

National Workplan to Complete Recovery Planning for Species Listed Under the Endangered Species Act

Fiscal Years 2022–2025 (March 2022 Version)

Species Common Name and Scientific Name: Species included on this workplan are those for which we plan to complete draft and final recovery plans in FY2022 through FY2025. This plan only contains species for which we expect to finalize the recovery plan by the end of FY2025. We make draft and final recovery plans available on our website. To view the status of recovery planning for a species, visit <http://www.fws.gov> and use the “Search” field to find information on individual species or find draft or final recovery plans for that species.

Target Dates: These columns indicate the fiscal years in which we anticipate completing draft and final recovery plans for the species. Recovery plans are unique to each species and, as such, some may require additional time and coordination with partners to complete. To keep the public informed of our progress in recovering species, we plan to periodically update this work plan to reflect the status of recovery plan development, and our consideration of new information over time.

Lead Office: Our recovery planning process requires public notice and an opportunity for public review and comment, prior to final approval of a new or revised recovery plan. Visit <http://www.fws.gov> and use the “Search” field to find information on individual species or find notices of draft recovery plans available for public review. Additionally, as of January 1, 2022, [draft recovery plan notices](#) are available on our website. In our notices, we generally request that comments on our draft recovery be submitted by certain dates to ensure we receive it in time to consider it in our planning process. However, we will accept information on any species at any time, and contact information is available on our website at <https://www.fws.gov>. Please see our [Recovery Planning and Implementation](#) and our [Recovery](#) fact sheets for more information.
