REVISION HISTORY

This supplement was published First Online by the Geological Society on October 21st 2015 as part of the volume entitled Arthur Smith Woodward: His Life and Influence on Modern Vertebrate Palaeontology (see Bernard & Smith 2016). The intention was, and remains, to update the supplement on an annual basis with further images, taxonomy changes and any other relevant information. Principal changes will be listed in this section under the year of revision. The header date will be updated annually as will the table of contents, if only to reflect page number changes.

2018

ACKNOWLEDGEMENTS AND COPYRIGHT

Regrettably some acknowledgements were omitted from the 2016 update and these are included now.

Rob Gess (Rhodes University, Grahamstown) for providing the image of *Dictyopyge(?) draperi* and Elize Butler, the collections manager at the National Museum in Bloemfontein who photographed the specimen.

Paul Shepherd and Simon Harris of the British Geological Survey for images of *Coccolepis andrewsi* and *Coelodus arcuatus*.

2018 Update

Bernard Mannequin, Royal Belgian Institute of Natural Sciences for the image of *Cratoselache pruvosti*.

Paul Shepherd at the BGS for the three images of the *Hybodus ensis* paratypes

Benjamin Kear of the Museum of Evolution, Uppsala University for the images of *Boreosomus arcticus*, *Saurichthys wimani*, *Perleidus woodwardi* and *Sassenia ? guttata*.

Kevin Webb of the Natural History Museum Image Resources for the additional NHM specimen images.

UPDATES

Some general “tidying up” was carried out including image size reduction and re-arrangement to reduce the overall number of pages. Note that the page numbers for the 2016 update are no longer valid. Minor corrections were made to some image numbers.

Cratoselache pruvosti – image of holotype plus updated stratigraphical information added (p. 15).

Hybodus ensis – images of five paratypes added (p. 17).

Pachymylus leedsi – new images added (p. 53).
Chimaera eocenica – new image added (p. 54).
Acrolepis arctica – images added and information updated (p. 64).
Belonorhynchus wimani – images added and information updated (p. 70).
Colobodus altilepis – image added and information updated (p. 75).
Coelodus multidens – image of holotype added from original reference (p. 79).
Lepidotus mawsoni - images of second syntype added (p. 95).
Protosphyraena ornata – information on specimen updated (p. 108).
Percichthys antiquus – new entry (p. 154).
Solea eocenica – new entry (p. 160) plus new order, Pleuronectiformes.
Coelacanthus guttatus – image added and information updated (p. 163).

2017

No update was made in 2017.

2016

ACKNOWLEDGEMENTS AND COPYRIGHT

This update could not have been achieved without assistance from many people. We hope the following list is complete but we apologise if we have inadvertently missed any person or institution.

Many of the new images of type specimens held in UK institutions have been sourced from the GB3D Type Fossils Online website:

<http://www.3d-fossils.ac.uk> 

These images and the associated information are made available under a Creative Commons Attribution-NonCommercial-Share Alike 3.0 Unported License and are © Jisc GB3D Type Fossils Online project partners. A link to the specific page on the website is included immediately below the host museum registration number. In the list of updates below those featured on the GB3D website are marked with an asterisk.

Eliza Howlett and Hilary Ketchum, Collections Managers, Earth Collections, Oxford University Museum of Natural History for images of *Scaphodus heteromorphus* and *Notidanus daviesii*.

Matt Riley of the Sedgwick Museum of Earth Sciences for providing images of *Anomoeodus confertus* and *Protosphyraena keeping*.

Mark Evans of the New Walk Museum & Art Gallery, Leicester for providing the image and further information on *Browneichthys ornatus*.

Matt Williams of the Bath Royal Literary and Scientific Institution for the images of the series of teeth associated with *Xenacanthus (Diplodus) moorei*.

Sébastien Olive and Bernard Mottequin of the Institut royal des Sciences naturelles de Belgique for assistance in locating type specimens in Belgium and to Annelise Folie of the same institute for the images of *Athrodon tenuis*.

Paulo Brito of the Universidade do Estado do Rio de Janeiro and Martha Richter of the Natural History Museum for images of *Rhinoptera prisca*, *Paleopiquitinga brasiliensis* and *Macracara prisca*.

Thomas Mörs of the Swedish Museum of Natural History. The images of *Onychodus arcticus*, *Ganolepis gracilis*, *Holptychius monilifer* and *Leptolepis nathersti* are by Emma van Eelen (© 2016 Swedish Museum of Natural History).

UPDATES

Corvaspis kingi – image and information added (p. 7).

Birkenia kingi – image and information added, name updated (p. 9).*

Acanthaspis decipiens – information added and institution name updated (p. 10).

Acanthaspis minor – information added and institution name updated (p. 10).

Asteroplax scabra – information added and institution name updated (p. 10).

Bothriolepis antarctica – images and reference added (p. 11).

Diplodus moorei – images, information and notes added (p 13).*

Diplodus problematicus – image and information added, name updated (p. 14).

Acrodus nitidus – tentative generic name change and information added (p. 17).

Notidanus daviesii – image and information added (p. 30).*

Odontaspis houzeaui - images and information added (p. 37).

Squatina cranei - images and information added (p. 44).*

Rhinoptera prisca – images and information added (p. 49).

Edestus newtoni – image and information added (p. 50).*

Psammodus salopiensis – image added (p. 70).

Byssacanthoides debenhami – images added and information updated (p. 72).

Acanthodes nitidus – image added (p. 73).

Browneichthys ornatus – image and information added (p. 75).

Ganolepis gracilis – image added and institution name updated (p. 77).

Coccolepis andrewsi - images and information added (p. 82).

Dictyopyge(?) draperi – image added (p. 88).

Coelodus arcuatus - image and information added (p. 94).

Scaphodus heteromorphus - images and information added (p. 101).*

Anomoeodus carteri – images of holotype and two paratypes plus information added (pp. 102-103).*

Anomoeodus confertus – image and information added (p. 103).

Anomoeodus superbus – images of holotype and five paratypes plus information added (p. 104).*

Anomoeodus willetti – images of holotype and information added (p. 105).*

Athrodon tenuis – images and information added (p. 105).

Athrodon crassus – image and information added (p. 106).*

Heterostrophus phillipsi – images of holotype and information added (p. 109).*

Lepidotus mawsoni – information added (p. 114).

Lepidotus souzai – information added (p. 115).

Megalurus mawsoni – genus name updated and information added (pp. 130-131).

Protosphyraena ornata – information added and institution name updated (p. 134).

Protosphyraena depressa – image of holotype and information added (p. 135).*

Protosphyraena keepingi – image and information added (p. 136).

Protosphyraena tenuirostris – images of holotype and information added (p. 136).*

Belonostomus(?) carinatus – information added (p. 139).

Eurycormus grandis – image of holotype and information added (p. 141).*

Urenchelys anglicus – images of holotype and information added (p. 153).*

Knightia brasiliensis – additional image, name change and information added (p. 159).

Scombroclupea scutata – information updated (pp. 160-161).

Pachyrhizodus subulidens – image and information added (p. 167).*

Dercetis latiscutatus – image of holotype and information added (p. 176).*

Leptolepis nathersti – images including lectotype added plus information updated (p. 191).

Macracara prisca – additional image and information added (p. 193).

Onychodus anglicus – image and information added (p. 207).*

Onychodus arcticus – image and information added (p. 207).

Holoptychius monilifer – image of holotype added and information updated. (p. 208).

Holoptychius antarcticus – images added and information updated (p. 209).

DISCLAIMER

This document is not intended to represent a comprehensive taxonomic review of the Smith Woodward type specimens but will provide some basic information and additional references that the reader may find useful.

INTRODUCTION

This supplement contains brief details of all the Smith Woodward's fossil fish type specimens that we know of. Images are provided for many of the type specimens that reside in the Natural History Museum (NHM) collection in London. These images often display:

- The specimen registration number written on a small yellow oval/circular disc.
- A small green circular disc indicating a specimen that has been described and/or figured.
- A small red circular disc indicating the specimen is a holotype.
- A speck or blob of red wax used by Smith Woodward to indicate a specimen that has been included in his catalogue of fossil fishes (Woodward 1889; 1891; 1895; 1901).

The specimens are ordered taxonomically in the same manner they are arranged in the NHM. A list of the countries from which the specimens originate are given in Appendix A. Most of the NHM fossil fish collection has been acquired over many years from amateur collectors and some dealers. Brief details of those relevant to this supplement are presented in Appendix B.

The authors would like to particularly acknowledge the skills of Kevin Webb, Jonathan Jackson, Harry Taylor and Phil Hurst of the Natural History Museum Photographic Studio for the hundreds of images they have taken as part of this project.

TYPES

Group: Agnatha
Class: Pteraspidomorphi
Order: Pteraspidiformes

NHMUK PV P 16446 (Woodward, 1934, fig. 1)

NHMUK PV P 16447 (Woodward, 1934, figs. 2,3)

Corvaspis kingi. Woodward, 1934. Co-types. *Gen. nov.*

Shield.

Downtonian; Earnstrey Brook, Corvedale, Shropshire.

Presented by W. Wickham King Esq, March 1933.

1934. Note on a New Cyathaspidian Fish from the Upper Downtonian of Corvedale. *Quart. J. Geol. Soc.* **90**, 566-567, pl. XIX, figs. 1-3.

NHMUK PV P 4797

Cyathaspis macculloughi. Woodward, 1891. Holotype.

Imperfect dorsal shield.

Lower Old Red Sandstone ("Ledbury Shales", Pandy, Herefordshire.): Englands Hill Quarry, Bodenham.

Presented by Sir Richard Owen, K.C.B., 1884.

1891. *Catalogue of the Fossil Fishes in the British Museum (Natural History)*, Part II, p. 172, pl. IX, fig. 4.

Group: Agnatha
Class: Cephalaspidomorphi
Order: Anaspidiformes

NHMUK PV P 6813-1 (Woodward, 1900, fig. 1)

NHMUK PV P 6813-2 (Woodward, 1900, fig. 1a)

Euphanerops longaevis. Woodward, 1900. Holotype. Gen. nov.

Near complete specimen.

Scaumenac Bay, Province of Quebec.

Purchased from R.F. Damon, July 1892.

1900. On a new Ostracoderm (*Euphanerops longaevis*) from the Upper Devonian of Scaumenac Bay, Province of Quebec, Canada. *Ann. Mag. Nat. Hist.* (7) 5, 416-419, pl. X, figs. 1, 1a.

OUM C.31384a-d

<http://www.3d-fossils.ac.uk/fossilType.cfm?typSampleId=15000171>

Tahulalepis kingi (Woodward), Blom et al, 2002

Birkenia kingi. Woodward, 1948. Holotype.

A few scales, arranged in their natural order belonging to the anterior ventral region of the trunk.

Downtonian Formation (Grey Grit, Ledbury Passage Beds): Herefordshire.

Pridoli Epoch (Silurian Period) (416 – 418.7 Ma B.P.)

Oxford University Museum of Natural History.

1948. On a new Species of *Birkenia* from the Downtonian Formation of Ledbury, Herefordshire. *Ann. Mag. Nat. Hist.* (11) 14, 876-878, 2 text figs.

2002. Blom, H., Märss, T. & Miller, C. G. Silurian and earliest Devonian birkeniid anaspids from the Northern Hemisphere, Earth and Environmental Science Transactions of the Royal Society of Edinburgh, Vol. 92, Issue 3, Sept. 2001, pp. 263-323.

Group: Pisces
Class: Placodermi

NHMUK PV OR 43039

Coccosteus disjectus. Woodward, 1891. Type.

Associated median ventral plates.

Upper Old Red Sandstone: Kiltoran, Kilkenny, Ireland.

Purchased 1871.

1891. *Catalogue of the Fossil Fishes in the British Museum (Natural History)*, Part II, p. 292, pl. VIII, figs. 1,2.

NHMUK PV P 6755

Coccosteus canadensis. Woodward, 1892. Holotype.

Impression of external aspect of head shield.

Upper Devonian: Scaumenac Bay, Province of Quebec, Canada.

Purchased from R.F. Damon, July 1892.

1892. Further Contributions to Knowledge of the Devonian Fish-fauna of Canada. *Geol. Mag.* (3) 9, p. 483, pl. XIII, fig. 2.

NO IMAGE CURRENTLY AVAILABLE

Acanthaspis decipiens. Woodward, 1891. Type.

Associated dorsal and ventral shields.

Lower Devonian, Red Micaceous Sandstone: Dickson Bay.

Swedish Museum of Natural History, Stockholm.

1891. The Devonian Fish-fauna of Spitzbergen. *Ann. Mag. Nat. Hist.* (6) 8, p. 4, pl. I, figs. 1-3.

NO IMAGE CURRENTLY AVAILABLE

Acanthaspis minor. Woodward, 1891. Type.

Portion of occipital plate and portion of pectoral appendage.

Lower Devonian, Red Micaceous Sandstone: Dickson Bay.

Swedish Museum of Natural History, Stockholm.

1891. The Devonian Fish-fauna of Spitzbergen. *Ann. Mag. Nat. Hist.* (6) 8, p. 6, pl. II, figs. 2-5.

NO IMAGE

Notopetalichthys hillsi. Woodward, 1941. Type. *Gen. nov.*

Head shield.

Middle Devonian: Goodravale, NSW, Australia.

Australian Museum, Sydney, Australia.

1941. The Head Shield of a New Macropetalichthyid Fish (*Notopetalichthys hillsi*, gen. et sp. nov.) from the Middle Devonian of Australia. *Ann. Mag. Nat. Hist.* (11) **8**, 91-96, pl. I, 1 text fig.

NO IMAGE CURRENTLY AVAILABLE

Asteroplax scabra. Woodward, 1891. Type. *Gen. nov.*

Cranial shield.

Upper Devonian Ironstone: Mimers Valley, Spitzbergen.

Swedish Museum of Natural History, Stockholm.

1891. The Devonian Fish-fauna of Spitzbergen. *Ann. Mag. Nat. Hist.* (6) **8**, p. 11, pl. III, figs. 1, 2.

NO IMAGE

Asterolepis incisa. Woodward, 1900. Syntypes.

Anterior median dorsal plate, left anterior dorso-lateral plate, left anterior ventro-lateral plate.

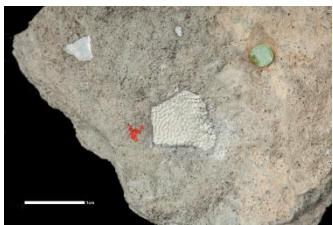

Upper Devonian: East Greenland.

?Royal State Museum, Stockholm.

1900. Notes on some Upper Devonian Fish-remains discovered by Professor A. G. Nathorst in East Greenland. *Bihang. K Svenska Vet.-Akad. Handl.* 26, Afd. IV, no. 10, p. 6, plate, figs. 11-13.

Xenacanthus moorei. (Woodward)

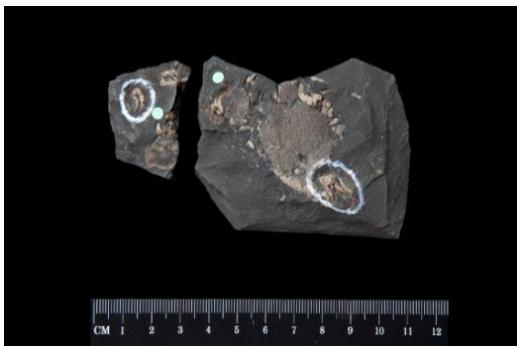

Diplodus moorei. Woodward, 1889. Syntypes (?M0004 & M0004a).

Two teeth.

Keuper, Triassic: Ruishton, near Taunton.

Bath Royal Literary and Scientific Institution, Charles Moore Collection.

1889. Palaeichthyological Notes. 1. On the so-called *Hybodus keuperinus*, Murch. and Strickl. 2. On *Diplodus Moorei*, sp. nov., from the Keuper of Somersetshire. 3. On a Symmetrical Hybodont Tooth from the Oxford Clay of Peterborough. 4. On a Maxilla of *Saurichthys* from the Rhaetic of Aust Cliff, near Bristol. Ann. Mag. Nat. Hist. (6) 3, p. 299, pl. XIV, fig. 4 and 5.
Note: It has not been possible to positively identify which of the specimens illustrated above were figured by Smith Woodward in the 1889 paper but it is believed this set of teeth includes the two figured.

NHMUK PV P 3026 (Woodward, 1889, figs. 2, 4)

NHMUK PV OR 20695 (tooth on the left,
Woodward, 1889, fig. 3)

Diplodus tenuis. Woodward, 1889. Syntypes.

Remains of associated teeth.

Coal-Measures: Carlisle, Lanarkshire.

Enniskillen Collection.

1889. *Catalogue of the Fossil Fishes in the British Museum (Natural History)*, Part I, p. 11, pl. VI, figs. 2-4.

NHMUK PV P 6540

Doliodus problematicus. (Woodward)

Diplodus problematicus. Woodward, 1892. Type.

Single tooth.

Lower Devonian: Campbellton, New Brunswick.

Purchased from Mr. Damon.

Coccolepis andrewsi. Woodward, 1890. Type.

Fish wanting pectoral fins.

Lower Purbeck Beds: Teffont, near Salisbury.

British Geological Survey.

1890. Woodward and Sherborn. *A Catalogue of British Fossil Vertebrata*, p. 37 (name only).

1891. *Catalogue of the Fossil Fishes in the British Museum (Natural History)*, Part II, p. 524.

(b) Counterpart (BGS GSM 28002)

NHMUK PV P 10756 (Woodward, 1910, fig. 1)

Ecrinesomus dixoni. Woodward, 1910. Holotype; Paratype *Gen. nov.*

Near complete specimen; Head and anterior abdominal region.

Lower Trias, Right bank of the Mahavavy River, opp. the village of Andogozo, near the extreme north-west coast of Madagascar.

Presented George G. Dixon Esq., Nov. 1909.

1910. On some Permo-Carboniferous Fishes from Madagascar. *Ann. Mag. Nat. Hist.* (8) 5, p. 2, pl. 1, figs. 1, 2.

Saurichthys wimani. (Woodward) Stensio 1925

Belonorhynchus wimani. Woodward, 1912. Syntypes.

Two imperfect skulls and jaws.

Lower Trias: Sassen Bay, Spitzbergen.

Uppsala University Museum, Uppsala, Sweden.

1912. Notes on some Fish-remains from the Lower Trias of Spitzbergen. *Bull. Geol. Inst. Univ. Upsala*, XI, p. 293, Pl. XIV, figs. 3-6.

Stensiö, Erik A:Son, 1925. Triassic Fishes from Spitzbergen, Part II, Stockholm.

PMU 23691/1 (Woodward, 1912, fig. 6)

NO IMAGE

Belonorhynchus gracilis. Woodward, 1890. Type.

A nearly complete head and trunk, seen from the ventral aspect, wanting all the fins except portions of the anal and caudal.

Triassic: Gosford, NSW, Australia.

Geological Survey Museum, Sydney.

1890. The Fossil Fishes of the Hawkesbury Series at Gosford. *Mem. Geol. Surv. N.S. Wales, Palaeont.* **4**, p. 27, Pl. VIII, fig. 5.

NO IMAGE

Belonorhynchus gigas. Woodward, 1890. Type.

Nearly complete fish with imperfect fins, the pectorals being absent, the anal much broken, and the dorsal destroyed.

Triassic: Gosford, NSW, Australia.

Geological Survey Museum, Sydney.

1890. The Fossil Fishes of the Hawkesbury Series at Gosford. *Mem. Geol. Surv. N.S. Wales, Palaeont.* **4**, p. 23, Pl. IX, fig. 1.

Group: Osteichthyes

Class: Actinopterygii

Order: Scorpaeniformes

Family: Anoplopomatidae

NO IMAGE

Myriolepis pectinata. Woodward, 1908. Holotype.

Greater part of the trunk with traces of the head and fins.

Wianamatta Shales, Triassic Hawkesbury Series: St. Peters, Sydney, NSW.

?Geological Survey, NSW.

1908. The Fossil Fishes of the Hawkesbury Series at St. Peter's; with Note by W. S. DUN. *Mem. Geol. Surv. N.S. Wales, Palaeont.* **10**, p. 15, Pl. III, fig. 2.

NO IMAGE

Myriolepis latus. Woodward, 1890. Type.

Complete head and trunk wanting all fins except the anal and caudal.

Lower Triassic: Gosford, NSW, Australia.

Australian Museum, Sydney, Australia.

1890. The Fossil Fishes of the Hawkesbury Series at Gosford. *Mem. Geol. Surv. N.S. Wales, Palaeont.* **4**, p. 10, Pl. III, fig. 2.

Australian Museum, Sydney, Australia.

1890. The Fossil Fishes of the Hawkesbury Series at Gosford. *Mem. Geol. Surv. N.S. Wales, Palaeont.* 4, p. 31, pl. VI, fig. 2.

NHMUK PV P 4089

Semionotus capensis. Woodward, 1888. Syntypes.

Portions of four imperfect fishes on a sandstone slab.

Upper Karoo: Orange Free State, S. Africa.

Presented by the Orange Free State National Museum, through Hugh Exton, Esq., M.D., 1883.

1888. On Two New Lepidotoid Ganoids from the early Mesozoic Deposits of Orange Free State, South Africa. *Quart J. Geol. Soc.* **44**, p. 138, pl. VI, figs. 1-5.

NO IMAGE

Semionotus formosus. Woodward, 1908. Type.

Fish lacking the pectoral fins and the greater part of the caudal fin.

Upper Triassic (Wianamatta Shales-Hawkesbury Series): Brickpits at St. Peter's and McDonaldtown, near Sydney, NSW.

Australian Museum, Sydney, Australia.

1908. The Fossil Fishes of the Hawkesbury Series at St. Peter's; with Note by W. S. DUN. *Mem. Geol. Surv. N.S. Wales, Palaeont.* **10**, p. 23, pl. IV, fig. 8.

NO IMAGE

Semionotus tenuis. Woodward, 1890. Type.

Imperfectly preserved specimen.

Lower Triassic: Gosford, NSW, Australia.

Mining Museum, Sydney, Australia.

1890. The Fossil Fishes of the Hawkesbury Series at Gosford. *Mem. Geol. Surv. N.S. Wales, Palaeont.* **4**, p. 31, pl. VI, fig. 3.

NO IMAGE

Semionotus joassi. Woodward, 1887. Type.

Nearly complete fish.

Lower Oolite: Brora, Sutherlandshire.

Collection of Rev'd. J. M. Joass.

1887. On a new Species of *Semionotus*, from the Lower Oolite of Brora, Sutherlandshire. *Ann. Mag. Nat. Hist. (5)* **20**, 175-179, pl. VIII.

Dercetis latiscutatus. Woodward, 1903. Holotype

Middle portion of trunk

Chalk marl (probably zone of *Terebratulina gracilis*): Glynde, Sussex.

Late Cretaceous Epoch (Cretaceous Period) (65.5 – 99.6 Ma B.P.)

Booth Museum of Natural History, Willett Collection.

1903. The Fossil Fishes of the English Chalk. Part II. *Palaeont. Soc. Lond.*, p. 65, pl. XV, fig. 1.

Group: Osteichthyes
Class: Actinopterygii
Order: Aulopiformes
Family: Enchodontidae

NHMUK PV P 9249_1 (Woodward, 1901, fig. 4)

NHMUK PV P 9249_2 (Woodward, 1901, fig. 4a)

Enchodus annectens. Woodward, 1901. Holotype.

Imperfect head, left lateral aspect; right lateral aspect.

Chalk: England.

History unknown.

1901. *Catalogue of the Fossil Fishes in the British Museum (Natural History)*, Part IV, p. 195, pl. XI, figs. 4, 4a.

NHMUK PV P 1703_1 (Woodward, 1901, fig. 2)

NHMUK PV P 1703_2

Enchodus pulchellus. Woodward, 1901. Holotype.

Imperfect head, left lateral aspect; right lateral aspect.

Lower Chalk: Kent.

Egerton Collection.

1901. *Catalogue of the Fossil Fishes in the British Museum (Natural History)*, Part IV, p. 194, pl. XI, fig. 2.

Group: Osteichthyes
Class: Actinopterygii

NHMUK PV P 9404

Acrognathus libanicus. Woodward, 1901. Type.

Imperfect fish.

Upper Cretaceous (Upper Senonian): Sahel Alma, Mt. Lebanon, Syria.

Lewis Collection.

1901. *Catalogue of the Fossil Fishes in the British Museum (Natural History)*, Part IV, p. 244.

Group: Osteichthyes
Class: Actinopterygii
Order: Myctophiformes
Family: Myctophidae

NHMUK PV P 4865

Microcoelia libanica. Woodward, 1901. Holotype.

Upper Cretaceous: Hakel, Mt. Lebanon.

Lewis Collection.

1901. *Catalogue of the Fossil Fishes in the British Museum (Natural History)*, Part IV, p. 252.

Group: Osteichthyes
Class: Actinopterygii
Order: Myctophiformes
Family: Sardinioididae

NHMUK PV P 8682

Sardinioides attenuatus. Woodward, 1901. Holotype.

Right lateral aspect.

Upper Cenomanian: Hakel, Lebanon.

Purchased C. H. V. Gollmer, Aug. 1897.

1901. *Catalogue of the Fossil Fishes in the British Museum (Natural History)*, Part IV, p. 241, pl. XII, fig. 5.

NHMUK PV P 3977_1 (Woodward, 1902, fig. 1)

Sardinioides illustrans. Woodward, 1902. Holotype.

Imperfect fish in dorsal aspect; left lateral oblique aspect.

English Chalk.

Enniskillen Collection.

1902. *The Fossil Fishes of the English Chalk. Part I. Palaeont. Soc. Lond.*, p. 34, pl. X, fig. 1.

NHMUK PV P 3977_2

Appendix A Countries

The following is a list of the countries from where Smith Woodward described new fossil fishes.

Algeria (Oran)

Antarctica

Argentina (Santa Cruz)

Australia (New South Wales, Queensland, Victoria)

Austria (Carinthia)

Belgium

Brazil (Bahia, Maranhão, Pernambuco, São Paulo)

Canada (Quebec, New Brunswick)

China (Shandong Province)

Egypt (Cairo)

France (Ain, Marne)

Germany (Bavaria, Rhenish Prussia, Würtemberg)

Greenland

India (Dongargaon, Srinagar, Warora)

Indonesia (Sumatra)

Iran (Shushtar, capital of Khuzestan Province)

Ireland, Republic of

Italy (Tuscany, Verona)

Lebanon

Madagascar (Andogozo)

Malta

New Zealand

Norway (Spitzbergen)

Russia (Siberia)

South Africa (Cape Colony, Cape Province, Orange Free State)

Sweden (South Scania)

Turkey (Sea of Marmara)

USA (South Carolina)

Zimbabwe (formerly Southern Rhodesia)

Appendix B Collections, Collectors and Dealers

The majority of the Natural History Museum collection of fossil fishes (and many of the important type specimens) has been acquired from amateur collectors either by purchase or donation. Such collectors remain a very important source of new acquisitions. Many of the collectors and their collections up to the year 1900 are described in Woodward 1904. Those in the following list included in this publication are marked with an asterisk and a double asterisk if details have already been mentioned in the chapter on the fossil fish collection (Smith 2015). Details of some collections are given in Smith Woodward's Catalogue of Fossil Fishes (Woodward 1889; 1891; 1895; 1901); these are marked with a dagger, †. Much useful information regarding collections is also contained in the World Palaeontological Collections book (Cleevely 1983). Details of those marked with a double dagger, ‡, can be found in this publication.

Andrews, Reverend W. R. Andrews.

***Atherstone**, The Hon. William Guybon (1813-1898)

Atherstone was a resident at Grahamstown, Cape Colony. He presented the type specimen of *Atherstonia scutata* to the Museum in 1884.

Barnes, F. J.

Barnes headed a company quarrying the famous Portland stone on the Isle of Portland.

****Baugh Collection** - Thomas Baugh.

†**Bayfield Collection**

"Fossil fishes and reptiles, chiefly from the Upper Chalk of Norfolk, purchased from Mr. T. G. Bayfield, of Norwich, 1878." (Woodward 1889).

***Beckles Collection** - Samuel Husband Beckles (-1890).

His Wealden and general collection, comprising about 500 vertebrata and 2000 invertebrata, was purchased in 1891.

****Bowerbank Collection** - James Scott Bowerbank (1797-1877).

***Brodie Collection** - Peter Bellinger Brodie (1815-1897).

Collected at various locations where he was employed by the church e.g. the Upper Silurian of Herefordshire and the Jurassic rocks of Northamptonshire and Leicestershire. His collection of over 25,000 fossils included many valuable type specimens and an extensive selection was purchased in 1895.

‡**Butler**, Francis H. (1849-1935).

"Mineral and fossil dealer; science lecturer; assistant editor, Encyclopaedia Britannica. Became a dealer through his responsibility as an executor." (Cleevely 1983).

†**Byne Collection** – Mr. Byne.

"Miscellaneous fossils from the Jurassic of Gloucestershire, purchased from Mr. Byne, before 1845." (Woodward 1889).

****Capron Collection** - J. Rand Capron.

***Charlesworth**, Edward.

Sold many fossils to the Museum, 1875.

***Clifton, George**.

"Presented a collection of British fossils, including fish-remains from the Portland Stone (*Caturus cliftoni*, &c.), 1889." (Woodward 1904).

Crawley, Cecil.

***Crofton**, Addison.

"Presented Mollusca from the Carboniferous Limestone of Yorkshire, 1898." (Woodward 1904).

***Damon**, Robert (1814-1899).

This well-known Weymouth dealer in natural history specimens made a private collection that was purchased in 1890.

‡**Damon**, Robert Ferris (1845-1925).

Weymouth dealer in fossils, shells and minerals. His stock of natural history material sold at auction between 1909-10.

‡**Davis**, Arthur George (1892-1957).

"Palaeontologist, naturalist and bibliophile; noted for his contribution to our knowledge of the British Lower Tertiaries, particularly the micro-fossils." (Cleevely 1983).

‡**Day Collection** - Alfred Ely Day.

Professor of Geology, American University of Beirut.

‡**Dibley Collection** - George E. Dibley, F.G.S. (1857-1943).

Teacher.

Dixon, George G.

****Dixon Collection** - Frederic Dixon (1799-1849).

‡**Doran**, Patrick? (?1784-1880).

Mineral and fossil collector and dealer of Glassdrummond, Co. Down.

***Edwards Collection** - Frederick Erasmus Edwards (1799-1875)

Edwards was a member of the London Clay Club and a founder of the Palaeontographical Society. The bulk of his collection was purchased in 1872-1873.

****Egerton Collection** - Sir Philip Malpas de Grey Egerton (1806-1881).

****Enniskillen Collection** - William Willoughby Cole, Third Earl of Enniskillen (1807-1886).

***Exton**, Hugh.

"Presented fossil Fishes from the Stormberg Beds of South Africa, namely, *Semionotus capensis* in 1883, and *Cleithrolepis extoni* in 1888... ". (Woodward 1904).

‡**Finlay**, T. M.

Edinburgh University.

***Fox Collection** - Rev. William Darwin Fox (-1882).

"Fox collected from the Wealden cliffs ... of the Isle of Wight in the neighbourhood of Brixton, where he lived." ... His collection was purchased in 1882. (Woodward 1904).

****Gardner Collection** - John Starkie Gardner (1845-1930).

‡**Garwood**, Edmund Johnston, FGS (1864-1949).

Professor of Geology and Mineralogy, University College, London. President of the Geological Society of London(1930-32).

***Gollmer, C. H. V.**

Collected in the Lebanon, purchased 1896.

***Gordon, John.**

"Presented fossil Fishes from the Lignite of Taubaté, San Paulo, Brazil, 1900."
(Woodward 1904).

***Gregory, John Walter**

Dr. Gregory made an important collection of fossils in Spitzbergen,
donated in 1896.

Griffith, William.

Fossil collector from Folkestone, Kent.

****Häberlein Collection - Karl Häberlein.**

***Harford Collection - Frederick Harford.**

"For many years, Harford relieved the tedium of a city life by the preparation of Chalk fossils. His specimens were collected chiefly by Joseph Wood in the neighbourhood of Cuxton and Burham, Kent. ... Besides the beautifully-prepared Chalk fossils, especially fishes, Harford accumulated a few specimens from other formations, some of them valuable. The greater part of the collection, numbering 1108 specimens, was purchased from him in 1888. In the same year he presented to the Museum the type-specimen of *Thrissops portlandicus*, A. S. Woodward, from the Portland Stone ..." (Woodward 1904).

***Harris Collection - William Harris (1797-1877).**

"A selection of about 240 specimens from the collection left at his death was purchased by the Museum from his daughter in 1881. It comprised ... various fish-remains ..." (Woodward 1904).

#Hislop, Reverend Stephen (1817-1864).

Holland, Alfred.

‡Hooley, Reginald Walter F.G.S (1865-1923).

Honorary Curator of Winchester Museum.

***Houzeau Collection - Houzeau de Lehaie (A.)**

"Presented Upper Cretaceous and Eocene fish-teeth from Belgium, 1889.
" (Woodward 1904).

‡Hovenden, Frederick, F.G.S, F.L.S (fl. 1864-1907).

Lived at Dulwich c. 1885.

***Jesson Collection - Thomas Jesson.**

"Mr. Jesson began his collection at Cambridge, when he obtained a fine series of fossils from the Cambridge Greensand... 2709 fossils from the Cambridge Greensand were purchased from him in 1891, 1892, and 1894 respectively." (Woodward 1904).

****Weaver Jones Collection - W. Weaver Jones.**

King, William Wickham (1862-1959).

Stourbridge solicitor, amateur geologist and F. G. S., wrote on the Old Red Sandstone of Shropshire in particular.

***Krantz, A. and F.**

Numerous purchases have been made, especially of Continental fossils, from these dealers.

***Leeds Collection** - Alfred Nicholson and Charles E. Leeds.

The Leeds brothers were assiduous collectors of fossil reptiles and fishes from the Oxford Clay pits near Peterborough. Their first collection was purchased in instalments in 1890, 1891, 1892 and 1893. The Leeds collection "comprises many type and unique specimens ... [including] fishes..." (Woodward 1904).

****Lewis Collection** - Reverend Professor E. R. Lewis.

****Mantell Collection** - Gideon Algernon Mantell (1790-1852).

***‡Marsham** - Hon. Robert Marsham-Townsend (1834-1915).

"Presented a valuable collection of British fossils and some Cretaceous Fishes from Brazil, 1877." (Woodward 1904).

***Mawson, Joseph.**

"While occupied with the construction of railways in Bahia, Brazil, Mr. Mawson has made a valuable collection of Cretaceous Reptilia, Pisces, and Mollusca from that region. It has been presented by him to the Museum in several small instalments from 1881 onwards, and comprises the type-specimens of *Lepidotus mawsoni*, *Megalurus mawsoni*, and *Acrodus nitidus*, ..." (Woodward 1904).

‡Molyneux, Arthur John Charles F.G.S. (d. 28 Dec. 1920).

Mining engineer who discovered chalcedonized fossils in Kalahari Desert.

***Owen, Sir Richard.**

"Many specimens given personally to Sir Richard Owen were presented by him to the Museum." (Woodward 1904).

Penny, E.

***Penton, R. H.**

"Presented dentition of *Myliobatis pentoni* from Eocene near Cairo, 1893." (Woodward 1904).

‡Roberts, George E. F.G.S (1831-1865).

‡Rubidge Collection - Richard Nathaniel Rubidge (1821-1869).

South African doctor interested in geology, particularly metamorphism.

Russel, J.

***Seeley, Harry Govier.**

Smith Woodward's father-in-law (see Shindler & Smith 2015; Smith & Shindler 2015).

Short, J. J. R.

***Simmons, Jeremiah.**

"An expert collector of Chalk fossils, from whom many specimens were purchased." (Woodward 1904).

****Mrs. Smith's Collection** - Mrs. M. H. Smith.

Smith, R. J.

****Toulmin Smith Collection** - Joshua Toulmin Smith (1816-1869).

Souza, Professor Ennes de Souza.

‡Stebbing, W. P. D., F.G.S.

***Sweet**, George.

"Discovered and presented a specimen of *Belonostomus sweeti* from the Cretaceous of Queensland, 1895." (Woodward 1904).

****Taylor Collection** - Henry William Taylor (-1843).

‡Teilhard de Chardin, Marie Joseph Pierre (1881-1955).

French Jesuit philosopher, biologist and palaeontologist, who was restricted by the supervision of his Catholic superiors in Rome and prevented from publishing between 1923-51, this eventually caused him to emigrate to North America.

***Tennant**, James.

"A lecturer on Geology and Mineralogy and a dealer from whom many specimens were purchased. An extensive selection from his private collection of English fossils was purchased ... in 1881-82." (Woodward 1904).

***Verbeek**, R. D. M.

"Presented fossil Fishes from Tertiary Lignite at Padang, Sumatra, 1876." (Woodward 1904).

Vyse, Colonel Howard.

***Ward**, John.

"Resident at Longton, Staffordshire, Mr. Ward has been occupied for forty years in collecting the fossils, especially fishes ... of the North Staffordshire Coalfield. ... A set of 1072 selected fossils, comprising many type-specimens and other specimens described by Egerton, John Young, and Traquair, was purchased ... in 1894." (Woodward 1904).

****Wetherell Collection** - Nathaniel Thomas Wetherell (1800-1875).

***Wright**, Bryce M.

"Many fossils were purchased from this dealer, ... 1873." (Woodward 1904).
