Gertens stands behind our plant material when a pattern of loss is sustained with a particular variety. Where there are abnormal losses with no particular pattern, claims will be processed on an individual basis. Gertens is not responsible for any other expenses, losses, or inconveniences, which a purchaser may sustain or suffer as a result thereof. Plants are a perishable product. With good horticultural practices, losses, if any, should be minimal. Gertens has numerous Minnesota Nursery and Landscape Association (MNLA) Certified Personnel who are glad to share their knowledge to maximize your success with our plants.

Two Great Ways to Order

Greenhouse Production:

Mike Bowman mbowman@gertens.com

Jessica Shepard jshepard@gertens.com

Watch for availability lists sent from greenhouse production. You can download the lists and use them as order forms. Some annuals are available to order online on the commercial sales website: www.gertenswholesale.com

Benefits of ordering ahead through greenhouse production:

- · Itemize all your purchases on your receipt
- Make bidding easier for you
- Spend less time standing in line

Regular wholesale orders placed and processed with greenhouse production will be charged printed wholesale catalog prices. Please note, all annuals sold wholesale are invoiced by full trays. Orders are fulfilled within 24-48 hours.

Shopping in Retail:

If you shop in the Gertens garden center, you will receive:

• 10% off retail price* annuals sold in pacs and pots, hanging baskets, tubs, combination planters and tropicals.

(10% off applies to listed retail prices)

Insider Tip: In the busy selling and planting months for annuals, shop the garden center early, in the morning, before the store gets busy!

Reminder: you can purchase at the garden center 7 days a week. It's easy to shop, view what's in color, and select the freshest plants around; a convenience that no other distributor or grower can match!

* Both pricing and availability are subject to change without notice. *Purchaser name must be on wholesale account. Photo ID required.

Spacing Annuals

To estimate the number of annuals needed, first determine the square footage of the space:

Once you know the square footage, use the chart on the right to determine the number of annuals needed.

Area of rectangle = length x width Area of Triangle = $\frac{1}{2}$ x base x height Area of circle = 3.14 x radius x radius

Spacing Requirements	Multiply sq. ft. by
4" (on center)	9.00
6"	4.00
8"	2.30
9"	1.80
10"	1.40
12"	1.00
15"	0.65
18"	0.45
24"	0.25
30"	0.16

We can give recommended spacing for annuals based on our experience with the plants. Remember to consider your customer's expectations when planning and installing products.

Annuals - Pack/Trays: Full Trays Only 304 = 12 count (3 packs of 4 cells) Approx. cell size = 3" x 3.5" x 3.5"D

Container Sizing Guide

306 = 18 count (3 packs of 6 cells) Approx. cell size = 2.5" x 3" x 3"D

606 = 35 count (5 packs of 6 cells) Approx. cell size = 2" x 2" x 3"D

Annuals - Pots 4" - 5.25": Full Trays Only 4.33" pots = 8 per tray

5.25" pots = 8 per tray

6.5" pots = 3 per tray

Putting bots back in can damage plants. We will not be filling in the center spen The tray price is subsulated for 50 plants

Flower Bed Preparation Guide

In years of working with landscapers, golf courses, and commercial planting sites, we've noticed two reasons why certain commercial sites consistently have success growing their bedding plants/flower beds: 1. variety selection and 2. soil preparation. The purpose of this "Flower Bed Preparation Guide" is to ensure that your bedding plants reach their full genetic potential.

Variety Selections: Not all varieties of annuals perform equally. We have tried to take the guess work out for you. Here at Gertens, we are constantly sorting through varieties, striving to find you the best garden performing varieties. So, whether you are getting the spectacular flowering capacity of the "Sunpatiens" *Hawkeri* Impatiens or the robust growth and abundant color of the "Whopper" *Hybrid* Begonias......you know you are purchasing the very best!

Soil Preparation: The following garden preparation formulas have proven successful for typical garden sites in Minnesota. Remember, before any soil preparation takes place on a large commercial site, it's a good idea to have the University of Minnesota do a thorough soil evaluation test at their St. Paul campus soil testing facility. If you need help analyzing the results, you can bring them in and have one of our greenhouse production growers analyze the data.

Generally, sandy or clay beds can be treated the same way (it is best to add enough volume to raise a clay bed, thereby increasing drainage). We advise using a Grower Grade Peat Moss, (black bale peat moss). It is a young, coarse, blonde-colored peat harvested from the top few inches of the bog. When mixed into poorer soils, it vastly enhances soil porosity, and helps suppress root disease that often shortens the performance duration of flowering bedding plants. General recommendations as follows:

Hanging Basket and Container Garden Maintenance: Most of our hanging baskets and container gardens contain an application of controlled release fertilizer added at planting. Supplementary feedings of liquid fertilizer on a bi-weekly basis will be beneficial.

Careful attention to watering is necessary for hanging baskets – especially in hot or windy weather. Gertens planted baskets are planted in extra deep pots for additional soil holding capacity. Most include a special reservoir to aid in water retention.

Full Sun Location: One-time soil correction recommendation for extremely poor-quality existing soil or a brand new bed: Rates based on 100 square feet of bed-space (10' x 10' area)

- 2 bales of 3.8 cu ft compressed bales of
- Grower Grade Peat Moss
- 2 lbs pulverized or finely sieved Dolomitic Limestone (optional)
- 8 lbs Controlled release fertilizer Osmocote Plus 15-9-12;
- 5–6-month formulation

Thoroughly mix above ingredients by hand or with a tiller into approximately 8" of the existing topsoil.

Full Sun Location Ongoing Maintenance Formula: Ongoing

maintenance formula for established beds – moderate soil quality: Rates based on 100 square feet of bed space (10' x 10' area)

- 1 bale of 3.8 cu ft compressed bales of
- Grower Grade Peat Moss as needed
- 8 lbs Controlled release fertilizer Osmocote Plus 15-9-12; 5–6-month formulation

Thoroughly mix above ingredients by hand or with a tiller into approximately 8" of the existing topsoil.

Shade location: One-time soil correction recommendation for extremely poor quality existing soil or a brand new bed:

Rates based on 100 square feet of bed-space (10' x 10' area)

- 2 bales of 3.8 cu ft compressed bales of
- Grower Grade Peat Moss
- 2 lbs pulverized or finely sieved Dolomitic Limestone (optional)
- 4 lbs Controlled release fertilizer Osmocote Plus 15-9-12;
- 5-6 month formulation

Thoroughly mix above ingredients by hand or with a tiller into approximately 8" of the existing topsoil.

Shade Location Ongoing Maintenance Formula:

- 1 bale of 3.8 cu ft compressed bales of
- Grower Grade Peat Moss
- 4 lbs Controlled release fertilizer Osmocote Plus 15-9-12;
- 5-6-month formulation
- Thoroughly mix above ingredients by hand or with a tiller into approximately 8" of the existing topsoil.

Mulching the beds with a thin layer of 1" fine red pine bark mulch or cocoa bean mulch can help naturally suppress weeds. The mulching also helps lengthen the time interval between watering, substantially cutting water use.

Thanks to new and ground breaking technology, we can now offer "Microbial Aeration" for relieving compacted soil. C20 is a consumable carbon food source for soil microbes. C20 dramatically increases the soil microbial populations which decompresses the soil and mineralizes nutrients. We can now aerate the soil without disturbing the surface of the landscape. C20 is a game changer!
