

§ 665.102

50 CFR Ch. VI (10–1–14 Edition)

§ 665.102 [Reserved]

§ 665.105 At-sea observer coverage.

§ 665.103 Prohibitions.

All fishing vessels subject to §§ 665.100 through 665.105 must carry an observer when directed to do so by the Regional Administrator.

In addition to the general prohibitions specified in § 600.725 of this chapter and § 665.15, it is unlawful for any person to fish for American Samoa bottomfish MUS using gear prohibited under § 665.104.

§§ 665.106–665.119 [Reserved]

§ 665.104 Gear restrictions.

§ 665.120 American Samoa coral reef ecosystem fisheries. [Reserved]

(a) *Bottom trawls and bottom set gillnets.* Fishing for American Samoa bottomfish MUS with bottom trawls and bottom set gillnets is prohibited.

§ 665.121 Definitions.

(b) *Possession of gear.* The possession of a bottom trawl or bottom set gillnet within the American Samoa fishery management area is prohibited.

As used in §§ 665.120 through 665.139: *American Samoa coral reef ecosystem management unit species (American Samoa coral reef ecosystem MUS)* means all of the Currently Harvested Coral Reef Taxa and Potentially Harvested Coral Reef Taxa listed in this section and which spend the majority of their non-pelagic (post-settlement) life stages within waters less than or equal to 50 fathoms in total depth.

(c) *Poisons and explosives.* The possession or use of any poisons, explosives, or intoxicating substances for the purpose of harvesting bottomfish is prohibited.

**§ 665.122 [Reserved]**

**§ 665.123 Relation to other laws.**

To ensure consistency between the management regimes of different Federal agencies with shared management responsibilities of fishery resources within the American Samoa fishery management area, fishing for American Samoa coral reef ecosystem MUS is not allowed within the boundary of a National Wildlife Refuge unless specifically authorized by the USFWS, regardless of whether that refuge was established by action of the President or the Secretary of the Interior.

**§ 665.124 Permits and fees.**

(a) *Applicability.* Unless otherwise specified in this subpart, §665.13 applies to coral reef ecosystem permits.

(1) *Special permit.* Any person of the United States fishing for, taking or retaining American Samoa coral reef ecosystem MUS must have a special permit if they, or a vessel which they operate, is used to fish for any:

(i) American Samoa coral reef ecosystem MUS in low-use MPAs as defined in §665.99;

(ii) American Samoa Potentially Harvested Coral Reef Taxa in the coral reef ecosystem management area; or

(iii) American Samoa coral reef ecosystem MUS in the coral reef ecosystem management area with any gear not specifically allowed in this subpart.

(2) *Transshipment permit.* A receiving vessel must be registered for use with a transshipment permit if that vessel is used in the American Samoa coral reef ecosystem management area to land or transship PHCRT, or any American Samoa coral reef ecosystem MUS harvested within low-use MPAs.

(3) *Exceptions.* The following persons are not required to have a permit under this section:

(i) Any person issued a permit to fish under any FEP who incidentally catches American Samoa coral reef ecosystem MUS while fishing for bottomfish MUS, crustacean MUS, western Pacific pelagic MUS, precious coral, or seamount groundfish.

(ii) Any person fishing for American Samoa CHCRT outside of an MPA, who does not retain any incidentally caught American Samoa PHCRT; and
