside έ-τεμ-ον (τέμ-νω, cut), in έ-τραφ-ον, έ-τραπ-ον, έ-κταν-ον beside τρέφ-ω (cherish), τρέπ-ω (turn), κτείν-ω (kill) (= *κτεν-γω). We cannot trace herein a

§ 19. step from *ε* to *a*, but only a vowel-colouring, originally merely dialectic, which indeed was used in Greek for the purpose of expressing the relation of the aorist. As *ἐ-ταμ-ον* is to *ἐ-τεμ-ον*, so are the present forms *τέμνω*, *τρέφω*, *τρέπω* to the Dôric *τάμνω*, *τράφω*, *τράπω*, which we have to consider as the presents corresponding to the aorists *ἔταμον*, *ἔτραφον*, *ἔτραπον*; *κρείσσω* (better) (i.e. **κρετ-γων*) beside *κράτ-ιστος* (best). Cf. Dôric *ā*=Iôn. Attic *η*.

a=*a*+nasal. *πόδα* (acc. sing.), Sk. and origl. *pád-am* (ped-em), *πόδ-ας*, Sk. *pád-as*, origl. *padam-s*; *φέρον-τα*, Sk. and origl. *bhāran-tam* (feren-tem), *φέροντ-ας*, Sk. *bhārant-as*, origl. *bharant-ams* (acc. pl. ferent-es); *ἐπτά*, Sk. and origl. *saptán* (septem); *δέκα*, Sk. *dáçan*, origl. *dakan* (decem); *-σα* (1 sing. aor. in comp.) =Sk. and origl. *-sa-m*, cf. *ἔ-δειξα* (= *ἐ-δεικ-σα*) and Sk. *á-dik-ṣa-m*, *√diç*, origl. *dik* (show).

§ 20. Step-formation in the *a*-scale. Rule for the first step is: radical *ε* is raised to *ο*, *a* to *ā* (i.e. *η*). There are, however, exceptions to this rule.

1. *ε:ο*. *φόρ-ο-ς* (tax), *φορέω* (bear (durative), wear)=Sk. and f.f. *bhār-a-s* (burden), *bhār-áyāmi* (causat.) beside *φέρ-ω*, Sk. and f.f. *bhār-āmi* (fero); *φόχ-ο-ς* (waggon), Sk. *vah-a-s*, f.f. *vāgh-a-s* (waggon), *√Fεχ*, Sk. *vah*, origl. *vagh* (vehere), which, however, as a verb becomes intermixed with *√σεχ*, Sk. *sah* (have, hold); *μέ-μον-α* (strive), f.f. *ma-mān-a*, beside *μέν-ος* (might), Sk. and f.f. *mān-as*, *√μεν*, origl. *√man* (think); *γou-ή* (birth), *γόν-ο-ς* (thing born, bairn), *γέ-γou-α*, f.f. *ga-gān-a*, Sk. *gāgāna*, beside *ἐ-γεν-όμηv*, *γέν-ος* (genus), Sk. *gān-as*, f.f. *gan-as*, *√γεν*, origl. *√gan* (gi-gn-ere); *τόκος* (thing born, bairn), *τοκ-εύ-ς* (parens), beside *τεκ-έσθαι*, *τίκ-τω*, *√τεκ* (produce); *τέ-τροφ-α* beside *τρέφ-ω*, *ἐ-τράφ-ην*, *√τρεφ* (nourish); *ἔ-κτου-α* beside *κτείν-ω* (i.e. **κτεν-γω*), *ἔ-κταν-ον*, *√κτεν* (kill); *εἷ-λογ-α*, *λόγ-ος*, beside *λέγω*, *√λεγ* (legere); *ἔ-φθορ-α*, *φθορ-ά*, beside *φθείρω*, i.e. **φθερ-γω*, *√φθερ* (destroy); *ὄψ* (voice), i.e. *φόπ-ς*, origl. *vāk-s*, Sk. *vāk* for **vāk-s* (cry), beside *φέπ-ος* (word),

origl. *vāk-as*, Sk. *vaḥ-as*, origl. \sqrt{vak} (cry); γόν-υ, gen. γόνατος, § 20. older (Iôn.) γούνατος=*γονFατος, γουνός=*γονFος, cf. Sk. *gānu* (genu); ὄ-νο-μα, older (Hom.) οὖ-νο-μα (name), from ὄ-γνο-μα, cf. Lat. *gno-men*, (Sk. *nām-an*, also, with root-vowel raised).

In Greek, on account of the prosodic quantity of *o*, this step is possible only before two consonants, e.g. δέδορκα=Sk. *da-dárç-a*, origl. *da-dark-a*, beside δέρκ-ομαι, ἔ-δρακ-ον, $\sqrt{δερκ}$, origl. *dark* (see).

Note.—The same kind of step-formation of *e=a* to *o=ā* occurs in Latin, also in Slavonic, e.g. O.-Bulg. *vez-a*=original *vagh-āmi*, Lat. *ueho*, bes. *voz-ŭ*=original *vāgh-a-s*, Gk. *Φόχ-ο-ς*, v. infr.

2. *a:ā, η*. two equivalent sounds. e.g. λέ-ληκ-α, λέ-λαḱ-α, beside ἔ-λακ-ον, $\sqrt{λακ}$ (cry out), cf. Sk. *lap*, origl. *rak*; κέ-κληγ-α beside ἔ-κλαγ-ον, κλάζω=*κλαγ-γω, $\sqrt{κλαγ}$ (sound); λέ-ληθ-α, Dôr. λέ-λαθ-α, λήθη (forgetfulness), beside ἔ-λαθ-ον, λα-ν-θ-άνω, $\sqrt{λαθ}$ (escape notice); εἶ-ληχ-α beside ἔ-λαχ-ον, λα-γ-χ-άνω, $\sqrt{λαχ}$ (get by lot); δέ-δηχ-α beside δάκ-νω, ἔ-δακ-ον, $\sqrt{δακ}$ (bite); εἶ-ληφ-α, λήψ-ις (i.e. ληπ-σις=ληβ-τις), beside ἔ-λαβ-ον, λα-μ-β-άνω, $\sqrt{λαβ}$ (take); κέ-κράγ-α beside κράζω, *κραγ-γω, $\sqrt{κραγ}$ (cry aloud); ἔ-ᾠγα, Iôn. ἔ-ηγ-α, i.e. *Fe-Fāγ-a*, f.f. *va-vāg-a*, beside ἄγ-νυμι, $\sqrt{Fαγ}$ (break); st. μῆ-τερ-, origl. and Sk. *mā-tar-*, etc.

In elements belonging to the formation of words, *o* will be found raised to *η, ā*: this rule is observed regularly in the stem-termination *o=a* in such stems as are raised in the feminine termination, e.g. νέο-ς (n. sing. masc.), νέο-ν (n. sing. neut.), origl. and Sk. *nāva-s, nāva-m* (nouo-s, nouo-m), but fem. *νέ-α*, Iôn. *νέη*=origl. and Sk. *nāvā* (noua). In *ή, 'ā*, origl. and Sk. *sā*, beside *ό*, origl. and Sk. *sa* (pron. demonstr.), and other pronominal stems, is found radical *o* raised to *η, ā*, the root being equivalent to the stem as often.

Note 1.—μέ-μηλ-α beside μέλ-ει, $\sqrt{μελ}$ (be a care to), shows also the raising of *ε* to *η*.

§ 20. Note 2.—Sometimes \bar{a} is shortened to \check{a} , e.g. *Φάστυ* (city), Sk. *rās-tu* (house), Sk. and original \sqrt{vas} (inhabit); similar shortenings often occur in the *a*-termn. of feminine stems.

Note 3.—The laying-down of the laws for the use of \bar{a} , η , belongs to the special-grammar of Greek: the Dôric predilection for the more ancient \bar{a} and that of Iônia for η are well known. In Attic likewise \bar{a} changes to η , yet *a* repeatedly occurs, owing to the surrounding sounds, especially in the case of ρ , ϵ , η , ι , υ (i.e. ζ , $\sigma\sigma$, $\lambda\lambda$, etc.), preceding, and ϵ , η , following, when its change to η is stopped.

For the second step we have ω in examples such as $\check{\epsilon}\rho\text{-}\rho\omega\gamma\text{-}\alpha$, $\rho\acute{\omega}\xi$, $\rho\acute{\omega}\gamma\text{-}\acute{\omicron}\varsigma$ (cleft), beside $\rho\acute{\eta}\gamma\text{-}\nu\upsilon\mu\iota$, $\sqrt{F\rho a\gamma}$ (break), cf. Goth. *brak*, Lat. *frag*; $\pi\tau\acute{\omega}\xi$, i.e. $\pi\tau\acute{\omega}\kappa\text{-}\varsigma$, gen. $\pi\tau\omega\kappa\text{-}\acute{\omicron}\varsigma$ (cowering), $\pi\tau\acute{\omega}\sigma\sigma\omega$, i.e. $^*\pi\tau\acute{\omega}\kappa\text{-}\gamma\omega$ (cower), beside $\pi\tau\acute{\eta}\sigma\sigma\omega = ^*\pi\tau\acute{\eta}\kappa\text{-}\gamma\omega$, $\check{\epsilon}\text{-}\pi\tau\alpha\kappa\text{-}\omicron\upsilon$, $\sqrt{\pi\tau\alpha\kappa}$ (cower), clearly a further formation from $\sqrt{\pi\tau\alpha}$, cf. $\pi\epsilon\text{-}\pi\tau\eta\text{-}\kappa\acute{\omega}\varsigma$; $\acute{\alpha}\rho\omega\gamma\text{-}\acute{\omicron}\varsigma$ (helper) beside $\acute{\alpha}\rho\acute{\eta}\gamma\text{-}\omega$ (I help). From these examples we gather an equation $\eta : \omega :: \epsilon : \omicron$.

Also where there is no parallel first step to ω , we must hold it to be in the position of a second step, e.g. $\tau\rho\acute{\omega}\gamma\text{-}\omega$ beside $\check{\epsilon}\text{-}\tau\rho\alpha\gamma\text{-}\omicron\upsilon$, $\sqrt{\tau\rho\alpha\gamma}$ (gnaw, chew); $\acute{\omicron}\delta\text{-}\omega\delta\text{-}\alpha$ beside $\acute{\omicron}\zeta\omega = ^*\acute{\omicron}\delta\text{-}\gamma\omega$, $\acute{\omicron}\delta\text{-}\mu\acute{\eta}$, $\acute{\omicron}\sigma\text{-}\mu\acute{\eta}$, $\sqrt{\acute{\omicron}\delta}$ (smell); $\acute{\omega}\kappa\text{-}\acute{\upsilon}\varsigma =$ Sk. $\bar{a}\zeta\text{-}\acute{\upsilon}\varsigma$, origl. $\bar{a}\kappa\text{-}\upsilon\varsigma$ (sharp), $\acute{\alpha}\kappa\text{-}\omega\kappa\text{-}\acute{\eta}$ (point), $\sqrt{\acute{\alpha}\kappa}$, cf. $\acute{\iota}\pi\pi\omicron\varsigma$ (equos), origl. $\acute{a}\kappa\text{-}\upsilon\varsigma$; $\acute{\omega}\acute{\omicron}\nu$, better $\acute{\omega}\acute{\omicron}\nu$ (Sappho, $\acute{\omega}\iota\omicron\upsilon$ acc. to Ahrens, $\acute{\omega}\beta\epsilon\omicron\upsilon$ Hêsuch.), origl. $\bar{a}\nu\gamma\alpha\text{-}m$ (ouom, *lit.* bird-, of a bird), from origl. $\acute{a}\nu\iota\text{-}s$, Sk. $\nu\iota\text{-}s$ (auis); $\acute{\alpha}\gamma\text{-}\omega\gamma\text{-}\acute{\eta}$ (leading), $\acute{\alpha}\gamma\text{-}\omega\gamma\text{-}\acute{\omicron}\varsigma$ (leader), beside $\acute{\alpha}\gamma\text{-}\alpha\gamma\text{-}\acute{\epsilon}\iota\nu$, $\acute{\alpha}\gamma\text{-}\acute{\epsilon}\iota\nu$ (lead); $\acute{\delta}\acute{\iota}\text{-}\delta\omega\text{-}\mu\iota$ beside $\acute{\delta}\acute{\iota}\text{-}\delta\omicron\text{-}\mu\epsilon\nu$, $\sqrt{\delta\omicron}$ (dare); $\acute{\epsilon}\delta\text{-}\omega\delta\text{-}\acute{\eta}$ (food), $\sqrt{\acute{\epsilon}\delta}$, Lat. *ed*, origl. and Sk. *ad* (eat); $\gamma\upsilon\omega\text{-}\tau\acute{\omicron}\varsigma$ (known), $\gamma\iota\text{-}\gamma\upsilon\acute{\omega}\text{-}\sigma\kappa\omega$ (learn, come to know), cf. Lat. $(g)n\bar{o}\text{-}tus$, $(g)n\bar{o}\text{-}sco$, \sqrt{gna} , from *gan*.

Note.—Dialectically *ou* occurs for ω , i.e. \bar{u} , in isolated instances (a weakening which occurs also in Lat.). $\omega : ou (\bar{u}) :: \omicron : \upsilon (u)$, e.g. Thessal. $\gamma\nu\acute{\omicron}\mu\alpha = \gamma\nu\acute{\omega}\mu\eta$ (insight, opinion), $\sqrt{\gamma\nu\omicron}$, original $gna = gan$ (learn); $\text{-}\omicron\upsilon\nu = \text{-}\omega\nu$, fund. $\text{-}\bar{a}m$ in gen. pl., cf. Lat. $\text{-}um$, etc.

§ 21. 2. *i*-scale.

Root-vowel ι . $\acute{\iota}\text{-}\mu\epsilon\nu$, $\acute{\iota}\text{-}\theta\iota$, Sk. $\acute{i}\text{-}m\acute{a}\varsigma\text{-}\acute{i}$, $\acute{i}\text{-}h\acute{\iota}$, origl. $\acute{i}\text{-}m\acute{a}\varsigma\acute{i}$, $\acute{i}\text{-}d\acute{h}\acute{i}$, $\sqrt{\acute{i}}$ (ire); $\check{\epsilon}\text{-}\lambda\iota\pi\text{-}\omicron\upsilon$, $\sqrt{\lambda\iota\pi}$, Lat. *lic*, Sk. *rik*, origl. *rik* (leave); $F\acute{\iota}\delta\text{-}\mu\epsilon\nu$

=Sk. and origl. *vid-māsi*, st. *ΐσ-τορ-* [n. sing. *ΐσ-τωρ* and *ΐσ-τωρ* § 21. (knower, witness)], for **ΐδ-τορ-*, f.f. *vid-tar*, \sqrt{vid} (know); *ἔ-πιθ-ον*, *ἔ-πιθ-όμην*, *πίσ-τις* (faith), for **πίθ-τι-ς*, $\sqrt{πιθ}$ (persuade), and element of stem-formation *τι*; *σχίδ-η* (splinter), *σχιζω* (split) = **σχίδ-γω*, $\sqrt{σχιδ}$ = Sk. *khid*, Lat. *scid*, origl. *skid* (scindere); *ὀ-μιχ-εῖν*, $\sqrt{μιχ}$ = Sk. *mih*, origl. *migh* (mingere); *λίχ-νος* (daintiness), *λιχ-μάω*, $\sqrt{λιχ}$, Sk. *lih*, *rih*, Lat. *lig*, origl. *righ*; *στίχ-ος* (rank), *ἔ-στιχ-ον*, $\sqrt{στιχ}$ (march, tread), Goth. *stig*, Sk. and origl. *stigh*; *τί-ς*, fund. *ki-s*, Lat. *qui-s*, Goth. **hi-s*, pronl. root, origl. *ki* (dem. and interrog.), etc.

Lengthened *ī* is a parallel form to *i* (often depending on fixed proportion of sound), e.g. Hom. *ΐ-ομεν* and *ΐ-ομεν* beside *ΐ-ωμεν* (1 pl. pres. conj.), origl. *i-a-mas*, \sqrt{i} (ire); *ΐδ-ος* (ntr. sweat), *ΐδ-ίω* (I sweat), $\sqrt{ΐδ}$, origl. *svid*, cf. Sk. *svīd-yāmi*; *πί-νω* (*πῖνε*), *πῖθι*, beside *ἔ-πῖ-ον*, $\sqrt{πι}$ (drink), cf. Sk. *pī* beside *pa*.

i raised by steps.

§ 22.

1. *i* raised to *ει*; e.g. *εἶ-μι* (go), Sk. *é-mi*, origl. *ai-mi*, \sqrt{i} ; *πέιθ-ω* (1 sing. pres.), $\sqrt{πιθ}$, so *λείπ-ω*, $\sqrt{λιπ}$; *λείχ-ω*, origl. *raigh-āmi* (1 sing. pres.), $\sqrt{λιχ}$, origl. \sqrt{righ} ; *στείχ-ω*, origl. *staigh-āmi*, $\sqrt{στιχ}$; *ΐείδ-εται*, *ἔἴσομαι* (for **ΐειδ-σομαι*), *ΐείδος* (ntr. outward-form), $\sqrt{ΐειδ}$; *εἰκ-ών* (likeness) beside *ἔ-ικ-τον*, *ἔ-ίκτην*, $\sqrt{ΐικ}$, clearly (=resemble); *κεῖ-ται* (3 sing. pres. med.) = Sk. *ḷé-tē*, \sqrt{ki} (lie), etc.

αι occurs in the main perhaps only as a lifeless step-formation where the language has lost all sense of the derivation, and hence for the most part no *ι*, *ει*, or *οι*, is parallel to *αι*, e.g. *αἶθ-ω* (I kindle), *αἶθ-εσθαι* (burn), *αἶθ-ήρ*, *αἶθ-έρος*, (aether), *αἶθ-ουσα* (porch), cf. Lat. *aed-es*, *aid-ilis*, $\sqrt{ΐθ}$ = Sk. *idh*, *indh* (burn), Germ. *it*, in O.H.G. *eit* (fire); *αἶ-ΐών*, origl. *ai-vān-s* (time, long time), cf. Lat. *ae-uo-m*, origl. *ai-va-m*, Sk. *é-va-s*, origl. *ai-va-s* (a going), Goth. *aiv-s*, f.f. *āi-va-s* (time, long time), with other step-forms, \sqrt{i} (go), with sf. *van*, *va* (here the language no longer felt the connexion with *ΐ-μεν*, *εἶ-μι*, *οἶ-μος*); *και-ρό-ς* (point of time), cf. Goth. *hvei-la* (hour, time, Engl. 'while'), origl. *kai-rā*, origl. \sqrt{ki} .

§ 22. Note.—In medial termns., e.g. φέρο-μαι, *φέρε-σαι, φέρε-ται, φέρον-ται, αι is not a step-form, but the product of a contraction from f.f. *bharā-mami*, *bhara-sasi*, *bhara-tati*, *bhara-ntanti*, v. sub. ‘Conjugation.’

2. *i* raised to *οι*, e.g. οἶ-μος, οἶ-μη (road, a going), cf. αἶ-Φών, εἶ-μι, ἴ-μεν, √ι (go); πέ-ποιθ-α beside πείθ-ω, √πιθ (ἐ-πέ-πιθ-μεν); λέ-λοιπ-α, λοιπ-ό-ς (left, remaining), beside λείπ-ω, ἔ-λιπ-ον, √λιπ; Foῖδ-α (know)=Sk. *véd-a*, with the 1st, Goth. *vait* with 2nd step, beside Feῖδ-ος, √Fιδ (Fίδ-μεν); ἔ-οικ-α (seem) beside εἰκ-ών, for FéFοικα, √Fικ, (ἔ-ικ-τον, ἐ-ικ-την); Foῖκ-ο-ς (house), cf. Sk. *vēs-a-s*, Lat. *uīc-u-s*, i.e. **ueic-o-s*, with 1st step, √Fικ=Sk. *viç*, origl. *vik* (settle); Foῖν-ο-ς (wine), cf. Lat. *uin-um*, Germ. *wein* with 1st step; λοιβ-ή (lib-atio) beside λείβ-ω (pour), and λίβ-ο-ς (drop), λιβ-άς, -άδ-ος (moisture), √λιβ; στοῖχ-ος (rank) beside στείχ-ω, ἔ-στιχ-ον, √στιχ; αίματο-λοιχ-ό-ς (blood-licking) beside λείχ-ω, λίχ-νος; κοίτ-η (bed), κοι-μᾶσθαι (sleep), beside κεῖ-ται, √ki, etc.

Note.—In opt. φέρ-οις (etc.)=fund. *bhar-ai-s*, also in nom. pl. e.g. οἶ, original *sai* (*tai*), *οι* is the result of a contraction, not a step of a vowel-scale; v. ‘Conjugation and Declension.’

§ 23. 3. *u*-scale.

Radical *υ*, e.g. ἔ-φυγ-ον, φυγ-ή (fug-a), √φυγ, Sk. *bhuç* (*bhug-ná-s*, bent), Goth. *bug* (bend), Lat. *fug* (only here and in the Greek with a narrower sense); ζυγ-όν (yoke)=Lat. *iug-um*, Sk. and origl. *yug-ám*, √yug (join, iungere); ἐ-ρυθ-ρό-ς (red)=Sk. *rudh-irá-s*, f.f. *rudh-ra-s*, √ρύθ, origl. and Sk. √rudh, Goth. *rud* (be red), etc.; σύ, τύ (thou, du), cf. Sk. *tv-am*, Lat. *tu*, Lith. *tu*, Slav. *ty*; κλύ-ω (hear), √κλυ, Sk. *çru*, Goth. *hlu* (Eng. *loud*, *lud*=voice), origl. *kru*; ῥυ-τό-ς (flowing), √ρύ, Sk. and origl. *sru* (flow), so ἐρρύ-ην=*ἐ-σρυ-ην, Germ. *stru* (in *ström*, *stream*, with inserted *t*); φύ-ω (am), φύτ-ον (being), √φυ, Sk. *bhu*, Lat. *fu*, origl. *bhu* (be); κέ-χυ-μαι (perf.), √χυ, Goth. √gu-*t* (pour) (with a *t* for further formation); ἔσ-συ-μαι, (pf.), σύ-το (aor.), √συ (rush); ὠκ-ύ-ς=Sk. *āç-ú-s*, origl. *āk-u-s*

§ 24. (kindle), ἔν-αυσ-μα (tinder), cf. εὔ-ω, Lat. *uro*=**ous-o*, **eus-o* (see Lat. 'Vowels'), Sk. ὄś-āmi, origl. *aus-āmi*, √*uś*, origl. *us*; αὐγ-ή (glance), √*ύγ*, cf. Sk. ὄgas (force); αὐξ-άν-ω, i.e. **αὐγ-σανω* (make to grow), cf. Lat. *aug-eo*, √*ug* (which occurs pure in Lith.).

2. Second step *ou* occurs seldom, espec. when *u* is medial (no **πε-φουγ-α*=Goth. *baug*,=**bu-bāuga*, like λέλοιπα), while we find it compensated for by the first step, yet cf. εἰλήλουθα (Hom.) from √*έλυθ*, cf. ἦλυθον and ἐλεύ(θ)σομαι [origl. √*έλ*=*έρ*, origl. *ar* (go), in ἔρ-χομαι (come, go), f.f. *er-skomai*, further formed in Greek by sf. *υ* (προς-ἦλυ-τος ἔπ-ηλυς, newly come), to which is added the frequent accompaniment of a verb-stem *θ* (v. sub. 'Formation of Present-stem'); the secondary √*έλυθ* so formed sts. was treated as if the √vowel was really *υ* (exx. in text), sts. is merely equivalent to an auxiliary vowel (§ 29), which moreover may disappear, ἦλθον]; ἀ-κόλουθος (follower), and κέλευθ-ος (way); ρούσ-ιος (reddish), for **ρούθιος* (or perhaps **ρούθ-τιος*, **ρούθ-σιος*?), beside ἐ-ρεύθ-ω (blush), and ἐ-ρυθ-ρός (red); σπουδ-ή (haste) beside σπεύδ-ω (hasten); λούσσον=**λουκ-γουν* (white pith of deal), cf. λευκ-ός. (white), ἀμφι-λύκ-η (twilight), λύχ-νος. More often beside final *u*, e.g. πνοF-ή (blast) beside πνέF-ω, √*πny*; ροF-ή, ρόF-ος (stream), beside ρεῦ-μα, √*ρύ*; χοF-ή (outpouring) beside χέF-ω, √*χy*; πλόF-ος (voyage) beside πλέF-ω, √*πly*; θόF-ος (swift) beside θέF-ω, √*θy*, Sk. and origl. *dhu*; ξοF-ίς (chisel), ξόF-ανον (carved-work), beside ξέF-ω, √*ξy*; σόF-ος (quick motion), σοῦ-μαι=**σοF-ομαι* (Trag. haste), beside σεύ-ω, √*sy*.

In separate instances also *av* (*āv*) is a second step fr. *u*, e.g. ναῦς (nauis) (i.e. *νāv̄ς* on acct. of *νηῦς*)=Sk. *nāu-s*, Iôn. *νηF-ός*, Dôr. *νāF-ός*, Sk. *nāv-ás*, point to √*ny*.

ωv is only Iôn.=*av*, e.g. θαῦ-μα (wonder)=θαῦ-μα, θέFa, θεFά-ομαι (show, gaze), point to √*θy*.

ω also occurs sts. as second step from *υ*, e.g. ζω-μός (broth), cf. ζῦ-μη (yeast), Sk. *yū-śa-m*, Lat. *iū-s*, similarly belonging to

√*yu*, Gk. ζυ (with which ζέ-ω (cook) for *ζεσ-ω, cf. ἔ-ζεσ-μαι, § 24. ζεσ-τό-ς, has no connexion, cf. O.H.G. √*jas*, cook); ζώ-ννυμι (gird), √ζυ, origl. *yu* (join); χώ-ννυμι, √χυ, χέω (pour). If we compare πλώ-ω for πλώ \mathcal{F} ω, Iôn. parallel-form to πλέ \mathcal{F} -ω, Dôr. βῶς=βοῦς=Sk. *gāus*, and Iôn. ωυ=*av*, hence we infer in Greek a step-formn. *ōu*, *ov*=origl. *āu*, *āv*, where the 2nd element has become assimilated to the first, so that only *ō*, *ω* (=ω \mathcal{O} , *ou*) remains.

Note 1.—Cases such as οὐρανός-ς (heaven) beside Sk. *váruna-s* (name of a deity); οὐλή-ή (scar) beside Lat. *uolnus*, Sk. *vranam* and *vranas* (wound); εὐρύ-ς (wide) beside Sk. *urú-s* for **varú-s*, show *ou*, *ev*, in place of the expected *fo*, *fe*. The explanation of this is difficult; perhaps it is to be considered less as a transposition of *fo*, *fe*, to *ou*, *ev*, than a shortening fr. original *va* to *u* and a step-formation from the latter.

Note 2.—There are three roots *θυ* in Gk.: 1. θύω, hasten; 2. θύω, offer; 3. in θαῦμα, θεάομαι, gaze.

Note 3.—All vowel-sounds which do not appear in the vowel-scales are therefore unoriginal products of the sound-laws (especially of contraction after the elision of consonants).

SOUND-LAWS OF VOWELS.

§ 25.

The laws laid down in ordinary Greek grammars, i.e. the laws of contraction, etc., may be passed over as already understood.

At first sight we are struck by the frequently occurring hiatus which arises from elision of spirants *y*, *s*, *v*, and their vocalisation, and which is not by any means invariably obviated by contraction; thus arise forms such as Homéric *δηϊόωεν*, five vowels (together), 3 pl. opt. from *δηϊόω* (slay), fr. *δήιος* (hostile); *δήιος* evidently=**δησιος*=Sk. *dāsya-s* (hostile), adjectival form in *ya*, fr. *dāsa-s* (demon, slave, originally 'foe'), whence **dāsya-yā-mi* (= **δησιο-γω-μι*, whence *δηϊόω*), of which 3 pl. f.f. *dās'-ya-yai-nt*, in Gk. with superfluous unoriginal *ε* before personal termination, **dāsya-yai-ant* as f.f.=*δηιο-οι-εν*, and in that case with *ω*=*ai*, in consequence of an unoriginal lengthening of *οι* to *ω*, comes *δηϊόωεν*. (Acc. to Aufrecht in Kuhn's *Zeitschrift*, vii. 312,

§ 25. sqq., *δήιος* proved to be Aiolic in *δάϊος* belongs to $\sqrt{\delta\nu}$; f.f. accordingly of *δήιος*, *δηιόωεν* = **dāvya-s*, **dāvya-yai-ant.*) Diphth. *α, η, ω*, are only secondary products of contraction.

Whilst the termination (except a few instances, e.g. partial shortening of *ā* to *ǎ* in fem. and the like, cf. § 20) does not yet exercise a destructive influence on the vowels,—and also the vowels of syllables which follow medially upon one another (excepting the working of the *ι* of *σι* on the vowel of the preceding syllable) have no essential influence upon one another,—we perceive a variation of the older vowel-system, caused by consonantal influence,—a variation of considerable importance and characteristic of the language.

Important above all are the changes in consequence of the Greek distaste for the original and frequent Indo-European spirants *γ, ν, σ*; *γ* and *ν* become *ι* and *υ*, *γ* also becomes *ε*; *ν* and *γ* as *ι* and *υ* change position from a following to a preceding syllable; *γ, ν*, and *σ*, further fall out from between two vowels. After the disappearance and softening of consonants, frequent vowel-lengthening takes place. A consonantal sound in the beginning of a word is not unfrequently accompanied by an introductory vowel-sound, and besides occurs the so-called vowel-insertion between two consonants.

§26a. Introduction of *i* into a preceding syllable in case of termn. *-σι*. e.g. (1.) loc. dat. pl. *ταῖσι*, Iôn. *τῆσι*, thence *ταῖς*, fr. **tāsi* (pronoml. st. *ta* raised to *tā*, and loc. termn. pl. *si*), and also *τοῖσι*, *τοῖς*, fr. **to-si*, **tā-si* (although another explanation offers itself here, v. sub. 'Declension'). (2.) 2 sing. ind. and conj. act., e.g. *φέρεις* (indic.), fr. **φερεισι*, **φερε-σι*, f.f. *bhara-si*; *φέρης* (conj.), fr. **φερησι*, **φερηισι*, **φερησι*, f.f. *bharā-si*.

§26b. Vocalisation and transposition of *γ* and *ν*.

1. *γ* changes to *ι* and *ν* to *υ*, e.g. original stem-formative particle *γα* = Gr. *ιο*; *πάτρ-ιο-ς* (paternal), cf. *patr-ius*, st. *πατέρ-*, cf. Sk. *pitr-ya-s*, origl. *patar-ya-s*; *ἅγ-ιο-ς* (holy), cf. Sk. *yağ-ya-s* (to revere); compar. suff. *-ιον*, origl. *-yans*, e.g. *ἡδ-ίων*, st.

ἡδ-λον- (ἡδ-ύ-ς, sweet), f.f. *svād-yāns*, st. *svād-yans-*, cf. ἐλάσσων §26 b. for *ἐλαχγων, f.f. *lagh-yāns* (ἐλαχ-ύ-ς, small, f.f. *lagh-u-s*), in the latter of which instt. *y* as such has disappeared; pres.-st.-suff. origl. *ya*, e.g. ἰδ-ί-ω (sweat), f.f. *svid-yāmi*, δα-ίω (kindle), fr. *da-yāmi*, cf. κράζω (howl), for *κραγ-γω, with same suff. which here has retained *y*; in Dôr. fut. form. -σίω for *σγω, origl. *syāmi*; in gen. sing. masc. neut. of *a*-stem, origl. -*asya* (Gr. with loss of *σ*, *οιο*), e.g. ἵππο-ιο fr. *ἰκFοσ-γο = Sk. *āṣvasya*, origl. *akva-sya*; optat. particle *ιη*, origl. and Sk. *ya*, e.g. εἶην for *ἔσ-γη-μ = origl. *as-ya-m*, with *s* lost between two vowels; perf. part. act. fem. *υια* fr. origl. -*vant-yā*, -*vans-yā*, from the latter form with elision of *an* came *-*vsyā*, hence -*usyā* = Gk. **υσια* = *υια*; δύο, δύω = *δFω, cf. δώδεκα fr. *δFωδεκα, Sk. and origl. *dva*.

Note.—Esp. in Lesbo-Aiolic *v* between two vowels is preferred to be = *v*, e.g. χε-ύ-ω = χέFω (pour), √χv; so πνεύ-ω = *πνέFω (breathe), √πvυ; θεύω = θέFω (haste), √θv, etc.

2. Further, *ε* occurs sts. undeniably for *y* (not however for *v*, *F*) especially after consonants; in the cases from *y* there remains only the accompanying vowel-sound itself, as a short and indeterminate vowel which is nearly = *ε*, e.g. *ε* = *y* in fut. forms, πλευσοῦμαι, φευξοῦμαι = σέομαι, *σγομαι, fund. f. -*syāmai*; further in κενέος (empty), Aiol. κέννος, both fr. *κενγος, f.f. *kvanyas*, Sk. *zūnyās*; ἔτεός (true) = Sk. *satyās*; στερεός (firm, solid) beside στερρός, f.f. *στεργος, *staryas*, fem. στείρα, *staryā*; Epic ἡνορ-έη = ἀνδρ-ία (manliness), f.f. of suff. is *yā* (st. ἀνέρ-, ἀνδρ-), n. sing. ἀνήρ (man).

Note 1.—In cases of declens., e.g. πόλεως, *ε* is not = *y*, but there was a step-raising of *ι* to *ει*, and the representative *y* was lost; e.g. πόλεως = πόλεος, fr. *πολεγ-ος, st. πολι (city), f.f. *parai-as*, st. *pari*.

Note 2.—Original *v* also does not change to *ι*. In poetry perhaps the metrical forms such as πλείειν for πλεύειν (sail), √πlv, raised to πλευ, πλεF, may be traced to a present st. in *ya*, which the Gk. has strangely liked, thus πλείω = *πλεF-γω, while πλέω = πλέFω; νεῖος beside νέFος (new), νεῖός beside νεFός

§26 b. (fallow), brings us to a f.f. *navyas*, which clearly occurs in Lith. *nau-yas*, Goth. *niuyis*, st. *niuya-* (new). From such cases *ει* may have become a more widespread representative of *ε* by analogy. In *πνοιή* for *πνοή*, we find *ya*-stems, whilst *πνοφή* ($\sqrt{\pi\nu}$) has suff. *a*, *πνοιή* = **πνοφιή* = **πνοφυη*, suff. *ya*.

Note 3.—*έός* = *έF-ός*, Lat. *sou-os*, *suus*, f.f. of both **sev-os*; *τέός* = *τεFός*, Lat. *touos*, *tuus*, f.f. **tevos* (yet *σός*, fr. *σFος* = **τFος*, not raised from $\sqrt{\tau\nu}$); through the Latin the Italograec f.-forms are made clear. In forms like *ήδεΐα*, fem. of *ήδύς* (sweet), there is a clear step-raising, thus f.f. is *ήδεF-ια* = *svā-dav-yā*, diverging from the unraised Sk. *svādvī*, fr. **svādvya*.

Note 4.—G. Curt. Gr. Et.² p. 500 sqq., treats of *ο*, *ω*, as representatives of original *v*. This occurs on the whole but seldom, and mostly in words of uncertain etymology, e.g. *δοάν* (Alkman), for **δFαν*, **δFην*, *δήν* (long while), and these must stand for **διFα-ν*, **διFη-ν*, acc. of a st. **διFα-* = Lat. **diue-*, in *die-s* = **dive-s* (day, for meaning cf. Lat. *diu*, long).

3. When *y* and *v* stand after *ν*, *ρ*, they regularly occur as *ι* and *υ* before the consonants: in Aiolic dialects, however, assimilation takes place to the preceding consonant: this assimilation occurs in the case of *λ* in the other dialects, transposition in the case of *λ* is merely the exception. The origin of the transposition we must hold to be this, that at first, whilst *y* and *v* were yet in existence, an *i* and *u* arose by assimilation in the foregoing syllable (as in Zend), and that long afterwards the *y*, *v*, disappeared.

y; e.g. *κτείνω* (kill), Aiolic *κτέννω*, for **κτεινγω*, fr. **κτενγω*; *μέλαινα* (fem. fr. stem *μέλαν-* black), fr. **μελανγα*; *χείρων* (worse), Aiol. *χέρρων*, for **χειρ-γων*, fr. **χεργων*; *φθείρω* (destroy), Aiol. *φθέρρω*, for **φθεργω*; *κλίνω* (lay), Aiol. *κλίννω*, for **κλινγω*; *κρίνω* (sift), Aiol. *κρίννω*, for **κρινγω*; *πλύνω* (wash), for **πλυννω*, **πλυνγω*, **πλυνγω*, contrn. of *ι* and *υ* to $\bar{\iota}$ and $\bar{\upsilon}$.

In the case of *λγ* the assimln. occurs outside the Aiolic dial., *ὀφείλω*, however, for **ὀφελγω*, Hom. *ὀφέλλω* (ought).

Note 1.—After *ν*, *ρ*, *λ*, original *y* very often = *ι*, e.g. *χρόν-ιο-ς*,

ἐλευθέριο-ς, μακάριο-ς, παράλιο-ς, collectively constructed with § 26b. original suff. *γα*.

Note 2.—For epenthesis of *γ* beside other consonants, we have good instances in *μείζων* (greater) for **μειγ-γων*, fr. **μεγ-γων*, *μεγ-* with compar. suff. original *-γans*; ζ=γγ, consequently this is a clear case of genuine epenthesis; *κρείσσω* (stronger, better) for **κρειτ-γων*, fr. **κρετ-γων* (*κρέσσω* preserved in diall.); σσ=τυ (v. post.) formed just like *μείζων*; *πείκω* (beside *πέκω*, comb) for **πεκγω*, which by the laws of sound (*κγ=σσ*) must coincide with *πέσσω* (cook) in form; st. *γυναικ-* (*γυναικός*, gen. fr. *γυνή*, woman) for **γυνακι*, cf. *φυλακίς* (female-guard); st. *αἶγ-* (n. sing. *αἶξ* for *αἶγ-ς*, goat) for **ἀγι-*, cf. Sk. *agá-s* (stag), *agā* (goat) (Curt. Gr. Et.² p. 608). It cannot be denied that *πείκω* for **πεκ-γω* is very doubtful phonetically.

v; e.g. *γουνός*, *γοῦνα* (Aiol. *γόννος*, *γόννα*), *γούνατος*, for *γονFός*, *γόνFa*, *γόνFaτος*, st. *γόνυ* (knee); *οὔλος*, Ion.=*όλος* (all), fr. *όλFος*, cf. Sk. *sárva-s* (every, all), Lat. *saluo-s*, *sollus* (Fest. totus), fr. **soluo-s*; *παῦρο-ς* (small, few) fr. **παρFo-ς*, cf. Lat. *paruo-s*; *νεῦρο-ν* (sinew) fr. **νερFo-ν*, cf. Lat. *neruo-s*.

In consequence of the evanescence of *γ, v, s*, vowel-§ 27. accumulation and contraction occur frequently.

Thus *s* disappears, e.g. in *φέρη* fr. **φέρεσαι* (2 sing. pres. med. fr. *φέρω*, bear), Sk. *bhārasē*; *μένους* (gen. sing. fr. *μένος*, might) fr. **μενεσος*, Sk. *mānas-as*; *εἶην* (1 sing. pres. opt. of *έσ-*, esse) fr. **έσ-γην*, f.f. *as-yā-m*; *εἰπόμην* fr. **έ-σεπ-ομην*, √*έπ* (follow), i.e. *σεπ*, Sk. *sak*, Lat. *seq*, in *έπομαι*; *εἶρπον* fr. **έ-σερπ-ον*, √*σερπ* (crawl), Sk. *sarp*, Lat. *serp-o*; *πεποιθυῖα* (fem. part. pf. act.) fr. *-υσια*, and the latter fr. *v(an)tyā*, etc.

F disappears in *εἶργασάμην* (*Φεργάζομαι*, work) fr. **έ-Φεργασαμην*; *εἶπον*, *εἶπεῖν*, older *έ-ειπον*, fr. **έ-Fe-Feπ-ον*=f.f. *a-va-vak-am*, redupl. aor. of √*Feπ* (speak), Sk. *vak*, Lat. *uoc*, f.f. *vak*, etc.

Loss of *γ* is common above all in the stems whence arise the contr. vbs. in *έω*, *άω*, *όω*, fr. **εγω*, **αγω*, **ογω*=Sk. and origl. *-ayāmi*, e.g. *φορῶ*, *φορέω* (bear)=Sk. *bhāráyāmi*, etc.

Note.—The sound-laws by which concurring vowels are regulated in different dialects do not belong in this place;

§ 27. because they extend to explain the Greek forms alone. The fundamental-forms, however, in the commonest and most important cases, conform to the rules laid down in the construction of stems and words.

The forms peculiar to the Greek, e.g. ὀρόω, ὀράας, by assimilation for ὀράω, ὀράεις; δρώωσι beside δράουσι, δρῶσι, etc., frequently offer difficulties in their explanation.

§ 28. After the evanescence and medial and final loss of consonants, there often occurs a compensatory lengthening.

1. *n* lost before *s*, followed by lengthening of preceding

o to *ou*—e.g. φέρουσι (they bear)=*φερονσι fr. φέροντι=*bháranti*, φέρουσα=*φερουσα fr. *φεροντγα, etc.; λύκος (acc. pl. st. λυκο-, wolf)=*λυκο-νς, cf. Goth. *vulfa-ns*; Krêtan τό-νς=τούς (acc. pl. st. το- demonstr.), f.f. *ta-ns*, *ta-ms*.

ε to *ει*—e.g. τιθείς (n. sing. m. part. pres. act. fr. τίθη-μι, place, √θε)=Krêtan τιθένς fr. *τιθεντ-ς; χάρις (n. sing. masc. conn. c. χάρις, grace)=*χαρι-Feυτ-ς (but fem. χαρίεσσα=*χαρι-Feτγα, without *ν*, cf. Sk. sf. *-vant*, fem. *-vatī*=*vatyā*, likewise with loss of *n*), etc.

a to *ā*—e.g. ἰστᾶς (n. sing. m. part. pres. act. ἴστη-μι, place, √στα)=*ἴστανς fr. *ἴσταντ-ς, etc.

ν to *ū*—e.g. δεικνῦς (δείκνυ-μι, show)=*δεικνυς fr. *δεικνυυ-τς, etc. Similarly εἰμί (am) for *έσ-μι, by compensatory lengthening (cf. Aiol. ἐμμί by assimiln.), Sk. and f.f. *ās-mi*; ὄρεινός (mountainous) for *ὄρεσ-νος, Aiol. ὄρεν-νός (fr. ὄρος, mountain, Iôn. οὔρος, therefore older *ὄρ-Φος, √ὄρ, or-iri, exsurgere), st. ὄρες-, with sf. *-νο-*, etc.

2. Moreover medial compensation is found in the formn. of 1 aor. after the loss of *σ*, preceded by *λ*, *μ*, *ν*, e.g. ἔνειμα (νέμω, distribute) for *ἐνεμ-σα, cf. Aiol. ἐ-νέμμ-ατο, by assimiln.; ἔφηνα (φαίνω for *φανγω, point out) for *ἐφαν-σα, ἔστειλα (στέλλω for *στελγω, send) for *ἐστελ-σα, Aiol. representation of compensation, ἔστελλα, etc.

3. Compensation by lengthening is frequently found in nom. sing. masc. of consonantal stems to compensate for lost

*Fair usage policy applies

§ 29. doubtless in other languages consonantal stems have often become allied to vowel stems, especially to the *i*-stem (e.g. Lat. *pedi-bus*, st. *ped-*). [Curt. has suggested doubts which I do not understand, especially on account of the Hêrakl. *πρασσόντ-ασσι*; he maintains a helping-vowel in these cases.] Less still do futs. of verb-stems in *λ, μ, ν, ρ*, belong here, e.g. *τείνω* fr. **τενεσω*, **τενεω*; *βαλῶ* fr. **βαλεσω*, **βαλεω*. In these cases we come upon the verb-stem *-εσω*, original *asyāmi*, fut. of \sqrt{as} (*esse*) (v. sub. 'Conjugation').

2. Vowel addition (prefix).

This phenomenon of sound also is to be referred to the slight development of the vocal-sound before the following consonants. Acc. to G. Curtius (Gr. Et.² p. 649, etc.) prefixed-vowels are very rare before simple momentary sounds; they never occur before *τ, π, φ*, but on the contrary, most frequently before more than one consonant, before liquids, and before nasals. Exx. a) before two consonants, *ἀ-στήρ* (star), cf. Latin *stella* for **sterula*, Goth. *stairnō*, Sk. st. *star-*; *ὀ-φρύς* (brow), Sk. *bhrū-s*, O.H.G. *brāwa*, Skl. *brüvǐ*; Lesb. Aiol. *ἄ-σφε*, *ἄ-σφι*=*σφέ*, *σφί*, origl. st. *sva*; *ἐ-χθές* beside *χθές* (yesterday), Sk. *hyas*, etc.

b) before *λ, μ, ν, ρ*; *ἐ-λαχύς* (small), Sk. *laghūs*, Lat. *leui-s*, fr. **legu-is*; *ἐ-μέ*, *ἐ-μοί*, beside *μέ*, *μοί*, origl. st. *ma* (pron. 1 pers.); *ὀ-μιχέω* (mingo), *ὀ-μίχ-λη* (mist), origl. \sqrt{migh} , cf. Sk. *mih* (mingere), Lat. *mig*, *mi-n-go*, etc.; *ἀ-νήρ* (man), Sk. st. *nar-*, Umbr. *ner* (prince); $\sqrt{ἐ-νεκ-}$ (bear), in *ἡνέχ-θην*, *ἡνεγκ-ον*; *δι-ηνεκ-ής* (thorough), for *νεκ*, cf. O. Bulg. *nes-ti*, Lith. *nèsz-ti* (bear); *ἐν-νέφα* (nine), with redupld. *ν*, cf. Lat. *nouem*, Sk. *nāvan*, etc.; *ὀ-νυξ* (nail), st. *ὀνυχ-*, Sk. *nakha-s*, *nakha-m*, O.H.G. *nagel*; *ὀ-νομα*, name, cf. Lat. (*g*)*nōmen*, Sk. *nāman-*, Goth. *naman-*, where in the Gk. the *o* did not arise until the origl. initial *g* had disappeared, *ἐ-ρυθρός* (red)=Sk. *rudhirás*, Lat. *ruber*, fund.-fm. *rudh-ra-s*, \sqrt{rudh} ; *ἔ-ρεβος* (n. lower-world, gloom), Sk. *raḡas* (gloom), Goth. *rikvis* (dimness); *ἐ-ρεύγ-εσθαι* (belch), cf. Lat. *ructare* for *rug-tare*, etc.

c) before origl. *v*; *ἐ-Φέργ-ειν* beside *Φέργ-ειν* (keep in), cf. Sk. *varḡ* (keep off); *ἐ-Φέρση* (Il. xxiii. 598), Krêt. *ἄ-Φερσα* beside

Fέρση, ἔρση (ros, dew), cf. Sk. $\sqrt{varś}$ (rain); *ἔ-Φείκοσιν* (Il. vi. § 29. 217) beside *εἴκοσι* (twenty), Boiôt. *Φίκατι*, Sk. *vīçáti*, Lat. *uiginti*; the initial was origly. *dv* (*dvi*=two), the *e* was not prefixed until the *d* had disappeared (cf. *ῥ-νομα*); and more frequently in the case of *F*.

d) before other consonants; *ὀ-δούς* (tooth), st. *ὀ-δοντ-*, cf. Lat. st. *dent-*, Sk. st. *dant-* and *danta-*, Goth. *tunthu*; in this word the *o* arises clearly, I think, from the vowel-sound of *δ*, and my view is confirmed by the consonance of the *o* with the *o* of the second syllable, as well as by the agreement of all the other languages in initial *d*. [*ἔδ-οντες* in Aiolic should, I think, be separated fr. *ὀδόντες*, and be regarded as a poetical expression; it is a part. of *ἔδω* (eat), ‘the eating ones,’ i.e. ‘teeth’; the origl. *dant-* (tooth) may arise from \sqrt{ad} , *da* (eat), but in my opinion *da-nt-* more probably belongs to \sqrt{da} , *ad*, ‘separate, cut’; cf. Zend st. *dā-ta-*, ‘tooth.’] *ἄ-δαγ-μός* (itch), *ὀ-δάξω*, *ἄ-δαξέω* (bite, itch), fr. $\sqrt{δακ}$ in *δάκ-νω* (bite), Sk. *daç*. For other inst. of prefixed-vowel before other mom. consonn., more or less probable, see Curt. Gr. Et.² p. 653.

LATIN.

§ 30.

TABLE OF SOUNDS IN THE LATIN LANGUAGE.

CONSONANTS.					VOWELS.	
MOMENTARY SOUNDS.			PROLONGED SOUNDS.			
	UNASPIRATED. mute sonant	ASPIRATED. mute sonant	NASAL. sonant	<i>r-</i> & <i>l</i> -SOUND. sonant		
Gutt.	<i>c, q g</i>	<i>h</i>	<i>n</i>		<i>a, ā</i>	} <i>e, ē, ae</i>
Pal.		<i>j</i>			<i>i, ī</i>	
Ling.				<i>r, l</i>		} <i>o, ō</i> } <i>oe</i>
Dent.	<i>t d</i>	<i>s</i>	<i>n</i>			
Lab.	<i>p b</i>	<i>f v</i>	<i>m</i>		<i>u, ū</i>	

§ 30. Note 1.—I have placed *h* amongst the mute spirants, because it is nowhere pronounced with a vowel-sound except in Sk.

Note 2.—Guttural *n* has no peculiar character; *n* is gutt. before gutt. consonn. *c*, *q*, *g* (*n* adulterinum), but not after *g*, where, contrary to the German usage, it must be pron. like ordinary dental *n*.

Diphthongs, almost exclusively peculiar to Old. Lat., are *ai* (*ae*), *au*, *ei*, *eu*, *oi* (*oe*), *ou*, *ui*.

§ 31. LATIN VOWEL-SYSTEM.

The Lat. vowel-system has suffered frequent changes in the course of time. Classical Lat., like Umbrian, shows a distaste for diphthongs, and these have changed to more compact sounds: the old diphthongs are vouched for by Old Lat., and esp. by Oscan. In the above cases the Lat. is insensible to vowel-development. A movement of root-vowels in their scales (confined, however, generally to two steps only) is not still shown except in a few roots.

The influence of final sounds, and further of sounds generally on one another (of consonant upon vowel, vowel upon vowel), has reached a high pitch in Lat. Unoriginal shortenings and lengthenings also occur frequently, so that the vowel-system of the Latin has diverged very widely from the original sounds. Besides, Old-Lat. and Osc. (both Italic languages with more origl. vowel-systems) have reached us only in a very fragmentary condition, while Classical Lat. has the characteristics of a written language which became stereotyped under foreign influence, and Umbr. is in the highest degree unoriginal in its vowels. Accordingly, of all Indo-Germ. languages, Lat. offers the greatest difficulties to a scientific investigator.

a is frequently weakened to *u* and *i*, and passes in a great measure into *e* and *o* (later generally to *u*), as in Gk.; similarly *ā* into *ē* and *ō*, only in Lat. the influence of neighbouring sounds is clearly the reason for vowel-colouring. In consequence of the full and thorough conformity of the Lat. with

the Greek vowel-scales, we are probably entitled to treat *ō* in § 31. Latin also as a vowel of the second step.

The *i*- and *u*- scales were in the oldest form of the language exactly like the Greek, especially in the distinction of *ai* and *au* from *ei* and *eu*. In the *u*-scale the second step takes throughout the place of the first, whilst *e* before *u* (*v*) passes into *o*, according to Lat. sound-laws (vid. § 34) [as in Gk. the converse takes place]. The later language, however, has preserved only *au* of the old diphthongs; yet even this diphthong shows a marked tendency to become a simple sound in certain cases.

Latin vowel-scales (Old Lat. sounds distinguished by upright characters):

	Weakening.	Fund.-vowel.	1st Step.	2nd Step.
1. <i>a</i> -scale loss.	<i>i, u</i>	<i>e, o, a</i>	<i>o, ē, ā</i>	<i>ō</i>
2. <i>i</i> -scale		<i>i</i>	<i>ei ī ē, ai ae</i>	<i>oi oe ū</i>
3. <i>u</i> -scale		<i>u</i>	<i>eu au ō</i>	<i>ou ū</i>

In Class. Lat. *eu* no longer exists as a vowel-step, but has become *ou* (i.e. *ū*).

The change from diphth. to monophth. is capable of simple physiological explanation (assimilation of both sounds, each to the other, e.g. *ei* to *ē*, *ai* to *ae*, *oi* to *oe*, *au* to *ō*, or of one to the other, as *ei* to *ī*, *ou* to *ū*), the change from *oi*, *oe* to *ū*, is caused by the common passing of *o* into *u*. (change-scale *oi, ui, ū*; possibly also *oe, ue, ū*).

EXAMPLES.

§ 32.

1. *a*-scale.

Weakening. 1. Loss of radical *a*, e.g. *sum, sumus, sunt, siēm*, etc., for **es-um* fund.-fm. *as-mi*, **es-umus* f.f. *as-masi*, **es-unt* f.f. *as-anti*, **es-iēm* f.f. *as-yām* (*√es*, to be, cf. Gk.); *gigno* (produce, cf. *γί-γνο-μαι*), fr. **gi-gen-o*, *√gen* (cf. *gen-ui, gen-us*), origl. *gan*; especially in the second member of compounds is this loss frequent, as in *malo* fr. **maulo*, and this again fr. **mage-uol-o*

§ 32. (magis uolo), and in like cases (v. 'Sound-laws,' § 42) : sf. *-br-um* (in part at least fr. **ber-um*), \sqrt{ber} , origl. *bhar* (ferre), so that here we have a compound, not a stem-formative sf.; the same remark applies to *-gnus* fr. **-genus* (\sqrt{gen} , *gi-gn-ere*), e.g. *mali-gn-us* (ill-disposed, malus, evil), and others, and *-gium* in *iur-gium* (lawsuit) for **iur-igium*, cf. *rem-ig-ium* (rowing), \sqrt{ag} (*agere*), etc.

In stem-formative suffixes, loss of origl. *a* occurs, as in the kindred languages, e.g. *patr-is*, older **patr-us*, **patr-os*, for *pater-os*, st. *pater*, f.f. *patar-as* (gen. sing.), and in many other cases.

2. Weakening of *a* to *i* is very frequent, esp. in the second member of a compound, e.g. *ac-cipio* (receive) beside *capio* (take); *per-ficio* (complete) beside *facio* (make); *as-sid-eo* (sit by), \sqrt{sad} , Lat. *sed*; *me-min-i* (bring to mind), \sqrt{man} ; *co-gni-tus* (known), \sqrt{gna} , fr. *gan*; *in-si-tus* (implanted), \sqrt{sa} , etc.; moreover in stem- and word-formative particles, e.g. *ueh-is*, *ueh-it* (2, 3, sing. pres., \sqrt{ueh} , carry), for **ueh-isi*, **ueh-iti*, origl. *vagh-asi*, *vagh-ati*; *nō-min-is* (gen. sing. *nōmen*, name), origl. *gnā-man-as*, etc.

It occurs even in the accentuated syllable of the word (as in Germ.), e.g. *in-ter* (between), Umbr. *an-ter*, compar. of pronoml. st. *an*, cf. Sk. *an-tār*, *án-tara-s* (inter, interior), Gk. *ἔν-τερα*; *in-* (neg.), Umbr. *an-*, Sk. *an-*, Gk. *ἀν-*; *igni-s* (fire), Sk. *agnī-s*; *quin-que* (five), f.f. *kankan*, Sk. *páñkan*.

In the reduplication-syll. of pres. stems fr. roots in root-vowel *a*, this weakening takes place regularly, e.g. *gi-gno* (beget) fr. **gi-gen-o*, f.f. *ga-gan-āmi*, cf. Gk. *γί-γν-ομαι*, \sqrt{gan} ; *ser-o* (sow) = **siso* (*i* changed to *e* on acct. of the *r*), f.f. *sa-sā-mi*, \sqrt{sa} ; *si-st-o* (set), f.f. *sta-stā-mi*, \sqrt{sta} ; *sīdo* (set myself) fr. **si-sdo*, **si-sed-o*, f.f. *sa-sad-āmi*, \sqrt{sad} .

Note.—The lengthening of *e* weakened from origl. *a* into *ī* (*ei*) is hardly susceptible of proof: *scrībo* (write) beside *γράφω*, since both words are generally akin, we must perhaps assume to be a case of *a*-scale passing into *i*-scale, as often in Slavov-

Teutonic: in cases such as *uirī-tim* (man by man) fr. st. *uiro-* § 32. (*uir*, man), the analogy of other forms (verbal stems) is followed (cf. *tribu-tim*, etc.).

3. Weakening of *a* to *u* is common, esp. in stem- and word-formative elements, but also in roots, through the influence of certain consonants. *i* is clearly the furthest weakening from *a*, for *u* through intermediate *ü* ("medius quidam inter *i* et *u* sonus—pinguius quam *i*, exilius quam *u*—sonum *y* Graecae uidetur habere" Gramm.; imp. Claudius Caesar ordered the character † to be used for this sound) often changes to *i*, whilst older forms in *u* exist beside later ones in *i*; *u* is also an unimportant representative of weakening from *a* through *o*, the older lang. very often retaining *o* where later *u* occurs. The vowel-scale of change from *a* to *i* is therefore evidently: *a*, *o*, *u*, *ü*, *i*. Thus, e.g. a f.f. *ap-tama-s* becomes **op-tomo-s*, *op-tumu-s*, *op-tümu-s*, *op-timu-s* (best), Ital. *ottimo*; *dakama-s*, **decomo-s*, *decumu-s*, *decimu-s* (tenth), Ital. *decimo*; beside *cap-io* (take), *man-cup-ium* (property; Plaut.), *oc-cup-are* (seize), *in-cip-ere* (begin), *man-cip-ium*; *con-cut-io* (shake violently) beside *quat-io* (shake), *in-sul-sus* (unsalted) beside *salsus* (salted), etc. *u* is frequent as a merely later change fr. older *o* (cf. Gk., where *o* remains), especially in word-formative elements, e.g. nom. acc. sing. masc. neut. of origl. *a*-stem *-u-s* fr. Old-Lat. *-o-s*, Gk. *o-s*, origl. *-a-s*; *-u-m*, Old-Lat. *-o-m*, Gk. *-o-v*, origl. *-a-m*, e.g. *da-tu-s* (given) fr. *da-to-s*, Gk. *δο-τό-s*, origl. *da-ta-s*; acc. *da-tu-m* fr. *da-to-m*, Gk. *δο-τό-v*, origl. *da-ta-m*. Lat. *os*, *us*, generally represents origl. final *as*, e.g. *gen-us* (race), earlier *gen-os*=*γέν-ος*, Sk. *gán-as*, origl. *gan-as*; *op-us* (work), Old-Lat. *op-os*, Sk. and origl. *áp-as*; *-bus* (sf. dat. abl. pl.), earlier *-bos* for *-byos*, Sk. *bhyas*; *ferunt* (they bear), Old-Lat. *fer-ont*, *fer-onti*, Gk. *φέρ-οντι* (*φέρ-ουσι*), Sk. and origl. *bhár-anti*; also in pres. part. *o* clearly is the form of the earlier lang., cf. *e-unt-em* (him who goes), i.e. *e-ont-em*, where beside *e*, *o* has become *u*, whilst *e* regularly occurs; *uol-unt-arius* (willing)

§ 32. points to a once-existing **uolont-*, **uolunt-*, beside usual *uolent-* (willing), etc.

After consonantal *u*, *o* remains, e.g. *uolt* (later *uult*, he will), Sk. and origl. √*var*; *loquontur* (*loquuntur*, they speak); *quom* (*quum*, conj. 'when,' 'since,' cf. *quon-iam*), f.f. *kam*; *quo-d* (which), f.f. *ka-t* (but *is-tu-d*, f.f. *ta-t*); *nouo-s*, new (*nouus*), Sk. and f.f. *náva-s*, etc.

Note.—Through the older *o*-forms, Latin approaches near to Greek.

§ 33. The root-vowel of the *a*-scale, origl. *a* is represented by—

1. *a* preserved in a very few cases, appearing by preference before *g*, *c*, e.g. *ac-us* (needle), *ac-ies* (point), *ac-erbus* (sour), √*ac*, Sk. *aç*, origl. √*ak*; *ag-o* (drive), ἄγ-ω, Sk. *ág-āmi*, √*ag*; *mag-is* (more), *mag-nus* (great), μέγ-ας, Sk. st. *mah-ánt-* (n. sing. masc. *mah-án*), Goth. *mik-ils*, √*mag*, Sk. *mah* fr. *magh*; *frag-ilis* (breakable), *frag-or* (crash), *fra-n-go* (break), Goth. √*brak* (pres. *brik-a*, pf. *brak*); *ang-uis* (snake), Sk. *áh-is*, Gk. ἔχ-ις, Germ. *unk*; *ans-er* (goose) for **hans-er*, Germ. *gans*, Sk. *hās-ás*, f.f. *ghans-*; *al-ius* (other), ἄλλος=*ἄλ-γος, Goth. *al-is*; *ap-iscor* (get), *ap-tus*, cf. Sk. *āp-nō-mi* (1 sing. pres. ind. *adipiscor*) √*ap*; *sta-tus* (placed), Gk. στα-τός, f.f. *sta-tas*, √*sta*; *sa-tus* (sown), √*sa*; *da-tus* (given), *da-tor* (giver), Gk. δο-τός, δο-τήρ, √*da*, etc.

2. Origl. *a* appears as *o*, especially in roots before and after *v*, and further in stem- and word-formative elements.

After *v*, as *uom-o* (spue), Gk. *Φεμ-έω*, Sk. *vám-āmi*; *uol-o* (will), *uol-t*, *uol-im*, later *uult*, *uel-im*, cf. Sk. *vár-āmi* (*vr-ṅōmi*, *vr-ṅāmi*), √*var*; *uoc-are* (call), Sk. √*vaḱ*, Gk. *Φεπ*, origl. *vak*; *uort-o* (turn), later *uert-o*, cf. Sk. *várt-atē* (3 sg. pres. med. *uertitur*, est), √*vart*; *uo-s* (you), *uoster* (your), later *uester*, cf. Sk. *vas* (*uos*, *uobis*); *uolu-ere* (twirl), Goth. *valv-yan* (*uoluere*); cf. *quatuor* (four) for **quatuors*, **quatuores*, beside τέσσαρες=*τετῤαρες, f.f. prob. *katvāras*; even *uocuus* (empty) in inscr. for *uacuus*.

Origl. *sva* is regularly so in Lat., prob. fr. *suo* for *sue*, origl.

§ 33. *vagh-ati*, √*vagh*; *pecu-* (cattle), Sk. st. *paçú-* (n. sing. masc. *paçú-s*), f.f. stem *paku-*; *eq-uos* (horse), √*ec*, Gk. ἵππος = **ik-Fos*, Sk. *áč-vas*, √*aç*, f.f. *ak-vas*, √*ak*; *dec-em* (ten), Gk. δέκα, Sk. *dáçan-*, f.f. *dakan-*; *septem*, Gk. ἑπτὰ (seven), Sk. and f.f. *saptán-*; *dent-em* (tooth, acc.), ὀ-δόντ-α, Sk. *dánt-am*; *men-te-m* (mind, acc.), f.f. *man-ti-m*, √*man*; *fer-ent-em* (bearing, acc.), φέρ-οντ-α, Sk. and f.f. *bhár-ant-am*; the origl. sound-combn. *ant* also becomes *ont*, *unt*, in Lat., e.g. *fer-unt* (they bear) fr. **fer-onti*, Sk. and origl. *bhár-ant-i*, *e-unt-em* (going, acc.; cf. § 32), beside *fer-ent-em*; st. *pa-ter-* (father), *mā-ter-* (mother), origl. *pa-tar-*, *mā-tar-*; (*g*)*nō-men* (name), Sk. *nā-man-*, f.f. *gnā-man*, etc.

e is often an evident weakening from *a*, e.g. *per-fec-tus* (made thoroughly) beside *fac-tus* (made), etc.

e has proceeded from *o* in cases such as *uert-o*, *ueter*, etc., fr. older *uorto*, *uoster*, f.f. *vart-ā-mi*, Sk. and origl. √*vart*, Goth. *varth*; *uos-ter*, cf. Sk. *vas* (uos, uobis) (cf. § 33). Accordingly *e* comes after *a* and *o* as a lighter vowel.

§ 34. Step-formation of *a*.

1. Corresponding to *e* we find *o* as the equivalent heavier vowel, and *o* sometimes occurs as a step-formn. fr. *e=a* (cf. Gk. and Slav.); thus in these cases *o=ā*; *e:o=a:ā*, e.g. *mon-eo* (warn), i.e. *mān-āyami*, caus. vb. fr. origl. √*man* (think, thus simply=make to think), beside *mens* (mind) for **ments*, **men-ti-s*, f.f. *man-ti-s* (sf. *ti*), fr. √*man*, cf. *me-min-i* (I remember), later with weakening of *e* to *i*; *noc-eo* (hurt), f.f. *nāk-ayāmi*, caus. vb. fr. origl. √*nak*, Sk. √*naç* (die) (so simply 'make to die'), *nex*, *nec-is* (death), *per-nic-ies* (ruin), *nec-are* (kill), cf. *νέκ-υς*, *νεκ-ρός* (corpse); *tog-a* (wrapper) beside *teg-o* (cover), √*tag* (H.G. *tak*), prob. for *stag*, cf. *στέγ-ω*, Sk. *sthág-āmi* (cover), in Lith. *steg-iù* (cover) stands beside *stōg-as* (tectum); *socius* (comrade) beside *seq-ui* (go with), *ad-sec-la* (escort); *doc-eo* (teach), caus. f.f. *dāk-ayāmi*, beside *di-dic-i*, *disco* (learn) for **dic-sco*, prob. for **di-dac-sco*, cf. *δι-δά(κ)-σκω* (teach) beside *διδάξω*, i.e. *διδάκ-σω*, *διδαχ-ή* (teaching), √*dak* (not *dic*, as in

dic-o, *δείκ-νυμι*, which must be kept distinct); *proc-us* (wooer) § 34. beside *prec-ari* (beg); *for-s* (chance), *for-dus* (pregnant), beside *fero* (bear), \sqrt{fer} , origl. \sqrt{bhar} .

When *o* is short, the step-formations can take place also before two consonants, e.g. *pond-us* (n. weight) beside *pend-ĕre* (weigh); *ex-torr-is* (exile), *torr-eo* (roast)=**tors-eo*, cf. *tos-tus* (p. part. pass. torreo) for **tors-tus*, beside *terra* for **ters-a* (the 'dry land' in contrast to the 'water'), \sqrt{tars} , Goth. *thars* (in *thairsan*, roast, *thaur̥syan*, thirst, vb.), Sk. *tarš* (thirst). Beside *a*, *o* occurs in *scob-s* (sawdust), *scob-ina* (rasp), and *scāb-o* (scratch); *port-io* (share) beside *part-em* (*pars*, part), *im-pert-io* (give, share).

2. \bar{e} is not common, e.g. *tĕg-ula* (tile) beside *tĕg-o* and *tōg-a*; *rĕg-em* (*rex*, king), cf. Sk. *rāḡ-am*, *rāḡ-ānam* beside *rĕg-o* (rule); *lĕg-em* (*lex*, law), *col-lĕg-a* (comrade in office) beside *lĕg-o* (pick out, read), *sĕd-es* (seat) beside *sĕd-eo* (sit), \sqrt{sad} ; *sĕ-men* (seed) beside *sā-tus*, so chiefly as a step-formn. of *e*; \bar{e} corresponds to origl. \bar{a} in *plĕ-nus* (full), f.f. *prā-nas*, \sqrt{pra} , *par* (fill); *ĕd-i*, cf. Sk. *āda*, i.e. **aāda* (perf.), fr. *ĕd-o* (eat), Sk. *ād-mi*; *sĕmi-* (half), Gk. *ἡμι-*, Sk. *sāmi-*, O.H.G. *sāmi-*; *siēm*, *siēt* (1, 3, opt. fr. *es*, be), cf. *εἴην*, *εἴη*, Sk. *syām*, *syāt*, origl. *as-yā-m*, *as-yā-t*, in which cases perh. *i* has had an assimilating influence.

3. As \bar{e} is to \bar{e} , so is \bar{a} to *a* in the sound-scale, which, therefore, occurs most often before guttural consonants, e.g. *āc-er*, *āc-ris* (sharp), beside *āc-ies* (point); *plāc-are* (appease) beside *plāc-ĕre* (please); *pāc-em* (*pax*, peace), thence *pāc-are* (to pacify), beside *pāc-isci* (bargain); *māc-ero* (soften) beside *māc-er* (thin): *amb-āg-es* (roundabout-way), cf. *amb-ĭg-ere* (be in doubt), fr. \sqrt{ag} in *āg-o* (drive, lead), Gk. *ἄγω*, Sk. *āḡ-āmi*, origl. *ag-āmi*; st. *con-tāg-io-* (*con-tāg-iu-m*, contact), and further formed from it the commoner *con-tāg-iōn-* (n. sing. *con-tāg-io*), fr. \sqrt{tag} in *tango* (touch), *tac-tu-s* (past part. pass.) for **tag-tus*, cf. *con-tingo* (touch, hit); st. *suf-frāg-io* (*suffrāg-ium*, origly. 'sherd'; vote) beside *frāg-or* (crash), \sqrt{frag} , cf. *fra-n-go* (break), *in-fri-n-g-o*

§ 34. (break into); *sāg-ire* (perceive), *sāg-us* (sooth-sayer), *sāg-a* (witch) beside *sāg-ax* (knowing); *pāg-ina* (page, leaf), *com-pāg-i* (compages, union), *com-pāg-in-* (compago), fr. \sqrt{pag} in *pa-n-g-o* (fix), cf. *com-ping-o* (fix together); *uād-o* (go) beside *uād-o* (uadum, ford); *lāb-i* (glide) beside *lāb-are* (totter); *dā*, *dā-s*, beside *dā-tus*, \sqrt{da} (give); *fā-ri* (speak), *fā-ma* (fame), *fā-cundus* (eloquent), beside *fā-teri* (own to), origl. \sqrt{bha} ; *mā-ter* (mother), Sk. *mā-tar-*, \sqrt{ma} ; *frā-ter* (brother), Sk. *bhrā-tar-*, \sqrt{bhra} , transposed fr. *bhar*.

The fem. of the *a*-st. had origly. in the Lat. also long *a*, e.g. *nou-ā*, *coc-tā*, origl. *nav-ā*, *kak-tā*, cf. Sk. *nāv-ā*, **pak-tā* (this form does not happen to occur, but is replaced by an entirely different form *pak-vā*), Gk. *νέF-ā*, *πεπ-τή*, fr. *nou-o-s*, *coc-to-s*, *nou-u-s*, *coctus*, origl. *nav-a-s*, *kak-ta-s*, Gk. *νέF-o-s*, *πεπ-τό-s*. Remains of this *ā* have been preserved in Latin.

4. Not unfrequently *ō* is a step-formation from *a*, especially beside *o=a*, and where *a* is a root-termn., further in stem-formative elements, e.g. *per-sōn-a* (mask) beside *sōn-us* (sound), *sōn-are* (sound), Sk. and origl. \sqrt{svan} ; *sōp-io* (put to sleep), i.e. Sk. and origl. *svāp-āyāmi*, causat. verb, beside *sōp-or* (sleep), Lat. \sqrt{sop} , Sk. and origl. *svap*; *uōc-em* (*uox*, voice) = Sk. *vāk-am*, Gk. *Fόπ-a*, origl. *vāk-am* beside *uōc-o* (call), origl. \sqrt{vak} (speak); *ōc-ior* (swifter), comp. fr. lost adj. corresponding to Gk. *ὠκ-ύ-s*, Sk. *āç-ú-s* (swift) (perh. sounded **oquis*), origl. \sqrt{ak} ; *dō-num* (gift), Sk. and f.f. *dā-na-m*, *dō-te-m*, n. *dōs* (dowry, = *dō-ti-s*), f.f. *dā-ti-m* beside *dā-tus*, \sqrt{da} ; *gnō-sco* (*nō-sco*, learn), *gnō-tus* (known, cf. *γι-γνώ-σκω*, *γνω-τός*), *gnō-men* (name) beside (*g*)*nōta* (mark), *co-gni-tus* (known), \sqrt{gna} , fr. *gan* (as later forms show); *pōd-ex* beside *pēd-o* and *pēd-ico*, Sk. and origl. \sqrt{pard} , Gk. *περδ*, H.G. *farz*; *da-tōr-em* (giver, acc.), Sk. *dā-tār-am*, Gk. *δο-τήρ-a*, origl. suff. *tar*, here raised to *tār*; *quō-rum* fr. st. *quo-* (rel. interrog.), origl. *ka*, etc.

5. *ū* as = origl. *ā* can only be considered a later parallel form from *ō*, since *o* has frequently become *u*; probably it does not

occur within the root. Hence the suff. *-tūro-*, fem. *-tūra-*, e.g. § 34. *da-tūr-us* (about to give), *rup-tūr-a* (breach), Lat. formns. from stems in *-tōr*, origl. *-tar*, *da-tōr-*, *rup-tōr-*, origl. *da-tār-*, *rup-tār-*; the suff. of gen. pl. *-um*, *-rum* (prob. for *-ūm*, *-rūm*, cf. Bücheler, Grundriss der Lat. Decl., p. 40) stands for earlier *-ōm*, *-rōm* (*bou-om* even in Verg.), Gk. *-ων*, in **-ῶν*, Sk. and origl. *-ām*, *-sām*, e.g. *(is)tarum* = Gk. **ταῶν*, i.e. *τῶν*, Sk. *tāsām*; *vōc-um* = Gk. *Φοπ-ῶν*, Sk. *vāk-ām*.

2. *i*-scale.

§ 35.

In this, as in the *u*-scale, there is a lack of roots which present all three steps at once. In the *i*-scale, I know only the \sqrt{fid} in *fides* (faith), *per-fid-us* (faithless) beside *con-fid-o* (trust), i.e. *feid-o* (*di-feid-ens* is vouched for) and *foid-os* (*foedus*, treaty): even in roots which appear in two steps, e.g. \sqrt{dic} (Gk. *δικ*, Sk. *diç*, etc.), in *in-dic-o* (point at), *causi-dic-us* (advocate) beside *deic-o*, *dīc-o* (say); and \sqrt{i} (go) in *ī-tum* beside *ei-s*, *ei-t*, *ei-tur* = *īs*, *īt*, *itur* (cf. *εἶμι*, go, Sk. *ē-mi*), there is a step wanting.

The fundamental vowel *i* occurs, e.g. in *dic-are* (dedicate), \sqrt{dic} , cf. Sk. *diç*, Gk. *δικ* (in *δείκ-νυμι*); *ī-tum* (cf. *ἴ-μεν*, Sk. *i-mās*), \sqrt{i} (go); *uid-eo* (see), cf. Sk. *vid-mās*, Gk. *ἴδ-μεν*, Goth. *vit-um*, \sqrt{vid} ; *sci-n-d-o* (slit), *scissus* = **scid-tus* (slitten), cf. Sansk. *khi-n-ā-d-mi*, *σχίζω* = **σχιδ-γω*, Goth. \sqrt{skid} in *skaid-an*, \sqrt{scid} ; \sqrt{mig} , origl. *migh*, Gk. *μιχ*, in *mi-n-g-o*, *mic-tus* for **mig-tus* (past part. pass.); \sqrt{lig} in *li-n-g-o* (lick), origl. *righ*, Gk. *λιχ*; *qui-s* (who?), cf. Goth. *his* (dem.), Lith. *szī-s*, f.f. *ki-s*, \sqrt{qui} = *ki*. In stem-formative elements, e.g. *ou-i-s* (sheep), Gk. *ὄF-ι-s*, Sk. *āv-i-s*, Lith. *av-ī-s*, \sqrt{u} , *av*, with suff. *i*, *i* is often lost in consequence of its position at the end of a word, e.g. *men-s* for *men-tis*, *men-ts*, f.f. *man-tis*, or dulled to *e*, as *men-tem*, cf. sqq.

This genuine *i* is dulled to *e* according to definite laws, e.g. *in-dex*, *in-dic-is* (pointer), \sqrt{dic} ; *ig-ne-m* (fire, acc.) for older *ig-ni-m*, Sk. *agni-m*, Lith. *ùgni*. The earlier forms of this acc. occur not uncommonly, as *navi-m* (ship, acc.) beside *naue-m* and

§ 35. others. Also *mare* for **mari*, cf. *mar-i-a* (in similar cases final *i* is lost); so also in *naue-bos*, *tempestate-bus* (inscrr.), origl. *i* has passed into *e*, stems *nāui-*, *tempestāti-*.

Note.—Thus here *e* is the newer, *i* the origl. and hence older sound; whilst in the case of the more usual *i* weakened from *a*, when it is interchanged in the earlier lang. with *e*, the latter is the earlier sound. The language, however, no longer felt the difference of derivation, and both *i*-sounds were treated alike. Perh. unorigl. lengthening of *i* to *ī* should not be separated from step-formn. of *i* (to *ei*).

First step: *ei* (*ī*, *ē*); **deiu-os*, *dīu-os* (godlike, *deiuae*, *deiuinus*, occur), Sk. *dēvā-s*, f.f. *daiva-s*, √*div* (shine); *deic-o*, *dīco* (say), f.f. *daik-āmi*, √*dic*; *ei-tur*, *ī-tur* ('it is gone,' impers.), √*i*; *feid-o*, *fīd-o* (trust), √*fid*; *ueiuo-s*, *uīuo-s* (alive), cf. Sk. *gīvā-s*, Lith. *gývas*, √*gi*, redupl. *gig*, *uig*, *giu*, *uiu* (*u* for *g*, through intermed. *gu* (vid. sub. "Consonn.")), *ueic-us*, *uīc-us* (hamlet), Sk. *vēças*, Sk. *Foīkos*; *uīnum* (wine), i.e. *ueinom*, Goth. *vein*, Gk. *Foīvos*; clearly *īd-us*, *eid-us* (a fixed day in the month, origly. the day on which the moon shines, the bright day; Corss. Krit. Beitr. 261), √*id*, origl. and Sk. √*idh* (vid. sub. *ai*, *ae*).

Deus (god) is weakened fr. **dēus*, **dēuos*, **deiuos*, and is thus a parallel-fm. to *dīuos*, to which *deiuīnus* points; so *ēo* (go) is clearly for **ēo*, **ēyo*, f.f. **aiy-āmi* for **aiāmi*, with splitting up of *i* into *iy*; *uen-dēmīa* (inscrr.) = *uin-dēmīa* (vintage).

In word-formative elements, *ē* beside *ei*, *ī*, is common, later generally the rule, e.g. *omneis*, *omnīs*, *omnes*, etc.

ai, *ae*, occur here and there as in Gk., e.g. *aid-e(m)*, *aed-es* (house, hearth), *aid-īlis* (overseer of buildings), *aes-tās* (summer heat) for **aed-tas*, cf. Gk. *αἶθ-ω*, *αἶθ-ουσα*, *αἶθ-ήρ*, Sk. √*idh* (kindle); *ae-uo-m*, old *ai-uo-m* (aye, long time) (except in gend.) = Sk. *év-a-s* (course), cf. *αἶ-Fών*, √*i* (go), origl. suff. *va*; *maes-tus* (sorrowful), *maer-eo* (grieve, intr.) beside *mis-er* (wretched); *aem-ulus* (vying) beside *im-itari* (imitate); *laeuos* (left-), cf. *λαἰFός*; *scaeuos* (left-), cf. *σκαἰFός*; *caecus* (blind), cf. Goth. *haihs* (one-eyed, blind).

Second step is *oi*, *oe*, *ū*; e.g. *foid-ere*, n. **foid-os* (*foed-us*, § 35. treaty), √*fid*; *über* (fruitful), early Lat. **oib-ri-s*, f.f. *āidh-ri-s*, cf. Sk. *ēdh-atē* (he grows), hence √*idh*, *über* (neut. subst. fruitfulness), early Lat. perh. **oib-es*, f.f. *āidh-as*, fr. same root; **oinos*, *oino(m)*, occurs, *oenus*, *ūnus* (one), cf. Goth. *ains*; *comoinem*, *comūnem* (common, acc.), cf. Goth. *gamains*; so we find *loidos*, *loedos*, *lūdus* (game); *oitier*, *oetier*, *ūtier* (use), etc.

Note.—For *oe* we find *ē* written by mistake (cf. Fleckeisen, 5th Art. aus einem Hilfsbüchlein für Lat. Rechtschreibung, Frankf. 1861, p. 22), e.g. *ob-ēdire* for *ob-oedire*, cf. *audire*, *n-ēnum*=*n-oenum* (*non*).

3. *u*-scale.

§ 36.

Very much obliterated in Lat. Exx. are very rare: we can bring forward only *lūc-erna* (lamp), Gk. √*λυκ*, Sk. *ruk*, f.f. *ruk*, beside *Leuc-esie* (Carm. Sal.), *Louc-ina* (nom. pr.), *lūcem* (light, acc.), *lū(c)-men* (light), *lou(c)-men*; *dūc-em* (leader) beside *douc-ere*, *dūc-ere* (lead); *rūb-er* (red), f.f. *rudh-ra-s*, beside *rūf-us* (red), f.f. *rāudh-as*; *pro-nūb-us* (marriage-making), *in-nūb-us* (unwedded), beside *nūb-o* (marry—of the woman); *rūp-es* (rock, cliff) fr. √*rup*, in *ru-m-p-o* (break); *trūd-o* (thrust) beside *trūd-i-s* (thrusting-pole).

The fund. vowel *u*, e.g. in *rup-tus* (broken), *ru-m-p-o* (break), cf. Sk. *lu-m-p-āmi*, √*lup*, origl. √*rup*; *us-tu-s* (burnt), √*us*, Sk. √*uś*; *tu-tud-i* fr. pres. *tu-n-d-o* (thump), cf. Sk. *tud-āmi*, √*tud*; *rub-er* (red), for **ruf-er*, **ruf-ro-s*, √*ruf*=*ρυθ*, Sk. and origl. √*rudh*; *iug-um* (yoke)=*ζυγ-όν*, Sk. *yug-ām*, √*yug*; *fu-i* (was), *fu-turus* (about to be), cf. *φυ-τόν*, origl. and Sk. √*bhu* (in Sk. lengthened *bhū*). In stem-formn. (not in stem-formative particles), e.g. *pec-u* (cattle, pl. *pecu-a*), cf. Goth. *faihu*, O.H.G. *vihu*, Sk. *paçú-s*.

This genuine *u* was also weakened to *i* (*ü*) [like that which arose from *a*, cf. § 32], e.g. *lub-et*, *lib-et* (it pleases), Sk. and origl. √*lubh* (desire), Goth. *lub* (in *lub-ō*, beloved, *liub-s*, love; *ga-laubs*, dear); *cli-ens* (hearer), √*clu*, √*κλυ*, origl. *kru* (hear);

§ 36. **manu-bus*, and hence *mani-bus* (*manu-s*, hand), *u* is noticeably preserved in many cases; *fructi-fer*, *corni-ger*, fr. **fructu-fer*, **cornu-ger* (fruit-bearing, horn-carrying).

Note 1.—Genuine *u* does not change to *o* except in *fö-re* fr. *fü-se*, √*fu*.

Note 2.—*ū* as lengthening from *ū* is prob. not to be separated fr. *ū=ou*, 1st and 2nd step-formn. of *u*. In *tū* (thou), we have an unorigl. lengthening, f.f. is *tū*, for in Sk. *tv-am*, Gk. *τύ, σύ*, Goth. *thu*, Scl. *ty*, there is no step-formn. We cannot decide between lengthening and step-formation in cases like *sū-s* (boar), *ūs*, O.H.G. *sū*; *mūs* (mouse), *μūs*, O.H.G. *mūs*, etc., where Gk. vouches for the hypothesis of the lengthening.

The first step-formn. (acc. to analogy of all Indo-Eur. langg.)—sounded of course precisely as in Gk.—was *eu*; but it was lost very early, since the only remaining instance of this archaic step-formn. is in *Leuc-esius* (n. prop.), cf. *λευκ-ός* (white), also *Loucetius*, *Lucetius*; f.f. is prob. **Leuc-ent-ios*, a further formn. fr. a particp. st. **leuc-ent-* (as *Prudent-ius* fr. *prudent-*), of a pres. **leuc-o*, √*luc*, as *φεύγ-ω* fr. √*φυγ*. In consequence of the sound-law mentioned § 33, (*e* before *u*, *v*, changed to *o*), there will arise fr. *eu* an *ou*, coinciding with 2nd step, and later becoming *ū*. Hence from *dūc-o* (lead), *douco*, we must infer an older **deuco*, f.f. *dauk-āmi*, √*duk* (because pres. stt. of this kind were formed by the 1st step); *ūro* (burn), **ouso* for **euso*=*εὔ-ω* for **εὔσ-ω*, Sk. *ṓś-āmi*, f.f. *aus-āmi*, √*us*; in roots which end in *u* we find *ov* for **ev*=*eu*, e.g. **plou-ont*, thence *pluu-ont*, *plu-ont* (they rain); **plou-ont*, however, is for **pleu-onti*, cf. Gk. *πλέF-οντι* (*πλέ-ουσι*), f.f. *plav-anti*; so *flu-ont*=*flou-ont*, fr. **fleu-onti*, and other similar pres. fms.; *ious*, *iour-is* (*iūs*, *iūr-is*, right), is for **iou-os*, **iou-es-is*, and formed like **gen-os*, **gen-es-is* (*gen-us*, *gen-eris*), fr. √*iu* (*iungere*), by the first step, as is usual in this kind of noun st., **iou-os* is thus for **ieu-os*, formed fr. √*iu* like *κλέF-ος* fr. √*κλυ*, and corresponding Sk. *çrāv-as* fr. √*çru*; *iūs*, *iūr-is* (broth)=**iou-s*, **iour-is*, **iou-os*, **iou-es-os*, **ieu-os*, **ieu-es-os*, f.f. *yav-as*, *yav-as-as*, fr. another √*yu*, Gk. √*ζυ* (in *ζύ-μη*, yeast), cf. Scl.

*Fair usage policy applies

§ 36. here belongs *ūber* (udder), on acct. of Gk. *οὔθηρα*, f.f. of both *āudhar*, though Sk. *ūdhas*, O.H.G *ūtar* (H.G. *euter*), show other degrees of the scale: perh. also *lūc-em*, *Louc-ina*, *lū(c)men*, *√luk*, origl. *√ruk*.

Note.—*ū*, *ou*, are here and there secondary products through falling-out of sounds, as e.g. **cuncti*, *cuncti* (all together), fr. *co-iuncti*; *noundinum* (S.C. de Bacc.), *nūndinum*, fr. **nouendinum*, cf. *nundinae* (period of 9 days), *prūdens* fr. *pro-uidens*.

§ 37.

VOWEL SOUND-LAWS.

Accurate statement of the extraordinarily variable vowel sound-laws of the Lat. must be left to the special-grammar of the lang.: a general view only can be given here.

Hiatus. In case of vowels coming into contact with one another, hiatus is often obviated by means of contraction. This occurs regularly, when the first vowel is *a*, thus *amo* (1 sing.) fr. **amao*, *amas* (2 sing.), fr. **amais*, f.f. of termn. *-ayāmi*, *-ayasi*; *amarunt* (3 pl. pf.) fr. *ama(u)erunt*; *equae* and *equā* fr. *equāi* (d. sing); *diē*, *fidē*, fr. *diēi*, *fidēi*, etc. Other exx. are found in *sīs* fr. *siēs*, *sīt*, earlier *seit*, fr. *siēt*, f.f. *syāt*; *tibī*, *tibei*, fr. *tibie*, f.f. of termn. *-bhya(m)*; so too in *uōbeis*, *uōbīs*, f.f. of termn. *bhya(m)s*; *senatūs* (gen. sing.) fr. *senatuis* (*-tuos*), *senatu* (d. sing.) fr. *senatui*, *cōgo* fr. **co-igo*, *equo* (d. sing.) fr. *equōi*, etc. Both vowels, however, remain in many cases, esp. *u* and *i* with its kindred *e* make no hiatus with follg. vowels, e.g. *fui*, *lues*, *fluunt* (*fluont*); the noun-termns. *-io*, *-ia*, *-ies*; *fieri*, *tenuia* (*tenvia*), *eunt*, *eo*, *meae*. In combination even *co-actus*, *de-esse*, *co-optare*, but also medially, *boo* (*boare*), etc. Hiatus in the middle of a word is almost always brought about by loss of consonn., e.g. *fluunt* fr. *flouont*, *boo* fr. *bouo*, etc. The laws of hiatus in Lat. need a further and more accurate settlement.

§ 38. Assimilation exercises a wide-spread influence; vowel assimilates vowel, both forwards and backwards, and also in case of indirect contact of vowels (passing over consonn.), causing both

partial and complete similarity; and the same effects are produced § 38. by consonants upon vowels (relationship between particular consonantal- and vowel-sounds). And, moreover, by this means immediate contact betw. like vowels is avoided, and dissimilation takes place.

Thus *aureolus*, *gladiolus*, even *vinolentus*, etc., stand for **aureulus*, **gladiulus*, **vinulentus*, fr. *aureu-s*, *gladiu-s*, *uinu-m*, cf. *longulus*, *turbulentus*; *duritie-s* beside *duriti-a*, etc.; cf. *siēm*, *siēs*, *siēt*, with Sk. *syām*, *syās*, *syāt*. In these and similar cases we see an assimilating influence of foregoing vowels on those follg.; consequently *o* is nearer to *e* and *i* than *u*, and *e* more akin to *i* than *a*.

A reflexive assimiln. passing over cons. occurs, e.g. in *ex-ul* but *exil-ium*, *facul-tas* but *facil-is*, *sta-bulum* but *sta-bilis*; *mihi*, *tibi*, but Umbr. *mehe*, *tefe*; *bene* but *bonus*.

For relation between *o* and *u*, vide § 33, 2; *u* has a special affinity for labials, and above all *m* and *l*. Hence from weakened *a* we get, not *i*, but *u*, in cases like *oc-cup-o*, *au-cup-ium*, bes. *capere*, *con-tubernium* (chummage) beside *tab-erna* (hut), *op-tum-us* (later only, *optimus*), etc.; bef. *l* older *o* became *u*, e.g. *poculum* fr. *pocolom*, *consul* fr. *cosol*, *epistula* fr. *ἐπιστολή*; through this weakening of *a*, before *l*+cons. we find *u*, not *i* or *e* (the regular representative of *i* before 2 consonn.), e.g. *salsus*, *insulsus*, *sepelio*, *sepultus*, etc.; further, *u* has remained before *n*+cons., e.g. *ferunt*, *homunculus* (cf. supr. § 32). Throughout, it represents here too an earlier *o*, wh. maintained itself intact in the popular diall., as later inscrr. and Ital. (e.g. *sepoltura* as early as 558 A.D., cf. Ital. *sepolcro*, *colonna*, Ital. *colonna*) prove.

Even origl. *i*—not weakened fr. *a*—gives way to *u* in cases like *testu-monium* (witness) beside *testi-s*; *carnu-fex* (flayer) beside st. *carni-* (n. *caro*, flesh), and the like; where, nevertheless, the analogy of the commoner cases may have had some influence.

e is retained by preference in final syll. bef. nasals, e.g. *septem*, cf. *ἐπτά*, *nōmen*, Sk. *nāman-*, *cornicen*, $\sqrt{\text{can}}$, *ouem* fr. *oui-m*, and

§ 38. so in most *i*-stems; in acc. sing. of *a*-stem nevertheless we find *o*, *u* (*nouo-m*, *nouu-m*); but above all *e* is found bef. *r*, e.g. *camera* fr. *καμάρα*, *operis* beside *nominis*; *stetērunt* for **steti-sonti*, cf. *stetis-ti*; *ueher-is* fr. *uehis-is*, cf. *uehit-ur*; *peperi* for **pepiri*, fr. *pario*, like *cecini* fr. *cano*; *affero*, not **af-fir-o*, wh. we might look for acc. to analogy, comparing such cases as *colligo* fr. *lego*.

r has also a preference for *o* (= *u*) preceding, e.g. *fo-re*, *fo-rem*, fr. \sqrt{fu} (*fu-turus*); Lat. *ancora* fr. Gk. *ἄγκυρα*; but *robur*, *ebur* with *u*, perh. on account of preceding *b*.

Further, *e* occurs bef. two or more consonn. interchangeably with *i* bef. one cons., e.g. *iudex* but *iudicis*; *eques-ter* for **equet-ter*, **equit-ter* but *equit-em*; *asellus* fr. **asin(u)lus*, cf. *asinus*; *consecro*, *abreptus*, etc. (but it remains *i* bef. *ng* in *attingo*, *infringo* and the like).

The sound-combinations *ent*, *end*, and *unt*, *und*, are weakened forms, e.g. *fer-ent-em* beside *e-unt-em* fr. **e-ont-em*, where the earlier sound *o*, *u*, has been kept in consequence of dissimiln., beside *e*, *uolunt-arius*; *faciendus* and *faciundus*, both fr. **faciendus*, remain in 'sacris faciundis,' 'iure dicundo,' and the like. After *u*, *e* is invariable: *tu-endus*, *restitu-endus*. *a* is throughout the origl. vowel in these cases.

i has a special affinity to *n* and *dentals*, and is the commonest weakening fr. *a*, e.g. *μηχανή* but *māchina*; *nominis*, *hominis*, *cecini*, fr. stems *gnāman-*, *ghaman-*, *ka-kan-*, etc.

By dissimiln. is prevented the combn. of two like vowels, e.g. *ueri-tas* fr. *ueru-s*, but *pie-tas* (*piu-s*), *ebrie-tas* (*ebriu-s*), etc., not **pii-tas*, etc.; *equit-is* (*eques*) but *abiēt-is*, *ariēt-is*, *pariet-is* (*abies*, *aries*, *paries*); *diuinus*, *diuo-s*, but *aliēnus* (*aliu-s*); *lēui-gare* (*lēuis*) but *uarie-gare* (*uariu-s*), etc. The first vowel is changed in *mēio* fr. **mīg-yo*, **mīo*: *ei*, *dei*, are older and more correct than *ii*, *dii*, etc. Through dissimiln. *o* kept ground longer after *u*, *v*, e.g. *equos*, *equom*, *nouom*, *mortuos*, etc.

§ 39. Through loss of consonants vowel-change takes place, viz.
1. Compensatory lengthening; 2. Contraction.

1. Compensatory lengthening, e.g. *pēs*, *ariēs* = **pēd-s*, § 39. *ariēt-s*; a regular shortening has here taken place later (§ 41), e.g. *pedēs* fr. *pedēs* = **pedēt-s*, *patēr* fr. *patēr* = **patēr-s*; *ferēs* = **ferēt-s* (cf. *φέρων* = *φεροντ-s*); *sāl* (salt) = *sāl-s* (gen. *sāl-is*), cf. *ἄλς*, etc.; esp. often through loss of nasal bef. *s*, e.g. acc. pl. of *a-st.* -*ōs* (*nou-ōs*) = -*ons* (f.f. *nav-ans*); in compar. -*iōr*, -*iōrem*, fr. -*yans*, -*yansam*, etc.; further, *pōno* (place) = **pos-no* (cf. *pos-ui*), *quini* (by fives) = *quīncni*, *exāmen* (swarm) = *exāg-men* (*āgo*); thus *g* falls out esp. bef. *y*, e.g. *māior* (greater) = **māg-ior*, cf. *mag-nus* (great), *āio* (say) = **āg-io* (cf. *ad-āg-ium*, proverb), *mēio* (urino) = **mīio* = **mīguo*, etc.

2. Contraction (vid. supr. § 37), e.g. *amārunt*, *amāsti*, *nōrunt*, *amō* (fr. **amao*), *docēs*, *audīs* (fr. **doce-is*, **audi-is*); *nouīs* = **nouo-is*, **noua-is* fr. **nouo-bios*, **noua-bios* (v. Decl.), etc. In redupl. perff. this case is very clear, e.g. *fēci* fr. **fēfici*, cf. *cecini*, likew. *iēci*, *frēgi*, etc.

Note.—Cases like *inuītare* (invite) = **uicitare*, √ *uōc*; *conuītium* (wrangle) = **conuīcitium* √ *uōc*; *suspītio* (suspicion) = **suspicitio*, etc. (on the last ex. cf. Fleckeisen, Rhein Museum, viii. 227; on the other side Corssen, Kritik. Beitr. s. 12 sqq., who writes *suspīcio*, *conuīcium*, and derives them accordingly, but assigns *inuītare* to an ambig. Sk. √ *vi*). Cf. § 77, 1. a. sub fin.

Weakening (lightening of vowels by change of quality § 40. with and without shortening) is very common in Lat., and throughout not exclusively confined to unaccentuate sylls., whence probably too the analogy of this weakening arose (cf. supr. § 32, 2; on the question cf. G. Curtius, das dreisilbengesetz der Gk. u. Lat. betonung, in Kuhn's Zeitschrift, ix. 321 sqq.). Esp. regular is the occurrence of weakg. in sylls. of word-formation; in composition and in reduplication, but also in root sylls. Nevertheless, that the weakening did not invariably occur in the second member of a compound is proved by exx. such as *com-paro*, *per-agro*, *per-actus*, etc. (Corss. Kuhn's Zeitschr. xi. 370). Through weakening

§ 40. *a* becomes *e*; *fall-o fe-fell-i, parc-o pe-perc-i, fac-tus per-fec-tus, etc.*

a becomes *u*; *cap-io, oc-cup-o*; here belongs the *u* of the unaccentuated final sylls., e.g. *da-tu-s* f.f. *da-ta-s*; early Lat. *oper-us*, Sk. and f.f. *ápas-as*, etc.: the change fr. *a* to *u* is through intermed. *o*.

a becomes *i*; e.g. *fac-io con-fic-io, pa-ter Iupi-ter, cad-o, ce-cid-i, can-o, ce-cin-i, etc.*; the change must be through intermed. *e*. *e* occurs for *i* acc. to the above-stated rule, in cases like *tubi-cen, pe-per-i, oper-is* for **opis-is* (*opos-os* f.f. *apas-as*), etc. Cf. § 38.

ā becomes *ē*; *hāl-o an-hēl-o*.

ae becomes *ī*; *quaer-o in-quir-o, caed-o ce-cīd-i con-cīd-o, aequos in-īquos, etc.*

au becomes *ō, ū*; *caus-a ac-cūs-o, fauc-es suf-fōc-o, plaud-o ex-plōd-o, etc.*

Even long vowels and diphths. became *ĭ* (*ě*) by more marked shortening, e.g. *gnō-tus co-gnĭ-tus, iouro (iūro), pe-iĕro, de-iĕro* (*-yĕro* for **-yiro*, with *e* for *i* bef. *r*, cf. § 38).

Before secondary suffixes, and as 1st member of compds., stems in *o, u*, weaken their stem-termns. before consonn. to *i*, e.g. *duri-tas, duri-ties*, st. *duro-* (*durus*); *corni-culum, corni-cen, corni-ger*, st. *cornu-*, etc.

Bef. vowels *u* remains, e.g. *fructu-arius fructu-osus*, st. *fructu-*; it also keeps ground bef. labials, e.g. *locu-ples, quadru-pes, quadru-plex*.

§ 41. Also shortening of vowels in unacc. final sylls. prevails very widely.

Thus *ă* in fem. is origl. *ā* (Sk. *ā, η*), hence kept long sometimes in earlier Latin; *ě*, in abl. sing. of *i*-st. and of conson. stems, following their analogy, is origl. *-ait*, thence *-aid, -eid, -ēd, ĭd*, later *-ei, -ē, -ī* (so *patrē*, tit. Scip. Barb.); *ē* of the vb. sometimes appears short, e.g. *cauě, iubě*; *ĭ* in *mihĭ, tibĭ, ubĭ*, etc., is fr. earlier *ī, ei* through shortening, *mihei, tibeī, ubeī*, occur not seldom: final *ō* always represents origl. *ō*, e.g. *homō = *homon-s*;

agō cf. ἄγω, f.f. *ag-āmi*, next step *ag-ā* by loss of *mi*; *egō* cf. § 41. ἐγώ; in these cases the nasal may have caused the dulling of *ā* to *ō*; *duo*, *ambo*, *octo*, cf. δύο, ἄμφω, ὀκτώ.

Shortening occurs regularly bef. final *t*; *amā-t* for *-āt* = *-ait*, *-aat* fr. *-ayati*, cf. *amā-mus*; so *-et*, *-it*, in the derived vbs. and in opt. fr. *-ēt*, *-īt*, earlier *-eit*: also *-it* in pf. was sounded *-eit* in earlier times, and the like.

Similarly bef. other consonn., e.g. *-is* of opt. (*fecerīs*) for and beside *-īs* (*fecerīs*); *pa-tēr* fr. *pa-tēr* (cf. πατήρ) for **pa-ters*; *-ōr* in nom. sing. fr. *-ōr*, e.g. *censōr* (tit. Scip.) fr. **cens-tor-s*, and many more such.

Evaporation in unacc. sylls. brings us to total loss, final and § 42. medial loss of vowels (§ 32).

Final loss of vowels is partly of late date only, e.g. *animal* for and beside *animale*, *dic* for and bes. *dice*, *hoc* for and bes. *hoce*, *ut* for and bes. *uti*; partly older, e.g. *uehis* for **uehisi*, f.f. *vaghasi*; *est*, *uehit*, for **esti*, **uehiti*, f.f. *asti*, *vaghati* (*tremonti* has remained, Bergk. index lect. Marburg, 1847–8), etc.

Medial loss of weakly-accented vowels is esp. common in Lat., and occurs (1.) bef. vowels, e.g. *minor*, *minus*, for **minior*, **minius*; *nullus* for *ne-ullus*, etc.; cases can be produced where no contraction has taken place, e.g. *un-ōculus* (*uno-oculus*), *sem-ānimus* (*semi-animus*), *nūtiquam* (*ne-utiquam*). (2.) bef. consonn., the commonest case, e.g. *alumnus*, *uertumnus*, for **alumenus*, **uertumenus*, suff. = Gk. *-μενο-*, Sk. *-māna-*; *stella* for **sterla* fr. **sterula*; *puella* for **puerla* fr. **puerula*; *misellus* for **miserlus* fr. **miserulus*; *patrem* for **pater-em*, st. *pater-*; *rettuli* fr. **re-tetuli*; *reppuli* fr. **re-pepuli*; *repperi* fr. **re-peperi*, and so on. Thus the loss of medial vowels is chiefly approved betw. like consonn. (as in Mid.H.G., Zeitschr. x. 160). Unacc. *i* may altogether disappear, e.g. *dixti* fr. *dixisti*, *ualde* fr. *ualide*, *gaudeo* fr. **gauideo* (cf. *gauisus*), etc.

Of special importance in treatment of declension is the medial loss of origl. *a* and *i*, i.e. *o* or *u* and *i* before the *s* of nom. sing.

§ 42. Thus arises *puer*, etc., fr. **puers*, which comes fr. *puero-s*, *puerus* (in existence), *uir* fr. **uirs*, **uiros*, *acer* (§ 43) fr. *acris*, etc. This is noticeably regular after *r* with short syll. precedg.; hence *quatuor* stands for **quatuors*, **quatuores*, cf. τέσσαρες, Sk. *katvāras*; after the vowel had been lost, the *s* also fell off from the *r*. Such forms as *famul* (Enn. Ann.) are obsol.; it stands for **famuls* fr. *famulos*, *damnas* for **damnats* fr. *damnatos*; *alis* for *alios* (vouched for more than once); *Sallustis*, *Clodis* (Inscrr.) for *Sallustios*, *Clodios*, etc.; *alid* for **aliud*, *aliud*.

Loss of *i* in *i-st.* is remarkably common, whereby its Lat. nom. has become thoroughly confused with that of conson. stems, thus e.g. *primas* for older *primatis*, *gens* fr. **gents* and this fr. **gen-ti-s*, *mors* for **morts* fr. **mor-ti-s*, fr. √*gen*, origl. *gan* (*gignere*), and √*mor*, origl. *mar* (*mori*), f.f. therefore *gan-ti-s*, *mar-ti-s*, and the like. Further *acer* for and bes. *acris*, *uigil* fr. *uigilis*, etc.

Note.—The occasional omission of vowels in the text of Inscrr. which could not take place in the spoken lang. (e.g. *dcumius*, *fect*, *uixt* for *Decumius*, *fecit*, *uixit*) has been pointed out by Ritschl. (Rhein. Mus. n. Folge xvi. p. 601 sqq.; xvii. p. 144 sqq.).

§ 43. Insertion of a helping-vowel likewise sometimes occurs in Lat., e.g. *s-u-m* fr. **es-mi*, **es-u-mi*, origl. *as-mi*; *s-u-mus* fr. **es-mus*, **es-u-mus*, origl. *as-masi*; *uol-u-mus* fr. **uol-mus*, f.f. *var-masi*, cf. *uol-t*, f.f. *var-ti*; *teg-u-mentum* (hence *teg-i-mentum*) bes. *teg-mentum*, and the like belong likewise here; *u* is here the helping-vowel on account of *m* following, cf. *drach-u-ma* (Plaut.) fr. *δραχ-μή*, since in general a similar vowel-insertion was admitted in foreign words, as e.g. *tech-i-na* (Plaut.) from *τέχνη*, etc.

Bef. *r*, *e=i* (§ 38), e.g. *um-e-rus* (shoulder) bes. Sk. *āsa-s* for **amsa-s*, *rub-e-r* (red) for **rubr* fr. **rubrs*, **rub-ro-s*=ἐ-ρυθ-ρός, Sk. also with helping-vowel *rudh-i-rá-s*, origl. *rudh-ra-s*; *gener* (son-in-law) for **gen-r(o-s)*, cf. *γαμβρός* for **γαμ-ρός*; *ager* (field) for **ag-r(o-s)*, Gk. *ἀγ-ρός*; *caper* (he-goat) for **cap-r(o-s)*, a form like *κάπ-ρος* (boar), etc.

B. CONSONANTS.

§ 44. CONSONANTS OF THE INDO-EUROPEAN ORIGINAL LANGUAGE.

The consonn. in Indo-Eur. are specially distinguished from the vowels, setting aside their physiological conditions, in that they are fixed and invariable in roots (we may pass over the changes which they undergo in consequence of sound-laws that are always secondary), but cannot, like vowels, raise themselves in a definite scale of gradation. Whilst the nine origl. vowel-sounds of the Indo-Eur. can be reduced to three fundamental vowels, the consonn. are collectively independent of one another. Whilst the vowels by means of their step-formation according to meaning thereby serve for the expression of *relation*, consonn. are merely elements of expression of *meaning*; no relationship is expressed in Indo-Eur. by the use of root-consonn.

The Indo-Eur. origl. lang. has fifteen consonn., which in § 1 are classed according to their physiological conditions, viz. three momentary mutes, three mom. sonants, three mom. son. aspirates, three spirants, and three so-called liquids, i.e. two nasals and *r*. The existence of *b* (mom. son. labial) in the origl. lang. cannot be authenticated by any perfectly certain example: but it is highly probable that it did exist, as the origl. element of the frequent aspirate *bh*. The number of origl. consonn. is also much greater than that of the vowels (prob. 3×3 , but certainly 2×3 existed).

The aspirates, as double sounds, seem to be foreign to the most original condition of the lang., and to have developed only in later times: but they certainly existed before the first splitting-up of the origl. lang., for they are found in the three divisions of the Indo-Eur., or at least they can be detected;

that is, they occur in Aryan and in S.-European; in N.-Euro- § 44.
pean likewise they must once have existed: the Teutonic has
them, it is true, like the other northern langg., changed to
sonants, but the origl. *sonants* are distinguished from them by
becoming *tenues*.

Consonantal sound-laws had not arisen so early as the
origl. lang.; consonn. can be placed anywhere, and in any com-
bination which the organism of the lang. required, because these
combinations (e.g. *vāk-bhis* inst. pl. fr. st. *vāk, voice*) were not
yet so close that those consonn. which are brought together by
word-formation exercised any influence on one another (thus
e.g. in *vāk-bhis* the influence of *bh* on *k* produces as early as
Sk. the fm. *vāg-bhīs*: *k* has here changed bef. sonant *bh* into
its corresponding son. *g*: on the improbability of origl. inter-
change of *i, u*, with *y, v*, cf. § 3).

EXAMPLES.

§ 45.

Momentary mute unaspirated consonants.

1. *k*. *ka-s* (who), *ka* (-que, and), *katvār-as* (four), *kankan*
(five), *kard* (heart), \sqrt{kak} (cook), \sqrt{ka} and *ak* (be sharp, quick),
 \sqrt{ki} (lie), \sqrt{kru} (hear), *kru-ta-s* (heard), *kvan-s* (dog), \sqrt{skid}
(cut), \sqrt{vak} (speak), \sqrt{dak} (bite), \sqrt{dik} (show), \sqrt{ruk} (light),
ak-man-s (stone, heaven), *dakan* (ten), *varka-s* (wolf); sf. *-ka*, etc.

2. *t*. *ta-t* (that), *tu* (thou), \sqrt{ta} , *tan* (stretch), *tri* (three), \sqrt{sta}
(stand), *stag* (cover), \sqrt{pat} (fly, fall), \sqrt{prat} (broad), \sqrt{vart} (turn);
common in stem- and word-formative particles, e.g. sf. *-ta* (pf.
pt. pass.), *bhara-ti* (fer-t), *ragh-is-ta-s* (ἐλάχιστος), etc.

3. *p*. \sqrt{pa} (drink), \sqrt{pa} (protect, rule), thence *pa-ti-s* (lord)
and *pa-tar-s* (father), *par* (fill), hence *paru-s* (many) and *par-na-s*
(full), \sqrt{pad} (go) as noun-st. n. sing. *pad-s* (foot), *pratu-s*
(πλατύς), \sqrt{pru} (flow), *prav-ati* (he flows), \sqrt{spak} (see, look),
 \sqrt{sarp} (creep, serpere), \sqrt{tap} (burn, heat), \sqrt{svap} (sleep) thence
svap-na-s (sleep, n.), etc.

§ 46. Momentary sonant unaspirated consonants.

1. *g*. √*ga* (go), 1 sing. pres. *ga-gā-mi*, √*ga*, *gan* (be born), √*gan* (know), √*ag* (agere), *ag-ni-s* (ig-ni-s), √*grabh* (grasp), √*yu-g* (iungere), thence *yug-am* (yoke, iug-um), etc.

2. *d*. √*da* (dare), 1 sing. pres. *da-dā-mi*, √*dak* (bite), √*dam* (tame, domare), *dama-s* (domus), √*dik* (show), √*div* (shine), st. *dva-* (two), √*ad* (eat), √*sad* (sit), √*vid* (uidere), 1 sing. pres. *vaid-mi*, etc.

3. *b*. I know of no certain example of this sound.

Note.—The Teutonic and Gk. forms of those words that show *b* in the Aryan and S.-European langg. point partly to *bh*, e.g. Sk. √*bandh* (bind), but Goth. *band*, f.f. therefore *bhandh*, Gk. √*πενθ* for **φενθ*, *πενθ-ερός* (affinis), *πείσμα* for **πενθ-μα* (cable); Sk. *bāhús* (fore-arm), Gk. *πῆχυς* for **φηχυς*, N.-Eur. *bōgr*, O.H.G. *puoc*, origl. initial-sound *bh*; Sk. √*budh* (know), Gk. √*πυθ* (*πυζάνομαι*) for **φυθ*, Goth. *bud*, not **puð*, as might be expected fr origl. *b* (moreover the Goth. root, notwithstanding the difference of function, is identical with *budh*, *πυθ*); if *b* were origl., the Gk. fms. would be **βενθ*, **βηχυς*, **βυθ*. These three roots have a final asp., which was the effect of the disappearance of an origl. asp. at the beginning in Aryan and Gk. (this conjecture has been ably confirmed by Grassmann, Zeitschr. xii. 110). In other instt. we lack decisive representatives in N.-European, e.g. *βραχύς*, *brevis*, Slav. *brüzü*; Sk. √*lab*, *lamb* (labi, delabi; 3 sing. pres. *lāmbatē*), Lat. *lab*. (*lāb-itur*), etc.; *κάνναβις* (hemp), Norse *hanpr*, O.Bulg. *konoplya*, a doubtful and borrowed form. Grassm. Zeitschr. xii. 122 sqq. shows it to be likely that *b* did not exist in Indo.-Eur., at least at the beginning of a word. Nor have I found any certain exx., ap. Bickell Zeitschr. xiv. 425 sqq., of the origl. existence of lab. son. in Indo.-Eur.

§ 47. Momentary sonant aspirated consonants.

1. *gh*. √*ghar*, *ghra* (burn, shine; be green, yellow), *ghans-s* (m. f. goose), √*stigh* (step), √*agh*, *angh* (be tight), √*vagh* (uehere), √*migh* (mingo), √*righ* (lick), *dargha-s* (long), etc.

2. *dh*. √*dha* (set, make), 1 sing. pres. *dha-dhāmi*, √*dham* (blow), √*idh* (burn), √*rudh* (be, become red) thence *rudhra-s* and *rāudha-s* (red), *madhu* (honey, mead), *madhya-s* (medius), etc.

*Fair usage policy applies

§ 49. 2. *m*. √*ma*, *ma-n* (measure, think), thence *ma-na-s* (mind) and *mā-tar-s* (mother), √*mar* (mori), √*smar* (remember), √*vam* (uomere); common in word-formative partt., e.g. *varka-m* (acc. sg.), *ai-mi*, *i-masi* (eo, imus, 1 sg. pl. pres.), etc.; in st-formative partt., e.g. *ghar-ma-s* (heat), *gnā-man* (name).

§ 50. *r*. √*rak* (shriek), √*ruk* (light), √*rik* (liquere), √*righ* (lick), √*rudh* (rubere), *raghu-s* (light, adj.), √*kru* (hear), √*bhar* (ferre), √*ar* (oriri, ire; arare), √*par* (fill); also in stem-formative partt., e.g. sf. *tar*, *bhrā-tar-*, *mā-tar-*, and the like, but not in word-formative sff.

§ 51.

SANSKRIT CONSONANTS.

The physiologically-arranged table of Sk. consonn. is in § 4, where also their pronunciation is considered. Whilst the vowel system of Sk. is generally original, its conson. system is mixed in many ways with later elements. Hence arises that large number of conson.-sounds which is unparalleled in other Indo-Eur. langg.

The origl. sounds in Sk. are the mom. mutes and sonants, and the sonant aspp. all of gutt., dent., and lab. quality, thus, *k*, *t*, *p*; *g*, *d*, *b* (?); *gh*, *dh*, *bh*; further the spirants *y*, *s*, *v*, and also *n*, *m*, *r*. Thus Sk. still possesses the consonn. of the Indo-Eur. origl. lang. entire. All the rest, nineteen in number, have arisen in pure Aryan words from these fifteen origl. consonn., and are to be treated as parallel fms. of them, which have been called forth according to generally perceptible sound-laws, and through the influence of the non-Indo-Eur. langg. spoken by Dravidian (Dekhanic) peoples who were pressed back by the Aryans, and were the earlier inhabitants of the peninsula of Further India, just as neighbouring langg. very often acquire sounds from one another.

The origin of the so-called Sk. lingual mom. consonn. and ling. nasal (*ṭ*, *ḍ*, *ṭh*, *ḍh*, *ṇ*) is due to the latter influence, therefore these sounds are peculiar to Indian, and are unknown in this form to other Indo-Eur. langg. Within the Indian these

sounds gain a still wider sway in the course of the development § 51. of the lang. (in the Prākritis). In Aryan words they are variations of their corresponding dentals.

Further the palat. mom. sounds and their nasal are all unorigl. (\acute{k} , \acute{g} , $\acute{k}h$, $\acute{g}h$, \acute{n}); they have arisen from the corresponding gutturals; and so is the pal. mute spirant $\ç$, which is a variation fr. k . The law acc. to which the gutt. partly pass into palatals, partly remain, is hitherto unexplained in particular cases (however, that the change of gutt. into palat. did not occur till late, is implied by the circumstance that the gutt. were reduplicated by means of the corresponding palatals).

Unorigl. also are all the tenues aspp. (kh , th , ph ; in the case of $\acute{k}h$ and $\acute{t}h$ the unoriginality is sufficiently clear from the nature of the unasp. sound), whose origin is in known cases mainly caused by foregoing s (kh , $\acute{k}h = sk$, $sth = st$).

Unorigl. also is h , which mostly represents gh , sometimes also other aspp.; \acute{s} occurs partly acc. to definite sound-laws, partly without perceptible reason for s ; ° (visarga) is an altogether late variation of s , and confined almost entirely to the termination.

The gutt. and palat. nasals stand only bef. mom. consonn. of their own quality, by which therefore they are conditioned; the nasalisation of the vowels (\sim) is likewise dependent on the follg. conson.; it occurs bef. s and h (bef. other consonn. it is often merely a way of writing nasal consonn.).

l bes. r , is as in other langg., unorigl.; it obviously increases in the course of the development of Sk.

Besides the sound-laws already explained, Sk. has numerous laws for medial sounds, but esp. for termn. (these laws however do not belong here, but rather to Sk. special grammar), through which the conson.-syst. of Sk. became considerably removed from the basis of the origl. lang.

The representation of gutt. by palatals occurs only bef. vowels and sonant mom. prolonged sounds, not bef. mom. consonn., mute conson.-prolonged-sounds, and in termin. Yet here also

§ 51. occur palatals by no means acc. to fixed sound-laws (e.g. *yu-yōḡ-a* iunxi, bes. *yōḡ-a-s* iunctio), so that it seems that the lang. has availed itself of the change of gutt. into palatals (originally merely physiological), in order to express differences of relation.

EXAMPLES.

§ 52. Origl. mom. mute unaspirated consonn.

1. Origl. *k*=Sk. *k*, *k̄*, *kh*, *k̄h*, *ç*, *p*.

Sk. *k*=origl. *k*, e.g. in *ka-s* (who), \sqrt{kar} (make), *kími-s* (worm), *v́rka-s* (wolf), st.-formative sf. *-ka*, e.g. *dhāirmi-ka-s* (right, fr. *dharmá-s*, duty), etc.

Sk. *k̄*=origl. *k*, *k̄a-kāra* (feci), *k̄a-* is the relic of the most origl. reduplicated supposed \sqrt{kar} ; *k̄a* (-que, and), *k̄atvār-as* (quatuor); $\sqrt{ruk̄}$ (shine), $\sqrt{vak̄}$ (speak), whence *vák-mi* (I speak), *vák-am* (uocem, speech); *k̄* stands for *k* esp. in $\sqrt{termn.}$, etc.

Note.—Bef. mom. sounds and *s* the gutt. remains, e.g. *vák-ti* (he speaks), *vák-śi* (thou speakest, ś for *s* after *k*, v. § 55, 2), *vag-dhí* (speak), *g* for *k* acc. to sound-laws, v. post., etc.

kh and *k̄h* occur for origl. *k* after *s*; this *s* more often than not is lost in case of *skh*, in case of *k̄h* always. [For aspirating force of *s*, v. Kuhn, Zeitschr. iii. p. 321 sqq., 426 sqq. Cf. also Ascoli, Zeitschr. xvi. p. 442 sqq.]

Sk. *kh*=origl. *sk*, e.g. *khaṅ́ga-s* (limping), cf. O.H.G. *hinch-an*, *hink-an*, \sqrt{hank} , likewise without initial *s*, but Gk. *σκάζω* (limp), $\sqrt{\sigma\kappa\alpha\gamma}$ =Sk. *khaḡ*, f.f. *skag*; *kháḡa-s* (stirrer), cf. Ang.-Sax. *scac-an*, Norse *skak-a* (shake); *khak̄* (spring forth), cf. Slav. *skak-ati* (spring).

Note.—Most words in *kh* cannot, or at least not certainly, be reduced to their f.f.

Sk. *k̄h*=origl. *sk*, e.g. $\sqrt{k̄hid}$ (split), Zend *çk̄id*, Lat. *scid*, f.f. *skid*; *k̄hāyá* (cover), cf. Gk. *σκιά*; *gák̄k̄hāmi*, f.f. *gaskāmi* (the redupln. of *k̄h* to *k̄k̄h* is regularly written so after a short vowel), and in similarly fmd. pres. stt.

*Fair usage policy applies

§ 52. *ak* (be swift). [On the change of origl. *k* to *p*, wh. often does not appear till late in certain words, while in others *k* remains, cf. Beitr. iii. 283 sqq.]

Note.—In the words *hrd-*, *hrd-aya-m* (heart), *h*=origl. *k*, clearly through intermed. *kh*; origl. *k* is attested by *cord-is*, *καρδ-λα hairt-ō*, Lith. *szird-īs*, Scl. *srūd-īce*. In \sqrt{guh} (hide, 3 sg. pres. *gúh-ati*, *gúh-ā*, cairn) *g* is softened fr. *k*, f.f. of root therefore is *kudh*, as Gk. *κεύθ-ω* (hide), Lat. *cus-tos* for **cud-tos*, Ang.-Sax. *hyd-an*, prove.

2. Origl. *t*=Sk. *t*, *th*.

Sk. *t*=origl. *t*, e.g. *ta-t* (that), origl. id.; *tv-am* (thou); \sqrt{ta} , *tan*, 1 sg. pres. *ta-nōmi* (stretch); *pát-ati* (3 sg. pres.), \sqrt{pat} (fly, fall); *várt-atē* (3 sg. pres. med), \sqrt{vart} (uertere); sf. of past part. pass., e.g. in *yuk-tá-s* (\sqrt{yug} , *yuḡ*, iungere), cf. *iunc-tu-s*, *ζευκ-τό-ς*; sf. *ti* of 3 pers. vb., e.g. 3 sg. *bhára-ti*, 3 pl. *bhára-nti*, cf. *φέρε-(τ)ι*, *φέρο-ντι*, *fer-t*, *feru-nt*, Goth. *bairi-th*, *baíra-nd*, etc.

Sk. *th*=origl. *t*, esp. after *s*, e.g. \sqrt{stha} (stand), e.g. *sthi-tás*, origl. *sta-ta-s* (status); $\sqrt{sthaḡ}$ (cover), cf. Gk. *στεγ*, Lith. *steg*; superl. sf. *-iṣṭha*, e.g. *lāgh-iṣṭha-s*, cf. *ἐ-λάχιστος* (here *th* has become *ṭh* acc. to sound-laws after *ṣ*). Sometimes *th* stands for *t* without being caused by preceding *s*, thus *tha*, termn. 2 sg. pf., e.g. *babhár-tha* (thou hast borne) could hardly have had an *s* inserted bef. it; as a $\sqrt{termn.}$ in \sqrt{prath} (be wide, broad), 3 sg. *práth-atē*, *prth-ús* (*πλατύς*); \sqrt{math} , *manth* (move), 1 sg. pres. *math-nāmi*, *mánth-āmi*, where origl. *st* must not be assumed.

Note 1.—The unoriginality of *th* is shown by the fact that it does not appear at the beginning of words (except in the few onomatopoëtic or unused and unorigl. words given in Lexx.).

Note 2.—It appears that after *k* (in those cases where *t* though part of a sf. was not felt to be such) this *t* passed into *s*; *s* however in these instances becomes *ś* (v. post. § 55, 2), e.g. *śkṣa-s* (bear)=*ἄρκτο-ς*, *ursu-s* for **urctus* (cf. post. sub Lat.); st. *tákṣan-* (carpenter)=*τέκτον-*; $\sqrt{kṣan}$ (slay) further fmn. fr. *kṣa*, cf. *κτεν* in *κτείνω*; $\sqrt{kṣi}$ (dwell), Gk. *κτι* (*ἀμφι-κτί-ονες*, dwellers-around, *κτί-ζω*, build), etc. Contrariwise, e.g. *uktá-s*

(said), past part. pass.; *vák-ti*, 3 sg. pres. \sqrt{vak} , origl. *vak* (say, § 52. speak); st. *çak-tár-* (fut. part.), *çak-tá-* (past part.), $\sqrt{çak}$ (know, be able), etc.

3. Origl. *p*=Sk. *p*, *ph*.

Sk. *p*=origl. *p*, e.g. \sqrt{pa} (drink, protect), whence *pá-ti-s* (lord), *pi-tár-* n.sg. *pi-tá* (father); \sqrt{par} (fill), 3 sg. pres. *pí-par-ti*, whence *pūr-ṇá-s* for **par-na-s* (plenus); $\sqrt{spaç}$ (see, spy) in *spaç-a-s* (spy), *vi-spaštá-s* (perspicuos) for **vi-spaç-ta-s* (past part. pass.); \sqrt{tap} , 3 sg. pres. *táp-ati* (heat, burn); \sqrt{sarp} , 3 sg. pres. *sárp-ati* (serpere, ire), etc.

Sk. *ph*=origl. *p*, esp. after *s*, e.g. *sphaṭī* (alum), *sphāṭika-s* (crystal), cf. German *spat*; \sqrt{sphur} , 3 sg. pres. *sphur-áti* (shake, in Vēd. the root means 'strike, push'), clearly fr. **sphar*, cf. *σπαίρω*, *ἀ-σπαίρω*, O.H.G. *sporo* (spur), *spor* (track); *phēna-s* (foam), cf. Scl. *pěna*, Lith. *pėna-s* (milk); Lat. *spūma*, provided it comes fr. **spoi-ma*, would here also point to *sp*, in *phē-na-s* etc. we must therefore assume a root *spi*, etc. For the rest, *ph* is not frequent in initio.

The aspiration of tenues after *s* is not, however, by any means universal, as is shown by the common combinations *sk* (*skánd-ati*, scandit), *st* (*str-ṇáti*, sternit), *sp* (*sprç-áti*, touches).

Origl. mom. sonant unasp. consonn.

§ 53.

1. Origl. *g*=Sk. *g*, *g* (*h*).

Sk. *g*=origl. *g*, e.g. \sqrt{ga} (go) in *gá-gā-ti*, *gí-gā-ti*, 3 sg. pres., *ga-tá-s* (past part. pres.), *á-gā-t* (3 sg. aor.); *yugá-m* (iugum); *grabh*, *grah* (seize), etc.

Sk. *g*=origl. *g*, e.g. *gí-gā-mi* (βίβημι), 1 sg. pres. \sqrt{ga} (go); *yu-ná-g-mi*, 1 sg. pres. \sqrt{yug} (iungere), cf. parallel *yug-á-m* with *g* preserved; \sqrt{gan} (gignere), e.g. *gán-as*=Lat. *gen-us*, 1, 3, sg. ind. pf. *gá-gān-a*=*γέγωνα*, *γέγouve*; *gñā-tá-s*=*(g)nō-tus*, $\sqrt{gñā}$ fr. *gan*, origl. *gan*, etc.

Note.—Bef. *t* in many cases we find not the gutt. but an un-origl. *ś*, e.g. *srś-tá-s*, past part. pass. $\sqrt{sarś}$ (do); *mārś-ti*, 3 sg. pres. $\sqrt{marś}$ (cleanse, wash away). Sometimes also *g* is interchanged with *ḍ* and *ṭ*, acc. to the quality of the following sounds.

§ 53. In more cases in Sk. *h* (= *gh*) stands where Gk. and the other langg. point to origl. *g*, so that in Sk. we must assume an unorigl. aspiration, e.g. st. *mah-ánt-*, i.e. **magh-ant-* (big), but parallel to it *maḡ-mán-* (strong), cf. Gk. *μέγ-ας*, *μέγ-ιστος*, Goth. *mik-ils* (big), Lat. *mag-nus*; indeed beside it stands Sk. \sqrt{mah} = *magh* (to wax), which exactly corresponds to Goth. \sqrt{mag} (can, be able); *hānu-s* (jaw) = Gk. *γένυ-ς*, Goth. *kinnu-s* (chin), cf. Lat. *gena*, and (dens) *genu-inus*; *ahám*, i.e. **agham* = *ἐγώ*, Goth. *ik*, Lat. *ego*; *gha*, *ha* = Gk. *-γε*, Dôr. *-γα*, Goth. *-k* (in *mi-k* = **με-γε*). In all these cases Gk. *γ* = Goth. *k* are in favour of origl. *g*.

2. Origl. *d* = Sk. *d*, e.g. \sqrt{da} (dare), 3 sg. pres. med. *dá-da-tē*, 2 sg. imper. med. epic *dá-da-sva*, 1 sg. pres. act. *dá-dā-mi*; \sqrt{dam} (domare), e.g. *dam-á-s*, *dám-ana-s* (domans, coercens), 3 sg. pres. *dām-yá-ti*; \sqrt{vid} (uidere), e.g. 1 sg. pres. *véd-mi*, 1, 3, sg. pf. *véd-a* = *Foîda*, *Foîde*; \sqrt{sad} (sidere, considerare), e.g. 3 aor. sg. *á-sad-at*, etc.

Note.—*d* in *pīd* (press) and *nīdā-* seems to have arisen from *sd*, namely in case of *pīd*, which is proved unoriginal through *ī* and *d*, comes fr. **pisd*, **pi-sad* = *api-sad*, cf. *πιέζω* = **πι-σεδγω* = **ἐπι-σεδ-γω*; bes. *nīdā-s*, *nīdā-m*, stands Lat. *nīdu-s*, which may very likely be for **nīsdus* (cf. *iu(s)-dex*, *i(s)dem*; v. sub Lat. ‘consonn.’), to which Teutonic *nest* points; **nīsdā-s* would then have arisen from **nī-sada-s*, and mean “down-sitting,” unless it belong to \sqrt{nas} , on which point v. Curt. Gr. Et.² no. 432, p. 282.

3. Sk. *b* (cf. § 46, 3), which may be held unorigl., occurs, e.g. in *bala-m* (force), with which is usually classed O. Bulg. *bolij* (greater); \sqrt{lab} , *lamb* (labi), 3 sg. pres. *lāmb-atē*, Lat. *lab*.

§ 54. Origl. mom. sonant asp. consonn.

1. Origl. *gh* = Sk. *gh*, *h*.

Sk. *gh* = origl. *gh*, e.g. \sqrt{agh} in *agh-ám* (ill, sin, origl. prob. anguish); \sqrt{stigh} = *στιχ* (step), 3 sg. pres. *stigh-nutē*; *mēgh-á-s* (clouds), cf. \sqrt{mih} , sub ‘*h*’ = *gh*; *dīrghá-s* (long) = *δολιχό-ς*, etc.

Sk. *h* = origl. *gh*; e.g. *hāsá-s* (goose), cf. *χήν*, Germ. *gans*, Lith. *žasīs*, Pol. *geś*; $\sqrt{āh}$ = *angh* in *āh-ú-s* (snake), *āh-as*, *āh-atīs* (pain); \sqrt{vah} (uehere), 3 sg. pres. *váh-ati*, for *vagh*, cf. Goth.

*Fair usage policy applies

§ 54. (masc. elbow) for **bhāhu-s*, cf. Norse *bōgr*, Gr. *πῆχυ-s* for **φήχυσ*; √*budh* (learn, know), 3 sg. pres. *budh-yátē*, *bódh-ati*, cf. Goth. √*bud*, Gk. *πυθ* for **φυθ*; √*druh* (hurt), 3 sg. pres. *druh-yáti* for **dhrugh*, Zend *drug*, *druḡ*, *druž*, but O.H.G. *trug*, i.e. earlier *drug*, are in favour of initial *dh*. Cf. the reduplication-law (§ 59, 3).

CONSONANTAL PROLONGED SOUNDS.

§ 55. Spirants *y*, *s*, *v*.

1. Origl. *y*=Sk. *y*, e.g. pron. √*ya* (rel.), n. sg. masc. *ya-s*; *ya* is further a frequent st.-formative element, e.g. *mádhyas*=*med-iu-s*; the same part. fms. the opt., e.g. *s-yā-t*=*s-iē-t*; further, as one part of the pres. stem which comes fr. *as* (esse), and serves to form the fut., e.g. *dā-s-yá-ti*=*δώσει* fr. **δω-σ-γε-τι*; *ya* forms derivative vbs., e.g. *bhārā-yati*, 3 sg. pres. vb. causat. √*bhar* (ferre)=*φορεῖ* fr. **φορε-γε-τι*; √*yu*, *yug* (iungere), cf. Lat. √*iug*, whence *yugá-m*=Lat. *iugu-m*; *yúvan-*, acc. sg. *yúvān-am*, cf. Goth. *juggs* (same meaning), Lat. *iuuenis*: *yákrt* (liver), cf. Lat. *iecur* (id.).

The connexion between *y* and *i* is treated in § 14, 1, d; the splitting up of *y* to *iy*, *īy*, in § 14, 1, c; change fr. *y* to *iy*, *īy*, v. § 15, 2, b.

2. Origl. *s*=Sk. *s*, *ś*.

Sk. *s*=origl. *s*, e.g. √*sad* (sedere), e.g. *sád-as* ntr., *sád-ana-m* (sedes); *sáp-tan-*, Véd. *saptán-*=*septem*; √*su* (beget, sow), e.g. *su-tás*, past part. pass.; √*sru* (flow), 3 sg. pres. *sráv-ati*: *svásar-*, acc. sg. *svásār-am* (sister); √*svid* (sweat), 3 sg. pres. *svid-yáti*; √*star* (sternere), 3 sg. pres. *str-ṇāti*; √*smar* (remember), 3 sg. pres. *smár-ati*; √*as* (esse), 3 sg. pres. *ás-ti*; √*vas* (dwell), 3 sg. pres. *vás-ati*; √*vas* (clothe oneself), 3 sg. pres. *vas-té*; in st.- and word-formative particles, as *mán-as* (ntr. mens)=*μέν-ος*; *-s* is an element of nom. masc. and fem., e.g. *vṛka-s*, pl. *vṛkā-sas* (wolf, wolves), etc.

Sk. *ś*=origl. *s*, e.g. √*uś* (ur-ere), cf. *us-tus*, 3 sg. pres. *óś-ati*;

√*tarś* (thirst), 3 sg. pres. *trś-yāti*, cf. Lat. *torr-eo* = **tors-eo*, § 55. Germ. *durs-t*; ś also sporadically after *a*, e.g. √*bhāś* (speak), 3 sg. pres. *bhāśatē*, further fmn. of √*bha* = Gk. *φα* in *φά-τι-ς*, *φά-σι-ς* (speech), *φη-μί* (say); bes. *bhās*, 3 sg. pres. *bhāśatē* (shine, gleam), further fmn. of a similarly sounding √*bha* = Gk. *φα* in *φαίνω* (show, make clear) = **φα-ν-γω*, *φά-σι-ς* (showing); ś thus stands to *s* as palatal to gutt.; it is initial in *śaś* (sex) only, but cf. Zend *khaśvs*, a fm. which renders doubtful the originality of the initial sound of this numeral in the other langg. of our stock.

Origl. *s* has moreover undergone many more changes in Sk.; these changes, however, did not occur generally till a relatively late period; *s* before *t* (*th*) and *p* (*ph*) and after *a* (except in fine) remains fixed; after *k* and *r*, ś stands for *s*; likewise after *i*, *u* (and their diphthongs, generally after other vowels, as after *a*, *ā*); medially bef. most sounds (bef. all vowels and *y*, *v*, *m*, *t*, *th*; ° and ˘ bef. *s* do not break this sound-law); fr. st. *bhūti-* (= *φυσι-*) thus comes loc. pl. *bhūti-śu* for **bhūti-su*; *nē-śyāti* (3 sg. fut. √*ni*, lead) for **nai-syati*; *ē-śi*, f.f. *ai-si* (2 sg. pres. √*i*, go); *vāk-śi* (2 sg. pres. √*vak*, speak) but *āt-si* for **ad-si* (2 sg. pres. √*ad*, eat) and *tā-su* (loc. fem. pl. *ta*, pron. dem.); st. *dhānus-* (bow), loc. pl. *dhānu°-śu* or *dhānuś-śu* for **dhanus-su*; with sf. *mant*, *dhānuś-mant-*, n. sg. *dhānuś-mān* (provided with a bow). Betw. *s* and ś there is nevertheless great vacillation (particulars must be relegated to Sk. special. gr.; it is enough to note here that ś = origl. *s*).

°, *r*, *ç*, occur, like ś, acc. to definite sound-laws, in place of *s*; yet mainly in termn. alone, in which case *-as* also may pass into *ō*, and *s* be lost, e.g. *vrka°* for *vrka-s* at end of a sentence, or bef. *k*, *p*; *avir ēti* for *avis ēti* (ouis it); *r* occurs for *s* bef. all sonant sounds unless *a* or *ā* precede; *-as*, however, bef. sonants becomes *ō*, and *-ās* becomes *ā*; this latter also medially, e.g. *çā-dhī* for **çās-dhi*, 2 sg. imper. fr. √*çās* (rule), but 3 sg. imper. *çās-tu*; *aviç karati* (the sheep goes); *vrkō bhavat* for *vrkas abhavat* (the wolf was); *vrka āstē* for *vrkas āstē* (the wolf sits), etc.

§ 55. In stems ending in *-s* these changes take place before case-sff. also which begin with a conson., e.g. st. *mānas-*, g. *mānas-as*, without change; but instr. pl. *mānōbhis* for **manas-bhis*, loc. pl. *māna^o-su* for *mānas-su*, which also occurs, *dhānur-bhis* for **dhanus-bhis*, st. *dhānus-* (bow).

ś bef. *s* passes into *k*, e.g. √*dvis* (hate), 2 sg. pres. *dvēk-śi* for **dvēś-si*; also the change to *t*, *d* occurs, as in the case of *ç*, e.g. *dvid-dhī*, 2 sg. imper. act. √*dviś* for **dviś-dhi*. Cf. Sk. grammars.

Note.—In *çvāçura-s* (father-in-law), *çvaçrū-s* (mother-in-law), *ç* stands in initio (by assimiln. to follg. *ç*), instead of *s*, cf. Zend *qhaçura-* i.e. **svaçura-*, *έκυπό-s*, Lat. *socer*, *socrus*; similarly in st. *çúška-* (dry) for **suska-*, cf. Z. *huska-*, O.Bulg. *suchū*, f.f. *sausa-s*, Lith. *saúsa-s*; *ç* for *s* occurs besides in other single cases bef. *v* and *u*.

3. Origl. *v*=Sk. *v*, e.g. √*vid* (perceive), 3 sg. pres. *vēt-ti* for **vēd-ti*; √*va* (blow), 3 sg. pres. *vā-ti*, cf. Goth. √*va*; √*vah* (uehere), 3 s.g. pres. *váh-ati*, cf. Lat. *ueh*, Goth. *vag*, Slav. *vez*, etc.; √*var* (cover), 3 sg. pres. *vr-ṇōti*, whence *ūr-ṇā* (wool) for **var-nā*, cf. Gk. *Φέριον*, Slav. *vlū-na*, O.H.G. *wol-la*, etc.; √*var* (will), cf. Lat. *uol* (uelle), Goth. *val* (will), etc.; *ávi-s*=Lat. *oui-s*, *ὄφι-s*; *náva-s*=Lat. *nouo-s*, *véFo-s*, etc.

On the connexion betw. *v* and *u*, v. § 14, 1, c, d.

§ 56. Nasals.

1. Origl. *n*=Sk. *n*, e.g. *na*, *an-* (negation); √*naç* (perish), 3 sg. pres. *náçyati*, cf. *νεκ*; st. *nar-*, *nara-*, n. sg. *nā* for **nars*, *nara-s* (*ἄ-νήρ*); *nāu-s*=*vaûs*; *nā-man-*=Lat. *nō-men-*; *dánta-s* (dens); often *n* is changed into another nasal, e.g. *pūr-ṇá-s* (plenus, cf. supr. *ū=a*, § 8), f.f. *par-na-s*, *ṇ* for *n*, since *r* precedes, v. post.; *ghā-tás*=*gnō-tus*, origl. fm. of √*ghā* is *gan*, on *ñ* for *n*, v. post.; *yuñgánti* (iungunt), √*yug*, with inserted nasal, but *yuñkté*, 3 sg. med. with *ñ*, since *k* follows, v. post.; *lump-áti*=*rumpit*, has nasal *m* because *p* follows; *hāsá-s*, cf. *hanser*, Germ. *gans*; *mā-si*, 2 sg. pres. act., *mā-syátē*, 3 sg. fut. med. √*man* (mean), with *~* for *n* acc. to Sk. sound-laws, etc. All these changes must have been wanting in Indo-Eur. origl. lang.,

*Fair usage policy applies

§ 57. *Note.*—In termn. *r* was treated like *s*; at the end of a sentence it becomes ṣ , etc., cf. § 55, 2.

Sk. *l*=original *r*, e.g. *lōk*, 3 sg. pres. *lōk-atē* (see), doubtless akin to *ruk* (shine), cf. *λευκ-ός* and *λεύσσω* = **λευκ-γω*; \sqrt{lup} (break), 3 sg. pres. *lumpāti*, cf. Lat. \sqrt{rup} ; \sqrt{kalp} (be in order), 3 sg. pres. *kālpatē*, cf. *karp*; \sqrt{lih} , *λιχ*, Lat. *lig*, Erse *lig*, Goth. *lig*, Lith. *liž*, Scl. *liz* (lick), but in earliest Indian still *rih*. Also where the kindred langg. show no *r*, we must yet assume an origl. *r*, because we notice that *l* is continually spreading, whilst *r* becomes rarer; if we suppose this process to have been going on continuously in pre-historic times, *r* will remain as the older by elimination; cf. Zend. Such instances are found in e.g. *plu* (float), Lat. *plu*, Gk. *πλυ*, Scl., Lith. *plu*, Germ. *flu* (in *flu-z*, in diall. *flu-e* (wash)); here precisely it happens that *l*—so frequently interchanged with *r*—occurs throughout; whilst in Sk. there is still a root *pru* (go) in existence, which origly. was prob. identical with *plu*, and must be considered as its earlier fm.

§ 58. Sketch of some sound-laws important for comparative grammar (so far as they are not contained in foregoing sections).

Between the various ways in which the Indo-Eur. sounds make their appearance in particular Indo-Eur. langg. (i.e. those changes of origl. sounds through which this or that distinct lang. arose from their common fundamental lang., e.g. Sk. *vāk-am*, Gk. *φόπ-α*, Lat. *uōc-em*, fr. f.f. *vāk-am*), and the variations which the sounds undergo during the separate existence of the lang. thus produced, namely sound-laws, we can draw no sharp line of demarcation. The distinction between sound-representation and sound-law is chronological, and therefore indeterminate, and the exact definition of the date at which a sound-change occurred is generally difficult. For this reason, and also in order not to break up the subject too much, I have often above left the boundary between sound-correspondence

and sound-law ill-defined; moreover, sound-laws—as peculiar to § 58. the separate-life of a lang.—belong here only in so far as they bear upon our knowledge of older word-forms. The numerous laws, e.g. in Sk., which come into play only when words are composed into sentences, may here be mostly omitted, since we are treating of words taken separately.

We find, esp. in written lang., forms of different periods beside each other, e.g. Sk. *yuk-tá-s* for **yug-ta-s*, √*yuḡ* (iungere), after an earlier mode of formn. than *iṣ-tá-s* for **ig-ta-s*, **ik-ta-s*, f.f. *yag-ta-s*, √*yaḡ* (open, v. § 53, 1, n.); here the sound-law by which *ḡt* becomes *st* is clearly later than the preservation of the origl. combination *gt*, i.e. *kt* (bef. *t*, *k* must naturally occur for *g*).

Generally speaking we may call the Sk. very rich in conson. sound-laws; its conson. system is thus manifoldly unorigl. from this point of view also. Consonn. often exercise influence on one another, not only in the middle of words, but also between the end of one word and the beginning of another when they are combined in a sentence, a process which we can scarcely attribute to the lang. at this early condition; the laying-down of these laws belongs, as we have said, in a great measure elsewhere.

MEDIAL SOUND-LAWS.

1. Assimilation.

§ 59.

a. Medially also sometimes occurs complete assimilation of a preceding to a follg. sound, e.g. *bhinna-* for **bhid-na-*, past part. pass. √*bhid* (split); *panna-* for **pad-na-*, likewise fr. √*pad* (go, fall), and so often in similar cases.

b. Lightening of conson.-groups by loss of one sound is likewise not rare, e.g. *kaṣṭē* for **kakṣ-tē* (*t* for *t* on acct. of *ṣ*, v. sqq.), 3 sg. pres. med. √*kakṣ* (see), etc.; *á-tut-ta*, 3 sg. med. aor. compos. √*tud* (push) for **a-tut-s-ta*, and so frequently in case of *s* betw. two mom. consonn. in like cases.

c. Bef. sonant mom. sounds sonants only, bef. mutes mutes

§ 59. only, are found, e.g. st. *vāk* (voice), instr. pl. *vāg-bhis*; *yu-ná-ḡ-mi*, 1 sg. pres. $\sqrt{yuḡ}$ (iungere), but 2 sg. *yu-ná-k-ṣi*, 3 sg. *yu-ná-k-ti* for **yunag-si*, **yunag-ti* (cf. § 53, 1); *ád-mi*, 1 sg. pres. \sqrt{ad} (edere), but *át-si*, 2 sg. pres. *át-ti*, 3 sg. pres. for **ad-si*, **ad-ti*; *bhárad-bhis*, instr. pl. fr. st. *bhárant-* (ferens) for **bharat-bhis* fr. **bharant-bhis*, etc.

The influence of spirant *s* on follg. mom. sounds has been already handled under 's.' In the case of the combination of \check{s} with a follg. *t*, *th*, the latter becomes assimild. to *s* because it is a lingual, e.g. superl. sf. origl. *is-ta*; fr. *yans*, compar. sf. shortened *is+ta*, arises next **is-tha* (§ 51, sqq.), and since after vowels other than *a*, \bar{a} , \check{s} must occur for *s*, **iṣ-tha*, whereby also *th* becomes $\check{t}h$, so that in Sk. *iṣṭha* stands for *ista*, e.g. st. $\acute{a}\check{\varsigma}$ -*iṣṭha*=Z. $\acute{a}\check{\varsigma}$ -*ista*-, Gk. $\acute{\omega}\kappa$ - $\iota\sigma\tau\omicron$ -, origl. $\acute{a}k$ -*ista*- (fr. $\acute{a}\check{\varsigma}u$ -, origl. $\acute{a}ku$ -, swift). For the group $\check{\varsigma}t$ occurs $\check{s}t$, e.g. st. *drṣṭá-* for **drṣ-ta-*, past part. pass. $\sqrt{dar\check{\varsigma}}$, origl. *dark* (see); st. *aṣṭa-*, *aṣṭan-* (eight), for **aṣta-*, **aṣtan-*, f.f. *akta-* (cf. $\acute{o}\kappa\tau\acute{\omega}$, octo); *váṣṭi* for **vaṣ-ti*, 3 sg. pres. $\sqrt{va\check{\varsigma}}$ (will, wish).

For the changes of *s* produced by assimiln. v. § 55, 2; by nasals, § 56, 2.

An example of dissimilation worth notice is found in the change of *s* to *t* at the end of a root bef. the termn. in *s* of fut. and aor., e.g. \sqrt{vas} (dwell), 3 sg. fut. *vat-syáti*, 3 sg. aor. \acute{a} -*vāt-sīt* for **vas-syati*, **á-vās-sīt*. Doubled *s* was generally avoided, e.g. *ási*, 2 sg. pres. \sqrt{as} (esse), for *as-si*= $\acute{e}\sigma$ - $\sigma\acute{\iota}$, cf. § 55, 2.

Note.—The *s* of \sqrt{vas} (dwell) is origl. and perh. not due to *t*, cf. Goth. \sqrt{vas} (remain, be), pres. *vis-a*=*vas-āmi*.

2. The aspirates stand bef. vowels and son. prolonged consonn. only, and therefore never in termn. The collision of a sonant gutt., dent., or lab. aspirate with follg. *t* (*th*) is common. In this case the aspp. throw their aspiration on follg. *t*, which in its turn becomes like the preceding sound in that it assumes vocal-sound; fr. sonant aspp.+*t* arise therefore son. unasp. consonn.+*dh*;

*Fair usage policy applies

§ 59. of these sounds remain; *tī-ṣṭha-ti*, pres. \sqrt{stha} (stand), origl. fm. of pres. is *sta-sta-ti*.

In other cases the Sk. still shows a more archaic kind of redupln. by which gutt. and aspp. remain unchanged; so esp. in ancient intensive-sts., e.g. *kō-ku* (3 sg. med. *kō-kū-ya-tē*), \sqrt{ku} (raise a cry); *kari-kar-*, \sqrt{kar} (make); *bhari-bhar-*, \sqrt{bhar} (bear); *ghani-ghan-*, \sqrt{ghan} , *han* (slay, kill); in noun-sts., e.g. *ghar-ghara-s* (clatter, crackling), etc. (cf. Benf. G. g. 1864, st. 39, p. 1539 sqq.).

TERMINATION.

§ 60. 1. In termn. only one conson. is tolerated, of more than one only the first remains, e.g. st. *vāk* (voice, acc. *vāk-am*) should be in n. sg. **vāk-s*, or rather (acc. to § 52, 1) **vāk-s*, or (acc. to § 55, 2) *vāk-ś*, wherefore *vāk* is now seen. Since aspp. are double-sounds, they must lose their aspn.; thus we find, not **sarva-budh*, but **sarva-bhud*, with aspn. transferred (acc. to § 59, 2), for which, acc. to the follg. law (no. 2), *sarva-bhūt* with *t* for *d* occurs.

Only *r* + mom. conson can stand *in fine*, a case which nevertheless occurs but seldom; moreover bef. follg. *k̄*, *t*, *ṭ*, and *kh*, *th*, *ṭh*, the combn. \sim s stands with their representatives, e.g. *áçvān*, acc. pl. of n. sg. *áçva-s* (equos), f.f. is **açvāns* or **açvāms*, hence e.g. *açvās tatra* (equos ibi); *çrī-mān* (pleasant), n. sg. masc. f.f. **çrī-mant-s*, hence e.g. yet *çrīmāṅ karati* (felix it; ç for *s* acc. to § 55, 2); *āsan*, 3 pl. impl. \sqrt{as} (esse) fr. **āsant*, **āsans*, *t* is esp. often subject to a change into *s*, as in stems in *-ant*, which are interchanged with fms. in *-ans*, further in termn. of 3 pl. *-us* for *-ant*, hence e.g. *āsās tatra* (erant ibi) for origl. **āsant tatra*. In all other cases, however, *n* only remains acc. to the general rule.

2. As only mute mom. consonn. (when no distinctly influencing clearer sound follows upon it; in pausa) could stand *in fine*, the son. consonn. pass over into the mutes of their quality; hence

for **sarva-búdh*, not **sarva-bhud*, but *sarva-bhút* is found. *h*, § 60. i.e. *gh*, becomes *ṭ* in termn., earlier *k* (for *g*, *gh*) has been retained in such roots only as begin with *d*, e.g. fr. *lih* (licking) comes in nom. (f.f. *ligh-s*) *liṭ* (*liḍ* bef. sonants), but fr. *duh* (milking), *dhuk* (*dhug*).

Note.—That palatals are not retained in termn. was remarked above in § 51, sub. fin.

CONSONANTS OF GREEK.

§ 61.

v. Table in § 16.

The consonl. system of the Gk. has retained 1. the origl. aspirates, not, however, as sonants, but as mutes: $\chi = kh$, $\theta = th$, $\phi = ph$, these can be proved to be the oldest equivalents of the Gk. sounds; the pronunciation of χ , ϕ , as spirants, i.e. $\chi =$ Germ. *ch*, $\phi = f$, and that of θ as a sibilant (nearly like *ts*), is of later origin, and arose first partially and afterwards in all cases. The passing of origl. sonant aspp. into Gk. mute aspirates is not inexplicable according to the physiology of sounds. Arendt (Kuhn und Schleicher, Beitr. ii. 283) conjectures, prob. rightly, that the un-sonant *h* of the origl. aspp. *gh*, *dh*, *bh*, changed the preceding sonants *g*, *d*, *b*, into the mutes κ , τ , π , and indeed no one will deny that *kh*, *th*, *ph*, are much easier to pronounce than *gk*, *dk*, *bh*. Thus the Gk. already permits of an assimilation. Change of sonn. to un-sonn. is seen also in Teutonic (origl. *g*, *d* = Germ. *k*, *t*). The agreement of the Indo-Eur. langg. collectively, and also of those langg. which are nearest of kin to the Gk., prevents us from accepting the supposition that the Gk. alone has preserved the oldest equivalents for the Indo-Eur. aspirates (that the sounds *kh*, *th*, *ph*, existed in the origl. lang. instead of *gh*, *dh*, *bh*; cf. esp. G. Curtius, Gr. Etym.² p. 369 sqq.). 2. Gk. shows a dislike of the origl. spirants; *y* even, in the earliest accessible state of the lang., is found merely remaining in its effects, but lost as a separately existing sound; *v* is retained

§ 61. as *F* in the archaic lang.; *s* stands its ground only in terminations and bef. and after mutes (ξ , ψ); moreover, when another sound has assimilated itself to it (*s*); before vowels it becomes *h*, and generally falls out between vowels. In Gk. as in all other Indo-Eur. langg., except Zend, *l* already occurs often beside *r*.

Generally, therefore, the consonantal-system of the Gk. is nearer to that of the origl. lang. than that of the Sk. or of most other Indo-Eur. langg.

As for consonl. sound-laws, the loss of origl. spirants and the variations which arise through this loss, and through the effects of origl. spirants on neighbouring sounds, bring about a considerable deviation from the older system of sounds. Assimilation has already acquired a widely extended sway: dentals generally have fallen away before *s*, *n*, mostly with a lengthening of preceding vowel. The palatal sounds (*y*, *i*) already show their influence in many cases (*zêtakismos*). Further, but few consonn. are tolerated in termn.; in short, in its consonantal sound-laws Gk. much resembles a lang. which is already in a comparatively late stage of existence.

§ 62.

EXAMPLES.

Origl. momentary mute unaspirated consonants.

1. Origl. *k*=Gk. κ , γ , π , τ ($\kappa\gamma$ = $\sigma\sigma$, cf. sound-laws).

Gk. κ =origl. *k*, e.g. *καρδ-λα* (heart), cf. Lat. *cord-*, Lith. *szird-ìs*, Scl. *srüd-ìce*, Goth. *hairt-ō*, Indo-Eur. lang. collectively presuppose an initial κ , Sk. *hrd-* thus stands for **khard-*, origl. *kard-*; *κεῖ-μαι* (I lie), *κοί-τη* (bed), $\sqrt{\kappa\iota}$, Sk. *çi*, Scl. and origl. *ki*; *κύων*, *κυν-ός* (hound), Sk. st. *çvan-*, origl. *kvan-*; *κλυ-τός* (famed), $\sqrt{\kappa\lambda\upsilon}$ (hear), Sk. *çru*, Goth. *hlu*, origl. *kru*; *δάκ-νω* (bite), $\sqrt{\delta\alpha\kappa}$, Sk. *daç*, origl. *dak*; *δείκ-νυμι* (show), $\sqrt{\delta\iota\kappa}$, Sk. *diç*, Goth. *tih*, origl. *dik*; *δέκα* (ten), Lat. *decem*, Sk. *daçan-*, Goth. *taihun*, origl. *dakan-*; *λευκ-ός* (white), *ἀμφι-λύκ-η* (morning-twilight), $\sqrt{\lambda\upsilon\kappa}$, Sk. *ruk*, origl. *ruk*, etc.

*Fair usage policy applies

§ 62. *-que*, Goth. *-u-h* for **-ha*, cf. *πό-τε* (when), Dôr. *πό-κα*, *ἄλλο-τε* (another time), Dôr. *ἄλλο-κα*; *πέντε* (five) bes. Aiol. *πέμπε* (see ab. $\pi=k$), origl. *kankan*, cf. *quinque*; *τέσσαρες* (four), origl. *katvāras*, cf. Lat. *quatuor(es)*, Sk. *katvār-as*, Lith. *keturì*. This correspondence of sounds occurs but rarely in other roots, e.g. $\sqrt{\tau}$ in *τί-ω* (honour, value), *τῖ-μή* (honour), *τί-νω*, *τί-νυμι* (punish, fine), Sk. *ḱi* in *ḱáy-ē* (I punish), *apa-ḱi-ta-s* (honoured), origl. therefore *ki*.

2. Origl. $t=Gk.$ τ ($\tau\gamma=\sigma\sigma$, v. sound-laws), e.g. *τό(τ)* origl. and Sk. *ta-t* (nom. acc. sing. dem. pron. st. origl. *ta-*); $\sqrt{\tau\alpha}$, *τεν* in *τέ-τα-κα*, *τά-νυ-μαι* (stretch myself), *τείνω* (stretch, lengthen)=**τεν-γω*, origl. and Sk. *ta, tan*; st. *τρι-* (three) in *τρεις*, origl. and Sk. *tri-*; $\sqrt{\sigma\tau\alpha}$ (stand), in *στα-τός* (placed), *στά-σις* (setting, revolt), *ἵ-στη-μι* (set up), origl. and Lat. *sta*, etc.; $\sqrt{\sigma\tau\epsilon\gamma}$ in *στέγ-ος* (roof), *στέγ-ω* (cover), cf. Lith. \sqrt{steg} , origl. *stag*; $\sqrt{\pi\epsilon\tau}$ in *πέτ-ομαι* (fly), *πί-π(ε)τ-ω* (fall), origl. and Sk. \sqrt{pat} (fly, fall); *πλατύς* (broad), origl. *pratus*, Sk. *prthús*; suff. *το* of pf. pass. part., origl. and Sk. *ta*, etc.

The combination *κτ* is in most cases preserved only in Gk., while in other langg. it is softened to *ks*, e.g. st. *τέκτων-* (carpenter), Sk. *tákṣan-*, cf. O.H.G *dēhsa, dēhsala* (axe); *ἄρκτος* (bear)=Lat. *ursus*, by Lat. sound-laws for **urcsus* fr. **urctus*, Sk. *ṛkṣas*, f.f. **ark-ta-s*.

Note.—Upon the very uncommon softening of τ to δ in Gk. cf. G. Curt. Gr. Et.² p. 469 sqq. It occurs almost without exception in obscure etymologies, not in words accurately corresponding with their kindred langg.

3. Origl. $p=Gk.$ π (cf. $\pi=$ origl. *k*), e.g. $\sqrt{\pi\omicron}$, *πι* (drink), in *πό-σις* (draught), *πέ-πο-μαι*, *πέ-πω-κα*, *πί-νω* (drink); *πό-σις* (husband), f.f. and Sk. *pá-tis* (lord); st. *πα-τέρ-* (father), origl. *pa-tar-*, fr. \sqrt{pa} (protect); $\sqrt{\pi\lambda\alpha}$, e.g. in *πίμ-πλη-μι*, *πιμ-πλά-ναι* (fill), origl. *pra* fr. *par*, e.g. Sk. *pí-par-mi* (1 sing. pres. act.); *πλατύς* (broad), origl. *pratus*, Sk. *prthús*; $\sqrt{\pi\lambda\upsilon}$ in *πλέF-ω* (sail), *πλόF-ος* (voyage), *πλυ-τός* (washed), Sk. *plu*, origl. *pru*;

√έρπ in έρπ-ετόν (creeping thing), έρπ-ω (creep)=Sk. and § 62. origl. *sárp-āmi*, Lat. *serp-o*, origl. *sarp*; ύπ-νος (sleep), origl. and Sk. *sváp-nas*, cf. *som-nus*=**sop-nus*, etc.

Note 1.—The softening of π to β, likewise uncommon, and only found in words of obscure etymology, has been treated of by G. Curt. elsewh. p. 471 sqq.

Note 2.—On unoriginal aspiration of tenues caused by operation of sound-laws, v. 'sound-laws.' Sometimes in Gk. as in Sk. aspirates make their appearance without visible reason. This occurs comparatively frequently in the case of π, cf. ἀ-λείφ-ω (anoint), ἀ-λοιφ-ή (ointment), bes. λίπ-α, λίπ-ος (grease), λιπ-αρός (greasy, shiny), cf. Sk. √lip (anoint), O.Bulg. lēp-ū (plaster), Lith. līp-ti (cleave to); βλέφ-αρον (eyelid) bes. βλέπ-ω (glance); κεφ-αλή (head) bes. Lat. *cap-ut*, Sk. *kap-ālas*, *kap-ālam* (shell, skull); σαφ-ής (clear), σοφ-ός (sap-iens), cf. Lat. *sap-io* (smack, am wise), O.H.G. √*sab* (understand; in pf. *int-suab*, **ant-suob*, he understands, notices), etc. Moreover, μόθ-ος (bustle) must not be coupled with Sk. √*math*, *manth* (i.e. *mat*, *mant*, stir, move), and O.Bulg. *met-a* (trouble), *met-ežī* (uproar, tumult). In έ-τυχ-ον (I chanced), τυχ-ή (chance), τεύχ-ειν (prepare), and Iôn. τε-τύκ-οντο (they prepared), τύκ-ος (mason's tool), we cannot suppose different roots; so too δέχ-ομαι (receive) bes. Iôn. δέκ-ομαι, δοκ-ός (beam), δοκ-άνη (fork) has the look of an unorigl. asp. In the perf. this unorigl. asp. has developed into a kind of medium for stem-formation, v. sub. Perf. G. Curt. Gr. Et.² p. 439 sqq. has treated at length of Unorigl. Aspiration in Gk.

Momentary sonant unaspirated consonants.

§ 63.

1. Origl. *g*=Gk. γ, β.

Gk. γ=origl. *g* (on ζ=γγ, v. sound-laws), e.g. √γεν in γέν-ος (race), γί-γ(ε)ν-ομαι (I am born, become), Sk. *gān*, origl. *gan*; √γνο=*gna* fr. *gan* in γι-γνώ-σκω (I learn), γνώ-μη (thought, opinion); γόνυ (knee)=Sk. *gānu*, cf. Lat. *genu*, Goth. *kniuu*; √ζυγ, origl. *yug* (iungere) in ζεύγ-νυμι (I yoke), ζυγ-όν (yoke); √άγ in ἄγ-ω (lead)=Sk. *ág-āmi*, Lat. *ag-o*, O.Norse inf. *ak-a*, 1 sing. pres. *ek*, pf. *ōk*, etc.

Note 1.—It is only in quite detached cases that Gk. δ seems=origl. *g* (like τ=origl. *k*); thus prob. δελφ-ύ-ς (uterus) must be

§ 63. placed beside Sk. *gárbh-a-s* (id.), esp. since a form ἀδελφείος corresponds perfectly to Sk. *sa-garbhya-s* (co-uterinus) in its form. It is worthy of note that βρέφος, too (v. sq.), stands close to Sk. *gárbhas*.

Note 2.—On Gk. γ and Sk. *h*, cf. § 53, 1.

Gk. β=origl. *g* (cf. § 68, 1, e); √βα in βί-βη-μι, βά-σκω (go) =Sk. and origl. *ga* (go), in Sk. *gí-gā-mi*, origl. *ga-gā-mi*, Sk. *gá-kkhāmi*, origl. *ga-skāmi*; βαρύς (heavy)=Sk. *gurús* for origl. *garus*, βάριστος=Sk. *gariṣṭhas*, origl. *garistas* (heaviest), cf. Lat. *gravis*=**garu-i-s*, Goth. *kaúrs* (heavy, earnest) for **kaúri-s*, and this prob. for **kurv-i-s* fr. **karv-i-s*; βρέφος (neut. offspring, child), Sk. *gárbha-s* (masc. matrix, offspring), O.Bulg. *žrěbe*, *žrěbicī* (to foal), Goth. *kalbō* (fem. cow-calf); Boiôt. βανά =γυνή (wife) with root vowel *a* retained, f.f. of both *ganā*, √*gan* (gignere); βάλανος (acorn), cf. Lat. *glans*, *gland-is* (acorn); βίβος (life)=Sk. *gīvās*, Lith. *gývas*, Goth. *kvius*, f.f. prob. *gigvas* (lively); βούς (bull)=Sk. and origl. *gāus*; βι-βρώ-σκω (eat), βορ-ά (food), √βορ, βορ, origl. *gar*, *gra*, Sk. √*gar* (swallow); Lat. (*g*)*uor-are*, Lith. *gér-ti* (drink), Scl. *žrě-ti* (swallow); ἔ-ρεβ-ος (gloom of lower world), cf. Sk. *rág-as* (gloom, dust), Goth. *rikv-is* (neut. darkness); √νιβ in χέρ-νιψ (water for washing hands) for **χερ-νιβ-ς*, **χερ-νιβ-ος*, Sk. √*niḡ*, origl. *nig*, in Gk. retained in νίζω (wash)=**νιγ-γω*.

2. Origl. *d*=Gk. δ (on ζ=δγ, cf. § 68); √δο, origl. *da* (give), pres. δί-δω-μι, origl. *da-dā-mi*; √δακ (bite), pres. δάκ-νω, Sk. √*daç*, origl. *daḥ*; √δαμ in δαμ-άω, δάμ-νημι (tame, bind), Sk. and origl. *dam* (domare); δόμος (house), Lat. *domus*, Sk. *damās* or *damám*, Scl. *domu*; √Φιδ (see), origl. √*vid* (uidere), pf. Φοῖδα (knew), Goth. *vait*, f.f. *vi-vāida*; √έδ, origl. and Sk. √*sad* (sedere) in ἔζομαι=**sed-yo-mai*; √έδ, origl. and Sk. √*ad* in ἔδ-ω, ἔδ-ομαι (eat, shall eat), Lat. *ed-o*, Goth. *it-a*, etc.

3. Gk. β, whose origl. existence can be proved, is found very rarely (cf. § 46), e.g. βλη-χή (bleating), βλη-χάομαι (bleat), Lat. *bāl-are*, Scl. *ble-γα*, O.H.G. *blā-zan*; βραχύ-ς (short), Lat.

*Fair usage policy applies

§ 64. In ἐγγύς (near) = Sk. *āhús*, i.e. **anghus* (narrow),—the Goth. *aggrus* (narrow) corresponds to the aspirated fms., which we hold to be origl. in this case, since we assign ἐγγ-ύς to √*āχ*, origl. *agh*, in ἄγγχ-ω, ἄχ-ομαι, etc. (so G. Curtius).

Other isolated cases in which Gk. sonants, mostly after nasals, stand for origl. aspp., are treated by G. Curtius (Gr. Et.² p. 460 sqq.).

Note.—In νίφ-α (acc. snow), νιφ-ετό-ς (snow-storm), νίφ-ει (it snows), φ stands for χ, cf. Lat. *nix*, *niu-is*, for **nig-s*, **nigu-is*, (v. post), *ning-it*; the root had an initial *s* lost in Graeco-Italic, cf. Lith. *snig-ti* (to snow), *snĕg-as* (snow), O.Bulg. *snĕg-ŭ* (snow), Goth. *snair-s* (snow), Zend √*çniž* (*çnaēž-enti*, 3 pl. pres. 'it snows,' lit. 'they snow'), Sk. √*snih* (be damp), f.f. of root is therefore *snigh*.

2. Origl. *dh* = Gk. θ (on *θy* = *σσ*, cf. § 68), e.g. √*θε*, origl. *dha* (set), pres. τί-θη-μι, Sk. and origl. *dá-dhā-mi*, Goth. √*da*, (do), H.G. *ta*, e.g. in 1 pres. *tuo-m* fr. **ti-tō-mi* = *dhadhāmi*; μέθυ (intoxicating drink), Sk. and origl. *mádhu*, O.H.G. *mētu* (mead); √*iθ* in αἶθ-ω (kindle), Sk. and origl. √*idh*; ἐρυθρός (red), √*ῥυθ*, Sk. *rudhirás*, origl. *rudhrás*, √*rudh*, Goth. √*rud* in *raud-s*, H.G. *rut* in *rōt*, Lat. *rūf-us*, etc.

Note.—In θερμός, Sk. *gharmás* (heat), Lat. *formus*, cf. Scl. *grĕ-ti* (to warm), Germ. *warm* fr. **gicarm*, √*θερ*, θερ-ομαι (am warm), θερ-ος (neut. summer), origl. and Sk. *ghar*, θ stands where we should expect χ.

3. Origl. *bh* = Gk. φ; √*φα* (shine) in φα-ίνω (show), φάσ-ις (a showing), √*φσ* (speak) in φη-μί, φά-σκω (say), φά-τις (speech, rumour), φω-νή (voice), Sk. and origl. *bha*, Sk. *bhā-mi* (shine), *bhā-s* (give light, shine), *bhā-ś* (speak), Lat. *fa-ri*; √*φερ*, 1 sing. pr. φέρ-ω (bear), Lat. *fer*, *fero*, Sk. and origl. *bhar*, *bhār-āmi*, Goth. *bar*, *baíra*; √*φϋ* in φύ-ω (bring forth), φυ-τόν (plant), Lat. *fu* in *fu-turus*, *fu-i*, Sk. and origl. *bhu*, O.H.G. *pi* in *pi-m*, weakened fr. **pu*, **pi-um*; νέφος (cloud), νεφέλη (a cloud), Sk. *nábhas* (a cloud), O.H.G. *nĕpal* (cloud); ὀφρύς (eyebrow), Sk. *bhrūs*, O.H.G. *prāwa*, etc.

Note 1.—In √λαβ (λαμβάνω, ἔ-λαβ-ον, take, seize) bes. § 64. λάφ-υρον (booty), ἀμφι-λαφ-ής (clasping), Sk. √labh (keep, get), β is very prob. a representative of origl. bh, caused perh. by the nasalized pres. λαμβάνω, cf. supr. ἐγγύς fr. √agh; also βρέμ-ω (roar) has β for origl. bh, cf. Lat. frem-o, Sk. bhrám-āmi (swarm, rove). On other isolated exx. cf. G. Curt. Gr. Et.² p. 460 sqq., Grassmann, Kuhn's Zeitschr. xii. 91 sqq.).

Note 2.—√Fραγ in ῥήγ-υμι (break, tear), ῥήγ-μα (rent), διαρῥώξ (broken through) for *δια-Fρωγ-ς has F for origl. bh (as in case-sf. origl. bhi the bh may even be entirely lost, v. sub. declens.), cf. Lat. √frag in frang-o, frag-men, frag-ilis, Goth. √brak in brik-an (break), pf. brak. The same change occurs in √Fαγ, ἄγ-υμι (break), ἄ-αγ-ής (unbroken), cf. Sk. √bhaḡ in bha-ná-ḡ-mi (I break), bhaṅgi-s (breakage). It is uncertain whether the roots bhag and bhrag are akin.

Roots which origly. began and ended with an asp. also lose in Gk. their initial asp., whereby there thus arises a tenuis (cf. sup. § 64). Thus e.g. πῆχυ-ς (fore-arm) stands for *φῆχυ-ς, cf. Norse bögr, O.H.G. buoc, like Sk. bāhú-s (arm) for *bhāghu-s; πυθ-μήν (base) for *φυθ-μην, like Sk. budh-nás (floor) for *bhudh-na-s, cf. O.H.G. bod-am, Lat. fu-n-d-us; πενθ-ερός (father-in-law), πενθ-ερά (mother-in-law), πείσ-μα (bond, halser) for *πενθ-μα fr. √πενθ for *φενθ (bind), like Sk. bandh for *bhandh (in Sk. also 'relationship' derived fr. 'bonds,' e.g. bandh-u-s, a relation); so too the Goth. fm. band points to this (pres. bind-a, pf. band); √πυθ for *φυθ in πυνθ-άνομαι, πεύθ-ομαι (learn, ask), Sk. budh for *bhudh (be awake, know, be wise), Lith. √bud (bud-ėti be awake, bud-rú-s wakeful), O.Bulg. būd (būd-ėti be awake, bud-iti wake), Goth. bud (biud-an bid, though with a considerable change of meaning). A perfectly analogous phenomenon is seen in redupln.-laws (§ 68); cf. Grassm. Kuhn's Zeitschr. xii. 110 sqq.

CONSONANTAL PROLONGED-SOUNDS.

§ 65.

Origl. spirants; *y*, *s*, *v* (the changes of origl. *y*, *v* have been treated at length by G. Curt. Gr. Et.² pp. 491–611).

§ 65. 1. Origl. $y = \text{Gk. } \iota, \epsilon, \zeta, \acute{\iota}$, is lost (on y in $\zeta, \sigma\sigma$, cf. § 68, 1 b, d, e). From assimiln. of y to other consonn. ($\kappa\epsilon\rho\rho\omega$ for $*\kappa\epsilon\rho-y\omega$, $\acute{\epsilon}\lambda\acute{\alpha}\sigma\sigma\omega\nu$ for $*\acute{\epsilon}\lambda\alpha\chi\gamma\omega\nu$, etc.), it follows that it was not lost till late in Gk. To the existence of y in Gk. evidence is given by the operation of the consonantal beginning of Hom. $\acute{\omega}\varsigma$ (as) = origl. $y\acute{\alpha}t$ (abl. of st. $y\alpha-$), and that of $\acute{\iota}\epsilon\tau\omicron, \acute{\iota}\acute{\epsilon}\mu\epsilon\nu\omicron\varsigma$, etc., origl. $\sqrt{y\alpha}$ (go); even the writing of F for y in $F\acute{\omicron}\tau\iota$ and $T\lambda\alpha\sigma\acute{\iota}\alpha F\omicron$ proves it, on which point we may follow G. Curt. Gr. Et.² no. 606, p. 354.

a. Gk. $\iota = \text{origl. } y$, e.g. in the common st.-formative sf. origl. $y\alpha$, Gk. $\iota\omicron$, thus $\pi\acute{\alpha}\tau\rho-\iota\omicron-\varsigma$ (fatherly), origl. $p\acute{\alpha}t\alpha\rho-y\alpha-s$; $\tau\epsilon\lambda\epsilon\acute{\iota}\omega$, thence $\tau\epsilon\lambda\acute{\epsilon}\omega$ (finish), for $*\tau\epsilon\lambda\epsilon\sigma-y\omega$, pres. fm. in $y\alpha$ fr. st. $\tau\epsilon\lambda\epsilon\sigma-$ ($\tau\acute{\epsilon}\lambda\omicron\varsigma$, neut. end), etc., vid. § 26.

Here there occurs also a transposition of origl. y after a liquid cons. to Gk. ι before the liquid, e.g. $\phi\theta\epsilon\acute{\iota}\rho\omega$ (destroy) fr. $*\phi\theta\epsilon\rho-y\omega$, etc., v. § 26, 3.

b. Gk. $\epsilon = \text{origl. } y$, e.g. $\kappa\epsilon\nu\acute{\epsilon}\omicron\varsigma$ (empty) for $*\kappa\epsilon\nu\gamma\omicron\varsigma$, as is shown by Aiol. $\kappa\acute{\epsilon}\nu\nu\omicron\varsigma$ fr. Sk. $\zeta\acute{u}n\gamma\alpha-s$ beside $*\kappa\epsilon\nu\gamma\omicron-\varsigma$ we may infer an origl. $k\upsilon\nu\alpha n\gamma\alpha-s$ common to both; $\sigma\tau\epsilon\rho\acute{\epsilon}\omicron\varsigma = \sigma\tau\epsilon\rho\acute{\rho}\omicron\varsigma$ (hard, solid) fr. $*\sigma\tau\epsilon\rho-y\omicron\varsigma$; $\theta\upsilon\rho\acute{\epsilon}\omicron\varsigma$ (door-stone, door-shaped shield) fr. $*\theta\upsilon\rho\gamma\omicron\varsigma$, with origl. sf. $y\alpha$, fr. $\theta\acute{u}\rho\alpha$, door. v. § 26, 2.

c. Gk. $\zeta = \text{origl. } y$, e.g. $\sqrt{\zeta\upsilon\gamma}$ in $\zeta\acute{\epsilon}\upsilon\gamma\nu\nu\mu\iota$ (bind), $\zeta\upsilon\gamma\acute{\omicron}\nu$ (yoke), Lat. $iug-um$, Sk. $yug\acute{\alpha}m$, etc., Lat. Sk. origl. \sqrt{yug} (iungere); $\zeta\acute{\epsilon}\omega$ (seethe, intr.), $\sqrt{\zeta\epsilon\sigma}$, cf. $\acute{\epsilon}-\zeta\epsilon\sigma-\mu\alpha\iota$, $\zeta\epsilon\sigma-\tau\acute{\omicron}\varsigma$, O.H.G. $j\acute{\epsilon}\sigma-an$ (H.G. $g\acute{a}ren$), f.f. of root is $y\alpha\varsigma$; $\zeta\acute{\epsilon}F\alpha$ (spelt), Lith. $y\acute{\alpha}vas$, pl. $y\alpha\nu\acute{\alpha}\acute{\iota}$ (barley), Sk. st. $y\alpha\nu\alpha-$ (grain).

Note.—A d has been here developed bef. origl. y , for $\zeta = dz$ or dy , precisely as in other langg. we find a change fr. y to dy , and further to $d\acute{z}$, e.g. Lat. $maiorem$, middle-Lat. $madiozem$. It. $maggiore$, i.e. $mad\acute{z}ore$; Prākrt $\acute{g}utta-$, i.e. $d\acute{z}utta- = yukta-$. G. Curtius (Gr. Et.² p. 550 sqq.) compares this dy for y with gv for v , which appears not unfrequently in later periods of speech (e.g. It. $guastare$ fr. Lat. $uastare$). Curt. also adds $\delta\iota = \text{origl. } y$, in sf. $\delta\iota\omicron-$ (e.g. $\kappa\rho\nu\pi\tau\acute{\alpha}-\delta\iota\omicron\varsigma$, secret) = origl. $y\alpha$, and $\delta\epsilon = *dy = \text{origl. } y$ in sf. $\delta\epsilon\omicron-$ (e.g. $\acute{\alpha}\delta\epsilon\lambda\phi\acute{\iota}-\delta\epsilon\omicron-\varsigma$, nephew), and

§ 65. (bear) = Sk. and origl. *bhār-āyāmi*; in cases like *τελέω* fr. *τελείω*, for **τελεσ-γω*, with origl. sf. *γα* fr. st. *τελες-* (*τέλος* neut. end), in *-υω* for **-υγω* (*φύω* earlier *φύλω*, f.f. *bhuyāmi*, etc.); in gen. sg. masc. and neut. of *o*-st., origl. *a*-st., e.g. *ἵππου* fr. *ἵπποο*, and this certainly fr. *ἵπποιο*, which stands for **ἵπποσγο*, origl. *akvasya*; *πλέον* (more) bes. *πλεῖον*, f.f. *pra-yans*, comp. fr. \sqrt{par} , *pra* in *πολ-ύ-* (many), f.f. *par-u-*. Thus in most cases, before *y* entirely disappeared, it became *i*.

Note.—The assimiln. of *y* to other consonn., e.g. $\lambda\lambda = \lambda y$ and the like, and its combination with gutt. and dentt. as ζ , $\sigma\sigma$, is treated of under ‘sound-laws,’ § 68.

2. Origl. *s* = Gk. σ , $\acute{\sigma}$, is lost.

a. Gk. σ = origl. *s* in termn. and bef. mutes, more rarely bef. vowels, e.g. $\sqrt{és}$, origl. *as* (esse), *έσ-τί*, Sk. and origl. *ás-ti* (he is); st. *μενες-* n. *μένος* (might, strength), origl. and Sk. *mānas*; sf. of nom. sg. masc. fem. *-s*, e.g. *πόσι-ς*, $\acute{\sigma}\psi = F\acute{o}\pi-ς$, Sk. and origl. *pāti-s*, origl. *vāk-s*; sf. gen. sg. *-os*, origl. *-as*, e.g. *Fοπ-ός*, origl. *vāk-as*, Sk. *vāk-ás*, etc.; $\sqrt{\sigma\tau\omicron\rho}$, Sk. and origl. *star*, e.g. in 1 sg. pres. *στορ-έννυμι*, *στόρ-νυμι* (spread), Sk. *str-ṇōmi*, origl. *star-naumi*, etc.; $\sqrt{\sigma\tau\alpha}$, *ἴστημι* (set), origl. *sta-stā-mi*, Lat. and origl. *sta*; *σῦς* bes. *ῦς* (swine), Lat. *sūs*, O.H.G. *sū*; *σέβ-ομαι* (be in awe of), *σεμ-νός* (awful) for **σεβ-νος*, *σοφ-ός* (wise), and others show likewise init. *s* bef. vowel; *σιγάω* (am silent) bes. O.H.G. *swīgēn* has exceptionally σ for older *sv*, which regularly should become $\acute{\sigma}$; it is also found in *σελ-ήνη* (moon), fr. origl. \sqrt{svar} (shine), and perh. in some other instt., cf. *σέλ-ας* (sheen), *έλ-άνη* (torch), with usual sound-change, fr. same root (cf. G. Curt. Gk. Et.² p. 625). This σ bes. $\acute{\sigma}$, we must prob. consider to be an archaism, which has been partially retained.

b. Gk. $\acute{\sigma}$ = origl. *s*, when it is initial before a vowel or origl. *v*, e.g. $\sqrt{έδ}$, *έδ-ος*, *έδ-ρα* (seat), *έζομαι* (set myself, sit) for **έδ-γομαι*, Lat. *sed*, origl. and Sk. *sad* (sit); *έπτά* (seven), Lat. *septem*, origl. and Sk. *saptán-*; $\sqrt{έπ}$ in *έπ-ω*, *έπ-ομαι* (follow),

Lat. *sequ-or*, Sk. \sqrt{sak} , origl. *sak*; ὕπνος (sleep), origl. and Sk. § 65. *svápnas*; ἡδύς (sweet), f.f. Sk. and origl. *svādús*; pron. $\sqrt{é}$, \acute{o} , in *oũ*, *oĩ*, *ě* (sui, sibi, se), *ός* (suos), origl. and Sk. *sva-*; *έκυρός* (father-in-law), f.f. *svakuras*, Sk. *ζνάçuras* for *svάçuras*, Lat. *socer*, Goth. *svaihra*, etc.

Note.—It is not probable that the $\acute{}$ (which regularly represents *s*) in words which origly. began with *sv* compensates for the *v*, and that *s* afterwards entirely disappeared from before it. If the earlier lang. shows *F* even then, we may prob. assume that the sign of the asp. was not written bef. *F*, and that we must theref. read *Fé* and the like as *hve*; the long duration of *s* in Gk. seems proved by parallel fms. in diall., such as *σφός*.

Not uncommonly we find medial $\acute{}$ after vowel transferred to initial $\acute{}$ bef. vowel; e.g. *ίερός* (strong, holy) fr. **ιέρος*, **ίσερο-s* = Sk. *iširá-s* (strong, fresh); *είπόμην* fr. **έ-έπομην*, **έ-σεπομην*, $\sqrt{έπ}$ (follow) for **σεπ*, origl. *sak*; *είστήκειν* fr. **έ-έστηκειν*, **έ-σεστηκειν*, $\sqrt{στα}$ (stand), redupld. *sa-sta*, **σε-στα*; *εύω* bes. *εύω* (kindle), $\sqrt{ύς}$, origl. *us*, Sk. *uś* (burn), f.f. *ausāmi*, in Gk. first **εύσω*, **εύώ*; *έως* (dawn) for **έως* fr. **εύώς*, **έFώς*, cf. Aiol. *αύως* for **αύσως* (*ήώς* by compens. lengthening for **άFσως*), f.f. of *st*, is *aus-as-*, cf. Sk. *uś-ás-* (f. dawn), fr. same \sqrt{us} , Lat. *aurōra* for **aus-ōs-a*, likewise, as in Gk., with step-formn. of root; *ήμαι* (sit) for **ήσ-μαι*, cf. Sk. *ās-ē* for **ās-mai*, here in Gk. the init. $\acute{}$ became fixed by analogy throughout, and is added also in *ήσ-ται* for **ήσ-ται* = Sk. *ās-tē*; *ήμεις* (we), cf. Sk. *as-má-t*, *ήμεις* thus stands by compens. lengthening for **άσ-μεις*, whence the parall. fm. *άμμες* = **άσμες*, in which the *σ* has become assimilated to the *μ*; in *ήμεις* therefore the real *s* is doubly represented.

Note.—At first sight *έός* bes. *σφός* and *ός* seems clearly fr. a Gk. f.f. **σFος*, viz. *έός* for **έός* (*ehos*) fr. **έFος* (*ehvos*), and this fr. **έσFος*, **έ-σFος* for **σFος*, with the favourite vowel-prefix, which does not occur in *σφός* and *ός*; but when we recollect the Lat. *suus*, earlier *souos*, i.e. **seuos* (§ 33, 2), we are

§ 65. led back to ' a special Gr.-Ital. f.f. *sevos (cf. Lith. *sávo* fr. an unused **sava-s* suus), which necessarily becomes in Lat. *souos*, *suus*, in Gk. *έFος*; then too we must understand *τεός* = **τεFος* = *tuus*, i.e. **toros*, **tevos*, Lith. *táva-s* (tuus). Cf. § 26 n.

Sometimes ' appears as a later addition; it seems that the sensibility of the lang. to the distinction betw. ' (*h*) and ' (Semit. 'elif') began to decay rather early (cf. c.), thus e.g. in *ίππος* (horse) fr. **ικFος*, cf. the extant fm. *ίκκος*, Lat. *equos*, Sk. *ácvas*, f.f. *akvas*; that ' occurs here only in later times is proved by forms like *Λεύκιππος*, **Αλκιππος*, which otherwise would have been pronounced **Λευχιππος*, **Αλχιππος*; *ύστερος* (later) = Sk. *út-taras*; *ύ* is so frequently an initial sound, for origl. *su*, *sva*, that the more uncommon beginnings which would properly be *ύ*, followed the analogy of *ύ*; here belongs prob. *ύδωρ* (water), cf. Boiôt. *ούδωρ*, Lat. *unda*, Sk. *ud-am*, *ud-akám* (water), Goth. *vatō*, Lith. *vandū* (with earlier *vad* = *ud*); *ύφ-η*, *ύφ-ος* (web), *ύφ-αίνω* (weave), cf. Germ. *√wab* (weave), Sk. *ūrṇa-vābh-i-s* (m. spider, lit. woolweaver), *√vabh*, fr. which therefore may arise regularly a fm. *ubh*, Gk. *ύφ*; for **ύδ*, **ύφ*, in these words, we must presuppose an origl. *vad*, *vabh*, for which through loss of *a* arose *ud*, *ubh*.

c. In Gk. origl. *s*, or rather ' , which arose fr. origl. *s*, is entirely lost (cf. § 28). This occurs regularly in middle of words betw. vowels, and more rarely in initio bef. vowels, whilst it is regular bef. initial *ν* and *ρ*; e.g. *μένος*, gen. *μένους* fr. *μένεος*, **μενεσος*, f.f. and Sk. *mánasas*; *φέρη* fr. **φερεσαι*, origl. *bharasai*; *μύς* (mouse), gen. *μυός* = Lat. *mus*, *muris*, both fr. **musas*; *Fiός* (poison) for **Fισος* = Lat. *virus*, Sk. *viśa-s* and *viśa-m*; etc. Yet we also find *s* kept betw. vowels, e.g. *δίδο-σαι*, *τίθε-σαι*, *ίστα-σαι*.

In initio bef. vowels ' has fallen out in *ά-* (for and bes. *ά-*), *ό* = origl. and Sk. *sa-* (with), e.g. in *ά-δελφειός*, *ά-δελφός* (brother, lit. couterinus, cf. *δελφύς* uterus); *ά-λοχος* (spouse, consors tori, cf. *λέχος*, bed); *ό-πατρος* (having the same father, cf. *πατήρ*), etc., bes. *ά-πας* (all); *έτεός* (true, correct) = Sk. *satyá-s*; *√έχ*

§ 65. *çtaora-* (larger cattle, draught-oxen), Goth. *stiur* (bull, calf); sts. the interchange betw. $\sigma\tau$ and τ is prob. merely a dialectical one, e.g. $\tau\acute{\epsilon}\gamma\text{-}\sigma\varsigma$ bes. $\sigma\tau\acute{\epsilon}\gamma\text{-}\sigma\varsigma$ (roof), $\sigma\tau\acute{\epsilon}\gamma\text{-}\omega$ (cover), Lith. *stóg-as* (roof), *stég-ti* (to cover), Sk. \sqrt{sthag} , origl. *stag* (cf. Lat. *teg-o*, Germ. *decken*, \sqrt{dak} , without initial *s*). For further exx. of this phenomenon, which is hard to decide upon, vid. G. Curt. Gr. Et.² p. 621 sqq.

The assimiln. of *s* to other consonn. is treated, § 68; the loss of *s* with compens. lengthening, § 28.

3. Origl. $v = \text{Gk. } \nu, F$, which was lost in the later langg.; origl. *v* is expressed by $\acute{}$.

a. Gk. $\nu = \text{origl. } v$, e.g. $\delta\acute{\upsilon}\omega$, $\delta\acute{\upsilon}\sigma$, which bes. $\delta\acute{\omega}\delta\epsilon\kappa\alpha$ proves an early Gk. st. $\delta F\sigma = \text{Sk. } dva-$; the same holds good in $\kappa\acute{\upsilon}\omega\nu$ (dog), bes. Lat. *canis* for **quani-s*, Sk. $\zeta v\bar{a}$ (nom. sing. for **çvan-s*, st. *çvan-*, *çun-*), and in some other cases. It is very hard to decide whether *v* or *u* was the origl. here; perh. *uv* (Engl. *w*) is the earliest.

On the Aiolic vocalisation of *v* between vowels ($\chi\acute{\epsilon}\acute{\upsilon}\omega = \chi\epsilon F\omega$, etc.), so too on the transposition of *v* near liquid consonants, as e.g. $\gamma\sigma\nu\acute{\nu}\sigma\varsigma = \text{Aiolic } \gamma\acute{\sigma}\nu\nu\sigma$ from **γουFος*, st. $\gamma\sigma\nu\nu\text{-}$ (knee), with *-ος* of the gen. sg., before which *v*, that is *u*, passes over into *F*, $\delta\sigma\nu\rho\acute{\sigma}\varsigma$, $\delta\acute{\sigma}\rho\alpha\tau\sigma\varsigma$, fr. **δορFος*, **δορFατος*, from which are explained also $\delta\sigma\rho\acute{\sigma}\varsigma$, $\delta\acute{\sigma}\rho\alpha\tau\sigma\varsigma$, by loss of *v*, cf. nom. $\delta\acute{\sigma}\rho\nu$ (spear), v. supra § 26 b, 1, 3.

b. Gk. F ,¹ which was lost in the later stage, = origl. *v* (cf. § 27), e.g. *Foînos* (wine), cf. Lat. *uînum*, O.Lat. *ueinom*, f.f. of st. *vaina-* (or, acc. to Gk., *vāina-*); *Foîkos* (house), Lat. *uîcus*, i.e. O.Lat. *ueicos*, Sk. $v\acute{\epsilon}\zeta a\text{-}s$, origl. *vaika-s*; *Féργον* (work), $\sqrt{F\epsilon\rho\gamma} = \text{Sk. } vr\acute{g}, \acute{u}r\acute{g}$, Germ. *vark* (work, to work), origl. *varg*; $\sqrt{F\iota\delta}$ (see, know), origl. Sk. *vid*, Lat. *uid*, Germ. *vit*, e.g. in $F\iota\delta\text{-}\mu\epsilon\nu = \text{Sk. and origl. } vid\text{-}m\acute{a}si$, *Foîda* = Sk. $v\acute{\epsilon}da$, Goth. *vait*,

¹ J. Savelsberg, "de digammo eiusque immutationibus dissertatio," pars i. Aquisgrani, 1864; pars ii. 1866.

f.f. *vivāida*; √*Fεπ*, speak=Lat. *uoc* for **uec*, Sk. *vak*, origl. *vak*, § 65. e.g. in *Fέπ-ος* (word)=Sk. *vák-as* (speech); *ὄFις* (sheep)=Lat. *ouis*, Lith. and origl. *avis*; *ῶον* for **ὠFιον*, f.f. *āvya-m*, fr. origl. *avi-s*, Lat. *avi-s* (bird); *νέFος* (new)=Lat. *nouus* for **neuos*, Sk. and f.f. *náva-s*; *πλέF-ω* (sail), √*πλυ*=Lat. **plou-o* for **pleu-o* (pluo), Sk. and origl. *pláv-āmi*; *ρέF-ω* (flow), √*ρύ*, origl. and Sk. *sráv-āmi*, √*sru*, cf. *ρέυ-μα* (stream); sf. *-Fεντ-*=Sk. and origl. *-vant-* (e.g. in *στονό-Fεσαν*=*-Fετ-γαν*, with loss of nasal); *ναῦς* (ship), gen. *νᾶFός*=Sk. and origl. *nāus*, gen. *nāv-ás*; after consonn. e.g. in *δώδεκα* (twelve), *δίσ* (twice), for **δFω-δεκα* **δFι-s*, st. *δFο-*, *δFι-*, origl. *dva-* (cf. *δύο*); *δορός*, *γόνατος*, fr. **δορFος*, **γουνFατος*, cf. *δόρυ* (spear), *γόνυ* (knee), etc.

Note.—Thus *vy* can disappear in medio betw. vowels; this occurs in sf. *ταν-γα*, formed by *γα* and step.-formn. of stem termn. of abstracts in *tu*, sounded in Gk. as *τέο*, e.g. *δοτέος* (dandus)=Sk. *dātávyas*; *θετέος* (ponendus)=Sk. *dhātávyas*.

c. Gk. ' =origl. *v* in *ἔσπερος*, *ἑσπέρα* (evening), cf. Lat. *vesper*, *vespera*; *ἴσ-τωρ* bes. *ἴσ-τωρ*, a fm. which we expect according to *Fίδ-μεν*, st. *Fιδ-τορ* (knowing, witness), thence *ἱστορ-ία* (questioning, history), √*Fιδ*; *ἔννυμι* (clothe), *εἶμα* (garment), Aiol. *Fέμμα*=**Fέσ-νυμι*, **Fεσ-μα*, √*Fεσ*, cf. Lat. *ves-tire*, Sk. and f.f. of √*vas*: ' may, however, here have arisen also fr. *s*, and then been transposed: cf. supr. 2 b.

Note.—In isolated exx. *β*=origl. *v*, *βούλομαι* (I will), which we hold stands for **βολνομαι* (cf. Sk. *vrñé*, f.f. *var-na-mai*); to which Aiol. *βόλλομαι* and *βόλλα*=*βουλή* (will, council) seem to bear evidence; *ου* would thus arise fr. *o* by compensatory lengthening, in place of the lost *v*; √*βολ* for **Fολ* corresponds to the Lat. *uel*, *uol* (in *uel-le*, *uol-t*), Sk. and origl. *var* (choose, will); *ὄροβο-ς* (vetch) bes. Lat. *eruo-m*, O.H.G. *araweiz*, cf. H.G. *erbfse*. For other exx. of this correspondence of sound *v*. G. Curt. Gr. Et.² p. 514 sqq. Dialectically *β* for origl. *v* occurs more often, e.g. Lakôn. *βέργον*, *βιδεῖν*, for *Fέργον* (work), *Fιδεῖν* (see), origl. √*varg*, √*vid*; Lesh. Aiol. *βρίζα* (root), *βρόδον* (rose), for *Fρίζα*, *Fρόδον*, etc. Yet it is not unlikely that here (except in comb.

§ 65. $\beta\rho = F\rho$) β is practically only a character representing the v -sound instead of F .

Quite beside the ordinary rule we find $\sigma\phi =$ earlier sv in pron. st. $\sigma\phi\epsilon-$, $\sigma\phi\theta-$ ($\sigma\phi\epsilon\acute{\iota}\varsigma$, you, $\sigma\phi\acute{\epsilon}-\tau\epsilon\rho\omicron\varsigma$, $\sigma\phi\acute{\omicron}-\varsigma$, your) = Sk. and origl. $sva-$; in $\sigma\phi\acute{\omega}$ (you two) for $*\sigma F\omega$, $*\tau F\omega$, fr. $\sigma\acute{\upsilon}$, Dôr. $\tau\acute{\upsilon}$, origl. tu (thou); here $\sigma\phi$ arises, prob. early, for sp , in consequence of the aspirating force of s (v. sub. § 68); so, too, $\sigma\phi\acute{\omicron}\gamma\gamma\omicron\varsigma$ bes. $\sigma\pi\acute{\omicron}\gamma\gamma\omicron\varsigma$, $\sigma\pi\omicron\gamma\gamma\acute{\iota}\alpha$, which corresponds in root to the Goth. *svamma*s, st. *svamma-* (Lat. *fungus* is perh. borrowed fr. Gk.); sp here occurs exceptionally for sv , as takes place sometimes in Zend; in Hom. $\phi\acute{\eta}$ (as) for $*\sigma\phi\eta$, cf. Goth. *svē* (as), the initial s has been lost (G. Curt. p. 387).

Origl. v is said to be = μ in $\acute{\alpha}\mu\nu\acute{\omicron}\varsigma$ (lamb) for $*\acute{\alpha}F\iota-\nu\omicron-\varsigma$, fr. origl. *avi-s*, Gk. $\acute{\omicron}F\iota-\varsigma$ (sheep), and in other single instt. more or less doubtful (G. Curt. p. 521).

Still more doubtful is the change from v to γ (G. Curt., p. 527 sqq.).

On the assimilatn. of v to other consonn. e.g. $\tau\acute{\epsilon}\sigma\sigma\alpha\rho\epsilon\varsigma = *τ\epsilon\sigma F\alpha\rho\epsilon\varsigma$, $*\tau\epsilon\tau F\alpha\rho\epsilon\varsigma$, v. 'sound-laws.'

§ 66. Nasals.

1. Origl. $n =$ Gk. ν (cf. sound-laws for medial and final loss of origl. n in Gk.); e.g. $\nu\acute{\epsilon}F\omicron\varsigma$ (new) = Sk. and origl. *návas*; $\nu\alpha\acute{\upsilon}\varsigma$ (ship) = Sk. *nāus*, Lat. *navis*; $\acute{\alpha}-\nu\acute{\eta}\rho$ (man), st. $\nu\epsilon\rho-$ = Sk. and origl. *nar-*; $\acute{\epsilon}\nu\nu\acute{\epsilon}F\alpha$ (nine), Lat. *nouem*, Sk. and f.f. *návan-*; $\sqrt{\nu\epsilon\kappa}$ in $\nu\acute{\epsilon}\kappa-\upsilon\varsigma$, $\nu\epsilon\kappa-\rho\acute{\omicron}\varsigma$ (corpse) = Lat. *nec* in *nec-are*, Sk. *naç*, origl. *nak*; neg. $\acute{\alpha}\nu-$ = origl. and Sk. *an-*; $\sqrt{\acute{\alpha}\nu}$, origl. and Sk. *an* (blow) in $\acute{\alpha}\nu-\epsilon\mu\omicron\varsigma$ (wind) = Lat. *an-imus*, cf. Sk. *an-ilás* (wind); $\sqrt{\gamma\epsilon\nu}$ in $\gamma\acute{\epsilon}\nu-\omicron\varsigma$ (race), $\gamma\acute{\iota}-\gamma(\epsilon)\nu-\omicron\mu\alpha\iota$ (become) = Lat. *gen*, origl. *gan*; $\sqrt{\mu\epsilon\nu}$, origl. and Sk. *man* (think) in $\mu\acute{\epsilon}\nu-\omicron\varsigma$ (mind, might) = Sk. *mán-as*; 3 pl. vb. $-\nu\tau\iota$ ($-\nu\sigma\iota$) = Sk. and origl. *-nti*, e.g. $\phi\acute{\epsilon}\rho\omicron\nu\tau\iota$, $\phi\acute{\epsilon}\rho\omicron\upsilon\sigma\iota$ = Sk. and origl. *bháranti*, etc.

Before gutturals in Gk. the nasal becomes guttural, origl. nk , ng , $ng\hbar =$ Gk. $\gamma\kappa$, $\gamma\gamma$, $\gamma\chi$; bef. labials it is labial. Accordingly the radical nasal, origl. n , which occurs after the root in the case of certain present-forms, remains, as in $\tau\acute{\epsilon}\mu-\nu\omega$ (I cut; cf. aor. $\acute{\epsilon}-\tau\alpha\mu-\omicron\nu$), is ν bef. dentt., e.g. $\lambda\alpha\nu\theta-\acute{\alpha}\nu\omega$ (escape notice), cf. $\acute{\epsilon}-\lambda\alpha\theta-\omicron\nu$; it becomes μ bef. labb., e.g. $\lambda\alpha\mu\beta-\acute{\alpha}\nu\omega$ (take), cf.

§ 66. *Note.*—The exx. which are intended to prove medial ν to be a representative of origl. m (cf. Curt. Gr. Et.² p. 476 sqq.) are all doubtful. Thus e.g. $\beta\acute{\alpha}\iota\nu\omega$ (go) fr. $*\beta\alpha\nu-\gamma\omega$, which must not be assigned to Sk. \sqrt{gam} , but to \sqrt{ga} , comes fr. the common formatives of the present st. na and ya ; in $\chi\theta\acute{\omega}\nu$ (earth), st. $\chi\theta\omicron\nu-$, bes. $\chi\theta\alpha\mu\alpha\lambda\acute{\omicron}\varsigma$ (lowly, on the earth), cf. $\chi\alpha\mu\alpha\lambda$ (on the earth), Zend st. $zem-$ (earth), O. Bulg. $zemya$, $zemlya$, Lith. $z\acute{e}m\acute{e}$ (earth), the ν seems to have penetrated inwards from the termn.: so, too, perh. st. $\chi\acute{\iota}\omicron\nu-$ ($\chi\acute{\iota}\acute{\omega}\nu$, snow) bes. Lat. $hiem(p)s$, Sk. $h\acute{i}ma-s$ (snow, cold), Zend st. $zim-$, $zima-$ (winter, cold), O. Bulg. $zima-$, Lith. $\acute{z}\acute{e}m\acute{a}$ (winter).

§ 67. r - and l -sounds.

Origl. $r = \text{Gk. } \rho, \lambda$.

Gk. $\rho = \text{origl. } r$, e.g. in $\sqrt{\rho\nu\theta}$ (be red), Sk. and origl. $rudh$; suff. $-\rho\omicron$, Sk. and origl. $-ra$, both in $\acute{\epsilon}-\rho\nu\theta-\rho\acute{\omicron}-\varsigma$ (red) = Sk. $rudh-ir\acute{a}-s$, Lat. $ruber$, i.e. $*rub-ro-s$, origl. $rudh-ra-s$; $\sqrt{\acute{\alpha}\rho}$ in $\acute{\alpha}\rho-\acute{\omicron}\omega$ (plough), $\acute{\alpha}\rho-\omicron\tau\rho\omicron\nu$ (a plough), cf. Lat. $ar-o$, $ar-atrum$, Goth. $ar-yan$, Lith. $\acute{a}r-ti$, Scl. $or-ati$ (plough); $\sqrt{\acute{\omicron}\rho}$ in $\acute{\omicron}\rho-\nu\nu\mu\iota$ (rise), Lat. or , Sk. ar in $r-\eta\acute{\omicron}mi$ (orior); $\sqrt{\acute{\rho}\nu}$, Sk. and origl. sru , flow, etc.

Gk. $\lambda = \text{origl. } r$, e.g. in $\sqrt{\lambda\nu\kappa}$ in $\lambda\epsilon\nu\kappa-\acute{\omicron}\varsigma$ (white), Lat. luc , Germ. luh , Sk. ruk , origl. ruk (shine); $\sqrt{\pi\omicron\lambda}$, $\pi\lambda\epsilon$, Sk. and origl. par (fill), in $\pi\omicron\lambda\acute{\upsilon}\varsigma$ (many), Sk. $pur\acute{u}\varsigma$ for origl. $parus$, $\pi\acute{\iota}\mu-\pi\lambda\eta-\mu\iota$ (fill); $\acute{\epsilon}-\lambda\alpha\chi\acute{\upsilon}\varsigma$ (small) = Sk. $lagh\acute{u}\varsigma$; $\delta\omicron\lambda\iota\chi\acute{\omicron}\varsigma$ (long), Sk. $d\acute{i}rgh\acute{a}\varsigma$, Zend $daregh\acute{o}$, origl. $dargha-s$; $\acute{\omicron}\lambda\omicron\varsigma$ (whole) for $*\acute{\omicron}\lambda\acute{F}\omicron\varsigma$, Lat. $sollus$ for $*soluos$, Sk. $s\acute{a}rva-s$, etc.

§ 68. SOME IMPORTANT SOUND-LAWS.

MEDIAL.

1. Assimilation.

a. Perfect assimiln. of a preceding to a following sound; e.g. of s to ν , μ following, $\acute{\epsilon}\nu\nu\mu\iota$ (clothe) = $*F\epsilon\sigma-\nu\nu\mu\iota$; Aiol. $\acute{\omicron}\rho\epsilon\nu\nu\omicron\varsigma$ (mountainous) = $*\acute{\omicron}\rho\epsilon\sigma-\nu\omicron\varsigma$ fr. $\acute{\omicron}\rho\omicron\varsigma$ (mountain), st. $\acute{\omicron}\rho\epsilon\varsigma-$ sf. $-\nu\omicron$; Aiol. $\acute{\epsilon}\mu\mu\iota$ (am) = $*\acute{\epsilon}\sigma-\mu\iota$; $\epsilon\acute{\iota}-\mu\acute{\iota}$, $\acute{\omicron}\rho\epsilon\iota-\nu\acute{\omicron}\varsigma$, represent the double cons. by compensatory lengthening. Not unfrequently consonants which were afterwards lost are preserved in

such assimilns., e.g. *περίρρυτος* (sea-girt) for **περι-σρυ-το-ς*, √*ρύ* § 68. (flow, *ρέF-ω*) for **σρυ*, Sk. and origl. *sru*, Germ. *stru* (with inserted *t*), etc.; *ἄρρηκτος* (unbreakable, unbroken) for **ἄ-Fρηγ-το-ς*, √*Fραγ* (*Fρήγ-νυμι*, break, *Fρηῆξις*, rent, for **Fρηγ-τι-ς*); *φιλομειδής* (freely smiling) for **φιλο-σμει-δης*, √*μι* for **σμι*, Sk. and origl. *smi*, O. Bulg. *smi*, etc.

The assimiln. of momentary labb. to following *μ* is well known; e.g. *γράμμα* (writing) for **γραφ-μα* (*γέ-γραμμαι* for **γεγραφ-μαι*, 1 pf. med. fr. *γράφ-ω*, write), etc., and the assimilns. which perh. occur only in compds., e.g. *συλλέγω*, *συρρέω*, and the like.

In the commonest of these cases, i.e. in assimiln. of all the dentals (including *ν*) to a following *s*, the double *s* so produced was not tolerated in the later form of lang., even when *s* was medial and followed a short vowel: only the archaic (Hom.) lang. shows such forms as *ποσσί* fr. **ποδ-σι* (loc. pl. fr. st. *ποδ-*, foot); throughout *s* is the only trace of the process of assimiln., not seldom (especially in nom. sing. and where *ντ*, *νδ*, *νθ*, were originally existent) accompanied by compensatory lengthening of precedg. vowels (cf. § 28), in which cases, perh. not common, we must assume an assimiln. of the *ν* by resolution into a vowel-sound. This is a well-known sound-law, to which belong such exx. as loc. pl. *σώμᾱ(τ)-σι*, *πο(δ)-σι*, *κόρυ(θ)-σι*, *δαίμο(ν)-σι*. The *s* which produces the assimiln. is often unorigl., i.e. has arisen, through the action of a previous sound-law (v. infr.), from *τ*, e.g. *πίσις* (feeling) fr. st. *πενθ-* (cf. *πένθος*, grief) and suff. *-σι-ς* fr. *-τι-ς*. Compensatory lengthening occurs in such cases as *εἰδώς* = **FειδFοτ-ς*, *δαίμων* = **δαιμον-ς*, *φέρουσι* = **φερονσι* fr. *φέροντι*; *ν* + dent. must both be lost before *s*, e.g. *σπείσω* fr. **σπενδ-σω*, *πίσομαι* fr. **πενθ-σομαι*, *τιθείς* fr. **τιθεντ-ς*, *χαρίεις* fr. **χαρι-Fεντ-ς* (*φέρων*, however, fr. **φεροντ-ς*, v. § 28, 3; *χαρίεσσα* fr. **χαριFετ-γα* [v. e], without compensatory lengthening, because no *ν* was originally there).

Moreover, in this place belong the cases in which the assimiln. takes place together with the loss of the former consonant, e.g.

§ 68. διδάσκω (learn) for *διδαχ-σκω, cf. διδαχ-ή (teaching); λάσκω (cry out, speak) for *λακ-σκω, cf. ἔ-λακ-ον; ἔψευκα for *ἔψευδ-κα fr. ψεύδ-ω (tell lies), etc.

b. Complete assimiln. of a following to a preceding sound.

This kind of assimiln. is, like the former, an especial favourite in the Aiol. dialects, whilst elsewhere, instead of the double consonn., compensatory lengthening (§ 28) of the preceding vowel, or transposn. of *v* and *y* generally occurs. Thus *F*, *y*, and *σ* become assimilated to a preceding liquid, *F* and *y* sometimes to other sounds also, viz. *σ*, *y*, to *τ*, *δ*; e.g. γόννος = γουνός = *γον*F*-ος, gen. fr. st. γονυ- (knee); st. πολλό- for *πολ*F*ο-, a further fmn. through *ο*, origl. *α*, fr. st. πολύ- (many), origl. *par-u-*; ἵππος (horse) fr. *ἵπ*F*ος, ἰκ*F*ος (cf. sideform ἵκκος), origl. *ak-va-s*; κτέννω (kill) = κτείνω = *κτεν-*y*ω; χέρρων = χείρων (worse) = *χερ-*y*ων, etc. In the case of *λy* the assimiln. has been retained in other diall.; στέλλω (send) = *στελ-*y*ω; ἄλλος (other) = *ἄλγος, Lat. *alius*; except ὀφείλω (owe) fr. *ὀφελ*y*ω, and perh. a few others; πτίσσω (peel) = *πτισ-*y*ω (ἔ-πτισ-μαι), cf. Lat. *√pis* in *pinso*, *pis-tor*, Sk. *piś* (e.g. *pi-náš-ti*, Lat. *pinsit*); this does not often happen, *s* usually is lost, and also *y* at a later period, cf. supr. § 65, 1, a, e; πόδ-εσσι fr. *ποδεσ*F*ι, -σ*F*ι = origl. -*sva*, is termn. of loc. pl., ποδε- is the noun-st. fr. earlier ποδ- (foot); in this case also the later lang. has only one *σ*, e.g. πόλεσι, γλυκέσι, which never disappears from between the two vowels, because it stands for *σσ*. τέτταρες, τέσσαρες (four), fr. *τετ*F*αρες (f.f. *katvāras*), and thence *τεσ*F*αρες is an ex. of *F* assimild. to a mom. sound. ττ for τ*y*, θ*y*, κ*y* (apparently γ*y*, v. infr. e, β), χ*y* is produced in the same way, since κ*y* first became τ*y*, as this sound-change occurs in many langg., and the aspiration (of θ*y*, χ*y*) becomes lost before *y*.

Thus, e.g. ἐρέττω (I row) fr. *ἐρετ-*y*ω, cf. ἐρετ-μός (oar); ἥπτων (less, worse) fr. *ἥτ*y*ων for *ἥκ-*y*ων, cf. ἥκ-ιστος (superl.); ἐλάττων (less, smaller) for *ἐλατ*y*ων, and the latter for *ἐλαθ-

§ 68. but sonant mom. sounds (γράφ-δην, √γραφ), θ by none but aspp. (λεχ-θῆναι, √λεγ).

Before ν labb. pass into their nasals, e.g. σεμ-νός (awful) for *σεβ-νος, cf. σέβ-ομαι (I dread), yet they are found, e.g. ὕπ-νος (sleep), in opposition to som-nus (*sop-nus).

Bef. labb. ν notably passes into the lab. nasal μ (e.g. ἔμ-πειρος for *έν-πειρος), bef. gutt. into the gutt. nasal γ (e.g. συγ-καλέω for *συν-καλεω), cf. § 66, 1.

Bef. μ the dentt. τ, δ, θ, often pass into their spirants, e.g. ἤνυσ-μαι fr. ἀνύτ-ω (bring to pass, finish), πέ-πεισ-μαι for *πε-πειθ-μαι, etc.; yet Iôn. ὀδ-μή occurs beside later ὀσ-μή (smell), √ὀδ; ἴδ-μεν (we know) bes. ἴσ-μεν; ἀριθ-μός, ἀτ-μός, κεκορυθ-μένος, and others, do not show the change to σ.

Further, the change of gutt. κ, χ, before μ into γ is well known, e.g. δόγ-μα, √δοκ; τέ-τυγ-μαι, √τυχ; yet χ often remains, e.g. δραχμή. This law was likewise incompletely applied in the earlier (Iôn.) langg., e.g. ἴκ-μενος, ἀκαχ-μένος.

Sometimes nasals seem to change preceding mom. sounds into aspp., e.g. λύχ-νος (light, torch) fr. √λυκ (λευκ-ός, white), origl. ruk; ἀκ-αχ-μένος (sharpened, pointed), redupl. √ἀκ (be sharp); cf. ἀκ-ωκ-ή (point), and others.

The same influence is exercised by ρ, λ, in many cases, e.g. suff. -θρο, -θλο, bes. origl. tra, Zend thra (here the spirants have the force of aspp.), e.g. βά-θρο-ν (base), √βα (go); κλει-θρον (lock), fr. κλείω, κληῖω, κλήω (lock); θέμε-θλον (ground-work), etc., bes. ἄρο-τρο-ν (plough) = Lat. arā-tru-m (ἀρόω, I plough), etc.

Before ι in stem- and word-formative particles (except in Dôr. dial.) τ is changed to σ, e.g. φησί (he says), Dôr. φατί; the -τι of 3rd pers. sing. is kept in ἐσ-τί (he is); the abstracts in -σι-ς for -τι-ς, e.g. φά-σις, in Hom. and tragg. φά-τις (speech); πέψις (cookery, √πεπ, f.f. kak, cook) fr. *πεπ-τι-ς, f.f. kak-ti-s; suff. γα, Gk. -ιο, forming -tya, with stems ending in t-, ta- (the stem-termn. a of ta being lost, which is regularly the case bef. suff. γα), Gk. -τιω, and hence -σιο, e.g. fr. πλοῦτο-ς (wealth) is

fm̄d. Dôr. πλούτ-ιο-ς, and hence πλούσιο-ς (rich); fr. ἐνιαυτό-ς § 68. (year), Dôr. ἐνιαύτ-ιο-ς, and hence ἐνιαύσιο-ς (yearly); st. γερωντ- (n. sing. γέρων, old man) with sf. γα, Gk. ια, makes γερωντία, and thence γερουσία (senate); f.f. (*d*)vikati, Dôr. Φίκατι, εἴκατι (perh. fr. *ἐΦικατι), Att. εἴκοσι (twenty); from Dôr. φέροντι, τιθέντι (3 pl.), f.f. *bharanti*, *dadhanti*, come *φερονσι, *τιθενσι, and thence by rule (v. supr.) φέρουσι, τιθείσι (Iôn.), etc. Yet in Att. and Iôn. is found φά-τι-ς (speech), √φα, and the like.

Also bef. *v* this change of τ to σ sometimes takes place, thus in σύ for Dôr. τύ (thou), cf. Lat. and Lith. *tu*; suff. -συνη, f.f. -*tu-nā*, further fm̄n. of common abstract sf. -*tu* (-*tv-a*).

d. An assimiln. of following to preceding sounds. *y* in the combn. *dy* is so similar to the preceding dent. sonant *d*, that it becomes a dental sonant spirant (French or Polish *z*), *dy* thus becomes *dz* (acc. to Slav. or French pronuncn.), written ζ, e.g. Ζεύς fr. *Δγευς=Sk. *dyāus* (√*dyu*=*div*), cf. early Lat. *Diou-is*; Aiol. ζά=*δγα for διά (through); ἔζομαι (sit, seat myself)=*σεδ-γομαι, √έδ=σεδ; σχίζω (split) for *σχιδ-γω, √σχιδ; τρά-πεζα (table) for *τετρα-πεδ-γα (four-footed), cf. Lat. st. *ped-* (*pes*, *ped-is*, foot), etc.

Here belongs the aspiration of origly. unaspirated consonn. through influence of preceding prolonged-(liquid) sounds. In Greek this influence is especially exercised by *s*, cf. Sk. § 52: i.e. *σχιδ-γω, σχίδ-η (splinter), √σχιδ, for and bes. √σκιδ in σκίδ-νημι (divide, scatter), cf. Lat. *scid* in *scindo*, Goth. *skid* in *skaida* (cut), Sk. *k̄hid*, i.e. origl. *skid*, in *k̄hi-ná-d-mi* (slit); πάσχω (suffer) for *πα-σκω or perh. *παν-σκω, √πα in πα-θ (ἐπαθ-ον), and πε-ν, πέν-ομαι (endure, tire myself), further formations in θ and ν; the σ sometimes disappears before the aspp. which it has called into existence, e.g. ἔρχομαι (come), for *ἐρ-σχομαι, ἐρ-σκομαι, √ἐρ (come, go), cf. Sk. *r̄k̄hāmi*, also *árk̄hāmi*=*ἐρχω, origl. 1 sing. act. *ar-skā-mi*, med. *ar-ska-mai*; κριθή (spelt) for *χριθη (cf. § 64, sub fine, and 2 infr.), and this for *χρισθη, *χριστη, cf. O.H.G. *gērsta*, etc.

§ 68. The nasals also seem to have this aspirating effect sometimes, e.g. Boiôt. *-νθι* for *-ντι*, 3 p. pl. act. vb.; *ὀμφ-ή* (voice) for **Φομπ-η* fr. $\sqrt{Fεπ}$, origl. *vak* (speak); *ἐγχ-ος* (nt. spear) fr. $\sqrt{ἀκ}$ (be sharp), cf. *ἄκ-οντ-* (*ἄκων*, javelin).

Perh. *ρ*, *λ*, are the cause of aspiration in *τρέφ-ω* (nourish), which thus by assumption may be for **τερφω* bes. *τέρπω* (sate, delight, cf. *τέρπεσθαι ἐδητύος*), Sk. *tarp* (be sated, delighted), Lith. *tàrp-ti* (thrive); *πλάθ-ανος*, *πλαθ-άνη* (flat cake), bes. *πλατ-ύς* (broad), Lith. *plat-ùs*, etc., *πλάτ-η* (plate, oar-blade). Concerning 'unorigl. aspiration,' cf. G. Curt. Gr. Et.² p. 439 sqq.

e. Mutual assimilation (complete or partial) of two sounds, each affecting the other.

a. *γγ* becomes $\zeta=dz$ (v. d supr.), as *γ* bef. *γ* becomes *d*, *γ* after *d* becomes *z*, e.g. *κράζω* (cry), i.e. **kradzō* fr. **κραδγω*, and this fr. **κραγ-γω*, $\sqrt{κραγ}$, cf. *κέ-κρᾶγ-α*; *ἄζομαι* (dread) fr. **ἀγ-γομαι*, cf. *ἄγ-ιος* (holy); *μέζων*, *μείζων* (greater), the latter having, moreover, *γ* transferred to the preceding syll. (cf. § 26), fr. **μεγ-γων*, cf. *μεγ-άλη*, *μέγ-ας* (great), etc.

In *νίζω* (wash) bes. *χέρ-νιβ-ος* (*χέρνιψ*, water for handwashing), *νίπτω* (wash) = **νιβ-τω*, the earlier root-fm. *nig*, Sk. *niḡ*, is retained (cf. § 63). *Λάζομαι* (grasp) bes. *λαμβάνω* (take) is obscure, unless it be the unique ex. of $\zeta=\beta\gamma$, formed perh. on the analogy of the common fms. in *-αζω*, *-αζομαι*.

β. *τυ*, *θγ*, *κγ*, *χγ*, become *σσ*; in *τυ* and *θγ*, *γ* perh. became the dent. mute spir. *s*, after dental mutes, whereby arose *τσ*, *θσ*, then the preceding mute dentt. assimilated themselves to this *σ*; because $\sigma\sigma=τυ$, *θγ*, also in Dôr., we must not assume that *τυ* (*θγ*) passed next into *σγ*, as *τι* into *σι* (v. sup. c), and this *σγ* into *σσ* by rule (b), for in Dôr. *τ* remains before *ι*; *κγ*, *χγ*, became firstly *τγ*, *θγ*, as of course gutt. so often pass into dentt. bef. *γ*, and then these sounds became *σσ* in the way above described; e.g. *ἐρέσσω* (row) fr. **ἐρετ-γω*, cf. *ἐρετ-μός*; *κρέσσω*, *κρείσσω* (stronger, better), with transposn. of *γ* (cf.

*Fair usage policy applies

§ 68. *μβροτος (preserved in ἄ-μβροτος), and this for *μρο-τος, past part. from √*mar*, *mra* (mori), cf. Sk. *mar-ta-s* (a mortal, man, Rigved. I. 84, 8, acc. to Kuhn, Beitr. iii. 236); the same process takes place in βλίττω (cut honey) for *μβλιττω, fr. *μελιτ-γω, st. μελιτ- (μέλι, honey); βλώσκω (go, come) for *μβλωσκω fr. *μλωσκω, √*mol* in μολ-εῖν, etc.

Note.—In πτόλις, and such like cases, bes. πόλις (city), cf. Sk. *puram*, *purī*, √*par* (fill); πτόλεμος bes. πόλεμος (war), cf. πελεμίζω (brandish), and Lat. *pello*; πτίσσω (peel) = *πτισ-γω for *πισγω, √*pis* = Lat. *pis* (pinso), Sk. *piś*, πτ stands for π without any visible cause. They seem to be dialectic fms.

g. The ejection of *s* from between consonn., e.g. τέτυφ-(σ)θε, is well known.

Loss of *s* between vowels is treated of § 65. In like cases τ also disappears, but not so often; e.g. κέρως for κέρατ-ος (gen. sing. st. κερατ-, horn); φέρει (3 sing. pres. act.) fr. *φερε-τι, origl. *bhara-ti*. The dent. nasal also is subject to similar decay in known cases, e.g. μείζους for μείζον-ες (n. pl. masc. fem. st. μειζον-, greater).

h. Transposition, as in θάρσος bes. θράσος, δέδορκα bes. ἔδρακον: it is not easy to ascertain which arrangement is here the primitive one.

Note.—τέ-θυη-κα bes. ἔ-θαν-ον, and the like, are primitive deviations from root-fms., and must not be treated according to Gk. sound-laws. Cf. 'root-formation.'

2. Dissimilation. Here belong the known changes of mom. dent. bef. τ and θ to σ, so as to facilitate pronunciation; this change is found in Eran. Lat. and Sclavo-germ. also, e.g. ἀνυσ-τός fr. ἀνύτ-ω; ἄσ-τέον fr. ἄδ-ω; πεισ-θῆναι fr. πείθ-ω; πισ-τός for *πιθ-τος, etc.

Sometimes two consecutive aspp. are avoided by changing the former or latter into an unasp. conson., e.g. ἐ-τέ-θην, ἐ-τύ-θην, for *ἐ-θε-θην, *ἐ-θυ-θην, √*θε*, *θυ*, cf. τί-θη-μι, θύω; σώ-θη-τι for *σω-θη-θι, the termn. of 2 p. sing. imp. is -θι, origl. *dhi*, cf.

κλῦ-θι, origl. *kru-dhi*, etc. This change scarcely ever takes § 68. place except in the case of *θ* (in *φ* and *χ* perh. only in compds., e.g. *ἀμπ-έχω*, *έκε-χειρία*).

For a similar phenomenon in the case of root-fms., which origly. began and ended with aspp., v. supr. § 64, sub fine).

Moreover, the attempt to avoid pronouncing similar sounds close together causes the contraction of two similar or like consonn. into one, by means of evaporation of the vowel that lies between them, e.g. *τράπεζα* (table) for **τετρά-πεζα* (four-footed); *τέτραχμον* for earlier *τετρά-δραχμον* (four-drachm piece); *ἀμφορεύς* (two-handled jug) for earlier *ἀμφι-φορεύς*, etc.

3. The aspirates. Whenever by sound-laws aspp. which terminate a root become unasp. consonn., the aspiration falls back upon the *τ* which begins the root; the same change takes place when *θ* follows upon the root-termn., notwithstanding that the asp. remains before *θ*, e.g. st. *τριχ-*, cf. *τριχ-ός*, but **θρικ-ς*, i.e. *θρίξ* (hair); *τρέχ-ω* (run), but *θρέξομαι*; *τύφω* (fume), but *θύψω*; *τρέφ-ω* (nourish), but *έθρέφθην*, etc. In cases like the last mentioned the aspiration before the *θ* appeared to the Greek instinct for language to be caused by it (the *θ*), and similarly also where the aspiration occurs in the case of e.g. *π*, *β*; accordingly the sound that ended the root was only characterized as aspirate by the retrogression of the aspiration upon the initial conson.

For the law by which, in the case of roots which origly. began and ended in aspp., the initial consonn. lost their aspiration, v. supr. § 64, sub fine.

4. Law of Reduplication. Of two initial consonn. the former only was admissible into the syll. of redupln.,—hence the aspp. are redupld. through their first element alone (*χ*, i.e. *kh*, through *κ*; *θ*, i.e. *th*, through *τ*; *φ*, i.e. *ph*, through *π*)—e.g. *ἴ-στη-μι* (set), i.e. **σι-στη-μι* for *sti-stā-mi*; *γέ-γραφ-α* (have written) for **γρε-γραφ-α*; *πέ-φν-κα* (have been born) for **φε-φν-κα*;

§ 68. τί-θη-μι (place) for *θι-θη-μι; κί-χρη-μι (lend, borrow) for *χι-χρη-μι, and this for *χρι-χρη-μι, etc.

In the case of more consonantal combinations, the first consonant also falls away, so that instead of redupln., only a vowel appears, e.g. ἔ-γνω-κα (have learnt) for *γε-γνω-κα; ἔ-κτου-α (have killed) for *κε-κτου-α, etc. Cf. Sk. redupln., § 59.

§ 69.

TERMINATION.

The only consonn. tolerated *in fine* in Gk. were *s* and *ν* (generally fr. *μ*; this is also the case in the N. European langg. of the Teut. stem), e.g. πόσι-ς, origl. *pāti-s*; πόσι-ν, origl. *pāti-m*; and further *ρ* also, e.g. πάτερ, voc. f.f. *pātar*, n. sing. πατήρ, f.f. *pātars* (*κ* is found only in ἐκ, shortened fr. ἐξ ‘out,’ and in οὐκ ‘not,’ which likewise is prob. a shortened fm.). Other conson. were either cast off, or changed into *s* or *ν*.

Thus the frequent final *t* of Indo-Eur. is thrown off in Gk. (cf. Lat. *nouō* fr. *nouōd*, origl. *navāt*, abl. sing.), or changed to *s*, e.g. τό (the, neut.), Sk. and origl. *ta-t*, Lat. (*is*)-*tu-d*, Goth. *tha-t-a*; ἔφερε (3 sg. impf.), Sk. and origl. *ābharat*; ἔφν (3 sg. aor.), Sk. *ābhūt*; ἔφερον (3 pl. impf.), origl. *abharant*; φέρον (acc. sg. neut. pres. part. act.) for *φεροντ; τέρας (wonder, sign) for *τερατ, cf. gen. τέρατ-ος; εἶδος (neut. pres. part. act. ‘knowing’) for *εἶδφοτ, cf. gen. εἶδότ-ος, etc. In consequence of loss of final *ι*, *θ* became final; when this occurred, *θ* also became *s*, e.g. δός (give) fr. *δοθ for *δο-θι, origl. *da-dhi* (imper. aor. √δο, origl. *da*, dare). *δ* drops off: παιῖ (voc.) for *παιδ (n. sg. παιῖς, child); so also *κ* in γύναι (voc. woman) for *γυναικ (cf. e.g. gen. γυναικ-ός); κτ in ἄνα (voc.) for *ἀνακτ (ἄναξ, gen. ἀνακτ-ος, lord), γάλα (n. acc. milk) for *γαλακτ (e.g. gen. γάλακτ-ος), etc. From *ντ* only *τ* is lost, e.g. γέρον (voc. fr. n. γέρων for *γεροντ-ς, gen. γέροντ-ος, old man) for *γεροντ.

The final *m* so common in Indo-Eur., esp. as sign of acc. and element of 1st sing. of vb., is usually replaced by *ν* in Gk., e.g. πόσι-ν, Sk. and f.f. *pāti-m*; νέφο-ν, Sk. and f.f. *nāva-m*; ἔφερο-ν

§ 70.

CONSONANTS IN LATIN.

The table of consonn. is to be found in § 30.

The Lat. lang. is esp. characterized by lack of the *aspp.*, which were represented by the corresponding unaspirated sonants, and by unorigl. spirants *f*, *h*; the latter in such a way that *f* (repres. by *b*, in medio) may stand for any origl. asp., *h* almost exclusively=origl. *gh*.

k (written *c*, *q*) remains always unchanged, but here and there drops away in initio; it does not become *p* or *t*, as in the other Indo-Eur. langg. The origl. spirants *y*, *s*, *v*, are generally retained, though *s* very often passes into *r*, and *y* and *v* often drop out, and are interchanged with *i* and *u*.

The consonn. are subject to numerous sound-laws: assimilation; dissimilation; change from *t* to *s*; from *s* to *r*; medial, initial, and final loss (the latter in a still higher degree in archaic Lat.)—all remove the consonantal system of Lat. widely from the origl. condition of the Indo-Eur. lang.

§ 71.

EXAMPLES.

Origl. mom. mute unaspirated consonn.

1. Origl. *k*=Lat. *k*, i.e. *c*, *q*. Origl. *k* often attaches to itself a *v*, by a sound-law not yet understood (cf. Goth.). The written character, with a few archaic exceptions, represents *k* by *c*; before *u* (when other vowels follow = *v*) *k* is represented by its equivalent *q* (at an earlier period also before the *u* which forms the syll., e.g. *pequnia*), e.g. \sqrt{coc} in *coc-tus*, *coqu-o* (cook), origl. *kak*, cf. Gk. $\pi\epsilon\pi$, Sk. *paḥ*; *quinque* (five), origl. *kankan*, cf. Gk. $\piέντε$; \sqrt{quo} in *quo-d* (which), etc., origl. *ka*, cf. Gk. $\pi\omicron$, earlier $\kappa\omicron$; *-que* (and), Sk. *-ka*, origl. *ka*, cf. Gk. $\tau\epsilon$; *quatuor* (four) for **quatuores*, origl. *katvāras*, cf. Gk. $\tauέτταρες$; st. *cord-* in *cor* (heart) for **cord*, gen. *cord-is*, origl. *kard*, cf. Gk. $\kappa\rho\alpha\delta-\lambda\alpha$; \sqrt{qui} in *qui-s*, *qui-d* (what), origl. *ki*, cf. Gk. $\tauί-s$, $\tauί$; \sqrt{qui} in *qui-es* (rest), origl. *ki*, cf. Gk. $\kappa\iota$ in $\kappa\epsilon\hat{\iota}-\tau\alpha\iota$; \sqrt{clu} in *clu-o* (hear),

in-clu-tus (famed), origl. *kru*, cf. Gk. κλυ; √*scid* in *scindo* (split), § 71. origl. *skid*, cf. Gk. σχιδ; *canis* (hound) for **cvan-is*, origl. *kvan-s*, cf. Gk. κύων, κυν-ός; √*dic* in *deic-o*, *dīc-o* (say), *-dīc-us* (saying), origl. *dik*, cf. Gk. δικ in δείκ-νυμι; *decem* (ten), origl. *dakan*, cf. Gk. δέκα; √*luc* in *lūc-eo* (shine), *louc-em*, *lūc-em* (n. lux, light), origl. *ruk*, cf. Gk. λυκ; √*loc* in *loc-utus*, *loqu-i* (speak), origl. *rak*, cf. Gk. λακ; √*uoc* for **uec* in *uōc-em* (n. uox, voice), *uoc-are* (call), origl. *vak*, cf. Gk. Φεπ; suff. *-co*, fem. *-ca*, origl. *-ka*, fem. *-kā*, e.g. *ciui-cu-s*, *uni-cu-s*, cf. Gk. -κο-ς, etc.

In Lat. as in Gk. (cf. § 62) *k* is sometimes softened into *g*, e.g. *ui-gin-ti*, *tri-gin-ta*, bes. *ui-cen-sumus*, *tri-cen-sumus* (*uigesimalis*, *trigesimalis*, cf. εἴ-κο-σι, τριά-κον-τα), *-gin-*, *-cen-*, is here a relic of (*de*)*cem*, f.f. *dakan*; *neg-otium* = **nec-otium*; *gubernator* bes. κυβερνήτης, etc.

Note 1.—This is prob. the case also in *glōria* (glory) for **clōria*, **clōsia*, a further fmn. of st. **clōs-* for **clouos-*, **cleuos-* = Gk. κλεφες-, Sk. *ḡrāvas-* (glory), Slav. *sloves-* (n. acc. *slovo*, word), root origly. *kru* (hear), as Sk. *ḡrāvas-ya-* (famous), *crāvas-yā* (famousness, Kuhn, Zeitschr. iii. 398), yet the *ō* is strange, for we should have expected *ū*, cf. *in-iūria* = **ious-ia*, fr. *ious*, *iūs*, a further fm. fr. **iouos*, **ieuos*.

Note 2.—The pronunciation of *c* bef. *i* became, as in other langg., that of palat. *k̄* (perh. like Germ. *k* in *kind*): the preference for *c* before *i*, where another vowel follows, was the stronger, because in these cases *i* was nearly the same as *y*, so that the combinations *cio*, *ciu*, etc., were not only sounded like *kio*, *kIU*, but tolerably early (precisely as in other langg. also) were pronounced *tyo*, *tyu* (Ital. *cio*, *ciu*), whence arose the common fluctuation in writing about the end of the second or the beginning of the third century A.D. (Corss. Krit. Nachtr. p. 48). The change of *i*, *y*, after *t*, into *s*, *š* (*tyo* = *tšo*), does not occur till the Romance period.

Note 3.—In the pronoml. stems, *hi-*, *ho-* (*hi-nc*, *ho-nc*), notwithstanding the regularly corresponding Sk. **ghi-*, *gha-* (in *hi*, then, *ha*, *gha*, important particles), ought not prob. to be separated from Goth. *hi-*, *hva-*, Slav. *š-*, *kŭ-*, Lith. *sz-*, *ka-*, i.e. origl. *ki-*, *ka-*, on account of the perfect similarity of their functions; further, in √*hab* in *hab-eo*, *hab-ēs* = Goth. *hab-a*, *hab-ais* (I have, thou hast), cf. Osk. *hip-ust* (habuerit), *haf-iest* (habebit),

§ 71. whose initial conson. is, as in Goth., *k* (Goth. \sqrt{hab} also corresponds to Lat. \sqrt{cap} in *cap-io*); Lat. *h* seems to be origl. *k*, a permutation which is found sporadically in Sk. *hrd-*, *hrd-aya-* (heart)=origl. *kard-* (cf. Lat. *cord-*, Gk. *καρδ-ία*, Goth. *hairt-ō*) [the antiquity of this *h* in Aryan is shown by Zend *seredhaēm* =Sk. *hrdayam*]. With Bopp, therefore, I now hold the Lat. pron. stems *hi-*, *ho-*, to be parallel-fms. to origl. *ki-*, *ka-*, regularly represented in Lat. by *qui-*, *ci-*, *quo-*, *cu-* (*qui-s*, *ci-tra*, *quo-d*, *cu-ius*, used as interrog. and relat.), and so, too, \sqrt{hab} in *hab-ēre*, as a parallel-fm. to *cap* in *cap-ere*, for Goth. *b* can be=origl. *p*, and *b* may possibly arise in Lat. through softening from *p* (*bibo*, drink,=origl. *papāmi*). The correspondence of Lat. *h* to Goth. *h* remains none the less remarkable, but esp. the conformity of the two langg. as regards *habēre*, whose perfect identity, nevertheless, no one denies. But we must not suppose words were borrowed in either case. Other views are found in Corss. Krit. Nachtr., p. 89 sqq.; Comp., 1st ed., p. 715.

Note 4.—Accordingly *p* is not in Lat.=origl. *k* (but cf. Osk. and Umbr.); words in which *p* seems=origl. *k* are therefore borrowed. Thus *Petronius*, *Epona*, are Keltic, cf. Lat. *quatuor*, *equos*; *popina* is Osk., cf. Lat. *coquina*, *coquere*; *palumbes*, bes. Lat. *columba*, must prob. be derived fr. Osk., and *limpidus*, too, bes. *liquidus*, must be a dialectic, and not originally a Roman by-form, in which case both words, as is often maintained, were identical; if *lupus* is really=Gk. *λύκος*, it must therefore also be attributed to Osk., Sab., or Umb., but beyond doubt it belongs to Zend; *u-rup-i-s*, *raop-i-s* (name of wild beasts of the breed of dogs), \sqrt{rup} , *lup* (rend, cf. Spiegel, Zeitschr. xiii. 366); *sap-io* (taste of), *sap-iens* (wise), does not belong to *sucus*, Gk. *ὀπός* (*sap*), but to O.H.G. \sqrt{sab} (understand, pf. *int-suab*; Mid. H. G. pres. *ent-sebe*, pf. *ent-suop*), Gk. *σοφ-ός* (wise), *σαφ-ής* (intelligible, clear), with unorigl. asp. (v. supr. § 62, 3, n. 2); *saep-io* (hedge in), *prae-saep-e* (crib, stall), does not agree with Gk. *σηκό-ς* even in root-vowel (Lat. *ae*=*ai*, Gk. *η*=*ā*); *trepit* (vertit; Paul. Ep., 367; Curt. Gr. Et.² 411) seems to be borrowed from Gk. *τρέπει*.

2. Origl. *t*=Lat. *t*; e.g. in *tu* (thou), origl. *tu*, cf. Gk. *τύ*, *σύ*; \sqrt{to} in *is-tu-d* (dem.), origl. *ta*, *ta-t*, cf. Gk. *τό*; \sqrt{ten} in *ten-tus* (held, stretched), *ten-or* (holding, length), *ten-eo* (hold), *ten-do* (stretch), origl. *tan*, cf. Gk. *τα*, *τεν*; st. *tri-* (three) in *trēs*, *trīs*, *treis*, origl. *tri-*, cf. Gk. *τρι-* in *τρεις*; \sqrt{sta} (stand) in *sta-tus*,

§ 72. Momentary sonant unasp. consonants.

1. Origl. *g*=Lat. *g*, *gv* (*gu*), *v*.

Lat. *g*=origl. *g*, e.g. √*gen* in *gi-g(e)n-o* (beget), *gen-us* (race), *gna* in *gnā-tus* (one born, son), origl. *gan*, cf. Gk. *γεν*; √*gno* in *gnō-sco* (learn), *gnō-tus* (known), origl. *gna*, transposed fr. *gan*, cf. Gk. *γνο* in *γι-γνώ-σκω*; *genu* (knee), cf. Gk. *γόνυ*, Sk. *gānu*, Goth. *kniū*; √*ag* in *ago* (drive), origl. *ag*, pres. *ag-āmi*, Gk. *ἄγ* in *ἄγ-ω*; √*iug* in *iugum* (yoke), *iung-o* (join), Sk. *yuḡ*, *yug*, origl. *yug*, cf. Gk. *ζυγ*, etc.

Lat. *gv* (*gu*)=origl. *g*. As origl. *k* developed into *qu* (*kv*), so also *g* (=origl. *g* and *gh*, cf. § 73, 1) into *gv*: this *gv* is, however, retained only after *n*; it also occurs after *r*, bes. *g*, in *urgueo* bes. *urgeo* (urge), √*urg*, origl. *varg*, cf. Sk. *varḡ* (shut out), Lith. *vèrż-ti* (urge). Between vowels this *g* has become assimilated to the *v* (without lengthening of a previous short syll.), so that the *v* alone therefore remains. In this way it happens that Lat. *v* betw. vowels may be origl. *g* and *gh*, e.g. √*uig* for **guig*, cf. Germ. *quick* in *uixi* (pf.)=**uig-si*, *uic-tus* (diet)=**uig-tus*, but *uīu-os* (alive), *uīu-o* (live) for **uigu-os*, **uigu-o*. For further exx. of this interchange of sound *v*. sub 'gh' (v. Corss. Krit. Beitr., p. 68, on interchange of *g* and *gv* in Lat.).

Note 1.—*fluxi*, *fluc-tus*, *con-flūg-es* (confluence), bes. *fluo*, i.e. **flou-o* (flow), show indeed a further fmn. of √*flu* to *flug*, as Gk. *φλυ* to *φλυγ* (§ 71, 3 n.); we see, however, no ground for the assumption that *fluo*, **flou-o*, together with *fluu-ius* (river), have passed through fms. **flogu-o*, **flugu-ium* (Corss. Ausspr. etc., i.¹ 44). In this case the root-fm. is preserved without *g*.

Note 2.—Cf. exx. cited under *gh*, § 73, 1, and sound-laws, § 77, 1. a.

Note 3.—In *bos*, *bouis* (ox)=Gk. *βοῦς*, *βοφός*=Sk. *gāus* (gen. *gōs* prob. represents origl. *gav-as*), cf. O.H.G. *chuō*, *b*=origl. *g*, a correspondence of conson. otherwise foreign to Lat.; accordingly the word is probably borrowed. G. Curt. Gr. Et.² nos. 639, 642, brings forward *super-bus*, *super-bia* (proud, pride), which he takes to stand for **super-bios*, as=Gk. *ὑπέρ-βιος* (overween-

ing), *-βλα* (presumption), *-βιος* however=Sk. *gi*, pres. *gáy-āmi* § 72. (triumph), f.f. *gi*; *bo-ere*, *bou-are* (cry, sound), *re-bo-are* (re-sound), with Gk. *βο-ή* (call, cry) fr. Sk. \sqrt{gu} (let sound), Old Bulg. *gov-orŭ* (noise); *super-bus* is, however, not precisely similar to *ὑπέρ-βιος*, a word compounded according to Gk. principles (for we should then be obliged to consider it borrowed), but rather a special Lat. fmn. like *acer-bus*, *mor-bus* (Corss. Krit. Beitr. 61), and *boare* with *βοή* need not by any means be referred to Sk. *gu*, O. Bulg. *gov-orŭ*. It seems to me to be a mere imitative sound.

Note 4.—*c* and *g* were not distinguished in earlier Lat. writing, but prob. in the spoken lang. only.

Note 5.—Bef. *n* we are now accustomed in pronunciation to change Lat. *g* to gutt. *ñ*, i.e. the *g* becomes assimild. to *n*, according to its scale, becoming nasal: instead of *mag-nus*, *dig-nus*, etc., we say *mañ-nus*, *diñ-nus*. This is the same interchange of sound which is seen quite early in the lang., e.g. in *Sam-nium* for **Sab-nium*, *som-nus* for **sop-nus*. Spellings such as *signum* make it probable that even as early as the times of the later Cæsars, people had begun to pronounce *signum* as *siñnum*. Yet we cannot consider this pronuncn. of *gn* as *ñn* to be ancient, because the Roman grammarians do not mention it. From this later pronunciation of *gn* we must distinguish the principle on which *gn* was treated in Romance langg., where it became a palatal *ñ*, e.g. Ital. *magno*, *degno* (pron. *maño*, *deño*), Fr. *magne*, *digne* (pr. *mañ*, *diñ*). Therefore the above-named pronunciation of Lat. *gn* cannot have arisen through Romance influence.

2. Origl. *d*=Lat. *d*, rarely *l*.

Lat. *d*=origl. *d*, e.g. \sqrt{da} in *dă-tus* (given), Sk. and origl. \sqrt{da} , cf. Gk. *δο*; \sqrt{dom} in *dom-are* (tame), Sk. and origl. \sqrt{dam} , cf. Gk. *δαμ-άω*; *dom-us* (house), Sk. and origl. *dam-as*, cf. Gk. *δόμ-ος*; *dent-em* (tooth, acc.), Sk. and origl. *dánt-am*, cf. Gk. *ὀ-δόντ-α*; \sqrt{uid} in *uid-ere* (see), Sk. and origl. *vid*, Gk. *ἴδ*; \sqrt{ed} in *ed-o* (eat), Sk. and origl. *ad*, cf. Gk. *ἐδ*; \sqrt{sed} in *sed-eo* (sit), Sk. and origl. *sad*, cf. Gk. *ἐδ*, etc.

Lat. *l*=origl. *d* in *initio*, and, more rarely, medially bef. vowels, e.g. *lacrima* (tear) fr. *dacrima* (Festus), cf. *δάκρυ*, Goth. *tagr*, O.H.G. *zahar*; *lëuir* (father-in-law), cf. *δᾱήρ-*, st. *δᾱερ-*, for **δαιερ-*, **δαιφερ-* (Ebel, Zeitschr. vii. 272), Sk. st. *dëvár-*, n. sing.

§ 72. *dēvā*, also *a-st. dēvará-s*, O.H.G. *zeihhur*, Lith. *dēveri-s* (known to me through the Dictionary only), O. Bulg. *dēveri*; *lingua* (tongue), earlier *dingua*, cf. Goth. *tuggē*, Germ. *tunge*; *ol-ere* (smell) bes. *od-or* (scent), cf. ὄδ-ωδ-α, ὄδ-μή, ὄσμῆ. Sometimes both the *d-* and *l-*forms remained extant; thus *im-pel-imentum* bes. *im-ped-imentum* (hindrance), fr. st. *ped-* (pes, foot); *de-lic-are* bes. *de-dic-are* (dedicate), √*dic* (*dīc-o*, δείκ-νυμι, etc.), etc.

3. Lat. *b* may be origl. *b* (v. § 46, 3), e.g. in *bal-are* (bleat), cf. Gk. βλη-χή (a bleating), βλη-χάομαι, Slav. *blě-ja*, O.H.G. *blā-zan* (bleat), an onomatopoëtic word; *brevis* (short), corresponding to Gk. βραχύς, Slav. *brüzü* (quick); √*lab* in *lāb-itur* (glides, sinks), *lap-sus* = **lab-tus* (past part.), Sk. √*lab*, *lamb* in *lāmb-atē* (he sinks, falls).

§ 73. Momentary sonant aspirated consonants.

Note 1.—*f* may represent any of the aspp., and is placed mainly in *initio*; medially *b* occurs instead of *f*; yet *rūfu-s* (red), *scrofa* (sow), *Afer* (African), *sifilus* and *sifilare* (Fr. *siffler*, Zeitschr. xvi. 382) bes. usual *sibilus* (whistling, piping), *sibilare* (to whistle, pipe), etc., with medial *f* betw. vowels, according to the principles of the other Italian langg., whose influence perh. made itself felt in these words (Corss. Krit. Nachtr. p. 194, sqq.). In *signi-fer*, *pesti-fer*, and the like, *f* evidently arises from the perceptible connexion with *ferre*, whilst in *ama-bam*, etc., fr. √*fu* (*fui*, etc.), origl. *bhu* was no longer felt.

Note 2.—*ch*, *th*, *ph*, are not Latin but Gk. sounds, which did not come into use till a comparatively late period, and are yet unknown in the earlier lang. Further details as regards the history of these ways of spelling belong to the special gr. of Lat.

1. Origl. *gh* = Lat. *g*, *gv* (*gu*), *v*, *h*, *f*.

Lat. *g* = origl. *gh*, e.g. √*ger*, *gra*, in *ger-men* (bud), = Lith. *žel-mū*, st. *žel-men-* (sprout), *grā-men* (grass), origly. a side-form of *ger-men*, cf. O.H.G. *gruo-ni* (green), *gra-s* (grass), Sk. *hār-it-*, *har-ita-* (green), Zend *zairita-* (yellowish-green), Gk. χλο-ή (green, grass), O. Bulg. *zel-enū* (green), Lith. *žél-ti* (grow green,

*Fair usage policy applies

§ 73. since the corresponding Goth. fms. *mik-ils*, *ik*, show the unasp. conson.

Lat. *h*=origl. *gh*, esp. in *initio*, very rarely in *medio*, e.g. *hiem-ps* (winter), cf. Gk. *χιών* (snow), *χειμα* (storm), *χειμών* (winter), Sk. *himá-s* (snow, cold), Slav. *zima* (winter, cold), Lith. *žėmà* (winter); *homo* (man), earlier *hemo*, st. *homen-*, *hemen-*, cf. Goth. *guma* (man), st. *guman-*, Lith. *žmũ*, st. *žmen-* (mankind), which collectively point to a f.f. *ghaman-*; *holus*, *helus*, *heluola* (greens), √*ghar* (be green), cf. *χλο-ή*, Sk. *hár-ita* (v. sub *g=gh*); *haed-us* (he-goat, Cod. Medic. Vergili), cf. Goth. *gaitis* (f. she-goat), O.H.G. *geiz*, the initial conson. of this word was therefore *gh*; √*veh*, pres. *ueh-o* (carry, draw), √*vagh*, pres. *vagh-āmi*, Sk. *vah*, pres. *váh-āmi*, Zend *vaz*, pres. *vaz-āmi*, Gk. *Φεχ* in *Φόχ-os* (waggon), Goth. *vag* in (*ga-*)*vig-a* (move), *vig-s* (way), Slav. *vez*, pres. *vez-a*, Lith. *vez*, pres. *vez-ù*.

The *h* easily comes to be entirely lost, e.g. in *anser* (goose) for **hanser*, cf. Sk. *hāsá-s*, O.H.G. *gans*, st. *gansi-*, Slav. *gāš*, Lith. *žasì-s*; *olus* for earlier *holus* (v. supr.); *uia* (way) fr. **ueh-ia*, **ueia*, **uīa*, √*ueh*, cf. the completely analogous Lith. *vėžė* (track), i.e. **vėžya*, f.f. of Lith. and Lat. word, thus *vagh-yā*; *nēmo* (no man), fr. **ne-hemo*, etc.

Note.—*h* is often found where it should not be, by false analogy, e.g. *humerus* for *umerus*, which is warranted by MSS., cf. Gk. *ὤμο-ς*, Sk. *āsa-s* and *āsa-m*, Goth. *amsa*, st. *amsan-*; in later times *h* was noticeably often placed bef. initial vowel: *h* must therefore have fallen out of use in many cases tolerably early.

Lat. *f*=origl. *gh*, e.g. *fel* (gall), st. *felli-*, clearly fr. **felti-*, cf. Gk. *χολ-ή*, *χόλ-os*, O.H.G. *galla*, Slav. *žlŭčŭ*, √*ghar* (be green); *for-mu-s*, *for-midus* (hot), cf. Sk. *ghar-má-s* (heat), Scl. *grě-ti* (to warm), *gor-ěti* (burn), Germ. *warm* for **gwarm* fr. **gar-m*, all of which point to a √*ghar* (on Gk. *θερ-μός*, *θέρ-ομαι*, v. supr. § 64, 2. n.); *fra-gra-t* (*fragrare*, emit odour), provided it really comes from a redupln. of √*ghra*, cf. Sk. *gi-ghrā-ti*, *ghrā-ti* (stinks,

Benf. Or. u. Occ. iii. 69); *fu-tis* (tub), *fū-tilis* (unstable, cf. Curt. § 73. Gr. Et.² no. 203, p. 156), $\sqrt{fu-d}$, *fundo* (pour), cf. Gk. $\sqrt{\chi\nu}$ in $\chi\acute{\epsilon}F-\omega$, Teut. *gu-t*, in Goth. *giut-an* (pour).

Since *f* and *h* correspond to origl. *gh*, and *h* easily disappears altogether, we can explain such forms as *faedus*, *fēdus*, bes. *haedus*, *aedus*, *ēdus* (cf. *geiz*); *folus* bes. *holus* and *olus* (\sqrt{ghar}); *fostis* bes. *hostis* (foe; Goth. *gasts*, *guest*, points distinctly to the origl. initial *gh*; in both langg. the meaning has been developed in divergent lines, cf. Corss. Krit. Beitr. 217 sqq.); *fordeum* bes. *hordeum*, prob. for **horteum*, **horsteum*, cf. O.H.G. *gersta*, Gk. *κρῖθή* for **χρῖστη* (§ 68, 1, d; on this word cf. Corss. Krit. Nachtr., p. 104 sqq.); *festūca* (stalk, switch) bes. *hasta* (spear), cf. Goth. *gazds* (thorn), O.H.G. *gart* (thorn), **gartya* (*gardea*, *kertia*, *gerta*), initial origl. *gh* therefore; and the like. Cf. the change fr. *gh* to *f* in cases such as Engl. *enough* (pron. *inūf*), A.S. *genōh* (genug); *laugh* (pr. *lāf*), A.S. *hleahhan*, Goth. *hlahyan* (laugh), etc.

Note 1.—No ex. of *b*=origl. *gh* seems to be found.

Note 2.—The origl. \sqrt{ghar} (be green) is found also in fms. *ger* (germen), *gra* (grāmen), *hel* (helus), *hol* (holus), *ol* (olus), *fol* (folus), and *fel* (fel). In the other langg. also the feeling of relationship of the different words which spring from this root has been lost.

2. Origl. *dh*=Lat. *d*, *f*, *b*.

Lat. *d*=origl. *dh*, e.g. *mediu-s* (middle-)=origl. and Sk. *mādhyā-s*, Gk. *μέσσοσ*, i.e. **μεθογο-σ*, Goth. *midji-s*; *aed-es* (house, origly. fire-place, cf. *aes-tus*, *aes-tas*, fr. **aed-tus*, **aed-tas*), \sqrt{idh} , origl. Gk. *αἶθ-ω*, Sk. *indh*, cf. O.H.G. *eit* (fire); *vidua* (widow), cf. Sk. *vidhavā*, Goth. *vidurō*.

Hence it arises that the origl. roots *da*, *dha* (give, set), may become intermixed, e.g. *ab-do* (do away, hide), *con-do* (found), *crē-do* (believe), belong not to *da-re* (give), but to a root lost in its uncompounded fm., corresponding to Gk. *τί-θη-μι*, Sk. *dá-dhā-mi*, O.H.G. *tuo-m*, cf. Sk. *grad-dadh-āmi* (believe); of the coin-

§ 73. cidence of the origl. *da*, *dha* (as in Zend), we find proof in *uen-di-t* (sells) bes. *uēnum dat* = Sk. and origl. *vasnam dadhāti*, ὄνον τίθησι, *dat* therefore stands here most likely as representative of *dha*, Gk. *θε*, not of *do*, Gk. *δο*; further, *do* which has become like a *sf.*, e.g. in *albi-du-s*, *ari-du-s*, *sordi-du-s*, is prob. to be referred to this root, as the similar roots also in Lat. are elsewh. still practically used as suffixes (e.g. *laua-cru-m*, *ludi-cru-s*, *ala-cri-s*, *uolu-cri-s*, cf. $\sqrt{\textit{kar}}$ (make); *late-bra*, *fune-bri-s*, cf. $\sqrt{\textit{bhar}}$, *ferre*, etc.). In un-compounded words $\sqrt{\textit{dha}}$ is in Lat. *fa*, *fe*; v. post.

Note.—*r* for *d* fr. *dh* is altogether sporadic, in *meri-dies* (mid-day) fr. **medi-dies* (*medius*=*mádhyas*, cf. *μεσ-ημβρα*, Germ. *mit-tag*, Sk. *madhyāhna-s* fr. *madhya-*, *medius*, and *ahan-*, day); in the case of *ar*=*ad* (*ar-uorsus*, etc.), the comparison with words of the kindred langg. is not easy (cf. regular change of *d* to *r* in Umbrian).

Lat. *f*=origl. *dh*, e.g. *fūmus* (smoke), cf. Sk. *dhūmās*, Lith. *dūmai* (pl. n. sing. would be *dūma-s*), Slav. *dymŭ*, O.H.G. *toum*, Gk. *θύ-ος* (burnt sacrifice), $\sqrt{\textit{dhu}}$; *fores* (pl. door), *foris* (passage), *foras* (outwards), cf. Gk. *θύρα*, Goth. *daúr*, O.H.G. *tor*, *turi*, Scl. *dverŭ*, Lith. *durŭs*, Sk., however, *dvāra-m*, *dvār-*, Ved. *dur-* with *d*, not *dh*, to which the S.- and N.-European langg. point; *fer-us*, *fer-a*, *fer-ox* (wild), cf. Gk. *θήρ*, *θηρ-ίον*; *fir-mus* (fast), *frē-tus* (trusting to), *frē-num* (bridle), *for-ma* (shape), cf. Sk. *dhar-imán-* (id.), $\sqrt{\textit{dhar}}$ (hold); *fīo*=**feio* (become), f.f. *dhayāmi*, $\sqrt{\textit{dha}}$ (set, do), Gk. *θε*, Goth. *da*, from which also the secondary $\sqrt{\textit{fac}}$ is formed (*fac-io*, make), likewise *fä-ber* (wright), st. *fa-bro-*, cf. Sk. *dhā-tar-* (founder, ordainer; Kuhn, Zeitsch. xiv. 229 sqq.).

In *rūfus* (red)=Goth. *raud-s*, f.f. *rāudha-s*, $\sqrt{\textit{rudh}}$, medial *f* stands also for origl. *dh*, whilst *rub-er* (red), *rub-igo* (rust), are regular, and show *b* for *f* (v. supr. n. 1), but collateral *raud-us* (clod), origl. $\sqrt{\textit{rudh}}$, cf. Sk. *rudh-irā-m* (blood), Gk. *ἐ-ρυθ-ρός*, and hence we find this root in Lat. as *rud*, *ruf*, *rub* (for *rutilus*, v. 1

*Fair usage policy applies

§ 73. cf. *ti-bi*, Sk. *tú-bhyam*; in both langg. the initial *m* seems to have had a dissimilating influence on the *bh*. We must not hence venture to assign a fm. *ma-hyam* to the origl. langg., for the origl. could only be sounded *ma-bhyam* (or *ma-bhiam*, *ma-bhiyam*, cf. § 3), a f.f. which diverged later into Sk. *má-hyam*, Lat. *mi-hei*; in dat. pl. of *a-st.*, in *-is* fr. *-ois*, *-ais*, origl. *-a-bhyams*, *-ā-bhyams* (v. 'decl.'). origl. *bh* has entirely disappeared, perh. through intervening *h* (cf. *mihi*); so too prob. *ama-ui* for **ama-fui*, \sqrt{fu} , origl. *bhu* (be).

Note.—In some exx. a Lat. tenuis stands apparently for an asp.; these are *rutilus* (fiery red) bes. Sk. \sqrt{rudh} , Gk. $\rho\upsilon\theta$; *pati* (suffer) bes. Gk. $\pi\alpha\theta\epsilon\acute{\iota}\nu$; *pūtēre* (stink) bes. Gk. $\pi\acute{\upsilon}\theta\text{-}\epsilon\sigma\theta\alpha\iota$; *putāre* (calculate) bes. Gk. $\pi\upsilon\theta\acute{\epsilon}\sigma\theta\alpha\iota$ (learn), otherwise distinct from it in use; *sapiens* (wise) bes. Gk. $\sigma\phi\acute{\omicron}\varsigma$; *latēre* (escape notice) bes. Gk. $\lambda\alpha\theta\epsilon\acute{\iota}\nu$, Sk. \sqrt{rah} for origl. *radh*. Cf. L. Meyer, Gr. of Gk. and Lat. Langg., i. p. 51; G. Curt. Gr. Et.² p. 374, Kuhn's Zeitschr. ii. 355; Grassmann ap. Kuhn, id. xii. 86 sqq.; Corss. Krit. Beitr. p. 75 sqq., 79 sqq. Herein we concur in the conclusions of Curt. and Corss., which amount to this,—that in the above-named words also *t* and *p* are not=origl. *dh*, *bh*, Gk. θ , ϕ . *ru-tilus* (cf. *fu-tilis*, *mu-tilus*) seems to have sf. *-tilo*, and to stand peculiarly for **rud-tilus*, **rus-tilus* (v. post.), like early Lat. *ad-gre-tus*, *e-gre-tus*, for **-gred-tus*, **-gres-tus* (class. *gressus*, \sqrt{grad} , *gred*, in *grad-ior*, step), *pa-tior* however is a later fm. fr. \sqrt{pa} , which is otherwise formed in Gk. $\pi\alpha\text{-}\theta$, $\pi\epsilon\upsilon\text{-}\theta$ ($\pi\acute{\epsilon}\upsilon\theta\omicron\varsigma$, suffering, grief); to the origl. existence of the shorter root-fm. *pa*, $\pi\alpha$, the fms. $\pi\acute{\epsilon}\upsilon\text{-}\omicron\mu\alpha\iota$ (am in want), $\pi\omicron\upsilon\text{-}\acute{\epsilon}\omega$ (suffer, labour), point; therefore $\pi\epsilon\upsilon$, $\pi\omicron\upsilon$, give evidence to $\pi\alpha$, just as $\gamma\epsilon\upsilon$, $\gamma\omicron\upsilon$ (beget), do to a real pre-existent $\gamma\alpha$ (*n* is a common secondary root-termn.). The same explan. holds good in *puteo*, where *t* belongs to the origl. root as little as does θ in $\pi\acute{\upsilon}\text{-}\theta\omicron\mu\alpha\iota$; the root is *pu*, which clearly occurs in Lat. *pūs*, gen. *pūris* (matter), i.e. **pou-os*, **pou-es-os*, f.f. *pav-as*, *pav-as-as*, cf. $\pi\acute{\upsilon}\text{-}\omicron\upsilon$ (id.), Sk. $\pi\acute{\upsilon}\text{-}\gamma\alpha\text{-}\acute{\epsilon}$ (becomes foul, stinks), $\pi\acute{\upsilon}\text{-}\gamma\alpha\text{-}\varsigma$ (matter), Lith. $\pi\acute{\upsilon}\text{-}\acute{\iota}$ (be-foul), O.H.G. *fū-l* (foul), f.f. *pau-ra-s*. *Pu-tare* fr. *putus* (pure), lit. = 'make clean, clear,' and has therefore nothing to do with Gk. $\pi\upsilon\theta\acute{\epsilon}\sigma\theta\alpha\iota$, Sk. \sqrt{budh} , etc.; $\sigma\phi\acute{\omicron}\varsigma$ stands for **σσοπος* with unorigl. aspn., cf. supr. § 62, 3, n. 2. Thus *latēre* alone remains unexplained bes. $\lambda\alpha\theta\epsilon\acute{\iota}\nu$, a solitary instance, for which we must not try to make good a consonantal change which is otherwise unknown.

CONSONANTAL PROLONGED-SOUNDS.

Spirants *y, s, v.*

§ 74.

1. Origl. *y* = Latin *j* (written *i*), *i*.

Lat. *j* = origl. *y*, initial and medial, yet not commonly between vowels, and almost only after long vowels, e.g. *cū-ius*, *plebē-ius*, or when a conson. has assimilated itself to the *y*, as in *āio*, *māior*, *mēio* (v. post.), e.g. √*iug*, Sk. *yuḡ*, Gk. ζυγ, origl. *yug*, in *iu-n-go*, (join), *iug-um* (yoke) = origl. and Sk. *yug-ám*, Gk. ζυγ-όν, Goth. *yuk*, O. Bulg. *igo* = **jüg-o*; pronl. √*ya* in *ia-m* (already), cf. Lith. *yaú*, Goth. *yu* (already); *ius* (broth), cf. Sk. *yūša-s*, *yūša-m* ('pease-soup,' 'the water in which pulse of various kinds has been boiled;' Wilson), Scl. *iucha*; *iuuenis* (young man), cf. Sk. *yúvan-*, Goth. *yuggs*, Scl. *yunü*, Lith. *yaúnas* (young); *āio* (say) for **ag-io*, pres. fmn. in sf. origl. *ya*, √*ag*, origl. √*agh*, cf. *ad-āg-ium* (saying), Sk. *ah* (say); *māior* (greater) fr. **mag-ior*, comp. sf. *-ior*, earlier *-ios*, Gk. *-iov*, Sk. *-yās*, *-īyās*, origl. *-yans*; *mēio* = **migio*, i.e. **migh-yāmi*, pres. fmn. in origl. *ya*, etc.

Lat. *i* = origl. *y* after consonn., e.g. *med-ius* = origl. and Sk. *mādhyas*, cf. μέσσοσ = **μεθ-yos*; *patr-iu-s* (father-), origl. *patar-ya-s*, cf. πάτρ-ιο-σ, Sk. *pitr-ya-s*, st. origl. *patar-*, sf. *ya*; *siem*, *siet* (1, 3, sg. opt. pres.), origl. *as-yā-m*, *as-yā-t*, cf. εἶην, εἶη, fr. **έσ-yη-μ*, **έσ-yη-τ*, Sk. *syā-m*, *syā-t*, opt. pres. √*as* (be); *capio* for **cap-yō*, i.e. **kap-yā-mi*, pres. in origl. *ya*, etc.

Not uncommonly *y* disappears entirely, thus regularly betw. vowels, as, e.g. *moneo* (remind, warn), f.f. *mānayāmi*, causative from √*men* (*men-tem*, *me-min-i*), origl. *man* (think); *sēdo* (seat, set), fr. **sēdao*, **sēdayo*, Sk. and origl. *sādáyāmi*, caus. from √*sed* (*sedere*), origl. *sad*; further before *i* and *e* which stands for *i* (§ 35, § 38), e.g. *capis*, *capit*, for **capyis*, **capyit*, i.e. *kap-ya-si*, *kap-ya-ti*, bes. *capio*, i.e. *kap-yā-mi*; *obex* (obstacle, hindrance), gen. *obicis*, for **obyex* = **ob-yic-s*, *ob-yic-is*, √*iac* (cf. *iac-io*, *ob-iic-io*, *ob-ic-io*); yet elsewh.

§ 74. after consonn. also, e.g. *minor*, *minus* (less), for **min-ior*, **min-ius*, origl. sf. *-yans*, compar.-fmn.; *ero*, *eris*, *erit*, fr. **eso*, **esis*, **esit*, for **esyō*, **esyis*, **esyit*, f.f. *as-yā-mi*, *as-ya-si*, *as-ya-ti*, pres.-fmn. through *ya* of √*as*, which expresses fut. meaning, cf. Sk. *s-yā-mi*, *s-yā-si*, *s-yā-ti*, Gk. ἔσομαι for *ἐσ-yo-μαι; *-bus* sf. of dat. and abl. pl. origl. *-bhyams*, Sk. *-bhyas*, etc.

2. Origl. *s*=Lat. *s*, *r*.

Lat. *s*=origl. *s*. Initially, generally also finally, medially betw. mute consonn.; betw. vowels *s* passes over into *r* almost always in the class. lang. Before sonant consonn. *s* partly falls out (becomes assimld.), partly likewise becomes *r* (v. 'sound-laws'), e.g. √*sed* (*sed-ere*), origl. and Sk. *sad*, Gk. ἔδ, Goth. *sat* (*sit*); *septem* (*seven*), Sk. and origl. *sáptan*, Gk. ἑπτὰ; √*sta* (*stand*), e.g. in *sta-tus*, origl. *sta*, Gk. στα, Sk. *stha*; √*ster* in *ster-no* (*strew*), Sk. and origl. *star*, Gk. σtop; √*es* in *es-t*, origl. and Sk. *as*, Gk. ἐσ in ἐσ-τί; √*us* (*burn*) in *ur-o*, *us-tus*, origl. *us*, Sk. *uš*; *-s*, sf. of nom. sg., origl. and Sk. *-s*, Gk. *-s*, Goth. Lith. *-s*, e.g. *equo-s*, origl. *akva-s*, Gk. ἵππο-ς, Sk. *áçva-s*; sf. *-os*, *-es*, e.g. *gen-os*, *gen-us* (*race*), gen. *gen-er-us*, *gen-er-is*, origl. *gan-as*, *gan-as-as*, cf. Gk. γέν-ος, *γεν-εσ-ος=γένους, Sk. *gán-as*, *gán-as-as*, etc.

Lat. *r*=origl. *s* (cf. sound-laws, § 77, 1. f.).

3. Origl. *v*=Lat. *v* (in writing undistinguished fr. *u*), *u*.

Lat. *v*=origl. *v*, e.g. √*vid* in *video* (*see*), Sk. and origl. *vid*, Gk. *Fιδ*; √*vom* for **vem* in *uom-o* (*spue*), Sk. and origl. *vam*, Gk. *Fεμ*; √*voc* for **vec* in *uoc-are* (*cry*), *uōc-em* (*acc. voice*), origl. *vak*, Sk. *vak*, Gk. *Fεπ*; √*veh* in *ueh-o* (*carry*), origl. *vagh*, Sk. *vah*, Gk. *Fεχ*, Goth. *vag*; √*vol* in *uol-t* (*he wills*), Sk. and origl. *var* (*uelle*); *oui-s* (*sheep*), origl. *avi-s*, Lith. *avi-s*, Sk. *ári-s*, Gk. ὄFις; *nouo-s* (*new*), orig. and Sk. *náva-s*, Gk. *véFo-s*, etc.

Note.—Though *quis*, *quod*, *anguis*, *suavis* are the usual ways of writing those words, yet here, too, *u*=*v* (thus *qvis*, *qvod*, *angvis*, *svavis*), because this *u* is not metrically=vowel.

*Fair usage policy applies

§ 74. *nōlo* = **neuolo*; *amarunt* = *amauerunt*, etc. Yet *nouos*, *ouis*, etc., with *v* preserved, are the only fms. found.

Note.—On the alleged change of *v* to *b* in Lat. v. Corss. Krit. Beitr., 157 sqq. Only in *ferbui*, pf. fr. pres. *ferueo* (boil), *v* after *r* and bef. *u* has become *b*; *bubile* bes. *bouile* (ox-stall) seems caused by the analogy of *bu-bulus* (ox-); *opilio*, *upilio* (shepherd), stand for **oui-pilio*, cf. *Pal-es*, αἴ-πολ-ος, βού-πολ-ος (Corss. ib. 152; Krit. Nachtr., p. 180 sqq.).

§ 75. Nasals.

1. Origl. *n* = Lat. *n*. As in other Indo-Eur. langg., so also in Lat., origl. *n* bef. gutt. consonn. becomes gutt., bef. labb. it becomes lab., i.e. *m*, (*n̄* = gutt. *n*, § 4). Exx.: *ne* (negation), in *ne-c*, *ne-fas*, etc., Sk. and origl. *na*; *in-*, Umbr. *an-*, Gk. ἀν-, Sk. and origl. *an-* (neg. in composn.); √*nec* in *nec-are* (kill), *noc-ēre* (hurt), Gk. νεκ, Sk. नाच, origl. *nak*; st. *noc-ti* (night) in *noc-te-m*, origl. *nak-ti-*, cf. Lith. *nak-ti-s*, Gk. st. νυκτ-, Sk. *nákta-m* (adv. by night); *nāuis* (ship), Sk. and origl. *nāus*, Gk. ναῦς; √*gen* in *gen-us* (race), *gi-g(e)n-o* (beget), Gk. γεν, Sk. *ḡan*, origl. *gan*; *n* is common in suff., e.g. origl. *-na* in *plē-nu-s* (full), f.f. *prā-na-s*, origl. *par-na-s*, √*par* (fill), *na* fms. the perf. part. pass., but has also various other functions, e.g. *som-nu-s* (sleep) for **sop-nu-s*, origl. and Sk. *sváp-na-s*, Gk. ὕπ-νο-ς; sf. *-man*, e.g. in **gnō-men*, *nō-men* (name), Sk. *nā-man-*, origl. *gnā-man-*; *-nti*, *-nt*, fm. 3 pl. vb., e.g. **fero-nti*, *feru-nt*, = φέρο-ντι, Sk. and origl. *bhāra-nti*, etc.

Exx. of change of *n* to *n̄*, *m*, are found in pres. fmn., e.g. *iu-n-go* (join), √*iug*, *ru-m-po* (break), Sk. *lu-m-pāmi*, √*rup*, Sk. *lup*, which in f.f. were prob. *yug-nāmi*, *rup-nāmi*; only later did the nasal pass into the root, whereby arose *yuṅgāmi*, *rum-pāmi*, i.e. *iungo*, *rumpo*.

Note.—On *gn̄* v. supr. § 72, 1, n. 5.

2. Origl. *m* = Lat. *m*, e.g. √*men* in *me-min-i* (remember), *men-tem*, *mens* (mind), *moneo* (warn), Gk. μεν, origl. and Sk. *man* (think); *mā-ter* (mother), μή-τηρ, Sk. *mā-tá*, origl. *mā-tar-s*;

√*mor* in *mor-i* (die), *mor-tuos* (dead), Sk. and origl. *mar*; √*uom* § 75. for **uem* in *uom-o* (spue) (§ 33), Gk. *Φεμ*, Sk. and origl. *vam*, etc. In sff. also *m* often occurs, e.g. sf. *-men*, origl. *man*, as in **gnō-men*, *nō-men*, Sk. *nā-man-*, origl. *gnā-man*; origl. sf. *-ma*, an intensitive, most often forming superl., esp. in combination with sf. *-ta*, as *ta-ma*, Lat. e.g. in *pri-mu-s*, *optu-mu-s*; *-m* 1 pers. sg., *-mus* 1 pl., e.g. (*e*)*s-u-m* fr. **es-mi*, Gk. *εἰ-μί* fr. same f.f., Sk. and origl. *ás-mi*; *feri-mus*, Gk. *φέρο-μεν*, Dôr. *φέρο-μες*, Sk. and origl. *bhárā-masi*; *-m* of acc. sing., e.g. *equo-m*, Sk. *áçva-m*, cf. Gk. *ἵππο-ν*, with *ν* for *μ*, acc. to Gk. sound-laws of termn., origl. *akva-m*, etc.

Note.—In *tene-brae* (darkness), prob. for **tenes-brae*, **temes-brae*, √*tam* in Sk. *tám-as* (darkness), O.H.G. *dēm-ar* (dawn), etc., *n* has arisen by dissimiln. fr. *m*, to avoid the labialism **temebrae*; in *nōnus* (ninth) for **nōmus*, **nouimus*, cf. *nouem* (nine), *septimus* bes. *septem*, *decimus* bes. *decem*, *primus*, etc., the init. *n* has had an assimilating influence; *gener* (son-in-law) does not stand for **gemer* on acct. of *γαμβρός* (on which cf. § 66, 1, n. 1), because **gemer* would have stood its ground like *uōmer* (ploughshare), also Sk. *gā-mātar-* (son-in-law) proves nothing, because it is a compd. of *gā* (come after) from √*ga*, origl. *ga* (gi-gn-ere), and *mā-tar-* (bearing, bringing forth); *gen-er*, st. *gen-ero-* for *gen-ro-*, is derived rather fr. √*gen* (beget), sf. *ra*, in this case with auxil. vowel *i*, pronounced *e* bef. *r* (§ 38).

r- and *l-*sounds.

§ 76.

Origl. *r*=Lat. *r*, *l*.

Lat. *r*=origl. *r*, e.g. *rex* (king), i.e. **rēg-s*, origl. *rāg-s*, cf. Sk. st. *rāg-* (id.); √*rub* in *rub-er* (red), *rub-ru-m*, cf. *ἐ-ρυθ-ρός*, *ἐ-ρυθ-ρό-ν*, Sk. *rudh-i-rá-m*, origl. *rudh-ra-s*, *rudh-ra-m*; √*rup* in *ru-m-p-o* (break), *rup-tu-s*, cf. Sk. *lup* (rumpere) in *lu-m-p-āmi*, *lup-tá-s*, Lith. *lup* in *lùp-ti* (flay); √*or* in *or-ior* (rise), *or-tus*, cf. *ὄρ-υμι*, Sk. and origl. *ar*; √*ar* in *ar-o* (plough), cf. *ἀρ-όω*, Scl. *or-ya*, *ar-atrum* (plough), cf. *ἄρ-οτρον*, O. Bulg. *or-alo* for **or-adlo*; √*fer*, 1 sg. pres. *fer-o* (bear), Gk. *φέρ*, 1 sg. pres. *φέρ-ω*, Sk. and origl. *bhar*, 1 sg. pres. *bhár-āmi*; *frā-ter* (brother), *φρά-τωρ*, Sk. *bhrātā*, origl. *bhrā-tar-s*, etc. *r* is frequent in

§ 76. stem-formative particles, thus in sff. *ro*, *ru*, origl. *ra* (*rub-ru-m*, origl. *rudh-ra-m*); *tōr*, origl. *tār* (*da-tōr*, origl. *da-tar-s*, n. sg.); *tro*, *tru*, origl. *tra*; in word-formative particles, i.e. in case- and person-termns., it does not occur.

Lat. *l*=origl. *r* (cf. 'sound-laws,' upon Lat. interchange of *l* with *r* for purposes of dissimiln.), e.g. $\sqrt{\text{loc}}$ (speak) in *loqu-or*, *loc-utus*, Gk. $\lambda\alpha\kappa$, Scl. *rek* (*rek-a*, loquor), origl. *rak*; $\sqrt{\text{luc}}$ in *luc-erna* (lamp), *lūc-em* (acc. light), Gk. $\lambda\upsilon\kappa$, Sk. *ruk*, Goth. *luh*, origl. *ruk*; $\sqrt{\text{lic}}$ in *linquo* (leave), *re-lic-tus*, Gk. $\lambda\iota\pi$ ($\lambda\epsilon\acute{\iota}\pi\omega$), Sk. *rik*, origl. *rik*; $\sqrt{\text{lig}}$ in *lingo* (lick), Gk. $\lambda\iota\chi$ ($\lambda\epsilon\acute{\iota}\chi\omega$), Sk. *lih*, origl. *righ*; $\sqrt{\text{lub}}$ in *lub-et* (it pleases), Goth. *lub* (*liubs*, love), Sk. *lubh* (desire), origl. *rubh*; *leuis* (light) fr. **legu-is*, cf. Gk. $\epsilon\text{-}\lambda\alpha\chi\acute{\upsilon}\text{-s}$, Sk. *laghú-s*, origl. *raghu-s*; *plē-nu-s* (full), f.f. *prā-na-s*, parall. fm. to *par-na-s*, Zend *perenō*, Sk. *pūrṇá-s*, i.e. origl. *par-na-s*, Goth. *fulls* for **ful-na-s*; *sollus* (whole, Fest.) for **soluo-s*, parall. fm. to *sal-uo-s* (whole), Gk. $\text{*}\acute{\omicron}\lambda\text{F}\omicron\text{s}$, Sk. and f.f. *sár-va-s*; $\sqrt{\text{uol}}$, *uel*, in *uol-t* (he wills), f.f. *var-ti*, *uel-le* (will), for **uel-se* (v. post), Sk. and origl. *var* (choose), etc. In st.-formative particles also *l* is common.

§ 77. SKETCH OF SOME SOUND-LAWS WHICH ARE IMPORTANT FOR
COMPARATIVE GRAMMAR.

MEDIAL.

1. Assimilation. We omit here the assimilns. which occur in prepositional compds.; they bear a subordinate meaning for Compar. Gr., and belong to the Special Gr. of Latin. Further, except that they are treated as well known, they are not at all, or only briefly, mentioned.

a. Complete assimiln. of foregoing to following consonn. This occurs after long vowels, after which doubled consonn. cannot easily be made audible, and can scarcely be distinguished from evanescence (ejection) of the former conson.; whilst after short vowels the doubling of the conson. is the distinctive mark of real assimiln. As, however, the evaporation of one conson. bef. another can hardly be conceived of as con-

*Fair usage policy applies

§ 77. \sqrt{ag} , Sk. *ah*, origl. *agh* (say); *mē-io* by dissimiln. (cf. § 38) fr. **mi-yo* for **mīg-yo*, cf. *mi-n-g-o*, \sqrt{mig} , Gk. $\mu\iota\chi$, origl. *migh* (cf. § 74, 1). Bef. origl. sf. *-ya*, *g* remains, because here *y* changes into *i* (§ 74, 1), e.g. *ad-äg-iu-m*, *nau-fräg-iu-m*. Cf. the extensive loss of consonn. before *y* with compensatory lengthening in composition, e.g. *se(d)-iungo*, *pe(r)-iero*, *di(s)-iudico*, *tra(ns)-icio*, etc.

Loss of *g* bef. *v* without compensat. lengthening occurs, e.g. in *brēu-is* for **bregu-is*, cf. $\beta\rho\alpha\chi\acute{\upsilon}\text{-}\varsigma$; *lēu-is* for **lēgu-is*, cf. $\acute{\epsilon}\text{-}\lambda\alpha\chi\acute{\upsilon}\text{-}\varsigma$; *niu-is* for **nigu-is*, cf. *nix* = **nig-s*, *ningu-o*; accordingly the same process must be assumed in *uīuo* for **uīgu-o*, cf. *uixi*, i.e. **uig-si*, \sqrt{uig} (v. §§ 72, 1; 73, 1).

d disappears bef. *v* in *suāu-is* for **suād-uīs*, cf. Gk. $\eta\delta\acute{\upsilon}\text{-}\varsigma$, Sk. *svādú-s*.

Bef. nasals sometimes *g*, oftener *c*, disappears (*c* may also remain and become *g*, v. *c* in this section), more rarely without, more often with compensatory lengthening, *c* was evidently softened to *g* before it fell out (v. *c*), e.g. *stī-mulus* (goad), *stī-mulo* (I goad), \sqrt{stig} , raised a step to *stīg* (*in-stīg-o*, urge), nasalized in *in-stinc-tus* (urged) = **in-sting-tus*, cf. Gk. $\sigma\tau\acute{\iota}\chi\omega$ (prick) = **στυγ-γω*; *ex-ā-men* (swarm of bees, rank) for **ex-äg-men*, \sqrt{ag} in *a-gere* bes. *ag-men*, *teg-men*, *seg-mentum* (*g* is common bef. *n*, e.g. *lig-num*, *dig-nus*, *mag-nus*, etc.); *uā-nus* (empty) fr. **uāc-nus*, cf. *uāc-uos* (empty); *dē-ni* (ten apiece) fr. **dēc-ni*, cf. *dēc-em*; *pī-nus* fr. *pīc-nus*, cf. *pix*, *pīc-is* (pitch; *pīnus*, on acct. of the vowel, cannot be akin to $\pi\acute{\epsilon}\upsilon\kappa\text{-}\eta$, Germ. *vieh-te*, which point to a \sqrt{puk}); *nc* disappears thus in *quī-ni* (five apiece) for **quinc-ni*, cf. *quinque* (five).

Before *m*, *c* disappears in *lū(c)-men* (light), where it is doubtful whether the vowel is simple or whether it is raised in the scale, whether fr. **lūc-men* or **louc-*, **lūc-men*; *cs*, i.e. *x*, disappeared bef. *m* in *sē-mestris* (six-monthly) for **sex-mestris*, prob. also in *tē-mo* (pole) for **tex-mo*, cf. O.H.G. *dīhs-ila*, and Sk. $\sqrt{takś}$ (compose, make).

Bef. *m*, *b* disappears, e.g. *glūma* (shell) for **glūb-ma*, cf. *glūb-ere* (pare); *grēmium* (lap) for **greb-mium*, cf. Sk. *gārbha-* (masc. id.), etc. (Corss. Krit. N. p. 236).

Bef. *l*, *x* has died out in *tē-la* (web), which, however, can only § 77. be explained as prob. coming fr. **tex-la*, cf. *tex-ere* (weave).

Bef. *c*, *d* and *t* disappear in *hoc* for **hod-c*, **hod-ce*, cf. *quod*; *ac* for **at-c*, cf. *atque*.

Bef. sonant consonn. *s* disappears, thus e.g. bef. *n* in *pō-no* for **pos-no*, cf. *pos-uis*; *cē-na* for **ces-na*, cf. Umbr. *ces-na*; *penis* for **pes-nis*, cf. *πέος* for **πεσ-ος*, Sk. *pās-as*; in *penna* for earlier *pesna* the assimiln. has been kept, *pesna* stands for **pet-na* (v. c), \sqrt{pet} , *πετ*, Sk. *pat* (fly), cf. *prae-pet-es* (aues; Fest.), O.H.G. *fēd-ara*, *fēd-ah*, Gk. *πτ-ίλον*, *πτε-ρόν* (feather, wing), etc.

Bef. *m*, *s* is lost in *rē-mus* (oar), cf. *tri-resmus* (three-oared) Col. Rostr., *res-mus* stands for **ret-mus*, cf. *ἑ-ρετ-μός*; *s* is lost without compensatory lengthening in *Că-mēna* for *Cas-mena*, \sqrt{cas} , cf. *car-men*, Sk. \sqrt{cas} , *çās* (count, say).

Bef. *n* and *m*, *s* also becomes *r*. v. e.

Bef. *l*, *s* is lost in *corpu-lentus* for **corpus-lentus*, cf. *corpus*, *corpor-is*.

Bef. *d*, *s* is lost in, e.g. *iū-dex* for **iūs-dex*, *ī-dem* for **īs-dem*, *dī-duco* for **dīs-duco*, etc., but it remains in *trans-dūco*, *trans-do*, bes. *trā-dūco*, *trā-do*, further in cases like *eius-dem*, *cuius-dam*.

Bef. *b*, also, *s* is lost, e.g. *tene-brae* for *tenēs-brae*, and the like; v. post.

Bef. *d*, *r* is lost with compensat. lengthening in *pēd-o*, *pōd-ex*, bes. *πέρδ-ω*, Sk. \sqrt{pard} , O.H.G. *farz*, Lith. *perd* (1 sg. pres. *pėrdžu* = **perd-yu*).

The change of *r* to *s* by assimiln. is well known, e.g. *rūsum*, *russum*, bes. *rur-sum*, *sū-sum* bes. *sur-sum*, *retrō-sum* bes. *retror-sum*, etc.

Bef. *sc*, consonn. are lost, prob. only to make pronunciation simpler and easier; thus in *di-sco* for **dic-sco*, cf. *di-dic-i*; *po-sco* (where *sc* became fixed, though origl. only in pres., cf. *po-posc-i*), prob. for **porc-sco*, cf. \sqrt{proc} , *prec*, in *proc-ax*, *proc-us*, *prec-or*, cf. Germ. *frah*, *frag* (in Goth. *fraih-nan-*, N.H.G. *frag-en*); *mi-sceo* for **mig-sceo*, cf. *μίγ-νυμι* (here, too, has the *sc* in Lat. grown into the root).

§ 77. Similarly *mis-tus* stands for and bes. *mics-tus*, *mix-tus*, and this prob. for **misc-tus*, cf. *misc-eo*; *tos-tus* for **tors-tus*, cf. *torr-eo* for **tors-eo*, Germ. *durs-t*, Sk. $\sqrt{tar\check{s}}$ (thirst), i.e. *tars*, to which prob. belongs *tes-ta* (crock, jar) for **ters-ta* (lit. 'baked,' 'burnt'); cf. *terra* (dry land) for **ters-a*.

It is certain that certain groups composed of more consonn. were lightened by the evaporation (ejection) of one of these consonn.

Thus after *r*, *l*, are lost gutt. *c*, *g*, when folld. by *t* or *s*, e.g. *sar-tus* for **sarc-tus*, cf. *sarc-io*; *tor-tus* for **torc-tus*, cf. *torqu-eo*; *ul-tor* for **ulc-tor*, cf. *ulc-iscor*; *in-dul-tus* for **in-dulc-tus*, and this for **in-dulg-tus* fr. *in-dulg-eo*, and so others; *sar-si* for **sarc-si*, cf. *sarc-io*; *tor-si* for **torc-si*, cf. *torqu-eo*; *mul-si*, *mul-sus*, for **mulg-si*, **mulg-sus*, fr. *mulg-tus*, cf. *mulg-eo*; *spar-si* for **sparg-si*, *spar-sus* for **sparg-sus* fr. *sparg-tus*, cf. *sparg-o*, etc.; *par-simonia* for **parc-simonia* fr. **parc-timonia*, like the underlying fm. *par-sus* fr. **parc-tus*, cf. *parc-o*; thus also *ursus* for **urcsus* fr. **urctus*, cf. Gk. $\acute{\alpha}\rho\kappa\tau\omicron\varsigma$, Sk. $\acute{r}k\check{s}as$.

On the other hand, *rcs* was tolerated *in fine*, in *arx*, *merx*.

Also the combinations *s-br*, *r-br* are avoided by the evaporation of the *s*, *r*, bef. *b*, e.g. *mulie-bris* for **mulier-bris* (or **mulies-bris*); *funie-bris* for **funes-bris* bes. *funer-a*, *funus*; *tene-brae* for **tenes-brae*, **temes-brae*, (§ 75, 2, n.); *fe-bris*, *he-bris*, for **fer-bris*, \sqrt{fer} (in *fer-uor*, etc.), origl. *ghar* (§ 73, 1; Corss. Krit. Beitr. 204 sqq.; Ebel, Zeitschr. xiv. 78; cf. L. Meyer, Comp. Gr. ii. 235, 241). Similarly in above-mentioned *tos-tus* for **tors-tus*, etc.

Quintus for *Quinc-tus* is late, cf. common *Quinc-tius* bes. later *Quin-tius*; the same holds good in *au-tor* for *auc-tor* fr. **aug-tor*, etc. Yet it cannot be doubted that *c* was lost bef. *t* sporadically even at an earlier period of the lang. in such cases as *in-uītus* fr. **in-uic-(i)-tus*, \sqrt{uic} , *uec*, Gk. $\text{F}\epsilon\kappa$ ($\acute{\epsilon}\kappa\text{-}\acute{\omega}\nu$), Sk. *vaç*, i.e. *vak* (will): *in-uī-tare* fr. **in-uic-(i)-tare*, \sqrt{uic} , *uec*, *uoc* (*uoc-are*), Gk. $\text{F}\epsilon\pi$, Sk. *vač*, origl. *vak* (speak), etc. (cf. Corss. Krit. B. p. 4 sqq., and Krit. N. p. 47 sqq. where other views, however, are expressed). Also *Vitoria*, *Vitorius*, are supported

*Fair usage policy applies

§ 77. e.g. *fissus* fr. **fid-tus*, **fis-tus*, √*fid* in *findo*, *fid-i*; *gressu-s* fr. **gred-tu-s*, **gres-tu-s*, cf. *grad-ior*; *fossa* fr. **fos-ta*, **fod-ta*, √*fod* in *fod-io*; *passus* fr. **pat-tu-s*, **pas-tu-s*, cf. *pat-ior*; *ēsum* for **essum*, which we might have expected, fr. **ēd-tu-m*, **es-tu-m*, cf. *ēd-o*; *clausus* fr. **claud-tu-s*, **claus-tu-s*, cf. *claud-o*; *ūsus* (rarely *ussus*, *inscrr.*) fr. **ūt-tu-s*, **ūs-tu-s*, cf. *oit-ier*, *ūt-i*; *tonsu-s* fr. **tond-tu-s*, **tons-tu-s*, cf. *tond-eo*; *uicensumus*, *uicēsumus*, fr. **uicent-tumu-s*, **uicens-tumu-s* (unless here, as in *deci-mu-s*, only *mo* was added, in which case the fm. would be **uiginti-mu-s*); *uersus*, *uorsus*, for **uers-tus*, **uors-tus*, fr. **uert-tus*, **uort-tus* (*uert-ere*), etc. On this Sound-law, cf. Corss. Krit. B. 418 sqq.

c. Partial assimiln. of foregoing to follg. consonn.

It is well known that bef. mutes mom. sonant consonn. become mute; e.g. *ac-tus* for **ag-tus*, cf. *ag-o*; *scrip-tus*, *scrip-si*, for **scrib-tus*, **scrib-si*, cf. *scrib-o*, etc.; in *uec-tus* bes. *ueh-o*, origl. *vagh-āmi*, we must assume a representation of origl. *gh* by Lat. *g*: origl. *vagh-ta-s*, Lat. **ueg-to-s*, *uec-tu-s*. On the other hand, *sec-are*, *salic-em*, stand bes. *seg-mentum*, *salig-nus*, etc.; the sonant consonn. *m*, *n*, here change *c* to son. *g*.

Lab. moment. consonn. pass into their nasals bef. *n*: *som-nus*, *Sam-nium*, for **sop-nus*, **Sab-nium* (cf. *sop-ire*, *Sab-īni*, *Sab-elli*).

The earlier lang. still shows *s* bef. nasals, softened fr. *t*, as *res-mu-s* (*rēmus*) fr. **ret-mu-s* (ῥ-ρετ-μó-s); *pes-na* (*penna*) fr. **pet-na* (√*pet*, fly, v. a).

Quadra-ginta bes. *quatri-duo* is peculiar; *t* bef. sonant *r* has become *d*.

From origl. *tr* in Lat. there have arisen sometimes **thr*, *dhr*, *br*, through the aspirating force of the *r* (v. supr. Gk., also Zend), (on *b* as a representative of origl. *dh*, v. § 73, 2), e.g. *consobrinus* (cousin) for **-sosbrinus* (*s* bef. *b* is lost regularly, v. sup.), and this for **sosdhrinus*, **sosthrinus*, **sostrinus*, fr. **sostor-īnu-s*, st. **sos-tor-*, usu. **sosor-*, *soror-* (sister); *salūbris* fr. **salus-bris*, and this for **salus-dhris*, **salus-thris*, **salus-tris*, **salut-tris* (*salus*, *salut-is*). Cf. Ebel, Zeitschr. xiv. 78; Kuhn, Zeitschr. xiv. 222, xv. 238. On the other hand, Cors. Krit. N. p. 186 sqq.

d. Partial assimilation of following to foregoing § 77. consonants. This takes place esp. in the case of *t*, which, after nasals and liquids, commonly changes into spir. *s*; the same tendency is seen after gutt. (after *c*),—the latter occurs also in Sk. (v. § 52, 2, n. 2); e.g. *man-sum* for **man-tu-m* (*man-eo*); in *Leu-cesie*—important on acct. of *eu*, v. § 36—(voc.; title of Iuppiter) for **leucetie*, fr. **Leucentie*, cf. *Leucetios*, *Loucetios*, for **leucent-ios*, **loucent-ios*, further fmm. fr. **leucent-*, *loucent-*, pres. part. act. fr. **leuc-o*, **louc-o*, f.f. *rauk-āmi*, √*luc*, origl. *ruk* (Corss. Krit. B. 471); *t* has become *s* after origl. *n*, which afterwards was lost, in the same way; *pul-su-s* for **pul-tu-s* (*pel-lo*, *pe-pul-i*), *spar-sus* for **spar(g)-tu-s* (*sparg-o*), etc.; but by their side occur *ten-tu-s* (and *ten-su-s*), *sepul-tu-s* (*sepel-io*), *tor-tu-s* for **tor(c)-tu-s*, (*torqu-eo*), etc.; **mac-simu-s* thus is for **mag-timu-s* (*mag-nus*; cf. *op-timu-s*); *fixus*, i.e. *fic-su-s*, for **fig-tu-s* (*figo*); *noxa*, i.e. **noc-sa*, for **noc-ta* (*noc-eo*), etc., bes. *ac-tu-s* (*ag-o*), *fic-tu-s* (√*fig* in *fi-n-g-o*), and many others with retained *t*.

Regularly *t* does not pass into *s* after *n*, when *nt* belongs to one and the same word-formative particle, e.g. *feru-nt*, *fere-nt-em*, etc. (yet cf. above-mentioned *Leucesios* for **Leucentios*).

Lapsus for **lap-tu-s*, **lab-tu-s*, is singular (cf. *lab-i*), bes. *scrip-tu-s* (*scrib-ere*), cf. Corss. Krit. B. 420 sqq. (Ebel, Zeitschr. xiv. 245 sqq. here assumes an inserted *s*: **lap-stus*, **man-stum*, to which *t* was assimild.)

Note.—Yet *mend-ax* belongs prob. to *ment-iri*, according to the system laid down by Schuchardt, *Vocalismus des vulgärlateins*, Lpz. 1866; cf. however on this point Aufrecht in *Zeitschr.* ix. 232; Corss. Krit. B. 117 sqq.

e. Change of *s* to *r* betw. vowels, or betw. vowels and sonant consonn., also after vowels in termination (in the lang. in question). The sonant consonn. here change the mute *s* into sonant *r*. The same process takes place, e.g. in Germ. also (*war*, *wāren*, for *was*, *wāsen*, √*was*, cf. *ge-wēs-en*, etc.), and in Sk. So, e.g. in *gener-is* (genus) for old Lat. **genes-os*; *maiores* fr. **maioses*; *erat* fr. **esat*, √*es*, etc.;

§ 77. *ueter-nus* fr. **uetes-nus* (*uetus*, *ueter-is*); *car-men* fr. **cas-men*, cf. Old-Lat. *Cas-mena*, √*cas*; *diur-nus*, *ho-dier-nus*, from an otherwise lost st. **dios-*, **dies-* = origl. *divas* (in *dies*, *diei*, the final *s* of the root has been lost), etc.; *arbor* for earlier *arbos*; *amor* fr. **amos*, **amo-se*, etc. In *fine* this *r* for *s* is caused through analogy of the other fms. (*arbor-is*, *amar-is*). Betw. vowels *s* has remained but rarely, e.g. *nasus*, cf. Sk. *nas*, Scl. *nosŭ*, etc., *miser*, *uasa*, *posui*; regularly *s* only remains instead of *ss*, e.g. *casus* for *cassus* fr. **cad-tu-s*, etc. (v. b).

f. Loss of consonn. betw. vowels. Here too we see a kind of assimiln., in that sonant consonn. become thereby similar to the surrounding vowels, and are swallowed up by them, so that only the attendant accent remains.

In the Romance langg. this process is very common (e.g. *ducatu*s, It. *ducato*, Sp. *ducado*, Fr. *duché*). The commonest case is the loss of *y* and *v*, as *moneo*, *monēs*, fr. **moneyo*, **moneyis*, f.f. *mānayāmi*, *mānayasi*; *amasti* fr. **amaisti*, *amauisti*; *fluont*, *fluunt*, fr. *flouont*, etc. Exceptionally *s* has been lost betw. two vowels (Corss. Krit. Beitr. 464 sqq.), thus e.g. in *uēr* (spring) fr. **veser*, cf. Gk. *ἔαρ* for **Ἔσαρ*, Lith. *vasarà* (summer), Sk. *vas-antā-s* (spring), O. Bulg. *ves-na*; *uīs*, *uim*, bes. *uires*, *uirium*, st. *uisi-*, *uiri-*; prob. through analogy fr. origl. **divas-* arose a fm. *diēs*, *diēi*, bes. *ho-dier-nus*, fr. **dives-no-s*; fr. origl. and Sk. *nābhas-*, *nūbēs*, *nūbi-s*; fr. origl. and Sk. *sadas-* (cf. Gk. *ἔδος*), *sēdēs*, *sēdi-s*, and other like forms. Further, loss of origl. *bh*, Lat. *f*, *b*, has certainly occurred in *ama-ui* for **ama-fui*, etc.; in dat. pl. e.g. *equīs*, f.f. *akva-bhya(m)s* (v. § 73, 3). On the doubtful loss of *c* betw. vowels, cf. § 39, 2; § 77, a, sub fin.; on loss of *h*, cf. § 73, 1.

g. Evident insertion of conson. betw. concurrent consonn. The change fr. *m* to *mp*, for the accommodation of *m* to the follg. *s*, *t*, is well known; it occurs in the best MSS. (e.g. in Cod. Medic. Vergili), e.g. *hiem-p-s*, *sum-p-si*, *sum-p-tus*, etc. Bef. the *s*, *t*, *m* became an audible conclusion, i.e. changed to *mp*.

2. Dissimilation.

t, *d*, before follg. *t*, change into *s* (as in Zend, Gk., Scl.-Germ.),

*Fair usage policy applies

§ 78. cf. *ράκος* (*rag*), Aiol. *βράκος*, i.e. *Φράκος*, Sk. $\sqrt{vra}k$, i.e. *vra*k (*tear*); *radix* (*root*), cf. *ρίζα*, Lesb. *βρίσδα*, i.e. *Φρίζα*, **Φριδ-γα*, Goth. *vaúrts* (*root*), O.H.G. *wurza*, *wurzala*, f.f. of root therefore=*vrad*, etc.

Bef. *f*, *s* has disappeared in *fallere* (*deceive*) bes. *σφάλλειν*, *fungus* (*id.*) bes. *σφόγγος*, *funda* (*sling*) bes. *σφενδόνη*, *fides* (*lyre*) bes. *σφίδη*; on the conjectured loss of *s* bef. *p*, v. Corss. Krit. B. 457.

More singular, on the other hand, are cases like *teg-o* (*cover*) for **steg-o*, cf. *i-steg-a* for **in-steg-a* (*cover*), Gk. *στέγ-ω*, *στέγ-η*, bes. *τέγ-η*, Lith. *stógas* (*roof*), in Germ. likewise the *s* is lost, cf. *deck-en*, *dach*; *tundo* (*thump*), \sqrt{tud} , bes. Goth. *stauta*, \sqrt{stut} , but Sk. \sqrt{tud} ; *taurus* (*bull*), *ταῦρος*, O. Bulg. *turü*, but Goth. *stiur*, Sk. *sthūra-s*; *cau-ere* (*beware*) bes. Goth. *us-skav-yan* (*be wakeful*), origl. \sqrt{skav} , etc.; bes. freq. initial *st*, *sc*. Whilst, inversely, of *sc* only the *s* remains in *sirpeus* (*rush—*), *sirpea*, *sirpiculus*, *-la*, (*junket*), *sirpare* (*bind*), bes. *scirpus* (*withe*), *scirpeus*, *scirpea*, etc., cf. O.H.G. *scilaf*, *sciluf*, N.H.G. *schilf*, and perh. in some others (Corss. Krit. B. 31 sqq.). Also in *lā-tum* for **tlātum*, cf. \sqrt{tol} (*tollo*), init. *t* is lost. *p* bef. *l* has clearly been lost in *lien* (*milt*) bes. Sk. *plihán-*, *plihán*, *σπλήν*; perh. in *lanx*, *lanc-is* (*dish*), bes. *πλάξ*, *πλακ-ός* (*flat-*, *plate*), O.H.G. *flah*; whether *lae-tus* (*glad*) is for **plai-to-s*, and belongs to Sk. \sqrt{pri} (*love*, *cheer*), *lau* in *lau-ere*, *lauare* (*wash*), stands for **plav*, and here a causative fmn. of \sqrt{plu} is seen, may seem doubtful (*lau* belongs prob. to same root as *luo*, and not to root *plu*). Upon loss of *c* bef. *l*, which is not yet beyond doubt in my opinion, cf. Corss. Krit. B. p. 2 sqq., Krit. N. p. 35 sqq. On the whole there is still considerable doubt and uncertainty in this branch, because we are confined to a few examples.

It is well known that it was not till historic times that men simplified *gn* into *n*, as e.g. in *nō-sco*, *nō-tus*, *nō-men*, fr. older *gnō-sco*, cf. *co-gnō-sco*, *gnō-tus*, *gnō-men*, cf. *co-gnō-men*; *narrare* fr. earlier *gnā-rigare*, from same *gnā-rus*, where the initial conson. is fully preserved, fr. same root as *gnō-sco*, origl. *gna* fr. *gan* (*nosse*: cf. *γι-γνώ-σκω*, Sk. *ग्ना*, Germ. *kan* and *kna*, etc.):

nā-tus for earlier *gnā-tus*, preserved in *co-gnā-tus*, √*gna* fr. *gan* § 78. (*gignere*), cf. *gen-us*. The same sound-law, by which an initial gutt. + *n* becomes *n*, occurs also in Eng.: the old initials *gn*, *kn*, are still noticeably written in Eng. of this day, in words like *gnat*, *gnaw*, *knowledge*, etc., but *g*, *k*, are no longer heard. Cf. loss of gutt. bef. nasals medially (§ 77, 1, a).

Similarly at a later period of the lang. *st* was lost before *l* (Corss. Krit. B. 461, cf. 149) in st. *stleiti-*, *sleiti-*, *leiti-*, *liti-* (*lis*, *suit*), bes. which we place O.H.G. *strīt*, N.H.G. *streit* (in st.-terminations, it is true, this does not occur in Lat. words), in Inscrr. *slis* is seen, *stl* thus becomes *l* through *sl*: *stlātu-s*, *lātu-s* (broad), which is derived from origl. √*star* (*ster-no*, *strā-tus*, *σπορ-έννυμι*, etc.)—thus the origl. word means “spread”; *stlocu-s*, *locu-s* (place), which we refer to Sk. √*sthal*, further fmn. of *stha*, origl. √*sta* (stand), and others whose derivation is not quite clear.

As *suāuis* for **suaduis* (§ 77, 1, a), so *uiginti* for **duiginti*, cf. *duo*, Sk. *dva*; the dropping away of the *d* occurs nevertheless in Gk. too (*εἴκοσι*), in Kelt. (Erse *fiche*, *fichet*, i.e. *uiginti*), in Aryan (Sk. *vīçāti*, Zend *vīçaiti*), and thus dates from the earliest times. If **duiginti* had stood its ground to a later time, **biginti* would have arisen, as *bis* fr. **duis*, *bellum* fr. *duellum*, *bonus* fr. *duonus* (*duonoro*; Epit. Scip. Barb. f.): here through mutual influence *b* has arisen, as an assimiln. of *d* and *v*, since *d* became assimilated to *v* as regards quality (labial quality), and *v* became like *d* as regards quantity, i.e. became a momentary sonant conson.

Bef. *y*, *d* is lost in *Iouis*, etc., for **Dyowis*, cf. Old Lat. *Dioue* (*Ioui*), and Osk. *Diuvei* (Momms. Unterital. Diall. p. 255), Sk. *dyāu-s* (heaven), Gk. *Ζεύς* = **dyev-s*, etc., √*dyu* (= *div*, shine). The same loss is seen in *Iuno* for **Diou-no*, fmd. fr. same root (Corss. Krit. N. p. 142).

Even the favourite initial sound *qu* appears simplified to *u* in *uermis* (cf. Germ. *wurm*) for **quermis*, f.f. *karmi-s*, Sk. *krmi-s*, Lith. *kirm-elė* (worm; but cf. G. Curt. Gr. Et.² p. 485 sqq.);

§ 78. so too *v* appears to stand for *gv* in \sqrt{uen} (uenire) = **g^huen* for **ge-n* (§ 77, 1), further fm. fr. \sqrt{ga} (go), by means of *n*. At a very late period arose the loss of init. *c* bef. *u* in several fms. of interrog. pronn., e.g. in *u-bi* for **cu-bi* or **quo-bi*, kept in compd. *ali-cu-bi*, cf. Umbr. *pufe* (*p* = Lat. *c*); *u-nde* for **cu-nde*, kept in *ali-cu-nde*; *u-ter* for **cu-ter* (compar. fm. st. *cu-* = *quo-*), cf. Osk. *piturus-pid* (i.e. utrique) with *p* = Lat. *c*, Gk. *πότερος*, earlier Iôn. *κότερος*, Sk. and f.f. *ka-tarás*.

§ 79.

FINAL.

The Lat. lang., as we have it, generally permits only single consonn. at the end of a word, but also groups of two and even three consonn., viz. nasal or liq. + mutes; mutes, *r*, *l*, *m*, *n* + *s*; *s* + *t*, e.g. *ferunt*, *hunc*, *uolt*, *fert*; *scrobs*, *ars* for **art-s*, and so in similar cases (but *uir* for **uirs*, *quatuor* for **quatuors*, fr. **uiro-s*, *quatuor-es*), *fers* (fr. *feris*), *puls* for **pult-s* (but *uis* for **uil-s*, f.f. *varsi*, "thou wilt," *sal* for **sal-s*, *s* lost), *hiem(p)s*, *ferens* for **ferent-s*, and so in such cases (but *nouōs*, *nouās*, for **nouons*, **nouans*); the combinations *rs*, *ls*, *ns*, were therefore tolerated in these cases where they stand for *rts*, *lts*, *nts*, i.e. when *s* alone = *ss*; *est*; nasal or liq. + mute + *s*, e.g. *hiemps*, *urbs*, *arx*, i.e. *arc-s*, *falx*, i.e. **falcs*; indeed our present final consonn., for by far the greatest part, did not become final until vowels had evaporated, and were not compressed until vowels had been lost. Yet in no case was a doubled conson. tolerated, *in fine*, e.g. *os*, *fel*, not **oss*, **fell*, cf. *oss-is*, *fell-is*; moreover, the combination of two mom. consonn. was not admissible, e.g. *lac* for **lact*, cf. *lact-is*, and *rd*, *cor* for **cord*, cf. *cord-is*; where these combinations should have been final, the latter conson. was discarded.

It was not until Lat. became a fixed written language in classical times that the termn. assumed a more definite existence. The earlier national archaic lang. shows in spelling a great indifference towards final consonn. In fact, the consonantal termns. *s*, *m*, *t*, important as they are for word-formn., were sometimes expressed in writing, sometimes omitted, which

*Fair usage policy applies

§ 79. Scip.), bes. *pocolom*, *sacrom*, etc. In popular diall. this faint pronunciation of final *s* remains, as later inscrr. prove; the written lang., however, firmly maintained the letter in spelling. One effect of the weak pronunciation of final *m* must here be noticed, viz. that in verse it was not considered a conson. bef. vowels.

Also final *n* seems to have become only faintly heard, cf. *alioqui* bes. *alioquin* and the like (cf. however, Corss. Krit. B. 272).

Origl. final *t* had in earlier Lat. a weak sound, like a scarcely audible *d*; accordingly it is freq. omitted in writing, e.g. *patre* (Epit. Scip. Barb.) bes. *Gnaiuod*, etc. In classical Lat. *d* for origl. *t* was sometimes retained in writing, thus e.g. in ntr. pronl. decl. e.g. *quo-d*=origl. *ka-t*, *id*=origl. *i-t*, etc. (the spelling in *t* is rarer in these cases), sometimes completely discarded, as in abl. sg., where *d*=origl. *t* has been retained in archaic Lat. only, but was not written in class. Lat., e.g. *equō-d*, *equō*=origl. *akvā-t*, Sk. *áčvā-t*; in termn. *-to* of imper. *t* has likewise been lost, e.g. origl. *as-tāt*, Osk. *es-tūd*, Lat. *esto* fr. **es-tōd*. Final *t* in Lat. is not origl., but has become final after vowel-loss, and thus remains in class. Lat., whilst archaic Lat. does not show this *t*, e.g. *īt*, f.f. **ei-ti*, origl. *ai-ti*; *uehit(i)*, *uehunt(i)*, **uehonti*, origl. *vaghati*, *vaghanti*, etc., but archaically *dede*=*dedet*, *dedit*, and even indeed *dedro*=*dedront*, *dederunt*.

Thus *nt* also in earlier times and colloquial lang. was barely audible in pronunciation; wherein lies the cause of the double fms. of the later fixed spelling of 3 p. pl. pf., as *fecerunt* (with entire termn. retained) and *fecere* (with lost *nt* and weakened vowel).

The clipping of final consonn. was even more prevalent in Umbr. than in Old Lat.; whilst the Osk. does not show this phenomenon, since there was a generally-received Samnite orthography before the time from which our earliest inscrr. date, and the popular variations in pronunciation were no longer followed in spelling.

Jataka (The); together with its Commentary. Being Tales of the Anterior Birth of Gotama Buddha. For the first time Edited in the original Pali by V. FAUSBÖLL. Demy 8vo. cloth. Vol. I. pp. 512. 1877. 28s. Vol. II., pp. 452. 1879. 28s. Vol. III. pp. viii.-544. 1883. 28s. Vol. IV. pp. x.-450. 1887. 28s. For Translation see under “Buddhist Birth Stories,” page 4.

The “Jataka” is a collection of legends in Pali, relating the history of Buddha’s transmigration before he was born as Gotama. The great antiquity of this work is authenticated by its forming part of the sacred canon of the Southern Buddhists, which was finally settled at the last Council in 246 B.C. The collection has long been known as a storehouse of ancient fables, and as the most original attainable source to which almost the whole of this kind of literature, from the Panchatantra and Pilpay’s fables down to the nursery stories of the present day, is traceable; and it has been considered desirable, in the interest of Buddhistic studies as well as for more general literary purposes, that an edition and translation of the complete work should be prepared. The present publication is intended to supply this want.—*Athenæum*:

Mahawansa (The)—THE MAHAWANSA. From the Thirty-Seventh Chapter. Revised and edited, under orders of the Ceylon Government, by H. SUMANGALA, and DON ANDRIS DE SILVA BATUWANTUDAWA. Vol. I. Pali Text in Sinhalese character, pp. xxxii. and 436. Vol. II. Sinhalese Translation, pp. lii. and 378 half-bound. Colombo, 1877. £2 2s.
