LED LAMPS

01

E14 C37 candle

Description

Body color: White

Material: Aluminium with plastic

Type of led: SMD

Voltage: 220-240V

CRI: Ra>80

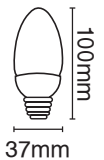

SMD 2835 **Model**

VK/05050/EI, VK/05048/EI, VK/5083/EI

Lamps apply to the following models

Model VK/03017

Model VK/03016

Model VK/03016/T

Uranus PAR30 spotlight

LED 35W 40W 45W

Features

- Spot the brightest clothing
- 40W replace 70W metal halide lamp directly
- Active cooling fan design, speed up heat dissipation 10 times faster than heat sink
- Taiwan Sunon MagLev Motor Fan with 70,000 hours lifespan
- Unique over heat automatic protection by turning off at 90 °C
- AC 100-277V voltage worldwide, over voltage protection by automatic zero current output
- No need ballast, no mercury, light no IR and UV

Customize your Lamp

- Housing color option: White/Black
- Beam angle option: 15°/25°/45°
- Light Color option: warm white/neutral white/cool white

Smart solutions with LED Light Modules

Features:

- 1 High efficiency lighting by replacing the **Metal halide (HQL)** lamps 35W, 70W and 150W
- 2 Improved lighting quality
- 3 Increased life time span up to 35000 hours since they are lit with 350mA-1050mA and have particular heatsink absorption coolers
- 4 Approximately 60% energy reduction compared to **Metal halide lamps**
- 5 Easy installation for all ceiling lights recessed or track (Gu10: D 50mm and R111: D 111mm)

**Ideal for use in business premises
(companies, banks, business store, etc)**

Modules for MR16

New Installation Steps

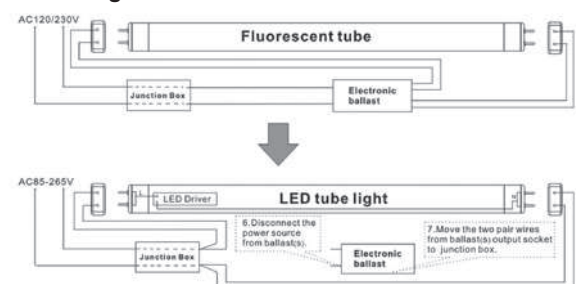

1. Switch off the power.
2. Snap in the two lamp holders into the two ends of the bracket.
3. Mount the bracket onto the intended location.
4. Install the LED T8 tube onto the bracket.
5. Connect thw wire to power source.
6. Switch on the power.

Re-wiring with Magnetic Ballast

Re-wiring with Electronic Ballast

Replacement Installation Steps

1. Switch off the power.
2. Take off the fluorescent tube.
3. Take off the cover of bracket.
4. Check what ballast was used inside, Magnetic ballast or Electronic ballast. (Note: magnetic ballast usually works with a starter on the bracket)
5. According to the ballast type, refer to one of the following wiring schematics.

Installation Instructions

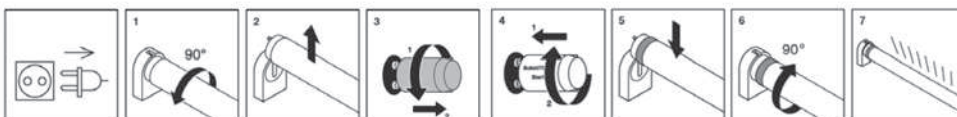

- Make sure that the supply voltage is disconnected.
- Carefully remove the fluorescent tube and starter according to the lamp holder type.
- Insert SubstiTUBE® Value and SubstiTUBE® Start properly.

Below an example for typical lamp holder types is described

- Turn the conventional lamp 90° degrees and take it out of the socket.
- Remove the conventional starter by turning it.
- Insert and latch the SubstiTUBE® Start into starter socket.
- Insert SubstiTUBE® Value into socket and locate into position by turning 90°.
- Check light emission direction.

Incredible bulbs for special installations. They are unique and can give a special touch to any environment. The light given by the carbon filaments helps create an intimate and vintage atmosphere.

Απίστευτα όμορφες λάμπες για ειδικές εγκαταστάσεις. Είναι μοναδικές και μπορούν να δώσουν μια ξεχωριστή νότα σε οποιοδήποτε περιβάλλον. Το φως που δίνουν οι ίνες άνθρακα συμβάλλει στη δημιουργία μιας οικείας και Vintage ατμόσφαιρας.

Halogen lamps, like all incandescent bulbs produce a continuous light spectrum. They can work at a higher temperature than other non-halogen lamps and thus generate light with a higher color temperature. **They do not contain mercury.** Halogen lamps are warmed more than regular light bulbs, because the heat is concentrated on a smaller surface and operates near the thread. Finally halogen lamps consume less energy, equal to 30% compared with ordinary light bulbs. **Instruction:** Do not touch halogen bulbs with bare hands! Use a clean towel or carefully grasp the base of the shower.

*Οι λαμπτήρες αλογόνου, όπως όλοι οι λαμπτήρες πυράκτωσης παράγουν ένα συνεχές φάσμα φωτός. Μπορούν να λειτουργήσουν σε υψηλότερη θερμοκρασία συγκριτικά με άλλους λαμπτήρες μη αλογόνου κι έτσι παράγουν φως με υψηλότερη θερμοκρασία χρώματος. **Δεν περιέχουν υδράργυρο.** Οι λαμπτήρες αλογόνου ζεσταίνονται περισσότερο από τους κανονικούς λαμπτήρες πυράκτωσης, επειδή η θερμότητα συγκεντρώνεται σε μικρότερη επιφάνεια και λειτουργεί κοντά στο νήμα. Τέλος οι λαμπτήρες αλογόνου καταναλώνουν μειωμένη ενέργεια, ίση με 30% συγκριτικά με τους απλούς λαμπτήρες πυράκτωσης. **Οδηγία:** Μην πιάνετε τους λαμπτήρες αλογόνου με γυμνό χέρι! Χρησιμοποιήστε μια καθαρή πετσέτα ή πιάστε προσεκτικά από την βάση του ντουί.*

The non-directional household lamps (incandescent) is a product during the use phase of consuming energy at maximum or high proportion. For this reason Regulation (EC) No. 244/2009 abolished. For lamps on the following pages (classic lamps) allow their use because they belong to the category of decorative lamps or low voltage (12, 24, 42, 110V).

Οι μη κατευθυντικοί οικιακοί λαμπτήρες (πυράκτωσης) είναι προϊόν που κατά το στάδιο της χρήσης του καταναλώνει ενέργεια σε μέγιστο ή μεγάλο ποσοστό. Για το λόγο αυτό με τον κανονισμό (ΕΚ) αριθ. 244/2009 καταργήθηκαν. Για τους λαμπτήρες που ακολουθούν στις επόμενες σελίδες (classic lamps) επιτρέπεται η χρήση τους διότι ανήκουν στην κατηγορία διακοσμητικών λαμπτήρων ή χαμηλού voltage (12, 24, 42, 110V).
