PRIMERGY RX100 S5

As business processes and customer bases increasingly grow and rely more and more on Internet technology, data centers face the challenge of rapid enhancements to their front-end infrastructure services. Increasingly they are looking for a platform solution that has minimum impact on their budgets, yet is easy to deploy and simple to operate. The RX100 S5 is the optimal answer. With technical further developments, such as Quad-Core Intel® Xeon® CPU in the 3200/3300, integrated SAS or SATA RAID 0, 1 data protection for up to 2x 3.5-inch easy-to-swap SATA or 2x 3.5-inch hot-plug SATA/SAS disks and 8 GB memory the PRIMERGY RX100 S5 matches your business application requirements perfectly. It combines the benefits of cost-optimized SATA or SAS disk technology with a space-saving 1 U form factor of less than 60 cm in depth. This makes it easy to integrate into any rack enclosures. The standard iRMC S2 (integrated Remote Management Controller) offers enhanced system management based on IPMI 2.0 technology. The set of integrated network and management functions make it a good choice for budget-sensitive infrastructure solutions
