FEDERAL REGISTER

Vol. 78 Thursday,

No. 31 February 14, 2013

Pages 10499–11088

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.ofr.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.fdsys.gov*, a service of the U.S. Government Printing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, 1 (January 2, 1994) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Printing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpo@custhelp.com.*

The annual subscription price for the **Federal Register** paper edition is $749 plus postage, or $808, plus postage, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Printing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 77 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Printing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

FEDERAL REGISTER WORKSHOP

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: Sponsored by the Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WHEN: Tuesday, March 12, 2013
9 a.m.–12:30 p.m.

WHERE: Office of the Federal Register
Conference Room, Suite 700
800 North Capitol Street, NW.
Washington, DC 20002

RESERVATIONS: (202) 741-6008

Printed on recycled paper.

Rules and Regulations

Federal Register

Vol. 78, No. 31

Thursday, February 14, 2013

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2012–1110; Directorate Identifier 2012–NM–013–AD; Amendment 39–17353; AD 2013–03–19]

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: We are superseding an existing airworthiness directive (AD) for certain The Boeing Company Model 707 airplanes, and Model 720 and 720B series airplanes. That AD currently requires replacing wiring for the fuel boost pumps and override pumps with new wiring, installing Teflon sleeving on the wiring, and doing associated actions; and doing repetitive inspections to detect damage of the wiring or evidence of a fuel leak. This new AD reduces the repetitive inspection interval. This AD was prompted by a determination that an inspection interval must be reduced. We are issuing this AD to detect and correct damaged wiring for the fuel boost pumps and override pumps, which could cause electrical arcing that could puncture the conduit containing the wire, and result in a fuel tank explosion or a fire adjacent to the fuel tank.

DATES: This AD is effective March 21, 2013.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of October 1, 2001 (66 FR 44954, August 27, 2001).

ADDRESSES: For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Data & Services Management, P. O. Box 3707, MC 2H–65, Seattle, WA 98124–2207; telephone 206–544–5000, extension 1; fax 206–766–5680; Internet *https://www.myboeingfleet.com*. You may review copies of the referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov;* or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The address for the Docket Office (phone: 800–647–5527) is Document Management Facility, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Rebel Nichols, Aerospace Engineer, Propulsion Branch, ANM–140S, Seattle Aircraft Certification Office (ACO), FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; phone: 425–917–6509; fax: 425–917–6590; email: *Rebel.Nichols@faa.gov.*

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 2001–17–20, Amendment 39–12411 (66 FR 44954, August 27, 2001). That AD applies to the specified products. The NPRM published in the **Federal Register** on October 29, 2012 (77 FR 65501). That NPRM proposed to continue to require replacing wiring for the fuel boost pumps and override pumps with new wiring, installing Teflon sleeving on the wiring, and doing associated actions; and doing repetitive inspections to detect damage of the wiring or evidence of a fuel leak with a reduced repetitive inspection interval.

Comment

We gave the public the opportunity to participate in developing this AD. We have considered the comment received. Boeing stated that it has reviewed the NPRM (77 FR 65501, October 29, 2012), and concurs with the proposed rule.

Conclusion

We reviewed the relevant data, considered the comment received, and determined that air safety and the public interest require adopting the AD as proposed—except for minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM (77 FR 65501, October 29, 2012) for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM (77 FR 65501, October 29, 2012).

Costs of Compliance

We estimate that this AD affects 5 airplanes of U.S. registry.

We estimate the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Replacement [retained action from AD 2001–17–20, Amendment 39–12411 (66 FR 44954, August 27, 2001)].	38 work-hours × $85 per hour = $3,230	$9,943	$13,173	$65,865.
Inspection [retained action from AD 2001–17–20, Amendment 39–12411 (66 FR 44954, August 27, 2001)].	3 work-hours × $85 per hour = $255 per inspection cycle.	$0	$255 per inspection cycle.	$1,275 per inspection cycle.

The new requirements of this AD add no additional economic burden. The increase in replacement labor costs of 31 work hours in AD 2001–17–20, Amendment 39–12411 (66 FR 44954, August 27, 2001), to the 38 work hours specified in this AD, is due to the opening and closing hours being included in the cost of this AD. We have received no definitive data that would enable us to provide cost estimates for the on-condition actions specified in this AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701, ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We have determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by removing airworthiness directive (AD) 2001–17–20, Amendment 39–12411 (66 FR 44954, August 27, 2001), and adding the following new AD:

2013–03–19 The Boeing Company: Amendment 39–17353; Docket No. FAA–2012–1110; Directorate Identifier 2012–NM–013–AD.

(a) Effective Date

This AD is effective March 21, 2013.

(b) Affected ADs

This AD supersedes AD 2001–17–20, Amendment 39–12411 (66 FR 44954, August 27, 2001).

(c) Applicability

This AD applies to The Boeing Company Model 707–100 long body, -200, -100B long body, and -100B short body series airplanes; Model 707–300, -300B, -300C, and -400 series airplanes; and Model 720 and 720B series airplanes; certificated in any category; line numbers 1 through 941 inclusive.

(d) Subject

Joint Aircraft System Component (JASC)/Air Transport Association (ATA) of America Code 24, Electrical Power.

(e) Unsafe Condition

This AD was prompted by a report that, while investigating a fuel leak around the bolts on the number 1 fuel boost pump on a Boeing Model 707 series airplane, an operator found wire damage where the fuel boost pump wiring exited the boost pump and entered the boost pump access area. We are issuing this AD to detect and correct damaged wiring for the fuel boost pumps and override pumps, which could cause electrical arcing that could puncture the conduit containing the wire, and result in a fuel tank explosion or a fire adjacent to the fuel tank.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Retained Replacement of Wiring, Installation of Sleeving, and Associated Actions

This paragraph restates the requirements of paragraph (a) of AD 2001–17–20, Amendment 39–12411 (66 FR 44954, August 27, 2001). Within 1 year or 4,000 flight hours after October 1, 2001 (the effective date of AD 2001–17–20), whichever occurs first: Replace the wiring for the fuel boost pumps and override pumps, install Teflon sleeving over the wiring, and do all associated actions, per the Accomplishment Instructions of Boeing Service Bulletin A3500, Revision 1, dated April 26, 2001. The associated actions include performing a general visual inspection of the area around each fuel boost pump and override pump for evidence of a fuel leak; finding the source of any fuel leak and repairing the affected area; replacing the conduit, if required; and performing a detailed visual inspection of the wiring installed in the conduit for evidence of electrical arcing or a fuel leak, or exposed copper wire. If replacement of the conduit is deferred per the Accomplishment Instructions of Boeing Service Bulletin A3500, Revision 1, dated April 26, 2001, repeat the inspection for fuel leaks every 500 flight hours until the conduit is replaced, and replace the conduit within 6,000 flight hours or 18 months, whichever occurs first.

(1) For the purposes of this AD, a general visual inspection is defined as: ''A visual examination of an interior or exterior area, installation, or assembly to detect obvious damage, failure, or irregularity. This level of inspection is made under normally available lighting conditions such as daylight, hangar lighting, flashlight, or drop-light, and may require removal or opening of access panels or doors. Stands, ladders, or platforms may be required to gain proximity to the area being checked.''

(2) For the purposes of this AD, a detailed visual inspection is defined as: ''An intensive visual examination of a specific structural area, system, installation, or assembly to detect damage, failure, or irregularity. Available lighting is normally supplemented with a direct source of good lighting at intensity deemed appropriate by the inspector. Inspection aids such as mirror, magnifying lenses, etc., may be used. Surface cleaning and elaborate access procedures may be required.''

(h) Retained Repetitive Inspections

This paragraph restates the requirements of paragraph (b) of AD 2001–17–20, Amendment 39–12411 (66 FR 44954, August 27, 2001), with a new compliance time. After replacement of the wiring per paragraph (g) of this AD, repeat the detailed visual inspection of the wiring for the fuel boost pumps and override pumps for damage, such as evidence of electrical arcing or exposed copper wire, or evidence of a fuel leak. After the effective date of this AD, repeat the inspection one time at the earlier of the times specified in paragraphs (h)(1) and (h)(2) of this AD, per the Accomplishment Instructions of Boeing Service Bulletin A3500, Revision 1, dated April 26, 2001. If any electrical arcing or exposed copper wire or evidence of a fuel leak is detected during any inspection per this paragraph, before further flight, do the applicable corrective actions (including finding the source of any fuel leak and repairing the affected area, replacing the wiring, replacing the conduit, or installing new Teflon sleeving; as applicable) according to the Accomplishment Instructions of Boeing Service Bulletin

A3500, Revision 1, dated April 26, 2001. Repeat the inspection thereafter at intervals not to exceed 15,000 flight hours.

(1) Within 30,000 flight hours after the most recent inspection.

(2) At the later of the compliance times specified in paragraphs (h)(2)(i) and (h)(2)(ii) of this AD.

(i) Within 15,000 flight hours after the most recent inspection.

(ii) Within 3 years after the effective date of this AD.

(i) Credit for Previous Actions

This paragraph provides credit for the actions required by paragraph (g) of this AD, if those actions were performed before October 1, 2001 (the effective date of AD 2001–17–20, Amendment 39–12411 (66 FR 44954, August 27, 2001)), using Boeing Alert Service Bulletin A3500, dated July 27, 2000, which is not incorporated by reference in this AD.

(j) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Seattle Certification Office (ACO), FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the ACO, send it to the attention of the person identified in the Related Information section of this AD. Information may be emailed to: *9-ANM-Seattle-ACO-AMOC-Requests@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(3) AMOCs approved previously in accordance with AD 2001–17–20, Amendment 39–12411 (66 FR 44954, August 27, 2001), are approved as AMOCs for the corresponding provisions of this AD, except for AMOCs that change the inspection frequency.

(k) Related Information

(1) For more information about this AD, contact Rebel Nichols, Aerospace Engineer, Propulsion Branch, ANM–140S, Seattle Aircraft Certification Office (ACO), FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; phone: 425–917–6509; fax: 425–917–6590; email: *Rebel.Nichols@faa.gov.*

(2) For Boeing service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Data & Services Management, P. O. Box 3707, MC 2H–65, Seattle, WA 98124–2207; telephone 206–544–5000, extension 1; fax 206–766–5680; Internet *https://www.myboeingfleet.com.*

(l) Material Incorporated by Reference

(1) The Director of the **Federal Register** approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(3) The following service information was approved for IBR on October 1, 2001 (66 FR 44954, August 27, 2001).

(i) Boeing Service Bulletin A3500, Revision 1, dated April 26, 2001.

(ii) Reserved.

(4) For Boeing service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Data & Services Management, P. O. Box 3707, MC 2H–65, Seattle, WA 98124–2207; telephone 206–544–5000, extension 1; fax 206–766–5680; Internet *https://www.myboeingfleet.com.*

(5) You may review copies of the referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

(6) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued in Renton, Washington on February 6, 2013.

Ali Bahrami,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2012–1055; Directorate Identifier 2012–NE–33–AD; Amendment 39–17351; AD 2013–03–17]

RIN 2120–AA64

Airworthiness Directives; Rolls-Royce Deutschland Ltd & Co KG Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for all Rolls-Royce Deutschland Ltd & Co KG (RRD) BR700–710A1–10 and BR700–710A2–20 turbofan engines, and certain BR700–710C4–11 model engines. This AD was prompted by RRD performing an evaluation that determined that certain high-pressure turbine (HPT) stage 1 and stage 2 discs from a specific supplier may contain steel inclusions that may cause the discs to fail before they reach their current life limits. This AD requires reducing the life limits for certain HPT stage 1 and stage 2 discs. We are issuing this AD to prevent failure of the HPT stage 1 and stage 2 discs, which could result in uncontained failure of the engine and damage to the airplane.

DATES: This AD becomes effective March 21, 2013.

ADDRESSES: The Docket Operations office is located at Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.

FOR FURTHER INFORMATION CONTACT: Robert Morlath, Aerospace Engineer, Engine Certification Office, FAA, Engine & Propeller Directorate, 12 New England Executive Park, Burlington, MA 01803; phone: 781–238–7154; fax: 781–238–7199; email: *robert.c.morlath@faa.gov.*

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to include an AD that would apply to the specified products. That NPRM was published in the **Federal Register** on November 16, 2012 (77 FR 68714). That NPRM proposed to correct an unsafe condition for the specified products. The Mandatory Continuing Airworthiness Information (MCAI) states:

> The results of a recent quality review of high pressure turbine (HPT) stage 1 and stage 2 discs identified potential for steel inclusions in some production scale parts. Further investigation concluded that all affected parts were manufactured by Udimet 720I and melted by a certain supplier. Subsequent evaluation concluded that the affected parts life limitation values declared in the engine Time Limits Manual cannot be supported for discs with potential steel inclusion.
>
> This condition, if not corrected, could lead to an uncontained HPT disc failure, potentially resulting in damage to, and/or reduced control of the aeroplane.

The FAA has further determined that the risk to the engine is increased by installing an HPT stage 1 disc and an HPT stage 2 disc from the affected population, on the same engine. Therefore the FAA is prohibiting the installation of an HPT stage 1 and HPT stage 2 discs from the affected population in the same engine. You may obtain further information by examining the MCAI in the AD docket.

Comments

We gave the public the opportunity to participate in developing this AD. We

received no comments on the NPRM (77 FR 68714, November 16, 2012).

Conclusion

We reviewed the available data and determined that air safety and the public interest require adopting the AD as proposed (77 FR 68714, November 16, 2012).

Costs of Compliance

We estimate that this AD will affect about 10 engines installed on airplanes of U.S. registry. Prorated parts life will cost about $210,000. Based on these figures, we estimate the cost of this AD on U.S. operators to be $2,100,000. Our cost estimate is exclusive of possible warranty coverage.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, Section 44701: General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this AD:

1. Is not a ''significant regulatory action'' under Executive Order 12866;

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and

3. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared a regulatory evaluation of the estimated costs to comply with this AD and placed it in the AD docket.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov;* or in person at the Docket Operations office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (phone: 800–647–5527) is provided in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new AD:

2013–03–17 Rolls-Royce Deutschland Ltd & Co KG (Formerly Rolls-Royce Deutschland GmbH, formerly BMW Rolls-Royce GmbH): Amendment 39–17351; Docket No. FAA–2012–1055; Directorate Identifier 2012–NE–33–AD.

(a) Effective Date

This airworthiness directive (AD) becomes effective March 21, 2013.

(b) Affected ADs

None.

(c) Applicability

This AD applies to the following Rolls-Royce Deutschland Ltd & Co KG (RRD) turbofan engines that have any of the high-pressure turbine (HPT) stage 1 or stage 2 discs with a serial number (S/N) listed in Table 1 to paragraph (c) of this AD, installed:

(1) RRD BR700–710A1–10 and BR700–710A2–20 turbofan engines; and

(2) BR700–710C4–11 model engines that have hardware configuration standard 710C4–11 or 710C4–11/10 engraved on the engine data plate.

TABLE 1 TO PARAGRAPH (C)—AFFECTED HPT STAGE 1 AND STAGE 2 DISCS

S/Ns of HPT Stage 1 Discs, Part Number (P/N) BRR23952	S/Ns of HPT Stage 2 Discs, P/N BRR22008
LDRQA05719	LDRQA05791
LDRQA05720	LDRQA05944
LDRQA05721	LDRQA05945
LDRQA05722	
LDRQA05723	
LDRQA05724	
LDRQA05726	
LDRQA05727	
LDRQA05841	
LDRQA05842	

(d) Reason

This AD was prompted by RRD performing an evaluation that determined that certain HPT stage 1 and stage 2 discs from a specific supplier may contain steel inclusions that may cause the discs to fail before they reach their current life limits. We are issuing this AD to prevent failure of the HPT stage 1 and stage 2 discs, which could result in uncontained failure of the engine and damage to the airplane.

(e) Actions and Compliance

Unless already done, remove from service the HPT stage 1 and stage 2 discs listed by S/N in Table 1 to paragraph (c) of this AD, at the following:

(1) For BR700–710A1–10, BR700–710A2–20, and BR700–710C4–11 engine models (without RRD Mod 72–101466), remove the HPT stage 1 and stage 2 discs from service before accumulating 3,000 cycles-since-new (CSN).

(2) For the BR700–710C4–11 engine model (with RRD Mod 72–101466), remove the HPT stage 1 and stage 2 discs from service before accumulating 2,300 CSN.

(f) Installation Prohibition

After the effective date of this AD, do not install an HPT stage 1 and an HPT stage 2 disc, identified by S/N in Table 1 to paragraph (c) of this AD, in the same engine.

(g) Alternative Methods of Compliance (AMOCs)

The Manager, Engine Certification Office, may approve AMOCs for this AD. Use the procedures found in 14 CFR 39.19 to make your request.

(h) Related Information

(1) For more information about this AD, contact Robert Morlath, Aerospace Engineer, Engine Certification Office, FAA, Engine & Propeller Directorate, 12 New England Executive Park, Burlington, MA 01803; phone: 781–238–7154; fax: 781–238–7199; email: *robert.c.morlath@faa.gov*.

(2) Refer to European Aviation Safety Agency Airworthiness Directive 2012–0166, dated August 30, 2012, and Rolls-Royce Deutschland Ltd & Co KG Alert Service Bulletin SB–BR700–72–A900508, dated July 26, 2012, for related information. Contact Rolls-Royce Deutschland Ltd & Co KG, Eschenweg 11, Dahlewitz, 15827

Blankenfelde-Mahlow, Germany; phone: 49 0 33–7086–1883; fax: 49 0 33–7086–3276, for a copy of this service information.

(3) You may view this service information at the FAA, Engine & Propeller Directorate, 12 New England Executive Park, Burlington, MA. For information on the availability of this material at the FAA, call 781–238–7125.

(i) Material Incorporated by Reference

None.

Issued in Burlington, Massachusetts, on February 5, 2013.

Robert J. Ganley,

Acting Manager, Engine & Propeller Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

CONSUMER PRODUCT SAFETY COMMISSION

[Docket No. CPSC–2012–0040]

16 CFR Part 1199

Children's Toys and Child Care Articles Containing Phthalates; Final Guidance on Inaccessible Component Parts

AGENCY: Consumer Product Safety Commission.

ACTION: Final rule.

SUMMARY: On August 14, 2008, Congress enacted the Consumer Product Safety Improvement Act of 2008 (CPSIA), Public Law 110–314. Section 108 of the CPSIA, as amended by Public Law 112–28, provides that the prohibition on specified products containing phthalates does not apply to any component part of children's toys or child care articles that is not accessible to a child through normal and reasonably foreseeable use and abuse of such product. In this document, the Consumer Product Safety Commission (CPSC or Commission) issues guidance on inaccessible component parts in children's toys or child care articles subject to section 108 of the CPSIA.

DATES: This rule is effective February 14, 2013.

FOR FURTHER INFORMATION CONTACT: Kristina M. Hatlelid, Ph.D., M.P.H., Toxicologist, Office of Hazard Identification and Reduction, U.S. Consumer Product Safety Commission, 5 Research Place, Rockville, MD 20850; telephone (301) 987–2558; *khatlelid@cpsc.gov.*

SUPPLEMENTARY INFORMATION:

A. Background

1. Statutory Authority

On August 14, 2008, Congress enacted the CPSIA (Pub. L. 110–314), as amended on August 12, 2011, by Public Law 112–28. Section 108 of the CPSIA, titled, ''Prohibition on Sale of Certain Products Containing Specified Phthalates,'' permanently prohibits the sale of any ''children's toy or child care article'' containing more than 0.1 percent of three specified phthalates (di-(2-ethylhexyl) phthalate (DEHP), dibutyl phthalate (DBP), and benzyl butyl phthalate (BBP)). Section 108 of the CPSIA also prohibits, on an interim basis, ''toys that can be placed in a child's mouth'' or ''child care article'' containing more than 0.1 percent of three additional phthalates (diisononyl phthalate (DINP), diisodecyl phthalate (DIDP), and di-n-octyl phthalate (DnOP)). These prohibitions became effective on February 10, 2009. 15 U.S.C. 2057c(a), (b). The terms or phrases ''children's toy,'' ''toy that can be placed in a child's mouth,'' and ''child care article,'' are defined in section 108(g) of the CPSIA. A ''children's toy'' is defined as a ''consumer product designed or intended by the manufacturer for a child 12 years of age or younger for use by the child when the child plays.'' A toy can be placed in a child's mouth ''if any part of the toy can actually be brought to the mouth and kept in the mouth by a child so that it can be sucked and chewed. If the children's product can only be licked, it is not regarded as able to be placed in the mouth. If a toy or part of a toy in one dimension is smaller than 5 centimeters, it can be placed in a child's mouth.'' The term ''child care article'' means ''a consumer product designed or intended by the manufacturer to facilitate sleep or the feeding of children age 3 years and younger, or to help such children with sucking or teething.'' 15 U.S.C. 2057c(g).

Section 108(d) of the CPSIA provides that the prohibitions for the specified phthalates shall not apply to any component part of a children's toy or child care article that is not accessible to a child through normal and reasonably foreseeable use and abuse of such product, as determined by the Commission. That section further provides that a component part is not accessible, if such component part is not physically exposed, by reason of a sealed covering or casing, and does not become physically exposed through reasonably foreseeable use and abuse of the product. Reasonably foreseeable use and abuse includes swallowing, mouthing, breaking, or other children's activities, and the aging of the product. 15 U.S.C. 2057c(d)(1).

The CPSIA directs the Commission to: (A) Promulgate a rule providing guidance with respect to what product components, or classes of components, will be considered to be inaccessible; or (B) adopt the same guidance with respect to inaccessibility that was adopted by the Commission with regard to accessibility of lead under section 101(b)(2)(B) (15 U.S.C. 1278a(b)(2)(B)), with additional consideration, as appropriate, of whether such component can be placed in a child's mouth. 15 U.S.C. 2057c(d)(3).

Section 108 of the CPSIA also directed the Commission, not earlier than 180 days after the date of enactment of this Act [enacted Aug. 14, 2008], to appoint a Chronic Hazard Advisory Panel (CHAP), pursuant to the procedures of section 28 of the CPSA (15 U.S.C. 2077), to study the effects on children's health of all phthalates and phthalate alternatives as used in children's toys and child care articles. 15 U.S.C. 2057c(b)(2). The Commission appointed the CHAP on April 14, 2010, to study the effects on children's health of all phthalates and phthalate alternatives, as used in children's toys and child care articles. The CHAP currently is working on a report, including recommendations, to be sent to the Commission.

Under section 108(d)(2) of the CPSIA, the Commission may revoke any or all exclusions granted based on the inaccessible component parts provision of section 108 of the CPSIA, at any time, and require that any or all component parts manufactured after such exclusion is revoked, comply with the prohibitions of phthalates, if the Commission finds, based on scientific evidence, that such compliance is necessary to protect the public health or safety. 15 U.S.C. 2057c(d)(2).

2. Notice of Proposed Guidance

In the **Federal Register** notice of July 31, 2012 (77 FR 45297), the Commission published a proposed guidance on inaccessible phthalate-containing component parts. As stated in the preamble to the proposed guidance (77 FR 45299), the Commission proposed to adopt the lead guidance for determining inaccessible component parts for phthalates, with the exception of polyvinyl chloride (PVC or vinyl) or other plasticized materials covering mattresses and other sleep surfaces designed or intended by the manufacturer to facilitate sleep of children age 3 and younger. Both the lead guidance and proposed phthalate guidance specified that a children's product, toy, or child care article that is completely enclosed or covered by fabric is considered inaccessible to a child, unless the product or part of the product in one dimension is smaller

than 5 centimenters. However, the lead guidance did not exclude vinyl or other plasticized materials covering mattresses and other sleep surfaces. The proposed phthalate guidance found that while lead is unlikely to leach through fabric except in the case of mouthing or swallowing an item, sheets or mattress pads that cover a vinyl sleep or other plasticized sleep surface should not serve as a barrier to the potential exposure of phthalates for young children. A child's skin comes into close contact with mattresses and similar products for large portions of a day, and a mattress cover could be dampened with a spilled beverage, saliva, sweat, urine, or other liquid, which could facilitate phthalate migration through a fabric covering. 74 FR 39539 (August 7, 2009).

In addition, although section 108 did not specifically disqualify paint, coatings, or electroplating as barriers that would render phthalates inaccessible, the Commission proposed to adopt the same guidance with respect to inaccessibility for phthalates that was adopted by the Commission with regard to inaccessibility of lead. The proposed phthalates guidance stated that paint, coatings, and electroplating may not be considered a barrier that would render phthalate-containing component parts of toys and child care articles inaccessible. The proposed phthalates guidance also noted that in some applications, phthalates are added to paint, printing inks, or coatings. 77 FR45299.

In addition, the Commission determined preliminarily that:

- An accessible component part is one that is capable of being touched or mouthed by a child;
- An inaccessible component part is one that is located inside the product and not capable of being touched or mouthed by a child, whether or not such part is visible to a user of the product;
- An inaccessible part is one that may be enclosed in any type of material, *e.g.,* hard or soft plastic, rubber, or metal (with the exception of vinyl or other plasticized materials covering mattresses or other sleep surfaces for children age 3 and younger);
- To assess whether a part is inaccessible, the accessibility probes defined in the Commission's existing regulations for evaluating accessibility of sharp points or sharp metal or glass edges (16 CFR 1500.48 and 1500.49) are appropriate. An ''accessible phthalate-containing component part'' would be considered one that contacts any portion of the specified segment of the accessibility probe. An ''inaccessible phthalate-containing component part'' would be considered as one that cannot be contacted by any portion of the specified segment of the accessibility probe; and
- Use and abuse tests are appropriate for evaluating whether phthalate-containing component parts of a product become accessible to a child during normal and reasonably foreseeable use and abuse of the product by a child (with the exception of the bite test). The purpose of the tests is to simulate use and damage or abuse of a product by children and to expose potential hazards that might result from use and abuse. 16 CFR 1500.50–1500.53.

B. Discussion of Comments to the Proposed Guidance and CPSC's Responses

Five comments were received on the proposed guidance. Two of the comments were from industry and three from consumers or nonprofit consumer and public health organizations. Most comments express general support for the guidance.

1. Fabric Materials as a Barrier to Accessibility of Component Parts

Comment: One commenter states that fabric should not be considered a barrier, regardless of the size of the component, because children could be exposed to phthalates through the fabric.

Response: As provided in CPSC staff's briefing memo ''Guidance for Evaluating Accessibility of Phthalate-Containing Component Parts'' dated July 13, 2012, CPSC staff is not aware of any studies that show the propensity for phthalates to move from a phthalate-containing material through an intact, non-phthalate-containing material, such as an outside covering, where it could eventually reach the outside of a product. Furthermore, CPSC staff's review showed that the non-vapor passive movement of phthalates within a product, if it exists, would be exceedingly slow and would never account for any more than a small, negligible fraction of the original phthalate content of the inaccessible phthalate-containing part. Based on CPSC staff's analysis, the Commission finds that, in most cases, phthalates that are inaccessible would not result in physical exposure to phthalates, unless it is reasonably foreseeable that a component part will become physically exposed through mouthing, swallowing, breaking, or other children's activities, and aging of the product. Accordingly, a children's toy or child care article that is, or contains, a phthalate-containing part that is enclosed, encased, or covered by fabric and passes the appropriate use and abuse tests on such covers, is considered inaccessible to a child, unless the product, or part of the product, in one dimension, is smaller than 5 centimeters; *i.e.,* a fabric-covered component part is not inaccessible if the product, or part of the product, can be placed in a child's mouth.

Moreover, the Commission reiterates that vinyl or other plasticized materials covering mattresses and other sleep surfaces designed or intended by a manufacturer to facilitate sleep for children age 3 and younger should not be considered to be made inaccessible through the use of a fabric covering. As discussed in the preamble of the proposed guidance, the Commission reviewed phthalate-containing vinyl or other plasticized materials covering mattresses and sleep surfaces intended for young children. These mattresses or sleep surfaces are too large to be placed in a child's mouth. Although such mattresses or sleep surfaces may be covered by fabric, such as sheets or mattress pads, additional consideration was given to whether children would become physically exposed to the vinyl or other plasticized materials covering the surface through reasonably foreseeable use and abuse of the products, including swallowing, mouthing, breaking, or other children's activities, and the aging of the product. The Commission determined there may be instances in which a child's skin comes into close contact with a fabric covering over a phthalate-containing item for large portions of a day, such as a vinyl or other plasticized material covering a mattress or other sleep surface. Young children typically spend more than half of each day sleeping or resting, frequently on a mattress or similar item. While a mattress is typically covered with a sheet or mattress pad, such non-permanently affixed coverings that are either supplied with the mattress or provided by the consumer should not be considered to render the underlying material inaccessible. As with the potential transfer of phthalates by saliva during mouthing of an item, a mattress cover dampened with a spilled beverage, saliva, sweat, urine, or other liquid, could facilitate phthalate migration through the fabric. Furthermore, a nonpermanent covering cannot be assumed to be in use at all times; if it is not, the mattress could no longer be considered inaccessible. For these reasons, vinyl (or other plasticized material) covered mattresses/sleep surfaces, which contain phthalates, designed or intended by a manufacturer

to facilitate sleep for children age 3 and younger, should not be considered to be made inaccessible through the use of a fabric covering.

Comment: One commenter states that the proposed guidance ''exempts components covered in fabric provided that the underlying component is not smaller than 5 centimeters in any one dimension.'' According to the commenter, any exposure to phthalates-containing component parts within fabric coverings is very low and all phthalate-containing components parts covered by fabric should be exempt, irrespective of the size of the part. The commenter also suggests that a *de minimis* exception should be considered for accessible small plasticized parts.

Response: The commenter misinterprets the fabric covering restriction in the proposed guidance on inaccessible phthalate-containing component parts. The proposed guidance states that ''a children's product that is or contains a phthalate-containing part which is enclosed, encased, or covered by fabric and passes the appropriate use and abuse tests on such covers, is inaccessible to a child unless the product or part of the product in one dimension is smaller than 5 centimeters.'' However, the 5 centimeter measure is applied to the fabric-covered part or product (i.e., a fabric covered plastic button), not to the size of the underlying phthalate-containing component part. If a toy or part of a toy in one dimension is smaller than 5 centimeters, it can be placed in a child's mouth (i.e., a fabric covered plastic ear on a stuffed animal). A phthalate-containing component part which is encased by a fabric covering is considered to be accessible to a child if the part or product is smaller than 5 centimeters in any dimension because such a part or product could be placed in a child's mouth, and the fabric is not expected to perform as a barrier to saliva or other fluids or to prevent direct contact by the child with the saliva or other fluid after a fluid's contact with the phthalate-containing part. Even if a fabric covering passes the applicable use and abuse tests, such a covering is not a barrier to the underlying material if the product can be placed in the mouth because it is smaller than 5 centimeters.

If the phthalate-containing component part that is encased by fabric covering is 5 centimeters or greater in dimension, such a part of product is considered to be inaccessible to a child, because the part or product in not likely to be put in the mouth or swallowed (i.e., plastic electronic box inside a stuffed animal). As discussed above, however, vinyl or other plasticized material covering a mattress or other sleep surface which is designed or intended by a manufacturer to facilitate sleep of children age 3 and younger, even when covered with a sheet or mattress pad, will still be considered accessible given that the foreseeable use and abuse of the product, including spilled beverages, saliva, sweat, urine, or other liquids, may facilitate phthalate migration through the fabric.

The statute does not provide for a *de minimis* exception for accessible component parts, and the Commission is not considering in this guidance such exceptions for accessible phthalate-containing children's toys and child care articles. However, we note that a CHAP has been convened to study the effects on children's health of all phthalates and phthalate alternatives, as used in children's toys and child care articles. Based on the findings and recommendations of the CHAP, any guidance concerning phthalates may be modified and revised, as appropriate.

Comment: The same commenter also states that the exclusion of fabric materials as a barrier to accessibility for phthalate-containing parts or products smaller than 5 centimeters is inconsistent with the Commission's use and abuse testing.

Response: The proposed guidance provides that accessibility of component parts, as a result of normal and reasonably foreseeable use and abuse of the product, should be evaluated using the use and abuse tests under the Commission's regulations at 16 CFR 1500.50 through 1500.53 (excluding the bite test in paragraph (c) of §§ 1500.51–1500.53). We disagree that the exclusion of fabric materials as a barrier to accessibility is inconsistent with the Commission's use and abuse testing. The Commission finds, in general, that fabric coverings can be considered barriers to the underlying materials because such coverings prevent direct physical contact with the phthalate-containing parts. The appropriate use and abuse tests, such as the test for the integrity of seams, should be used to evaluate fabric coverings to ensure that the component parts remain physically inaccessible to a child. Use and abuse testing generally is applied to evaluate whether a component part may become physically accessible as a result of reasonably foreseeable use and abuse of the product, including swallowing, mouthing, breaking, or other children's activities. Historically, this testing has been used to evaluate the presence of physical hazards, such as small parts, which may be choking hazards, or sharp points and edges. In the case of lead-containing or phthalate-containing component parts, these tests are used to evaluate the potential for physical contact with the parts. The material beneath a fabric covering should not be considered to be inaccessible to a child if the part or product is smaller than 5 centimeters in any dimension because such a part or product could be placed in a child's mouth, and fabric is not expected to perform as a barrier to saliva or other fluids or to prevent direct contact by the child with the saliva or other fluid after a fluid's contact with the phthalate-containing part. Even if a fabric covering passes the applicable use and abuse tests, such a covering is not a barrier to the underlying material if the product can be placed in the mouth.

2. Exclusion of the ''Bite Test'' from Use and Abuse Testing

Comment: Two commenters question the exclusion of the ''bite test'' from the use and abuse testing and requested that it be included in the guidance.

Response: Currently, the Commission does not use the bite test specified in 16 CFR 1500.51–1500.53), as a result of a court case (*Clever Idea Co., Inc.* v. *Consumer Product Safety Commission,* 385 F. Supp. 688 (E.D. N.Y. 1974)) that questioned the appropriateness of this test. Because the bite test currently is not applied as part of use and abuse testing for consumer products, it will not be applied for the purposes of evaluating products for accessibility of phthalate-containing component parts. However, this requirement may be modified in a future proceeding if the bite test is reevaluated.

3. Requirements for Labeling of Art Materials

Comment: One commenter requests consistency among the requirements for paints and other surface coatings for lead and phthalates and the requirements under ASTM D 4236 and ASTM F 963 that address art materials. This commenter specifically requests that bottles of paint available in retail stores should comply with all requirements because such paint could be used by children or on products for children.

Response: This comment is outside the scope of this guidance, which addresses the issue of when a phthalate-containing component part of a children's toy or child care article is considered to be inaccessible to a child. The *Standard Consumer Safety Specification for Toy Safety,* ASTM F 963 requires that all art materials comply with the Labeling of Hazardous Art Materials Act (LHAMA). In addition to the LHAMA requirements discussed above, art materials that are designed or

intended primarily for children 12 years of age or younger, are also required, like all children's products, to comply with the requirements of the CPSIA, including third party testing and certification.

C. Effective Date

Although guidance documents do not require a particular effective date under the Administrative Procedure Act, 5 U.S.C. 553(d)(2), the Commission recognizes the need for providing the guidance expeditiously. In addition, material published in the Code of Federal Regulations must have an effective date. Accordingly, the guidance will take effect upon publication in the **Federal Register**.

D. Final Guidance

The Commission is issuing the final guidance without substantive change from the proposed guidance.

List of Subjects in 16 CFR Part 1199

Business and industry, Infants and children, Consumer protection, Imports, Toys.

For the reasons stated above, the Commission adds 16 CFR part 1199 to read as follows:

PART 1199— CHILDREN'S TOYS AND CHILD CARE ARTICLES CONTAINING PHTHALATES: GUIDANCE ON INACCESSIBLE COMPONENT PARTS

Authority: 15 U.S.C. 1251–1289, 86 Stat. 1207, 125 Stat. 273.

§ 1199.1 Children's toys and child care articles: Phthalate-containing inaccessible component parts.

(a) Section 108 of the Consumer Product Safety Improvement Act of 2008 (CPSIA) permanently prohibits the sale of any ''children's toy or child care article'' containing more than 0.1 percent of three specified phthalates (di-(2-ethylhexyl) phthalate (DEHP), dibutyl phthalate (DBP), and benzyl butyl phthalate (BBP)). Section 108 of the CPSIA also prohibits, on an interim basis, ''toys that can be placed in a child's mouth'' or ''child care article'' containing more than 0.1 percent of three additional phthalates (diisononyl phthalate (DINP), diisodecyl phthalate (DIDP), and di-n-octyl phthalate (DnOP)). A ''children's toy'' is defined as a consumer product designed or intended by the manufacturer for a child 12 years of age or younger for use by the child when the child plays. A toy can be placed in a child's mouth if any part of the toy can actually be brought to the mouth and kept in the mouth by a child so that it can be sucked and chewed. If the children's product can only be licked, it is not regarded as able to be placed in the mouth. If a toy or part of a toy in one dimension is smaller than 5 centimeters, it can be placed in the mouth. The term ''child care article'' means a consumer product designed or intended by the manufacturer to facilitate sleep or the feeding of children age 3 years and younger, or to help such children with sucking or teething.

(b) Section 108(d) of the CPSIA provides that the prohibitions in paragraph (a) of this section do not apply to component parts of a children's toy or child care article that are not accessible to children through normal and reasonably foreseeable use and abuse of such product, as determined by the Commission. A component part is not accessible if it is not physically exposed, by reason of a sealed covering or casing, and does not become physically exposed through reasonably foreseeable use and abuse of the product, including swallowing, mouthing, breaking, or other children's activities, and the aging of the product.

(c) Section 108(d)(3) of the CPSIA directs the Commission to promulgate a rule to provide guidance with respect to what product components or classes of components will be considered to be inaccessible for a children's toy or child care article that contains phthalates or adopt the same guidance with respect to inaccessibility that was adopted by the Commission with regard to accessibility of lead under section 101(b)(2)(B) (15 U.S.C. 1278a(b)(2)(B)), with additional consideration, as appropriate, of whether such component can be placed in a child's mouth. 15 U.S.C. 2057c(d)(3). The Commission adopts the same guidance with respect to inaccessibility for the phthalates that was adopted by the Commission with regard to accessibility of lead, however, vinyl (or other plasticized material) covered mattresses/sleep surfaces, that contain phthalates that are designed or intended by the manufacturer to facilitate sleep of children age 3 and younger, are considered accessible and would not be considered inaccessible through the use of fabric coverings, including sheets and mattress pads.

(d) The accessibility probes specified for sharp points or edges under the Commission's regulations at 16 CFR 1500.48–1500.49 should be used to assess the accessibility of phthalate-containing component parts of a children's toy or child care article. A phthalate-containing component part would be considered accessible if it can be contacted by any portion of the specified segment of the accessibility probe. A phthalate-containing component part would be considered inaccessible if it cannot be contacted by any portion of the specified segment of the accessibility probe.

(e) For children's toys or child care articles intended for children that are 18 months of age or younger, the use and abuse tests set forth under the Commission's regulations at 16 CFR 1500.50 and 16 CFR 1500.51 (excluding the bite test of § 1500.51(c)), should be used to evaluate accessibility of phthalate-containing component parts of a children's toy or child care article as a result of normal and reasonably foreseeable use and abuse of the product.

(f) For children's toys or child care articles intended for children that are over 18 months, but not over 36 months of age, the use and abuse tests set forth under the Commission's regulations at 16 CFR 1500.50 and 16 CFR 1500.52 (excluding the bite test of § 1500.52(c)), should be used to evaluate accessibility of phthalate-containing component parts of a children's toy or child care article as a result of normal and reasonably foreseeable use and abuse of the product.

(g) For children's toys intended for children that are over 36 months, but not over 96 months of age, the use and abuse tests set forth under the Commission's regulations at 16 CFR 1500.50 and 16 CFR 1500.53 (excluding the bite test of § 1500.53(c)), should be used to evaluate accessibility of phthalate-containing component parts of a children's toy as a result of normal and reasonably foreseeable use and abuse of the product.

(h) For children's toys intended for children over 96 months through 12 years of age, the use and abuse tests set forth under the Commission's regulations at 16 CFR 1500.50 and 16 CFR 1500.53 (excluding the bite test of § 1500.53(c)) intended for children ages 37–96 months should be used to evaluate accessibility of phthalate-containing component parts of a children's toy as a result of normal and reasonably foreseeable use and abuse of the product.

(i) Because the Commission adopts the same guidance with respect to inaccessibility for phthalates that was adopted by the Commission with regard to inaccessibility of lead, paint, coatings, and electroplating may not be considered a barrier that would render phthalate-containing component parts of toys and child care articles inaccessible. A children's toy or child care article that is or contains a phthalate-containing part that is enclosed, encased, or covered by fabric and passes the appropriate use and

abuse tests on such covers, is considered inaccessible to a child, unless the product or part of the product, in one dimension, is smaller than 5 centimeters. However, vinyl (or other plasticized material) covered mattresses/sleep surfaces that contain phthalates that are designed or intended by the manufacturer to facilitate sleep of children age 3 and younger, are considered accessible and would not be considered inaccessible through the use of fabric coverings, including sheets and mattress pads.

(j) The intentional disassembly or destruction of products by children older than age 8 years, by means or knowledge not generally available to younger children, including use of tools, will not be considered in evaluating products for accessibility of phthalate-containing components.

Dated: February 11, 2013.

Todd A. Stevenson,

Secretary, Consumer Product Safety Commission.

[FR Doc. 2013–03400 Filed 2–13–13; 8:45 am]

BILLING CODE 6335–01–P

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 926

[SATS No. MT–032–FOR; Docket ID No. OSM–2011–0011]

Montana Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Final rule.

SUMMARY: We are issuing a final decision on an amendment to the Montana regulatory program (the Montana program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA or the Act). We are not approving the amendment. Montana proposes changes to the Montana Strip and Underground Mine Reclamation Act (MSUMRA) that differentiate between coal beneficiation and coal preparation plants. Montana revised its program to clarify ambiguities and improve operational efficiency.

DATES: *Effective Date:* February 14, 2013.

FOR FURTHER INFORMATION CONTACT: Jeffrey Fleischman, Casper Field Office Director, Telephone: (307) 261–6550, Internet address: *jfleischman@OSMRE.gov.*

SUPPLEMENTARY INFORMATION:

I. Background on the Montana Program
II. Submission of the Proposed Amendment
III. Office of Surface Mining Reclamation and Enforcement's (OSMRE's) Findings
IV. Summary and Disposition of Comments
V. OSMRE's Decision
VI. Procedural Determinations

I. Background on the Montana Program

Section 503(a) of the Act permits a State to assume primacy for the regulation of surface coal mining and reclamation operations on non-Federal and non-Indian lands within its borders by demonstrating that its State program includes, among other things, ''a State law which provides for the regulation of surface coal mining and reclamation operations in accordance with the requirements of this Act * * *; and rules and regulations consistent with regulations issued by the Secretary pursuant to this Act.'' See 30 U.S.C. 1253(a)(1) and (7). On the basis of these criteria, the Secretary of the Interior conditionally approved the Montana program on April 1, 1980. You can find background information on the Montana program, including the Secretary's findings, the disposition of comments, and conditions of approval in the April 1, 1980, **Federal Register** (45 FR 21560). You can also find later actions concerning Montana's program and program amendments at 30 CFR 926.15, 926.16, and 926.30.

II. Submission of the Proposed Amendment

By letter dated June 7, 2011, Montana sent us a proposed amendment to its program (SATS number: MT–032–FOR, Administrative Record Docket ID No. OSM–2011–0011) under SMCRA (30 U.S.C. 1201 *et seq.*). Montana submitted the amendment to include changes made to the MSUMRA as a result of the Montana Legislature's 2011 passage of a Senate Bill (SB 297) relating to coal beneficiation. Montana sent the amendment to include changes made at its own initiative.

We announced receipt of the proposed amendment in the October 17, 2011, **Federal Register** (76 FR 64045). In the same document, we opened the public comment period and provided an opportunity for a public hearing or meeting on the amendment's adequacy (Administrative Record No. MT–29–11; Administrative Record Document ID No. OSM–2011–0011–0001). We did not hold a public hearing or meeting because no one requested one. The public comment period ended on November 16, 2011. We received four public comments and four Federal agency comments (discussed under ''IV. Summary and Disposition of Comments'').

During our review of Montana's submittal and the comments received, we identified concerns with the amendment proposal including its newly proposed statutory definition of ''Coal beneficiation plant'' at Montana Code Annotated (MCA) Section 82–4–203(9), as well as proposed revisions to its currently approved statutory definitions of ''Coal preparation plant'' at MCA Section 82–4–203(11); ''Operation'' at MCA Section 82–4–203(34); ''Operator'' at MCA Section 82–4–203(35); ''Strip mining'' at MCA Section 82–4–203(48) (b); and ''Underground mining'' at MCA Section 82–4–203(52). We notified Montana of these concerns by letter dated February 14, 2012 (Administrative Record No. MT–29–15; Administrative Record Document ID No. OSM–2011–0011–0011).

We delayed final rulemaking to afford Montana the opportunity to submit new material to address the deficiencies. Montana responded in a letter dated March 14, 2012, that all of the proposed changes are legislative amendments to the MSUMRA and because they are changes in statute and not rule, the Montana Department of Environmental Quality (DEQ) has no authority to amend them (Administrative Record No. MT–29–16; Administrative Record Document ID No. OSM–2011–0011–0012). As a result, Montana stated that it will not be submitting revised amendments or draft proposed changes in response to our February 14, 2012, letter. Therefore, we are proceeding with the final rule **Federal Register** document.

III. OSMRE's Findings

30 CFR 732.17(h)(10) requires that State program amendments meet the criteria for approval of State programs set forth in 30 CFR 732.15, including that the State's laws and regulations are in accordance with the provisions of the Act and consistent with the requirements of 30 CFR Part 700. In 30 CFR 730.5, OSMRE defines ''consistent with'' and ''in accordance with'' to mean (a) with regard to SMCRA, the State laws and regulations are no less stringent than, meet the minimum requirements of, and include all applicable provisions of the Act and (b) with regard to the Federal regulations, the State laws and regulations are no less effective than the Federal regulations in meeting the requirements of SMCRA.

Following are the findings we made concerning the amendment under SMCRA and the Federal regulations at

30 CFR 732.15 and 732.17. We are not approving the amendment as described below.

A. Minor Revisions to Montana's Statutes

Montana proposes minor wording and editorial changes to its currently approved statutory definitions of ''Coal conservation plan'' at MCA Section 82–4–203(9); ''Imminent danger to the health and safety of the public'' at MCA Section 82–4–203(25); ''Minable coal'' at MCA Section 82–4–203(32); ''Prospecting'' at MCA Section 82–4–203(41) (b); and ''Residential'' at MCA Section 82–4–203(46).

These minor wording and editorial changes do not impact the effectiveness of the current statutes and do not adversely affect other aspects of the program. OSMRE was prepared to approve them. However, in its March 14, 2012, letter Montana explained that as a matter of state law OSMRE must approve Chapter 408 as a whole before any portion of it can take effect [SB 297 was published as Chapter 408, Laws of 2011 by the Secretary of State].

Specifically, Montana referenced Section 2 of Chapter 408 which provides:

> [This act] is effective on the date that the office of surface mining reclamation and enforcement publishes notice in the **Federal Register** that [this act] is approved pursuant to 30 CFR 732.17.

Therefore, Montana advised that the minor grammatical changes will not become effective if OSMRE disapproves any amendments made by Chapter 408. During our review of Montana's submittal, we found that the proposed amendments to the definitions of ''coal preparation plant,'' ''operation,'' ''operator,'' ''strip mining,'' and ''underground mining'' are less effective than Federal regulations or less stringent than SMCRA.

Based on Montana's explanation above and the ''contingent voidness'' clause in Section 2 of Chapter 408, we are not approving the proposed minor wording and editorial changes.

B. Revisions to Montana's Statutes That Are Not the Same as the Corresponding Provisions of SMCRA and the Federal Regulations

1. Definition of ''Coal Beneficiation Plant'' at Montana Code Annotated (MCA) Section 82–4–203(9)

At its own initiative, Montana proposes a new definition for ''Coal beneficiation plant'' at Montana Code Annotated (MCA) Section 82–4–203(9) to mean ''a commercial facility where coal is subject to coal preparation that is not operated, owned, or controlled by the mine operator of the mine providing the coal.'' While there are no direct Federal counterpart provisions, the definitions of ''Surface coal mining operations'' at SMCRA Section 701(28)(A) and 30 CFR 700.5, and the definitions of ''Coal preparation'' and ''Coal preparation plant'' at 30 CFR 701.5 all speak to the activities of chemical or physical processing, cleaning, concentrating, or other processing or preparation of coal. Similarly, Montana's definitions of ''Coal preparation'' and ''Coal preparation plant'' include coal processing and preparation.

In its submittal, Montana expresses its intent to exclude coal beneficiation plants from permitting and regulation under the MSUMRA. Montana's proposed definition of ''Coal beneficiation plant'' does not sufficiently distinguish between coal preparation and coal beneficiation plants for purposes of regulation under SMCRA and the MSUMRA. Specifically, the proposed definition references ''a commercial facility where coal is subject to coal preparation.'' However, Montana's currently approved definition of ''Coal preparation plant'' at MCA Section 82–4–203(11) also references ''a commercial facility where coal is subject to coal preparation.'' Montana does propose to revise its definition of ''Coal preparation plant'' by specifying that coal preparation is ''in connection with a strip mine or underground coal mine.'' Nevertheless, Montana's definitions for ''Coal beneficiation plant'' and ''Coal preparation plant'' both reference a commercial facility where coal is subject to coal preparation and as such are largely synonymous.

In identifying the relationship necessary for coal preparation to be ''in connection with'' a coal mine, the principle stated by OSMRE in a May 5, 1983, **Federal Register** (48 FR 20393) preamble to the definition of ''surface coal mining operations'' should be referenced. In that preamble, OSMRE stated its belief that the phrase in Section 701(28)(A) of the Act and 30 CFR 700.5 ''in connection with'' should be interpreted broadly. OSMRE also cited examples of facilities that could be considered to be ''in connection with'' a coal mine, including ''facilities which receive a significant portion of their coal from a mine; facilities which receive a significant portion of the output from a mine; facilities which have an economic relationship with a mine; or any other type of integration that exists between a facility and a mine.'' Further, OSMRE stated that a ''facility need not be owned by a mine owner to be in connection with a mine.''

Therefore, ownership, control, or operation by someone other than the mine operator is not the only criterion that determines whether a coal beneficiation facility or coal preparation plant is ''in connection with'' a coal mine. OSMRE amended its regulations, as published in the **Federal Register** (November 22, 1988, 53 FR 47384), to clarify the circumstances under which coal preparation plants located outside the permit area of a mine are subject to the performance standards and permitting requirements of SMCRA. The associated preamble clarified that off-site coal preparation is subject to regulation under SMCRA only when it is conducted in connection with a coal mine. No definition of the term ''in connection with'' is included in the rule. OSMRE stated in the preamble that any attempt to further define this phrase would unduly restrict the discretion that the regulatory authority must have in order to make valid decisions about the applicability of SMCRA in individual cases. In the same preamble, OSMRE stated that the elements of (1) geographic proximity and (2) functional relationship are proper factors to consider in evaluating whether an off-site coal preparation plant is subject to regulation under SMCRA. As a result of a subsequent U.S. District Court decision, OSMRE published a notice in the **Federal Register** (January 8, 1993, 58 FR 3466) to clarify that geographic proximity may not be the decisive factor in deciding whether to regulate an off-site coal preparation plant. To allow proximity to be the decisive factor would render ''in connection with'' equivalent to ''at or near.'' That is not the Secretary's intent. Instead, the Secretary's intent is to provide regulatory authorities appropriate guidance and discretion in deciding which off-site coal processing plants to regulate.

Since the term ''in connection with'' is not defined in the rule, OSMRE clarified in the **Federal Register** (November 22, 1988, 53 FR 47384) several factors that should be considered in order to determine whether a coal preparation plant located outside the permit area of a mine is operated in connection with a coal mine, thus constituting a surface coal mining operation and subject to the performance standards and permitting requirements of SMCRA. Specifically, in addition to geographic proximity and functional relationship, other factors, including economic and operational relationship and point of ultimate use are to be considered by regulatory

authorities when evaluating whether such facilities are subject to regulation under SMCRA.

Accordingly, we find that Montana's proposed definition is too vague to exclude coal beneficiation plants from permitting and regulation under SMCRA and the MSUMRA. In particular, proposed MCA Section 82–4–203(9) references ''coal preparation'' and, in addition to relying solely on ownership and control considerations, fails to ensure that coal beneficiation plants have no functional or economic relationship to the mine(s) providing the coal and are the point of end use of the coal. Consequently, we are not approving Montana's proposed definition of ''Coal beneficiation plant'' as it is less stringent than SMCRA and less effective than the Federal regulations.

Moreover, we are not approving Montana's proposed statutory changes that derive from its disapproved definition of ''Coal beneficiation plant'' or their associated recodification. Specifically, we are not approving Montana's proposed revisions to its currently approved definition of ''Coal preparation plant'' at MCA Section 82–4–203(11); Montana's proposed revisions to its currently approved definition of ''Operation'' at MCA Section 82–4–203(34); Montana's proposed revision to its currently approved definition of ''Operator'' at MCA Section 82–4–203(35); Montana's proposed revisions to its currently approved definition of ''Strip mining'' at MCA Section 82–4–203(48)(b); and Montana's proposed revisions to its currently approved definition of ''Underground mining'' at MCA Section 82–4–203(52).

IV. Summary and Disposition of Comments

Public Comments

We asked for public comments on the original amendment proposal (76 FR 64045; Administrative Record Docket ID No. OSM–2011–0011–0001). We received four public comments.

Westmoreland Resources, Inc. commented in a July 6, 2011, email message that it supports the changes to MSUMRA resulting from passage and approval of SB 297, and encouraged OSM to approve the program amendment (Administrative Record Document ID No. OSM–2011–0011–0003).

We received a comment letter from a private citizen on November 15, 2011 (Administrative Record Document ID No. OSM–2011–0011–0010). The letter contained both general and narrative comments in opposition to SB 297. The commenter noted that the definition of a coal beneficiation plant relates only to the ownership of the ''commercial facility,'' and opined that apparently the authors of SB 297 and its proposed amendments to the Montana program thought that if a coal beneficiation plant is owned by someone other than the mine operator, it would have no effect on anything for which the mine owner/operator is responsible under MSUMRA and SMCRA.

The commenter also stated that Section 507(a) of SMCRA dealing with application requirements makes it quite plain that anyone having an interest in property being permitted must be listed whether ownership or lease, and Section 508 indicates that there must be a reclamation plan for those lands, and that would include every activity, including measures to be taken during mining and reclamation to assure the protection of surface and ground water systems, rights of present users to water, and several other things. As a result, the commenter expresses a concern that if a company can avoid reclaiming areas where some sort of ''beneficiation'' may have taken place and may now be polluted in the soil or water, it can dodge an expensive cleanup.

Next, the commenter asserted that SB 297 is trying to get coal gasification exempted from control if it is in a mine permit. The commenter stated that SMCRA is quite plain that damaging the hydrologic balance in a mine site is not acceptable. The commenter also referenced 30 CFR Part 828 which concerns special environmental protection performance, reclamation and design standards for in situ processing of coal and noted that water is particularly important in that part.

The commenter went on to claim that SB 297 could be a vehicle to allow most of a mine permit surface to be sold for a ''beneficiation'' plant that would result in the removal of all bonding and reclamation problems because the operator would cease to own most of it. The commenter continued that if one attempted to operate on a mine permit, there would be questions as to where the waste from the beneficiation plant would be stored or disposed of. The commenter then questioned how the effects of processed water on the hydrologic balance in the area would affect the mine operator's compliance with SMCRA, and asked what kind of chemicals would be used in the beneficiation process and where would they be stored or disposed of? The commenter concluded by asserting that SB 297 is an attempt to avoid complying with the reclamation laws, and the modifications to MSUMRA do not comply with SMCRA.

Notwithstanding the ancillary concerns expressed above regarding hydrologic balance and waste storage and disposal, we refer the commenter to Finding No. III.B.1. for a detailed explanation as to why we are not approving Montana's proposed amendment.

We also received a comment letter from the Montana Environmental Information Center (MEIC) on November 16, 2011 (Administrative Record Document ID No. OSM–2011–0011–0008). The MEIC opposed Montana's proposed changes to the MSUMRA and asserted that the myriad of proposed changes would violate Federal law by eliminating important regulation of coal beneficiation plants, strip mines, and underground mines. The MEIC further stated that the Montana proposal attempts to differentiate coal preparation plants by ownership and asserts that the definition of ''surface coal mining operations'' in section 701(28) of SMCRA does not allow for such arbitrary differentiation. The MEIC continued that because the definition does not differentiate operations based on ownership, the proposal is clearly in conflict with the Federal requirements and should be rejected.

Next, the MEIC asserted that Montana's proposed change to the definition of ''operation'' contains a broad exclusion of at least three different types of coal preparation facilities, railroads, roads, and equipment that would leave many communities with no regulation of these potentially dangerous activities. The MEIC then stated that the definition change clearly flies in the face of SMCRA and should be rejected.

Finally, the MEIC contended that Montana's attempt to exclude all beneficiation activities from regulation through proposed changes to the definitions of ''operator,'' ''strip mining,'' and ''underground mining'' is counter to the intent of SMCRA and the definition of ''surface coal mining operations.'' For the reasons stated above, the MEIC urged OSMRE to reject Montana's proposal.

In response to the concerns expressed above, we refer the MEIC to Finding No. III.B.1. for a detailed explanation as to why we are not approving Montana's proposed amendment.

Lastly, we received a comment letter from the Northern Plains Resource Council (NPRC) on November 16, 2011 (Administrative Record Document ID No. OSM–2011–0011–0009). The NPRC also opposed Montana's proposed changes to the MSUMRA and asserted

that they eliminate important oversight responsibilities of OSMRE in relation to coal preparation, strip mining, and underground mining and should be rejected as they clearly violate the intent of the Federal law. The NPRC continued that the proposed amendment's newly-created definition of ''coal beneficiation plant'' exempts these facilities from regulation under the MSUMRA and removes the Montana DEQ's jurisdictional authority to regulate them. The NRPC went on to state that the intent of SB 297 was to create a regulatory distinction between a coal preparation facility that is owned, operated, or controlled by the mine operator supplying the coal and a ''coal beneficiation plant'' that has a potential different owner, operator, or controller which results in an arbitrary exclusion under the law. The NPRC then referenced the definition of ''surface coal mining operations'' in section 701(28) of SMCRA and asserted that because it does not make a distinction between ownership, operation, or control of any such activities being connected to the mine operator, the distinction made in the Montana program would appear to be inconsistent.

Next, the NPRC commented that the proposed amendment attempts to change the definition of ''operation'' so that these facilities would no longer be subject to regulation under the Montana regulatory program, and would create a far reaching exemption under law that would leave significant gaps in oversight for the development and reclamation of such activities. The NRPC then reiterated that such facilities clearly fall under the definition of ''surface coal mining operations'' in SMCRA and asserted that allowing this exemption would be inconsistent with Federal law.

The NRPC then cited the Federal regulations at 30 CFR 785.21 to argue that all coal preparation facilities, whether within the mining permit area or not, are subject to regulation under SMCRA. Additionally, the NRPC maintained that the Federal regulations governing the development of *in situ* processing and gasification clearly indicate that these facilities are to be regulated under the provisions of SMCRA. The NRPC concluded by strongly encouraging OSMRE to reject the proposed amendment as it is in clear violation with SMCRA and the Federal regulations.

In response, we acknowledge the concerns expressed above and refer the NPRC to Finding No. III.B.1. for a detailed explanation as to why we are not approving Montana's proposed amendment.

Federal Agency Comments

Under 30 CFR 732.17(h)(11)(i) and section 503(b) of SMCRA, we requested comments on the amendment from various Federal agencies with an actual or potential interest in the Montana program (Administrative Record ID No. MT–29–03). We received comments from three Federal Agencies.

The Bureau of Land Management (BLM) commented in a July 8, 2011 letter (Administrative Record Document ID No. OSM–2011–0011–0005), the U.S Geological Survey (USGS) commented in a July 15, 2011 letter (Administrative Record Document ID No. OSM–2011–0011–0006), and the Mine Safety and Health Administration (MSHA) commented in a July 29, 2011 letter (Administrative Record Document ID No. OSM–2011–0011–0007).

The BLM commented that one of the proposed changes to the MSUMRA would differentiate a coal beneficiation plant from a coal preparation plant by way of ownership, control, or operations by someone other than the mine operator. The BLM continued that the effect of the change would be that the DEQ would no longer have regulatory authority through MSUMRA over facilities that meet the definition of ''coal beneficiation plant'' even though it performs the same processes as a coal preparation plant. The BLM then referenced the definition of ''Surface Coal Mining Operations'' at 30 CFR 700.5 and ''the cleaning, concentrating, or other processing or preparation of coal.'' The BLM also quoted § 701.11(a), which requires ''any person who conducts surface coal mining operations on non-Indian and non-Federal lands on or after 8 months from the date of approval of a State program or implementation of a Federal program shall have a permit issued pursuant to the applicable State or Federal program.'' On this basis, the BLM stated it appears that the operation of a coal beneficiation plant or coal preparation plant is to be regulated under SMCRA and the Federal regulations at 30 CFR Part 700. The BLM concluded by stating that the proposed change to the MSUMRA would render it less stringent than SMCRA and should not be allowed.

We agree with the BLM's concerns and refer it to Finding No. III.B.1. above for a detailed explanation as to why we are not approving Montana's proposed amendment.

The USGS commented that, as a non-regulatory agency, it does not have a standing position on the issue and could not provide one.

The MSHA stated its concurrence with the proposed revisions to the MSMURA and has no further comment.

Environmental Protection Agency (EPA) Concurrence and Comments

Under 30 CFR 732.17(h)(11)(i), OSMRE requested comments on the amendment from EPA (Administrative Record ID No. MT–29–03). EPA did not respond to our request.

State Historic Preservation Officer (SHPO) and the Advisory Council on Historic Preservation (ACHP)

Under 30 CFR 732.17(h)(4), we are required to request comments from the SHPO and ACHP on amendments that may have an effect on historic properties. On June 29, 2011, we requested comments on Wyoming's amendment (Administrative Record ID No. MT–29–03). The SHPO responded on July 5, 2011, and commented that apparently the DEQ previously exercised regulatory authority over coal beneficiation and coal preparation facilities prior to the proposed changes (Administrative Record Document ID No. OSM–2011–0011–0004). The SHPO also explained that OSMRE's correspondence does not address whether or not it otherwise has regulatory authority under SMCRA or the National Historic Preservation Act for what would be termed coal beneficiation under MSUMRA, and noted that the proposed changes would seem to constrict the actions or undertakings under which SMCRA would/should otherwise apply. The SHPO then stated that 36 CFR Part 800 does not distinguish regulatory authority or responsibility on the basis of ownership, but by permitting, approval, license, funding or indirect jurisdiction by a Federal agency. The SHPO also commented that if, but for the proposed changes, OSMRE has regulatory responsibility under SMCRA, then it would seem the proposed amendment would pertain to cultural resources insofar as a section 106 type review to 36 CFR Part 800 standards would be foregone. The SHPO concluded by stating that it is not in a position to determine that responsibility as § 800.3(a) states the Federal agency official shall determine whether an action is an undertaking using the criteria of § 800.16(y).

In response, we acknowledge the aforementioned concerns and refer the SHPO to Finding No. III.B.1. above for a detailed explanation as to why we are not approving Montana's proposed amendment.

V. OSMRE's Decision

Based on the above findings, we are not approving Montana's June 7, 2011, amendment.

To implement this decision, we are amending the Federal regulations at 30 CFR Part 926, which codify decisions concerning the Montana program. We find that good cause exists under 5 U.S.C. 553(d)(3) to make this final rule effective immediately. Section 503(a) of SMCRA requires the State's program to demonstrate that the State has the capability of carrying out the provisions of the Act and meeting its purposes. Making this regulation effective immediately will expedite that process. SMCRA requires consistency of State and Federal standards.

Effect of OSMRE's Decision

Section 503 of SMCRA provides that a State may not exercise jurisdiction under SMCRA unless the State program is approved by the Secretary. Similarly, 30 CFR 732.17(a) requires that any change of an approved State program be submitted to OSM for review as a program amendment. The Federal regulations at 30 CFR 732.17(g) prohibit any changes to approved State programs that are not approved by OSM. In the oversight of the Montana program, we will recognize only the statutes, regulations and other materials we have approved, together with any consistent implementing policies, directives and other materials. We will require Montana to enforce only approved provisions.

VI. Procedural Determinations

Executive Order 12630—Takings

This rule does not have takings implications. This determination is based on the analysis performed for the counterpart Federal regulation.

Executive Order 12866—Regulatory Planning and Review

This rule is exempted from review by the Office of Management and Budget (OMB) under Executive Order 12866 (Regulatory Planning and Review).

Executive Order 12988—Civil Justice Reform

The Department of the Interior has conducted the reviews required by section 3 of Executive Order 12988 and has determined that this rule meets the applicable standards of subsections (a) and (b) of that section. However, these standards are not applicable to the actual language of State regulatory programs and program amendments because each program is drafted and promulgated by a specific State, not by OSM. Under sections 503 and 505 of SMCRA (30 U.S.C. 1253 and 1255) and the Federal regulations at 30 CFR 730.11, 732.15, and 732.17(h)(10), decisions on proposed State regulatory programs and program amendments submitted by the States must be based solely on a determination of whether the submittal is consistent with SMCRA and its implementing Federal regulations and whether the other requirements of 30 CFR Parts 730, 731, and 732 have been met.

Executive Order 13132—Federalism

This rule does not have Federalism implications. SMCRA delineates the roles of the Federal and State governments with regard to the regulation of surface coal mining and reclamation operations. One of the purposes of SMCRA is to ''establish a nationwide program to protect society and the environment from the adverse effects of surface coal mining operations.'' Section 503(a)(1) of SMCRA requires that State laws regulating surface coal mining and reclamation operations be ''in accordance with'' the requirements of SMCRA, and section 503(a)(7) requires that State programs contain rules and regulations ''consistent with'' regulations issued by the Secretary pursuant to SMCRA.

Executive Order 13175—Consultation and Coordination With Indian Tribal Governments

In accordance with Executive Order 13175, we have evaluated the potential effects of this rule on Federally recognized Indian Tribes and have determined that the rule does not have substantial direct effects on one or more Indian Tribes, on the relationship between the Federal government and Indian Tribes, or on the distribution of power and responsibilities between the Federal government and Indian Tribes. The rule does not involve or affect Indian Tribes in any way.

Executive Order 13211—Regulations That Significantly Affect The Supply, Distribution, or Use of Energy

On May 18, 2001, the President issued Executive Order 13211 which requires agencies to prepare a Statement of Energy Effects for a rule that is (1) considered significant under Executive Order 12866, and (2) likely to have a significant adverse effect on the supply, distribution, or use of energy. Because this rule is exempt from review under Executive Order 12866 and is not expected to have a significant adverse effect on the supply, distribution, or use of energy, a Statement of Energy Effects is not required.

National Environmental Policy Act

This rule does not require an environmental impact statement because section 702(d) of SMCRA (30 CFR U.S.C. 1292(d)) provides that agency decisions on proposed State regulatory program provisions do not constitute major Federal actions within the meaning of section 102(2)(C) of the National Environmental Policy Act (42 U.S.C. 4332(2)(C) *et seq*).

Paperwork Reduction Act

This rule does not contain information collection requirements that require approval by OMB under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

Regulatory Flexibility Act

The Department of the Interior certifies that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). The State submittal, which is the subject of this rule, is based upon counterpart Federal regulations for which an economic analysis was prepared and certification made that such regulations would not have a significant economic effect upon a substantial number of small entities. In making the determination as to whether this rule would have a significant economic impact, the Department relied upon the data and assumptions for the counterpart Federal regulations.

Small Business Regulatory Enforcement Fairness Act

This rule is not a major rule under 5 U.S.C. 804(2), of the Small Business Regulatory Enforcement Fairness Act. This rule:

a. Does not have an annual effect on the economy of $100 million.

b. Will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions.

c. Does not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S. based enterprises to compete with foreign-based enterprises.

This determination is based upon the fact that the State submittal which is the subject of this rule is based upon counterpart Federal regulations for which an analysis was prepared and a determination made that the Federal regulation was not considered a major rule.

Unfunded Mandates

This rule will not impose an unfunded Mandate on State, local, or tribal governments or the private sector of $100 million or more in any given year. This determination is based upon the fact that the State submittal, which is the subject of this rule, is based upon counterpart Federal regulations for which an analysis was prepared and a determination made that the federal regulation did not impose an unfunded mandate.

List of Subjects in 30 CFR Part 926

Intergovernmental relations, Surface mining, Underground mining.

Dated: June 26, 2012.

Allen D. Klein,

Director, Western Region.

Editorial Note: This document was received at the Office of the Federal Register on February 6, 2013.

For the reasons set out in the preamble, 30 CFR part 926 is amended as set forth below:

PART 926—MONTANA

■ 1. The authority citation for part 926 continues to read as follows:

Authority: 30 U.S.C. 1201 et seq.

■ 2. Add § 926.12 to read as follows:

§ 926.12 State program provisions and amendments not approved.

(a) The amendment submitted by letter dated June 7, 2011, Docket ID No. OSM–2011–0011, which proposed changes to the Montana approved program as a result of the Montana Legislature's 2011 passage of a Senate Bill (SB 297) relating to coal beneficiation is not approved.

(b) [Reserved]

[FR Doc. 2013–03065 Filed 2–13–13; 8:45 am]

BILLING CODE 4310–05–P

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 950

[SATS No. WY–040–FOR; Docket ID OSM–2011–0004]

Wyoming Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Final rule; approval of amendment with certain exceptions.

SUMMARY: We are issuing a final decision on an amendment to the Wyoming regulatory program (the ''Wyoming program'') under the Surface Mining Control and Reclamation Act of 1977 (''SMCRA'' or ''the Act''). Our decision approves in part and disapproves in part the amendment. Wyoming proposes revisions and additions to rules concerning noncoal mine waste, valid existing rights, and individual civil penalties. Wyoming revised its program to be consistent with the corresponding Federal regulations and SMCRA, clarify ambiguities, and improve operational efficiency.

DATES: *Effective Date:* February 14, 2013.

FOR FURTHER INFORMATION CONTACT: Jeffrey W. Fleischman, Telephone: 307.261.6550, Email address: *jfleischman@osmre.gov*.

SUPPLEMENTARY INFORMATION:

I. Background on the Wyoming Program
II. Submission of the Proposed Amendment
III. OSMRE's Findings
IV. Summary and Disposition of Comments
V. OSMRE's Decision
VI. Procedural Determinations

I. Background on the Wyoming Program

Section 503(a) of the Act permits a State to assume primacy for the regulation of surface coal mining and reclamation operations on non-Federal and non-Indian lands within its borders by demonstrating that its State program includes, among other things, ''a State law which provides for the regulation of surface coal mining and reclamation operations in accordance with the requirements of this Act* * *; and rules and regulations consistent with regulations issued by the Secretary pursuant to this Act.'' See 30 U.S.C. 1253(a)(1) and (7). On the basis of these criteria, the Secretary of the Interior conditionally approved the Wyoming program on November 26, 1980. You can find background information on the Wyoming program, including the Secretary's findings, the disposition of comments, and the conditions of approval of the Wyoming program in the November 26, 1980, **Federal Register** (45 FR 78637). You can also find later actions concerning Wyoming's program and program amendments at 30 CFR 950.12, 950.15, 950.16, and 950.20.

II. Submission of the Proposed Amendment

By letter dated April 28, 2011, Wyoming sent us a proposed amendment to its approved regulatory program (SATS number: WY–040–FOR, Administrative Record Docket ID No. OSM–2011–0004) under SMCRA (30 U.S.C. 1201 *et seq.*). Wyoming submitted the amendment partly in response to a February 13, 2008, letter that we sent to Wyoming notifying the State that the Office of Surface Mining Reclamation and Enforcement's (OSMRE) December 17, 1999, Valid Existing Rights (VER) rule changes had been upheld in court and the State should respond to our April 2, 2001, letter sent in accordance with 30 CFR 732.17(c) (''732 letter''). That letter required Wyoming to submit amendments to ensure its program remains consistent with the Federal program. This amendment package is intended to address all required rule changes pertaining to VER. Wyoming also submitted the proposed amendment to address required program amendments at 30 CFR 950.16(r), (s), and (t), respectively, and deficiencies that we identified in a November 7, 1988, 732 letter. These included changes to Wyoming's rules for noncoal mine waste and individual civil penalties.

We announced receipt of the proposed amendment in the June 21, 2011, **Federal Register** (76 FR 36040). In the same document, we opened the public comment period and provided an opportunity for a public hearing or meeting on the amendment's adequacy (Administrative Record Document ID No. OSM–2011–0004–0001). We did not hold a public hearing or meeting because no one requested one. The public comment period ended on July 21, 2011. We received comments from three Federal agencies (discussed under ''IV. Summary and Disposition of Comments'').

During our review of the amendment, we identified concerns regarding Wyoming's proposed rule changes in response to the April 2, 2001, 732 letter including revisions to its definition of ''Valid existing rights'' at Chapter 1, Section 2(fl); its newly-proposed ''Needed for and adjacent standard'' definition at Chapter 1, Section 2(fl)(ii)(B)(IV); its newly-proposed VER standards for roads rule at Chapter 1, Section 2(fl)(iii); its procedures for public road waivers at Chapter 12, Section 1(a)(v)(D); its VER submission requirements and procedure rules at Chapter 12, Section 1(a)(vii)(A)(I) and (IV); its requirements for initial review of VER requests at Chapter 12, Section 1(a)(vii)(B)(I) and (IV); its VER public notice and comment requirements at Chapter 12, Section 1(a)(vii)(C)(I)(3.), (C)(II)(2.), and (C)(III); its rules at Chapter 12, Section 1(a)(vii)(D)(I) and (III) concerning how a VER decision will be made; its newly-proposed requirements at Chapter 12, Section 1(a)(vii)(E) providing for administrative

and judicial review of VER determinations; its proposed revisions at Chapter 12, Section 1(a)(vii)(F) regarding availability of records; its newly proposed procedures for joint approval of surface coal mining operations that will adversely affect publicly owned parks or historic places at Chapter 12, Section 1(a)(vii)(G)(III)(2.); its proposed definition of ''willfully'' at Chapter 16, Section 4(a)(iii) in response to a November 7, 1988, 732 letter; and its newly proposed rules at Chapter 16, Section 4(b)(i) for determining when an individual civil penalty may be assessed in response to the November 7, 1988, 732 letter. We notified Wyoming of these concerns by letter dated August 17, 2011 (Administrative Record Document ID No. OSM–2011–0004–0009).

We delayed final rulemaking to afford Wyoming the opportunity to submit new material to address the deficiencies. Wyoming responded in a letter dated October 5, 2011, that it could not currently submit additional formal revisions to the amendment due to the administrative rulemaking requirements for promulgation of revised substantive rules (Administrative Record Document ID No. OSM–2011–0004–0010). Specifically, Wyoming explained that the required changes would be considered substantive in nature and therefore the Land Quality Division (LQD) is required to present the proposed rules to the LQD Advisory Board and then the Wyoming Environmental Quality Council for vetting. Following approval by the Governor, the rules may be submitted to OSMRE for final review. While it could not submit formal changes, Wyoming did submit informal responses to the noted concerns. Therefore, we are proceeding with the final rule **Federal Register** document. Our concerns and Wyoming's responses thereto are explained in detail below.

III. OSMRE's Findings

30 CFR 732.17(h)(10) requires that State program amendments meet the criteria for approval of State programs set forth in 30 CFR 732.15, including that the State's laws and regulations are in accordance with the provisions of the Act and consistent with the requirements of 30 CFR Part 700. In 30 CFR 730.5, OSMRE defines ''consistent with'' and ''in accordance with'' to mean (a) with regard to SMCRA, the State laws and regulations are no less stringent than, meet the minimum requirements of, and include all applicable provisions of the Act and (b) with regard to the Federal regulations, the State laws and regulations are no less effective than the Federal regulations in meeting the requirements of SMCRA.

Following are the findings we made concerning the amendment under SMCRA and the Federal regulations at 30 CFR 732.15 and 732.17. We are approving the amendment with certain exceptions as described below.

A. Minor Revisions to Wyoming's Rules

Wyoming proposed minor editorial and recodification changes to the following previously approved rules. No substantive changes to the text of these regulations were proposed. Because the proposed revisions to these previously approved rules are minor, we are approving the changes and find that they are no less effective than the corresponding Federal regulations.

Chapter 1, Section 2(fl)(iii); deletion of existing ''needed for and adjacent'' rule due to newly-proposed rule language at Section 2(fl)(ii)(B);

Chapter 7, Section 1(a)(i)(A) and (B); recodification of existing Underground Coal Mining Permit Application Content Requirements to reflect changes resulting from WY–038–FOR;

Chapter 12, Section 1(a)(viii), (ix), (x), and (xi); and recodification of existing permitting procedure rules applicable to surface coal mine operation permit applications.

B. Revisions to Wyoming's Rules That Have the Same Meaning as the Corresponding Provisions of the Federal Regulations

1. Wyoming proposes additions and revisions to the following rules containing language that are the same as or similar to the corresponding sections of the Federal regulations and/or SMCRA. We are approving the following revisions

Chapter 1, Section 2(fl)(ii)(A) and (B)(I)–(III); VER ''Good faith/all permits'' and ''Needed for and adjacent'' standards; [30 CFR 761.5(b)(1) and (2)(i)–(iii)];

Subsections (A)–(D) of Chapter 1, Section 2(fl)(iii); VER standard for roads; [30 CFR 761.5(c)(1)–(4)];

Chapter 10, Section 2(a); General permit requirements for exploration of more than 250 tons or in an area designated as unsuitable; [30 CFR 772.12(a)];

Chapter 10, Section 2(b)(xiii); Exploration permit application information; [30 CFR 772.12(b)(14)];

Chapter 10, Section 3(c) (iv); Approval of applications for exploration of more than 250 tons or in an area designated as unsuitable for surface coal mining operations; [30 CFR 772.12(d)(2)(iv)];

Subsections (1.)-(9.) of Chapter 12, Section 1(a)(vii)(A)(I); VER submission requirements and procedures; [30 CFR 761.16(b)(1)(i)–(ix)];

Chapter 12, Section 1(a)(vii)(A)(II)(1.)–(3.) and (III); VER submission requirements and procedures; [30 CFR 761.16(b)(2)(i)–(iii) and (3)];

Subsections (1.)-(3.) of Chapter 12, Section 1(a)(vii)(A)(IV); VER submission requirements and procedures; [30 CFR 761.16(b)(4)(i)–(iii)];

Chapter 12, Section 1(a)(vii)(B)(II) and (III); Initial review of VER request; [30 CFR 761.16(c)(2) and (3)];

Chapter 12, Section 1(a)(vii)(C)(I)(1.) and (2.); VER notice and comment requirements and procedures; [30 CFR 761.16(d)(1)(i) and (ii)];

Subsections e.–h. of Chapter 12, Section 1(a)(vii)(C)(I)(3.); VER notice and comment requirements and procedures; [30 CFR 761.16(d)(1)(v)–(viii)];

Chapter 12, Section 1(a)(vii)(C)(II)(1.); VER notice and comment requirements and procedures; [30 CFR 761.16(d)(2)(i)];

Chapter 12, Section 1(a)(vii)(D)(II); How a VER decision will be made; [30 CFR 761.16(e)(2)];

Chapter 12, Section 1(a)(vii)(D)(IV) and (V)(1.) and (2.); How a VER decision will be made; [30 CFR 761.16(e)(4) and (5)(i) and (ii)];

Chapter 12, Section 1(a)(vii)(G)(I)(1.), (2.), and (3.), (II), and (III)(1.); Procedures for joint approval of surface coal mining operations that will adversely affect publicly owned parks or historic places; [30 CFR 761.17(d)(1)(i), (ii), and (iii), (2), and (3)(i)];

Chapter 16, Section 4(a)(i) and (ii)(A) and (B); definitions of ''Knowingly'' and ''Violation, failure or refusal;'' [30 CFR 701.5];

Chapter 16, Section 4(b)(ii); when an individual penalty may be assessed; [30 CFR 846.12(b)];

Chapter 16, Section 4(c)(i)(B)–(C); Amount of civil penalty; [30 CFR 846.14(a)(2)–(3)];

Chapter 16, Section 4(d)(i), (ii)(B), and (iii); Procedure for assessment of individual civil penalty; [30 CFR 846.17(a), (b)(2), and (c)]; and

Chapter 16, Section 4(e)(i)–(iii); Payment of penalty; [30 CFR 846.18(a)–(c)].

2. Chapter 1, Section 2(fl)(i) and (iv)(B); Definition of ''Valid Existing Rights''

In response to Items B–2 and B–5 of OSMRE's April 2, 2001, 732 letter, Wyoming proposes to delete the takings

standard from its definition of VER at Chapter 1, Section 2(fl)(i) and its concept of continually created VER at Section (iv)(B). Wyoming explains in its Statement of Principle Reasons for Adoption (SOPR) that the Federal VER rules as published in 1999 (64 FR 70766) removed ''the 1983 takings standard for VER'' and reinstated a revised version of the 1980 good faith/all permits standard. The preamble to the 1999 VER rules indicated that the taking standard is less protective for areas under 30 CFR 761.11 than the good faith/all permits standard. The 732 letter notified Wyoming that because its ''definition at (i) and (iv)(B) bases VER (except for roads) on a takings standard'' the rules were less effective than the Federal definition. For these reasons, Wyoming now proposes to delete the aforementioned takings standards and include a good faith/all permits standard in its definition of VER to be consistent with the Federal definition at 30 CFR 761.5. We agree with the rationale for Wyoming's proposed deletions and we approve them.

3. Chapter 1, Section 2(fl)(iv)(A); VER Exception for Existing Operations

In response to Item D of OSMRE's April 2, 2001, 732 letter, Wyoming proposes to revise its rules at Chapter 1, Section 2(fl)(iv) by both identifying which operations qualify for the exception for existing operations and specifying that a person claiming VER must demonstrate the required elements as of the date that the land came under the protection of 522(e) of P.L. 95–87 or 30 CFR 761.11 rather than August 3, 1977 (the date of SMCRA's enactment). The 732 letter stated that Wyoming's definition of VER at former Chapter 1, Sec. 2(df)(iv)(A) incorporates the exception for existing operations as though it is stated as a type of VER rather than an exemption from VER. As a result, Wyoming is deleting former subsection (A) and explains in its SOPR that the VER definition was revised to be consistent with the Federal regulation at 30 CFR 761.12. Wyoming's proposed revision makes its rules substantively identical to and no less effective than the Federal regulations at 30 CFR 761.12(a) and we approve it.

4. Chapter 12, Section 1(a)(v)(B); Procedures for Compatibility Findings

In response to Items E–1 and G–3 of OSMRE's April 2, 2001, 732 letter, Wyoming proposes to revise its rules at Chapter 12, Section 1(a)(v)(B) by adding a cross-reference to the Federal requirements at 30 CFR 761.13 regarding procedures for compatibility findings for surface coal mining operations on Federal lands in national forests. The Federal rule clarifies that an applicant may request these findings in advance of preparing and submitting a permit application. The 732 letter indicated that although Wyoming's program incorporates the compatibility test for national forest lands as required by 30 CFR 761.11(b), it did not include the specific procedures of 30 CFR 761.13. Wyoming explains in its SOPR that subsection (B) was revised to include the necessary reference to the applicable Federal procedures for compatibility findings in order to correct the aforementioned 732 deficiencies. Wyoming's proposed revision and incorporation by reference makes its rules no less effective than the Federal regulations at 30 CFR 761.13 and we approve it.

5. Chapter 12, Section 1(a)(vi); Basic Framework for VER Determinations

In response to OSMRE's April 2, 2001, 732 letter, Wyoming proposes to revise its rules at Chapter 12, Section 1(a)(vi) to be consistent with the table in the Federal regulations at 30 CFR 761.16(a) by adding a basic framework for making valid existing rights determinations. Item A–1 of the 732 letter addressed the Cooperative Agreement at 30 CFR 950.20 and required Wyoming to clarify the responsibilities for making VER determinations on Federal lands within areas protected under 30 CFR 761.11(a) and (b), and the definition to use in making those determinations. Item G stated that the Wyoming program lacked the provisions of new 761.16(a) that defines which agency is responsible for the VER determination and which definition (State or Federal) applies. Proposed subsection (vi) adds those elements by specifying that OSMRE shall be the responsible agency for making VER determinations for Federal lands described in proposed subsections (v)(A) and (B) which are the counterparts to 30 CFR 761.11(a) and (b). Proposed subsection (vi) also identifies that Wyoming (the Division) is the responsible agency for making VER determinations for non-Federal lands described in subsection (v)(A) and shall make evaluations using the Federal VER definition. Wyoming's proposed rule at Chapter 12, Section 1(a)(vi) satisfies the 732 deficiencies and is no less effective than the counterpart Federal requirements at 30 CFR 761.16(a). Accordingly we approve it.

C. Revisions to Wyoming's Rules That Are Not the Same as the Corresponding Provisions of the Federal Regulations

1. Chapter 1, Section 2(fl); Definition of ''Valid existing rights''

In response to Item B–1 of OSMRE's April 2, 2001, 732 letter, Wyoming proposed to revise its definition of VER at Chapter 1, Section 2(fl) by adding an explanation of the operation of VER and noting that operations on prohibited or limited areas under VER are still subject to the remainder of SMCRA regulations. In its SOPR, Wyoming stated that the revisions are meant to be consistent with the required elements of OSMRE's basic conceptual definition for VER in 30 CFR 761.5.

OSMRE replied in a letter dated August 17, 2011, that Wyoming's definition does not include Federal counterpart language stating that ''Possession of valid existing rights only confers an exception from the prohibitions of § 761.11 and 30 U.S.C. 1272(e).'' We stated that Wyoming's failure to include this language in its VER definition clarifying and further explaining the operation of VER renders its program less effective than the Federal regulations. Consequently, we required Wyoming to add the ''exception'' language to its proposed definition of VER.

Wyoming responded in a letter dated October 5, 2011, and stated that it will add the required ''exception'' language to its VER definition in a future rule package.

Based on the discussion above, we are not approving Wyoming's revised VER definition at Chapter 1, Section 2(fl). We also acknowledge Wyoming's commitment to add the required ''exception'' language to its VER definition in a future rulemaking.

2. Chapter 1, Section 2(fl)(ii)(B)(IV); Definition of ''Needed for and adjacent standard''

In response to Item B–5 of OSMRE's April 2, 2001, 732 letter, Wyoming proposed a new ''Needed for and adjacent standard'' definition at Chapter 1, Section 2(fl)(ii)(B)(IV) and includes a requirement that, when evaluating if a person meets that standard, the agency making the decision may consider ''Whether the land lies within the area identified on the life-of-mine map submitted before the land came under the protection of 30 CFR § 761.11 (2009).''

OSMRE replied in a letter dated August 17, 2011, that the Federal counterpart provision at 30 CFR 761.5(b)(2) includes specific citation cross-references requiring the submission of a life-of-mine map as part

of a permit application. Therefore, in order to provide specificity and maintain clarity in its VER rules, we required Wyoming to revise the proposed rule language to specify the applicable counterpart permit application reference for requiring the submission of life-of-mine maps.

Wyoming responded in a letter dated October 5, 2011, and stated that it will add the required cross-references in a future rule package.

Consequently, we are not approving Wyoming's newly-proposed ''Needed for and adjacent standard'' definition at Chapter 1, Section 2(fl)(ii)(B)(IV). We also acknowledge Wyoming's commitment to add the required citation cross-references in a future rulemaking.

3. Chapter 1, Section 2(fl)(iii); VER Standards for Roads

In response to Item B–5 of OSMRE's April 2, 2001, 732 letter, Wyoming proposed a new rule at Chapter 1, Section 2(fl)(iii) that applies the VER standard to all roads included within a surface mining operation.

OSMRE replied in a letter dated August 17, 2011, that the Federal counterpart provision at 30 CFR 761.5(c), as well as the remainder of Wyoming's rules refer to ''surface *coal* mining operations.'' Thus, in order to maintain consistency with the terminology used in its VER rules, we required Wyoming to revise the proposed rule language to include the term ''coal.''

Wyoming responded in a letter dated October 5, 2011, and stated that it will add the term ''coal'' in a future rule package.

Based on the discussion above, we are not approving Wyoming's proposed rule change at Chapter 1, Section 2(fl)(iii) that applies its VER standard to all roads included within a surface mining operation. We also acknowledge Wyoming's commitment to revise the proposed rule language and add the term ''coal'' in a future rulemaking.

4. Chapter 12, Section 1(a)(v)(D); Procedures for Public Road Waivers

In response to Item F–1 of OSMRE's April 2, 2001, 732 letter, Wyoming proposed to revise its rule regarding procedures for public road waivers at Chapter 12, Section 1(a)(v)(D) to be consistent with the Federal counterpart regulations at 30 CFR 761.14 by adding requirements for time limits and written findings.

OSMRE replied in a letter dated August 17, 2011, that Wyoming's proposed language warrants additional grammatical revisions for purposes of clarity and consistency within its rules. Specifically, we stated that Wyoming needs to revise the phrase ''shall follow notice and opportunity to for public hearing'' to read ''shall *provide a public comment period* and an opportunity *to request* a public hearing.'' We further noted that Wyoming needs to replace the word ''authority'' with ''Administrator'' to clarify that they are responsible for making written findings following a hearing or end of the public comment period.

Wyoming responded in a letter dated October 5, 2011, and stated that it will make the requested revisions in a future rule package.

As a result, we are not approving Wyoming's proposed rule change at Chapter 12, Section 1(a)(v)(D) regarding procedures for public road waivers. We also acknowledge Wyoming's commitment to revise the proposed rule and include the aforementioned grammatical revisions in a future rulemaking.

5. Chapter 12, Section 1(a)(vii)(A)(I); VER Submission Requirements and Procedures

In response to Item G–1 of OSMRE's April 2, 2001, 732 letter, Wyoming proposed to add VER submission requirements and procedure rules to be consistent with the Federal counterpart regulations at 30 CFR 761.16(b).

OSMRE replied in a letter dated August 17, 2011, that Wyoming's proposed language at Chapter 12, Section 1(a)(vii)(A) does not include Federal counterpart language explaining that a VER determination request shall be submitted if an individual ''intends to conduct surface coal mining operations on the basis of valid existing rights under § 761.11 or wish to confirm the right to do so.'' Wyoming's failure to include this additional explanatory language in the proposed rule renders its program less effective than the Federal regulations. Similarly, for purposes of clarity and consistency within its rules and to be consistent with the Federal requirements at 30 CFR 761.16(b)(1) we required Wyoming to revise the proposed rule language in subsection (I) by adding citation cross-references to property rights demonstrations under paragraph (i) of its VER definition in Chapter 1 for requests that rely on the good faith/all permits standard or the needed for and adjacent standard in paragraph (ii) of its VER definition in Chapter 1.

Wyoming responded in a letter dated October 5, 2011, and stated that it will add the required cross-references and clarify that a request can be submitted if the individual intends to conduct surface coal mining operations on the basis of valid existing rights or wishes to confirm the right to do so in a future rule package.

Based on the discussion above, we are not approving Wyoming's proposed rule change at Chapter 12, Section 1(a)(vii)(A)(I) concerning VER determination requests. We also acknowledge Wyoming's commitment to revise the proposed rule to include the aforementioned citation cross-references and VER submission requirement language in a future rulemaking.

6. Chapter 12, Section 1(a)(vii)(A)(IV); VER Submission Requirements and Procedures

In response to Item G–1 of OSMRE's April 2, 2001, 732 letter, Wyoming proposed to add VER submission requirements and procedure rules at Chapter 12, Section 1(a)(vii)(A)(IV).

OSMRE replied in a letter dated August 17, 2011, that in order to be consistent with its own rules and the Federal counterpart requirements at 30 CFR 761.16(b) (4) Wyoming must revise the proposed rule language in subsection (IV) by adding a citation cross-reference to paragraphs (iii)(A) through (iii)(C) of its VER definition in Chapter 1 regarding the standards for roads.

Wyoming responded in a letter dated October 5, 2011, and stated that it will revise subsection (IV) to include the aforementioned required citation cross-references in a future rule package.

Therefore, we are not approving Wyoming's proposed rule change at Chapter 12, Section 1(a)(vii)(A)(IV) concerning VER submission requirements and requests that rely on one of the standards for roads. We also acknowledge Wyoming's commitment to include the required citation cross-references in a future rulemaking effort.

7. Chapter 12, Section 1(a)(vii)(B)(I); Initial Review of VER Request

In response to Item G–1 of OSMRE's April 2, 2001, 732 letter, Wyoming proposed a new rule at Chapter 12, Section 1(a)(vii)(B)(I) requiring that responsible agencies conduct an initial review of a VER request and determine whether it includes all applicable submission components as discussed in subsection (A). The proposed rule also states that the review only examines completeness of the request.

OSMRE replied in a letter dated August 17, 2011, that in order to be consistent with the Federal regulations at 30 CFR 761.16(c)(1) Wyoming must include Federal counterpart language in subsection (I) to further explain that the review does not pertain to the ''legal or

technical adequacy of the materials submitted.'' Wyoming's failure to include this qualifying explanatory language in the proposed rule renders its program less effective than the Federal regulations.

Wyoming responded in a letter dated October 5, 2011, and stated that it will revise its rules to indicate that the review does not address legal or technical adequacy in a future rule package.

Based on the discussion above, we are not approving Wyoming's proposed rule change at Chapter 12, Section 1(a)(vii)(B)(I) concerning initial review of a VER request. We also acknowledge Wyoming's commitment to revise the proposed rule and include the aforementioned qualifying explanatory language in a future rulemaking.

8. Chapter 12, Section 1(a)(vii)(B)(IV); Initial Review of VER Request

In response to Item G–1 of OSMRE's April 2, 2001, 732 letter, Wyoming proposed to add requirements to its rules at Chapter 12, Section 1(a)(vii)(B)(IV) for conducting an initial review of all applicable submission components for making VER determinations.

OSMRE replied in a letter dated August 17, 2011, that for purposes of clarity in its own rules and to be consistent with the Federal requirements at 30 CFR 761.16(c)(4) Wyoming must revise the proposed rule language in subsection (IV) regarding the VER demonstration by adding a citation cross-reference to subsection (D)(IV) that discusses how a VER decision will be made.

Wyoming responded in a letter dated October 5, 2011, and stated that it will revise its rules with the appropriate citation cross-reference discussed above in a future rule package.

Accordingly, we are not approving Wyoming's proposed rule change at Chapter 12, Section 1(a)(vii)(B)(IV) concerning an initial review of all applicable submission components for making VER determinations. We also acknowledge Wyoming's commitment to include the required citation cross-reference in a future rulemaking.

9. Chapter 12, Section 1(a)(vii)(C)(I)(3.); VER Notice and Comment Requirements

In response to Item G–2 of OSMRE's April 2, 2001, 732 letter, Wyoming proposed to add VER public notice and comment requirements and procedures to its rules at Chapter 12, Section 1(a)(vii)(C)(I)(3.).

OSMRE replied in a letter dated August 17, 2011, that in order to be consistent with its own rules and the Federal requirements at 30 CFR 761.16(d)(1)(iii) Wyoming must revise the proposed rule language in subsection (3.) by adding a citation cross-reference to include ''the applicable standards under Chapter 1, VER definition.'' For the same reasons, Wyoming must revise the language in subsection (a.) to include a cross-reference to paragraph (ii) of its VER definition in Chapter 1 regarding the good faith/all permits standard or the needed for and adjacent standard, and change the citation cross-references in subsections (b.) and (c.) from (IV)(1.) and (IV)(2.) to (A)(IV)(1.) and (A)(IV)(2.), respectively. Wyoming also needs to correct a typographical error for grammatical correctness in subsection (c.) by changing the word ''creation'' to ''creating.'' Lastly, in order to maintain consistency within its own rules and the Federal requirements at 30 CFR 761.16(d)(1)(iv) we required Wyoming to revise the proposed rule language in subsection (d.) by adding a citation cross-reference to the standards in paragraphs (ii), (iii)(A), and (iii)(B) of its VER definition in Chapter 1.

Wyoming responded in a letter dated October 5, 2011, and stated that it will revise its proposed rule language to include the citation cross-references discussed above and correct the typographical error in a future rule package.

Based on the discussion above, we are not approving Wyoming's proposed rules concerning VER public notice and comment requirements and procedures at Chapter 12, Section 1(a)(vii)(C)(I)(3.). We also acknowledge Wyoming's commitment to include the required citation cross-references and correct a typographical error in a future rulemaking.

10. Chapter 12, Section 1(a)(vii)(C)(II)(2.); VER Notice and Comment Requirements

In response to Item G–2 of OSMRE's April 2, 2001, 732 letter, Wyoming proposed to revise its rules at Chapter 12, Section 1(a)(vii)(C)(II)(2.) by requiring that the Division provide a copy of the notice of an administratively complete VER request to the owner of the feature causing the land to come under VER protection and, where applicable, the agency with primary jurisdiction over the feature.

OSMRE replied in a letter dated August 17, 2011, that Wyoming does not include Federal counterpart language providing specific examples of such required notifications. Wyoming's failure to include this additional explanatory language in its proposed rule renders its program less effective than the Federal regulations at 30 CFR 761.16(d)(2)(ii). In addition, we noted that Wyoming needs to correct a typographical error for grammatical correctness by changing the phrase ''where applicable'' to ''when applicable.''

Wyoming responded in a letter dated October 5, 2011, and stated that it will amend its rules by providing specific examples of administratively complete VER request notifications and correct the aforementioned typographical error in a future rule package.

Based on the discussion above, we are not approving Wyoming's proposed rule change at Chapter 12, Section 1(a)(vii)(C)(II)(2.) concerning VER public notice and comment requirements and procedures. We also acknowledge Wyoming's commitment to revise its proposed rule by adding explanatory language and correcting a typographical error in a future rulemaking effort.

11. Chapter 12, Section 1(a)(vii)(C)(III); VER Notice and Comment Requirements

In response to Item G–2 of OSMRE's April 2, 2001, 732 letter, Wyoming proposed to revise its rules at Chapter 12, Section 1(a)(vii)(C)(III) by requiring that the letter transmitting notice of an administratively complete VER request also provide a 30-day comment period and specify that another 30 days is available upon request.

OSMRE replied in a letter dated August 17, 2011, that Wyoming does not include Federal counterpart language providing the Division with discretion to grant additional time to comment for good cause upon request, and fails to explain that the Division need not necessarily consider comments received after the closing date of the comment period. We further explained that this provision is not to be interpreted as providing Wyoming with discretion to adopt the counterpart language. Rather, it is intended to afford Wyoming with the option to both extend the comment period for good cause requested and reject comments received after the comment period closes. Thus, Wyoming's failure to include this language in its proposed rule renders its program less effective than the Federal regulations at 30 CFR 761.16(d)(3).

Wyoming responded in a letter dated October 5, 2011, and stated that it will add the Federal counterpart language mentioned above in a future rule package.

Consequently, we do not approve Wyoming's proposed rule change at Chapter 12, Section 1(a)(vii)(C)(III) concerning VER public notice and comment requirements and procedures. We also acknowledge Wyoming's

commitment to revise its proposed rule by including Federal counterpart language affording Wyoming the option to both extend the comment period for good cause requested and reject comments received after the comment period closes in a future rulemaking.

12. Chapter 12, Section 1(a)(vii)(D)(I); How a VER Decision Will Be Made

In response to Item G–1 of OSMRE's April 2, 2001, 732 letter, Wyoming proposed to revise its rules at Chapter 12, Section 1(a)(vii)(D)(I) by requiring that the Division review materials and comments submitted for adequacy before making a VER determination.

OSMRE replied in a letter dated August 17, 2011, that in order to maintain consistency within its own rules and the Federal requirements at 30 CFR 761.16(e)(1) Wyoming must revise the proposed rule language in subsection (I) by adding citation cross-references to include ''materials submitted under subsection (A)'' and ''comments received under subsection (C).''

Wyoming responded in a letter dated October 5, 2011, and stated that it will add the aforementioned required cross-references in a future rule package.

Based on the discussion above, we are not approving Wyoming's proposed rule change at Chapter 12, Section 1(a)(vii)(D)(I) concerning the review of materials and comments submitted for adequacy before making a VER determination. We also acknowledge Wyoming's commitment to include the required citation cross-references in a future rulemaking.

13. Chapter 12, Section 1(a)(vii)(D)(III); How a VER Decision Will Be Made

In response to Item G–1 of OSMRE's April 2, 2001, 732 letter, Wyoming proposed to revise its rules at Chapter 12, Section 1(a)(vii)(D)(III) regarding impacts of property rights disagreements on VER determinations.

OSMRE replied in a letter dated August 17, 2011, that in order to maintain consistency within its own rules and the Federal requirements at 30 CFR 761.16(e)(3)(i) Wyoming must revise the proposed rule language in subsection (1.) by adding citation cross-references to include ''the closing date of the comment periods discussed under subsections (C)(I) or (C)(III) above.'' Similarly, to be consistent with 30 CFR 761.16(e)(3)(ii) Wyoming must revise subsection (2.) by adding citation cross-references to the requisite property rights demonstrations under paragraphs ''(i), (iii)(A), or (iii)(B)'' of its VER definition in Chapter 1, as appropriate. We also stated that Wyoming needs to specify that the Division is the ''responsible agency'' and correct a typographical error in the cross-reference from subsection (C)(II) to (D)(II). Lastly, for purposes of clarity and specificity, we required Wyoming to ensure that the ''responsible agency'' reference is similarly revised, if applicable, when it appears elsewhere in the proposed rules.

Wyoming responded in a letter dated October 5, 2011, by stating that it will revise its rule to provide the appropriate citation cross-references and clarify that the Land Quality Division is the ''responsible agency'' in a future rule package.

Accordingly, we are not approving Wyoming's proposed rule change at Chapter 12, Section 1(a)(vii)(D)(III) concerning the impacts of property rights disagreements on VER determinations. We also acknowledge Wyoming's commitment to revise it rule and incorporate the required changes discussed above in a future rulemaking.

14. Chapter 12, Section 1(a)(vii)(E); Administrative and Judicial Review

In response to Item G–1 of OSMRE's April 2, 2001, 732 letter, Wyoming proposed to add requirements to its rules at Chapter 12, Section 1(a)(vii)(E) providing for administrative and judicial review of VER determinations.

OSMRE replied in a letter dated August 17, 2011, that in order to provide clarity and specificity within its own rules and be consistent with the Federal requirements at 30 CFR 761.16(f) Wyoming must revise the proposed rule language by adding a reference to the Wyoming Administrative Procedures Act. Wyoming's failure to include this reference in the proposed rule renders its program less effective than the Federal regulations.

Wyoming responded in a letter dated October 5, 2011, and stated that it will revise it rules to include a reference to the Wyoming Administrative Procedures Act in a future rule package.

Based on the discussion above, we are not approving Wyoming's proposed rule change at Chapter 12, Section 1(a)(vii)(E) providing for administrative and judicial review of VER determinations. We also acknowledge Wyoming's commitment to include a reference to the Wyoming Administrative Procedures Act in a future rulemaking.

15. Chapter 12, Section 1(a)(vii)(F); Availability of Records

In response to Item G–4 of OSMRE's April 2, 2001, 732 letter, Wyoming proposed to revise its rules at Chapter 12, Section 1(a)(vii)(F) by requiring that the Division or agency responsible for processing a VER request shall make a copy of the request and related materials available to the public.

OSMRE replied in a letter dated August 17, 2011, that in order to maintain consistency within its rules, Wyoming needs to specify in the heading that the rule pertains to ''Availability of Records.'' Moreover, Wyoming must add language explaining that, in addition to the VER request and related materials, records associated with any subsequent determination under subsection (D) shall also be made available to the public. Wyoming's failure to include this corresponding language in its proposed rule renders its program less effective than the Federal regulations at 30 CFR 761.16(g).

Wyoming responded in a letter dated October 5, 2011, by stating that it will revise its rules to include the section header ''Availability of Records'' and additional language regarding other materials which may be made available to the public.

Accordingly, we are not approving Wyoming's proposed rule change at Chapter 12, Section 1(a)(vii)(F) concerning requirements for making VER requests and related materials available to the public. We also acknowledge Wyoming's commitment to revise the rule to address the required changes discussed above in a future rulemaking effort.

16. Chapter 12, Section 1(a)(vii)(G)(III)(2.); Procedures for Joint Approval of Surface Coal Mining Operations That Will Adversely Affect Publicly Owned Parks or Historic Places

In response to Item H–1 of OSMRE's April 2, 2001, 732 letter and to be no less effective than the Federal requirements at 30 CFR 761.17, Wyoming proposed new rules at Chapter 12, Section 1(a)(vii)(G) regarding procedures for joint approval of surface coal mining operations that will adversely affect publicly owned parks or historic places. Wyoming also proposed to clarify in subsection (III)(2.) that these procedures do not apply to lands within the scope of the exception for existing operations or to lands for which a person has VER.

OSMRE replied in a letter dated August 17, 2011, that in order to maintain consistency within its rules, Wyoming needs to revise the proposed rule language in subsection (2.) by adding a citation cross-reference to subsection (iv) to specify where the ''exception for existing operations'' is located in its Chapter 1, ''valid existing rights'' definition.

Wyoming responded in a letter dated October 5, 2011, and stated that it will amend its rules to include the required cross-reference in a future rule package.

Based on the discussion above, we are not approving Wyoming's proposed rule change at Chapter 12, Section 1(a)(vii)(G) concerning procedures for joint approval of surface coal mining operations that will adversely affect publicly owned parks or historic places. We also acknowledge Wyoming's commitment to add the aforementioned required citation cross-references in a future rulemaking effort.

17. Chapter 16, Section 4(a)(iii); Definition of ''Willfully''

In response to a November 7, 1988, 732 letter, Wyoming proposed to add a new definition of ''willfully'' to its rules at Chapter 16, Section 4(a)(iii) to be no less effective than those of the Federal rules.

OSMRE replied in a letter dated August 17, 2011, and notified Wyoming that OSMRE revised this definition and moved it from 30 CFR 846.5 to 701.5 in a December 19, 2000, final rule **Federal Register** (65 FR 79656) notice. Specifically, OSMRE replaced the definition of ''willful'' with a similarly worded definition of ''willful or willfully'' to mean ''that a person who authorized, ordered or carried out an act or omission that resulted in either a violation or the failure to abate or correct a violation acted: (1) Intentionally, voluntarily, or consciously; and (2) with intentional disregard or plain indifference to legal requirements.'' OSMRE revised the text of the definition for clarity and consistency with the term's broader applicability. In addition, OSMRE replaced the word ''individual'' with ''person'' because the Act and Federal regulations define person in a manner that includes both individuals and business entities, as is appropriate in the context in which the Act and regulations employ this term.

Wyoming's proposed definition of ''willfully'' at Chapter 16, Section 4(a)(iii) means ''that an individual acted: (A) Intentionally, voluntarily, or consciously; and (B) with intentional disregard or plain indifference to legal requirements.'' While subsections (A) and (B) are identical to the Federal counterpart provisions, subsection (iii) does not include the revised Federal language defining ''willful'' to mean ''a person who authorized, ordered or carried out an act or omission that resulted in either a violation or the failure to abate or correct a violation.'' Similar to Section 701(19) of SMCRA, Wyoming Statute W.S. 35–11–103(a)(vi) also defines the word ''person'' in a manner that includes both individuals and business entities. Lastly, it should be noted that the language in Wyoming's proposed definition of ''knowingly'' at Chapter 16, Section 4(a)(i) is identical to the revised Federal definition language at 30 CFR 701.5. Thus, in order to maintain consistency with the terminology used in its proposed rules and be no less effective than the corresponding Federal regulations at 30 CFR 701.5, we required Wyoming to amend its proposed definition of ''willfully'' to include the revised language discussed above.

Wyoming responded in a letter dated October 5, 2011, by stating that it will revise it rules to include the additional language described above in a future rule package.

Based on the discussion above, we are not approving Wyoming's newly-proposed definition of ''willfully'' to its rules at Chapter 16, Section 4(a)(iii). We also acknowledge Wyoming's commitment to revise the rule and add the required language discussed above in a future rulemaking effort.

18. Chapter 16, Section 4(b)(i); When an Individual Civil Penalty May Be Assessed

Wyoming proposes new rules at Chapter 16, Section 4(b) for determining when an individual civil penalty may be assessed. In subsection (i), Wyoming references its statutes at W.S. 35–11–902(b), ''Surface coal mining operations; violations of provisions; penalties'' in lieu of adopting Federal counterpart language at 30 CFR 846.12(a). In its Statement of Principal Reasons, Wyoming indicates that the statutory reference was in response to concerns expressed by the Wyoming Attorney General who stated in a review letter dated February 20, 2001, that most of the rules proposed by Chapter 16, Section 4, are already covered in W.S. 35–11–902.

In a November 7, 1988, 732 letter, OSMRE required Wyoming to adopt definitions of ''knowingly,'' ''willfully,'' and ''violation, failure or refusal'' to be no less effective than those of the Federal rules. Wyoming's proposed definition of ''violation, failure or refusal'' at Chapter 16, Section 4(a)(ii) is consistent with and no less effective than the Federal definition at 30 CFR 701.5. The referenced statutory language at W.S. 35–11–902(b) states, in pertinent part, that ''Any person who violates, or any director, officer or agent of a corporate permittee who willfully and knowingly authorizes, orders or carries out the violation'' is subject to an individual civil penalty. However, unlike the Federal regulation at 30 CFR 846.12(a) the statute does not specify that such penalties may also be assessed for ''failure or refusal'' to comply. Thus, in order to be consistent with its proposed definition of ''violation, failure or refusal'' and no less effective than the corresponding Federal requirements at 30 CFR 846.12(a) Wyoming must either clarify how its reference to W.S. 35–11–902(b) addresses a ''failure or refusal'' to comply, or revise the language in proposed Chapter 16, Section 4(b)(i) by stating that that the Director may assess an individual civil penalty against any corporate director, officer or agent of a corporate permittee who knowingly and willfully authorized, ordered or carried out a violation, failure or refusal.

Wyoming responded in a letter dated October 5, 2011, by stating that it will amend its regulations to include the language discussed above provided it is determined that the Department of Environmental Quality has the authority to adopt that language in consideration of W.S. 35–11–902.

Consequently, we do not approve Wyoming's newly-proposed rules at Chapter 16, Section 4(b)(i) for determining when an individual civil penalty may be assessed. We also acknowledge Wyoming's commitment to revise the proposed rule and add the language discussed above in a future rulemaking effort if authorized to do so, or clarify how its reference to W.S. 35–11–902(b) addresses a ''failure or refusal'' to comply.

19. Chapter 16, Section 4(c)(i); Amount of Civil Penalty

In a November 7, 1988, 732 letter, OSMRE notified Wyoming that its rules concerning individual civil penalties were deficient. In response, Wyoming proposes new rules at Chapter 16, Section 4(c)(i) imposing criteria that shall be considered when determining the amount of the individual civil penalty to be assessed. Proposed subsection (A) requires the Director to consider the ''individual's history of authorizing, ordering or carrying out previous violations, failures or refusals at the particular surface mining operation.''

However, the Federal counterpart provision at 30 CFR 846.14(a)(1), as well as the remainder of Wyoming's rules refer to ''surface *coal* mining operations.'' Thus, in order to maintain consistency with the terminology used in those rules, Wyoming must revise its proposed rule language to include the term ''coal.'' Based on the discussion above, we are not approving Wyoming's

newly proposed rule at Chapter 16, Section 4(c)(i)(A).

20. Chapter 16, Section 4(c)(ii); Amount of Civil Penalty

In a November 7, 1988, 732 letter, OSMRE notified Wyoming that its rules concerning individual civil penalties were deficient. In response, Wyoming proposes a new rule at Chapter 16, Section 4(c)(ii) prescribing individual civil penalty amounts that cannot be exceeded for each day during which a violation, failure or refusal continues, including those for multiple violations. Specifically, Wyoming incorporates a reference to its statute at W.S. 35–11–902(b), ''Surface coal mining operations; violations of provisions; penalties'' which states, in pertinent part, that violators are ''subject to either a penalty not to exceed ten thousand dollars ($10,000.00) for each day during which a violation continues, or, for multiple violations, a penalty not to exceed five thousand dollars ($5,000.00) for each violation for each day during which a violation continues * * *.'' In its SOPR, Wyoming indicates that the statutory reference was made in response to concerns expressed by the Wyoming Attorney General who stated in a review letter dated February 20, 2001, that W.S. 35–11–902(b) provides a more detailed penalty assessment for individual offenses and daily offenses than did Wyoming's originally proposed rule language that mirrored the Federal rule.

The Federal counterpart language provides a maximum penalty amount for each violation and a separate individual penalty may be assessed for each day the violation, failure or refusal continues, but it does not specifically address multiple violations. Thus, Wyoming's reference to its statute at W.S. 35–11–902(b) adds specificity and does not render its proposed rule at Chapter 16, Section 4(c)(ii) less effective than the corresponding Federal requirements at 30 CFR 846.14(b). Accordingly, we approve it.

21. Chapter 16, Section 4(d)(ii)(A); Procedure for Assessment of Individual Civil Penalty

In a November 7, 1988, 732 letter, OSMRE notified Wyoming that its rules concerning individual civil penalties were deficient. In response, Wyoming proposes a new rule at Chapter 16, Section 4(d)(ii)(A) requiring an individual to file within 15 days of service of a notice of proposed individual civil penalty assessment a petition for review with the Environmental Quality Council. In its SOPR, Wyoming indicates that the 15-day petition for review timeframe was included in response to concerns expressed by the Wyoming Attorney General who stated in a review letter dated February 20, 2001, that the 30-day timeframe provided in Wyoming's originally proposed rule language that mirrored the Federal rule was less restrictive than W.S. 35–11–902(d) which specifically provides and allows for 15 days to request a conference.

The Federal counterpart language requires an individual to file within 30 days of service of a notice of proposed individual civil penalty assessment a petition for review with the U.S. Department of the Interior's Office of Hearings and Appeals. Wyoming's 15-day timeframe to petition for review of a notice of proposed individual civil penalty assessment is both consistent with its statutory requirement at W.S. 35–11–902(d) and more stringent than the Federal 30-day timeframe. As such, Wyoming's proposed rule at Chapter 16, Section 4(d)(ii)(A) is no less effective than the corresponding Federal requirements at 30 CFR 846.17(b) and we approve it.

D. Removal of Required Amendments

1. Required Amendment at 30 CFR 950.16(r), Disposal of Noncoal Wastes

In an October 29, 1992 **Federal Register** (57 FR 48984) notice, we required Wyoming to either reinstate the removed cited reference ''disposal of noncoal wastes shall be in accordance with the standards set out in Section 11, paragraph c., Solid Waste Management Rules and Regulations (1980)'' or otherwise amend its rules to be no less effective than the Federal regulations at 30 CFR 816.89 and 817.89. Wyoming had revised its existing rule at Chapter 2, Section 3(a)(v)(A)(II) (now codified at Chapter 2, Section 2(a)(v)(A)(II)) by adding the modified definition of Solid Waste Management Facility contained in W.S. 35–11–103(d)(ii)(D) and by removing the requirement that noncoal wastes shall be disposed of in accordance with the Solid Waste Management Rules and Regulations. Additionally, the proposed rule would require facilities receiving solid waste that is generated outside the proposed permit area by any activity other than a mine-mouth power plant or mine-mouth coal drier to follow the Solid Waste Management Rules of Article 5 of the Environmental Quality Act (EQA).

The proposed rules were disapproved primarily because of the removal of specific performance standards for noncoal mine waste disposal as approved by the OSMRE in Wyoming's original program. Moreover, the proposed Statute change of Article 5 of the EQA did not contain Federal counterpart rules to the Federal requirements at 30 CFR 816.89 and 817.89. Consequently, we determined that Wyoming's proposed rules regarding solid waste permitting and management for mines were less effective than the corresponding Federal regulations.

Wyoming explains in its SOPR that in November of 1990, the Solid Waste Management Program revised its rules by removing Section 11, paragraph c. from the Solid Waste Rules and Regulations in response to the Wyoming Legislature eliminating duplication of jurisdiction for mine site solid waste disposal. The (now repealed) rules contained language which was very similar to the Federal Rules at 30 CFR 816.89, Disposal of noncoal mine wastes. OSMRE requested that the original reference to these rules be reinstated. However, Wyoming states that the rules are no longer a part of the current Solid and Hazardous Waste Management Division Rules and Regulations and cannot be referenced in the LQD Rules and Regulations.

In response to the required program amendment at 30 CFR 950.16(r), Wyoming proposes to revise its rules at Chapter 2, Section 2(a)(v)(A) by referring to the ''Solid and Hazardous Waste Management Division.'' Wyoming also proposes to revise subsection (II) by adding a cross-reference to its newly proposed rules at Chapter 4, Section 2(c)(xiii)(C) that provide standards for noncoal waste disposal and are no less effective than Federal regulation requirements at 30 CFR 816.89 and 817.89. Wyoming explains in its SOPR that the proposed rule language more appropriately explains which DEQ Division has authority over facilities other than those handling mine generated noncoal waste, and that the counterpart Federal rules now proposed for adoption in Chapter 4 also apply to such ''within permit'' disposal of off-site wastes.

Wyoming's proposed revisions makes its rules at Chapter 2, Section 2(a)(v)(A)(II) no less effective than the Federal regulations at 30 CFR 816.89 and 817.89, and we are removing the required program amendment at 30 CFR 950.16(r).

2. Required Amendments at 30 CFR 950.16(s) and (t), Specific Performance Standards for Noncoal Waste Disposal

In an October 29, 1992 **Federal Register** (57 FR 48984) notice, we required Wyoming to submit revisions to its rules at Chapter 2, Section 3(b)(xxi) and (xxii) (now codified at Chapter 2, Section 5(a)(xx) and (xxi),

respectively) to provide and/or include specific performance standards for noncoal waste disposal that are no less effective than the Federal Regulations at 30 CFR 816.89 and 817.89.

In response to required program amendments at 30 CFR 950.16(s) and (t), Wyoming proposes to revise its rules at Chapter 2, Section 5(a)(xx) by requiring that each application for a surface coal mining permit contain a plan for the management and disposal of noncoal mine waste within the proposed permit area in accordance with its newly-proposed rules at Chapter 4, Section 2(c)(xiii)(C) that provide standards for noncoal waste disposal and are no less effective than the Federal requirements at 30 CFR 816.89 and 817.89.

Wyoming also proposes to remove its rule at Chapter 2, Section 5(a)(xxi) regarding plans for the management and disposal within the permit area of any solid wastes generated by a mine mouth power plant or mine mouth coal drier. Wyoming states in its SOPR that the rule is being proposed for deletion because separate rules regarding solid wastes generated by a mine mouth power plant, coal drier or coal processing facility are no longer necessary. Wyoming further explains that these types of facilities are now addressed with the inclusion of language in proposed Chapter 2, Section 5(a) (xx) regarding solid wastes generated by a mine mouth power plant, coal drier or coal processing facility. Wyoming also notes that ''noncoal mine waste'' is interpreted by the LQD to exclude coal mine dust and coal fines which may be generated during the processing of coal. Specifically, coal dust and fines may be recovered and therefore are not considered waste.

Based on the foregoing, Wyoming's proposed revisions to its rules at Chapter 2, Section 5(a)(xx) and (xxi) are no less effective than the Federal regulations at 30 CFR 780.11(b), 816.89 and 817.89, and we are removing the required program amendments at 30 CFR 950.16(s) and (t).

3. Required Amendment at 30 CFR 950.16(s) and (t), Specific Performance Standards for Noncoal Waste Disposal

In an October 29, 1992 **Federal Register** (57 FR 48984) notice, we required Wyoming to submit revisions to its rules at Chapter 4, Section 2(c)(v) and Section 3(c)(iii)(C) and (D) (now codified at Chapter 4, Section 2(c)(xiii)(C) and (D), respectively) to provide and/or include specific performance standards for noncoal waste disposal that are no less effective than the Federal Regulations at 30 CFR 816.89 and 817.89.

In response to the required program amendments at 30 CFR 950.16(s) and (t), Wyoming proposes new rules at Chapter 4, Section 2(c)(xiii)(C)(I)–(III) that provide specific performance standards for temporary storage of noncoal mine wastes, final disposal of noncoal mine wastes, and restrictions as to where noncoal mine waste can be deposited. Wyoming also incorporates the requirements of former Section 2(c)(v) into newly-proposed Chapter 4, Section 2(c)(xiii)(C)(I) and (II) under ''Disposal of noncoal mine wastes.'' Subsections (I) and (III) of Wyoming's proposed rules regarding temporary storage and deposition restrictions for noncoal mine wastes are substantively identical to and no less effective than the Federal counterpart requirements at 30 CFR 816.89 and 817.89(a) and (c), and we are approving them.

Wyoming's proposed rule language in subsection (II) regarding final disposal of noncoal mine wastes requires that when the disposal is completed, a minimum of four feet of suitable cover material shall be placed over the site. The Federal counterpart language requires that a minimum of two feet of soil cover shall be placed over the site when the disposal is completed. In its SOPR, Wyoming explains that a burial depth of four feet above any noncoal mine waste disposal site is required to ensure that the disposed materials are never exposed at the final reclaimed surface. Wyoming acknowledges that this requirement is more stringent than the minimum of two feet of soil cover required by Federal Rules at 30 CFR 816.89(b). However, for the types of wastes that will be buried and the fact that some amount of erosion takes place on reclaimed land in the arid West, Wyoming believes that four feet of cover plus subsoil and topsoil, is necessary to prevent buried materials from making their way to the soil surface.

Wyoming also explains that its proposal requiring that suitable material be used for burial purposes rather than ''soil cover'' as required by the OSMRE rules is intended to clarify that topsoil and subsoil should not be used for burial purposes. Wyoming adds that the four feet can be comprised of suitable spoil or other approved material which is nontoxic, nonacid-forming and noncombustible, and the approved depth of subsoil/topsoil shall be placed above the four feet of suitable cover material.

We agree with Wyoming's rationale justifying the adoption of a four foot burial depth above disposal sites using of suitable cover material in lieu of soil cover. These provisions are reasonable and are more stringent than the Federal counterpart requirements at 30 CFR 816.89 and 817.89(b). Therefore, we approve subsection (II) of newly proposed Chapter 4, Section 2(c)(xiii)(C).

Wyoming also proposes to remove its rule at Chapter 4, Section 2(c)(xiii)(D) regarding management and final burial on the permit area of solid wastes generated by a mine mouth power plant or mine mouth coal drier. Wyoming explains in its SOPR that subsection (D) is no longer necessary because these types of facilities are now addressed with the inclusion of language in proposed Chapter 4, Section 2(c)(xiii)(C)(II) regarding solid wastes generated by a mine mouth power plant, coal drier or coal processing facility. Wyoming notes that ''noncoal mine waste'' is interpreted by the LQD to exclude coal mine dust and coal fines which may be generated during the processing of coal. Specifically, coal dust and fines may be recovered and therefore are not considered waste. We agree with Wyoming's proposed rule change and approve it.

Based on the discussion above, Wyoming's proposed revisions to its rules at Chapter 4, Section 2(c)(xiii)(C) and (D) are no less effective than the Federal regulations at 30 CFR 816.89 and 817.89, and we are removing the required program amendments at 30 CFR 950.16(s) and (t).

Related to the findings above is Wyoming's proposal to add a new rule at Chapter 7, Section 2(b)(ix) regarding Environmental Protection Performance Standards Applicable to Underground Mining Operations. In its SOPR, Wyoming's explains that proposed subsection (ix) provides a specific cross-reference to the noncoal mine waste management and performance standards in Chapter 4 Section 2(c) and is intended to make clear that they are applicable to underground mining operations as required by 30 CFR 817.89. Wyoming also states that the additional subsection will eliminate the need for adoption of a separate set of duplicate rules regarding noncoal mine waste generated by underground coal mines. We find that Wyoming's proposed rule applying noncoal mine waste management and performance standards to underground mining operations is no less effective than the Federal requirements at 30 CFR 817.89 and we approve it.

IV. Summary and Disposition of Comments

Public Comments

We asked for public comments on the amendment (Administrative Record

Document ID No. OSM–2011–0004–0001), but did not receive any.

Federal Agency Comments

Under 30 CFR 732.17(h)(11)(i) and section 503(b) of SMCRA, we requested comments on the amendment from various Federal agencies with an actual or potential interest in the Wyoming program (Administrative Record No. WY–45–03). We received comments from three Federal Agencies.

The United States Geological Survey (USGS) commented in a May 10, 2011, email response (Administrative Record Document ID No. OSM–2011–0004–0008), the Mine Safety and Health Administration (MSHA) commented in a June 1, 2011, letter (Administrative Record Document ID No. OSM–2011–0004–0006), and the Bureau of Land Management (BLM) commented in a June 3, 2011, letter (Administrative Record Document ID No. OSM–2011–0004–0005).

The USGS responded that inasmuch as they aren't a regulatory agency, they do not have a major role for commenting on these rule changes. The USGS further stated that a copy of the amendment materials was forwarded to the Central Energy Resource (coal group), Wyoming Water Science Center (water), and Fort Collins (wildlife and habitat) Science Centers for their review. The USGS concluded by stating they would forward to OSMRE any comments that were received from those groups.

MSHA responded that it reviewed the proposed changes to the Wyoming Reclamation Program and had no comments or concerns.

The BLM responded that the proposed Wyoming Reclamation Program amendment materials were reviewed by BLM staff in the Field, District, and State Offices and it did not have any comments at this time.

Environmental Protection Agency (EPA) Concurrence and Comments

Under 30 CFR 732.17(h)(11)(i) and (ii), we are required to get concurrence from EPA for those provisions of the program amendment that relate to air or water quality standards issued under the authority of the Clean Water Act (33 U.S.C. 1251 *et seq.*) or the Clean Air Act (42 U.S.C. 7401 *et seq.*).

Under 30 CFR 732.17(h)(11)(i), OSMRE requested comments on the amendment from EPA (Administrative Record No. WY–45–03). EPA did not respond to our request.

State Historic Preservation Officer (SHPO) and the Advisory Council on Historic Preservation (ACHP)

Under 30 CFR 732.17(h)(4), we are required to request comments from the SHPO and ACHP on amendments that may have an effect on historic properties. On July 1, 2011, we requested comments on Wyoming's amendment (Administrative Record No. WY–045–06), but neither responded to our request.

V. OSMRE's Decision

Based on the above findings, we approve, with certain exceptions, Wyoming's April 28, 2011, amendment. We do not approve the following provisions or parts of provisions.

As discussed in Finding No. III.C.1, we are not approving Wyoming's revised VER definition at Chapter 1, Section 2(fl).

As discussed in Finding No. III.C.2, we are not approving Wyoming's newly-proposed ''Needed for and adjacent standard'' definition at Chapter 1, Section 2(fl)(ii)(B)(IV).

As discussed in Finding No. III.C.3, we are not approving Wyoming's proposed rule change at Chapter 1, Section 2(fl)(iii) that applies its VER standard to all roads included within a surface mining operation.

As discussed in Finding No. III.C.4, we are not approving Wyoming's proposed rule change at Chapter 12, Section 1(a)(v)(D) regarding procedures for public road waivers.

As discussed in Finding No. III.C.5, we are not approving Wyoming's proposed rule change at Chapter 12, Section 1(a)(vii)(A)(I) concerning VER determination requests.

As discussed in Finding No. III.C.6, we are not approving Wyoming's proposed rule change at Chapter 12, Section 1(a)(vii)(A)(IV) concerning VER submission requirements and requests that rely on one of the standards for roads.

As discussed in Finding No. III.C.7, we are not approving Wyoming's proposed rule change at Chapter 12, Section 1(a)(vii)(B)(I) concerning initial review of a VER request.

As discussed in Finding No. III.C.8, we are not approving Wyoming's proposed rule change at Chapter 12, Section 1(a)(vii)(B)(IV) concerning an initial review of all applicable submission components for making VER determinations.

As discussed in Finding No. III.C.9, we are not approving Wyoming's proposed rules concerning VER public notice and comment requirements and procedures at Chapter 12, Section 1(a)(vii)(C)(I)(3.).

As discussed in Finding No. III.C.10, we are not approving Wyoming's proposed rule change at Chapter 12, Section 1(a)(vii)(C)(II)(2.) concerning VER public notice and comment requirements and procedures.

As discussed in Finding No. III.C.11, we are not approving Wyoming's proposed rule change at Chapter 12, Section 1(a)(vii)(C)(III) concerning VER public notice and comment requirements and procedures.

As discussed in Finding No. III.C.12, we are not approving Wyoming's proposed rule change at Chapter 12, Section 1(a)(vii)(D)(I) concerning the review of materials and comments submitted for adequacy before making a VER determination.

As discussed in Finding No. III.C.13, we are not approving Wyoming's proposed rule change at Chapter 12, Section 1(a)(vii)(D)(III) concerning the impacts of property rights disagreements on VER determinations.

As discussed in Finding No. III.C.14, we are not approving Wyoming's proposed rule change at Chapter 12, Section 1(a)(vii)(E) providing for administrative and judicial review of VER determinations.

As discussed in Finding No. III.C.15, we are not approving Wyoming's proposed rule change at Chapter 12, Section 1(a)(vii)(F) concerning requirements for making VER requests and related materials available to the public.

As discussed in Finding No. III.C.16, we are not approving Wyoming's proposed rule change at Chapter 12, Section 1(a)(vii)(G) concerning procedures for joint approval of surface coal mining operations that will adversely affect publicly owned parks or historic places.

As discussed in Finding No. III.C.17, we are not approving Wyoming's newly-proposed definition of ''willfully'' to its rules at Chapter 16, Section 4(a)(iii).

As discussed in Finding No. III.C.18, we are not approving Wyoming's newly-proposed rules at Chapter 16, Section 4(b)(i) for determining when an individual civil penalty may be assessed.

As discussed in Finding No. III.C.19, we are not approving Wyoming's newly-proposed rule at Chapter 16, Section 4(c)(i)(A) imposing criteria that shall be considered when determining the amount of the individual civil penalty to be assessed.

We are removing existing required amendments and approving, as discussed in: Finding No. III.D.1, Chapter 2, Section 2(a)(v)(A)(II) concerning disposal of noncoal wastes; Finding No. III.D.2, Chapter 2, Section

5(a) (xx) and (xxi) concerning specific performance standards for noncoal waste disposal; and Finding No. III.D.3, Chapter 4, Section 2(c)(xiii)(C) and (D) concerning specific performance standards for noncoal waste disposal. To implement this decision, we are amending the Federal regulations at 30 CFR Part 950, which codify decisions concerning the Wyoming program. We find that good cause exists under 5 U.S.C. 553(d)(3) to make this final rule effective immediately. Section 503(a) of SMCRA requires that the State's program demonstrates that the State has the capability of carrying out the provisions of the Act and meeting its purposes. Making this regulation effective immediately will expedite that process. SMCRA requires consistency of State and Federal standards.

Effect of OSMRE's Decision

Section 503 of SMCRA provides that a State may not exercise jurisdiction under SMCRA unless the State program is approved by the Secretary. Similarly, 30 CFR 732.17(a) requires that any change of an approved State program be submitted to OSMRE for review as a program amendment. The Federal regulations at 30 CFR 732.17(g) prohibit any changes to approved State programs that are not approved by OSMRE. In the oversight of the Wyoming program, we will recognize only the statutes, regulations and other materials we have approved, together with any consistent implementing policies, directives and other materials. We will require Wyoming to enforce only approved provisions.

VI. Procedural Determinations

Executive Order 12630—Takings

This rule does not have takings implications. This determination is based on the analysis performed for the counterpart Federal regulation.

Executive Order 12866—Regulatory Planning and Review

This rule is exempted from review by the Office of Management and Budget (OMB) under Executive Order 12866.

Executive Order 12988—Civil Justice Reform

The Department of the Interior has conducted the reviews required by section 3 of Executive Order 12988 and has determined that this rule meets the applicable standards of subsections (a) and (b) of that section. However, these standards are not applicable to the actual language of State regulatory programs and program amendments because each program is drafted and promulgated by a specific State, not by OSMRE. Under sections 503 and 505 of SMCRA (30 U.S.C. 1253 and 1255) and the Federal regulations at 30 CFR 730.11, 732.15, and 732.17(h)(10), decisions on proposed State regulatory programs and program amendments submitted by the States must be based solely on a determination of whether the submittal is consistent with SMCRA and its implementing Federal regulations and whether the other requirements of 30 CFR Parts 730, 731, and 732 have been met.

Executive Order 13132—Federalism

This rule does not have Federalism implications. SMCRA delineates the roles of the Federal and State governments with regard to the regulation of surface coal mining and reclamation operations. One of the purposes of SMCRA is to ''establish a nationwide program to protect society and the environment from the adverse effects of surface coal mining operations.'' Section 503(a)(1) of SMCRA requires that State laws regulating surface coal mining and reclamation operations be ''in accordance with'' the requirements of SMCRA, and section 503(a)(7) requires that State programs contain rules and regulations ''consistent with'' regulations issued by the Secretary pursuant to SMCRA.

Executive Order 13175—Consultation and Coordination With Indian Tribal Governments

In accordance with Executive Order 13175, we have evaluated the potential effects of this rule on Federally recognized Indian tribes and have determined that the rule does not have substantial direct effects on one or more Indian tribes, on the relationship between the Federal government and Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes. The rule does not involve or affect Indian tribes in any way.

Executive Order 13211—Regulations That Significantly Affect the Supply, Distribution, or Use of Energy

On May 18, 2001, the President issued Executive Order 13211 which requires agencies to prepare a Statement of Energy Effects for a rule that is (1) considered significant under Executive Order 12866, and (2) likely to have a significant adverse effect on the supply, distribution, or use of energy. Because this rule is exempt from review under Executive Order 12866 and is not expected to have a significant adverse effect on the supply, distribution, or use of energy, a Statement of Energy Effects is not required.

National Environmental Policy Act

This rule does not require an environmental impact statement because section 702(d) of SMCRA (30 CFR U.S.C. 1292(d)) provides that agency decisions on proposed State regulatory program provisions do not constitute major Federal actions within the meaning of section 102(2)(C) of the National Environmental Policy Act (42 U.S.C. 4332(2)(C) *et seq*).

Paperwork Reduction Act

This rule does not contain information collection requirements that require approval by OMB under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

Regulatory Flexibility Act

The Department of the Interior certifies that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). The State submittal, which is the subject of this rule, is based upon counterpart Federal regulations for which an economic analysis was prepared and certification made that such regulations would not have a significant economic effect upon a substantial number of small entities. In making the determination as to whether this rule would have a significant economic impact, the Department relied upon the data and assumptions for the counterpart Federal regulations.

Small Business Regulatory Enforcement Fairness Act

This rule is not a major rule under 5 U.S.C. 804(2), of the Small Business Regulatory Enforcement Fairness Act. This rule:

a. Does not have an annual effect on the economy of $100 million.

b. Will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions.

c. Does not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S. based enterprises to compete with foreign-based enterprises.

This determination is based upon the fact that the State submittal which is the subject of this rule is based upon counterpart Federal regulations for which an analysis was prepared and a determination made that the Federal regulation was not considered a major rule.

Unfunded Mandates

This rule will not impose an unfunded mandate on State, local, or tribal governments or the private sector of $100 million or more in any given year. This determination is based upon the fact that the State submittal, which is the subject of this rule, is based upon counterpart Federal regulations for which an analysis was prepared and a determination made that the Federal regulation did not impose an unfunded mandate.

List of Subjects in 30 CFR Part 950

Intergovernmental relations, Surface mining, Underground mining.

Dated: June 26,2012.

Allen D. Klein,

Regional Director, Western Region.

Editorial Note: This document was received at the Office of the Federal Register on February 8, 2013.

For the reasons set out in the preamble, 30 CFR part 950 is amended as set forth below:

PART 950—Wyoming

■ 1. The authority citation for part 950 continues to read as follows:

Authority: 30 U.S.C. 1201 *et seq.*

■ 2. Section 950.15 is amended in the table by adding a new entry in chronological order by ''Date of Final Publication'' to read as follows:

§ 950.15 Approval of Wyoming regulatory program amendments.

* * * * *

BILLING CODE 4310–05–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 100

[Docket No. USCG–2012–1034]

Special Local Regulation; Southern California Annual Marine Events for the San Diego Captain of the Port Zone

AGENCY: Coast Guard, DHS.

ACTION: Notice of enforcement of regulation.

SUMMARY: The Coast Guard will enforce the 2013 California Ironman Triathlon Special Local Regulation located in Oceanside Harbor in Oceanside, California from 6:40 a.m. through 9:30 a.m. on March 30, 2013. This action is necessary to provide to provide for the safety of the participants, crew, spectators, sponsor vessels of the event, and general users of the waterway. During the enforcement period, no spectators shall anchor, block, loiter in, or impede the transit of participants or official patrol vessels in the regulated area during the effective dates and times, unless cleared for such entry by Coast Guard Patrol Commander or through an official supporting vessel.

DATES: The regulations in 33 CFR 100.1101 will be enforced from 6:40 a.m. to 9:30 a.m. on March 30, 2013.

FOR FURTHER INFORMATION CONTACT: If you have questions on this notice, call or email Petty Officer Bryan Gollogly, Waterways Management, U.S. Coast Guard Sector San Diego, CA; telephone 619–278–7656, email *D11–PF–MarineEventsSanDiego@uscg.mil.*

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce the Special Local Regulation for the 2013 California Ironman Triathlon in 33 CFR 100.1101 (Item 2 on Table 1) from 6:40 a.m. through 9:30 a.m. on March 30, 2013.

Under provisions of 33 CFR 100.1101, a vessel may not enter the regulated area, unless it receives permission from the COTP. Spectator vessels may safely transit outside the regulated area but may not anchor, block, loiter, or impede the transit of participants or official patrol vessels. The Coast Guard may be assisted by other Federal, State, or Local law enforcement agencies in enforcing this regulation.

This notice is issued under authority of 33 CFR 100.1101 and 5 U.S.C. 552 (a). In addition to this notice in the **Federal Register**, the Coast Guard will provide the maritime community with extensive advance notification of this enforcement period via the Local Notice to Mariners. If the Captain of the Port or his designated representative determines that the regulated area need not be enforced for the full duration stated on this notice, he or she may use a Broadcast Notice to Mariners to grant general permission to enter the regulated area.

Dated: January 22, 2013.

S.M. Mahoney,

Captain, United States Coast Guard, Captain of the Port San Diego.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[Docket No. USCG–2013–0061]

Drawbridge Operation Regulation; Bayou Boeuf, Amelia, LA

AGENCY: Coast Guard, DHS.

ACTION: Notice of deviation from drawbridge regulation.

SUMMARY: The Coast Guard has issued a temporary deviation from the operating schedule that governs the Burlington

Northern Santa Fe (BNSF) Railway Company swing span bridge across Bayou Boeuf, mile 10.2, at Amelia, St. Mary Parish, Louisiana. The deviation is necessary to complete scheduled repairs necessitated by a bridge allision. This deviation allows the bridge to remain in the closed-to-navigation position for sixteen consecutive hours.

DATES: This deviation is effective from 6 a.m. through 10 p.m. on Thursday, March 14, 2013.

ADDRESSES: The docket for this notice, USCG–2013–0061, is available online at *www.regulations.gov* by typing the docket number in the ''SEARCH'' box and clicking ''SEARCH.'' Click on Open Docket Folder on the line associated with this notice. You may also visit the Docket Management Facility in Room W12–140 on the ground floor of the Department of Transportation West Building, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: If you have questions on this temporary deviation, call or email David Frank, Bridge Administration Branch, Coast Guard; telephone 504–671–2128, email *David.M.Frank@uscg.mil.* If you have questions on viewing the docket, call Barbara Hairston, Program Manager, Docket Operations, telephone 202–366–9826.

SUPPLEMENTARY INFORMATION: The BNSF Railway Company has requested a temporary deviation from the operating schedule of the swing span railroad bridge across Bayou Boeuf, mile 10.2, at Amelia, St. Mary Parish, Louisiana. The bridge provides no vertical clearance in the closed-to-navigation position. However, the bridge will be able to open in the event of an emergency.

In accordance with 33 CFR 117.5, the bridge currently opens on signal for the passage of vessels. This deviation allows the swing span of the bridge to remain in the closed-to-navigation position from 6 a.m. through 10 p.m. on Thursday, March 14, 2013.

The closure is necessary in order to change out a shaft and reducer gear damaged during a bridge allision that occurred last year. Notices will be published in the Eighth Coast Guard District Local Notice to Mariners and will be broadcast via the Coast Guard Broadcast Notice to Mariners System.

Navigation at the site of the bridge consists mainly of tows with barges and some recreational pleasure craft. Due to prior experience, as well as coordination with waterway users, it has been determined that this closure will not have a significant effect on these vessels. An alternate route is available by using the GIWW, Morgan City to Port Allen Alternate Route.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: February 4, 2013.

David M. Frank,

Bridge Administrator, Eighth Coast Guard District.

[Docket No. USCG–2013–0062]

Drawbridge Operation Regulation; Charenton Canal, Baldwin, LA

AGENCY: Coast Guard, DHS.

ACTION: Notice of deviation from drawbridge regulation.

SUMMARY: The Coast Guard has issued a temporary deviation from the operating schedule that governs the Burlington Northern Santa Fe (BNSF) Railway Company swing span bridge across Charenton Canal, mile 0.4, at Baldwin, St. Mary Parish, Louisiana. The deviation is necessary to complete scheduled repairs for the continued safe operation of the bridge. This deviation allows the bridge to remain in the closed-to-navigation position for sixteen consecutive hours.

DATES: This deviation is effective from 6 a.m. through 10 p.m. on Thursday, March 28, 2013.

ADDRESSES: The docket for this notice, USCG–2013–0062, is available online at *www.regulations.gov* by typing in the docket number in the ''SEARCH'' box and clicking ''SEARCH.'' Next, click on Open Docket Folder on the line associated with this notice. You may also visit the Docket Management Facility in Room W12–140 on the ground floor of the Department of Transportation West Building, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: If you have questions on this temporary deviation, call or email David Frank, Bridge Administration Branch, Coast Guard; telephone 504–671–2128, email *David.M.Frank@uscg.mil.* If you have questions on viewing the docket, call Barbara Hairston, Program Manager, Docket Operations, telephone 202–366–9826.

SUPPLEMENTARY INFORMATION: The BNSF Railway Company has requested a temporary deviation from the operating schedule of the swing span railroad bridge across the Charenton Canal, mile 0.4, at Baldwin, St. Mary Parish, Louisiana. The bridge provides 10 feet of vertical clearance in the closed-to-navigation position. Due to the type of equipment being used and safety concerns, vessels will not be allowed to pass under the bridge while in the closed-to-navigation position. However, the bridge will be able to open in the event of an emergency.

Navigation on the waterway consists of tugs with tows, fishing vessels, and recreational craft including sailboats and powerboats. An alternate route is available for mariners through the Berwick Locks. The alternate waterway route takes about 45 minutes to transit. Due to prior experience, as well as coordination with waterway users, and the alternate route through Berwick Locks, it has been determined that this closure will not have a significant effect on these vessels.

In accordance with 33 CFR 117.5, the bridge currently opens on signal for the passage of vessels. This deviation allows the swing span of the bridge to remain in the closed-to-navigation position from 6 a.m. through 10 p.m. on Thursday, March 28, 2013.

The closure is necessary in order to change out the segment gear on the turn span of the bridge. Notices will be published in the Eighth Coast Guard District Local Notice to Mariners and will be broadcast via the Coast Guard Broadcast Notice to Mariners System.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: February 4, 2013.

David M. Frank,

Bridge Administrator, Eighth Coast Guard District.

BILLING CODE 9110–04–P

DEPARTMENT OF EDUCATION

34 CFR Part 300

RIN 1820–AB64

[Docket ID ED–2011–OSERS–0012]

Assistance to States for the Education of Children With Disabilities

AGENCY: Office of Special Education and Rehabilitative Services, Department of Education.

ACTION: Final regulations.

SUMMARY: The Secretary of Education (Secretary) amends regulations for Part B of the Individuals with Disabilities Education Act (IDEA or Act). These regulations govern the Assistance to States for the Education of Children with Disabilities program, including the Preschool Grants for Children with Disabilities program. These amendments revise the parental consent requirements a public agency must meet before it may access for the first time a child's or parent's public benefits or insurance (e.g., Medicaid) to pay for services required under the Act; ensure that parents of children with disabilities are specifically informed of all of their legal protections when public agencies seek to access public benefits or insurance (e.g., Medicaid) to pay for services required under the Act; and address the concerns expressed by State educational agencies (SEAs) and local educational agencies (LEAs) that requiring parental consent each time access to public benefits or insurance is sought, in addition to the parental consent required by the Family Educational Rights and Privacy Act (FERPA) and section 617(c) of the IDEA, imposes unnecessary costs and administrative burdens.

DATES: These regulations are effective on March 18, 2013.

FOR FURTHER INFORMATION CONTACT: Mary Louise Dirrigl, U.S. Department of Education, 550 12th Street SW., Potomac Center Plaza, Room 5156, Washington, DC 20202–2641. *Telephone:* (202) 245–7324. If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), you may call the Federal Relay System (FRS) at 1–800–877–8339.

Individuals with disabilities can obtain a copy of this document in an alternative format (e.g., Braille, large print, audiotape, or compact disk) upon request to the contact person listed in the preceding paragraph.

SUPPLEMENTARY INFORMATION:

Background: Section 300.154 of current regulations, which implements section 612(a)(12) and section 612(e) of the Act, addresses methods for ensuring services to children with disabilities, including the responsibility of non-educational public agencies to provide or pay for required special education or related services that are necessary to ensure the provision of a free appropriate public education (FAPE) to children with disabilities in the State. Specifically, § 300.154(h), which implements section 612(e) of the Act, provides that Part B of the Act does not alter requirements imposed on States by Titles XIX and XXI of the Social Security Act or other public benefits or insurance programs. Accordingly, § 300.154(a) reinforces this important principle and emphasizes each State's obligation to develop interagency agreements or other mechanisms for coordination between educational and non-educational public agencies to ensure that all services necessary to provide FAPE are provided to children with disabilities at no cost to the parent, including services such as assistive technology devices or assistive technology services, related services, supplementary aids and services, and transition services. To that end, § 300.154(a), consistent with section 612(a)(12)(A)(i) of the Act, requires States to identify the financial responsibility of non-educational public agencies, including the State Medicaid agency or other public insurers of children with disabilities, for providing services required for FAPE, and specifies that the financial responsibility of Medicaid and other public insurers of children with disabilities must precede the financial responsibility of the LEA responsible for developing the child's IEP. Further, § 300.154(b)(1)(ii), provides that a non-educational public agency may not disqualify a covered service for reimbursement because that service is provided in a school context.

On September 28, 2011, the Department published a notice of proposed rulemaking (NPRM) in the **Federal Register** (76 FR 60310). In the preamble, the Secretary discussed the changes proposed to the regulations that govern the use of a child's or parent's public benefits or insurance to provide or pay for services required under Part B of the IDEA.

Major Changes in the Regulations

The Department has made several significant changes to the regulations proposed in the NPRM. Specifically:

- We have added new § 300.154(d)(2)(iv), which clarifies the parental consent a public agency must obtain prior to accessing a child's or parent's public benefits or insurance for the first time. Paragraph (A) of new § 300.154(d)(2)(iv) describes the specific elements of the written parental consent that a public agency must obtain under FERPA and IDEA before it may release for billing purposes a child's personally identifiable information to a public benefits or insurance program (e.g., Medicaid). Paragraph (B) of new § 300.154(d)(2)(iv) requires that the one-time consent described in new § 300.154(d)(2)(iv)(A) must specify that the parent understands and agrees that the public agency may access the child's or parent's public benefits or insurance to pay for services under part 300.
- Because we have added the parental consent provision in new § 300.154(d)(2)(iv), we have moved the provision requiring public agencies to provide written notification to the child's parents in proposed § 300.154(d)(2)(iv) to new § 300.154(d)(2)(v). This new paragraph incorporates, with some minor modifications from the proposed regulations, the specific information that must be included in this written notification. In addition final § 300.154(d)(2)(v) requires that the public agency provide this written notification to the child's parents both prior to accessing a child's or parent's public benefits or insurance for the first time, and annually thereafter. The Department's rationale for these changes is discussed in the *Analysis of Comments and Changes* section of this preamble.

Analysis of Comments and Changes

Introduction

In response to the invitation in the NPRM, more than 500 parties submitted comments. An analysis of the comments and of the changes we made to the regulations as a result follows this introduction. The perspectives of parents, individuals with disabilities, State and local education officials, advocacy organizations, and others were useful in helping us identify and formulate these changes.

We discuss substantive issues under the sections of the regulations to which they pertain. The analysis generally does not address—

(a) Minor changes, including technical changes made to the language published in the NPRM;

(b) Suggested changes the Secretary is not legally authorized to make under applicable statutory authority; and

(c) Comments that express concerns of a general nature about the Department or other matters that are not directly relevant to these regulations, including requests for information about the

provision of special education and related services and other matters that are within the purview of State and local decision-makers.

Methods of Ensuring Services (§ 300.154)

Nature of Public Benefits or Insurance Programs

Comment: One commenter requested clarification on the meaning of the phrase ''seeking to bill or otherwise access the Medicaid or other public benefits or insurance programs in which a child participates to provide or pay for services required under Part B of the Act'' in the preamble of the NPRM.

Discussion: We interpret the comment as a request to clarify the phrase ''other public benefits or insurance programs.'' The names of public benefits or insurance programs may vary across States. Generally, these programs are associated with the State agency that is responsible for the administration of a State's Medicaid program, which is a source of funding for medically necessary school-based services that are covered benefits under Medicaid. Another example of a public benefits or insurance program is the Children's Health Insurance Program (CHIP). These final regulations apply to all public benefits and insurance programs regardless of whether they are Medicaid programs.

All of these programs provide sources of funding for public agencies to pay for services required under part 300, provided certain conditions are met. Specifically, provided the conditions described in new § 300.154(d)(2)(iv) and (v) for obtaining parental consent and providing written notification to the child's parents are met, public agencies may access benefits from these programs to bill for services provided by the LEA that are required under Part B of the Act.

We note that in some States, public benefits or insurance programs may also be the provider of services that are required under part 300 and are included in the individualized education programs (IEPs) of children with disabilities. In these situations the public agency would use the public benefits or insurance program to pay for those services. However, the parental consent required under FERPA and § 300.622 that is described in new § 300.154(d)(2)(iv)(A) and the written notification to the child's parents required in new § 300.154(d)(2)(v) would apply only if the public agency seeks to access funds under the public benefits or insurance program for billing purposes to pay for services required under part 300.

Changes: None.

Parental Consent

Comment: Many commenters supported removing the requirement in current § 300.154(d)(2)(iv)(A) that a public agency obtain parental consent each time it seeks access to public benefits or insurance. The commenters stated that eliminating this requirement would reduce paperwork and simplify the process for public agencies to access a child's or parent's public benefits or insurance. Other commenters expressed concern that eliminating the parental consent requirement would diminish parental rights. Another commenter requested that the regulations be revised to require consent to access a child's or parent's public benefits or insurance once every three years.

Discussion: We continue to believe that current § 300.154(d)(2)(iv)(A) should be removed. As we discussed in the NPRM, this change will help alleviate the burden on public agencies to obtain parental consent each time they seek to access public benefits or insurance, and will result in a more streamlined process for accessing a child's or parent's public benefits or insurance to pay for services provided under Part B of the Act. With the changes we are making in these final regulations, we do not believe removing this requirement will result in diminished protections for parents and children. Nor do we believe that requesting periodic consent every three years, as suggested by one commenter, would provide additional protection for parents. A periodic consent would apply only to the services that would be billed to the child's or parent's public benefits or insurance at the time that the parent's consent is sought. Therefore, if a service billed to the child's or parent's public benefits or insurance changes within the three year period, the consent would not apply to the additional services.

Changes: None.

Comment: Some commenters requested clarification about the parental consent requirements in 34 CFR part 99 and § 300.622 and asked how those requirements would apply to the use of public benefits or insurance to pay for special education and related services. Some commenters recommended that the proposed regulations be revised to require a public agency to obtain an initial, one-time, informed consent to access a child's or parent's public benefits or insurance in addition to the consent already required under 34 CFR part 99 and § 300.622 to release personally identifiable information to a public benefits or insurance program. These commenters stated that this one-time, initial consent would offer more protection for families than the consent required under 34 CFR part 99 and § 300.622 alone because the one-time consent would ensure that there is an ongoing dialogue between the school district and the parents on the use of their public insurance.

Discussion: We agree with commenters who suggested that it would be helpful to clarify the parental consent requirements in 34 CFR part 99 and § 300.622 in the final regulations. We referenced these requirements in the proposed regulations in § 300.154(d)(2)(iv)(A) when we discussed the elements of written notification to be provided to parents, but the reference was very brief. Therefore, we are providing in new § 300.154(d)(2)(iv)(A) that the parental consent must meet the requirements in 34 CFR 99.30 and § 300.622 prior to accessing a child's or parent's public benefits or insurance for the first time. And, to clarify what is required under these provisions, and thereby ensure that the public agency provides the parents all relevant information they need to make an informed decision, we are providing in new § 300.154(d)(2)(iv)(A) that such consent must specify the personally identifiable information that may be disclosed (e.g., records or information about the services that may be provided to a particular child), the purpose of the disclosure (e.g., billing for services under part 300), and the agency to which the disclosure may be made (e.g., the State's public benefits or insurance program (e.g., Medicaid)). We believe these changes will clarify the parental consent that must be obtained under 34 CFR 99.30 and § 300.622 before a public agency discloses, for billing purposes, the child's personally identifiable information to the agency responsible for the administration of the State's public benefits or insurance program (e.g., Medicaid) prior to accessing a child's or parent's public benefits or insurance for the first time to pay for services required under part 300.

To ensure that a parent fully understands that the purpose of the consent obtained under 34 CFR part 99 and § 300.622 is to enable the public agency to access the child's or parent's public benefits or insurance for the first time and in the future, we are adding new § 300.154(d)(2)(iv)(B). This section provides that the consent to access public benefits or insurance must state that the parent understands and agrees

that the public agency may access the child's or parent's public benefits or insurance to pay for services under part 300. We note that to comply with the new parental consent requirement in final § 300.154(d)(2)(iv)(B), a public agency may add the specific statement included in new § 300.154(d)(2)(iv)(B) to the consent required under 34 CFR 99.30 and § 300.622 to release personally identifiable information to a public benefits or insurance program (e.g., Medicaid) for billing purposes, or it may choose to obtain this consent statement separately.

Further, to help ensure that a parent understands his or her rights when a public agency seeks to use or uses their or their child's public benefits or insurance to pay for services under part 300 we are also specifying in § 300.154(d)(2)(iv)(A) that the public agency must provide the written notification described in final § 300.154(d)(2)(v) (proposed § 300.154(d)(2)(iv)) before obtaining parental consent.

Changes: We have revised the regulations to add a new § 300.154(d)(2)(iv). In final § 300.154(d)(2)(iv), we have clarified that parental consent must be obtained before a public agency accesses a child's or parent's public benefits or insurance for the first time.

We have specified that the public agency must provide written notification to the child's parents consistent with § 300.154(d)(2)(v) before parental consent is obtained.

We have added new paragraph (d)(2)(iv)(A) to describe the parental consent required by 34 CFR 99.30 and § 300.622 that a public agency must obtain prior to disclosing for billing purposes a child's personally identifiable information to a State's public benefits or insurance before accessing a child's or parent's public benefits or insurance for the first time.

We have added new § 300.154(d)(2)(iv)(B) to require that the consent must specify that the parent understands and agrees that the public agency may access the child's or parent's public benefits or insurance to pay for services under part 300.

Comment: A few commenters asked whether a public agency must obtain a new consent following the publication of the final regulations if the agency already has a parent's consent on file.

Discussion: As described below, under these final regulations, a new consent is not necessary provided there is no change in any of the following: the type (e.g., physical therapy or speech therapy) of services to be provided to the child; the amount of services to be provided to the child (frequency or duration); or the amount that the public agency charges to the public benefits or insurance program.

Under current regulations, a public agency is required to obtain parental consent to access a child's or parent's public benefits or insurance to bill for specific services. Current § 300.154(d)(2)(iv)(A) provides that consistent with the definition of ''consent'' in § 300.9(b), the parent understands and agrees in writing to the carrying out of the activity for which his or her consent was sought. The consent must describe the activity, the records (if any) that were released, and the entity to whom the records were released. Therefore, a public agency that has on file a parental consent that meets the requirements of current § 300.154(d)(2)(iv)(A) and 34 CFR 99.30 and § 300.622 will not be required to obtain a new parental consent following the publication of these final regulations, as long as the type or amount of services that the public agency will bill to public insurance or the amount that the public agency charges to the public benefits or insurance program does not change. By previously consenting, the parent understood and agreed that the public agency was accessing the child's or parent's public benefits or insurance (e.g., Medicaid) to pay for a specified type, amount, and cost of services under part 300.

However, for children for whom the public agency already has consent under current § 300.154(d)(2)(iv)(A), the first time after the effective date of these regulations that there is a change in the type or amount of services to be provided, or the amount charged by the public agency or cost of services billed to the public benefits or insurance program, the public agency must provide the parents the written notification described in new § 300.154(d)(2)(v). The public agency must also obtain consent, consistent with new § 300.154(d)(2)(iv)(B), stating that the parent understands and agrees to the public agency's accessing the child's or parent's public benefits or insurance to pay for services under part 300. Once the public agency obtains this one-time consent, the public agency will not be required to obtain any further parental consent in the future before it accesses the child's or parent's public benefits or insurance, regardless of whether there is any change in the type, amount, or cost of services to be billed to the public benefits or insurance program (e.g., Medicaid). However, the public agency will annually thereafter be required to provide parents with the written notification described in final § 300.154(d)(2)(v), to help ensure that parents understand their rights when a public agency uses their or their child's public benefits or insurance to pay for services under part 300.

Of course, with respect to children with disabilities who receive special education and related services that were not previously billed to the child's or parent's public benefits or insurance program (e.g., Medicaid), a public agency must provide the child's parents the written notification described in new § 300.154(d)(2)(v) and obtain parental consent in accordance with final § 300.154(d)(2)(iv)(A) and (B) prior to accessing the child's or parent's public benefits or insurance (e.g., Medicaid) for the first time to pay for services under part 300. This parental consent must meet the requirements in 34 CFR 99.30 and § 300.622 that apply prior to the release of the child's personally identifiable information to the public benefits or insurance program (e.g., Medicaid) for billing purposes. The consent must also include a statement specifying that the parent understands and agrees that the public agency may access the child's or parent's public benefits or insurance to pay for services under part 300.

Changes: None.

Comment: Some commenters asked for clarification regarding the Department's position in the March 8, 2007, letter to Mr. John Hill, particularly in situations when parental consent is given directly to another agency, such as the State Medicaid agency.

Discussion: Our position has not changed from what it was in the March 8, 2007, letter to Mr. John Hill. See *http://www2.ed.gov/policy/speced/guid/idea/letters/2007–1/hill030807consent1q2007.pdf.* The public agency is not required to independently obtain separate parental consent, so long as the parental consent provided to the other agency meets the requirements of 34 CFR 99.30 and § 300.622, and current § 300.154(d)(2)(iv)(A) and there is no change in the type, amount, or cost of services to be billed to the public insurance program. However, if the type, amount, or cost of services to be billed to the public benefits or insurance program changes, the public agency must provide to the parent the written notification described in new § 300.154(d)(2)(v) (proposed § 300.154(d)(2)(iv)) and obtain parental consent on a one-time basis in accordance with new § 300.154(d)(2)(iv)(B). This consent must specify that the parent understands and agrees that the public agency may access the child's or

parent's public benefits or insurance to pay for services under part 300.

Changes: None.

Comment: One commenter requested the word ''informed'' be placed in front of the word ''consent'' in the final regulations.

Discussion: We do not believe this change is necessary for the reasons explained in response to the comments regarding the parental consent provisions and the written notification requirement. We believe that the consent required by these final regulations is informed consent. Parents understand that they are consenting to enable the public agency to access their or their child's public benefits or insurance (e.g., Medicaid) to pay for services under part 300.

Changes: None.

Comment: One commenter questioned the value of the proposed regulatory change if school districts will have to obtain parental consent to be able to provide the child's personally identifiable information prior to submitting that information to Medicaid. Other commenters asked the Department to eliminate any requirements to obtain parental consent for Medicaid reimbursable services. These commenters asserted that IDEA contains no requirement to obtain consent before a public agency seeks reimbursement for Medicaid-eligible services to Medicaid-eligible children. The commenters also asserted that other non-school Medicaid providers are permitted to seek reimbursement for Medicaid-eligible services to Medicaid-eligible individuals, including school age children, without seeking parental consent.

Discussion: Under these final regulations, educational agencies covered by 34 CFR part 99 and public agencies under the IDEA must continue to adhere to the consent requirements in 34 CFR 99.30 and § 300.622, which we describe in new § 300.154(d)(2)(iv)(A). Under FERPA and section 617(c) of the Act, a public agency may not release personally identifiable information from a child's education records to a public benefits or insurance program without prior parental consent, except for a few specified exceptions that do not include the release of education records for billing purposes. Therefore, final § 300.154(d)(2)(iv)(A) describes the parental consent that is required under 34 CFR 99.30 and § 300.622 before a public agency may release personally identifiable information from education records for billing purposes to a public benefits or insurance program prior to accessing a child's or parent's public benefits or insurance for the first time. Additionally, new § 300.154(d)(2)(iv)(B) requires a one-time consent specifying that the parent understands and agrees that the public agency may access the child's or parent's public benefits or insurance to pay for services under part 300. We believe that these final regulations continue to protect a parent's rights under FERPA and confidentiality rights under IDEA, and they address concerns from public agencies about costs and the administrative burden associated with obtaining parental consent each time access to public benefits insurance is sought.

Changes: None.

Comment: A few commenters recommended that we retain the current regulations and require parental consent each time a public agency seeks access to Medicaid or other public benefits or insurance programs in order to hold schools accountable for what they bill to the State Medicaid program and to facilitate better communication between the school and parent.

Discussion: We do not believe that it is necessary to retain the current parental consent requirement in order to hold schools accountable for services they bill to public insurance programs (e.g., Medicaid). We believe the parental consent required in 34 CFR 99.30 and § 300.622 (now described in new § 300.154(d)(2)(iv)(A)) and in new § 300.154(d)(2)(iv)(B) will provide sufficient communication with and protection for parents while making it easier for public agencies to access those benefits or insurance to pay for services required under part 300. The former is required before disclosing a child's personally identifiable information to a State's public benefits or insurance program (e.g., Medicaid) for billing purposes. The latter requires that the parent understands and agrees that a public agency may access their or their child's public benefits or insurance to pay for services required under part 300.

In addition to the parental protections provided for in these final regulations, a State's Medicaid agency or other public benefits or insurance program is already responsible for monitoring schools and LEAs to ensure that children are receiving the services for which the public agency bills the public benefits or insurance program. Of course, if a public agency that accesses a child's or parent's public benefits or insurance to pay for required services does not provide those services at no cost to the parents, an SEA must use its general supervisory authority under § 300.149 to achieve compliance. This authority requires each SEA to ensure that all educational programs for children with disabilities administered within the State meet State education standards and the requirements of the Act and part 300. Pursuant to §§ 300.149(b) and 300.600, an SEA must monitor public agencies' implementation of the Act and Part B regulations and ensure timely correction of any identified noncompliance. Also, parents may use IDEA's dispute resolution mechanisms to raise concerns regarding the denial of appropriate services at no cost to the parents. These mechanisms include mediation under § 300.506, due process complaint procedures under §§ 300.507 through 300.516, and State complaint procedures under §§ 300.151 through 300.153. Further, a parent or an organization or individual other than the child's parents, including one from another State, may file a signed, written complaint alleging a violation of Part B of the Act or the Part B regulations. We believe all of these protections help to ensure public agency accountability under the IDEA.

The Secretary also believes that the changes we are making in these final regulations will improve communication between the school and parents. Requiring written notification to the child's parents, consistent with new § 300.154(d)(2)(v), before a public agency obtains consent will provide important information that school districts were not required to provide parents in the past. This includes information about the parental consent requirements in final § 300.154(d)(2)(iv) and a parent's right to withdraw consent at any time.

Changes: None.

Comment: One commenter asked whether the public agency may ask a parent for permission to disclose personally identifiable information to the State public benefits or insurance program if the parent previously declined to provide consent for such disclosure.

Discussion: As in the past, a public agency may make reasonable requests to obtain the parental consent required under new § 300.154(d)(2)(iv) from a parent who previously declined to provide consent to disclose personally identifiable information to the State's public benefits or insurance program (e.g., Medicaid) for billing purposes to pay for services required under part 300. Prior to seeking to obtain this parental consent, the public agency must provide the parents with written notification consistent with new § 300.154(d)(2)(iv).

Changes: None.

Comment: One commenter recommended that the regulations include guidance on whether new

parental consent needs to be obtained prior to disclosing personally identifiable information to access a child's or parent's public benefits or insurance when consent is obtained in one school district, but the child subsequently relocates to another school district within the State or to a location outside of the State.

Discussion: Under § 300.323(e) through (g), States must have policies and procedures in effect to govern IEPs for students who transfer from one public agency to another, and we believe that those policies and procedures could address the parental consent and written notification requirements that apply to accessing public benefits or insurance for billing purposes for services required under part 300 for children who relocate to another public agency or another State. The responsibility for obtaining parental consent prior to the disclosure of personally identifiable information for billing purposes and before accessing a child's or parent's public benefits or insurance for the first time rests with the public agency responsible for providing a free appropriate public education (FAPE) to the child, not with the individual school. Thus, if a child who had an IEP in effect in a previous public agency transfers to a school in a new public agency in the same school year, whether or not within the same State, the new public agency would need to obtain a new parental consent under new § 300.154(d)(2)(iv)(A)–(B) before it can access the child's or parent's public benefits or insurance for the first time to pay for services under part 300. This new parental consent is to enable the new public agency to release the child's personally identifiable information for billing purposes to the public benefits or insurance program (e.g., Medicaid). Consistent with new § 300.154(d)(2)(iv)(B), the consent also must specify that the parent understands and agrees that the new public agency may access the child's or parent's public benefits or insurance to pay for services under part 300. Likewise, in these transfer situations, the new public agency must provide the child's parents with the written notification described in final § 300.154(d)(2)(v) prior to obtaining parental consent for that agency to access the child's or parent's public benefits or insurance for the first time. Further, the new public agency must provide this written notification to the child's parents annually thereafter. However, if a child transfers to a different school but remains within the same public agency, any parental consent that the public agency has previously obtained that meets the requirements in new § 300.154(d)(2)(iv)(A)–(B) would continue to apply.

Changes: None.

Comment: One commenter recommended that electronic signatures for consent be accepted as valid due to the increasing use of virtual meetings.

Discussion: A public agency may accept digital or electronic signatures in obtaining the parental consent required under 34 CFR 99.30 and § 300.622, as described in new § 300.154(d)(2)(iv)(A), before disclosing, for billing purposes, the child's personally identifiable information to the agency responsible for the administration of the State's public benefits or insurance program (e.g., Medicaid) prior to accessing the child's or parent's public benefits or insurance for the first time. Among other requirements, under 34 CFR 99.30(a), the parental consent that must be obtained before disclosure of personally identifiable information must be signed and dated. Section 99.30(d) provides that this consent may include a record and signature in electronic form that—

(1) Identifies and authenticates a particular person as the source of the electronic consent; and

(2) Indicates such person's approval of the information contained in the electronic consent, i.e., disclosure of the child's personally identifiable information to the agency responsible for the administration of the State's public benefits or insurance program (e.g., Medicaid) for billing purposes to pay for services under part 300. Additionally, the electronic consent must include a statement that the parent understands and agrees that the public agency may access the child's or parent's public benefits or insurance to pay for services under part 300.

Changes: None.

Parental Notification

Comment: Many commenters supported the requirement in proposed § 300.154(d)(2)(iv) that prior to accessing a child's or parent's public benefits or insurance, the public agency must provide written notification to parents consistent with current § 300.503(c). Several commenters stated that this type of written notification would help to protect children's and parents' rights under IDEA and FERPA. These commenters agreed with the Department's analysis in the NPRM that the proposed written notification requirement would provide parents with important information they need to understand their rights in the special education process. They also stated that the proposed requirement would ensure that all parents of children with disabilities receive full disclosure of their rights on the use of their public benefits or insurance for services under Part B, particularly their rights under FERPA and the IDEA confidentiality requirements.

A few commenters recommended that the written notification in proposed § 300.154(d)(2)(iv) be provided at the child's initial IEP Team meeting. Another commenter expressed concern that providing the written notification at the initial IEP Team meeting would overwhelm parents. Some commenters suggested that LEAs be given discretion on when to provide the notification. One commenter asked if the proposed parental written notification may be mailed to the parents.

Several commenters expressed concern about only providing parents with a one-time written notification. They instead recommended that a written notification be provided to parents at each subsequent annual IEP Team meeting and when there is an amendment to the IEP during the course of the school year that would result in a change to the type or amount of services billed to a public benefits or insurance program. These commenters stated that requiring more frequent written notifications would provide parents with greater protections and remind parents that they can reconsider their consent in light of changed circumstances a family may experience over time (e.g., change in the child's disability, change in living situation, change in guardianship, etc.).

Discussion: The Department appreciates the commenters' strong support for the written notification provision in proposed § 300.154(d)(2)(iv) and has retained this provision in new § 300.154(d)(2)(v) with a few minor modifications. We agree with commenters generally that more frequent notifications to the child's parents in addition to the initial written notification to the child's parents would be beneficial. Therefore, we are amending new § 300.154(d)(2)(v) (proposed § 300.154(d)(2)(iv)) to require that the public agency provide written notification that meets the requirements of § 300.503(c) to the child's parents prior to accessing a child's or parent's public benefits or insurance for the first time and annually thereafter. The requirement that the notice be written in language understandable to the general public and in the native language of the parent or other mode of communication used by the parent, unless it is clearly

not feasible to do so, will provide additional protections for children and parents. This annual written notification will be especially important for parents in families that experience a change in circumstances over time and for children whose parent, as defined in § 300.30, changes often (e.g., children in the foster care system), children whose guardianship changes, or children who live with an individual acting in place of the biological or adoptive parent. Providing an annual written notification to parents also will serve to remind them of important safeguards previously explained. Further, as discussed earlier, we are specifying in final § 300.154(d)(2)(iv) that this written notification must be provided to the child's parents before the public agency obtains their consent to access their or their child's public benefits or insurance for the first time.

In those instances where a child has been determined eligible for Medicaid prior to the IEP Team meeting, the public agency could provide the child's parents with the written notification described in final § 300.154(d)(2)(v) at the IEP Team meeting or at some other meeting, so long as the child's parents receive the written notification before the public agency obtains the requisite parental consent under final § 300.154(d)(2)(iv) to access the parent or child's public benefits or insurance for the first time.

We do not agree with those commenters who recommended requiring the written notification described in proposed § 300.154(d)(2)(iv) be provided at the child's initial IEP Team meeting or at subsequent IEP Team meetings. We appreciate the importance of parent participation in the IEP process, and we recognize that an IEP Team meeting could provide a public agency with a meaningful opportunity to explain to the parents the components of the written notification and respond to any questions the parents may have.

As a practical matter, however, eligibility for Medicaid may not necessarily coincide with annual IEP Team meetings. Therefore, requiring written notification at an IEP Team meeting could mean that a public agency would have to convene an additional IEP Team meeting for those children found to be eligible for Medicaid only after the annual IEP Team meeting.

We also do not agree with the commenters who suggested that written notification be provided each time the public agency amends a child's IEP in a manner that would result in a change to the type or amount of services billed to the public benefits or insurance program. We believe that providing parents the annual written notification in accordance with final § 300.154(d)(2)(v) is sufficient protection in these situations. Of course, nothing in these regulations would prevent public agencies from providing parents the written notification described in final § 300.154(d)(2)(v) more frequently than annually, if they deem it appropriate to do so. Further, nothing in these regulations would prevent public agencies from providing the notification described in final § 300.154(d)(2)(v) to all parents of children with disabilities, regardless of whether the public agency is seeking to access the child's or parent's public benefits or insurance.

There are a number of ways in which the public agency may provide the written notification to parents. The annual written notification may be mailed to the parents, provided at an IEP Team meeting if it occurs prior to the first time a public agency accesses a child's or parent's public benefits or insurance, or provided through other means determined by the public agency, so long as all of the written notification requirements in these final regulations are met, including the requirement in § 300.154(d)(2)(v) that the public agency provide written notification before obtaining parental consent under new § 300.154(d)(2)(iv).

We decline to specify in the regulations when subsequent annual written notifications must be provided to parents because we believe that once the public agency provides the child's parents the written notification described in final § 300.154(d)(2)(v) prior to accessing the child's or parent's public benefits or insurance for the first time, public agencies need to have the flexibility to determine the timing of subsequent annual written notifications.

Finally, for those children with IEPs for whom services have previously been billed to Medicaid, when the final regulations become effective, the written notification requirement in final § 300.154(d)(2)(v) applies. The written notification, therefore, must be provided before the public agency may access the child's or parent's public benefits or insurance after these final regulations become effective and annually thereafter. As noted previously, no new parental consent would need to be obtained if there is no change in the type, amount, or cost of services to be billed to public benefits or insurance (e.g., Medicaid).

However, in the future, if the type, amount, or cost of services billed to the public benefits or insurance program changes, the public agency must provide to the parent the written notification described in new § 300.154(d)(2)(v) (proposed § 300.154(d)(2)(iv)) before obtaining one-time parental consent in accordance with new § 300.154(d)(2)(iv)(B) specifying that the parent understands and agrees that the public agency may access the child's or parent's public benefits or insurance to pay for services under part 300 in the future.

Changes: We have revised final § 300.154(d)(2)(v) to specify that the written notification must be provided to the child's parents prior to accessing a child's or parent's public benefits or insurance for the first time and annually thereafter. To conform to the changes in new § 300.154(d)(2)(iv), we have added a reference in new § 300.154(d)(2)(v)(A) to the new regulatory provision regarding parental consent in § 300.154(d)(2)(iv).

We have also revised new § 300.154(d)(2)(v)(C) (proposed § 300.154(d)(2)(iv)(C)) to clarify that parents may withdraw their consent under part 99 *and* part 300 to the disclosure of their child's personally identifiable information to the agency responsible for the administration of the public benefits or insurance program (e.g., Medicaid). The reference to part 300 was inadvertently left out of proposed § 300.154(d)(2)(iv)(C). We also have renumbered paragraphs (B) and (D) of the proposed regulations with no other changes.

Comment: One commenter recommended that the written notification provided to parents clearly and prominently provide information to parents about the process of withdrawing consent for disclosure of personally identifiable information necessary to access public insurance.

Discussion: Proposed § 300.154(d)(2)(v)(C) provided that the written notification to the child's parents had to include a statement that parents have the right under 34 CFR part 99 to withdraw their consent to the disclosure of their child's personally identifiable information to the agency responsible for the administration of the State's public benefits or insurance program (e.g., Medicaid) at any time. This provision has been retained in final § 300.154(d)(2)(v)(C), but as noted in the response to comments about the timing of the written notification, this section has been revised to also include a reference to withdrawal of consent under part 300. The parents must be informed of this right in the written notification that the public agency must provide them prior to accessing their or their child's public benefits or insurance

for the first time and annually thereafter.

FERPA and IDEA do not include specific provisions regarding the process for withdrawal of consent for the disclosure of a child's personally identifiable information; therefore, we are deferring to LEAs on procedures for withdrawal of this parental consent. However, once the parent withdraws consent under 34 CFR part 99 and part 300 to the disclosure of the child's personally identifiable information to the agency responsible for the administration of the State's public benefits or insurance program (e.g., Medicaid), the public agency responsible for providing FAPE to the child with a disability may no longer bill the public benefits or insurance program (e.g., Medicaid) to pay for services under part 300. The public agency must nevertheless continue to provide the child with all services required under part 300 at no cost to the parents.

Changes: None.

Comment: A few commenters asked whether the proposed written notification takes the place of written parental consent for a child to participate in Medicaid-funded related services at school, particularly in a State where the public agency provides the child's IEP to the public benefits program so that the public benefits or insurance program may determine whether the related services are medically necessary and covered under the public benefits or insurance program.

Discussion: The final regulations are clear that the written notification requirement in final § 300.154(d)(2)(v) is separate and distinct from, and does not replace, the parental consent requirements in FERPA and IDEA that are now described in new § 300.154(d)(2)(iv)(A). Further, under new § 300.154(d)(2)(iv)(B), this parental consent must specify that the parent understands and agrees that the public agency may access the child's or parent's public benefits or insurance to pay for services under part 300. The written notification requirements in final § 300.154(d)(2)(v) (proposed § 300.154(d)(2)(iv)) continue to underscore the significance of those requirements and now require that this written notification include an explanation of the parental consent requirements contained in new § 300.154(d)(2)(iv)(A)–(B).

These requirements continue to apply even in States where the public agency provides the IEP to the public benefits program to verify that the related services in the IEP are medically necessary and covered under the public benefits or insurance program. The consent required in this context must be obtained before the public agency accesses the child's or parent's public benefits or insurance for the first time to bill for services required under part 300 and after the public agency provides the written notification described in new § 300.154(d)(2)(v). Further, this consent must specify that the parent understands and agrees that the public agency may access the parent's or child's public benefits or insurance to pay for services under part 300.

We remind public agencies that they may not reduce or delay providing the services in a child's IEP solely because the State's public benefits or insurance program determined that the services required in the child's IEP are not medically necessary or not covered under the public benefits or insurance program. If the services are not medically necessary under Medicaid, a public agency would not receive reimbursement for them. But the public agency is not relieved of its responsibility under Part B to ensure that all required services in the IEP are provided at no cost to the parents, even if that means using Part B funds or sources of support other than the child's or parent's public benefits or insurance in order to ensure that the child receives all required services at no cost to the parents.

Changes: None.

Comment: A few commenters requested model language for the written notification requirement.

Discussion: Following the publication of these final regulations, the Department intends to issue model language for the written notification requirement described in final § 300.154(d)(2)(v).

Changes: None.

Other Matters

Comment: A few commenters stated that public agencies should not be permitted to bill Medicaid for educational services because this would deplete medical benefits that should be directed to families. Other commenters, concerned about the potential for Medicaid fraud, recommended that parents who consent to the use of Medicaid funds to pay for their child's school-based health services should be provided a quarterly statement of those services. Another commenter asked whether Medicaid may be billed for services the child does not receive.

Discussion: These final regulations continue to permit public agencies to use Medicaid or other public benefits or insurance to provide or pay for services required under part 300, provided that those agencies comply with the consent requirements in 34 CFR 99.30 and § 300.622, now described in final § 300.154(d)(2)(iv)(A), including the requirement that parents provide their consent prior to the release of their child's personally identifiable information to the public benefits or insurance program for billing purposes before the public agency may access the parent's or child's public benefits or insurance for the first time. This consent must also specify that the parent understands and agrees that the public agency may access the child's or parent's public benefits or insurance to pay for services under part 300. Public benefits and insurance are important sources of financial support for services required under Part B. Section 612(a)(12) of the Act requires the State to identify or have a method of defining the financial responsibility of non-educational public agencies for services required to provide FAPE to children with disabilities and that the financial responsibility of those non-educational public agencies, including the State Medicaid agency and other public insurers of children with disabilities, must precede the financial responsibility of LEAs or the State agency responsible for developing the child's IEP. The statute, therefore, contemplates that public agencies responsible for providing education to children with disabilities under State law, in appropriate circumstances, access funds from public benefits and insurance programs (e.g., Medicaid) as a means of paying for services required under Part B.

We do not believe it is necessary to require public agencies to provide quarterly statements of the dates and times children with disabilities are provided school-based health services. However, under § 300.613 each participating agency must permit parents to inspect and review any education records relating to their child that are collected, maintained, or used by the agency to implement Part B of the Act. A parent, therefore, may request to review any education records relating to their child that have been sent to the State public benefits or insurance program.

If parents believe public agencies are billing Medicaid for services that their child does not receive, they should file a complaint with the State agency responsible for the administration of the State's Medicaid program. The Department has no jurisdiction over complaints alleging Medicaid fraud. However, if a parent believes that a public agency has not provided his or

her child all required services at no cost to the parents, this could constitute a denial of FAPE under the Act and these regulations, and the parent could use IDEA's dispute resolution mechanisms to seek redress. These mechanisms include mediation under § 300.506, the due process complaint procedures in §§ 300.507 through 300.516, or the State complaint procedures in §§ 300.151 through 300.153. Note also that under the State complaint procedures in §§ 300.151 through 300.153, any organization or individual other than the child's parent, including one from another State, may file a signed, written complaint alleging that a public agency has violated a requirement of Part B of the Act or the Part B regulations.

Changes: None.

Comment: A few commenters recommended that LEAs be included in the consent language on the Medicaid application form used in most States. The commenters stated that like hospitals and clinics, schools are providers of Medicaid services and do not need a separate consent form. One commenter requested that the written notice include a warning to parents that once in receipt of public benefits or insurance, the subsequent refusal to share such information with the Medicaid program is a violation of the terms of eligibility and is in many States considered a crime.

Discussion: The Department does not administer Medicaid or other State public benefits or insurance programs and, therefore, cannot dictate what States choose to include on applications or how State programs choose to address parties that do not share required information with them. Under new § 300.154(d)(2)(iv), if parents refuse to consent to release personally identifiable information to a public benefits or insurance program for billing purposes under 34 CFR 99.30 and § 300.622, the public agency may not access the child's or parents public benefits or insurance to pay for those services, and the child with a disability must continue to receive all special education and related services necessary for the provision of FAPE at no cost to the parents.

Changes: None.

Comment: A few commenters asked the Department to clarify whether the proposed regulations apply to the use of private insurance to pay for services to children with disabilities. One commenter expressed concern that under the proposed regulations, a family's right to privacy is linked to its economic status. Other commenters expressed concern that the regulations establish a dual standard for consent based on whether the child or parent is enrolled in a private insurance program or a public benefits or insurance program.

Discussion: Final § 300.154(d)(2)(iv)–(v) applies only to public benefits and insurance programs and does not apply to private insurance programs. The requirements for children with disabilities covered by private insurance are found in § 300.154(e). For services required to provide FAPE to an eligible child under Part B of the Act, a public agency may access the parents' private insurance proceeds only if the parents provide consent consistent with § 300.9. Each time the public agency proposes to access the parents' private insurance, the agency must obtain parental consent and inform the parents that their refusal to permit the public agency to access their private insurance does not relieve the public agency of its responsibility to ensure that all required services are provided at no cost to the parents.

We disagree with the comments that the proposed regulations set a dual standard based on economic status and enrollment in private versus public insurance. The Act places no financial obligations on private insurers; however, section 612(a)(12) of the Act places financial obligations on non-educational public agencies by requiring States to identify or have a method of defining the financial responsibility of non-educational public agencies, including the State Medicaid agency and other public insurers of children with disabilities, for services provided by the LEA that are necessary to provide FAPE to children with disabilities. No similar statutory provision exists regarding the use of private insurance. In addition, section 612(a)(12) of the Act requires that the financial responsibility of those non-educational public agencies, including the State Medicaid agency and other public insurers of children with disabilities, must precede the financial responsibility of an LEA or the State agency responsible for developing the child's IEP. This statutory provision also requires non-educational public agencies, such as a State Medicaid agency, to fulfill their obligations or responsibilities under State or Federal law to pay for services provided by LEAs required under Part B, if permitted under the public benefits or insurance program. To the extent that the final regulations treat people who have public and private insurance differently, the regulations merely reflect the operation of the Act.

These final regulations are consistent with the Act and strengthen the privacy and confidentiality protections afforded to parents and children enrolled in public benefits or insurance programs who are eligible to receive special education and related services under Part B of the Act. For example, new § 300.154(d)(2)(iv)(A) requires a public agency to obtain the parental consent required in § 300.622 and 34 CFR 99.30 before the agency accesses a child's or parent's public benefits or insurance for the first time. Additionally, final § 300.154(d)(2)(iv)(B) provides that this consent must specify that the parent understands and agrees that the public agency may access a child's or parent's public benefits or insurance to pay for services under part 300. Further, in accordance with final § 300.154(d)(2)(v), the public agency must provide the child's parents with written notification consistent with § 300.503(c) prior to obtaining parental consent to access a child's or parent's public benefits or insurance for the first time. A public agency must also provide this written notification annually thereafter. This written notification must inform the child's parents in language understandable to the general public and in the parent's native language or other mode of communication used by the parent, unless it is clearly not feasible to do so, of the following:

(a) A statement of the parental consent provisions in § 300.154(d)(2)(iv)(A)–(B).

(b) A statement of the ''no cost'' provisions under § 300.154(d)(2)(i)–(iii).

(c) A statement that parents have the right under 34 CFR part 99 and part 300 to withdraw their consent to disclosure of their child's personally identifiable information to the agency responsible for the administration of the State's public benefits or insurance program (e.g., Medicaid) at any time.

(d) A statement that withdrawal of consent or refusal to provide consent under 34 CFR part 99 and part 300 to disclosure of personally identifiable information to the agency responsible for the administration of the State's public benefits or insurance program (e.g., Medicaid) does not relieve the public agency of its responsibility to ensure that all required services are provided at no cost to the parents.

We believe these parental consent and written notification requirements will strengthen the protections afforded to parents and children enrolled in public benefits or insurance programs by specifically including the parent's right to withdraw their consent under 34 CFR part 99 and part 300 at any time.

If a parent chooses to withdraw this consent, the public agency responsible for providing FAPE to the child with a disability may no longer bill the public benefits or insurance program (e.g.,

Medicaid) to pay for services required under part 300 and must ensure that the child receives all required services necessary to receive FAPE at no cost to the parents.

Changes: None.

Comment: One commenter stated that the proposed regulations would diminish the protections of FERPA and violate the Health Insurance Portability and Accountability Act of 1996 (HIPAA). The commenter also asserted that the proposed regulations would violate the Equal Protection Clause because individuals without disabilities are not spending down their Medicaid resources and that the notice provision would violate due process.

Discussion: HIPAA is administered by the U.S. Department of Health and Human Services and not by the Department of Education. HIPAA excludes from its definition of ''protected health information'' individually identifiable health information contained in education records covered by FERPA and records described under FERPA's medical treatment records provision (34 CFR 99.3, defining ''education records''). See 45 CFR 160.103. Thus, the term ''protected health information'' in the HIPAA Privacy regulations does not cover records protected by FERPA. The reason for this exception is that Congress, through FERPA, specifically addressed how education records and student treatment records should be protected.

FERPA provides ample protections for these records, which include requiring public agencies to obtain prior consent from parents before a child's personally identifiable information is disclosed to the agency responsible for the administration of the State's public benefits or insurance program (e.g., Medicaid) for billing purposes. There is no exception under FERPA or under these final regulations that would permit the nonconsensual disclosure of personally identifiable information in education records to a public benefits or insurance program (e.g., Medicaid) for billing purposes. Likewise, the IDEA's confidentiality of information provisions in section 617(c) of the Act and § 300.622 also require parental consent before personally identifiable information can be disclosed to a State's public benefits or insurance program for billing purposes (e.g., Medicaid). Therefore, nothing in these final regulations violates or is in any way inconsistent with either HIPAA or FERPA. In fact, the final regulations support FERPA in that they require written notification to inform parents of certain protections under FERPA.

Further, neither the proposed nor final regulations violate the U.S. Constitution's Equal Protection Clause. On the contrary, they help to ensure that children, regardless of disability status, have equal access to education. The regulations facilitate access to FAPE by removing the requirement in current regulations for a public agency to obtain consent from the parent each time access to public benefits or insurance is sought, while continuing to require that the parental consent required by FERPA and section 617(c) of the IDEA prior to disclosure of personally identifiable information for billing purposes to a State's public benefits or insurance program, now described in final § 300.154(d)(2)(iv)(A), be obtained before a public agency can access a child's or parent's public benefits or insurance for the first time.

These final regulations also require that, in accordance with new § 300.154(d)(2)(iv)(B), the consent must specify that the parent understands and agrees that the public agency may access the child's or parent's public benefits or insurance to pay for services under part 300. Additionally, an important new protection is provided to parents through the written notification provision in new § 300.154(d)(2)(v), which must be provided to the child's parents prior to accessing the child's or parent's public benefits or insurance for the first time and annually thereafter.

As in the past, these final regulations will continue to require, as specified in § 300.154(d)(2)(i) through (d)(2)(iii), that the children of parents who consent to share their children's personally identifiable information with a State's public benefits or insurance program (e.g., Medicaid) for billing purposes continue to receive all required services under this part at no cost.

Finally, we do not agree with the commenter's assertion that the notice would deny due process. Rather, the written notification required in new § 300.154(d)(2)(v) would enhance due process protections for parents by providing them crucial information about when public agencies seek to access their or their child's public benefits or insurance.

Changes: None.

Comment: One commenter requested clarification on the example provided in the NPRM discussing ''Tommy'' and asked whether a related services provider is required to attend the IEP Team meeting when the team discusses the related service.

Discussion: The IDEA does not expressly require that related services personnel attend IEP Team meetings. However, if a child with a disability has an identified need for a related service, it would be appropriate for the related services provider to attend the meeting. Additionally, if the public agency designates the related services provider as a required IEP Team member, the public agency must ensure that the individual attends the child's IEP Team meeting, unless the excusal provisions in § 300.321(e) are met.

Changes: None.

Executive Orders 12866 and 13563

Regulatory Impact Analysis

Under Executive Order 12866, the Secretary must determine whether this regulatory action is ''significant'' and, therefore, subject to the requirements of the Executive order and subject to review by the Office of Management and Budget (OMB). Section 3(f) of Executive Order 12866 defines a ''significant regulatory action'' as an action likely to result in a rule that may—

(1) Have an annual effect on the economy of $100 million or more, or adversely affect a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities in a material way (also referred to as an ''economically significant'' rule);

(2) Create serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles stated in the Executive order.

This regulatory action is a significant regulatory action subject to review by OMB under section 3(f)(4) of Executive Order 12866 because this action is economically significant.

We have also reviewed these regulations under Executive Order 13563, which supplements and explicitly reaffirms the principles, structures, and definitions governing regulatory review established in Executive Order 12866. To the extent permitted by law, Executive Order 13563 requires that an agency—

(1) Propose or adopt regulations only upon a reasoned determination that their benefits justify their costs (recognizing that some benefits and costs are difficult to quantify);

(2) Tailor their regulations to impose the least burden on society, consistent with obtaining regulatory objectives and taking into account—among other things and to the extent practicable—the costs of cumulative regulations;

(3) In choosing among alternative regulatory approaches, select those approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity);

(4) To the extent feasible, specify performance objectives, rather than the behavior or manner of compliance a regulated entity must adopt; and

(5) Identify and assess available alternatives to direct regulation, including economic incentives—such as user fees or marketable permits—to encourage the desired behavior, or provide information that enables the public to make choices.

Executive Order 13563 also requires an agency ''to use the best available techniques to quantify anticipated present and future benefits and costs as accurately as possible.'' The Office of Information and Regulatory Affairs of OMB has emphasized that these techniques may include ''identifying changing future compliance costs that might result from technological innovation or anticipated behavioral changes.''

We are issuing these regulations only on a reasoned determination that their benefits justify their costs. In choosing among alternative regulatory approaches, we selected those approaches that maximize net benefits. Based on the analysis that follows, the Department believes that these regulations are consistent with the principles in Executive Order 13563.

We also have determined that this regulatory action would not unduly interfere with State, local, and tribal governments in the exercise of their governmental functions.

Potential Costs and Benefits

The following is an analysis of the costs and benefits of the significant changes reflected in these final regulations. In conducting this analysis, the Department examined the extent the changes made by these regulations add to or reduce the costs to States, LEAs, and others, as compared to the costs of implementing the current Part B program regulations. Based on the following analysis, the Secretary has concluded that the changes reflected in the final regulations will not impose significant costs on States, LEAs, and others.

Costs and Benefits

Current Section 300.154(d)

Under current regulations, public agencies are required to obtain parental consent, consistent with § 300.9, each time access to a child's or parents' public benefits or insurance is sought to pay for services identified in the child's IEP. This has meant that written parental consent to access public benefits or insurance must be obtained for a specified type of service (e.g., physical therapy, speech therapy), and amount of services (frequency or duration). If the type, amount, or cost of service changes, the public agency must obtain new parental consent covering the change in services to be charged to the child's or parents' public benefits or insurance.

New § 300.154(d)(2)(iv) and (v)

The final regulations eliminate the requirement to obtain consent every time that the type or amount of service changes, or the amount charged for services changes. Instead, the final regulations require public agencies to obtain an initial, one-time consent from parents before the agency seeks to access a child's or parent's public benefits or insurance (e.g., Medicaid). This consent must meet the parental consent requirements under 34 CFR part 99 and § 300.622 and must specify that the parent understands and agrees that the public agency may access the child's or parent's public benefits or insurance to pay for services provided under part 300. This written consent is consistent with the consent currently required under § 300.9(b), which specifies that the parent understands and agrees to the carrying out of the activity for which his or her consent is sought and the records to be released and to whom. However, consent under current § 300.154(d)(2)(iv)(A) would no longer be valid if the public agency seeks to access public benefits or insurance for a different type or amount of services for a specified period of time.

The final regulations also require public agencies to specifically inform parents of their rights and protections under the Act by providing written notification prior to obtaining consent to access public benefits or insurance for the first time. This written notification also must be provided to the child's parents annually thereafter. Thus, a public agency would be able to access a child's or parent's public benefits or insurance program to provide or pay for services required under Part B of the Act without obtaining parental consent each time it seeks access, provided that (1) the agency has complied with the parental consent requirements under FERPA and part 300, as described in final § 300.154(d)(2)(iv)(A), before personally identifiable information is released to a State's Medicaid agency or other public insurance program for billing purposes and (2) before seeking to access a child's or parent's public benefits or insurance program for the first time to provide or pay for services required under Part B.

This written notification also must be provided annually thereafter. These changes allow public agencies to save the costs associated with obtaining written consent from parents each time access to their or their child's public benefits or insurance is sought. We estimate that the changes to final § 300.154(d)(2)(iv) will result in net cost savings and provide an economic benefit to LEAs in many States.

Savings From Reduction in Current Requirements

Although we do not have data on the number of children who participate in both IDEA Part B and public benefits or insurance programs, a Congressional Research Service (CRS) report indicates that at least 25 percent of children receiving services under Part B of IDEA are eligible for Medicaid services (including children who are eligible for but not enrolled in Medicaid).[1] For this analysis, we assume that 20–30 percent of the 6,558,000 students served under the Part B program are also enrolled in public benefits or insurance programs for a total of 1,311,600 to 1,967,400 children. While some LEAs do not currently use public benefits or insurance to pay for services that are eligible for reimbursement, we do not know the number of eligible students who are enrolled in these LEAs. Accordingly, this analysis assumes that all LEAs seek to use public benefits or insurance for all students who are served under Part B and are eligible for public benefits or insurance. As a result, our analysis likely overestimates the number of students for which LEAs currently need parental consent to access public benefits or insurance.

Costs of Current Requirements

Under the current regulations, we assume that LEAs need to obtain consent 1.2 times per year for each eligible student for a total of 1,573,920 to 2,360,880 consent requests per year. If we assume that the consent forms are no more than 4 pages long and that it takes approximately 5–10 minutes to draft and print these forms for each consent request (forms must be tailored to the specific services and duration of services as specified in the child's IEP), we estimate that the cost of complying with the current regulations is

[1] U.S. Congressional Research Service. Individuals with Disabilities Education Act (IDEA) and Medicaid (RL31722; Jan. 31, 2003), by Richard Apling and Elicia Herz.

$4,363,693 to $12,618,904 annually based on the national average hourly compensation of $30.87. This estimate is based on the median hourly wage for an insurance claims and policy processing clerk of $20.19, as reported in the National Compensation Survey, December 2009-January 2011 (*www.bls.gov/ncs/ocs/sp/nctb1479.pdf*), and the average cost to employers for benefits to State and local government employees of 34.6 percent of total hourly compensation (Table A, *www.bls.gov/news.release/ecec.nr0.htm*).

In most cases (50–75 percent), we assume that although not required in the regulations, public agencies seek to obtain parental consent during a child's IEP Team meeting (either at the annual meeting or following a change in the IEP). We assume that IEP Team meetings typically include four participants (the child's special education teacher or, where appropriate, related services provider; the child's regular education teacher; a public agency representative; and one parent). Assuming it takes an average of three minutes to obtain a response regarding parental consent, the additional estimated cost under the current regulations of obtaining a response during an IEP Team meeting would be $7,754,310 to $17,447,198 annually, based on the average hourly compensation of the participating teachers and school or public agency representative of between $59.82 and $69.95 and the opportunity cost to the parent, which was calculated using the Federal minimum wage. The median wages of participants, excluding the parent, were obtained from the National Compensation Survey, December 2009-January 2011 (*www.bls.gov/ncs/ocs/sp/nctb1479.pdf*) and 34.6 percent of total hourly compensation was used as the average cost to employers for benefits to State and local government employees (Table A, *www.bls.gov/news.release/ecec.nr0.htm*)

In the 25 to 50 percent of cases where a response is not obtained during an IEP Team meeting (or the agency and parents agree to make a change in the IEP without convening an IEP Team meeting as permitted under the Act and regulations), we assume that public agencies mail forms directly to parents to be completed and returned and incur additional administrative, postage, and material costs. Of the parents who receive consent forms sent via mail, we estimate that only 30–50 percent of those recipients will respond to any particular letter request, with a maximum of 3 letters sent to any particular parent for a total of 688,590 to 2,585,164 letters sent. We estimate that the cost of mailing consent forms includes $0.45 for postage, $0.10 for an envelope, and $0.20 to duplicate or print each 4-page form. Each consent form returned by parents requires return postage of $0.45 and $0.10 for an envelope. We estimate these combined postage and materials costs are $627,109 to $2,129,337.[2] If, based on the national average hourly compensation for a secretary or administrative assistant of $27.14, it takes approximately 10–15 minutes of administrative time for each letter sent to track the addresses of parents who have not provided a response, mail forms to parents, and process responses, and if, based on the Federal minimum wage, it takes an additional 5 minutes for the opportunity cost to parents to respond to a consent request, we estimate that the additional cost of time spent by public agencies and parents is $3,322,734 to $18,008,896. The estimated cost of administrative time was based on the median hourly wage of a secretary or administrative assistant of $17.75, as reported in the, National Compensation Survey, December 2009-January 2011 (*www.bls.gov/ncs/ocs/sp/nctb1479.pdf*), and 34.6 percent of total hourly compensation was used as the average cost to employers for benefits to State and local government employees (Table A, *www.bls.gov/news.release/ecec.nr0.htm*). Based on these estimates, eliminating the parental consent requirement in current § 300.154(d)(2)(iv)(A) will result in gross savings of $16,067,846 to $50,204,335 annually.

Costs of Additional Requirements

The final regulations in § 300.154(d)(2)(iv) permit public agencies to access a child's or parent's public benefits or insurance if the public agency obtains written, parental consent and provides written notification to the child's parents prior to accessing the child's or parents' public benefits or insurance for the first time and provides written notification to parents annually thereafter to inform them of their rights and protections under the Act. The written consent must (a) meet the requirements of 34 CFR 99.30 and § 300.622; and (b) specify that the parent understands and agrees that the public agency may access the parent's or child's public benefits or insurance to pay for services under part 300.

We believe that initially there would be no additional cost to comply with the revised consent requirements in the final regulations for students already enrolled in Medicaid and for whom parents have already provided consent under 34 CFR 99.30 and § 300.622 and that consent meets the requirements of current § 300.154(d)(2)(iv)(A). However, at the time this consent is no longer valid because of a change in the type amount or cost of services, the public agency must obtain parental consent to seek further access to the child's or parent's public benefits or insurance to provide or pay for services under part 300. This consent must specify that the parent understands and agrees that the public agency may access the child's or parent's public benefits or insurance to pay for services under part 300. We estimate that the costs of obtaining written consent will be the same costs incurred under current IDEA requirements for obtaining consent each time the public agency seeks to access a public benefits or public insurance program.

Of the 1,311,600 to 1,967,400 children we estimate to be enrolled in Medicaid, we do not know how many in any one year are children for whom the public agency is seeking to access a public benefits or insurance program for the first time. However, we estimate for purposes of these final regulations that there are roughly 100,237 to 150,355 such children,[3] leaving a total of 1,211,363 to 1,817,045 children for whom the agency would be required to obtain a one-time consent when there is a change in services. We estimate that the cost of obtaining this one-time consent under the final regulations would be $12,366,571 to $38,639,632. This assumes that LEAs would incur costs in obtaining the required consent in IEP Team meetings and in mailing the consent forms to parents from whom they were not able to obtain consent in such meetings.

For the remaining children for whom the public agency is seeking to access public benefits or insurance for the first time, there would be a minimal cost associated with obtaining the consent required under new § 300.154(d)(2)(iv)(B) because LEAs could meet this requirement by presenting parents with a modified FERPA and IDEA consent form (which they should already have in place for the release of the child's personally

[2] Amounts shown are the additional postage and material costs of sending forms via mail; the cost of the first form copy is not included.

[3] Our estimate of the number of children for whom the agency would be seeking to access public benefits or insurance for the first time is based on an estimate of the number of newly identified children under IDEA using IDEA child count data for the period 2004–2010.

identifiable information to the public benefits or insurance program for billing purposes), or by presenting parents with a separate consent form that meets the requirements in new § 300.154(d)(2)(iv)(B) at the same time the agency is seeking the consent required under 34 CFR part 99 and § 300.622.

Although the specific format and content may vary by State, we estimate that it will take no more than 10 hours per State to draft a consent form that complies with these requirements. Although the parental consent requirement generally rests with LEAs, we assume States will choose to create a standard consent form in order to increase efficiency and address any applicable State laws. We estimate that the cost per State of drafting this document will be no more than $590, for a national cost of approximately $35,000 based on the national average hourly compensation for lawyers employed by State or local governments of $38.46, as reported in the National Compensation Survey, December 2009-January 2011 (*http://www.bls.gov/ncs/ocs/sp/nctb1479.pdf*), and the average cost to employers for benefits to State and local government employees of 34.6 percent of total hourly compensation (Table A, *www.bls.gov/news.release/ecec.nr0.htm*).

We further estimate that it would take approximately 30 minutes for an administrative assistant in each of the 16,330 LEAs to obtain and modify the State's model form for use in that LEA. The total cost of preparing new FERPA and IDEA consent forms would therefore be $222,000, based on the national average hourly compensation of $27.14. The estimated cost of compensation was based on the median hourly wage of a secretary or administrative assistant of $17.75, as reported in the National Compensation Survey, December 2009–January 2011 (*www.bls.gov/ncs/ocs/sp/nctb1479.pdf*), and the average cost to employers for benefits to State and local government employees of 34.6 percent of total hourly compensation (Table A, *www.bls.gov/news.release/ecec.nr0.htm*). The number of LEAs is taken from the National Center for Education Statistics Schools and Staffing Survey, ''Public School District Data File,'' 2007–08.

The total cost of drafting FERPA and IDEA consent forms, including drafting the State model form and customizing it for use in each LEA, will be at most a one-time cost of an estimated $257,000.

Final § 300.154(d)(2)(v) specifies that written notifications to the child's parents consistent with § 300.503(c) include (a) A statement of the parental consent provisions in § 300.154(d)(2)(iv)(A)–(B); (b) a statement of the ''no cost'' provisions in § 300.154(d)(2)(i)–(d)(2)(iii); (c) a statement that the parents have the right under 34 CFR part 99 and part 300 to withdraw at any time their consent to disclosure of their child's personally identifiable information; and (d) a statement that the withdrawal of consent or refusal to provide consent under 34 CFR part 99 and part 300 to disclose personally identifiable information does not relieve the public agency of its responsibility to ensure that all required services are provided at no cost to the parents.

We do not expect the requirement for written notification to result in significant costs. While the written notification must be provided to the child's parents before the public agency may access the child's or parent's public benefits or insurance for the first time to pay for services under Part 300 and annually thereafter, the timing of the written notification is otherwise left to the discretion of public agencies. In many instances, public agencies will have an opportunity to provide this written notification, either by mail or in person, in conjunction with other required documentation or activities and will incur only the additional cost of photocopying the written notification.

Although the specific format and content may vary by State, we estimate that it will take no more than 10 hours per State to draft a written document that complies with these requirements and that the document will not exceed 4 pages in length. Although the written notification requirement generally rests with LEAs, we assume States will choose to create a standard notification in order to increase efficiency and address any applicable State laws. We estimate that the cost per State of drafting this document will be no more than $590, for a national cost of approximately $35,000 based on the national average hourly compensation for lawyers employed by State or local governments of $38.46, as reported in the National Compensation Survey, December 2009–January 2011 (*http://www.bls.gov/ncs/ocs/sp/nctb1479.pdf*), and the average cost to employers for benefits to State and local government employees of 34.6 percent of total hourly compensation (Table A, *www.bls.gov/news.release/ecec.nr0.htm*).

Assuming all 16,330 LEAs need to prepare written notifications and that it would take approximately 30 minutes for an administrative assistant to obtain and modify the State's standard notification for use in that LEA, the total cost of preparing written notifications will be $222,000, based on the national average hourly compensation of $27.14. The estimated cost of compensation was based on the median hourly wage of a secretary or administrative assistant of $17.75, as reported in the, National Compensation Survey, December 2009–January 2011 (*www.bls.gov/ncs/ocs/sp/nctb1479.pdf*), and the average cost to employers for benefits to State and local government employees of 34.6 percent of total hourly compensation (Table A, *www.bls.gov/news.release/ecec.nr0.htm*). The number of LEAs is taken from the National Center for Education Statistics Schools and Staffing Survey, ''Public School District Data File,'' 2007–08. If the written notification is assumed to be no more than 4 pages long, then the cost of photocopying this document for the estimated 1,311,600 to 1,967,400 children who participate in both Part B and a public benefits or insurance program will be approximately $263,000 to $394,000 annually.

In some instances, public agencies will be unable to provide the written notification in conjunction with other mailings or in person and will need to provide that written notification by mail separately. We assume that sending written notifications by mail separately will be necessary for one-half of the eligible children and that the cost of each written notification would be $0.55.[4] The resulting additional cost of mailing these notifications will be an estimated $361,000 to $541,000. The total cost of the written annual notification requirement, including drafting the State model notification, customizing it for use in each LEA, and either copying it for distribution at the IEP Team meeting or mailing it to parents, will be an estimated $881,000 to $1,192,000 in the first year and $624,000 to $935,000 annually thereafter.

After accounting for additional parental consent and written notification costs resulting from the final regulations, the net savings will be $2,563,275 to $10,115,702 in the first year and $15,443,846 to $49,269,335 annually thereafter, assuming the costs associated with obtaining parental consent for children for whom the agency is already accessing public benefits or insurance occur in year one.

[4] The additional cost of mailing a notification includes $0.45 in postage, and $0.10 for an envelope.

Paperwork Reduction Act of 1995

The Paperwork Reduction Act of 1995 does not require you to respond to a collection of information unless it displays a valid OMB control number. We display the valid OMB control numbers assigned to the collection of information in these final regulations at the end of the affected section of the regulations.

These final regulations include one information collection requirement associated with the following provisions: § 300.154(d)(2)(iv)–(v).

A description of these provisions is given below with an estimate of the annual recordkeeping burden. Included in the estimate is the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing each collection of information.

Collection of Information: State and Local Educational Agency Record Keeping, Notification, and Reporting Requirements under Part B of the Individuals with Disabilities Education Act (Information Collection 1820–0600). The affected section of the regulations for this information collection is final § 300.154(d)(2)(iv)–(v). The Act requires SEAs and LEAs to gather, maintain, report, and disclose various information and data, but the Act does not require this information and data to be submitted to the Department.

The final regulations in § 300.154(d)(2)(iv)–(v) permit public agencies to access a child's or parent's public benefits or insurance if the public agency provides written notification to the child's parents of their protections under the Act, obtains written consent prior to accessing the child's or parents' public benefits or insurance for the first time, and provides annual written notification to parents thereafter.

Each LEA must obtain written parental consent after providing the written notification to parents. Assuming that each SEA will develop a model consent form that its LEAs can use, and that it will take an average of about 10 hours to draft the consent form for each of the 60 grantees funded under Part B of IDEA, we estimate a total burden of 600 hours for SEAs to develop a model consent form.

We further estimate that as an uppermost bound it will take an additional 8,165 hours for LEA staff to obtain and modify an existing model consent form, based on not more than 30 minutes for each of the 16,330 LEAs. However, we would expect that most LEAs will simply use the model consent form provided by their SEA. Therefore, we estimate the burden for the first year of implementation of this consent requirement to be not more than 8,765 hours.

Additionally, each LEA must provide a written notification to parents prior to accessing a child's or parents' public benefits or insurance for the first time and annually thereafter. Assuming that each SEA will develop a model written notification that its LEAs can use and assuming that it will take an average of about 10 hours to draft the written document for each of the 60 grantees funded under Part B of IDEA, we estimate a total burden of 600 hours for SEAs to develop a model notification.

We further estimate that as an uppermost bound it will take an additional 8,165 hours for LEA staff to obtain and modify an existing model notification, based on not more than 30 minutes for each of the 16,330 LEAs. However, we would expect that most LEAs will simply use the model notification provided by their SEA. Therefore, we estimate the burden for the first year of implementation of this notification requirement to be not more than 8,765 hours.

With the addition of the burden to SEAs and LEAs associated with final § 300.154(d)(2)(iv)–(v), the total annual record keeping and notification burden for this collection of information is estimated to be approximately 490,181 hours for the 104,349 separate responses from SEAs and LEAs.

Intergovernmental Review

This program is subject to Executive Order 12372 and the regulations in 34 CFR part 79. One of the objectives of the Executive order is to foster an intergovernmental partnership and a strengthened federalism. The Executive order relies on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

This document provides early notification of our specific plans and actions for this program.

Assessment of Educational Impact

In the NPRM we requested comments on whether the proposed regulations would require transmission of information that any other agency or authority of the United States gathers or makes available.

Based on the response to the NPRM and on our review, we have determined that these final regulations do not require transmission of information that any other agency or authority of the United States gathers or makes available.

Accessible Format: Individuals with disabilities can obtain this document in an accessible format (e.g., braille, large print, audiotape, or compact disc) on request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. Free Internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available via the Federal Digital System at: *www.gpo.gov/fdsys.* At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Adobe Portable Document Format (PDF). To use PDF you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at: *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

List of Subjects in 34 CFR Part 300

Administrative practice and procedure, Education of individuals with disabilities, Elementary and secondary education, Grant programs—education, Privacy, Private schools, Reporting and recordkeeping requirements.

Dated: February 8, 2013.

Arne Duncan,

Secretary of Education.

For the reasons discussed in the preamble, the Secretary amends 34 CFR chapter III as follows:

PART 300—ASSISTANCE TO STATES FOR THE EDUCATION OF CHILDREN WITH DISABILITIES

■ 1. The authority citation for part 300 continues to read as follows:

Authority: 20 U.S.C. 1221e–3, 1406, 1411–1419, unless otherwise noted.

■ 2. Section 300.154 is amended by:

■ a. Revising paragraph (d)(2)(iv).

■ b. Adding new paragraph (d)(2)(v).

The revision and addition read as follows:

§ 300.154 Methods of ensuring services.

* * * * *

(d) * * *

(2) * * *

(iv) Prior to accessing a child's or parent's public benefits or insurance for the first time, and after providing notification to the child's parents consistent with paragraph (d)(2)(v) of this section, must obtain written, parental consent that—

(A) Meets the requirements of § 99.30 of this title and § 300.622, which consent must specify the personally identifiable information that may be disclosed (e.g., records or information about the services that may be provided to a particular child), the purpose of the disclosure (e.g., billing for services under part 300), and the agency to which the disclosure may be made (e.g., the State's public benefits or insurance program (e.g., Medicaid)); and

(B) Specifies that the parent understands and agrees that the public agency may access the parent's or child's public benefits or insurance to pay for services under part 300.

(v) Prior to accessing a child's or parent's public benefits or insurance for the first time, and annually thereafter, must provide written notification, consistent with § 300.503(c), to the child's parents, that includes—

(A) A statement of the parental consent provisions in paragraphs (d)(2)(iv)(A) and (B) of this section;

(B) A statement of the ''no cost'' provisions in paragraphs (d)(2)(i) through (iii) of this section;

(C) A statement that the parents have the right under 34 CFR part 99 and part 300 to withdraw their consent to disclosure of their child's personally identifiable information to the agency responsible for the administration of the State's public benefits or insurance program (e.g., Medicaid) at any time; and

(D) A statement that the withdrawal of consent or refusal to provide consent under 34 CFR part 99 and part 300 to disclose personally identifiable information to the agency responsible for the administration of the State's public benefits or insurance program (e.g., Medicaid) does not relieve the public agency of its responsibility to ensure that all required services are provided at no cost to the parents.

RIN 2070–AJ76

Protections for Subjects in Human Research Involving Pesticides

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is finalizing narrowly tailored amendments to the portions of its rules for the protection of human subjects of research applying to third parties who conduct or support research with pesticides involving intentional exposure of human subjects and to persons who submit the results of human research with pesticides to EPA. The amendments broaden the applicability of the rules to cover human testing with pesticides submitted to EPA under any regulatory statute it administers. The amendments also disallow participation in third-party pesticide studies by subjects who cannot consent for themselves. Finally, the amendments identify specific considerations to be addressed in EPA science and ethics reviews of proposed and completed human research with pesticides, drawn from the recommendations of the National Academy of Sciences (NAS). The amendments make no changes to the current Federal Policy for the Protection of Human Subjects (the ''Common Rule''), which governs research with human subjects conducted or supported by EPA and many other Federal departments and agencies.

DATES: This rule is effective April 15, 2013.

ADDRESSES: The docket for this action, identified by docket identification (ID) number EPA–HQ–OPP–2010–0785, is available at *http://www.regulations.gov* or at the OPP Docket in the Environmental Protection Agency Docket Center (EPA/DC), located in the EPA West Bldg., Rm. 3334, 1301 Constitution Ave. NW., Washington, DC 20460–0001. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the OPP Docket is (703) 305–5805. Please review the visitor instructions and additional information about the docket available at *http://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: Kelly Sherman, Immediate Office of the Director (7501P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001; telephone number: (703) 305–8401; fax number: (703) 308–4776; email address: *sherman.kelly@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Executive Summary

A. Does this action apply to me?

You may be potentially affected by this action if you conduct or sponsor research that may be submitted to EPA and which involves intentional exposure of human subjects. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document might apply to them. Although EPA has in the past received such third-party research from pesticide registrants, other entities could submit such information to EPA.

- Pesticide and other Agricultural Chemical Manufacturing (NAICS code 325320) who sponsor or conduct human research with pesticides.
- Other entities (NAICS code 541710) that sponsor or conduct human research with pesticides, and Institutional Review Boards (IRBs) who review human research with pesticides to ensure it meets applicable standards of ethical conduct. Under these new provisions, EPA must consider the ethical aspects and scientific validity and reliability of research in a manner that is consistent with the requirements of the Common Rule as codified in 40 CFR part 26, subpart A. The ''Common Rule'' is the name generally used to refer to the Federal Policy for the Protection of Human Subjects, which governs research with human subjects conducted or supported by EPA and many other Federal departments and agencies. EPA's codification of the Common Rule appears as subpart A in 40 CFR part 26.

B. What action is the agency taking?

The amendments contained in this final rule change the 2006 rule, published in the **Federal Register** issue of February 6, 2006 (71 FR 6138) (FRL–7759–8), subsequently amended in the **Federal Register** issue of June 23, 2006 (71 FR 36171) (FRL–8071–6), and codified at 40 CFR part 26, in the following substantive respects:

- By broadening the applicability of 40 CFR part 26, subparts K, L, M, and Q, so these subparts would apply not only to research submitted to or considered by EPA under the pesticide

laws, but also to research involving a ''pesticide'' (as defined in the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136(u)) which is submitted to or considered by EPA under any other regulatory statute it administers.

- By incorporating the definition of ''pesticide'' from FIFRA, as a substance or mixture of substances intended for pesticidal effect.
- By deleting from 40 CFR part 26, subpart K, all references to consent on behalf of a subject in research involving intentional exposure to a pesticide by a subject's ''legally authorized representative.''
- By incorporating into 40 CFR part 26, subparts P and Q, factors to be considered by EPA and the Human Studies Review Board (HSRB), in their review of proposed and completed human research, derived from the recommendations by the National Research Council of NAS in its 2004 Report entitled ''Intentional Human Dosing Studies for EPA Regulatory Purposes: Scientific and Ethical Issues'' (hereafter, 2004 NAS Report) to EPA.

C. What is the agency's authority for taking this action?

Sections 3(a) and 25(a) of FIFRA (7 U.S.C. 136a(a) and 136w(a)) and section 408(e)(1)(C) of the Federal Food, Drug, and Cosmetic Act (FFDCA) (21 U.S.C. 364a(e)(1)(C)), provide the legal authority for these amendments to the 2006 rule on human research.

D. What are the incremental costs and benefits of this action?

The incremental costs of these amendments both to industry and to EPA are expected to be negligible. EPA has not, therefore, prepared a new economic analysis for this rule. Because no research has been identified that is outside the scope of the 2006 rule but that would be within the scope of these amendments, EPA has no basis on which to revise the cost estimates that were provided in the economic analysis for the 2006 rule or those most recently provided in the 2008 renewal of the Information Collection Request (ICR) for the existing regulation at 40 CFR part 26. The estimates included in the ICR are summarized in Unit VI.B. and a copy of the ICR is available in the docket.

II. Background

A. EPA's 2006 Rule

As required by section 201 of the Department of the Interior, Environment, and Related Agencies Appropriations Act, 2006 (2006 Appropriations Act), Public Law 109–54, 119 Stat. 531, EPA promulgated a rule in 2006 establishing a set of protections for people participating as subjects in third-party human research with pesticides in 40 CFR part 26. (In this context ''third-party'' research is research neither conducted (''first-party'') nor supported (''second-party'') by EPA or another Common Rule Federal department or agency.) The 2006 rule prohibits EPA from relying on third-party research on pesticides involving intentional exposure of children or of pregnant or nursing women, unless relying on the data is crucial to a decision that would impose a more stringent regulatory restriction that would improve protection of public health than could be justified without relying on the data. It further forbids EPA itself to conduct or support any research involving intentional exposure of pregnant or nursing women or of children to any substance.

B. Petition for Review of the 2006 Rule and Settlement Agreement

In early 2006, the Natural Resources Defense Council, Inc.; Pesticide Action Network North American; Pineros y Campesinos Unido Del Noroeste; Physicians for Social Responsibility-San Francisco; Farm Labor Organizing Committee; ALF-CIO; and Migrant Clinicians Network petitioned for review of the 2006 rule in the United States Court of Appeals for the Second Circuit (Second Circuit Court of Appeals) (*NRDC* v. *EPA,* No. 06–0820–ag (2d Cir.)). The Petitioners argued that the 2006 rule violated the 2006 Appropriations Act because it did not bar all pesticide research with pregnant women and children, was inconsistent with the 2004 NAS Report, and was inconsistent with the Nuremburg Code.

After briefing and argument, but before a decision was rendered by the Second Circuit Court of Appeals, EPA and Petitioners entered a settlement agreement in which EPA agreed to conduct notice-and-comment rulemaking on the issue of whether the 2006 rule should be amended. EPA also agreed to propose, at a minimum, amendments to the 2006 rule that were substantially consistent with language negotiated between the parties and attached to the settlement agreement as Exhibit A. This agreement, including Exhibit A, is available in the docket for this action as described under **ADDRESSES**. The settlement agreement makes clear that EPA retained full discretion concerning what amendments were proposed, and what, if any, amendments are finalized.

C. Proposed Amendments to the 2006 EPA Rule

Consistent with the settlement agreement, on January 18, 2011, EPA Administrator Lisa Jackson signed a notice of proposed rulemaking for proposed amendments to the 2006 rule. The proposed amendments were substantially consistent with the regulatory language negotiated with Petitioners. The notice of proposed rulemaking published in the **Federal Register** issue of February 2, 2011 (76 FR 5735) (FRL–8862–7).

D. Retrospective Review of the Common Rule

On July 26, 2011, after issuance of EPA's proposed rule, the Department of Health and Human Services (HHS), in coordination with the Office of Science and Technology Policy (OSTP), issued an advance notice of proposed rulemaking concerning modernization of the Common Rule which governs research with human subjects conducted or supported by EPA and many other Federal departments and agencies (76 FR 44512, July 26, 2011). HHS and OSTP sought comment on ''how to better protect human subjects who are involved in research, while facilitating valuable research and reducing burden, delay, and ambiguity for investigators.'' Id. HHS and OSTP identified seven areas of concern regarding the Common Rule. Most relevant to EPA's proposed amendments to the 2006 rule, was a concern with ''the multiple, differing regulatory requirements that can apply to a single research study * * * .'' These requirements, according to HHS and OSTP, ''have been criticized as complex, inconsistent, and lacking in clarity,'' and can result in ''unwarranted variability across institutions and their [Institutional Review Boards] in how the requirements are interpreted and implemented'' (76 FR at 45514). HHS and OSTP stressed the importance of clarifying and harmonizing human subject protections across the Federal Government and sought comment on the means by which this could be accomplished (76 FR at 44528).

III. The Final Rule

EPA is finalizing the amendments to the 2006 rule as proposed. This includes changes to the scope and consent provisions, and the incorporation of selected individual recommendations from the 2004 NAS Report as the specific ethical and scientific factors to be considered by EPA and the HSRB in reviewing proposed and completed human research (*i.e.,* proposed

§§ 26.1603 and 26.1703, see 76 FR 5745–5749).

The amendments finalized in this rule are consistent with the recommendations in the 2004 NAS Report and EPA practice under the 2006 rule. That practice has been modeled primarily on EPA's practice under its Common Rule. Sections 26.109, 26.111, 26.116, and 26.117 of EPA's Common Rule explicitly address most of the specific ethical considerations included in the amendments to the 2006 rule, including whether risks to subjects are minimized (compare § 26.1603(c)(2) with existing § 26.111(a)(2)); whether risks are reasonable in comparison to benefits (compare § 26.1603(c)(3) with § 26.111(a)(2)); whether subject selection would be equitable (compare § 26.1603(c)(4) with existing § 26.111(a)(3)); whether consent will be free and voluntary (compare § 26.1603(c)(5) with existing §§ 26.116 and 26.117); whether an appropriately constituted institutional review board (IRB) has reviewed the proposed research (compare § 26.1603(c)(6) with § 26.109); and whether the ''special problems'' of research involving vulnerable populations are taken into account (compare § 26.1603(c)(7) and (8) with existing § 26.111(a)(3)). Other considerations are implicitly addressed.

The Common Rule's requirement to ''minimize risks'' in § 26.111(a)(1) necessitates consideration of whether adequate animal data is available to assess potential risks to subjects (see § 26.1603(c)(1)). It would involve consideration of whether medical care is to be provided for injuries incurred in the proposed research (see § 26.1603(c)(10)). Section 26.111(b)'s requirement that additional safeguards be in place to protect against undue influence of ''economically'' disadvantaged persons ensures that consideration of whether any proposed payments are so high as to constitute undue inducement or so low as to be attractive only to individuals who are socioeconomically disadvantaged (see § 26.1603(c)(9)). Although scientific considerations are not addressed in similar detail in the Common Rule requirements, nonetheless, the requirement to consider scientific validity and reliability and the Common Rule's emphasis on the need for ''sound research design'' in § 26.111(a)(1) and the need to take ''the importance of the knowledge that may reasonably be expected to result'' from the study into account, mandate that EPA focus on considerations addressing scientific validity such as those included in §§ 26.1603 and 26.1703. At a minimum, NAS Recommendations 3–1, 4–1, 5–1, 5–2, 5–3, and 5–5 are critical to proper consideration of the Common Rule's ethical requirements and its requirement for ''sound research design.''

IV. Public Comments on the Proposed Amendments

This unit discusses, in general terms, the public comments on the proposed amendments and EPA's responses to those comments. EPA received a total of 10 public comments on the proposed amendments during the 60-day comment period. Comments were submitted by 4 individual citizens and 6 different entities—the Agricultural Handler Exposure Task Force, the American Chemistry Council (on behalf of the Antimicrobial Exposure Assessment Task Force II), Beyond Pesticides, CropLife America, Natural Resources Defense Council, and SC Johnson & Son, Inc. The docket (under docket ID number EPA–HQ–OPP–2010–0785) includes all of the comments submitted to EPA on the proposed amendments, as well as EPA's Response to Comments document, which provides detailed responses to all comments received.

A. Comments on Proposal To Expand Scope To Include Research Submitted to EPA Under Any Regulatory Statute EPA Administers

Two comments addressed the proposed changes to the scope of the 2006 rule. One commenter stated that the 2006 Appropriations Act did not permit an expansion of scope beyond pesticide studies performed in the FIFRA and FFDCA context, and another argued that the 2006 Appropriations Act required that the scope of the rule be further expanded beyond studies submitted, or intended for submission, to EPA.

After considering these comments, EPA has decided to finalize the rule text relating to scope as it was proposed, *i.e.,* expanding the scope to cover research involving intentional exposure of human subjects to pesticides where that research is submitted, or intended to be submitted, to EPA under any regulatory statute that EPA administers. As noted in EPA's Response to Comments document, EPA no longer regards the 2006 Appropriations Act as authority for this rule. Therefore, EPA believes it is unnecessary to address whether the 2006 Appropriation Act either requires or does not allow EPA to establish a different scope for this rule.

Nevertheless, EPA regards FIFRA as providing adequate legal authority for the scope of research covered by this final rule. Sections 3(a) and 25(a) of FIFRA provide EPA with authority to regulate pesticides, including research involving intentional exposure of a human subject to a substance, when the substance is being tested as a ''pesticide.'' That includes research intended for submission to EPA, whether under FIFRA, FFDCA, or any of EPA's other regulatory authorities. EPA believes it makes sense to apply the same standards to all human studies involving pesticides submitted to EPA. On the other hand, EPA believes that it is not in the public interest to extend the prohibition against research involving intentional exposure of children or pregnant women to pesticides beyond the scope delineated in the proposed rule because such a prohibition, if enforceable, could have the unintended effect of prohibiting valuable research.

B. Comments on Inclusion of NAS-Derived Considerations

Two commenters questioned whether new regulatory text proposed at § 26.1603(b)(2)(ii) and (iii) would change the ways in which EPA has been reviewing proposed studies to measure exposures experienced by people who mix, load, or apply pesticides. As proposed, EPA would have been required to consider whether the proposed research includes representative study populations for the endpoint in question and has adequate statistical power to detect appropriate effects. These commenters expressed the same concern regarding the proposed regulatory text at § 26.1703(a)(2) and (3), which would require EPA to consider these factors in determining whether to rely on the research. As explained in more detail in EPA's Response to Comments document, EPA does not believe that the adoption of the specific ethical and scientific factors will impose any additional burden on sponsors of exposure studies or on the types of exposure studies referenced by the commenters.

As explained previously, EPA has decided to finalize the proposed text detailing specific scientific and ethical aspects of proposed and completed research—including the text proposed at § 26.1603(b)(2)(ii) and (iii) and at § 26.1703(a)(2) and (3)—that EPA and the HSRB must consider when reviewing such research. EPA also notes that, under the 2006 rule as amended through this final rule, EPA does not intend to change the way in which it reviews exposure research with respect to the inclusion of representative populations or the statistical power of the study, although EPA will consider whether further guidance on this issue

is needed. In addition, EPA does not believe the codification of the specific ethical and scientific factors derived from the 2004 NAS Report represents a material change in the way a particular pesticide study would have been reviewed. Thus, EPA believes that particular pesticides studies that have been approved under the 2006 rule, would also meet the standards reflected in this final rule.

C. Other Comments, Including Comments on Narrowing the Scope of the 2006 Rule To Include Only Intentional Dosing Studies

The remainder of the public comments addressed issues beyond the scope of the proposed amendments. These comments included arguments that the burden of the requirements of the 2006 rule (as opposed to any burden connected to this amendment) are unjustified, and assertions that EPA's interpretation in the 2006 rule of the language ''research involving intentional exposure of a human subject'' incorrectly expanded the scope of the rule beyond that required in the 2006 Appropriations Act, which addressed only ''intentional dosing human toxicity studies.'' The commenters are referring to § 26.1101(a) of the 2006 rule, which defines the scope of the rule as applying to ''all research initiated after April 7, 2006 involving intentional exposure of a human subject * * *.'' As EPA explained in the preamble to the proposal for the 2006 rule, this scope was intended to capture ''all intentional dosing human studies intended for submission to EPA under the pesticide laws'', *i.e.,* studies involving intentional dosing to measure a toxic effect and studies involving intentional dosing to measure other scientific endpoints, like exposure (**Federal Register** issue of September 12, 2005 (70 FR at 53845) (FRL–7728–2)). Additional discussion in the preambles to the proposal for the 2006 rule and 2006 rule further explains what studies EPA intended to be included within the scope of the 2006 rule (70 FR at 53845–53847; 71 FR 6138, 6146, 6149–6150).

Because these comments were directed at provisions in the 2006 rule that EPA did not reopen for reconsideration as part of the proposed amendments, these comments are beyond the scope of this final rule, and no response to them is required to finalize this rule. Nonetheless, EPA appreciates the concerns expressed by the commenters with regard to the burdens imposed by the 2006 rule and recognizes that there may be value in considering further amendments to the 2006 rule in a way that reduces the burdens on investigators, *e.g.,* by limiting the types of research that are subject to particular requirements of the rule.

V. Conclusion

EPA received relatively few comments on the proposed rule, and many of the comments received did not address the amendments in the proposal. For the reasons noted previously, the comments that did address the proposal do not merit any change to the amendments as proposed. Accordingly, EPA is finalizing the amendments as proposed for the reasons stated herein and in the preamble to the proposed rule.

VI. Statutory and Executive Order Reviews

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this action is a ''significant regulatory action,'' because the Office of Management and Budget (OMB) determined that it would raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order. Accordingly, EPA submitted this action to OMB for review under Executive Orders 12866 and 13563 (76 FR 3821, January 21, 2011). Any changes made in response to OMB recommendations have been documented in the docket for this rulemaking as required by the Executive Order.

B. Paperwork Reduction Act (PRA)

This action does not impose any new information collection burden that would require additional review or approval by OMB. However, OMB has previously approved the information collection requirements contained in the existing regulations at 40 CFR part 26 under the provisions of PRA (44 U.S.C. 3501 *et seq.*), and has assigned OMB Control No. 2070–0169 (EPA ICR No. 2195). The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9.

In its 2008 analysis supporting the most recent renewal of this ICR, EPA estimated that respondents would submit to the Agency some 34 proposals for or reports of research involving intentional exposure of human subjects each year. EPA estimated that preparation of information required by the 2006 rule would require about 598 hours per study at a cost of $45,927 per study, for a total estimated annual burden for affected entities of 20,332 hours at an estimated cost of $1,561,518. In addition, EPA estimated annual submission of 20 reports of research requiring only documentation of ethical conduct at a cost of 12 hours/$879 per report, or 240 hours/$17,580 per year. The total estimate of the annual respondent burden and cost was the sum of these two estimates, or 2,572 hours/$1,579,098.

These paperwork burden and cost estimates include activities related to initial rule familiarization, as well as activities that researchers would have to perform even without the Agency's rulemaking in this area, such as developing a protocol and maintaining records.

The average annual burden on EPA for reviewing each of the 34 study submissions was estimated to be 178 hours/$16,850 per study, or 6,052 hours/$572,900 per year. The average annual burden on EPA for reviewing each of the 20 additional submissions was estimated to be 44 hours/$3,158 per study, or 880 hours/$63,160 per year. The total estimate of the annual burden on EPA was the sum of these two estimates, or 6,932 hours/$636,000 per year.

In no year since promulgation of the 2006 rule have more than 7 protocols been submitted to EPA by industry; the average annual rate has been just over 5 for the 5-year period of 2006–2010. Somewhat fewer completed reports have been submitted during this period, so the average of new protocols and finished studies has been about 11 per year, less than a third of the projected 34 per year covered by the ICR. There is no evidence to suggest an upward trend, and nothing in these amendments is believed likely to lead to a significant change in the rate of protocol and study submissions.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9.

C. Regulatory Flexibility Act (RFA)

RFA (5 U.S.C. 601 *et seq.*), generally requires an agency to prepare a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements under the Administrative Procedure Act (5 U.S.C. 551–553) or any other statute unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses,

small organizations, and small governmental jurisdictions.

For purposes of assessing the impacts of this rule on small entities, small entity is defined as:

1. A small business as defined by the Small Business Administration's (SBA) regulations at 13 CFR 121.201, which is based on either the maximum number of employees or on the sales for small businesses in each industry sector, as defined by a 6-digit NAICS code, and for this rule is pesticide and other agricultural chemical manufacturers (NAICS code 325320) who sponsor or conduct human research with pesticides, or other entities (NAICS code 541710) that sponsor or conduct human research with pesticides, and IRBs who review human research with pesticides to ensure it meets applicable standards of ethical conduct;

2. A small governmental jurisdiction that is a government of a city, county, town, school district, or special district with a population of less than 50,000; or

3. A small organization that is any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.

After considering the economic impacts of this final rule on small entities, I certify that this action will not have a significant economic impact on a substantial number of small entities. Because no small entities have been identified that are directly regulated by these amendments, EPA has not attempted to reduce the impact of this final rule on small entities. Public comments were explicitly invited on all aspects of the proposal and its impacts on small entities, but no such comments were received.

D. Unfunded Mandates Reform Act (UMRA)

Title II of UMRA (2 U.S.C. 1531–1538) establishes requirements for Federal agencies to assess the effects of their regulatory actions on State, local, and tribal governments and the private sector. This rule does not contain a Federal mandate that may result in expenditures of $100 million or more for State, local, and tribal governments, in the aggregate, or the private sector in any 1 year. Thus, this rule is not subject to the requirements of UMRA sections 202 or 205. This rule is also not subject to the requirements of UMRA section 203, because it contains no regulatory requirements that might significantly or uniquely affect small governments. These amendments are unlikely to affect State, local, and tribal governments at all, and are likely to affect the private sector only trivially.

E. Executive Order 13132: Federalism

This action does not have federalism implications because it will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999). It makes marginal changes in the scope of an existing rule applying to sponsors and investigators conducting certain kinds of research involving human subjects, and refines the standards for EPA oversight of and reliance on such research. Thus, Executive Order 13132 does not apply to this action.

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have tribal implications as specified in Executive Order 13175 (65 FR 67249, November 9, 2000). This action will not have substantial direct effects on Indian Tribes, will not significantly or uniquely affect the communities of Indian tribal governments, and does not involve or impose any requirements that affect Indian Tribes. Thus, Executive Order 13175 does not apply to this action.

G. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

EPA interprets Executive Order 13045 (62 FR 19885, April 23, 1997), as applying only to those regulatory actions that concern health or safety risks, such that the analysis required under section 5–501 of the Executive Order has the potential to influence the regulation. This action is not subject to Executive Order 13045, because it does not establish an environmental standard intended to mitigate health or safety risks, nor is it an ''economically significant regulatory action'' as defined in Executive Order 12866. The 2006 rule applies to the conduct and review of research involving intentional exposure of human subjects, and prohibits the conduct of or EPA reliance on any such research involving subjects who are children, or pregnant or nursing women. These provisions would not be affected by the amendments.

H. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use

This action is not a ''significant regulatory action'' as defined in Executive Order 13211 (66 FR 28355, May 22, 2001), because it is not likely to have a significant adverse effect on the supply, distribution, or use of energy.

I. National Technology Transfer and Advancement Act (NTTAA)

Section 12(d) of NTTAA (15 U.S.C. 272 note) directs EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (*e.g.,* materials specifications, test methods, sampling procedures, and business practices) that are developed or adopted by voluntary consensus standards bodies. NTTAA directs EPA to provide Congress, through OMB, explanations when the Agency decides not to use available and applicable voluntary consensus standards. This action does not involve any technical standards. Therefore, EPA did not consider the use of any voluntary consensus standards.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

Executive Order 12898 (59 FR 7629, February 16, 1994) establishes Federal executive policy on environmental justice. Its main provision directs Federal agencies, to the greatest extent practicable and permitted by law, to make environmental justice part of their mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects of their programs, policies, and activities on minority populations and low-income populations in the United States.

EPA has determined that this final rule will not have disproportionately high and adverse human health or environmental effects on minority or low-income populations, because it does not affect the level of protection provided to human health or the environment. This rule does not entail special considerations of environmental justice related issues. The strengthened protections for human subjects participating in covered research established in the 2006 rule will not be altered by these amendments.

VII. Congressional Review Act

The Congressional Review Act (5 U.S.C. 801 *et seq.*), generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and the Comptroller General of the United States. EPA will submit a

report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 26

Environmental protection, Administrative practice and procedures, Human research, Pesticides and pests.

Dated: February 8, 2013.

Lisa P. Jackson,

Administrator.

Therefore, 40 CFR chapter I is amended as follows:

PART 26—[AMENDED]

■ 1. The authority citation for part 26 is revised to read as follows:

Authority: 5 U.S.C. 301; 7 U.S.C. 136a(a) and 136w(a)(1); 21 U.S.C. 346a(e)(1)(C); sec. 201, Pub. L. 109–54, 119 Stat. 531; and 42 U.S.C. 300v–1(b).

■ 2. In § 26.1101:
■ a. Remove paragraphs (a), (c), and (g).
■ b. Redesignate paragraph (b) as (c), (f) as (g), (e) as (f), and (d) as (e).
■ c. Add new paragraphs (a), (b), and (d).

The amendments read as follows:

§ 26.1101 To what does this subpart apply?

(a) Except as provided in paragraph (c) of this section, this subpart applies to all research initiated on or after April 15, 2013 involving intentional exposure of a human subject to:

(1) Any substance if, at any time prior to initiating such research, any person who conducted or supported such research intended either to submit results of the research to EPA for consideration in connection with any action that may be performed by EPA under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136–136y) or section 408 of the Federal Food, Drug, and Cosmetic Act (FFDCA) (21 U.S.C. 346a), or to hold the results of the research for later inspection by EPA under FIFRA or section 408 of FFDCA; or

(2) A pesticide if, at any time prior to initiating such research, any person who conducted or supported such research intended either to submit results of the research to EPA for consideration in connection with any action that may be performed by EPA under any regulatory statute administered by EPA other than those statutes designated in paragraph (a)(1) of this section, or to hold the results of the research for later inspection by EPA under any regulatory statute administered by EPA other than those statutes designated in paragraph (a)(1) of this section.

(b) For purposes of determining a person's intent under paragraph (a) of this section, EPA may consider any available and relevant information. EPA must rebuttably presume the existence of intent if:

(1) The person or the person's agent has submitted or made available for inspection the results of such research to EPA; or

(2) The person is a member of a class of people who, or whose products or activities, are regulated by EPA and, at the time the research was initiated, the results of such research would be relevant to EPA's exercise of its regulatory authority with respect to that class of people, products, or activities.

* * * * *

(d) The EPA Administrator retains final judgment as to whether a particular activity is covered by this subpart.

* * * * *

■ 3. In § 26.1102, revise paragraphs (a) and (c) and add new paragraph (k) to read as follows:

§ 26.1102 Definitions.

(a) *Administrator* means the Administrator of the Environmental Protection Agency (EPA) and any other officer or employee of EPA to whom authority has been delegated.

* * * * *

(c) *Pesticide* means any substance or mixture of substances meeting the definition in 7 U.S.C. 136(u) (Federal Insecticide, Fungicide, and Rodenticide Act, section 2(u)).

* * * * *

(k) *Common Rule* refers to the Federal Policy for the Protection of Human Subjects that was established in 1991 by the Office of Science and Technology Policy and codified in 1991 by EPA and 14 other Federal departments and agencies (see the **Federal Register** issue of June 18, 1991 (56 FR 28003)) and subsequently codified by other Federal departments and agencies. The Common Rule contains a widely accepted set of standards for conducting ethical research with human subjects, together with a set of procedures designed to ensure that the standards are met. Once codified by a Federal department or agency, the requirements of the Common Rule apply to research conducted or sponsored by that Federal department or agency. EPA's codification of the Common Rule appears in 40 CFR part 26, subpart A.

§ 26.1111 [Amended]

■ 4. In § 26.1111, remove from paragraph (a)(4) the phrase ''or the subject's legally authorized representative.''

■ 5. In § 26.1116, revise the introductory text of the section to read as follows:

§ 26.1116 General requirements for informed consent.

No investigator may involve a human being as a subject in research covered by this subpart unless the investigator has obtained the legally effective informed consent of the subject. An investigator must seek such consent only under circumstances that provide the prospective subject sufficient opportunity to consider whether or not to participate and that minimize the possibility of coercion or undue influence. The information that is given to the subject must be in language understandable to the subject. No informed consent, whether oral or written, may include any exculpatory language through which the subject is made to waive or appear to waive any of the subject's legal rights, or releases or appears to release the investigator, the sponsor, the institution or its agents from liability for negligence.

* * * * *

■ 6. Revise § 26.1117 to read as follows:

§ 26.1117 Documentation of informed consent.

(a) Informed consent must be documented by the use of a written consent form approved by the IRB and signed by the subject. A copy shall be given to the subject.

(b) The consent form may be either of the following:

(1) A written consent document that embodies the elements of informed consent required by § 26.1116. This form may be read to the subject, but in any event, the investigator must give the subject adequate opportunity to read it before it is signed; or

(2) A short form written consent document stating that the elements of informed consent required by § 26.1116 have been presented orally to the subject. When this method is used, there must be a witness to the oral presentation. Also, the IRB shall approve a written summary of what is to be said to the subject. Only the short form itself is to be signed by the subject. However, the witness must sign both the short form and a copy of the summary, and the person actually obtaining consent must sign a copy of the summary. A copy of the summary must

be given to the subject, in addition to a copy of the short form.

■ 7. Revise the heading for subpart L to read as follows:

Subpart L—Prohibition of Third-Party Research Involving Intentional Exposure to a Pesticide of Human Subjects Who Are Children or Pregnant or Nursing Women

■ 8. Revise § 26.1201 to read as follows:

§ 26.1201 To what does this subpart apply?

This subpart applies to any research subject to subpart K of this part.

■ 9. Revise § 26.1301 to read as follows:

§ 26.1301 To what does this subpart apply?

This subpart applies to any person who submits to EPA on or after April 15, 2013 either of the following:

(a) A report containing the results of any human research for consideration in connection with an action that may be performed by EPA under FIFRA (7 U.S.C. 136–136y) or section 408 of FFDCA (21 U.S.C. 346a).

(b) A report containing the results of any human research on or with a pesticide for consideration in connection with any action that may be performed by EPA under any regulatory statute administered by EPA.

§ 26.1302 [Amended]

■ 10. In § 26.1302, remove the word ''shall.''

§ 26.1502 [Amended]

■ 11. In § 26.1502:

■ a. Remove in the first sentence of paragraph (a), the period after the phrase ''during an inspection'' and add in its place a comma.

■ b. Remove in the second sentence of paragraph (a), the phrase ''The agency'' and add in its place ''EPA.''

■ c. Remove in the last sentence of the introductory text of paragraph (b), the phrase ''the Agency'' and add in its place ''EPA.''

§ 26.1505 [Amended]

■ 12. In § 26.1505, remove from the last sentence, the citation ''§ 26.1502(c)'' and add in its place ''§ 26.1502(b)(4).''

§ 26.1507 [Amended]

■ 13. In § 26.1507, remove from the last sentence, the phrase ''The Agency'' and add in its place ''EPA.''

§§ 26.1601 through 26.1603 [Redesignated as §§ 26.1603 through 26.1605]

■ 14. Redesignate §§ 26.1601 through 26.1603 as §§ 26.1603 through 26.1605.

■ 15. Add new §§ 26.1601 and 26.1602 to subpart P to read as follows:

§ 26.1601 To what does this subpart apply?

This subpart applies to both of the following:

(a) Reviews by EPA and by the Human Studies Review Board of proposals to conduct new research subject to § 26.1125.

(b) Reviews by EPA on or after April 15, 2013 and, to the extent required by § 26.1604, by the Human Studies Review Board of reports of completed research subject to § 26.1701.

§ 26.1602 Definitions.

The definitions in § 26.1102 also apply to this subpart.

■ 16. In newly redesignated § 26.1603:

■ a. Remove paragraphs (a) and (e).

■ b. Redesignate paragraphs (b) through (d) as (e) through (*g*).

■ c. Add new paragraphs (a), (b), (c), (d), and (h).

The amendments read as follows:

§ 26.1603 EPA review of proposed human research.

(a) EPA must review all proposals for new human research submitted under § 26.1125 in a timely manner.

(b) In reviewing proposals for new human research submitted under § 26.1125, the EPA Administrator must consider and make determinations regarding the scientific validity and reliability of the proposed research, including:

(1) Whether the research would be likely to produce data that address an important scientific or policy question that cannot be resolved on the basis of animal data or human observational research.

(2) Whether the proposed research is designed in accordance with current scientific standards and practices to:

(i) Address the research question.

(ii) Include representative study populations for the endpoint in question.

(iii) Have adequate statistical power to detect appropriate effects.

(3) Whether the investigator proposes to conduct the research in accordance with recognized good research practices, including, when appropriate, good clinical practice guidelines and monitoring for the safety of subjects.

(c) In reviewing proposals for new research submitted under § 26.1125, the EPA Administrator must consider and make determinations regarding ethical aspects of the proposed research, including:

(1) Whether adequate information is available from prior animal studies or from other sources to assess the potential risks to subjects in the proposed research.

(2) Whether the research proposal adequately identifies anticipated risks to human subjects and their likelihood of occurrence, minimizes identified risks to human subjects, and identifies likely benefits of the research and their distribution.

(3) Whether the proposed research presents an acceptable balance of risks and benefits. In making this determination for research intended to reduce the interspecies uncertainty factor in a pesticide risk assessment, the EPA Administrator will also consider the process laid out and the attendant discussion for evaluating that type of study as provided in Recommendation 4–1 of the 2004 Report from the National Research Council of the National Academy of Sciences (NAS), entitled ''Intentional Human Dosing Studies for EPA Regulatory Purposes: Scientific and Ethical Issues.''

(4) Whether subject selection will be equitable.

(5) Whether subjects' participation would follow free and fully informed consent.

(6) Whether an appropriately constituted IRB or its foreign equivalent has approved the proposed research.

(7) If any person from a vulnerable population may become a subject in the proposed research, whether there is a convincing justification for selection of such a person, and whether measures taken to protect such human subjects are adequate.

(8) If any person with a condition that would put them at increased risk for adverse effects may become a subject in the proposed research, whether there is a convincing justification for selection of such a person, and whether measures taken to protect such human subjects are adequate.

(9) Whether any proposed payments to subjects are consistent with the principles of justice and respect for persons, and whether they are so high as to constitute undue inducement or so low as to be attractive only to individuals who are socioeconomically disadvantaged.

(10) Whether the sponsor or investigator would provide needed medical care for injuries incurred in the proposed research, without cost to the human subjects.

(d) With respect to any research or any class of research subject to this subpart, the EPA Administrator may recommend additional conditions which, in the judgment of the EPA

Administrator, are necessary for the protection of human subjects.

* * * * *

(h) EPA must provide the submitter of the proposal copies of the EPA and Human Studies Review Board reviews.

■ 17. In newly redesignated § 26.1604, revise paragraph (a) to read as follows:

§ 26.1604 EPA review of completed human research.

(a) When considering, under any regulatory statute it administers, data from completed research involving intentional exposure of humans to a pesticide, EPA must thoroughly review the material submitted under § 26.1303, if any, and other available, relevant information and document its conclusions regarding the scientific and ethical conduct of the research.

* * * * *

■ 18. Add §§ 26.1606 and 26.1607 to subpart P to read as follows:

§ 26.1606 Human Studies Review Board review of proposed human research.

In commenting on proposals for new research submitted to it by EPA, the Human Studies Review Board must consider the scientific merits and ethical aspects of the proposed research, including all elements required in § 26.1603(b) and (c) and any additional conditions recommended pursuant to § 26.1603(d).

§ 26.1607 Human Studies Review Board review of completed human research.

In commenting on reports of completed research submitted to it by EPA, the Human Studies Review Board must consider the scientific merits and ethical aspects of the completed research, and must apply the appropriate standards in subpart Q of this part.

■ 19. Revise the heading for subpart Q to read as follows:

Subpart Q—Standards for Assessing Whether To Rely on the Results of Human Research in EPA Actions

■ 20. Revise §§ 26.1701 through 26.1705 to read as follows:

* * * * *

Sec.
26.1701 To what does this subpart apply?
26.1702 Definitions.
26.1703 Prohibitions applying to all research subject to this subpart.
26.1704 Prohibition of reliance on unethical human research with non-pregnant, non-nursing adults.
26.1705 Prohibition of reliance on unethical human research with non-pregnant, non-nursing adults initiated after April 7, 2006.

* * * * *

§ 26.1701 To what does this subpart apply?

(a) For decisions under FIFRA (7 U.S.C. 136–136y) or section 408 of FFDCA (21 U.S.C. 346a), this subpart applies to research involving intentional exposure of human subjects to any substance.

(b) For decisions under any regulatory statute administered by EPA other than those statutes designated in paragraph (a) of this section, this subpart applies to research involving intentional exposure of human subjects to a pesticide.

§ 26.1702 Definitions.

The definitions in § 26.1102 and § 26.1202 also apply to this subpart.

§ 26.1703 Prohibitions applying to all research subject to this subpart.

(a) Prohibition of reliance on scientifically invalid research. EPA must not rely on data from research subject to this subpart unless EPA determines that the data are relevant to a scientific or policy question important for EPA decisionmaking, that the data were derived in a manner that makes them scientifically valid and reliable, and that it is appropriate to use the data for the purpose proposed by EPA. In making such determinations, EPA must consider:

(1) Whether the research was designed and conducted in accordance with appropriate scientific standards and practices prevailing at the time the research was conducted.

(2) The extent to which the research subjects are representative of the populations for the endpoint or endpoints in question.

(3) The statistical power of the data to support the scientific conclusion EPA intends to draw from the data.

(4) In a study that reports only a No Observed Effect Level (NOEL) or a No Observed Adverse Effect Level (NOAEL), whether a dose level in the study gave rise to a biological effect, thereby demonstrating that the study had adequate sensitivity to detect an effect of interest.

(b) Prohibition of reliance on research subject to this subpart involving intentional exposure of human subjects who are pregnant women (and therefore their fetuses), nursing women, or children. Except as provided in § 26.1706, EPA must not rely on data from any research subject to this subpart involving intentional exposure of any human subject who is a pregnant woman (and therefore her fetus), a nursing woman, or a child.

§ 26.1704 Prohibition of reliance on unethical human research with non-pregnant, non-nursing adults.

(a) This section applies to research subject to this subpart that is not subject to § 26.1705.

(b) Except as provided in § 26.1706, EPA must not rely on data from any research subject to this section if there is clear and convincing evidence that:

(1) The conduct of the research was fundamentally unethical (*e.g.,* the research was intended to seriously harm participants or failed to obtain informed consent); or

(2) The conduct of the research was deficient relative to the ethical standards prevailing at the time the research was conducted in a way that placed participants at increased risk of harm (based on knowledge available at the time the study was conducted) or impaired their informed consent.

(c) The prohibition in this section is in addition to the prohibitions in § 26.1703.

§ 26.1705 Prohibition of reliance on unethical human research with non-pregnant, non-nursing adults initiated after April 7, 2006.

(a) This section applies to research subject to this subpart, that:

(1) Was initiated after April 7, 2006.

(2) Was subject, at the time it was conducted, either to subparts A through L of this part, or to the codification of the Common Rule by another Federal department or agency.

(b) Except as provided in § 26.1706, EPA must not rely on data from any research subject to this section unless EPA determines that the research was conducted in substantial compliance with either:

(1) All applicable provisions of subparts A through L of this part, or the codification of the Common Rule by another Federal department or agency; or

(2) If the research was conducted outside the United States, with procedures at least as protective of subjects as those in subparts A through L of this part, or the codification of the Common Rule by another Federal department or agency.

(c) Except as provided in § 26.1706, EPA must not rely on data from any research subject to this section unless EPA determines that the research was conducted in substantial compliance with either:

(1) A proposal that was found to be acceptable under § 26.1603(c), and no amendments to or deviations from that proposal placed participants at increased risk of harm (based on knowledge available at the time the

study was conducted) or impaired their informed consent. If EPA discovers that the submitter of the proposal materially misrepresented or knowingly omitted information that would have altered the outcome of EPA's evaluation of the proposal under § 26.1603(c), EPA must not rely on that data.

(2) A proposal that would have been found to be acceptable under § 26.1603(c), if it had been subject to review under that section, and no amendments to or deviations from that proposal placed participants at increased risk of harm (based on knowledge available at the time the study was conducted) or impaired their informed consent.

(d) The prohibition in this section is in addition to the prohibitions in § 26.1703.

§ 26.1706 [Amended]

■ 21. In § 26.1706, remove in paragraph (d) the word ''publishes'' and add in its place the phrase ''has published.''

[FR Doc. 2013–03456 Filed 2–13–13; 8:45 am]

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R10–OAR–2011–0367; FRL–9756–8]

Approval and Promulgation of Implementation Plans; State of Alaska; Regional Haze State Implementation Plan

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is approving a State Implementation Plan (SIP) submittal from the State of Alaska as meeting the requirements of Clean Air Act (CAA) sections169A and 169B and federal regional haze regulations. The SIP implements a regional haze program in the State of Alaska for the first regional haze planning period, through July 31, 2018. This submittal addresses the requirements of the Clean Air Act (CAA) and EPA's rules that require states to prevent any future and remedy any existing manmade impairment of visibility in mandatory Class I areas caused by emissions of air pollutants from numerous sources located over a wide geographic area (also referred to as the ''regional haze program''). In this action, EPA is approving all provisions of Alaska's Regional Haze SIP submission, including the requirements for the calculation of baseline and natural visibility conditions, statewide inventory of visibility-impairing pollutants, best available retrofit technology (BART), Reasonable Progress Goals (RPGs), and Long-Term Strategy (LTS). Additionally, EPA is approving the Alaska Department of Environmental Conservation Best Available Retrofit Technology regulations, and amendments to Alaska's Area Wide Pollution Control Program for Regional Haze.

DATES: This final rule is effective March 18, 2013.

ADDRESSES: EPA has established a docket for this action under Docket ID No. EPA–R10–OAR–2011–0367. All documents in the docket are listed on the *www.regulations.gov* Web site. Although listed in the index, some information is not publicly available, e.g., Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically through *www.regulations.gov* or in hard copy at the State and Tribal Air Programs Unit, Office of Air Waste and Toxics, EPA Region 10, 1200 Sixth Avenue, Seattle, WA 98101. EPA requests that if at all possible, you contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section to view the hard copy of the docket. You may view the hard copy of the docket Monday through Friday, 8:00 a.m. to 4:00 p.m., excluding Federal holidays.

FOR FURTHER INFORMATION CONTACT: Keith Rose, EPA Region 10, Suite 900, Office of Air, Waste and Toxics, 1200 Sixth Avenue, Seattle, WA 98101, (206) 553–1949.

SUPPLEMENTARY INFORMATION:

Definitions

For the purpose of this document, we are giving meaning to certain words or initials as follows:

(i) The words or initials *Act, CAA,* or *Clean Air Act* mean or refer to the Clean Air Act, unless the context indicates otherwise.

(ii) The words *EPA, we, us* or *our* mean or refer to the United States Environmental Protection Agency.

(iii) The initials *SIP* mean or refer to State Implementation Plan.

(iv) The words *Alaska* and *State* mean the State of Alaska.

Table of Contents

I. Background Information
II. Response to Comments
III. Final Action
IV. Statutory and Executive Orders Review

I. Background Information

In the CAA Amendments of 1977, Congress established a program to protect and improve visibility in the national parks and wilderness areas. See CAA section 169A. Congress amended the visibility provisions in the CAA in 1990 to focus attention on the problem of regional haze. See CAA section 169B. EPA promulgated regulations in 1999 to implement sections 169A and 169B of the Act. These regulations require states to develop and implement plans to ensure reasonable progress toward improving visibility in mandatory Class I Federal areas [1] (Class I areas). 64 FR 35714 (July 1, 1999); see also 70 FR 39104 (July 6, 2005) and 71 FR 60612 (October 13, 2006).

On February 24, 2012, EPA published a Notice of Proposed Rulemaking (NPR) for the State of Alaska. See 77 FR 11022. In the NPR, EPA proposed approval of the Alaska SIP submittal that addresses regional haze for the planning period 2008 through 2018. The Regional Haze Plan was submitted to EPA on April 4, 2011. Specifically, EPA proposed to approve all provisions of Alaska's April 4, 2011 Regional Haze SIP submission. In this action, EPA is approving all provisions of Alaska's Regional Haze SIP submission, including the requirements for the calculation of baseline and natural visibility conditions, statewide inventory of visibility-impairing pollutants, best available retrofit technology (BART), Reasonable Progress Goals (RPGs), Long-Term Strategy (LTS), ADEC's BART regulations in 18 AAC 50.260, and the amendments to 18 AAC 50.030 which adopts by reference Volume II, Section III. F. Open Burning; Volume II, Section III. K. Area Wide Pollution Control Program for Regional Haze; and Volume II, Appendices to Volume II.

---

[1] Areas designated as mandatory Class I Federal areas consist of national parks exceeding 6000 acres, wilderness areas and national memorial parks exceeding 5000 acres, and all international parks that were in existence on August 7, 1977. 42 U.S.C. 7472(a). In accordance with section 169A of the Clean Air Act, EPA, in consultation with the Department of Interior, promulgated a list of 156 areas where visibility is identified as an important value. 44 FR 69122 (November 30, 1979). The extent of a mandatory Class I area includes subsequent changes in boundaries, such as park expansions. 42 U.S.C. 7472(a). Although states and tribes may designate as Class I additional areas which they consider to have visibility as an important value, the requirements of the visibility program set forth in section 169A of the Clean Air Act apply only to ''mandatory Class I Federal areas.'' Each mandatory Class I Federal area is the responsibility of a ''Federal Land Manager.'' 42 U.S.C. 7602(i). When we use the term ''Class I area'' in this action, we mean a ''mandatory Class I Federal area.''

A detailed explanation of the requirements for regional haze SIPs as well as EPA's analysis of Alaska's SIP submittal was provided in the NPR and will not be repeated in detail here.

Most of the comments received on the NPR addressed the Healy coal-fired power plant (Healy Power Plant) located in Healy, Alaska just five miles from Denali National Park. The Healy Power Plant consists of 2 power generating units. Unit 1 is subject to BART as a nominal 25 megawatt (MW) coal-fired electric generating unit that was initially constructed in 1967. Unit 2, also referred to as the Healy Clean Coal Project (HCCP), is a nominal 50 MW coal-fired electric generating unit, was constructed in 1997, is not subject to BART, and has not operated since 1999. Golden Valley Electric Association, Inc. (GVEA) owns and operates Unit 1. GVEA and the Alaska Industrial Development and Export Authority (AIDEA) currently own Unit 2. GVEA and AIDEA intend to reactivate and/or restart Unit 2.[2]

Subsequent to the publication of the NPR, the United States entered into negotiations with GVEA and the AIDEA regarding their future work plans and intent to operate Unit 2 at the Healy Power Plant. These negotiations resulted in the United States, on behalf of EPA, filing a civil complaint for injunctive relief concurrently with a consent decree in the United States District Court for the District of Alaska.[3] The consent decree recognizes that GVEA and AIDEA intend to reactivate and/or restart Unit 2 and that, as alleged in the complaint accompanying the consent decree, the United States believes that GVEA's and AIDEA's project at Unit 2 at the Healy Power Plant would result in the operation of a new source or, in the alternative, a major modification of an existing source without obtaining the necessary permits under the Act and without the installation and operation of the state-of-the-art controls necessary under the Act to reduce air pollutants, particularly oxides of nitrogen (NOx) emissions from Unit 2. While not admitting liability, GVEA and AIDEA agreed to comply with specified pollution control requirements and emissions limits for Unit 1 and Unit 2 at the Healy Power Plant.

The consent decree requires GVEA to install Selective Non-Catalytic Reduction (SNCR) on Unit 1 on or before September 30, 2015 or 18 months after Unit 2 first fires coal, whichever is later. Additionally, by December 31, 2022, GVEA must elect to either permanently retire Unit 1 by December 23, 2024 or install Selective Catalytic Reduction (SCR). If GVEA elects to operate Unit 1 after December 31, 2024 it must continuously operate the SCR and comply with specified emission limits. The consent decree also requires GVEA and AIDEA to install SCR on Unit 2 on or before September 30, 2015 or 24 months after it first fires coal and to comply with specified emission limits.

The consent decree also acknowledges that EPA is currently reviewing the Regional Haze SIP submittal from Alaska and that EPA may consider the enforceable conditions in the consent decree when it takes final action on that SIP submission. Additionally the consent decree provides that nothing in the consent decree relieves GVEA or AIDEA of their obligation to comply with all applicable state or federal, state and local laws and regulations, specifically including the BART requirements in the Alaska SIP or emission limits or deadlines for the installation of pollution controls set forth in the regulations.

II. Response to Comments

EPA received a number of comments on the proposed action to approve the Alaska Regional Haze SIP submittal. These comments were received from the Alaska Department of Environmental Conservation (ADEC), Sierra Club, the National Park Service, Denali Citizens' Council, National Parks and Conservation Association (NPCA), and Golden Valley Electric Association (GVEA) and a number of individual commenters or members of organizations. The individual comments included many identical or nearly identical comment letters that were part of a public comment campaign sponsored by Sierra Club, NPCA and CREDO. Additionally, on June 29, 2012, Earth Justice submitted a letter to EPA on behalf of the NPCA commenting on a number of Regional Haze SIPs, including Alaska, that were pending review before the agency. Even though the letter was submitted after the close of the comment period for this action, we have taken these comments into account and are responding to those comments relevant to this action in this notice.

The EPA's responses to the comments are grouped into three categories: (1) Comments on BART for Healy Unit 1; (2) Comments on Reasonable Progress and Healy Unit 2; and (3) General Comments.

A. Comments Related to BART for Healy Unit I

As noted above, the majority of the comments received related to the Healy Power Plant. Numerous comments were received regarding the selection of Selective Non-Catalytic Reduction (SNCR) rather than Selective Catalytic Reduction (SCR) as BART for Healy Unit 1. Many of the comments focused on the cost of controls, cost effectiveness calculations, and the lack of an enforceable shut down date for the unit.

After reviewing the public comments, we performed additional analyses of the cost effectiveness associated with the various NO_X control technologies considered by ADEC in determining BART for Unit 1 at the Healy Power Plant. While evaluating the public comments received on the proposed approval of the Alaska Regional Haze SIP submission, we considered the enforceable conditions in the consent decree and the resulting controls, limits and emission reductions. We also considered our additional technical and cost effectiveness analyses. The specific comments and responses are described below.

Comment: A number of commenters asserted that BART should be SCR for Healy Unit I. More specifically, a comment concluded that BART for Healy Unit 1 should require the installation and operation of SCR at a 0.035 lb/mmBtu emission limit and stated that SCR technology is the industry standard for NO_X removal. Other commenters asserted that SCR could achieve a limit between 0.05 and 0.07 lbs/mmBtu. In the commenters' view, the State's analysis overestimated the SCR costs and underestimated its benefits. One comment pointed to EPA's finding in other determinations that BART for NO_X is 0.05 lbs/mmBtu. For the San Juan coal-fired generating station in New Mexico, EPA imposed a 0.05 lbs/mmBtu BART limit, and the final permit for the Desert Rock coal-fired generating plant imposed a limit of 0.035 lbs/mmBtu.

Response: EPA agrees that a more stringent emission rate is achievable with SCR than with SNCR. A BART determination is based on consideration of multiple factors. As explained in the NPR, the State found that SCR is not cost effective at this facility for an 8 year equipment lifetime. Although EPA does

[2] Unit 2 previously went through Prevention of Significant Deterioration (PSD) review and received an Air Quality Control Permit issued in 1993 and amended in 1994. On February 3, 2011, ADEC issued Final Air Quality Control Permit No. AQ0173TVPO2 to GVEA.

[3] *United States* v. *Golden Valley Electric Association, Inc. and Alaska Industrial Development and Export Authority,* Civ. No. 4:12-cv-00025–RRB (D. Alaska). The United States filed an Unopposed Motion to Enter the Consent Decree on November 14, 2012.

not agree with the State's use of an 8 year equipment life, we are approving the BART limit for NO_X of 0.20 lbs/mmBtu based on the installation of SNCR. After considering the comments received, EPA calculated the cost of SCR using a 30 year lifetime for the controls in addition to the 20 year lifetime cost calculation that EPA had undertaken prior to the proposed action. Based on the vendor's quote for SCR and having eliminated costs that were not consistent with EPA's Control Cost Manual, EPA found that the cost effectiveness of SCR at Healy Unit 1 is about $5,900/ton for a 20 year equipment lifetime, and about $5,300/ton for a 30 year lifetime. See ''Revisions to Healy Unit 1 Cost Effectiveness Calculations'', memo from Zach Hedgpeth to Keith Rose, October 15, 2012. Based on modeled results of visibility impacts at different emission rates, the State also found that the incremental visibility improvement at Denali National Park associated with an emission rate of 0.07 lbs/mmBtu (achievable with SCR) versus the improvement expected with an emission rate of 0.19 lb/mmBtu (achievable with SNCR) to be relatively small (about 0.17 dv).

In this case, as explained in more detail in the proposal, ADEC selected the BART NO_X emission limit for Healy Unit 1 based on their consideration of the BART five-step review process, information provided in GVEA's BART analyses, the Enviroplan GVEA Healy BART Report, and a decision by ADEC to grant GVEA's request to allow for some operational variability in the NO_X emission rate for Healy Unit 1. 77 FR 11034, February 24, 2012. The Regional Haze rule grants States the authority to make the initial determination of what constitutes BART. EPA reviews that determination to ensure that the appropriate factors were considered and that the determination by the State is a reasonable one.

BART is a source by source determination based on consideration, among other things, of the cost of controls at the source and the visibility improvement expected to result from the installation of controls at the source. In other words, each BART determination is made based on a site-specific, fact-specific evaluation of the particular BART source. Here, to name but one difference between Healy and the San Juan Generating Station as an example, the BART unit at Healy is only rated at 25 MW, whereas the four units at the San Juan facility are rated at a total of 1,800 MW. The size of the unit can affect both the cost effectiveness of controls as well as the associated air quality or visibility impacts. As a result, the conclusion that SCR is BART for one facility is not determinative in another BART determination. The decision as to appropriate controls for the Desert Rock facility to meet the requirements of another CAA program, the prevention of significant deterioration or PSD program, is of even less relevance to the determination of BART for Healy Unit 2.

EPA also notes that pursuant to the consent decree described above, no later than December 31, 2022, GVEA must decide whether it will continue to operate Unit 1 past December 31, 2024 (the date upon which ADEC based its cost effectiveness calculations) or whether it will permanently retire the Unit by December 31, 2024. If GVEA elects to continue operation after December 31, 2024, it must install SCR control technology (or alternate control technology approved by EPA).

Taking all this into consideration, EPA is approving the State's NO_X BART determination for Healy Unit 1 as meeting the requirements of the CAA.

Comment: A number of comments state that the SIP fails to adequately address the shutdown date required as part of the BART determination for Healy Unit 1. The commenter references the BART guidelines statements that ''if a shutdown date affects the BART determination, this date should be assured by a federally or state enforceable restriction preventing further operation.'' The commenters assert that this requirement is not addressed in the SIP submittal and that the SIP should make clear that a shutdown date of 2024 is a requirement for Unit 1.

Response: As noted in the proposal, the BART Guidelines explain that the source's remaining useful life may be considered as an element of the cost analysis in a BART determination for a particular source and, as the comment points out, where the retirement date affects the BART determination, the date should be enforceable. BART Guidelines IV.D.4.k. 70 FR 39169, July 6, 2005. In our proposed rulemaking, we recognized that the 2024 shutdown date relied on in the State's cost effectiveness calculation is not enforceable. Because of this, EPA conducted additional analyses of the cost effectiveness of the particular control technologies under consideration for Healy Unit 1 based on the estimated useful lifetime for the controls. 77 FR 11034, February 24, 2012. For that analysis we used lifetimes of 20 years for NO_X control technologies, and 15 years for SO_2 and PM control technologies. Based on additional information received during the public comment period, we subsequently evaluated the cost effectiveness of the NO_X control technologies for Healy Unit 1 based on a 8, 15, 20 and 30 year lifetime. This analysis calculated the cost effectiveness of SNCR, SCR, Rotating Over Fire Air (ROFA), ROFA with Rotamix, and optimization of the low NO_X burners with a modified over-fire air system. Thus, EPA's revised cost analysis specifically examined the cost effectiveness of SCR over both 20 and 30 year lifetimes. The revised cost analysis calculates SCR costs of about $5,900/ton of NO_X reduced for a 20 year equipment lifetime, and $5,300/ton of NO_X reduced for a 30 year equipment lifetime. After reviewing new information submitted from the commenters, and adjusting the assumptions in our cost effectiveness calculations, EPA continues to find that it was reasonable for the State to conclude that the additional cost for SCR over SNCR, even when based on 20 year or 30 year lifetimes, is not justified.

Our analysis confirmed that the reduced period for the remaining useful life used by the State in its BART analysis did not change the level of control that would reasonably be required as BART at this facility. As explained above, based on consideration of all the BART factors, including cost effectiveness, the remaining life, and visibility improvement estimated to result with emission limits associated with the different controls, the State's decision to reject SCR is not unreasonable.

Comment: EPA failed to conduct an adequate review of Alaska's cost projections for SCR technology on Healy Unit 1. EPA relied on Alaska's submission of a single vendor's quote (Fuel Tech) for the cost of SCR. The cost of an SCR can vary significantly depending on the vendor and its specifications, and EPA did not even review the details in this vendor's estimate. Both the Fuel Tech report and the GVEA report use cost assumptions that are contrary to the Cost Control Manual. EPA cannot reject SCR on cost effectiveness grounds without more sufficient factual support.

Response: EPA disagrees with the comment regarding Fuel Tech's cost quotes. It is appropriate for our cost analysis to rely, at least in part, on the vendor's quote which is based on site specific information and specifications. In conducting our analysis described above, we reduced the vendor's cost estimates for a number of components, including annual operating and maintenance (O&M) costs, NO_X emission rates for SCR, expected equipment lifetime, and costs for a new

induced draft fan, consistent with the EPA Control Cost Manual methodology.

Comment: One commenter asserted that the NO_X control options evaluated for Healy Unit 1 could be implemented sooner that the five years assumed by Alaska, in which case a 2024 shut down date may affect the cost effectiveness of feasible emission control technologies considered for Healy Unit 1.

Response: EPA recognizes that the time it takes to implement controls and the length of time the controls may operate affect the cost effectiveness calculation and thus the ultimate BART determination. EPA acknowledges that SNCR installations may typically require 8 to 12 months, however, the amount of time necessary for installation at a particular facility may vary significantly depending on the site specific circumstances, such as weather conditions, and the frequency and duration of maintenance periods for a particular power plant. Additionally, as noted above, the shut down date does not affect the BART determination here and thus the State's estimate of the time it may take to install SNCR does not significantly affect the cost effectiveness calculations of that technology.

Comment: A commenter asserts that EPA's proposal does not require meaningful emission reductions from this outdated coal plant. Further the comment states that limits proposed for SO_2 and NO_X at Healy do not represent the ''degree of reduction achievable through the application of the best system of continuous emission reduction'' and that EPA must impose lower BART emission limits for SO_2 and NO_X at Healy Unit 1 that are consistent with modern pollution control technology.

Response: The State's BART determination found that 0.20 lbs/mmBtu is the appropriate NO_X limit based on continued use of the current low NO_X burners (LNB) and over fired air (OFA) systems, and the new installation of SNCR. This limit represents a reduction of 29% from baseline emissions of NO_X from Healy 1. The BART limit for SO_2 is 0.30 lb/mmBtu based on the current Dry Sorbent Injection (DSI) system. As explained above, based on comments received on the proposed rulemaking, EPA reevaluated the cost effectiveness of SCR on Healy Unit 1 based on 20 and 30 year lifetimes, and evaluated the cost effectiveness of SNCR, ROFA, ROFA with Rotamix, and optimization of the low NO_X burners with overfire air system for 30 year lifetimes. Though some of the more stringent control technologies for NO_X (such as ROFA with Rotamix) and for SO_2 (such as DSI optimization), are reasonable in terms of cost effectiveness, the incremental visibility improvement achievable with these technologies, over the BART limits determined by ADEC for Healy Unit 1, are relatively small. For example, ROFA with Rotamix is estimated to result in just 0.166 dv more visibility improvement than that which is expected to result from SNCR, and DSI optimization may possibly improve visibility by just 0.25 dv. The incremental visibility improvement at Denali National Park for SCR over SNCR is only about 0.17 dv. EPA agrees with the State that the additional cost of SCR over SNCR is not justified at this facility by the relatively small incremental improvement in visibility.

Comment: A commenter asserts that even though a NO_X emissions limit of 0.19 lb/mmBtu is far too high to be BART for Healy Unit 1, EPA did not provide adequate justification for using a 0.20 lb/mmBtu emissions limit instead of 0.19 lb/mmBtu. The commenter states that Alaska found that SNCR could achieve a 0.19 lb/mmBtu emission limit at Healy, but then allowed a 5% higher emission rate for ''operating variability'' and that EPA accepted this determination without further analysis. There is no data showing that this need for variability necessarily exists, and furthermore, neither Alaska nor EPA conducted a visibility analysis based on the 0.20 lb/mmBtu emission limit.

Response: In the proposal, EPA explained that the State's basis for setting the NO_X limit at 0.20 lb/mmBtu rather than 0.19 lb/mmBtu was GVEA's analysis of 5 years of 30 day rolling average NO_X and SO_2 emissions from Unit 1. Based on this data, the State determined that the small increase would appropriately allow for operational flexibility. 77 FR 11034, February 24, 2012. EPA found that a 5% increase in NO_X emissions over the 0.19 lb/mmBtu achievable with SNCR, to allow for operational variability of Healy Unit 1, is reasonable and EPA has decided that the State's determination to set the NO_X limit at 0.20 lb/mmBtu is approvable.

Comment: The comment states that ROFA would achieve a 0.66 dv incremental visibility improvement over the improvement associated with SNCR at Healy 1. EPA cannot dismiss a cost-effective improvement greater than the improvement it proposes to accept. Also, EPA improperly rejected ROFA with Rotamix as BART based on an unclear relationship between NO_X and CO, CO_2 and PM emissions.

Response: EPA disagrees with the comment regarding the incremental visibility improvement between SNCR and ROFA. The SIP submittal indicates that the incremental visibility improvement expected to result from ROFA compared to SNCR would only be 0.049 dv, and ROFA with Rotamix compared to SNCR to be just 0.116 dv. See Table 8–1 of Appendix III.K.6 of the SIP submittal. EPA regards the small incremental visibility improvements from ROFA or ROFA with Rotamix as insufficient to justify the increased cost of either technology, regardless of the risk of additional collateral pollutant (CO, CO_2, and PM) emission increases.

Comment: GVEA agrees with Alaska and EPA that the BART process results in an emissions limit for NO_X based on the limit that can be achieved with SNCR, and that SCR would not be cost effective.

Response: As explained above, the State's conclusion regarding the BART limit for Healy Unit 1 is reasonable. In this action EPA is approving Alaska's determination that the NO_X BART emission limit for Healy Unit 1 is 0.20 lb/mmBtu.

Comment: EPA proposed that the current sulfur dioxide emissions limit of 0.30 lb/mmBtu is BART. EPA erroneously rejected optimization of the DSI system, which could achieve a 0.18 lb/mmBtu emission limit. This lower emissions limit would result in significant reduction in sulfur dioxide emissions and greatly improve visibility at Denali. EPA found that DSI optimization is cost-effective; however, it rejected this more stringent limit based on its concerns about a ''brown plume'' effect. The commenter further asserts there is no demonstration that the rapid conversion to NO_2 nearer the source will make any difference to the visibility in Denali. It is improper for EPA to dismiss this control possibility based on anecdotal evidence, which is not even linked to plant-specific characteristics present at Healy. The comment suggests that a short term pilot study be made part of the SIP to test the relationship between mercury emissions and sorbent injection rates.

Response: For the reasons explained in the SIP submittal and summarized in the proposal, after considering all the BART factors, the State's BART analysis for SO_2 at Healy Unit 1 found that the current DSI control technology with a limit of 0.30 lb/mmBtu is BART for SO_2. The State's analysis found that increased sorbent injection, at a cost of \$3578/ton of SO_2 removed would result in a potential visibility improvement of 0.25 dv but could also cause a visibility impairing brown plume which would interfere with rather than improve visibility in the nearby Denali National Park. EPA does not consider this

amount of potential improvement in visibility achievable by optimizing the existing DSI system when coupled with the potential for brown plume to provide sufficient basis to disapprove the State's SO_2 BART determination for Healy Unit 1.

The State retains the ability to consider requiring a pilot study in the future. The results of such a study, along with available information to better evaluate the potential for brown plume, could be used to further evaluate optimizing DSI as potential control technology when the State evaluates reasonable progress in the next planning period for regional haze. The other SO_2 control options analyzed, a spray dryer and wet limestone flue gas desulfurization, were considered not cost effective. See 77 FR 11034, February 24, 2012. Given these considerations, EPA has decided that the State's SO_2 BART determination for Healy Unit 1 is reasonable.

Comment: One commenter suggested that the effectiveness of a Lime Spray Dryer (LSD) was underestimated and recommended that EPA require GVEA to evaluate the LSD SO_2 treatment technology with plume reheat to see if the efficiency of the existing DSI system can be increased.

Response: EPA does not believe this further analysis is required. Plume reheat would require additional fuel combustion. This would increase CO2 emissions and add to the costs of a wet scrubbing control system.

B. Comments Related to the State's Reasonable Progress Demonstration and Healy Unit 2

A number of comments were received regarding the State's analysis of future sources that may impact visibility in Denali National Park. The commenters were particularly concerned with the emissions associated with Healy Unit 2 and contend its emissions should have been included in the State's reasonable progress and long term strategy analysis and determinations.

Comment: Commenters claim that, in general, the SIP does little to address additional emissions that are reasonably foreseeable. A number of industrial developments are currently moving forward in the Denali region, and are not even mentioned in Alaska's SIP. At a minimum, the SIP should address how it will deal with future emissions and construction activities occurring prior to the SIP's next review phase that would affect Denali's Class I Airshed. The commenters state that it is not prudent to delay this planning to the future.

Response: Contrary to the comments, the State in its SIP did account for future growth in emissions from industrial sources through 2018 by considering and evaluating population growth factors. The State used population projections compiled by the Alaska Department of Labor and Workforce Development (DOLWD) at five-year intervals through 2030 by individual borough and census areas to grow 2002 baseline activity to 2018 for most of the source categories. In addition, emission factors specific to calendar year 2018 were also developed for stationary point sources affected by regulatory control programs and technology improvements. The SIP submittal does not consider emissions from specific industrial projects that are planned for the future, or permitted point sources that are not currently operating but which may be in operation in 2018. Emissions from any such point sources will be considered and evaluated in future updates to the Alaska Regional Haze plan as they come into operation. A full description of the emission sources included in the 2018 projected inventory can be found in section III.K.5 of the SIP submittal.

Comment: Multiple commenters claim that the failure to account for emissions from Healy Unit 2 results in an inaccurate conclusion that the State is on the ''glide path'' to achieving its reasonable progress goals. Alaska failed to include Healy Unit 2 in its reasonable progress analysis, a facility which is projected to come on line in the near term, and that because Unit 2 is in the same footprint as Healy Unit 1 its emissions may prevent reasonable progress at Denali. The commenters assert that EPA must issue adequate emission limits for Healy Unit 2 to ensure reasonable progress not be thwarted by anticipated haze causing emissions.

Response: EPA recognizes that the Alaska Regional Haze SIP submittal does not address future emissions from Healy Unit 2 and that if, or when, it begins operating its emissions could influence Alaska's ability to achieve their reasonable progress goals. As explained above, Healy Unit 2, was originally permitted in 1994, operated briefly for testing in the late 1990's and has not operated at all since December 1999. It is a 50 MW non-BART unit. Unit 2 was not operating during the baseline period and its emissions were not included in the State's baseline emissions inventory. Recently, as further explained in the proposal, ADEC issued a renewed Title 5 permit to GVEA allowing future operation at Unit 2. However its future emissions have not been modeled and its potential visibility impact have not been determined at this time. 77 FR 11036, February 24, 2012. The Unit is still not operating. In the proposal, EPA indicated that it would consider additional relevant information it receives during public comment period regarding the emissions or visibility impact of this source as it relates to Alaska's reasonable progress goals. We did not receive additional specific information regarding Healy Unit 2 emissions or its future visibility impacts. The potential emissions for Healy Unit 2 have not been modeled therefore we cannot accurately assess the Unit's potential future visibility impacts.

In its SIP submittal, should Unit 2 be restarted, Alaska has committed to reassess the need for further control on the source during the five-year review to determine whether additional emission reductions would improve visibility in Class I areas in the next planning period. Thus, more specifically, in order to determine the affect of any such emissions from Healy Unit 2 on the glide path, the State will need to assess its emissions in future reasonable progress evaluations conducted pursuant to 40 CFR 51.308(g).

Additionally, EPA notes that the *U.S.* v. *GVEA and AIDEA* consent decree acknowledges that the anticipated operation of Unit 2 could be viewed as the operation of a new source and imposes additional enforceable requirements on Unit 2 that go beyond the Regional Haze SIP requirements. As described more fully above, pursuant to the consent decree, GVEA is subject to SCR installation requirements, strict NO_X emission limits and associated monitoring recordkeeping and reporting requirements. Additionally, the consent decree establishes declining NO_X emission limitations for both Unit 1 and Unit 2. Its emissions will be well controlled. It is unlikely that even if the State were to include the future emissions from Healy Unit 2 in its reasonable progress analysis that controls beyond those required under the consent decree would be necessary under the reasonable progress provisions in the regional haze rule.

In consideration of a number of factors including the current non-operational status of Healy Unit 2, the uncertainty of its future emissions, the State's commitment to assess its emissions during the 5-year review and the enforceable terms and conditions in the *U.S.* v. *GVEA and AIDEA* consent decree, EPA approves Alaska's treatment of Healy Unit 2 in its reasonable progress determination as proposed.

Comment: GVEA agrees with Alaska and EPA that the exact amount of impact from any operation of Healy Unit 2 cannot be determined at this time and that it is not reasonable to require additional controls on Healy Unit 2. However, GVEA does not agree with the State's assumption that it will necessarily have to ''consider'' Healy Unit 2 in its reasonable progress evaluation.

Response: As explained above, Alaska has committed to assess emissions from Healy Unit 2 in the reasonable progress evaluation in its 5-year assessment and in its 2018 Regional Haze SIP submittal. Given the location of Healy Unit 2, EPA believes that Alaska's commitment is not only appropriate but is necessary to ensure reasonable progress. EPA is approving Alaska's treatment of Healy Unit 2 in its reasonable progress determination as proposed.

Comment: Alaska's LTS fails to satisfy obligations under the Regional Haze Rule toward achieving natural visibility conditions at Denali. The Clean Air Act requires states to submit implementation plans that ''contain such emission limits, schedules of compliance and other measures as may be necessary to make reasonable progress toward meeting the national goal'' of achieving natural visibility conditions at all Class I Areas.

Response: In developing a LTS, the Regional Haze Rule requires that states address six topics: (1) Ongoing Air Pollution Control Programs, (2) Measures to Mitigate Impacts of Construction Activities, (3) Emission Limitations and Schedules for Compliance, (4) Source Retirement and Replacement Schedules, (5) Smoke Management Techniques for Agricultural and Forestry Burning, and (6) Enforceability of Emission Limitations and Control Measures. In its proposed rulemaking, EPA found that the Alaska Regional Haze SIP submittal adequately addressed all six topics, and proposed to find that the LTS as a whole provided sufficient measures to ensure that Alaska will meet its emission reduction obligations.

According to ADEC's reasonable progress analysis, there is no statistically significant difference between the visibility improvement predicted by the Weighted Emission Potential (WEP) analysis for 2018 and the 2018 visibility target needed to achieve the uniform rate of progress (URP) to meet natural visibility conditions by 2064 for each Alaska Class I area. ADEC reached this conclusion by showing that the WEP results for 2018 fall within the 95 percent confidence limits of the 2018 visibility goal for each Class I area. See Section 9.E of the SIP submission. EPA believes that the reasonable progress goals established by Alaska for its Class I areas are reasonable. EPA finds that controls identified in the submittal, including the elements identified in the LTS portion of the Alaska Regional Haze SIP, along with additional controls on Healy Unit 2 required as a result of the consent decree, will provide reasonable progress towards attaining the goal of achieving natural visibility conditions in Alaska's Class I areas by 2064.

C. General Comments Regarding Visibility and Air Quality in Alaska

EPA also received a number of general comments on a range of topics including the purpose of the Clean Air Act, the need to protect the visibility in Denali National Park, the impact of pollution on public health, the importance of visibility to tourism in Alaska, motoring techniques and coal combustion and other generalized concerns or comments.

Comment: EPA received numerous comments asking EPA to ensure clean air in Denali National Park, Fairbanks, Anchorage, and throughout the region, and asking EPA to strengthen Alaska's regional haze plan.

Response: EPA's final action in this rulemaking to approve Alaska's Regional Haze SIP will result in cleaner air in Denali National Park and throughout the region by placing stricter emission limits on sources that contribute to regional haze. The objective of the regional haze program is to improve and protect visibility in national parks and wilderness areas through successive 10-year regional haze plans developed by the states. The Alaska Regional Haze plan, as approved in this action, establishes emission limits, through BART. For instance, Healy Unit 1 will have new NOx emission limits that are expected to result in a significant improvement in visibility in Denali National Park. The combined effect of all of the elements in the State's long term strategy that were described in the NPR, including the emission limits established for Healy, will result in improved visibility in Denali National Park, and cleaner air throughout the region.

Comment: EPA received numerous comments on the health effects, primarily asthma, that are associated with air pollution, and urged EPA to place tighter controls on sources of air pollution in Alaska.

Response: We appreciate the commenters' concerns regarding the potential adverse health effects of air pollution. We agree that the same emissions that cause visibility impairment can also cause respiratory problems, such as decreased lung function, aggravated asthma, and bronchitis. Although our action addresses visibility impairment, we note that there is the potential for improvements in human health through reductions in regional concentrations of visibility impairing pollutants.

Comment: We received a few comments saying that the purpose of the Clean Air Act is to protect our nation's air quality, especially at special places like Denali, the only national park in Alaska classified as a Class 1 area. These comments urged EPA not to allow air quality to degrade in the Denali National Park Class I area. We also received comments urging EPA to preserve the views at Denali National Park, and to ensure that tourism to pristine areas in Alaska is not adversely impacted by regional haze. Additional comments were submitted stating that Healy Units 1 and 2 are less than five miles from Denali, and are not being required to reduce emission enough to significantly decrease their visibility impacts on the park. These comments stated that modern and effective controls should be required to stem the haze pollution from Healy Unit 1 and Unit 2.

Response: EPA agrees that it is important to reduce the visibility and health impacts from man-made pollution at the Federal Class I Areas, such as Denali National Park. EPA's approval of Alaska's Regional Haze SIP will result in significant reductions in emissions and improvement in visibility in the State. This represents only the first step towards meeting the national goal of natural conditions in federal Class I Areas. The State's actions being approved in this rulemaking are the first in a series of actions that will be taken over the next several decades to improve visibility in Alaska Class I areas.

EPA also recognizes the role that protecting visibility in national parks and wilderness areas in Alaska has to tourism throughout the state. Reducing regional haze will help ensure that views in these parks and wilderness areas are preserved, and will continue to support tourism. We also appreciate the concern regarding Healy's proximity to Denali National Park. With approval of the State's BART determination for Healy, and as a result of the enforceable terms and conditions in the *U.S.* v. *GVEA and AIDEA* consent decree, the facility will be subject to modern and effective pollution control requirements and its emissions will be reduced. Additionally, the State will continue to

assess its control strategies and visibility goals in future regional haze reviews. Additional more detailed responses to comments regarding controls on the Healy Power Plant are addressed above.

Comment: We received a comment regarding the Denali IMPROVE monitoring site. The commenter stated that while it appears that the Alaska Regional Haze SIP submittal equally considers data from both the Denali Headquarters and Trapper Creek monitoring sites, it does not explicitly state that this is the case. The SIP submittal describes the Denali Headquarters IMPROVE site as now a ''protocol site'' but does not define the difference between a protocol and primary site, or whether data from a primary site would be given preference over a protocol site. Monitoring pollutants affecting visibility in Denali should not only consider pollutant information south of the Alaska Range, but pollutants from nearby major sources such as the Healy Power Plant, and sources in the Fairbanks area and both sites should be given equal consideration in the future.

Response: According to the information on the national IMPROVE Web site (*http://vista.cira.colostate.edu/improve/Overview/IMPROVENetworkExp.htm*), the Denali Headquarters site was designated as the ''IMPROVE'' site, and the Trapper Creek site was designated as a ''protocol'' site when the IMPROVE network was expanded in 2002. EPA agrees with these designations, and also agrees that data from both the Denali Headquarters site and the Trapper Creek site should be used by Alaska to determine future progress toward visibility improvement goals in Denali National Park.

Comment: One commenter recommended that a more refined, receptor-by-receptor modeling analysis be conducted throughout Denali National Park to determine if visibility improvements greater than those predicted by GVEA for the Healy Unit 1 would be found.

Response: GVEA used the CALPUFF model to estimate the visibility impacts of Healy Unit 1 on Denali National Park. Alaska found that the CALPUFF modeling methods and related model input options used by GVEA were consistent with the WRAP CALPUFF modeling protocol and related BART guidance. The receptors used in the CALPUFF modeling were placed at uniform receptor spacing along the boundary and in the interior of Denali National Park, and were based on the National Park Service database for Class I area modeling receptors, found at: (*http://www2.nature.nps.gov/air/maps/Receptors/index.cfm*).

EPA believes that the modeling approach taken to determine visibility impacts from Healy Unit 1 is consistent with the BART modeling guidance and does not believe that including additional receptors in the CALPUFF modeling runs would have identified any greater visibility improvements for any given emission limits than those identified in the GVEA modeling results.

Comment: GVEA commented regarding the contributions from wildfires and out of State sources and supported the finding that natural wildfires inside Alaska are the primary contributors to regional haze at Denali National Park. GVEA also submits that the sources outside and upwind of Alaska are significant contributors to visibility impairment, and if visibility is not improving as planned, the monitoring data should be evaluated to quantify not only the impacts from natural wildfires, but from the out-of-state, upwind air pollution as well.

Response: The Alaska Regional Haze SIP submittal identifies organic carbon emissions from natural wildfires as the primary contributor to visibility impairment on the 20% worst days in Denali National Park. More specifically, the WEP analysis used by Alaska found that approximately 97% of the fine particulates causing visibility impairment on the 20% worst days in Denali National Park were composed of organic carbon from natural fires. Alaska will also review monitoring data prior to the five-year SIP update to determine progress towards the 2018 visibility goals in each Class I area. Alaska may decide at that time if additional source controls are necessary to achieve the 2018 goals. In addition, Alaska will undertake a comprehensive review of control strategies and visibility goals every 10 years. These subsequent reviews will evaluate whether this assessment of the dominance of fire continues to be the case.

Comment: EPA received numerous comments that emissions from coal combustion have impacts on visibility, human health, salmon, and climate change through emissions of carbon dioxide. The comments urged EPA to hold Alaska coal combustion sources, particularly utilities, to the highest emission standards with the most modern pollution control technology.

Response: The primary emission control action pertaining to coal-fired power plants taken in this final action is to establish BART emission limits on Healy Unit 1. The emission reductions achieved through BART for Healy Unit 1 will result in a decrease of nitrogen oxides emissions from 0.28 lb/mmBtu to 0.20 lb/mmBtu. Additionally it is noteworthy that, additional reductions in NOx, SO_2 and PM emissions will be achieved through the emission limits on Healy Unit 1 and Unit 2 set forth in the *US* v. *GVEA and AIDEA* consent decree discussed above.

Comment: A comment contends that it is unclear whether this SIP fully reviews and addresses all options for control of anthropogenic pollutants that impair visibility in Denali's Class I airshed. For example, while the SIP references coal combustion as a source of Organic Matter Carbon (OMC) and Elemental Carbon (EC), it attributes all OMC and EC in the Denali region to wildfires. Considering that OMC and EC are present year-round, it's unclear why the state has avoided mention of OMC and EC's relationship to the Healy Power Plant and combustion related to power generation and home heating in and near the Denali Borough. This SIP should acknowledge the presence of OMC and EC from anthropogenic sources in and near the Denali Borough (and within the state), and should consider methods to control OMC and EC pollutants related to anthropogenic sources.

Response: As explained in the SIP submittal Chapter III.K.4 of the SIP, the major sources of OMC in Alaska are wildland fires (forest, wetland, and tundra) and biogenic aerosols produced by natural vegetation, and that wildfires in Alaska occur mostly during the May-August fire season. The SIP submittal also states that in Alaska, severe wildfires create a significant amount of EC, and that there is significant amount of elemental carbon aerosols reaching the state from Asia and Europe. Chapter III.K.4 of the SIP submittal also explains that wildfire-related OMC is the largest contributor of fine particulates on the 20% worst days at the Denali IMPROVE sites, particularly during the spring and summer months. Table III.K.7–1 of the SIP summarizes the Weighted Emission Potential (WEP) analysis results from the top three boroughs for each pollutant on the 20% worst days in Denali. This table shows that approximately 97% of the fine particulates (which includes particulates composed of OMC and EC) on the 20% worst visibility days at Denali National Park are due to natural fires in the Yukon Koyukuk, Southeast Fairbanks, and the Fairbanks North Star boroughs. The WEP analysis used by Alaska was developed by the WRAP as a screening tool for states to decide which source regions have the potential

to contribute to haze formation at specific Class I areas. This method does not account for chemistry and removal processes in the atmosphere. Instead, the WEP analysis relies on an integration of gridded emissions data, meteorological back trajectory residence time data, a one-over-distance factor to approximate deposition and dispersion, and a normalization of the final results. The gridded emission data used by Alaska was consolidated into the following sources categories: Commercial marine vessels, natural fires, non-road mobile, on-road mobile, point, and stationary area sources. Therefore, the WEP analysis identified the OMC and EC contribution from the above man-made source categories, but was not able to determine the contribution of any single point source, such as the Healy Power Plant, or a subcategory of an area source, such as home heating sources. So while the SIP submission does not specifically identify the contribution of coal-combustion sources to visibility impairment in Denali National Park, it does demonstrate that wildfires are the major source of $PM_{2.5}$ in the State, that wildfires have the greatest potential to impact visibility in Denali, and that wildfires are the major source of OMC on the worst visibility days in Denali National Park. Alaska may choose to use a more sophisticated chemical-speciation tracer analysis, such as the PM Source Apportionment Technology (PSAT) analysis developed by the WRAP (see the WRAP TSD, Chapter 6A), in the future to determine the contributions from specific point sources or subcategories of sources.

Comment: There were a few comments on topics not related to the proposal. These included comments regarding the regulation of mining activities in Alaska and mercury monitoring in Alaska.

Response: These comments may be important topics for discussion but they are not related to the proposed action.

Comment: We also received a comment urging the use of alternative forms of energy, such as reducing emissions from motor vehicles by shifting to alcohol fuels.

Response: The State has the option of pursuing cleaner forms of alternative energy to reduce emissions that cause regional haze in its Class I areas. Alaska decided not to implement the use of renewable energy in this Regional Haze SIP but may chose to do so in future SIPs.

Comment: ADEC commented that it appreciates EPA's thorough review of the Regional Haze SIP submittal and supports EPA's action to approve the plan and encouraged EPA to finalize its approval of the Alaska Regional Haze SIP as meeting the requirements of the Clean Air Act, Sections 169A and 169B, and the federal Regulations at 40 CFR 51.308.

Response: EPA appreciates this comment supporting our proposed action.

III. Final Action

EPA is approving the Alaska Regional Haze plan, submitted on April 4, 2011, as meeting the requirements set forth in sections 169A and 169B of the Act and in 40 CFR 51.308 regarding Regional Haze. In this action, EPA is approving all provisions of Alaska's Regional Haze SIP submission, including the requirements for the calculation of baseline and natural visibility conditions, statewide inventory of visibility-impairing pollutants, best available retrofit technology (BART), Reasonable Progress Goals (RPGs), and Long-Term Strategy (LTS). Additionally, EPA is approving the Alaska Department of Environmental Conservation Best Available Retrofit Technology regulations at 18 AAC 50.260, and amendments to 18 AAC 50.030 which adopts by reference Volume II, Section III.F. Open Burning; and Volume II, Section III.K. Area Wide Pollution Control Program for Regional Haze.

IV. Statutory and Executive Orders Review

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this action is not a ''significant regulatory action'' and therefore is not subject to review by the Office of Management and Budget. For this reason, this action is also not subject to Executive Order 13211, ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use'' (66 FR 28355, May 22, 2001). This action merely approves state law as meeting Federal requirements and imposes no additional requirements beyond those imposed by state law. Accordingly, the Administrator certifies that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Because this rule approves pre-existing requirements under state law and does not impose any additional enforceable duty beyond that required by state law, it does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4).

In addition, this rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the rule neither imposes substantial direct compliance costs on tribal governments, nor preempts tribal law. Therefore, the requirements of section 5(b) and 5(c) of the Executive Order do not apply to this rule. Consistent with EPA policy, EPA nonetheless provided a consultation opportunity to Tribes in Alaska located near the affected Class I areas in letters dated December 30, 2011. EPA received no requests for consultation in response to these letters.

This action also does not have Federalism implications because it does not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999). This action merely approves a state rule implementing a Federal standard, and does not alter the relationship or the distribution of power and responsibilities established in the CAA. This rule also is not subject to Executive Order 13045 ''Protection of Children from Environmental Health Risks and Safety Risks'' (62 FR 19885, April 23, 1997), because it approves a state rule implementing a Federal standard.

In reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. In this context, in the absence of a prior existing requirement for the State to use voluntary consensus standards (VCS), EPA has no authority to disapprove a SIP submission for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews a SIP submission, to use VCS in place of a SIP submission that otherwise satisfies the provisions of the CAA. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. This rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

The Congressional Review Act, 5 U.S.C. section 801 *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report

containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. section 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by April 15, 2013. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2))

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Visibility, and Volatile organic compounds.

Dated: November 15, 2012.

Dennis J. McLerran,

Regional Administrator, Region 10.

Part 52, chapter I, title 40 of the Code of Federal Regulations is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for Part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 et seq.

Subpart C—Alaska

■ 2. Section 52.70 is amended by adding paragraph (c)(41) to read as follows:

§ 52.70 Identification of plan.

* * * * *

(c) * * *

(41) On April 4, 2011, the Alaska Department of Environmental Conservation submitted a SIP revision to meet the regional haze requirements of Clean Air Act sections 169A and 169B, and Federal Regulations 40 CFR 51.308, to implement a regional haze program in the State of Alaska for the first planning period through July 31, 2018.

(i) Incorporation by reference.

(A) The following revised section of the Alaska Administrative Rules: Alaska Department of Environmental Conservation, 18 AAC 50.260, ''Guidelines for Best Available Retrofit Technology under the Regional Haze Rule'', state effective date December 30, 2007.

(ii) Additional material.

(A) The following section of ADEC's air quality control regulations: 18 AAC 50.030 State Air Quality Control Plan; state effective date February 11, 2011; Volume II, Section III. F. Open Burning; and Volume II, Section III. K. Area Wide Pollution Control Program for Regional Haze.

■ 3. Section 52.73 is amended by adding paragraph (g) to read as follows:

§ 52.73 Approval of plans.

* * * * *

(g) *Visibility protection.* (1) EPA approves the Regional Haze SIP revision submitted by the Alaska Department of Environmental Conservation on April 4, 2011, as meeting the requirements of Clean Air Act sections 169A and 169B, and Federal Regulations 40 CFR 51.308 to implement a regional haze program in the State of Alaska for the first planning period through July 31, 2018.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R09–OAR–2013–0064; FRL–9777–8]

Interim Final Determination To Stay and Defer Sanctions, Sacramento Metropolitan Air Quality Management District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Interim final rule.

SUMMARY: EPA is making an interim final determination to stay the imposition of offset sanctions and to defer the imposition of highway sanctions based on a proposed approval of a revision to the Sacramento Metropolitan Air Quality Management District (SMAQMD or District) portion of the California State Implementation Plan (SIP) published elsewhere in this **Federal Register**. The SIP revision concerns two permitting rules submitted by the SMAQMD: Rule 214, *Federal New Source Review,* and Rule 217, *Public Notice Requirements for Permits*.

DATES: This interim final determination is effective on February 14, 2013. However, comments will be accepted until March 18, 2013.

ADDRESSES: Submit comments, identified by docket number EPA–R09–OAR–2013–0064, by one of the following methods:

1. *Federal eRulemaking Portal: http://www.regulations.gov*. Follow the on-line instructions.
2. Email: *R9airpermits@epa.gov*.
3. *Mail or deliver:* Gerardo Rios (Air-3), U.S. Environmental Protection Agency Region IX, 75 Hawthorne Street, San Francisco, CA 94105–3901.

Instructions: All comments will be included in the public docket without change and may be made available online at *http://www.regulations.gov,* including any personal information provided, unless the comment includes Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Information that you consider CBI or otherwise protected should be clearly identified as such and should not be submitted through *http://www.regulations.gov* or email. *http://www.regulations.gov* is an ''anonymous access'' system, and EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send email directly to EPA, your email address will be automatically captured and included as part of the public comment. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

Docket: Generally, documents in the docket for this action are available electronically at *http://www.regulations.gov* and in hard copy at EPA Region IX, 75 Hawthorne Street, San Francisco, California. While all documents in the docket are listed at *http://www.regulations.gov,* some information may be publicly available only at the hard copy location (e.g., copyrighted material, large maps), and some may not be publicly available in either location (e.g., CBI). To inspect the hard copy materials, please schedule an appointment during normal business hours with the contact listed in the **FOR FURTHER INFORMATION CONTACT** section.

FOR FURTHER INFORMATION CONTACT: Laura Yannayon, EPA Region IX, (415) 972–3534, *yannayon.laura@epa.gov*.

SUPPLEMENTARY INFORMATION: Throughout this document, ''we,'' ''us'' and ''our'' refer to EPA.

I. Background

On July 20, 2011 (76 FR 43183), we published a limited approval and limited disapproval of SMAQMD Rule 214 as adopted locally on October 28,

2010 and submitted by the State on December 7, 2010. We based our limited disapproval action on certain deficiencies in the submitted rule. This disapproval action started a sanctions clock for imposition of offset sanctions 18 months after August 19, 2011 and highway sanctions 6 months later, pursuant to section 179 of the Clean Air Act (CAA) and our regulations at 40 CFR 52.31. Under 40 CFR 52.31(d)(1), offset sanctions apply eighteen months after the effective date of a disapproval and highway sanctions apply six months after the offset sanctions, unless we determine that the deficiencies forming the basis of the disapproval have been corrected.

On August 23, 2012, SMAQMD adopted an amended version of Rule 214, which was intended to correct the deficiencies identified in our July 20, 2011 limited approval and limited disapproval action. On September 26, 2012, the State submitted this amended rule to EPA. In the Proposed Rules section of today's **Federal Register**, we are proposing to fully approve this rule because we believe it corrects the deficiencies identified in our July 20, 2011 disapproval action. Based on today's proposed approval, we are taking this final rulemaking action, effective on publication, to stay the imposition of the offset sanctions and to defer the imposition of the highway sanctions that were triggered by our July 20, 2011 limited disapproval.

EPA is providing the public with an opportunity to comment on this stay/deferral of sanctions. If comments are submitted that change our assessment described in this final determination and our proposed full approval of amended SMAQMD Rule 214, we intend to take subsequent final action to reimpose sanctions pursuant to 40 CFR 52.31(d). If no comments are submitted that change our assessment, then all sanctions and sanction clocks will be permanently terminated on the effective date of a final rule approval.

II. EPA Action

We are making an interim final determination to stay the imposition of the offset sanctions and to defer the imposition of the highway sanctions associated with SMAQMD Rule 214 (as adopted 2010) based on our concurrent proposal to approve the State's SIP revision as correcting the deficiencies that initiated sanctions.

Because EPA has preliminarily determined that the State has corrected the deficiencies identified in EPA's limited disapproval action, relief from sanctions should be provided as quickly as possible. Therefore, EPA is invoking the good cause exception under the Administrative Procedure Act (APA) in not providing an opportunity for comment before this action takes effect (5 U.S.C. 553(b)(3)). However, by this action EPA is providing the public with a chance to comment on EPA's determination after the effective date, and EPA will consider any comments received in determining whether to reverse such action.

EPA believes that notice-and-comment rulemaking before the effective date of this action is impracticable and contrary to the public interest. EPA has reviewed the State's submittal and, through its proposed action, is indicating that it is more likely than not that the State has corrected the deficiencies that started the sanctions clocks. Therefore, it is not in the public interest to initially impose sanctions or to keep applied sanctions in place when the State has most likely done all it can to correct the deficiencies that triggered the sanctions clocks. Moreover, it would be impracticable to go through notice-and-comment rulemaking on a finding that the State has corrected the deficiencies prior to the rulemaking approving the State's submittal. Therefore, EPA believes that it is necessary to use the interim final rulemaking process to stay and defer sanctions while EPA completes its rulemaking process on the approvability of the State's submittal. Moreover, with respect to the effective date of this action, EPA is invoking the good cause exception to the 30-day notice requirement of the APA because the purpose of this notice is to relieve a restriction (5 U.S.C. 553(d)(1)).

III. Statutory and Executive Order Reviews

This action stays and defers Federal sanctions and imposes no additional requirements.

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this action is not a ''significant regulatory action'' and therefore is not subject to review by the Office of Management and Budget.

This action is not subject to Executive Order 13211, ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use'' (66 FR 28355, May 22, 2001) because it is not a significant regulatory action.

The administrator certifies that this action will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. § 601 *et seq.*).

This rule does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4).

This rule does not have tribal implications because it will not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal government and Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes, as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

This action does not have Federalism implications because it does not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999).

This rule is not subject to Executive Order 13045, ''Protection of Children from Environmental Health Risks and Safety Risks'' (62 FR 19885, April 23, 1997), because it is not economically significant.

The requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272) do not apply to this rule because it imposes no standards.

This rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

The Congressional Review Act, 5 U.S.C. 801 *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report to Congress and the Comptroller General. However, section 808 provides that any rule for which the issuing agency for good cause finds that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest, shall take effect at such time as the agency promulgating the rule determines. 5 U.S.C. 808(2). EPA has made such a good cause finding, including the reasons therefore, and established an effective date of February 14, 2013. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This rule is not a ''major rule'' as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States

Court of Appeals for the appropriate circuit by April 15, 2013. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purpose of judicial review nor does it extend the time within which petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements (see section 307(b)(2)).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental regulations, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements.

Dated: January 29, 2013.

Jared Blumenfeld,

Regional Administrator, Region IX.

BILLING CODE 6560–50–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 648

[Docket No. 120109034–2171–01]

RIN 0648–XC456

Fisheries of the Northeastern United States; Northeast Multispecies Fishery; Trip Limit Adjustments for the Common Pool Fishery

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; inseason adjustment of landing limits.

SUMMARY: This temporary rule increases the possession limits for Georges Bank cod, Gulf of Maine cod, and Southern New England/Mid-Atlantic yellowtail flounder for Northeast multispecies common pool vessels for the remainder of the 2012 fishing year. This rule also decreases the trip limits for white hake and pollock. This is intended to facilitate the harvest of Georges Bank cod, Gulf of Maine cod, and Southern New England/Mid-Atlantic yellowtail flounder to allow the total catch of these stocks to approach their pertinent common pool sub-annual catch limits sub-annual catch limits and prevent the overharvest of the white hake and pollock sub-annual catch limits.

DATES: Effective February 11, 2013, through April 30, 2013.

FOR FURTHER INFORMATION CONTACT: Brett Alger, Fisheries Management Specialist, 978–675–2153, Fax 978–281–9135.

SUPPLEMENTARY INFORMATION: Regulations governing the Northeast (NE) multispecies fishery are found at 50 CFR part 648, subpart F. The regulations at § 648.86(o) authorize the NE Regional Administrator (RA) to adjust the possession limits for common pool vessels in order to optimize the harvest of NE regulated multispecies by preventing the overharvest or underharvest of the pertinent common pool sub-annual catch limits (ACLs). As of January 30, 2013, Gulf of Maine (GOM) cod, Georges Bank (GB) cod, and Southern New England (SNE)/Mid-Atlatnic (MA) yellowtail flounder catch is well below their respective quotas, and conversely, catch of white hake and pollock is relatively high with approximately 3 months remaining in fishing year (FY) 2012. Table 1 includes the common pool sub-ACL for each stock affected by this action and the amount that has been caught as of February 7, 2013.

TABLE 1—SUB-ACLS AND CURRENT CATCH OF FIVE NE MULTISPECIES STOCKS IN THE COMMON POOL

	Sub-ACL (lb)	Sub-ACL (mt)	Percent harvested
GOM Cod	176,414	80	35.5
GB Cod	179,489	81	20.3
SNE/MA Yellowtail Flounder	338,099	153	6.1
White Hake	57,896	26	88.7
Pollock	180,323	82	77.8

Framework Adjustment 47 (FW 47) to the NE Multispecies Fishery Management Plan (FMP) established the current trip limits for the common pool vessels fishing under a Category A day-at-sea (DAS) (77 FR 26104). Since then, there have been no adjustments to any trip limits for any common pool vessels. Table 2 contains the current landing limit and the new landing limit being implemented by this action.

TABLE 2—THE CURRENT AND NEW TRIP LIMITS FOR FIVE NE MULTISPECIES STOCKS IN THE COMMON POOL

	Current DAS limit	New DAS limit
GOM Cod	650 lb (294.8 kg) per DAS up to 2,000 lb (907.2 kg) per trip.	2,000 lb (907.2 kg) per DAS up to 6,000 lb (2,721 kg) per trip.
GB Cod	2,000 lb (907.2 kg) per DAS up to 20,000 lb (9,072 kg) per trip.	3,000 lb (1,361 kg) per DAS up to 30,000 lb (13,608 kg) per trip.
SNE/MA Yellowtail Flounder	1,500 lb (680.4 kg) per DAS up to 4,500 lb (2,041 kg) per trip.	5,000 lb (2,268 kg) per DAS up to 15,000 lb (6,804 kg) per trip.
White Hake	1,500 lb (680.4 kg) per trip	500 lb (226.8 kg) per trip.
Pollock	Unlimited	10,000 lb (4,536 kg) per trip.

The regulations require that the Handgear B (HB) trip limit for GOM and GB cod be adjusted proportionally (rounded up to the nearest 25 lb (11.3 kg)) if either the GOM or GB cod trip limit applicable to a vessel fishing

under a NE multispecies DAS permit is adjusted. Under the NE Multispecies FMP, the initial GOM cod trip limits for NE multispecies common pool vessels fishing under a Category A DAS is set at 800 lb (362.9 kg) per DAS. However, FY 2012 began with a GOM cod trip limit of 650 lb (294.8 kg) per DAS, as implemented through FW 47, due to a reduced GOM cod sub-ACL for the common pool. Ultimately, the HB trip limit for GOM cod is adjusted according to trip limit in the FMP (i.e., 800 lb (362.9 kg) per DAS), not what was set under FW 47. For GB cod, the FMP establishes a limit of 2,000 lb (907.2 kg) per DAS and FW 47 did not implement anything different from that.

The new landing limit for GOM cod is 2,000 lb (907.2 kg) per DAS, an increase of 150 percent from 800 lb (362.9 kg) per DAS. Based on this new trip limit for GOM cod for Category A DAS vessels, the new GOM cod trip limit for HB vessels is 200 lb (90.7 kg) per trip (75 lb (34.0 kg) per trip increased by 150 percent = 187.5 lb (85.0 kg) per trip, rounded up to 200 lb (90.7 kg) per trip). The new landing limit for GB cod is 3,000 lb (1,361 kg) per DAS, an increase of 50 percent from the original landing limit of 2,000 lb (907.2 kg) per DAS. Based on the new trip limit for GB cod for Category A DAS vessels, the new GB cod trip limit for HB vessels is 125 lb (56.7 kg) per trip (75 lb (34.0 kg) per trip increased by 50 percent = 112.5 lb (51.0 kg) per trip, rounded up to 125 lb (56.7 kg) per trip). Increasing these trip limits does not jeopardize current conservation objectives.

The trip limit adjustments for Category A DAS and HB vessels are effective February 11, 2013, through April 30, 2013. This action does not change the current cod trip limit for vessels with a limited access Handgear A permit (300 lb (136.1. kg) per trip) or Small Vessel Category permit (300 lb (136.1 kg) of cod, haddock, and yellowtail flounder combined). Catch will continue to be monitored through dealer-reported landings, vessel monitoring system catch reports, and other available information, and if necessary, additional adjustments to common pool management measures may be made.

Classification

This action is required by 50 CFR part 648, and is exempt from review under Executive Order 12866.

The Assistant Administrator for Fisheries, NOAA (AA), finds good cause pursuant to 5 U.S.C. 553(b)(B) to waive prior notice and the opportunity for public comment because it would be impracticable and contrary to the public interest. The regulations at § 648.86(o) grant the RA authority to adjust the NE multispecies trip limits for common pool vessels in order to prevent the overharvest or underharvest of the pertinent common pool sub-ACLs. The information informing this action only very recently became available. Given this fact, this action increases the trip limits for GOM cod, GB cod, and SNE/MA yellowtail flounder to reduce the probability of underharvesting the common pool sub-ACLs. A resulting delay in the trip limit increases of these three stocks could result in less revenue for the fishing industry and be counter to the objective of achieving optimum yield. A resulting delay in the trip limit decreases for white hake and pollock reduces the probability of exceeding the applicable common pool sub-ACLs. If the sub-ACLs are exceeded, this would undermine conservation objectives and trigger the implementation of accountability measures that will have negative economic impacts on the participants in the common pool. Given this fact, the time necessary to provide for prior notice and comment would prevent NMFS from implementing the necessary trip limit adjustments in a timely manner.

The AA further finds, pursuant to 5 U.S.C. 553(d)(3), good cause to waive the 30-day delayed effectiveness period for the reasons stated above.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: February 11, 2013.

James P. Burgess,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 660

[Docket No. 120813333–3107–02]

RIN 0648–BC28

Fisheries Off West Coast States; West Coast Salmon Fisheries; Amendment 17 to the Salmon Fishery Management Plan

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS issues a final rule under authority of the Magnuson-Stevens Fishery Conservation and Management Act (MSA) to implement Amendment 17 to the Pacific Coast Salmon Fishery Management Plan for Commercial and Recreational Salmon Fisheries off the Coasts of Washington, Oregon, and California (Salmon FMP). NMFS approved Amendment 17 on February 5, 2013. Among other things, Amendment 17 revises the maximum fishing mortality threshold (MFMT) for Quillayute fall coho, revises the FMP to correct typographical errors, updates reporting measures to reflect new technology, and updates or removes other obsolete or unnecessary language. This rule implements certain portions of Amendment 17; specifically, it discontinues the public comment period for final management measures that are published in the **Federal Register** and updates mechanisms for obtaining information on management of the fishery. NMFS also makes minor updates to regulations unrelated to Amendment 17.

DATES: This final rule is effective March 18, 2013.

ADDRESSES: This final rule is also accessible on the Web site of NMFS' Northwest Region (*http://www.nwr.noaa.gov*). The current Salmon FMP, through Amendment 17 will be made available on the Pacific Fishery Management Council's Web site (*http://www.pcouncil.org/*).

FOR FURTHER INFORMATION CONTACT: Peggy Mundy at 206–526–4323, or Heidi Taylor at 562–980–4039.

SUPPLEMENTARY INFORMATION: The Pacific Fishery Management Council (Council) developed Amendment 17 to revise the MFMT for Quillayute fall coho and make several minor revisions to update language and technology used in FMP, including discontinuing a public comment period after the annual salmon management measures have been published in the **Federal Register** as a final rule. NMFS determined that the actions of Amendment 17 have all either been previously analyzed in a NEPA document or qualify for categorical exclusion (CE) from further NEPA analysis under NAO 216–6. The Council took final action on Amendment 17 in September 2012 and transmitted the amendment to NMFS on November 5, 2012. NMFS published a Notice of Availability of Amendment 17 in the **Federal Register** (77 FR 67327, November 9, 2012) to notify the public of the amendment and invite comments. NMFS published a proposed rule in the **Federal Register** (77 FR 75101, December 19, 2012) to notify the public and invite comments on the proposals. NMFS received two comment

submissions. The comments are summarized and responded to in the ''Response to Comments'' section of this rule.

As described in the proposed rule, Amendment 17 removes mention of a public comment period after final management measures are published in the **Federal Register.** Annual management measures for the salmon fishery are published in the **Federal Register** as final rules; public comment periods are not applied to final rules. The public has an opportunity to comment on these measures throughout the Council's annual process of setting them; that process includes two Council meetings and public hearings held in Washington, Oregon, and California. The Council publishes a notice in the **Federal Register** each December that details the process for setting the next year's annual management measures and solicits comments. The Council's notice provides the schedule for Council meetings and public hearings, as well as the schedule of availability of planning documents, including Preseason Report II which contains the salmon management alternatives the Council adopts in March for further consideration at its April meeting where it adopts a final recommendation for the fishing season. The Council's notice informs the public of how to request copies of the preseason planning documents, how to view the documents online, and how to submit comments to the Council by mail, fax, email, or the Federal Rulemaking Portal: *www.regulations.gov.* All comments received are reviewed by both the Council and NMFS.

The other details of Amendment 17 were described in the proposed rule (77 FR 75101, December 19, 2012) and are not repeated here. This final rule identifies changes to the regulations under 50 CFR part 660 subpart H to implement Amendment 17 and additional updates as described in the proposed rule.

Response to Comments

NMFS invited comments on Amendment 17 and the proposed rule. Two comments were received, including a letter of ''no comment'' submitted by the U.S. Department of the Interior. The one public comment received was opposed to approval of ''Frankenfish.'' While NMFS appreciates receiving public comment, the issue of ''Frankenfish'' is not relevant to Amendment 17.

Changes From Proposed Rule

This final rule includes changes to the existing regulations at 50 CFR 660.401 *et seq.* to implement Amendment 17 and additional updates. These are unchanged from the proposed rule.

Classification

Pursuant to section 304(b)(1)(A) of the Magnuson-Stevens Act, the NMFS Assistant Administrator has determined that this final rule is consistent with Amendment 17, other provisions of the Magnuson-Stevens Act, and other applicable law.

This final rule has been determined to be not significant for purposes of Executive Order 12866.

The Northwest Regional Administrator has determined that the actions of Amendment 17 have all either been previously analyzed in a NEPA document or qualify for categorical exclusion from further NEPA analysis under NAO 216–6.

An initial regulatory flexibility analysis (IRFA) was prepared, as required by section 603 of the Regulatory Flexibility Act (RFA). The IRFA describes the economic impact the proposed rule, if adopted, would have on small entities. NMFS received no comments to the RIR/IRFA, and a final regulatory flexibility analysis (FRFA) was prepared. The commercial entities directly regulated by the Pacific Council's Fishery Management Plan are non-tribal commercial trollers, tribal commercial trollers, and charter boats. According to the Small Business Administration (SBA), a small commercial fish harvesting business is one that has annual receipts under $4.0 million, a small charter boat business is one that has annual receipts under $7.0 million, and a small processor is one that employs 500 employees or fewer. During 2011, the affected fleets consisted of estimated 802 non-tribal trollers, 40 to 50 tribal trollers, and 438–495 charter boats. Based on Pacific Coast Fisheries Information Network (PacFIN) data, a total of 802 non-tribal vessels participated in the West Coast commercial salmon fishery in 2011. This number is 25 percent more than participated in 2010 (642), two-and-a-half times the number that participated in 2009 (313), and three-and-a-half times the number participating in 2008 (221). Based on the SBA definitions and available information, the IRFA determined that all these entities are small entities. The RIR/IRFA also determined that these regulations are administrative in nature. Consequently, these regulations are not expected to meet any of the tests of having a ''significant'' economic impact on a ''substantial number'' of small entities. There are no additional projected reporting, recordkeeping, and other compliance requirements of this rule. No Federal rules have been identified that duplicate, overlap, or conflict with this action. The FRFA concurs with the findings of the RIR/IRFA.

The final rule is administrative in nature and does not affect ESA listed species. However, NMFS has issued a number of ESA biological opinions that address the impacts of the Council managed salmon fisheries on listed salmonids as follows: March 8, 1996 (Snake River spring/summer and fall Chinook and sockeye), April 28, 1999 (Oregon Coast natural coho, Southern Oregon/Northern California coastal coho, Central California coastal coho), April 28, 2000 (Central Valley spring Chinook), April 27, 2001 (Hood Canal summer chum 4(d) limit), April 30, 2004 (Upper Willamette Chinook, Upper Columbia spring Chinook, Lake Ozette sockeye, Columbia River chum, Puget Sound Chinook), June 13, 2005 (California coastal Chinook), April 28, 2008 (Lower Columbia River natural coho), and April 30, 2010 (Sacramento River winter Chinook, and listed Puget Sound yelloweye rockfish, canary rockfish, and bocaccio), and April 26, 2012 (Lower Columbia River Chinook). NMFS reiterates its consultation standards for all ESA-listed salmon and steelhead species in an annual Guidance letter to the Council. In 2009, NMFS consulted on the effects of fishing under the Salmon FMP on the endangered Southern Resident Killer Whale Distinct Population Segment (SRKW) and concluded the salmon fisheries were not likely to jeopardize SRKW (biological opinion dated May 5, 2009).

Pursuant to Executive Order 13175, this final rule was developed after meaningful consultation and collaboration with Tribal officials from the area covered by the FMP. Under the Magnuson-Stevens Act at 16 U.S.C. 1852(b)(5), one of the voting members of the Pacific Council must be a representative of an Indian Tribe with Federally recognized fishing rights from the area of the Council's jurisdiction. This tribal representative on the Council has agreed with the provisions that apply to tribal vessels.

List of Subjects in 50 CFR Part 660

Fisheries, Fishing, Recordkeeping and reporting requirements.

Dated: February 11, 2013.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, Performing the Functions and Duties of the Assistant Administrator for Fisheries, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 660 is amended as follows:

PART 660—FISHERIES OFF WEST COAST STATES

■ 1. The authority citation for part 660 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.* and 16 U.S.C. 773 *et seq.*

■ 2. In § 660.402, revise the definition for ''Dressed, head-off length of salmon'' to read as follows:

§ 660.402 Definitions.

* * * * *

Dressed, head-off length of salmon means the shortest distance between the midpoint of the clavicle arch and the fork of the tail, measured along the lateral line while the fish is lying on its side, without resort to any force or mutilation of the fish other than removal of the head, gills, and entrails.

* * * * *

■ 3. In § 660.406, revise paragraph (c) to read as follows:

§ 660.406 Exempted fishing.

* * * * *

(c) Each vessel participating in any exempted fishery recommended by the Council and allowed by NMFS is subject to all provisions of this subpart, except those portions which relate to the purpose and nature of the exempted fishery. These exceptions will be specified in a permit issued by the Regional Administrator to each vessel participating in the exempted fishery and that permit must be carried aboard each participating vessel.

■ 4. In § 660.408, revise paragraphs (d)(1)(vii) and (d)(2)(v) to read as follows:

§ 660.408 Annual actions.

* * * * *

(d) * * *

(1) * * *

(vii) *Other inseason provisions.* Any increase or decrease in the recreational or commercial allowable ocean harvest resulting from an inseason restructuring of a fishery or other inseason management action does not require reallocation of the overall non-treaty allowable ocean harvest north of Cape Falcon between the recreational and commercial fisheries. Inseason redistribution of subarea quotas within the recreational fishery or the distribution of allowable coho catch transfers from the commercial fishery among subareas may deviate from the preseason distribution. Inseason management actions may be taken by the Regional Administrator to assure meeting the primary objective of achieving all-species fisheries without imposing Chinook restrictions in each of the recreational subareas north of Cape Falcon. Such actions might include, but are not limited to: Closure from 0 to 3, 0 to 6, 3 to 200, or 5 to 200 nm from shore; closure from a point extending due west from Tatoosh Island for 5 nm, then south to a point due west of Umatilla Reef Buoy, then due east to shore; closure from North Head at the Columbia River mouth north to Leadbetter Point; change in species that may be landed; or other actions as prescribed in the annual management measures.

* * * * *

(2) * * *

(v) *Inseason reallocation.* No later than August 15 each year, the Salmon Technical Team will estimate the number of coho salmon needed to complete the recreational seasons. Any coho salmon allocated to the recreational fishery that are not needed to complete the recreational seasons will be reallocated to the commercial fishery. Once reallocation has taken place, the remaining recreational quota will change to a harvest guideline. If the harvest guideline for the recreational fishery is projected to be reached on or before Labor Day, the Regional Administrator may allow the recreational fishery to continue through the Labor Day weekend only if there is no significant danger of impacting the allocation of another fishery or of failing to meet an escapement goal.

* * * * *

■ 5. In § 660.411, revise paragraphs (b) and (c) to read as follows:

§ 660.411 Notification and publication procedures.

* * * * *

(b) *Public comment.* If time allows, NMFS will invite public comment prior to the effective date of any action published in the **Federal Register.**

(c) *Availability of data.* The Regional Administrator will compile in aggregate form all data and other information relevant to the action being taken and will make them available for public review upon request, contact information will be published annually in the **Federal Register** and announced on the telephone hotline. For actions affecting fisheries occurring primarily or exclusively in the fishery management area seaward of California, information relevant to the action also will be made available upon request by the Southwest Region, NMFS.

Proposed Rules

Federal Register
Vol. 78, No. 31
Thursday, February 14, 2013

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA–2013–0016; Airspace Docket No. 12–ASO–33]

RIN 2120–AA66

Proposed Modification and Revocation of Air Traffic Service Routes; Jackson, MS

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to modify two jet routes and seven VOR Federal airways; and remove two VOR Federal airways in the vicinity of Jackson, MS. The FAA is proposing this action due to the scheduled decommissioning of the Jackson, MS, VORTAC, and the commissioning of the Magnolia, MS, VORTAC navigation aids.

DATES: Comments must be received on or before April 1, 2013.

ADDRESSES: Send comments on this proposal to the U.S. Department of Transportation, Docket Operations, M–30, 1200 New Jersey Avenue SE., West Building Ground Floor, Room W12–140, Washington, DC 20590–0001; telephone: (202) 366–9826. You must identify FAA Docket No. FAA–2013–0016 and Airspace Docket No. 12–ASO–33 at the beginning of your comments. You may also submit comments through the Internet at *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Paul Gallant, Airspace Policy and ATC Procedures Group, Office of Airspace Services, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 267–8783.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.

Communications should identify both docket numbers (FAA Docket No. FAA–2013–0016 and Airspace Docket No. 12–ASO–33) and be submitted in triplicate to the Docket Management Facility (see **ADDRESSES** section for address and phone number). You may also submit comments through the Internet at *http://www.regulations.gov.*

Commenters wishing the FAA to acknowledge receipt of their comments on this action must submit with those comments a self-addressed, stamped postcard on which the following statement is made: ''Comments to FAA Docket No. FAA–2013–0016 and Airspace Docket No. 12–ASO–33.'' The postcard will be date/time stamped and returned to the commenter.

All communications received on or before the specified comment closing date will be considered before taking action on the proposed rule. The proposal contained in this action may be changed in light of comments received. All comments submitted will be available for examination in the public docket both before and after the comment closing date. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

An electronic copy of this document may be downloaded through the Internet at *http://www.regulations.gov.*

You may review the public docket containing the proposal, any comments received and any final disposition in person in the Dockets Office (see **ADDRESSES** section for address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal holidays. An informal docket may also be examined during normal business hours at the office of the Eastern Service Center, Federal Aviation Administration, Room 210, 1701 Columbia Ave., College Park, GA 30337.

Persons interested in being placed on a mailing list for future NPRM's should contact the FAA's Office of Rulemaking, (202) 267–9677, for a copy of Advisory Circular No. 11–2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedure.

Background

The Jackson, MS, VORTAC will be permanently decommissioned in 2013. The new Magnolia, MS, VORTAC is being constructed on the property of Bruce Campbell Field Airport in Madison, MS, to replace the Jackson VORTAC. The Magnolia VORTAC site is approximately 5.5 NM southeast of the Jackson VORTAC location. The Magnolia VORTAC is scheduled for commissioning concurrent with the shutdown of the Jackson VORTAC. This proposal amends the affected route descriptions due to the VORTAC changes.

The Proposal

The FAA is proposing an amendment to Title 14, Code of Federal Regulations (14 CFR) part 71 to modify two jet routes and seven VOR Federal airways; and cancel two VOR Federal airways in the vicinity of Jackson, MS. Specifically, the following changes are proposed:

Jet Route J–4 would be amended by removing ''Jackson, MS'' from the description and inserting ''Magnolia, MS'' in its place.

Jet Route J–20 would be amended by removing ''Jackson, MS'' from the description and inserting ''Magnolia, MS'' in its place. Also, the J–20 description in FAA Order 7400.9 contains an editorial error whereby ''Montgomery, AL'' is listed before ''Meridian, MS'' instead of following it. This action would correct the description by moving ''Montgomery, AL'' to follow ''Meridian, MS'' to match its proper geographic position along the route. It should be noted that this editorial error appears only in the route description in Order 7400.9. J–20 is correct in the NAS database and on IFR Enroute High Altitude chart H–6.

VOR Federal Airways V–9 and V–11 would be amended by removing ''Jackson, MS'' and inserting ''Magnolia, MS'' and by inserting radial intersections using the new Magnolia VORTAC.

VOR Federal Airway V–18 would be modified by removing ''Jackson, MS'' and inserting ''Magnolia, MS'' in its

place and by correcting the spelling of ''Talladega'' in the route description listed in FAA Order 7400.9.

VOR Federal Airway V–74 would be modified so that the last route segment proceeds from the Greenville, MS, VOR/DME direct to the new Magnolia VORTAC instead of the Jackson VORTAC.

VOR Federal Airway V–245 would amended by removing ''Jackson, MS'' and substituting ''Magnolia, MS,'' in the description.

Currently, V–417 extends from Monroe, LA, to Charleston, SC. This action would cancel the portion of V–417 that lies between Monroe, LA, and Meridian, MS. Between those two points, V–417 serves as an alternate airway to V–18. However, V–18 provides direct, more efficient routing between Monroe and Meridian, while V–417 includes two doglegs to the south of V–18, resulting in additional flying miles between Monroe and Meridian. The V–417 segments between Monroe and Meridian have been deemed obsolete and of little value to the National Airspace System (NAS), therefore, V–417 would be amended to begin at Meridian and proceed along the current route to Charleston.

V–427 would be removed. V–427 currently extends between Monroe, LA and Jackson, MS. Similar to V–417 (above) V–427 also serves as an alternate airway to V–18, but to the north side of V–18. Since V–18 provides a direct and more efficient route between Monroe, LA, and the Jackson, MS/Magnolia, MS, area, the FAA has determined that V–427 is obsolete and of little value to the NAS.

V–555 currently extends between Picayune, MS, and Sidon, MS, and serves as an alternate route to the east of V–9, between McComb, MS, and Sidon. Since V–9 provides direct, more efficient routing between McComb and Sidon, the FAA is proposing to modify V–555 by removing the segment between McComb and Sidon, which has been determined to be of minimal value to the NAS. As a result, the modified V–555 would only extend between Picayune and McComb.

V–557 currently extends between McComb, MS and Sidon, MS and is an alternate route to the west of V–9. However, V–9 provides direct, more efficient routing between those points; therefore, the FAA has determined that V–557 is of minimal value to the NAS, and would be removed.

The full descriptions of the proposed amended routes are listed in ''The Proposed Amendment'' section, below. Where new navigation aid radials are established in a description, both True and Magnetic degrees are shown. Otherwise, only True degrees are stated.

Jet routes are published in paragraph 2004, and VOR Federal airways are published in paragraph 6010, respectively, of FAA Order 7400.9W dated August 8, 2012, and effective September 15, 2012, which is incorporated by reference in 14 CFR 71.1. The jet routes and VOR Federal airways listed in this document would be subsequently published in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation: (1) Is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority.

This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would modify the route structure as required to preserve the safe and efficient flow of air traffic in the vicinity of Jackson, MS.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1E, ''Environmental Impacts: Policies and Procedures'' prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.9W, Airspace Designations and Reporting Points, Dated August 8, 2012 and effective September 15, 2012, is amended as follows:

Paragraph 2004 Jet routes.

* * * * *

J–4 [Amended]

From Los Angeles, CA, via INT Los Angeles 083° and Twentynine Palms, CA, 269° radials; Twentynine Palms; Parker, CA; Buckeye, AZ; San Simon, AZ; Newman, TX; Wink, TX; Abilene, TX; Ranger, TX; Belcher, LA; Magnolia, MS; Meridian, MS; Montgomery, AL; INT Montgomery 051° and Colliers, SC, 268° radials; Colliers; Columbia, SC; Florence, SC; to Wilmington, NC.

J–20 [Amended]

RIN 2120–AA66

Proposed Establishment of Area Navigation (RNAV) Routes; Washington, DC

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to establish five new RNAV routes in support of the Washington, DC, Optimization of Airspace and Procedures in a Metroplex (OAPM) project. The proposed routes would increase efficiency and allow easier transition into the high altitude structure for departures from the Washington, DC Metropolitan area airports.

DATES: Comments must be received on or before April 1, 2013.

ADDRESSES: Send comments on this proposal to the U.S. Department of Transportation, Docket Operations, M–30, 1200 New Jersey Avenue SE., West Building Ground Floor, Room W12–140, Washington, DC 20590–0001; telephone: (202) 366–9826. You must identify FAA Docket No. FAA–2013–0081 and Airspace Docket No. 12–AEA–5 at the beginning of your comments. You may also submit comments through the Internet at *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Paul Gallant, Airspace Policy and ATC Procedures Group, Office of Airspace Services, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 267–8783.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.

Communications should identify both docket numbers (FAA Docket No. FAA–2013–0081 and Airspace Docket No. 12–AEA–5) and be submitted in triplicate to the Docket Management Facility (see **ADDRESSES** section for address and phone number). You may also submit comments through the Internet at *http://www.regulations.gov.*

Commenters wishing the FAA to acknowledge receipt of their comments on this action must submit with those comments a self-addressed, stamped postcard on which the following statement is made: ''Comments to FAA Docket No. FAA–2013–0081 and Airspace Docket No. 12–AEA–5.'' The postcard will be date/time stamped and returned to the commenter.

All communications received on or before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this action may be changed in light of comments received. All comments submitted will be available for examination in the public docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

An electronic copy of this document may be downloaded through the Internet at *http://www.regulations.gov.*

You may review the public docket containing the proposal, any comments received and any final disposition in person in the Dockets Office (see **ADDRESSES** section for address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal holidays. An informal docket may also be examined during normal business hours at the office of the Eastern Service Center, Federal Aviation Administration, Room 210, 1701 Columbia Ave., College Park, GA 30337.

Persons interested in being placed on a mailing list for future NPRM's should contact the FAA's Office of Rulemaking, (202) 267–9677, for a copy of Advisory Circular No. 11–2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedure.

The Proposal

The FAA is proposing an amendment to Title 14, Code of Federal Regulations (14 CFR) part 71 to establish three high altitude RNAV routes, designated Q–68, Q–72 and Q–80; and two low altitude RNAV routes, designated T–291 and T–295, in the Washington, DC area. The proposed Q-routes would facilitate the divergence of aircraft departures from the Washington, DC, Metropolitan area airports, produce shorter routings and allow easier transition into the high altitude route structure. The Q-routes are intended to be one-way routes going westward and would serve primarily as feeders and alternate dispersion routes for aircraft departing the DC Metro area to the west. The proposed T-routes are expected to reduce ATC complexity and provide shorter routes of flight in some cases.

The following routes are proposed. Q–68 would extend between the Charleston, WV, VHF omnidirectional range tactical air navigation (VORTAC) aid and the OTTTO, VA, waypoint (WP). Q–72 would extend between the HACKS, WV, intersection and the RAMAY, VA, WP. It would provide an alternate route for jet route J–149 via a direct routing to the HACKS intersection, thus reducing miles flown for RNAV-equipped aircraft. Q–80 would extend between the FAREV, KY, WP and the OTTTO, VA, WP to serve aircraft headed to the southwest.

T–291 would extend between the LOUIE, MD, navigation fix and the Harrisburg, PA, VORTAC. T–295 would extend between the LOUIE fix and the Lancaster, PA, VORTAC. T–291 and T–295 would have a maximum assigned altitude (MAA) of 11,000 feet MSL. The T-routes would provide more efficient and predictable routing for aircraft utilizing airports near Harrisburg, PA, and the airports south of Patuxent River, MD, that normally fly VOR Federal airways V–31, V–33, V–93 and V–499 near the area. The T-routes would also enhance segregation of those aircraft utilizing those airways from the DC Metro arrivals coming from the northeast and from the DC Metro departures headed eastbound.

The proposed routes would increase National Airspace System (NAS) efficiency and advance the use of NextGen technology.

High altitude RNAV routes are published in paragraph 2006, and low altitude RNAV routes are published in paragraph 6011, respectively, of FAA Order 7400.9W dated August 8, 2012, and effective September 15, 2012, which is incorporated by reference in 14 CFR 71.1. The RNAV routes listed in this document would be subsequently published in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation: (1) Is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority.

This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it establishes RNAV routes as required to preserve the safe and efficient flow of air traffic.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1E, ''Environmental Impacts: Policies and Procedures'' prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.9W, Airspace Designations and Reporting Points, Dated August 8, 2012, and effective September 15, 2012, is amended as follows:

[Docket No. FAA–2012–1296; Airspace Docket No. 09–AWA–1]

RIN 2120–AA66

Proposed Modification of Class B Airspace; Minneapolis, MN

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to modify the Minneapolis, MN, Class B airspace area to contain large turbine-powered aircraft conducting published instrument procedures at the Minneapolis-St. Paul International Airport (MSP), MN, within Class B airspace. The FAA is proposing this action to ensure containment of aircraft being vectored to and conducting Simultaneous Instrument Landing System (SILS) approaches to parallel Runways 12L/R and 30L/R, aircraft being vectored to and conducting approaches to Runway 35, and aircraft being re-sequenced from approaches to Runway 35 to approaches to Runway 30L. This action would further support the FAA's national airspace redesign goal of optimizing terminal and en route airspace areas to enhance safety, improving the flow of air traffic, and reducing the potential for near midair collision in the terminal area.

DATES: Comments must be received on or before April 15, 2013.

ADDRESSES: Send comments on this proposal to the U.S. Department of Transportation, Docket Operations, M–30, 1200 New Jersey Avenue SE., West Building Ground Floor, Room W12–140, Washington, DC 20590–0001; telephone: (202) 366–9826. You must identify FAA Docket No. FAA–2012–1296 and Airspace Docket No. 09–AWA–1 at the beginning of your comments. You may also submit comments through the Internet at *http://www.regulations.gov*.

FOR FURTHER INFORMATION CONTACT: Colby Abbott, Airspace Policy and ATC Procedures, Office of Airspace Services, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 267–8783.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.

Communications should identify both docket numbers (FAA Docket No. FAA–2012–1296 and Airspace Docket No. 09–AWA–1) and be submitted in triplicate to the Docket Management Facility (see **ADDRESSES** section for address and phone number). You may also submit comments through the internet at *http://www.regulations.gov*.

Commenters wishing the FAA to acknowledge receipt of their comments on this action must submit with those comments a self-addressed, stamped postcard on which the following statement is made: ''Comments to Docket Nos. FAA–2012–1296 and Airspace Docket No. 09–AWA–1.'' The postcard will be date/time stamped and returned to the commenter.

All communications received on or before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this action may be changed in light of comments received. All comments submitted will be available for examination in the public docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

An electronic copy of this document may be downloaded through the Internet at *http://www.regulations.gov*.

You may review the public docket containing the proposal, any comments received and any final disposition in person in the Dockets Office (see **ADDRESSES** section for address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal holidays. An informal docket may also be examined during normal business hours at the office of the Central Service Center, Operations Support Group, Federal Aviation Administration, 2601 Meacham Blvd. Fort Worth, TX 76137.

Persons interested in being placed on a mailing list for future NPRMs should contact the FAA's Office of Rulemaking, (202) 267–9677, for a copy of Advisory Circular No. 11–2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedure.

Background

In 1974, the FAA issued a final rule which established the Minneapolis, MN, Terminal Control Area (TCA) (38 FR 34991). As a result of the Airspace Reclassification final rule (56 FR 65638), which became effective in 1993, the terms ''terminal control area'' and ''airport radar service area'' were replaced by ''Class B airspace area,'' and ''Class C airspace area,'' respectively. The primary purpose of a Class B airspace area is to reduce the potential for midair collisions in the airspace surrounding airports with high density

air traffic operations by providing an area in which all aircraft are subject to certain operating rules and equipment requirements. FAA directives require Class B airspace areas be designed to contain all instrument procedures, and that air traffic controllers vector aircraft as appropriate to remain within Class B airspace after entry.

The Minneapolis Class B airspace area has only been amended once, in 2006, since being established to address the significant growth in aircraft operations and the construction of Runway 17/35 to accommodate the increased operations at that time. That amendment action modified the Class B airspace to (1) accommodate aircraft conducting SILS approaches to parallel Runways 12L/R and 30L/R, and (2) provide protection for aircraft conducting instrument approaches to MSP's new Runway 35.

Since the 2006 Minneapolis Class B airspace amendment action, changes to MSP vector patterns (traffic flows) and aircraft descent profiles, and the realization of a miscalculated Class B airspace boundary configuration have resulted in unanticipated and unintended Class B airspace exits. There are two areas in the existing Minneapolis Class B airspace extensions located northwest and southeast of MSP where aircraft on south downwind flight paths to MSP Runways 12R and 30L operate on, or in close proximity to, the existing Class B airspace boundaries. These downwind ''legs'' must be far enough away from the associated final approach course (FAC) to ensure that aircraft have enough airspace to execute a standard rate turn from the downwind leg to a point at which they are established on a 30° FAC intercept heading. This 30° intercept heading must be achieved at least three miles from the FAC. On the north side of the final approach areas (for Runways 12L and 30R), the downwind legs are more than 1.5 nautical miles (NM) from the Class B airspace boundary; however, on the south side of the final approach areas (for Runways 12R and 30L), the downwind legs are less than 0.65 NM from the Class B airspace boundary. The southern boundaries of the existing Class B airspace extensions located northwest and southeast of MSP require a one NM expansion further south, at a minimum, to ensure large turbine-powered aircraft flying the downwind legs of the southern traffic patterns supporting Runways 12R and 30L instrument procedures are safely contained within Class B airspace.

Also, there are three areas of the Minneapolis Class B airspace where arriving aircraft ''drop'' beneath the floor of Class B airspace while descending for sequencing to closely-spaced, adjacent approaches at MSP. Since 2006, the fleet mix of aircraft operating at MSP has shifted from mostly rapidly descending DC–9s and B727s, to A320s, B757s, and other turbojet aircraft with more ''efficient wings'' that require a longer time to descend. As a result, the distance at which these slower descending aircraft must start a descent is located farther from MSP because the points at which air traffic control (ATC) must ensure the arriving aircraft reach 4,000 feet or 5,000 feet mean sea level (MSL), in order to commence the various instrument approach procedures, has not changed. This requirement to descend arriving large turbine-powered aircraft earlier often results in aircraft exiting the floor of existing Class B airspace.

Finally, a portion of the Runway 35 FAC, extended, is not contained entirely within the existing Class B airspace. Between 20 NM and 25 NM from the Minneapolis-St. Paul International (Wold-Chamberlain) Airport DME Antenna (I–MSP DME), the Runway 35 FAC is outside the boundary of existing Class B airspace; whereas, between 25 NM and 30 NM from the I–MSP DME, the Runway 35 FAC is inside the boundary of existing Class B airspace. As a result, aircraft turned on to the Runway 35 FAC, extended, at 6,000 feet MSL will be within Class B airspace between 25 NM and 30 NM from the I–MSP DME, but will be outside Class B airspace, beneath the existing 7,000-foot Class B airspace floor in that area between 20 NM and 25 NM from the I–MSP DME. Similarly, aircraft that are initially positioned for an approach to Runway 35, but then re-sequenced to Runway 30L, are also at risk of exiting the Class B airspace area. In this case, the typical flight path for aircraft being re-sequenced from Runway 35 to Runway 30L passes under the existing Class B airspace where, currently, the floor of the existing Class B airspace subarea is 7,000 feet MSL.

The proposed Minneapolis Class B airspace modifications described in this NPRM are intended to address these issues. For calendar year 2011, MSP ranked number 12 in the list of the ''50 Busiest FAA Airport Traffic Control Towers,'' with over 435,000 total airport operations. Additionally, the calendar year 2011 passenger enplanement data ranked MSP as number 16 among Commercial Service Airports, with 15,895,653 passenger enplanements (an increase of 2.47% from the previous year).

Pre-NPRM Public Input

An Ad Hoc Committee, formed in 2010, reviewed the Minneapolis Class B airspace and provided recommendations to the FAA about the proposed design. The Ad Hoc Committee was chaired by the Minnesota Soaring Club representative with participants representing aviation interests in the greater Twin Cities area including representatives of air carrier, seaplane, ultralight, parachute, aerobatic, sailplane, experimental aircraft, and general aviation interests. The Ad Hoc Committee met three times; May 15, 2010; June 15, 2010; and July 13, 2010.

In addition, as announced in the **Federal Register** of January 5, 2011 (76 FR 489), four fact-finding informal airspace meetings were held; the first on March 18, 2011, at the Metropolitan Airports Commission in Minneapolis, MN; the second on March 19, 2011, at the In Flight Pilot Training, LLC., in Eden Prairie, MN; the third on March 21, 2011, at the Minnesota Army National Guard, Aviation Facility, in St. Paul, MN; and the fourth on March 22, 2011, at the Metropolitan Airports Commission in Minneapolis, MN. These meetings provided interested airspace users with an opportunity to present their views and offer suggestions regarding the planned modifications to the Minneapolis Class B airspace area.

The navigation aid radial information contained in the Ad Hoc Committee recommendations, the informal airspace meeting comments, and the proposal discussions that follow is presented relative to Magnetic North for ease of understanding. However, the navigation aid radial information contained in the regulatory text legal description is presented relative to both True North and Magnetic North.

All substantive airspace recommendations made by the Ad Hoc Committee and public comments received as a result of the informal airspace meetings were considered in developing this proposal.

Discussion of Ad Hoc Committee Recommendations

The FAA prepared a preliminary design of the proposed Minneapolis Class B airspace modifications to illustrate the need for change and to serve as a basis for the Ad Hoc Committee's review. In general, the preliminary design featured a proposal to expand the southern boundaries of the existing Class B airspace extensions located northwest and southeast of MSP by approximately one NM to the south; lower the floor of portions of existing

Class B airspace abeam both sides of the existing Class B airspace extensions by 1,000 feet MSL; combine the existing Class B airspace subareas located south and southeast of MSP into one subarea, and; expand the boundary of existing Class B airspace south of MSP from the Gopher VHF omnidirectional range (VOR)/tactical air navigation (VORTAC) antenna (GEP) 160° radial to the GEP 157° radial.

The Ad Hoc Committee reported that most of the proposed Minneapolis Class B airspace area changes had little or no impact on the aviation community represented by the Ad Hoc Committee; however, they felt that the proposed modifications near the Stanton Airfield (SYN) would impact the Minnesota Soaring Club and Stanton Sport Aviation operations. The Ad Hoc Committee's report provided to the FAA contained six recommendations for consideration regarding the FAA's proposed modification of the Minneapolis Class B airspace area.

The Ad Hoc Committee recommended limiting the expansion of the existing Class B airspace located south of MSP, between 25 NM and 30 NM from the I–MSP DME, by defining the boundary using the GEP 158° radial instead of the initially proposed GEP 157° radial. They believed this change would better align the Class B airspace boundary with easily identifiable road junctions on the visual flight rules (VFR) charts and allow pilots of glider and powered aircraft, which are not Global Positioning System (GPS) equipped, to identify the Class B airspace boundary visually.

The FAA incorporated the Ad Hoc Committee's recommendation and defined the portion of the proposed Class B airspace boundary addressed above (proposed Area H) using the GEP 158° radial. Defining this portion of the proposed boundary from the GEP 157° radial to the GEP 158° radial would reduce the Class B airspace subarea by 0.8 NM laterally, but still provide containment of large turbine-powered aircraft within Class B airspace between 20 NM and 30 NM from the I–MSP DME.

The Ad Hoc Committee further recommended the FAA consider using a north-south aligned boundary to define the proposed GEP 158° radial boundary of the Class B airspace located south of MSP, between 25 NM and 30 NM from the I–MSP DME, in lieu of the discussion above. They thought this would more effectively shape the Class B airspace subarea boundary and minimize the Class B airspace expansion towards Stanton Airfield (SYN), as compared to the boundary being aligned using GEP radials. They noted this change would naturally shape the proposed Class B airspace wider towards MSP and minimize the movement of the southern portion of the boundary towards SYN.

The FAA notes that there are no navigation aids available in the MSP terminal area whose position would provide a significantly improved north-south alignment of the proposed boundary under discussion. Absent prominent landmarks being available where needed, to define a north-south aligned boundary, the FAA also considered using geographic references (latitude/longitude) to define the boundary. This alternative was also discounted because pilots of glider and powered aircraft, which are not GPS equipped, operating at SYN would not be able to easily identify the Class B airspace boundary and would risk further airspace incursions. Therefore, this proposal would define the boundary being discussed for the proposed Class B airspace Area H using the GEP 158° radial.

The Ad Hoc Committee also recommended the FAA consider moving the western boundary of the existing Class B airspace, located south of MSP, two degrees east by using the GEP 168° radial to define the boundary. The committee stated the two degree boundary movement would reduce the amount of Class B airspace with a 6,000-foot MSL floor that gliders operating out of SYN would have to stay below to clear.

This recommendation to change the existing GEP 170° radial to the GEP 168° radial to define the existing boundary of Class B airspace located south of MSP would affect two air traffic flows for Runway 35 arrivals and result in large turbine-powered aircraft not being contained within Class B airspace as they are today. If the committee's change was incorporated, the large turbine-powered aircraft inbound to MSP flying the TWOLF Standard Terminal Arrival (STAR) procedure from the south/southwest would fly, on average, an additional three miles in the very same airspace that nonparticipating VFR aircraft are flying in before they entered the protection of the Class B airspace area. Additionally, the large turbine-powered aircraft already contained in Class B airspace, flying a left downwind (southbound) traffic pattern to intercept Runway 35 approach procedures, would exit Class B airspace when the downwind leg of the traffic pattern extended beyond 20 NM from the I–MSP DME. The downwind leg of the traffic pattern to Runway 35 is typically five to seven miles west of the FAC, but the GEP 168° radial is only 4 miles west of the FAC. When an aircraft flying at 6,000 feet MSL on a left downwind to Runway 35 extends beyond 20 NM from the I–MSP DME, it would exit Class B airspace beneath the existing Class B airspace subarea with a 7,000-foot MSL floor, and again be flying in the same airspace used by nonparticipating VFR aircraft before re-entering Class B airspace after being turned-on to the base leg of the traffic pattern in preparation of intercepting the Runway 35 FAC, extended. Both scenarios highlight the unintended consequences that would result from moving the western boundary of the existing Class B airspace subarea located south of MSP two degrees to the east and the counterproductive result to this proposed action.

The Ad Hoc Committee was concerned about the availability of airspace north of SYN. They recommended the FAA establish only the portion of the proposed Class B airspace located south of MSP, west of the GEP 158° radial, with a 6,000-foot MSL floor and retain the existing 7,000-foot MSL floor in the remainder of the existing Class B airspace north of SYN. They further recommended that if more Class B airspace was required north of SYN, the FAA lower the portion of existing Class B airspace from 7,000 feet MSL to 6,000 feet MSL in the area necessary in the Class B airspace cutout north of SYN. The committee wanted to retain the majority of airspace available north of SYN with a 7,000-foot MSL ceiling.

The FAA evaluated this recommendation and determined the proposed Class B airspace located south of MSP and north of SYN (proposed Area H) is necessary with a 6,000-foot MSL floor. Aircraft that are inbound to Runway 35, but then re-sequenced to Runway 30L, are often vectored northeastward through the proposed Class B airspace Area H subarea at 6,000 feet MSL or higher, depending on traffic volume. Typically, aircraft arrivals inbound from the south are re-sequenced to Runway 30L when the traffic flows from the north and southwest saturate the Runway 35 FAC. As the number of aircraft sequenced to Runway 35 increases, the point at which aircraft from the south must be re-sequenced and turned to Runway 30L extends farther to the south; requiring the availability of Class B airspace with a 6,000-foot MSL floor. The proposed modification to establish the new Class B airspace Area H with a 6,000-foot MSL floor would ensure inbound aircraft that are at or descending to

6,000 feet MSL do not exit Class B airspace when transitioning from a Runway 35 arrival to a Runway 30L arrival.

However, in response to the second part of the Ad Hoc Committee's recommendation to minimize the amount of Class B airspace north of SYN being lowered, the initially proposed 25 NM boundary of Class B airspace being lowered to 6,000 feet MSL could be reduced to the 24 NM arc from the I–MSP DME with the floor of the remaining portion of existing Class B airspace between the 24 NM and 25 NM arcs from the I–MSP DME retained at 7,000 feet MSL. The net effect would be to limit the amount of proposed Class B airspace north of SYN being lowered to 6,000 feet MSL by moving the proposed boundary of that subarea one NM further north of SYN. This change to the proposal would still provide the Class B airspace necessary to contain large turbine-powered aircraft within Class B airspace when being re-sequenced from Runway 35 to Runway 30L, but leaves the Class B airspace overhead SYN unchanged.

The Ad Hoc Committee's final recommendation to the FAA was to consider moving the existing Class B airspace boundary over SYN north or eliminating the current 7,000-foot MSL Class B airspace floor altogether. It felt that flight track data shown to it indicated that the floor at the 25 NM line over SYN could be either moved northward or perhaps eliminated.

In this proposal, the FAA moved the 25 NM boundary of proposed Class B airspace to be lowered to 6,000 feet MSL one NM north to the 24 NM arc from the I–MSP DME in accordance with the Ad Hoc Committee's previous recommendation. The existing Class B airspace north of SYN that falls outside 24 NM from the I–MSP DME would remain unchanged. The FAA believes the minimal number of flight tracks documented below the existing Class B airspace between 24 NM and 25 NM from the I–MSP DME below 7,000 feet MSL can be managed with ATC-assigned course changes.

Discussion of Informal Airspace Meeting Comments

The FAA received written comments from thirteen individuals and organizations as a result of the informal airspace meetings. Seven commenters found the FAA's presentation helpful in understanding the requirement and issues, and clearly demonstrated an understanding of all stakeholders' views. The remaining commenters provided comments opposing various aspects of the proposed Minneapolis Class B airspace area modification. The following discussion addresses the substantive comments received.

One commenter questioned the reason for the proposed Class B airspace modification and submitted that the proposed modifications would further restrict General Aviation (GA) freedom of flight around the Twin Cities area, especially near Airlake Airport (LVN). He stated that the new airspace design might cause confusion and more airspace incursion violations, suggesting that the FAA ''keep things the same'' and have fewer regulations.

The FAA is proposing this action to ensure aircraft being vectored and conducting SILS approaches to MSP parallel Runways 12L/R and 30L/R, aircraft being vectored to and conducting approaches to Runway 35, and aircraft being re-sequenced from approach procedures for Runway 35 to approach procedures for Runway 30L are contained within Class B airspace. The FAA does not agree with the commenter that the proposed modification will further restrict GA freedom of flight, especially near LVN. The closest proposed Class B airspace modification to LVN by this action is approximately six miles southeast of the airport; the proposed lowering of Class B airspace (proposed Area H) from 7,000 feet MSL to 6,000 feet MSL. LVN is located approximately 14 NM south of the I–MSP DME, between the 12 NM and 20 NM I–MSP DME arcs where the Class B airspace floor would remain unchanged at 4,000 feet MSL. Additionally, the navigation aids that currently define the various Class B airspace boundaries would continue to define the modified boundaries. The FAA believes the proposed Class B airspace modifications have been clearly developed to prevent confusion, and would not contribute to unintentional airspace incursion violations.

One commenter expressed concern with the regulations that allow aircraft without transponders (sailplanes and gliders) to operate within the 30 NM Mode C veil around MSP, outside the Minneapolis Class B airspace area, because ATC may not be able to see the sailplanes and gliders on radar or advise other aircraft operating in the same area of their presence. The commenter stated that in the interest of safety, the FAA should look very seriously at the no-transponder exception allowing aircraft without a transponder to operate near congested Class B airspace areas.

The commenter is seeking a change to Title 14 Code of Federal Regulations (14 CFR) section 91.215, ATC transponder and altitude reporting equipment and use. This regulation, in part, provides an ''exception'' to the transponder requirement for aircraft not originally certified with an engine-driven electrical system to conduct operations within the 30 NM Mode C veil around Class B airspace primary airports, outside Class B airspace without a transponder. This suggestion is beyond the scope of this action. The MSP Terminal Radar Approach Control (TRACON) controllers are aware that gliders and sailplanes are operating near SYN without transponders and will continue to provide traffic advisories, to the extent possible, to VFR aircraft under their control that are operating near SYN.

One commenter stated that the Class B airspace modifications presented in the March 22, 2011, meeting offered some relief for SYN glider flights compared to previous versions, but that there was increased and unnecessary complexity created with the 24 NM to 25 NM Class B airspace subarea retained with a 7,000-foot MSL floor. A second commenter argued the same point, stating that the proposed modification creates an alleyway of airspace that will confuse pilots and may result in inadvertent airspace incursions. The commenters suggested that the Minneapolis Class B airspace should either end at 24 NM between the GEP 158° radial and the Flying Cloud VOR/DME navigation aid (FCM) 123° radial to simplify navigation for most gliders, or utilize a more consistent Class B airspace floor in this area preserving the 7,000-foot MSL floor directly over SYN. The first commenter also mentioned that the flight path summaries briefed at the informal airspace meetings did not show or take into account the non-transponder equipped gliders operating in the vicinity of SYN adjacent to the current MSP Class B airspace.

The FAA reviewed the Class B airspace subarea with a 7,000-foot MSL floor located between 24 NM and 25 NM from the I–MSP DME, from the GEP 158° radial to the FCM 123° radial, addressed by the commenters and incorporated their suggestion to remove it from the proposal to reduce the perceived airspace complexity and confusion for users in the area north of SYN. As a result, inbound aircraft transitioning from Runway 35 to Runway 30L will be issued ATC-assigned headings to keep them within the proposed Class B airspace Area H between 20 NM and 24 NM from the I–MSP DME.

Additionally, the FAA acknowledges that the flight path summaries presented at the informal airspace meetings did not include non-transponder equipped aircraft (gliders) since track recording

are only possible on transponder-equipped aircraft. This limitation underscores the need and importance for Minneapolis Class B airspace to be designed in such a way that it not only contains large turbine-powered aircraft arriving and departing MSP or nonparticipating VFR aircraft cleared into the Class B airspace by the MSP TRACON, but also segregates aircraft operating within the Class B airspace and those operating outside the Class B airspace, especially those not visible to ATC radar.

One commenter suggested that lowering the Class B airspace located north of SYN, from 7,000 feet MSL to 6,000 feet MSL, should be limited to the airspace west of the GEP 158° radial and the remainder of the Class B airspace subarea left unchanged with a 7,000-foot MSL floor. The commenter argued that this would allow continued upwind operations of glider training flights north of SYN.

As mentioned previously, the proposed Class B airspace located north of SYN between 20 NM and 24 NM from the I–MSP DME is necessary with a 6,000-foot MSL floor to ensure aircraft inbound to Runway 35, but then re-sequenced to Runway 30L are contained within Class B airspace. The proposed Class B airspace Area H would ensure aircraft that are at or descending to 6,000 feet MSL do not exit Class B airspace when transitioning from a Runway 35 arrival to a Runway 30L arrival. However, this action also proposes to return the Class B airspace located north of SYN outside 24 NM from the I–MSP DME between the GEP 158° and FCM 123° radials to the NAS. This airspace return is expected to continue supporting upwind operations of glider training flights north of SYN, as well as other nonparticipating VFR aircraft flying in the vicinity of SYN.

One commenter suggested that the FAA change nine of the Minneapolis Class B airspace boundary segments to align them with prominent geographic landmarks such as rivers and freeways, rather than the existing DME distance and VOR radials. A list of specific boundary changes were recommended and provided for the airspace boundaries located within a short distance (less than one mile) of available landmarks, and where the realignments would keep MSP traffic contained within Class B airspace. The commenter argued that the recommended changes would enhance safety by improving situational awareness for VFR traffic operating below Class B airspace subareas; stating that eliminating the need [for pilots] to keep eyes inside the cockpit would improve traffic scans and would reduce the risk of mid-air collisions.

Using prominent geographic features (landmarks), when they are easily identifiable and coincide with proposed airspace configuration modifications, help identify Class B airspace boundaries and enhances the situational awareness for VFR pilots flying in the vicinity of Class B airspace areas. The scope of this proposed modification is to modify the Minneapolis Class B airspace areas where aircraft containment has been compromised so as to minimize airspace impacts on nonparticipating VFR aircraft operating in the vicinity of the Class B airspace. There are not any easily identifiable landmarks available that coincide with the proposed Class B airspace boundaries needed to contain the large turbine-powered aircraft arriving/departing MSP, without expanding the proposed Class B airspace subareas beyond what is required to match existing landmarks. Since there have not been any containment problems in the areas where the commenter suggested boundary changes, the FAA has opted to retain the existing boundaries and limit the scope of this action as mentioned previously.

The Proposal

The FAA is proposing an amendment to Title 14 of the Code of Federal Regulations
(14 CFR) part 71 to modify the Minneapolis Class B airspace area. This action (depicted on the attached chart) proposes to expand the southern boundary of the existing Area D extensions by approximately 1 NM to the south, lower the floor of portions of existing Class B airspace Area E abeam both sides of the existing Area D extensions by 1,000 feet MSL, reduce the southern boundary of existing Area E located southeast of MSP by 1 NM and combine the remaining airspace of that portion of Area E with existing Area F, and move the eastern boundary of existing Area F from the GEP 160° radial to the GEP 158° radial between 24 NM and 30 NM from the I–MSP DME navigation aid. These proposed modifications would provide the minimum additional airspace needed to contain large turbine-powered aircraft conducting instrument procedures within the confines of Class B airspace.

Except for Areas A, B, and C, the proposed descriptions of all other Minneapolis Class B airspace subareas would be reconfigured, re-described, and realigned by geographic position in relation to the I–MSP DME antenna rather than the previous practice of combining geographically separate areas that share common Class B airspace altitude floors into one large, complex subarea description. The current MSP Class B airspace area consists of six subareas (A through F) whereas the proposed configuration would consist of ten subareas (A through J). The proposed revisions to the Minneapolis Class B airspace area, by subarea, are outlined below.

Area A. Area A is the surface area that extends upward from the surface to 10,000 feet MSL in the Class B airspace contained in the current Area A. The FAA is not proposing any changes to Area A.

Area B. Area B extends upward from 2,300 feet MSL to 10,000 feet MSL in the Class B airspace contained in the current Area B. The FAA is not proposing any changes to Area B.

Area C. Area C extends upward from 3,000 feet MSL to 10,000 feet MSL in the Class B airspace contained in the current Area C. The FAA is not proposing any changes to Area C.

Area D. Area D would be revised to include the airspace extending upward from 4,000 feet MSL to 10,000 feet MSL in the Class B airspace contained in the current Area D with the southern boundary of the Class B airspace extensions moved approximately 1 NM to the south. The expanded southern boundary of the new Area D extensions would ensure containment of aircraft flying the southern traffic pattern downwind legs for Runway 12R and 30L instrument procedures within Class B airspace.

Area E. Area E would be revised to include the airspace extending upward from 6,000 feet MSL to 10,000 feet MSL between the GEP 295° radial clockwise to the GEP 352° radial and the 20 NM to 30 NM arcs from the I–MSP DME. This new subarea would lower a portion of existing Class B airspace contained in the current Area E by 1,000 feet MSL to ensure containment of aircraft that require a longer time/distance to descend for sequence to closely spaced, adjacent instrument approaches to Runways 12L and 12R within Class B airspace.

Area F. Area F would include the airspace extending upward from 7,000 feet MSL to 10,000 feet MSL between the GEP 085° radial clockwise to the GEP 105° radial and the 20 NM to 30 NM arcs from the I–MSP DME. This new subarea would be established in existing Class B airspace contained in the current Area E.

Area G. Area G would include the airspace extending upward from 6,000 feet MSL to 10,000 feet MSL between the GEP 105° radial clockwise to the GEP 115° radial and the 20 NM to 30

NM arcs from the I–MSP DME. This new subarea would lower a portion of existing Class B airspace contained in the current Area E by 1,000 feet MSL to ensure containment of aircraft that require a longer time/distance to descend for sequence to closely spaced, adjacent instrument approaches to Runways 30L and 30R within Class B airspace.

Area H. Area H would include the airspace extending upward from 6,000 feet MSL to 10,000 feet MSL in the existing Class B airspace contained in current Area F and a portion of current Area E located southeast of MSP. This new subarea would expand the eastern boundary of the current Area F to the GEP 158° radial, reduce the southern boundary of the portion of current Area E to the 24 NM arc from the I–MSP DME, and lower the Class B airspace floor in the remaining portion of the current Area E to match the Class B airspace floor in the current Area F. The new subarea would ensure containment of aircraft flying the Runway 35 procedures and associated traffic patterns, as well as the aircraft being re-sequenced from Runway 35 to Runway 30L approaches, within Class B airspace.

Area I. Area I would include the airspace extending upward from 7,000 feet MSL to 10,000 feet MSL between the GEP 170° radial clockwise to the FCM 270° radial and the 20 NM to 30 NM arcs from the I–MSP DME. This new subarea would be established in existing Class B airspace contained in the current Area E.

Area J. Area J would include the airspace extending upward from 6,000 feet MSL to 10,000 feet MSL between the FCM 270° radial clockwise to the FCM 294° radial and the 20 NM to 30 NM arcs from the I–MSP DME. This new subarea would lower a portion of existing Class B airspace contained in the current Area E by 1,000 feet MSL to ensure containment of aircraft that require a longer time/distance to descend for sequence to closely spaced, adjacent instrument approaches to Runways 12L and 12R within Class B airspace.

Finally, this proposed action would update the Minneapolis-St. Paul International (Wold-Chamberlain) Airport reference point, the Gopher VORTAC, the Flying Cloud VOR/DME, and the Minneapolis-St. Paul International (Wold-Chamberlain) Airport DME geographic coordinates (latitude/longitude) to reflect current NAS data is reflected in the Minneapolis Class B airspace area legal description header. The geographic coordinates in this proposal are stated in degrees, minutes, and seconds based on North American Datum 83.

Implementation of these proposed modifications to the Minneapolis Class B airspace area would ensure containment of large turbine-powered aircraft within Class B airspace as required by FAA directive to enhance safety and the efficient management of aircraft operations in the Minneapolis, MN, terminal area.

Class B airspace areas are published in paragraph 3000 of FAA Order 7400.9W, Airspace Designations and Reporting Points, dated August 8, 2012, and effective September 15, 2012, which is incorporated by reference in 14 CFR section 71.1. The Class B airspace area listed in this document would be published subsequently in the Order.

Regulatory Evaluation Summary

Changes to Federal regulations must undergo several economic analyses. First, Executive Order 12866 and Executive Order 13563 directs that each Federal agency shall propose or adopt a regulation only upon a reasoned determination that the benefits of the intended regulation justify its costs. Second, the Regulatory Flexibility Act of 1980 (Pub. L. 96–354) requires agencies to analyze the economic impact of regulatory changes on small entities. Third, the Trade Agreements Act (Pub. L. 96–39) prohibits agencies from setting standards that create unnecessary obstacles to the foreign commerce of the United States. In developing U.S. standards, the Trade Act requires agencies to consider international standards and, where appropriate, that they be the basis of U.S. standards. Fourth, the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4) requires agencies to prepare a written assessment of the costs, benefits, and other effects of proposed or final rules that include a Federal mandate likely to result in the expenditure by State, local, or tribal governments, in the aggregate, or by the private sector, of $100 million or more annually (adjusted for inflation with base year of 1995). This portion of the preamble summarizes the FAA's analysis of the economic impacts of this proposed rule.

Department of Transportation Order DOT 2100.5 prescribes policies and procedures for simplification, analysis, and review of regulations. If the expected cost impact is so minimal that a proposed or final rule does not warrant a full evaluation, this order permits that a statement to that effect and the basis for it be included in the preamble if a full regulatory evaluation of the cost and benefits is not prepared. Such a determination has been made for this proposed rule. The reasoning for this determination follows:

This action proposes to modify the Minneapolis, MN, Class B airspace area to contain large turbine-powered aircraft conducting published instrument procedures within Class B airspace, and reduce the potential for midair collisions. Given the current boundaries and changes in MSP traffic flows and aircraft descent profiles since the last restructuring, instrument flight rules (IFR) flights are not contained within Class B airspace. This amendment would restructure the airspace to ensure containment of these aircraft within Class B airspace which would reduce the potential for midair collisions in the terminal area. The amendment would also reduce controller workload by reducing the number of Class B airspace excursions.

The proposed restructuring accommodates aircraft approaches on flight paths that are currently close to the Class B airspace boundaries, by proposing these boundaries be moved slightly. Also, since the last restructuring of the airspace, the fleet mix has changed from more rapidly descending aircraft to turbojets with more ''efficient wings'' which require a longer time to descend. To better contain these new turbojets, the amendment proposes lowering the floor of the Class B airspace in the areas where arriving aircraft currently drop beneath the floor of Class B airspace so they would be contained. Also, the original Class B airspace design does not contain a portion of one of the FACs within the existing Class B airspace and consequently aircraft traveling along this FAC exit Class B airspace for part of the descent. The rule proposes moving the Class B boundary and lowering the floor in this portion of the airspace so that aircraft using this FAC would be contained within Class B airspace.

The FAA expects these changes would have little impact on VFR traffic as VFR aircraft would have the alternatives of flying under or over the redesigned Class B or through it with clearance from air traffic control. Although there was a comment expressing concern that the proposed modifications would restrict general aviation flight around the Twin Cities area, in particular near Airlake Airport (LVN), the FAA notes that LVN is a significant distance from the proposed modifications and there should be no impact to general aviation traffic in that area. Furthermore, the Ad Hoc Committee which was formed to review the Class B airspace proposal and provide feedback to the FAA reported

most of the proposed changes would have little or no impact on the aviation community they represented, including non-participating VFR aircraft, with the exception of the cutout near Stanton Airfield. The committee did however indicate the proposed modifications would impact the Minnesota Soaring Club and Stanton Sport Aviation operations and provided six recommendations to alleviate the potential impact. Additionally, the FAA held several fact finding informal airspace meetings. As a result of the Ad Hoc Committee and informal airspace meeting inputs, the FAA incorporated those recommendations and comments that supported containment of IFR traffic within Class B airspace with an expected minimal impact on non-participatory VFR operations. The FAA anticipates the proposed modifications would continue to allow sufficient airspace for VFR operations in the vicinity of the Minneapolis Class B airspace area.

The expected outcome would be a minimal impact with positive net benefits, and a regulatory evaluation was not prepared. The FAA requests comments with supporting justification about the FAA determination of minimal impact.

The FAA has, therefore, determined that this proposed rule is not a ''significant regulatory action'' as defined in section 3(f) of Executive Order 12866, and is not ''significant'' as defined in DOT's Regulatory Policies and Procedures.

Initial Regulatory Flexibility Determination

The Regulatory Flexibility Act of 1980 (Pub. L. 96–354) (RFA) establishes ''as a principle of regulatory issuance that agencies shall endeavor, consistent with the objectives of the rule and of applicable statutes, to fit regulatory and informational requirements to the scale of the businesses, organizations, and governmental jurisdictions subject to regulation. To achieve this principle, agencies are required to solicit and consider flexible regulatory proposals and to explain the rationale for their actions to assure that such proposals are given serious consideration.'' The RFA covers a wide-range of small entities, including small businesses, not-for-profit organizations, and small governmental jurisdictions.

Agencies must perform a review to determine whether a rule will have a significant economic impact on a substantial number of small entities. If the agency determines that it will, the agency must prepare a regulatory flexibility analysis as described in the RFA.

However, if an agency determines that a rule is not expected to have a significant economic impact on a substantial number of small entities, section 605(b) of the RFA provides that the head of the agency may so certify and a regulatory flexibility analysis is not required. The certification must include a statement providing the factual basis for this determination, and the reasoning should be clear.

The proposed rule is expected to improve safety by redefining Class B airspace boundaries and would impose only minimal costs. It is expected to cause little impact on VFR traffic. VFR traffic that might be currently flying in airspace that would be re-designated as Class B airspace would continue to have the option of flying above or below the proposed Class B airspace or obtaining clearance to fly through. The proposed amendment would not require updating of materials outside the normal update cycle. Therefore, the expected outcome would be a minimal economic impact on small entities affected by this rulemaking action.

Therefore, the FAA certifies this proposed rule, if promulgated, would not have a significant impact on a substantial number of small entities. The FAA solicits comments regarding this determination. Specifically, the FAA requests comments on whether the proposed rule creates any specific compliance costs unique to small entities. Please provide detailed economic analysis to support any cost claims. The FAA also invites comments regarding other small entity concerns with respect to the proposed rule.

International Trade Impact Assessment

The Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. Pursuant to these Acts, the establishment of standards is not considered an unnecessary obstacle to the foreign commerce of the United States, so long as the standard has a legitimate domestic objective, such the protection of safety, and does not operate in a manner that excludes imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. The FAA has assessed the potential effect of this proposed rule and determined that it would have only a domestic impact and therefore no effect on international trade.

Unfunded Mandates Assessment

Title II of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4) requires each Federal agency to prepare a written statement assessing the effects of any Federal mandate in a proposed or final agency rule that may result in an expenditure of $100 million or more (in 1995 dollars) in any one year by State, local, and tribal governments, in the aggregate, or by the private sector; such a mandate is deemed to be a ''significant regulatory action.'' The FAA currently uses an inflation-adjusted value of $143.1 million in lieu of $100 million. This proposed rule does not contain such a mandate; therefore, the requirements of Title II of the Act do not apply.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1E, ''Environmental Impacts: Policies and Procedures,'' prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p.389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.9W, Airspace Designations and Reporting Points, dated August 8, 2012, and effective September 15, 2012, is amended as follows:

Paragraph 3000—Subpart B—Class B Airspace

* * * * *

AGL MN B Minneapolis, MN [Amended]

Minneapolis-St. Paul International (Wold-Chamberlain) Airport (Primary Airport)
(Lat. 44°52′55″ N., long. 93°13′18″ W.)
Gopher VORTAC
(Lat. 45°08′44″ N., long. 93°22′23″ W.)

Flying Cloud VOR/DME
(Lat. 44°49′31″ N., long. 93°26′34″ W.)
Minneapolis-St. Paul International (Wold-Chamberlain) Airport DME Antenna (I–MSP DME)
(Lat. 44°52′27″ N., long. 93°12′21″ W.)

Boundaries

Area A. That airspace extending upward from the surface to and including 10,000 feet MSL within a 6 NM radius of I–MSP DME.

Area B. That airspace extending upward from 2,300 feet MSL to and including 10,000 feet MSL within an 8.5 NM radius of I–MSP DME, excluding Area A previously described.

Area C. That airspace extending upward from 3,000 feet MSL to and including 10,000 feet MSL within a 12 NM radius of I–MSP DME, excluding Area A and Area B previously described.

Area D. That airspace extending upward from 4,000 feet MSL to and including 10,000 feet MSL within an area bounded by a line beginning at the intersection of the 20 NM arc of the I–MSP DME and the Gopher VORTAC 301°T/295°M radial; thence clockwise along the 20 NM arc of the I–MSP DME to the Gopher VORTAC 121°T/115°M radial; thence southeast along the Gopher VORTAC 121°T/115°M radial to the 30 NM arc of the I–MSP DME; thence clockwise along the 30 NM arc of the I–MSP DME to the Flying Cloud VOR/DME 124°T/123°M radial; thence northwest along the Flying Cloud VOR/DME 124°T/123°M radial to the 20 NM arc of the I–MSP DME; thence clockwise along the 20 NM are of the I–MSP DME to the Flying Cloud VOR/DME 295°T/294°M radial; thence northwest along the Flying Cloud VOR/DME 295°T/294°M radial to the 30 NM arc of the I–MSP DME; thence clockwise along the 30 NM arc of the I–MSP DME to the Gopher VORTAC 301°T/295°M radial; thence southeast along the Gopher VORTAC 301°T/295°M radial to the point of beginning, excluding Area A, Area B, and Area C previously described.

Area E. That airspace extending upward from 6,000 feet MSL to and including 10,000 feet MSL within an area bounded by a line beginning at the intersection of the 20 NM arc of the I–MSP DME and the Gopher VORTAC 301°T/295°M radial; thence clockwise along the 20 NM arc of the I–MSP DME to the Gopher VORTAC 358°T/352°M radial; thence north along the Gopher VORTAC 358°T/352°M radial to the 30 NM arc of the I–MSP DME; thence counterclockwise along the 30 NM arc of the I–MSP DME to the Gopher VORTAC 301°T/295°M radial; thence southeast along the Gopher VORTAC 301°T/295°M radial to the point of beginning.

Area F. That airspace extending upward from 7,000 feet MSL to and including 10,000 feet MSL within an area bounded by a line beginning at the intersection of the 20 NM arc of the I–MSP DME and the Gopher VORTAC 091°T/085°M radial; thence clockwise along the 20 NM arc of the I–MSP DME to the Gopher VORTAC 111°T/105°M radial; thence southeast along the Gopher VORTAC 111°T/105°M radial to the 30 NM arc of the I–MSP DME; thence counterclockwise along the 30 NM arc of the I–MSP DME to the Gopher VORTAC 091°T/085°M radial; thence west along the Gopher VORTAC 091°T/085°M radial to the point of beginning.

Area G. That airspace extending upward from 6,000 feet MSL to and including 10,000 feet MSL within an area bounded by a line beginning at the intersection of the 20 NM arc of the I–MSP DME and the Gopher VORTAC 111°T/105°M radial; thence clockwise along the 20 NM arc of the I–MSP DME to the Gopher VORTAC 121°T/115°M radial; thence southeast along the Gopher VORTAC 121°T/115°M radial to the 30 NM arc of the I–MSP DME; thence counterclockwise along the 30 NM arc of the I–MSP DME to the Gopher VORTAC 111°T/105°M radial; thence northwest along the Gopher VORTAC 111°T/105°M radial to the point of beginning.

Area H. That airspace extending upward from 6,000 feet MSL to and including 10,000 feet MSL within an area bounded by a line beginning at the intersection of the 20 NM arc of the I–MSP DME and the Flying Cloud VOR/DME 124°T/123°M radial; thence clockwise along the 20 NM arc of the I–MSP DME to the Gopher VORTAC 176°T/170°M radial; thence south along the Gopher VORTAC 176°T/170°M radial to the 30 NM arc of the I–MSP DME; thence counterclockwise along the 30 NM arc of the I–MSP DME to the Gopher VORTAC 164°T/158°M radial; thence north along the Gopher VORTAC 164°T/158°M radial to the 24 NM arc of the I–MSP DME; thence counterclockwise along the 24 NM arc of the I–MSP DME to the Flying Cloud VOR/DME 124°T/123°M radial; thence northwest along the Flying Cloud VOR/DME 124°T/123°M radial to the point of beginning.

Area I. That airspace extending upward from 7,000 feet MSL to and including 10,000 feet MSL within an area bounded by a line beginning at the intersection of the 20 NM arc of the I–MSP DME and the Gopher VORTAC 176°T/170°M radial; thence clockwise along the 20 NM arc of the I–MSP DME to the Flying Cloud VOR/DME 271°T/270°M radial; thence west along the Flying Cloud VOR/DME 271°T/270°M radial to the 30 NM arc of the I–MSP DME; thence counterclockwise along the 30 NM arc of the I–MSP DME to the Gopher VORTAC 176°T/170°M radial; thence north along the Gopher VORTAC 176°T/170°M radial to the point of beginning.

Area J. That airspace extending upward from 6,000 feet MSL to and including 10,000 feet MSL within an area bounded by a line beginning at the intersection of the 20 NM arc of the I–MSP DME and the Flying Cloud VOR/DME 271°T/270°M radial; thence clockwise along the 20 NM arc of the I–MSP DME to the Flying Cloud VOR/DME 295°T/294°M radial; thence northwest along the Flying Cloud VOR/DME 295°T/294°M radial to the 30 NM arc of the I–MSP DME; thence counterclockwise along the 30 NM arc of the I–MSP DME to the Flying Cloud 271°T/270°M radial; thence east along the Flying Cloud 271°T/270°M radial to the point of beginning.

Issued in Washington, DC, on February 6, 2013.

BILLING CODE 4910–13–C

FEDERAL TRADE COMMISSION

16 CFR Part 455

Used Motor Vehicle Trade Regulation Rule

AGENCY: Federal Trade Commission.

ACTION: Extension of time period within which to submit comments.

SUMMARY: On December 17, 2012, the Federal Trade Commission (''FTC'' or ''Commission'') published a **Federal Register** notice soliciting public comments in connection with its issuance of a Notice of Proposed Rulemaking (''NPR'') concerning proposed changes to the Used Motor Vehicle Trade Regulation Rule (''Used Car Rule'' or ''Rule''). The notice stated that comments must be received on or before February 11, 2013. In response to several requests to extend the comment period, the Commission has decided to extend the comment period until March 13, 2013.

DATES: Comments addressing the Used Car Rule must be received on or before March 13, 2013.

ADDRESSES: Interested parties are invited to submit written comments electronically or in paper form. For important information concerning the comments you file, please review the **SUPPLEMENTARY INFORMATION** section below. Comments in electronic form should be filed at the following electronic address: *https://ftcpublic.commentworks.com/ftc/usedcarrulenprm* by following the instructions on the web-based form. Comments in paper form should be mailed or delivered to the following address: Federal Trade Commission, Office of the Secretary, Room H–113 (Annex T), 600 Pennsylvania Avenue NW., Washington, DC 20580, in the manner detailed in the **SUPPLEMENTARY INFORMATION** section below.

FOR FURTHER INFORMATION CONTACT: John C. Hallerud, (312) 960–5634, Attorney, Midwest Region, Federal Trade Commission, 55 West Monroe Street, Suite 1825, Chicago, IL 60603.

SUPPLEMENTARY INFORMATION: The Commission's December 17, 2012, **Federal Register** notice seeks comments on proposed changes to the Rule described in the NPR.[1] The NPR addresses the comments received during its review and invites public comment on the following four proposed changes to the Buyers Guide: Adding boxes to the back of the Buyers Guide where dealers would have the option to indicate manufacturers' and other third-party warranties; adding a statement to the Buyers Guide encouraging consumers to seek vehicle history information and directing consumers to an FTC Web site for more information about vehicle histories; adding catalytic converters and airbags to the List of Systems on the back of the Buyers Guide; and adding a statement in Spanish to the English Buyers Guide directing consumers who cannot read the Buyers Guide in English to ask for a copy of it in Spanish.

The Commission has received letters from the Chair of the Automobiles Working Group of the National Association of Attorneys General, Consumers for Auto Reliability and Safety, the National Association of Consumer Advocates, the Katharine & George Alexander Community Law Center, Santa Clara University School of Law, and National Vehicle Service requesting that the comment period be extended.[2] Among other reasons supporting the request, these organizations cite their need to coordinate their efforts in researching and developing comments to address issues raised by the NPR.

Based on the arguments raised in these requests, the Commission believes that an extension of the initial sixty-day comment period until March 13, 2013, is reasonable. Accordingly, the Commission has decided to extend the comment period set forth in the December 17, 2012, **Federal Register** notice until March 13, 2013.

Interested parties are invited to submit written comments electronically or in paper form. Comments should refer to ''Used Car Rule Regulatory Review, Project No. P087604'' to facilitate the organization of comments. Please note that your comment—including your name and your state—will be placed on the public record of this proceeding, including on the publicly accessible FTC Web site, at *http://www.ftc.gov/os/publiccomments.shtm*.

Because comments will be made public, they should not include any sensitive personal information, such as any individual's Social Security Number; date of birth; driver's license number or other state identification number, or foreign country equivalent; passport number; financial account number; or credit or debit card number. Comments also should not include any sensitive health information, such as medical records or other individually identifiable health information. In addition, comments should not include ''[t]rade secret or any commercial or financial information which is obtained from any person and which is privileged or confidential'' as provided in § 6(f) of the Federal Trade Commission Act (''FTC Act''), 15 U.S.C. 46(f), and FTC Rule 4.10(a)(2), 16 CFR 4.10(a)(2). Comments containing matter for which confidential treatment is requested must be filed in paper form, must be clearly labeled ''Confidential,'' and must comply with FTC Rule 4.9(c).[3]

Because paper mail addressed to the FTC is subject to delay due to heightened security screening, please consider submitting your comments in electronic form. Comments filed in electronic form should be submitted by using the following weblink: *https://ftcpublic.commentworks.com/ftc/usedcarrulenprm* and following the instructions on the web-based form. To ensure that the Commission considers an electronic comment, you must file it on the web-based form at the weblink *https://ftcpublic.commentworks.com/ftc/usedcarrulenprm*. If this Notice appears at *http://www.regulations.gov/#!home;tab=search*, you may also file an electronic comment through that Web site. The Commission will consider all comments that regulations.gov forwards to it. You may also visit the FTC Web site at *http://www.ftc.gov* to read the Notice and the news release describing it.

A comment filed in paper form should include the ''Used Car Rule Regulatory Review, Project No. P087604'' reference both in the text and on the envelope, and should be mailed or delivered to the following address: Federal Trade Commission, Office of the Secretary, Room H–113 (Annex T), 600 Pennsylvania Avenue NW., Washington, DC 20580. The FTC requests that any comment filed in paper form be sent by courier or overnight service, if possible, to avoid security related delays.

The FTC Act and other laws that the Commission administers permit the collection of public comments to consider and use in this proceeding as appropriate. The Commission will consider all timely and responsive public comments that it receives, whether filed in paper or electronic form. Comments received will be available to the public on the FTC Web

[1] 77 FR 7476 (Dec. 17, 2012).

[2] The letters are available on the Commission's Web site at: *http://ftc.gov/os/comments/usedcarrulenprm/index.shtm*.

[3] The comment must be accompanied by an explicit request for confidential treatment, including the factual and legal basis for the request, and must identify the specific portions of the comment to be withheld from the public record. The request will be granted or denied by the Commission's General Counsel, consistent with applicable law and the public interest. *See* FTC Rule 4.9(c), 16 CFR 4.9(c).

site, to the extent practicable, at *http://www.ftc.gov/os/publiccomments.shtm*. As a matter of discretion, the FTC makes every effort to remove home contact information for individuals from the public comments it receives before placing those comments on the FTC Web site. More information, including routine uses permitted by the Privacy Act, may be found in the FTC's privacy policy, at *http://www.ftc.gov/ftc/privacy.htm*.

Comments on the proposed disclosure amendments, which are subject to review under the Paperwork Reduction Act, 44 U.S.C. 3501–3521, additionally should be submitted to the Office of Management and Budget (''OMB''). If sent by U.S. mail, they should be addressed to Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for the Federal Trade Commission, New Executive Office Building, Docket Library, Room 10102, 725 17th Street NW., Washington, DC 20503. Comments sent to OMB by U.S. mail, however, are subject to delays due to heightened security precautions. Thus, comments instead should be sent by facsimile to: (202) 395–5167.

By direction of the Commission.

Donald S. Clark,

Secretary.

BILLING CODE 6750–01–P

FEDERAL TRADE COMMISSION

16 CFR Part 803

Premerger Notification; Reporting and Waiting Period Requirements

AGENCY: Federal Trade Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Commission is proposing amendments to the premerger notification rules (''the Rules'') to provide a framework for the withdrawal of a premerger notification filing under the Hart Scott Rodino Act (''the Act'' or ''HSR''). The Act and Rules require the parties to certain mergers and acquisitions to file reports with the Federal Trade Commission (''the Commission'') and the Assistant Attorney General in charge of the Antitrust Division of the Department of Justice (''the Assistant Attorney General'') (collectively, ''the Agencies'') and to wait a specified period of time before consummating such transactions. The reporting and waiting period requirements are intended to enable these enforcement agencies to determine whether a proposed merger or acquisition may violate the antitrust laws if consummated and, when appropriate, to seek a preliminary injunction in federal court to prevent consummation. This proposed rulemaking sets forth the procedure for voluntarily withdrawing an HSR filing, establishes when an HSR filing will be automatically withdrawn after an electronically submitted filing publicly announcing the termination of a transaction is made with the U. S. Securities and Exchange Commission (''SEC'') under the Securities Exchange Act of 1934 and rules promulgated under that act, and sets forth the procedure for resubmitting a filing after a withdrawal with no additional filing fee.

DATES: Comments must be received on or before April 15, 2013.

ADDRESSES: Interested parties may file a comment online or on paper, by following the instructions in the Request for Comment part of the **SUPPLEMENTARY INFORMATION** section below. Write ''HSR Filing Withdrawals Rulemaking, Project No. P859910,'' on your comment, and file your comment online at *https://ftcpublic.commentworks.com/ftc/hsrruleamendnprm,* by following the instructions on the web-based form. If you prefer to file your comment on paper, mail or deliver your comment to the following address: Federal Trade Commission, Office of the Secretary, Room H–113 (Annex H), 600 Pennsylvania Avenue NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: Robert L. Jones, Deputy Assistant Director, Premerger Notification Office, Bureau of Competition, Room 302, Federal Trade Commission, Washington, DC 20580. Telephone: (202) 326–3100.

SUPPLEMENTARY INFORMATION:

Invitation to Comment

You can file a comment online or on paper. For the Commission to consider your comment, we must receive it on or before April 15, 2013. Write ''HSR Filing Withdrawals Rulemaking, Project No. P859910,'' on your comment. Your comment—including your name and your state—will be placed on the public record of this proceeding, including, to the extent practicable, on the public Commission Web site, at *http://www.ftc.gov/os/publiccomments.shtm*. As a matter of discretion, the Commission tries to remove individuals' home contact information from comments before placing them on the Commission Web site.

Because your comment will be made public, you are solely responsible for making sure that your comment does not include any sensitive personally identifiable information, like any Social Security number, date of birth, driver's license number or other state identification number or foreign country equivalent, passport number, financial account number, or credit or debit card number. You are also solely responsible for making sure that your comment does not include any sensitive health information, like medical records or other individually identifiable health information. In addition, do not include any ''[t]rade secret or any commercial or financial information which is obtained from any person and which is privileged or confidential,'' as provided in Section 6(f) of the FTC Act, 15 U.S.C. 46(f), and FTC Rule 4.10(a)(2), 16 CFR 4.10(a)(2). In particular, do not include competitively sensitive information such as costs, sales statistics, inventories, formulas, patterns, devices, manufacturing processes, or customer names.

If you would like the Commission to give your comment confidential treatment, you must file it in paper form, with a request for confidential treatment, and you must follow the procedure explained in FTC Rule 4.9(c), 16 CFR 4.9(c).[1] Your comment will be kept confidential only if the FTC General Counsel, in his or her sole discretion, grants your request in accordance with the law and the public interest.

Postal mail addressed to the Commission is subject to delay due to heightened security screening. As a result, we encourage you to submit your comments online. To make sure that the Commission considers your online comment, you must file it at *https://ftcpublic.commentworks.com/ftc/hsrruleamendnprm,* by following the instructions on the web-based form. If this Notice appears at *http://www.regulations.gov/#!home;tab=search,* you also may file a comment through that Web site.

If you file your comment on paper, write ''HSR Filing Withdrawals Rulemaking, Project No. P859910,'' on your comment and on the envelope, and mail or deliver it to the following address: Federal Trade Commission, Office of the Secretary, Room H–113 (Annex H), 600 Pennsylvania Avenue NW., Washington, DC 20580. If possible,

[1] In particular, the written request for confidential treatment that accompanies the comment must include the factual and legal basis for the request, and must identify the specific portions of the comment to be withheld from the public record. *See* FTC Rule 4.9(c), 16 CFR 4.9(c).

submit your paper comment to the Commission by courier or overnight service.

Visit the Commission Web site at *http://www.ftc.gov* to read this Notice and the news release describing it. The FTC Act and other laws that the Commission administers permit the collection of public comments to consider and use in this proceeding as appropriate. The Commission will consider all timely and responsive public comments that it receives on or before April 15, 2013. You can find more information, including routine uses permitted by the Privacy Act, in the Commission's privacy policy, at *http://www.ftc.gov/ftc/privacy.htm*.

Statement of Basis and Purpose

Section 7A(d)(1) of the Act, 15 U.S.C. 18a(d)(1), directs the Commission, with the concurrence of the Assistant Attorney General, in accordance with the Administrative Procedure Act, 5 U.S.C. 553, to require that premerger notification be in such form and contain such information and documentary material as may be necessary and appropriate to determine whether the proposed transaction may, if consummated, violate the antitrust laws. In addition, Section 7A(d)(2) of the Act, 15 U.S.C. 18a(d)(2), grants the Commission, with the concurrence of the Assistant Attorney General, in accordance with 5 U.S.C. 553, the authority to define the terms used in the Act and prescribe such other rules as may be necessary and appropriate to carry out the purposes of Section 7A.

In this proposed rulemaking, the Commission proposes adding § 803.12 to set forth the procedure for voluntarily withdrawing an HSR filing, establish when an HSR filing will be automatically withdrawn after a filing publicly announcing the termination of a transaction is made on EDGAR, the Electronic Data Gathering, Analysis, and Retrieval system where companies who file reports with the SEC must make such submissions, and set forth the procedure for resubmitting a filing with no additional filing fee after a withdrawal. Additionally, the Commission proposes adding § 803.9(f) to establish that no additional filing fee is required when § 803.12(c) is utilized.

Part 803—Transmittal Rules

Section 803.12 Withdraw and Refile Notification.

Since the beginning of the HSR program, the Agencies have allowed HSR filers to withdraw their notification filing at any time. To set forth the procedure, and to require automatic withdrawal of a notification filing in certain circumstances in which an SEC filing is made publicly announcing the termination of a transaction, this rulemaking proposes adding rule § 803.12.

A. Voluntary Withdrawal

Under proposed rule § 803.12(a), at any time, an acquiring person, or in transactions to which § 801.30 does not apply (a ''non-§ 801.30 transaction''), an acquiring or an acquired person, may withdraw its notification by notifying the FTC and the Antitrust Division in writing. Doing so will nullify the filing and terminate the pendency of any formal Request for Additional Information (''Second Request'') if substantial compliance has not been certified. If the transaction has been granted early termination or the initial or extended waiting period has expired, the one year period that parties have under § 803.7(a) to consummate the transaction will terminate. If the parties wish to pursue the acquisition at a future date, new notifications and a new filing fee will be required (unless the withdraw-refile procedure in paragraph (c) of § 803.12 is utilized), and a new waiting period must be observed prior to consummation of the acquisition.

B. Automatic Withdrawal

The Agencies have a strong interest in ensuring that they do not expend scarce resources on hypothetical transactions. The affidavit requirements of § 803.5 provide assurance that at the time of filing, a transaction is not hypothetical. When parties to a transaction make an HSR filing, the filing must include an affidavit attesting, in the case of a tender offer under § 801.30, that the intention to make the tender offer has been publicly announced, and in the case of a non-§ 801.30 transaction, that a contract, agreement in principle or letter of intent has been executed. The affidavit must also attest to a good faith intention to proceed with the transaction. As the Commission stated when it issued § 803.5:

> Two considerations motivate the inclusion of subparagraph (a)(2) and paragraph (b), which require a good faith intention to make the acquisition, public announcement of tender offers, and execution of a contract, agreement in principle or letter of intent. First, those provisions ensure that the parties intend to consummate the acquisition, and are not using notification as a means of testing the agencies' enforcement intentions. Because of the time and resource constraints upon the agency staffs, the agencies could not tolerate review of hypothetical transactions. Second, the requirement assures that the forms will contain sufficiently definitive information about the transaction to permit accurate analysis.

43 FR 33450 (July 31, 1978).

After the HSR filings are made, circumstances may change so that the transaction becomes hypothetical in that the factual basis for the § 803.5 affidavit no longer exists: the tender offer may have expired, been terminated, or been withdrawn, or the agreement between the parties may have been terminated. The Agencies have encountered some such instances where the parties do not withdraw their filing and continue to move forward with the HSR process, for example, by moving ahead with second request compliance. This can happen where, in the § 801.30 context, despite the tender offer having expired, been terminated, or been withdrawn, the offeror indicates that it may launch another offer in the future; it can also happen in non-§ 801.30 transactions where a merger agreement has been terminated, yet the parties state that they hope to negotiate another. In these instances, the investigating Agency is forced to expend scarce resources on what has become a hypothetical transaction.

Proposed rule § 803.12(b) addresses this problem by linking the HSR filing with disclosures required by the SEC under the Securities Exchange Act of 1934 (15 U.S.C. 78a et seq.) and rules promulgated under that act. Under those SEC disclosure requirements, when the terms or conditions of a tender offer have not been met and subsequently the tender offer has expired, is terminated or has otherwise been withdrawn, the offeror must file an amendment to its Schedule TO filing with the SEC. This amended filing brings the current tender offer to a definitive end and if the offeror wishes to launch another tender offer, it must start the process from the beginning by filing a new Schedule TO. Similar disclosure requirements exist for acquisitions outside of the § 801.30 tender offer context, those that are instead the subject of an agreement between the parties. In the case of non-§ 801.30 transactions, if the parties terminate a definitive material agreement, they must file a Form 8–K with the SEC disclosing the termination of the agreement. If the parties subsequently become interested in moving forward with the transaction once again and sign another definitive material agreement, they must file a new Form 8–K with the SEC.[2]

[2] Parties also may file a Form 8–K voluntarily to announce the entry into, or termination of, agreements, including letters of intent. Under this proposed rulemaking, such voluntary disclosures of

Continued

The SEC disclosure requirements in both the § 801.30 tender offer and the non-§ 801.30, non-tender offer context are clear. Once these termination disclosures are made with the SEC, the parties' transaction as filed with the Agencies has become hypothetical because the factual basis for a § 803.5 affidavit no longer exists. At this point, the parties would not be able to execute the affidavit required by § 803.5 without taking additional steps. In the case of a tender offer under § 801.30, the acquiring person would have to make a public announcement concerning its intent to commence a tender offer in order to execute the affidavit. In the case of a non-§ 801.30 transaction, the parties would have to execute a letter of intent or some other agreement in order to execute the affidavit.

The Commission proposes using the SEC's disclosure requirements to establish a bright line trigger for the automatic withdrawal of an HSR filing. In the case of tender offers under § 801.30, any time a tender offer has expired, is terminated or has otherwise been withdrawn that results in the filing of an amended Schedule TO with the SEC, the Commission proposes that the associated HSR filing will be automatically withdrawn. The Commission also proposes that the same concept would apply to non-§ 801.30 transactions, such that any time an agreement between the parties is terminated that results in the filing of a Form 8–K with the SEC, the associated HSR filing will be automatically withdrawn. In both cases, the Commission proposes that the associated HSR filing would be automatically withdrawn on the date of the filing with the SEC and that the parties must notify the Agencies by letter when the SEC filing is made. Any subsequent transaction between the parties, if otherwise reportable, would be subject to a new HSR filing and a new filing fee (unless the special circumstances of § 803.12(c) apply).

At the same time, the Commission recognizes that there will be instances where transactions that trigger SEC disclosure requirements should not result in the automatic withdrawal of an HSR filing. If the Agencies have already completed an investigation of a transaction, the expiration or withdrawal of a tender offer or the termination of an acquisition agreement does not affect the Agencies' ability to allocate resources. Thus, the Commission proposes three exceptions for transactions that have not been or are no longer being investigated.

The Commission proposes that the associated HSR filing will not be automatically withdrawn:

(1) If the initial waiting period has expired without issuance of a request for additional information or documentary material and without an agreement in place with the Agencies to delay closing of the transaction (''a timing agreement''); or

(2) If early termination of that waiting period has been granted, without a timing agreement in place; or

(3) If a second request has been issued, and the Agencies have either granted early termination or allowed the extended waiting period to expire following certification of compliance without a timing agreement in place.

The Commission understands that withdrawal procedures in this proposed rulemaking will not result in an automatic withdrawal in all instances in which a transaction becomes hypothetical. For instance, parties can make an HSR filing for a non-§ 801.30 transaction on the basis of a letter of intent without having to make a mandatory filing of a Form 8–K with the SEC upon termination and may choose not to do so voluntarily. In addition, tender offers for non-public companies that are not large enough or widely enough held to be covered by the SEC disclosure requirements would not trigger the need to file an amended Schedule TO upon termination. Finally, tender offers for foreign companies that do not have sufficient U.S. ownership and may therefore be exempt from the SEC disclosure requirements would not trigger the need to file an amended Schedule TO upon termination.

The Commission believes the benefit of the approach outlined in this proposed rulemaking will outweigh any additional burden on the parties. The proposal provides a bright line test that will better allow the Agencies to allocate their scarce resources so as to avoid expending resources on transactions where SEC filings demonstrate that the transaction has become hypothetical.

C. Resubmission

For years, the Premerger Notification Office (''PNO'') has informally permitted an acquiring person voluntarily to withdraw a pending HSR filing and resubmit it within two business days without paying an additional fee in order to restart the waiting period. This informal procedure benefits the filing parties by providing an additional 15- or 30-day waiting period for the Agencies to review the competitive impact of a transaction without issuing a Second Request. When an acquiring person chooses to withdraw and refile, it must update certain items in its HSR filing, but it retains the same transaction number and does not pay an additional filing fee. Although experienced practitioners are familiar with this procedure, this withdraw and refile procedure has never been formalized. The Commission proposes to do so now through a new rule, § 803.12(c).

When a filing is voluntarily withdrawn by the acquiring person pursuant to proposed § 803.12(a) or the acquiring person's filing is automatically withdrawn pursuant to proposed § 803.12(b) as discussed above, the acquiring person may resubmit the HSR filing without paying an additional fee if the acquiring person complies with certain requirements. The proposed resubmission process may only be used by an acquiring person in the following circumstances:

(1) The proposed acquisition must not have changed in any material way. For instance, if it is an asset transaction, the resubmitted HSR filing cannot involve additional assets. If it is a voting securities transaction, the resubmitted HSR filing cannot involve a higher notification threshold;

(2) The resubmitted HSR filing must be recertified, and Items 4(a), 4(b), 4(c), and 4(d) must be updated;

(3) The resubmitted HSR filing must include a new executed affidavit as required by § 803.5; and

(4) The resubmitted HSR filing must be refiled with both Agencies prior to the close of the second business day after withdrawal.

The procedure above is straightforward and based on the existing informal process. The refiling must involve the same transaction, include an updated Item 4, and be made within two business days after withdrawal. The requirement that the acquiring person must submit a new certification assures the accuracy of the HSR filing. In submitting a new affidavit, the acquiring person must attest, in the case of a tender offer under § 801.30, that the intention to make the tender offer has been publicly announced, and in the case of a non-§ 801.30 transaction, that a contract, agreement in principle or letter of intent has been executed, as well as attest to its good faith intention to proceed with the transaction.

If the requirements of proposed § 803.12(c) are met, no new filing fee will be assessed and the PNO will assign the same HSR transaction number to the resubmitted HSR filing.

termination would be treated the same way as a mandatory Form 8–K filing disclosing the termination of a definitive material agreement.

The new waiting period will commence on the same day the resubmitted notification filing is received. Withdrawal, whether voluntary or automatic, and resubmission without the payment of an additional fee, will only be permitted once.

It has been the longstanding position of the Agencies that only the acquiring person may avail itself of refiling. If the acquired person, in the case of an acquisition to which § 801.30 does not apply, withdraws its notification under paragraph (a) or its filing is automatically withdrawn under paragraph (b) of this section, no resubmission under paragraph (c) of this section is available.

Section 803.9 Filing Fee

In previous rulemakings, the Commission has addressed other instances in which a filing fee is technically required but is not necessary, given the parameters of the specific situation. For example, the Commission has stated:

> In transactions in which there are two acquiring persons that would have the same responses to Items 5–8 of the Notification and Report Form, those two acquiring persons would have no significant business activities outside of the jointly controlled acquisition vehicle. Accordingly, the agencies are again essentially reviewing one transaction and a single filing fee seems appropriate. Eliminating the double fee for these transactions is non-controversial and benefits potential filing parties.

66 FR 8680 (February 1, 2001). In the instance above, although there are two acquiring persons and two fees are technically required, a single fee is appropriate because it is one transaction.

The same basis for eliminating the filing fee applies to a withdrawn filing that is refiled within two business days and meets the other requirements of § 803.12(c). If the acquiring person voluntarily withdraws its filing under § 803.12(a) or faces the automatic withdrawal provision of proposed § 803.12(b), and the Agencies are reviewing a transaction that is the same in all material respects, they face no disadvantage if the acquiring person resubmits within two business days under § 803.12(c). Accordingly, in such a case, no new fee would be required.

Communications by Outside Parties to Commissioners and Their Advisors

Written communications and summaries or transcripts of oral communications respecting the merits of this proceeding from any outside party to any Commissioner or Commissioner's advisor will be placed on the public record. 16 CFR 1.26(b)(5).

Regulatory Flexibility Act

The Regulatory Flexibility Act, 5 U.S.C. 601–612, requires that the agency conduct an initial and final regulatory analysis of the anticipated economic impact of the proposed amendments on small businesses, except where the Commission certifies that the regulatory action will not have a significant economic impact on a substantial number of small entities. 5 U.S.C. 605. Because of the size of the transactions necessary to invoke an HSR filing, the premerger notification rules rarely, if ever, affect small businesses. The 2000 amendments to the Act exempted all transactions valued at $50 million or less, with subsequent automatic adjustments to take account of changes in GNP resulting in a current threshold of $68.2 million. Further, none of the proposed rule amendments expands the coverage of the premerger notification rules in a way that would affect small business. Accordingly, the Commission certifies that these proposed rules will not have a significant economic impact on a substantial number of small entities. This document serves as the required notice of this certification to the Small Business Administration.

Paperwork Reduction Act

The Paperwork Reduction Act, 44 U.S.C. 3501–3521, requires agencies to submit ''collections of information'' to the Office of Management and Budget (''OMB'') and obtain clearance before instituting them. Such collections of information include reporting, recordkeeping, or disclosure requirements contained in regulations. The existing information collection requirements in the Rules and Form have been reviewed and approved by OMB under Control No. 3084–0005. The current OMB clearance expires on August 31, 2014. The proposed rule amendments in this NPR would have at most, a minor effect on the FTC's current burden estimates. Should these proposed amendments become final, the FTC will submit an adjustment request to OMB to modify the currently cleared burden estimate.[3]

When calculating burden for the proposed amendments, there are two potential scenarios. Under proposed § 803.12(a) and (b), a voluntary or automatic withdrawal of a notification that utilizes the two-day resubmission process under § 803.12(c) does not generate an additional transaction as the acquiring person simply restarts the waiting period on the same transaction. Thus, there is no net increase in the number of transactions. In a § 803.12(b) scenario involving an auto-withdrawn notification that does not utilize the two-day resubmission process under § 803.12(c), a new filing would be required if the parties pursue the transaction at a later date, but the likelihood of this occurring is rare. Based on past experience, this situation occurs approximately once every fifteen years. Effectively, then, this averages out to a small fraction of a single transaction per year that would require non-index HSR filings due to the proposed rule change. The currently cleared estimate for a single non-index filing is 37 hours.[4] *See* 76 FR 42471, 42479 (July 19, 2011). PNO staff believes that this new filing will require the same work and diligence as any new non-index filing. Assuming, then, an average of 37 hours for one transaction, when applied to a traditional frequency of .067 (one every fifteen years), this amounts to an annual average of 3 hours, rounded up. Applied to an assumed hourly wage or rate of $460/hour for an executive or attorney's handling, associated labor cost would approximate $1,380.

PNO staff believes that any incremental capital/non-labor costs presented by the proposed amendments would be marginal. Businesses subject to the Rules generally have or would obtain necessary equipment for other business purposes. Staff believes that the existing requirements (and proposed extension to certain additional

[3] The currently cleared burden hours total is 53,756, calculated as follows: [(1,428 non-index filings × 37 hours) + (22 transactions requiring more precise valuation × 40 hours) + (20 index filings × 2 hours)]. *See* 76 FR 42471, 42479 (July 19, 2011). The instant proposed amendments, as detailed below, would incrementally add no more than 3 hours to this total. Separately, the FTC has estimated incremental PRA burden of 2,664 hours for the Commission's proposed amendments to sections 801.1 and 801.2 of the Rules that would reflect the longstanding staff position that a transaction involving the transfer of exclusive rights to a patent in the pharmaceutical industry is potentially reportable under the Act. *See* 77 FR 50057 (August 20, 2012).

[4] ''Index'' filings pertain to banking transactions, and thus would not be affected by the proposed amendments. Index filings are incorporated, however, into the FTC's currently cleared burden estimates (the FTC has jurisdiction over the administration of index filings). They are mentioned here to distinguish them from and to further explain what a ''non-index'' filing is. Clayton Act Sections 7A(c)(6) and (c)(8) exempt from the requirements of the premerger notification program certain transactions that are subject to the approval of other agencies, but only if copies of the information submitted to these other agencies are also submitted to the Agencies. Thus, parties must submit copies of these ''index'' filings, but completing the task requires significantly less time than non-exempt transactions (which require ''non-index'' filings), as illustrated by the calculations in footnote 2 above.

transactions) necessitate ongoing, regular training so that covered entities stay current and have a clear understanding of federal mandates. This should constitute a small portion of and be subsumed within the ordinary training that employees receive apart from that associated with the information collected under the Rules and the corresponding HSR Form.

List of Subjects in 16 CFR Part 803

Antitrust.

For the reasons stated in the preamble, the Federal Trade Commission proposes to amend 16 CFR part 803 as set forth below:

PART 803—TRANSMITTAL RULES

■ 1. The authority citation for part 803 continues to read as follows:

Authority: 15 U.S.C. 18a(d).

■ 2. Amend § 803.9 by revising paragraph (a) and adding paragraph (f) to read as follows:

§ 803.9 Filing fee.

(a) Each acquiring person shall pay the filing fee required by the act to the Federal Trade Commission, except as provided in paragraphs (b), (c) and (f) of this section. No additional fee is to be submitted to the Antitrust Division of the Department of Justice.

* * * * *

(f) For a transaction described by paragraph (c) of § 803.12, the parties shall pay no additional filing fee.

■ 3. Add § 803.12 to read as follows:

§ 803.12 Withdraw and refile notification.

(a) *Voluntary.* An acquiring person, and in the case of an acquisition to which § 801.30 does not apply, an acquired person, may withdraw its notification by notifying the Federal Trade Commission and the Antitrust Division in writing of such withdrawal.

(b) *Upon public announcement of termination.* An acquiring person's notification or, in the case of an acquisition to which § 801.30 does not apply, an acquiring or an acquired person's notification, will be deemed to have been withdrawn if any filing that publicly announces the expiration, termination or withdrawal of a tender offer or the termination of an agreement or letter of intent is made by the acquiring person or the acquired person with the U.S. Securities and Exchange Commission (''SEC'') under the Securities Exchange Act of 1934 (15 U.S.C. 78a et seq.) and rules promulgated under that act. The acquiring person or acquired person must notify the Federal Trade Commission and the Antitrust Division by letter that such filing has been made with the SEC and the withdrawal shall be deemed effective on the date of the SEC filing. Withdrawal of the HSR notification(s) shall occur even if statements are made in the SEC filing indicating a desire to recommence the tender offer or enter into a new or amended agreement or letter of intent. This paragraph is inapplicable if the initial 15-day or 30-day waiting period has expired without issuance of a request for additional information or documentary material and without an agreement in place with the Agencies to delay closing of the transaction (''a timing agreement''); or early termination of that waiting period has been granted, without a timing agreement in place; or if a request for additional information or documentary material has been issued and the Agencies have either granted early termination or allowed the extended waiting period to expire following certification of compliance without a timing agreement in place.

(c) *Resubmission without a new filing fee.* (1) An acquiring person whose notification has been voluntarily withdrawn pursuant to paragraph (a) of this section, or an acquiring person whose notification is deemed to have been automatically withdrawn under paragraph (b) of this section, may resubmit its notification, thereby initiating a new waiting period for the same transaction without an additional filing fee pursuant to § 803.9(f). This procedure may be used only one time, and only under the following circumstances:

(i) The proposed acquisition does not change in any material way;

(ii) The resubmitted notification is recertified, and the submission, as it relates to Items 4(a), 4(b), 4(c), and 4(d), is updated to the date of the resubmission;

(iii) A new executed affidavit is provided with the resubmitted HSR filing; and

(iv) The resubmitted notification is refiled prior to the close of the second business day after withdrawal.

(2) If the acquired person, in the case of an acquisition to which § 801.30 does not apply, withdraws its notification under paragraph (a) of this section or is automatically withdrawn under paragraph (b) of this section, no resubmission is available under this paragraph.

Examples: 1. A commences a tender offer to acquire 100% of B's voting securities and files a Schedule TO with the SEC and a premerger notification filing with the Federal Trade Commission and the Antitrust Division (''the Agencies''). Subsequently, A decides to withdraw the tender offer and files an amended Schedule TO announcing the withdrawal. A states in its amended filing, designated as a Schedule TO–T/A on EDGAR, the SEC's Electronic Data Gathering, Analysis, and Retrieval system, which announces the tender offer withdrawal that it reserves the right to recommence the tender offer, should circumstances change. A's premerger notification filing is deemed to have been withdrawn on the date of the filing of the Schedule TO–T/A with the SEC.

2. A commences a tender offer for at least 75% of B's voting securities and files a Schedule TO with the SEC stating that the tender offer will expire after 30 days. A also files a premerger notification filing with the Agencies and a request for additional information or documentary material (''Second Request'') is issued. At the end of the 30 day effective period of the tender offer sufficient shares have not been tendered and the tender offer expires. A files a closing Schedule TO–T/A with the SEC announcing the expiration of the tender offer. A's premerger notification filing is deemed to have been withdrawn on the date of the filing of the Schedule TO–T/A with the SEC.

3. A commences a tender offer for 100% of B's voting securities and files a Schedule TO with the SEC stating that shareholders tendering their shares will receive $2.00 per share. During the effective period of the tender offer, A increases the amount it will pay per share to $2.25 and files a Schedule TO–T/A with the SEC announcing the increased share price. A's premerger notification filing is not deemed to have been withdrawn on the date of the filing of the Schedule TO–T/A with the SEC because it is not notifying the SEC that the tender offer has expired or is being withdrawn.

4. A commences a tender offer for 100% of B's voting securities and files a Schedule TO with the SEC. During the effective period of the tender offer, A and B enter into a merger agreement and A files a Schedule TO–T/A with the SEC announcing the withdrawal of the tender offer. A's premerger notification filing is deemed to have been withdrawn on the date of the filing of the Schedule TO–T/A with the SEC. A can, however, refile within two business days on the merger agreement, commencing a new waiting period, without paying an additional filing fee, if it meets the requirements of § 803.12(c).

5. A and B enter into a merger agreement conditioned on successful completion of due diligence. A and B file premerger notification filings with

the Agencies and also Form 8–Ks with the SEC announcing they have entered into an agreement to merge. Subsequent findings in the course of due diligence cause A and B to terminate the merger agreement and A files an additional Form 8–K announcing the termination of an agreement. A states that it may seek to enter into a new or amended merger agreement with B. A's premerger notification filing is deemed to have been withdrawn on the date of the filing of the Form 8–K announcing the termination of the merger agreement. A can, however, refile within two business days on a new merger agreement, commencing a new waiting period, without paying an additional filing fee, if it meets the requirements of § 803.12(c).

6. A and B enter into a merger agreement and file premerger notification filings with the Agencies and Form 8–Ks with the SEC. Second requests are issued. A and B subsequently certify compliance with the second request, starting the extended waiting period. Prior to the expiration of the extended waiting period, the parties enter into an agreement with the agency conducting the investigation to delay closing of the transaction, allowing the consummation of the acquisition only after 30-days' notice (a ''timing agreement''), and the extended waiting period expires. During the pendency of the timing agreement, A and B terminate the merger agreement and A files a Form 8–K with the SEC announcing the termination of an agreement. A's premerger notification filing is deemed withdrawn on the date of the SEC filing as a result of that filing, even though the extended waiting period has expired and the parties are still within the one year period following that expiration under § 803.7(a). Note that had the extended waiting period expired and no timing agreement had been entered into, a filing with the SEC announcing the termination of the agreement would not result in the withdrawal of A's premerger notification filing.

7. A and B enter into a merger agreement and file premerger notification filings with the Agencies and Form 8–Ks with the SEC. The agencies complete their review and early termination of the initial 30-day waiting period is granted. Prior to the expiration of the one year period following the grant of early termination, A and B terminate the merger agreement and A files a Form 8–K with the SEC announcing the termination of an agreement. A's premerger notification filing is not deemed withdrawn as a result of the SEC filing because the initial 30-day premerger notification waiting period had been granted early termination. Therefore, the parties still have the full one year period prior to the expiration of the notification under § 803.7(a) to consummate the transaction should it be recommenced.

By direction of the Commission.

Donald S. Clark,

Secretary.

Note: The following appendix will not appear in the Code of Federal Regulations.

Concurring Statement of Commissioner Joshua D. Wright Regarding Proposed Amendments to Hart-Scott-Rodino Rules

FTC Matter No. P859910

February 1, 2013.

The Commission has voted today to publish a notice of proposed rulemaking seeking comment on amendments to the Hart-Scott-Rodino (HSR) rules. Under the proposed amendments, HSR filings would be automatically withdrawn upon the submission of an SEC filing that the notified transaction had been terminated.[1] I wish to thank staff in the Premerger Notification Office for their efforts in crafting this proposed rule and their diligent administration of the premerger notification program.

I concur in the Commission's decision because I believe the Commission would benefit from the public's input into this proposed rulemaking. Nevertheless, I am concerned that the proposed rules may impose costs in excess of any potential benefits.

The proposed rulemaking appears to be a solution in search of a problem. The **Federal Register** notice states that the proposed rules are necessary to prevent the FTC and DOJ from ''expend[ing] scarce resources on hypothetical transactions.'' Yet, I have not to date been presented with evidence that any of the over 68,000 transactions notified under the HSR rules have required Commission resources to be allocated to a truly hypothetical transaction. Indeed, it would be surprising to see firms incurring the costs and devoting the time and effort associated with antitrust review in the absence of a good faith intent to proceed with their transaction.

The proposed rules, if adopted, could increase the costs of corporate takeovers and thus distort the market for corporate control. Some companies that had complied with or were attempting to comply with a Second Request, for example, could be forced to restart their antitrust review, leading to significant delays and added expenses. The proposed rules could also create incentives for firms to structure their transactions less efficiently and discourage the use of tender offers. Finally, the proposed new rules will disproportionately burden U.S. public companies; the **Federal Register** notice acknowledges that the new rules will not apply to tender offers for many non-public and foreign companies.

Given these concerns, I hope that interested parties will avail themselves of the opportunity to submit public comments so that the Commission can make an informed decision at the conclusion of this process.

[1] The proposed rulemaking would also codify, with one modification, the existing procedure for pulling and refiling an HSR notification without payment of an additional filing fee. I have no objections to this proposal.

32 CFR Part 199

[Docket ID DOD–2012–HA–0105]

RIN 0720–AB58

TRICARE Revision to CHAMPUS DRG-Based Payment System, Pricing of Hospital Claims

AGENCY: Office of the Secretary, Department of Defense.

ACTION: Proposed rule.

SUMMARY: This rule proposes to change TRICARE's current regulatory provision for hospital claims priced under the DRG-based payment system. Claims are currently priced by using the rates and weights that are in effect on a beneficiary's date of admission. This rule proposes to change that provision to price such claims by using the rates and weights that are in effect on a beneficiary's date of discharge.

DATES: Written comments received at the address indicated below by April 15, 2013 will be accepted.

ADDRESSES: You may submit comments, identified by docket number and or Regulatory Information Number (RIN) number and title, by either of the following methods:

- *Federal eRulemaking Portal: www.regulations.gov.* Follow the instructions for submitting comments.
- *Mail:* Federal Docket Management System Office, 4800 Mark Center Drive, East Tower, Suite 02G09, Alexandria, VA 22350–3100.

Instructions: All submissions received must include the agency name and

docket number or RIN for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the Internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: Ms. Amber Butterfield, TRICARE Management Activity, Medical Benefits and Reimbursement Systems, telephone (303) 676–3565.

SUPPLEMENTARY INFORMATION:

Executive Summary and Overview

I. Purpose of the Regulatory Action

This rule proposes to amend the TRICARE/CHAMPUS regulatory provision of pricing hospital claims that are reimbursed under the DRG-based payment system from the beneficiary's date of admission, to pricing such claims based on the beneficiary's date of discharge.

The TRICARE/CHAMPUS DRG-based payment system applies to hospitals, unless such hospital is exempt by regulation from the payment system. Under the TRICARE DRG-based payment system, payment for the operating costs of inpatient hospital services subject to the payment system are made on the basis of prospectively determined rates.

The TRICARE DRG-based payment system is modeled on the Medicare Inpatient Prospective Payment System (IPPS). Although many of the procedures in the TRICARE DRG-based payment system are similar or identical to the procedures in the Medicare IPPS, the actual payment amounts, DRG weights, and certain procedures are different. This is necessary because of the differences in the two programs, especially in the beneficiary population.

Since the inception of the DRG-based payment system in 1987, claims have been priced following the beneficiary's discharge by the hospital, but using the rules, weights, and rates that were in effect on the beneficiary's date of admission. That is, claims submitted for the beneficiary's inpatient stay are grouped to a specific DRG, and the pricing (*i.e.,* payment rate) is determined by using the rules, weights and rates that were in effect on the date of the beneficiary's admission to the hospital. The August 31, 1988, Final Rule (53 FR 33461) published in the **Federal Register** explains TRICARE's decision to utilize the date of admission to price claims. Using the date of admission to price claims allowed hospitals to be reimbursed for inpatient services under the same payment methodology they expected to be used when the patient was admitted. Prior to implementation of the DRG-based payment system, the hospital could expect to be reimbursed at the billed charge rate since that was the method TRICARE used to reimburse hospitals at that time. For patients admitted after implementation of the DRG-based payment system, the hospital could expect to be reimbursed using the DRG-based payment system. The Final Rule continues by stating that since certain services were previously excluded from the DRG-based system, but may have already involved an interim bill prior to the effective date of the Final Rule, it would be administratively difficult and fiscally unfair to hospitals, to attempt to reconcile the total payments with the DRG-based allowed amounts. As a result of the analysis at the time, the provision stated, ''except for interim claims submitted for qualifying outlier cases, all claims reimbursed under the CHAMPUS DRG-based payment system are to be priced as of the date of admission, regardless of when the claim is submitted.''

II. Summary of the Major Provisions of the Regulatory Action

The major provision of this proposed rule is to revise TRICARE's regulation on the pricing of claims paid under the DRG-based payment system. Claims are currently priced by using the rates and weights that are in effect on a beneficiary's date of admission. This rule proposes to change that provision to price such claims by using the rates and weights that are in effect on a beneficiary's date of discharge.

In the early stages of the DRG-based payment system, the approach of pricing claims based on the date of the beneficiary's admission to the hospital was an effective operational policy for TRICARE. It is now time, however, to revise this policy to be consistent with industry standards. Medicare and other payers have an operational policy of pricing all claims, to include interim claims, based on the date of discharge. While pricing using the date of discharge applies to all claims, it becomes an issue only for those relatively few claims that span Fiscal Years (FY). That is, if an admission occurs on September 29, 2013, (FY 2013) and the discharge occurs on October 2, 2013, (FY2014) the payment rate is currently based upon the DRG rates and weights in effect on September 29, 2013, (FY2013) rather than on October 2, 2013, (FY2014). Using this same example, if the provisions of this proposed rule are made final and the date of discharge is used to price the claim, the claim will be priced using the rates and weights in place on October 2, 2013, (FY2014). The rates and weights for the DRG-based payment system are updated every FY, and are based on the previous year's TRICARE claims data.

III. Costs and Benefits

The benefits of this change include, aligning TRICARE pricing of hospital claims practices with industry standards and enhancing provider satisfaction because we are following Medicare and industry standards.

There are known cost impacts associated with this change:

1. One-time information technology costs associated with changes to Managed Care Support Contractors' claims processing systems and one time administrative costs associated with the review change order and the assessment of the impact on Claims Operations, Customer Service, Provider Administration and Contracts Maintenance. The total one time information technology and administrative costs is estimated at $88,208.

2. An annual cost of reprocessing interim claims of $2,500.

3. An increase in health care costs to account for using the weights and rates in place on the date of discharge. Using 2009 claims data, it is estimated about 1,200 inpatient claims will span FYs. Consequently, reimbursing using the updated weights and rates in place for the new FYs date of discharge is expected to increase the payment for approximately 1,200 claims with estimated additional cost of $500,000 annually.

4. Total costs for this change equal approximately $600,000.

IV. Regulatory Procedures

Executive Order 12866, ''Regulatory Planning and Review'' and Executive Order 13563, ''Improving Regulation and Regulatory Review''

Section 801 of title 5, United States Code, and Executive Orders 12866 and 13563 require certain regulatory assessments and procedures for any major rule or significant regulatory action, defined as one that would result in an annual effect of $100 million or more on the national economy or which would have other substantial impacts. It has been certified that this rule is not economically significant, and has been reviewed by the Office of Management and Budget as required under the provisions of E.O. 12866.

Public Law 104–4, Section 202, ''Unfunded Mandates Reform Act''

Section 202 of Public Law 104–4, ''Unfunded Mandates Reform Act,'' requires that an analysis be performed to determine whether any federal mandate may result in the expenditure by State, local and tribal governments, in the aggregate, or by the private sector of $100 million in any one year. It has been certified that this proposed rule does not contain a Federal mandate that may result in the expenditure by State, local and tribal governments, in aggregate, or by the private sector, of $100 million or more in any one year, and thus this proposed rule is not subject to this requirement.

Public Law 96–354, ''Regulatory Flexibility Act'' (RFA) (5 U.S.C. 601)

Public Law 96–354, ''Regulatory Flexibility Act'' (RFA) (5 U.S.C. 601), requires that each Federal agency prepare a regulatory flexibility analysis when the agency issues a regulation which would have a significant impact on a substantial number of small entities. This proposed rule is not an economically significant regulatory action, and it has been certified that it will not have a significant impact on a substantial number of small entities. Therefore, this proposed rule is not subject to the requirements of the RFA.

Public Law 96–511, ''Paperwork Reduction Act'' (44 U.S.C. Chapter 35)

This rule does not contain a ''collection of information'' requirement, and will not impose additional information collection requirements on the public under Public Law 96–511, ''Paperwork Reduction Act'' (44 U.S.C. Chapter 35).

Executive Order 13132, ''Federalism''

E.O. 13132, ''Federalism,'' requires that an impact analysis be performed to determine whether the rule has federalism implications that would have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. It has been certified that this proposed rule does not have federalism implications, as set forth in E.O. 13132.

List of Subjects in 32 CFR part 199

Claims, Dental health, Health care, Health insurance, Individuals with disabilities, Military personnel.

Accordingly, 32 CFR Part 199 is amended as follows:

PART 199—[AMENDED]

■ 1. The authority citation for Part 199 continues to read as follows:

Authority: 5 U.S.C. 301; 10 U.S.C. chapter 55.

■ 2. Section 199.14 is amended by revising paragraph (a)(1)(i)(C)(*3*) to read as follows:

§ 199.14 Provider Reimbursement Methods

(a) * * *

(1) * * *

(i) * * *

(C) * * *

(*3*) *Pricing of claims.* All claims reimbursed under the CHAMPUS DRG-based payment system are to be priced as of the date of discharge, regardless of when the claim is submitted.

* * * * *

Dated: February 1, 2013.

Patricia L. Toppings,

OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5001–06–P

ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD

36 CFR Part 1192

RIN 3014–AA42

Rail Vehicles Access Advisory Committee

AGENCY: Architectural and Transportation Barriers Compliance Board.

ACTION: Notice of intent to establish advisory committee.

SUMMARY: We, the Architectural and Transportation Barriers Compliance Board (Access Board), plan to revise and update our accessibility guidelines issued pursuant to the Americans with Disabilities Act for transportation vehicles that operate on fixed guideway systems (e.g., rapid rail, light rail, commuter rail, and intercity rail). We are establishing a Rail Vehicles Access Advisory Committee (Committee) to make recommendations for revisions and updates to the accessibility guidelines. We request applications from interested organizations for representatives to serve on the Committee.

DATES: Submit applications by April 1, 2013.

ADDRESSES: Submit applications by any of the following methods:

- *Mail or Hand Delivery/Courier:* Paul Beatty, Access Board, 1331 F Street NW., Suite 1000, Washington, DC 20004–1111.
- *Fax:* 202–272–0081.
- *Email: rvaac@access-board.gov.*

FOR FURTHER INFORMATION CONTACT: Paul Beatty, Access Board, 1331 F Street NW., Suite 1000, Washington, DC 20004–1111. Telephone: (202) 272–0012 (Voice) or (202) 272–0072 (TTY). Email address: *rvaac@access-board.gov.*

SUPPLEMENTARY INFORMATION: In this notice, ''we,'' ''us'' and ''our'' refer to the Architectural and Transportation Barriers Compliance Board (Access Board).

The Americans with Disabilities Act requires us to issue guidelines to ensure that transportation vehicles covered by the statute are accessible to individuals with disabilities. 42 U.S.C. 12204. Our accessibility guidelines for transportation vehicles form the basis for legally enforceable accessibility standards issued by the U.S. Department of Transportation (DOT). Our accessibility guidelines for transportation vehicles are codified at 36 CFR part 1192; the DOT accessibility standards for transportation vehicles are codified at 49 CFR part 38.

We issued a notice of proposed rulemaking (NPRM) in 2010 to revise and update our accessibility guidelines for buses, over-the-road buses, and vans. 75 FR 43748 (July 26, 2010). The NPRM noted that we would revise and update our accessibility guidelines for transportation vehicles that operate on fixed guideway systems (e.g., rapid rail, light rail, commuter rail, and intercity rail) at a future date. To begin the process of revising and updating our accessibility guidelines for transportation vehicles that operate on fixed guideway systems, we are establishing a Rail Vehicles Access Advisory Committee (Committee) to make recommendations for revisions and updates to the guidelines. We request applications from representatives of the following interests for membership on the Committee:

- Manufacturers of transportation vehicles that operate on fixed guideway systems;
- Transportation providers that operate fixed guideway systems;
- Organizations representing individuals with disabilities; and
- Other entities whose interests may be affected by the accessibility guidelines.

Federal agencies may serve as ex-officio members on the advisory committee.

The number of Committee members will be limited so that the Committee's

work can be accomplished effectively. The Committee will be balanced in terms of interests represented. We encourage organizations with similar interests to submit a single application to represent their interests. Although the Committee will be limited in size, there will be opportunities for the public to present information to the Committee and to comment at each Committee meeting. Federally registered lobbyists may not be appointed to the Committee pursuant to Presidential Memorandum dated June 18, 2010, entitled ''Lobbyists on Agency Boards and Commissions'' (*http://www.whitehouse.gov/the-press-office/presidential-memorandum-lobbyists-agency-boards-and-commissions*).

Applications should be sent to our office at the address listed at the beginning of this notice. There is no specific application form. The application should include the following information:

• Name of the organization;

• Interests represented by the organization;

• Person who will represent the organization and an alternate, and the title, address, telephone number, and email address for the representative and alternate;

• Description of the representative's qualifications, including engineering, technical, and design expertise and knowledge of making fixed guideway systems accessible to individuals with disabilities; and

• Certification that the representative and alternate are not federally registered lobbyists.

Committee members will not be compensated for their service. We may pay travel expenses for a limited number of persons who would otherwise be unable to participate on the Committee. Committee members will serve as representatives of their organizations, not as individuals. Committee members will not be considered special government employees and will not be required to file confidential financial disclosure reports.

After the applications have been reviewed, we will publish a notice in the **Federal Register** announcing the appointment of Committee members and the first meeting of the Committee. The Committee will operate in accordance with the Federal Advisory Committee Act, 5 U.S.C. app 2. All Committee meetings are expected to be held at our office in Washington, DC. Committee meetings will be open to the public. A notice of each Committee meeting will be published in the **Federal Register** at least 15 days in advance of the meeting. Records will be kept of each Committee meeting and made available for public inspection.

David M. Capozzi,

Executive Director.

BILLING CODE 8150–01–P

ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD

36 CFR Part 1195

[Docket No. ATBCB–2012–0003]

RIN 3014–AA40

Medical Diagnostic Equipment Accessibility Standards Advisory Committee

AGENCY: Architectural and Transportation Barriers Compliance Board.

ACTION: Notice of advisory committee meeting.

SUMMARY: The Medical Diagnostic Equipment Accessibility Standards Advisory Committee will hold its fourth meeting. On July 5, 2012, the Architectural and Transportation Barriers Compliance Board (Access Board) established the advisory committee to make recommendations to the Board on matters associated with comments received and responses to questions included in a previously published Notice of Proposed Rulemaking (NPRM) on Medical Diagnostic Equipment Accessibility Standards.

DATES: The Committee will meet on February 26, 2013, from 10:00 a.m. to 5:00 p.m. and on February 27, 2013, from 9:00 a.m. to 2:30 p.m.

ADDRESSES: The meeting will be held at the Access Board's Conference Room, 1331 F Street NW., Suite 800, Washington, DC 20004–1111.

FOR FURTHER INFORMATION CONTACT: Rex Pace, Office of Technical and Information Services, Architectural and Transportation Barriers Compliance Board, 1331 F Street NW., Suite 1000, Washington, DC 20004–1111. Telephone number (202) 272–0023 (Voice); (202) 272–0052 (TTY). Electronic mail address: *pace@access-board.gov*.

SUPPLEMENTARY INFORMATION: On July 5, 2012, the Architectural and Transportation Barriers Compliance Board (Access Board) established an advisory committee to make recommendations to the Board on matters associated with comments received and responses to questions included in a previously published NPRM on Medical Diagnostic Equipment Accessibility Standards. See 77 FR 6916 (February 9, 2012). The NPRM and information related to the proposed standards are available on the Access Board's Web site at: *http://www.access-board.gov/medical-equipment.htm*.

The advisory committee will hold its forth meeting on February 26 and 27, 2013. The agenda includes the following:

• Review of previous committee work;

• Presentations by manufacturers on exam tables and chairs;

• Review and discussion of subcommittee work;

• Continued discussion on transfer surface height and size;

• Continued discussion on transfer support location and configuration;

• Review and discussion on the depth of wheelchair spaces;

• Consideration of issues proposed by committee members; and

• Discussion of administrative issues.

The preliminary meeting agenda, along with information about the committee, is available at the Access Board's Web site (*http://www.access-board.gov/medical-equipment.htm*).

Committee meetings are open to the public and interested persons can attend the meetings and communicate their views. Members of the public will have opportunities to address the committee on issues of interest to them during public comment periods scheduled on each day of the meeting.

The meetings will be accessible to persons with disabilities. An assistive listening system, computer assisted real-time transcription (CART), and sign language interpreters will be provided. Persons attending the meetings are requested to refrain from using perfume, cologne, and other fragrances for the comfort of other participants (see *www.access-board.gov/about/policies/fragrance.htm* for more information). Also, persons wishing to provide handouts or other written information to the committee are requested to provide electronic formats to Rex Pace via email prior to the meetings so that alternate formats can be distributed to committee members.

David M. Capozzi,

Executive Director.

BILLING CODE 8150–01–P

LIBRARY OF CONGRESS

United States Copyright Office

37 CFR Part 201

[Docket No. 2012–1]

Copyright Office Fees

AGENCY: U.S. Copyright Office, Library of Congress.

ACTION: Notice of proposed rulemaking: Extension of reply comment periods.

SUMMARY: The United States Copyright Office is extending the deadline for filing reply comments regarding its notice of proposed rulemaking concerning the establishment of a fee schedule for filing cable and satellite statements of account for use of the statutory licenses that provide for the secondary transmission of broadcast programming by cable and satellite companies.

DATES: Reply comments on the proposed regulation must be received in the Office of the General Counsel of the Copyright Office no later than 5 p.m. Eastern Standard Time (EST) on February 22, 2013.

ADDRESSES: The Copyright Office strongly prefers that reply comments be submitted electronically. A comment submission page is posted on the Copyright Office Web site at *http://www.copyright.gov/docs/newfees/comments/.* The Web site interface requires submitters to complete a form specifying name and other required information, and to upload comments as an attachment. To meet accessibility standards, all comments must be uploaded in a single file in either the Adobe Portable Document File (PDF) format that contains searchable, accessible text (not an image); Microsoft Word; WordPerfect; Rich Text Format (RTF); or ASCII text file format (not a scanned document). The maximum file size is 6 megabytes (MB). The name of the submitter and organization should appear on both the form and the face of the comments. All comments will be posted publicly on the Copyright Office Web site exactly as they are received, along with names and organizations if provided. If electronic submission of comments is not feasible, please contact the U.S. Copyright Office at (202) 707–8380 for special instructions.

FOR FURTHER INFORMATION CONTACT: Megan Rivet, Budget Analyst, or Melissa Dadant, Senior Advisor for Operations and Special Projects, at (202) 707–8350.

SUPPLEMENTARY INFORMATION: On December 6, 2012, the U.S. Copyright Office published a notice of proposed rulemaking (''NPRM'') announcing a revised schedule of fees for filing semi-annual statements of account pursuant to 17 U.S.C. 111, 119, and 122 based upon a new cost study. 77 FR 72,788 (December 6, 2012). Comments to the proposed fees were due on January 7, 2013 and the Office received three comments at that time, including a comment from the National Cable & Telecommunications Association (''NCTA''). The Office previously granted an extension of time to file reply comments to February 15, 2013 in response to NCTA's motion requesting additional time to consider the Office's response to a Freedom of Information Act (''FOIA'') request for the cost studies referenced in the Office's December 6 notice announcing new proposed fees. It appears that more time is necessary to consider this information and the Office is thus extending the time for all stakeholders to file reply comments to 5:00 p.m. EST February 22, 2013.

Dated: February 11, 2013.

Maria A. Pallante,

Register of Copyrights.

Approval and Promulgation of Air Quality Implementation Plans; Massachusetts; Reasonably Available Control Technology for the 1997 8-Hour Ozone Standard

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing approval of State Implementation Plan (SIP) revisions submitted by the State of Massachusetts. These SIP revisions consist of a demonstration that Massachusetts meets the requirements of reasonably available control technology for oxides of nitrogen (NO_X) and volatile organic compounds (VOC) set forth by the Clean Air Act with respect to the 1997 8-hour ozone standard. Additionally, we are proposing approval of updates to two existing regulations limiting emissions of volatile organic compounds. This action is being taken in accordance with the Clean Air Act.

DATES: Written comments must be received on or before March 18, 2013.

ADDRESSES: Submit your comments, identified by Docket ID Number EPA–R01–OAR–2013–0028 by one of the following methods:

1. *www.regulations.gov:* Follow the on-line instructions for submitting comments.
2. *Email: arnold.anne@epa.gov.*
3. *Fax:* (617) 918–0047.
4. *Mail:* ''Docket Identification Number EPA–R01–OAR–2013–0028,'' Anne Arnold, U.S. Environmental Protection Agency, EPA New England Regional Office, Office of Ecosystem Protection, Air Quality Planning Unit, 5 Post Office Square—Suite 100, (Mail Code OEP05–2), Boston, MA 02109—3912.
5. *Hand Delivery or Courier.* Deliver your comments to: Anne Arnold, Manager, Air Quality Planning Unit, U.S. Environmental Protection Agency, EPA New England Regional Office, Office of Ecosystem Protection, Air Quality Planning Unit, 5 Post Office Square—Suite 100, (mail Code OEP05–2), Boston, MA 02109—3912. Such deliveries are only accepted during the Regional Office's normal hours of operation. The Regional Office's official hours of business are Monday through Friday, 8:30 to 4:30, excluding legal holidays.

Instructions: Direct your comments to Docket ID No. EPA–R01–OAR–2013–0028. EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *www.regulations.gov,* including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit through *www.regulations.gov,* or email, information that you consider to be CBI or otherwise protected. The *www.regulations.gov* Web site is an ''anonymous access'' system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to EPA without going through *www.regulations.gov* your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA

cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: All documents in the electronic docket are listed in the *www.regulations.gov* index. Although listed in the index, some information is not publicly available, i.e., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically in *www.regulations.gov* or in hard copy at Office of Ecosystem Protection, U.S. Environmental Protection Agency, EPA New England Regional Office, Office of Ecosystem Protection, Air Quality Planning Unit, 5 Post Office Square—Suite 100, Boston, MA. EPA requests that if at all possible, you contact the contact listed in the **FOR FURTHER INFORMATION CONTACT** section to schedule your inspection. The Regional Office's official hours of business are Monday through Friday, 8:30 to 4:30, excluding legal holidays.

In addition, copies of the State submittals are also available for public inspection during normal business hours, by appointment at the Division of Air Quality Control, Massachusetts Department of Environmental Protection, One Winter Street, 8th Floor, Boston, MA 02108.

FOR FURTHER INFORMATION CONTACT: Bob McConnell, Air Quality Planning Unit, U.S. Environmental Protection Agency, EPA New England Regional Office, 5 Post Office Square, Suite 100 (Mail Code: OEP05–2), Boston, MA 02109–3912, telephone number (617) 918–1046, fax number (617) 918–0046, email *mcconnell.robert@epa.gov.*

SUPPLEMENTARY INFORMATION:

Throughout this document whenever ''we,'' ''us,'' or ''our'' is used, we mean EPA. Additionally, the phrase ''the Commonwealth'' refers to the state of Massachusetts. The following outline is provided to aid in locating information in this preamble.

I. Background and Purpose
II. Summary of Massachusetts' SIP Revisions
III. EPA's Evaluation of Massachusetts' SIP Revisions
a. Evaluation of VOC Requirements
b. Evaluation of NO_X Requirements
IV. Proposed Action
V. Statutory and Executive Order Reviews

I. Background and Purpose

On January 31, 2008, the State of Massachusetts submitted a formal revision to its SIP. The SIP revision consists of information documenting how Massachusetts complied with the reasonably available control technology (RACT) requirements for the 1997 8-hour ozone standard.[1] Additionally, on June 1, 2010, Massachusetts submitted updates to two regulations that limit volatile organic compound (VOC) emissions, one of which further restricted emissions from pressure-vacuum (PV) valves used by gasoline service stations, and another that updates an existing regulation limiting VOC emissions from solvent cleaning operations. The Commonwealth's submittals requested that they be incorporated into the Massachusetts SIP.

Sections 172(c)(1) and 182(b)(2) of the Clean Air Act (CAA) require states to implement RACT in areas classified as moderate (and higher) non-attainment for ozone, while section 184(b)(1)(B) of the Act requires RACT in states located in the ozone transport region (OTR). Specifically, these areas are required to implement RACT for all major VOC and NO_X emissions sources and for all sources covered by a Control Techniques Guideline (CTG). A CTG is a document issued by EPA which establishes a ''presumptive norm'' for RACT for a specific VOC source category. A related set of documents, Alternative Control Techniques (ACT) documents, exists primarily for NO_X control requirements. States must submit rules or negative declarations for CTG source categories, but not for sources in ACT categories. However, RACT must be imposed on major sources of NO_X, and some of those major sources may be within a sector covered by an ACT document.

In 1997, EPA revised the health-based National Ambient Air Quality Standards (NAAQS) for ozone, setting it at 0.08 parts per million (ppm) averaged over an 8-hour time frame. EPA set the 8-hour ozone standard based on scientific evidence demonstrating that ozone causes adverse health effects at lower ozone concentrations and over longer periods of time than was understood when the pre-existing 1-hour ozone standard was set. EPA determined that the 8-hour standard would be more protective of human health, especially with regard to children and adults who are active outdoors and individuals with a pre-existing respiratory disease such as asthma. On April 30, 2004 (69 FR 23858), EPA designated areas attainment or nonattainment with respect to the 1997 8-hour ozone standard. The entire state of Massachusetts was designated nonattainment and classified as moderate, as two nonattainment areas. See 40 CFR 81.322.

On November 29, 2005, EPA published a final rule in the **Federal Register** that outlined the obligations that areas found to be in nonattainment of the 1997 8-hour ozone standard needed to address (see 70 FR 71612). This rule, referred to as the ''Phase 2 Implementation rule,'' contained, among other things, a description of EPA's expectations for states with RACT obligations. The Phase 2 Implementation rule indicated that states could meet RACT through the establishment of new or more stringent requirements that meet RACT control levels, through a certification that previously adopted RACT controls in their SIP approved by EPA under the 1-hour ozone NAAQS represent adequate RACT control levels for 8-hour attainment purposes, or with a combination of these two approaches. In addition, a State must submit a negative declaration in instances where there are no CTG sources.

II. Summary of Massachusetts' SIP Revisions

On January 31, 2008, Massachusetts submitted a demonstration that its regulatory framework for stationary sources meets the criteria for RACT as defined in EPA's Phase 2 Implementation rule. The Commonwealth held a public hearing on the RACT program on January 18, 2008. Massachusetts' RACT submittal notes that its prior statewide designation as nonattainment for the 1-hour ozone standard resulted in the adoption of stringent controls for major sources of VOC and NO_X, including RACT level controls. Therefore, as allowed for within EPA's Phase 2 Implementation rule, much of the Commonwealth's submittal consists of a review of RACT controls adopted under the 1-hour ozone standard and an indication of whether those previously adopted controls still represent RACT under the 1997 ozone standard. Additionally, Massachusetts notes that as a member state of the Ozone Transport Commission (OTC) it works with that organization to identify and adopt, as deemed appropriate, regulations on additional VOC and NO_X categories beyond those for which EPA has issued CTGs or ACT documents.

[1] The Commonwealth's submittal was made to address RACT for the 1997 8-hour ozone standard and does not address the 2008 8-hour ozone standard of 0.075 parts per million.

With regard to VOC controls, the Commonwealth's submittal identifies the specific control measures that have been previously adopted to control emissions from VOC sources, reaffirms negative declarations for some CTG categories, and describes updates being considered to strengthen three VOC control regulations to ensure that they will continue to represent RACT under the 1997 ozone standard. A table named ''Table RACT–1'' within Massachusetts' submittal contains a summary of the state's response to each of the CTG categories that EPA issued through 2006.[2] The table identifies the specific state rule, where relevant, that is in place, and the date that EPA approved the rule into the Massachusetts SIP. A table labeled ''Table RACT–2'' within the Commonwealth's submittal identifies the major VOC sources in the state that are not covered by an ACT or CTG document. The state has issued source-specific orders containing control requirements for the facilities listed in Table RACT–2 of the state's submittal, and all of these have been previously approved into the Massachusetts SIP.

The Commonwealth's submittal notes that no sources exist in the state for some CTG categories. Specifically, Table RACT–1 of Massachusetts' submittal makes negative declarations for the following CTG sectors:

1. Refinery Vacuum Producing Systems, Wastewater Separators, and Process Unit Turnarounds;
2. Leaks from Petroleum Refinery Equipment;
3. Manufacture of Synthetic Pharmaceutical Products;
4. Manufacture of Pneumatic Rubber Tires;
5. Large Petroleum Dry Cleaners;
6. Manufacture of High-Density Polyethylene, Polypropylene and Polystyrene Resins;
7. Natural Gas/Gasoline Process Leaks;
8. Synthetic Organic Chemical Manufacturing Air Oxidation Processes; and
9. Ship Building and Repair.

Massachusetts' review of its control program for sources of VOC concludes that, with the adoption of revised rules for solvent cleaning, Stage II vehicle refueling, and cutback asphalt, all required VOC sources in the state are subject to RACT.

As required, the Commonwealth's submittal addresses NO_X emissions as well as VOC emissions. In their submittal, the Commonwealth explains that in order to address the 1990 CAA NO_X RACT requirement, Massachusetts adopted 310 CMR 7.19, ''Reasonably Available Control Technology (RACT) for Sources of Oxides of Nitrogen (NO_X).'' This rule established NO_X RACT for large, medium and small boilers; stationary combustion turbines; stationary reciprocating internal combustion engines; and glass melting furnaces. In addition, they describe that 310 CMR 7.19(12) provided for single source NO_X RACT determinations for major ''miscellaneous'' NO_X sources with a potential to emit 50 tons or more per year of NO_X. Massachusetts explains that they have reviewed 310 CMR 7.19 and, in general, have determined that the NO_X controls required by 310 CMR 7.19 continue to constitute NO_X RACT under the 1997 8-hour ozone standard for each of the source categories covered by that rule, as well as for major sources of NO_X for which single-source RACT determinations were made pursuant to 310 CMR 7.19(12). Additionally, the Commonwealth certifies in Tables RACT–1 and RACT–2 that current Massachusetts NO_X RACT constitutes 8-hour NO_X RACT under the 1997 ozone standard for the NO_X categories listed and for the facilities for which single-source RACT determinations were made.

Within their submittal, the Commonwealth notes that certain NO_X emitting sectors are controlled by additional sections of Massachusetts' air pollution control regulations. First, Massachusetts notes that electric generation units (EGUs) and large industrial boilers, in addition to requirements contained within 310 CMR 7.19, are also covered by 310 CMR 7.28, ''NO_X Allowance Trading Program,'' and 310 CMR 7.32, ''Massachusetts Clean Air Interstate Rule (Mass CAIR).'' In addition, Massachusetts notes that a subset of the largest fossil fuel-fired EGUs in Massachusetts are also subject to NO_X emission limitations under 310 CMR 7.29, ''Emissions Standards for Power Plants,'' adopted in 2001. Lastly, the Commonwealth notes that municipal waste combustors, in addition to requirements contained within 310 CMR 7.19, are also covered by 310 CMR 7.08, ''Incinerators.''

Massachusetts' review of its control program for major sources of VOC and NO_X thus concludes that, with the adoption of revised rules for solvent cleaning, Stage II vehicle refueling, and cutback asphalt, all major sources in the state are subject to RACT under the 1997 ozone standard.

III. EPA's Evaluation of Massachusetts' SIP Revisions

EPA has reviewed Massachusetts' determination that it has adopted VOC and NO_X control regulations for stationary sources that constitute RACT, and determined that the set of regulations cited by the Commonwealth constitute RACT for purposes of the 1997 8-hour ozone standard. Additionally, we are proposing to approve updates to two VOC RACT regulations submitted by Massachusetts on June 1, 2010.

a. Evaluation of VOC Requirements

Massachusetts' submittal documents the set of VOC control regulations that have been adopted to ensure that RACT level controls are required in the state. These requirements include: 310 CMR 7.18, ''Volatile and Halogenated Organic Compounds;'' and 310 CMR 7.24, ''Organic Material Storage and Distribution.'' Table RACT–1 of the Commonwealth's submittal indicates that Massachusetts has either adopted a regulation that has been incorporated into the SIP to address EPA's pre-2006 CTGs, or submitted a negative declaration in instances where no facilities exist in the state for certain CTGs identified in the submittal. Massachusetts' review of these VOC RACT regulations revealed that several could be strengthened in order to continue to meet RACT, and we address the disposition of those updates further below.

Additionally, Massachusetts has adopted numerous single source RACT orders for major sources of VOC that are not covered by one of EPA's CTGs, and these orders have been submitted to EPA and incorporated into the SIP. They are identified within the Commonwealth's submittal in Table RACT–2. Also, as noted above, Massachusetts adopted, and we are proposing to approve into the Massachusetts SIP, updates to two existing VOC RACT rules, namely the state's existing solvent metal cleaning and Stage II motor vehicle refueling regulations.

The Commonwealth's submittal documents a substantial downward trend in VOC emissions from stationary sources, a portion of which is attributable to RACT controls implemented by Massachusetts. Data collected by Massachusetts from its annual survey of industrial point source emitters reveals that between 1996 and 2002, VOC emissions from industrial point sources declined by 63%. This decline in emissions was brought about,

[2] This rulemaking does not address Massachusetts' response to the CTGs that EPA issued in 2006, 2007, and 2008.

in part, by the RACT program implemented by Massachusetts.

We are proposing approval of updates to the following two VOC RACT regulations described below, which Massachusetts has strengthened such that they continue to represent RACT under the 1997 ozone standard. Although Massachusetts's RACT certification submittal indicates that three existing VOC rules were to be updated in such fashion, only two were updated. Massachusetts updated its existing rules limiting emissions from solvent cleaning (metal degreasing) and emissions from storage tanks at gasoline service stations, but did not update its existing cutback asphalt regulation. These three regulations are discussed individually, as follows.

Solvent Degreasing Rule

Massachusetts updated its previously SIP-approved (58 FR 34911) solvent cleaning rule primarily to include a new requirement limiting the vapor pressure for cold cleaning solvents, as recommended within the Ozone Transport Commission's (OTC's) 2001 model rule for this activity. The requirement applies to cold cleaning degreasers that hold more than one liter of solvent. The Commonwealth's proposed revision includes exemptions for cold cleaning degreasers used in special and extreme metal cleaning, for devices located in a permanent total enclosure with an overall VOC control efficiency of at least 90 percent, and for facilities that receive an approval from the Department of Environmental Protection (DEP) to use a non-compliant solvent due to unsafe operating conditions. We note that with the new vapor pressure limit, the revised rule is more stringent than the previously SIP-approved version of the rule. In particular, Massachusetts estimated that the revised rule would reduce VOC emissions by 7 tons per summer day in 2009 compared to the previously regulated levels.[3] Therefore, the revised rule meets the requirements of section 193 of the CAA, which provides that ''[n]o control requirement in effect * * * before November 15, 1990, in any area which is a nonattainment area for any air pollutant may be modified after November 15, 1990, in any manner unless the modification insures equivalent or greater emission reductions of such air pollutant.'' For similar reasons, the revisions meets the requirements of section 110(l) of the CAA, which prohibits EPA from approving a SIP revision ''if the revision would interfere with any applicable requirement concerning attainment and reasonable further progress * * * or any other applicable requirement of [the Clean Air Act].'' Additionally, we note that the limited number of exemptions from the new vapor pressure requirement is acceptable given that this requirement is above and beyond the RACT recommendation within the EPA's CTG[4] for this source category.

Stage II Rule

The Commonwealth updated its previously adopted, SIP-approved (65 FR 78974) Stage II Vapor Recovery regulation, 310 CMR 7.24(6), primarily to require the use of PV vent caps on vapor balance systems installed on underground gasoline storage tanks to further reduce evaporative emissions from vehicle refueling. A number of additional updates were also made to the rule, including the following items.

The Commonwealth revised definitions for the terms ''isolate,'' ''minor modification,'' ''routine maintenance,'' and ''substantial modification,'' and also proposed new language clarifying requirements that ensure timely repair of Stage II systems. Massachusetts incorporated requirements that compel compliance testing companies to notify the DEP of any facilities that fail a compliance test, and also revised existing requirements for compliance testing companies.

Experience gained from operation of the Stage II program revealed that the compliance benefit attributed to the 120 day in-use compliance testing and certification requirement for vacuum assist systems could be achieved by the weekly visual and annual compliance testing requirement, and so the Commonwealth eliminated the 120 day in-use compliance testing requirement. Additionally, Massachusetts' revisions include an allowance for a facility to commence operation immediately upon passing applicable testing requirements.

When Massachusetts initially adopted its Stage II rule in 1989, it adopted a more stringent applicability level than subsequently required by the CAA amendments of 1990[5] that resulted in essentially all dispensing of gasoline to be subject to the regulation. Because of this, very small levels of gasoline dispensing activity such as that which occurs at salvage yards was covered by the regulation. Therefore, the Commonwealth's revised rule exempts motor vehicle salvage yards that dispense recovered fuel on-site to employee vehicles. By including this exemption, Massachusetts believes that the air quality protections afforded by the rule will not be adversely affected. Given the minimal amount of gasoline that will receive this exemption in comparison to the statewide use of motor vehicle fuel, we agree with the Commonwealth's conclusion.

The Commonwealth's revisions to the Stage II regulation include several provisions relating to requirements put in place by the California Air Resources Board (CARB). These include an allowance for the installation of CARB approved above ground storage tanks, references to CARB Stage II approval letters, and an update to the list of CARB approved Stage II systems to incorporate recently adopted CARB Executive Orders.

Massachusetts also made a number of minor revisions to existing recordkeeping and testing requirements applicable to Stage II system operators. We note that, with the addition of the new PV vent valve requirements, the revised rule is more stringent than the previously SIP-approved rule, even after accounting for the new exemption for motor vehicle salvage yards that dispense recovered fuel on-site to employee vehicles. Therefore, the revision meets the requirements of section 110(l) of the CAA.

The Commonwealth submitted its updated Stage II vapor recovery and solvent cleaning rules to EPA on June 1, 2010, and we are proposing approval of them within this action.

Cutback Asphalt Rule

The Commonwealth's January 31, 2008 submittal indicated that updates were also intended for 310 CMR 7.18(9), the existing cutback asphalt paving rule. However, on January 18, 2013, Massachusetts submitted a letter withdrawing portions of the January 31, 2008 submittal, including the commitment to revise the cutback asphalt rule. The Commonwealth noted in its January 18, 2013 withdrawal letter that on May 29, 2012 (77 FR 31496), EPA issued a final determination that Eastern Massachusetts had attained the 1997 8-hour ozone standard, and on June 19, 2012 (77 FR 36404) issued a similar determination for the Western Massachusetts nonattainment area. Therefore, the Commonwealth indicated

[3] See ''Background Information and Technical Support Document for Proposed Amendments To 310 CMR 7.00 et seq., 310 CMR 7.18, Volatile and Halogenated Organic Compounds, Solvent Metal Degreasing,'' Massachusetts Department of Environmental Protection, October 17, 2008, available in the docket for this rulemaking.

[4] See ''Control of Volatile Organic Emissions from Solvent Metal Cleaning,'' EPA–450/2–77–022; 1977/11.

[5] Section 182(b)(3) of the CAA requires Stage II controls at gasoline dispensing facilities which dispense 10,000 gallons or more per month or 50,000 gallons per month in the case of independent small business marketers.

that it now believes that its existing SIP-approved (58 FR 3495) cutback asphalt regulation continues to represent RACT. Given the circumstances cited above, we concur with this conclusion.

b. Evaluation of NO_X Requirements

Massachusetts' submittal documents the set of NO_X control regulations that have been adopted to ensure that RACT level controls are required in the state. These requirements include the following sections of title 310 of the Code of Massachusetts Regulations:

7.08, "Incinerators;"

7.19, "Reasonably Available Control Technology (RACT) for Sources of Oxides of Nitrogen (NO_X);"

7.28, "NO_X Allowance Trading Program;"

7.29, "Emission Standards for Power Plants;" and,

7.32, "Massachusetts Clean Air Interstate Rule (Mass CAIR)."

Table RACT–1 of the Commonwealth's submittal indicates the regulation that the Commonwealth has adopted, where appropriate, to address EPA's ACTs for NO_X source categories. We note that we have not updated any of the ACT documents noted within Table RACT–1. Massachusetts' submittal addresses NO_X RACT for all major sources in the Commonwealth. For the following sectors for which EPA has published ACT guidelines, Massachusetts's submittal indicates that there are no major sources of NO_X within the Commonwealth: nitric and adipic acid plants; cement plants; and iron and steel manufacturing facilities. Major NO_X sources do exist in Massachusetts for the ACT categories noted within Table RACT–1, and this Table identifies the NO_X RACT regulations the Commonwealth has adopted to address them. These ACT categories include combustion turbines, process heaters, internal combustion engines, industrial-commercial-institutional boilers, and glass manufacturing facilities. Massachusetts' RACT submittal certifies that these regulations represent RACT for purposes of EPA's 1997 8-hour ozone standard. Additionally, Massachusetts has adopted three single source RACT orders for major sources of NO_X that are not covered by one of EPA's ACTs, and these orders, identified in Table RACT–2, have been submitted to EPA and incorporated into the SIP. See 40 CFR 52.1167. Table RACT–1 also lists regulations adopted by the Commonwealth to further control NO_X emissions from electric utility boilers and municipal waste combustors (MWCs), and we discuss these two sectors separately below.

Municipal Waste Combustors

MWCs represent one of the largest NO_X emitting sectors in the Commonwealth, and EPA previously approved RACT requirements for these units within 310 CMR 7.19(9), which became effective in 1995. See 64 FR 48095. More recently, in 2000, the Commonwealth tightened emission limits for eleven of the seventeen MWC units in the Commonwealth via a strengthening of 310 CMR 7.08(2), Incinerators. Massachusetts submitted the updated rule to us, and we approved it as part of the Commonwealth's plan for controlling MWC emissions from existing large MWC plants under Section 111(d) of the CAA on October 9, 2002 (67 FR 62894). Massachusetts noted that the update to section 7.08(2) established emission limits that were equivalent to those within 40 CFR 60 Subpart Cb, which refers to EPA's emission guideline entitled, "Emissions Guidelines and Compliance Times for Large Municipal Waste Combustors that are Constructed on or Before September 20, 1994." The Commonwealth's RACT certification further noted that one unit in Massachusetts is subject to the New Source Performance Standard located at 40 CFR 60 Subpart Eb. In light of the above, we find that the controls on 12 of the 17 units as specified above, in addition to the initial baseline adoption of RACT for MWCs in 1995 pursuant to CMR 7.19(9), demonstrates that the Commonwealth has required an overall RACT level of control for these units.

Electric Utility Boilers

EPA's Phase 2 Ozone Implementation Rule mentioned above addressed various statutory requirements, including the requirement for RACT level controls for sources located within nonattainment areas generally, and controls for NO_X emissions from EGUs in particular. EPA indicated its determination that the regional NO_X emissions reductions that result from either the NO_X SIP Call or the CAIR would meet the NO_X RACT requirement for EGUs located in states included within the respective NO_X SIP Call or the CAIR geographic regions. Thus, EPA concluded that: "[t]he State need not perform a NO_X RACT analysis for sources subject to the State's emission cap-and-trade program where the cap-and-trade program has been adopted by the State and approved by EPA as meeting the NO_X SIP Call requirements or, in States achieving the CAIR reductions solely from electric generating units (EGUs), the CAIR NO_X requirements."[6] Based in part on this existing EPA rule at that time, the Commonwealth certified that the NO_X sources regulated by its NO_X SIP Call and CAIR rules meet the 8-hour ozone RACT requirements for purposes of the 1997 ozone standard.

However, in November 2008, several parties challenged EPA's Phase 2 Ozone Implementation Rule. In particular, they challenged EPA's determination that compliance with the NO_X SIP Call and/or the CAIR could satisfy NO_X RACT requirements for EGUs in nonattainment areas and EPA's determination that compliance with the CAIR could satisfy NO_X RACT for EGUs in ozone nonattainment areas. As a result of this litigation, the Court decided that the provisions in the Phase 2 Ozone Implementation Rule indicating that a state need not perform (or submit) a NO_X RACT analysis for EGU sources subject to a cap-and-trade program that meets the requirements of the NO_X SIP Call are inconsistent with the statutory requirements of section 172(c)(1).[7] The Court specifically held that the Phase 2 Ozone Implementation Rule allowing use of the NO_X SIP call to constitute RACT without any locally applicable analysis regarding the equivalence of NO_X SIP Call and RACT reductions: "is inconsistent with the Clean Air Act * * * in allowing participation in a regional cap-and-trade program to satisfy an area-specific statutory mandate." The Court emphasized that: "the RACT requirement calls for reductions in emissions from sources in the area; reductions from sources outside the nonattainment area do not satisfy the requirement * * * Accordingly, participation in the NO_X SIP call would constitute RACT only if participation entailed at least RACT-level reductions in emissions from sources within the nonattainment area." In view of its decision in *North Carolina* v. *EPA,* in which the Court had previously remanded the CAIR, the court deferred consideration of the litigant's challenge to the Phase 2 Ozone Implementation Rule insofar as they related to the CAIR program. In light of the above, as well as a 2007 petition for reconsideration that EPA granted on this issue as it pertains to CAIR,[8] we do not consider the NO_X SIP call or CAIR to equal NO_X RACT. Rather, consistent

[6] See Phase 2 Ozone Implementation Rule, 70 FR 71617.

[7] See *NRDC* v. *EPA,* 571 F.3d 1245 (D.C. Cir. 2009).

[8] See Earthjustice Petition for Reconsideration of the Clean Air Fine Particle Rule, June 25, 2007. See also April 25, 2011 letter from Lisa P. Jackson to Paul Cort, Earthjustice, responding to the June 25, 2007 petition for reconsideration.

with the above ruling, we have prepared a locally applicable analysis of whether electric utility boilers in the Commonwealth are subject to a RACT level of controls.

Electric utility boilers are subject to the Commonwealth's initial NO_X RACT regulation, 310 CMR 7.19, which was adopted in the mid-1990s. We previously determined that the emission limits within 310 CMR 7.19 required a RACT level of control on these units for purposes of our 1-hour ozone standard. See 64 FR 48095. Massachusetts subsequently acted to further reduce NO_X emissions from these units by participation in several NO_X budget trading programs, and also by enactment of 310 CMR 7.29, ''Emission Standards for Power Plants.''

Regarding NO_X budget trading programs, between 1999 and 2002, Massachusetts participated in the OTC's NO_X Budget Program. Massachusetts implemented this program by adopting 310 CMR 7.27, ''NO_X Allowance Program,'' and submitted this regulation to EPA which we incorporated into the Massachusetts SIP on December 27, 2000 (65 FR 81743). In 2003, the sources covered by the NO_X Allowance Program were transitioned to the Federal NO_X budget program (also referred to as the ''NO_X SIP call'') which Massachusetts implemented by adopting 310 CMR 7.28, ''NO_X Allowance Trading Program.'' Massachusetts submitted this regulation to EPA, and we approved it into the Massachusetts SIP on December 3, 2007 (72 FR 67854). The Federal NO_X budget program achieved significant additional NO_X reductions within Massachusetts from the sources subject to its requirements. In particular, emissions from units within Massachusetts subject to the Federal NO_X budget program reduced ozone season NO_X emissions from 9,265 tons in 2003 to 3,232 tons by 2008, representing a 65% reduction in emissions. Massachusetts then acted to further reduce NO_X emissions from these units by adopting 310 CMR 7.32, ''Massachusetts Clean Air Interstate Rule (Mass CAIR).'' Massachusetts submitted this program to EPA, and we approved it into the SIP on December 3, 2007 (72 FR 67854). By 2011, ozone season NO_X emissions from units within the Commonwealth subject to the CAIR rule decreased by an additional 46%, falling from 3,232 tons in 2008 to 1,760 tons in 2011. The substantial decrease in NO_X emissions from sources in the Commonwealth subject to the Federal NO_X budget and CAIR programs was brought about, in part, by the installation of various types of NO_X emission control equipment of the variety listed in Table 1, below. Although the CAIR program was subject to a number of court challenges, a recent decision by the U.S. Court of Appeals for the District of Columbia issued on August 21, 2012 which vacated the Cross State Air Pollution Rule (CSAPR) provided that until the CSAPR litigation is resolved, the CAIR program remains in effect. (*EME Homer City Generation, L.P.,* v. *EPA,* No. 11–1302. (D.C. Cir. 2012)).

Regarding 310 CMR 7.29, ''Emission Standards for Power Plants,'' the Commonwealth adopted this regulation in 2001, and submitted it to EPA for incorporation into the SIP within a submittal made on December 30, 2011, to address regional haze requirements. We approved the state's submittal, including 310 CMR 7.29, within a final rulemaking signed by the Regional Administrator on September 12, 2012 and forwarded for publication in the **Federal Register**. A copy of the signed approval of the Commonwealth's regional haze SIP is available in the docket for this action. This rule covers the largest fossil fuel-fired EGUs in Massachusetts and required individual emissions units to install additional add-on controls to comply with output-based NO_X emission limits between 2000 and 2008. As of 2009, six operating facilities were subject to this regulation containing 13 EGUs. Annual NO_X emissions for these six facilities dropped from 30,352 tons in 2000 to 7,009 tons in 2009, a drop of 77%. The NO_X controls installed on each unit at these facilities, as listed in their Title V Operating Permit, is contained in Table 1, below. Within Table 1, the following abbreviations are used: LNB for low NO burners; OFA for over-fire air; FGR for flue gas recirculation; SCR for selective catalytic reduction; and SNCR for selective non-catalytic reduction.

TABLE 1—NO_X CONTROLS AT FACILITIES GOVERNED BY 310 CMR 7.29

Facility	Unit	NO_X controls installed	Operating status
Brayton Point	1	LNB, OFA, SCR	Operating.
Brayton Point	2	LNB, OFA	Operating.
Brayton Point	3	LNB, OFA, SCR	Operating.
Brayton Point	4	LNB	Operating.

Canal Station	2	LNB, OFA, FGR, combustion tuning, SNCR	Operating.
Mount Tom	1	LNB, OFA, SCR	Operating.
Mystic	7	None [9]	Operating.
Salem Harbor	1	LNB, SNCR	Retired 1/15/12.
Salem Harbor	2	SNCR	Retired 1/15/12.
Salem Harbor	3	LNB, OFA, SNCR	Operating.
Salem Harbor	4	LNB	Operating.
Somerset	8	OFA, Natural Gas Reburn System, SNCR	Retired 1/2/10.

As previously mentioned, Massachusetts adopted a set of regulations to address NO_X RACT for the 1-hour ozone standard, and we approved those requirements into the Commonwealth's SIP. Since then, Massachusetts has acted to further reduce NO_X emissions from the two largest NO_X emitting sectors in the state, namely municipal waste combustors and electric utility boilers. In light of the above regulatory actions and NO_X control equipment installations and the resulting decrease in NO_X emissions within Massachusetts, in addition to the initial baseline adoption of RACT in CMR 7.19, EPA is proposing approval of Massachusetts' January 31, 2008 SIP certification that the state has adopted air pollution control strategies that represent NO_X RACT for purposes of

[9] RACT requirements for Unit 7 are located at 310 CMR 7.19(4)(a)(3)(a)(i), which requires a NO_X emission limit of 0.25 lbs/mmBtu when burning oil, and pursuant to 310 CMR 7.19(4)(a)(3)(a)(ii) which requires a NO_X emission limit of 0.20 lbs/mmBtu when burning gas. Between 2010 and 2012, the unit was well within these limits, emitting NO_X within a range of 0.06 to 0.08 lbs/mmBtu.

compliance with our 1997 8-hour ozone standard. Our decision is also based, in part, on the fact that both nonattainment areas within the Commonwealth have attained our 1997 8-hour ozone standard by their attainment date of June 15, 2010 as noted in Section IV, Proposed Action.

IV. Proposed Action

EPA is proposing approval of Massachusetts' January 31, 2008 SIP submittal that demonstrates that the state has adopted air pollution control strategies that represent RACT for purposes of compliance with the 1997 8-hour ozone standard. Additionally, we are proposing approval of two revised regulations submitted by Massachusetts on June 1, 2010: 310 CMR 7.18(8), ''Solvent Metal Degreasing;'' and 310 CMR 7.24(6), ''Dispensing of Motor Vehicle Fuel.''

EPA has evaluated the VOC and NO_X stationary source control regulations which Massachusetts contends meets RACT for the 1997 8-hour ozone standard, and determined that a level of control consistent with RACT has been implemented in the state for purposes of the 1997 ozone standard. We do not anticipate any difficulties with enforcing the state's standards, as EPA has previously approved the rules Massachusetts cites as the means by which RACT is implemented. We have determined that these regulatory elements and the resulting reduction in VOC and NO_X emissions from major sources demonstrate that a RACT level of control for both pollutants has been implemented in the state. EPA has previously determined that Massachusetts' two 8-hour ozone nonattainment areas attained the 1997 ozone standard by their attainment date, based on quality-assured air monitoring data. This determination was published on May 29, 2012 (77 FR 31496) for the Eastern Massachusetts nonattainment area, and on June 19, 2012 (77 FR 36404) for the Western Massachusetts nonattainment area. The improvements in air quality represented by these clean data determinations were brought about, in part, by the RACT program implemented by Massachusetts.

EPA is soliciting public comments on the issues discussed in this notice or on other relevant matters. These comments will be considered before taking final action. Interested parties may participate in the Federal rulemaking procedure by submitting written comments to the EPA New England Regional Office listed in the **ADDRESSES** section of this **Federal Register**.

V. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve State choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this proposed action merely approves State law as meeting Federal requirements and does not impose additional requirements beyond those imposed by State law. For that reason, this proposed action:

- Is not a ''significant regulatory action'' subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP is not approved to apply in Indian country located in the State, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law.

40 CFR Part 52

[EPA–R09–OAR–2013–0064; FRL–9777–7]

Revision of Air Quality Implementation Plan; California; Sacramento Metropolitan Air Quality Management District; Stationary Source Permits

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to fully approve two permitting rules submitted by California as a revision to the Sacramento Metropolitan Air Quality Management District (SMAQMD or District) portion of the California State Implementation Plan (SIP). These rules were adopted by the SMAQMD to regulate the construction and modification of stationary sources of air pollution within Sacramento County. EPA is proposing to approve this SIP revision based on the Agency's conclusion that the rules are consistent with applicable Clean Air Act (CAA) requirements, policies and guidance. Final approval of these rules would make the rules federally enforceable and correct program deficiencies identified in a previous EPA rulemaking on July 20, 2011.

DATES: Any comments must arrive by March 18, 2013.

ADDRESSES: Submit comments, identified by docket number EPA–R09–OAR–2013–0064, by one of the following methods:

1. *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the on-line instructions.
2. *Email: R9airpermits@epa.gov.*

3. *Mail or deliver:* Gerardo Rios (Air-3), U.S. Environmental Protection Agency Region IX, 75 Hawthorne Street, San Francisco, CA 94105–3901.

Instructions: All comments will be included in the public docket without change and may be made available online at *http://www.regulations.gov,* including any personal information provided, unless the comment includes Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Information that you consider CBI or otherwise protected should be clearly identified as such and should not be submitted through *http://www.regulations.gov* or email. *http://www.regulations.gov* is an ''anonymous access'' system, and EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send email directly to EPA, your email address will be automatically captured and included as part of the public comment. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: EPA has established a docket for this action under EPA–R09–OAR–2013–0064. Generally, documents in the docket for this action are available electronically at *http://www.regulations.gov* or in hard copy at EPA Region IX, 75 Hawthorne Street, San Francisco, California. While all documents are listed at *http://www.regulations.gov,* some information may be publicly available only at the hard copy location (e.g., copyrighted material, large maps, multi-volume reports), and some may not be publicly available in either location (e.g., CBI). To inspect the hard copy materials, please schedule an appointment during normal business hours with the contact listed in the **FOR FURTHER INFORMATION CONTACT** section.

FOR FURTHER INFORMATION CONTACT:
Laura Yannayon, EPA Region IX, (415) 972–3534, *yannayon.laura@epa.gov.*

SUPPLEMENTARY INFORMATION:
Throughout this document, ''we,'' ''us'' and ''our'' refer to EPA.

II. EPA's Evaluation and Proposed Action
A. How is EPA evaluating the rules?
B. Do the rules meet the evaluation criteria?
C. Proposed action and request for public comment.
III. Statutory and Executive Order Reviews

I. The State's Submittal

A. What rules did the State submit?

Table 1 lists the rules addressed by this proposal, including the dates they were adopted by the local air agency and submitted by the California Air Resources Board (CARB).

TABLE 1—SUBMITTED RULES

Local agency	Rule No.	Rule title	Amended/Adopted	Submitted
SMAQMD	214	Federal New Source Review	Amended 8/23/12	9/26/12
SMAQMD	217	Public Notice Requirements for Permits	Adopted 8/23/12	9/26/12

CARB's SIP submittal includes evidence of public notice and adoption of these regulations. We find that the submittals for SMAQMD Rules 214 and 217 meet the completeness criteria in 40 CFR part 51, appendix V, which must be met before formal EPA review.

B. Are there other versions of these rules?

EPA approved a previous version of Rule 214 into the SIP on July 20, 2011 (76 FR 43183). There are no previous versions of Rule 217 in the SIP.

C. What is the purpose of the submitted rules?

Section 110(a)(2) of the CAA requires that each SIP include, among other things, a preconstruction permit program to provide for regulation of the construction and modification of stationary sources within the areas covered by the plan as necessary to assure that the National Ambient Air Quality Standards (NAAQS) are achieved, including a permit program as required in parts C and D of title I of the CAA. For areas designated as nonattainment for one or more NAAQS, the SIP must include preconstruction permit requirements for new or modified major stationary sources of such nonattainment pollutant(s), commonly referred to as ''Nonattainment New Source Review'' or ''NSR.'' CAA 172(c)(5).

Sacramento County is currently designated and classified as severe nonattainment for the 1997 and 2008 8-hour ozone NAAQS and moderate nonattainment for the 24-hour PM_{10} NAAQS. The area is also designated nonattainment for the 2006 24-hour $PM_{2.5}$ NAAQS. *See* 40 CFR 81.305. Therefore, California is required under part D of title I of the Act to adopt and implement a SIP-approved NSR program for the Sacramento area that applies, at minimum, to new or modified major stationary sources of the following pollutants: volatile organic compounds (VOCs), nitrogen oxides (NO_X), particulate matter of 10 microns of less (PM_{10}), particular matter of 2.5 microns or less ($PM_{2.5}$) and sulfur oxides (SO_X).[1]

Rule 214 (Federal New Source Review) implements the NSR requirements under part D of title I of the CAA for new or modified major stationary sources of these nonattainment pollutants within Sacramento County. Rule 217 (Public Notice Requirements for Permits) contains the public notice and other procedural requirements for issuance of permits to all minor sources and to new or modified major sources of nonattainment pollutants in the County.[2] The SMAQMD amended Rule 214 and adopted Rule 217 to correct program deficiencies identified by EPA on July 20, 2011 (76 FR 43183).

II. EPA's Evaluation and Proposed Action

A. How is EPA evaluating the rules?

EPA has reviewed the submitted permitting rules for compliance with the CAA's general requirements for SIPs in CAA section 110(a)(2), EPA's regulations for stationary source permit programs in 40 CFR part 51, subpart I (''Review of New Sources and Modifications''), and the CAA

[1] VOCs and NO_X are subject to NSR as precursors to ozone, and NO_X and SO_X are subject to NSR as precursors to $PM_{2.5}$ in Sacramento County. *See* 40 CFR 51.165(a)(1)(xxxvii)(C).

[2] New or modified major stationary sources of air pollutants for which Sacramento County is designated attainment or unclassifiable are subject to separate permitting procedures and requirements under Rule 203 (Prevention of Significant Deterioration), which EPA fully approved into the California SIP on July 20, 2011. See 76 FR 43183.

requirements for SIP revisions in CAA section 110(l).[3] As explained below, EPA is proposing to fully approve the submitted rules.

B. Do the rules meet the evaluation criteria?

With respect to procedures, CAA sections 110(a) and 110(l) require that revisions to a SIP be adopted by the State after reasonable notice and public hearing. EPA has promulgated specific procedural requirements for SIP revisions in 40 CFR part 51, subpart F. These requirements include publication of notices, by prominent advertisement in the relevant geographic area, of a public hearing on the proposed revisions, a public comment period of at least 30 days, and an opportunity for a public hearing.

Based on our review of the public process documentation included in the SMAQMD's September 26, 2012 rule submittals, we find that the State has provided sufficient evidence of public notice and opportunity for comment and public hearings prior to adoption and submittal of these rules to EPA.

With respect to substantive requirements, EPA has reviewed the submitted rules in accordance with the CAA and regulatory requirements that apply to NSR permit programs under part D of title I of the Act and the general public notice requirements for stationary source permits in 40 CFR section 51.161. Based on our evaluation of these rules, we are proposing to fully approve Rule 214 as satisfying the CAA and regulatory requirements for NSR permit programs in part D of title I of the Act and EPA's NSR implementing regulations in 40 CFR section 51.165 for new or modified major stationary sources proposing to locate in Sacramento County. Additionally, we are proposing to fully approve Rule 217 as satisfying the general public notice requirements in 40 CFR 51.161 for both minor source permits and major source NSR permits issued in Sacramento County. Final approval of Rule 214 and Rule 217 would correct all deficiencies in SMAQMD's permit programs identified in our July 20, 2011 final rule. See 76 FR 43183. The Technical Support Document (TSD) for this action contains a more detailed discussion of our evaluation.

C. Proposed action and request for public comment

For the reasons given above and described more fully in the TSD for this rulemaking, EPA is proposing to fully approve Rule 214 and Rule 217 into the California SIP pursuant to CAA section 110(k)(3). We will accept comments from the public on this proposal for the next 30 days.

III. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve State choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this action merely proposes to approve State law as meeting Federal requirements and does not impose additional requirements beyond those imposed by State law. For that reason, this proposed action:

- Is not a ''significant regulatory action'' subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 et seq.);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and
- Does not provide EPA with the discretionary authority to address disproportionate human health or environmental effects with practical, appropriate, and legally permissible methods under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this proposed rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP is not approved to apply in Indian country located in the State, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

Notice of Request for Extension and Revision of a Currently Approved Information Collection

AGENCY: National Appeals Division, U.S. Department of Agriculture.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Action of 1995 (44 U.S.C. Chapter 35), this notice announces the U.S. Department of Agriculture, National Appeals Division's request for an extension to a currently approved information collection for Customer Service Survey.

DATES: Comments on this notice must be received by April 15, 2013 to be assured of consideration.

Additional information or comments: Contact Dr. Angela Parham, U.S. Department of Agriculture, National Appeals Division, 3101 Park Center Drive, Suite 1100, Alexandria, Virginia, 22302–1500, 703.305.2588.

SUPPLEMENTARY INFORMATION:

Title: National Appeals Division Customer Service Survey.

OMB Number: 0503–0007.

Expiration Date of Approval: September 30, 2013.

Type of Request: Extension and Revision of a currently approved information collection.

Abstract: Executive Order 12862, requires Federal Agencies to identify the customers who are, or should be served by the Agency and survey those customers to determine the kind and quality of services they want and level of satisfaction with existing services. Therefore, NAD proposes to extend its currently approved information collection survey.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average .17 hours per response.

Respondents: Appellants, producers, and other USDA agencies.

Estimated Number of Respondents: 1600.

Estimated Number of Responses per Respondent: One (1).

Estimated Total Annual Burden on Respondents: 272.

Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology. Comments may be sent to Dr. Angela Parham, U.S. Department of Agriculture, National Appeals Division, 3101 Park Center Drive, Suite 1100, Alexandria, Virginia 22302–1500.

All comments received will be available for public inspection during regular business hours at the same address.

All responses to this notice will be summarized and included in the request for OMB approval. All comments will become a matter of public record.

Roger Klurfeld,

Director, National Appeals Division.

BILLING CODE P

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

Agency Information Collection Activities: Proposed Collection; Comment Request—Supplemental Nutrition Assistance Program: State Issuance and Participation Estimates—Forms FNS–388 and FNS–388A

AGENCY: Food and Nutrition Service, USDA.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the Food and Nutrition Service (FNS) is publishing for public comment a summary of a proposed information collection. The proposed collection is a revision of a currently approved collection for the Supplemental Nutrition Assistance Program (SNAP) for the form FNS–388, State Issuance and Participation Estimates, and FNS–388A, Project Area Data Format.

DATES: Written comments must be received on or before April 15, 2013.

ADDRESSES: Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments may be sent to Jane Duffield, Chief, State Administration Branch, Supplemental Nutrition Assistance Program, Food and Nutrition Service, USDA, 3101 Park Center Drive, Room 818, Alexandria, VA 22302. Comments may also be submitted via email to *SNAPSAB@fns.usda.gov.* Comments will also be accepted through the federal eRulemaking Portal. Go to *http://www.regulations.gov,* and follow the online instructions for submitting comments electronically.

All responses to this notice will be summarized and included in the request for Office of Management and Budget approval. All comments will become a matter of public record.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of this information collection should be directed to Kelly Stewart at 703–305–2425.

SUPPLEMENTARY INFORMATION:

Title: State Issuance and Participation Estimates.

Form Number: FNS–388 and FNS–388A.

OMB Number: 0584–0081.

Expiration Date: 5/31/2013.

Type of Request: Revision of a currently approved collection.

Abstract: Section 18(b) of the Food and Nutrition Act, (the Act) 7 U.S.C. 2027(b), limits the value of allotments paid to SNAP households to an amount not in excess of the appropriation for the fiscal year. If allotments in any fiscal year would exceed the appropriation, the Secretary of Agriculture is required to direct State agencies to reduce the value of SNAP allotments to the extent necessary to stay within appropriated funding limits. Timely State monthly issuance estimates are necessary for FNS to ensure that it remains within the appropriation. The estimates will also have a direct effect upon the manner in which allotments would be reduced if necessary. While benefit reductions have never been ordered in the past under Section 18(b) nor are they anticipated based on current data, the Department must continue to monitor actual program costs against the appropriation.

Section 11(e)(12) of the Food and Nutrition Act, 7 U.S.C. 2020(e)(12), requires that the State Plan of Operations provide for the submission of reports required by the Secretary of Agriculture. State agencies are required to report on a monthly basis on the FNS–388, State Issuance and Participation Estimates, estimated or actual issuance and participation data for the current month and previous month, and actual participation data for the second preceding month. The FNS–388 report provides the necessary data for an early warning system to enable the Department to monitor actual and estimated costs for all benefit types against the appropriation.

State agencies in general only submit one Statewide FNS–388 per month, which covers benefits from their electronic benefit transfer (EBT) system. The exception is that State agencies which choose to operate an approved alternative issuance demonstration project such as a cash-out system submit a separate report for each additional type of issuance system.

In addition, State agencies are required to submit a project area breakdown on the FNS–388 of issuance and participation data twice a year. The project area breakdown attached to the FNS–388 twice a year is known as the FNS–388A. This data is useful in identifying project areas that operate fraud detection units in accordance with the Act.

As of December, 2012, 100 percent of respondents submitted the FNS–388 and FNS–388A data electronically.

Affected Public: State agencies that administer SNAP.

Estimated Number of Respondents: 53.

Estimated Number of Responses per Respondent: 27.17.

Estimated Hours per Response: 3.581.

Estimated Total Annual Responses: 1440.

Estimated Total Annual Burden on Respondents: The annual reporting and recordkeeping burden for OMB No. 0584–0081, is estimated to be 5,157 hours. For the FNS–388, the frequency of response has decreased slightly from an estimated 11.509 times per year to 11.32. This results in a burden reduction of 86 hours annually. See the table below for estimated total annual burden for each type of respondent.

Affected public	Forms	Number of respondents	Frequency of response	Total annual responses	Time per response (hrs)	Annual burden hours
State Agencies	FNS–388	53	11.32	600	5.6	3360
	FNS–388A.	53	2.26	120	14.83	1779.6
Reporting Burden	....	53	....	720	....	5139.6

Affected public	Forms	Number of recordkeepers	Frequency of response	Total annual records	Time per response (hrs)	Annual record–keeping hours
State Agencies	FNS–388	53	11.32	600	.024	14.4
	FNS–388A.	53	2.26	120	.024	2.88
Recordkeeping Burden	....	53	....	720	....	17.28

BILLING CODE 3410–30–P

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

Agency Information Collection Activities: Proposed Collection; Comment Request—Evaluation of the Demonstrations of National School Lunch and School Breakfast Program (NSLP/SBP) Direct Certification of Children Receiving Medicaid Benefits

AGENCY: Food and Nutrition Service (FNS), USDA.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice invites the general public and other public agencies to comment on this proposed information collection. This is a new collection for Evaluation of the Demonstrations of NSLP/SBP (National School Lunch Program/School Breakfast Program) Direct Certification of Children Receiving Medicaid Benefits.

DATES: Written comments must be received on or before April 15, 2013.

ADDRESSES: Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the

information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions that were used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments may be sent to: Steve Carlson, Food and Nutrition Service, U.S. Department of Agriculture, 3101 Park Center Drive, Room 1040, Alexandria, VA 22302. Comments may also be submitted via fax to the attention of Steve Carlson at 703–305–2017 or via email to *steve.carlson@fns.usda.gov*. Comments will also be accepted through the Federal eRulemaking Portal. Go to *http://www.regulations.gov*, and follow the online instructions for submitting comments electronically.

All written comments will be open for public inspection at the office of the Food and Nutrition Service during regular business hours (8:30 a.m. to 5 p.m., Monday through Friday) at 3101 Park Center Drive, Room 1040, Alexandria, Virginia 22302.

All responses to this notice will be summarized and included in the request for Office of Management and Budget approval. All comments will be a matter of public record.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of this information collection should be directed to Steve Carlson at 703–305–2017.

SUPPLEMENTARY INFORMATION:

Title: Evaluation of the Demonstrations of NSLP/SBP Direct Certification of Children Receiving Medicaid Benefits.

Form Number: N/A.

OMB Number: Not Yet Assigned.

Expiration Date: Not Yet Determined.

Type of Request: New collection.

Abstract: The Healthy, Hunger-Free Kids Act of 2010 (the Act), Section 103, directs USDA to demonstrate direct certification for free lunches and breakfasts to children who are receiving Medicaid and whose households have a gross income as measured by Medicaid that does not exceed 133 percent Federal Poverty Level (FPL). The Direct Certification-Medicaid (DC–M) demonstration may expand the number of students certified for free meals and affect the costs that States and local education agencies (LEAs) incur when certifying students. While the process of matching students to Medicaid data will increase certification costs for States and some LEAs, DC–M can generate cost savings if it leads fewer families to submit applications for school meals. DC–M may also have an impact on federal costs if it leads to an increase in certifications for free and reduced price meals.

To determine the impact and effectiveness of direct certification using Medicaid data, FNS will conduct a comprehensive evaluation of DC–M through three investigative areas:

(1) Identify the potential impact that DC–M may have on children's access to the NSLP and SBP;

(2) Measure the actual impact of DC–M on participation and costs observed over two years of demonstrations. This component of the study will examine whether DC–M leads to changes in the number and distribution of certified students and higher or lower certification costs in LEAs. The results of this analysis will be used to project the impact of DC–M on number of meals served and on the dollar amount of federal meal reimbursements distributed to districts. The study will also identify the challenges that States and LEAs face when implementing DC–M; and

(3) Examine the conditions that would make SES certification procedures a cost-effective alternative to current certification procedures.

The study will gather data from State and LEAs to include: (1) Certification and participation records; (2) cost surveys and interviews that include certification costs, start-up costs, local meal costs, and federal benefit costs; as well as (3) challenges in conducting DC–M matching. Data will be collected through web surveys and telephone interviews for school year 2012–13 (SY1) and school year 2013–2014 (SY2).

Affected Public: State and Local Government—Respondent groups identified include: (1) State level administrators that administer the National School Lunch and Breakfast Programs from nine State agencies (six States in SY1 and an additional three States in SY2); and (2) District/School level administrators from 698 LEAs in SY1, increasing to 1,200 LEAs in SY2.

Estimated Number of Respondents: 3,776.

Estimated Number of Responses per Respondent: The average estimated annual number of responses per respondent in the first school year is 1.03, and the average in the second school year is 4.24, for an aggregate average over the two years of 3.09 responses.

Estimated Time per Response: The estimated time per response is .767 hours (or approximately 46 minutes). The estimated time of response varies from 10 minutes to 5 hours depending upon respondent action, as shown in the table below.

Estimated Total Annual Burden on Respondents: The total estimated annual burden is 1,265.34 hours in year 1 and 7,684.52 hours in year 2, as shown in the table below.

Action	Respondent type	Estimated # respondents	Responses annually per respondent	Total annual responses	Estimated avg. # of hours per response	Estimated total hours

BILLING CODE 3410–30–P

DEPARTMENT OF AGRICULTURE

Forest Service

Olympic Peninsula Resource Advisory Committee

AGENCY: Forest Service, USDA.

ACTION: Outreach for new RAC Replacement members.

SUMMARY: Interested citizens are invited to serve on the Olympic Peninsula Resource Advisory Committee (RAC). The RAC will be responsible for reviewing and recommending land management projects to be funded under the Secure Rural Schools and Community Self-Determination Act, should the act be reauthorized this year.

RAC members represent a wide range of interests. The committee consists of 15 members and each member is assigned to one of three categories. A replacement member is also assigned to each category. The replacement member becomes a full time member when and if an assigned member can not complete his or her four-year term. The Olympic Peninsula RAC has vacancies for replacement members in Categories A, B, and C.

- Category A represents organized labor, developed outdoor recreation, off-highway vehicle use, commercial recreation activities, energy development interests, the commercial timber industry, and Federal grazing or other land use permits.
- Category B represents nationally recognized environmental organizations, regionally or locally recognized environmental organizations, dispersed recreational activities, archaeological and historical interests.
- Category C represents state, county, or local elected offices, American Indian tribes, school officials or teachers, and the affected public-at-large.

A four-year term would begin upon appointment by the Secretary of Agriculture. Committee members serve without compensation, but may be reimbursed for travel expenses. Members must be Washington residents, preferably living in one of the Olympic Peninsula counties. Meetings are held at least once and up to four times per year within Thurston, Mason, Jefferson, Clallam, or Grays Harbor Counties.

Interested participants should submit the required AD 755 application, available on the forest's Web site at *http://www.fs.usda.gov/main/olympic/workingtogether/advisorycommittees.*

DATES: All applications must be received at the Olympic National Forest Supervisor's Office by March 29, 2013.

ADDRESSES: Please mail all AD 755 forms to: Olympic National Forest, 1835 Black Lake Blvd. SW., Olympia, WA 98512, Attention: Grace Haight.

FOR FURTHER INFORMATION CONTACT: For additional information, please contact Donna Nemeth at 360–956–2274 or Bill Shelmerdine at 360–956–2282.

Dated: February 7, 2013.

Reta Laford,

Forest Supervisor, Olympic National Forest.

BILLING CODE 3410–11–M

DEPARTMENT OF AGRICULTURE

National Agricultural Statistics Service

Notice of Intent To Request Revision and Extension of a Currently Approved Information Collection

AGENCY: National Agricultural Statistics Service, USDA.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the intention of the National Agricultural Statistics Service (NASS) to request revision and extension of a currently approved information collection, the Fruits, Nuts, and Specialty Crops Surveys. Revision to burden hours will be needed due to changes in the size of the target population, sample design, minor changes in questionnaire design and an anticipated increase in response rates.

DATES: Comments on this notice must be received by April 15, 2013 to be assured of consideration.

ADDRESSES: You may submit comments, identified by docket number 0535–0039, by any of the following methods:

- *Email: ombofficer@nass.usda.gov.* Include docket number above in the subject line of the message.
- *Fax:* (202) 720–6396.
- *Mail:* Mail any paper, disk, or CD–ROM submissions to: David Hancock, NASS Clearance Officer, U.S. Department of Agriculture, Room 5336 South Building, 1400 Independence Avenue SW., Washington, DC 20250–2024.
- *Hand Delivery/Courier:* Hand deliver to: David Hancock, NASS Clearance Officer, U.S. Department of Agriculture, Room 5336 South Building, 1400 Independence Avenue SW., Washington, DC 20250–2024.

FOR FURTHER INFORMATION CONTACT: Joseph T. Reilly, Associate Administrator, National Agricultural Statistics Service, U.S. Department of Agriculture, (202) 720–4333.

SUPPLEMENTARY INFORMATION:

Title: Fruits, Nuts, and Specialty Crops Surveys.

OMB Control Number: 0535–0039.

Expiration Date of Approval: June 30, 2013.

Type of Request: To revise and extend a currently approved information collection for a period of three years.

Abstract: The primary objective of the National Agricultural Statistics Service (NASS) is to collect, prepare and issue State and national estimates of crop and livestock production, prices, and disposition; as well as economic statistics, environmental statistics related to agriculture and also to conduct the Census of Agriculture. The Fruits, Nuts, and Specialty Crops survey program collects information on acreage, yield, production, price, and value of citrus and non-citrus fruits and nuts and other specialty crops in States with significant commercial production. The program provides data needed by the U.S. Department of Agriculture and other government agencies to administer programs and to set trade quotas and tariffs. Producers, processors, other industry representatives, State Departments of Agriculture, and universities also use forecasts and estimates provided by these surveys.

Authority: These data will be collected under authority of 7 U.S.C. 2204(a). Individually identifiable data collected under this authority are governed by Section 1770 of the Food Security Act of 1985 as amended, 7 U.S.C. 2276, which requires USDA to afford strict confidentiality to non-aggregated data provided by respondents. This Notice is submitted in accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104–113) and Office of Management and Budget regulations at 5 CFR part 1320. NASS also complies with OMB Implementation Guidance, ‘‘Implementation Guidance for Title V of the E-Government Act, Confidential Information Protection and Statistical Efficiency Act of 2002 (CIPSEA),’’ **Federal Register**, Vol. 72, No. 115, June 15, 2007, p. 33376.

Estimate of Burden: Public reporting burden for this information collection is based on approximately 70 individual surveys with expected response times of 4–30 minutes and frequency of 1–12 times per year. Estimated number of responses per respondent is 1.6. Publicity materials and instruction sheet will account for 5 minutes of additional burden per respondent. Respondents who refuse to complete a survey will be allotted 2 minutes of burden per attempt to collect the data.

Respondents: Producers, processors, and handlers.

Estimated Number of Respondents: 63,000.

Estimated Total Annual Burden on Respondents: 16,000 hours.

Copies of this information collection and related instructions can be obtained without charge from David Hancock, NASS Clearance Officer, at (202) 690–2388.

Comments: Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, through the use of appropriate automated, electronic, mechanical, technological or other forms of information technology collection methods.

All responses to this notice will become a matter of public record and be summarized in the request for OMB approval.

Signed at Washington, DC, January 31, 2013.

Joseph T. Reilly,

Associate Administrator.

SUPPLEMENTARY INFORMATION:

Title: Honey Survey.

OMB Control Number: 0535–0153.

Expiration Date of Approval: May 31, 2013.

Type of Request: Intent to revise and extend a currently approved information collection for a period of three years.

Abstract: The primary objective of the National Agricultural Statistics Service (NASS) is to prepare and issue state and national estimates of crop and livestock production, prices, and disposition; as well as economic statistics, environmental statistics related to agriculture and also to conduct the Census of Agriculture.

The Honey Survey collects information on the number of colonies, honey production, stocks, and prices. The survey provides data needed by the U.S. Department of Agriculture and other government agencies to administer programs and to set trade quotas and tariffs. State universities and agriculture departments also use data from this survey.

Authority: These data will be collected under the authority of 7 U.S.C. 2204(a). Individually identifiable data collected under this authority are governed by Section 1770 of the Food Security Act of 1985 as amended, 7 U.S.C. 2276, which requires USDA to afford strict confidentiality to non-aggregated data provided by respondents. This Notice is submitted in accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104–113) and the Office of Management and Budget regulations at 5 CFR part 1320. NASS also complies with OMB Implementation Guidance, ''Implementation Guidance for Title V of the E-Government Act, Confidential Information Protection and Statistical Efficiency Act of 2002 (CIPSEA),'' **Federal Register**, Vol. 72, No. 115, June 15, 2007, p. 33376.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 10 minutes per response. Publicity materials and instruction sheet will account for 5 minutes of additional burden per respondent. Respondents who refuse to complete a survey will be allotted 2 minutes of burden per attempt to collect the data.

Respondents: Farmers.

Estimated Number of Respondents: 10,000.

Estimated Total Annual Burden on Respondents: With an estimated response rate of approximately 80%, we estimate the burden to be 2,400 hours. Copies of this information collection and related instructions can be obtained without charge from David Hancock, NASS Clearance Officer, at (202) 690–2388.

Comments: Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, through the use of appropriate automated, electronic, mechanical, technological or other forms of information technology collection methods.

All responses to this notice will become a matter of public record and be summarized in the request for OMB approval.

Signed at Washington, DC, January 31, 2013.

Joseph T. Reilly,

Associate Administrator.

BILLING CODE 3410–20–P

DEPARTMENT OF AGRICULTURE

National Agricultural Statistics Service

Notice of Intent to Request Revision and Extension of a Currently Approved Information Collection

AGENCY: National Agricultural Statistics Service, USDA.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the intention of the National Agricultural Statistics Service (NASS) to request revision and extension of a currently approved information collection, the Nursery and Floriculture Chemical Use Survey. Revision to burden hours will be needed due to changes in the size of the target population, sampling design, and/or questionnaire length.

DATES: Comments on this notice must be received by April 15, 2013 to be assured of consideration.

ADDRESSES: You may submit comments, identified by docket number 0535–0244, by any of the following methods:

• *Email: ombofficer@nass.usda.gov.* Include docket number above in the subject line of the message.

• *Fax:* (202) 720–6396.

• *Mail:* Mail any paper, disk, or CD–ROM submissions to: David Hancock, NASS Clearance Officer, U.S. Department of Agriculture, Room 5336 South Building, 1400 Independence Avenue SW., Washington, DC 20250–2024.

• *Hand Delivery/Courier:* Hand deliver to: David Hancock, NASS Clearance Officer, U.S. Department of Agriculture, Room 5336 South Building, 1400 Independence Avenue SW., Washington, DC 20250–2024.

FOR FURTHER INFORMATION CONTACT: Joseph T. Reilly, Associate Administrator, National Agricultural Statistics Service, U.S. Department of Agriculture, (202) 720–4333.

SUPPLEMENTARY INFORMATION: *Title:* Nursery and Christmas Tree Production Survey and Nursery and Floriculture Chemical Use Survey.

OMB Control Number: 0535–0244.

Expiration Date of Approval: June 30, 2013.

Type of Request: Intent to revise and extend a currently approved information collection for a period of three years.

Abstract: The primary objective of the National Agricultural Statistics Service (NASS) is to prepare and issue State and national estimates of crop and livestock production, prices, and disposition, as well as economic statistics, environmental statistics related to agriculture and also to conduct the Census of Agriculture. This includes estimates of production and value of key nursery products and chemical use by nursery and floriculture production operations.

• As nursery production continues to be one of the fastest growing segments of American agriculture, the Nursery Production and Christmas Tree Survey will update the production and economic contribution of the nursery industry to U.S. agriculture every 3 years by conducting a census of nursery and greenhouse operations with sales over $10,000 in the 17 major producing States. These operations will receive the production questionnaire by mail with telephone and personal interview follow-up for non-response.

- The Nursery and Floriculture Chemical Use Survey, is conducted every 3 years in conjunction with the production survey mentioned above. It measures chemical usage, related to the production of nursery and floriculture crops in six major producing States. The resulting publication is part of the NASS series on Agricultural Chemical Usage, and it summarizes rates of application, total amount of active ingredients applied, and use of pest management practices. NASS collects on-farm chemical use data to enhance the quality of information used in the evaluation of issues related to agricultural chemicals, including pesticide registrations. Pest management data are used to measure integrated pest management adoption levels and evaluate the impact of alternative pesticide regulations, policies, and practices. A sample of nursery and floriculture operations with sales over $10,000 in the major States will be personally interviewed, since chemical use data are not accurately collected by telephone or mail.
- A nursery production survey and a Christmas tree production survey are conducted every year in Oregon.

Authority: These data will be collected under authority of 7 U.S.C. 2204(a). Individually identifiable data collected under this authority are governed by Section 1770 of the Food Security Act of 1985 as amended, 7 U.S.C. 2276, which requires USDA to afford strict confidentiality to non-aggregated data provided by respondents. This Notice is submitted in accordance with the Paperwork Reduction Act of 1995, (Pub. L. 104–113) and Office of Management and Budget regulations at 5 CFR part 1320 (60 FR 44978, August 29, 1995).

NASS also complies with OMB Implementation Guidance, ''Implementation Guidance for Title V of the E-Government Act, Confidential Information Protection and Statistical Efficiency Act of 2002 (CIPSEA),'' **Federal Register**, Vol. 72, No. 115, June 15, 2007, p. 33376.

Estimate of Burden: Based on previous data collected, the average amount of respondent burden for the Nursery and Floriculture Chemical Use Survey (6 States) is estimated to average 60 minutes per respondent (conducted once every three years). The Nursery and Christmas Tree Production Survey (17 States) is estimated to average 35 minutes per respondent (conducted once every three years). The annual nursery production survey conducted in Oregon is estimated to average 30 minutes per respondent. The annual Christmas tree production survey in Oregon is estimated to average 20 minutes per respondent. Publicity materials and instruction sheet will account for 10 minutes of additional burden per respondent. Respondents who refuse to complete a survey will be allotted 2 minutes of burden per attempt to collect the data.

Respondents: Producers of nursery, greenhouse, and floriculture products.

Estimated Annual Number of Respondents: (Nursery Production and Christmas Tree Survey at 15,000 × frequency of ⅓) + (Chemical Use Survey at 4,200 × frequency of ⅓) + (Oregon Nursery Production Survey at 800 × frequency of 1.0) + (Oregon Christmas Tree Production at 1,000 × frequency of 1.0) = approximately 8,200.

Estimated Total Annual Burden on Respondents: approximately 7,500 hours. Copies of this information collection and related instructions can be obtained without charge from David Hancock, NASS Clearance Officer, at (202) 690–2388.

Comments: Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, through the use of appropriate automated, electronic, mechanical, technological or other forms of information technology collection methods.

All responses to this notice will become a matter of public record and be summarized in the request for OMB approval.

Signed at Washington, DC, January 31, 2013.

Joseph T. Reilly,

Associate Administrator.

BILLING CODE 3410–20–P

DEPARTMENT OF AGRICULTURE

Rural Utilities Service

Information Collection Activity; Comment Request

AGENCY: Rural Utilities Service, USDA.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35, as amended), the Rural Utilities Service (RUS) invites comments on this information collection for which approval from the Office of Management and Budget (OMB) will be requested.

DATES: Comments on this notice must be received by April 15, 2013.

FOR FURTHER INFORMATION CONTACT: Michele L. Brooks, Director, Program Development and Regulatory Analysis, Rural Utilities Service, 1400 Independence Ave. SW., STOP 1522, Room 5162—South Building, Washington, DC 20250–1522. Telephone: (202) 690–1078. FAX: (202) 720–8435. Email: *michele.brooks@wdc.usda.gov*.

SUPPLEMENTARY INFORMATION: The Office of Management and Budget's (OMB) regulation (5 CFR part 1320) implementing provisions of the Paperwork Reduction Act of 1995 (Pub. L. 104–13) requires that interested members of the public and affected agencies have an opportunity to comment on information collection and recordkeeping activities (see 5 CFR 1320.8(d)). This notice identifies an information collection that RUS is submitting to OMB for extension.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (b) the accuracy of the Agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology. Comments may be sent to: Michele L. Brooks, Director, Program Development and Regulatory Analysis, Rural Utilities Service, STOP 1522, 1400 Independence Ave. SW., Washington, DC 20250–1522. FAX: (202) 720–8435. Email: *michele.brooks@wdc.usda.gov*.

Title: 7 CFR 1779, Water and Waste Disposal Programs Guaranteed Loans.

OMB Number: 0572–0122.

Type of Request: Extension of a currently approved information collection.

Abstract: The Rural Utilities Service is authorized by Section 306 of the Consolidated Farm and Rural Development Act (7 U.S.C. 1926) to make loans to public agencies, nonprofit corporations, and Indian tribes for the development of water and waste

disposal facilities primarily servicing rural residents. The guaranteed loan program encourages lender participation and provides specific guidance in the processing and servicing of guaranteed loans. The regulations governing the Water and Waste Disposal Guaranteed Loan program are codified at 7 CFR part 1779. The required information, in the form of written documentation and Agency approved forms, is collected from applicants/borrowers, their lenders, and consultants. The collected information will be used to determine applicant/borrower eligibility, project feasibility, and to ensure borrowers operate on a sound basis and use loan funds for authorized purposes. Failure to collect proper information could result in improper determinations of eligibility, improper use of funds, and/or unsound loans.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 7.8 hours per response.

Respondents: Business or other for profit; Not-for-profit institutions; State, Local or Tribal Government.

Estimated Number of Respondents: 15.

Estimated Number of Responses per Respondent: 7.3.

Estimated Total Annual Burden on Respondents: 858 hours.

Copies of this information collection can be obtained from Rebecca Hunt, Program Development and Regulatory Analysis, at (202) 205–3660, FAX: (202) 720–8435. Email: *rebecca.hunt@wdc.usda.gov*.

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Dated: February 8, 2013.

John Charles Padalino,

Acting Administrator, Rural Utilities Service.

[FR Doc. 2013–03347 Filed 2–13–13; 8:45 am]

BILLING CODE P

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: National Estuarine Research Reserve System Science Collaboration Evaluation Survey.

OMB Control Number: None.

Form Number(s): NA.

Type of Request: Regular submission (request for a new information collection).

Number of Respondents: 140.

Average Hours per Response: 20 minutes.

Burden Hours: 47.

Needs and Uses: This request is for a new information collection.

The National Estuarine Research Reserve System (NERRS) Science Collaborative was created in 2009 to put Reserve-based science to work for coastal communities coping with the impacts of land use change, pollution, and habitat degradation in the context of a changing climate. The program operates on the belief that for science to be applied to solve coastal management problems, the people who need to use the science must be involved in its generation.

The projects funded by the NERRS Science Collaborative are designed to bring the intended users of the science into the research process so that their perspectives can inform problem definition, research design and implementation, and ultimately, application of the project results. This is what is meant by ''collaboration,'' and it is the program's goal to use this process to ensure that the good science happening in and around the Reserves gets put to good use.

To help evaluate the efficacy of the NERRS Science Collaborative, NOAA is conducting a survey of the NERRS staff located in the 28 Reserves around the country to solicit their perspective about the program and how it has been implemented.

Affected Public: State, local or tribal government, not-for-profit institutions.

Frequency: Once.

Respondent's Obligation: Voluntary.

OMB Desk Officer: OIRA_Submission@omb.eop.gov.

Copies of the above information collection proposal can be obtained by calling or writing Jennifer Jessup, Departmental Paperwork Clearance Officer, (202) 482–0336, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at *JJessup@doc.gov*).

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *OIRA_Submission@omb.eop.gov.*

Dated: February 8, 2013.

Gwellnar Banks,

Management Analyst, Office of the Chief Information Officer.

[FR Doc. 2013–03384 Filed 2–13–13; 8:45 am]

BILLING CODE 3510–08–P

DEPARTMENT OF COMMERCE

Economics and Statistics Administration

Bureau of Economic Analysis Advisory Committee

AGENCY: Bureau of Economic Analysis, Commerce.

ACTION: Notice of public meeting.

SUMMARY: Pursuant to the Federal Advisory Committee Act (Pub. L. 92–463 as amended by Pub. L. 94–409, Pub. L. 96–523, Pub. L. 97–375 and Pub. L. 105–153), we are announcing a meeting of the Bureau of Economic Analysis Advisory Committee. The meeting will address ways in which the national economic accounts can be presented more effectively for current economic analysis and recent statistical developments in national accounting.

DATES: Friday, May 10, 2013 the meeting will begin at 9:00 a.m. and adjourn at 3:30 p.m.

ADDRESSES: The meeting will take place at the Bureau of Economic Analysis at 1441 L St. NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Gianna Marrone, Program Analyst, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230; telephone number: (202) 606–9633.

Public Participation: This meeting is open to the public. Because of security procedures, anyone planning to attend the meeting must contact Gianna Marrone of BEA at (202) 606–9633 in advance. The meeting is physically accessible to people with disabilities. Requests for foreign language interpretation or other auxiliary aids should be directed to Gianna Marrone at (202) 606–9633.

SUPPLEMENTARY INFORMATION: The Committee was established September 2, 1999. The Committee advises the Director of BEA on matters related to the development and improvement of BEA's national, regional, industry, and international economic accounts, especially in areas of new and rapidly growing economic activities arising from innovative and advancing technologies, and provides recommendations from the perspectives of the economics profession, business,

and government. This will be the Committee's twenty-fifth meeting.

Dated: February 5, 2013.

Brian C. Moyer,

Deputy Director, Bureau of Economic Analysis.

BILLING CODE 3510–06–P

DEPARTMENT OF COMMERCE

International Trade Administration

North American Free Trade Agreement (NAFTA), Article 1904 Binational Panel Reviews

AGENCY: NAFTA Secretariat, United States Section, International Trade Administration, Department of Commerce.

ACTION: Notice of Completion of Panel Review of the Department of Commerce's final determination of Stainless Steel Sheet and Strip in Coils from Mexico (Secretariat File No. USA–MEX–2008–1904–01).

SUMMARY: Pursuant to the Order of the Binational Panel dated January 8, 2013, the panel review was completed on February 8, 2013.

FOR FURTHER INFORMATION CONTACT: Ellen Bohon, United States Secretary, NAFTA Secretariat, Suite 2061, 14th and Constitution Avenue, Washington, DC 20230, (202) 482–5438.

SUPPLEMENTARY INFORMATION: On January 8, 2013, the Binational Panel issued an Order granting a joint motion filed by the Investigating Authority (U.S. Department of Commerce) and the Complainant (ThyssenKrupp Mexinox S.A. de C.V. and Mexinox USA, Inc.) to dismiss the panel review concerning the Department of Commerce's final determination concerning Stainless Steel Sheet and Strip in Coils from Mexico. The Secretariat was instructed to issue a Notice of Completion of Panel Review on the 31st day following the issuance of the Notice of Final Panel Action, if no request for an Extraordinary Challenge Committee was filed. No such request was filed. Therefore, on the basis of the Panel Order and Rule 80 of the *Article 1904 Panel Rules,* the Panel Review was completed and the panelists were discharged from their duties effective February 8, 2013.

Dated: February 8, 2013.

Ellen M. Bohon,

United States Secretary, NAFTA Secretariat.

BILLING CODE 3510–GT–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Proposed Information Collection; Comment Request; Southeast Region Logbook Family of Forms

AGENCY: National Oceanic and Atmospheric Administration (NOAA).

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

DATES: Written comments must be submitted on or before April 15, 2013.

ADDRESSES: Direct all written comments to Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at *JJessup@doc.gov*).

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to Steve Turner, (305) 361–4482 or *Steve.Turner@noaa.gov.*

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for extension of a current information collection.

Participants in most Federally-managed fisheries in the Southeast Region are currently required to keep and submit catch and effort logbooks from their fishing trips. A subset of these vessels also provide information on the species and quantities of fish, shellfish, marine turtles, and marine mammals that are caught and discarded or have interacted with the vessel's fishing gear. A subset of these vessels also provide information about dockside prices, trip operating costs, and annual fixed costs.

The data are used for scientific analyses that support critical conservation and management decisions made by national and international fishery management organizations. Interaction reports are needed for fishery management planning and to help protect endangered species and marine mammals. Price and cost data will be used in analyses of the economic effects of proposed regulations.

II. Method of Collection

The information is submitted on paper forms. Logbooks are completed daily and submitted on either a by trip or monthly basis, depending on the fishery. Fixed costs are submitted on an annual basis. Other information is submitted on a trip basis.

III. Data

OMB Control Number: 0648–0016.

Form Number: None.

Type of Review: Regular submission (extension of a current information collection).

Affected Public: Business or other for-profit organizations; individuals or households.

Estimated Number of Respondents: 4,177.

Estimated Time per Response: Annual fixed-cost reports, 30 minutes; Colombian fishery logbooks, 18 minutes; discard logbooks, 15 minutes; headboat, golden crab, reef fish-mackerel, economic cost/trip,, wreckfish, and shrimp logbooks, 10 minutes; no-fishing responses for golden crab, reef fish-mackerel, charterboat, wreckfish and Colombian fisheries, 2 minutes.

Estimated Total Annual Burden Hours: 16,007.

Estimated Total Annual Cost to Public: $0.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: February 8, 2013.

Gwellnar Banks,

Management Analyst, Office of the Chief Information Officer.

National Oceanic and Atmospheric Administration

[Docket No. 130208645–3645–01]

RIN 0648–XC209

Endangered and Threatened Wildlife; 90-Day Finding on a Petition to List 44 Species of Corals as Threatened or Endangered Under the Endangered Species Act

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce.

ACTION: Notice of 90-day petition finding.

SUMMARY: We (NMFS) announce a 90-day finding on a petition to list 44 species of corals off Alaska as threatened or endangered under the Endangered Species Act (ESA). We find that the petition does not present substantial scientific or commercial information indicating that the petitioned actions may be warranted.

ADDRESSES: Copies of the petitions and related materials are available online at *http://www.alaskafisheries.noaa.gov/protectedresources/coral/default.htm* or upon request from the Assistant Regional Administrator for Protected Resources, Alaska Region, NMFS, P.O. Box 21668, Juneau, AK 99802–1668.

FOR FURTHER INFORMATION CONTACT: John Olson, NMFS Alaska Region, (907) 271–1508; Jon Kurland, NMFS Alaska Region, (907) 586–7638; or Maggie Miller, NMFS Office of Protected Resources, (301) 427–8403.

SUPPLEMENTARY INFORMATION:

Background

On August 20, 2012, we received a petition from the Center for Biological Diversity to list 44 taxa of coral (42 species, one subspecies and one variant) as threatened or endangered under the ESA. The petition is entitled ''Petition to List 43 Coral Species under the Endangered Species Act'' but it provides information regarding 44 taxa. We are therefore treating the petitioned action as the listing of 44 taxa. The petitioner also requested that critical habitat be designated for these corals concurrent with listing under the ESA. The petition asserts that synergistic threats of ocean warming, ocean acidification, commercial fisheries, oil spills, and other impacts affect these species. The petition briefly summarizes the description, taxonomy, distribution, and status for each petitioned species. It also describes current and future threats that the petitioner asserts are affecting or will affect these species.

The 44 taxa included in the petition are: *Arthrogorgia otsukai, Arthrogorgia utinomii, Fanellia compressa, Fanellia fraseri, Narella abyssalis, Narella alaskensis, Narella arbuscula, Narella bayeri, Narella cristata, Plumarella aleutiana, Plumarella echinata, Plumarella hapala, Plumarella nuttingi, Plumarella profunda, Plumarella robusta, Plumarella spicata, Plumarella superba, Primnoa pacifica* var. *willeyi, Primnoa wingi, Thouarella cristata, Thouarella trilineata, Alaskagorgia aleutiana, Cryogorgia koolsae, Cavernularia vansyoci, Swiftia beringi* (a junior synonym for *Calcigorgia beringi*), *Crypthelia trophostega, Cyclohelia lamellata, Errinopora dichotoma, Errinopora disticha, Errinopora fisheri, Errinopora nanneca, Errinopora undulate, Errinopora zarhyncha, Stylaster trachystomus, Stylaster ellasotomus, Stylaster brochi, Stylaster alaskanus, Stylaster leptostylus, Stylaster campylecus, Stylaster crassiseptum, Stylaster parageus parageus, Stylaster repandus, Stylaster stejnegeri,* and *Distochopora borealis. Stylaster cancellatus* is also mentioned in the petition but this is a junior synonym for *Stylaster alaskanus.* All 44 taxa are found in waters off Alaska in the Aleutian Islands, Gulf of Alaska, and/or Bering Sea.

ESA Statutory and Regulatory Provisions and Evaluation Framework

Section 4(b)(3)(A) of the ESA of 1973, as amended (U.S.C. 1531 *et seq.*), requires that, to the maximum extent practicable, within 90 days of receipt of a petition to list a species as threatened or endangered, the Secretary of Commerce make a finding as to whether that petition presents substantial scientific or commercial information indicating that the petitioned action may be warranted, and promptly publish such finding in the **Federal Register** (16 U.S.C. 1533(b)(3)(A)). When we find that substantial scientific or commercial information indicates the petitioned action may be warranted (a ''positive 90-day finding''), we are required to commence a review of the status of the species concerned during which we will conduct a comprehensive review of the best available scientific and commercial information. In such cases, we are to conclude the review with a finding as to whether the petitioned action is warranted within 12 months of receipt of the petition. Because the finding at the 12-month stage is based on a more thorough review of the available information, a ''may be warranted'' 90-day finding does not prejudge the outcome of the status review.

Under the ESA, a listing determination may address a species, subspecies, or, for any vertebrate species, a distinct population segment (DPS) which interbreeds when mature (16 U.S.C. 1532(16)). Because corals are invertebrate species, we are limited to assessing the status of species or subspecies of corals. A species or subspecies is ''endangered'' if it is in danger of extinction throughout all or a significant portion of its range, and ''threatened'' if it is likely to become endangered within the foreseeable future throughout all or a significant portion of its range (ESA sections 3(6) and 3(20), respectively, 16 U.S.C. 1532(6) and (20)). The ESA requires us to determine whether species are threatened or endangered based upon any of the following section 4(a)(1) factors: the present or threatened destruction, modification, or curtailment of habitat or range; overutilization for commercial, recreational, scientific, or educational purposes; disease or predation; inadequacy of existing regulatory mechanisms; and any other natural or manmade factors affecting the species' existence (16 U.S.C. 1533(a)(1)).

Implementing regulations issued jointly by NMFS and the US Fish and Wildlife Service (50 CFR 424.14(b)) define ''substantial information'' in the context of reviewing a petition to list, delist, or reclassify a species as the amount of information that would lead a reasonable person to believe that the measure proposed in the petition may be warranted. When evaluating whether substantial information is contained in a petition, the Secretary must consider whether the petition: (1) Clearly indicates the administrative action recommended and gives the scientific and any common name of the species involved; (2) contains detailed narrative justification for the recommended measure, describing, based on available information, past and present numbers and distribution of the species involved and any threats faced by the species; (3) provides information regarding the status of the species over all or a significant portion of its range; and (4) is accompanied by the appropriate supporting documentation in the form of bibliographic references, reprints of pertinent publications, copies of reports or letters from authorities, and maps (50 CFR 424.14(b)(2)).

Court decisions clarify the appropriate scope and limitations of the Services' review of petitions at the 90-day finding stage in making a determination whether a petitioned

action may be warranted. As a general matter, these decisions hold that a petition need not establish a strong likelihood or a high probability that a species is either threatened or endangered to support a positive 90-day finding.

Decisions under the ESA must be based on the best scientific and commercial data available. We evaluate the petitioner's request based upon the information in the petition including its references, and the information readily available in our files. If the petitioner's sources are based on accepted scientific principles, we will accept them and characterizations of the information presented unless we have specific information in our files that indicates the petition's information is incorrect, unreliable, obsolete, or otherwise irrelevant to the requested action. Information that is susceptible to more than one interpretation or that is contradicted by other available information will not be dismissed at the 90-day finding stage, so long as it is reliable and a reasonable person would conclude it supports the petitioner's assertions. In other words, conclusive information indicating the species may meet the ESA's requirements for listing is not required to make a positive 90-day finding. We will not conclude that a lack of specific information alone negates a positive 90-day finding, if a reasonable person would conclude that the unknown information itself suggests an extinction risk of concern for the species at issue.

To make a 90-day finding on a petition to list a species, we evaluate whether the petition presents substantial scientific or commercial information indicating the subject species may be either threatened or endangered, as defined by the ESA. First, we evaluate whether the information presented in the petition, along with the information readily available in our files, indicates that the petitioned entity constitutes a ''species'' eligible for listing under the ESA. Next, we evaluate whether the information indicates that the species at issue faces extinction risk that is cause for concern; this may be indicated in information expressly discussing the species' status and trends, or in information describing impacts and threats to the species. We evaluate any information on specific demographic factors pertinent to evaluating extinction risk for the species at issue, and the potential contribution of identified demographic risks to extinction risk for the species. We then evaluate the potential links between these demographic risks and the causative impacts and threats identified in section 4(a)(1).

Information presented on impacts or threats should be specific to the species and should reasonably suggest that one or more of these factors may be operative threats that act, will act, or have acted on the species to the point that it may warrant protection under the ESA. Broad statements about generalized threats to the species, or identification of factors that could negatively impact a species, do not constitute substantial information that listing may be warranted. We look for information indicating that not only is the particular species exposed, or reasonably likely to be exposed, to a factor, but that the species may respond or may presently be responding in a negative fashion; then we assess the potential significance of that negative response.

Biology of Coral Species

Corals are defined as ''animals in the cnidarian class Anthozoa and Hydrozoa that produce either calcium carbonate (argonite or calcite) secretions resulting in a continuous skeleton or as numerous, usually microscopic, individual sclerites, or that have a black, horn-like proteinaceous axis'' (Cairns, 2007). All of the petitioned corals belong to the phylum Cnidaria and to the classes Anthozoa or Hydrozoa. The anthozoans are exclusively polypoid (i.e., generally sessile) with no medusoid (i.e., generally free-swimming) stage and include the orders Gorgonacea (gorgonians) and Pennatulacea (sea whips and sea pens). The hydrozoans generally retain both the polypoid and medusoid stages in their life cycle and include the order Anthoathecatae (hydrocorals). To date, 134 unique coral taxa have been found in Alaskan waters (Stone and Rooper, in review) and all are ahermatypic (i.e., non-reef forming) and azooxanthellate (i.e., do not contain symbiotic algae in their tissues). They have a broad distribution in Alaskan waters and are found at depths between 3 and 6,328 meters (m) (Stone and Rooper, in review).

Gorgonians are the most diverse coral group in Alaskan waters with 61 unique taxa from 7 families (Stone and Rooper, in review). They are the most important structure-forming corals in Alaskan waters and generally require exposed, hard substratum for attachment (Stone and Shotwell, 2007). Gorgonians are locally abundant, contagiously distributed, and form both single- and multi-species assemblages (Stone and Shotwell, 2007). They range in depth from 6 to 4,784 m (Stone and Shotwell, 2007). Their skeletal components are composed of aragonite, calcite, high-magnesium calcite, amorphous carbonate hydroxylapatite and there is some evidence that some taxa may have polymorphic skeletons (Cairns and MacIntyre, 1992). Of the 23 gorgonians listed in the petition, 11 taxa are known exclusively from the Aleutian Islands, 5 appear to be endemic to seamounts, 4 are known from the Aleutian Islands and Bering Sea Slope, 1 is known from the western Gulf of Alaska and Aleutian Islands, *Primnoa pacifica* var. *willeyi* ranges throughout Alaskan waters south of the Bering Sea, and *Swiftia beringi* (actually *Calcigorgia beringi*) appears to be broadly distributed from the eastern Gulf of Alaska through the Aleutian Island Archipelago (Stone *et al.,* in preparation).

Sea whips and sea pens have a widespread distribution in Alaskan waters and are represented by 10 taxa in 3 families (Stone and Shotwell, 2007). Several are important structure forming corals and at least three species form extensive groves in soft sediment areas (Stone and Shotwell, 2007). They range in depth from 3 to 2,947 m (Stone and Shotwell, 2007) and their skeletons appear to be composed exclusively of high-magnesium calcite (Stone *et al.,* in preparation). The single pennatulacean listed in the petition is known from one specimen collected in the Aleutian Islands (Williams, 2005).

Hydrocorals have a widespread distribution in Alaska but have not been reported from seamounts and are extremely rare north of the Aleutian Archipelago slope (Stone *et al.,* in preparation). They are represented by 24 taxa in Alaskan waters (R. Stone, unpublished data) and several species are important structure forming corals (Stone and Shotwell, 2007). They form erect or encrusting calcareous colonies and require exposed, hard substratum for attachment. They range in depth from 10 to 2,124 m (Stone and Rooper, in review) and their skeletons may be composed of aragonite, calcite, high-magnesium calcite, amorphous carbonate hydroxylapatite, and there is some evidence that some taxa may have polymorphic skeletons (Cairns and MacIntyre, 1992). Of the 19 hydrocorals listed in the petition, 14 are known only from the Aleutian Islands, 3 are known from the Aleutians Islands region and the eastern Gulf of Alaska, and 2 are known from the Aleutian Islands and the southern Bering Sea (Stone *et al.,* in preparation).

Analysis of Petition

The petition describes factors which it asserts have led to the current status of

these corals, as well as threats which it asserts the taxa currently face, categorizing them under the ESA section 4(a)(1) factors. The petition focuses on habitat threats, asserting that the habitat of the petitioned coral taxa is under threat from several processes linked to anthropogenic greenhouse gas emissions, including ocean acidification, ocean warming, and changes in currents and salinity. The petition also asserts that these global habitat threats are exacerbated by local habitat threats posed by commercial fishing activities, oil and gas exploration and production, and oil spills. Finally, the petition contends that the existing regulatory mechanisms in place are inadequate to address the identified threats to corals.

For each of the petitioned taxa, we evaluated whether the information provided or cited in the petition met the regulatory standard for ''substantial information.'' We also reviewed other readily available information (i.e., currently within NMFS files) related to the distribution, abundance, and threats to the petitioned taxa.

Information submitted by the petitioner for each of the 44 coral taxa was limited to a brief taxonomic/physical description, geographic and depth distribution information based on the cited literature, a map describing the possible spatial distribution, and a relatively generic status statement. Some distribution descriptions also contained temperature or substrate data. Relatively little species-specific information was presented in the petition or is presently available on the biology, population characteristics, distribution, or status of the 44 individual taxa. The petitioner provided no species-specific information on abundance or trends. The petition states on page 27 that ''[t]here are several factors that play an important role in the distribution of Alaska coral species, including nutrient flows and productivity, water temperature, availability of hard substrate, currents and sediment load, and seawater chemistry make-up including salinity and calcium carbonate saturation state.'' These statements are not referenced and we are unaware of any research that has been conducted in Alaska to date to support them. The petition continues: ''[t]hese factors were not included in the mapping process as they are not readily available, and the specific interactions of these factors to each species' distribution are unknown.'' The petition acknowledges limited available data regarding the distribution, range, abundance, and population trends for the petitioned taxa and relies instead on relatively generic status statements for each of the petitioned taxa that suggest limited range (endemism) as well as a limited ability of corals to repair damage, adapt to new conditions, or colonize disturbed areas.

Of the 44 petitioned coral taxa, 22 species have been described in just the past decade (14 of those in 2011). These include five species of *Narella* (*N. abyssalis, N. alaskensis, N. arbuscula, N. bayeri,* and *N. cristata*) collected during submersible surveys in 2002 and 2004 and formally described in 2007 (Cairns and Baco, 2007). These are all deep bathyal species and appear to be endemic to Gulf of Alaska seamounts. New species also include two gorgonians (*Alaskagorgia aleutiana* and *Cryogorgia koolsae*) and the small, cryptic pennatulacean *Cavernularia vansyoci* from the Aleutian Islands (Sanchez and Cairns, 2004; Williams, 2005). The latter species is known from only a single specimen. Cairns (2011) published a major revision of the Primnoidae that yielded eight new species that are included in the petition, principally from the Aleutian Islands (*Plumarella aleutiana, P. echinata, P. hapala, P. nuttingi, P. profunda, P. robusta, Thouarella cristata, T. trilineata*). All of these species are extremely difficult to differentiate from each other, particularly in the field, and consequently our knowledge of their distribution is largely limited to expertly identified museum specimens. Cairns and Lindner (2011) also performed a major revision of the hydrocorals (Stylasteridae) from Alaskan waters yielding six new species that are included in the petition (*Errinopora dichotoma, E. disticha, E. fisheri, E. undulata, Stylaster repandus,* and *S. crassiseptum*). The genera *Errinopora* and *Stylaster* require advanced taxonomic expertise to identify to species in the field or laboratory and consequently our knowledge of their distribution is largely limited to expertly identified museum specimens.

The remaining gorgonians in the petition are somewhat easier to identify in the field, and of those, six (*Arthrogorgia otsukai, A. utinomii, Fanellia compressa, F. fraseri, Primnoa pacifica* var. *willeyi,* and *P. wingi*) have been fairly well documented and most have been caught incidentally and repeatedly in bottom trawl surveys that NMFS conducts in the Gulf of Alaska and Bering Sea to assess groundfish stocks. *Plumarella spicata* and *P. superba* are not documented in the NMFS bottom trawl survey. *Swiftia beringi* (actually *Calcigorgia beringi*) is relatively easy to identify in the field but is relatively uncommon and seldom encountered in the NMFS bottom trawl survey. Of the remaining hydrocorals, *Crypthelia trophostega, Cyclohelia lamellata, Errinopora nanneca, E. zarhyncha, Stylaster brochi,* and *S. campylecus* are relatively easy to differentiate to species level in the field and consequently some information on their distribution is available from the NMFS bottom trawl survey. *Distichopora borealis* has not been documented in the NMFS bottom trawl survey. *Stylaster alaskanus, S. ellasotomus, S. leptostylus, S. parageus parageus, S. stejnegeri,* and *S. trachystomus* are very difficult to identify to species and consequently few records are available from any source for these taxa.

The petition presents little information on the past or present numbers, relative abundance, or distribution of the petitioned taxa, which is understandable because for many of the species only scant information exists. As noted above, 22 of the petitioned taxa are new to science in the last decade. For the other 22 petitioned taxa, sampling has been largely opportunistic as bycatch in surveys to assess groundfish stocks using trawl gear that is not designed to sample corals. To supplement information presented in the petition, we reviewed the 38,752 bottom trawl survey data points in our files (available at *http://www.afsc.noaa.gov/RACE/groundfish/survey_data/data.htm*) for the Aleutian Islands, Bering Sea, and Gulf of Alaska, and found 1,151 tows in which corals were caught incidentally since 1982, including 17 of the petitioned taxa. These data demonstrate a substantially wider distribution for some of these taxa than reported in the petition, both geographically and with regard to depth. We also have information that one of the species listed in the petition as ''endemic to the Aleutian Islands, Gulf of Alaska, and Bering Sea,'' *Swiftia beringi,* has confirmed occurrences off Washington State. Nevertheless, systematic surveys have not been conducted in Alaska to assess the distribution, abundance, or population trends of these (or other) corals, providing no reliable basis to assess their status. Trawl surveys off Alaska are limited to areas that are relatively flat and not too rough, yet many Alaskan coral species, particularly in the Aleutian Islands, prefer hard substrate with high currents and steep slopes (Woodby *et al.,* 2009) that are not conducive to sampling with a bottom trawl. NMFS and others have conducted coral research in Alaska with other tools

(e.g., submersibles) that has confirmed a much broader depth and geographical distribution and more varied habitat for many Alaskan coral species than previously documented (Stone, 2006; Stone and Alcorn, 2007; Miller *et al.,* 2012). Even these efforts provide an incomplete picture of the population-level status and abundance of these species. Based on our review of the petition and other information available to us, too little survey information exists to conclude that the small number of documented occurrences of the petitioned taxa may equate to a risk of extinction due to low population size. We expect, based on surveys conducted to date, that additional survey effort would result in additional observations of the petitioned taxa in other locations.

We examined each of the threats listed in the petition. Ocean acidification due to anthropogenic carbon dioxide emissions and oceanographic changes resulting from climate change are described in the petition as major threats. NMFS scientists are aware that others have hypothesized that both may produce conditions that directly and indirectly affect cold water corals, yet no empirical studies to date have demonstrated deleterious effects to the petitioned taxa or to similar coral taxa. The petition draws entirely on the results of ocean acidification research conducted on tropical corals and a single cold water coral species (*Lophelia pertusa*). Tropical scleractinian corals and cold water corals are very different animals both physiologically and ecologically. Tropical scleractinian corals are typically hermatypic (reef-building), contain intracellular zooxanthellae (symbiotic photosynthetic dinoflagellates), and inhabit shallow warm waters. *L. pertusa* is a reef building scleractinian predominantly found in the North Atlantic Ocean and is not found in the northern North Pacific Ocean. It is the only cold water coral for which there is species-specific information on the physiological effects of lowered pH (Maier, 2009). The results of that study were contradictory; *L. pertusa* exhibited reduced growth when exposed to lower pH but colonies still showed positive net calcification. Ocean acidification literature generally would lead scientists to expect both reduced growth and negative net calcification, so we find the Maier (2009) study unhelpful for assessing whether the petitioned corals may react negatively to ocean acidification.

The petitioned corals and scleractinian corals (such as the tropical corals and *L. pertusa*) are not closely related and we find no basis to expect that they would have similar physiological responses to stress. Scleractinians and hydrocorals are related at the Phylum level whereas scleractinians and octocorals (gorgonians and pennatulaceans) are related at the Class level. Most importantly, the biomineralization processes for scleractinians and the petitioned coral groups are entirely different, so it is not appropriate to use the responses of the first group of corals as a surrogate for the latter group. Scleractinians accrete aragonite whereas all gorgonians and many hydrocorals accrete calcite and/or high-magnesium calcite. The biomineralization mechanisms that produce these compounds are very different (Lowenstam and Weiner, 1989). Aragonite is the kinetically favored polymorph of calcium carbonate to precipitate from seawater and scleractinian aragonite crystals are morphologically and chemically similar to aragonites precipitated inorganically (Holcomb *et al.,* 2009). Two factors indicate that scleractinian calcification is more of an inorganic process compared to gorgonians and hydrocorals (including the petitioned taxa) where the organic matrix plays a much more prominent role in calcification. First, scleractinian mineralization is entirely extracellular whereas gorgonian spicules are formed intracellularly. Second, the percent organic matrix in scleractinian coral skeletons is very small (< 1 percent) compared to a very high percentage for gorgonians and hydrocorals (Cohen and Holcomb, 2009).

The literature cited in the petition does not support the petitioned action. For example, the petition states that undersaturation of calcite will affect the growth and repair of both the corals and the plankton that provide the corals' food and nutrient sources and then cites the work by Comeau *et al.* (2010) on pteropods. Drawing inferences based upon effects on pteropods is inappropriate because pteropods are not corals (they are mollusks), belong to an entirely different phylum of animals, and unlike corals are generally free-swimming and pelagic. Similarly, the petition states that shifting currents as the result of climate change may limit nutrients available to the petitioned species. The petition presents no evidence that currents in the areas of the petitioned corals may shift, and no scientific information is available regarding the role water currents play in delivering nutrients to the petitioned taxa. Rather, the petition provides citations from the tropical coral literature (Coma *et al.,* 2009; Donner, 2009) that are not applicable to cold water corals. The petition states that global climate change and ocean acidification will impair biological and ecological functions of cold water corals, degrade habitat, and actively erode existing coral colonies, yet cites the work by Orr *et al.* (2005) on pteropods and the review by Hoffman *et al.* (2010) which does not provide any direct evidence to support the statement. The Hoffman paper reviews ocean acidification literature for ''the responses of key marine calcifiers at the organismal level and extend[s] these observations, where possible, to potential outcomes at the ecosystem level.'' The review does not provide new information on the petitioned corals, but does state that ''some deep-living corals may resist dissolution because tissues protect their carbonate skeletons.''

The petition also states that ''the petitioned coral species are under severe, pervasive and growing threats from * * * ocean acidification and climate change'' and again cites Hofmann *et al.* (2010). Hofmann *et al.* (2010), however, does not mention any of the petitioned corals but rather only specifically discusses the colonial scleractinian, *L. pertusa,* from the North Atlantic Ocean. As noted above, *L. pertusa* is a very different species from the petitioned taxa and we find no basis to infer that the petitioned corals would respond similarly to ocean acidification or climate change. To the contrary, extensive observations made in situ during the last decade indicate that corals in Alaska (including many of the petitioned species) are thriving at depths well below the saturation horizons in the Aleutian Islands (Stone, 2006; Heifetz *et al.,* 2007). Additionally, all stylasterids and octocorals (including all of the petitioned taxa) have external tissue that would insulate the skeleton from acidic water, so they may not be as susceptible to the effects of corrosive seawater as other organisms that lack this tissue coverage (Rudolfo-Metalpa, 2011). In summary, while corals in other parts of the world have come under pressure, including from the effects of climate change and ocean acidification, the little information that exists regarding the petitioned cold water corals is too insubstantial to indicate that they may be threatened by the effects of climate change and ocean acidification.

The information presented in the petition on threats from commercial fishing describes how fishing gear could affect corals, but it understates the degree of conservation provided by the

suite of management measures taken since 2005 to protect corals and other sensitive sea floor habitats in Alaska, which greatly alleviate these threats. On June 28, 2006, NMFS finalized regulations to minimize the effects of fishing on Essential Fish Habitat, including substantial new measures to address concerns about the impacts of bottom trawling on benthic habitat (particularly on coral communities) in the Aleutian Islands and Gulf of Alaska (71 FR 36694). The regulations established the Aleutian Islands Habitat Conservation Area (AIHCA) to prohibit all bottom trawling in the Aleutians outside the historical footprint of the fishery. Over 95 percent of the management area (277,100 square nautical miles (nm^2)) and 60 percent of ''fishable depths'' are closed to bottom trawling. Additionally, the regulations established six Aleutian Islands Coral Habitat Protection Areas totaling 110 nm^2 with especially high density coral and sponge habitat that were closed to all bottom-contact fishing gear (nonpelagic trawl, dredge, dinglebar, pot, and hook-and-line). The regulations also identified 16 seamounts (mostly in the Gulf of Alaska) as Habitat Protection Areas and similarly closed them to all bottom contact fishing to protect corals and other habitat features. The same regulations closed 10 Gulf of Alaska Slope Habitat Conservation Areas totaling 2,086 nm^2 to bottom trawling and closed 5 Gulf of Alaska Coral Habitat Protection Areas totaling 13.5 nm^2 to all bottom contact fishing. Other substantial closures in the Aleutian Islands, such as the Steller Sea Lion protection measures, further limit the areas open to bottom trawling and therefore protect coral habitat. Preliminary GIS analysis of the NMFS trawl survey data show that in the Aleutian Islands, 30 percent of coral records are located in the AICHA alone, which is closed to bottom trawling. NMFS has also conducted cooperative research with the fishing industry, resulting in gear modifications to trawl sweeps that have been shown to reduce the effects of non-pelagic trawls on benthic invertebrates in the Bering Sea and Gulf of Alaska.

The petition suggests that corals in the Bering Sea canyons remain unprotected from the effects of fishing and asserts that such corals are therefore vulnerable. In 2006 and 2007, the North Pacific Fishery Management Council considered protection measures for submarine canyons but ultimately postponed taking action because scientific information was not available to establish the dependence of managed fish species on habitat features of the canyons. A 2007 expedition to Zhemchug and Pribilof Canyons led to publication of a paper with new information (Miller *et al.,* 2012). In April 2012 the Council requested that NMFS review and summarize existing and new information on the canyons, their habitat, and fish associations in those areas to assist the Council in determining whether any potential future management actions are warranted. The analysis will include the coral species in the canyons, but there is no indication at this time that corals, including the few petitioned species that are found there, face risks from commercial fishing that may warrant listing the species as threatened or endangered.

With regard to increased shipping and tourism traffic and oil spills that may accompany such increases, the petition asserts that the risk of spills will intensify over time. According to the petition, most traffic to the Bering Sea and Arctic transits Unimak Pass, thereby placing corals in the Aleutian Islands, Bering Sea, and Gulf of Alaska at risk. NOAA has developed the General NOAA Oil Model Environment (GNOME) model to predict the trajectory and weathering of oil spills. Winds, currents, tides, and climatology can all be used as inputs. However, this is a surface trajectory model and a vertical mixing component is not available. Data on currents in the Aleutian Islands are general at best, and the petition's assertion that the ''currents would therefore be likely to transport oily water to cold water coral sites'' is unsupported, as there is no research to suggest a mechanism for ''likely'' transport of oil. Deep water flowing north in the Pacific Ocean encounters the Aleutian Trench where it is forced up onto the Aleutian Trench and into the Bering Sea through the many island passes (Johnson, 2003). Woodby *et al.* (2009) attempted to include currents in modeling coral distribution in the Aleutian Islands, but stated ''reliable and high resolution current data were not available for model development due to the general lack of current observations in the central Aleutian Islands.'' This statement is true throughout the Aleutians Islands and Alaska. Suchanek (1993) analyzed spill responses in tidal and subtidal environments and included hermatypic corals; however, mechanisms for transport of oil components to depths typical of the petitioned species in Alaska are not discussed. Information presented in the petition related to the Deepwater Horizon oil spill in the Gulf of Mexico and the effects of oil on Gulf of Mexico deep water corals is not directly relevant in Alaska as the Deepwater Horizon spill occurred at a depth of 1,259 m in an environment vastly different than the Aleutian Islands or other Alaskan waters. Fewer than a dozen exploratory wells have been drilled (and subsequently abandoned) in deep (≤ 100 m) central Bering Sea waters, and there has been no exploratory activity in the Aleutian Islands. No wells have been developed for production and no platforms exist. There is a moratorium on exploration in Bristol Bay until at least 2017. In the Arctic, several wells exist; however, most are developed through human-made drilling islands in shallow water (< 15 m). Exploration in the Chukchi Sea in 2012 was conducted in 50 m of water.

The petition cites recent discoveries of corals in the Chukchi Sea as examples of corals at risk from oil exploration and development. However, the species encountered in that instance was a soft coral, *Gersemia rubiformis,* which is not included in the petition. The petition states that ''the density and coverage of cold water corals at the drill site were similar to those observed in tropical coral reefs,'' citing a Washington Post newspaper article (Eilperin, 2012), yet the cited article presents no such conclusion. Based on information in our files, the petitioned coral species do not occur north of approximately the Pribilof Islands in the Bering Sea, approximately 600 miles (966 km) south of the site of proposed oil exploration drilling in the Chukchi Sea. The petition does not present substantial information on possible threats from oil exploration or development to the petitioned species in Alaska.

Beginning in 2012, NMFS implemented a 3 year field research program in Alaska as part of NOAA's Deep Sea Coral Research and Technology Program, which may help to answer some of the unknown questions with regard to corals in Alaska. The goals of the program are to better understand the location, distribution, ecosystem role, and status of deep-sea coral and sponge habitats. Research priorities include determining the distribution, abundance and diversity of deep-sea corals and sponges (and their distribution relative to fishing activity); compiling and interpreting habitat and substrate maps; determining associations of commercially important fish species (especially juveniles) with deep-sea coral and sponge habitats and the contribution of those habitats to

fisheries production; determining the impacts of fishing gears and testing gear modifications to reduce any impacts; determining recovery rates of deep-sea coral and sponge communities from physical disturbance; and establishing a long-term monitoring program to determine the potential effects of climate change and ocean acidification on deep-sea coral and sponge ecosystems. Additionally, NOAA's Ocean Acidification Program is currently analyzing the carbonate mineralogy of Alaskan corals. The mineralogy data will be used in conjunction with species distribution data (depth and geographical) and the present and projected aragonite and calcite saturation horizons in Alaska to predict the effects of ocean acidification on coral resources of the North Pacific Ocean.

Petition Finding

We have reviewed the petition, the literature cited in the petition, and other literature and information available in our files. We find that the petition does not present substantial information indicating that the requested listing actions may be warranted for any of the 44 petitioned species.

Per 50 CFR 424.14(b)(2)(1), the petition clearly requests that NMFS list 44 taxa of corals as threatened or endangered under the ESA and provides the scientific names for each taxon.

Per 50 CFR 424.14(b)(2)(2), the petition provides a narrative justification for listing but does not present information on the past or present numbers or relative abundance of the petitioned taxa and provides scant information on their distribution. Based on information from the NMFS trawl surveys, the published literature, and museum records, at least 17 of the petitioned taxa have a broader depth and geographical distribution than reported in the petition. Of the 44 petitioned taxa, 22 are new to science in the past decade and have very few recorded observations, and the remaining 22 have been recorded opportunistically as bycatch in fish surveys that are not designed to sample corals. Systematic surveys have not been conducted to assess the distribution, abundance, or population trends for any of the petitioned corals, providing no basis to assess their status. We conclude that too little survey data exist to lead a reasonable person to conclude that the small number of documented occurrences of the petitioned taxa may equate to a risk of extinction due to low population size, either now or in the foreseeable future.

Per 50 CFR 424.14(b)(2)(3), the petition provides little information regarding the status of the species. We have somewhat more information including observations from bycatch in NMFS trawl surveys, but systematic surveys for these corals have not been undertaken. At least 17 of the petitioned taxa have a wider distribution than is reflected in the petition. The threats cited in the petition are ocean warming, ocean acidification, commercial fisheries, oil spills, and oil and gas exploration and development. Information presented in the petition regarding the effects of climate change and ocean acidification on the petitioned taxa is too tenuous or unsupported. Also, information in our files and the published literature (discussed above) suggests that certain corals off Alaska might be more resilient to the effects of ocean acidification than the petition implies, leading us to conclude that there is not substantial information that would lead a reasonable person to believe that the petitioned corals may be threatened with extinction due to the effects of climate change and ocean acidification, either now or in the foreseeable future. Regarding commercial fisheries, the petition discusses general threats from trawling and other bottom contact fishing but fails to provide a complete description of the protective measures that NMFS has implemented, particularly since 2006, to protect extensive areas of sea floor habitat off Alaska; many of the measures were expressly designed to protect corals. While some of the petitioned taxa may well exist in areas that remain open to bottom-contact fishing, due to the extensive fishery restrictions in place to protect coral habitats and the reasonable inference that the petitioned taxa likely have a wider distribution than has yet been documented in the limited surveys conducted to date, we find insufficient information to lead a reasonable person to believe that such fishing threatens those corals with extinction, either now or in the foreseeable future. Regarding oil spills and oil exploration and development, the petition discusses increasing human activity that may result in an increased risk of spills, but does not present substantial information suggesting that the petitioned corals will face exposure to spilled oil that would present a risk of extinction.

Per 50 CFR 424.14(b)(2)(4), the petition includes references and maps, although as noted above, we conclude that overall the petition does not provide substantial information to support its conclusions, and the maps do not accurately reflect the known distribution of the petitioned taxa (acknowledging that even the known distribution is likely not the complete distribution, since comprehensive surveys have not been undertaken).

Final Management Plan and Environmental Assessment for Monitor National Marine Sanctuary: Notice of Public Availability

AGENCY: Office of National Marine Sanctuaries (ONMS), National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce (DOC).

ACTION: Notice of public availability.

SUMMARY: NOAA is releasing the final management plan and environmental assessment for Monitor National Marine Sanctuary.

DATE: The final management plan and environmental assessment for Monitor National Marine Sanctuary is now available.

ADDRESSES: To obtain a copy of the final management plan and environmental assessment, contact the Management Plan Review Coordinator, Monitor National Marine Sanctuary, 100 Museum Drive, Newport News, VA 23606; (757) 591–7328; or via email at *Monitor@noaa.gov*. Copies can also be downloaded from the Monitor National Marine Sanctuary (MNMS) Web site at *http://monitor.noaa.gov.*

FOR FURTHER INFORMATION CONTACT: Shannon Ricles at (757) 591–7328.

SUPPLEMENTARY INFORMATION:

I. Background Information

On January 30, 1975, the National Oceanic and Atmospheric

Administration (NOAA) designated Monitor National Marine Sanctuary (MNMS) as the nation's first national marine sanctuary. MNMS protects the wreck of the famed Civil War ironclad, USS *Monitor,* best known for its battle with the Confederate ironclad, *CSS Virginia* in Hampton Roads, VA, on March 9, 1862.

NOAA began to review the management plan for MNMS in December 2008 with public scoping (including meetings). This was followed by meetings of sanctuary advisory council working groups to develop the action plans of the management plan.

NOAA released a draft revised management plan on April 12, 2012, and accepted comments through June 22, 2012 (77 F.R. 22761). During the public comment period, NOAA held five public meetings in Raleigh, NC, Wilmington, NC, Beaufort, NC, Nags Head, NC, and Newport News, VA. Comments can be viewed at *http://www.regulations.gov* with docket number NOAA–NOS–2012–0076. All comments received are addressed in *Appendix I: Response to Public Comments.*

II. Environmental Assessment

NOAA prepared an environmental assessment, pursuant to the National Environmental Policy Act, that analyzes the environmental impacts of the revised management plan. NOAA's analysis of environmental impacts of this action resulted in a finding of no significant impact.

Dated: February 6, 2013.

Daniel J. Basta,

Director, Office of National Marine Sanctuaries.

Fisheries of the Gulf of Mexico; Southeast Data, Assessment, and Review (SEDAR); Public Meeting; Correction

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Correction to notice of SEDAR Steering Committee meeting.

SUMMARY: This document corrects an error made to the meeting description in the **DATES** section for the SEDAR Steering Committee. The original document published in the **Federal Register** on February 8, 2013, and all other information remains unchanged and will not be repeated in this document. See **SUPPLEMENTARY INFORMATION.**

ADDRESSES: *SEDAR address:* 4055 Faber Place Drive, Suite 201, N. Charleston, SC 29405.

FOR FURTHER INFORMATION CONTACT: John Carmichael, SEDAR Program Manager; phone (843) 571–4366; email: *john.carmichael@safmc.net* or Andrea Grabman, SEDAR Administrative Assistant; phone (843) 571–4366; email: *andrea.grabman@safmc.net.*

SUPPLEMENTARY INFORMATION:

Correction

In the **Federal Register** of February 8, 2013, in FR Doc. 2013–02870, on page 9372, in the first column, correct the **DATES** caption to read as follows:

DATES: The SEDAR Steering Committee webinar will be held on February 25, 2013, from 11 a.m. to 1 p.m. EST.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: February 8, 2013.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

National Sea Grant Advisory Board

AGENCY: National Oceanic and Atmospheric Administration, Commerce.

ACTION: Notice of public meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the National Sea Grant Advisory Board (Board). Board members will discuss and provide advice on the National Sea Grant College Program in the areas of program evaluation, strategic planning, education and extension, science and technology programs, and other matters as described in the agenda found on the National Sea Grant College Program Web site at *http://www.seagrant.noaa.gov/leadership/advisory_board.html.*

DATES: The announced meeting is scheduled 8:00 a.m.–5:00 p.m. EST Monday, March 4 and 8:00 a.m.–5:00 p.m. EST Tuesday, March 5, 2013.

ADDRESSES: The meeting will be held at the Melrose Hotel, 2430 Pennsylvania Avenue Northwest, Washington, DC 20037.

Status: The meeting will be open to public participation with a 15-minute public comment period on Tuesday, March 5 at 11:00 a.m. E.S.T. (check agenda on Web site to confirm time.) The Board expects that public statements presented at its meetings will not be repetitive of previously submitted verbal or written statements. In general, each individual or group making a verbal presentation will be limited to a total time of three (3) minutes. Written comments should be received by the Designated Federal Officer by February 26, 2013 to provide sufficient time for Board review. Written comments received after February 26, 2013 will be distributed to the Board, but may not be reviewed prior to the meeting date. Seats will be available on a first-come, first-served basis.

Special Accomodations: These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Elizabeth Ban, Designated Federal Officer at 301–734–1082 by February 22, 2013.

FOR FURTHER INFORMATION CONTACT: Ms. Elizabeth Ban, Designated Federal Officer, National Sea Grant College Program, National Oceanic and Atmospheric Administration, 1315 East-West Highway, Room 11843, Silver Spring, Maryland 20910, (301) 734–1082.

SUPPLEMENTARY INFORMATION: The Board, which consists of a balanced representation from academia, industry, state government and citizens groups, was established in 1976 by Section 209 of the Sea Grant Improvement Act (Pub. L. 94–461, 33 U.S.C. 1128). The Board advises the Secretary of Commerce and the Director of the National Sea Grant College Program with respect to operations under the Act, and such other matters as the Secretary refers to them for review and advice.

The agenda for this meeting will be available at *http://www.seagrant.noaa.gov/leadership/advisory_board.html.*

Dated: February 6, 2013.

Jason Donaldson,

Chief Financial Officer/Chief Administrative Officer, Office of Oceanic and Atmospheric Research, National Oceanic and Atmospheric Administration.

DEPARTMENT OF DEFENSE

Office of the Secretary

David Grant United States Air Force Medical Center Specialty Care Travel Reimbursement Demonstration Project

AGENCY: Department of Defense.

ACTION: Notice of demonstration project.

SUMMARY: This notice is to advise interested parties of a Military Health System (MHS) demonstration project under the authority of Title 10, United States Code, Section 1092, entitled David Grant United States Air Force Medical Center Specialty Care Travel Reimbursement Demonstration Project. This demonstration project is intended to test whether providing travel reimbursement will increase utilization of the direct care system by selected beneficiaries. The Military Treatment Facility (MTF) commander would determine based on the MTF's individual capabilities, which specialty services in the facility currently have excess capacity and then offer those specialty services to qualified beneficiaries, including TRICARE Prime, TRICARE Standard and TRICARE for Life (TFL) beneficiaries, who reside more than one hour drive time away from the David Grant United States Air Force Medical Center (DGMC). These beneficiaries would be enticed to receive this specialty care from the more distant MTF rather than a closer authorized provider through the payment of travel costs from their residence to the MTF. The travel reimbursement offered under this demonstration will include roundtrip mileage reimbursement from the patient's residence to DGMC. Reimbursement may also include overnight lodging for the patient the evening before an early morning procedure and travel for a non-medical attendant for patients when medically indicated. This demonstration will test if the travel reimbursement incentive can produce a cost of care savings related to the recapturing of selected DoD beneficiaries. This travel benefit will be authorized only when the MTF commander (or designee) determines that the DoD cost of funding the care (including the travel benefit) in the MTF is likely to be less than the DoD cost to provide the care in the purchased care system. This demonstration also seeks to maximize the utilization of DGMC specialists, maintain an adequate clinical case mix of patients for approved Graduate Medical Education program functioning in the MTF, and sustain readiness-related medical skills activities for the military providers. This demonstration would be initially conducted at DGMC and its satellite clinic, the McClellan Clinic (MCC) as well as the clinic located at Beale Air Force Base (Beale). However, it could be expanded to other MTFs with the approval of the Assistant Secretary of Defense (Health Affairs), and a subsequent **Federal Register** notification.

DATES: This demonstration will be effective 60 days from the date of this notice for a period of thirty six (36) months, unless extended by a separate action.

ADDRESSES: TRICARE Management Activity (TMA), Health Plan Operations, 7700 Arlington Boulevard, Suite 5101, Falls Church, VA 22042–5101.

FOR FURTHER INFORMATION CONTACT: For questions pertaining to this demonstration project, please contact Maj. Kevin Schultz at (707) 423–7887.

SUPPLEMENTARY INFORMATION:

a. Background

A basic principle of the TRICARE program and the Military Health System (MHS) business design is that MTFs have first priority for providing referred specialty care or inpatient care for all TRICARE Prime enrollees. If the MTF does not have the capability to provide the needed care or cannot provide the care within the required access standard, then the care will be referred to the TRICARE provider network. TRICARE Prime access standards require referrals for specialty care services to be provided with an appropriately trained provider within 4 weeks or sooner, if required, and within 1-hour travel time from the beneficiary's residence. The geographic area that represents 1-hour travel time surrounding an MTF is referred to as the Right of First Refusal (ROFR) area.

For those Prime beneficiaries that live outside the ROFR area, their specialty care is referred to the civilian network. TRICARE Standard and TFL beneficiaries maintain freedom of choice and may receive specialty care from any TRICARE authorized civilian provider or alternatively may elect to receive their care in a MTF to the extent such care is available to them.

DoD's authority to reimburse travel expenses for TRICARE beneficiaries is currently limited to the TRICARE Prime Travel Benefit, provided pursuant to 10 USC 1074i, which reimburses only Prime beneficiaries for non-emergent medically necessary specialty care that is provided more than 100 miles from the beneficiary's primary care provider's office to the nearest specialist's office.

The benefit is limited to specialty referrals when no other options for care are available within 100 miles of the primary care provider. This demonstration project is designed to test the effectiveness of a voluntary local travel reimbursement designed to recapture certain specialty care within the direct care system for beneficiaries who reside outside of the ROFR area.

David Grant United States Air Force Medical Center (DGMC) at Travis Air Force Base (AFB) is currently a 116-bed facility and fulfills a key role in the Air Force Medical Service as the second largest deployment platform. A robust TRICARE eligible population remains in the Northern California area, however much of it is located just beyond a 60-minute drive time from DGMC. DGMC also operates the McClellan satellite clinic (MCC) in Sacramento. This satellite clinic offers an opportunity to recapture a larger DoD beneficiary population than is available in the existing DGMC Prime Service Area and ROFR area for specialty care. Based on surveys of existing patients at the clinic, travel distance is the most significant factor for why patients do not utilize DGMC for specialty care that may only be available at the MTF vice the clinic.

Over the last year, DGMC specialties have begun offering outpatient services at MCC, with appointment availability varying based on patient demand. The majority of patient care can be provided at MCC including initial consults, medication management, and pre/post-operative visits. When required, the physician will schedule a patient for surgery or other procedure not available at MCC, at DGMC. The feedback from patients has been very positive as MCC offers specialty services much closer to the patient's residence.

These DGMC efforts have proven to be very successful in recapturing specialty care in the immediate area surrounding the hospital. Through this demonstration project, DGMC will now seek to reach the larger beneficiary population that resides beyond the 60 minute drive time to the MTF (those outside the ROFR area) to maximize the direct care system and improve provider currency and deployment capability through increased patient acuity and volume.

Under this demonstration, DGMC would reimburse TRICARE Prime, TRICARE Standard, and TFL beneficiaries who live outside of the ROFR area of DGMC for reasonable travel expenses when they agree to receive specialty procedures, including diagnostic and surgical procedures not otherwise available at MCC or Beale AFB, in specialties determined by the Commander of DGMC to have excess capacity. Reimbursement will only be authorized when the beneficiary resides outside of the ROFR area of the DGMC and (1) a specialty provider at MCC or Beale sends a patient to DGMC for care not available at MCC or (2) a patient is assessed by a specialist who is an authorized TRICARE provider and identified as a candidate for a surgical intervention to be performed at DGMC. There will be no requirement for a network provider outside of the ROFR area to refer the patient to DGMC, but all authorized specialty providers will be given information on how to make the referral if the patient desires to use DGMC. The demonstration project will be communicated to the non-Prime beneficiaries through multiple communications channels, to include provider outreach and other media.

For purposes of this demonstration, once the beneficiary is identified as requiring a procedure at DGMC, they will be referred to the Beneficiary Counseling and Assistance Coordinator (BCAC) at MCC. The BCAC will review the patient information and determine if the patient is eligible for travel reimbursement. If so, the BCAC will brief the patient as to the process and assist the patient in applying for the travel as well as processing any travel vouchers. Travel for a non-medical attendant (NMA) for patients who require admission may be authorized when the attendance of a NMA is medically indicated. When the patient's procedure is to occur before 8:00 a.m., then reimbursement for the patient and an NMA may be authorized for lodging for the one night prior to the procedure. The maximum reimbursement shall be the lesser of the actual lodging costs or the locality lodging rate. This shall be in addition to the normal mileage reimbursement of 51 cents per mile. If the beneficiary is hospitalized overnight, the NMA may also be authorized reimbursement for the mileage back to their residence. The MCC BCAC will assist with making arrangements at the Travis Fisher House, base lodging, or local hotel, based on availability. The amount of travel to DGMC will be minimized as much as possible by offering pre/post-operative visits at MCC, as well as diagnostic testing either at MCC or in the civilian network.

Beneficiary participation in this demonstration program is strictly voluntary; beneficiaries will be allowed to seek specialty procedures/care in the private care system if they prefer. The 60 minute drive time access to care standard for Prime beneficiaries would still be applicable, so Prime beneficiaries wanting to participate would have to waive their access to care standards. The authorization and oversight of the reimbursement and, if needed, the coordination with other healthcare insurance (OHI) plans will be the responsibility of the MTF.

b. Implementation

This demonstration will be effective 60 days from the date of this notice for a period of thirty six (36) months.

c. Evaluation

The results of this demonstration will allow a focused study on the impact a voluntary local travel reimbursement will have on encouraging TRICARE beneficiaries who live beyond a 60 minute drive time to an MTF (those outside the ROFR area) to nonetheless utilize the direct care system for needed specialty care in lieu of electing a closer, purchased care provider. Throughout the demonstration project, there will be monthly tracking of the number of DGMC inpatient admissions and outpatient encounters by demonstration participants who reside outside the DGMC ROFR area for the identified specialties. There will also be quarterly tracking of marketing initiatives to measure their effectiveness in ensuring that eligible beneficiaries in the target area are aware of the availability of specialty services at MCC and the corresponding travel reimbursement to/from DGMC. Success of the demonstration would be determined in part by a substantial increase in encounters from beneficiaries that reside outside the DGMC ROFR area for identified specialties while at the same time there is no increase in the referral rate to the network from DGMC for these same specialties for TRICARE Prime beneficiaries that reside within the ROFR area. Data will also be gathered regarding local travel reimbursement expenditures and the estimated purchased care cost-savings of demonstration participants. At the end of the demonstration, a thorough business case analysis will be conducted of the relevant expenditures and cost-savings, in addition to an assessment of the demonstration project's impact on MTF productivity, provider currency in the identified specialties, and utilization of excess capacity in the direct care system. Following this evaluation, Health Affairs may seek permanent authority to implement a travel reimbursement program for certain beneficiaries when they agree to receive specialty care in the direct care system.

Dated: February 1, 2013.

Patricia L. Toppings,

OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5001–06–P

DEPARTMENT OF DEFENSE

Defense Acquisition Regulations System

Waiver for Certain Defense Items Produced in the United Kingdom

AGENCY: Defense Acquisition Regulations System, Department of Defense (DoD).

ACTION: Notice.

SUMMARY: The Under Secretary of Defense (Acquisition, Technology, and Logistics) is waiving the statutory limitation of 10 U.S.C. 2534 for certain defense items produced in the United Kingdom (UK). The law limits DoD procurement of certain items to sources in the national technology and industrial base. The waiver will permit procurement of enumerated items from sources in the UK, unless otherwise restricted by statute.

DATES: This waiver is effective beginning March 1, 2013 until February 28, 2014.

FOR FURTHER INFORMATION CONTACT: Ms. Patricia Foley, OUSD (AT&L) Director, Office of the Defense Procurement and Acquisition Policy, Contract Policy and International Contracting, Room 5E621, 3060 Defense Pentagon, Washington, DC 20301–3060, telephone (703) 693–1145.

SUPPLEMENTARY INFORMATION: Subsection (a) of 10 U.S.C. 2534 provides that the Secretary of Defense may procure the items listed in that subsection only if the manufacturer of the item is part of the national technology and industrial base. Subsection (i) of 10 U.S.C. 2534 authorizes the Secretary of Defense to exercise the waiver authority in subsection (d), on the basis of the applicability of paragraph (2) or (3) of that subsection, only if the waiver is made for a particular item listed in subsection (a) and for a particular foreign country. Subsection (d) authorizes a waiver if the Secretary determines that application of the limitation ''would impede the reciprocal procurement of defense items under a memorandum of understanding providing for reciprocal procurement of defense items'' and if he determines that ''that country does not discriminate against defense items produced in the United States to a greater degree than the United States discriminates against defense items produced in that country.'' The Secretary of Defense has delegated the waiver authority of 10 U.S.C. 2534(d) to the Under Secretary of Defense (Acquisition, Technology, and Logistics).

DoD has had a Reciprocal Defense Procurement Memorandum of Understanding (MOU) with the UK since 1975, most recently renewed on December 16, 2004.

The Under Secretary of Defense (Acquisition, Technology, and Logistics) finds that the UK does not discriminate against defense items produced in the United States to a greater degree than the United States discriminates against defense items produced in the UK, and also finds that application of the limitation in 10 U.S.C. 2534 against defense items produced in the UK would impede the reciprocal procurement of defense items under the MOU.

Under the authority of 10 U.S.C. 2534, the Under Secretary of Defense (Acquisition, Technology, and Logistics) has determined that application of the limitation of 10 U.S.C. 2534(a) to the procurement of any defense item produced in the UK that is listed below would impede the reciprocal procurement of defense items under the MOU with the UK.

On the basis of the foregoing, the Under Secretary of Defense (Acquisition, Technology, and Logistics) is waiving the limitation in 10 U.S.C. 2534(a) for procurements of any defense item listed below that is produced in the UK. This waiver applies only to the limitations in 10 U.S.C. 2534(a). This waiver applies to procurements under solicitations issued during the period from March 1, 2013 to February 28, 2014. Similar waivers have been granted since 1998, most recently in 2012 (77 FR 2278, January 17, 2012).

List of Items to Which This Waiver Applies

1. Air circuit breakers.
2. Gyrocompasses.
3. Electronic navigation chart systems.
4. Steering controls.
5. Pumps.
6. Propulsion and machinery control systems.
7. Totally enclosed lifeboats.

Manuel Quinones,

Editor, Defense Acquisition Regulations System.

BILLING CODE 5001–06–P

DEPARTMENT OF DEFENSE

Office of the Secretary

TRICARE; Demonstration Project for Participation in Maryland Multi-Payer Patient Centered Medical Home Program (MMPCMHP) Demonstration

AGENCY: Department of Defense (DoD).

ACTION: Notice of Demonstration Project.

SUMMARY: This notice advises interested parties of a Military Health System (MHS) Demonstration project under the authority of Title 10, United States Code, Section 1092, entitled Department of Defense (DoD) Enhanced Access to Patient Centered Medical Home (PCMH): Participation in Maryland Multi-payer Patient Centered Medical Home Program (MMPCMHP).

DATES: The demonstration program will be effective 30 days after publication in the **Federal Register** and have a two year duration.

ADDRESSES: TRICARE Management Activity (TMA), TRICARE Regional Office North, 1700 North Moore Street, Suite 1200, Arlington, VA 22209.

FOR FURTHER INFORMATION CONTACT: Capt. John O'Boyle, TMA, TRICARE Regional Office—North, telephone (703) 588–1831.

SUPPLEMENTARY INFORMATION: The MHS has adopted the PCMH concept as the strategy of choice for the direct care system and is now using this demonstration to evaluate and provide a PCMH model in the purchased care portion of the TRICARE program.

The MHS defines PCMH as a model of care adopted by the American Academy of Family Physicians, the American Academy of Pediatrics, the American College of Physicians, and the American Osteopathic Association that seeks to strengthen the provider-patient relationship by replacing episodic care with coordinated care and a long-term healing relationship. In PCMH practices, each patient has an ongoing relationship with a personal provider who leads a team that takes collective responsibility for patient care. The provider-led care team is responsible for providing all the patient's health care needs and, when required, arranging for appropriate care with other qualified providers.

A particular challenge in implementing the PCMH concept in the purchased care portion of the TRICARE program has been the inability to distinguish and employ reimbursement methodologies which encourage network providers to accept TRICARE beneficiaries under a Medical Home model. Current contractual incentives encourage network discounts which

may also prove counterproductive in attracting network providers to a PCMH model.

The goal of participation is to test the PCMH model in qualified primary care practices to determine if this model: (1) Provides higher quality and more cost effective care for TRICARE beneficiaries who receive medical care in participating practices and (2) leads to higher satisfaction for patients and providers. The demonstration seeks to compensate medical homes for additional services not traditionally covered through fee for service reimbursement, while creating a viable economic model for health care purchasers and maintaining administrative simplicity. As part of the demonstration, TRICARE, with other payers, will provide additional fixed, semi-annual payments to participating practices for providing documented evidence-based medicine; use of electronic medical records; care coordination; care transition management; collaboration with hospitals to prevent readmissions; and patient coaching; services. These fixed payments will be weighted based on practice size, practice share of Maryland based TRICARE beneficiaries and National Committee on Quality Assurance Patient Centered Medical Home (PPC–PCMH) recognition criteria. TRICARE Prime and Standard beneficiaries will be assigned/attributed to the MMPCMHP demonstration based on current TRICARE Prime enrollment and/or evidence of previous services provided to TRICARE Standard beneficiaries by participating practices. TRICARE for Life beneficiaries will be excluded from the demonstration. TRICARE will continue to pay claims using existing reimbursement methodologies established in 32 CFR part 199. In addition, incentive payments will be made based upon calculated shared savings and measured quality improvements. TMA Defense Health Cost Assessment and Evaluation (DHCAPE) staff will calculate TRICARE beneficiary cost savings based on Maryland Health Care Commission methodology. Pharmacy costs associated with beneficiaries attributed in the demonstration will be measured for informational purposes.

Additional information is available at *http://mhcc.maryland.gov/pcmh/* and will be available in the TRICARE Operations Manual.

Dated: February 1, 2013.

Patricia L. Toppings,

OSD Federal Register Liaison Officer, Department of Defense.

DEPARTMENT OF EDUCATION

Service Contract Inventory for Fiscal Year (FY) 2012

AGENCY: Office of the Chief Financial Officer, U.S. Department of Education.

ACTION: Notice of availability—FY 2012 service contract inventory.

SUMMARY: Through this notice, the Secretary announces the availability of the Department of Education's service contract inventory on its Web site, at *http://www2.ed.gov/fund/data/report/contracts/servicecontractinventoryappendix/servicecontractinventory.html.* A service contract inventory is a tool for assisting an agency in better understanding how contracted services are being used to support mission and operations and whether the contractors' skills are being utilized in an appropriate manner.

FOR FURTHER INFORMATION CONTACT: Andrew Sullivan, U.S. Department of Education, 400 Maryland Avenue SW., Washington, DC 20202 by phone at 202–245–6450 or email at *Andrew.Sullivan@ed.gov.*

If you use a telecommunications device for the deaf (TDD), call the Federal Relay Service (FRS), toll free, at 1–800–877–8339.

SUPPLEMENTARY INFORMATION: Section 743 of Division C of the Consolidated Appropriations Act of 2010, Public Law 111–117, requires civilian agencies, other than the Department of Defense, that are required to submit an inventory in accordance with the Federal Activities Inventory Reform Act of 1998 (Pub. L. 105–270, 31 U.S.C. 501 note) to submit their inventories to the Office of Federal Procurement Policy (OFPP) in the Office of Management and Budget (OMB) by December 31, 2012. In addition, section 743 requires these agencies, which include the Department of Education, to (1) Make the inventory available to the public by posting the inventory on its agency homepage, (2) provide OFPP with the Web site address (URL) on which the inventory is being posted so that the inventory can be linked to a central OMB Web page, and (3) publish in the **Federal Register** a notice announcing that the inventory is available to the public along with the name, telephone number, and email address of an agency point of contact.

Through this notice, the Department announces the availability of its inventory on the following Web site: *http://www2.ed.gov/fund/data/report/contracts/servicecontractinventoryappendix/servicecontractinventory.html.* The point of contact for the inventory is provided under the **FOR FURTHER INFORMATION CONTACT** section in this notice.

Accessible Format: Individuals with disabilities can obtain this document in an accessible format (e.g., Braille, large print, or audiotape) on request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**.

Electronic Access to This Document: You can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Adobe Portable Document Format (PDF) on the Internet at the following site: *www.ed.gov/news/fedregister.* To use PDF you must have Adobe Acrobat Reader, which is available free at this site.

Note: The official version of this document is the document published in the **Federal Register**. Free Internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available on GPO Access at: *http://www.gpoaccess.gov/nara/index.html.*

Program Authority: Section 743 of Division C of the Consolidated Appropriations Act of 2010, Pub. L. 111–117.

DEPARTMENT OF ENERGY

Environmental Management Site-Specific Advisory Board, Portsmouth

AGENCY: Department of Energy (DOE).

ACTION: Notice of Open Meeting.

SUMMARY: This notice announces a meeting of the Environmental Management Site-Specific Advisory Board (EM SSAB), Portsmouth. The Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770) requires that public notice of this meeting be announced in the **Federal Register**.

DATES: Thursday, March 7, 2013 6:00 p.m.

ADDRESSES: Ohio State University, Endeavor Center, 1862 Shyville Road, Piketon, Ohio 45661.

FOR FURTHER INFORMATION CONTACT: Greg Simonton, Alternate Deputy Designated

Federal Officer, Department of Energy Portsmouth/Paducah Project Office, Post Office Box 700, Piketon, Ohio 45661, (740) 897–3737, *Greg.Simonton@lex.doe.gov*.

SUPPLEMENTARY INFORMATION:

Purpose of the Board: The purpose of the Board is to make recommendations to DOE–EM and site management in the areas of environmental restoration, waste management and related activities.

Tentative Agenda

- Call to Order, Introductions, Review of Agenda
- Approval of January Minutes
- Deputy Designated Federal Officer's Comments
- Federal Coordinator's Comments
- Presentation
- Liaisons' Comments
- Administrative Issues
  - Subcommittee Updates
- Public Comments
- Final Comments from the Board
- Adjourn

Public Participation: The meeting is open to the public. The EM SSAB, Portsmouth, welcomes the attendance of the public at its advisory committee meetings and will make every effort to accommodate persons with physical disabilities or special needs. If you require special accommodations due to a disability, please contact Greg Simonton at least seven days in advance of the meeting at the phone number listed above. Written statements may be filed with the Board either before or after the meeting. Individuals who wish to make oral statements pertaining to agenda items should contact Greg Simonton at the address or telephone number listed above. Requests must be received five days prior to the meeting and reasonable provision will be made to include the presentation in the agenda. The Deputy Designated Federal Officer is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Individuals wishing to make public comments will be provided a maximum of five minutes to present their comments.

Minutes: Minutes will be available by writing or calling Greg Simonton at the address and phone number listed above. Minutes will also be available at the following Web site: *http://www.ports-ssab.energy.gov/*.

Issued at Washington, DC, on February 8, 2013.

ACTION: Notice of open meeting.

SUMMARY: This notice announces a combined meeting of the Environmental Monitoring, Surveillance and Remediation Committee and Waste Management Committee of the Environmental Management Site-Specific Advisory Board (EM SSAB), Northern New Mexico (known locally as the Northern New Mexico Citizens' Advisory Board [NNMCAB]). The Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770) requires that public notice of this meeting be announced in the **Federal Register**.

DATES: Wednesday, March 13, 2013, 2:00 p.m.–4:00 p.m.

ADDRESSES: NNMCAB Conference Room, 94 Cities of Gold Road, Pojoaque, NM 87506.

FOR FURTHER INFORMATION CONTACT: Menice Santistevan, Northern New Mexico Citizens' Advisory Board, 94 Cities of Gold Road, Santa Fe, NM 87506. Phone (505) 995–0393; Fax (505) 989–1752 or Email: *msantistevan@doeal.gov*.

SUPPLEMENTARY INFORMATION:

Purpose of the Board: The purpose of the Board is to make recommendations to DOE–EM and site management in the areas of environmental restoration, waste management, and related activities.

Purpose of the Environmental Monitoring, Surveillance and Remediation Committee (EMS&R): The EMS&R Committee provides a citizens' perspective to NNMCAB on current and future environmental remediation activities resulting from historical Los Alamos National Laboratory operations and, in particular, issues pertaining to groundwater, surface water and work required under the New Mexico Environment Department Order on Consent. The EMS&R Committee will keep abreast of DOE–EM and site programs and plans. The committee will work with the NNMCAB to provide assistance in determining priorities and the best use of limited funds and time. Formal recommendations will be proposed when needed and, after consideration and approval by the full NNMCAB, may be sent to DOE–EM for action.

Purpose of the Waste Management (WM) Committee: The WM Committee reviews policies, practices and procedures, existing and proposed, so as to provide recommendations, advice, suggestions and opinions to the NNMCAB regarding waste management operations at the Los Alamos site.

Tentative Agenda

1. Approval of Agenda
2. Approval of Minutes of February 13, 2013
3. Old Business
4. New Business
5. Update from Executive Committee—Carlos Valdez, Chair
6. Update from DOE—Ed Worth, Deputy Designated Federal Officer
7. 2:45 p.m. Presentation
8. 3:45 p.m. Public Comment Period
9. 4:00 p.m. Adjourn

Public Participation: The NNMCAB's EMS&R and WM Committees welcome the attendance of the public at their combined committee meeting and will make every effort to accommodate persons with physical disabilities or special needs. If you require special accommodations due to a disability, please contact Menice Santistevan at least seven days in advance of the meeting at the telephone number listed above. Written statements may be filed with the Committees either before or after the meeting. Individuals who wish to make oral statements pertaining to agenda items should contact Menice Santistevan at the address or telephone number listed above. Requests must be received five days prior to the meeting and reasonable provision will be made to include the presentation in the agenda. The Deputy Designated Federal Officer is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Individuals wishing to make public comments will be provided a maximum of five minutes to present their comments.

Minutes: Minutes will be available by writing or calling Menice Santistevan at the address or phone number listed above. Minutes and other Board documents are on the Internet at: *http://www.nnmcab.energy.gov/*.

Issued at Washington, DC, on February 11, 2013.

LaTanya R. Butler,

Deputy Committee Management Officer.

BILLING CODE 6405–01–P

DEPARTMENT OF ENERGY

Environmental Management Site-Specific Advisory Board, Northern New Mexico

AGENCY: Department of Energy.

ACTION: Notice of open meeting.

SUMMARY: This notice announces a meeting of the Environmental Management Site-Specific Advisory Board (EM SSAB), Northern New Mexico. The Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770) requires that public notice of this meeting be announced in the **Federal Register**.

DATES: Wednesday, March 20, 2013 1:00 p.m.–7:00 p.m.

ADDRESSES: Marriott Pyramid North, 5151 San Francisco Road NE., Albuquerque, NM 87109.

FOR FURTHER INFORMATION CONTACT: Menice Santistevan, Northern New Mexico Citizens' Advisory Board (NNMCAB), 94 Cities of Gold Road, Santa Fe, NM 87506. Phone (505) 995–0393; Fax (505) 989–1752 or Email: *Menice.Santistevan@nnsa.doe.gov.*

SUPPLEMENTARY INFORMATION:

Purpose of the Board: The purpose of the Board is to make recommendations to DOE-EM and site management in the areas of environmental restoration, waste management, and related activities.

Tentative Agenda

1:00 p.m.
Call to Order by Deputy Designated Federal Officer (DDFO), Ed Worth
Establishment of a Quorum: Roll Call and Excused Absences, William Alexander
Welcome and Introductions, Carlos Valdez, Chair
Approval of Agenda and January 30, 2013 Meeting Minutes
1:30 p.m. Public Comment Period
1:45 p.m. Old Business
- Written Reports
- Other Items

2:00 p.m. New Business
2:30 p.m. Update from DDFO, Ed Worth
- Update from DOE
- Other Items

2:45 p.m. Break
3:00 p.m. Update on Remediation of the 33 Shafts at Area G
4:30 p.m. Update from Liaison Members
- Los Alamos National Security, Jeffrey Mousseau
- New Mexico Environment Department, John Keiling
- Environmental Protection Agency (Region 6), Ed Worth for Rich Mayer
- DOE, Peter Maggiore

5:00 p.m. Dinner Break
6:00 p.m. Public Comment Period
6:15 p.m. Consideration and Action on Draft Recommendation(s) to DOE, Carlos Valdez
6:45 p.m. Wrap-Up and Comments from Board Members, Carlos Valdez
7:00 p.m. Adjourn, Ed Worth, DDFO

Public Participation: The EM SSAB, Northern New Mexico, welcomes the attendance of the public at its advisory committee meetings and will make every effort to accommodate persons with physical disabilities or special needs. If you require special accommodations due to a disability, please contact Menice Santistevan at least seven days in advance of the meeting at the telephone number listed above. Written statements may be filed with the Board either before or after the meeting. Individuals who wish to make oral statements pertaining to agenda items should contact Menice Santistevan at the address or telephone number listed above. Requests must be received five days prior to the meeting and reasonable provision will be made to include the presentation in the agenda. The Deputy Designated Federal Officer is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Individuals wishing to make public comments will be provided a maximum of five minutes to present their comments.

Minutes: Minutes will be available by writing or calling Menice Santistevan at the address or phone number listed above. Minutes and other Board documents are on the Internet at: *http://www.nnmcab.energy.gov/.*

Issued at Washington, DC, on February 11, 2013.

BILLING CODE 6405–01–P

DEPARTMENT OF ENERGY

Office of Energy Efficiency and Renewable Energy

Proposed Agency Information Collection

AGENCY: Office of Energy Efficiency and Renewable Energy, U.S. Department of Energy.

ACTION: Submission for Office of Management and Budget (OMB) review; comment request.

SUMMARY: The Department of Energy (DOE) has submitted an information collection request to the OMB for reinstatement under the provisions of the Paperwork Reduction Act of 1995. A **Federal Register** Notice with a 60-Day comment solicitation period on this information collection was published on May 24, 2012, Vol. 77, No. 101, pg. 31000. The information collection requests a three-year approval of its Customer Electricity Data Access and Control Questionnaire, OMB Control Number 1910–5164. The proposed collection will gather and share information about customer access to electricity usage data. The information will be shared on the DOE-supported OpenEI Web site where consumers can learn about the access offered by their electricity provider to energy usage data. Visitors to the Web site will also be able to learn about measures they can take to use energy more efficiently and economically.

DATES: Comments regarding this collection must be received on or before March 18, 2013. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, please advise the OMB Desk Officer of your intention to make a submission as soon as possible. The Desk Officer may be telephoned at 202–395–4650.

ADDRESSES: Written comments should be sent to: DOE Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 10102, 735 17th Street NW., Washington, DC 20503, and to Jamie Vernon by fax at 202–586–9260, or by email at *Jamie.Vernon@ee.doe.gov.*

FOR FURTHER INFORMATION CONTACT: For information or to request a copy of the collection instrument contact: Jamie Vernon by fax at 202–586–9260, or by email at *Jamie.Vernon@ee.doe.gov.*

SUPPLEMENTARY INFORMATION: This information collection request contains: (1) *OMB No.:* 1910–5164; (2) *Information Collection Request Title:* Customer Electricity Data Access and Control Questionnaire; (3) *Type of Request:* Reinstatement; (4) *Purpose:* The U.S. Department of Energy (DOE) Office of Energy Efficiency and Renewable Energy (EERE) has developed and launched a new consumer-focused Web site *(http://openei.org/utilityaccess)* with the capability to map how and what electricity use data utilities provide to their customers. An online questionnaire device captures and publishes the necessary information as a series of web-based maps upon completion by electricity providers. Each electric utility has the opportunity to fill out a web-based questionnaire that will automatically generate the informational maps. Consumers can visit the maps and Web site to learn about data access offered by their utility

and how to use energy more efficiently. Generation of such maps requires DOE to collect information from electricity providers about data access and sharing services offered to their customers. DOE is requesting a 3-year approval to continue to collect and report this information using an improved collection instrument. This information collection request may be relevant to electric utilities, energy management professionals and residential and commercial electricity customers; (5) *Annual Estimated Number of Respondents:* 3,261; (6) Annual Estimated Number of Total Responses: 3,261; (7) *Annual Estimated Number of Burden Hours:* 1087; (8) *Annual Estimated Reporting and Recordkeeping Cost Burden:* $0.

Statutory Authority: Section 13(b) of the Federal Energy Administration Act of 1974 (FEA Act), as amended, codified at 15 U.S.C. 772(b) and Section 1301 of the Energy Independence and Security Act of 2007 (EISA), as amended, codified at 42 U.S.C. 17381.

Issued in Washington, DC, on February 6, 2013.

Carla Frisch,

Acting Director of Policy and Analysis, Office of Energy Efficiency and Renewable Energy, U.S. Department of Energy.

[FR Doc. 2013–03438 Filed 2–13–13; 8:45 am]

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket Nos. RM07–16–000 and RM01–5–000]

Information Collection Activities and Request for Comments

AGENCY: Federal Energy Regulatory Commission.

ACTION: Notice and request for comments.

SUMMARY: The Federal Energy Regulatory Commission (Commission) invites public comment on a proposed collection of information that the Commission is developing for submission to the Office of Management and Budget (OMB) pursuant to the Paperwork Reduction Act of 1995 (PRA). This collection of information relates to the application to interstate and intrastate natural gas pipelines and interstate oil pipelines of the Commission's revised Company Registration procedures.[1]

DATES: Comments regarding this proposed information collection must be received on or before April 15, 2013.

ADDRESSES: You may submit comments (identified by Docket Nos. RM07–16–000 and RM01–5–000) by either of the following methods:

- *eFiling at Commission's Web Site: http://www.ferc.gov/docs-filing/efiling.asp.*
- *Mail/Hand Delivery/Courier:* Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street NE., Washington, DC 20426.

Instructions: All submissions must be formatted and filed in accordance with submission guidelines at: *http://www.ferc.gov/help/submission-guide.asp.* For user assistance contact FERC Online Support by email at *ferconlinesupport@ferc.gov*, or by phone at: (866) 208–3676 (toll-free), or (202) 502–8659 for TTY.

FOR FURTHER INFORMATION CONTACT: Ellen Brown, by email at *DataClearance@FERC.gov,* telephone at (202) 502–8663, and fax at (202) 273–0873.

SUPPLEMENTARY INFORMATION: This collection of information relates to the application to interstate and intrastate natural gas pipelines and interstate oil pipelines of the Commission's revised Company Registration procedures.

These procedures will replace the use of random-number generated passwords to authenticate access to a company registration account with a superior method of authentication. Under the revised procedures, a regulated natural gas and oil pipeline will be able to maintain a list of eRegistered agents whom the pipeline has authorized to submit a particular type of filing. Implementation of these changes will provide increased flexibility for regulated entities to manage their company registration accounts and to designate agents to make filings at the Commission. These changes also will reduce the need for pipelines to institute measures to protect password integrity, including the need to request new passwords if existing passwords are compromised.[2] These revised procedures are expected to go into effect in October 2013.

OMB's regulations[3] require approval of certain information collection requirements that impose identical reporting or recordkeeping requirements imposed on ten or more persons. Without consideration of potential cost savings in reduced password management and requests for new passwords, the one-time burden on interstate and intrastate natural gas and oil pipelines to transition to the revised system is estimated to be one hour per respondent at a cost of $35.99/hour for support staff.[4]

Information Collection Costs: The Commission projects the average annual burden and cost of compliance with these regulations to be the following:

Data collection	Number of respondents	Hours per response (1 response per respondent)	Total hours	Total cost
FERC–545—NGA Pipelines	161	1	161	$5,794
FERC–549—NGPA Pipelines	200	1	200	7,198
FERC–550—Oil Pipelines	200	1	200	7,198

[1] Concurrent with this Notice, the Commission is issuing a separate order on ''Revisions to Company Registration and Establishing Technical Conference'' with additional details on the requirements.

[2] A description of the procedures can be found in the Commission's order in *Filing Via the Internet,* Docket Nos. RM07–16–000 and RM01–5–000, 142 FERC ¶ 61,097 (2013) (*http://elibrary.ferc.gov/idmws/common/OpenNat.asp?fileID=13174100).*

[3] 5 CFR 1320.

[4] The estimated burden on electric utilities for compliance with this requirement was included in Order No. 770, 77 FR 71,288 (Nov. 30, 2012) and is incorporated in FERC–920, Electric Quarterly Report, OMB Control No. 1902–0255. Those reporting requirements will be submitted to OMB for review after OMB issues a decision on another pending item under that Control Number. (Only one item per OMB Control Number can be pending at OMB for PRA review at a time.)

We estimate that pipelines will have the initial implementation burden of one hour and may annually review or make revisions to their list of designated agents. The total annual cost for all respondents is: $20,190.

Title: FERC–545, Gas Pipeline Rates: Rate Change (Non-Formal), OMB Control No. 1902–0154; FERC–549, Gas Pipeline Rates: NGPA Title III Transactions and Part 341, OMB Control No. 1902–0086; and FERC–550, Oil Pipeline Rates: Tariff Filings, OMB Control No. 1902–0089.

Action: Revised company registration information requirements.

Respondents: Interstate and intrastate natural gas pipelines and interstate oil pipelines.

Frequency of Responses: One-time initial implementation and periodic updates as needed.

Need for Information: The changes are being implemented to enhance the security of natural gas and oil pipelines' company registration accounts and to provide pipelines with an enhanced ability to manage filing permissions.

Internal Review: We have reviewed the changes and determined that the changes are necessary, conforming to the Commission's need for efficient information collection, communication, and management within the energy industry. We have assured ourselves, by means of internal review, that there is specific, objective support for the burden estimates associated with the information collection requirements.

Comments: Comments are invited on: (1) Whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Dated: February 8, 2013.

Kimberly D. Bose,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 14483–000]

Westfield Water Resources Department; Notice of Application Accepted for Filing and Soliciting Comments, Motions To Intervene, Protests, Recommendations, and Terms and Conditions

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection.

a. *Type of Application:* Conduit Exemption.

b. *Project No.:* 14483–000.

c. *Date filed:* January 22, 2013.

d. *Applicant:* Westfield Water Resources Department.

e. *Name of Project:* Sackett Filtration Plant Hydroelectric Project.

f. *Location:* The proposed Sackett Filtration Plant Hydroelectric Project would be located on a water supply pipeline entering the Sackett Filtration Plant in Hampden County, Massachusetts. The land on which all the project structures are located is owned by the applicant.

g. *Filed Pursuant to:* Federal Power Act 16 U.S.C. 791a–825r

h. *Applicant Contact:* Mr. Charles Darling, Water Systems Engineer, Westfield Water Resources Department, 28 Sackett Street, Westfield, MA 01085; phone (413) 572–6243.

i. *FERC Contact:* Robert Bell, (202) 502–6062, *robert.bell@ferc.gov.*

j. *Status of Environmental Analysis:* This application is ready for environmental analysis at this time, and the Commission is requesting comments, reply comments, recommendations, terms and conditions, and prescriptions.

k. *Deadline for filing responsive documents:* Due to the small size of the proposed project, as well as the resource agency consultation letters filed with the application, the 60-day timeframe specified in 18 CFR 4.34(b) for filing all comments, motions to intervene, protests, recommendations, terms and conditions, and prescriptions is shortened to 30 days from the issuance date of this notice. All reply comments filed in response to comments submitted by any resource agency, Indian tribe, or person, must be filed with the Commission within 45 days from the issuance date of this notice.

Comments, protests, and interventions may be filed electronically via the Internet in lieu of paper; see 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site at *http://www.ferc.gov/docs-filing/efiling.asp.* The Commission strongly encourages electronic filings.

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

l. *Description of the project:* The proposed Sackett Filtration Plant Hydroelectric Project would consist of: (1) A proposed 16.19-foot-long, 12-inch-diameter intake pipe; (2) a proposed powerhouse containing one proposed generating unit with an installed capacity of 80 kilowatts; (3) a proposed 9.42-foot-long, 12-inch-diamter exit pipe; and (4) appurtenant facilities. The applicant estimates the project would have an average annual generation of 0.4745 gigawatt-hours.

m. This filing is available for review and reproduction at the Commission in the Public Reference Room, Room 2A, 888 First Street NE., Washington, DC 20426. The filing may also be viewed on the Web at *http://www.ferc.gov/docs-filing/elibrary.asp* using the ''eLibrary'' link. Enter the docket number, P–14483, in the docket number field to access the document. For assistance, call toll-free 1–866–208–3676 or email *FERCOnlineSupport@ferc.gov.* For TTY, call (202) 502–8659. A copy is also available for review and reproduction at the address in item h above.

n. *Development Application*—Any qualified applicant desiring to file a competing application must submit to the Commission, on or before the specified deadline date for the particular application, a competing development application, or a notice of intent to file such an application. Submission of a timely notice of intent allows an interested person to file the competing development application no later than 120 days after the specified deadline date for the particular application. Applications for preliminary permits will not be accepted in response to this notice.

o. *Protests or Motions to Intervene*—Anyone may submit a protest or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, 385.211, and 385.214. In determining the appropriate action to take, the Commission will consider all protests filed, but only those who file a motion

to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any protests or motions to intervene must be received on or before the specified deadline date for the particular application.

p. All filings must (1) Bear in all capital letters the title ''PROTEST,'' ''MOTION TO INTERVENE,'' ''COMMENTS,'' ''REPLY COMMENTS,'' ''RECOMMENDATIONS,'' ''TERMS AND CONDITIONS,'' or ''PRESCRIPTIONS;'' (2) set forth in the heading, the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, recommendations, terms and conditions or prescriptions must set forth their evidentiary basis and otherwise comply with the requirements of 18 CFR 4.34(b). Agencies may obtain copies of the application directly from the applicant. Any of these documents must be filed by providing the original and seven copies to: The Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426. An additional copy must be sent to Director, Division of Hydropower Administration and Compliance, Office of Energy Projects, Federal Energy Regulatory Commission, at the above address. A copy of any protest or motion to intervene must be served upon each representative of the applicant specified in the particular application. A copy of all other filings in reference to this application must be accompanied by proof of service on all persons listed in the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 4.34(b) and 385.2010.

Dated: February 7, 2013.

Kimberly D. Bose,

Secretary.

[Project No. 6764–036]

BMB Enterprises, Inc.; Notice of Availability of Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission or FERC) regulations, 18 CFR part 380, Commission staff has reviewed the application for amendment of license for the partially constructed but not operating Sixmile Creek Project (FERC No. 6764) and has prepared an environmental assessment (EA). The project is located on the Sixmile Creek in Sanpete County, Utah. The project would occupy 10.86 acres of federal lands administered by the U.S. Department of Agriculture, Forest Service.

The EA contains the Commission staff's analysis of the potential environmental effects of the proposed addition of new generating capacity and concludes that authorizing the amendment, with appropriate environmental protective measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

A copy of the EA is available for review at the Commission in the Public Reference Room 2–A of the Commission's offices at 888 First Street NE., Washington, DC 20426. The EA also may be viewed on the Commission's Internet Web site at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance with eLibrary, contact FERC Online Support at *FERCOnlineSupport@ferc.gov* or toll-free at (866) 208–3676, or for TTY contact (202) 502–8695.

Any comments should be filed within 60 days from the date of this notice. Comments may be filed electronically via the Internet. See 18 CFR 385.200(a)(1)(iii) and instructions on the Commission's Web site at *http://ferc.gov.docs/efiling.asp.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *http://www.ferc.gov/docsfiling/ecomment.asp.* You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support. Although the Commission strongly encourages electronic filings, documents may also be paper-filed. To paper-file, mail an original and seven copies to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

Dated: February 7, 2013.

Kimberly D. Bose,

Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER13–899–000]

Abest Power & Gas, LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding, of Abest Power & Gas, LLC's application for market-based rate authority, with an accompanying rate schedule, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability is February 28, 2013.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 14 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

The filings in the above-referenced proceeding(s) are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email *FERCOnlineSupport@ferc.gov,* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Dated: February 8, 2013.

Nathaniel J. Davis, Sr.,

Deputy Secretary.

FEDERAL DEPOSIT INSURANCE CORPORATION

Sunshine Act Meeting

Pursuant to the provisions of the ''Government in the Sunshine Act'' (5 U.S.C. 552b), notice is hereby given that at 10:20 a.m. on Tuesday, February 12, 2013, the Board of Directors of the Federal Deposit Insurance Corporation

met in closed session to consider matters related to the Corporation's supervision, corporate, and resolution activities.

In calling the meeting, the Board determined, on motion of Vice Chairman Thomas M. Hoenig, seconded by Director Jeremiah O. Norton (Appointive), concurred in by Director Thomas J. Curry (Comptroller of the Currency), Director Richard Cordray (Director, Consumer Financial Protection Bureau), and Chairman Martin J. Gruenberg, that Corporation business required its consideration of the matters which were to be the subject of this meeting on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), (c)(9)(B), and (c)(10) of the ''Government in the Sunshine Act'' (5 U.S.C. 552b(c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), (c)(9)(B), and (c)(10)).

The meeting was held in the Board Room of the FDIC Building located at 550—17th Street NW., Washington, DC.

Dated: February 12, 2013.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Executive Secretary.

BILLING CODE P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Re-Establishment of the Advisory Group on Prevention, Health Promotion, and Integrative and Public Health

AGENCY: Office of the Assistant Secretary for Health, Office of the Secretary, Department of Health and Human Services.

ACTION: Notice.

SUMMARY: The U.S. Department of Health and Human Services announces re-establishment of the Advisory Group on Prevention, Health Promotion, and Integrative and Public Health (hereafter referred to as ''the Advisory Group''). Authorization to re-establish the Advisory Group is given under Executive Order 13631, dated December 7, 2012.

FOR FURTHER INFORMATION CONTACT: Corinne Graffunder, Designated Federal Officer (DFO) of the Advisory Group, Office of the Associate Director for Policy; Centers for Disease Control and Prevention; 1600 Clifton Road NE., MS D–28; Atlanta, GA 30329; Telephone: (404) 639–7514; and/or the following person may be contacted: Olga Nelson, Committee Management Officer, Office of the Assistant Secretary for Health; Department of Health and Human Services; 200 Independence Avenue SW., Room 714B; Washington, DC 20201; Telephone: (202) 690–5205; Fax: (202) 401–2222.

SUPPLEMENTARY INFORMATION: It was mandated under the Patient Protection and Affordable Care Act that the President establish the Advisory Group. The President complied with the statute under Executive Order 13544, dated June 10, 2010. The Advisory Group was established as a non-discretionary federal advisory committee. Functioning as a federal advisory committee, the Advisory Group is governed by provisions of the Federal Advisory Committee Act (FACA). FACA stipulates that appropriate action must be taken to renew the charter for a federal advisory committee every two years in order for the committee to continue to operate. Under Executive Order 13544, authorization was given for the Advisory Group to operate for two years, from June 10, 2010 to June 10, 2012. Since the Advisory Group was established by Presidential directive, it was necessary for appropriate action to be taken by the President or agency head to give authorization for the Advisory Group to be continued. A subsequent directive was issued, Executive Order 13591, dated November 23, 2011, to give authorization for the Advisory Group to continue to operate until September 30, 2012. No action was taken to continue the Advisory Group after the designated termination date. Therefore, the Advisory Group was terminated on September 30, 2012.

On December 7, 2012, Executive Order 13631 was issued. This directive gives authorization for the Advisory Group to be re-established. A charter was developed to re-establish the Advisory Group. The charter was approved by the Secretary of Health and Human Services and filed with the appropriate Congressional committees, the Library of Congress, and the Committee Management Secretariat under the General Services Administration (GSA) on February 6, 2013.

Objectives and Scope of Activities. The Advisory Group provides recommendations and advice to the National Prevention, Health Promotion, and Public Health Council (hereafter referred to as the ''Council''). The Advisory Group provides assistance to the Council in carrying out its mission. The Advisory Group develops policy and program recommendations and advises the Council on lifestyle-based chronic disease prevention and management, integrative health care practices, and health promotion.

Membership and Designation. The Advisory Group is authorized to consists of not more than 25 non-federal members, who are appointed by the President. In appointing members, the President is to ensure that the Advisory Group includes a diverse group of licensed health professionals, including integrative health practitioners who have expertise in (1) Worksite health promotion; (2) community services, including community health centers; (3) preventive medicine; (4) health coaching; (5) public health education; (6) geriatrics; and (7) rehabilitation medicine.

The Advisory Group had 22 members when it was terminated on September 30, 2012. It is stipulated under Executive Order 13631 that the same members who were serving on the Advisory Group when it was terminated shall be reappointed as if the Advisory Group had continued without termination. Members of the Advisory Group are classified as special Government employees (SGEs).

Administrative Management and Support. HHS provides funding and administrative support for the Advisory Group to the extent permitted by law within existing appropriations. Staff within Office of the Assistant Secretary for Health (OASH) provide management and oversight for support services provided to the Advisory Group. OASH is a staff division within the Office of the Secretary, HHS.

The Advisory Group reports to the Surgeon General, U.S. Public Health Service. The Office of the Surgeon General is a program office that is organizationally located within OASH.

A copy of the charter and information on activities and accomplishments of the Advisory Group can be obtained from the designated contacts or by accessing the FACA database that is maintained by the GSA Committee Management Secretariat. The Web site for the FACA database is *http://fido.gov/facadatabase/.*

Authority: Authority to establish the Advisory Group was given under Executive Order 13544, dated June 10, 2010, in accordance with Section 4001 of the Patient Protection and Affordable Care Act, Public Law 111–148, dated March 23, 2010. The Advisory Group was terminated on September 30, 2012, by Executive Order 13591, dated November 23, 2011. Authority

for the Advisory Group to be re-established is given under Executive Order 13631, dated December 7, 2012. The Advisory Group is governed by provisions of the Federal Advisory Committee Act (FACA), Public Law 92–463, as amended (5 U.S.C. App.), which sets forth standards for the formation and use of advisory committees.

Dated: February 8, 2013.

Wanda K. Jones,

Principal Deputy Assistant Secretary for Health.

BILLING CODE 4150–28–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

[Document Identifier HHS–OS–18521–60D]

Agency Information Collection Activities; Proposed Collection; Public Comment Request

AGENCY: Office of the Secretary, HHS.

ACTION: Notice.

SUMMARY: In compliance with section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Office of the Secretary (OS), Department of Health and Human Services, announces plans to submit a new Information Collection Request (ICR), described below, to the Office of Management and Budget (OMB). Prior to submitting that ICR to OMB, OS seeks comments from the public regarding the burden estimate, below, or any other aspect of the ICR.

DATES: Comments on the ICR must be received on or before April 15, 2013.

ADDRESSES: Submit your comments to *Information.CollectionClearance@hhs.gov* or by calling (202) 690–6162.

FOR FURTHER INFORMATION CONTACT: Information Collection Clearance staff, *Information.CollectionClearance@hhs.gov* or (202) 690–6162.

SUPPLEMENTARY INFORMATION: When submitting comments or requesting information, please include the document identifier HHS–OS–18521–60D for reference.

Information Collection Request Title: Evaluation of Implementation of the Viral Hepatitis Action Plan.

Abstract: In response to the viral hepatitis epidemic in the United States, the Department of Health and Human Services (HHS) released the Action Plan for the Prevention, Care, and Treatment of Viral Hepatitis (Action Plan) in May 2011 to provide a comprehensive strategic plan to address viral hepatitis B and C. Implementation of the Action Plan requires actions across a variety of agencies including national, state/local government, community-based organizations, and the private sector. The Evaluation of Implementation of the Viral Hepatitis Action Plan will assess state and local response to activities that support the Action Plan, identify barriers to implementation and strategies to address these barriers, and inform future viral hepatitis efforts.

Need and Proposed Use of the Information: The purpose of this project is to evaluate the state and local response to and implementation of the Action Plan and examine viral hepatitis activities that are occurring in the four jurisdictions that have been pre-selected for the evaluation: Alabama, Massachusetts, New York, and Washington State. The information collected through the evaluation will position OASH to better understand implementation of the Action Plan at the state and local levels and barriers that might be occurring in the selected jurisdictions. The evaluation will also serve to examine the landscape of viral hepatitis activities that are taking place in the selected jurisdictions. The results of the evaluation will enable OASH to understand and identify potential strategies to strengthen local implementation of the Action Plan, address barriers, and inform future implementation efforts.

Likely Respondents: State Viral Hepatitis Prevention Coordinators (CDC-funded state health department staff); other state and local health department stakeholders such as HIV and Immunization Program staff; national organization representatives who are involved in viral hepatitis program development and advocacy; local viral hepatitis stakeholders including health care and substance abuse treatment providers, non-profit community-based organization staff and volunteers, and others identified by the State Viral Hepatitis Prevention Coordinator (see above).

Burden Statement: The estimated burden for data collection involves scheduling and conducting key informant interviews among a variety of stakeholder groups including the CDC-funded Adult Viral Hepatitis Prevention Coordinators, state and local health departments, community-based organizations, correctional facilities, and healthcare providers. These interviews will be conducted in four states (Alabama, Massachusetts, New York, and Washington). Up to twelve additional interviews will also be conducted with select national-level stakeholders. The total annual burden hours estimated for this ICR are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN—HOURS

Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden hours
Adult Viral Hepatitis Prevention Coordinators	4	1	1.5	6
State and local health departments	16	1	45/60	12
Community-based organizations	12	1	30/60	6
National organizations	12	1	30/60	6
Correctional facilities	12	1	30/60	6
Healthcare providers	12	1	30/60	6
Total				42

OS specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Keith A. Tucker,

Information Collection Clearance Officer.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifier CMS–576A]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, HHS.

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Centers for Medicare & Medicaid Services (CMS) is publishing the following summary of proposed collections for public comment. Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

1. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* Organ Procurement Organization's (OPOs) Health Insurance Benefits Agreement and Supporting Regulations at 42 CFR 486.301–486.348; *Use:* The Medicare and Medicaid Programs Final Conditions for Coverage for Organ Procurement Organizations (OPOs) require OPOs to sign agreements with the Center for Medicare and Medicaid Services (CMS) in order to be reimbursed and perform their services. The information provided on this form serves as a basis for continuing the agreements with CMS and the OPOs for participation in the Medicare and Medicaid programs for reimbursement of service. *Form Number:* CMS–576A (OCN: 0938–0512); *Frequency:* Occasionally; *Affected Public:* Private Sector: Business or other for-profit and not-for-profit institutions; *Number of Respondents:* 58; *Total Annual Responses:* 58; *Total Annual Hours:* 116. (For policy questions regarding this collection contact Peggye Wilkerson at 410–786–4857. For all other issues call 410–786–1326.)

To obtain copies of the supporting statement and any related forms for the proposed paperwork collections referenced above, access CMS' Web Site address at *http://www.cms.hhs.gov/PaperworkReductionActof1995*, or Email your request, including your address, phone number, OMB number, and CMS document identifier, to *Paperwork@cms.hhs.gov,* or call the Reports Clearance Office on (410) 786–1326.

In commenting on the proposed information collections please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be submitted in one of the following ways by April 15, 2013:

1. *Electronically.* You may submit your comments electronically to *http://www.regulations.gov.* Follow the instructions for ''Comment or Submission'' or ''More Search Options'' to find the information collection document(s) accepting comments.

2. *By regular mail.* You may mail written comments to the following address: CMS, Office of Strategic Operations and Regulatory Affairs, Division of Regulations Development, Attention: Document Identifier/OMB Control Number ________, Room C4–26–05, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

Dated: February 11, 2013.

Martique Jones,

Deputy Director, Regulations Development Group, Office of Strategic Operations and Regulatory Affairs.

Food and Drug Administration

[Docket No. FDA–2011–N–0899]

Draft Environmental Assessment and Preliminary Finding of No Significant Impact Concerning a Genetically Engineered Atlantic Salmon; Extension of Comment Period

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; extension of comment period.

SUMMARY: The Food and Drug Administration (FDA) is extending the comment period for two draft environmental review documents for which a notice of availability appeared in the **Federal Register** of December 26, 2012. In that notice, FDA made available for comment the Agency's draft environmental assessment (EA) of the proposed conditions of use specified in materials submitted by AquaBounty Technologies, Inc., in support of a new animal drug application (NADA) concerning a genetically engineered (GE) Atlantic salmon and a preliminary finding of no significant impact (FONSI) for those specific conditions of use. The Agency is taking this action in response to a request for an extension to allow interested persons additional time to submit comments.

DATES: Submit either electronic or written comments by April 26, 2013.

ADDRESSES: Submit electronic comments to: *http://www.regulations.gov.* Submit written comments to the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852. Identify comments with the docket number found in brackets in the heading of this document.

FOR FURTHER INFORMATION CONTACT: Eric Silberhorn, Center for Veterinary Medicine (HFV–162), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855; 240–276–8247; *abig@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

In the **Federal Register** of December 26, 2012 (77 FR 76050), FDA published a notice of availability with a 60-day comment period to make available for public comment the Agency's draft EA of the proposed conditions of use specified in materials submitted by AquaBounty Technologies, Inc., in support of an NADA concerning a GE

Atlantic salmon and a preliminary FONSI for those specific conditions of use. Comments on the draft EA and FONSI will inform FDA's decision whether to require an environmental impact statement (EIS) or finalize the EA and FONSI for this NADA.

The Agency has received a request for a 60-day extension of the comment period for the draft EA and FONSI. The request conveyed concern that the current 60-day comment period does not allow sufficient time to respond.

FDA has considered the request and is extending the comment period for the draft EA and FONSI for 60 days, until April 26, 2013. The Agency believes that a 60-day extension allows adequate time for interested persons to submit comments without significantly delaying the Agency's decision on whether to finalize these documents or prepare an EIS.

II. Request for Comments

Interested persons may submit either electronic comments regarding these documents to *http://www.regulations.gov* or written comments to the Division of Dockets Management (see **ADDRESSES**). It is only necessary to send one set of comments. Identify comments with the docket number found in brackets in the heading of this document. Received comments may be seen in the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday, and will be posted to the docket at *http://www.regulations.gov.*

Dated: February 11, 2013.

Leslie Kux,

Assistant Commissioner for Policy.

National Institutes of Health

National Cancer Institute; Notice of Closed Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of a meeting of the Board of Scientific Counselors for Basic Sciences National Cancer Institute.

The meeting will be closed to the public as indicated below in accordance with the provisions set forth in section 552b(c)(6), Title 5 U.S.C., as amended for the review, discussion, and evaluation of individual intramural programs and projects conducted by the National Cancer Institute, including consideration of personnel qualifications and performance, and the competence of individual investigators, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Board of Scientific Counselors for Basic Sciences National Cancer Institute, NCI Board of Scientific Counselors Meeting (Basic Sciences).

Date: March 12, 2013.

Time: 9:00 a.m. to 1:30 p.m.

Agenda: To review and evaluate personal qualifications and performance, and, competence of individual investigators.

Place: National Institutes of Health, Building 31, Conference Room 6, 31 Center Drive, Bethesda, MD 20892.

Contact Person: Florence E. Farber, Ph.D., Executive Secretary, Office of the Director, National Cancer Institute, National Institutes of Health, 6116 Executive Boulevard, Room 2205, Bethesda, MD 20892, 301–496–7628, *ff6p@nih.gov.*

In the interest of security, NIH has instituted stringent procedures for entrance onto the NIH campus. All visitor vehicles, including taxicabs, hotel, and airport shuttles will be inspected before being allowed on campus. Visitors will be asked to show one form of identification (for example, a government-issued photo ID, driver's license, or passport) and to state the purpose of their visit.

BILLING CODE 4140–01–P

DEPARTMENT OF HOMELAND SECURITY

Office of the Secretary

[Docket No. DHS–2012–0069]

Privacy Act of 1974; Department of Homeland Security Immigration and Customs Enforcement-007—Alien Criminal Response Information Management System of Records

AGENCY: Privacy Office, Department of Homeland Security.

ACTION: Notice of modification to existing Privacy Act System of Records.

SUMMARY: In accordance with the Privacy Act of 1974, the Department of Homeland Security, U.S. Immigration and Customs Enforcement is updating and renaming an existing system of records titled, ''Department of Homeland Security/Immigration and Customs Enforcement-007—Law Enforcement Support Center Alien

Criminal Response Information Management System of Records.'' With the publication of this updated system of records, several changes are being made: (1) The name is being changed; (2) new categories of individuals have been added; (3) new routine uses have been added to allow Immigration and Customs Enforcement to share information from the system; and (4) the retention period of Brady Act check records has been corrected and the retention period for National Sex Offender Registrant records and for individuals for whom non-criminal queries are conducted have been added. A Privacy Impact Assessment update for the Alien Criminal Response Information Management system is being published concurrently with this notice. It can be found on the DHS Web site at *http://www.dhs.gov/privacy.* The exemptions for the existing system of records notice will continue to be applicable for this system of records notice (74 FR 45079, August 31, 2009), and this system will continue to be included in the Department of Homeland Security's inventory of record systems.

DATES: Submit comments on or before March 18, 2013. In particular, comments are requested concerning the application of the exemptions to the newly added categories of individuals. This new system will be effective March 18, 2013.

ADDRESSES: You may submit comments, identified by docket number DHS–2012–0069 by one of the following methods:

- *Federal e-Rulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–343–4010.
- *Mail:* Jonathan R. Cantor, Acting Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528.

Instructions: All submissions received must include the agency name and docket number for this rulemaking. All comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided.

Docket: For access to the docket to read background documents or comments received go to *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Lyn Rahilly (202–732–3300), Privacy Officer, U.S. Immigration and Customs Enforcement, 500 12th Street SW., Stop 5004 Washington, DC 20536–5004; Jonathan R. Cantor, (202–343–1717), Acting Chief Privacy Officer, Privacy Office, U.S. Department of Homeland Security, Washington, DC 20528.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Homeland Security (DHS) is updating and reissuing DHS/Immigration and Customs Enforcement (ICE)–007—Law Enforcement Support Center (LESC) Alien Criminal Response Information Management System (ACRIMe) system of records notice (SORN) (75 FR 8377, February 24, 2010), to shorten the system name, add new categories of individuals and routine uses, and update the retention period of records related to Brady Act checks, National Sex Offender Registrants, and individuals for whom non-criminal queries are conducted. The new system name is DHS/ICE–007—Alien Criminal Response Information Management System (ACRIMe). This system of records describes information maintained in an ICE information system of the same name, which is used by ICE personnel to receive and respond to immigration status inquiries made by other agencies about individuals who are arrested, screened as part of a background check in order to determine suitability for employment, access, or other purposes, or otherwise encountered by those agencies. ACRIMe also supports the creation and maintenance of lookout records in the Federal Bureau of Investigation (FBI) National Crime Information Center (NCIC) system on persons wanted by ICE for crimes or as fugitive aliens. ACRIMe also supports the operation of the ICE tip line, where members of the public can notify ICE of suspected violations of law, and the operation of the Law Enforcement Support Center call center, which takes calls from other law enforcement agencies seeking assistance from ICE.

Concurrent with the publication of this SORN update, ICE is publishing an update to the ACRIMe Privacy Impact Assessment (PIA) to describe several updates to the data maintained in that system in support of ICE's immigration enforcement mission. ICE is adding new categories of individuals to the DHS/ICE–007—ACRIMe SORN to adequately describe the individuals whose information is maintained in the system via the interoperability process. The ACRIMe PIA update is available on the DHS Privacy Office web site at *http://www.dhs.gov/privacy.*

Under interoperability's original use, the fingerprints of individuals arrested by or in the custody of a law enforcement agency participating in the ICE Secure Communities Program are sent to the FBI's Integrated Automated Fingerprint Identification System (IAFIS)/Next Generation Identification (NGI) for matching against the FBI's criminal fingerprint holdings. Through interoperability, the fingerprints are also checked against the DHS Automated Biometric Identification System (IDENT) and, if the submitted fingerprints match fingerprints in IDENT, the FBI generates an Immigration Alien Query (IAQ) that is sent to the ACRIMe. An ICE employee uses ACRIMe to research the subject of the IAQ, determine the immigration status of the subject, and generate an Immigration Alien Response (IAR), which ACRIMe sends back to the FBI Criminal Justice Information Services (CJIS) Division. The FBI combines and sends the IDENT response and the IAR back to the agency that conducted the fingerprint check for awareness if they are technically capable of receiving the response. ACRIMe also sends the IAR to the appropriate ICE field office to determine the appropriate enforcement action, if any, to take against the individual.

As described in the ACRIMe PIA update, ACRIMe's use under interoperability has been expanded to assist other agencies that screen individuals for various purposes, including administration of criminal justice, national security, and background checks/investigations conducted for employment, access, and other suitability purposes. The appendices to the PIA list the new uses of interoperability that ACRIMe now supports. The appendices will be updated as new interoperability users are added and as existing users change how they use interoperability. It should be noted that although ACRIMe is supporting new uses under interoperability, the process by which IAQs (queries) are submitted to ACRIMe and responses (IARs) are sent back to the FBI CJIS Division and ultimately to the agency submitting the request, remains the same as occurs under Secure Communities. For example, one of the new uses of ACRIMe is to assist agencies that are conducting background checks/investigations on individuals for employment, access, or other suitability purposes. The fingerprints of the individuals being screened are checked against IDENT and IAQs are sent to ACRIMe for any matches. ICE personnel research the subjects of the IAQ, determine the immigration status of the subjects, and return IARs on them.

Using interoperability, ICE will also begin to screen convicted sex offenders whose fingerprints are captured during federal, state, local, and tribal law

enforcement processes that enroll these individuals in sex offender registries. ICE places a high priority on targeting for removal those aliens with criminal records who pose a threat to public safety, such as sex offenders. When a convicted sex offender is released from incarceration, the individual is required to register as a sex offender with authorities in the state in which he or she resides. During the registration process, state authorities typically capture the individual's fingerprints and biographic information and transmit them to the FBI CJIS Division for inclusion in the National Sex Offender Registry, and to update IAFIS and the individual's FBI criminal record. Via interoperability, the FBI CJIS Division automatically runs the individual's fingerprints against IDENT. If the fingerprints match fingerprints in IDENT, an IAQ is generated and sent to ACRIMe. ICE users research the immigration status of the individual and generate an IAR containing the results of that research in ACRIMe. The IAR is sent to the relevant ICE field office, which determines the appropriate enforcement action to take against the individual, if any. A similar process is used when there are changes to the convicted sex offender's information. The state authorities send the individual's information to the FBI CJIS Division. They update the person's record, run the individual's fingerprints against IDENT, and if the fingerprints match fingerprints in IDENT, an IAQ is generated and sent to ACRIMe. The processing of the convicted sex offender information varies from the standard interoperability process in one respect only: ACRIMe does not send a copy of the IAR to the FBI CJIS Division or to the agency that registered the sex offender. Instead, the IAR is only distributed and used within ICE for enforcement purposes.

New categories of individuals have been added to the DHS/ICE–007—ACRIMe SORN to describe the convicted sex offenders and other types of individuals whose information is being processed through ACRIMe under these new interoperability programs including individuals about whom a background check is being performed for employment, access, or other suitability purposes. As new interoperability users are approved by DHS, the ACRIMe PIA appendix will be updated to describe them and conforming changes will be made to this SORN, if required.

Additionally, new routine uses have been added to allow ICE to share information from the system. Below is a summary of the new routine uses and their corresponding letter:

(J) To federal, state, local, tribal, territorial, or international agencies seeking to verify or ascertain the citizenship or immigration status of an individual for a purpose within the agency's jurisdiction;

(N) To a former employee of DHS for purposes of responding to an official inquiry or facilitating communications with a former employee that may be relevant for personnel-related or other official purposes;

(V) To prospective claimants and their attorneys for the purpose of negotiating the settlement of an actual or prospective claim against DHS prior to litigation or proceedings;

(X) To the Department of Justice (DOJ), Federal Bureau of Investigation (FBI) in order to facilitate responses to fingerprint-based immigration status queries;

(Y) To federal, state, local, tribal, territorial, international, or foreign government agencies or entities to enable consultation to assist in the processing of redress requests;

(Z) To federal, state, local, tribal, territorial, foreign, or international agencies regarding a requesting agency's decision concerning the hiring or retention of an individual or if the information is relevant and necessary to a DHS decision concerning the hiring or retention;

(AA) To federal, state, local, tribal, territorial, foreign, or international agencies, if DHS determines the information is relevant and necessary to the agency's decision concerning the hiring or retention of an individual and failure to disclose the information is likely to create a risk;

(BB) To federal, state, local, tribal, territorial, foreign, or international agencies seeking information on the subjects of wants, warrants, or lookouts for law enforcement purposes;

(CC) To federal, state, local, tribal, territorial, or foreign government agencies or organizations, or international organizations, lawfully engaged in collecting law enforcement intelligence;

(DD) To foreign governments in order to notify them concerning an alien who is incapacitated, an unaccompanied minor, or deceased.

(EE) To federal, state, local, tribal, and territorial courts or government agencies involved in criminal investigation or prosecution, pretrial services, sentencing, parole, probation or other aspects of the criminal justice process, and to counsel representing an individual in a proceeding, in order to ensure the integrity of the justice system by informing these recipients of the existence of an immigration detainer on that individual or that individual's status in removal proceedings, voluntary departure, or custodial status/location.

Finally, the retention period for Brady Act check records has been corrected. Previously, the SORN incorrectly stated that the records were retained for twenty-four (24) hours. The records are retained for five (5) years in order to provide ICE with sufficient time to follow up on any leads generated by Brady Act record check information. Additionally, the SORN is being updated to reflect the retention period for biometric and biographic immigration status check records for National Sex Offender Registrants and individuals for whom non-criminal queries are conducted. Information on National Sex Offender Registrants will be maintained for seventy-five (75) years while records pertaining to non-criminal queries will only be retained for thirty (30) years.

Portions of the DHS/ICE–007 ACRIMe System of Records are exempt from one or more provisions of the Privacy Act because of criminal, civil and administrative enforcement requirements. Individuals may request information about records pertaining to them stored in the DHS/ICE–007 ACRIMe System of Records as outlined in the ''Notification Procedure'' section below. ICE reserves the right to exempt various records from release. Pursuant to 5 U.S.C. 552a(j)(2), the Secretary of Homeland Security has exempted portions of this system of records from subsections (c)(3) and (4); (d); (e)(1), (2), (3), (4)(G), (4)(H), (5) and (8); (f); and (g) of the Privacy Act. In addition, the system has been exempted from subsections (c)(3) and (4); (d); (e)(1), (4)(G), (4)(H), and (f) pursuant to 5 U.S.C. 552a(k)(2). Rules have been promulgated in accordance with the requirements of 5 U.S.C. 553(b), (c), and (e) and have been published in the **Federal Register** as addition to Title 28, Code of Federal Regulations (28 CFR 16.99). In addition, to the extent a record contains information from other exempt systems of records; ICE will rely on the exemptions claimed for those systems. In the context of this updated SORN, the Department is requesting comment on the application of these exemptions to the newly added categories of individuals.

II. Privacy Act

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government

collects, maintains, uses, and disseminates individuals' records. The Privacy Act applies to information that is maintained in a ''system of records.'' A ''system of records'' is a group of any records under the control of an agency for which information is retrieved by the name of an individual or by some identifying number, symbol, or other particular identifier assigned to the individual. In the Privacy Act, an individual is defined to encompass United States citizens and lawful permanent residents. As a matter of policy, DHS extends administrative Privacy Act protections to all individuals when systems of records maintain information on U.S. citizens, lawful permanent residents, and visitors. Individuals may request access to their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR Part 5.

The Privacy Act requires each agency to publish in the **Federal Register** a description denoting the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system in order to make agency record keeping practices transparent, to notify individuals regarding the uses to which their records are put, and to assist individuals to more easily find such files within the agency. Below is the description of the DHS/ICE–007 ACRIMe System of Records.

In accordance with 5 U.S.C. 552a(r), DHS has provided a report of this system of records to the Office of Management and Budget and to Congress.

System of Records

DHS/ICE—007

SYSTEM NAME:

Alien Criminal Response Information Management (ACRIMe).

SECURITY CLASSIFICATION:

Unclassified and Law Enforcement Sensitive (LES).

SYSTEM LOCATION:

Records are maintained in the ACRIMe information technology system and associated paper records at the U.S. Immigration and Customs Enforcement (ICE) Law Enforcement Support Center (LESC) in Williston, Vermont, at ICE Headquarters, and at other ICE field office locations.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Categories of individuals covered in this system include:

(1) Individuals who are the subjects of immigration status inquiries submitted to ICE or immigration checks conducted by ICE, including:

A. Individuals who are encountered by, arrested by, under the investigation of, or in the custody of a criminal justice agency.

B. Individuals convicted of sexual offenses required to register as a sexual offender.

C. Individuals subject to background checks or investigations by or under the authority of a federal, state, local, tribal, or territorial agency to determine eligibility or suitability for employment, access, or other purposes.

D. Individuals applying to obtain/purchase a firearm in the United States and whose information has been submitted to ICE for the purpose of conducting an immigration status check in support of background checks required by the Brady Handgun Violence Protection Act (Brady Act) or other applicable laws.

(2) Individuals who are the subjects of criminal arrest warrants and immigration lookouts that ICE has entered into the Federal Bureau of Investigation's (FBI) National Crime Information Center (NCIC) System.

(3) Individuals who report tips concerning customs and immigration violations, suspicious activity or other law enforcement matters to the Department of Homeland Security (DHS)/ICE and individuals about whom those reports are made.

(4) Law enforcement officers or other personnel working for criminal justice agencies who contact ICE for reasons relating to the purposes of this system of records, or for other law enforcement assistance.

CATEGORIES OF RECORDS IN THE SYSTEM:

Categories of records in this system may include:

(1) Biographic identifiers, other identifiers, and contact information (e.g., name, aliases, date and place of birth, address, telephone number, Social Security Number (SSN), Alien Registration Number (A-Number), driver's license number, other personal identification numbers, fingerprint identification number, passport number).

(2) Visa, border, immigration and citizenship information (e.g., citizenship and/or immigration status, application for benefit information, visa and travel history).

(3) Criminal history information (e.g., FBI number, booking number, current charge[s], custodial status, past offenses and convictions).

(4) NCIC hit confirmation records, which consist of information supporting the entry of criminal warrants or immigration lookouts into the NCIC system, such as criminal arrest warrant information, fingerprints and photographs, other information identifying the individual, and records reflecting the purpose/basis for the warrant or lookout. Records of inquiries received from criminal justice agencies regarding potential matches against ICE-created NCIC records, and records pertaining to ICE's research, resolution, and response to those inquiries.

(5) Background investigation records, which consist of identifying and other information received from agencies requesting an immigration status check on individuals as part of a background check for employment, gun ownership, or other reasons; research conducted by ICE during the conduct of the immigration status check; and ICE's research, resolution, and response to those inquiries.

(6) Criminal justice immigration status check records, which consist of identifying and other information received from criminal justice agencies requesting an immigration status check on individuals in the context of a criminal justice matter; prioritization of requests; research conducted by ICE during the conduct of the immigration status check; and ICE's research, resolution, and response to those inquiries.

(7) Public tip records, which consist of information contained in tips received from the public or other sources regarding customs and immigration violations, or other violations of law, and suspicious activities. This includes identifying and contact information about the individual reporting the tip (if provided) and information about the person or persons who are the subject of the tip.

(8) Information pertaining to ICE's follow-up activities regarding a tip or other information received pursuant to the activities supported by this system of records, including leads for ICE investigations and referrals to other agencies.

(9) Identification and authentication information for law enforcement officers or other criminal justice personnel who contact ICE.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

8 U.S.C. 1103, 8 U.S.C. 1324(b)(3); 8 U.S.C. 1360(b); Section 504 of the Immigration and Nationality Act of 1990 (INA) (Pub. L. 101–649); the Brady Handgun Violence Protection Act of

1993 (Pub. L. 103–159); FY 2008 Consolidated Appropriations Act (Pub. L. 110–161, 121 Stat. 1844, 2050 (2007)); and the INA provisions regarding removal of criminal aliens (INA § 237(a)(2) and § 238).

PURPOSE(S):

The purposes of this system are to:

(1) Identify and arrest individuals in the United States who may be subject to removal under the Immigration and Nationality Act, as amended.

(2) Respond to inquiries from criminal justice agencies that seek to determine the immigration status of an individual in the context of a criminal justice matter for the purpose of identifying and arresting those who may be subject to removal.

(3) Inform criminal justice agencies and agencies conducting background checks whether an individual is under investigation and/or wanted by ICE or other criminal justice agencies.

(4) Receive, process and act on information received from the general public and other sources regarding suspicious activities and actual or potential violations of laws enforced by ICE or DHS, and to refer any other actionable information to the appropriate agencies for action.

(5) Provide assistance to domestic, foreign, and international agencies that contact ICE and the LESC on matters within the scope of ICE's law enforcement authorities, including violations of U.S. customs and immigration laws.

(6) Collect and analyze data to evaluate the effectiveness and quality of services provided to other agencies in support of the purposes described above, and of ICE's customs and immigration law enforcement efforts generally.

(7) Identify potential criminal activity, immigration violations, and threats to homeland security; uphold and enforce the law; and ensure public safety.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, all or a portion of the records or information contained in this system may be disclosed outside DHS as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

A. To the Department of Justice (DOJ), including U.S. Attorneys Offices, or other federal agency conducting litigation or proceedings before any court, adjudicative or administrative body, when it is relevant or necessary to the litigation and one of the following is a party to the litigation or has an interest in such litigation:

1. DHS or any component thereof;
2. Any employee of DHS in his/her official capacity;
3. Any employee of DHS in his/her individual capacity where DOJ or DHS has agreed to represent the employee; or
4. The United States or any agency thereof.

B. To a congressional office from the record of an individual in response to an inquiry from that congressional office made pursuant to a written Privacy Act waiver at the request of the individual to whom the record pertains.

C. To the National Archives and Records Administration (NARA) or General Services Administration pursuant to records management inspections being conducted under the authority of 44 U.S.C. 2904 and 2906.

D. To an agency or organization for the purpose of performing audit or oversight operations as authorized by law, but only such information as is necessary and relevant to such audit or oversight function.

E. To appropriate agencies, entities, and persons when:

1. DHS suspects or has confirmed that the security or confidentiality of information in the system of records has been compromised;
2. DHS has determined that as a result of the suspected or confirmed compromise, there is a risk of identity theft or fraud, harm to economic or property interests, harm to an individual, or harm to the security or integrity of this system or other systems or programs (whether maintained by DHS or another agency or entity) that rely upon the compromised information; and
3. The disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with DHS' efforts to respond to the suspected or confirmed compromise and prevent, minimize, or remedy such harm.

F. To contractors and their agents, grantees, experts, consultants, and others performing or working on a contract, service, grant, cooperative agreement, or other assignment for DHS, when necessary to accomplish an agency function related to this system of records. Individuals provided information under this routine use are subject to the same Privacy Act requirements and limitations on disclosure as are applicable to DHS officers and employees.

G. To federal, state, local, tribal, territorial, or foreign government agencies or multilateral government organizations responsible for investigating or prosecuting the violations of, or for enforcing or implementing, a statute, rule, regulation, order, license, or treaty where DHS determines that the information would assist in the enforcement of civil, criminal, or regulatory laws.

H. To federal, state, local, tribal, territorial, foreign, or international agencies, if the information is relevant and necessary to a requesting agency's decision concerning individuals who are being screened with respect to their participation in, attendance at, or other relation to a national or special security event.

I. To domestic governmental agencies seeking to determine the immigration status of persons who have applied to purchase/obtain a firearm in the United States, pursuant to checks conducted on such persons under the Brady Handgun Violence Prevention Act or other applicable laws.

J. To federal, state, local, tribal, territorial, or international agencies seeking to verify or ascertain the citizenship or immigration status of any individual within the jurisdiction of the agency for any purpose authorized by law.

K. To courts, magistrates, administrative tribunals, opposing counsel, parties, and witnesses, in the course of immigration, civil, or criminal proceedings (including discovery, presentation of evidence, and settlement negotiations) and when DHS determines that use of such records is relevant and necessary to the litigation before a court or adjudicative body when any of the following is a party to or have an interest in the litigation:

1. DHS or any component thereof;
2. Any employee of DHS in his/her official capacity;
3. Any employee of DHS in his/her individual capacity where the government has agreed to represent the employee; or
4. The United States, where DHS determines that litigation is likely to affect DHS or any of its components.

L. To federal, state, local, tribal, territorial, foreign or international agencies in order to refer reports of suspicious activity, tips, potential violations of law and other relevant information to agencies with appropriate jurisdiction, authorities, and/or need-to-know concerning the matters.

M. To the Department of Justice (DOJ), Federal Bureau of Prisons (BOP) and other federal, state, local, territorial, tribal and foreign law enforcement or custodial agencies for the purpose of

placing an immigration detainer on an individual in that agency's custody, or to facilitate the transfer of custody of an individual to DHS from the other agency.

N. To a former employee of DHS for purposes of responding to an official inquiry by federal, state, local, tribal, territorial government agencies or professional licensing authorities; or facilitating communications with a former employee that may be relevant and necessary for personnel-related or other official purposes where DHS requires information or consultation assistance from the former employee regarding a matter within that person's former area of responsibility.

O. To federal, state, local, tribal, territorial, or foreign government agencies, as well as to other individuals and organizations during the course of an investigation by DHS or the processing of a matter under DHS's jurisdiction, or during a proceeding within the purview of the immigration and nationality laws, when DHS deems that such disclosure is necessary to carry out its functions and statutory mandates or to elicit information required by DHS to carry out its functions and statutory mandates.

P. To international, foreign, intergovernmental, and multinational government agencies, authorities, and organizations in accordance with law and formal or informal international arrangements.

Q. To the Office of Management and Budget (OMB) in connection with the review of private relief legislation as set forth in OMB Circular No. A–19 at any stage of the legislative coordination and clearance process as set forth in the Circular.

R. To the U.S. Senate Committee on the Judiciary or the U.S. House of Representatives Committee on the Judiciary when necessary to inform members of Congress about an alien who is being considered for private immigration relief.

S. To the Department of State when it requires information to consider and/or provide an informed response to a request for information from a foreign, international, or intergovernmental agency, authority, or organization about an alien or an enforcement operation with transnational implications.

T. To federal, state, local, territorial, tribal, international, or foreign criminal, civil, or regulatory law enforcement authorities when the information is necessary for collaboration, coordination, and de-confliction of investigative matters, prosecutions, and/or other law enforcement actions to avoid duplicative or disruptive efforts and to ensure the safety of law enforcement officers who may be working on related law enforcement matters.

U. To federal, state, local, tribal, territorial, or foreign government agencies or entities or multinational government agencies where DHS desires to exchange relevant data for the purpose of developing, testing, or implementing new software or technology whose purpose is related to this system of records.

V. To prospective claimants and their attorneys for the purpose of negotiating the settlement of an actual or prospective claim against DHS or its current or former employees, in advance of the initiation of formal litigation or proceedings.

W. To federal and foreign government intelligence or counterterrorism agencies or components when DHS becomes aware of an indication of a threat or potential threat to national or international security, or when such disclosure is to support the conduct of national intelligence and security investigations or to assist in anti-terrorism efforts.

X. To the Department of Justice (DOJ), Federal Bureau of Investigation (FBI) in order to facilitate responses to fingerprint-based immigration status queries that are sent to ICE, including queries that the FBI sends on behalf of another agency.

Y. To federal, state, local, tribal, territorial, international, or foreign government agencies or entities for the purpose of consulting with that agency or entity:

1. To assist in making a determination regarding redress for an individual in connection with the operations of a DHS component or program;

2. To verify the identity of an individual seeking redress in connection with the operations of a DHS component or program; or

3. To verify the accuracy of information submitted by an individual who has requested such redress on behalf of another individual.

Z. To federal, state, local, tribal, territorial, foreign, or international agencies, if the information is relevant and necessary to a requesting agency's decision concerning the hiring or retention of an individual, or the issuance, grant, renewal, suspension or revocation of a security clearance, license, contract, grant, or other benefit; or if the information is relevant and necessary to a DHS decision concerning the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant or other benefit.

AA. To federal, state, local, tribal, territorial, foreign, or international agencies, if DHS determines (1) the information is relevant and necessary to the agency's decision concerning the hiring or retention of an individual, or the issuance of a security clearance, license, contract, grant, or other benefit, and (2) failure to disclose the information is likely to create a risk to government facilities, equipment, or personnel; sensitive information; critical infrastructure; or the public safety.

BB. To federal, state, local, tribal, territorial, foreign, or international agencies seeking information on the subjects of wants, warrants, or lookouts, or any other subject of interest, for purposes related to administering or enforcing the law, national security, immigration, or intelligence, when consistent with a DHS mission-related function.

CC. To federal, state, local, tribal, territorial, or foreign government agencies or organizations, or international organizations, lawfully engaged in collecting law enforcement intelligence, whether civil or criminal, to enable these entities to carry out their law enforcement responsibilities, including the collection of law enforcement intelligence.

DD. To foreign governments in order to notify them concerning an alien who is incapacitated, an unaccompanied minor, or deceased.

EE. To federal, state, local, tribal, and territorial courts or government agencies involved in criminal investigation or prosecution, pretrial services, sentencing, parole, probation, bail bonds, child welfare services, or any other aspect of the criminal justice process, and to counsel representing an individual in a criminal, civil, or child welfare proceeding, in order to ensure the integrity of the justice system by informing these recipients of the existence of an immigration detainer on that individual or that individual's status in removal proceedings, including removal, voluntary departure, or custodial status/location. Disclosure of that individual's Alien Registration Number (A-Number) and country of birth is also authorized to facilitate use of the ICE Online Detainee Locator System by the aforementioned individuals and agencies. This routine use does not authorize disclosure to bail bond companies or agents.

FF. To appropriate federal, state, local, tribal, foreign or international criminal justice agencies, or other authorized users of NCIC, to respond to inquiries regarding a person who is or

may be the subject of an ICE-generated NCIC criminal arrest warrant or immigration lookout record.

GG. To the news media and the public, with the approval of the Chief Privacy Officer in consultation with counsel, when there exists a legitimate public interest in the disclosure of the information or when disclosure is necessary to preserve confidence in the integrity of DHS or is necessary to demonstrate the accountability of DHS's officers, employees, or individuals covered by the system, except to the extent it is determined that release of the specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records in this system are stored electronically or on paper in secure facilities behind locked doors. Electronic records are stored on magnetic disc, tape, digital media, and CD–ROM.

RETRIEVABILITY:

Records may be retrieved by personal, biographic, or biometric identifiers such as name, date of birth, place of birth, address, A-Number(s), FBI criminal history number(s), Social Security Number, Fingerprint Identification Number, and passport number.

SAFEGUARDS:

Records in this system are safeguarded in accordance with applicable rules and policies, including all applicable DHS automated systems security and access policies. Strict controls have been imposed to minimize the risk of compromising the information that is being stored. Access to the computer systems containing the records in this system is limited to those individuals who have a need to know the information for the performance of their official duties and who have appropriate clearances or permissions.

RETENTION AND DISPOSAL:

ICE is seeking approval for a records retention schedule for the records described in this system of records. ICE proposes to maintain the IAQ and IAR records pertaining to criminal biometric and biographic immigration status checks and pertaining to National Sex Offender Registrants for seventy-five (75) years. The IAQ and IAR records pertaining to non-criminal biometric and biographic immigration queries will be kept for thirty (30) years. Records pertaining to Brady Act, special security event, and OPM checks will be kept for five (5) years from the date an immigration status determination is made and an IAR returned, after which the records will be deleted from the ACRIMe system. ICE proposes to maintain NCIC Module records (containing the underlying basis for the ICE-generated NCIC record) for 75 years from the date the record is removed from NCIC. ICE also proposes to maintain Communication Center Module records containing NCIC Hit Confirmation calls for 75 years and follow-up calls to IARs for the time period consistent with the type of query conducted. Additionally, ICE proposes to maintain tips and suspicious activity reporting in the Communications Center Module for ten (10) years from the date of the tip.

SYSTEM MANAGER AND ADDRESS:

Unit Chief, Law Enforcement Support Center, U.S. Immigration and Customs Enforcement, 188 Harvest Lane, Williston, VT 05495.

NOTIFICATION PROCEDURE:

The Secretary of Homeland Security has exempted this system from the notification, access, and amendment procedures of the Privacy Act because it is a law enforcement system. However, ICE will consider individual requests to determine whether or not information may be released. Thus, individuals seeking notification of and access to any record contained in this system of records, or seeking to contest its content, may submit a request in writing to ICE's FOIA Officer, whose contact information can be found at *http://www.dhs.gov/foia* under ''contacts.'' If an individual believes more than one component maintains Privacy Act records concerning him or her, the individual may submit the request to the Chief Privacy Officer and Chief Freedom of Information Act Officer, U.S. Department of Homeland Security, 245 Murray Drive SW., Building 410, STOP–0655, Washington, DC 20528–0655.

When seeking records about yourself from this system of records or any other Departmental system of records your request must conform with the Privacy Act regulations set forth in 6 CFR Part 5. You must first verify your identity, meaning that you must provide your full name, current address, and date and place of birth. You must sign your request, and your signature must either be notarized or submitted under 28 U.S.C. § 1746, a law that permits statements to be made under penalty of perjury as a substitute for notarization. While no specific form is required, you may obtain forms for this purpose from the Chief Privacy Officer and Chief Freedom of Information Act Officer, *http://www.dhs.gov* or 1–866–431–0486. In addition you should:

- Explain why you believe the Department would have information on you;
- Identify which component(s) of the Department you believe may have the information about you;
- Specify when you believe the records would have been created; and
- Provide any other information that will help the FOIA staff determine which DHS component agency may have responsive records.

If your request is seeking records pertaining to another living individual, you must include a statement from that individual certifying his/her agreement for you to access his/her records.

Without the above information, the component(s) may not be able to conduct an effective search, and your request may be denied due to lack of specificity or lack of compliance with applicable regulations.

RECORD ACCESS PROCEDURES:

See ''Notification procedure'' above.

CONTESTING RECORD PROCEDURES:

See ''Notification procedure'' above.

RECORD SOURCE CATEGORIES:

Records are obtained from ICE and other federal, state, local, tribal, foreign, and international criminal justice agencies (e.g., law enforcement agencies, investigators, prosecutors, correctional institutions, police departments, and parole boards).

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Pursuant to 5 U.S.C. 552a(j)(2) of the Privacy Act, portions of this system are exempt from subsections (c)(3) and (4); (d); (e)(1), (e)(2), (e)(3), (e)(4)(G), (e)(4)(H), (e)(5) and (e)(8); (f); and (g) of the Privacy Act. In addition, the system has been exempted from subsections (c)(3), (d), and (e)(1), (4)(G), (4)(H), and (f) pursuant to 5 U.S.C. 552a(k)(2). Rules have been promulgated in accordance with the requirements of 5 U.S.C. 553(b), (c), and (e) and have been published in the **Federal Register** as additions to Title 28, Code of Federal Regulations (28 CFR 16.99). In addition, to the extent a record contains information from other exempt systems of records, ICE will rely on the exemptions claimed for those systems.

Dated: January 24, 2013.

Jonathan R. Cantor,

Acting Chief Privacy Officer, Department of Homeland Security.

BILLING CODE 9111–28–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

[OMB Control Number 1615–0087]

Agency Information Collection Activities: Application for Citizenship and Issuance of Certificate Under Section 322, Form N–600K; Revision of a Currently Approved Collection

ACTION: 30-Day Notice.

SUMMARY: The Department of Homeland Security (DHS), U.S. Citizenship and Immigration Services (USCIS) will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995. The information collection notice was previously published in the **Federal Register** on December 3, 2012, at 77 FR 71609, allowing for a 60-day public comment period. USCIS received two public comment submissions in connection with the 60-day notice.

DATES: The purpose of this notice is to allow an additional 30 days for public comments. Comments are encouraged and will be accepted until March 18, 2013. This process is conducted in accordance with 5 CFR 1320.10.

ADDRESSES: Written comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, must be directed to the OMB USCIS Desk Officer via email at *oira_submission@omb.eop.gov.* The comments submitted to the OMB USCIS Desk Officer may also be submitted to DHS via the Federal eRulemaking Portal Web site at *http://www.regulations.gov* under e-Docket ID number USCIS–2007–0019 or via email at *uscisfrcomment@uscis.dhs.gov.* All submissions received must include the agency name and the OMB Control Number 1615–0087.

Regardless of the method used for submitting comments or material, all submissions will be posted, without change, to the Federal eRulemaking Portal at *www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to consider limiting the amount of personal information that you provide in any voluntary submission you make to DHS. For additional information please read the Privacy Act notice that is available via the link in the footer of *www.regulations.gov.*

Note: The address listed in this notice should only be used to submit comments concerning this information collection. Please do not submit requests for individual case status inquiries to this address. If you are seeking information about the status of your individual case, please check ''My Case Status'' online at: *https://egov.uscis.gov/cris/Dashboard.do,* or call the USCIS National Customer Service Center at 1–800–375–5283.

Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of this Information Collection

(1) *Type of Information Collection Request:* Revision of a Currently Approved Collection.

(2) *Title of the Form/Collection:* Application for Citizenship and Issuance of Certificate Under Section 322.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* Form N–600K; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract: Primary:* Individuals or households. This form provides an organized framework for establishing the authenticity of an applicant's eligibility and is essential for providing prompt, consistent and correct processing of such applications for citizenship under section 322 of the Immigration and Nationality Act.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* 3,242 responses at 2 hours and 5 minutes (2.083 hours) per response.

(6) *An estimate of the total public burden (in hours) associated with the collection:* 6,753 annual burden hours.

If you need a copy of the information collection instrument with supplementary documents, or need additional information, please visit *http://www.regulations.gov.* We may also be contacted at: USCIS, Office of Policy and Strategy, Regulatory Coordination Division, 20 Massachusetts Avenue NW., Washington, DC 20529–2134; Telephone 202–272–8377.

Dated: February 8, 2013.

Laura Dawkins,

Chief, Regulatory Coordination Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security.

BILLING CODE 4210–67–P

DEPARTMENT OF THE INTERIOR

[NPS–WASO–CONC–12180; PPMVSCS1Y.Y00000; PPWOBSADC0]

Notice of Public Meeting: Concessions Management Advisory Board

AGENCY: National Park Service, Interior.

ACTION: Notice of public meeting.

SUMMARY: Notice is hereby given in accordance with the Federal Advisory Committee Act that the 26th meeting of the Concessions Management Advisory Board (the Board) will be held as indicated below.

DATES: The meeting will be held March 20, 2013, at the Four Points by Sheraton, 1201 K Street NW., Washington, DC 20005, beginning at 9 a.m. Members of the public are invited to attend. A public comment period will be held.

FOR FURTHER INFORMATION CONTACT: Erica Chavis, National Park Service, Commercial Services Program, 1201 Eye Street NW., Washington, DC 20005, Telephone: 202/513–7156.

SUPPLEMENTARY INFORMATION: The Board was established by Title IV, Section 409 of the National Parks Omnibus Management Act of 1998, November 13, 1998 (Pub. L. 105–391). The purpose of the Board is to advise the Secretary and the National Park Service on matters relating to management of concessions in the National Park System. The members of the Advisory Board are: Dr. James J. Eyster, Ms. Ramona Sakiestewa, Mr. Richard Linford, and Ms. Michele Michalewicz.

Topics that will be presented during the meeting include:

- General Commercial Services Program Updates
- Concession Contracting Status Update
- Standards, Evaluations, and Rate Approval Project Update
- Simplifying Contract Management and the Proposal Process
- Incentive Programs for Concessioners
- Innovative Visitor Services
- Public Comment—Limited to 3 minutes per person

The meeting will be open to the public, however, facilities and space for accommodating members of the public are limited, and persons will be accommodated on a first-come-first-served basis.

Assistance to Individuals With Disabilities at the Public Meeting

The meeting site is accessible to individuals with disabilities. If you plan to attend and will require an auxiliary aid or service to participate in the meeting (e.g., interpreting service, assistive listening device, or materials in an alternate format), notify the contact person listed in this notice at least 2 weeks before the scheduled meeting date. Attempts will be made to meet any request(s) we receive after that date, however, we may not be able to make the requested auxiliary aid or service available because of insufficient time to arrange for it.

Anyone may file with the Board a written statement concerning matters to be discussed. The Board may also permit attendees to address the Board, but may restrict the length of the presentations, as necessary to allow the Board to complete its agenda within the allotted time. Such requests should be made to the Director, National Park Service, Attention: Chief, Commercial Services Program, at least 7 days prior to the meeting. Draft minutes of the meeting will be available for public inspection approximately 6 weeks after the meeting, at the Commercial Services Program office located at 1201 Eye Street NW., 11th Floor, Washington, DC.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Dated: February 7, 2013.

Lena McDowall,

Associate Director, Business Services.

BILLING CODE 4312–53–P

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

List of Allottees or Heirs Determined To Receive Monetary Compensation Under the White Earth Reservation Land Settlement Act of 1985, as Amended

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: Pursuant to Section 8(c) of the White Earth Land Settlement Act of 1985 (the Act), Public Law 99–264 (100 Stat. 61), as amended this notice lists individuals whose whereabouts are unknown. Therefore as described in the Act undeliverable monetary compensation payments which have been determined to fall within the scope of sections 4(a), 4(b), or 5(c) of the Act are being published.

FOR FURTHER INFORMATION CONTACT: Patricia L. Olby, Superintendent, Minnesota Agency, Bureau of Indian Affairs, 522 Minnesota Ave., Bemidji, Minnesota 56601, Telephone (218) 751–2011.

SUPPLEMENTARY INFORMATION: The White Earth Reservation Land Settlement Act of 1985, Public Law 99–264 (100 Stat. 61) as amended by Public Law 100–153 (101 Stat. 886), Public Law 100–212 (101 Stat. 1433), and Public Law 101–301 (104 Stat. 210), provides for alternative methods of resolving disputes relative to the title to certain allotments for which trust patents were issued to White Earth Chippewa Indians. Section 4(a) and 4(b) of the Act define circumstances by which the title to an allotment may have been taken or transferred through questionable means during the trust period. The Act authorizes the Secretary of the Interior to: (1) Identify the allotments or interest therein which were taken or transferred under identified circumstances, (2) determine the individuals entitled to compensation pursuant to the Act, and (3) ascertain the amount of compensation to which each such individual is entitled.

In addition, section 5(c) of the Act provides that the White Earth Band of Chippewa Indians shall be compensated for allotments which were granted to individuals who had died prior to the selection dates of their respective allotments.

Under Section 8(a) of the Act, the compensation for the taking or transfer of an allotment or interest is to be based on the fair market value of the allotment or interest therein as of the date of such taking or transfer, less any consideration actually received at the time. The compensation to be paid under the Act shall include interest compounded annually at 5 percent from the date of the questionable taking or transfer, until March 24, 1986, and at the general rate of interest earned by Department of the Interior funds thereafter. The Secretary is authorized to issue written notices of compensation determination for the allottees or heirs entitled thereto. Such notice shall describe the basis for the Secretary's determination, the process whereby such compensation was determined, the method of payment,

and the applicable time limits for judicial review of the determination. Any individual who has already elected to file suit in the Federal District Court for the District of Minnesota to seek the recovery of title to an allotment or interest therein, or damages, is barred under section 6(c) from receiving any compensation under the Act.

The Secretary shall give written notice only to those allottees or heirs whose addresses can be ascertained by reasonable and diligent efforts; otherwise such notice shall be given by publication in the **Federal Register**.

The Secretary's administrative determination of the appropriate amount of compensation computed pursuant to the provisions of the Act may be judicially reviewed pursuant to the Administrative Procedure Act not later than one hundred and eighty days after the issuance of notice as aforesaid; after such time the Secretary's determination shall be conclusive and all judicial reviews shall be barred. Exclusive jurisdiction over any such action is hereby vested in the United States District Court for the District of Minnesota.

The Secretary of the Interior shall then make a diligent effort to locate each allottee or heir; however, if after two years from the date on which a determination becomes conclusive an allottee or heir cannot be located the Secretary of the Interior shall declare the amount owing to such allottee or heir forfeit.

This notice is published in the exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 DM 8.

Dated: February 5, 2013.

Kevin K. Washburn,

Assistant Secretary—Indian Affairs.

Instruction Sheet

There are four (4) columns containing the following;

English Name: English names of the allottees and/or heir, including given name, middle initial, middle name, maiden name, married name, and other English names.

Ojibway Name: The name of the allottee and/or heir in Ojibway, the native language of the White Earth Band of the White Earth Band of Chippewa Indians. The names are shown with phonetic spellings.

Claim Number: Each questionable taking or transfer has been assigned a 10, 11 or 12 Character Issue Number. In every instance, the first six characters F53408, are identical and denote the Midwest Regional Office, Minnesota Agency and White Earth Indian Reservation. The last four, five or six characters identify the specific taking or transfer.

Heirship Level: All allottees and/or heirs will be assigned a one to eight character heirship level. This entry is a combination of alphabet and numeral characteristics define each undivided interest inherited.

If you wish further information about allotments or interest therein which are contained in this list, call or write the WELSA Project office in care of the Bureau of Indian Affairs. The address and telephone number are indicated in the **FOR FURTHER INFORMATION CONTACT** section of this document. Be sure to include the complete Issue Number in any correspondence with the Bureau of Indian Affairs.

Notice to Individuals Entitled to Compensation Determination Under the White Earth Reservation Land Settlement Act of 1985

Alaska Native Claims Selection

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of decision approving lands for conveyance.

SUMMARY: As required by 43 CFR 2650.7(d), notice is hereby given that the Bureau of Land Management (BLM) will issue an appealable decision to Chugach Alaska Corporation. The decision will approve conveyance of the surface and subsurface estates in certain lands pursuant to the Alaska Native Claims Settlement Act (43 U.S.C. 1601, *et seq*). The lands are located south of Tatitlek, Alaska, and contain 65.05 acres. Notice of the decision will also be published four times for four consecutive weeks in the *Anchorage Daily News.*

DATES: Any party claiming a property interest in the lands affected by the decision may appeal the decision in accordance with the requirements of 43 CFR part 4 within the following time limits:

1. Parties receiving service of the decision by certified mail shall have 30 days from the date of receipt to file an appeal.

2. Unknown parties, parties unable to be located after reasonable efforts have been expended to locate, parties who fail or refuse to sign their return receipt, and parties who receive a copy of the decision by regular mail which is not certified, return receipt requested, shall have until March 18, 2013 to file an appeal.

Parties who do not file an appeal in accordance with the requirements of 43 CFR part 4, subpart E, shall be deemed to have waived their rights. Notices of appeal transmitted by electronic means, such as facsimile or email, will not be accepted as timely filed.

ADDRESSES: A copy of the decision may be obtained from: Bureau of Land Management, Alaska State Office, 222 West Seventh Avenue, #13, Anchorage, Alaska 99513–7504.

FOR FURTHER INFORMATION CONTACT: The BLM by phone at 907–271–5960 or by email at *ak.blm.conveyance@blm.gov*. Persons who use a Telecommunications Device for the Deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 to contact the BLM during normal business hours. In addition, the FIRS is available 24 hours a day, 7 days a week, to leave a message or question with the BLM. The BLM will reply during normal business hours.

Alaska Native Claims Selection

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of decision approving lands for conveyance.

SUMMARY: As required by 43 CFR 2650.7(d), notice is hereby given that an appealable decision will be issued by the Bureau of Land Management (BLM) to Huna Totem Corporation. The decision approves the surface estate in the lands described below for conveyance pursuant to the Alaska Native Claims Settlement Act (43 U.S.C. 1601, *et seq.*). The subsurface estate in these lands will be conveyed to Sealaska Corporation when the surface estate is conveyed to Huna Totem Corporation. The lands are in the vicinity of Hoonah, Alaska, and are located in:

Copper River Meridian, Alaska

T. 43 S., R. 62 E.,
Sec. 33.
Containing 8.51 acres.

Notice of the decision will also be published four times for four consecutive weeks in the *Juneau Empire.*

DATES: Any party claiming a property interest in the lands affected by the decision may appeal the decision in accordance with the requirements of 43 CFR part 4 within the following time limits:

1. Parties receiving service of the decision by certified mail shall have 30 days from the date of receipt to file an appeal.

2. Unknown parties, parties unable to be located after reasonable efforts have been expended to locate, parties who fail or refuse to sign their return receipt, and parties who receive a copy of the decision by regular mail which is not certified, return receipt requested, shall have until March 18, 2013 to file an appeal.

Parties who do not file an appeal in accordance with the requirements of 43 CFR part 4, subpart E, shall be deemed to have waived their rights. Notices of appeal transmitted by electronic means, such as facsimile or email, will not be accepted as timely filed.

Notice of Meetings, Dominguez-Escalante National Conservation Area Advisory Council

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of public meetings.

SUMMARY: In accordance with the Federal Land Policy and Management Act of 1976 and the Federal Advisory Committee Act of 1972, the U.S. Department of the Interior, Bureau of Land Management (BLM), Dominguez-Escalante National Conservation Area Advisory Council (Council) will meet as indicated below.

DATES: Meetings will be held on April 3, 2013, May 1, 2013, and May 29, 2013. All meetings will begin at 3 p.m. and will normally adjourn at 6 p.m. Any changes in the duration of the meetings will be posted on the Dominguez-Escalante Resource Management Plan Web site at *http://www.blm.gov/co/st/en/nca/denca/denca_rmp.html*. Field trips may be scheduled as well. Notice of field trips will also be posted online.

ADDRESSES: The meeting on April 3 will be held at the Mesa County Courthouse Annex, Multi-Purpose Room, 544 Rood

Avenue, Grand Junction, CO. The meeting on May 1 will be held at the Delta County Courthouse, Room 234, 501 Palmer Street, Delta, CO. The meeting on May 29 will be held at the Mesa County Courthouse Annex, Training Room A, 544 Rood Avenue, Grand Junction, CO.

FOR FURTHER INFORMATION CONTACT: Katie Stevens, Advisory Council Designated Federal Official, 2815 H Road, Grand Junction, CO 81506; phone: (970) 244–3049; email: *kasteven@blm.gov*.

SUPPLEMENTARY INFORMATION: The 10-member Council advises the Secretary of the Interior, through the BLM, on a variety of planning and management issues associated with the resource management planning process for the Dominguez-Escalante National Conservation Area and Dominguez Canyon Wilderness. Topics of discussion during the meeting may include informational presentations from various resource specialists working on the resource management plan, as well as Council reports related to the following topics: Recreation, fire management, land-use planning process, invasive species management, travel management, wilderness, cultural resource management, and other resource management topics of interest to the Council that were raised during the planning process. These meetings are anticipated to occur monthly. Dates, times and agendas for additional meetings may be determined at future Advisory Council Meetings and will be published in the **Federal Register** and announced through local media and on the BLM's Web site for the Dominguez-Escalante planning effort, *www.blm.gov/co/st/en/nca/denca/denca_rmp.html*. These meetings are open to the public. The public may present written comments to the Council. Each formal Council meeting will have time allocated at the beginning and end of the meeting for hearing public comments. Depending on the number of people wishing to comment and time available, the time for individual oral comments may be limited at the discretion of the chair.

Helen M. Hankins,

BLM Colorado State Director.

BILLING CODE 4310–JB–P

INTERNATIONAL TRADE COMMISSION

[Docket No. 2938]

Certain Integrated Circuit Devices and Products Containing the Same; Notice of Receipt of Complaint; Solicitation of Comments Relating to the Public Interest

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has received a complaint entitled *Certain Integrated Circuit Devices and Products Containing the Same,* DN 2938; the Commission is soliciting comments on any public interest issues raised by the complaint or complainant's filing under section 210.8(b) of the Commission's Rules of Practice and Procedure (19 CFR 210.8(b)).

FOR FURTHER INFORMATION CONTACT: Lisa R. Barton, Acting Secretary to the Commission, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 205–2000. The public version of the complaint can be accessed on the Commission's electronic docket (EDIS) at *http://edis.usitc.gov,* and will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 205–2000.

General information concerning the Commission may also be obtained by accessing its Internet server (*http://www.usitc.gov*). The public record for this investigation may be viewed on the Commission's electronic docket (EDIS) at *http://edis.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: The Commission has received a complaint and a submission pursuant to section 210.8(b) of the Commission's Rules of Practice and Procedure filed on behalf of Tela Innovations, Inc. on February 8, 2013. The complaint alleges violations of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain integrated circuit devices and products containing the same. The complaint names as respondents HTC Corporation of Taiwan; HTC America, Inc. of Bellevue, WA; LG Electronics, Inc. of Korea; LG Electronics U.S.A., Inc. of Englewood Cliffs, NJ; LG Electronics MobileComm U.S.A., Inc. of San Diego, CA; Motorola Mobility LLC of Libertyville, IL; Nokia Corporation (Nokia Oyj) of Finland; Nokia, Inc. of Sunnyvale, CA; Pantech Co., Ltd. of Korea and Pantech Wireless Inc. of Atlanta, GA.

Proposed respondents, other interested parties, and members of the public are invited to file comments, not to exceed five (5) pages in length, inclusive of attachments, on any public interest issues raised by the complaint or section 210.8(b) filing. Comments should address whether issuance of the relief specifically requested by the complainant in this investigation would affect the public health and welfare in the United States, competitive conditions in the United States economy, the production of like or directly competitive articles in the United States, or United States consumers.

In particular, the Commission is interested in comments that:

(i) Explain how the articles potentially subject to the requested remedial orders are used in the United States;

(ii) Identify any public health, safety, or welfare concerns in the United States relating to the requested remedial orders;

(iii) Identify like or directly competitive articles that complainant, its licensees, or third parties make in the United States which could replace the subject articles if they were to be excluded;

(iv) Indicate whether complainant, complainant's licensees, and/or third party suppliers have the capacity to replace the volume of articles potentially subject to the requested exclusion order and/or a cease and desist order within a commercially reasonable time; and

(v) Explain how the requested remedial orders would impact United States consumers.

Written submissions must be filed no later than by close of business, eight calendar days after the date of publication of this notice in the **Federal Register**. There will be further opportunities for comment on the public interest after the issuance of any final initial determination in this investigation.

Persons filing written submissions must file the original document electronically on or before the deadlines stated above and submit 8 true paper copies to the Office of the Secretary by

noon the next day pursuant to section 210.4(f) of the Commission's Rules of Practice and Procedure (19 CFR 210.4(f)). Submissions should refer to the docket number (''Docket No. 2938'') in a prominent place on the cover page and/or the first page. (*See* Handbook for Electronic Filing Procedures, *http://www.usitc.gov/secretary/fed_reg_notices/rules/handbook_on_electronic_filing.pdf*). Persons with questions regarding filing should contact the Secretary (202–205–2000).

Any person desiring to submit a document to the Commission in confidence must request confidential treatment. All such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. *See* 19 CFR 201.6. Documents for which confidential treatment by the Commission is properly sought will be treated accordingly. All nonconfidential written submissions will be available for public inspection at the Office of the Secretary and on EDIS.

This action is taken under the authority of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and of sections 201.10 and 210.8(c) of the Commission's Rules of Practice and Procedure (19 CFR 201.10, 210.8(c)).

By order of the Commission.

Issued: February 8, 2013.

Lisa R. Barton,

Acting Secretary to the Commission.

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701–TA–488 and 731–TA–1199–1200 (Final)]

Large Residential Washers From Korea and Mexico

Determinations

On the basis of the record [1] developed in the subject investigations, the United States International Trade Commission (Commission) determines, pursuant to sections 705(b) and 735(b) of the Tariff Act of 1930 (19 U.S.C. 1671d(b) and 1673d(b)) (the Act), that an industry in the United States is materially injured by reason of imports from Korea of large residential washers that the U.S. Department of Commerce (Commerce) has determined are subsidized by the Government of Korea and sold in the United States at less than fair value (LTFV). The Commission further determines that an industry in the United States is materially injured by reason of imports from Mexico of large residential washers that the Commerce has determined are sold in the United States at LTFV. The products subject to these investigations are provided for in subheading 8450.20.00 of the Harmonized Tariff Schedule of the United States, and imported under statistical reporting number 8450.20.0090. Products subject to these investigations may also be imported under HTS subheadings 8450.11.00, 8450.90.20 or 8450.90.60.

[1] The record is defined in sec. 207.2(f) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(f)).

Background

The Commission instituted these investigations effective December 30, 2011, following receipt of a petition filed with the Commission and Commerce by Whirlpool Corporation, Benton Harbor, MI. The final phase of the investigations was scheduled by the Commission following notification of a preliminary determination by Commerce that imports of large residential washers from Korea were subsidized within the meaning of section 703(b) of the Act (19 U.S.C. 1671b(b)) and that imports of large residential washers from Korea and Mexico were sold at LTFV within the meaning of 733(b) of the Act (19 U.S.C. 1673b(b)). Notice of the scheduling of the final phase of the Commission's investigations and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** on August 24, 2012 (77 FR 51569). The hearing was held in Washington, DC, on December 11, 2012, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its determinations in these investigations to the Secretary of Commerce on February 8, 2013. The views of the Commission are contained in USITC Publication 4378 (February 2013), entitled *Certain Large Residential Washers From Korea and Mexico: Investigation Nos. 701–TA–488 and 731–TA–1199–1200 (Final).*

By order of the Commission.

Issued: February 8, 2013.

Lisa R. Barton,

Acting Secretary to the Commission.

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

Task Force on Research on Violence Against American Indian and Alaska Native Women; Meeting

AGENCY: Office on Violence Against Women, United States Department of Justice.

ACTION: Notice of Meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of the forthcoming public meeting of the Task Force on Research on Violence Against American Indian and Alaska Native Women(hereinafter ''the Task Force'').

DATES: The meeting will take place on March 7, 2013 from 8:30 a.m. to 5:00 p.m. and March 8 from 8:30 a.m. to 12:30 p.m.

ADDRESSES: The meeting will take place at the Office of Justice Programs, U.S. Department of Justice, 810 7th Street NW., 3rd Floor Ballroom, Washington, DC 20531. The public is asked to pre-register by March 1, 2013 for the meeting due to security considerations and so that there is adequate space (see below for information on pre-registration).

FOR FURTHER INFORMATION CONTACT: Lorraine Edmo, Deputy Tribal Director, Office on Violence Against Women, United States Department of Justice, 145 N Street NE., Suite 10W.121, Washington, DC 20530; by telephone at: (202) 514–8804; email: *Lorraine.edmo@usdoj.gov;* or fax: (202) 307–3911. You may also view information about the Task Force on the Office on Violence Against Women Web site at: *http://www.ovw.usdoj.gov/section904-taskforce.html.*

SUPPLEMENTARY INFORMATION: Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act. Title IX of the Violence Against Women Act of 2005 (VAWA 2005) requires the Attorney General to establish a Task Force to assist the National Institute of Justice (NIJ) to develop and implement a program of research on violence against American Indian and Alaska Native women, including domestic violence, dating violence, sexual assault, stalking, and murder. The program will evaluate the effectiveness of the Federal, state, and tribal response to violence against Indian women, and will propose recommendations to improve the government response. The Attorney General, acting through the Director of the Office on Violence Against Women, established the Task Force on March 31, 2008.

A meeting previously scheduled for October 30 and 31, 2012, and previously

announced in the **Federal Register**, was cancelled due to extreme weather conditions. The March 7–8 meeting will include an update on NIJ's program of research, an overview of NIJ's Federal Response Study, an overview of the Center for Disease Control's 2010 General Population National Intimate Partner and Sexual Violence Surveillance Study (NISVS) and NIJ's American Indian and Alaska Native NISVS Oversample Study, an overview of NIJ's proposed sampling plan for a baseline study, and a presentation on refinement and field implementation of the Tribal Study of Public Safety and Public Health Issues Facing American Indian and Alaska Native Women as well as facilitated Task Force member discussion. In addition, the Task Force is also welcoming public oral comment at this meeting and has reserved an estimated 15 minutes on March 7 and on March 8 from 11:45 p.m. to 12:00 p.m. for this purpose. Members of the public wishing to address the Task Force must contact Lorraine Edmo, Deputy Tribal Director, Office on Violence Against Women, United States Department of Justice, 145 N Street NE., Suite 10W.121, Washington, DC 20530; by telephone at: (202) 514–8804; email: *Lorraine.edmo@usdoj.gov;* or fax: (202) 307–3911. The meeting will take place on March 7, 2013 from 8:30 a.m. to 5:00 p.m. and will include a lunch break and on March 8 from 8:30 a.m. to 12:30 p.m. Time will be reserved for public comment from 11:45 a.m. to 12:00 p.m. on March 7 and 8. See the section below for information on reserving time for public comment.

Access: This meeting will be open to the pubic but registration on a space available basis and for security reasons is required. All members of the public who wish to attend must register in advance of the meeting by March 1, 2013 by contacting Lorraine Edmo, Deputy Tribal Director, Office on Violence Against Women, United States Department of Justice, by email: *Lorraine.edmo@usdoj.gov;* or fax: (202) 307–3911. All attendees will be required to sign in and be processed through Security at the Lobby Visitors Desk. Please bring photo identification and allow extra time prior to the start of the meeting.

All members of the press who wish to attend and/or record any part of the meeting must register in advance of the meeting by March 1, 2013 by contacting Lorraine Edmo as noted above. In addition to being processed through Security at the Lobby Visitors Desk, all members of the press are required to sign in at meeting registration and must present government-issued photo I.D. (such as a driver's license) as well as valid media credentials. Please allow extra time prior to the start of the meeting for registering.

The meeting site is accessible to individuals with disabilities. Individuals who require special accommodation in order to attend the meeting should notify Lorraine Edmo no later than March 1, 2013.

Written Comments: Interested parties are invited to submit written comments by March 1, 2013 to Lorraine Edmo, Deputy Tribal Director, Office on Violence Against Women, United States Department of Justice, 145 N Street NE., Suite 10W.121, Washington, DC 20530 by mail; or by email: *Lorraine.edmo@usdoj.gov;* or by fax: (202) 307–3911.

Public Comment

Persons interested in participating during the public comment period of the meeting are requested to reserve time on the agenda by contacting Lorraine Edmo, Deputy Tribal Director, Office on Violence Against Women, United States Department of Justice, by email: *Lorraine.edmo@usdoj.gov;* or fax: (202) 307–3911 by March 1, 2013. Requests must include the participant's name, organization represented, if appropriate, and a brief description of the subject of the comments. Each participant will be permitted approximately 3 to 5 minutes to present comments, depending on the number of individuals reserving time on the agenda. Participants are also encouraged to submit written copies of their comments at the meeting. Comments that are submitted to Lorraine Edmo, Deputy Tribal Director, Office on Violence Against Women, United States Department of Justice, 145 N Street NE., Suite 10W.121, Washington, DC 20530 by mail; by email: *Lorraine.edmo@usdoj.gov;* or fax: (202) 307–3911 before March 1, 2013 will be circulated to Task Force members prior to the meeting.

Given the expected number of individuals interested in presenting comments at the meeting, reservations should be made as soon as possible. Persons unable to obtain reservations to speak during the meeting are encouraged to submit written comments, which will be accepted at the meeting location or may be mailed to the attention of Lorraine Edmo, Deputy Tribal Director, Office on Violence Against Women, United States Department of Justice, 145 N Street NE., Suite 10W.121, Washington, DC 20530.

Dated: February 7, 2013.

Bea Hanson,

Acting Director, Office on Violence Against Women.

BILLING CODE 4410–EX–P

DEPARTMENT OF LABOR

Office of the Secretary

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Mine Rescue Teams, Arrangements for Emergency Medical Assistance, and Arrangements for Transportation for Injured Persons

ACTION: Notice.

SUMMARY: The Department of Labor (DOL) is submitting the Mine Safety and Health Administration (MSHA) sponsored information collection request (ICR) titled, ''Mine Rescue Teams, Arrangements for Emergency Medical Assistance, and Arrangements for Transportation for Injured Persons,'' to the Office of Management and Budget (OMB) for review and approval for continued use in accordance with the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501 et seq.).

DATES: Submit comments on or before March 18, 2013.

ADDRESSES: A copy of this ICR with applicable supporting documentation; including a description of the likely respondents, proposed frequency of response, and estimated total burden may be obtained from the RegInfo.gov Web site, *http://www.reginfo.gov/public/do/PRAMain*, on the day following publication of this notice or by contacting Michel Smyth by telephone at 202–693–4129 (this is not a toll-free number) or sending an email to *DOL_PRA_PUBLIC@dol.gov.*

Submit comments about this request to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for DOL–MSHA, Office of Management and Budget, Room 10235, 725 17th Street NW., Washington, DC 20503, Fax: 202–395–6881 (this is not a toll-free number), email: *OIRA_submission@omb.eop.gov.*

FOR FURTHER INFORMATION CONTACT: Michel Smyth by telephone at 202–693–4129 (this is not a toll-free number) or by email at *DOL_PRA_PUBLIC@dol.gov.*

Authority: 44 U.S.C. 3507(a)(1)(D).

SUPPLEMENTARY INFORMATION: This ICR is to re-authorize existing information collection requirements supporting regulations 30 CFR part 49 regarding the

availability of mine rescue teams, alternate mine rescue capability for small and remote mines and mines with special mining conditions, inspection and maintenance records of mine rescue equipment and apparatus, physical requirements for team members and alternates, and experience and training requirements for team members and alternates. Mine operators, miners, and the MSHA use this information to formulate an appropriate rescue capability within the guidelines set forth in these standards.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. *See* 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1219–0078. The current approval is scheduled to expire on February 28, 2013; however, it should be noted that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. For additional information, see the related notice published in the **Federal Register** on October 19, 2012 (77 FR 64360).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within 30 days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB Control Number 1219–0078. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Agency: DOL–MSHA.

Title of Collection: Mine Rescue Teams, Arrangements for Emergency Medical Assistance, and Arrangements for Transportation for Injured Persons.

OMB Control Number: 1219–0078.

Affected Public: Private Sector—businesses or other for-profits.

Total Estimated Number of Respondents: 254.

Total Estimated Number of Responses: 20,043.

Total Estimated Annual Burden Hours: 10,111.

Total Estimated Annual Other Costs Burden: $309,067.

Dated: February 8, 2013.

Michel Smyth,

Departmental Clearance Officer.

[FR Doc. 2013–03404 Filed 2–13–13; 8:45 am]

BILLING CODE 4510–43–P

DEPARTMENT OF LABOR

Employee Benefits Security Administration

Proposed Amendment to the Information Collection Requirements of Prohibited Transaction Exemption 77–4 for Certain Transactions Between Investment Companies and Employee Benefit Plans

AGENCY: Employee Benefits Security Administration, Department of Labor.

ACTION: Notice.

SUMMARY: The Department of Labor (the Department), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. The Employee Benefits Security Administration (EBSA) is soliciting comments on the proposed amendment to the information collection request (ICR) contained in Prohibited Transaction Exemption 77–4 that is described below. A copy of the ICR may be obtained by contacting the office listed in the **ADDRESSES** section of this notice. ICRs also are available at reginfo.gov (*http://www.reginfo.gov/public/do/PRAMain*).

DATES: Written comments must be submitted to the office shown in the **ADDRESSES** section on or before April 15, 2013.

ADDRESSES: G. Christopher Cosby, Department of Labor, Employee Benefits Security Administration, 200 Constitution Avenue NW., Room N–5711, Washington, DC 20210, (202) 693–8410, FAX (202) 693–4745 (these are not toll-free numbers).

SUPPLEMENTARY INFORMATION:

I. Background

Prohibited Transaction Exemption (PTE) 77–4 provides relief from the restrictions of section 406 of the Employee Retirement Income Security Act of 1974, as amended (ERISA) and from the sanctions resulting from the application of section 4975 of the Internal Revenue Code of 1986, as amended (the Code), for an employee benefit plan's purchase or sale of shares of an open-end investment company registered under the Investment Company Act of 1940 (mutual fund) when an investment advisor for the mutual fund or its affiliate is: (1) A plan fiduciary; and (2) not an employer of employees covered by the plan.

Section II(d) of PTE 77–4 contains certain conditions for the exemptive relief and provides, in pertinent part, that:

> A second fiduciary with respect to the plan, who is independent of and unrelated to the fiduciary/investment adviser or any affiliate thereof, receives a current prospectus issued by the investment company, and full and detailed written disclosure of the investment advisory and other fees charged to or paid by the plan and the investment company, including the nature and extent of any differential between the rates of such fees, the reasons why the fiduciary/investment adviser may consider such purchases to be appropriate for the plan, and whether there are any limitations on the fiduciary/investment adviser with respect to which plan assets may be invested in shares of the investment company and, if so, the nature of such limitations.

The conditions impose ICRs that are subject to the PRA. This notice requests public comment on the Department's proposed revision to the ICRs that would provide that delivery of a ''summary prospectus'' may be used to satisfy the condition in section II(d) of PTE 77–4 requiring the delivery of a mutual fund's prospectus to the second fiduciary if the summary prospectus meets the requirements of the Securities and Exchange Commission's (SEC)

revised disclosure provisions for mutual funds including a summary prospectus rule that were published in 2009.[1] Pursuant to the SEC's revised disclosure provisions, mutual funds also are required to send the full prospectus to the investor upon an investor's request [2] and to provide the full prospectus on-line at a specified Internet site.[3]

An agency may not conduct or sponsor, and a person is not required to respond to, an information collection unless it displays a valid OMB control number. A summary of the current burden estimates for the revised ICR follows:

Agency: Employee Benefits Security Administration, Department of Labor.

Title: Class Exemption 77–4 for Certain Transactions Between Investment Companies and Employee Benefit Plans.

Type of Review: Amendment to a currently approved collection of information.

OMB Number: 1210–0049.

Affected Public: Business or other for-profit; Not-for-profit institutions.

Respondents: 700.

Responses: 363,000.

Estimated Total Burden Hours: 33,600.

Estimated Total Burden Cost (Operating and Maintenance): $213,000.

II. Focus of Comments

The Department is particularly interested in comments that:

- Evaluate whether the collections of information are necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the collections of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., by permitting electronic submissions of responses.

Comments submitted in response to this notice will be summarized and/or included in the ICRs for OMB approval of the extension of the information collection; they will also become a matter of public record.

[1] See 74 FR 4546 (January 26, 2009). The final rule adopted, among other things, parallel amendments to SEC Form N–1A (the registration form for mutual funds) and to Rule 498 (which includes the content requirements for a summary prospectus).

[2] 17 CFR 230.498(f).

[3] 17 CFR 230.498.

Dated: February 8, 2013.

Joseph S. Piacentini,

Director, Office of Policy and Research, Employee Benefits Security Administration.

BILLING CODE 4510–29–P

DEPARTMENT OF LABOR

Employee Benefits Security Administration

[Application Number D–11657]

ZRIN EBSA–2012–0015

Proposed Amendment to Prohibited Transaction Exemption 2006–06 (PTE 2006–06) for Services Provided in Connection with the Termination of Abandoned Individual Account Plans

AGENCY: Employee Benefits Security Administration, U.S. Department of Labor.

ACTION: Notice of Extension of Comment Period for Proposed Amendment to PTE 2006–06.

SUMMARY: The Department of Labor (the Department) is extending the comment period for a proposed amendment to PTE 2006–06, a prohibited transaction class exemption issued under the Employee Retirement Income Security Act of 1974 (ERISA). PTE 2006–06 provides an exemption for certain transactions entered into on behalf of individual account pension plans that have been abandoned by their sponsors.

DATES: Written comments and requests for a public hearing must be received by the Department on or before March 18, 2013.

ADDRESSES: All written comments and requests for a public hearing concerning the proposed amendment should be sent to the Office of Exemption Determinations, Employee Benefits Security Administration, Room N–5700, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210, Attention: PTE 2006–06 Amendment. Comments may be submitted electronically by using the Federal eRulemaking portal at *www.regulations.gov* (follow instructions for submission of comments). Interested persons are also invited to submit comments and hearing requests to EBSA via email to: *moffitt.betty@dol.gov* or by fax to 202–219–0204 by the end of the scheduled comment period. The comments received will be available for public inspection in the Public Disclosure Room of the Employee Benefits Security Administration, U.S. Department of Labor, Room N–1513, 200 Constitution Avenue NW., Washington, DC 20210. Comments and hearing requests will also be available online at *www.regulations.gov* and *www.dol.gov/ebsa,* at no charge.

All comments will be made available to the public. Warning: Do not include any personally identifiable information (such as name, address, or other contact information), or confidential business information, that you do not want publicly disclosed. All comments may be posted on the Internet and can be retrieved by most Internet search engines.

FOR FURTHER INFORMATION CONTACT: Chris Motta, Office of Exemption Determinations, Employee Benefits Security Administration, U.S. Department of Labor, (202) 693–8540 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION: On December 12, 2012, the Department published a notice of the pendency before the Department of a proposed amendment to PTE 2006–06. The amendment to PTE 2006–06 was proposed in connection with the Department's proposed amendment of regulations relating to the Termination of Abandoned Individual Account Plans, the Safe Harbor for Distributions from Terminated Individual Account Plans, and the Special Terminal Report for Abandoned Plans. PTE 2006–06 provides an exemption from the restrictions of ERISA section 406(a)(1)(A) through (D), ERISA section 406(b)(1) and (b)(2) and from the taxes imposed by section 4975(a) and (b) of the Internal Revenue Code of 1986 (the Code), by reason of Code section 4975(c)(1)(A) through (E).

The proposed amendment to PTE 2006–06 would expand the definition of a qualified termination administrator (a QTA) to include bankruptcy trustees and certain persons designated by such trustees to act as QTAs. The Department is proposing the amendment because it has determined that, in certain instances, it may be appropriate for a bankruptcy trustee to provide termination services to a plan.

The comment period was scheduled to close on February 11, 2013. Notice of the right to comment was provided in the **Federal Register** on December 12, 2012. However, due to administrative error, a copy of the proposed amendment to PTE 2006–06 was not posted to *www.regulations.gov* until January 22, 2013. Accordingly, the Department is extending the comment

period for the proposed amendment to PTE 2006–06 to March 18, 2013.

Signed at Washington, DC, this 8th day of February, 2013.

Lyssa E. Hall,

Director, Office of Exemption Determinations, Employee Benefits Security Administration, U.S. Department of Labor.

BILLING CODE 4510–29–P

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (13–010)]

NASA Advisory Council; Aeronautics Committee; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of Meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Public Law 92–463, as amended, the National Aeronautics and Space Administration announces a meeting of the Aeronautics Committee of the NASA Advisory Council. The meeting will be held for the purpose of soliciting, from the aeronautics community and other persons, research and technical information relevant to program planning.

DATES: Thursday, February 28, 2013, 9:00 a.m. to 4:00 p.m.; Friday, March 1, 2013, 8:30 a.m.to 12:15 p.m.; Local Times.

ADDRESSES: National Aeronautics and Space Administration Headquarters, Room 6E40, 300 E Street SW., Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: Ms. Susan L. Minor, Executive Secretary for the Aeronautics Committee, National Aeronautics and Space Administration Headquarters, Washington, DC 20546, (202) 358–0566, or *susan.l.minor@nasa.gov*.

SUPPLEMENTARY INFORMATION: The meeting will be open to the public up to the capacity of the room. Any person interested in participating in the meeting by Webex and telephone should contact Ms. Susan L. Minor at (202) 358–0566 for the web link, toll-free number and passcode. The agenda for the meeting includes the following topics:

- Aeronautics Research Mission Directorate (ARMD) Budget Status
- ARMD External Guidance Planning
- ARMD Future Direction
- National Research Council Autonomy Study Planning
- Integrated Systems Research Program Future Direction
- Unmanned Aircraft Systems Subcommittee Outbrief
- ARMD Strategic Implementation Plan

It is imperative that these meetings be held on this date to accommodate the scheduling priorities of the key participants. Attendees will be requested to comply with NASA security requirements, including the presentation of a valid picture ID, before receiving an access badge. U.S. citizens will need to show a valid, officially-issued picture identification such as driver's license to enter the NASA Headquarters building (West Lobby—Visitor Control Center) and must state that they are attending the NASA Advisory Council Aeronautics Committee meeting in conference room 6E40 before receiving an access badge. All non-U.S. citizens must fax a copy of their passport, and print or type their name, current address, citizenship, company affiliation (if applicable) to include address, telephone number, and their title, place of birth, date of birth, U.S. visa information to include type, number, and expiration date, U.S. Social Security Number (if applicable), Permanent Resident green card number and expiration date (if applicable), and place and date of entry into the U.S., to Susan Minor, NASA Advisory Council Aeronautics Committee Executive Secretary, FAX 202–358–4060, by no less than 8 working days prior to the meeting. Non-U.S. citizens will need to show their Passport or Permanent Resident green card to enter the NASA Headquarters building. For questions, please call Susan Minor at (202) 358–0566.

Susan M. Burch,

Acting Advisory Committee Management Officer, National Aeronautics and Space Administration.

11:15–11:45 a.m. (Plenary closed)

MATTERS TO BE DISCUSSED:

Wednesday, February 20, 2013

Committee on Programs and Plans and Committee on Strategy and Budget, Joint Meeting

Open Session: 8:05–8:20 a.m.

- Committee Chairs' Remarks
- Discussion Item: NSF Annual Facilities Plan

Committee on Programs and Plans and Committee on Strategy and Budget, Joint Meeting

Closed Session: 8:20–9:20 a.m.

- Discussion Item: NSF Annual Facilities Plan

Committee on Programs and Plans (CPP)

Open Session: 9:30–12:30 p.m.

- Approval of Open CPP Minutes for December 2012 (NSB/CPP–12–48)
- Committee Chairman's Remarks
- Discussion Item: Review of CPP Charge
- Information Item: Arctic Support Contract—Annual Update (NSB/CPP–13–1)
- Information Item: SAGE/GAGE GEO Proposals
- Information Item: Renewal of Award for Management of the National Center for Atmospheric Research (NCAR)
- Information Item: ALMA Operations Update on Recompetition
- Information Item: Update on the Science of Learning Centers Program
- CPP Program Portfolio Planning—Water; Next Steps and Schedule for Future Program Portfolio Discussions

Committee on Programs and Plans (CPP)

Closed Session: 2:15–4:00 p.m.

- Committee Chairman's Remarks
- Approval of Closed CPP Minutes for December 2012 (NSB/CPP–12–47)
- Continued Discussion on Blue Ribbon Panel Recommendations
- Action Item: National Ecological Observatory Network (NEON) Operations and Maintenance (NSB/CPP–13–3)
- Action Item: Authorization to fund *Sustained-Petascale in Action: Blue Waters Enabling Transformative Science and Engineering* (NSB/CPP–13–4)

Committee on Strategy and Budget (CSB)

Open Session: 9:30–10:30 a.m.

- Committee Chairman's Remarks
- Approval of CSB Open Minutes for December 2012 Meeting (NSB/CSB–12–16)
- NSF FY 2013 Budget Update
- NSF Strategic Plan Update
- Study on Trends in Science Budgets
- Other Committee Business

Committee on Strategy and Budget (CSB)

Closed Session: 10:30–11:00 a.m.

- Committee Chairman's Remarks
- Approval of CSB Closed Minutes for December 2012 Meeting (NSB/CSB–12–17)
- NSF FY 2014 and Future Budget Development

Committee on Education and Human Resources (CEH)

Open Session: 1:30–3:00 p.m.

- Approval of May 4, 2012 Open Meeting Minutes (NSB/CEH–12–6) and February 11, 2013 Open Teleconference Meeting Minutes (NSB/CEH–13–3)
- Introductory Remarks by the Chairman and Vice Chairman
- Graduate Education to Prepare the Future STEM Workforce
- Innovations in Undergraduate STEM Education—Discipline-Based Education Research Report by the National Academy of Sciences; Building Community Support to Implement ''Vision and Change''
- Identification of Other Potential Topics of Committee Interest—Implications and Status of Massively Open Online Courses (MOOCs) for STEM Education and an Update on NSF MOOC-related Activities; Next Steps for Finalizing and Implementing Committee Priorities

Committee on Science & Engineering Indicators (SEI)

Open Session: 3:00–4:00 p.m.

- Chairman's Remarks
- Approval of December Meeting Minutes (NSB/SEI–12–16)
- Update on *Science and Engineering Indicators 2014* Production
- Update on the development of *Science and Engineering Indicators 2014* Mobile Application
- Taking Advantage of Digital Delivery for *Indicators:* Project Update
- Discussion of Potential Topics for Companion(s) to *Indicators 2014*
- Update on Potential NSB Panel Discussion on Research Universities
- Update on the Revised ''STEM Education Data and Trends'' Online Tool
- Chairman's Summary

Committee on Audit and Oversight (A&O)

Open Session: 4:00–4:45 p.m.

- Approval of Minutes of the December 2012 Meeting (NSB/A&O–12–14)
- Committee Chairman's Opening Remarks
- Inspector General's Update
- Chief Financial Officer's Update
- Periodic Review of Committee Charge
- Committee Chairman's Closing Remarks

Committee on Audit and Oversight (A&O)

NUCLEAR REGULATORY COMMISSION

[NRC–2013–0029]

Service Contracts Inventory

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of availability.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is providing for public information its Inventory of Contracts for Services for Fiscal Year (FY) 2012. The inventory includes service contract actions over $25,000 that were awarded in FY 2012.

ADDRESSES: Please refer to Docket ID NRC–2013–0029 when contacting the NRC about the availability of information regarding this document. You may access information related to this document, which the NRC possesses and are publicly available, using any of the following methods:

- *Federal Rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2013–0029. Address questions about NRC dockets to Carol Gallagher; telephone: 301–492–3668; email: *Carol.Gallagher@nrc.gov.*
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may access publicly available documents online in the NRC Library at *http://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''ADAMS Public Documents'' and then select ''*Begin Web-based ADAMS Search.''* For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov.* The ADAMS accession number for each document referenced in this document (if that document is available in ADAMS) is provided the first time that a document is referenced. The Inventory of Contracts for Services for FY 2012 can be accessed under ADAMS accession number ML12362A385. The inventory was published on the NRC Web site at the following location: *http://www.nrc.gov/about-nrc/contracting.html.*
- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Lori Konovitz, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–492–3627 or email: *lori.konovitz@nrc.gov.*

SUPPLEMENTARY INFORMATION: In accordance with Section 743 of Division C of the FY 2010 Consolidated Appropriations Act, Public Law 111–117, the NRC is publishing this notice to advise the public of the availability of its FY 2012 Service Contracts Inventory. The inventory provides information on service contract actions over $25,000 that were awarded in FY 2012. The information is organized by function to show how contracted resources are distributed throughout the agency. The inventory contains the following data:

1. A description of the services purchased;
2. The total dollar amount obligated for the services under the contract, and the funding source for the contract;
3. The contract type and date of the award;
4. The name of the contractor and place of performance;
5. Whether the contract is a personal services contract; and
6. Whether the contract was awarded on a non-competitive basis.

The NRC will analyze the data in the inventory for the purpose of determining if its contract labor is being used in an effective and appropriate manner and if the mix of federal employees and contractors in the agency is effectively balanced. The NRC developed the inventory by pulling data from the Federal Procurement Data System—Next Generation. The inventory does not include contractor proprietary or sensitive information.

Dated at Rockville, Maryland, this 7th day of February 2013.

For the Nuclear Regulatory Commission.

James C. Corbett,

Director, Division of Contracts, Office of Administration.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–68876; File No. SR–NYSE–2013–09]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Amending Exchange Rule 80C To Establish Rules To Comply With the Requirements of the Plan To Address Extraordinary Market Volatility Submitted to the Commission Pursuant to Rule 608 of Regulation NMS

February 8, 2013.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (the ''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that January 25, 2013, New York Stock Exchange LLC (''NYSE'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Exchange Rule 80C to establish rules to comply with the requirements of the Plan to Address Extraordinary Market Volatility submitted to the Commission pursuant to Rule 608 of Regulation NMS. The text of the proposed rule change is available on the Exchange's Web site at *www.nyse.com,* at the principal office of the Exchange, on the Commission's Web site at *http://www.sec.gov,* and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Exchange Rule 80C to establish rules to comply with the requirements of the Plan to Address Extraordinary Market Volatility submitted to the Commission pursuant to Rule 608 of Regulation NMS under the Act (the ''Plan''). The Exchange proposes to adopt the changes for a pilot period that coincides with the pilot period for the Plan, which is currently scheduled as a one-year pilot to begin on April 8, 2013.

Background

Since May 6, 2010, when the markets experienced excessive volatility in an abbreviated time period, *i.e.,* the ''flash crash,'' the equities exchanges and FINRA have implemented market-wide measures designed to restore investor confidence by reducing the potential for excessive market volatility. Among the measures adopted include pilot plans for stock-by-stock trading pauses [4] and related changes to the equities market clearly erroneous execution rules [5] and more stringent equities market maker quoting requirements.[6] On May 31, 2012, the Commission approved the Plan, as amended, on a one-year pilot basis.[7] In addition, the Commission approved changes to the equities market-wide circuit breaker rules on a pilot basis to coincide with the pilot period for the Plan.[8]

The Plan is designed to prevent trades in individual NMS Stocks from occurring outside of specified Price Bands.[9] As described more fully below, the requirements of the Plan are coupled with Trading Pauses to accommodate more fundamental price moves (as opposed to erroneous trades or momentary gaps in liquidity). All trading centers in NMS Stocks, including both those operated by Participants and those operated by members of Participants, are required to establish, maintain, and enforce written policies and procedures that are reasonably designed to comply with the requirements specified in the Plan.[10] As set forth in more detail in the Plan, Price Bands consisting of a Lower Price Band and an Upper Price Band for each NMS Stock are calculated by the Processors.[11] When the National Best Bid (Offer) is below (above) the Lower (Upper) Price Band, the Processors shall disseminate such National Best Bid (Offer) with an appropriate flag identifying it as unexecutable. When the National Best Bid (Offer) is equal to the Upper (Lower) Price Band, the Processors shall distribute such National Best Bid (Offer) with an appropriate flag identifying it as a Limit State Quotation.[12] All trading centers in NMS Stocks must maintain written policies and procedures that are reasonably designed to prevent the display of offers below the Lower Price Band and bids above the Upper Price Band for NMS Stocks. Notwithstanding this requirement, the Processor shall display an offer below the Lower Price Band or a bid above the Upper Price Band, but with a flag that it is non-executable. Such bids or offers shall not be included in the National Best Bid or National Best Offer calculations.[13]

Trading in an NMS Stock immediately enters a Limit State if the National Best Offer (Bid) equals but does not cross the Lower (Upper) Price Band.[14] Trading for an NMS stock exits a Limit State if, within 15 seconds of entering the Limit State, all Limit State Quotations were executed or canceled in their entirety. If the market does not exit a Limit State within 15 seconds, then the Primary Listing Exchange would declare a five-minute trading

[13] *See* Section VI(A)(3) of the Plan.

[14] *See* Section VI(B)(1) of the Plan.

pause pursuant to Section VII of the LULD Plan, which would be applicable to all markets trading the security.[15] In addition, the Plan defines a Straddle State as when the National Best Bid (Offer) is below (above) the Lower (Upper) Price Band and the NMS Stock is not in a Limit State. For example, assume the Lower Price Band for an NMS Stock is $9.50 and the Upper Price Band is $10.50, such NMS stock would be in a Straddle State if the National Best Bid were below $9.50, and therefore non-executable, and the National Best Offer were above $9.50 (including a National Best Offer that could be above $10.50). If an NMS Stock is in a Straddle State and trading in that stock deviates from normal trading characteristics, the Primary Listing Exchange may declare a trading pause for that NMS Stock.

Proposed Amendment to Rule 80C

The Exchange is required by the Plan to establish, maintain, and enforce written policies and procedures that are reasonably designed to comply with the limit up-limit down and trading pause requirements specified in the Plan. In response to the new Plan, the Exchange proposes to amend its Rules accordingly. The Exchange proposes to add Rule 80C(a) to define that ''Plan'' means the Plan to Address Extraordinary Market Volatility Submitted to the Securities and Exchange Commission Pursuant to Rule 608 of Regulation NMS under the Securities Exchange Act of 1934, Exhibit A to Securities Exchange Act Release No. 67091 (May 31, 2012), 77 FR 33498 (June 6, 2012), as it may be amended from time to time. The Exchange proposes to add Rule 80C(a)(2) to state that the Exchange is a Participant in, and subject to the applicable requirements of, the Plan, which establishes procedures to address extraordinary volatility in NMS Stocks. In addition, proposed Rule 80C(a) provides that all capitalized terms not otherwise defined in this Rule shall have the meanings set forth in the Plan or Exchange rules, as applicable.

The Exchange proposes to add Rule 80C(a)(3) to provide that member organizations shall comply with the applicable provisions of the Plan. The Exchange believes that this requirement will help ensure the compliance by its members with the provisions of the Plan as required pursuant to Section II(B) of the Plan.[16]

The Exchange proposes to add Rule 80C(a)(4) to provide that Exchange systems shall not display or execute buy (sell) interest above (below) the Upper (Lower) Price Bands, unless such interest is specifically exempted under the Plan. The Exchange believes that this requirement is reasonably designed to help ensure the compliance with the limit up-limit down and trading pause requirements specified in the Plan, by preventing executions outside the Price Bands as required pursuant to Section VI(A)(1) of the Plan.[17]

The Exchange proposes Rules regarding the treatment of certain trading interest on the Exchange in order to prevent executions outside the Price Bands and to comply with the new LULD Plan. In particular, the Exchange proposes to add Rule 80C(a)(5) that provides that Exchange systems shall reprice and/or cancel buy (sell) interest that is priced or could be executed above (below) the Upper (Lower) Price Band. Any interest that is repriced pursuant to this Rule shall retain its time stamp of original order entry. Specifically, the Exchange proposes the following provisions regarding the repricing and/or canceling of certain trading interest:

- *Market Orders.* If a market order cannot be fully executed at or within the Price Bands, Exchange systems shall display the unexecuted portion of the buy (sell) market order at the Upper (Lower) Price Band.[18]
- *Limit-priced Interest.* Both displayable and non-displayable incoming limit-priced interest to buy (sell) that is priced above (below) the Upper (Lower) Price Band shall be repriced to the Upper (Lower) Price Band. Exchange systems shall also reprice resting limit-priced interest to buy (sell) to the Upper (Lower) Price Band if Price Bands move and the price of resting limit-priced interest to buy (sell) moves above (below) the Upper (Lower) Price Band. If the Price Bands move and the original limit price of repriced interest is at or within the Price Bands, Exchange systems shall reprice such interest to its original limit price.[19]
- *IOC Orders.* If an IOC order cannot be fully executed at or within the Price Bands, Exchange systems shall cancel any unexecuted portion of the IOC Order.
- *DMM Interest.* Exchange systems shall cancel DMM Interest to buy (sell) that is entered manually or via DMM-specific order entry methodology if such interest is priced above (below) the Upper (Lower) Price Band. DMM Interest to buy (sell) that is entered via the same order entry methodology as off-Floor interest shall be repriced pursuant to paragraph (a)(5)(B) of this Rule.
- *Market Pegging Interest.* Market Pegging Interest to buy (sell) shall peg to the specified pegging price or the Upper (Lower) Price Band, whichever is lower (higher).
- *Sell Short Orders.* During a Short Sale Price Test, as set forth in Rule 440B(b), short sale orders priced below the Lower Price Band shall be repriced to the higher of the Lower Price Band or the Permitted Price, as defined in Rule 440B(e).[20]
- *Floor Broker Cross Function.* Exchange systems shall not execute orders crossed pursuant to the process provided for in Supplementary Material .10 to Rule 76, if the price of the proposed cross transaction is outside of the Price Bands.
- *NYBX.* An order to buy (sell) entered into the NYBX Facility pursuant to Rule 1600 that is priced above (below) the Upper (Lower) Price Band shall be rejected. Exchange systems shall also cancel resting orders to buy (sell) in the NYBX Facility if Price Bands move and the price of a resting buy (sell) order moves above (below) the Upper (Lower) Price Band.
- *Original Order Instructions.* Any interest repriced pursuant to Exchange Rule 80C(a) shall return to its original order instructions for purposes of the re-opening transaction following a Trading Pause.

The Exchange believes these provisions are reasonably designed to prevent executions outside the Price Bands as required by the limit up-limit down and trading pause requirements specified in the Plan. The Exchange believes that allowing trading interest that would otherwise execute outside the Prices Bands to reprice and keep its original time stamp helps ensure that trading interest retains its priority while preventing executions in violation with the limit up-limit down and trading pause requirements. The Exchange notes that retention of an original timestamp when interest is repriced occurs only under the operation of this Rule in order to prevent executions outside the Price Bands and to comply

---

[15] The primary listing market would declare a trading pause in an NMS Stock; upon notification by the primary listing market, the Processor would disseminate this information to the public. No trades in that NMS Stock could occur during the trading pause, but all bids and offers may be displayed. *See* Section VII(A) of the Plan.

[16] *See* Section II(B) of the Plan.

[17] *See* Section VI(A)(1) of the Plan.

[18] If market participants do not want to have their orders repriced to the Price Band, market Participants may cancel the unexecuted portion of the order or submit such order as an IOC order.

[19] *See id.*

[20] Since there is no Permitted Price for short sale exempt orders, short sale exempt orders are treated the same as other orders under this Rule.

with the new LULD Plan and in no other circumstances.[21] To the extent that repricing of trading interest is not practical due to systems restrictions such as in the case of the DMM Interest that is entered manually or via DMM-specific order entry methodology and trading interest entered into the NYBX Facility, the Exchange proposes to cancel the trading interest in order to prevent executions outside the Price Bands. The Exchange will not reprice a Floor Broker Cross that would execute outside the Price Bands because such orders are intended to be crossed at the entered price or not at all. Instead, the Exchange will return the unexecuted orders to the Floor Broker. The Exchange believes that adding certainty to the treatment and priority of trading interest in these situations will encourage market participants to continue to provide liquidity to the Exchange and thus promote a fair and orderly market.

The Exchange proposes Rule 80C(a)(6) that provides that the Exchange systems shall not route buy (sell) interest to an away market displaying a sell (buy) quote that is above (below) the Upper (Lower) Price Band. The Exchange believes that this provision is reasonably designed to prevent an execution outside the Price Bands in a manner that promotes compliance with the limit up-limit down and trading pause requirements specified in the Plan.

In addition, the Exchange proposes Rule 80C(a)(7) that provides that the Exchange may declare a Trading Pause for a NMS Stock listed on the Exchange when (i) the National Best Bid (Offer) is below (above) the Lower (Upper) Price Band and the NMS Stock is not in a Limit State; and (ii) trading in that NMS Stock deviates from normal trading characteristics. An Exchange Floor Official may declare such Trading Pause during a Straddle State if such Trading Pause would support the Plan's goal to address extraordinary market volatility.[22] The Exchange believes that this provision is reasonably designed to comply with Section VII(A)(2) of the Plan.[23]

Consistent with the Plan's requirements for the Exchange to establish, maintain, and enforce policies and procedures that are reasonably designed to comply with the trading pause requirements specified in the Plan, the Exchange also proposes to amend the Rules regarding Trading Pauses to correspond with the LULD Plan. The Exchange proposes to provide that during Phase 1 of the Plan, a Trading Pause in Tier 1 NMS Stocks subject to the requirements of the Plan, shall be subject to Plan requirements and Exchange Rule 80C(b)(2); a Trading Pause in Tier 1 NMS Stocks not yet subject to the requirements of the Plan shall be subject to the requirements in paragraphs (b)(1)–(5) of this Rule; and a Trading Pause in Tier 2 NMS Stocks shall be subject to the requirements set forth in Exchange Rule 80C(b)(1)(B)–(5). The proposed change will allow the Trading Pause requirements in Exchange Rule 80C(b)(1) to continue to apply to Tier 1 NMS Stocks during the beginning of Phase I until they are subject to the Plan requirements. Once the Plan has been fully implemented and all NMS Stocks are subject to the Plan, a Trading Pause under the Plan shall be subject to Exchange Rule 80C(b)(2). These proposed changes are designed to comply with Section VIII of the Plan to ensure implementation of the Plan's requirements.[24]

Finally, the Exchange proposes to amend Rule 1600 to correspond with the changes to Rule 80C. Specifically, the Exchange proposes to provide that pursuant to Rule 80C(a)(50)(H), an order to buy (sell) entered into the NYBX Facility pursuant to Rule 1600 that is priced above (below) the Upper (Lower) Price Band shall be rejected. The NYBX Facility shall also cancel resting orders to buy (sell) in the NYBX Facility if Price Bands move and the price of a resting buy (sell) order moves above (below) the Upper (Lower) Price Band. The Exchange believes that this change will help Users of the NYBX Facility to understand how the requirements of Rule 80C and the LULD Plan apply to such transactions.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with Section 6(b) of the Act [25] in general, and furthers the objectives of Section 6(b)(5),[26] in particular, in that it is designed to promote just and equitable principles of trade, remove impediments to and perfect the mechanisms of a free and open market and a national market system and, in general, to protect investors and the public interest.

The proposal promotes just and equitable principles of trade and removes impediments to, and perfects the mechanism of, a free and open market and a national market system by ensuring that the Exchange systems will not display or execute trading interest outside the Price Bands as required by the limit up-limit down and trading pause requirements specified in the Plan.

The proposal will also ensure that the trading interest on the Exchange is either repriced to maintain priority or canceled in a manner that promotes just and equitable principles of trade and removes impediments to, and perfects the mechanism of, a free and open market and a national market system. Specifically, the proposal will help allow market participants to continue to trade NMS Stocks within Price Bands in compliance with the Plan with certainty on how certain orders and trading interest will be treated. Thus, reducing uncertainty regarding the treatment and priority of trading interest with the Price Bands should help encourage market participants to continue to provide liquidity during times of extraordinary market volatility that occur during Regular Trading Hours.

The proposal also promotes just and equitable principles of trade and removes impediments to, and perfects the mechanism of, a free and open market and a national market system by ensuring that orders in NMS Stocks are not routed to other exchanges in situations where an execution may occur outside Price Bands, and thereby is reasonably designed to prevent an execution outside the Price Bands in a manner that promotes compliance with the limit up-limit down and trading pause requirements specified in the Plan.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed changes are being made to establish, maintain, and enforce written policies and procedures that are reasonably designed to comply with the limit up-limit down and trading pause requirements specified in the Plan, of which other equities exchanges are also Participants of. Other competing equity exchanges are subject to the same limit up-limit down and trading pause requirements specified in the Plan. Thus, the proposed changes will not

[21] The Exchange notes repricing of trading interest under ordinary circumstances outside of this Rule may be different than pursuant to the proposed Rule. For example, repricing of Market Pegging Interest and Sell Short Orders under ordinary circumstances would receive a new time stamp after repricing.

[22] The Exchange will develop written policies and procedures to determine when to declare a Trading Pause in such circumstances.

[23] *See* Section VII(A)(2) of the Plan.

[24] *See* Section VIII of the Plan.

[25] 15 U.S.C. 78f(b).

[26] 15 U.S.C. 78f(b)(5).

impose any burden on competition while providing certainty of treatment and execution of trading interest on the Exchange to market participants during periods of extraordinary volatility in NMS stock while in compliance with the limit up-limit down and trading pause requirements specified in the Plan.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act [27] and Rule 19b–4(f)(6) thereunder.[28] Because the proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) of the Act [29] to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

[27] 15 U.S.C. 78s(b)(3)(A)(iii).

[28] 17 CFR 240.19b–4(f)(6).

[29] 15 U.S.C. 78s(b)(2)(B).

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File No. SR–NYSE–2013–09 on the subject line.

Paper Comments

- Send paper comments in triplicate to Elizabeth M. Murphy, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File No. SR–NYSE–2013–09. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File No. SR–NYSE–2013–09 and should be submitted on or before March 7, 2013.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[30]

Kevin M. O'Neill,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–68882; File No. SR–ICC–2012–23]

Self-Regulatory Organizations; ICE Clear Credit LLC; Notice of Designation of a Longer Period for Commission Action on Proposed Rule Change To Add Rules Related to the Clearing of iTraxx Europe Index CDS

February 8, 2013.

On December 6, 2012, ICE Clear Credit LLC (''ICC'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change SR–ICC–2012–23 pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b-4 thereunder.[2] The proposed rule change was published for comment in the **Federal Register** on December 26, 2012.[3] The Commission did not receive comments on the proposal.

Section 19(b)(2) of the Act [4] provides that within 45 days of the publication of notice of the filing of a proposed rule change, or within such longer period up to 90 days as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or as to which the self-regulatory organization consents, the Commission shall either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved. The 45th day from the publication of notice of filing of this proposed rule change is February 9, 2013. The Commission is extending this 45-day time period.

The proposed rule change relates to ICC's adoption of rules to permit the clearing of iTraxx Europe credit default swap indices. The proposed rule change is novel because no clearing agency located in the United States currently provides clearing services for these products. As a result, and in order to provide the Commission with sufficient time to consider the proposed rule change, the Commission finds it is appropriate to designate a longer period within which to take action on the proposed rule change.

Accordingly, the Commission, pursuant to Section 19(b)(2) of the Act,[5] designates March 26, 2013, as the date

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b-4.

[3] Securities Exchange Act Release No. 34–68481 (December 19, 2012), 77 FR 76109 (December 26, 2012).

[5] 15 U.S.C. 78s(b)(2).

by which the Commission should either approve or disapprove, or institute proceedings to determine whether to disapprove, the proposed rule change (File No. SR–ICC–2012–23).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[6]

Kevin M. O'Neill,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–68887; File No. SR–CBOE–2013–017]

Self-Regulatory Organizations; Chicago Board Options Exchange, Incorporated; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the Fees Schedule

February 8, 2013.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on February 1, 2013, Chicago Board Options Exchange, Incorporated (the ''Exchange'' or ''CBOE'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of the Substance of the Proposed Rule Change

The Exchange is proposing to amend the Fees Schedule. The text of the proposed rule change is available on the Exchange's Web site (*http://www.cboe.com/AboutCBOE/CBOELegalRegulatoryHome.aspx*), at the Exchange's Office of the Secretary, and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its Fees Schedule. Specifically, the Exchange proposes to amend its Volume Incentive Program (''VIP''), through which the Exchange credits each Trading Permit Holder (''TPH'') the per contract amount resulting from each public customer (''C'' origin code) order transmitted by that TPH which is executed electronically on the Exchange in all multiply-listed option classes (excluding Qualified Contingent Cross (''QCC'') trades and executions related to contracts that are routed to one or more exchanges in connection with the Options Order Protection and Locked/Crossed Market Plan referenced in Rule 6.80), provided the TPH meets certain volume thresholds in a month. The proposed changes are to take effect on February 1, 2013.

First, the Exchange proposes to change the different fee tier thresholds in the VIP. Currently, qualification for the different fee rates at different tiers in the VIP is based on a TPH's percentage of national customer volume in multiply-listed options monthly. The current qualification tiers are set to, in ascending order, 0 through 0.75%,[3] above 0.75% through 2.25%, above 2.25% through 3.50%, above 3.50% through 5.00%, and above 5.00%. The purpose of the change is to eliminate the fifth qualification tier and adjust the threshold percentages for tier one through tier four. The Exchange is proposing to amend the tiers to be, in ascending order, 0 through 0.75%, above 0.75% through 2.00%, above 2.00% through 2.75%, and above 2.75%. Lowering the upper thresholds in the second and third tiers, along with the corresponding lower thresholds in the third and fourth tiers, allows for a greater number or participants to achieve a higher payment in the VIP Program.

The Exchange also proposes to change the amounts of the credits in the tiers of the VIP. The credit in the second tier will be increased from $0.07 per contract to $0.10 per contract, the credit in the third tier will be decreased from $0.12 per contract to $0.11 per contract, and the credit in the fourth tier will decrease from $0.18 to $0.14 per contract. Going forward, the relative volume thresholds and credit amounts will be as follows:

Percentage thresholds of national customer volume in multiply-listed options classes (monthly)	Per contract credit
0%–0.75%	$0.00
Above 0.75%–2.00%	0.10
Above 2.00%–2.75%	0.11
Above 2.75	0.14

The purpose of increasing the credit in the second tier and decreasing the credits in the third and fourth tiers is to rationalize the opportunity to receive a credit under the VIP across a broader set of participants. Lowering the credit in the third and fourth tiers allows the Exchange to make up for lowering the thresholds in tier two through tier four.

Next, the Exchange is proposing to eliminate the VIP credit of $0.10 per contract at every tier in VIP. Currently this $0.10 credit is given at every tier, including the $0.00 tier, on each leg, for customer, complex multiply-listed options contracts, when executed electronically against a non-public customer origin. The Exchange is proposing to eliminate this additional credit. Eliminating this credit allows the Exchange to make up for threshold and credit adjustments as proposed above.

Finally, the Exchange is proposing to add to the notes on the VIP table. The Exchange is proposing to amend the section of the ''Notes'' on the VIP table to state that the VIP payment will be calculated from the first executed contract at the applicable threshold per contract credit. Stated in a different way, VIP payments will be made at the highest achieved tier for each contract executed in that month. Under the current VIP, VIP payments are made for the number of applicable contracts executed in each tier. For example, if TPH Firm XYZ executes 2.50% of the total national customer volume in the month of April, XYZ would receive a $0.00 credit for the contracts at 0.75% of the market and below, a credit of $0.10[4] for the contracts above 0.75% through 2.00% of the market, and $0.11 for each contract above 2.00% of the market through the total 2.50% of the market. In the proposed VIP Program, XYZ will receive a credit of $0.11 for each contract executed in the month of

[6] 17 CFR 200.30–3(a)(31).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] Each tier is based on the percentage of total national customer volume in multiply-listed options monthly.

[4] For sake of the example, credit amounts being applied are the proposed credit changes as mentioned above.

April. The purpose of the proposed change is to provide a greater incentive to direct greater customer trade volume to the Exchange to achieve a greater monthly percentage and receive a greater credit for all executed contracts at the greatest level achieved.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the ''Act'') and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[5] Specifically, the Exchange believes the proposed rule change is consistent with Section 6(b)(4) of the Act,[6] which provides that Exchange rules may provide for the equitable allocation of reasonable dues, fees, and other charges among its Trading Permit Holders and other persons using its facilities.

The Exchange believes that the proposed changes to amend the fee tier thresholds in the VIP are reasonable. Specifically, decreasing the upper thresholds in the second and third tiers, and thus the corresponding lower thresholds in third and fourth tiers, is reasonable because the slight changes are designed to provide TPHs a greater ability to reach higher tiers. These changes are equitable and not unfairly discriminatory because they will be applied to all TPHs. The Exchange believes that the proposed changes to increase the credit in the second tier of the VIP and decrease the credits in the third and fourth tiers each are reasonable. In the case of the increase in the credit for the second tier, the change will allow TPHs who reach the percentage threshold in that tier to receive an increased credit for doing so. In the case of the decrease in the credit for the third and fourth tiers, the change will still allow TPHs who reach the percentage threshold in that tier to receive a credit which is higher than such TPH would receive in the tier immediately below it. These changes are equitable and not unfairly discriminatory because they will be applied to all TPHs.

The proposed changes to eliminate the VIP credit of $0.10 per contract at every tier in VIP is reasonable given the other proposed lower threshold and credits in the VIP. Though the Exchange is eliminating the additional credit, through the proposed changes, TPHs have a greater ability to reach higher tiers. Thus, eliminating the fee [sic] is reasonable when coupled with the other changes to the VIP. The elimination of this credit is equitable and not unfairly discriminatory as it applies to all TPHs. Finally, the Exchange believes that amending the Notes Section of the VIP is reasonable because it allows TPHs to receive a greater credit by applying the greatest credit obtained to all trades done in that particular month. This change is equitable and not unfairly discriminatory because it will be applied to all TPHs.

Moreover, the purpose of all of the proposed changes is to encourage the sending and electronic execution of customer multiply-listed options volume to the Exchange. This increased volume creates greater trading opportunities that benefit all market participants (including TPHs that do not reach the higher-credit tiers in the VIP). Further, the increased volume and improved trading opportunities will provide such TPHs with a better opportunity to reach the higher-credit tiers in the VIP.

B. Self-Regulatory Organization's Statement on Burden on Competition

CBOE does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. To the extent that some of the changes to the VIP may attract greater trading volume to CBOE (and away from other exchanges), the Exchange does not believe the proposed changes will impose any burden on intermarket competition. The Exchange notes that, should the proposed changes make CBOE more attractive for trading, market participants trading on other exchanges can always elect to become TPHs on CBOE. Further, the Exchange exists in a competitive marketplace, and to the extent that these proposed changes make other exchanges less competitive with CBOE, market participants trading on those other exchanges can elect to trade on CBOE.

The Exchange does not believe the proposed changes will impose any burden on intramarket competition. Though the proposed changes only benefit TPHs that meet the VIP thresholds, the purpose of all of the proposed changes is to encourage the sending and electronic execution of customer multiply-listed options volume to the Exchange. This increased volume creates greater trading opportunities that benefit all market participants (including TPHs that do not reach the higher-credit tiers in the VIP). Further, the proposed changes apply to all TPHs.

The Exchange does not believe that the proposed changes to eliminate the VIP credit of $0.10 per contract at every tier in VIP will impose any burden on intermarket competition because the change is minimal and the VIP program already gives a credit to qualifying TPHs. Further, to the extent that any change in intramarket competition may result from this change, such possible change is justifiable and offset because the changes to such fees are designed to attract greater customer order flow to the Exchange. This would bring greater liquidity to the market, which benefits all market participants. The Exchange does not believe that the elimination of the additional $0.10 credit will cause any unnecessary burden on intermarket competition because the changes are minimal and only apply to certain TPHS that qualify for the VIP.

The Exchange also notes that it operates in a highly-competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive. The proposed rule change reflects a competitive pricing structure designed to incent market participants to direct their order flow to the Exchange, and the Exchange believes that such structure will help the Exchange remain competitive with those fees and rebates assessed by other venues.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act [7] and paragraph (f) of Rule 19b–4 [8] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act.

Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–CBOE–2013–017 on the subject line.

Paper Comments

- Send paper comments in triplicate to Elizabeth M. Murphy, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–CBOE–2013–017. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–CBOE–2013–017, and should be submitted on or before March 7, 2013.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[9]

Kevin M. O'Neill,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–68885; File No. SR–BYX–2013–006]

Self-Regulatory Organizations; BATS Y-Exchange, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Extend Pilot Program Related To Trading Pauses Due to Extraordinary Market Volatility

February 8, 2013.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on January 30, 2013, BATS–Y Exchange, Inc. (''BYX'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Exchange has designated this proposal as a ''non-controversial'' proposed rule change pursuant to Section 19(b)(3)(A) of the Act[3] and Rule 19b–4(f)(6)(iii) thereunder,[4] which renders it effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is proposing to extend a pilot program previously approved by the Commission related to Rule 11.18, entitled ''Trading Halts Due to Extraordinary Market Volatility.''

The text of the proposed rule change is available at the Exchange's Web site at *http://www.batstrading.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of this filing is to extend the effectiveness of the Exchange's rule related to individual stock circuit breakers, which is contained in Rule 11.18(d) and Interpretation and Policy .05 to Rule 11.18. The rule, explained in further detail below, is currently operating as a pilot program set to expire on February 4, 2013.

On October 4, 2010, the Exchange filed an immediately effective filing to adopt various rule changes to bring BYX Rules up to date with the changes that had been made to the rules of BATS Exchange, Inc., the Exchange's affiliate, while BYX's Form 1 Application to register as a national securities exchange was pending approval. Such changes included changes to the Exchange's Rule 11.18, on a pilot basis, to provide for uniform market-wide trading pause standards for individual securities in the S&P 500® Index, the Russell 1000® Index and specified Exchange Traded Products that experience rapid price movement.[5] More recently, the Exchange proposed expansion of the pilot program to apply to all NMS stocks.[6] This expansion was approved on June 23, 2011.[7] The pilot program relating to trading pause standards has been extended five times since its inception.[8] The Exchange believes the benefits to market participants from the individual stock trading pause rule should be continued on a pilot basis until individual stocks become, on a

rolling basis, subject to the Plan to Address Extraordinary Market Volatility Pursuant to Rule 608 of Regulation NMS under the Act (the ''Limit Up-Limit Down Plan'' or ''Plan'').[9]

The Exchange, in conjunction with other national securities exchanges and FINRA, recently filed an amendment to the Plan to change the date of initial operations of the Plan from February 4, 2013 to April 8, 2013. The extension proposed herein would allow the pilot to continue to operate without interruption until implementation of the Limit Up-Limit Down Plan, which will occur on a rolling basis.

The Exchange proposes to extend the effective date of the pilot from the current scheduled expiration date of February 4, 2013 until February 4, 2014. The Exchange also proposes to modify the definition of ''Circuit Breaker Securities'' subject to the individual stock circuit breaker pilot to mean all NMS stocks other than NMS stocks subject to the Limit Up-Limit Down Plan. Accordingly, as securities become subject to the Limit Up-Limit Down Plan, they will no longer be Circuit Breaker Securities subject to the individual stock trading pause pilot.

2. Statutory Basis

The Exchange believes that its proposal is consistent with the requirements of the Act and the rules and regulations thereunder that are applicable to a national securities exchange, and, in particular, with the requirements of Section 6(b) of the Act.[10] In particular, the proposal is consistent with Section 6(b)(5) of the Act,[11] because it would promote just and equitable principles of trade, remove impediments to, and perfect the mechanism of, a free and open market and a national market system. The proposed rule change is also consistent with Section 11A(a)(1) of the Act[12] in that it seeks to assure fair competition among brokers and dealers and among exchange markets. The Exchange believes that the pilot program promotes just and equitable principles of trade in that it promotes transparency and uniformity across markets concerning decisions to pause trading in a security when there are significant price movements. The Exchange believes that the pilot program is working well, that it has been infrequently invoked during the previous months, and that the extension of the pilot will allow the Exchange to further assess the effect of the pilot on the market until securities become subject to the Limit Up-Limit Down Plan on a rolling basis.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed changes are being made to extend the operation of the trading pause pilot to allow the pilot to continue to operate without interruption until implementation of the Limit Up-Limit Down Plan, which contributes to the protection of investors and the public interest. Other competing equity exchanges are subject to the same trading pause requirements specified in the Plan. Thus, the proposed changes will not impose any burden on competition while providing trading pause requirements specified in the Plan.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[13] and Rule 19b–4(f)(6) thereunder.[14] Because the proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.

A proposed rule change filed under Rule 19b–4(f)(6)[15] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[16] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest because such waiver would allow the pilot program to continue uninterrupted. Accordingly, the Commission hereby grants the Exchange's request and designates the proposal operative upon filing.[17]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

• Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or

• Send an email to *rule-comments@sec.gov.* Please include File Number SR–BYX–2013–006 on the subject line.

Paper Comments

• Send paper comments in triplicate to Elizabeth M. Murphy, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–BYX–2013–006. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–68877; File No. SR–EDGA–2013–07]

Self-Regulatory Organizations; EDGA Exchange, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Relating to Amendments to the EDGA Exchange, Inc. Fee Schedule

February 8, 2013.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on January 31, 2013, EDGA Exchange, Inc. (the "Exchange" or "EDGA") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II and III below, which items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend its fees and rebates applicable to Members[3] of the Exchange pursuant to EDGA Rule 15.1(a) and (c). All of the changes described herein are applicable to EDGA Members. The text of the proposed rule change is available on the Exchange's Internet Web site at www.directedge.com, at the Exchange's principal office, and at the Public Reference Room of the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections A, B and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange currently assesses a charge of $0.0003 per share for Members' orders that yield Flag RY. The Exchange proposes to increase the rate it charges for Flag RY from $0.0003 per share to $0.0005 per share for Members' orders that route to the BATS Y-Exchange, Inc. ("BATS BYX") and add liquidity. This proposed change represents a pass through of the rate that Direct Edge ECN LLC (d/b/a DE Route) ("DE Route"), the Exchange's affiliated routing broker dealer, is charged for routing orders to BATS BYX that do not qualify for additional volume tiered discounts, as described in BATS BYX's fee filing with the Securities and Exchange Commission.[4]

The Exchange proposes to implement these amendments to its fee schedule on February 1, 2013.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the objectives of Section 6 of the Act,[5] in general, and furthers the objectives of Section 6(b)(4),[6] in particular, as it is designed to provide for the equitable allocation of reasonable dues, fees and other charges among its Members and other persons using its facilities.

The Exchange's proposed fee increase for Flag RY represents a pass-through rate where BATS BYX charges DE Route $0.0005 per share for Members' orders that route to BATS BYX through DE Route and add liquidity, and then DE Route charges the Exchange $0.0005 per share, and then the Exchange charges its Members $0.0005 per share. The Exchange's proposal represents an equitable allocation of reasonable dues, fees, and other charges among Members of the Exchange and other persons using its facilities because the Exchange does not levy additional fees or offer additional rebates for orders that it routes to BATS BYX through DE Route. Prior to BATS BYX's January 2013 fee filing, BATS BYX charged DE Route a fee of $0.0003 per share for orders yielding Flag RY, which DE Route passed through to the Exchange and the Exchange passed through to its Members. In BATS BYX's January 2013 fee filing, BATS BYX increased the rate it charges its customers, such as DE Route, from $0.0003 per share to a charge of $0.0005 per share for orders that are routed to BATS BYX and add liquidity. Therefore, the Exchange believes that the proposed change in Flag RY from a fee of $0.0003 per share to a fee of $0.0005 per share is equitable and reasonable because it accounts for the pricing changes on BATS BYX. In addition, the proposal allows the Exchange to continue to charge its Members a pass-through rate for orders that are routed to BATS BYX and add liquidity using DE Route. The Exchange notes that routing through DE Route is voluntary. Lastly, the Exchange also believes that the proposed amendment is non-discriminatory because it applies uniformly to all Members.

The Exchange also notes that it operates in a highly-competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive. The proposed rule change reflects a competitive pricing structure designed to incent market participants to direct their order flow to the Exchange. The

---

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] As defined in Exchange Rule 1.5(n).

[4] *See* Securities Exchange Act Release No. 68665 (January 16, 2013), 78 FR 4946 (January 23, 2013) (SR–BYX–2013–001).

[5] 15 U.S.C. 78f.

[6] 15 U.S.C. 78f(b)(4).

Exchange believes that the proposed rates are equitable and non-discriminatory in that they apply uniformly to all Members. The Exchange believes the fees and credits remain competitive with those charged by other venues and therefore continue to be reasonable and equitably allocated to Members.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

Regarding Flag RY, the Exchange believes its proposal to assess a charge of $0.0005 per share increases competition among trading centers because it offers customers an alternative means to route to BATS BYX and add liquidity for the same price as entering orders on BATS BYX directly. The Exchange believes that its proposal will have no burden on intramarket competition because the rate applies uniformly to all Members.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from Members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act [7] and Rule 19b–4(f)(2) [8] thereunder. At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–68881; File No. SR–ICC–2012–24]

Self-Regulatory Organizations; ICE Clear Credit LLC; Notice of Designation of a Longer Period for Commission Action on Proposed Rule Change To Add Rules Related to the Clearing of European Corporate Single-Name CDS

February 8, 2013.

On December 6, 2012, ICE Clear Credit LLC (''ICC'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change SR–ICC–2012–24 pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder.[2] The proposed rule change was published for comment in the **Federal Register** on December 26, 2012.[3] The Commission did not receive comments on the proposal.

Section 19(b)(2) of the Act [4] provides that within 45 days of the publication of notice of the filing of a proposed rule change, or within such longer period up to 90 days as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or as to which the self-regulatory organization consents, the Commission shall either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved. The 45th day from the publication of notice of filing of this proposed rule change is February 9, 2013. The Commission is extending this 45-day time period.

The proposed rule change relates to ICC's adoption of rules to permit the clearing of standard single-name CDS contracts referencing European corporate reference entities. The proposed rule change is novel because no clearing agency located in the United States currently provides clearing services for these products. As a result, and in order to provide the Commission with sufficient time to consider the proposed rule change, the Commission finds it is appropriate to designate a longer period within which to take action on the proposed rule change.

Accordingly, the Commission, pursuant to Section 19(b)(2) of the Act,[5]

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–68884; File No. SR–EDGA–2013–04]

Self-Regulatory Organizations; EDGA Exchange, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend EDGA Rule 11.14 To Extend the Operation of the Single Stock Circuit Breaker Program

February 8, 2013.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act'') [1] and Rule 19b–4 thereunder,[2] notice is hereby given that on January 30, 2013, EDGA Exchange, Inc. (''EDGA'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend EDGA Rule 11.14 to extend the operation of the single stock circuit breaker pilot program (the ''Pilot'') from the current scheduled expiration date of February 4, 2013 until the earlier of the initial date of operations of the Regulation NMS Plan to Address Extraordinary Market Volatility (the ''Plan'') or February 4, 2014. All of the changes described herein are applicable to EDGA Members. The text of the proposed rule change is available on the Exchange's Internet Web site at *www.directedge.com,* at the Exchange's principal office, and at the Public Reference Room of the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections A, B and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend EDGA Rule 11.14 to extend the operation of the Pilot from the current scheduled expiration date of February 4, 2013 [3] until the earlier of the initial date of operations of the Plan or February 4, 2014. The Pilot will continue to operate as to individual securities until such security is subject to the Plan.

EDGA Rule 11.14 requires the Exchange to pause trading in an individual security listed on the Exchange if the primary listing market for such stock issues a trading pause. Such trading pause will continue until trading has resumed on the primary listing market. However, the Exchange may resume trading in such stock if trading has not resumed on the primary listing market and ten minutes have passed since the individual stock trading pause message has been received from the responsible single plan processor. The Pilot was developed and implemented as a market-wide initiative by the Exchange and other national securities exchanges in consultation with the Securities and Exchange Commission (the ''Commission'') staff and is currently applicable to all NMS stocks and specified exchange-traded products.[4]

The extension proposed herein would allow the Pilot to continue to operate without interruption until implementation of the Plan.[5] The Plan will begin initial operations on April 8, 2013.[6] If the Plan has an initial date of operations before February 4, 2014, the proposed Pilot for trading pauses would expire at that time.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[7] in general, and furthers the objectives of Section 6(b)(5) of the Act,[8] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. The Exchange believes that the change proposed herein meets these requirements in that it promotes uniformity across markets concerning decisions to pause trading in a security when there are significant price movements, which promotes just and equitable principles of trade and

[5] *See* Securities Exchange Act Release No. 67091 (May 31, 2012), 77 FR 33498 (June 6, 2012) (File No. 4–631) (Order Approving, on a Pilot Basis, the National Market System Plan To Address Extraordinary Market Volatility by BATS Exchange, Inc., BATS Y-Exchange, Inc., Chicago Board Options Exchange, Incorporated, Chicago Stock Exchange, Inc., EDGA Exchange, Inc., EDGX Exchange, Inc., Financial Industry Regulatory Authority, Inc., NASDAQ OMX BX, Inc., NASDAQ OMX PHLX LLC, The Nasdaq Stock Market LLC, National Stock Exchange, Inc., New York Stock Exchange LLC, NYSE MKT LLC, and NYSE Arca, Inc).

[6] Letter from Janet McGinness, Executive Vice President and Corporate Secretary, NYSE Markets, to Elizabeth Murphy, Secretary, Securities and Exchange Commission, dated January 17, 2013.

[7] 15 U.S.C. 78f(b).

[8] 15 U.S.C. 78f(b)(5).

removes impediments to, and perfects the mechanism of, a free and open market and a national market system. Additionally, extension of the Pilot until the earlier of the initial date of operations of the Plan or February 4, 2014 would allow the Pilot to continue to operate without interruption while the Exchange and the Commission further assess the effect of the Pilot on the marketplace or whether other initiatives should be adopted in lieu of the current Pilot, which contributes to the protection of investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed changes are being made to extend the Pilot until the earlier of the initial date of operations of the Plan or February 4, 2014 would allow the Pilot to continue to operate without interruption until implementation of the Plan, which contributes to the protection of investors and the public interest. Other competing equity exchanges are subject to the same trading pause requirements specified in the Plan. Thus, the proposed changes will not impose any burden on competition while providing trading pause requirements specified in the Plan.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act [9] and Rule 19b–4(f)(6) thereunder.[10] Because the proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.

A proposed rule change filed under Rule 19b–4(f)(6) [11] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b4(f)(6)(iii),[12] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest because such waiver would allow the pilot program to continue uninterrupted. Accordingly, the Commission hereby grants the Exchange's request and designates the proposal operative upon filing.[13]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number SR–EDGA–2013–04 on the subject line.

Paper Comments

- Send paper comments in triplicate to Elizabeth M. Murphy, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–EDGA–2013–04. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make publicly available. All submissions should refer to File Number SR–EDGA–2013–04 and should be submitted on or before March 7, 2013.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority. [14]

Kevin M. O'Neill,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–68874; File No. SR–FINRA–2012–010]

Self-Regulatory Organizations; Financial Industry Regulatory Authority, Inc.; Order Approving a Proposed Rule Change To Amend FINRA Rule 6440 (Trading and Quotation Halt in OTC Equity Securities)

February 8, 2013.

I. Introduction

On December 20, 2012, Financial Industry Regulatory Authority, Inc. (''FINRA'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend FINRA Rule 6440 (Trading and Quotation Halt in OTC Equity Securities). The proposed rule change was published for comment in the **Federal Register** on December 31, 2012.[3] The Commission received one comment letter regarding the proposal.[4] This order approves the proposed rule change.

II. Description of the Proposal

FINRA Rule 6440 (Trading and Quotation Halt in OTC Equity Securities) generally provides that, in circumstances where it is necessary to protect investors and the public interest, FINRA may direct members to halt trading and quotations in OTC Equity Securities.[5] FINRA may impose a ''Foreign Regulatory Halt'' when a foreign securities exchange, market, or regulatory authority halts trading for regulatory reasons in an OTC Equity Security or a security underlying an American Depository Receipt (''ADR'') that is an OTC Equity Security (''OTC ADR'') listed on or registered with such foreign securities exchange or market.[6] FINRA, however, will not impose a trading and quotation halt if the Foreign Regulatory Halt was imposed solely for material news, a regulatory filing deficiency, or operational reasons.[7] In addition, FINRA may impose a ''Derivative Halt'' when a national securities exchange or foreign securities exchange or market halts trading in a listed security of which the OTC Equity Security or the security underlying an OTC ADR is a derivative or component.[8] Further, FINRA may impose an ''Extraordinary Event Halt'' when it determines that an extraordinary event has occurred or is ongoing that has had a material effect on the market for the OTC Equity Security or has caused, or has the potential to cause, major disruption to the marketplace and/or significant uncertainty in the settlement and clearance process.[9]

FINRA proposes to amend Rule 6440(a)(1) to permit FINRA to initiate a trading and quotation halt as a result of a Foreign Regulatory Halt when the foreign halt is imposed for news pending.[10] FINRA indicates that historically it has not halted in these instances because FINRA lacks privity with OTC equity issuers and cannot compel such issuers to disclose information to FINRA.[11] FINRA believes that with the growth of foreign securities markets and the ease at which trading can occur across jurisdictions and markets, increased coordination of trading halts across markets would protect investors by reducing instances of potentially material disparities in information regarding the security, or even fraudulent or manipulative trading in the security, and would act to protect U.S. investors.[12]

FINRA Rule 6440(b)(1) provides that upon receipt of information from a foreign securities exchange or market on which an OTC Equity Security or a security underlying the OTC ADR is listed or registered, or from a regulatory authority overseeing such issuer, exchange, or market, FINRA will promptly evaluate the information and determine whether a trading and quotation halt in the OTC Equity Security is appropriate. FINRA proposes to amend Rule 6440(b)(1) to clarify that FINRA may initiate a trading and quotation halt in an OTC Equity Security as a result of a Foreign Regulatory Halt or Derivative Halt upon notice from another reliable third-party source (*e.g.,* The Depository Trust & Clearing Corporation, broker-dealers, or financial news data vendors) where FINRA can validate the information provided.[13] The proposed revision to Rule 6440(b)(1) will provide that upon notice, not simply receipt of information, of a Foreign Regulatory Halt or Derivative Halt from (i) the national or foreign securities exchange or market on which the OTC Equity Security or the security underlying the OTC ADR is listed or registered; (ii) a regulatory authority overseeing such issuer, exchange, or market; or (iii) another reliable third-party source where FINRA can validate the information provided, FINRA will promptly initiate a trading and quotation halt in the OTC Equity Security.[14]

Currently, under Rule 6440(b)(3), trading and quotations in an OTC Equity Security may resume when FINRA determines that the basis for the halt no longer exists, or when ten business days have elapsed from the date FINRA initiated the trading and quotation halt in the security, whichever occurs first. FINRA proposes to add new Rule 6440(b)(2) to provide that, after it initiates a halt in an OTC Equity Security as a result of a Foreign Regulatory Halt or a Derivative Halt, FINRA may continue the halt in trading and quoting in the OTC market for the OTC Equity Security until such time as FINRA receives notice that the applicable regulatory authority has or intends to resume trading in the security, even if such halt is longer than ten business days.[15]

FINRA proposes to amend Rule 6440(b)(3) to provide that, with respect to a halt in an OTC Equity Security as

[10] *See* Notice, *supra* note 3, 77 FR at 77163. The limitations in Rule 6440(a)(1) relating to FINRA's halt authority where the Foreign Regulatory Halt is imposed solely for a regulatory filing deficiency or operational reasons would remain.

[11] *See id.*

[12] *See id.*

[13] *See id.* FINRA states that it verifies all third-party information relating to trading and quotation halts in foreign markets before it acts upon such information. *See id.* at 77164. FINRA believes that having the authority to halt trading and quotation in an OTC Equity Security upon notice from a reliable third-party source that can be validated would allow FINRA to act more promptly to initiate trading and quotation halts in such securities. *See id.*

[14] The commencement of the trading and quotation halt for the OTC Equity Security will be effective simultaneous with the issuance of appropriate public notice by FINRA. *See* proposed FINRA Rule 6440(b)(1).

[15] FINRA stated that it will disseminate an appropriate public notice that a trading and quotation halt initiated under Rule 6440 is no longer in effect. *See* proposed FINRA Rule 6440(b)(4).

a result of an Extraordinary Event Halt, trading and quotations in the OTC market for the OTC Equity Security may resume when FINRA determines that the basis for the halt no longer exists, or when ten business days have elapsed from the date FINRA initiated the trading and quotation halt in the security, whichever occurs first. In addition, FINRA will be permitted to extend an Extraordinary Event Halt for subsequent periods of up to ten business days each if, at the time of any such extension, FINRA finds that the extraordinary event is ongoing and determines that the continuation of the halt beyond the prior ten business day period is necessary in the public interest and for the protection of investors.[16]

III. Discussion and Commission's Findings

After careful review of the proposed rule change, the Commission finds that the proposed rule change is consistent with the requirements of Section 15A(b) of the Act [17] and the rules and regulations thereunder applicable to a national securities association.[18] In particular, the Commission finds that the proposed rule change is consistent with Section 15A(b)(6) of the Act,[19] which requires, among other things, that FINRA rules be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, and, in general, to protect investors and the public interest, and Section 15A(b)(11) of the Act,[20] which requires, among other things, that FINRA rules relating to quotations be designed to produce fair and informative quotations, to prevent fictitious or misleading quotations, and to promote orderly procedures for collecting, distributing, and publishing quotations.

The Commission believes that FINRA's trading and quotation halt rule for OTC Equity Securities, when appropriately applied under the circumstances specified in the rule, as proposed to be amended, is designed to promote the protection of investors and the public interest and to produce fair and informative quotations, and to prevent fictitious or misleading quotations, for OTC Equity Securities. Permitting FINRA to initiate a trading and quotation halt as a result of a Foreign Regulatory Halt that is imposed for news pending should enable FINRA to initiate trading and quotation halts in OTC Equity Securities under a broader set of circumstances than currently exists, which could help to reduce the potential that investors may trade on incomplete or inaccurate information in these securities. In addition, permitting FINRA to initiate a halt as a result of a Foreign Regulatory Halt or Derivative Halt upon notice from another reliable third-party source where FINRA can validate the information provided should allow FINRA to initiate a halt more promptly when such a halt is warranted.

The Commission further believes that the provisions relating to the duration of a trading and quotation halt are reasonably designed to protect investors and the public interest and to produce fair and informative quotations, and to prevent fictitious or misleading quotations, for OTC Equity Securities. The Commission believes that it is reasonable for a halt in an OTC Equity Security as a result of a Foreign Regulatory Halt or a Derivative Halt to run concurrently with, and for as long as, the halt imposed on the security in the market on which it is listed or registered. In addition, allowing FINRA to extend an Extraordinary Event Halt for subsequent periods of up to ten business days will help allow for resolution of the event before trading and quoting in the OTC market for the OTC Equity Security resumes. The Commission notes that FINRA would be permitted to extend an Extraordinary Event Halt only if it finds that the extraordinary event is ongoing and determines that the continuation of the halt beyond the initial ten business day halt period is necessary and appropriate in the public interest and for the protection of investors.

IV. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[21] that the proposed rule change (SR–FINRA–2012–010) is approved.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[22]

Kevin M. O'Neill,

Deputy Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–68872; File No. SR–MSRB–2013–01]

Self-Regulatory Organizations; Municipal Securities Rulemaking Board; Notice of Filing of a Proposed Rule Change Relating to Amendments to MSRB Rules G–37 and G–8 and Form G–37

February 8, 2013.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] notice is hereby given that on February 4, 2013, the Municipal Securities Rulemaking Board (''MSRB'' or ''Board'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the MSRB. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The MSRB is filing with the Commission a proposed rule change consisting of amendments to Rules G–37, on political contributions and prohibitions on municipal securities business, and G–8, on books and records, and Form G–37 (the ''proposed rule change''). The MSRB requested an effective date for the proposed rule change of no later than the start of the second calendar quarter following the date of SEC approval.

The text of the proposed rule change is available on the MSRB's Web site at *www.msrb.org/Rules-and-Interpretations/SEC-Filings/2013-Filings.aspx,* at the MSRB's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the MSRB included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The MSRB has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The proposed rule change amends Rule G–37 to require the public disclosure of additional information related to contributions made by brokers, dealers and municipal securities dealers (''dealers''), their municipal finance professionals (''MFPs''),[3] political action committees (''PACs'') controlled by the dealer or their MFPs and non-MFP executive officers[4] (individually, a ''covered party'' and collectively, ''covered parties'') to bond ballot campaigns and the municipal securities business[5] engaged in by dealers resulting from voter approval of the bond ballot measure to which such contributions were given. The additional information will be required to be reported on revised MSRB Form G–37[6] and submitted to the MSRB.[7] The proposed rule change also amends Rule G–8 to require dealers to maintain records pertaining to the additional information disclosed under the proposed amendments to Rule G–37. The proposed rule change is further described below under ''Summary of Proposed Rule Change'' and under ''Discussion of Comments.''

Background

Rule G–37, in effect since 1994, has provided substantial benefits to the industry and the investing public by greatly reducing the direct connection between political contributions given to issuer officials[8] and the awarding of municipal securities business to dealers. Rule G–37 requires dealers to disclose (on Form G–37) certain contributions to issuer officials, contributions to bond ballot campaigns, and payments to political parties of states and political subdivisions made by covered parties. The rule prohibits dealers from engaging in municipal securities business with an issuer within two years after contributions to an official of such issuer are made by certain covered parties (other than certain permitted *de minimis* contributions).[9] The rule's prohibition on engaging in municipal securities business is not triggered by contributions that are made to bond ballot campaigns by covered parties.

Bond Ballot Contributions

Since February 1, 2010,[10] the MSRB has required disclosure, under Rule G–37, of non-*de minimis* contributions[11] to bond ballot campaigns made by covered parties. Rule G–37 also requires dealers to maintain records of such reportable contributions to bond ballot campaigns pursuant to Rule G–8. The 2010 amendments to Rule G–37 and the corresponding amendments to Rule G–8 resulted, in part, from concerns that contributions by covered parties to bond ballot campaigns could assist dealers with obtaining municipal securities business. The amendments also resulted from the MSRB's concern about the lack of effective transparency regarding bond ballot campaign contributions.[12]

Some industry participants and market observers continue to express concerns regarding the potential adverse effect on the integrity of the municipal securities market from dealer and dealer personnel contributions to bond ballot campaigns.[13] The proposed rule change addresses these concerns by augmenting the disclosures currently required under Rule G–37. These more detailed disclosures also will help inform the Board whether further action regarding bond ballot campaign contributions is warranted, up to and including a corresponding ban on engaging in

---

[3] Rule G–37(g)(iv) defines municipal finance professional as: (A) Any associated person primarily engaged in municipal securities representative activities (exclusive of sales activities with natural persons); (B) any associated person (including but not limited to any affiliated person of the dealer, as defined in Rule G–38) who solicits municipal securities business; (C) any associated person who is both (i) a municipal securities principal or a municipal securities sales principal and (ii) a supervisor of any persons described in (A) or (B) above; (D) any associated person who is a supervisor of any person described in (C) above up through and including, in the case of a dealer other than a bank dealer, the Chief Executive Officer or similarly situated official and, in the case of a bank dealer, the officer or officers designated by the board of directors of the bank as responsible for the day-to-day conduct of the bank's municipal securities dealer activities; or (E) any associated person who is a member of the dealer (or, in the case of a bank dealer, the separately identifiable department or division of the bank) executive or management committee or similarly situated officials, if any.

[4] Rule G–37(g)(v) defines non-MFP executive officer as an associated person in charge of a principal business unit, division or function or any other person who performs similar policy making functions for the dealer (or, in the case of a bank dealer, the separately identifiable department or division of the bank, as defined in Rule G–1), but does not include any MFP. Although Rule G–37 requires disclosure of non-MFP executive officer contributions, such contributions do not result in a ban on engaging in municipal securities business.

[5] Rule G–37(g)(vii) defines municipal securities business as: (A) The purchase of a primary offering of municipal securities from an issuer on other than a competitive bid basis (*e.g.,* a negotiated underwriting); (B) the offer or sale of a primary offering of municipal securities on behalf of any issuer (*e.g.,* a private placement); (C) the provision of financial advisory or consultant services to or on behalf of an issuer with respect to a primary offering of municipal securities in which the dealer was chosen to provide such services on other than a competitive bid basis; or (D) the provision of remarketing agent services to or on behalf of an issuer with respect to a primary offering of municipal securities in which the dealer was chosen to provide such services on other than a competitive bid basis.

[6] MSRB Form G–37 is the document pursuant to which dealers disclose contribution information as currently required by Rule G–37. The form is being revised to conform to the requirements resulting from the proposed rule change.

[7] Form G–37 is submitted by dealers through the existing MSRB Political Contribution Submission Service, which is the current system that accepts the submissions of Form G–37. Submitted Forms G–37 are made publicly available through the MSRB Web site.

[8] Rule G–37(g)(vi) defines ''official of such issuer'' or ''official of an issuer'' as any person (including any election committee for such person) who was, at the time of the contribution, an incumbent, candidate or successful candidate: (A) For elective office of the issuer which office is directly or indirectly responsible for, or can influence the outcome of, the hiring of a broker, dealer or municipal securities dealer for municipal securities business by the issuer; or (B) for any elective office of a state or of any political subdivision, which office has authority to appoint any person who is directly or indirectly responsible for, or can influence the outcome of, the hiring of a broker, dealer or municipal securities dealer for municipal securities business by an issuer.

[9] Contributions made by MFPs to issuer officials for whom such MFP is entitled to vote will not result in a ban on municipal securities business if such contributions, in total, do not exceed $250 to each issuer official, per election.

[10] *See* Securities Exchange Act Release No. 61381 (January 20, 2010), 75 FR 4126 (January 26, 2010) (File No. SR–MSRB–2009–18).

[11] Dealers are not required to disclose contributions made by MFPs and non-MFP executive officers to a bond ballot campaign for a ballot initiative with respect to which such person is entitled to vote if such contributions, in total, do not exceed $250 per ballot initiative.

[12] The MSRB noted that the lack of effective transparency results from political contribution disclosure requirements that vary from state to state and the difficulty of locating and extracting the relevant dealer-related and bond initiative-related information from the various public disclosure facilities. *See* MSRB Notice 2009–35 (June 22, 2009).

[13] Similar concerns have been expressed with regard to such contributions made by some municipal advisors. The Board expects to consider undertaking parallel rulemaking with respect to municipal advisor contributions to bond ballot campaigns when it develops additional rules for municipal advisors.

municipal securities business as a result of certain contributions.

Summary of Proposed Rule Change

The MSRB requested comment on a draft of the proposed rule change on August 15, 2012.[14] The description of the proposed rule change below revises certain provisions of the draft that was provided for comment in the Request for Comment based on the MSRB's review of comment letters, as further described below and in ''Discussion of Comments'' below. The proposed rule change revises Rule G–37(e)(i)(B)(2) to provide that, in disclosing the contribution amount made to a bond ballot campaign, the dealer also must include, in the case of in-kind contributions, the value and nature of the goods or services provided, including any ancillary services provided to, on behalf of, or in furtherance of the bond ballot campaign. The proposed rule change also requires dealers to disclose the specific date on which such contributions to bond ballot campaigns were made.

Proposed Rule G–37(e)(i)(B) requires dealers to disclose the full issuer name and full issue description of any primary offering resulting from voter approval of a bond ballot measure to which a contribution required to be disclosed has been made. All information is required to be reported in the calendar quarter in which the closing date for the issuance that was authorized by the bond ballot measure occurred. The proposed rule change contains a look-back provision for bond ballot campaign contributions that are made by an MFP or a non-MFP executive officer during the two years prior to an individual becoming an MFP or a non-MFP executive officer of a dealer.[15] The look-back provision will limit the additional disclosures required under proposed Rule G–37(e)(i)(B) to those items that would have been required to be disclosed if such individual had been an MFP or a non-MFP executive officer at the time of such contribution. Proposed Rule G–37(e)(i)(B) also requires dealers to disclose both the amount and source of any payments or reimbursements related to any bond ballot contribution, received by a dealer or its MFPs from any third party.[16]

The proposed rule change revises Rule G–37(g) to expand the definition of ''contribution'' and create a new term, the ''reportable date of selection.'' The proposed amendments to the definition of ''contribution'' distinguish between contributions made to an official of an issuer and contributions made to a bond ballot campaign. The term ''reportable date of selection'' is defined to refer to the specific date on which a dealer is selected, either in writing or orally, to engage in municipal securities business that must be reported on Form G–37.

Lastly, conforming amendments to Rule G–8(a)(xvi)(H) and (I) require dealers to maintain records of the supplemental information related to bond ballot campaign contributions that are required to be disclosed on Form G–37 under the proposed rule change.

Effective Date Of Proposed Rule Change

The MSRB requested an effective date for the proposed rule change no later than the start of the second calendar quarter following the date of SEC approval.

2. Statutory Basis

The MSRB believes that the proposed rule change is consistent with Section 15B(b)(2)(C) of the Act, which provides that the MSRB's rules shall:

> be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in municipal securities and municipal financial products, to remove impediments to and perfect the mechanism of a free and open market in municipal securities and municipal financial products, and, in general, to protect investors, municipal entities, obligated persons, and the public interest.

The MSRB believes that the proposed rule change is consistent with Section 15B(b)(2)(C) of the Act because it is intended to protect investors and the public interest and prevent fraudulent and manipulative acts and practices by adding greater specificity to the public disclosures surrounding contributions made by covered parties to bond ballot campaigns, and any municipal securities business awarded pursuant to such bond ballot measure. Access to such information in a centralized format on the MSRB's Web site (through Form G–37) has and will continue to substantially increase the amount of information available to market participants, thereby increasing market transparency and strengthening market integrity. The revisions also will assist the MSRB in its on-going review of Rule G–37 and potential conflicts of interest or other practices that may present challenges to the integrity of the municipal securities market related to political contributions by dealers and dealer personnel.

B. Self-Regulatory Organization's Statement on Burden on Competition

The MSRB does not believe that the proposed rule change would impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The MSRB solicited comment on the potential burdens of the proposed rule change in the Request for Comment. Among the questions asked were:

- Would the draft amendments help to protect the integrity of the municipal securities market, and are there specific benefits that issuers, investors and the public (including taxpayers) would realize from adopting the draft amendments?
- Would the draft amendments have any negative effects on issuers, investors and the public, or on the fairness, efficiency or overall integrity of the municipal securities market? If so, please describe in detail.
- Dealers are already required to collect, report and retain records of certain information in connection with bond ballot campaigns under the current provisions of Rules G–37 and G–8. What would be the incremental additional burden, if any, to dealers to collect, report and retain records of the additional items of information that would be required under the draft amendments?
- Are there alternative methods to providing the protections sought under the draft amendments that the MSRB should consider and that would be more effective and/or less burdensome?

The specific comments and responses thereto are discussed in Part 5. Of those commenters addressing issues of burdens, two stated that any burden in connection with the proposed rule change would be outweighed by the benefits, and five commenters supported even more expansive regulation to, among other things, ban dealers from making contributions to bond ballot campaigns. The MSRB addressed those commenters that were critical of the burdens from the proposed rule change by clarifying certain definitions and allowing additional time for implementation. The MSRB also notes that dealers already are required to report information on certain contributions and municipal

[14] *See* MSRB Notice 2012–43 (August 15, 2012) (''Request for Comment'').

[15] There is a similar look-back provision in current Rule G–37 for contributions to issuer officials. *See* Rule G–37(b)(i). As with that provision, disclosure is only required with respect to municipal securities business that results from the bond ballot measure after the effective date of the proposed rule change.

[16] Third parties include issuers.

securities business on Form G–37. The proposed rule change augments existing Rule G–37 by providing greater clarity and context to the information already provided under the rule. The MSRB believes that the burdens resulting from the proposed new disclosures are outweighed by the benefits accruing to investors and the marketplace in general.

The MSRB believes that these incremental burdens are necessary and appropriate to address ongoing concerns of pay-to-play practices with respect to bond ballot campaign contributions. The additional information required to be reported under the proposed rule change should be readily available to dealers and the public and is generally consistent with the type of information currently required to be reported under Rule G–37.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

In the Request for Comment,[17] the MSRB requested comment on a draft of the proposed rule change. Specifically, the MSRB sought comment on whether the proposed revisions to Rule G–37 and Rule G–8, as described herein, that would require additional public disclosure of certain information related to contributions made by covered parties to bond ballot campaigns, and the municipal securities business engaged in by dealers resulting from the bond ballot campaign to which they contributed, on revised Form G–37, and the maintenance of records related to such contributions, would be useful and helpful to the market in monitoring and accessing such dealer contribution information. In addition, the Board sought comments from the industry and other interested parties on all aspects of the proposed rule change and the range of practices that are undertaken by dealers, municipal advisors and other market participants in connection with contributions to bond ballot campaigns and related activities that can give rise to concerns regarding the integrity of the municipal securities market.

Discussion Of Comments

Comments on the Request for Comment were received from: (1) Barclays; (2) California Association of County Treasurers and Tax Collectors (''CACTTC''); (3) Center for Competitive Politics (''CCP''); (4) Government Financial Strategies Inc. (''GFS''); (5) Magis Advisors (''Magis''); (6) Morgan Stanley; (7) National Association of Independent Public Finance Advisors (''NAIPFA''); and (8) Securities Industry and Financial Markets Association (''SIFMA''). Summaries of these comments and the MSRB's responses follow.

General Support

Comments: Barclays stated the ''Board has clearly identified the legitimate concerns of industry participants and market observers regarding the adverse effect bond ballot activity by dealers and MFPs has on the integrity of the municipal securities market. Such concerns have a tendency to extend beyond issuances supported by bond ballot campaigns and reflect poorly on our industry as a whole.'' GFS stated that the disclosures contemplated by the proposed rule change would be an important step in preventing pay-to-play activities related to bond ballot campaign contributions. The MSRB discusses additional comments from these and other commenters below.

The Board should consider amendments to Rule G–37 to ban dealer contributions to bond ballot campaigns, or impose a ban on future business similar to that for certain dealer campaign contributions to issuer officials.

Comments: CACTTC recommended that the MSRB consider amendments to the rule that would include, ''an outright ban on brokers, dealers, or any other municipal finance professionals from contributing to bond ballot measures and/or their related committees'' and argued that such a ''ban would simply expand the existing ban on political contributions to public officials involved in approving related bond transactions.''[18] CACTTC stated that pay-to-play activities in municipal bond elections and transactions undermines the competitive process that ensures that taxpayer money is spent in the most efficient and effective manner and suggested that the MSRB amend Rule G–37 to ''either shed light on or eliminate pay-to-play activities.'' Magis expressed opposition to any circumstance where any market professional is permitted to directly, or indirectly, contribute to bond ballot campaigns that serve the interests of such a participant.

Barclays asked the Board to seek a more direct means to ''address conflicts of interest, actual and apparent, raised by cash and in-kind contributions of dealers and their municipal finance personnel (''MFPs'') to bond ballot campaigns.'' Barclays suggested that the Board consider measures that would prohibit dealers from engaging in municipal securities business for a clearly defined period of time after the dealer or any of its MFPs has made a non-*de minimis* cash or in-kind contribution to support a bond ballot campaign authorizing such municipal securities business. Barclays argued that the terms of such a prohibition should not turn on whether a dealer expects to be, or is, reimbursed for such contributions, and should apply with respect to the kinds of support activities identified in the Request for Comment[19] (*e.g.,* polling) whether or not local law would permit an issuer to engage in such activity.

Morgan Stanley cited a San Francisco Chronicle article that observed that ''in 150 of 155 cases (97%) where a dealer contributed to support a bond ballot election that authorized the bonds the underwriter was hired to underwrite'' and stated that ''[t]he continued allowance of this widely perceived pay-to-play practice damages the integrity of the municipal marketplace and allows outsiders (regulators, journalists and politicians) to question the practices of our marketplace.'' NAIPFA stated that the proposed amendments to Rule G–37 do not go far enough in terms of curtailing the practice of contributing to bond ballot campaign committees and will likely not have a significant impact on such contributions. NAIPFA also stated that it is unsure how the amendments alone will benefit issuers or the public interest since the proposed rule change does not prohibit or limit the practice of contributions to bond ballot campaigns. Finally, NAIPFA stated that bond ballot contributions are often made, ''for the purpose of influencing the selection or retention of underwriters, and are thus the equivalent of the impermissible pay-to-play contributions already banned under current Rule G–37.'' GFS believes that further action will be warranted as the Board continues to examine this area of rulemaking.

MSRB Response: The MSRB believes that the additional disclosures required by the proposed rule change are an appropriate regulatory response to the concerns identified. The MSRB believes that providing public access to disclosures of dealer contributions to bond ballot campaigns in a centralized format on the MSRB's Web site (through Form G–37) has substantially increased the amount of information available to

[17] *See* footnote 14.

[18] CACTTC indicated that the bond ballot contribution problem is most prevalent for school district financings in California due to proposition 39. The proposition was enacted in 2000 and, lowered to 55% from 66%, the amount of voter approval needed to approve a bond ballot measure.

[19] *See* footnote 14.

market participants, thereby increasing market transparency and strengthening market integrity.

The information gathered pursuant to the proposed rule change, coupled with the existing requirements of Rule G–37, will assist the Board as it continues to monitor dealer and dealer personnel contribution disclosures. Such monitoring will allow the Board to determine, in the future, whether a corresponding ban on business, as a result of such contributions, would be necessary to address any real or perceived linkage between such contributions to bond ballot campaigns (and related activities) and the award of municipal securities business.

The MSRB should amend Rule G–37 to request certain additional disclosures related to dealers' and their MFPs' contributions to bond ballot campaigns.

Comments: CACTTC supported the additional disclosure requirements for bond ballot campaigns and stated that an amendment to Rule G–37 is ''necessary to reduce the perception of pay-to-play and to help ensure that underwriters and other municipal financial professionals are not awarded bond transactions because they have contributed to related bond ballot measures.'' SIFMA [20] also supported the proposed rule change to require disclosure of whether a dealer or any of its MFPs or non-MFP executive officers received payments or reimbursements, related to any bond issuance resulting from a bond ballot campaign to which the dealer, its MFP or non-MFP executive officer or applicable PAC contributed, from any third party. SIFMA stated that these payments or reimbursements are not common and should be disclosed. SIFMA stated that such payments would be known to the dealer and disclosure would not cause much burden on the dealer and it would be material if any such payments were made. SIFMA also supported the proposed rule change to require dealers to provide the complete name of the entity that will issue the bonds that were authorized by the bond ballot campaign, to which a contribution was made by the dealer, its MFP or non-MFP executive officer (other than a *de minimis* contribution) or applicable PAC. SIFMA stated that the name of the issuer is always known by the dealer and would be beneficial if disclosed on Form G–37 and that such increased transparency would create more benefits than burdens on the regulated dealer community.

[20] Morgan Stanley supports the SIFMA comment letter.

GFS expressed concern about the lack of transparency in school bond campaign fundings and how it leads to corruption. GFS stated that it would be helpful to place in the public record information regarding the specific issuers and bond issues implicated through the actions of MFPs. GFS suggested requiring the disclosure, ''of compensation in excess of general industry compensation practices * * *.'' GFS also suggested requiring the disclosure of relevant information to investors when firms participating in the bond issue have contributed to election campaigns and the election campaigns to which the underwriters have contributed are administered by municipal advisors. Magis stated that there may be compelling reasons to require that disclosure of potential conflicts of interest also be made in official statements ''in order to avoid introducing error or omission to the issuer's official statement.'' GFS also recommended requiring reporting of payments made by underwriters to (not only payments received from) other professionals, such as financial advisors and election advisors and channeled through bond ballot campaigns.

MSRB Response: The MSRB believes that the additional disclosures that will be required under the proposed rule change provide the appropriate types of information that should be disclosed to the general public, including investors, about when firms participating in bond issues have contributed to election campaigns, by providing additional information that has not previously been collected and made available to the public. Such additional information includes: (a) Requiring dealers to disclose the full issuer name and the full issue description, which will provide increased public disclosure of the specific primary offering or offerings that resulted from the bond ballot campaign to which the dealer, or their personnel, contributed and was required to disclose under existing Rule G–37; and (b) requiring dealers to disclose additional information about in-kind contributions that are made to bond ballot campaigns, including the value and nature of goods and services that are provided to the campaign and any ancillary services that are provided to, on behalf of, or in furtherance of the bond ballot campaign by a dealer.

The MSRB does not believe there presently is a readily accessible standard or a ''base-line'' level of compensation for municipal securities transactions that would allow disclosure of ''excess'' compensation as urged by GFS. In response to comments suggesting that dealers should disclose whether a bond ballot campaign is administered by a municipal advisor, the MSRB believes that actual knowledge of whether the bond ballot campaign is administered by a municipal advisor would be required, and that such information is not generally known or available to support a comprehensive disclosure standard for the industry at this time.

In response to Magis's suggestion to require the disclosure of potential conflicts of interest in official statements, the MSRB notes that it does not have regulatory authority over issuers, and therefore does not have the authority to establish requirements regarding the content of official statements. The MSRB believes that GFS's recommendation to report the payments made by underwriters to other professionals that may be channeled through bond election campaigns is not necessary because, to the extent that such payments would represent indirect contributions by the dealer to a bond ballot campaign, such indirect contributions already are required to be disclosed under current Rule G–37.

The proposed amendments to Rule G–37 raise constitutional concerns.

Comments: CCP noted its concerns that ''the Board may take further action regarding dealer and dealer personnel contributions to bond ballot campaigns, up to and including a corresponding ban on business as a result of certain contributions.'' CCP stated that the Board has overlooked the long-standing constitutional distinction between contributions to candidates and those given to support or oppose ballot initiatives. ''Simply put, ballot measure committees receive stronger constitutional protection against government regulation than do candidates.'' CCP also argued that the MSRB's concern about certain practices related to bond ballot campaigns have nothing to do with the creation of a *quid pro quo* arrangement between the bond ballot measure committee and the contributors because the bond ballot measure committee is, under the law, an entirely separate entity from the issuer. ''There is no identity of interests between the person supported for election and the person making hiring and issuing decisions, as is the case in the candidate context and as the D.C. Circuit required in *Blount.* The Board's announcement and analysis make no mention of this crucial distinction.'' CCP suggested that the Board take into consideration the fact that ''ballot issue, ballot measure, and independent expenditure committees are granted far more constitutional protection than are candidate committees.''

MSRB Response: The MSRB recognizes the distinctions between contributions to candidates and bond ballot campaigns. The MSRB believes that the requirement under the proposed rule change to have dealers provides additional, basic information pertaining to contributions to bond ballot campaigns and any subsequent municipal securities business does not impinge upon the First Amendment rights of individuals and/or firms that will be responsible for providing disclosure of bond ballot campaign contributions.[21] As noted previously, the proposed rule change only will require disclosure of additional information pertaining to contributions to, and municipal securities business from, bond ballot campaigns and will not prohibit contributions to such campaigns.

Certain dealer and dealer personnel contributions to, and activities related to, bond ballot campaigns violate state laws in certain jurisdictions.

Comments: Magis cited an opinion of the California Legislative Counsel's Office that ''a school district or other local agency may not condition the award of an agreement to provide bond underwriting services on the underwriter also providing campaign services in support of that bond measure or another bond measure proposed by the school district or other local agency.'' Magis also stated that California law prohibits the expenditure of public monies on electioneering.

GFS argued that certain bond ballot campaign practices are contrary to the Best Practice recommendation of the Government Finance Officers Association and that

> [t]here are variations in bond election contribution patterns. Other underwriters simply administer bond election campaigns themselves. In doing so, those firms provide both monetary and in-kind value. Those underwriters may advertise this function as a ''service'' provided to issuers. Yet, in California and other states the issuers cannot administer bond election campaigns themselves. Still, in those facts and circumstances, the issuers invariably employ those underwriters to underwrite the bonds the voters approve. The practice has the appearance of those issuers doing indirectly through municipal finance professionals what the issuers cannot do directly.

MSRB Response: The MSRB has previously stated that contributions and expenditures by certain dealers and dealer personnel may assist an issuer in avoiding state law restrictions, and depending on the totality of the facts and circumstances, could independently violate Rule G–17, even if not precluded by Rule G–37.[22] The MSRB does not believe that any additional changes in Rule G–37 are necessary at this time.

The proposed amendments to the definitions of ''contribution'' and ''de minimis'' in Rule G–37 are problematic.

Comments: SIFMA stated that including election services or collateral work provided on behalf of an issuer, in addition to work done on behalf of a bond ballot campaign committee, in the revised definition of ''contribution'' to include the full range of cash and in-kind contributions is a significant change that greatly expands the scope of the reporting obligations to cover frequent routine communications between issuers and underwriters. SIFMA believes the proposed amendment blurs the line between work done for the bond ballot campaign committee which is to be reported on Form G–37 and traditional work for the issuer completed as part of the public finance transaction. SIFMA stated that only in-kind contributions to the bond ballot committee itself should be reportable and that references to work provided to the issuer should be struck from the proposed rule change. SIFMA argued that it would be burdensome on the dealer community to separately distinguish, track, quantify and report such information to the MSRB. SIFMA agreed that work done for or contributions made to the actual bond ballot campaign committee should be disclosed, as the bond ballot campaign committee is a separate legal entity from the issuer.

NAIPFA stated its support of the MSRB's proposed amendment to address ''in-kind'' contributions. GFS stated that it would be helpful to include reporting of in-kind contributions and the value of in-kind contributions, which are excluded from current reporting requirements under Rule G–37.

MSRB Response: The MSRB believes the public disclosure of all political contributions, including cash and in-kind services, will allow for greater public scrutiny of such contributions and the potential connection between them and the awarding of municipal securities business. However, the MSRB agrees that the definition of ''contribution'' should not include work provided to or on behalf of the issuer that is related to the completion of municipal securities business. The MSRB has amended the proposed rule change to clarify the appropriate nexus between ancillary services provided to, on behalf of, or in furtherance of a bond ballot campaign by a dealer or dealer personnel. The revisions will assist with clarifying that in-kind contributions that would be required to be reported by dealers will solely be required with respect to activities related to a bond ballot campaign and not with respect to activities undertaken to complete the associated municipal securities business.

The MSRB also notes that the term ''contribution,'' as defined in Rule G–37, includes anything of value, which has been interpreted to include in-kind contributions.[23] The proposed rule change will establish that the disclosure of in-kind contributions must include both the value and the nature of the goods or services provided.

The proposed amendments will impose undue burdens on dealers.

Comment: CCP stated that the proposed rule change would impose only recordkeeping burdens and would do little to advance the MSRB's anticorruption mission. CCP stated that the recordkeeping requirements for in-kind contributions do little to prevent corruption and would chill a kind of political participation—volunteer work. In addition, CCP stated that by requiring recordkeeping of non-*de minimis* contributions, and defining such contributions at the same rate as those

---

[21] In *Blount* v. *Securities and Exchange Commission,* 61 F.3d 938, 948 (DC Cir. 1995), the District Court determined that existing Rule G–37 advanced a compelling governmental interest to protect investors that did not abridge First Amendment rights and stated that ''municipal finance professionals are not in any way restricted from engaging in the vast majority of political activities, including making direct expenditures for the expression of their views * * *.''

[22] MSRB Rule G–17 provides that, in the conduct of its municipal securities or municipal advisory activities, each dealer and municipal advisor shall deal fairly with all persons and shall not engage in any deceptive, dishonest, or unfair practice. These principles of fair practice have previously been viewed as applicable in the context of the MSRB's efforts to eliminate pay-to-play activities in the municipal securities market. *See, e.g.,* MSRB Notice 2003–32 (August 6, 2003); *In the Matter of Pryor, McClendon, Counts & Co. et al.,* Order Making Findings and Imposing Remedial Sanctions and a Cease-and-Desist Order (February 6, 2002) (broker-dealer violated Rule G–17 by concealing certain political contributions that would have triggered a ban on business under Rule G–37). *See also* MSRB Reports, Draft Rule G–37, Concerning Political Contributions in the Municipal Securities Market, Volume 13, Number 4 (August, 1993); Testimony of Charles W. Fish, Chairman, Municipal Securities Rulemaking Board before the Subcommittee on Telecommunications and Finance of the Committee on Energy and Commerce, United States House of Representatives (September 7, 1993) at 59, n.86.

[23] *See* Rule G–37 Interpretations, Questions and Answers Concerning Political Contributions and Prohibitions on Municipal Securities Business: Rule G–37, Question II. 18 (May 24, 1994). For example, if a MFP uses dealer's resources (*e.g.,* a political position paper prepared by dealer personnel) or incurs expenses in the conduct of dealer volunteer work (*e.g.,* hosting a reception), then the value of such resources or expenses would constitute a contribution.

for candidates, the proposed revisions conflate contributions to candidates with those to support or oppose ballot initiatives.

MSRB Response: The MSRB believes the requirements of the proposed rule change are necessary and appropriate and will assist the Board and the public in determining whether the awarding of municipal securities business is linked to certain dealer and dealer personnel contributions to bond ballot campaigns. The proposed rule change will assist with advancing the anticorruption objective of Rule G–37. The MSRB believes that potential burdens that may be caused by the recordkeeping requirements of the proposed rule change will be offset by the benefits to the MSRB and the public through greater clarity and context to existing bond ballot campaign contribution disclosures. The MSRB notes that dealers currently report certain political campaign contributions and the increased reporting and submission requirements of the proposed rule change will only involve a slight, incremental increase to existing requirements.

The MSRB also notes that certain dealers also are required to report bond ballot contribution information at the state and local level. These requirements demonstrate the strong public interest for reporting such contributions, and for dealers in such jurisdictions, the burdens of the proposed rule change are arguably even lower.

The MSRB does not believe that the proposed rule change will prohibit or regulate personal volunteer work by dealers and MFPs nor will it chill volunteer work as suggested by CCP. The proposed rule change will require the disclosure of the contribution amounts that are made to bond ballot campaigns by covered parties which, in the case of in-kind contributions, include both the value and the nature of the goods or services provided, including any ancillary services provided to, on behalf of, or in furtherance of the bond ballot campaign. As with existing Rule G–37, the proposed rule change does not prohibit or restrict individual personal volunteer work.[24]

The MSRB does not agree with CCP's comment that defining *de minimis* contributions at the same level as those for candidates, and the attendant recordkeeping requirements for in-kind contributions, is improper. Rather, the MSRB believes that there are efficiencies in maintaining consistent *de minimis* levels for Rule G–37, even with respect to in-kind contributions.

Comment: SIFMA stated that requiring the dealer to provide the specific date on which a contribution was given by the dealer to the bond ballot campaign is burdensome depending upon the number of non-*de minimis* reportable contributions that need to be tracked and reported to the MSRB. SIFMA requested that the MSRB not expand the Form G–37 disclosure to include the specific date the dealer was selected to engage in municipal securities business because the date the dealer was selected to engage in such municipal securities business may not be clear or ascertainable by the dealer. SIFMA believes that each issuer typically has its own method for the selection and final approval of underwriters, which makes it difficult or impossible to standardize the process.

MSRB Response: In response to SIFMA's concern over difficulties in identifying the precise date when a dealer is selected to engage in a municipal securities business, the MSRB has proposed defining a new term: ''reportable date of selection.'' Specifically, the ''reportable date of selection'' will be the date of the earliest to occur of (i) The execution of an engagement letter, (ii) the execution of a bond purchase agreement, or (iii) the receipt of formal notification (provided either in writing or orally) from, or on behalf of, the issuer that the dealer has been selected to engage in municipal securities business.

Comments: SIFMA requested that any rule change be applied from its effective date forward, with no contributions made, or transactions sold or issued before the effective date of the rule, be subject to reporting. SIFMA proposed ''a two-year look back for contributions by current individual MFPs or non-MFPs executive officers for bond ballot campaign contributions that result in a municipal bond offering underwritten by the dealer, to be phased in from the effective date of the rule.''[25] SIFMA also proposed a limitation on reporting municipal securities business resulting from a bond ballot campaign to which a contribution was made so that the dealer would only be required to look back two years prior to the business being undertaken, and that ''transactions underwritten by the dealer after a contribution was made to a bond ballot campaign committee by a former employee should not need to be reported.''

NAIPFA stated that ''any burden, incremental or otherwise, placed upon municipal market participants in connection with the imposition of the Amendments will be outweighed by the benefits that the Amendments will have to the municipal market in terms of improving hiring practices, market transparency, and the policing'' of dealer contributions to bond ballot campaigns. Similarly, GFS stated that it does not believe the disclosure requirements that are contemplated by the proposed rule change would impose undue burdens on underwriters, nor would a future extension of the disclosure requirements to municipal advisors.

MSRB Response: The MSRB believes that the proposed rule change should only apply with respect to municipal securities business with a sale or issuance date on or after the effective date of the proposed rule change. As a result, dealers will not be required to supplement the bond ballot campaign disclosures made with respect to offerings prior to the effective date. However, with respect to offerings after the effective date, dealers must look back at any contribution made by a covered party on or after February 1, 2010 (the date on which dealers were first required to record and disclose contributions to bond ballot campaigns).[26]

In addition, the MSRB believes that the look-back provisions for contributions made by an individual prior to becoming an MFP or a non-MFP executive officer of a dealer should be limited to two years, consistent with the existing timeframe for which such

[24] *Ibid.* The MSRB has previously provided guidance regarding the treatment of contributions as the use of dealer resources or the incurrence of expenses by dealers in connection with a political campaign. The MSRB has made clear that Rule G–37 does not prohibit or limit individuals from providing volunteer services in support of an issuer official, and has also noted that certain incidental expenses incurred by such individual would generally not be treated as a contribution. *See* Rule G–37 Question and Answer II.18 (May 24, 1994). For example, personal expenses incurred by an MFP in the conduct of volunteer work, which expenses are purely incidental to the volunteer work and are unreimbursed by the dealer (*e.g.,* cab fares and personal meals), would not constitute a contribution. Also *see* Rule G–37, Question II.19 (August 18, 1994). An employee of a dealer generally can donate their time to an issuer official's campaign without such time being viewed as a contribution by the dealer to the official, so long as the employee is volunteering his or her time during non-work hours, or is using previously accrued vacation time or the dealer is not otherwise paying the employee's salary (*e.g.,* an unpaid leave of absence). These principles would apply equally to individuals providing volunteer services in connection with a bond ballot campaign.

[25] SIFMA also stated any applicable look back provision should not take into account contributions made, or transactions sold or issued before the effective date of the rule.

[26] *See* footnote 10.

contributions are ordinarily attributable to the dealer under Rule G–37. The MSRB also believes that dealers must continue to report primary offerings pertaining to bond ballot campaign contributions of an MFP or non-MFP executive officer that left the dealer, as such contributions are properly attributable to such dealer.

The proposed amendments to Rule G–37 should apply to municipal advisors.

Comments: NAIPFA believes that municipal advisors should be subject to the proposed amendments when and if adopted. In addition, NAIPFA supported the inclusion of municipal advisors within the provisions of current Rule G–37 and, in particular, those portions contained within Rule G–37(c) and (d) in order to prevent municipal advisors from circumventing their disclosure obligations as well as the ban on campaign contributions. GFS stated that ''[a]mong other things, once the definition of the 'municipal advisor' concept is finalized by the Securities and Exchange Commission, financial advisors and other municipal advisors can be brought within the scope of the regulation.'' Magis and SIFMA also supported the application of the proposed amendments to municipal advisors.

MSRB Response: The MSRB previously proposed a new rule that would apply pay-to-play restrictions to municipal advisors but withdrew such proposal pending final rulemaking by the SEC on a permanent municipal advisor registration rule and related definitional matters.[27] The MSRB will consider including the same types of disclosures required by the proposed rule change in any such rule it may propose in the future with regard to municipal advisors.

Rule G–37 should have more timely and/or expansive reporting requirements.

Comments: GFS recommended that the Board consider requiring reporting promptly after contributions are made, and in any event, prior to elections and in time to inform the electorate. Magis expressed concern that existing Form G–37 submissions by underwriters occur only quarterly and suggested that the Board consider ''more timely disclosure of these conflicts of interest prior to the bond election. * * *''

MSRB Response: The MSRB believes that the current quarterly reporting scheme required under Rule G–37 provides adequate and timely information about dealer and dealer personnel contributions to bond ballot campaigns and does not intend to expand the reporting requirements at this time.

The EMMA system should provide for easier access to the disclosures submitted by dealers relating to bond ballot campaign contributions and related information.

Comments: GFS stated that ''EMMA's online campaign contribution report records are difficult to search in a systematic manner. For example, EMMA's records cannot be searched at present by issuer names or titles of bond issues, which voters may wish to do.'' GFS recommended making campaign contribution reports more easily searchable on EMMA by issuer name and by titles of bond issues. Magis also stated that EMMA is exceedingly difficult to search by issuer name because the records are ''dealer name-centric.'' Magis supports the ability to access Form G–37 information by state or type of issuer.

MSRB Response: Comments about the usability and functionality of disclosure on EMMA are beyond the scope of the proposed rule change. The MSRB is continually evaluating the effectiveness of EMMA and may consider initiating such changes in the future.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve or disapprove such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–MSRB–2013–01 on the subject line.

Paper Comments

- Send paper comments in triplicate to Elizabeth M. Murphy, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–MSRB–2013–01. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the MSRB. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–MSRB–2013–01 and should be submitted on or before March 7, 2013.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[28]

Kevin M. O'Neill,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–68880; File No. SR–Phlx–2013–10]

Self-Regulatory Organizations; NASDAQ OMX PHLX LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Certain Fees in Section II of the Pricing Schedule

February 8, 2013.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 [2] thereunder, notice is hereby given that on January 25, 2013, NASDAQ OMX PHLX LLC (''Phlx'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Section II of the Pricing Schedule entitled ''Multiply Listed Options Fees'' [3] to amend fees applicable to a Firm. The Exchange also proposes to make a technical amendment to Section VI entitled ''Membership Fees.''

While changes to the Pricing Schedule pursuant to this proposal are effective upon filing, the Exchange has designated the proposed amendment to be operative on February 1, 2013.

The text of the proposed rule change is provided in Exhibit 5. The text of the proposed rule change is also available on the Exchange's Web site at *http://nasdaqomxphlx.cchwallstreet.com/,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of this filing is to increase certain fees applicable to Firms in Section II of the Pricing Schedule to more closely align the electronic Firm Penny Pilot Options [4] Transaction Charge with other fees in Sections II of the Pricing Schedule.

Currently, the Exchange assesses Firm Options Transaction Charges in Penny Pilot Options as follows: $0.40 per contract for an electronic order and $0.25 per contract for an order originating from the Exchange floor. The Exchange assesses Firm Options Transaction Charges in non-Penny Pilot Options [5] as follows: $0.45 per contract for an electronic order and $0.25 per contract for an order originating from the Exchange floor. The Exchange proposes to increase the electronic Firm Options Transaction Charge in Penny Pilot Options from $0.40 to $0.44 per contract.

Currently, the Exchange reduces electronic Firm Options Transaction Charges in Penny Pilot and non-Penny Pilot Options to $0.13 per contract and $0.00 per contract for electronic Complex Orders that add liquidity for a given month provided that a Firm has volume greater than 600,000 electronically-delivered contracts in a month (''Electronic Firm Fee Discount''). The Exchange proposes to reduce electronic Firm Options Transaction Charges in Penny Pilot and non-Penny Pilot Options, including electronic Complex Orders that add liquidity,[6] to $0.17 per contract [7] if a Firm meets the volume requirement of the Electronic Firm Fee Discount. Finally, the Exchange proposes to amend the Firm volume requirement for the Electronic Firm Fee Discount by lowering it from 600,000 electronically-delivered contracts to 500,000 electronically-delivered contracts.

The Exchange also proposes to amend Section VI, Part A of the Pricing Schedule entitled ''Permit and Registration Fees'' to make a technical amendment to correct the text of the Pricing Schedule. The Exchange amended the Permit Fees on January 2, 2013 to increase the Permit Fee for Phlx Members transacting business on Phlx from $2,000 to $2,100 per month.[8] At that time, the Exchange inadvertently did not also update the paragraph explaining how a member qualifies for the lower Permit Fee. The Exchange proposes to update the Pricing Schedule to reflect the Permit Fee for Phlx Members transacting business on Phlx is $2,100 in note 15 which accompanies the Permit Fee to update and clarify the Pricing Schedule.

2. Statutory Basis

The Exchange believes that its proposal to amend its Pricing Schedule is consistent with Section 6(b) of the Act [9] in general, and furthers the objectives of Section 6(b)(4) of the Act,[10] in particular, in that it is an equitable allocation of reasonable fees and other charges among Exchange members.

The Exchange believes that increasing the Firm Options Transaction Charge from $0.40 to $0.44 per contract is

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] Multiply Listed Options includes options overlying equities, ETFs, ETNs and indexes which are Multiply Listed.

[4] The Penny Pilot was established in January 2007; and in October 2009, it was expanded and extended through June 30, 2013. *See* Securities Exchange Act Release Nos. 55153 (January 23, 2007), 72 FR 4553 (January 31, 2007) (SR–Phlx–2006–74) (notice of filing and approval order establishing Penny Pilot); 60873 (October 23, 2009), 74 FR 56675 (November 2, 2009) (SR–Phlx–2009–91) (notice of filing and immediate effectiveness expanding and extending Penny Pilot); 60966 (November 9, 2009), 74 FR 59331 (November 17, 2009) (SR–Phlx–2009–94) (notice of filing and immediate effectiveness adding seventy-five classes to Penny Pilot); 61454 (February 1, 2010), 75 FR 6233 (February 8, 2010) (SR–Phlx–2010–12) (notice of filing and immediate effectiveness adding seventy-five classes to Penny Pilot); 62028 (May 4, 2010), 75 FR 25890 (May 10, 2010) (SR–Phlx–2010–65) (notice of filing and immediate effectiveness adding seventy-five classes to Penny Pilot); 62616 (July 30, 2010), 75 FR 47664 (August 6, 2010) (SR–Phlx–2010–103) (notice of filing and immediate effectiveness adding seventy-five classes to Penny Pilot); 63395 (November 30, 2010), 75 FR 76062 (December 7, 2010) (SR–Phlx–2010–167) (notice of filing and immediate effectiveness extending the Penny Pilot); 65976 (December 15, 2011), 76 FR 79247 (December 21, 2011) (SR–Phlx–2011–172) (notice of filing and immediate effectiveness extending the Penny Pilot); 67326 (June 29, 2012), 77 FR 40126 (July 6, 2012) (SR–Phlx–2012–86) (notice of filing and immediate effectiveness extending the Penny Pilot); and 68534 (December 21, 2012), 77 FR 77174 (December 31, 2012) (notice of filing and immediate effectiveness extending the Penny Pilot). See also Exchange Rule 1034.

[5] Non-Penny Pilot refers to options classes not in the Penny Pilot.

[6] Today, a Firm that qualifies for the Electronic Firm Fee Discount would not be assessed an Options Transaction Charge for electronic Complex Orders that add liquidity because they are entitled to a fee reduction to $0.00 per contract.

[7] Today, a Firm that qualifies for the Electronic Firm Fee Discount would not be assessed a charge for electronic Complex Orders that add liquidity. Pursuant to this proposal, a Firm would be assessed $0.17 per contract for electronic Complex Orders that add liquidity.

[8] *See* Securities Exchange Act Release No. 68473 (December 19, 2012), 77 FR 76128 (December 19, 2012) (SR–Phlx–2012–140).

[9] 15 U.S.C. 78f(b).

[10] 15 U.S.C. 78f(b)(4).

reasonable because this fee is within the range of other fees in Section II of the Pricing Schedule. The Exchange currently assesses an electronic Firm Options Transaction Charge in non-Penny Pilot Options of $0.45 per contract and an electronic Broker-Dealer Options Transaction Charge in Penny Pilot Options of $0.45 per contract. The Exchange generally assesses lower fees for Penny Pilot Options as compared to non-Penny Pilot Option because those securities are among the most actively traded and liquid options. This is the case today for Specialist, Market Maker and Broker-Dealer Fees.[11]

The Exchange believes that increasing the Firm Options Transaction Charge from $0.40 to $0.44 per contract is equitable and not unfairly discriminatory for the reasons which follow. Firms will continue to be assessed a higher fee than a Customer who pays no fee to transact electronic Penny Pilot Options. Customer order flow brings unique benefits to the market which benefits all market participants through increased liquidity. Similarly, Firms will continue to be assessed higher fees than Specialists[12] and Market Makers[13] in electronic Penny Pilot Options[14] because Specialists and Market Makers have obligations to the market and regulatory requirements,[15] which normally do not apply to other market participants. They have obligations to make continuous markets, engage in a course of dealings reasonably calculated to contribute to the maintenance of a fair and orderly market, and not make bids or offers or enter into transactions that are inconsistent with a course of dealings. The proposed differentiation as between Customers, Specialists and Market Makers and other market participants recognizes the differing contributions made to the liquidity and trading environment on the Exchange by these market participants, as well as the differing mix of orders entered. Broker-Dealers and Firms today pay higher fees as compared to a Professional[16] for electronic Penny Pilot Options transactions and this would not change. With respect to Professionals, they have access to more information and technological advantages as compared to Customers and Professionals do not bear the obligations of Specialists or Market Makers. Also, Professionals engage in trading activity similar to that conducted by Specialists or Market Makers. For example, Professionals continue to join bids and offers on the Exchange and thus compete for incoming order flow. For these reasons, the Exchange believes that Professionals may be priced higher than a Customer and may be priced equal to or higher than a Specialist or Market Maker. Finally, the Firm will continue to be assessed a lower fee as compared to a Broker-Dealer. The Exchange believes that increasing the Firm electronic Penny Pilot Options Transaction Charge to $0.44 per contract does not misalign the current rate differentials between a Broker-Dealer and a Firm because the Exchange is narrowing the differential to $.01 per contract. Further, the Exchange is increasing the discounted fee for Firms that qualify for the Electronic Firm Fee Discount for all electronic orders, including electronic Complex Orders that add liquidity, to $0.17 per contract. This will also serve to further align the rate differentials as between a Broker-Dealer and a Firm.

The Exchange believes that it is reasonable to decrease the Electronic Firm Fee Discount for electronic Options Transaction Charges in Penny Pilot and non-Penny Pilot Options from $0.13 to $0.17 per contract, decrease the fee deduction for Firm electronic Complex Orders that add liquidity from no fee to $0.17 per contract and decrease the Firm volume requirement from 600,000 to 500,000 electronically-delivered contracts because the Exchange is continuing to offer Firms discounts if they qualify for the Electronic Firm Fee Discount. By decreasing the Firm volume requirement from 600,000 to 500,000 electronically-delivered contracts, the Exchange believes that additional market participants transacting Firm orders would be able to qualify for the discount. Despite the increase to the Firm electronic Penny Pilot Options Transaction Charge, the Exchange believes the amendments to the Electronic Firm Fee Discount should continue to attract electronic Firm volume to the Exchange.

The Exchange believes that it is equitable and not unfairly discriminatory to decrease the Electronic Firm Fee Discount for electronic Options Transaction Charges in Penny Pilot and non-Penny Pilot Options from $0.13 to $0.17 per contract, decrease the fee deduction for Firm electronic Complex Orders that add liquidity from no fee to $0.17 per contract and decrease the Firm volume requirement from 600,000 to 500,000 electronically-delivered contracts for the Electronic Firm Fee Discount because all Firms will continue to have an opportunity to qualify for this incentive as they do today, provided they achieve the requisite volume. The Exchange also believes that the increased opportunity to obtain the Electronic Firm Fee Discount, because of the reduced volume requirement, will assist Firms to offset the increased Firm fee proposed herein. While the Exchange is decreasing the discount (from no charge to $0.17 per contract) on Firm electronic Complex Orders that add liquidity, the Exchange believes that reducing the discount for all Firm electronic Penny Pilot and non-Penny Pilot Options Transaction Charges by the same amount is equitable and not unfairly discriminatory.

Finally, the Exchange believes that the technical amendment to Section VI of the Pricing Schedule to amend the reference to the Permit Fee for Phlx Members transacting business on Phlx is reasonable, equitable and not unfairly discriminatory because the proposed amendment should clarify the incorrect text on the Pricing Schedule and provide consistent information in that section of the Pricing Schedule.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The Exchange believes that increasing the electronic Firm Penny Pilot Options Transaction Charge does not misalign the pricing in Section II as between the market participants. The Firm electronic Options Transaction Charges in Penny Pilot Options would continue to be higher than Customer fees, electronic Professional fees and electronic Specialist and Market Maker fees in

[11] The Exchange assesses an electronic Specialist and Market Maker Options Transaction Charge in Penny Pilot Options of $0.22 per contract as compared to an electronic Specialist and Market Maker Options Transaction Charge in non-Penny Pilot Options of $0.23 per contract. The Exchange assesses an electronic Broker Dealer Options Transaction Charge in Penny Pilot Options of $0.45 per contract as compared to an electronic Broker Dealer Options Transaction Charge in non-Penny Pilot Options of $0.60 per contract.

[12] A ''Specialist'' is an Exchange member who is registered as an options specialist pursuant to Rule 1020(a).

[13] A ''Market Maker'' includes Registered Options Traders (Rule 1014(b)(i) and (ii)), which includes Streaming Quote Traders (*see* Rule 1014(b)(ii)(A)) and Remote Streaming Quote Traders (*see* Rule 1014(b)(ii)(B)). Directed Participants are also market makers.

[14] Specialists and Market Maker pay $0.22 per contract to transact electronic Penny Pilot Options.

[15] *See* Rule 1014 titled ''Obligations and Restrictions Applicable to Specialists and Registered Options Traders.''

[16] The term ''Professional'' means any person or entity that (i) is not a broker or dealer in securities, and (ii) places more than 390 orders in listed options per day on average during a calendar month for its own beneficial account(s). *See* Rule 1000(b)(14).

Penny Pilot Options. Additionally, the increased Firm fee narrows the differential as between Firms and Broker-Dealers. Further, the Exchange is offsetting the Firm fee increase with an increased opportunity to obtain the Electronic Firm Fee Discount of $0.17 per contract by decreasing the Firm volume requirement. The increased Firm discount of $0.17 per contract applies equally to all Firms. The Exchange does not believe that any of the proposed amendments impose a burden on competition as between market participants. The Exchange proposes to balance an increased fee applicable only to Firms with an increased opportunity for Firms to benefit from a discount.

The Exchange operates in a highly competitive market, comprised of eleven exchanges, in which market participants can easily and readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive. Accordingly, the fees that are assessed by the Exchange must remain competitive with fees charged by other venues and therefore must continue to be reasonable and equitably allocated to those members that opt to direct orders to the Exchange rather than competing venues.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act.[17] At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–Phlx–2013–10 on the subject line.

Paper Comments

- Send paper comments in triplicate to Elizabeth M. Murphy, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–Phlx–2013–10. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–Phlx–2013–10 and should be submitted on or before March 7, 2013.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[18]

Kevin M. O'Neill,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–68889; File No. SR–Phlx–2013–15]

Self-Regulatory Organizations; NASDAQ OMX PHLX LLC; Notice of Filing of Proposed Rule Change for the Permanent Approval of a Pilot Program To Permit PSX To Accept Inbound Orders Routed by Nasdaq Execution Services LLC From the BX Equities Market

February 8, 2013.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (the "Act")[2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on February 6, 2013, NASDAQ OMX PHLX, LLC ("Exchange" or "Phlx") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing with the Commission a proposed rule change for the permanent approval of its pilot program to permit the NASDAQ OMX PSX facility of PHLX ("System") to accept inbound orders routed by Nasdaq Execution Services LLC ("NES") from the NASDAQ OMX BX Equities Market of NASDAQ OMX BX, Inc. ("BX").

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

[1] 15 U.S.C.78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

In conjunction with BX providing outbound routing services to all markets using its affiliated routing broker, NES,[4] PHLX proposed that NES be permitted to route orders from BX to the Exchange on a pilot basis, subject to certain limitations and conditions, as described below.[5] The current pilot program expires March 30, 2013.[6]

NES is a broker-dealer and member of NASDAQ, PHLX and BX. NES provides all routing functions for The NASDAQ Stock Market (''NASDAQ''), BX and PHLX. BX, NASDAQ, PHLX and NES are affiliates. Accordingly, the affiliate relationship between PHLX and NES, its member, raises the issue of an exchange's affiliation with a member of such exchange. Specifically, in connection with prior filings, the Commission has expressed concern that the affiliation of an exchange with one of its members raises the potential for unfair competitive advantage and potential conflicts of interest between an exchange's self-regulatory obligations and its commercial interests.[7]

Recognizing that the Commission has previously expressed concern regarding the potential for conflicts of interest in instances where a member firm is affiliated with an exchange of which it is a member, the Exchange previously proposed, and the Commission approved, limitations and conditions on NES's affiliation with the Exchange.[8] Also recognizing that the Commission has expressed concern regarding the potential for conflicts of interest in instances where a member firm is affiliated with an exchange to which it is routing orders, the Exchange previously proposed, and the Commission approved,[9] NES's affiliation with the Exchange to permit the Exchange to accept inbound orders that NES routes in its capacity as a facility of NASDAQ, subject to the certain limitations and conditions. The Exchange now proposes to permit PHLX to accept inbound orders that NES routes in its capacity as a facility of BX on a permanent basis, subject to the limitations and conditions of this pilot:

- First, the Exchange and FINRA maintain a Regulatory Contract, as well as an agreement pursuant to Rule 17d–2 under the Act (''17d–2 Agreement'').[10] Pursuant to the Regulatory Contract and the 17d–2 Agreement, FINRA is allocated regulatory responsibilities to review NES's compliance with certain Exchange rules.[11] Pursuant to the Regulatory Contract, however, PHLX retains ultimate responsibility for enforcing its rules with respect to NES.
- Second, FINRA monitors NES for compliance with the Exchange's trading rules, and collects and maintains certain related information.[12]
- Third, FINRA provides a report to the Exchange's chief regulatory officer (''CRO''), on a quarterly basis, that: (i) Quantifies all alerts (of which FINRA is aware) that identify NES as a participant that has potentially violated Commission or Exchange rules, and (ii) lists all investigations that identify NES as a participant that has potentially violated Commission or Exchange rules.
- Fourth, the Exchange has in place PHLX Rule 985, which requires The NASDAQ OMX Group, Inc., as the holding company owning both the Exchange and NES, to establish and maintain procedures and internal controls reasonably designed to ensure that NES does not develop or implement changes to its system, based on non-public information obtained regarding planned changes to the Exchange's systems as a result of its affiliation with the Exchange, until such information is available generally to similarly situated Exchange members, in connection with the provision of inbound order routing to the Exchange.

The Exchange has met all the above-listed conditions. By meeting the above conditions, the Exchange has set up mechanisms that protect the independence of the Exchange's regulatory responsibility with respect to NES, as well as demonstrate that NES cannot use any information advantage it may have because of its affiliation with the Exchange. Because the Exchange has met all the above-listed conditions, it now seeks permanent approval of this inbound routing relationship. The Exchange will continue to comply with the conditions 1–4 stated above.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the provisions of Section 6 of the Act,[13] in general, and with Sections 6(b)(5) of the Act,[14] in particular, in that the proposal is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest, because the proposed rule change will allow the Exchange to continue to receive inbound orders from NES, acting in its capacity as a facility of BX, in a manner consistent with prior approvals and established protections. The Exchange believes that these conditions establish mechanisms that protect the independence of the Exchange's regulatory responsibility with respect to NES, as well as ensure that NES cannot use any information it may have because of its affiliation with the Exchange to its advantage.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act, as amended. Permanent approval of the current pilot program does not raise any issues of intramarket competition because it involves inbound routing from an affiliated exchange. Nor does it result in a burden on competition among exchanges, because there are many competing exchanges that provide routing services, including through an affiliate.

[10] 17 CFR 240.17d–2.

[11] NES is also subject to independent oversight by FINRA, its designated examining authority, for compliance with financial responsibility requirements.

[12] Pursuant to the Regulatory Contract, both FINRA and the Exchange collect and maintain all alerts, complaints, investigations and enforcement actions in which NES (in its capacity as a facility of BX routing orders to PHLX) is identified as a participant that has potentially violated applicable Commission or Exchange rules. The Exchange and FINRA retain these records in an easily accessible manner in order to facilitate any potential review conducted by the Commission's Office of Compliance Inspections and Examinations.

[14] 15 U.S.C. 78f(b)(5).

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Exchange consents, the Commission shall: (a) By order approve or disapprove such proposed rule change, or (b) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–Phlx–2013–15 on the subject line.

Paper Comments

- Send paper comments in triplicate to Elizabeth M. Murphy, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–Phlx–2013–15. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, on business days between the hours of 10 a.m. and 3 p.m., located at 100 F Street NE., Washington, DC 20549–1090. Copies of the filing will also be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–Phlx–2013–15 and should be submitted on or before March 7, 2013.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[15]

Deputy Secretary.

[FR Doc. 2013–03396 Filed 2–13–13; 8:45 am]

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–68888; File No. SR–CBOE–2012–120]

Self-Regulatory Organizations; Chicago Board Options Exchange, Incorporated; Order Granting Approval to Proposed Rule Change To Establish a Pilot Program, as Modified by Amendment Nos. 2, 3, and 4, To List and Trade a P.M.-Settled S&P 500 Index Option Product

February 8, 2013.

I. Introduction

On December 5, 2012, Chicago Board Options Exchange, Incorporated (the ''Exchange'' or ''CBOE'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] a proposed rule change to permit the listing and trading of P.M.-settled options on the Standard & Poor's 500 Index (''S&P 500''). On December 17, 2012, the Exchange filed Amendments No. 1 and 2 to the proposed rule change.[3] The proposed rule change was published for comment in the **Federal Register** on December 26, 2012.[4] On January 4, 2013, the Exchange filed Amendment No. 3 to the proposed rule change.[5] On January 29, 2013, the Exchange filed Amendment No. 4 to the proposed rule change.[6] The Commission received no comment letters on the proposal. This order approves the proposed rule change, as modified, on a twelve-month pilot basis.

II. Description of the Proposal

The Exchange is proposing to amend its rules to permit it to list and trade, on a pilot basis, cash-settled S&P 500 index options with third-Friday-of-the-month (''Expiration Friday'') expiration dates for which the exercise settlement value will be based on the index value derived from the closing prices of component securities (''P.M.-settled''). The proposed contract (referred to as ''SPXPM'') is currently traded on a pilot basis on C2 Options Exchange, Incorporated (''C2'') (the ''C2 Pilot Program'').[7] CBOE is proposing to list and trade SPXPM on the same terms as the C2 Pilot Program, except that CBOE intends to list and trade SPXPM for an initial pilot period of twelve months.[8] CBOE and C2 will not concurrently list and trade SPXPM. In other words, C2 (which is wholly owned by the same corporation, CBOE Holdings, Inc., as CBOE) will cease trading SPXPM upon the introduction of SPXPM trading on CBOE. CBOE initially represented that it intended to begin trading SPXPM on or around January 22, 2013, but in Amendment No. 4, CBOE instead represented its intent to begin trading SPXPM on February 19, 2013.[9]

CBOE will list and trade SPXPM in a manner similar to how SPXPM currently is listed and traded on C2. In

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] The Exchange withdrew Amendment No. 1 on December 17, 2012. In Amendment No. 2, the Exchange represented that it does not believe that CBOE Trading Permit Holders will experience significant operations issues when trading P.M.-settled S&P 500 Index products on CBOE.

[4] *See* Securities Exchange Act Release No. 68457 (December 18, 2012), 77 FR 76135 (December 26, 2012) (''Notice''). An amendment to the Notice was published in the **Federal Register** on January 8, 2013 with a corrected deadline for comments of January 16, 2013. *See* Securities Exchange Act Release No. 68457 (December 18, 2012), 78 FR 1296 (January 8, 2013).

[5] In Amendment No. 3, the Exchange explained that any P.M.-settled S&P 500 Index options series that are part of the SPX options class and that have an expiration on any day other than the third Friday of every month will remain under the SPXPM class to avoid investor confusion. Because Amendment No. 3 is technical in nature, the Commission is not publishing it for comment.

[6] In Amendment No. 4, the Exchange modified the anticipated start date for the listing and trading of the proposed contact on CBOE from January 22, 2013 to February 19, 2013. *See* Notice, *supra* note 4, at 76136. Because Amendment No. 4 is technical in nature, the Commission is not publishing it for comment.

[7] *See* Securities Exchange Act Release No. 65256 (September 2, 2011), 76 FR 55969 (September 9, 2011) (''C2 SPXPM Approval Order'').

[8] The C2 Pilot Program is a fourteen month pilot.

[9] *See* Amendment No. 4, *supra* note 6.

particular, SPXPM on CBOE will use a $100 multiplier, and the minimum trading increment will be $0.05 for options trading below $3.00 and $0.10 for all other series. Strike price intervals will be set no less than 5 points apart. Consistent with existing rules for index options, the Exchange will allow up to twelve near-term expiration months, as well as LEAPS. Expiration processing will occur on the Saturday following Expiration Friday. The product will have European-style exercise and will not be subject to position limits, though there would be enhanced reporting requirements. The Exchange represents that the conditions for listing SPXPM on CBOE will be similar to those for SPX, which already is listed and traded on CBOE.[10]

The Exchange proposes that SPXPM be approved on a pilot basis for an initial period of twelve months. As part of the pilot program, the Exchange committed to submit a pilot program report to the Commission at least two months prior to the expiration date of the pilot program (the ''annual report''). The annual report will contain the same information currently provided to the Commission pursuant to the C2 Pilot Program and would include an analysis of volume, open interest, and trading patterns. The analysis will examine trading in the proposed option product as well as trading in the securities that comprise the S&P 500 index. In addition, for series that exceed certain minimum open interest parameters, the annual report will provide analysis of index price volatility and share trading activity. In addition to the annual report, the Exchange committed to provide the Commission with periodic reports while the pilot is in effect that would contain some, but not all, of the information contained in the annual report (''interim reports''). This information is identical to the information that C2 is required to report to the Commission pursuant to the C2 Pilot Program.

III. Discussion and Commission Findings

After careful consideration of the proposal, the Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange,[11] and, in particular, the requirements of Section 6 of the Act.[12] Specifically, the Commission finds that the proposed rule change is consistent with Section 6(b)(5) of the Act,[13] which requires that an exchange have rules designed to remove impediments to and perfect the mechanism of a free and open market and to protect investors and the public interest, to allow CBOE to conduct a limited, and carefully monitored, pilot as proposed.

As noted in the Commission's order approving the listing and trading of SPXPM on C2 on a pilot program basis, the Commission has concerns about the potential impact on the market at expiration for the underlying component stocks for a P.M.-settled, cash-settled index option such as SPXPM.[14] The potential impact today remains unclear, given the significant changes in the closing procedures of the primary markets over the past two decades. The Commission is mindful of the historical experience with the impact of P.M. settlement of cash-settled index derivatives on the underlying cash markets, but recognizes that these risks may be mitigated today by the enhanced closing procedures that are now in use at the primary equity markets.

To assist the Commission in assessing any potential impact of a P.M.-settled S&P 500 index option on the options markets as well as the underlying cash equities markets, CBOE will be required to submit data to the Commission in connection with the pilot in exactly the same scope and format as C2 was required to submit as a condition of Commission approval of SPXPM on a pilot basis. The Commission believes that CBOE's proposed twelve-month pilot, together with the data and analysis that CBOE will provide to the Commission, will allow CBOE and the Commission to monitor for and assess any potential for adverse market effects. Specifically, the data and analysis will assist the Commission in evaluating the effect of allowing P.M. settlement for S&P 500 index options on the underlying component stocks.

CBOE's proposed twelve-month pilot will enable the Commission to collect current data to assess and monitor for any potential for impact on markets, including the underlying cash equities markets. In particular, the data collected from CBOE's pilot program will help inform the Commission's consideration of whether the SPXPM pilot should be modified, discontinued, extended, or permanently approved. The P.M. settlement pilot information should help the Commission assess the impact on the markets and determine whether other changes are necessary. Furthermore, the Exchange's ongoing analysis of the pilot should help it monitor any potential risks from large P.M.-settled positions and take appropriate action on a timely basis if warranted.

As the Commission noted when it approved C2's proposal to list and trade SPXPM, approval of CBOE's proposal to transfer listing of SPXPM from C2 to CBOE could benefit investors and the public interest to the extent it attracts trading in P.M.-settled S&P 500 index options from the opaque OTC market to the more transparent exchange-listed markets, where trading in the product will be subject to exchange trading rules and exchange surveillance.[15]

The Exchange represents that it has adequate surveillance procedures to monitor trading in these options thereby helping to ensure the maintenance of a fair and orderly market, and has represented that it has sufficient capacity to handle additional traffic associated with this new listing.[16] In addition, CBOE represents that it does not expect that its Trading Permit Holders will experience significant operation issues as a result of the cessation of trading on C2 of SPXPM upon the introduction of trading of SPXPM on CBOE.[17] CBOE stated that there are no C2 Trading Permit Holders that are not also CBOE Trading Permit Holders, so any C2 Trading Permit Holder that is currently trading SPXPM on C2 will have access to trade SPXPM on CBOE.[18]

For the reasons discussed above, the Commission finds that CBOE's proposal is consistent with the Act, including Section 6(b)(5) thereof, in that it is designed to remove impediments to and perfect the mechanism of a free and open market, and, in general, to protect investors and the public interest. As it found in the case of C2's original proposal to list and trade SPXPM, and in light of the enhanced closing

[10] *See* Notice, *supra* note 4, at 76136.

[11] In approving this proposed rule change, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

[12] 15 U.S.C. 78f.

[13] 15 U.S.C. 78f(b)(5).

[14] *See* C2 SPXPM Approval Order, *supra* note 7, at 55972, 55974–55975.

[15] *See* C2 SPXPM Approval Order, *supra* note 7, at 55976.

[16] *See* Notice, *supra* note 4, at 76138.

In addition, the Commission notes that CBOE would have access to information through its membership in the Intermarket Surveillance Group with respect to the trading of the securities underlying the S&P 500 index, as well as tools such as large options positions reports to assist its surveillance of SPXPM options.

In approving the proposed rule change, the Commission also has relied upon the Exchange's representation that it has the necessary systems capacity to support new options series that will result from this proposal. *See* Notice, *supra* note 4, at 76138.

[17] *See* Notice, *supra* note 4, at 76136.

[18] *See* Amendment No. 2, *supra* note 3.

procedures at the underlying markets and the potential benefits to investors discussed above, the Commission finds that it is appropriate and consistent with the Act to approve CBOE's proposal on a pilot basis. The collection of data during the pilot and CBOE's active monitoring of any effects of SPXPM on the markets will help CBOE and the Commission assess any impact of P.M. settlement in today's market.

As noted in Amendment No. 4, CBOE represented its intent to begin trading SPXPM on February 19, 2013, which is the first day of a new expiration cycle for options.

IV. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[19] that the proposed rule change (SR–CBOE–2012–120), as modified by Amendment Nos. 2, 3, and 4, be, and hereby is, approved, as amended, on a 12 month pilot basis set to expire on February 8, 2014.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[20]

Kevin M. O'Neill,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–68891; File No. SR–NASDAQ–2013–028]

Self-Regulatory Organizations; The NASDAQ Stock Market LLC; Notice of Filing of Proposed Rule Change for the Permanent Approval of a Pilot Program To Permit Inbound Orders Routed by Nasdaq Execution Services LLC From the NASDAQ OMX BX Equities Market and NASDAQ OMX PSX

February 8, 2013.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (the ''Act'')[2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on February 6, 2013, The NASDAQ Stock Market LLC (''Exchange'' or ''Nasdaq'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes a rule change for the permanent approval of its pilot program to permit inbound orders routed by Nasdaq Execution Services LLC (''NES'') from the NASDAQ OMX BX Equities Market of NASDAQ OMX BX, Inc. (''BX'') and the NASDAQ OMX PSX facility of NASDAQ OMX PHLX LLC (''PHLX'').

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

In conjunction with BX and PHLX providing outbound routing services to all markets using their affiliated routing broker, NES,[4] NASDAQ proposed that NES be permitted to route orders from BX and PHLX, respectively, to the Exchange on a pilot basis, subject to certain conditions and limitations, as described below.[5] The current pilot program expires March 30, 2013.[6]

NES is a broker-dealer and member of NASDAQ, PHLX and BX. NES provides all routing functions for NASDAQ, BX and PHLX. BX, NASDAQ, PHLX and NES are affiliates. Accordingly, the affiliate relationship between NASDAQ and NES, its member, raises the issue of an exchange's affiliation with a member of such exchange. Specifically, in connection with prior filings, the Commission has expressed concern that the affiliation of an exchange with one of its members raises the potential for unfair competitive advantage and potential conflicts of interest between an exchange's self-regulatory obligations and its commercial interests.[7]

Recognizing that the Commission has previously expressed concern regarding the potential for conflicts of interest in instances where a member firm is affiliated with an exchange of which it is a member, the Exchange previously proposed, and the Commission approved, limitations and conditions on NES's affiliation with the Exchange.[8] The Exchange now proposes to permit NASDAQ to accept inbound orders that NES routes in its capacity as a facility of BX and PHLX on a permanent basis, subject to the imitations [sic] and conditions of this pilot:

- First, the Exchange and FINRA maintain a Regulatory Contract, as well as an agreement pursuant to Rule 17d–2 under the Act (''17d–2 Agreement'').[9] Pursuant to the Regulatory Contract and the 17d–2 Agreement, FINRA is allocated regulatory responsibilities to review NES's compliance with certain Exchange rules.[10] Pursuant to the Regulatory Contract, however, NASDAQ retains ultimate responsibility for enforcing its rules with respect to NES.
- Second, FINRA monitors NES for compliance with the Exchange's trading rules, and collects and maintains certain related information.[11]
- Third, FINRA provides a report to the Exchange's chief regulatory officer (''CRO''), on a quarterly basis, that: (i) Quantifies all alerts (of which FINRA is aware) that identify NES as a participant that has potentially violated Commission or Exchange rules, and (ii) lists all investigations that identify NES as a participant that has potentially violated Commission or Exchange rules.

[5] *See* Securities Exchange Act Release No. 65554 (October 13, 2011), 76 FR 65311 (October 20, 2011) (SR–NASDAQ–2011–142).

[6] *See* Securities Exchange Act Release No. 67997 (October 5, 2012), 77 FR 62293 (October 12, 2012) (SR–NASDAQ–2012–112).

[7] *See* Securities Exchange Act Release Nos. 59153 (December 23, 2008), 73 FR 80485 (December 31, 2008) (SR–NASDAQ–2008–098); and 62736 (August 17, 2010), 75 FR 51861 (August 23, 2010) (SR–NASDAQ–2010–100).

[8] *Id.*

[9] 17 CFR 240.17d–2.

[10] NES is also subject to independent oversight by FINRA, its designated examining authority, for compliance with financial responsibility requirements.

[11] Pursuant to the Regulatory Contract, both FINRA and the Exchange collect and maintain all alerts, complaints, investigations and enforcement actions in which NES (in its capacity as a facility of BX and PHLX routing orders to NASDAQ) is identified as a participant that has potentially violated applicable Commission or Exchange rules. The Exchange and FINRA retain these records in an easily accessible manner in order to facilitate any potential review conducted by the Commission's Office of Compliance Inspections and Examinations.

• Fourth, the Exchange has in place NASDAQ Rule 2160(c), which requires The NASDAQ OMX Group, Inc., as the holding company owning both the Exchange and NES, to establish and maintain procedures and internal controls reasonably designed to ensure that NES does not develop or implement changes to its system, based on non-public information obtained regarding planned changes to the Exchange's systems as a result of its affiliation with the Exchange, until such information is available generally to similarly situated Exchange members, in connection with the provision of inbound order routing to the Exchange.

The Exchange has met all the above-listed conditions. By meeting the above conditions, the Exchange has set up mechanisms that protect the independence of the Exchange's regulatory responsibility with respect to NES, as well as demonstrate that NES cannot use any information advantage it may have because of its affiliation with the Exchange. Because the Exchange has met all the above-listed conditions, it now seeks permanent approval of this inbound routing relationship. The Exchange will continue to comply with the conditions 1–4 stated above.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the provisions of Section 6 of the Act,[12] in general, and with Sections 6(b)(5) of the Act,[13] in particular, in that the proposal is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest, because the proposed rule change will allow the Exchange to continue to receive inbound orders from NES, acting in its capacity as a facility of BX and PHLX, in a manner consistent with prior approvals and established protections. The Exchange believes that these conditions establish mechanisms that protect the independence of the Exchange's regulatory responsibility with respect to NES, as well as ensure that NES cannot use any information it may have because of its affiliation with the Exchange to its advantage.

[12] 15 U.S.C. 78f.

[13] 15 U.S.C. 78f(b)(5).

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act, as amended. Permanent approval of the current pilot program does not raise any issues of intramarket competition because it involves inbound routing from an affiliated exchange. Nor does it result in a burden on competition among exchanges, because there are many competing exchanges that provide routing services, including through an affiliate.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Exchange consents, the Commission shall: (a) By order approve or disapprove such proposed rule change, or (b) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

• Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or

• Send an email to *rule-comments@sec.gov*. Please include File Number SR–NASDAQ–2013–028 on the subject line.

Paper Comments

• Send paper comments in triplicate to Elizabeth M. Murphy, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NASDAQ–2013–028. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, on business days between the hours of 10 a.m. and 3 p.m., located at 100 F Street NE., Washington, DC 20549–1090. Copies of the filing will also be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NASDAQ–2013–028 and should be submitted on or before March 7, 2013.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[14]

Kevin M. O'Neill,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–68873; File No. SR–CBOE–2013–016]

Self-Regulatory Organizations; Chicago Board Options Exchange, Incorporated; Notice of Filing of Proposed Rule Change To Permit the Minimum Price Variation for Mini-Options To Be the Same as Permitted for Standard Options on the Same Security

February 8, 2013.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934

(''Act'') [1] and Rule 19b–4 thereunder,[2] notice is hereby given that on January 31, 2013, Chicago Board Options Exchange, Incorporated (''Exchange'' or ''CBOE'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

CBOE proposes to permit the minimum price variation for mini-option contracts that deliver 10 shares to be the same as permitted for standard options that deliver 100 shares on the same security. The text of the proposed rule change is available on the Exchange's Web site *http://www.cboe.com/AboutCBOE/CBOELegalRegulatoryHome.aspx*), at the Exchange's Office of the Secretary, and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

CBOE recently amended its rules to allow for the listing of mini-options that deliver 10 physical shares on SPDR S&P 500 (''SPY''), Apple, Inc. (''AAPL''), SPDR Gold Trust (''GLD''), Google Inc. (''GOOG'') and Amazon.com Inc. (''AMZN'').[3] Mini-options trading is expected to commence in March 2013. Prior to the commencement of trading mini-options, the Exchange proposes to establish and permit the minimum price variation for mini-option contracts to be the same as permitted for standard options on the same security. In addition to giving market participants clarity as to the minimum pricing increments for mini-options, the filing would harmonize penny pricing between mini-options and standard options on the same security.

Of the five securities on which mini-options are permitted, four of them (SPY, AAPL, GLD and AMZN) participate in the Penny Pilot Program. Under the Penny Pilot Program:

- The minimum price variation for AAPL, GLD and AMZN options is $0.01 for all quotations in series that are quoted at less than $3 per contract and $0.05 for all quotations in series that are quoted at $3 per contract or greater; [4] and
- The minimum price variation for SPY options is $0.01 for all quotations in all series.[5]

In the lead up to the launch of mini-options trading, the Exchange has polled firms with customer bases of potential product users and they have indicated a preference that premium pricing for mini-options match what is currently permitted for standard options that deliver 100 physical shares on the same securities. Specifically, firms' systems are configured using the ''root symbol'' of an underlying security and cannot differentiate, for purposes of minimum variation pricing, between contracts on the same security. Mini-options will be loaded into firms' systems using the same ''root symbol'' that is used for standard options on the same security. As a result, it is believed that existing systems will not be able to assign different minimum pricing variations to different contracts on the same security. As a result, firms have indicated their preference that there be matched pricing between mini-options and standard options on the same security because their systems, which are programmed using ''root symbols,'' would not be able to assign different minimum pricing variations to mini-options and standard options on the same security.

Because mini-options are a separate class from standard options on the same security, mini-options would have to qualify separately for entry into the Penny Pilot Program. This, however, is not possible by product launch (or possibly ever) for a number of reasons. First, there is a six calendar month trading volume criteria for entry into the Penny Pilot Program, which mini-options cannot satisfy prior to launch. Second, even if mini-options met the trading volume criteria, replacement classes are only added to the Penny Pilot Program on the second trading day following January 1 and July 1 in a given year. Finally, there is a price test for entry into the Penny Pilot Program which excludes ''high premium'' classes, which are defined as classes priced at $200 per share or higher at the time of selection. As of the date of this filing, three of the five securities (AAPL, AMZN and GOOG) eligible for mini-options would be excluded as ''high premium'' classes, even though two of those securities (AAPL and AMZN) are in the Penny Pilot Program for standard options. The Exchange notes that GOOG is not in the Penny Pilot Program.[6]

The Exchange, therefore, is proposing to establish a pricing regime for mini-options separate from the Penny Pilot Program that permits the minimum price variation for mini-option contracts to be the same as permitted for standard options on the same security, which would encompass penny pricing for mini-option contracts on securities that participate in the Penny Pilot Program.[7]

As to the Penny Pilot Program, the Exchange believes that there are several good reasons to allow penny pricing for mini-options on securities that currently participate in the Penny Pilot Program, without requiring mini-options to separately qualify for the Penny Pilot Program. First, the Penny Pilot Program applies to the most actively-traded, multiply-listed option classes. Likewise, the five securities which may underlie mini-options were chosen because of the significant liquidity in standard options on the same security. The Exchange also believes that the marketplace and investors will be expecting the minimum price variation for contracts on the same security to be the same. Second, one of the primary goals of the Penny Pilot Program is to

[2] 17 CFR 240.19b–4.

[3] *See* Securities Exchange Act Release No. 68656 (January 15, 2013), 78 FR 4526 (January 22, 2013) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change to List and Trade Option Contracts Overlying 10 Shares of Certain Securities) (SR–CBOE–2013–001).

[4] *See* CBOE Rule 6.42(3).

[5] *See* CBOE Rule 6.42(3) and Securities Exchange Act Release No. 61478 (February 3, 2010), 75 FR 6762 (February 10, 2010) (Notice of Filing and Immediate Effectiveness of Proposed Rule Change to [sic] Relating to the Penny Pilot Program) (SR–CBOE–2010–09).

[6] The minimum price variation for standard options on GOOG is $0.05 for all quotations in series that are quoted at less than $3 per contract and $0.10 for all quotations in series that are quoted at $3 per contract or greater. *See* CBOE Rule 6.42(1) and (2).

[7] As noted in the Exchange's original mini-option filing, mini-options are limited to five securities and any expansion of the program would require that a subsequent proposed rule change be submitted to the Commission. The current proposal is limited to the five securities originally approved to underlie mini-options. The Exchange anticipates that a similar minimum pricing variation regime would be included in any rule change to expand the mini-option program.

narrow the bid-ask spreads of exchange-traded options to reduce the cost of entering and exiting positions. This same goal can similarly be accomplished by permitting penny pricing for mini-option contracts on securities that already participate in the Penny Pilot Program. Finally, the Exchange believes that penny pricing for mini-options is desirable for a product that is geared toward retail investors. Mini-options are on high priced securities and are meant to be an investment tool with more affordable and realistic prices for the retail average investor. Penny pricing for mini-options on securities that are currently in the Penny Pilot Program would benefit the anticipated users of mini-options by providing more price points. The Exchange notes that it is not requesting penny pricing for all of the five securities eligible for mini-options trading; but rather is seeking to permit matched penny pricing for mini-options on those securities for which standard options already trade in pennies.

In addition to an expressed market preference for matched minimum increment pricing (including penny pricing) between mini-options and standard options on the same securities, the Exchange believes that its rules establish precedent for the current proposal. Specifically, CBOE Rule 6.42.03 provides, among other things, that matched penny pricing between SPY and Mini-S&P 500 Index (''XSP'') options is permitted. As to SPY and XSP options, the rationale for matched pricing was that the underlying SPY ETF is designed to track the performance of the S&P 500 Index and XSP options are options based on the S&P 500 Index.[8] In support of this earlier filing, the Exchange believed that having the same minimum price variation for SPY and XSP options was necessary for consistency and for competitive reasons.

To effect the current proposed rule changes, CBOE proposes to amend CBOE Rules 6.42 and 5.5. As to CBOE Rule 6.42 (Minimum Increments for Bids and Offers), CBOE proposes adding new Interpretation and Policy .04 that would be an internal cross reference to new proposed Interpretation and Policy .22(d) to CBOE Rule 5.5 as the provision that sets forth the minimum price variation for bids and offers for mini-options. Proposed Interpretation and Policy .22(d) to CBOE Rule 5.5 would provide as follows:

> The minimum price variation for bids and offers for mini-options shall be the same as permitted for standard options on the same security. For example, if a security participates in the Penny Pilot Program, mini-options on the same underlying security may be quoted in the same minimum increments, e.g., $0.01 for all quotations in series that are quoted at less than $3 per contract and $0.05 for all quotations in series that are quoted at $3 per contract or greater, $0.01 for all SPY option series, and mini-options do not separately need to qualify for the Penny Pilot Program.

With regard to the impact of this proposal on system capacity, the Exchange has analyzed its capacity and represents that it and the Options Price Reporting Authority have the necessary systems capacity to handle the potential additional traffic associated with this proposal. The Exchange does not believe that this increased traffic will become unmanageable since mini-options are limited to a fixed number of underlying securities.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Act and the rules and regulations thereunder, including the requirements of Section 6(b) of the Act.[9] In particular, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[10] requirements that the rules of an exchange be designed to promote just and equitable principles of trade, to prevent fraudulent and manipulative acts, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and to perfect the mechanism for a free and open market and a national market system, and, in general, to protect investors and the public interest.

Specifically, the Exchange believes that investors and other market participants would benefit from the current rule proposal because it would clarify and establish the minimum price variation for mini-options prior to the commencement of trading. The Exchange believes that the marketplace and investors will be expecting the minimum price variation for contracts on the same security to be the same. As a result, the Exchange believes that this change would lessen investor and marketplace confusion because mini-options and standard options on the same security would have the same minimum price variation.

While price protection between mini-options and standard options on the same security is not required, the Exchange believes that consistency between mini-options and standard options as to the minimum price variation is desirable and is designed to promote just and equitable principles of trade. Matching the minimum price variation between mini-options and standard options on the same security would help to eliminate any unnecessary arbitrage opportunities that could result from having contracts on the same underlying security traded in different minimum price increments. Similarly, matched minimum pricing would hopefully generate enhanced competition among liquidity providers. The Exchange believes that matched pricing for mini-options and standard options on the same security would attract additional liquidity providers who would make markets in mini-options and standard options on the same security. In addition to the possibility of more liquidity providers, the Exchange believes that the ability to quote mini-options and standard options on the same security in the same minimum increments would hopefully result in more efficient pricing via arbitrage and possible price improvement in both contracts on the same security. The Exchange also believes that allowing penny pricing for mini-options on securities that currently participate in the Penny Pilot Program (without mini-options having to qualify separately for entry into the Penny Pilot Program) will benefit the marketplace and investors because penny pricing in mini-options may also accomplish one of the primary goals of the Penny Pilot Program, which is to narrow the bid-ask spreads of exchange-traded options to reduce the cost of entering and exiting positions. Finally, the proposed rule would be beneficial from a logistical perspective since firms' existing systems are configured using the ''root symbol'' of an underlying security and would not be able to assign different minimum pricing variations to mini-options and standard options on the same security.

B. Self-Regulatory Organization's Statement on Burden on Competition

CBOE does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. Specifically, since mini-options are permitted on multiply-listed classes, other exchanges that have received approval to trade mini-options will have the opportunity to similarly establish the minimum price variation for mini-options prior to the anticipated launch in March 2013. CBOE also believes that the proposed rule change will enhance competition by allowing

[9] 15 U.S.C. 78f(b).

[10] 15 U.S.C. 78f(b)(5).

products on the same security to be priced in the same minimum price increments.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve or disapprove such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–CBOE–2013–016 on the subject line.

Paper Comments

- Send paper comments in triplicate to Elizabeth M. Murphy, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–CBOE–2013–016. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–CBOE–2013–016 and should be submitted on or before March 7, 2013.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[11]

Kevin M. O'Neill,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–68890; File No. SR–BX–2013–013]

Self-Regulatory Organizations; NASDAQ OMX BX, Inc.; Notice of Filing of Proposed Rule Change Requesting Permanent Approval of a Pilot Program To Receive Inbound Equities Orders From PSX Through NES

February 8, 2013.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (the "Act")[2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on February 6, 2013, NASDAQ OMX BX, Inc. ("Exchange" or "BX") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange has filed a proposed rule change for the permanent approval of the Exchange's pilot program to permit the BX Equities Market ("System") to accept inbound orders routed by Nasdaq Execution Services LLC ("NES") from the NASDAQ OMX PSX facility of NASDAQ OMX PHLX LLC ("PHLX").

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

In conjunction with PHLX providing outbound routing services on PSX to all markets using its affiliated routing broker, NES,[4] BX proposed that NES be permitted to route orders from PHLX to the Exchange on a pilot basis, subject to certain limitations and conditions, as described below.[5] The current pilot program expires March 30, 2013.[6]

NES is a broker-dealer and member of NASDAQ, PHLX and BX. NES provides all routing functions for The NASDAQ Stock Market ("NASDAQ"), BX and PHLX. BX, NASDAQ, PHLX and NES are affiliates. Accordingly, the affiliate relationship between BX and NES, its member, raises the issue of an exchange's affiliation with a member of such exchange. Specifically, in connection with prior filings, the Commission has expressed concern that the affiliation of an exchange with one of its members raises the potential for unfair competitive advantage and

[4] *See* Securities Exchange Act Release No. 65469 (October 3, 2011), 76 FR 62486 (October 7, 2011) (SR–Phlx–2011–108).

[5] *See* Securities Exchange Act Release No. 65514 (October 7, 2011), 76 FR 63969 (October 14, 2011) (SR–BX–2011–066).

[6] *See* Securities Exchange Act Release No. 67995 (October 5, 2012), 77 FR 62292 (October 12, 2012) (SR–BX–2012–066).

potential conflicts of interest between an exchange's self-regulatory obligations and its commercial interests.[7]

Recognizing that the Commission has previously expressed concern regarding the potential for conflicts of interest in instances where a member firm is affiliated with an exchange of which it is a member, the Exchange previously proposed, and the Commission approved, limitations and conditions on NES's affiliation with the Exchange.[8] Also recognizing that the Commission has expressed concern regarding the potential for conflicts of interest in instances where a member firm is affiliated with an exchange to which it is routing orders, the Exchange previously proposed, and the Commission approved,[9] NES's affiliation with the Exchange to permit the Exchange to accept inbound orders that NES routes in its capacity as a facility of NASDAQ, subject to the certain limitations and conditions. The Exchange now proposes to permit BX to accept inbound orders that NES routes in its capacity as a facility of PHLX on a permanent basis, subject to the limitations and conditions of this pilot:

- First, the Exchange and FINRA maintain a Regulatory Contract, as well as an agreement pursuant to Rule 17d–2 under the Act (''17d–2 Agreement'').[10] Pursuant to the Regulatory Contract and the 17d–2 Agreement, FINRA is allocated regulatory responsibilities to review NES's compliance with certain Exchange rules.[11] Pursuant to the Regulatory Contract, however, BX retains ultimate responsibility for enforcing its rules with respect to NES.
- Second, FINRA monitors NES for compliance with the Exchange's trading rules, and collects and maintains certain related information.[12]
- Third, FINRA provides a report to the Exchange's chief regulatory officer (''CRO''), on a quarterly basis, that: (i) Quantifies all alerts (of which FINRA is aware) that identify NES as a participant that has potentially violated Commission or Exchange rules, and (ii) lists all investigations that identify NES as a participant that has potentially violated Commission or Exchange rules.
- Fourth, the Exchange has in place BX Rule 2140(c), which requires The NASDAQ OMX Group, Inc., as the holding company owning both the Exchange and NES, to establish and maintain procedures and internal controls reasonably designed to ensure that NES does not develop or implement changes to its system, based on non-public information obtained regarding planned changes to the Exchange's systems as a result of its affiliation with the Exchange, until such information is available generally to similarly situated Exchange members, in connection with the provision of inbound order routing to the Exchange.

The Exchange has met all the above-listed conditions. By meeting the above conditions, the Exchange has set up mechanisms that protect the independence of the Exchange's regulatory responsibility with respect to NES, as well as demonstrate that NES cannot use any information advantage it may have because of its affiliation with the Exchange. Because the Exchange has met all the above-listed conditions, it now seeks permanent approval of this inbound routing relationship. The Exchange will continue to comply with the conditions 1–4 stated above.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the provisions of Section 6 of the Act,[13] in general, and with Sections 6(b)(5) of the Act,[14] in particular, in that the proposal is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest, because the proposed rule change will allow the Exchange to continue to receive inbound orders from NES, acting in its capacity as a facility of PHLX, in a manner consistent with prior approvals and established protections. The Exchange believes that these conditions establish mechanisms that protect the independence of the Exchange's regulatory responsibility with respect to NES, as well as ensure that NES cannot use any information it may have because of its affiliation with the Exchange to its advantage.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act, as amended. Permanent approval of the current pilot program does not raise any issues of intramarket competition because it involves inbound routing from an affiliated exchange. Nor does it result in a burden on competition among exchanges, because there are many competing exchanges that provide routing services, including through an affiliate.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Exchange consents, the Commission shall: (a) By order approve or disapprove such proposed rule change, or (b) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–68878; File No. SR–EDGX–2013–07]

Self-Regulatory Organizations; EDGX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Relating to Amendments to the EDGX Exchange, Inc. Fee Schedule

February 8, 2013.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on January 31, 2013, EDGX Exchange, Inc. (the ''Exchange'' or ''EDGX'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II and III below, which items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend its fees and rebates applicable to Members [3] of the Exchange pursuant to EDGX Rule 15.1(a) and (c). All of the changes described herein are applicable to EDGX Members. The text of the proposed rule change is available on the Exchange's Internet Web site at *www.directedge.com,* at the Exchange's principal office, and at the Public Reference Room of the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections A, B and C below, of the most significant aspects of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] As defined in Exchange Rule 1.5(n).

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange currently assesses a charge of $0.0003 per share for Members' orders that yield Flag RY. The Exchange proposes to increase the rate it charges for Flag RY from $0.0003 per share to $0.0005 per share for Members' orders that route to the BATS Y-Exchange, Inc. (''BATS BYX'') and add liquidity. This proposed change represents a pass through of the rate that Direct Edge ECN LLC (d/b/a DE Route) (''DE Route''), the Exchange's affiliated routing broker dealer, is charged for routing orders to BATS BYX that do not qualify for additional volume tiered discounts, as described in BATS BYX's fee filing with the Securities and Exchange Commission.[4]

The Exchange proposes to add Flag RT to its fee schedule for Members' orders that route to away trading centers using the ROUT routing strategy [5] and remove liquidity from the away exchange. The Exchange proposes to assess a fee of $0.0030 per share for orders yielding Flag RT.

The Exchange proposes to add Flag RX to its fee schedule for Members' orders that route to away trading centers using the ROUX routing strategy [6] and remove liquidity from the away exchange. The Exchange proposes to assess a fee of $0.0030 per share for orders yielding Flag RX.

The Exchange proposes to implement these amendments to its fee schedule on February 1, 2013.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the objectives of Section 6 of the Act,[7] in general, and furthers the objectives of Section 6(b)(4),[8] in particular, as it is designed to provide for the equitable allocation of reasonable dues, fees and other charges among its Members and other persons using its facilities.

The Exchange's proposed fee increase for Flag RY represents a pass-through rate where BATS BYX charges DE Route $0.0005 per share for Members' orders that route to BATS BYX through DE Route and add liquidity, and then DE Route charges the Exchange $0.0005 per share, and then the Exchange charges its

[4] *See* Securities Exchange Act Release No. 68665 (January 16, 2013), 78 FR 4946 (January 23, 2013) (SR–BYX–2013–001).

[5] As defined in Exchange Rule 11.9(b)(3)(c)(ii).

[6] As defined in Exchange Rule 11.9(b)(3)(c)(iii).

[7] 15 U.S.C. 78f.

[8] 15 U.S.C. 78f(b)(4).

Members $0.0005 per share. The Exchange's proposal represents an equitable allocation of reasonable dues, fees, and other charges among Members of the Exchange and other persons using its facilities because the Exchange does not levy additional fees or offer additional rebates for orders that it routes to BATS BYX through DE Route. Prior to BATS BYX's January 2013 fee filing, BATS BYX charged DE Route a fee of $0.0003 per share for orders yielding Flag RY, which DE Route passed through to the Exchange and the Exchange passed through to its Members. In BATS BYX's January 2013 fee filing, BATS BYX increased the rate it charges its customers, such as DE Route, from $0.0003 per share to a charge of $0.0005 per share for orders that are routed to BATS BYX and add liquidity. Therefore, the Exchange believes that the proposed change in Flag RY from a fee of $0.0003 per share to a fee of $0.0005 per share is equitable and reasonable because it accounts for the pricing changes on BATS BYX. In addition, the proposal allows the Exchange to continue to charge its Members a pass-through rate for orders that are routed to BATS BYX and add liquidity using DE Route. The Exchange notes that routing through DE Route is voluntary. Lastly, the Exchange also believes that the proposed amendment is non-discriminatory because it applies uniformly to all Members.

The Exchange believes that its proposal to assess a charge of $0.0030 per share for orders that yield Flag RT represents an equitable allocation of reasonable dues, fees and other charges among its Members and other persons using its facilities. By electing the ROUT routing strategy, Members' orders check the System for available shares and then are sent to destinations on the System routing table,[9] and any unexecuted shares are posted to EDGX, unless otherwise instructed. The Exchange believes that the proposed rate of $0.0030 per share for orders that yield Flag RT is equitable because it is comparable to the Exchange's default rate of $0.0029 per share that it charges Members for routing to away trading destinations and removing liquidity from the away exchange and also accounts for the increased costs associated with the ROUT routing strategy routing to all displayed markets including more costly destinations such as NYSE Arca, Inc. (''NYSE Arca'') and The NASDAQ Stock Market LLC (''NASDAQ''). In addition, the Exchange believes that the proposed rate of $0.0030 per share for orders that yield Flag RT is reasonable because it is comparable to the fees charged by other exchanges for similar routing strategies. Namely, BATS Exchange, Inc. (''BATS BZX'') charges its customers a rate of $0.0029 per share for orders using its Parallel D or Parallel 2D routing strategies;[10] and NASDAQ charges its customers a rate of $0.0030 per share for orders using its SCAN and STGY routing strategies.[11] Lastly, the Exchange also believes that the proposed amendment is non-discriminatory because it applies uniformly to all Members.

The Exchange believes that its proposal to assess a charge of $0.0030 per share for orders that yield Flag RX represents an equitable allocation of reasonable dues, fees and other charges among its Members and other persons using its facilities. By electing the ROUX routing strategy, Members' orders check the System for available shares and then are sent to destinations on the System routing table, and any unexecuted shares are posted to EDGX, unless otherwise instructed. The Exchange believes that the proposed rate of $0.0030 per share for orders that yield Flag RX is equitable because it is comparable to the Exchange's default rate of $0.0029 per share that it charges Members for routing to away trading destinations and removing liquidity from the away exchange and also accounts for the increased costs associated with the ROUX routing strategy routing to all displayed markets including more costly destinations such as NYSE Arca and NASDAQ. In addition, the Exchange believes that the proposed rate of $0.0030 per share for orders that yield Flag RX is reasonable because it is comparable to the fees charged by other exchanges for similar routing strategies. Namely, BATS BZX charges its customers a rate of $0.0029 per share for orders using its Parallel D or Parallel 2D routing strategies; and NASDAQ charges its customers a rate of $0.0030 per share for orders using its SKIP and SKNY routing strategies.[12] Lastly, the Exchange also believes that the proposed amendment is non-discriminatory because it applies uniformly to all Members.

The Exchange also notes that it operates in a highly-competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive. The proposed rule change reflects a competitive pricing structure designed to incent market participants to direct their order flow to the Exchange. The Exchange believes that the proposed rates are equitable and non-discriminatory in that they apply uniformly to all Members. The Exchange believes the fees and credits remain competitive with those charged by other venues and therefore continue to be reasonable and equitably allocated to Members.

B. Self-Regulatory Organization's Statement on Burden on Competition

These proposed rule changes do not impose any burdens on competition that are not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believes that any of the changes represent a significant departure from previous pricing offered by the Exchange or pricing offered by the Exchange's competitors.

Regarding Flag RY, the Exchange believes its proposal to assess a charge of $0.0005 per share increases competition among trading centers because it offers customers an alternative means to route to BATS BYX and add liquidity for the same price as entering orders on BATS BYX directly. The Exchange believes that its proposal will have no burden on intramarket competition because the rate applies uniformly to all Members.

Regarding Flag RT, the Exchange believes that its proposal to assess a fee of $0.0030 per share for Members' orders that route using the ROUT routing strategy and remove liquidity from the away exchange will increase competition because it is comparable to the rates charged by BATS BZX and NASDAQ for similar routing strategies. The Exchange believes that its proposal will have no burden on intramarket competition because the rate applies uniformly to all Members. The Exchange believes that its proposal will

[12] *See* NASDAQ, Routing Strategies and Order Types Guide, *http://www.nasdaqtrader.com/content/ProductsServices/Trading/Workstation/rash_strategy.pdf* (describing SKIP and SKNY routing strategies).

increase competition for routing services because the market for order execution is competitive and the Exchange's proposal provides customers with another alternative to route their orders. The Exchange notes that routing through DE Route is voluntary.

Regarding Flag RX, the Exchange believes that its proposal to assess a fee of $0.0030 per share for Members' orders that route using the ROUX routing strategy and remove liquidity from the away exchange will increase competition because it is comparable to the rates charged by BATS BZX and NASDAQ for similar routing strategies. The Exchange believes that its proposal will have no burden on intramarket competition because the rate applies uniformly to all Members. The Exchange believes that its proposal will increase competition for routing services because the market for order execution is competitive and the Exchange's proposal provides customers with another alternative to route their orders. The Exchange notes that routing through DE Route is voluntary.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from Members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act [13] and Rule 19b–4(f)(2) [14] thereunder. At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

[13] 15 U.S.C. 78s(b)(3)(A).

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–68875; File No. SR–NYSEMKT–2013–05]

Self-Regulatory Organizations; NYSE MKT LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Amending Exchange Rule 80C—Equities To Establish Rules To Comply With the Requirements of the Plan To Address Extraordinary Market Volatility Submitted to the Commission Pursuant to Rule 608 of Regulation NMS

February 8, 2013.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (the "Act") [2] and Rule 19b–4 thereunder,[3] notice is hereby given that on January 25, 2013, NYSE MKT LLC (the "Exchange" or "NYSE MKT") filed with the Securities and Exchange Commission (the "Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Exchange Rule 80C—Equities to establish rules to comply with the requirements of the Plan to Address Extraordinary Market Volatility submitted to the Commission pursuant to Rule 608 of Regulation NMS. The text of the proposed rule change is available on the Exchange's Web site at *www.nyse.com,* at the principal office of the Exchange, on the Commission's Web site at *http://www.sec.gov,* and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below,

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Exchange Rule 80C—Equities to establish rules to comply with the requirements of the Plan to Address Extraordinary Market Volatility submitted to the Commission pursuant to Rule 608 of Regulation NMS under the Act (the ''Plan''). The Exchange proposes to adopt the changes for a pilot period that coincides with the pilot period for the Plan, which is currently scheduled as a one-year pilot to begin on April 8, 2013.

Background

Since May 6, 2010, when the markets experienced excessive volatility in an abbreviated time period, *i.e.,* the ''flash crash,'' the equities exchanges and FINRA have implemented market-wide measures designed to restore investor confidence by reducing the potential for excessive market volatility. Among the measures adopted include pilot plans for stock-by-stock trading pauses [4] and related changes to the equities market clearly erroneous execution rules [5] and more stringent equities market maker quoting requirements.[6] On May 31, 2012, the Commission approved the Plan, as amended, on a one-year pilot basis.[7] In addition, the Commission approved changes to the equities market-wide circuit breaker rules on a pilot basis to coincide with the pilot period for the Plan.[8]

The Plan is designed to prevent trades in individual NMS Stocks from occurring outside of specified Price Bands.[9] As described more fully below, the requirements of the Plan are coupled with Trading Pauses to accommodate more fundamental price moves (as opposed to erroneous trades or momentary gaps in liquidity). All trading centers in NMS Stocks, including both those operated by Participants and those operated by members of Participants, are required to establish, maintain, and enforce written policies and procedures that are reasonably designed to comply with the requirements specified in the Plan.[10] As set forth in more detail in the Plan, Price Bands consisting of a Lower Price Band and an Upper Price Band for each NMS Stock are calculated by the Processors.[11] When the National Best Bid (Offer) is below (above) the Lower (Upper) Price Band, the Processors shall disseminate such National Best Bid (Offer) with an appropriate flag identifying it as unexecutable. When the National Best Bid (Offer) is equal to the Upper (Lower) Price Band, the Processors shall distribute such National Best Bid (Offer) with an appropriate flag identifying it as a Limit State Quotation.[12] All trading centers in NMS Stocks must maintain written policies and procedures that are reasonably designed to prevent the display of offers below the Lower Price Band and bids above the Upper Price Band for NMS Stocks. Notwithstanding this requirement, the Processor shall display an offer below the Lower Price Band or a bid above the Upper Price Band, but with a flag that it is non-executable. Such bids or offers shall not be included in the National Best Bid or National Best Offer calculations.[13]

Trading in an NMS Stock immediately enters a Limit State if the National Best Offer (Bid) equals but does not cross the Lower (Upper) Price Band.[14] Trading for an NMS stock exits a Limit State if, within 15 seconds of entering the Limit State, all Limit State Quotations were executed or canceled in their entirety. If the market does not exit a Limit State within 15 seconds, then the Primary Listing Exchange would declare a five-minute trading pause pursuant to Section VII of the LULD Plan, which would be applicable to all markets trading the security.[15] In addition, the Plan defines a Straddle State as when the National Best Bid (Offer) is below (above) the Lower (Upper) Price Band and the NMS Stock is not in a Limit State. For example, assume the Lower Price Band for an NMS Stock is $9.50 and the Upper Price Band is $10.50, such NMS stock would be in a Straddle State if the National Best Bid were below $9.50, and therefore non-executable, and the National Best Offer were above $9.50 (including a National Best Offer that could be above $10.50). If an NMS Stock is in a Straddle State and trading in that stock deviates from normal trading characteristics, the Primary Listing Exchange may declare a trading pause for that NMS Stock.

Proposed Amendment to Rule 80C—Equities

The Exchange is required by the Plan to establish, maintain, and enforce written policies and procedures that are reasonably designed to comply with the limit up-limit down and trading pause requirements specified in the Plan. In response to the new Plan, the Exchange proposes to amend its Rules accordingly.

The Exchange proposes to add Rule 80C(a) to define that ''Plan'' means the Plan to Address Extraordinary Market Volatility Submitted to the Securities and Exchange Commission Pursuant to Rule 608 of Regulation NMS under the Securities Exchange Act of 1934, Exhibit A to Securities Exchange Act Release No. 67091 (May 31, 2012), 77 FR 33498 (June 6, 2012), as it may be amended from time to time. The Exchange proposes to add Rule 80C(a)(2) to state that the Exchange is a Participant in, and subject to the applicable requirements of, the Plan, which establishes procedures to address extraordinary volatility in NMS Stocks. In addition, proposed Rule 80C(a) provides that all capitalized terms not otherwise defined in this Rule shall have the meanings set forth in the Plan or Exchange rules, as applicable.

The Exchange proposes to add Rule 80C(a)(3) to provide that member organizations shall comply with the applicable provisions of the Plan. The Exchange believes that this requirement will help ensure the compliance by its members with the provisions of the Plan as required pursuant to Section II(B) of the Plan.[16]

The Exchange proposes to add Rule 80C(a)(4) to provide that Exchange systems shall not display or execute buy (sell) interest above (below) the Upper (Lower) Price Bands, unless such interest is specifically exempted under the Plan. The Exchange believes that this requirement is reasonably designed to help ensure the compliance with the

[10] The Exchange is a Participant in the Plan.

[11] *See* Section (V)(A) of the Plan.

[12] *See* Section VI(A) of the Plan.

[13] *See* Section VI(A)(3) of the Plan.

[14] *See* Section VI(B)(1) of the Plan.

[15] The primary listing market would declare a trading pause in an NMS Stock; upon notification by the primary listing market, the Processor would disseminate this information to the public. No trades in that NMS Stock could occur during the trading pause, but all bids and offers may be displayed. *See* Section VII(A) of the Plan.

[16] *See* Section II(B) of the Plan.

limit up-limit down and trading pause requirements specified in the Plan, by preventing executions outside the Price Bands as required pursuant to Section VI(A)(1) of the Plan.[17]

The Exchange proposes Rules regarding the treatment of certain trading interest on the Exchange in order to prevent executions outside the Price Bands and to comply with the new LULD Plan. In particular, the Exchange proposes to add Rule 80C(a)(5) that provides that Exchange systems shall reprice and/or cancel buy (sell) interest that is priced or could be executed above (below) the Upper (Lower) Price Band. Any interest that is repriced pursuant to this Rule shall retain its time stamp of original order entry. Specifically, the Exchange proposes the following provisions regarding the repricing and/or canceling of certain trading interest:

- *Market Orders.* If a market order cannot be fully executed at or within the Price Bands, Exchange systems shall display the unexecuted portion of the buy (sell) market order at the Upper (Lower) Price Band.[18]
- *Limit-Priced Interest.* Both displayable and non-displayable incoming limit-priced interest to buy (sell) that is priced above (below) the Upper (Lower) Price Band shall be repriced to the Upper (Lower) Price Band. Exchange systems shall also reprice resting limit-priced interest to buy (sell) to the Upper (Lower) Price Band if Price Bands move and the price of resting limit-priced interest to buy (sell) moves above (below) the Upper (Lower) Price Band. If the Price Bands move and the original limit price of repriced interest is at or within the Price Bands, Exchange systems shall reprice such interest to its original limit price.[19]
- *IOC Orders.* If an IOC order cannot be fully executed at or within the Price Bands, Exchange systems shall cancel any unexecuted portion of the IOC Order.
- *DMM Interest.* Exchange systems shall cancel DMM Interest to buy (sell) that is entered manually or via DMM-specific order entry methodology if such interest is priced above (below) the Upper (Lower) Price Band. DMM Interest to buy (sell) that is entered via the same order entry methodology as off-Floor interest shall be repriced pursuant to paragraph (a)(5)(B) of this Rule.
- *Market Pegging Interest.* Market Pegging Interest to buy (sell) shall peg to the specified pegging price or the Upper (Lower) Price Band, whichever is lower (higher).
- *Sell Short Orders.* During a Short Sale Price Test, as set forth in Rule 440B(b), short sale orders priced below the Lower Price Band shall be repriced to the higher of the Lower Price Band or the Permitted Price, as defined in Rule 440B(e).[20]
- *Floor Broker Cross Function.* Exchange systems shall not execute orders crossed pursuant to the process provided for in Supplementary Material .10 to Rule 76, if the price of the proposed cross transaction is outside of the Price Bands.
- *Original Order Instructions.* Any interest repriced pursuant to Exchange Rule 80C(a) shall return to its original order instructions for purposes of the re-opening transaction following a Trading Pause.

The Exchange believes these provisions are reasonably designed to prevent executions outside the Price Bands as required by the limit up-limit down and trading pause requirements specified in the Plan. The Exchange believes that allowing trading interest that would otherwise execute outside the Prices Bands to reprice and keep its original time stamp, helps ensure that trading interest retains its priority while preventing executions in violation with the limit up-limit down and trading pause requirements. The Exchange notes that retention of an original timestamp when interest is repriced occurs only under the operation of this Rule in order to prevent executions outside the Price Bands and to comply with the new LULD Plan and in no other circumstances.[21] To the extent that repricing of trading interest is not practical due to systems restrictions such as in the case of the DMM Interest that is entered manually or via DMM-specific order entry methodology, the Exchange proposes to cancel the trading interest in order to prevent executions outside the Price Bands. The Exchange will not reprice a Floor Broker Cross that would execute outside the Price Bands, because such orders are intended to be crossed at the entered price or not at all. Instead, the Exchange will return the unexecuted orders to the Floor Broker. The Exchange believes that adding certainty to the treatment and priority of trading interest in these situations will encourage market participants to continue to provide liquidity to the Exchange and thus promote a fair and orderly market.

The Exchange proposes Rule 80C(a)(6) that provides that the Exchange systems shall not route buy (sell) interest to an away market displaying a sell (buy) quote that is above (below) the Upper (Lower) Price Band. The Exchange believes that this provision is reasonably designed to prevent an execution outside the Price Bands in a manner that promotes compliance with the limit up-limit down and trading pause requirements specified in the Plan.

In addition, the Exchange proposes Rule 80C(a)(7) that provides that the Exchange may declare a Trading Pause for a NMS Stock listed on the Exchange when (i) the National Best Bid (Offer) is below (above) the Lower (Upper) Price Band and the NMS Stock is not in a Limit State; and (ii) trading in that NMS Stock deviates from normal trading characteristics. An Exchange Floor Official may declare such Trading Pause during a Straddle State if such Trading Pause would support the Plan's goal to address extraordinary market volatility.[22] The Exchange believes that this provision is reasonably designed to comply with Section VII(A)(2) of the Plan.[23]

Consistent with the Plan's requirements for the Exchange to establish, maintain, and enforce policies and procedures that are reasonably designed to comply with the trading pause requirements specified in the Plan, the Exchanges also proposes to amend the Rules regarding Trading Pauses to correspond with the LULD Plan. The Exchange proposes to provide that during Phase 1 of the Plan, a Trading Pause in Tier 1 NMS Stocks subject to the requirements of the Plan, shall be subject to Plan requirements and Exchange Rule 80C(b)(2); a Trading Pause in Tier 1 NMS Stocks not yet subject to the requirements of the Plan shall be subject to the requirements in paragraphs (b)(1)–(5) of this Rule; and a Trading Pause in Tier 2 NMS Stocks shall be subject to the requirements set forth in Exchange Rule 80C(b)(1)(B)–(5). The proposed change will allow the Trading Pause requirements in Exchange Rule 80C(b)(1) to continue to

[17] *See* Section VI(A)(1) of the Plan.

[18] If market participants do not want to have their orders repriced to the Price Band, market Participants may cancel the unexecuted portion of the order or submit such order as an IOC order.

[19] *See id.*

[20] Since there is no Permitted Price for short sale exempt orders, short sale exempt orders are treated the same as other orders under this Rule.

[21] The Exchange notes repricing of trading interest under ordinary circumstances outside of this Rule may be different than pursuant to the proposed Rule. For example, repricing of Market Pegging Interest and Sell Short Orders under ordinary circumstances would receive a new time stamp after repricing.

[22] The Exchange will develop written policies and procedures to determine when to declare a Trading Pause in such circumstances.

[23] *See* Section VII(A)(2) of the Plan.

apply to Tier 1 NMS Stocks during the beginning of Phase I until they are subject to the Plan requirements. Once the Plan has been fully implemented and all NMS Stocks are subject to the Plan, a Trading Pause under the Plan shall be subject to Exchange Rule 80C(b)(2). These proposed changes are designed to comply with Section VIII of the Plan to ensure implementation of the Plan's requirements.[24]

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with Section 6(b) of the Act[25] in general, and furthers the objectives of Section 6(b)(5),[26] in particular, in that it is designed to promote just and equitable principles of trade, remove impediments to and perfect the mechanisms of a free and open market and a national market system and, in general, to protect investors and the public interest.

The proposal promotes just and equitable principles of trade and removes impediments to, and perfects the mechanism of, a free and open market and a national market system by ensuring that the Exchange systems will not display or execute trading interest outside the Price Bands as required by the limit up-limit down and trading pause requirements specified in the Plan.

The proposal will also ensure that the trading interest on the Exchange is either repriced to maintain priority or canceled in a manner that promotes just and equitable principles of trade and removes impediments to, and perfects the mechanism of, a free and open market and a national market system. Specifically, the proposal will help allow market participants to continue to trade NMS Stocks within Price Bands in compliance with the Plan with certainty on how certain orders and trading interest will be treated. Thus, reducing uncertainty regarding the treatment and priority of trading interest with the Price Bands should help encourage market participants to continue to provide liquidity during times of extraordinary market volatility that occur during Regular Trading Hours.

The proposal also promotes just and equitable principles of trade and removes impediments to, and perfects the mechanism of, a free and open market and a national market system by ensuring that orders in NMS Stocks are not routed to other exchanges in situations where an execution may occur outside Price Bands, and thereby is reasonably designed to prevent an execution outside the Price Bands in a manner that promotes compliance with the limit up-limit down and trading pause requirements specified in the Plan.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed changes are being made to establish, maintain, and enforce written policies and procedures that are reasonably designed to comply with the limit up-limit down and trading pause requirements specified in the Plan, of which other equities exchanges are also Participants of. Other competing equity exchanges are subject to the same limit up-limit down and trading pause requirements specified in the Plan. Thus, the proposed changes will not impose any burden on competition while providing certainty of treatment and execution of trading interest on the Exchange to market participants during periods of extraordinary volatility in NMS stock while in compliance with the limit up-limit down and trading pause requirements specified in the Plan.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[27] and Rule 19b–4(f)(6) thereunder.[28] Because the proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) of the Act[29] to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File No. SR–NYSEMKT–2013–05 on the subject line.

Paper Comments

- Send paper comments in triplicate to Elizabeth M. Murphy, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File No. SR–NYSEMKT–2013–05. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–68883; File No. SR–EDGX–2013–04]

Self-Regulatory Organizations; EDGX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend EDGX Rule 11.14 To Extend the Operation of the Single Stock Circuit Breaker Program

February 8, 2013.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on January 30, 2013, EDGX Exchange, Inc. (''EDGX'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend EDGX Rule 11.14 to extend the operation of the single stock circuit breaker pilot program (the ''Pilot'') from the current scheduled expiration date of February 4, 2013 until the earlier of the initial date of operations of the Regulation NMS Plan to Address Extraordinary Market Volatility (the ''Plan'') or February 4, 2014. All of the changes described herein are applicable to EDGX Members. The text of the proposed rule change is available on the Exchange's Internet Web site at *www.directedge.com,* at the Exchange's principal office, and at the Public Reference Room of the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections A, B and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend EDGX Rule 11.14 to extend the operation of the Pilot from the current scheduled expiration date of February 4, 2013[3] until the earlier of the initial date of operations of the Plan or February 4, 2014. The Pilot will continue to operate as to individual securities until such security is subject to the Plan.

EDGX Rule 11.14 requires the Exchange to pause trading in an individual security listed on the Exchange if the primary listing market for such stock issues a trading pause. Such trading pause will continue until trading has resumed on the primary listing market. However, the Exchange may resume trading in such stock if trading has not resumed on the primary listing market and ten minutes have passed since the individual stock trading pause message has been received from the responsible single plan processor. The Pilot was developed and implemented as a market-wide initiative by the Exchange and other national securities exchanges in consultation with the Securities and Exchange Commission (the ''Commission'') staff and is currently applicable to all NMS stocks and specified exchange-traded products.[4]

The extension proposed herein would allow the Pilot to continue to operate without interruption until implementation of the Plan.[5] The Plan will begin initial operations on April 8, 2013.[6] If the Plan has an initial date of operations before February 4, 2014, the proposed Pilot for trading pauses would expire at that time.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[7] in general, and furthers the objectives of Section 6(b)(5) of the Act,[8] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. The Exchange believes that the change proposed herein meets these requirements in that it promotes

[8] 15 U.S.C. 78f(b)(5).

uniformity across markets concerning decisions to pause trading in a security when there are significant price movements, which promotes just and equitable principles of trade and removes impediments to, and perfects the mechanism of, a free and open market and a national market system. Additionally, extension of the Pilot until the earlier of the initial date of operations of the Plan or February 4, 2014 would allow the Pilot to continue to operate without interruption while the Exchange and the Commission further assess the effect of the Pilot on the marketplace or whether other initiatives should be adopted in lieu of the current Pilot, which contributes to the protection of investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed changes are being made to extend the Pilot until the earlier of the initial date of operations of the Plan or February 4, 2014 would allow the Pilot to continue to operate without interruption until implementation of the Plan, which contributes to the protection of investors and the public interest. Other competing equity exchanges are subject to the same trading pause requirements specified in the Plan. Thus, the proposed changes will not impose any burden on competition while providing trading pause requirements specified in the Plan.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act [9] and Rule 19b–4(f)(6) thereunder.[10] Because the proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.

A proposed rule change filed under Rule 19b–4(f)(6) [11] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b4(f)(6)(iii),[12] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest because such waiver would allow the pilot program to continue uninterrupted. Accordingly, the Commission hereby grants the Exchange's request and designates the proposal operative upon filing.[13]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–EDGX–2013–04 on the subject line.

Paper Comments

- Send paper comments in triplicate to Elizabeth M. Murphy, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–EDGX–2013–04. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make publicly available. All submissions should refer to File Number SR–EDGX–2013–04 and should be submitted on or before March 7, 2013.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[14]

Kevin M. O'Neill,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–68886; File No. SR–ISE–2013–10]

Self-Regulatory Organizations; International Securities Exchange, LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend ISE Rule 2102 To Extend the Pilot Program

February 8, 2013.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act'') [1] and Rule 19b–4 thereunder,[2] notice is hereby given that on January 31, 2013, the International Securities Exchange, LLC (''ISE'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 2102 (Hours of Business) to extend the expiration of the pilot rule.

The text of the proposed rule change is available on the Exchange's Internet Web site at *http://www.ise.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections A, B and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend ISE Rule 2102 to extend the expiration of the pilot rule. Initial amendments to ISE Rule 2102 to allow the Exchange to pause trading in an individual stock when the primary listing market for such stock issues a trading pause were approved by the Securities and Exchange Commission (''Commission'') on June 10, 2010 on a pilot basis to end on December 10, 2010.[3] The pilot was then extended to expire on April 11, 2011.[4] On March 21, 2011, ISE Rule 2102 was amended to state that the pilot would expire on the earlier of August 11, 2011 or the date on which a limit up/limit down mechanism to address extraordinary market volatility, if adopted, would apply.[5] On August 9, 2011, ISE Rule 2102 was once again amended to extend the pilot to January 31, 2012.[6] On January 30, 2012, ISE Rule 2102 was amended to extend the pilot to July 31, 2012.[7] On July 27, 2012, ISE Rule 2102 was amended to extend the pilot to February 4, 2013.[8]

On September 10, 2010, ISE Rule 2102 was amended to expand the pilot rule to apply to the Russell 1000® Index and other specified exchange traded products.[9] On June 23, 2011, ISE Rule 2102 was amended again to expand the pilot rule to apply to all NMS Stocks.[10] The Exchange now proposes to extend the date by which this pilot rule will expire to the earlier of the initial date of operations of the Regulation NMS Plan to Address Extraordinary Market Volatility or February 4, 2014. Extending this pilot program will provide the exchanges with a continued opportunity to assess the effect of this rule proposal on the markets. While the proposed rule change would allow the single stock circuit breaker to sunset as the Regulation NMS Plan to Address Extraordinary Market Volatility expands to cover more securities, this phasing out of the single stock circuit breaker will have no effect on the Exchange as the Exchange does not trade equity securities.

2. Statutory Basis

The statutory basis for the proposed rule change is Section 6(b)(5) of the Securities Exchange Act of 1934 (the ''Exchange Act''),[11] which requires the rules of an exchange to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest. The proposed rule change also is designed to support the principles of Section 11A(a)(1) [12] of the Exchange Act in that it seeks to assure fair competition among brokers and dealers and among exchange markets. The Exchange believes that the proposed rule meets these requirements in that it promotes uniformity across markets concerning decisions to pause trading in a security when there are significant price movements. Additionally, extending this pilot rule so that it will expire on the earlier of the initial date of operations of the Regulation NMS Plan to Address Extraordinary Market Volatility or February 4, 2014 will provide the exchanges with a continued opportunity to assess the effect of this rule proposal on the markets. While the proposed rule change would allow the single stock circuit breaker to sunset as the Regulation NMS Plan to Address Extraordinary Market Volatility expands to cover more securities, this phasing out of the single stock circuit breaker will have no effect on the Exchange as the Exchange does not trade equity securities.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act [13] and Rule 19b–4(f)(6) thereunder.[14] Because the proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.

A proposed rule change filed under Rule 19b–4(f)(6) [15] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b4(f)(6)(iii),[16] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest because such waiver would allow the pilot program to continue uninterrupted. Accordingly, the Commission hereby grants the Exchange's request and designates the proposal operative upon filing.[17]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

[13] 15 U.S.C. 78s(b)(3)(A)(iii).

[14] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires the Exchange to give the Commission written notice of the Exchange's intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[15] 17 CFR 240.19b–4(f)(6).

[16] 17 CFR 240.19b–4(f)(6)(iii).

[17] For purposes only of waiving the 30-day operative delay, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–ISE–2013–10 on the subject line.

Paper Comments

- Send paper comments in triplicate to Elizabeth M. Murphy, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–ISE–2013–10. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make publicly available. All submissions should refer to File Number SR–ISE–2013–10 and should be submitted on or before March 7, 2013.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[18]

Kevin M. O'Neill,

Deputy Secretary.

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[U.S. DOT Docket No. NHTSA–2012–0169]

Reports, Forms, and Recordkeeping Requirements: Agency Information Collection Activity Under OMB Review

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Notice; Correction.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collections and their expected burden. The **Federal Register** Notice with a 60-day comment period was published on December 11, 2012 [FR Doc. 2012–29844, Vol. 77, No. 238, Pages 73736–73737].

DATES: Comments must be submitted on or before March 18, 2013.

FOR FURTHER INFORMATION CONTACT: Jonathan Walker, contract task order manager, Office of Regulatory Analysis and Evaluation, National Highway Traffic Safety Administration, 1200 New Jersey Ave. SE., NVS–432, Washington, DC 20590. Mr. Walker's phone number is 202–366–8571 and his email address is *jonathan.walker@dot.gov.*

SUPPLEMENTARY INFORMATION:

National Highway Traffic Safety Administration

Title: Tire Pressure Monitoring Systems Special Studies.

OMB Number: 2174 Renewal.

Type of Request: Request for public comment on proposed collection of information.

Abstract: Improperly inflated tires pose a safety risk, increasing the chance of skidding, hydroplaning, longer stopping distances, and crashes due to flat tires and blowouts. In an effort to decrease the number of vehicles with improperly inflated tires, Tire Pressure Monitoring Systems (TPMS) were

mandated in Federal Motor Vehicle Safety Standard (FMVSS) No. 138, so that drivers are warned when the pressure in one or more of the vehicle's tires has fallen to 25 percent or more below the placard pressure, or a minimum level specified in the standard, whichever pressure is higher. Executive Order 12866 requires Federal agencies to evaluate their existing regulations and programs and measure their effectiveness in achieving their objectives. This survey (Tire Pressure Monitoring Systems Special Study) was conducted in order to evaluate whether the frequency of underinflated tires has decreased in vehicles with TPMS in comparison to vehicles of the same age without TPMS. Survey results led the agency to the determination that additional study is needed in regards to analogous aspects of medium- and heavy-duty (MD/HD) trucks. The supplementary study of MD/HD trucks is not expected to begin until 2014; therefore, NHTSA seeks an extension of *Tire Pressure Monitoring Systems Special Studies* in preparation for this additional work.

Affected Public: Individuals.

Estimated Total Annual Burden: 1,925 hours.

ADDRESSES: Send comments, within 30 days, to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725–17th Street NW., Washington, DC 20503, Attention NHTSA Desk Officer.

Comments are invited on: Whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Department's estimate of the burden of the proposed information collection; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology. A comment to OMB is most effective if OMB receives it within 30 days of publication.

Authority: 44 U.S.C. 3506(c)(2)(A).

James F. Simons,

Director, Office of Regulatory Analysis and Evaluation.

[Docket No. NHTSA–2013–0012, Notice 1]

Notice of Receipt of Petition for Decision That Nonconforming Long-Wheel Base 2005 Mercedes-Benz G-Class (463 Chassis) Multi-Purpose Passenger Vehicles Are Eligible for Importation

AGENCY: National Highway Traffic Safety Administration, DOT.

ACTION: Receipt of petition.

SUMMARY: This document announces receipt by the National Highway Traffic Safety Administration (NHTSA) of a petition for a decision that 2005 Long-Wheel Base (LWB) Mercedes-Benz G-class (463 chassis) multi-purpose passenger vehicles (MPVs) that were not originally manufactured to comply with all applicable Federal Motor Vehicle Safety Standards (FMVSS) are eligible for importation into the United States because they are substantially similar to vehicles that were originally manufactured for sale in the United States and that were certified by their manufacturer as complying with the safety standards (the U.S.-certified version of the 2005 LWB Mercedes-Benz G-class (463 chassis) MPV) and they are capable of being readily altered to conform to the standards.

DATE: The closing date for comments on the petition is March 18, 2013.

ADDRESSES: Comments should refer to the docket and notice numbers above and be submitted by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov*. Follow the online instructions for submitting comments.
- *Mail:* Docket Management Facility: U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building Ground Floor, Room W12–140, Washington, DC 20590–0001
- *Hand Delivery or Courier:* West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays.
- *Fax:* 202–493–2251.

Instructions: Comments must be written in the English language, and be no greater than 15 pages in length, although there is no limit to the length of necessary attachments to the comments. If comments are submitted in hard copy form, please ensure that two copies are provided. If you wish to receive confirmation that your comments were received, please enclose a stamped, self-addressed postcard with the comments. Note that all comments received will be posted without change to *http://www.regulations.gov*, including any personal information provided. Please see the Privacy Act heading below.

Privacy Act: Anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477–78).

How to Read Comments submitted to the Docket: You may read the comments received by Docket Management at the address and times given above. You may also view the documents from the Internet at *http://www.regulations.gov.* Follow the online instructions for accessing the dockets. The docket ID number and title of this notice are shown at the heading of this document notice. Please note that even after the comment closing date, we will continue to file relevant information in the Docket as it becomes available. Further, some people may submit late comments. Accordingly, we recommend that you periodically search the Docket for new material.

FOR FURTHER INFORMATION CONTACT: George Stevens, Office of Vehicle Safety Compliance, NHTSA (202–366–5308).

SUPPLEMENTARY INFORMATION:

Background

Under 49 U.S.C. 30141(a)(1)(A), a motor vehicle that was not originally manufactured to conform to all applicable FMVSS shall be refused admission into the United States unless NHTSA has decided that the motor vehicle is substantially similar to a motor vehicle originally manufactured for importation into and sale in the United States, certified under 49 U.S.C. § 30115, and of the same model year as the model of the motor vehicle to be compared, and is capable of being readily altered to conform to all applicable FMVSS.

Petitions for eligibility decisions may be submitted by either manufacturers or importers who have registered with NHTSA pursuant to 49 CFR Part 592. As specified in 49 CFR 593.7, NHTSA publishes notice in the **Federal Register** of each petition that it receives, and affords interested persons an opportunity to comment on the petition. At the close of the comment period,

NHTSA decides, on the basis of the petition and any comments that it has received, whether the vehicle is eligible for importation. The agency then publishes this decision in the **Federal Register**.

G&K Automotive Conversion, Inc. of Santa Ana, California (G&K)(Registered Importer 90–007) has petitioned NHTSA to decide whether nonconforming 2005 LWB Mercedes-Benz G-class (Type 463) MPVs are eligible for importation into the United States. The vehicles which WETL believes are substantially similar are 2005 LWB Mercedes-Benz G-class (Type 463) MPVs that were manufactured for importation into and sale in the United States and certified by their manufacturer as conforming to all applicable FMVSS.

The petitioner claims that it compared non-U.S. certified 2005 LWB Mercedes-Benz G-class (Type 463) MPVs to their U.S.-certified counterparts, and found the vehicles to be substantially similar with respect to compliance with most FMVSS. G&K submitted information with its petition intended to demonstrate that non-U.S. certified 2005 LWB Mercedes-Benz G-class (Type 463) MPVs, as originally manufactured, conform to many FMVSS in the same manner as their U.S. certified counterparts, or are capable of being readily altered to conform to those standards. Specifically, the petitioner claims that non-U.S. certified 2005 LWB Mercedes-Benz G-class (Type 463) MPVs are identical to their U.S. certified counterparts with respect to compliance with Standard Nos. 102 *Transmission Shift Lever Sequence, Starter Interlock, and Transmission Braking Effect;* 103 *Windshield Defrosting and Defogging Systems;* 104 *Windshield Wiping and Washing Systems;* 105 *Hydraulic and Electric Brake Systems;* 106 *Brake Hoses;* 113 *Hood Latch System;* 116 *Motor Vehicle Brake Fluids;* 119 *New Pneumatic Tires;* 124 *Accelerator Control Systems;* 201 *Occupant Protection in Interior Impact;* 202 *Head Restraints;* 204 *Steering Control Rearward Displacement;* 205 *Glazing Materials;* 206 *Door Locks and Door Retention Components;* 207 *Seating Systems;* 209 *Seat Belt Assemblies;* 210 *Seat Belt Assembly Anchorages;* 212 *Windshield Mounting;* 216 *Roof Crush Resistance;* 219 *Windshield Zone Intrusion;* 225 *Child Restraint Anchorage Systems;* and 302 *Flammability of Interior Materials.*

The petitioner also contends that the vehicles are capable of being altered to meet the following standards, in the manner indicated:

Standard No. 101 *Controls and Displays:* Replacement of the instrument cluster with a U.S.-model component and reprogramming and initializing the vehicle control system to integrate the instrument cluster and activate the required warning systems.

Standard No. 108 *Lamps, Reflective Devices and Associated Equipment:* Installation of U.S.- model headlamps and front and rear side marker lamps.

Standard No. 111 *Rearview Mirrors:* Replacement of the passenger-side rearview mirror with a U.S.-model component, or inscription of the required warning statement on the face of that mirror.

Standard No. 114 *Theft Protection:* Reprogramming the vehicle's control system so that the required warning is activated when the key is in the ignition and the driver's door is open.

Standard No. 118 *Power-Operated Window, Partition, and Roof Panel Systems:* Reprogramming the vehicle's control system and door modules so that the window transport mechanism is inoperative when the ignition is turned in the off position.

Standard No. 120 *Tire Selection and Rims for Motor Vehicles Other than Passenger Cars:* Installation of a tire information placard.

Standard No. 208 *Occupant Crash Protection:* Reprogramming the interior control computer to activate the seat belt warning system.

The petitioner also stated that the vehicles are equipped with an automatic restraint system that consists of a seat belt warning lamp, driver and passenger air bags and knee bolsters, air bag crash sensors, and an air bag control unit. The vehicles are also equipped in the front and rear outboard seating positions with Type 2 lap and shoulder belts identical to those found on the vehicle's U.S. certified counterpart that are self-tensioning and released by means of a single red push button.

Standard No. 214*Side Impact Protection:* Inspection of each vehicle to ensure it is equipped with door beams that meet the requirements of the standard.

Standard No. 301 *Fuel System Integrity:* Inspection of each vehicle and replacement of non-U.S. model components with U.S. model components to meet the requirement of the standard.

In addition, the petitioner states that a vehicle identification number (VIN) plate must be installed in the area of the left windshield post with the vehicle's original VIN identified as a substitute for a U.S. VIN to meet the requirements of 49 CFR Part 565.

All comments received before the close of business on the closing date indicated above will be considered, and will be available for examination in the docket at the above addresses both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Notice of final action on the petition will be published in the **Federal Register** pursuant to the authority indicated below.

Authority: 49 U.S.C. 30141(a)(1)(A), (a)(1)(B), and (b)(1); 49 CFR 593.7; delegation of authority at 49 CFR 1.95 and 501.8.

Issued on: February 11, 2013.

Claude H. Harris,

Director, Office of Vehicle Safety Compliance.

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA–2013–0014, Notice 1]

Notice of Receipt of Petition for Decision That Nonconforming 1992 Porsche Carrera Passenger Cars Are Eligible for Importation

AGENCY: National Highway Traffic Safety Administration, DOT.

ACTION: Notice of receipt of petition.

SUMMARY: This document announces receipt by the National Highway Traffic Safety Administration (NHTSA) of a petition for a decision that 1992 Porsche Carrera passenger cars that were not originally manufactured to comply with all applicable Federal Motor Vehicle Safety Standards (FMVSS), are eligible for importation into the United States because they are substantially similar to vehicles that were originally manufactured for sale in the United States and that were certified by their manufacturer as complying with the safety standards (the U.S.-certified version of the 1992 Porsche Carrera) and they are capable of being readily altered to conform to the standards.

DATES: The closing date for comments on the petition is March 18, 2013.

ADDRESSES: Comments should refer to the docket and notice numbers above and be submitted by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov*. Follow the online instructions for submitting comments.
- *Mail:* Docket Management Facility: U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building Ground Floor, Room W12–140, Washington, DC 20590–0001

• *Hand Delivery or Courier:* West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays.

• *Fax:* 202–493–2251.

Instructions: Comments must be written in the English language, and be no greater than 15 pages in length, although there is no limit to the length of necessary attachments to the comments. If comments are submitted in hard copy form, please ensure that two copies are provided. If you wish to receive confirmation that your comments were received, please enclose a stamped, self-addressed postcard with the comments. Note that all comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided. Please see the Privacy Act heading below.

Privacy Act: Anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477–78).

How to Read Comments submitted to the Docket: You may read the comments received by Docket Management at the address and times given above. You may also view the documents from the Internet at *http://www.regulations.gov*. Follow the online instructions for accessing the dockets. The docket ID number and title of this notice are shown at the heading of this document notice. Please note that even after the comment closing date, we will continue to file relevant information in the Docket as it becomes available. Further, some people may submit late comments. Accordingly, we recommend that you periodically search the Docket for new material.

FOR FURTHER INFORMATION CONTACT: Coleman Sachs, Office of Vehicle Safety Compliance, NHTSA (202–366–3151).

SUPPLEMENTARY INFORMATION:

Background

Under 49 U.S.C. 30141(a)(1)(A), a motor vehicle that was not originally manufactured to conform to all applicable FMVSS shall be refused admission into the United States unless NHTSA has decided that the motor vehicle is substantially similar to a motor vehicle originally manufactured for importation into and sale in the United States, certified under 49 U.S.C. 30115, and of the same model year as the model of the motor vehicle to be compared, and is capable of being readily altered to conform to all applicable FMVSS.

Petitions for eligibility decisions may be submitted by either manufacturers or importers who have registered with NHTSA pursuant to 49 CFR part 592. As specified in 49 CFR 593.7, NHTSA publishes notice in the **Federal Register** of each petition that it receives, and affords interested persons an opportunity to comment on the petition. At the close of the comment period, NHTSA decides, on the basis of the petition and any comments that it has received, whether the vehicle is eligible for importation. The agency then publishes this decision in the **Federal Register**.

J.K. Technologies, LLC (''JK''), of Baltimore, Maryland (Registered Importer 90–006) has petitioned NHTSA to decide whether nonconforming 1992 Porsche Carrera passenger cars are eligible for importation into the United States. The vehicles which JK believes are substantially similar are 1992 Porsche Carrera passenger cars that were manufactured for sale in the United States and certified by their manufacturer as conforming to all applicable FMVSS.

The petitioner claims that it compared the non-U.S. certified 1992 Porsche Carrera to its U.S.-certified counterpart, and found the vehicles to be substantially similar with respect to compliance with most FMVSS.

JK submitted information with its petition intended to demonstrate that the non-U.S. certified 1992 Porsche Carrera, as originally manufactured, conforms to many FMVSS in the same manner as its U.S. certified counterpart, or is capable of being readily altered to conform to those standards. Specifically, the petitioner claims that the non-U.S. certified 1992 Porsche Carrera is identical to its U.S. certified counterpart with respect to compliance with Standard Nos. 102 *Transmission Shift Lever Sequence, Starter Interlock, and Transmission Braking Effect,* 103 *Windshield Defrosting and Defogging Systems,* 104 *Windshield Wiping and Washing Systems,* 106 *Brake Hoses,* 113 *Hood Latch System,* 114 *Theft Protection,* 116 *Motor Vehicle Brake Fluids,* Standard No. 118 *Power-Operated Window, Partition, and Roof Panel Systems,* 109 *New Pneumatic Tires and certain specialty tires,* 124 *Accelerator Control Systems,* 135 *Light Vehicle Brake Systems,* 201 *Occupant Protection in Interior Impact,* 202 *Head Restraints,* 203 *Impact Protection for the Driver from the Steering Control System,* 204 *Steering Control Rearward Displacement,* 205 *Glazing Materials,* 206 *Door Locks and Door Retention Components,* 207 *Seating Systems,* 209 *Seat Belt Assemblies,* 210 *Seat Belt Assembly Anchorages,* 212 *Windshield Mounting,* 214 *Side Impact Protection,* 216 *Roof Crush Resistance,* 219 *Windshield Zone Intrusion,* 225 *Child Restraint Anchorage Systems,* 301 *Fuel System Integrity,* and 302 *Flammability of Interior Materials.*

The petitioner also contends that the vehicle is capable of being readily altered to meet the following standards, in the manner indicated:

Standard No. 101 *Controls Telltales, and Indicators:* Replacement of the instrument cluster with a U.S.-model component.

Standard No. 108 *Lamps, Reflective Devices and Associated Equipment:* Installation of the following U.S.-model components on vehicles not already so equipped: (a) Headlamps; (b) tail lamps (c) front and rear side marker lamps; and (d) a high-mounted stop lamp.

Standard No. 111 *Rearview Mirrors:* Installation of a U.S.-model passenger side rearview mirror, or inscription of the required warning statement on the face of the existing mirror.

Standard No. 120 *Tire Selection and Rims for Vehicles other than Passenger Cars:* Installation of a tire and rim information placard.

Standard No. 208 *Occupant Crash Protection:* (a) Reprogramming the vehicle computer to activate the seat belt warning lamp in a manner that meets the standard; and (b) inspection of all vehicles and installation of the following U.S.-model components on vehicles that are not already so equipped: (1)Airbags; (2)control unit; (3) sensors; (4) seat belts; and (5) knee bolster. The petitioner states that the vehicle is equipped with an automatic restraint system that consists of dual front airbags and knee bolsters, and with combination lap and shoulder belts at the front and rear outboard seating positions that are automatic, self-tensioning, and capable of being released by means of a single red push button.

The petitioner states that each vehicle will be inspected prior to importation for compliance with the Theft Prevention Standard in 49 CFR Part 541 and that anti-theft devices will be installed on all vehicles not already so equipped.

The petitioner additionally states that a vehicle identification plate must be affixed to the vehicles near the left windshield post to meet the requirements of 49 CFR Part 565 and that a certification label must be affixed

to the driver's door jamb to meet the requirements of 49 CFR Part 567.

All comments received before the close of business on the closing date indicated above will be considered, and will be available for examination in the docket at the above addresses both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Notice of final action on the petition will be published in the **Federal Register** pursuant to the authority indicated below.

Authority: 49 U.S.C. 30141(a)(1)(A) and (b)(1); 49 CFR 593.8; delegations of authority at 49 CFR 1.50 and 501.8.

Issued on: February 11, 2013.

Claude H. Harris,

Director, Office of Vehicle Safety Compliance.

BILLING CODE 4910–59–P

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

[Docket No. PHMSA–2013–0029]

Pipeline Safety: Public Forum State One-Call Exemptions

AGENCY: Office of Pipeline Safety, Pipeline and Hazardous Materials Safety Administration, DOT.

ACTION: Notice; public forum.

SUMMARY: The Pipeline and Hazardous Materials Safety Administration will sponsor a public forum on state one-call exemptions. The forum will be held on March 14, 2013, in West Palm Beach, Florida at the Palm Beach County Convention Center. At the forum, PHMSA will discuss the requirements of the Pipeline Safety, Regulatory Certainty and Job Creation Act of 2011 relating to exemptions in state one-call programs and actions taken to date. In addition, damage prevention stakeholders will discuss existing data relating to this topic and present perspectives during panel discussions.

DATES: The public forum will be held on Thursday, March 14, 2013, from 9:30 a.m. to 5:30 p.m. EST. Name badge pickup and onsite registration will be available starting at 8:30 a.m. Refer to the forum Web site for the agenda and times at: *http://primis.phmsa.dot.gov/meetings/MtgHome.mtg?mtg=85.* Please note that the public forum will be webcast live and presentations will be available on the forum Web site within 30 days following the public forum.

ADDRESSES: The forum is open to all. There is no cost to attend. The forum will be held at the Palm Beach County Convention Center, 650 Okeechobee Boulevard, West Palm Beach, Florida, 33401. PHMSA is holding the forum at this location because it is the same location where the Common Ground Alliance (CGA) 811 Excavation Safety Conference & Expo will be held March 11–14, 2013, and many of the likely attendees for the PHMSA Forum will participate in the CGA Excavation Safety Conference. Attendees can make hotel arrangements for the PHMSA Forum under the CGA room block at a rate of $199.00 per night. Further details can be found at *http://www.cgaconference.com.*

Registration: To help assure that adequate space is provided, all attendees are encouraged to register for the workshop at *http://primis.phmsa.dot.gov/meetings/MtgHome.mtg?mtg=85.*

Comments: Members of the public may also submit written comments, either before or after the workshop. Comments should reference Docket No. PHMSA–2013–0029. Comments may be submitted in the following ways:

- *E-Gov Web Site: http://www.regulations.gov.* This site allows the public to enter comments on any **Federal Register** notice issued by any agency. Follow the instructions for submitting comments.
- *Fax:* 1–202–493–2251.
- *Mail:* Docket Management System, U.S. Department of Transportation, 1200 New Jersey Avenue SE., Room W12–140, Washington, DC 20590.
- *Hand Delivery:* DOT Docket Management System, Room W12–140, on the ground floor of the West Building, 1200 New Jersey Avenue SE., Washington, DC between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Instructions: Identify the Docket No. at the beginning of your comments. If you submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA has received your comments, include a self-addressed stamped postcard. Internet users may submit comments at *http://www.regulations.gov.* Note: Comments will be posted without changes or edits to *http://www.regulations.gov* including any personal information provided. Please see the Privacy Act heading in the Regulatory Analyses and Notices section of the **SUPPLEMENTARY INFORMATION** for additional information.

Privacy Act Statement: Anyone may search the electronic form of all comments received for any of our dockets. You may review DOT's complete Privacy Act Statement in the **Federal Register** published April 11, 2000 (65 FR 19477).

Information on Services for Individuals with Disabilities: For information on facilities or services for individuals with disabilities, or to request special assistance at the meeting, please contact Annmarie Robertson at 317–253–1622, or by email at *annmarie.robertson@dot.gov* by March 4, 2013.

FOR FURTHER INFORMATION CONTACT: Annmarie Robertson, Office of Pipeline Safety, at 317–253–1622 or email at *annmarie.robertson@dot.gov,* regarding the subject matter of this notice.

SUPPLEMENTARY INFORMATION: Section 3 of the Pipeline Safety, Regulatory Certainty and Job Creation Act of 2011 (Pub. L. 112–90) requires that PHMSA address exemptions in state one-call laws in two ways: As a factor in determining eligibility for certain grants, and in a requirement to prepare a state-by-state exemption study. With respect to grant eligibility, in order to qualify for a state one-call grant under 49 U.S.C. 6106, a state may not provide any exemptions to municipalities, state agencies, or their contractors from the one-call notification system requirements of the program. This amendment takes effect 1/3/2014.

With respect to the study on the impact of exemptions on pipeline safety, Section 3(d) states:

(1) Study.—The Secretary of Transportation shall conduct a study on the impact of excavation damage on pipeline safety.

(2) Contents.—The study shall include—

(A) an analysis of the frequency and severity of different types of excavation damage incidents;

(B) an analysis of exemptions to the one-call notification system requirements in each State;

(C) a comparison of exemptions to the one-call notification system requirements in each State to the types of excavation damage incidents in that State; and

(D) an analysis of the potential safety benefits and adverse consequences of eliminating all exemptions for mechanized excavation from State one-call notification systems.

(3) Report.—Not later than 2 years after the date of enactment of this Act, the Secretary shall submit to the Committee on Transportation and Infrastructure and the Committee on Energy and Commerce of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate a report on the results of the study.

PHMSA has conducted a preliminary analysis of the exemptions found in state one-call laws and regulations. PHMSA is in the process of developing a plan for addressing grant eligibility in accordance with the law and will continue to work with stakeholders concerning this requirement. This public forum will allow PHMSA, state pipeline safety representatives, excavators, pipeline operators, one-call centers, the public, facility locators, and stakeholders often affected by one-call exemptions such as railroads, local government and the farming community to share data and observations resulting from one-call exemptions and the impact of removing such exemptions. This input will facilitate PHMSA's ability to complete the study required in Section 3 of the law.

Participants of the public forum will benefit from: (1) Understanding the issue and the current status of states with regard to exemptions in one-call laws; (2) understanding the issues concerning the availability of data to support or challenge existing exemptions; and (3) listening to panelists present perspectives, both positive and negative, on the existence of exemptions in state one-call laws.

Interested persons may obtain more information on damage prevention at: *http://primis.phmsa.dot.gov/comm/DamagePrevention.htm.*

Issued in Washington, DC, on February 8, 2013.

Linda Daugherty,

Deputy Associate Administrator for Policy and Programs.

BILLING CODE 4910–60–P

DEPARTMENT OF TRANSPORTATION

Surface Transportation Board

[Docket No. FD 35714]

Puget Sound & Pacific Railroad Company—Lease Exemption—the United States of America

Puget Sound & Pacific Railroad Company (PSAP), a Class III rail carrier, has filed a verified notice of exemption under 49 CFR 1150.41 to lease from the United States of America (the Navy), and to operate, pursuant to a lease agreement dated January 16, 2013, a 44-mile line of railroad between Shelton and Bangor, Wash., and a 4.6-mile branch line to the Bremerton Navy Yard, in Kitsap and Mason Counties, Wash., a total distance of approximately 48.6 miles (the Line).

According to PSAP, there are no mileposts on the Line. PSAP states that the lease agreement replaces a transportation agreement dated December 11, 1944, between the Navy and the Northern Pacific Railway Company (Northern Pacific)[1] that covers the operations of the Line (operating agreement). PSAP points out that, under the operating agreement, it currently provides service on the above-described 48.6 miles of rail line,[2] and will continue to provide the same common carrier service under the lease agreement.

PSAP has certified that its projected annual revenues as a result of this transaction will not result in PSAP's becoming a Class II or Class I rail carrier but that its projected annual revenue will exceed $5 million. Accordingly, PSAP is required, at least 60 days before this exemption is to become effective, to send notice of the transaction to the national offices of the labor unions with employees on the affected lines, post a copy of the notice at the workplace of the employees on the affected lines, and certify to the Board that it has done so. 49 CFR 1150.42(e).

PSAP has certified to the Board that, on January 24, 2013, it posted notice of the transaction at the workplace of the employees on the affected lines, and on January 29, 2013, it served a copy of the notice on the national office of the potentially affected employees' labor union, as required under 49 CFR 1150.42(e). However, concurrently with its notice of exemption, PSAP filed a petition for waiver of the 60-day advance labor notice requirement under 1150.42(e), asserting that no employees will be affected by the change from the operating agreement to the lease agreement, and that the transaction will not result in any operational or maintenance changes on the Line. PSAP's waiver request will be addressed in a separate decision.

PSAP states that it intends to consummate the transaction on February 28, 2013 (the effective date of this exemption). The Board will establish in the decision on the waiver request the earliest this transaction may be consummated.

If the notice contains false or misleading information, the exemption is void *ab initio.* Petitions to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the effectiveness of the exemption. Petitions for stay must be filed no later than February 21, 2013.

An original and 10 copies of all pleadings, referring to Docket No. FD 35714, must be filed with the Surface Transportation Board, 395 E Street SW., Washington, DC 20423–0001. In addition, one copy of each pleading must be served on Louis E. Gitomer, Law Offices of Louis E. Gitomer, 600 Baltimore Avenue, Suite 301, Towson, MD 21204.

Board decisions and notices are available at our Web site at *www.stb.dot.gov.*

Decided: February 11, 2013.

By the Board, Rachel D. Campbell, Director, Office of Proceedings.

Derrick A. Gardner,

Clearance Clerk.

BILLING CODE 4810–25–M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Collection; Comment Request for the MeF letter

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the IRS is soliciting comments concerning the MeF letter, Mondernized e-File—Non-compliance with Mandate for Large Corporations to file electronically.

DATES: Written comments should be received on or before April 15, 2013 to be assured of consideration.

ADDRESSES: Direct all written comments to Yvette Lawrence, Internal Revenue Service, Room 6129, 1111 Constitution Avenue NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the form and instructions should be directed to Allan Hopkins, (202) 622–6665, at Internal Revenue Service, Room 6129, 1111 Constitution Avenue NW., Washington, DC 20224, or through the Internet at *Allan.M.Hopkins@irs.gov.*

SUPPLEMENTARY INFORMATION:

Title: Mondernized e-File—Non-compliance with Mandate for Large Corporations to file electronically.

OMB Number: 1545–2023.

Form Number: MeF letter.

Abstract: Service will contact those taxpayers who file paper income tax returns to determine if these taxpayers should have filed electronic returns under the Mandate, Treasury Regulation Section 301.6011–5T.

Current Actions: There is no change in the paperwork burden previously approved by OMB. This form is being submitted for renewal purposes only.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses and other for-profit organizations.

Estimated Number of Respondents: 20,250.

Estimated Time per Respondent: 5 minutes.

Estimated Total Annual Burden Hours: 2,080.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Approved: February 5, 2013.

Yvette Lawrence,

IRS Reports Clearance Officer.

[FR Doc. 2013–03374 Filed 2–13–13; 8:45 am]

BILLING CODE 4830–01–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Collection; Comment Request for Form 13797

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the IRS is soliciting comments concerning Form 13797, Tribal Evaluation of Filing and Accuracy Compliance (TEFAC)—Compliance Check Report.

DATES: Written comments should be received on or before April 15, 2013 to be assured of consideration.

ADDRESSES: Direct all written comments to Yvette Lawrence, Internal Revenue Service, Room 6129, 1111 Constitution Avenue NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the form and instructions should be directed to Allan Hopkins, (202) 622–6665, at Internal Revenue Service, Room 6129, 1111 Constitution Avenue NW., Washington, DC 20224, or through the Internet at *Allan.M.Hopkins@irs.gov*.

SUPPLEMENTARY INFORMATION: *Title:* Tribal Evaluation of Filing and Accuracy Compliance (TEFAC)—Compliance Check Report.

OMB Number: 1545–2026.

Form Number: Form 13797.

Abstract: This form will be provided to tribes who elect to perform a self compliance check on any or all of their entities. This is a VOLUNTARY program, and the entity is not penalized for non-completion of forms or withdrawal from the program. Upon completion, the information will be used by the Tribe and ITG to develop training needs, compliance strategies, and corrective actions.

Current Actions: There is no change in the paperwork burden previously approved by OMB. This form is being submitted for renewal purposes only.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses and other for-profit organizations and State, Local, or Tribal Government.

Estimated Number of Respondents: 20.

Estimated Time per Respondent: 22 hours 20 minutes.

Estimated Total Annual Burden Hours: 447.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number.

Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Approved: February 5, 2013.

Yvette Lawrence,

IRS Reports Clearance Officer.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Open Season for Membership to the Electronic Tax Administration Advisory Committee (ETAAC)

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Request for Nominations and Applications.

SUMMARY: The Electronic Tax Administration Advisory Committee (ETAAC) was established to provide continued input into the development and implementation of the Internal Revenue Service (IRS) strategy for electronic tax administration. The ETAAC provides an organized public forum for discussion of electronic tax administration issues in support of the overriding goal that paperless filing should be the preferred and most convenient method of filing tax and information returns. ETAAC members convey the public's perception of IRS electronic tax administration activities, offer constructive observations about current or proposed policies, programs, and procedures, and suggest improvements. Members of the ETAAC may not be federally registered lobbyists. This document seeks applicants for selection as committee members.

The Director, Return Preparer Office (RPO) will assure that the size and organizational representation of the ETAAC obtains balanced membership and includes representatives from various groups including: (1) Tax practitioners and preparers, (2) transmitters of electronic returns, (3) tax software developers, (4) large and small business, (5) employers and payroll service providers, (6) individual taxpayers, (7) financial industry (payers, payment options and best practices), (8) system integrators (technology providers), (9) academic (marketing, sales or technical perspectives), (10) trusts and estates, (11) tax exempt organizations, and (12) state and local governments. We are soliciting applicants from professional and public interest groups. Members will serve a three-year term on the ETAAC to allow for a rotation in membership which ensures that different perspectives are represented. All travel expenses within government guidelines will be reimbursed. Potential candidates must pass an IRS tax compliance check and Federal Bureau of Investigation (FBI) background investigation.

DATES: The complete application package must be received no later than Monday, April 1, 2013.

ADDRESSES: Completed applications should be submitted using one of the following methods:

- *Email:* Send to *etaac@irs.gov.*
- *Mail:* Send to Internal Revenue Service, Return Preparer Office, SE:RPO 5000 Ellin Road (M/Stop C4–470, Attn: ETAAC Analyst (C4–213), Lanham, Maryland 20706.
- *Fax:* Send via facsimile to (202) 283–2845 (not a toll-free number).

An application can be obtained by sending an email to *etaac@irs.gov* or calling (202) 283–2178 (not a toll-free number).

FOR FURTHER INFORMATION CONTACT: Cassandra Daniels, (202) 283–2178 or send an email to *etaac@irs.gov.*

SUPPLEMENTARY INFORMATION: The ETAAC will also provide an annual report to Congress on IRS progress in meeting the Restructuring and Reform Act of 1998 goals for electronic filing of tax returns. This activity is based on the authority to administer the Internal Revenue laws conferred upon the Secretary of the Treasury by section 7801 of the Internal Revenue Code and delegated to the Commissioner of the Internal Revenue under section 7803 of the Internal Revenue Code. The ETAAC will research, analyze, consider, and make recommendations on a wide range of electronic tax administration issues and will provide input into the development of the strategic plan for electronic tax administration.

Applicants should describe and document their qualifications for membership to the Committee. Equal opportunity practices will be followed in all appointments to the Committee. To ensure that the recommendations of the Committee have taken into account the needs of the diverse groups served by the Department, membership will include, to the extent practicable, individuals, with demonstrated ability to represent the interests of all racial and ethnic groups, women and men, and persons with disabilities. The Secretary of Treasury will review the recommended candidates and make final selections.

Dated: January 31, 2013.

Preston B. Benoit,

Deputy Director, Return Preparer Office.

Mortgage Servicing Rules Under the Real Estate Settlement Procedures Act (Regulation X)

AGENCY: Bureau of Consumer Financial Protection.

ACTION: Final rule; official interpretations.

SUMMARY: The Bureau of Consumer Financial Protection is amending Regulation X, which implements the Real Estate Settlement Procedures Act of 1974, and implementing a commentary that sets forth an official interpretation to the regulation. The final rule implements provisions of the Dodd-Frank Wall Street Reform and Consumer Protection Act regarding mortgage loan servicing. Specifically, this final rule implements Dodd-Frank Act sections addressing servicers' obligations to correct errors asserted by mortgage loan borrowers; to provide certain information requested by such borrowers; and to provide protections to such borrowers in connection with force-placed insurance. Additionally, this final rule addresses servicers' obligations to establish reasonable policies and procedures to achieve certain delineated objectives; to provide information about mortgage loss mitigation options to delinquent borrowers; to establish policies and procedures for providing delinquent borrowers with continuity of contact with servicer personnel capable of performing certain functions; and to evaluate borrowers' applications for available loss mitigation options. Further, this final rule modifies and streamlines certain existing servicing-related provisions of Regulation X. For instance, this final rule revises provisions relating to mortgage servicers' obligation to provide disclosures to borrowers in connection with transfers of mortgage servicing, and mortgage servicers' obligation to manage escrow accounts, including restrictions on purchasing force-placed insurance for certain borrowers with escrow accounts and requirements to return amounts in an escrow account to a borrower upon payment in full of a mortgage loan. Concurrently with the issuance of this final rule, the Bureau is issuing a rule implementing amendments relating to mortgage servicing to the Truth in Lending Act in Regulation Z.

DATES: This final rule is effective on January 10, 2014.

FOR FURTHER INFORMATION CONTACT:

Regulation X (RESPA): Whitney Patross, Attorney; Jane Gao, Terry Randall or Michael Scherzer, Counsels; Lisa Cole or Mitchell E. Hochberg, Senior Counsels, Office of Regulations, at (202) 435–7700.

Regulation Z (TILA): Whitney Patross, Attorney; Marta Tanenhaus or Mitchell E. Hochberg, Senior Counsels, Office of Regulations, at (202) 435–7700.

SUPPLEMENTARY INFORMATION:

I. Summary of the Final Rule

The Bureau of Consumer Financial Protection (Bureau) is amending Regulation X, which implements the Real Estate Settlement Procedures Act of 1974, and implementing a commentary that sets forth an official interpretation to the regulation (the 2013 RESPA Servicing Final Rule). The final rule implements provisions of the Dodd-Frank Wall Street Reform and Consumer Protection Act regarding mortgage loan servicing.[1] Specifically, this final rule implements Dodd-Frank Act sections addressing servicers' obligations to correct errors asserted by mortgage loan borrowers; to provide certain information requested by such borrowers; and to provide protections to such borrowers in connection with force-placed insurance. Additionally, this final rule addresses servicers' obligations to establish reasonable policies and procedures to achieve certain delineated objectives; to provide information about mortgage loss mitigation options to delinquent borrowers; to establish policies and procedures for providing delinquent borrowers with continuity of contact with servicer personnel capable of performing certain functions; and to evaluate borrowers' applications for available loss mitigation options. Further, this final rule modifies and streamlines certain existing servicing-related provisions of Regulation X. For instance, this final rule revises provisions relating to mortgage servicers' obligation to provide disclosures to borrowers in connection with a transfer of mortgage servicing, and mortgage servicers' obligation to manage escrow accounts, including restrictions on purchasing force-placed insurance for certain borrowers with escrow accounts and requirements to return amounts in an escrow account to a borrower upon payment in full of a mortgage loan. Concurrently with the issuance of this final rule, the Bureau is issuing a rule implementing amendments relating to mortgage servicing to the Truth in Lending Act in Regulation Z (the 2013 TILA Servicing Final Rule).

On August 10, 2012, the Bureau issued proposed rules that would have amended Regulation X, which implements RESPA,[2] as well as Regulation Z, which implements TILA,[3] regarding mortgage servicing requirements.[4] The Proposed Servicing Rules proposed to implement the Dodd-Frank Act amendments to TILA and RESPA with respect to, among other things, periodic mortgage statements, disclosures for ARMs, prompt crediting of mortgage loan payments, requests for mortgage loan payoff statements, error resolution, information requests, and protections relating to force-placed insurance. In the 2012 RESPA Servicing Proposal, the Bureau also proposed to use its authority to adopt requirements relating to servicer policies and procedures, early intervention with delinquent borrowers, continuity of contact, and procedures for evaluating and responding to loss mitigation applications.[5] The proposals sought to address fundamental problems that underlie many consumer complaints and recent regulatory and enforcement actions, as set forth in more detail below.

The Bureau is finalizing the Proposed Servicing Rules with respect to nine

The proposal was published in the **Federal Register** on September 17, 2012. 77 FR 57200 (Sept. 17 2012) (2012 RESPA Servicing Proposal).

[3] *See* Press Release, U.S. Consumer Fin. Prot. Bureau, *Consumer Financial Protection Bureau Proposes Rules to Protect Mortgage Borrowers* (August 10, 2012) available at *http://www.consumerfinance.gov/pressreleases/consumer-financial-protection-bureau-proposes-rules-to-protect-mortgage-borrowers/*. This proposal was also published in the **Federal Register** on September 17, 2012. 77 FR 57318 (Sept. 17, 2012) (2012 TILA Servicing Proposal; and, together with the 2012 RESPA Servicing Proposal, the Proposed Servicing Rules).

[4] The 2013 RESPA Servicing Final Rule and the 2013 TILA Servicing Final Rule are referred to collectively as the Final Servicing Rules.

[5] For ease of discussion, this notice uses the term ''discretionary rulemakings'' to refer to a set of regulations implemented using the Bureau's authorities under section 6(j), 6(k)(1)(E), or 19(a) of RESPA to expand requirements beyond those explicit in RESPA. The ''discretionary rulemakings'' include requirements relating to servicer policies and procedures, early intervention with delinquent borrowers, continuity of contact, and procedures for evaluating and responding to loss mitigation applications, as set forth in §§ 1024.38–41.

major topics, as summarized below, as well as certain technical and streamlining amendments. The goals of the Final Servicing Rules are to provide better disclosure to consumers of their mortgage loan obligations and to better inform consumers of, and assist consumers with, options that may be available for consumers having difficulty with their mortgage loan obligations. The amendments also address critical servicer practices relating to, among other things, correcting errors, imposing charges for force-placed insurance, crediting mortgage loan payments, and providing payoff statements. The Bureau's final rules are set forth in two separate notices because some provisions implement requirements that Congress imposed under TILA while other provisions implement requirements Congress imposed under RESPA.[6]

A. Major Topics in the Final Servicing Rules

1. Periodic billing statements (2013 TILA Servicing Final Rule). Creditors, assignees, and servicers must provide a periodic statement for each billing cycle containing, among other things, information on payments currently due and previously made, fees imposed, transaction activity, application of past payments, contact information for the servicer and housing counselors, and, where applicable, information regarding delinquencies. These statements must meet the timing, form, and content requirements provided in the rule. The rule contains sample forms that may be used. The periodic statement requirement generally does not apply to fixed-rate loans if the servicer provides a coupon book, so long as the coupon book contains certain information specified in the rule and certain other information specified in the rule is made available to the consumer. The rule also includes an exemption for small servicers as discussed below.

2. Interest rate adjustment notices (2013 TILA Servicing Final Rule). Creditors, assignees, and servicers must provide a consumer whose mortgage has an adjustable rate with a notice between 210 and 240 days prior to the first payment due after the rate first adjusts. This notice may contain an estimate of the new rate and new payment. Creditors, assignees, and servicers also must provide a notice between 60 and 120 days before payment at a new level is due when a rate adjustment causes the payment to change. The current annual notice that must be provided for adjustable-rate mortgages (ARMs) for which the interest rate, but not the payment, has changed over the course of the year is no longer required. The rule contains model and sample forms that servicers may use.

3. Prompt payment crediting and payoff statements (2013 TILA Servicing Final Rule). Servicers must promptly credit periodic payments from borrowers as of the day of receipt. A periodic payment consists of principal, interest, and escrow (if applicable). If a servicer receives a payment that is less than the amount due for a periodic payment, the payment may be held in a suspense account. When the amount in the suspense account covers a periodic payment, the servicer must apply the funds to the consumer's account. In addition, creditors, assignees, and servicers must provide an accurate payoff balance to a consumer no later than seven business days after receipt of a written request from the borrower for such information.

4. Force-placed insurance (2013 RESPA Servicing Final Rule). Servicers are prohibited from charging a borrower for force-placed insurance coverage unless the servicer has a reasonable basis to believe the borrower has failed to maintain hazard insurance, as required by the loan agreement, and has provided required notices. An initial notice must be sent to the borrower at least 45 days before charging the borrower for force-placed insurance coverage, and a second reminder notice must be sent no earlier than 30 days after the first notice. The rule contains model forms that servicers may use. If a borrower provides proof of hazard insurance coverage, the servicer must cancel any force-placed insurance policy and refund any premiums paid for overlapping periods in which the borrower's coverage was in place. The rule also provides that charges related to force-placed insurance (other than those subject to State regulation as the business of insurance or authorized by Federal law for flood insurance) must be for a service that was actually performed and must bear a reasonable relationship to the servicer's cost of providing the service. Where the borrower has an escrow account for the payment of hazard insurance premiums, the servicer is prohibited from obtaining force-place insurance where the servicer can continue the borrower's homeowner insurance, even if the servicer needs to advance funds to the borrower's escrow account to do so. The rule against obtaining force-placed insurance in cases in which hazard insurance may be maintained through an escrow account exempts small servicers, as discussed below, so long as any force-placed insurance purchased by the small servicer is less expensive to a borrower than the amount of any disbursement the servicer would have made to maintain hazard insurance coverage.

5. Error resolution and information requests (2013 RESPA Servicing Final Rule). Servicers are required to meet certain procedural requirements for responding to written information requests or complaints of errors. The rule requires servicers to comply with the error resolution procedures for certain listed errors as well as any error relating to the servicing of a mortgage loan. Servicers may designate a specific address for borrowers to use. Servicers generally are required to acknowledge the request or notice of error within five days. Servicers also generally are required to correct the error asserted by the borrower and provide the borrower written notification of the correction, or to conduct an investigation and provide the borrower written notification that no error occurred, within 30 to 45 days. Further, within a similar amount of time, servicers generally are required to acknowledge borrower written requests for information and either provide the information or explain why the information is not available.

6. General servicing policies, procedures, and requirements (2013 RESPA Servicing Final Rule). Servicers are required to establish policies and procedures reasonably designed to achieve objectives specified in the rule. The reasonableness of a servicer's policies and procedures takes into account the size, scope, and nature of the servicer's operations. Examples of the specified objectives include accessing and providing accurate and timely information to borrowers, investors, and courts; properly evaluating loss mitigation applications in accordance with the eligibility rules established by investors; facilitating oversight of, and compliance by, service providers; facilitating transfer of information during servicing transfers; and informing borrowers of the availability of written error resolution and information request procedures. In addition, servicers are required to retain records relating to each mortgage loan until one year after the mortgage loan is discharged or servicing is transferred, and to maintain certain documents and information for each mortgage loan in a manner that enables the services to compile it into a servicing file within five days. This section includes an exemption for small servicers as discussed below. The Bureau and

[6] Note that TILA and RESPA differ in their terminology. Whereas Regulation Z generally refers to ''consumers'' and ''creditors,'' Regulation X generally refers to ''borrowers'' and ''lenders.''

prudential regulators will be able to supervise servicers within their jurisdiction to assure compliance with these requirements but there will not be a private right of action to enforce these provisions.

7. Early intervention with delinquent borrowers (2013 RESPA Servicing Final Rule). Servicers must establish or make good faith efforts to establish live contact with borrowers by the 36th day of their delinquency and promptly inform such borrowers, where appropriate, that loss mitigation options may be available. In addition, a servicer must provide a borrower a written notice with information about loss mitigation options by the 45th day of a borrower's delinquency. The rule contains model language servicers may use for the written notice. This section includes an exemption for small servicers as discussed below.

8. Continuity of contact with delinquent borrowers (2013 RESPA Servicing Final Rule). Servicers are required to maintain reasonable policies and procedures with respect to providing delinquent borrowers with access to personnel to assist them with loss mitigation options where applicable. The policies and procedures must be reasonably designed to ensure that a servicer assigns personnel to a delinquent borrower by the time a servicer provides such borrower with the written notice required by the early intervention requirements, but in any event, by the 45th day of a borrower's delinquency. These personnel should be accessible to the borrower by phone to assist the borrower in pursuing loss mitigation options, including advising the borrower on the status of any loss mitigation application and applicable timelines. The personnel should be able to access all of the information provided by the borrower to the servicer and provide that information, when appropriate, to those responsible for evaluating the borrower for loss mitigation options. This section includes an exemption for small servicers as discussed below. The Bureau and the prudential regulators will be able to supervise servicers within their jurisdiction to assure compliance with these requirements but there will not be a private right of action to enforce these provisions.

9. Loss Mitigation Procedures (2013 RESPA Servicing Final Rule). Servicers are required to follow specified loss mitigation procedures for a mortgage loan secured by a borrower's principal residence. If a borrower submits an application for a loss mitigation option, the servicer is generally required to acknowledge the receipt of the application in writing within five days and inform the borrower whether the application is complete and, if not, what information is needed to complete the application. The servicer is required to exercise reasonable diligence in obtaining documents and information to complete the application.

For a complete loss mitigation application received more than 37 days before a foreclosure sale, the servicer is required to evaluate the borrower, within 30 days, for all loss mitigation options for which the borrower may be eligible in accordance with the investor's eligibility rules, including both options that enable the borrower to retain the home (such as a loan modification) and non-retention options (such as a short sale). Servicers are free to follow ''waterfalls'' established by an investor to determine eligibility for particular loss mitigation options. The servicer must provide the borrower with a written decision, including an explanation of the reasons for denying the borrower for any loan modification option offered by an owner or assignee of a mortgage loan with any inputs used to make a net present value calculation to the extent such inputs were the basis for the denial. A borrower may appeal a denial of a loan modification program so long as the borrower's complete loss mitigation application is received 90 days or more before a scheduled foreclosure sale.

The rule restricts ''dual tracking,'' where a servicer is simultaneously evaluating a consumer for loan modifications or other alternatives at the same time that it prepares to foreclose on the property. Specifically, the rule prohibits a servicer from making the first notice or filing required for a foreclosure process until a mortgage loan account is more than 120 days delinquent. Even if a borrower is more than 120 days delinquent, if a borrower submits a complete application for a loss mitigation option before a servicer has made the first notice or filing required for a foreclosure process, a servicer may not start the foreclosure process unless (1) the servicer informs the borrower that the borrower is not eligible for any loss mitigation option (and any appeal has been exhausted), (2) a borrower rejects all loss mitigation offers, or (3) a borrower fails to comply with the terms of a loss mitigation option such as a trial modification.

If a borrower submits a complete application for a loss mitigation option after the foreclosure process has commenced but more than 37 days before a foreclosure sale, a servicer may not move for a foreclosure judgment or order of sale, or conduct a foreclosure sale, until one of the same three conditions has been satisfied. In all of these situations, the servicer is responsible for promptly instructing foreclosure counsel retained by the servicer not to proceed with filing for foreclosure judgment or order of sale, or to conduct a foreclosure sale, as applicable.

This section includes an exemption for small servicers as defined above. However, a small servicer is required to comply with two requirements: (1) A small servicer may not make the first notice or filing required for a foreclosure process unless a borrower is more than 120 days delinquent, and (2) a small servicer may not proceed to foreclosure judgment or order of sale, or conduct a foreclosure sale, if a borrower is performing pursuant to the terms of a loss mitigation agreement.

All of the provisions in the section relating to loss mitigation can be enforced by individuals. Additionally, the Bureau and the prudential regulators can also supervise servicers within their jurisdiction to assure compliance with these requirements.

B. Scope of the Final Servicing Rules

The Final Servicing Rules have somewhat different scopes, with respect to the types of mortgage loan transactions covered and the loans that are exempted. With respect to the 2013 TILA Servicing Final Rule, certain requirements, specifically the periodic statement and ARM disclosure requirements, only apply to closed-end mortgage loans, whereas other requirements, specifically the requirements for crediting of payments and providing payoff statements, apply to both open-end and closed-end mortgage loans. Reverse mortgage transactions and timeshare plans are exempt from the periodic statement requirement. ARMs with terms of one year or less are exempt from the ARM disclosure requirements.

With respect to the 2013 RESPA Servicing Final Rule, certain requirements generally apply to federally related mortgage loans that are closed-end, with certain exemptions for loans on property of 25 acres or more, business-purpose loans, temporary financing, loans secured by vacant land, and certain loan assumptions or conversions. Open-end lines of credit (home equity plans) are generally exempt from the requirements in the 2013 RESPA Servicing Final Rule. The general servicing policies, procedure, and requirements, early intervention, continuity of contact, and loss mitigation procedures provisions are generally inapplicable to servicers of

reverse mortgage transactions or to servicers of mortgage loans for which the servicers are also qualified lenders under the Farm Credit Act of 1971.

In the 2013 TILA Servicing Final Rule, the Bureau is exercising its authority under TILA to provide an exemption from the periodic statement requirement for small servicers, defined as servicers that service 5,000 mortgage loans or less and only service mortgage loans the servicer or an affiliate owns or originated (small servicers). In this 2013 RESPA Servicing Final Rule, the Bureau has elected not to extend to these small servicers most provisions of the Final Rule that are not being promulgated to implement specific mandates in the Dodd-Frank Act but are, instead, being issued by the Bureau, in the exercise of its discretion, pursuant to its discretionary rulemaking authority under RESPA, as amended by the Dodd-Frank Act, and title X of the Dodd-Frank Act. The exemptions from the discretionary rulemakings include those relating to general servicing policies, procedures, and requirements; early intervention with delinquent borrowers; continuity of contact; and most of the requirements for evaluating and responding to loss mitigation applications. Further, the Bureau is not restricting small servicers from purchasing force-placed insurance for borrowers with escrow accounts for the payment of hazard insurance, so long as the cost to the borrower of the force-placed insurance obtained by a small servicer is less than the amount the small servicer would be required to disburse from the borrower's escrow account to ensure that the borrower's hazard insurance premium charges were paid in a timely manner. Small servicers are required to comply with limited loss mitigation procedure requirements. These include (1) a prohibition on making the first notice or filing required for a foreclosure process unless a borrower is more than 120 days delinquent and (2) a prohibition on making the first notice or filing or moving for foreclosure judgment or order of sale, or conducting a foreclosure sale, when a borrower is performing pursuant to the terms of a loss mitigation agreement. The exemptions applicable to small servicers in the 2013 TILA Servicing Rule and the 2013 RESPA Servicing Rule are also being extended to Housing Finance Agencies, without regard to the number of mortgage loans serviced by any such agency, and these agencies are included within the definition of small servicer.

II. Background

A. Overview of the Mortgage Servicing Market and Market Failures

The mortgage market is the single largest market for consumer financial products and services in the United States, with approximately $10.3 trillion in loans outstanding.[7] Mortgage servicers play a vital role within the broader market by undertaking the day-to-day management of mortgage loans on behalf of lenders who hold the loans in their portfolios or (where a loan has been securitized) investors who are entitled to the loan proceeds.[8] Over 60 percent of mortgage loans are serviced by mortgage servicers for investors.

Servicers' duties typically include billing borrowers for amounts due, collecting and allocating payments, maintaining and disbursing funds from escrow accounts, reporting to creditors or investors, and pursuing collection and loss mitigation activities (including foreclosures and loan modifications) with respect to delinquent borrowers. Indeed, without dedicated companies to perform these activities, it is questionable whether a secondary market for mortgage-backed securities would exist in this country.[9] Given the nature of their activities, servicers can have a direct and profound impact on borrowers.

Mortgage servicing is performed by banks, thrifts, credit unions, and non-banks under a variety of business models. In some cases, creditors service mortgage loans that they originate or purchase and hold in portfolio. Other creditors sell the ownership of the underlying mortgage loan, but retain the mortgage servicing rights in order to retain the relationship with the borrower, as well as the servicing fee and other ancillary income. In still other cases, servicers have no role at all in origination or loan ownership, but rather purchase mortgage servicing rights on securitized loans or are hired to service a portfolio lender's loans.[10]

These different servicing structures can create difficulties for borrowers if a servicer makes mistakes, fails to invest sufficient resources in its servicing operations, or avoids opportunities to work with borrowers for the mutual benefit of both borrowers and owners or assignees of mortgage loans. Although the mortgage servicing industry has numerous participants, the industry is highly concentrated, with the five largest servicers servicing approximately 53 percent of outstanding mortgage loans in this country.[11] Small servicers generally operate in discrete segments of the market, for example, by specializing in servicing delinquent loans, or by servicing loans that they originate.[12]

Contracts between the servicer and the mortgage loan owner specify the rights and responsibilities of each party. In the context of securitized loans, the contracts may require the servicer to balance the competing interests of different classes of investors when borrowers become delinquent. Certain provisions in servicing contracts may limit the servicer's ability to offer certain types of loan modifications to borrowers. Such contracts also may limit the circumstances under which owners or assignees of mortgage loans can transfer servicing rights to a

[7] Inside Mortg. Fin., *Outstanding 1–4 Family Mortgage Securities, in* 2 The 2012 Mortgage Market Statistical Annual 7 (2012). For general background on the market and the recent crisis, *see* the 2012 TILA–RESPA Proposal available at *http://www.consumerfinance.gov/knowbeforeyouowe/* (last accessed Jan. 10, 2013).

[8] As of June 2012, approximately 36 percent of outstanding mortgage loans were held in portfolio; 54 percent of mortgage loans were owned through mortgage-backed securities issued by Federal National Mortgage Association (Fannie Mae) and the Federal Home Loan Mortgage Corporation (Freddie Mac), together referred to as the government-sponsored enterprises (GSEs), as well as securities issued by the Government National Mortgage Association (Ginnie Mae); and 10 percent of loans were owned through private label mortgage-backed securities. *Strengthening the Housing Market and Minimizing Losses to Taxpayers, Hearing Before the S. Comm. on Banking, Housing and Urban Affairs* (2012) (Testimony of Laurie Goodman, Amherst Securities), available at *http://banking.senate.gov/public/index.cfm?FuseAction=Hearings.Testimony&Hearing_ID=53bda60f-64c1-43d8-9adf-a693c31eb56b&Witness_ID=b06f2fb1-59dd-4881-86cb-1082464d3119.* A securitization results in the economic separation of the legal title to the mortgage loan and a beneficial interest in the mortgage loan obligation. In a securitization transaction, a securitization trust is the owner or assignee of a mortgage loan. An investor is a creditor of the trust and is entitled to cash flows that are derived from the proceeds of the mortgage loans. In general, certain investors (or an insurer entitled to act on behalf of the investors) may direct the trust to take action as the owner or assignee of the mortgage loans for the benefit of the investors or insurers. *See, e.g.,* Adam Levitin & Tara Twomey, *Mortgage Servicing,* 28 Yale J. on Reg. 1, 11 (2011) (Levitin & Twomey).

different servicer. Further, servicer contracts govern servicer requirements to advance payments to owners of mortgage loans, and to recoup advances made by servicers, including from ultimate recoveries on liquidated properties.

Compensation structures vary somewhat for loans held in portfolio and securitized loans,[13] but have tended to make pure mortgage servicing (where the servicer has no role in origination) a high-volume, low-margin business. Such compensation structures incentivize servicers to ensure that investment in operations closely tracks servicer expectations of delinquent accounts, and an increase in the number of delinquent accounts a servicer must service beyond that projected by the servicer strains available servicer resources. A servicer will expect to recoup its investment in purchasing mortgage servicing rights and earn a profit primarily through a net servicing fee (which is typically expressed as a constant rate assessed on unpaid mortgage balances), interest float on payment accounts between receipt and disbursement, and cross-marketing other products and services to borrowers. Under this business model, servicers act primarily as payment collectors and processors, and will have limited incentives to provide other customer service. Servicers greatly vary in the extent to which they invest in customer service infrastructure. For example, servicer staffing ratios have varied between approximately 100 loans per full-time employee to over 4,000 loans per full time employee.[14]

Servicers are generally not subject to market discipline from consumers because consumers have little opportunity to switch servicers. Rather, servicers compete to obtain business from the owners of loans—investors, assignees, and creditors—and thus competitive pressures tend to drive servicers to lower the price of servicing and scale their investment in providing service to consumers accordingly.

Servicers also earn revenue from fees assessed on borrowers, including fees on late payments, fees for obtaining force-placed insurance, and fees for services, such as responding to telephone inquiries, processing telephone payments, and providing payoff statements.[15] As a result, servicers have an incentive to look for opportunities to impose fees on borrowers to enhance revenues.

These attributes of the servicing market created problems for certain borrowers even prior to the financial crisis. For example, borrowers experienced problems with mortgage servicers even during regional mortgage market downturns that preceded the financial crisis.[16] There is evidence that borrowers were subjected to improper fees that servicers had no reasonable basis to impose, improper force-placed insurance practices, and improper foreclosure and bankruptcy practices.[17]

When the financial crisis erupted, many servicers—and especially the larger servicers with their scale business models—were ill-equipped to handle the high volumes of delinquent mortgages, loan modification requests, and foreclosures they were required to process. Mortgage loan delinquency rates nearly doubled between 2007 and 2009 from 5.4 percent of first-lien mortgage loans to 9.4 percent of first-lien mortgage loans.[18] Many servicers lacked the infrastructure, trained staff, controls, and procedures needed to manage effectively the flood of delinquent mortgages they were forced to handle.[19] One study of complaints to the HOPE Hotline reported that over half of the complaints (27,000 out of 48,000) were from borrowers who could not reach their servicers and obtain information about the status of applications they had submitted for options to avoid foreclosure.[20]

Consumer harm has manifested in many different areas, and major servicers have entered into significant settlement agreements with Federal and State governmental authorities. For example, in April 2011, the Office of the Comptroller of the Currency (OCC) and the Board of Governors of the Federal Reserve System (Board), following on-site reviews of foreclosure processing at 14 federally regulated mortgage servicers, found significant deficiencies at each of the servicers reviewed. As a result, the OCC and the Board undertook formal enforcement actions against several major servicers for unsafe and unsound residential mortgage loan servicing practices.[21]

---

[13] At securitization, the cash flow that was part of interest income is bifurcated between the loan and the mortgage servicing right (MSR). The MSR represents the present value of all the cash flows, both positive and negative, related to servicing a mortgage. Prime MSRs are largely created by the GSE minimum servicing fee rate, which is calculated as 25 basis points (bps) per annum. The servicing fee rate is typically paid to the servicer monthly and the monthly amount owed is calculated by multiplying the pro rata portion of the servicing fee rate by the stated principal balance of the mortgage loan at the payment due date. Accounting rules require that a capitalized asset be created if the ''compensation'' for servicing (including float/ancillary) exceeds ''adequate compensation.'' For loans held in portfolio, there is no bifurcation of the interest income from the loan. The owner of the loan simply negotiates pricing, terms, and standards with the servicer, which, at larger institutions, is typically a separate affiliate or subsidiary of the owner of the loans. Keefe, Bruyette & Woods, Inc., PowerPoint Presentation, *KBW Mortgage Matters: Mortgage Servicing Primer* (Apr. 2012).

[14] Richard O'Brien, *High Time for High-Touch,* Mortg. Banking, Feb. 1, 2009, at 39. Industry participants generally indicated to the Bureau that servicers targeted a loan to employee ratio of 1,000–1,200 mortgage loans per full time employee for mortgage loans that are current, and 125–150 mortgage loans per full time employee for mortgage loans that are delinquent. Between 1992 and 2000, as servicers sought to make their operations more efficient, loans serviced per full time employee increased from approximately 700 loans in 1992 to over 1,200 loans by 2000. Michael A. Stegman *et al., Preventative Servicing Is Good for Business and Affordable Homeownership Policy,* 18 Housing Pol'y Debate 243, 274 (2007). As an example of current mortgage servicing staffing levels, Ocwen services 162 mortgage loans per servicing employee. *See* Morningstar Credit Ratings, LLC, *Operational Risk Assessment—Ocwen Loan Servicing, LLC,* at 7 (2012) available at *http://www.ocwen.com/docs/Morningstar-Sept-2012.pdf*.

Reserve Bd., *Federal Reserve Issues Enforcement Actions Related to Deficient Practices in Residential Mortgage Loan Servicing* (April 13, 2011) (''Fed Press Release''), available at *http://www.federalreserve.gov/newsevents/press/enforcement/20110413a.htm*. In addition to

These enforcement actions generally focused on practices relating to (1) filing of foreclosure documents without, for example, proper affidavits or notarizations; (2) failing to always ensure that loan documents were properly endorsed or assigned and, if necessary, in the possession of the appropriate party at the appropriate time; (3) failing to devote sufficient financial, staffing, and managerial resources to ensure proper administration of foreclosure processes; (4) failing to devote adequate oversight, internal controls, policies and procedures, compliance risk management, internal audit, third-party management, and training to foreclosure processes; and (5) failing to oversee sufficiently outside counsel and other third-party providers handling foreclosure-related services.[22]

Other investigations of servicers have found similar problems. For example, the Government Accountability Office (GAO) has found pervasive problems in broad segments of the mortgage servicing industry impacting delinquent borrowers, such as servicers who have misled, or failed to communicate with, borrowers, lost or mishandled borrower-provided documents supporting loan modification requests, and generally provided inadequate service to delinquent borrowers. It has been recognized in Inspector General reports, and the Bureau has learned from outreach with mortgage investors, that servicers may be acting to maximize their self-interests in the handling of delinquent borrowers, rather than the interests of owners or assignees of mortgage loans.[23]

The mortgage servicing industry, however, is not monolithic. Some servicers provide high levels of customer service. Some of these servicers are compensated by investors in a way that incentivizes them to provide this level of service in order to optimize investor outcomes.[24] Other servicers provide high levels of customer service because they are servicing loans of their own retail customers within their local community or (in the case of credit unions) membership base. These servicers seek to provide other products and services to consumers—and to others within the community or membership base—and thus have an interest in preserving their reputations and relationships with their consumers. For example, as discussed further below, small servicers that the Bureau consulted as part of a process required under the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA) described their businesses as requiring a ''high touch'' model of customer service both to ensure loan performance and maintain a strong reputation in their local communities.[25]

B. The National Mortgage Settlement and Other Regulatory Requirements

In response to the unprecedented financial crisis and pervasive problems in mortgage servicing, including the systemic violation of State foreclosure laws by many of the largest servicers, State and Federal regulators have engaged in a number of individual servicing related enforcement and regulatory actions over the last few years and have begun discussions about comprehensive national standards.

For example, the Federal government, joined by 49 State attorneys general,[26] entered into settlements with the nation's five largest servicers in February 2012 (the National Mortgage Settlement).[27] Exhibit A to each of the settlements is a Settlement Term Sheet, which sets forth standards that each of the five largest servicers must follow to comply with the terms of the settlement.[28] The settlement standards contained in the Settlement Term Sheet are sub-divided into the following eight categories: (1) Foreclosure and bankruptcy information and documentation; (2) third-party provider oversight; (3) bankruptcy; (4) loss mitigation; (5) protections for military personnel; (6) restrictions on servicing fees; (7) force-placed insurance; and (8) general servicer duties and prohibitions.

Apart from the National Mortgage Settlement, Federal regulatory agencies have also issued guidance on mortgage servicing and loan modifications,[29] conducted coordinated reviews of the nation's largest servicers,[30] and taken enforcement actions against individual companies.[31] Further, the Bureau and other Federal agencies have been engaged since spring 2011 in informal

enforcement actions against major servicers, Federal agencies have also undertaken formal enforcement actions against major service providers to mortgage servicers.

[22] Press Release, Federal Reserve Bd., *Federal Reserve Issues Enforcement Actions Related to Deficient Practices in Residential Mortgage Loan Servicing* (April 13, 2011), available at *http://www.federalreserve.gov/newsevents/press/enforcement/20110413a.htm.* None of the servicers admitted or denied the OCC's or Federal Reserve Board's findings.

[23] *See, e.g.,* Jody Shenn, *PIMCO: This is who's actually going to be punished by the mortgage fraud settlement,* Bloomberg News, February 10, 2012; *cf.,* Office of Inspector Gen., Fed. Hous. Fin. Agency, *Evaluation of FHFA's Oversight of Fannie Mae's Transfer of Mortgage Servicing Rights from Bank of America to High Touch Servicers,* at 12 (Sept. 18, 2012) (''FHA OIG MSR Report''). The Inspector General for FHFA observed that ''Fannie Mae may have had (what one of its executives described as) a 'misalignment of interests' with its servicers. As guarantor or loan holder, Fannie Mae could face significant losses from a default. However, a servicer earns only a fraction of a percent of the unpaid balance of a mortgage it services and, thus, the fees derived from any particular loan may not—at least for the servicer—provide adequate incentive to undertake anything more than the bare minimum of effort in order to prevent a default. This will typically include sending out delinquency notices to borrowers who have not made timely payments, telephoning delinquent borrowers, and, ultimately, initiating foreclosure proceedings.''

[24] For example, Fannie Mae rewards servicers that provide high levels of customer service by compensating them through (1) base servicing fees, (2) incentive payments for mortgage modifications, and (3) a performance payment based on the servicer's success as contrasted with that of a benchmark portfolio. *See* FHA OIG MSR Report at 12.

discussions about the potential development of national mortgage servicing standards through interagency regulations and guidance.

Servicers are currently required to navigate overlapping requirements governing their servicing responsibilities. Servicers must comply with requirements established by owners or assignees of mortgage loans. These include, as applicable, (1) servicing guidelines required by Fannie Mae, Freddie Mac, and Ginnie Mae; (2) government insured program guidelines issued by the Federal Housing Administration (FHA), Department of Veterans Affairs (VA), and the Rural Housing Service; (3) contractual agreements with investors (such as pooling and servicing agreements and subservicing contracts); and (4) bank or institution policies.

Servicers are also required to consider the impact of State and even local regulation on mortgage servicing. Significantly, New York, California, and Oregon have all adopted varying statutory or regulatory restrictions on mortgage servicers. For example, the Superintendent of Banks of the State of New York repeatedly adopted short-term emergency regulations governing mortgage servicers on a continuous basis since July 2010.[32] These regulations impose obligations on servicers with respect to, among other things, consumer complaints and inquiries, statements of accounts, crediting of payments, payoff balances, and loss mitigation procedures.[33] The California Homeowner Bill of Rights, which was enacted in 2012, imposes requirements on servicers with respect to evaluations of borrowers for loss mitigation options before various foreclosure documents may be filed for California's non-judicial foreclosure process.[34] Further, Oregon implemented regulations on mortgage servicers not to engage in unfair or deceptive conduct by: assessing fees for payments made on or before a payment due date; assessing or collecting fees not authorized by a security instrument or mortgage, misrepresenting information relating to a loan modification or set forth in an affidavit, declaration, or other sworn statement detailing a borrower's default and the servicer's right to foreclose; failing to comply with certain provisions of RESPA; or failing to deal with a borrower in good faith.[35] Further, Massachusetts has recently proposed new regulations to protect consumers with respect to mortgage servicing practices, including with respect to loss mitigation procedures.[36]

C. RESPA and Regulation X

Congress originally enacted the Real Estate Settlement Procedures Act of 1974 (RESPA) based on findings that significant reforms in the real estate settlement process were needed to ensure that consumers are provided with greater and more timely information on the nature and costs of the residential real estate settlement process and are protected from unnecessarily high settlement charges caused by certain abusive practices found by Congress. *See* 12 U.S.C. 2601(a). In 1990, Congress amended RESPA by adding a new section 6 covering persons responsible for servicing federally related mortgage loans and imposing on such servicers certain obligations.[37] These included required disclosures at application concerning whether the lender intended to service the mortgage loan and disclosures upon an actual transfer of servicing rights.[38] RESPA section 6 further imposed substantive and disclosure requirements for escrow account management and required servicers to respond to ''qualified written requests''—written error resolution or information requests relating to the ''servicing'' of the borrower's mortgage loan.[39]

Section 19(a) of RESPA authorizes the Bureau (and formerly directed the Department of Housing and Urban Development (HUD)) to prescribe such rules and regulations, to make such interpretations, and to grant such reasonable exemptions for classes of transactions, as may be necessary to achieve the purposes of RESPA. *See* 12 U.S.C. 2617(a).

Historically, Regulation X, 24 CFR part 3500, implemented RESPA. General rulemaking authority for RESPA transferred to the Bureau on July 21, 2011. *See* sections 1061 and 1098 of the Dodd-Frank Act. Pursuant to the Dodd-Frank Act and RESPA, as amended, the Bureau published for public comment an interim final rule establishing a new Regulation X, 12 CFR part 1024, implementing RESPA. 76 FR 78978 (Dec. 20, 2011). The Bureau's Regulation X took effect on December 30, 2011. The requirements in section 6 of RESPA for mortgage servicing are implemented primarily by § 1024.21.

D. The Dodd-Frank Act

The Dodd-Frank Act imposes certain new requirements related to mortgage servicing. As set forth above, some of these new requirements are amendments to RESPA addressed in this final rule and others are amendments to TILA, addressed in the 2013 TILA Servicing Final Rule.

Section 1463 of the Dodd-Frank Act added new sections 6(k), 6(*l*), and 6(m) to RESPA. 12 U.S.C. 2605. Sections 6(k)(1)(A), 6(k)(2), 6(*l*) and 6(m) impose restrictions on servicers with respect to force-placed insurance. Specifically, section 6(k)(1)(A) of RESPA provides that a servicer may not obtain force-placed hazard insurance with respect to any property secured by a federally related mortgage unless there is a reasonable basis to believe the borrower has failed to comply with the loan contract's requirement to maintain property insurance. Further, under section 6(*l*) of RESPA, a servicer is deemed not to have a reasonable basis for obtaining force-placed insurance, unless the servicer sends to the borrower, by first-class mail, two written notices. The first notice must be sent at least 45 days before imposing on the borrower any charge for force-placed insurance, and the second notice must be sent at least 30 days after the first written notice and at least 15 days before imposing on the borrower any charge for force-placed insurance. The notices must remind borrowers of their obligation to maintain hazard insurance on the property, alert borrowers to the servicer's lack of evidence of insurance coverage, tell borrowers what they must do to provide proof of hazard insurance coverage, and state that the servicer may obtain coverage at the borrower's expense if the borrower fails to provide evidence of coverage. Under section 6(*l*)(3) of RESPA, within fifteen days of receipt by a servicer of a borrower's

[35] OAR 137–020–0805. Notably, Oregon's regulations initially implemented mortgage servicing requirements with respect to open-end lines of credit (home equity plans) and, further, required servicers to comply with GSE guidelines for loan modifications. Oregon suspended these requirements and reissued the rule as OAR 137–020–0805 on the basis that such suspension was necessary to facilitate compliance. *See* In the matter of: Suspension of OAR 137–020–0800 and Adoption of OAR 137–020–0805 (February 15, 2012), available at *http://www.oregonmla.org/WebsiteAttachments/Misc%20Events%20Attachments/OAR%20137-020-0805%202%2015%2012%20AG%20Servicing%20Rules%20(00540177).pdf* (last accessed Jan. 6, 2013).

[36] *See* Press Release, Massachusetts Division of Banks Proposes New Standards for Mortgage Servicing (Nov. 8, 2012), available at *http://www.mass.gov/ocabr/docs/dob/standards-for-mort-servicing2012.pdf* (last accessed Jan. 6, 2013).

[37] Public Law 101–625, 104 Stat. 4079 (1990), sections 941–42.

[38] *See* 12 U.S.C. 2605(a) through (e).

[39] *See* 12 U.S.C. 2605(e) and 2609.

existing insurance coverage, servicers must terminate force-placed insurance coverage and refund to the borrower any premiums charged during any period when the borrower had hazard insurance in place. Finally, section 6(m) of RESPA requires that all charges imposed on the borrower related to force-placed insurance, apart from charges subject to State regulation as the business of insurance, must be bona fide and reasonable.

Section 1463 of the Dodd-Frank Act further added section 6(k)(1)(B)–(D) of RESPA, which prohibits certain acts and practices by servicers of federally related mortgage loans with regard to responding to borrower assertions of error and requests for information. Specifically, section 6(k)(1)(B) of RESPA prohibits servicers from charging fees for responding to valid qualified written requests. Section 6(k)(1)(C) of RESPA provides that a servicer of a federally related mortgage loan must not fail to take timely action to respond to a borrower's requests to correct errors relating to: (1) Allocation of payments; (2) final balances for purposes of paying off the loan; (3) avoiding foreclosure; or (4) other standard servicer duties. Finally, section 6(k)(1)(D) provides that a servicer must respond within ten business days to a request from a borrower to provide the identity, address, and other relevant contact information about the owner or assignee of the loan. In addition, section 1463(c) amends section 6(e) of RESPA to reduce the amount of time within which servicers must correct errors and respond to requests for information. Section 1463(b) and (d) of the Dodd-Frank Act amended sections 6(f) and 6(g) of RESPA with respect to penalties for violation of section 6 of RESPA, and refund of escrow account balances, respectively.[40]

Finally, section 1463(a) of the Dodd-Frank Act adds section 6(k)(1)(E) to RESPA, which provides that a servicer of a federally related mortgage loan must ''comply with any other obligation found by the [Bureau], by regulation, to be appropriate to carry out the consumer protection purposes of this Act.''[41] This provision provides the Bureau authority to establish prohibitions on servicers of federally related mortgage loans appropriate to carry out the consumer protection purposes of RESPA. As discussed below, in light of the systemic problems in the mortgage servicing industry discussed above, the Bureau is exercising this authority in this rulemaking to implement protections for borrowers with respect to mortgage servicing.

Section 1022(b)(1) of the Dodd-Frank Act authorizes the Bureau to prescribe rules ''as may be necessary or appropriate to enable the Bureau to administer and carry out the purposes and objectives of the Federal consumer financial laws, and to prevent evasions thereof[.]'' 12 U.S.C. 5512(b)(1). RESPA and title X of the Dodd-Frank Act are Federal consumer financial laws. Accordingly, the Bureau proposed to exercise its authority under section 1022(b) of the Dodd-Frank Act to prescribe rules to carry out the purposes of RESPA and title X and prevent evasion of those laws.

III. Summary of the Rulemaking Process

A. Outreach and Consumer Testing

The Bureau has conducted extensive outreach in developing the Final Servicing Rules. Prior to issuing the Proposed Servicing Rules on August 10, 2012, Bureau staff met with consumers, consumer advocates, mortgage servicers, force-placed insurance carriers, industry trade associations, other Federal regulatory agencies, and other interested parties to discuss various aspects of the statute, servicing industry operations, and consumer harm impacts. Outreach included meetings with numerous individual servicers to understand their operations and the potential benefits and burdens of the proposed mortgage servicing rules. As discussed above and in connection with section 1022 of the Dodd-Frank Act below, the Bureau has also consulted with relevant Federal regulators both regarding the Bureau's specific rules and the need for and potential contents of national mortgage servicing standards in general.

Further, the Bureau solicited input from small servicers through a Small Business Review Panel (Small Business Review Panel) with the Chief Counsel for Advocacy of the Small Business Administration (Advocacy) and the Administrator of the Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB).[42] The Small Business Review Panel's findings and recommendations are contained in the Small Business Review Panel Report.[43] The Bureau has adopted recommendations provided by the participants on the Small Business Review Panel and includes below a discussion of such recommendations in connection with the applicable requirement.

Further, prior to the issuing the Proposed Servicing Rules on August 10, 2012, the Bureau engaged ICF Macro (Macro), a research and consulting firm that specializes in designing disclosures and consumer testing, to conduct one-on-one cognitive interviews regarding disclosures connected with mortgage servicing. During the first quarter of 2012, the Bureau and Macro worked closely to develop and test disclosures that would satisfy the requirements of the Dodd-Frank Act and provide information to consumers in a manner that would be understandable and useful. These disclosures related to the force-placed insurance notices set forth in this rule, as well as the ARM interest rate adjustment notices and the periodic statement disclosure set forth in the 2013 TILA Servicing Final Rule.

Macro conducted three rounds of one-on-one cognitive interviews with a total of 31 participants in the Baltimore, Maryland metro area (Towson, Maryland), Memphis, Tennessee, and Los Angeles, California. Participants were all consumers who held a mortgage loan and represented a range of ages and education levels. Efforts were made to recruit a significant number of participants who had trouble making mortgage payments in the last two years. During the interviews, participants were shown disclosure forms for periodic statements, ARM interest rate adjustment notices, and force-placed insurance notices. Participants were asked specific questions to test their understanding of the information presented in each of the disclosures, how easily they could find various pieces of information presented in each of the disclosures, and how they would use the information presented in each of the disclosures. The disclosures were revised after each round of testing.

After the Bureau issued the Proposed Servicing Rules, Macro conducted a fourth round of one-on-one cognitive interviews with eight participants in Philadelphia, Pennsylvania. Again, participants were consumers who held

[40] As set forth below, section 1463(d) is implemented by § 1024.34(b) of this rule. Section 1463(b), however, is not implemented by this rulemaking. Accordingly, pursuant to section 1400(c) of the Dodd-Frank Act, the amendments to section 6(f) of RESPA in section 1463(b) of the Dodd-Frank Act are effective as of January 21, 2013.

[42] The Small Business Regulatory Enforcement Fairness Act of 1996 requires the Bureau to convene a Small Business Review Panel before proposing a rule that may have a significant economic impact on a substantial number of small entities. *See* Public Law 104–121, tit. II, 110 Stat. 847, 857 (1996) (as amended by Pub. L. 110–28, sec. 8302 (2007)).

[43] *See* U.S. Consumer Fin. Prot. Bureau, *Final Report of the Small Business Review Panel on CFPB's Proposals Under Consideration for Mortgage Servicing Rulemaking* (June 11, 2012) (''SBREFA Final Report''), available at *http://www.consumerfinance.gov.*

a mortgage loan and represented a range of ages and education levels. During the interviews, participants were asked to review two different versions of a servicing transfer notice and early intervention model clauses, which relate to requirements the Bureau is implementing under RESPA. Participants were asked specific questions to test their reaction to and understanding of the content of the servicing transfer notice and the early intervention model clauses. This process was repeated for each of the five clauses being tested. Specific findings from the consumer testing are discussed in detail throughout where relevant.[44]

One commenter, identifying itself as a research organization, observed that the consumer testing the Bureau has conducted with respect to the mortgage servicing disclosures follows the path of evidence-based decision-making. This commenter asserted, however, that the Bureau should consider undertaking steps in evaluating the proposed forms, including possibly undertaking additional testing because other consumer financial disclosures, including the forms the Bureau proposed with the 2012 TILA–RESPA Proposal, have gone through more testing. At the same time, however, the commenter observed that the decreased level of testing might be justified on various grounds, such as, for example, the fact that studies have found that small numbers of individuals can identify the vast majority of usability problems, the fact that the testing was done with participants familiar with mortgages, and the fact that the Bureau is working on a tight schedule to finalize rules by January 21, 2013 when statutory provisions would go into effect.

The Bureau believes that the testing it conducted is appropriate. The Bureau observes that the forms the Bureau proposed as part of the 2012 TILA–RESPA Proposal contained significantly more complicated financial information than the forms finalized as part of the current rulemakings. Additionally, the 2012 TILA–RESPA Proposal, when finalized, would substantially change consumers' mortgage shopping experience; by contrast, the Final Mortgage Servicing Rules are intended to improve, but not substantially alter, consumers' experience with their mortgage servicers. These differences, in terms of level of complication and degree of change from current practice, justify the different levels of resources the Bureau allocated to the two different testing projects. Lastly, Macro's findings show that there was notable consistency across the different rounds of testing in terms of participant comprehension that, in combination with the Bureau's expertise and knowledge of consumer understanding and behavior, gave the Bureau confidence to rely on the forms that were developed and refined through testing as a basis for the model forms included in the Final Servicing Rules.

The Bureau further emphasizes that it is not relying solely on the consumer testing to determine that any particular disclosure will be effective. The Bureau is also relying on its knowledge of, and expertise in, consumer understanding and behavior, as well as principles of effective disclosure design.

B. Small Business Regulatory Enforcement Fairness Act

As required by SBREFA, the Bureau convened a Small Business Review Panel to assess the impact of the possible rules on small servicers and to help the Bureau determine to what extent it may be appropriate to consider adjusting these standards for small servicers, to the extent permitted by law. Thus, on April 9, 2012, the Bureau provided Advocacy with the formal notification and other information required under section 609(b)(1) of the Regulatory Flexibility Act (RFA) to convene the panel.

In order to obtain feedback from small servicers, the Bureau, in consultation with Advocacy, identified five categories of small entities that may be subject to the proposed rule: Commercial banks/savings institutions, credit unions, non-depositories engaged primarily in lending funds with real estate as collateral, non-depositories primarily engaged in loan servicing, and certain non-profit organizations. The Bureau, in consultation with Advocacy, selected 16 representatives to participate in the Small Business Review Panel process from the categories of entities that may be subject to the Proposed Servicing Rules. The participants included representatives from each of the categories identified by the Bureau and comprised a diverse group of individuals with regard to geography and type of locality (*i.e.,* rural, urban, suburban, or metropolitan areas), as described in chapter 7 of the Small Business Review Panel Report.

On April 10, 2012, the Bureau convened the Small Business Review Panel. In order to collect the advice and recommendations of small entity participants, the Panel held an outreach meeting/teleconference on April 24, 2012 (Panel Outreach Meeting). To help the small entity participants prepare for the Panel Outreach Meeting, the Panel circulated briefing materials that summarized the proposals under consideration at that time, posed discussion issues, and provided information about the SBREFA process generally.[45] All 16 small entities participated in the Panel Outreach Meeting either in person or by telephone. The Small Business Review Panel also provided the small entities with an opportunity to submit written feedback until May 1, 2012. In response, the Small Business Review Panel received written feedback from 5 of the representatives.[46]

On June 11, 2012, the Small Business Review Panel submitted to the Director of the Bureau the written Small Business Review Panel Report, which includes the following: Background information on the proposals under consideration at the time; information on the types of small entities that would be subject to those proposals and on the participants who were selected to advise the Small Business Review Panel; a summary of the Panel's outreach to obtain the advice and recommendations of those participants; a discussion of the comments and recommendations of the participants; and a discussion of the Small Business Review Panel findings, focusing on the statutory elements required under section 603 of the RFA, 5 U.S.C. 609(b)(5).

In connection with issuing the Proposed Servicing Rules, the Bureau carefully considered the feedback from the small entities participating in the SBREFA process and the findings and recommendations in the Small Business Review Panel Report. The section-by-section analyses for the Final Servicing Rules discuss this feedback and the specific findings and recommendations of the Small Business Review Panel, as applicable. The SBREFA process provided the Small Business Review Panel and the Bureau with an opportunity to identify and explore opportunities to mitigate the burden of the rule on small entities while achieving the rule's purposes. It is important to note, however, that the

[44] ICF Int'l, Inc., *Summary of Findings: Design and Testing of Mortgage Servicing Disclosures* (Aug. 2012) (''Macro Report''), *available at http://www.regulations.gov/#!documentDetail;D=CFPB-2012-0033-0003.*

[45] The Bureau posted these materials on its Web site and invited the public to email remarks on the materials. Press Release, U.S. Consumer Fin. Prot. Bureau, *Consumer Financial Protection Bureau Outlines Borrower-Friendly Approach to Mortgage Servicing* (Apr. 9, 2012), *available at http://www.consumerfinance.gov/pressreleases/consumer-financial-protection-bureau-outlines-borrower-friendly-approach-to-mortgage-servicing/* (last accessed Jan. 6, 2013).

[46] This written feedback is attached as appendix A to the Small Business Review Panel Report.

Small Business Review Panel prepared the Small Business Review Panel Report at a preliminary stage of the proposal's development and that the report—in particular, the findings and recommendations—should be considered in that light. Any options identified in the Small Business Review Panel Report for reducing the proposed rule's regulatory impact on small entities were expressly subject to further consideration, analysis, and data collection by the Bureau to ensure that the options identified were practicable, enforceable, and consistent with RESPA, TILA, the Dodd-Frank Act, and their statutory purposes.

C. Summary of the Proposed Servicing Rule

The 2012 RESPA Servicing Proposal contained numerous significant revisions to Regulation X. As a preliminary matter, the Bureau proposed to reorganize Regulation X to include three distinct subparts. Subpart A (General) would have included general provisions of Regulation X, including provisions that applied to both subpart B and subpart C. Subpart B (Mortgage settlement and escrow accounts) would have included provisions relating to settlement services and escrow accounts, including disclosures provided to borrowers relating to settlement services. Subpart C (Mortgage servicing) would have included provisions relating to obligations of mortgage servicers. The Bureau also proposed to set forth a commentary that included official Bureau interpretations of Regulation X.

With respect to mortgage servicing-related provisions, the proposed rule would have amended existing provisions currently published in 12 CFR 1024.21 that relate to disclosures of mortgage servicing transfers and servicer obligations to borrowers. The Bureau proposed to include these provisions within subpart C as §§ 1024.33–1024.34. The Bureau also proposed to move certain clarifications in these provisions that were previously published in 12 CFR 1024.21 to the commentary to conform the organization of these provisions with the proposed additions to Regulation X.

The proposed rule would have established procedures for investigating and resolving alleged errors and responding to requests for information. The proposed requirements were set forth in proposed §§ 1024.35–1024.36. As proposed, these sections would have required servicers to respond to notices of error and information requests from borrowers, including qualified written requests. The Bureau's goal was to conform and consolidate the pre-existing requirements under RESPA applicable to qualified written requests, with the new requirements imposed by the Dodd-Frank Act through the addition of sections 6(k)(1)(C) and 6(k)(1)(D) of RESPA to respond to errors and information requests. The Bureau proposed to create a unified requirement for servicers to respond to notices of error and information requests provided by borrowers, without regard to whether the notices or requests constituted qualified written requests.[47] To that end, the proposed rule would have implemented the Dodd-Frank Act amendments to RESPA section 6(e) by adjusting the timeframes applicable to respond to qualified written requests, as well as errors and information requests generally, to conform to the new requirements.

Proposed § 1024.37 would have implemented limitations on servicers obtaining force-placed insurance. The proposed rule would have required servicers to provide notices to borrowers at certain timeframes before a servicer could impose a charge on a borrower for force-placed insurance. Further, the proposed rule would have required that charges related to force-placed insurance, other than charges subject to State regulation as the business of insurance or authorized by Federal flood laws, be bona fide and reasonable. Finally, the proposed rule sought to reduce the instances in which force-placed insurance would be needed by amending current § 1024.17 to require that where a borrower has escrowed for hazard insurance, servicers must advance funds to, and disburse from, an escrow account to maintain the borrower's own hazard insurance policy even if the loan obligation is more than 30 days overdue. The proposed rule also would have implemented the Dodd-Frank Act amendment to RESPA section 6(g) in proposed § 1024.34(b) by imposing requirements on servicers to refund or transfer funds in an escrow account when a mortgage loan is paid in full.

The proposed rule would have imposed obligations on servicers in four additional areas not specifically required by the Dodd-Frank Act: (1) Servicer policies and procedures, (2) early intervention for delinquent borrowers, (3) continuity of contact, and (4) loss mitigation procedures. The policies and procedures provision would have required servicers to implement policies and procedures to manage documents and information to achieve defined objectives intended to ensure that borrowers are not harmed by servicers' information management operations. Further, the policies and procedures provision would also have imposed requirements on servicers regarding record retention and management of servicing file documents. The early intervention provision would have required servicers to contact borrowers at an early stage of delinquency and provide information to borrowers about available loss mitigation options and the foreclosure process. The continuity of contact provision would have required servicers to make available to borrowers direct phone access to personnel who could assist borrowers in pursuing loss mitigation options. The loss mitigation procedures would have required servicers that offer loss mitigation options to borrowers to evaluate complete and timely applications for loss mitigation options. Servicers would have been required to permit borrowers to appeal denials of timely loss mitigation applications for loan modification programs. A servicer that received a complete and timely application for a loss mitigation option would not have been able to proceed with a foreclosure sale unless (1) the servicer denied the borrower's application and the time for any appeal had expired; (2) the borrower had declined or failed to accept an offer of a loss mitigation option within 14 days of the offer; or (3) the borrower failed to comply with the terms of a loss mitigation agreement.

D. Overview of the Comments Received

The Bureau received approximately 300 comments on the Proposed Servicing Rules. The comments came from individual consumers, consumer advocates, community banks, large bank holding companies, secondary market participants, credit unions, non-bank servicers, State and national trade associations for financial institutions in the mortgage business, local and national community groups, Federal

[47] As discussed below, RESPA sets forth a ''qualified written request'' mechanism through which a borrower can assert an error to a servicer or request information from a servicer. Section 6(k)(1)(C) and 6(k)(1)(D) of RESPA set forth separate obligations for servicers to correct certain types of errors asserted by borrowers and to provide information to a borrower regarding an owner or assignee of a mortgage loan without reference to the ''qualified written request'' process. The 2012 RESPA Servicing Proposal would have integrated the new requirements under RESPA to respond to errors and information requests with RESPA's preexisting qualified written request process. Although a borrower would still have been able to submit a ''qualified written request,'' under the proposed rule, a ''qualified written request'' would have been subject to the same error resolution or information request requirements applicable to any other type of written error notice or information request to a servicer.

and State regulators, academics, and others. Commenters provided feedback on all aspects of the Proposed Servicing Rules. Most commenters tended to focus on specific aspects of the proposals. Accordingly, in general, the comments are discussed below in the section-by-section analysis.

The majority of comments were submitted by mortgage servicers, industry groups representing servicers and businesses involved in the servicing industry. Large banks, community banks and credit unions, non-bank servicers, and industry trade associations submitted nearly all of these comments. The Small Business Administration Office of Advocacy submitted a comment and the remaining comments were submitted by vendors and attorney's representing industry interests. The Bureau also received a significant number of comments from consumer advocacy groups. The record also includes a 50-page comment by the Cornell e-Rulemaking Initiative synthesizing submissions of 144 registered participants to Cornell's Regulation Room project. Regulation Room is a pilot project designed to use different web technologies and approaches to enhance public understanding and participation in Bureau rulemakings and to evaluate the advantages and disadvantages of these techniques. Finally, the Bureau also received comments from the Small Business Administration, the Federal Housing Finance Agency, the GSEs, and from vendors and attorneys representing industry interests.

Industry commenters and their trade associations also provided comments regarding the rulemaking process, and those comments are addressed here.[48] In that regard, community banks and their trade associations stated that the Bureau should consider cumulative burden when writing regulations, setting comment deadlines, and effective dates. These commenters believed that the combination of the Bureau's rules as well as the impact of Basel III requirements with respect to accounting for mortgage servicing rights in Tier I capital may cause disruptions across all mortgage market segments. A community bank trade association indicated that community banks are likely to feel the impact of the rules more acutely, as they cannot take advantage of economies of scale in mitigating the compliance burden. A community bank trade association stated that the Bureau should consider the wide diversity among servicer business models and adapt regulations to preserve diversity within the servicing industry. The commenter emphasized that community banks have strong reputation and performance incentives to ensure that consumers are provided a high level of service.

A large bank and a number of trade association commenters stated that the Bureau should be cognizant of imposing requirements and standards potentially inconsistent with those required by settlement agreements, consent orders, and GSE or government insurance program requirements. One commenter stated that the Bureau should consider preempting State law mortgage servicing requirements to provide legal and regulatory certainty to industry participants that are evaluating the future desirability of maintaining servicing operations. A number of trade associations stated that the Bureau should not issue regulations that would impose requirements substantially similar to the National Mortgage Settlement on mortgage servicers that are not parties to the National Mortgage Settlement.

The Bureau has considered each of these comments relating to the cumulative impact of mortgage regulation, including the mortgage servicing rules; the potential for inconsistent results with current servicing obligations, including State law and the National Mortgage Settlement; and comments regarding the diversity of servicing business models and servicer sizes. The Bureau's consideration of those comments is reflected below in the section-by-section analysis with respect to various determinations made in finalizing the 2012 RESPA Servicing Proposal, including the determination to create clear requirements, the determination to maintain consistency with current servicing obligations, including those imposed by State law and the National Mortgage Settlement, and the consideration of exemptions for small servicers.

With respect to preemption of state law, the Final Servicing Rules generally do not have the effect of prohibiting state law from affording borrowers broader consumer protections relating to mortgage servicing than those conferred under the Final Servicing Rules. However, in certain circumstances, the effect of specific requirements of the Final Servicing Rules is to preempt certain limited aspects of state law. Specifically, as set forth below, § 1024.41(f) bars a servicer from making the first notice or filing required for a foreclosure process unless a borrower is more than 120 days delinquent, notwithstanding that state law may permit any such filing. Further, § 1024.33(d) incorporates a pre-existing provision in Regulation X that implements RESPA with respect to preemption of certain state law disclosures relating to mortgage servicing transfers. In other circumstances, the Bureau explicitly took into account existing standards (both State and Federal) and either built in flexibility or designed its rules to coexist with those standards. For example, as discussed below, the Bureau took into account the loss mitigation timelines and ''dual-tracking'' provisions in the National Mortgage Settlement and the California Homeowner Bill of Rights and designed timelines that are consistent with those standards. Similarly, in designing its early intervention provision the Bureau included a statement that nothing in that provision shall require a servicer to make contact with a borrower in a manner that would be prohibited under applicable law.

A number of commenters provided comments regarding language access and community blight. Two national consumer groups urged the Bureau to take action to remove barriers borrowers with limited English-proficiency face with respect to understanding the terms of their mortgages because such barriers might make these borrowers more vulnerable to bad servicing practices. One national consumer group urged the Bureau to mandate translation of all notices, documents, and bills going to borrowers. Another national consumer group urged the Bureau to consider requiring servicers to provide disclosures and services in a borrower's preferred language, noting that it

[48] Some commenters provided comments strictly with respect to the rulemaking process. One trade association commented that small servicers that participated in the Small Business Review Panel process did not have adequate time to prepare for the panel discussion and provide appropriate data, while another trade association commented that because the Bureau's proposed rules are lengthy and because some rules have overlapping comment periods, each of which has been limited to 60 days, the trade association has had difficulty dedicating staff to comment on the Bureau's proposals. As set forth in this section, the Bureau has conducted the rulemaking process, including the SBREFA process and the public comment period, in a manner that provided as much flexibility as possible to receive feedback from the SBREFA participants and public commenters in light of the deadlines required for the rulemaking. The Bureau assisted the SBA in calls and outreach with small entity participants to obtain any comments not set forth during the panel outreach with the small entity representatives. Further, with respect to public comments, the Bureau believes that the public had a meaningful opportunity to comment, which is evidenced by the significant number of comments received and their length. The Bureau offered 61 days from August 10, 2012 through October 9, 2012, for comment; and 22 days after the proposal was published in the **Federal Register** on September 17.

represents a population that speaks more than 100 different dialects. Finally, one commenter suggests that the Bureau should not only mandate disclosures in other languages but also should require servicers to provide language-capable staff to assist borrowers with limited English skills. With respect to neighborhood blight, a coalition of consumer advocacy groups and a consumer advocate that participated in outreach with the Bureau commented that the Bureau should consider implementing regulations to manage neighborhood blight by requiring servicers to maintain real estate owned (REO) property to decent, safe, and sanitary standards capable of purchase by borrowers with FHA financing.

Although some of these specific requests exceed the scope of the rulemaking, the Bureau takes seriously the important considerations of avoiding neighborhood blight and language access. The Bureau recognizes the challenges borrowers with limited English proficiency face in understanding the terms of their mortgage. The Bureau believes that servicers should communicate with borrowers clearly, including in the borrower's native language, where possible, and especially when lenders advertise in the borrower's native language. The Bureau conducted Spanish testing to support proposed rules and forms combining the TILA mortgage loan disclosure with the Good Faith Estimate (GFE) and statement required under RESPA. *See* 77 FR 54843. That testing underscores both the value of disclosures in other languages but also the challenges in translating forms using English terms of art into other languages to assure that the foreign-language version of the form effectively communicates the required information to its readers.

The Bureau has not had the opportunity to test the disclosures that the Bureau is adopting, or the pre-existing RESPA disclosures, in other languages. Accordingly, the Bureau is not imposing mandatory foreign language translation requirements or other language access requirements at this time with respect to the mortgage servicing disclosures and other requirements the Bureau is adopting under new subpart C. Although the Bureau declines at this time to implement requirements regarding language access, the Bureau will continue to consider language access generally in connection with developing disclosures and will consider further requirements on servicer communication with borrowers if appropriate. With respect to REO properties, the Bureau continues to consider whether regulations are appropriate to address the maintenance of properties owned by lenders and any potential resulting harm from community blight.

E. Other Dodd-Frank Act Mortgage-Related Rulemakings

In addition to the Final Servicing Rules, the Bureau is adopting several other final rules and issuing one proposal, all relating to mortgage credit, to implement requirements of title XIV of the Dodd-Frank Act. The Bureau is also issuing a final rule and planning to issue a proposal jointly with other Federal agencies to implement requirements for mortgage appraisals in title XIV. Each of the final rules follows a proposal issued in 2011 by the Board or in 2012 by the Bureau alone or jointly with other Federal agencies. Collectively, these proposed and final rules are referred to as the Title XIV Rulemakings.

• *Ability to Repay:* The Bureau recently issued a rule, following a May 2011 proposal issued by the Board (the Board's 2011 ATR Proposal),[49] to implement provisions of the Dodd-Frank Act (1) requiring creditors to determine that a consumer has a reasonable ability to repay covered mortgage loans and establishing standards for compliance, such as by making a ''qualified mortgage,'' and (2) establishing certain limitations on prepayment penalties, pursuant to TILA section 129C as established by Dodd-Frank Act sections 1411, 1412, and 1414. 15 U.S.C. 1639c. The Bureau's final rule is referred to as the 2013 ATR Final Rule. Simultaneously with the 2013 ATR Final Rule, the Bureau issued a proposal to amend the final rule implementing the ability-to-repay requirements, including by the addition of exemptions for certain nonprofit creditors and certain homeownership stabilization programs and a definition of a ''qualified mortgage'' for certain loans made and held in portfolio by small creditors (the 2013 ATR Concurrent Proposal). The Bureau expects to act on the 2013 ATR Concurrent Proposal on an expedited basis, so that any exceptions or adjustments to the 2013 ATR Final Rule can take effect simultaneously with that rule.

• *Escrows:* The Bureau recently issued a rule, following a March 2011 proposal issued by the Board (the Board's 2011 Escrows Proposal),[50] to implement certain provisions of the Dodd-Frank Act expanding on existing rules that require escrow accounts to be established for higher-priced mortgage loans and creating an exemption for certain loans held by creditors operating predominantly in rural or underserved areas, pursuant to TILA section 129D as established by Dodd-Frank Act sections 1461. 15 U.S.C. 1639d. The Bureau's final rule is referred to as the 2013 Escrows Final Rule.

• *HOEPA:* Following its July 2012 proposal (the 2012 HOEPA Proposal),[51] the Bureau recently issued a final rule to implement Dodd-Frank Act requirements expanding protections for ''high-cost mortgages'' under the Homeownership and Equity Protection Act (HOEPA), pursuant to TILA sections 103(bb) and 129, as amended by Dodd-Frank Act sections 1431 through 1433. 15 U.S.C. 1602(bb) and 1639. The Bureau also is finalizing rules to implement certain title XIV requirements concerning homeownership counseling, including a requirement that lenders provide lists of homeownership counselors to applicants for federally related mortgage loans, pursuant to RESPA section 5(c), as amended by Dodd-Frank Act section 1450. 12 U.S.C. 2604(c). The Bureau's final rule is referred to as the 2013 HOEPA Final Rule.

• *Loan Originator Compensation:* Following its August 2012 proposal (the 2012 Loan Originator Proposal),[52] the Bureau is issuing a final rule to implement provisions of the Dodd-Frank Act requiring certain creditors and loan originators to meet certain duties of care, including qualification requirements; requiring the establishment of certain compliance procedures by depository institutions; prohibiting loan originators, creditors, and the affiliates of both from receiving compensation in various forms (including based on the terms of the transaction) and from sources other than the consumer, with specified exceptions; and establishing restrictions on mandatory arbitration and financing of single premium credit insurance, pursuant to TILA sections 129B and 129C as established by Dodd-Frank Act sections 1402, 1403, and 1414(a). 15 U.S.C. 1639b, 1639c. The Bureau's final rule is referred to as the 2013 Loan Originator Final Rule.

• *Appraisals:* The Bureau, jointly with other Federal agencies,[53] is issuing

[49] 76 FR 27390 (May 11, 2011).

[50] 76 FR 11598 (Mar. 2, 2011).

[51] 77 FR 49090 (Aug. 15, 2012).

[52] 77 FR 55272 (Sept. 7, 2012).

[53] Specifically, the Board of Governors of the Federal Reserve System, the Office of the

Continued

a final rule implementing Dodd-Frank Act requirements concerning appraisals for higher-risk mortgages, pursuant to TILA section 129H as established by Dodd-Frank Act section 1471. 15 U.S.C. 1639h. This rule follows the agencies' August 2012 joint proposal (the 2012 Interagency Appraisals Proposal).[54] The agencies' joint final rule is referred to as the 2013 Interagency Appraisals Final Rule. As discussed in that final rule, the agencies plan to issue a supplemental proposal addressing potential additional exemptions to the appraisal requirements. In addition, following its August 2012 proposal (the 2012 ECOA Appraisals Proposal),[55] the Bureau is issuing a final rule to implement provisions of the Dodd-Frank Act requiring that creditors provide applicants with a free copy of written appraisals and valuations developed in connection with applications for loans secured by a first lien on a dwelling, pursuant to section 701(e) of the Equal Credit Opportunity Act (ECOA) as amended by Dodd-Frank Act section 1474. 15 U.S.C. 1691(e). The Bureau's final rule is referred to as the 2013 ECOA Appraisals Final Rule.

The Bureau is not at this time finalizing proposals concerning various disclosure requirements that were added by title XIV of the Dodd-Frank Act, integration of mortgage disclosures under TILA and RESPA, or a simpler, more inclusive definition of the finance charge for purposes of disclosures for closed-end mortgage transactions under Regulation Z. The Bureau expects to finalize these proposals and to consider whether to adjust regulatory thresholds under the Title XIV Rulemakings in connection with any change in the calculation of the finance charge later in 2013, after it has completed quantitative testing, and any additional qualitative testing deemed appropriate, of the forms that it proposed in July 2012 to combine TILA mortgage disclosures with the good faith estimate (RESPA GFE) and settlement statement (RESPA settlement statement) required under the Real Estate Settlement Procedures Act, pursuant to Dodd-Frank Act section 1032(f) and sections 4(a) of RESPA and 105(b) of TILA, as amended by Dodd-Frank Act sections 1098 and 1100A, respectively (the 2012 TILA–RESPA Proposal).[56] Accordingly, the Bureau already has issued a final rule delaying implementation of various affected title XIV disclosure provisions.[57]

Coordinated Implementation of Title XIV Rulemakings

As noted in all of its foregoing proposals, the Bureau regards each of the Title XIV Rulemakings as affecting aspects of the mortgage industry and its regulations. Accordingly, as noted in its proposals, the Bureau is coordinating carefully the Title XIV Rulemakings, particularly with respect to their effective dates. The Dodd-Frank Act requirements to be implemented by the Title XIV Rulemakings generally will take effect on January 21, 2013, unless final rules implementing those requirements are issued on or before that date and provide for a different effective date. *See* Dodd-Frank Act section 1400(c), 15 U.S.C. 1601 note. In addition, some of the Title XIV Rulemakings are required by the Dodd-Frank Act to take effect no later than one year after they are issued. *Id.*

The comments on the appropriate effective date for this final rule are discussed in detail below in part VI of this notice. In general, however, consumer advocates requested that the Bureau put the protections in the Title XIV Rulemakings into effect as soon as practicable. In contrast, the Bureau received some industry comments indicating that implementing so many new requirements at the same time would create a significant cumulative burden for creditors. In addition, many commenters also acknowledged the advantages of implementing multiple revisions to the regulations in a coordinated fashion.[58] Thus, a tension exists between coordinating the adoption of the Title XIV Rulemakings and facilitating industry's implementation of such a large set of new requirements. Some have suggested that the Bureau resolve this tension by adopting a sequenced implementation, while others have requested that the Bureau simply provide a longer implementation period for all of the final rules.

The Bureau recognizes that many of the new provisions will require creditors to make changes to automated systems and, further, that most administrators of large systems are reluctant to make too many changes to their systems at once. At the same time, however, the Bureau notes that the Dodd-Frank Act established virtually all of these changes to institutions' compliance responsibilities, and contemplated that they be implemented in a relatively short period of time. And, as already noted, the extent of interaction among many of the Title XIV Rulemakings necessitates that many of their provisions take effect together. Finally, notwithstanding commenters' expressed concerns for cumulative burden, the Bureau expects that creditors actually may realize some efficiencies from adapting their systems for compliance with multiple new, closely related requirements at once, especially if given sufficient overall time to do so.

Accordingly, the Bureau is requiring that, as a general matter, creditors and other affected persons begin complying with the final rules on January 10, 2014. As noted above, section 1400(c) of the Dodd-Frank Act requires that some provisions of the Title XIV Rulemakings take effect no later than one year after the Bureau issues them. Accordingly, the Bureau is establishing January 10, 2014, one year after issuance of the Bureau's 2013 ATR, Escrows, and HOEPA Final Rules (*i.e.,* the earliest of the title XIV Rulemakings), as the baseline effective date for most of the Title XIV Rulemakings. The Bureau believes that, on balance, this approach will facilitate the implementation of the rules' overlapping provisions, while also affording creditors sufficient time to implement the more complex or resource-intensive new requirements.

The Bureau has identified certain rulemakings or selected aspects thereof, however, that do not present significant implementation burdens for industry. Accordingly, the Bureau is setting earlier effective dates for those final rules or certain aspects thereof, as applicable. Those effective dates are set forth and explained in the **Federal Register** notices for those final rules.

IV. Legal Authority

The final rule was issued on January 17, 2013, in accordance with 12 CFR 1074.1. The Bureau is issuing this final rule pursuant to its authority under RESPA and the Dodd-Frank Act. Section 1061 of the Dodd-Frank Act transferred

Comptroller of the Currency, the Federal Deposit Insurance Corporation, the National Credit Union Administration, and the Federal Housing Finance Agency.

[54] 77 FR 54722 (Sept. 5, 2012).

[55] 77 FR 50390 (Aug. 21, 2012).

[56] 77 FR 51116 (Aug. 23, 2012).

[57] 77 FR 70105 (Nov. 23, 2012).

[58] Of the several final rules being adopted under the Title XIV Rulemakings, six entail amendments to Regulation Z, with the only exceptions being the 2013 RESPA Servicing Final Rule (Regulation X) and the 2013 ECOA Appraisals Final Rule (Regulation B); the 2013 HOEPA Final Rule also amends Regulation X, in addition to Regulation Z. The six Regulation Z final rules involve numerous instances of intersecting provisions, either by cross-references to each other's provisions or by adopting parallel provisions. Thus, adopting some of those amendments without also adopting certain other, closely related provisions would create significant technical issues, *e.g.,* new provisions containing cross-references to other provisions that do not yet exist, which could undermine the ability of creditors and other parties subject to the rules to understand their obligations and implement appropriate systems changes in an integrated and efficient manner.

to the Bureau the ''consumer financial protection functions'' previously vested in certain other Federal agencies, including HUD. The term ''consumer financial protection function'' is defined to include ''all authority to prescribe rules or issue orders or guidelines pursuant to any Federal consumer financial law, including performing appropriate functions to promulgate and review such rules, orders, and guidelines.'' [59] RESPA and certain provisions of Title XIV of the Dodd-Frank Act are Federal consumer financial laws.[60] Accordingly, the Bureau has authority to issue regulations pursuant to RESPA and Title XIV of the Dodd-Frank Act, including implementing the additions and amendments to RESPA's mortgage servicing requirements made by Title XIV of the Dodd-Frank Act.

Section 1463 of the Dodd-Frank Act creates statutory mandates by adding new section 6(k) through (m) to RESPA. Section 1463 of the Dodd-Frank Act also amends certain consumer protection provisions set forth in existing section 6(e) through (g) of RESPA.

Regarding the statutory mandates, section 6(k) of RESPA contains prohibitions on servicers for servicing of federally related mortgage loans. Pursuant to section 6(k) of RESPA, servicers are prohibited from: (i) Obtaining force-placed insurance unless there is a reasonable basis to believe the borrower has failed to comply with the loan contract's requirements to maintain property insurance; (ii) charging fees for responding to valid qualified written requests; (iii) failing to take timely action to respond to a borrower's requests to correct certain types of errors; (iv) failing to respond within ten business days to a request from a borrower to provide certain information about the owner or assignee of a mortgage loan; or (v) failing to comply with any other obligation found by the Bureau to be appropriate to carry out the consumer protection purposes of RESPA. *See* RESPA section 6(k).

Section 6(*l*) of RESPA sets forth specific requirements for determining if a servicer has a reasonable basis to obtain force-placed insurance coverage. Section 6(*l*) of RESPA requires servicers to provide written notices to a borrower before imposing on the borrower a charge for a force-placed insurance policy. Section 6(*l*) of RESPA also requires a servicer to accept any reasonable form of written confirmation from a borrower of existing insurance coverage. Section 6(*l*) of RESPA further requires a servicer, within 15 days of the receipt of such confirmation, to terminate force-placed insurance and refund any premiums and fees paid during the period of overlapping coverage. Section 6(m) of RESPA requires that charges related to force-placed insurance, other than charges subject to State regulation as the business of insurance, be bona fide and reasonable.

The Dodd-Frank Act also amends existing section 6(e) through (g) of RESPA. Section 6(e) is amended by decreasing the response times currently applicable to a servicer's obligation to respond to a qualified written request. Section 6(f) is amended to increase the penalty amounts servicers may incur for violations of section 6 of RESPA. Further, section 6(g) is amended to protect borrowers by obligating servicers to refund escrow balances to borrowers when a mortgage loan is paid in full or to transfer the escrow balance in certain refinancing related situations.

The Bureau observes that in addition to the specific statutory mandates and amendments the Dodd-Frank Act established in RESPA, by adding section 6(k)(1)(E) to RESPA, the Dodd-Frank Act authorizes the Bureau, through section 6(k), to prescribe regulations that are appropriate to carry out the consumer protection purposes of the title. RESPA is a remedial consumer protection statute and imposes obligations upon servicers of federally related mortgage loans. RESPA has established a consumer protection paradigm of requiring disclosures to consumers, and establishing servicer requirements and prohibitions, for the purpose of protecting borrowers from certain potential harms. The disclosures include, for example, disclosures regarding escrow account balances and disbursements, transfers of mortgage servicing among mortgage servicers, and force-placed insurance notices. The requirements and prohibitions include requirements for servicers to respond to qualified written requests from borrowers and with respect to escrow account payments. Servicers are subject to civil liability for failure to comply with such requirements and prohibitions.

Considered as a whole, RESPA, as amended by the Dodd-Frank Act, reflects at least two significant consumer protection purposes: (1) To establish requirements that ensure that servicers have a reasonable basis for undertaking actions that may harm borrowers and (2) to establish servicers' duties to borrowers with respect to the servicing of federally related mortgage loans. Specifically, with respect to mortgage servicing, the consumer protection purposes of RESPA include responding to borrower requests and complaints in a timely manner, maintaining and providing accurate information, helping borrowers avoid unwarranted or unnecessary costs and fees, and facilitating review for foreclosure avoidance options. Each of the provisions adopted in this final rule is intended to achieve some or all of these purposes.

The final rule also relies on the rulemaking and exception authorities specifically granted to the Bureau by RESPA and Title X of the Dodd-Frank Act, including the authorities discussed below:

RESPA

Section 19(a) of RESPA authorizes the Bureau to prescribe such rules and regulations, to make such interpretations, and to grant such reasonable exemptions for classes of transactions, as may be necessary to achieve the purposes of RESPA, which includes the consumer protection purposes laid out above. 12 U.S.C. 2617(a). In addition, section 6(j)(3) of RESPA authorizes the Bureau to establish any requirements necessary to carry out section 6 of RESPA. 12 U.S.C. 2605(j)(3)

Title X of the Dodd-Frank Act

Dodd-Frank Act section 1022(b). Section 1022(b)(1) of the Dodd-Frank Act authorizes the Bureau to prescribe rules ''as may be necessary or appropriate to enable the Bureau to administer and carry out the purposes and objectives of the Federal consumer financial laws, and to prevent evasions thereof[.]'' 12 U.S.C. 5512(b)(1). RESPA and Title X are Federal consumer financial laws. Accordingly, in adopting this final rule, the Bureau is exercising its authority under Dodd-Frank Act section 1022(b) to prescribe rules to carry out the purposes and objectives of RESPA and Title X and prevent evasion of those laws.

Dodd-Frank Act section 1032. Section 1032(a) of the Dodd-Frank Act provides that the Bureau ''may prescribe rules to ensure that the features of any consumer financial product or service, both initially and over the term of the product or service, are fully, accurately, and effectively disclosed to consumers in a manner that permits consumers to

[59] 12 U.S.C. 5581(a)(1).

[60] Dodd-Frank Act section 1002(14), 12 U.S.C. 5481(14) (defining ''Federal consumer financial law'' to include the ''enumerated consumer laws'' and the provisions of title X of the Dodd-Frank Act); Dodd-Frank Act section 1002(12), 12 U.S.C. 5481(12) (defining ''enumerated consumer laws'' to include RESPA), Dodd-Frank section 1400(b), 15 U.S.C. 1601 note (defining ''enumerated consumer laws'' to include certain subtitles and provisions of title XIV).

understand the costs, benefits, and risks associated with the product or service, in light of the facts and circumstances.'' 12 U.S.C. 5532(a). The authority granted to the Bureau in Dodd-Frank Act section 1032(a) is broad, and empowers the Bureau to prescribe rules regarding the disclosure of the ''features'' of consumer financial products and services generally. Accordingly, the Bureau may prescribe rules containing disclosure requirements even if other Federal consumer financial laws do not specifically require disclosure of such features.

Dodd-Frank Act section 1032(c) provides that, in prescribing rules pursuant to Dodd-Frank Act section 1032, the Bureau ''shall consider available evidence about consumer awareness, understanding of, and responses to disclosures or communications about the risks, costs, and benefits of consumer financial products or services.'' 12 U.S.C. 5532(c). Accordingly, in developing the final rule under Dodd-Frank Act section 1032(a), the Bureau has considered available studies, reports, and other evidence about consumer awareness, understanding of, and responses to disclosures or communications about the risks, costs, and benefits of consumer financial products or services. In addition, Dodd-Frank Act section 1032(b)(1) provides that ''any final rule prescribed by the Bureau under this [section 1032] requiring disclosure may include a model form that may be used at the option of the covered person for provision of the required disclosures.'' 12 U.S.C. 5532(b)(1). As required under Dodd-Frank Act section 1032(b)(3), the Bureau has validated model forms issued under Dodd-Frank Act section 1032(b)(1) through consumer testing.

The Bureau uses the specific statutory authorities set forth above, as well as the broader authorities set forth in sections 6(j)(3), 6(k), and 19(a) of RESPA, and in sections 1022 and 1032 of the Dodd-Frank Act discussed above in adopting this final rule.

Commentary

The Bureau's final rule also includes official Bureau interpretations in a supplement to Regulation X. RESPA section 19(a) authorizes the Bureau to make such reasonable interpretations of RESPA as may be necessary to achieve the consumer protection purposes of RESPA. Good faith compliance with the interpretations would afford servicers protection from liability under section 19(b) of RESPA. The Bureau's adoption of these official Bureau interpretations in the supplement substitutes for the prior practice of HUD of publishing Statements of Policy with respect to interpretations of RESPA.[61]

V. Section-by-Section Analysis

Subpart A—General

Existing Regulation X does not contain distinctive subparts. The Bureau proposed to create three distinct subparts within Regulation X. The Bureau did not receive any comments on the proposed reorganization of Regulation X. Therefore, the final rule adopts the reorganization as proposed.

Subpart A, titled ''General,'' contains general provisions as well as provisions that would have been applicable to the other two subparts of Regulation X. The Bureau proposed to place current §§ 1024.1 through 1024.5 in subpart A and, as described below, proposed to make a number of largely technical corrections to those sections.

Current § 1024.2 sets forth defined terms that are applicable to transactions covered by Regulation X, including the defined term ''Federally related mortgage loan'' that is referenced in the proposed defined term ''Mortgage loan'' in proposed subpart C. The Bureau proposed to retain most of current § 1024.2 without change, except that the Bureau proposed deletions from the defined terms ''Federally related mortgage loan'' and ''Mortgage broker'' and additions to the defined terms ''Public Guidance Documents'' and ''Servicer.''

Specifically, the Bureau proposed to modify the defined term ''Federally related mortgage loan'' to eliminate the use of the short-hand reference to ''mortgage loan'' as a substitute for ''Federally related mortgage loan'' in light of the fact that proposed § 1024.31 would have provided that the term ''mortgage loan'' for purposes of subpart C's mortgage servicing requirements is to be a defined term distinct from the defined term ''Federally related mortgage loan.'' The Bureau also proposed conforming edits that would have replaced references to ''mortgage loan'' with ''federally related mortgage loan'' in the defined terms ''Origination service,'' ''Servicer,'' and ''Servicing'' set forth in current § 1024.2 and in current §§ 1024.7(f)(3), 1024.17(c)(8), 1024.17(f)(2)(ii), 1024.17(f)(4)(iii), 1024.17(i)(2), and 1024.17(i)(4)(iii). The Bureau did not receive comments on the proposed revision to the defined term ''Federally related mortgage loan'' or the conforming edits described above. The final rule adopts the proposed revision and conforming edits as proposed.

The 2012 RESPA Servicing Proposal also would have removed a reference to loan correspondents that are approved under 24 CFR 202.8 from the defined term ''Mortgage broker'' because the reference was made obsolete when HUD amended 24 CFR 202.8 on April 20, 2010, to eliminate the FHA approval process for loan correspondents after determining that loan correspondents would no longer be approved participants in FHA programs.[62] The Bureau did not receive comments on the proposal to remove the reference to loan correspondents from the current defined term ''Mortgage broker,'' and the final rule adopts the proposed removal from the defined term ''Mortgage broker'' as proposed.

The proposal also would have modified the defined term ''Public Guidance Documents'' to clarify that such documents are available from the Bureau upon request and to provide an address for such requests. The Bureau did not receive comments on these proposed clarifications, and the final rule adopts the clarifications to the defined term ''Public Guidance Documents'' as proposed.

The proposal also would have added language to the defined term ''Servicer'' to clarify the status of the National Credit Union Administration (NCUA) as conservator or liquidating agent of a servicer or in its role of providing special assistance to an insured credit union. The current definition of ''Servicer'' provides that the Federal Deposit Insurance Corporation (FDIC) is not a servicer (1) with respect to assets acquired, assigned, sold, or transferred pursuant to section 13(c) of the Federal Deposit Insurance Act or as receiver or conservator of an insured depository institution; or (2) in any case in which the assignment, sale, or transfer of the servicing of the mortgage loan is preceded by commencement of proceedings by the FDIC for conservatorship or receivership of a servicer (or an entity by which the servicer is owned or controlled). The proposed addition to the defined term ''Servicer'' would have clarified similarly that the NCUA is not a servicer (1) with respect to assets acquired, assigned, sold, or transferred, pursuant to section 208 of the Federal Credit Union Act or as conservator or liquidating agent of an insured credit

[61] The Bureau recognizes that the proposed supplement, which sets forth interpretations that relate to the proposed mortgage servicing rulemakings, is not inclusive of all interpretations of RESPA, including interpretations previously issued by the HUD. The Bureau does not intend that the publication of the supplement would withdraw or otherwise affect the status of any prior interpretations of RESPA not set forth in the supplement.

[62] *See* 75 FR 20718.

union; or (2) in any case in which the assignment, sale, or transfer of the servicing of the mortgage loan was preceded by commencement of proceedings by the NCUA for appointment of a conservator or liquidating agent of a servicer (or an entity by which the servicer is owned or controlled). The Bureau does not believe there is a basis to impose on the NCUA, when it is providing assistance to an insured credit union or in its role as conservator or liquidating agent of an insured credit union, the obligations of a servicer. The Bureau did not receive any comments concerning the proposed language. Accordingly, the Bureau adopts the proposed addition to the defined term ''Servicer'' as proposed.

The Bureau proposed to delete the text of current § 1024.3 concerning the process for the public to submit questions or suggestions regarding RESPA or to receive copies of Public Guidance Documents and to replaced it with the substance of the regulation concerning electronic disclosures set forth in current § 1024.23. The Bureau did not believe a provision of Regulation X was needed to address the process for submitting questions and requesting documents. The public may contact the Bureau to request documents, suggest changes to Regulation X, or submit questions, including questions concerning the interpretation of RESPA by mail to the Associate Director, Research, Markets, and Regulations, Bureau of Consumer Financial Protection, 1700 G St. NW., Washington, DC 20552, or by email to *CFPB_RESPAInquiries@cfpb.gov*. Further, the final rule includes contact information to request copies of Public Guidance Documents in the defined term ''Public Guidance Documents'' in § 1024.2, as discussed above.

Current § 1024.23 states that provisions of the Electronic Signatures in Global and National Commerce Act (E-Sign Act) permitting electronic disclosures to consumers if certain conditions are met apply to Regulation X. Because the Bureau believes that such E-Sign Act provisions are applicable to all provisions in Regulation X, it decided that the best place for the language was in § 1024.3. In the process of moving the language in current § 1024.23 to § 1024.3, the Bureau also made technical edits to conform the language to the language of other similar Bureau regulations. The Bureau did not receive comments on these revisions to current §§ 1024.3 and 1024.23. The Final rule adopts § 1024.3 as proposed and removes § 1024.23 as proposed.

Current § 1024.4 sets forth provisions relating to reliance upon rules, regulations, or interpretations by the Bureau. The Bureau proposed to remove current § 1024.4(b) and redesignate current § 1024.4(c) as proposed § 1024.4(b). Current § 1024.4(b) provides that the Bureau may, in its discretion, provide unofficial staff interpretations but that such interpretations do not provide protection under section 19(b) of RESPA and that staff will not ordinarily provide such interpretations on matters adequately covered by Regulation X, official interpretations, or commentaries. The Bureau's policy is to assist the public in understanding the Bureau's regulations, including, but not limited to, Regulation X. The Bureau believes that this provision, which states Bureau policy, is more appropriate for the commentary and, accordingly, proposed to include the substance of this provision in the introduction to the commentary. The Bureau did not receive comments on the proposed removal of current § 1024.4(b) and re-designation of current § 1024.4(c) as proposed § 1024.4(b). The final rule adopts these revisions as proposed.

Current § 1024.5 sets forth exemptions with respect to the applicability of Regulation X. The Bureau proposed a technical correction to current § 1024.5(b)(7) to reflect that mortgage servicing-related provisions of Regulation X will be included in new subpart C and will no longer be placed in current § 1024.21. The Bureau did not receive comments on this technical correction, and the final rule adopts the technical correction to § 1024.5 as proposed, with an additional technical change to clarify the applicability of subpart C to *bona fide* transfers in the secondary market.

For reasons discussed below, current § 1024.21 is deleted. In connection with the deletion of current § 1024.21 as discussed below, the Bureau is also making a technical correction to a cross-reference in current § 1024.13(d) to language in current § 1024.21(h) that is being moved to § 1024.33(d).

Subpart B—Mortgage Settlements and Escrow Accounts

In connection with the Bureau's proposal to create three distinct subparts in Regulation X, the Bureau is organizing §§ 1024.6 through 1024.20 under new subpart B. These provisions generally relate to settlement services and escrow accounts. As described above, the Bureau is adopting the conforming edits the Bureau proposed relating to §§ 1024.7(f)(3), 1024.17(c)(8), 1024.17(f)(2)(ii), 1024.17(f)(4)(iii), 1024.17(i)(2), and 1024.17(i)(4)(iii).

Section 1024.17 Escrow Accounts

17(k) Timely Payments

Section 6(g) of RESPA establishes that if the terms of any federally related mortgage loan require a borrower to make payments to a servicer of the loan for deposit into an escrow account for the purpose of assuring payment of taxes, insurance premiums, and other charges with respect to the property, the servicer shall make such payments from the borrower's escrow account in a timely manner as such payments become due. Existing § 1024.21(g) provides that the requirements set forth in § 1024.17(k) govern the payment of such charges. Existing § 1024.17(k)(1) provides that if the terms of a federally related mortgage loan require a borrower to make payments to an escrow account, a servicer must pay the disbursements in a timely manner (specifically, on or before the deadline to avoid a penalty) unless a borrower's payment is more than 30 days overdue. Existing § 1024.17(k)(2) requires servicers to advance funds if necessary to make the disbursements in a timely manner unless the borrower's mortgage payment is more than 30 days past due. Upon advancing funds to pay a disbursement, a servicer may seek repayment from a borrower for the deficiency pursuant to § 1024.17(f).

The Bureau proposed a new § 1024.17(k)(5) to expand the scope of these obligations with regard to continuing a borrower's hazard insurance policy. Specifically, proposed § 1024.17(k)(5) would have required that, notwithstanding § 1024.17(k)(1) and (2), a servicer must make payments from a borrower's escrow account in a timely manner to pay the premium charge on a borrower's hazard insurance, as defined in § 1024.31, unless the servicer has a reasonable basis to believe that a borrower's hazard insurance has been canceled or not renewed for reasons other than nonpayment of premium charges. Thus, proposed § 1024.17(k)(5) would have required a servicer to both advance funds to an escrow account and to disburse such funds to pay a borrower's hazard insurance notwithstanding that a borrower is more than 30 days delinquent.

The proposed requirement would not have applied where a servicer had ''a reasonable basis to believe that such insurance has been canceled or not renewed for reasons other than nonpayment of premium charges'' because the Bureau recognized that there were situations where timely payment by a servicer would not be sufficient to continue a policy that had

already been canceled or was not renewed for other reasons, such as, for example, risks presented by the condition of the property.

The Bureau also proposed commentary to clarify the requirements in § 1024.17(k)(5). Specifically, the Bureau proposed to clarify in comment 17(k)(5)–1 that the receipt by a servicer of a notice of cancellation or non-renewal from the borrower's insurance company before the insurance premium is due provides a reasonable basis to believe that the borrower's hazard insurance has been canceled or not renewed for reasons other than nonpayment of premium charges. Comment 17(k)(5)–2 would have provided three examples of situations in which a borrower's hazard insurance was canceled or not renewed for reasons other than the nonpayment of premium charges, including because the borrower cancelled the insurance policy, because the insurance company no longer writes the type of policy that the borrower carried or writes policies in the area where the borrower's property is located, or because the insurance company is no longer willing to maintain the borrower's individual policy to cover the borrower's property because of a change in risk affecting the borrower's property. Finally, proposed comment 17(k)(5)–3 would have clarified that a servicer that advances the premium payment as required by § 1024.17(k)(5) may advance the payment on a month-to-month basis, if permitted by State or other applicable law and accepted by the borrower's hazard insurance company.

The Bureau proposed § 1024.17(k)(5) to protect consumers from the unwarranted force-placement of hazard insurance. Force-placed insurance generally provides substantially less coverage for a borrower's property at a substantially higher premium cost than a borrower-obtained hazard insurance policy, as discussed below in connection with § 1024.37. Section 1463 of the Dodd-Frank Act demonstrates that Congress was concerned about the unwarranted or unnecessary force-placement of hazard insurance for mortgage borrowers. Section 6(k) of RESPA, as amended by section 1463 of the Dodd-Frank Act, evinces Congress's intent to establish reasonable protections for borrowers to avoid unwarranted force-placed insurance coverage. Section 1024.17(k)(5), though articulated differently than the protections directly set forth in section 1463, draws directly from Congress's intent as set forth in section 1463 of the Dodd-Frank Act to protect borrowers from the force-placement of hazard insurance in situations where such force-placement is unwarranted and can be avoided. When a servicer is receiving bills for the borrower's hazard insurance in connection with administration of an escrow account, a servicer who elects not to advance to a delinquent borrower's escrow account to maintain the borrower's hazard insurance, allowing that insurance to lapse, and then advances a far greater amount to a borrower's escrow account to obtain a force-placed insurance policy unreasonably harms a borrower. Section 1024.17(k)(5) implements the purposes of section 1463 of the Dodd-Frank Act to protect borrowers from the unwarranted force-placement of insurance when a servicer does not have a reasonable basis to impose the charge on a borrower.

Further, considered as a whole, one of the consumer protection purposes of RESPA, as amended by the Dodd-Frank Act, is a requirement that servicers must have a reasonable basis for undertaking actions that may harm borrowers, including delinquent borrowers. Section 1024.17(k)(5) furthers this purpose by establishing that servicers may not unnecessarily obtain force-placed insurance in situations where such placement is not warranted, that is, when a servicer is able to maintain a borrower's current hazard insurance in force by advancing and disbursing funds to pay the premiums.

The Bureau further reasoned that proposed § 1024.17(k)(5) would not increase burdens on servicers generally, because the Bureau understood that many servicers already advance hazard insurance premiums for borrowers with escrow accounts even if the borrowers' mortgage payments are more than 30 days past due. The Bureau also understands that the proposed requirement would benefit owners or assignees of mortgage loans by preventing the placement of costly and unnecessary force-placed insurance policies, the higher costs for which may be recovered from an owner or assignee in the event the property is liquidated.

The Bureau sought comment on all aspects of the proposed escrow advance provision including on whether there should be additional limitations on a servicer's duty to advance funds. For instance, the Bureau sought comments on an alternative approach under which a servicer could not charge a borrower who has an escrow account established to pay hazard insurance for force-placed insurance unless those charges would be less expensive than the charges for reimbursing the servicer for advancing funds to continue the borrower's hazard insurance policy. The Bureau further requested comment regarding whether to require further that any such force-placed insurance policy protect the borrower's interest. In addition, the Bureau observed in the proposal that § 1024.17(k)(5) would only apply when a borrower has an escrow account established to pay hazard insurance, and also invited comments on whether a servicer should be required to pay the hazard insurance premiums on behalf of a borrower who has not established an escrow account to pay for such insurance. Finally, the Bureau further requested comment on whether a servicer should be required to ask such a borrower whether the borrower would consent to the servicer renewing the borrower's hazard insurance and, with the borrower's consent, be required to advance funds to pay such premiums.

Industry commenters and their trade associations varied significantly in their comments with respect to § 1024.17(k)(5). A number of commenters, including a force-placed insurance provider and two trade associations, stated that the proposed requirement was consistent with current industry practice and would not be onerous to implement. For example, one non-bank servicer indicated that it generally advanced funds to escrow and disbursed those funds to maintain hazard insurance so long as it viewed the advances as recoverable, notwithstanding the delinquency status of the borrower.

Numerous other servicers and their trade associations, however, objected to the requirement that a servicer timely disburse funds from escrow to pay hazard insurance for borrowers who are delinquent and further that servicers should advance funds to escrow accounts that would then be disbursed to pay hazard insurance. Some industry commenters indicated that force-placed insurance is the appropriate means for insuring a property for a borrower that has not paid for hazard insurance. For example, a national trade association representing property and casualty insurers stated that the inclusion of limitations on force-placed insurance in section 1463(a) of the Dodd-Frank Act recognized that an appropriate role exists for force-placed insurance. Some commenters indicated that the procedures for obtaining force-placed insurance, specifically notices provided to borrowers, spur borrower action to communicate with servicers and to obtain insurance. These commenters believe that the threat of forced placement of insurance causes borrowers to obtain hazard insurance to avoid force-placed insurance. If the threat is effective, they argue, servicers

should not have to advance funds to escrow accounts for delinquent borrowers. One commenter, a force-placed insurance provider, urged the Bureau to first evaluate the effectiveness of the notices and procedures required by the Dodd-Frank Act before adopting a final rule requiring a servicer to advance funds for borrowers whose mortgage payments were more than 30 days overdue. Finally, one commenter hypothesized that the proposed requirement was intended as a step toward potential future actions by the Bureau to eliminate the force-placed insurance product market.

Some servicers and their trade associations questioned the Bureau's authority to require servicers to advance funds to, and disburse from, an escrow account to maintain hazard insurance. These commenters stated that (1) the Bureau does not have the authority to impose the requirement because it is not specifically set forth in the Dodd-Frank Act, (2) section 6(g) of RESPA only applies to insurance required pursuant to the terms of a federally related mortgage loan, whereas the duty to advance funds appeared to apply even for insurance not required by the terms of the loan, and (3) the requirement was an unnecessary exercise of the Bureau's authority to impose additional obligations on servicers pursuant to sections 6(k)(1)(E) and 19(a) of RESPA. Commenters further objected that the requirement to advance funds would require a servicer to provide funds to maintain coverage obtained by a borrower that exceeded the coverage required by the lender, including, for example, coverage for borrower possessions or coverage beyond hazards the lender required to be covered.

Some servicers and their trade associations further stated that the requirement to advance funds to, and disburse from, an escrow account to maintain hazard insurance would have adverse consequences for servicers, borrowers, and the insurance market. With respect to potential impact on servicers, some commenters indicated that the proposed requirement would create a disincentive to establish escrow accounts. These commenters also indicated that borrowers may incorrectly presume that servicers will advance to escrow accounts for delinquent borrowers to pay all escrow obligations, not just hazard insurance. Further, a credit union trade association commented that requiring disbursements for hazard insurance may deplete funds that may be available to pay other escrow obligations, such as tax liabilities. A commenter stated that a servicer may be responsible for a loss if a hazard insurance provider to whom it has advanced payments denies coverage because a property is vacant and is excluded from coverage; in such a situation, the commenter said that force-placed insurance is necessary because it would cover the loss.

Some servicers stated that borrowers may be unjustly enriched at the expense of their servicers by cancelling hazard insurance and obtaining for themselves refunds of premiums that were paid by their servicers. Although the Bureau had attempted to address this concern, which also was raised during the Small Business Review Panel, through proposed comment 17(k)(5)–3, servicers disagreed on the solution. Importantly, one state banking association stated that the risk of moral hazard and unjust enrichment was mitigated by proposed comment 17(k)(5)–3, which permitted the servicer to advance and disburse on a month-to-month basis, while another small bank commenter stated that the Bureau's comment permitting advancing on a month-to-month basis would increase its servicing costs because it would be paying a borrower's insurance twelve times per year.

With respect to potential impact on borrowers, several commenters suggested that the proposal would result in an increase in incidents of a borrower being double-billed for hazard insurance. These commenters incorrectly interpreted the proposal to require a servicer to pay to maintain coverage even though the borrower had decided to cancel the insurance and pay a new insurer directly. These commenters stated that borrowers may be harmed because borrowers would be responsible for duplicative hazard insurance costs, whereas a borrower would be entitled to a refund for overlapping force-placed insurance, including pursuant to the Dodd-Frank Act.

With respect to impacts on the insurance market, a number of commenters who are not insurance providers asserted that insurance providers generally view seriously delinquent borrowers as higher insurance risks compared to other borrowers. These commenters expressed concern that the Bureau's proposal could potentially mask this risk because the servicer would be required to advance premiums, even if a borrower is seriously delinquent. One commenter requested that the Bureau state that servicers may inform an insurance provider that a borrower is delinquent. In that regard, a commenter urged the Bureau to provide a form that servicers may provide to insurance providers stating that a lender is paying some identified portion of a borrower's insurance premium due to a deficiency in the borrower's escrow account.

Small banks and credit unions, as well as their trade associations and other small non-bank servicers, indicated that the impact of proposed § 1024.17(k)(5) would be particularly acute for small servicers. These commenters indicated that small servicers typically have different practices with regard to force-placed insurance than large servicers. Outreach with small servicers indicated that in certain circumstances, such servicers may not require borrowers to maintain insurance coverage, may self-insure, or may impose charges for collateral protection plans that may be less costly than advances to maintain a borrower's hazard insurance coverage. Further, commenters asserted that small servicers may be more significantly impacted by the cost of the funds required to be advanced to borrower escrow accounts.

Certain commenters requested clarification regarding whether a servicer would be entitled to recoup any required advances and whether a servicer may be liable to a borrower for failing to advance funds to, and disburse from, an escrow account to maintain hazard insurance. Further, commenters requested clarification that advancing funds is only required if the owner or assignee of a mortgage loan requires the borrower to maintain hazard insurance.

Finally, one credit union commenter requested that the Bureau exempt servicers of home equity lines of credit (HELOCs) from the proposed requirement in § 1024.17(k)(5) to advance funds. The commenter asserted that HELOCs are largely in the subordinate-lien position and requiring a servicer of HELOCs to advance would generally be needless costly to such servicers because servicers servicing liens in the first position would also be advancing payment.

The Bureau received numerous comments from consumers and consumer advocacy groups with respect to proposed § 1024.17(k)(5). These commenters strongly supported all aspects of proposed § 1024.17(k)(5) as set forth in the proposal. These commenters generally stated, however that the Bureau should go farther than the proposal and implement requirements regarding advances and disbursements to maintain hazard insurance for delinquent borrowers that do not have escrow accounts.

Commenters significantly disagreed regarding the merits of requiring advances and disbursements to maintain hazard insurance of borrowers

without escrow accounts. A number of consumer advocacy group commenters contended that the Bureau should make no distinction between homeowners that have escrow accounts and those that do not. Certain state attorney general commenters suggested instead that the Bureau should require a servicer, prior to force-placing insurance, to ask for a borrower's consent to renew voluntary coverage and to advance funds for the premium if the borrower gives consent to the creation of an escrow account. Industry commenters were nearly uniformly opposed to requiring servicers to advance funds for the hazard insurance premiums of borrowers who have not escrowed for hazard insurance, citing most often the impracticality for servicers to reinstate a lapsed policy without any gap in coverage.

The Bureau is finalizing § 1024.17(k)(5) as proposed with adjustments to address pertinent issues raised by the comments. Specifically, the Bureau is not requiring that a servicer advance funds to, or disburse funds from, an escrow account to maintain hazard insurance in all circumstances. Rather, the Bureau had adjusted the requirement in § 1024.17(k)(5)(i) to provide that a servicer may not obtain force-placed insurance unless a servicer is unable to disburse funds from the borrower's escrow account to ensure that the borrower's hazard insurance is paid in a timely manner. Thus, for example, a servicer of a mortgage loan, including a HELOC, is not required to disburse funds from an escrow account to maintain a borrower's hazard insurance, so long as the servicer does not purchase force-placed insurance.

Pursuant to § 1024.17(k)(5)(ii)(A), a servicer is unable to disburse funds if the servicer has a reasonable basis to believe that a borrower's hazard insurance has been canceled or not renewed for reasons other than nonpayment of premium charges. Further, § 1024.17(k)(5)(ii)(B) states that a servicer is not considered unable to disburse funds solely because an escrow account contains insufficient funds. Section 1024.17(k)(5)(ii)(C) makes clear that a servicer may seek repayment from a borrower for funds advanced to pay hazard insurance premiums. Finally, the Bureau has determined to exempt small servicers, that is, servicers that service less than 5,000 mortgage loans and only service mortgage loans owned or originated by the servicer or an affiliate so long as any force-placed insurance purchased by the small servicer is less costly to a borrower than the amount that would be required to be disbursed to maintain the borrower's hazard insurance coverage. *See* § 1024.17(k)(5)(iii). The Bureau is not implementing any requirement that a servicer advance funds to pay for a hazard insurance policy for a borrower that does not have an escrow account.

The Bureau believes that a servicer should not obtain force-placed insurance when a servicer is able to make disbursements from an escrow account to maintain hazard insurance. As set forth above, unless a policy has been cancelled for reasons other than nonpayment, a borrower's delinquency should not cause a servicer to take actions (or make omissions) that would lead to the cancellation of the borrower's voluntary insurance policy and the potential replacement of that policy with a more expensive (and less protective) force-placed insurance policy. The Bureau acknowledges that in certain circumstances, force-placed insurance is necessary. Section 1024.17(k)(5) does not prevent a servicer from obtaining force-placed insurance, subject to the requirements in § 1024.37, when such a policy is appropriate, including, for instance, where a borrower's hazard insurance policy has been cancelled for reasons other than non-payment. In that situation, a servicer may impose a charge on a borrower for a force-placed insurance policy consistent with the requirements in § 1024.37. However, as set forth above and in the proposal, the Bureau does not believe imposition of a charge for force-placed insurance is appropriate where a hazard insurance policy has not been cancelled and a servicer is able to disburse funds from an escrow account to maintain the borrower's preferred hazard insurance policy in force.[63]

The Bureau is therefore adopting § 1024.17(k)(5) in reliance on section 6(k)(1)(E) of RESPA, which authorizes the Bureau to prescribe regulations that are appropriate to carry out the consumer protection purposes of RESPA. The Bureau has additional authority pursuant to section 6(j)(3) of RESPA to establish any requirements necessary to carry out section 6 of REPSA, including section 6(g) with respect to administration of escrow accounts, and has authority pursuant to section 19(a) of RESPA to prescribe such rules and regulations, and to make such interpretations, as may be necessary to achieve the consumer protection purposes of RESPA. The Bureau also has authority to establish consumer protection regulations pursuant to section 1022 of the Dodd-Frank Act. A consumer protection purpose of RESPA is to help borrowers avoid unwarranted or unnecessary costs and fees, and further, the amendments to section 6(k) of RESPA in section 1463 of the Dodd-Frank Act evince Congress's intent to establish reasonable protections for borrowers to avoid unwarranted force-placed insurance coverage. Section 1024.17(k)(5) furthers these purposes and is therefore an appropriate regulation under section 6(j) and 6(k)(1)(E) and section 19(a) of RESPA.[64]

The Bureau does not believe that § 1024.17(k)(5) will have adverse consequences on servicers, borrowers, or the insurance market. With respect to impacts on servicers, § 1024.17(k)(5) does not create significant disincentives to maintain escrow accounts for borrowers. Escrow accounts encourage borrowers to budget for costs of homeownership and to provide funds regularly to servicers to be used to pay those costs, including for insurance, taxes, and other obligations. Lenders include escrow requirements in mortgage contracts because the use of such an account reduces risk to an owner or assignee of a mortgage loan. Servicer also generally benefit from an escrow account both as a result of the improved performance of mortgage loans and also because of the opportunity to earn a return on funds held. Further, servicers manage the impact of an obligation to make advances to escrow accounts by ensuring that advances may be recouped from an owner or assignee of a mortgage loan in the event a property is foreclosed upon and liquidated. In the absence of § 1024.17(k)(5), a servicer that obtains force-placed insurance might advance a greater amount of funds for the force-placed insurance policy and would seek to obtain repayment of those funds either from a borrower or ultimately from an owner or assignee of a mortgage loan if a property is foreclosed upon and liquidated. For these reasons, the Bureau is not persuaded that § 1024.17(k)(5) creates an incentive that would materially affect whether servicers offer escrow accounts to borrowers.

With respect to the ability of servicers to use funds in an escrow account to

[63] Notably, the National Mortgage Settlement includes a similar protection for borrowers. *See e.g., National Mortgage Settlement: Consent Agreement* A–37 (2012), *available at http://www.nationalmortgagesettlement.com.* (stating that ''For escrowed accounts, servicer shall continue to advance payments for the homeowner's existing policy, unless the borrower or insurance company cancels the existing policy.'').

[64] The Bureau notes that regulations established pursuant to section 6 of RESPA are subject to section 6(f) of RESPA, which provides borrowers a private right of action to enforce such regulations.

pay obligations other than hazard insurance, the Bureau recognizes, of course, that escrow account funds are fungible and that payment of hazard insurance necessarily requires expending funds that would have been available for payment of other escrowed obligations, including tax obligations. Servicers, on behalf of owners or assignees of mortgage loans, currently manage this risk by advancing funds to escrow accounts to pay such obligations and seeking repayment from borrowers or ultimately from proceeds payable to the owners or assignees of mortgage loans. No contrary practice is required here. Further, such a practice does not create any new or enhanced risk for servicers. Further, the Bureau has clarified in § 1024.17(k)(5)(ii)(C) that servicers may seek repayment of advances unless otherwise prohibited by applicable law. Servicers, as well as owners and assignees of mortgage loans, are capable of managing risks arising from other escrow account obligations by advancing funds to pay any such obligations as appropriate.

The Bureau also does not believe that § 1024.17(k)(5) presents a material risk to servicers from borrowers cancelling policies, receiving refunds, and, thus, becoming unjustly enriched at the expense of a servicer. A borrower that is current on a mortgage loan obligation but anticipates a future delinquency could engage in the same type of behavior during a period of an escrow account deficiency. Commenters have not demonstrated that such actions typically occur. Further, the Bureau has mitigated this risk by finalizing comment 17(k)(5)(ii)(C)–1, which provides that servicers may, but are not required to, advance payment on a month-to-month basis. Because such advancement is not required on a month-to-month basis, servicers may determine not to undertake that schedule for advances if it would impose greater costs on servicers with respect to maintaining a borrower's hazard insurance.

The Bureau is not persuaded that requiring servicers to disburse funds for hazard insurance for borrowers that are more than 30 days overdue will create incentives for borrowers not to make mortgage loan payments or to fund escrow accounts. Nothing in § 1024.17(k)(5), nor Regulation X generally, prevents servicers from charging borrowers late fees or reporting borrower failures to pay to a consumer reporting agency. These consequences to borrowers provide appropriate disincentives from obtaining the far more limited benefit of non-cancellation of a hazard insurance policy.

The Bureau is persuaded, however, by the comment that hazard insurance coverage may not provide similar protections as force-placed insurance. Many hazard insurance policies contain exclusions from coverage for properties that are vacant. In these circumstances, losses may not be covered by insurance for vacant properties. Delinquent borrowers may have a higher incidence of abandoning properties as vacant. Accordingly, the Bureau has adjusted § 1024.17(k)(5)(ii) to provide that a servicer may be considered unable to disburse funds from escrow to maintain a borrower's hazard insurance policy if the servicer has a reasonable basis to believe the borrower's property is vacant.

The Bureau does not believe that § 1024.17(k)(5) will have adverse impacts on borrowers. The only borrower harm asserted by servicers and their trade associations is that the requirement will lead to an increase in double-billing when a borrower cancels hazard insurance and obtains a new policy for which the borrower pays the insurer directly. The commenters provide no reason to believe that borrowers that are more than 30 days overdue are more likely to cancel hazard insurance and pay insurance directly than borrowers that are current on a mortgage loan obligation or less than 30 days overdue. Further, if a servicer has a reasonable basis to believe that a borrower has cancelled a hazard insurance policy, a servicer is not required to disburse funds to pay for the hazard insurance policy. Finally, when a borrower has cancelled a policy, an insurance company is unlikely to credit the amounts paid by a servicer toward that policy after the date of cancellation.[65]

Further, the Bureau does not believe that § 1024.17(k)(5) will have adverse impacts on the insurance market. Section 1024.17(k)(5) does not, as commenters state, mask any risks presented by a borrower that is more than 30 days overdue on a mortgage loan obligation. Nothing in § 1024.17(k)(5) prevents a servicer from reporting a borrower's payment history to a consumer reporting agency, and an insurance provider could, to the extent permitted by applicable law, obtaining borrower information it deems relevant to underwriting insurance, including a consumer report. In addition, if insurers are harmed by insuring borrowers who are delinquent on their mortgage loans, they face that same harm already for borrowers that do not have escrow accounts and pay hazard insurance premiums directly to their insurers. Section 1024.17(k)(5) does not present a different category of risk in that regard. With respect to one commenter's request that the Bureau issue a form for lenders and servicers to provide to insurance providers stating that a servicer is paying some identified portion of a borrower's insurance premium due to a deficiency in the borrower's escrow account, the Bureau declines. To the extent applicable law permits a lender or servicer to communicate such information to an insurance provider, the lender or servicer should not need the Bureau to develop a form for the communication.

Finally, the Bureau believes that special treatment is warranted with respect to ''small servicers'' as defined in § 1026.41(e)(4). As explained in the section by section discussion of § 1024.30(b) and in the 2013 TILA Servicing Final Rule, the Bureau has identified a class of servicers, referred to as ''small servicers'' and defined by the combination of the number of loans they service and the servicer's relationship to those loans that sets those servicers apart. With respect to the requirements set forth in § 1024.17(k)(5), outreach with small servicers indicates that small servicers' practices with respect to obtaining force-placed insurance tend to be less costly to borrowers than those utilized by larger servicers. For example, the Bureau understands that small servicers often obtain force-placed insurance in the form of collateral protection policies. The charges passed through to borrowers for such coverage, if any, may be less expensive than the costs of either maintaining a borrower's hazard insurance coverage or purchasing an individual force-placed insurance policy. At the same time, requiring such servicers to continue the borrower's hazard insurance in force, which may require advancing funds to the borrower's escrow, could cause these servicers to incur incremental expenses which, because of their size, would be burdensome for them. Because of this difference in practices, the Bureau believes it is appropriate to reduce the restrictions applicable to small servicers with respect to borrowers that have escrow accounts. Accordingly, the Bureau has exempted small servicers from the restriction in § 1024.17(k)(5)(i) and

[65] Notably, as discussed further below, the risk of double-billing when a servicer is paying toward a policy that was currently in place is markedly different than the risk presented by a requirement that a servicer obtain or renew a previously cancelled policy, which would exist if a servicer were required to disburse funds to obtain a policy for a borrower that does not have an escrow account.

1024.17(k)(5)(ii)(B), so long any force-placed insurance that is purchased by the small servicer is less costly to a borrower than the amount that would be required to be disbursed to maintain the borrower's hazard insurance coverage. The Bureau believes this partial exemption sets an appropriate balance of effectuating consumer protections for borrowers with escrow accounts and considerations that may be unique to small servicers.

After consideration of the comments received, the Bureau has also determined not to require servicers to continue hazard insurance policies and advance premium payments for borrowers who have not escrowed for hazard insurance. The Bureau understands the concern of the consumer groups that commented, but the Bureau is persuaded that it would generally be impracticable for servicers to renew the hazard insurance coverage obtained by a non-escrowed borrower without creating a significant risk of double-billing and/or a gap in coverage. For example, although the Bureau does not find concerns about double-billing of borrowers persuasive with respect to situations in which insurance coverage is being paid via disbursement from an escrow account, the Bureau is concerned that a substantially different situation results where the borrower is making direct payments and a policy is allowed to lapse due to non-payment. In those cases, it is far more likely that a consumer may have switched insurance providers without notifying the servicer, and requiring a servicer to obtain a new policy (or to reinstate a previously cancelled policy) may result in borrower harm through the purchase of duplicative insurance and double-billing of a borrower. Further, when a borrower does not have an escrow account, the servicer may not have notice before a policy lapses, and no ability to maintain the policy in continuous force. Were the Bureau to impose a duty on the servicer to pay for hazard insurance in such circumstance, such a duty would not necessarily be to maintain a current policy in force. Rather, the duty could well be to reinstate a lapsed policy or to obtain a new policy on behalf of the borrower to replace the cancelled policy. Requiring a servicer to obtain a new insurance policy on behalf of a borrower that did not have an escrow account to pay for hazard insurance may be burdensome and complex, and may not be justified. Accordingly, the Bureau declines at this time to impose requirements to obtain insurance for borrowers that do not have escrow accounts but will continue to monitor the impact of the requirements set forth in § 1024.37 with respect to force-placed insurance for any such borrowers.

Two consumer groups submitted joint comments urging the Bureau to amend current § 1024.17(k)(1) so that a servicer would be required to make timely disbursements with respect to any escrowed charge, not just hazard insurance, so long as the borrower's escrow account contained sufficient funds to do so. These consumer groups asserted that there is no reason to maintain the limitation for disbursements to borrowers that are less than 30 days overdue with respect to escrow obligations other than hazard insurance. For example, the commenters stated that the failure of a servicer to pay tax obligations in a timely manner would harm a borrower, and suggested that finalizing § 1024.17(k)(5) in isolation could cause borrower confusion because borrowers may not understand that the rule applies only to hazard insurance.

The Bureau understands the commenters' concern with respect to the impact on borrowers if an escrowed charge is not paid, but declines to amend § 1024.17(k)(1) as part of this rulemaking. Section 1024.17(k)(5), as adopted, is only a restriction on servicers' ability to obtain force-placed insurance. If a servicer will not be purchasing force-placed insurance, the servicer is not subject to the provisions of § 1024.17(k)(5). For example, a servicer that does not require a borrower to maintain insurance is not required to disburse funds to maintain the borrower's hazard insurance coverage other than as required pursuant to § 1024.17(k)(1). Because the Bureau is not imposing a blanket obligation to advance funds to escrow to pay hazard insurance premiums, the Bureau does not believe that it would be appropriate to impose such an obligation with respect to other payments to be made from escrow. Accordingly, the Bureau declines to amend § 1024.17(k)(1) as suggested.

Finally, as discussed above, the Bureau requested comments on an alternative approach to § 1024.17(k)(5), which would have added language to § 1024.37 to provide that if a borrower has an escrow account established for hazard insurance, a servicer could not charge the borrower for force-placed insurance unless the force-placed insurance obtained by a servicer was less expensive to the borrower, for comparable coverage, than would be the servicer's advancing funds to continue the borrower's hazard insurance policy. The Bureau further requested comments on whether § 1024.37 should additionally require that force-placed insurance purchased by a servicer under these circumstances protect a borrower's interests.

One large force-placed insurance provider asserted that the proposed alternative is neither necessary or realistic because proposed § 1024.17(k)(5) reflects general industry practice and because the cost of force-placed insurance is invariably more expensive to the borrower than the servicer advancing funds to continue a borrower's hazard insurance policy. On the other hand, another large force-placed insurance provider and a national trade association expressed a preference for the alternative compared to proposed § 1024.17(k)(5). These commenters preferred, however, that the alternative be placed in § 1024.17(k), and not in § 1024.37, because they believed that this alternative should only limit a servicer's force-placement of insurance in situations where an escrowed borrower's hazard insurance was canceled due to a servicer's failure to disburse funds to maintain a borrower's hazard insurance. Commenters further expressed a variety of views concerning how the scope of comparable coverage would be determined. While industry commenters acknowledged that the industry standard is to obtain force-placed coverage equal to the replacement cost of the property, two national trade associations and a large force-placed insurance provider argued that servicers must be given flexibility to determine coverage levels. In contrast, another large force-placed insurance provider suggested that the Bureau should require coverage at replacement cost value.

After consideration of the comments received on the alternative, the Bureau believes that the alternative proposal's requirement regarding comparable coverage would add unnecessary complexity to the regulation. Whether a borrower may or may not benefit from any particular coverage level is dependent on the individual circumstances of the borrower. Further, differences between coverage provided for homeowners' insurance and force-placed insurance make a comparability determination and complex and difficult process. The Bureau declines to adopt the alternative proposal with respect to obtaining comparable coverage.

Section 1024.17(k)(5), as adopted, however, is informed by the alternative and the comments received in response to the alternative. The Bureau has adjusted the requirement in

§ 1024.17(k)(5), consistent with the alternative, to reflect that a servicer's ability to disburse funds to maintain hazard insurance coverage serves as a restriction on the servicer's purchasing force-placed insurance coverage. Thus, a servicer is not required in all instances to disburse funds to maintain hazard insurance coverage for borrowers that are more than 30 days overdue; instead, a servicer may not obtain force-placed insurance coverage unless the servicer is unable to disburse funds from the borrower's escrow account pursuant to § 1024.17(k)(5). Further, the exemption for small servicers in § 1024.17(k)(5)(iii) provides that a small servicer may obtain force-placed insurance, even if the small servicer is not unable to disburse funds from a borrower's escrow account, so long as the cost to the borrower is less than the amount the small servicer would need to disburse to maintain the borrower's hazard insurance, without consideration of the specific policy coverage provisions.

17(l) System of Recordkeeping

The Bureau proposed to remove current § 1024.17(*l*), which generally requires that a servicer maintain for five years records regarding the payment of amounts into and from an escrow account and escrow account statements provided to borrowers. Current § 1024.17(*l*) further provides that the Bureau may request information contained in the servicer's records for an escrow account and that a servicer's failure to provide such information may be deemed to be evidence of the servicer's failure to comply with its obligations with respect to providing escrow account statements to borrowers.

As discussed in the proposal, the Bureau believed that the obligations set forth in current § 1024.17(*l*) would no longer be warranted in light of the information management policies, procedures, and requirements that the Bureau proposed to impose under proposed § 1024.38 and the substantially different authorities available to the Bureau with regard to requesting information from entities subject to § 1024.17. No comments were received on the removal of current § 1024.17(*l*). Accordingly, the Bureau is removing § 1024.17(*l*) as proposed.

Section 1024.18 Validity of contracts and liens

The Bureau is removing current § 1024.18. Current § 1024.18 states that ''Section 17 of RESPA (12 U.S.C. 2615) governs the validity of contracts and liens under RESPA.'' 12 U.S.C. 2615 states ''Nothing in this Act shall affect the validity or enforceability of any sale or contract for the sale of real property or any loan, loan agreement, mortgage, or lien made or arising in connection with a federally related mortgage loan.'' The Bureau believes that RESPA clearly delineates the validity and enforceability of contracts and liens and that § 1024.18 is an unnecessary restatement of the provisions of RESPA. Accordingly, in order to streamline the regulations, the Bureau is removing current § 1024.18.[66]

Section 1024.19 Enforcement

Similarly, the Bureau is removing § 1024.19. The first sentence of § 1024.19(a) states ''[i]t is the policy of the Bureau regarding RESPA enforcement matters to cooperate with Federal, state, or local agencies having supervisory powers over lenders or other persons with responsibilities under RESPA.'' The Bureau believes this statement, which reflects the Bureau's general policy to cooperate with counterpart agencies, is unnecessary. The second sentence of § 1024.19(a) states ''Federal agencies with supervisory powers over lenders may use their powers to require compliance with RESPA.'' Again, the Bureau believes this general statement of the supervisory authority of other federal agencies, which neither conveys authority nor creates limits or restrictions with respect to such authority, is unnecessary in Regulation X. Further, the third sentence of § 1024.19(a) states ''[i]n addition, failure to comply with RESPA may be grounds for administrative action by HUD under HUD regulation 2 CFR part 2424 concerning debarment, suspension, ineligibility of contractors and grantees, or under HUD regulation 24 CFR part 25 concerning the HUD Mortgagee Review Board.'' Here the Bureau believes that the applicable regulations issued by HUD are controlling and whether RESPA may serve as grounds for any such enumerated action is based on those HUD regulations. Accordingly, the Bureau believes this provision, which repeats the scope of HUD regulations, is unnecessary. Section 1024.19(a) states that ''[n]othing in this paragraph is a limitation on any other form of enforcement that may be legally available.'' Because the Bureau believes the other provisions of § 1024.19(a) are unnecessary, this remaining sentence is no longer necessary. Finally, § 1024.19(b) states that the Bureau's procedures for investigations and investigational proceedings are set forth in 12 CFR part 1080. A cross-reference to the location of the Bureau's regulations regarding investigations and investigational proceedings in Regulation X is unnecessary. Accordingly, § 1024.19 is removed in its entirety.[67]

Subpart C—Mortgage Servicing

Section 6 of RESPA sets forth a number of protections for borrowers with respect to the servicing of federally related mortgage loans that are currently implemented through Regulation X in current § 1024.21. Section 1463 of the Dodd-Frank Act amended section 6 of RESPA by adding new section 6(k) through (m) to establish new obligations on servicers for federally related mortgage loans with respect to the purchase of force-placed insurance and responses to borrowers' requests to correct errors, among other things.[68] The Bureau observes that section 6(k) also establishes the Bureau's authority to create obligations the Bureau finds appropriate to carry out the consumer protection purposes of RESPA.

Section 1463 of the Dodd-Frank Act also amended existing provisions in section 6 of RESPA with respect to a servicer's obligation to respond to qualified written requests, a servicer's administration of an escrow account. Section 1463 also increased the dollar amounts for damages for which a servicer may be liable for violations of section 6 of RESPA.

In order to implement the amendments the Dodd-Frank Act added to RESPA in a consistent and clear manner, the Bureau proposed to reorganize Regulation X to combine current Regulation X provisions relating to mortgage servicing in existing § 1024.21 with new mortgage servicing provisions the Bureau proposed to implement Dodd-Frank Act's amendment of section 6 of RESPA in a newly created subpart C. As discussed above, no comments were received on the proposed reorganization of Regulation X into three subparts and the Bureau is adopting subpart C as

[66] Although the Bureau did not propose to remove § 1024.18, the Bureau finds there is good cause to finalize this aspect of the rule without notice and comment. Because § 1024.18 simply restates, verbatim, existing statutory text, its removal will have no impact on, or significance for, any person; notice and comment therefore would be unnecessary.

[67] As with § 1024.18, the Bureau finds there is good cause to remove § 1024.19 without notice and comment. As the foregoing discussion demonstrates, § 1024.19 has no impact on, or significance for, any person; notice and comment therefore would be unnecessary.

[68] Section 1463 uses the term ''federally related mortgage'' but it amends and expands section 6 of RESPA that uses the term ''federally related mortgage loan.'' Accordingly, the Bureau interprets the ''federally related mortgage'' and ''federally related mortgage loan'' to be the same.

proposed as a separate subpart in Regulation X.

Section 1024.21 Mortgage Servicing Transfers

To incorporate mortgage servicing-related provisions within subpart C, the proposed rule would have removed § 1024.21 and would implement the provisions of § 1024.21, subject to proposed changes as discussed below, in proposed §§ 1024.31–1024.34 within subpart C. No comments were received on the removal of § 1024.21 and its incorporation within subpart C. The final rule adopts the removal of § 1024.21 as proposed and implements the provisions of § 1024.21, subject to changes adopted as discussed below, in §§ 1024.31–1024.34 within subpart C.

Section 1024.22 Severability

Current § 1024.22 states that if any particular provision of Regulation X, or its application to any particular person or circumstance is held invalid, the remainder of Regulation X or the application of such provision to any other person or circumstance shall not be affected. The Bureau proposed removing current § 1024.22 because the Bureau believes the section may create unnecessary inconsistency with respect to other Bureau regulations that do not contain corresponding provisions. By removing § 1024.22, the Bureau is not suggesting that the severability of Regulation X is changing or that the Bureau intends the new provisions to be non-severable. The Bureau intends that the provisions of Regulation X are severable and believes that if any particular provision of Regulation X, or its application to any particular person or circumstance is held invalid, the remainder of Regulation X or the application of such provision to any other provision or circumstance should not be affected. The Bureau's proposal to remove current § 1024.22 should not be construed to indicate a contrary position. The Bureau did not receive comments on the proposed removal of current § 1024.22, and accordingly, is adopting the removal of current § 1024.22 as proposed.

Section 1024.23 E-Sign Applicability

Current § 1024.23 states that provisions of the Electronic Signatures in Global and National Commerce Act (E-Sign Act) permitting electronic disclosures to consumers if certain conditions are met apply to Regulation X. For reasons discussed above in the section-by-section analysis of § 1024.3, the Bureau has concluded that the E-Sign Act provisions are applicable to all provisions in Regulation X. Accordingly, the Bureau decided that the best place for this language was in § 1024.3. Having received no comments on the removal of § 1024.3 or the placing of the E-Sign Act provisions in § 1024.3, the Bureau, as discussed above, is removing current § 1024.23 from Regulation X.

Section 1024.30 Scope

The proposal would have defined the scope of subpart C as any mortgage loan, as that term is defined in § 1024.31. A ''mortgage loan,'' as proposed would be any federally related mortgage loan, as defined in § 1024.2, except for open-end loans (home equity plans) and except for loans exempt from RESPA and Regulation X pursuant to § 1024.5(b). The Bureau received a significant number of comments relating to the scope of the mortgage servicing rules.

Small servicer exemption. In the 2012 TILA Servicing Proposal, the Bureau proposed an exemption to the periodic statement requirement for small servicers, defined in the 2012 TILA Servicing Proposal as servicers that service 1,000 mortgage loans or fewer and only servicer mortgage loan that the servicer or an affiliate owns or originated. The Bureau requested comment in the 2012 TILA Servicing Proposal regarding that exemption and, in the 2012 RESPA Servicing Proposal, further requested comment regarding whether the Bureau should implement a small servicer exemption for any mortgage servicing requirements proposed in Regulation X.

The Bureau received three comment letters from consumer advocacy groups with respect to a small servicer exemption from certain requirements in Regulation X. One comment from three consumer advocacy groups indicated that small servicers should be exempt from the loss mitigation procedures requirements in § 1024.41 on the basis that these servicers already have an interest in mitigating any losses that might result from proceeding with foreclosure. Two other consumer advocacy groups, however, stated their view that if a servicer cannot afford to implement the required protections, the servicer should not be permitted to service mortgage loans. Further, a large bank joined in opposing an exemption for small servicers on the basis that such an exemption does not implement consumer protections for customers of small servicers and creates artificial distinctions that provide a competitive advantage to small servicers.

The Bureau also received a significant number of comments from small banks, credit unions, and non-bank servicers, as well as their trade associations, that requested that the Bureau consider an exemption for small servicers from the mortgage servicing rules, including the discretionary rulemakings. The Bureau also received a comment letter from Advocacy urging the implementation of a small servicer exemption for requirements in Regulation X.

Many of the small banks, credit unions, and non-bank servicers that provided comments stated that their business models necessarily facilitate communication with delinquent borrowers. Per the comments, such servicers have an incentive to work with borrowers to avoid losses because typically, for small servicers, either the mortgage loan is owned by the servicer (or an affiliate) or the servicer has a customer relationship with the borrower to consider. Community banks, credit unions, and Advocacy further stated that the servicing market should not be considered simplistically; small servicers have substantially different business practices than larger servicers, including with respect to considering borrowers for loss mitigation or managing force-placed insurance. Further, such servicers have not been shown to have engaged in the servicing failures that contributed to the financial crisis, including poor oversight of third-party providers, lost documents and other process failures relating to loss mitigation evaluations, or wrongful filing of foreclosure documents that contain false information or fail to comply with applicable law.

Comments from small banks, credit unions, non-bank servicers, and their trade associations, suggested various means for defining a small servicer. Most industry commenters indicated that the proposed 1,000 mortgage loan threshold was inadequate because it would capture only the smallest servicers in the market. One trade association commenter stated that a 1,000-mortgage-loan threshold would cover only single-employee servicing operations. Most commenters indicated that the small servicer exemption threshold should be raised to between 5,000 and 15,000 mortgage loans. One commenter indicated that a small servicer threshold should be based on a delinquency percentage or foreclosure filing threshold, while a large community bank servicer stated that a small servicer exemption should include all but the top five servicers by market share.

Small servicers indicated several components of the rulemaking that would have particularly problematic impacts on small servicers. For example, many small servicers and their trade associations raised concerns

regarding the appeal process set forth in § 1024.41(h). Small servicers stated that required independent reviews for the appeal process would be difficult to implement because the size of a small servicer necessarily constrains the number of knowledgeable servicing personnel that would be able to conduct the independent review. Per the commenters, the resulting review would be without value because the independent review would be conducted by employees less familiar with, or skilled in, evaluating borrowers for loss mitigation options. Small servicers also indicated they would be burdened by implementing new notice requirements, including those set forth in § 1024.39 and § 1024.41, which, commenters believed, would only serve to require communications that are already occurring, but would impose the cost of requirements to track communications and demonstrate compliance to appropriate regulators.

In addition to the comments, the Bureau reviewed the input gained through outreach with small servicers during the Small Business Review Panel process. As discussed throughout, in order to gain feedback on small servicer impacts, the Bureau participated in a Small Business Review Panel and conducted outreach with small entities that would be subject to the regulations. The Bureau solicited feedback from the small entities participating in the Small Business Review Panel on many elements of the loss mitigation process in conjunction with other elements of the servicing proposals, including impacts on loss mitigation processes of small servicers from proposed rules relating to error resolution, reasonable information management policies and procedures, early intervention for troubled or delinquent borrowers, and continuity of contact. In particular, the Bureau requested feedback from small servicers on the following: (1) A duty to suspend a foreclosure sale while a borrower is performing as agreed under a loss mitigation option or other alternative to foreclosure; (2) the ability to adopt policies and procedures to facilitate review of borrowers for loss mitigation options; (3) the ability to provide information regarding loss mitigation early in the foreclosure process to borrowers; and (4) the ability to provide borrowers with the opportunity to discuss evaluations for loss mitigation options with designated servicer contact personnel.[69]

The small entities generally informed the Small Business Review Panel that they engaged in individualized contact with borrowers early in the foreclosure process, that some servicers completed discussions of loss mitigation options with borrowers prior to a point in time when borrowers should receive significant foreclosure-related information, and that small servicers generally worked closely with foreclosure counsel such that foreclosure processes and loss mitigation could be easily conducted simultaneously without prejudice to the loss mitigation process. Further, the small entities explained that they were willing to communicate with borrowers about loss mitigation contemporaneously with the foreclosure process, and one small entity indicated that it would be willing to halt the foreclosure process, if appropriate, in order to consider a modification.[70]

The Bureau carefully considered the comments regarding requested exemptions for small servicers, including the comments received from Advocacy. In addition, the Bureau carefully considered the specific aspects of the rule that community banks, small credit unions, and other small servicers indicated would potentially impact those institutions most significantly. The analysis conducted by the Bureau is set forth below, as well as in the analyses required pursuant to section 1022 of the Dodd-Frank Act and the Regulatory Flexibility Act.

In general, the Bureau is persuaded based on its experience, outreach, and the submission of the comments that the problematic practices that have plagued the servicing industry, particularly in recent years, are to a large extent a function of a business model in which servicing is viewed as a discrete line of business and profit center, and in which servicers compete to secure business from owners or assignees of mortgage loans based upon price. As discussed in greater detail in part II, such a model leads to a high volume, low margin business, in which servicers are not incentivized to invest in operations necessary to handle large numbers of delinquent borrowers. The significant weight of evidence of servicer failures of which the Bureau is aware involved large servicers following such a business model.

In contrast, there is a segment of servicers who service a relatively small number of mortgage loans and do not purchase or hold mortgage servicing rights for mortgage loans they do not own or did not originate. Many community bank and small credit union servicers fit this model. For example, the Bureau estimates that 10,829 banks, thrifts, and credit unions service 5,000 or fewer loans. Of these, approximately 96 percent have assets of $1 billion or less, which is the traditional threshold for denoting a community bank. The Bureau is not aware of evidence indicating the performance of these types of institutions in servicing the mortgage loans they originate or own generally results in substantial consumer harm. To the contrary, data available to the Bureau indicates that such servicers achieve significantly reduced levels of borrowers rolling into 90 or more days of delinquency or having a mortgage loan charged-off when compared to the average for all banks. For example, in 2011, the 90+ delinquency rate for community banks was 0.27 percent compared with over 6 percent for all banks. Further, the net charge-off rate for community banks was 0.66 percent against 1.31 percent for all banks. Community bank performance with respect to levels of delinquencies and charge-offs has also remained relatively stable through the financial crisis. From 2007 through 2011, the 90+ delinquency rate fluctuated between 0.27 percent in 2007 to a high of only 0.31 percent in 2009. The equivalent metric for all banks showed the 90+ delinquency rate at 0.80 percent rising rapidly to a high of 6.29 percent in 2011.

The reasons for this performance may lay in the fact that small servicers have very different incentives than large servicers. Servicers that service 5,000 or fewer mortgage loans and only service mortgage loans that the servicer or an affiliate owns or originated generally must be conscientious of the impact of servicing operations on the borrower. Any such servicer has an interest in maintaining a relationship with borrower as a customer of the bank or thrift or member of the credit union to provide other banking services. Further, such servicers must be conscientious of reputational consequences within a community or member base. Further, to the extent a servicer or an affiliate owns a mortgage loan, the servicer bears risk from the borrower's potential delinquency and default on the mortgage loan obligation and does not have an incentive to engage in practices

that may put the performance of the mortgage loan obligation at risk.

All of these considerations, as well as the performance data discussed above, persuades the Bureau that the small servicers are generally achieving the goals of the discretionary rulemakings to protect delinquent borrowers. The Bureau recognizes, however, that these small servicers may be achieving these ends through procedures that differ from those mandated in § 1024.39 and § 1024.41, with respect to early intervention and loss mitigation procedures, and that while the practice of these small servicers are, in the main, achieving the objectives delineated in § 104.38 and § 1024.40, with respect to general servicing policies, procedures, and requirements and continuity of contact, these servicers may not have systems in place to document how they are achieving these results. Thus, the Bureau believes that subjecting the small servicers to these provisions would impose costs that they could find difficult to absorb.

In sum, the Bureau is not persuaded at this time that the consumer protection purposes of RESPA necessarily would be furthered by requiring small servicers to comply with the discretionary rulemakings.

Accordingly, a small servicer as defined pursuant to 12 CFR 1026.41(e)(4), that is, a servicer that services 5,000 mortgage loans or less and only services mortgage loans that the servicer or an affiliate owns or originated, is exempt from the requirements of § 1024.38 through 41, with two exceptions.[71] First, § 1024.41(f) prohibits servicers from making the first notice or filing required by applicable law for any judicial or non-judicial foreclosure process unless a borrower's mortgage loan obligation is greater than 120 days delinquent. Second, § 1024.41(g) prohibits a servicer from, among other things, proceeding with a foreclosure sale if the borrower is performing under an agreement on a loss mitigation option. The Bureau deems it highly unlikely, given the considerations discussed above, that a small servicer would initiate a foreclosure with respect to a borrower who is less than 120 days delinquent to conclude a foreclosure sale if a borrower was performing under a loss mitigation agreement. Nonetheless, the Bureau does not see any reason why these basic protections should not be extended to all borrowers or why subjecting small servicers to these prohibitions would create any burden for them. Accordingly, § 1024.41(j) extends these two rules to small servicers. The analysis pursuant to section 1022 of the Dodd-Frank Act, set forth in part VII below, and the final regulatory flexibility analysis, set forth in part VIII below, provide significant additional discussion regarding the assumptions used in determining an appropriate small servicer exemption threshold of 5,000 mortgage loans.

The Bureau received comments from a nonprofit lender/servicer indicating that the mortgage servicing rules would be costly and difficult to implement, in light of the commenter's nonprofit mission and volunteer workforce. The commenter indicated that the Bureau should carry over the small servicer exemption proposed with respect to the periodic statement requirement in Regulation Z to the Regulation X requirements and should also implement a narrow exemption for nonprofit servicers. Although the Bureau declines to exempt nonprofit servicers separately, the Bureau believes that such servicers will likely fall within the small servicer exemption established by the Bureau.[72] To the extent a nonprofit servicer services more than 5,000 mortgage loans or services mortgage loans that the servicer or an affiliate does not own or did not originate, then the Bureau believes any such servicer should be required to provide appropriate consumer protection by implementing the loss mitigation procedures, notwithstanding the non-profit status of the servicer.

Other exemptions. In addition to requests for a small servicer exemption, the Bureau received comments that it should implement exemptions for housing finance agencies, reverse mortgage transactions, and servicers that are qualified lenders as defined in regulations established by the Farm Credit Administration. Housing finance agencies and their associations commented that the mission orientation of these agencies weighs in favor of exempting such agencies from certain of the proposed mortgage servicing rules. A comment from one such agency with respect to the Homeowners' Emergency Mortgage Assistance Program is instructive. That program assists a borrower experiencing hardship by extending a loan, secured by a subordinate lien on a borrower's property, to bring a borrower's first-lien mortgage loan current and, for certain borrowers, to provide continuing assistance. Absent an exemption, the servicing of the subordinate-lien mortgage loan that secures such assistance would be subject to mortgage servicing rules relating to loss mitigation, notwithstanding that the loan itself is a form of loss mitigation. In addition, the Bureau received comments from housing finance agencies indicating that the costs of certain of the rulemakings may be burdensome for housing finance agencies.

The Bureau also received comments from a trade association for reverse mortgage lenders and servicers. The commenter stated that many of the rulemakings, including the discretionary rulemakings, are not appropriate for reverse mortgage transactions. For example, loss mitigation requirements in the proposed rule were based on days of delinquency, which is an imprecise and difficult concept with respect to a reverse mortgage transaction because of the structure of the transaction. Further, the vast majority of reverse mortgage transactions are subject to regulations implemented by FHA in connection with the Home Equity Conversion Mortgage Program.

The Bureau received comments from lenders subject to regulations established by the Farm Credit Administration with respect to loss mitigation. These entities requested exemptions for mortgage loans for which a servicer is required to comply with Farm Credit Administration requirements on loss mitigation because those requirements differ markedly from those proposed by the Bureau.

The Bureau agrees that additional exemptions are appropriate for certain of the rulemakings. As discussed in more detail below, the Bureau has determined not to implement these additional exemptions to those regulations that principally implement requirements set forth in the Dodd-Frank Act. These include the requirements in §§ 1024.35 (Error Resolution Procedures), 1024.36 (Information Requests), and 1024.37 (Force-Placed Insurance). With respect to error resolution procedures and information requests, those provisions build upon the existing Qualified Written Request procedures, which are currently applicable to the servicers discussed above. Providing an

[71] The 5,000-loan threshold reflects the purposes of the exemptions that the rule establishes for these servicers and the structure of the mortgage servicing industry. The Bureau's choice of 5,000 in loans serviced for purposes of Regulation X does not imply that a threshold of that type or of that magnitude would be an appropriate way to distinguish small firms for other purposes or in other industries.

[72] The nonprofit lenders/servicer did not object to the proposed 1,000-loan threshold; the Bureau infers that this nonprofit lender/servicer would qualify as a small servicer under that threshold, much less the 5,000-loan threshold that the Bureau has implemented pursuant to § 1024.30.

exemption to these requirements would have removed a currently existing consumer protection.

The Bureau is persuaded that imposing the requirements in the discretionary rulemakings on housing finance agencies does not further the goals of those requirements and imposes undue costs on housing finance agencies. Such agencies are engaged in programs that assist mortgage loan borrowers facing hardship under the auspices of state or local governments. The Bureau believes the mission of these agencies, as articulated by the agencies and their associations, clearly demonstrates that the interests of such agencies are aligned with those of borrowers, so that imposing the discretionary rulemakings on such agencies would not further the consumer protection purposes of RESPA. Accordingly, the Bureau exempts housing finance agencies from the requirements of §§ 1024.38 through 1024.41 as well as the principal restrictions of § 1024.17(k)(5). To effectuate this exemption, the Bureau simply uses the term ''small servicer,'' because Regulation Z, as amended by the 2013 TILA Servicing Rule, defines a housing finance agency as a small servicer without regard to the number of mortgage loans serviced by a housing finance agency.

The Bureau also is persuaded that the discretionary rulemakings are not appropriate for reverse mortgage transactions. For example, many of the timing requirements in § 1024.41 relate to the length of a borrower's delinquency, which is a concept that does not apply cleanly with respect to reverse mortgage transactions. Further, the vast majority of reverse mortgage transactions are subject to regulation by FHA pursuant to the Home Equity Conversion Mortgage program. These regulations provide many protections for borrowers that are appropriate for the specific circumstances of a reverse mortgage transaction. The Bureau continues to consider appropriate requirements for reverse mortgage transactions separately from the mortgage servicing rulemakings.

Similarly, the Bureau finds that ''qualified lenders'' subject to Farm Credit Administration regulation of their loss mitigation practices should be exempt from compliance with §§ 1024.38–41. The Bureau agrees with the commenters that the Farm Credit Administrations' regulations in this area offer consumer protections comparable to those in the mortgage servicing rules and subjecting such institutions to the new rules would subject such servicers to overlapping, and potentially inconsistent, regulatory requirements. Accordingly, the Bureau has determined to exempt a servicer with respect to any mortgage loan for which the servicer is a qualified lender as that term is defined in 12 CFR 617.7000 from the requirements of §§ 1024.38 through 41.

Finally, the Bureau has determined to revise the scope of certain sections. Section 1024.30(c) implements two limitations on the scope of subpart C. First, § 1024.33(a) is only applicable to mortgage loans that are secured by first liens. This limitation excludes from coverage subordinate-lien mortgage loans. Section 1024.33(a) is based on the existing § 1024.21, renumbered in accordance with the reorganization of Regulation X, and § 1024.21 is already limited to first-lien mortgage loans. When the TILA–RESPA Integrated Disclosure rulemaking is finalized, the Bureau anticipates that rule will alter the requirements for servicers to comply with § 1024.33(a). Accordingly, the Bureau does not believe it is beneficial to require servicers to begin implementing the requirements of § 1024.33(a) for subordinate-lien mortgage loans, only to have to adjust compliance with § 1024.33(a) upon finalization of the TILA–RESPA Integrated Disclosure rulemaking. Accordingly, the Bureau is not making a change to the scope of § 1024.33(a) and retains the limitation on the scope of that requirement to mortgage loans that are secured by a first lien.

The Bureau proposed to maintain the exclusion for open-end lines of credit (home-equity plans) covered by TILA and Regulation Z, including open-end lines of credit secured by a first lien, from the mortgage servicing requirements in subpart C of Regulation X. Open-end lines of credit, which may be federally related mortgage loans when secured by a first or subordinate lien on residential real property, have been historically excluded from regulations applicable to mortgage servicing under Regulation X. *See* current § 1024.21(a) (defining ''mortgage servicing loan''). Further, open-end lines of credit are already regulated under Regulation Z. Certain provisions of Regulation Z would substantially overlap with the servicer obligations that would be set forth in subpart C, including, for example, billing error resolution procedures. *See* 12 CFR 1026.13. The Bureau requested comment regarding whether to maintain an exemption for open-end lines of credit for the requirements in subpart C.

To the extent industry commenters responded to the Bureau's request, they supported the continued exclusion of open-end lines of credit (home-equity plans). Two consumer advocacy groups, however, jointly commented that open-end credit transactions secured by a borrower's principal residence should be fully covered by RESPA. The two commenters stated that consumer protections for open-end lines of credit (home equity plans) are less robust than consumer protections for closed-end credit, particularly in the area of disclosures, error resolution, information requests, and penalties for violation. They expressed concerns that the Bureau has failed to appreciate these differences and the potential for consumer harm when predatory lenders exploit these differences. Additionally, the commenters questioned the Bureau's authority to exempt open-end lines of credit (home-equity plans) when the statutory definition of the term ''federally related mortgage loan'' does not include such an exemption.

The Bureau believes it is necessary and appropriate at this time not to apply the requirements in subpart C to open-end credit (home equity lines). Open-end lines of credit secured by a first or subordinate lien on residential real property can constitute a federally related mortgage loans. As stated in the proposal, home equity lines of credit (HELOCs) tend to reflect better credit quality than subordinate-lien closed-end mortgage loans and share risk characteristics more similar to other open-end consumer financial products, such as credit cards, because of the access to additional unutilized credit provided by a HELOC.[73] The Bureau understands from discussions with servicers and industry representatives that the servicing of HELOCs tends to differ significantly from closed-end mortgage loans, including with respect to information systems used, lender remedies (including restricting access to the line of credit), and borrower behavior. Further, the Bureau understands that although a household may finance a property solely with an open-end line of credit, the proportion that do so is very small.[74]

In addition, the protections proposed in subpart C of Regulation X are not necessary for open-end lines of credit. As set forth above, separate error resolution and information request

[73] *See* Donghoon Lee *et al., A New Look at Second Liens,* 3, 19 (Feb. 2012), *available at http://ssrn.com/abstract=2014570* (chapter in Housing and the Financial Crisis, Edward Glaeser and Todd Sinai, eds.)

[74] *See, e.g.,* Julapa Jagtiani and William W. Lang, *Strategic Default on First and Second Lien Mortgages During The Financial Crisis,* at n.5 (Federal Reserve Bank of Philadelphia, Working Paper No. 11–3, Dec. 9, 2010), *available at http://papers.ssrn.com/sol3/papers.cfm?abstract_id=1724947.*

requirements exist under Regulation Z for open-end lines of credit. Further, the Bureau understands from servicers of open-end lines of credit that such servicers typically do not maintain escrow accounts for open-end lines of credit, require borrowers to maintain insurance for properties secured by open-end lines of credit, or force-place insurance for such borrowers. The Bureau believes that it would contravene the consumer protection purposes of RESPA for servicers to expend resources complying with overlapping or unnecessary requirements that would not benefit consumers.

Further, open-end lines of credit perform differently from closed-end mortgages with respect to loss mitigation. A borrower is in control of an open-end line of credit and can draw from that line as necessary to meet financial obligations. Many borrowers who have become delinquent on a first lien closed-end mortgage loan keep current on payments for subordinate lien open-end lines of credit in order to maintain their access to the line of credit.[75] Conversely, when borrowers experience difficulty meeting their obligations, lenders have the ability to cut off access to unutilized draws from the open-end line of credit. These features of open-end lines of credit weigh against imposing the requirements set forth for early intervention with delinquent borrowers, continuity of contact, and loss mitigation procedures on servicers for open-end lines of credit. Further, open-end lines of credit tend to differ from closed-end mortgage loans with respect to servicing information systems utilized.

For the reasons set forth above, the Bureau believes it is necessary and appropriate to achieve the purposes of RESPA to maintain the current exemption, which HUD originally adopted as 24 CFR 3500.21 nearly 20 years ago. Accordingly, this exemption is authorized under section 19(a) of RESPA.

In addition, § 1024.30(c)(2) limits the scope of §§ 1024.39 through 41 to mortgage loans that are secured by a borrower's principal residence. The purpose of the early intervention requirement, the continuity of contact requirement, and the loss mitigation procedures is to help borrowers stay in their principal residences, where possible, while mitigating the losses of loan owners and assignees, by ensuring that servicers use clear standards of review for loss mitigation options. The Bureau does not believe that this purpose is furthered by extending those protections to mortgage loans for investment, vacation, or other properties that are not principal residences. For example, in such circumstances, the protections set forth in §§ 1024.39–41 may only serve to assist a non-occupying borrower to maintain cash flow from rental revenue during a period of delinquency. Further, for certain properties that are not principal residences, there is a significant risk that a property may not be maintained and may present hazards and blight to local communities. Thus, for investment or vacation properties, the lack of borrower occupancy, and the potential rental income obtained by the borrower, vitiates the justifications for ensuring that a foreclosure process is not undertaken unless the borrower has the opportunity for review for a loss mitigation option. Finally, this limitation is consistent with the California Homeowner Bill of Rights and the National Mortgage Settlement, and its incorporation here furthers the goal of creating uniform standards.[76] Accordingly, the Bureau has limited the scope of §§ 1024.39 through 41 to mortgage loans that are secured by properties that are borrowers' principal residences.

Section 1024.31 Definitions

For purposes of subpart C, proposed § 1024.31 would have provided definitions of the following terms: ''Consumer reporting agency,'' ''Day,'' ''Hazard insurance,'' ''Loss mitigation application,'' ''Loss mitigation options,'' ''Master servicer,'' ''Mortgage loan,'' ''Qualified written request,'' ''Reverse mortgage transaction,'' ''Subservicer,'' ''Service provider,'' ''Transferee servicer,'' and ''Transferor servicer.'' For the reasons set forth below, and except as otherwise discussed, § 1024.31 is adopted as proposed.

''Consumer reporting agency''; ''Day''; ''Reverse mortgage transaction''; ''Master servicer''; ''Transferee servicer''; ''Transferor servicer.'' The Bureau proposed to move the definitions of ''Master servicer,'' ''Transferee servicer,'' and ''Transferor servicer'' from current § 1024.21(a) to proposed § 1024.31 without change. The Bureau also proposed to add new defined terms for ''Reverse mortgage transaction'' and ''Consumer reporting agency,'' in proposed § 1024.31 by adopting the same definition for those terms as is already provided in current Regulation Z and section 503 of the Fair Credit Reporting Act, 15 U.S.C. 1681a, respectively. The Bureau proposed to add a new defined term ''Day'' in proposed § 1024.31. The Bureau proposed to define ''Day'' to mean a calendar day because the Bureau believed that Congress intended that the term ''day'' by itself includes legal public holidays, Saturdays, and Sundays for purposes of RESPA. No comments were received on these proposed defined terms. The final rule adopts these terms as proposed.

''Hazard insurance.'' As discussed in the section-by-section analyses concerning §§ 1024.17(k)(5) and 1204.37, section 1463(a) of the Dodd-Frank Act amended section 6 of RESPA to establish new servicer duties with respect to the purchase of force-placed insurance on a property securing a federally related mortgage. The statute generally defines ''force-placed insurance'' as hazard insurance coverage obtained by a servicer of a federally related mortgage when the borrower has failed to maintain or renew hazard insurance on such property as required of the borrower under the terms of the mortgage.'' *See* section 6(k)(2). Thus, the statutory definition of ''force-placed insurance'' indicates that Congress intended the term ''force-placed insurance'' to mean a type of ''hazard insurance.'' However, neither the statute nor current Regulation X defines ''hazard insurance.'' The Bureau believed that it was necessary to define ''hazard insurance'' in order to implement the statute.

The Bureau proposed to add new defined term ''Hazard insurance'' in proposed § 1024.31 to mean insurance on the property securing a mortgage loan that protects the property against loss caused by fire, wind, flood, earthquake, theft, falling objects, freezing, and other similar hazards for which the owner or assignee of such loan requires insurance. The Bureau modeled the definition of ''hazard insurance'' on the definition of ''property insurance'' in typical mortgage loan contracts, in light of the fact that the statute generally prohibits servicers from obtaining force-placed insurance ''unless there is a reasonable basis to believe the borrower has failed to comply with the loan contract's requirement to maintain property

[75] *See, e.g.,* Julapa Jagtiani and William W. Lang, *Strategic Default on First and Second Lien Mortgages During The Financial Crisis,* at n.11 (Federal Reserve Bank of Philadelphia, Working Paper No. 11–3, Dec. 9, 2010).

[76] *See* Cal. Civ. Code § 2923.6; *see also* Attorneys Gen. *et al., National Mortgage Settlement: Consent Agreement* A–1 (2012), *available at http://www.nationalmortgagesettlement.com* stating ''[t]he provisions outlined below are intended to apply to loans secured by owner-occupied properties that serve as the primary residence of the borrower unless otherwise noted herein'').

insurance.'' *See* section 6(k)(1)(A). The Bureau thus interpreted the statute to mean that ''force-placed hazard insurance'' refers to ''property insurance'' that the borrower has failed to maintain as required by the borrower's mortgage loan contract.

The Bureau sought comment on the definition in general and in particular on the proposed inclusion of insurance to protect against flood loss. Although including flood insurance is consistent with the way typical mortgage loan contracts define ''property insurance,'' the Bureau did not believe that the Bureau's force-placed insurance regulations should apply to servicers when they are required by the Flood Disaster Protection Act of 1973 (FDPA) to purchase hazard insurance to protect against flood loss. The FDPA provides an extensive set of restrictions on flood insurance provision, and the Bureau was concerned that overlapping regulatory restrictions would be unduly burdensome and produce little consumer benefit. The Bureau thus proposed to include flood insurance as part of the general definition of ''Hazard insurance,'' but to exclude flood insurance that is required under the FDPA from the definition of ''force-placed insurance'' in proposed § 1024.37(a)(2)(i).

The Bureau did not receive comments from consumer groups or industry commenters on the proposed defined term ''Hazard insurance'' other than with respect to the treatment of flood insurance. On that topic, most industry commenters believed that simply excluding flood insurance obtained by a servicer as required by the FDPA from the definition of the term ''force-placed insurance'' in proposed § 1024.37(a)(2)(i) was workable and adequately mitigated the risk of a servicer having to comply with both regulations under the FDPA and the Bureau's force-placed insurance regulations. But one large bank servicer and one large force-placed insurance provider urged the Bureau to exclude flood insurance from the defined term ''Hazard insurance'' in § 1024.31 instead.

The large bank servicer expressed concern that the proposed definitions of ''hazard insurance'' and ''force-placed insurance'' would effectively require a servicer to strictly monitor any potential change in a mortgage's property's flood zone designation because whether the FDPA requires a servicer to obtain hazard insurance to protect against flood loss depends, among other things, on whether a property is located in an area designated as a Special Flood Hazard Area (SFHA). The commenter thus worried that the force-placed insurance requirements of § 1024.37 would become applicable instantaneously after a change in SFHA designations if that change meant that flood insurance was no longer required under the FDPA for a particular property. The Bureau, however, does not interpret § 1024.37 to apply in this way. Compliance with § 1024.37 would be required if the servicer decides to renew or replace a flood insurance policy that had been previously been required under the FDPA with a new policy after the property's SFHA designation had changed. As discussed above, the Bureau proposed to exclude hazard insurance required by the FDPA from the definition of ''force-placed insurance'' because the Bureau believes that the FDPA and other related Federal laws adequately regulated this activity. However, if a servicer chooses to renew or replace hazard insurance to protect against flood loss even though the insurance the renewal or replacement is no longer required by the FDPA, then the FDPA would not apply. The Bureau's force-placed insurance regulations are intended to fill precisely this gap to ensure that consumers have basic procedural and substantive protections in the absence of FDPA coverage. Thus, a servicer would have to check a property's flood zone designation when a servicer is about to renew or replace hazard insurance to protect against flood loss that the servicer originally obtained pursuant to the FDPA to determine whether the status has changed such that § 1024.37 would apply going forward. The Bureau believes that this presents minimal if any burden on servicers and is justified to avoid imposing unnecessary costs on borrowers.

The large force-placed insurance provider urged the same result based on statutory interpretation grounds, asserting that Congress had not intended to include flood insurance as a type of hazard insurance that would potentially be subject to the force-placed insurance requirements because section 1461 of the Dodd-Frank Act, which governs the establishment of escrow accounts for certain higher-priced mortgage loans, contains separate definitions for ''hazard insurance'' and ''flood insurance.'' The commenter acknowledged that section 1461 is distinct from section 1463 and amends different underlying statutes, TILA and RESPA respectively. Nonetheless, it asserted that both address insurance for which premiums could be paid through the establishment of escrow accounts and therefore should be interpreted in tandem.

Again, the Bureau declines to make this change. The Bureau does not believe that Congress intended the statutory definition of ''flood insurance'' and ''hazard insurance'' in section 1461 to control the interpretation of ''hazard insurance'' for purposes of section 1463(a). Indeed, section 1461 expressly limits its scope by stating that ''For purposes of this section, the following definitions [of ''flood insurance'' and ''hazard insurance''] shall apply.'' In light of this language, the Bureau does not believe that section 1461 controls. Section 1463(a) itself demonstrates that Congress expected the force-placed insurance provisions to apply to flood insurance other than that required by the FDPA. Section 6(*l*)(4) of RESPA states that nothing in the force-placed insurance provisions shall be construed as prohibiting a servicer from providing simultaneous or concurrent notice of a lack of flood insurance pursuant to the FDPA. This provision would have little impact if flood insurance could *never* be considered force-placed insurance within the meaning of section 1463. Thus, the Bureau believes its interpretation of the statutory terms to apply the force-place insurance requirements to flood insurance that is not required by the FDPA and thus not subject to that statute's extensive regulation is consistent with the statutory language, congressional intent, and consumers' interests. Accordingly, the Bureau adopts the proposed defined term ''Hazard insurance'' as proposed.

''Loss mitigation application.'' Proposed § 1024.31 would have defined a loss mitigation application as a submission from a borrower requesting evaluation for a loss mitigation option in accordance with procedures established by the servicer for the submission of such requests. As discussed below with respect to § 1024.41, the Bureau received comments from large bank servicers regarding the application of the loss mitigation requirements on pre-qualification and informal oral communications with borrowers.

Based on the consideration of those comments, the Bureau has determined to revise the definition of a loss mitigation application. The Bureau believes that a loss mitigation application differentiates a communication or inquiry from a borrower regarding loss mitigation options from a borrower's request for consideration for a loss mitigation option. When a borrower, orally or writing, expresses an interest in a loss mitigation option and provides any

information that would be evaluated by a servicer, that communication should be considered a loss mitigation application. A servicer must then determine whether the loss mitigation application is complete or incomplete pursuant to the requirements of § 1024.41(b). This definition of a loss mitigation application is similar to framework established in Regulation B with respect to an application for credit.

Accordingly, § 1024.31 states that a loss mitigation application means an oral or written request for a loss mitigation option that is accompanied by any information required by a servicer for evaluation for a loss mitigation option.

''Loss mitigation option.'' Pursuant to the Bureau's authorities under RESPA sections 6(k)(1)(E), 6(j)(3), and 19(a), the Bureau proposed rules on error resolution (proposed § 1024.35), information management (proposed § 1024.38), early intervention (proposed § 1024.39), continuity of contact (proposed § 1024.40), and loss mitigation (proposed § 1024.41) that would have set forth servicer duties with respect to ''Loss mitigation options.''

The Bureau proposed to define ''Loss mitigation options'' at new § 1024.31 as ''alternatives available from the servicer to the borrower to avoid foreclosure.'' The Bureau also proposed to clarify through comment 31 (Loss mitigation options)-1 that loss mitigation options include temporary and long-term relief, and options that allow borrowers to remain in or leave their homes, such as, without limitation, refinancing, trial or permanent modification, repayment of the amount owed over an extended period of time, forbearance of future payments, short-sale, deed-in-lieu of foreclosure, and loss mitigation programs sponsored by a State or the Federal Government. The Bureau also proposed to clarify through comment 31 (Loss mitigation options)-2 that loss mitigation options available from the servicer include options offered by the owner or assignee of the loan that are made available through the servicer.

Several industry commenters addressed the Bureau's proposed definition of ''Loss mitigation options.'' One industry commenter recommended that the term ''Loss mitigation options'' should be defined as alternatives available ''from the investor through the servicer to the borrower'' to avoid foreclosure, in light of the general industry practice that loss mitigation options are generally authorized by investors rather than servicers. While one industry trade group supported the proposed definition, other commenters were concerned that the breadth of the definition could conflict with servicers' delinquency management programs because the definition would subject short-term cures to the same procedural requirements as more permanent options. Similarly, industry commenters were concerned that the proposed definition would be inconsistent with requirements under existing loss mitigation programs, such as Farm Credit Administration rules and portions of the National Mortgage Settlement.

In light of comments and upon further consideration, the Bureau is adopting a definition of the term ''Loss mitigation option'' substantially as proposed, but that incorporates the substance of proposed comment 31 (Loss mitigation options)-2 into the regulatory text. Accordingly, the final rule defines the term ''Loss mitigation option'' as an alternative to foreclosure offered by the owner or assignee of a mortgage loan that is made available through the servicer to the borrower.

The Bureau proposed to define ''Loss mitigation options'' as alternatives available ''from the servicer'' to reflect the practical, day-to-day relationship between borrowers and servicers, in which servicers pursue loss mitigation activities with respect to delinquent borrowers on behalf of the owners or assignees of the mortgage loans. The Bureau had proposed to add comment 31 (Loss mitigation options)-2 to clarify that the proposed definition should be read to include options offered by the owner and assignee and made available through the servicer in light of the actual legal relationship between servicers and owners or assignees, in which the owner or assignee authorizes the offering of loss mitigation options. Upon further consideration, the Bureau believes that the text of the definition should reflect the underlying legal relationship between servicers and owners or assignees to avoid confusion over whether servicers may be able to authorize loss mitigation options independent of the owner or assignee of the mortgage loan. Accordingly, the Bureau is not adopting comment 31 (Loss mitigation options)-2 as proposed, but instead is amending the proposed definition to incorporate the substance of proposed comment 31 (Loss mitigation option)-2.

The definition of the term ''Loss mitigation option'' is broad to account for the wide variety of options that may be available to a borrower, the availability of which may vary depending on the underlying loan documents, any servicer obligations to the lender or assignee of the loan, the borrower's particular circumstances, and the flexibility the servicer has in arranging alternatives with the borrower. Accordingly, the Bureau is adopting proposed comment 31 (Loss mitigation option)-1 substantially as proposed to set forth examples of loss mitigation options ''without limitation.'' The Bureau has revised proposed comment 31 (Loss mitigation option)-1 to clarify that loss mitigation options include programs sponsored by ''a locality'' as well as a State or the Federal government and other non-substantive revisions describing options that allow borrowers ''who are behind on their mortgage payments to remain in their homes or to leave their homes without a foreclosure.''

While the Bureau has developed a broad definition of loss mitigation options in order to accommodate the variety of loss mitigation programs, the Bureau does not intend for the provisions of Regulation X that use the term ''Loss mitigation option'' to require servicers to offer options that are inconsistent with any investor or guarantor requirements. Thus, under the Bureau's definition, an alternative that is not made available by the owner or assignee of the mortgage loan would not be a loss mitigation option for purposes of the final rule. The Bureau discusses the final rules that use the term ''Loss mitigation option'' in the applicable section-by-section analysis below.

The final rule includes new language in comment 31 (Loss mitigation option) -2, which explains that a loss mitigation option available through the servicer refers to an option for which a borrower may apply, even if the borrower ultimately does not qualify for such option. The Bureau has included this comment to clarify that the regulatory text's reference to options ''available'' to borrowers is not intended to restrict the definition to options for which a borrower ultimately qualifies, but instead refers to options for which a borrower may apply.

''*Mortgage loan.''* As discussed in detail in the section-by-section analysis of § 1024.30, the Bureau proposed to add a new defined term ''Mortgage loan'' in proposed § 1024.31 to mean any federally related mortgage loan, as that term is defined in § 1024.2, subject to the exemptions in § 1024.5(b), but does not include open-end lines of credit (home equity plans). For the reasons discussed in the section-by-section analysis of § 1024.30, the Bureau is adopting the proposed definition to the defined term ''Mortgage loan'' as proposed.

''*Qualified written request.''* The Bureau proposed to adopt the defined

term ''Qualified written request'' included in current § 1024.21(a) in proposed § 1024.31 without change, except to add related commentary, proposed 31 (qualified written request) -1, that would have explained that: (1) A qualified written request is a written notice a borrower provides to request a servicer either correct an error relating to the servicing of a loan or to request information relating to the servicing of the loan; and (2) a qualified written request is not required to include both types of requests. For example, a qualified written request may request information relating to the servicing of a mortgage loan but not assert that an error relating to the servicing of a loan has occurred.

One commenter suggested that the Bureau should clarify that the policies, procedures, and penalties related to a qualified written request are the same as those related to error resolution and information requests under §§ 1024.35 and 1024.36. The Bureau agrees that it would be helpful to clarify that the error resolution and information request requirements in §§ 1024.35 and 1024.36 apply as set forth in those sections irrespective of whether the servicer receives a qualified written request, and accordingly, is adopting new comment 31 (qualified written request)-2 for that purpose. However, the Bureau does not believe it is appropriate to discuss a servicer's penalties for violation of the Bureau's regulations in either the regulation or the commentary.

In addition, the Bureau has made slight modifications to the proposed definition of ''qualified written request'' so it more closely tracks the definition included in section 6(e)(1) of RESPA. The final rule defines ''qualified written request'' to mean a written correspondence from the borrower to the servicer that includes, or otherwise enables the servicer to identify, the name and account of the borrower, and either: (1) States the reasons the borrower believes the account is in error; or (2) provides sufficient detail to the servicer regarding information relating to the servicing of the mortgage loan sought by the borrower.

''Service provider.'' The Bureau proposed to add new defined term ''Service provider'' in proposed § 1024.31 to mean any party retained by a servicer that interacts with a borrower or provides a service to the servicer for which a borrower may incur a fee. The Bureau proposed related commentary, comment 31 (service provider)-1, that would have clarified that service providers may include attorneys retained to represent a servicer or an owner or assignee of a mortgage loan in a foreclosure proceeding, as well as other professionals retained to provide appraisals or inspections of properties. Two industry groups representing appraisal professionals submitted joint comments that objected to the inclusion of appraisal professionals in the Bureau's proposed comment 31 (service provider)-1. The commenters sought clarification from the Bureau about the circumstances under which appraisers are ''service providers'' and what their obligations would be. The Bureau believes that comment 31 (service provider)-1 is clear in describing the circumstances under which appraisal professionals are ''service providers'' and thus feels no further explanation is required. While acknowledging that the Bureau's mortgage servicing rules do not directly regulate real estate appraisal services, the commenters claimed that individual appraisers and small appraisal firms would experience costly and unnecessary hardship if they were considered ''service providers.'' The Bureau disagrees. The definition of the term ''service provider'' in § 1024.31, by its terms, applies only for purposes of subpart C, and the term ''service provider'' appears only in § 1024.38 of subpart C. Section 1024.38 requires servicers maintain policies and procedures reasonably designed to ensure that they can exercise reasonable oversight of their service providers. The Bureau does not believe that requiring servicers to exercise reasonable oversight of their service providers will lead to costly and unnecessary hardship on individual appraisers and small appraisal firms.

''Subservicer.'' The Bureau proposed to adopt the defined term ''Subservicer'' included in current § 1024.21(a) in proposed § 1024.31 without change. The proposed defined term ''Subservicer'' provides that a ''subservicer'' is any servicer who does not own the right to perform servicing, but who performs servicing on behalf of the master servicer.

One commenter suggested that the Bureau should replace the reference to ''master servicer'' in the definition of ''subservicer'' with ''servicer'' to accommodate circumstances where there are multiple levels of subservicing. The example the commenter provided is one where there is one master servicer, but also a primary servicer and multiple subservicers. It appears that the commenter's concern is that people might be confused by thinking ''primary servicers'' would not be considered ''subservicers'' for purposes of subpart C of Regulation X. Based on the example provided by the commenter, the Bureau understands that a primary servicer is performing servicing on behalf of the master servicer, who owns the right to perform servicing. Because the primary servicer is not the owner of the right to perform servicing, it would be a ''subservicer'' pursuant to the proposed definition to the defined term ''Subservicer.'' Although industry practice may differentiate between levels of subservicing by referring to a servicer that directly performs servicing on behalf of a master servicer as the ''primary servicer,'' and servicers performing on behalf of the ''primary servicer'' as ''subservicers,'' for purposes of subpart C, any servicer that does not own the servicing right but performs servicing on behalf of a servicer that owns the servicing right is a subservicer. Accordingly, the Bureau believes the proposed definition to the defined term ''Subservicer'' adequately captures situations where there are multiple levels of subservicing and the defined term ''Subservicer'' is adopted as proposed.

Section 1024.32 General Disclosure Requirements

The Bureau set forth requirements applicable to disclosures required by subpart C in proposed § 1024.32. Specifically, proposed § 1024.32(a)(1) would have required that disclosures provided by servicers be clear and conspicuous, in writing, and in a form the consumer may keep. This standard is consistent with disclosure standards applicable in other regulations issued by the Bureau, including, for example, Regulation Z. *See, e.g.,* 12 CFR 1026.17(a)(1). Proposed § 1024.32(a)(2) would have permitted disclosures to be provided in languages other than English, so long as disclosures are made available in English upon a borrower's request. Further, proposed § 1024.32(b) would have permitted disclosures required under subpart C to be combined with disclosures required by applicable laws, including State laws, as well as disclosures required pursuant to the terms of an agreement between the servicer and a Federal or State regulatory agency.

The Bureau is adopting the final rule as proposed, with minor changes to § 1024.32(a)(1) to replace the term ''consumer,'' with ''recipient'' as applicable and to improve the clarity of § 1024.32. Two commenters representing industry trade groups suggested that the clarity of § 1024.32(a) could be enhanced if the final rule could remove the term ''consumer'' where permissible because the term ''consumer'' is more appropriate in the context of disclosures provided prior to

the consummation of the mortgage loan transaction.

Section 1024.33 Mortgage Servicing Transfers

RESPA section 6(a) through (d) sets forth disclosure requirements for servicing transfers that are currently implemented in § 1024.21(b) through (d) of Regulation X. 12 U.S.C. 2605(a) through (d). As part of the Bureau's proposed reorganization of Regulation X, which would have created a new subpart C to contain the Bureau's mortgage servicing rules, the Bureau proposed to move the disclosure provisions in § 1024.21(b) through (d) to new § 1024.33 and new Regulation X official interpretations. The Bureau also proposed to move the existing State law preemption provision in § 1024.21(h) to § 1024.33(d). In addition to these conforming amendments, the Bureau proposed to add certain new provisions to § 1024.33 and official commentary to § 1024.33, as discussed in more detail below.[77]

Section 1024.21(b) through (d) currently requires that borrowers receive two notices related to mortgage servicing: (1) A servicing disclosure statement provided at application notifying the applicant whether the servicing of the loan may be transferred at any time (§ 1024.21(b) and (c)); and (2) if servicing is transferred, a notice of transfer provided by the transferor and transferee servicer around the time of the transfer (§ 1024.21(d)).

33(a) Servicing Disclosure Statement

RESPA section 6(a) generally sets forth requirements for persons making federally related mortgage loans to disclose to loan applicants, at the time of application, whether servicing of the loan may be assigned, sold, or transferred to any other person at any time while the loan is outstanding. 12 U.S.C. 2605(a). Current § 1024.21(b) and (c) implements requirements in RESPA section 6(a) related to the servicing disclosure statement. The Bureau's proposed § 1024.33(a) would have made certain changes to the requirements currently set forth in § 1024.21(b) and (c) pertaining to the servicing disclosure statement, including changes to the scope of applicability and delivery of the servicing disclosure statement, and certain other non-substantive technical revisions.

The Bureau proposed to limit the scope of the servicing disclosure statement to closed-end reverse mortgage transactions to conform § 1024.33(a) to the comprehensive amendments to consumer mortgage disclosures proposed by the Bureau in the 2012 TILA–RESPA Proposal.[78] Because the Bureau intended to incorporate the servicing disclosure statement requirements of RESPA section 6(a) into the consolidated disclosure forms for the TILA–RESPA Integrated Disclosure rulemaking, the Bureau had proposed to limit the scope of the servicing disclosure statement provisions in new § 1024.33 to closed-end reverse mortgage transactions because those transactions would not be covered by the 2012 TILA–RESPA Proposal.

After additional consideration, because the Bureau will not be finalizing the 2012 TILA–RESPA Proposal until after this final rule, the Bureau has decided not to finalize the language in proposed § 1024.33(a) that would have limited the scope of the provision to closed-end reverse mortgage transactions. Instead, the Bureau is finalizing § 1024.33(a) by conforming the scope to ''mortgage loans'' other than subordinate-lien mortgage loans, as discussed in the section-by-section analysis of § 1024.30(c) above. The Bureau is excluding subordinate liens in order to maintain the current coverage of the servicing disclosure statement requirement in Regulation X.[79] HUD initially implemented this exemption in reliance on its authority under section 19(a) of RESPA; [80] the Bureau relies on the same authority to maintain the current exemption. Accordingly, in the final rule, the Bureau has added language to § 1024.33(a) so that applicants for ''first-lien mortgage loans'' must receive the servicing disclosure statement, as indicated at § 1024.30(c)(1). Thus, applicants for both reverse and forward mortgage loans must receive the servicing disclosure statement. The Bureau expects to harmonize the scope of § 1024.33(a) in the final rule implementing the TILA–RESPA integrated disclosures and to provide for consolidated disclosure forms at that time.

The Bureau also proposed to add comment 33(a)(1)–2 to § 1024.33(a) to clarify that the servicing disclosure statement need only be provided to the ''primary applicant.'' Current § 1024.21(b) requires that the servicing disclosure statement be provided to mortgage servicing loan applicants, and current § 1024.21(c) provides that if co-applicants indicate the same address on their application, one copy delivered to that address is sufficient, but that if different addresses are shown by co-applicants on the application, a copy must be delivered to each of the co-applicants. The Bureau proposed to implement through commentary to § 1024.33(a) a clarification relating to providing a servicing disclosure statement for co-applicants—that when an application involves more than one applicant, notification need only be given to one applicant but must be given to the primary applicant when one is readily apparent. A credit union trade association supported this proposed change.

In its proposal, the Bureau explained that the modified requirement would reduce burdens on servicers without significantly reducing consumer protections, given that the Bureau proposed to apply the regulation only to closed-end reverse mortgage transactions. The Bureau explained that such transactions are typically only conducted with regard to a borrower's principal residence and do not involve ongoing consumer payments for the life of the loan, so that contact with servicers is generally quite minimal. The Bureau also observed that amending the current requirement would be consistent with disclosure requirements applicable to other Bureau regulations, such as the adverse action notice required under Regulation B (Equal Credit Opportunity Act).[81]

Because the Bureau is not limiting § 1024.33(a) to closed-end reverse mortgage transactions in the final rule, as originally proposed, the Bureau is not adopting proposed comment 33(a)(1)–2 as proposed and is not amending the existing requirement in § 1024.21(c), under which the servicing disclosure statement must be provided to co-applicants if different addresses are shown by co-applicants. Instead, comment 33(a)–2 contains the same guidance that originally appeared in § 1024.21(c): That if co-applicants

[77] Further, the Bureau proposed to move and amend provisions in § 1024.21(e) (pertaining to servicer responses to borrower inquiries) to new § 1024.35 (error resolution) and § 1024.36 (information requests). The Bureau's proposal also would have removed current § 1024.21(f) (damages), which had restated the damages and costs provision in RESPA section 6(f). The Bureau is removing this provision from Regulation X, which is no longer accurate following amendments to RESPA section 6(f) by section 1463(b) of the Dodd-Frank Act. The Bureau believes the damages and costs provision is more appropriate as a statutory provision.

[78] The Bureau issued the 2012 TILA–RESPA Proposal on July 9, 2012.

[79] The Bureau notes that it proposed in the 2012 TILA–RESPA Proposal to implement the servicing disclosure requirement in RESPA section 6(a) through a disclosure appearing on the Bureau's proposed Loan Estimate for both first and subordinate liens *See* 2012 TILA–RESPA Proposal, 77 FR 51116, 51230 (2012) and proposed § 1026.19(e)(1)(i).

[80] See 59 FR 65442, 65443 (1994).

[81] *See* 12 CFR 1002.9(f).

indicate the same address on their application, one copy of the servicing disclosure statement delivered to that address is sufficient; and that if different addresses are shown by co-applicants on the application, a copy must be delivered to each of the co-applicants.

Finally, in addition to proposing changes about the scope of the rule, the Bureau proposed in § 1024.33(a) to make certain non-substantive changes to language from current § 1024.21(b) and (c) to clarify the circumstances under which the servicing disclosure statement must be provided and the proper use of appendix MS–1, which provides a model form for the servicing disclosure statement. For example, § 1024.21(b) currently provides that the servicing disclosure statement must be provided ''[a]t the time an application for a mortgage servicing loan is submitted, or within three days after submission of the application.'' The Bureau's proposed § 1024.33(a) stated that the servicing disclosure statement must be provided ''[w]ithin three days (excluding legal public holidays, Saturdays, and Sundays) after a person applies [.]'' The Bureau also proposed to incorporate some of the language currently in § 1024.21(b) and (c) into new Regulation X official commentary. For example, the Bureau proposed to move § 1024.21(b)(1), which explained use of appendix MS–2, to new comment 33(a)–1; the Bureau also included generally applicable instructions for use of model forms and clauses in commentary to appendix MS. The Bureau did not receive comment on this aspect of the proposal and adopts these revisions substantially as proposed, other than with respect to the scope of the rule, discussed above.

In the final rule, the Bureau has replaced the phrase ''table funding mortgage broker'' with the phrase ''mortgage broker who anticipates using table funding,'' which the Bureau believes is clearer and better conforms to the term that currently appears in § 1024.21(b)(1). In addition, the Bureau has consolidated proposed comments 33(a)(2)–1, –2, and –3 into comment 33(a)–3, which contains disclosure preparation instructions currently in § 1024.21(b)(2).[82] Comment 33(a)–3 explains that, if the lender, mortgage broker who anticipates using table funding, or dealer in a first lien dealer loan knows at the time of the disclosure whether it will service the mortgage loan for which the applicant has applied, the disclosure should, as applicable, state that such entity will service such loan and does not intend to sell, transfer, or assign the servicing of the loan, or that such entity intends to assign, sell, or transfer servicing of such mortgage loan before the first payment is due. The comment also provides that, in all other instances, a disclosure that states that the servicing of the loan may be assigned, sold, or transferred while the loan is outstanding complies with § 1024.33(a).

The final rule also makes a technical revision to the last sentence of proposed § 1024.33(a). The final rule provides that the servicing disclosure statement is not required to be delivered if ''a person who applies for a first-lien mortgage loan is denied credit'' within the three-day period.

33(b) Notice of Transfer of Loan Servicing

RESPA section 6(b) and (c) sets forth the general requirement for the transferor and transferee servicers of a federally related mortgage loan to notify the borrower in writing of any assignment, sale, or transfer of servicing. 12 U.S.C. 2605(b) and (c). These statutory requirements are implemented through current § 1024.21(d). The Bureau had proposed to move and adopt substantially all of these requirements to new § 1024.33(b), with a few exceptions, as explained in the section-by-section analysis below. The Bureau's proposal also would have made certain non-substantive revisions to current § 1024.21(d) to clarify existing servicing transfer requirements.[83] New § 1024.33(b)(1) sets forth the general requirement to provide the servicing transfer notice. New § 1024.33(b)(2) sets forth the transfers for which a servicing transfer is not required. New § 1024.33(b)(3) sets forth the timing requirements of the notice. New § 1024.33(b)(4) sets forth the content requirements for the servicing transfer notice. The Bureau is generally adopting these provisions as proposed, except as noted in the section-by-section analysis below.

33(b)(1) Requirements for Notice and 33(b)(2) Certain Transfers Excluded

RESPA section 6(b)(1) and (c)(1) sets forth the general requirements for the transferor and transferee servicers to provide a notice of servicing transfer for any federally related mortgage loan that is assigned, sold, or transferred. 12 U.S.C. 2605(b)(1) and (c)(1). Current § 1024.21(d)(1)(i) implements the general requirement for the transferor and transferee servicers to provide the notice of transfer, which the Bureau proposed to move to new § 1024.33(b)(1). Unlike the servicing disclosure statement that the Bureau proposed in § 1024.33(a) to apply only to closed-end reverse mortgage transactions,[84] the Bureau proposed that the servicing transfer notice be provided with respect to the transfer of a ''mortgage loan,'' including forward and reverse mortgage loans.

The Bureau proposed to include in § 1024.33(b)(1) a statement that appendix MS–2 contains a model form for the notice. The reference to appendix MS–2 was previously located in § 1024.21(d)(4). Section 1024.21(d)(4) also contained language indicating that servicers could make minor modifications to the sample language but that the substance of the sample language could not be omitted or substantially altered. Similar language now appears in a general comment to appendix MS in comment MS–2, discussed below in the section-by-section analysis of appendix MS. The Bureau did not receive comment on these proposed provisions and is adopting them in the final rule.

Current § 1024.21(d)(i) exempts certain transactions from the requirement to provide the notice of transfer (if there is no change in the payee, address to which payment must be delivered, account number, or amount of payment due): Transfers between affiliates, transfers resulting from mergers or acquisitions of servicers or subservicers, and transfers between master servicers where the subservicer remains the same. The Bureau did not receive comment on these proposed provisions and is adopting them in the final rule.

Current § 1024.21(d)(ii) exempts the FHA from the requirement to provide a transfer notice where a mortgage insured under the National Housing Act

[82] The disclosure preparation instructions in current § 1024.21(b)(2) refer to ''table funding mortgage broker.'' In implementing these instructions through comment 33(a)–3, the Bureau has replaced that phrase with the phrase ''mortgage broker who anticipates using table funding'' to better conform to the language in § 1024.33(a).

[83] For example, the Bureau changed ''consumer inquiry address,'' under § 1024.21(d)(3)(ii) to an address ''that can be contacted by the borrower to obtain answers to servicing transfer inquiries,'' under § 1024.33(b)(4)(ii). The Bureau also changed the provision in § 1024.21(d)(3)(v) regarding ''[i]nformation concerning any effect the transfer may have'' on the terms of the continued availability of mortgage life or disability insurance, to a requirement in § 1024.33(d)(3)(v) to include information ''[w]hether the transfer will affect'' the terms or the continued availability of mortgage life or disability insurance.

[84] As noted in the section-by-section analysis of § 1024.33(a), the Bureau is finalizing the servicing disclosure statement requirement for first-lien mortgage loans, including forward and reverse mortgage loans.

is assigned to the FHA. The Bureau proposed to move this provisions to new § 1024.33(b)(2)(i)(ii). HUD initially implemented this exemption in reliance on its authority under section 19(a) of RESPA;[85] the Bureau relies on the same authority to maintain the current exemption. The Bureau did not receive comment on this proposed provision and is adopting it in the final rule.

33(b)(3) Time of the Notice

33(b)(3)(i) In General

Timing of the Transferor and Transferee Notices

RESPA section 6(b)(2)(A) requires that the transferor's notice be provided not less than 15 days before the effective date of transfer of servicing, except as provided in RESPA section 6(b)(2)(B) and (C), which provides that the notice may be provided under different timeframes in certain cases. 12 U.S.C. 2605(b)(2)(A). RESPA section 6(c)(2)(A) requires that the transferee's notice be provided not more than 15 days after the effective date of transfer, except as provided in RESPA section 6(c)(2)(B) and (C). 12 U.S.C. 2605(c)(2)(A). Current § 1024.21(d)(2)(i) implements these requirements and provides that, except as provided in paragraph (d)(1)(i) or (d)(2)(ii), the notice of transfer must be provided by the transferor not less than 15 days before the effective date of the transfer and by the transferee not more than 15 days after the effective date of the transfer. The Bureau proposed to move these requirements to new § 1024.33(b)(3)(i).

Several individual consumers suggested that a 15-day timeframe was too short a period for borrowers to make adjustments with respect to whom they should direct their mortgage payments. They recommended that transferees should be required to provide the transfer notice 30 to 45 days in advance of the effective date of transfer. In its final rule, the Bureau is not adjusting the exiting timing requirements. The 15-day time period was established by Congress, which reasonably concluded that this time period provides borrowers with sufficient time to make adjustments to any automated payment systems. In addition, the Bureau believes that there is minimal risk to borrowers who may be unable to send payments to the proper servicer after a transfer. Pursuant to § 1024.33(c)(1), servicers generally may not treat a payment as late for 60 days after a transfer if a borrower makes a timely but misdirected payment to the transferee servicer.

Delivery. Subparagraphs (b)(1) and (c)(1) of RESPA section 6 require that the transferor and transferee servicer notify ''the borrower'' of any assignment, sale, or transfer of servicing. Current § 1024.21(d)(1)(i) implements these requirements by requiring that notices be delivered to ''the borrower.'' However, unlike as set forth in current § 1024.21(c) with respect to the servicing disclosure statement, current § 1024.21(d) does not contain specific delivery instructions for delivering servicing transfer notice under § 1024.21(d) to multiple borrowers. The Bureau proposed comment 33(b)(3)–2 to clarify that a notice of transfer should be delivered to the mailing address listed by the borrower in the mortgage loan documents, unless the borrower has notified the servicer of a new address pursuant to the servicer's requirements for receiving a notice of a change of address. Proposed comment 33(b)(3)–2 further clarified that when a mortgage loan has more than one borrower, the notice of transfer need only be given to one borrower, but must be given to the primary borrower when one is readily apparent.

The Bureau did not receive comment on the language in proposed comment 33(b)(3)–2 clarifying that a servicer deliver the notice of transfer to the mailing address listed by the borrower in the mortgage loan documents unless the borrower has notified the servicer of a new address pursuant to the servicer's requirements for receiving a notice of a change in address. However, the Bureau did receive comment on the proposed language clarifying that servicers may provide the transfer notice to the ''primary'' borrower. Industry commenters supported the proposed limitation to provide the transfer notice only to the primary borrower. One industry commenter indicated, however, that servicers generally will not know who the primary borrower is, noting that servicers would likely rely on the owner's or a prior servicer's designation in servicer transfer instructions, or the party that is listed first on the note. The industry commenter recommended that the Bureau permit such reliance.

Two consumer advocacy groups recommended that the Bureau omit this comment. These commenters were concerned that providing notice to only one party would not ensure that multiple obligors, or even the party who is actually making payments on the mortgage, would receive it. For example, in the event of a divorce or separation, a ''primary'' borrower could be a spouse who is no longer living at home but who has submitted a change-of-address notice to the servicer. In another scenario, a borrower not living at home could be under a family court order to make mortgage payments even though the borrower is not a ''primary'' borrower. In these types of cases, the consumer groups were concerned that borrowers not considered ''primary'' would not receive the transfer notice. The consumer groups also raised concern about the lack of a definition of ''primary'' borrower and observed that, even if a definition were provided, a servicer's original designation of ''primary'' may become inaccurate over time if the obligors' relationship changes or other changed circumstances arise. The consumer groups also noted that sending two notices is not costly, would simplify compliance, and would reduce the risk that an interested borrower would not receive the notice.

In light of comments received, the Bureau is not adopting the proposed comment 33(b)(3)–2 regarding delivery to ''primary'' borrowers. The Bureau recognizes that a party who may be ''primary'' at application could change over time without the servicer's knowledge, which could be problematic for borrowers responsible for making ongoing payments to their servicer. The Bureau believes that servicers should be responsible for providing a notice to the address listed by the borrower in the mortgage loan documents or different addresses they have received through their own procedures, consistent with § 1024.11[86] and applicable case law.[87] The Bureau has otherwise retained proposed comment 33(b)(3)–2 substantially as proposed. The Bureau has omitted the comment limiting delivery to ''primary'' borrowers, added parenthetical language about providing the notice to ''addresses,'' and has renumbered the comment as 33(b)(3)–1 because of the deletion of proposed comment 33(b)(3)–1 discussed above. Comment 33(b)(3)–1 explains that a servicer mailing the notice of transfer

[85] *See* 59 FR 65442, 65443 (1994).

[86] Section 1024.11 provides that ''the provisions of [part 1024] requiring or permitting mailing of documents shall be deemed to be satisfied by placing the document in the mail (whether or not received by the addressee) addressed to the addresses stated in the loan application or in the other information submitted to or obtained by the lender at the time of loan application or submitted or obtained by the lender or settlement agent, except that a revised address shall be used where the lender or settlement agent has been expressly informed in writing of a change in address.''

[87] *See Rodriguez* v. *Countrywide Homes* et al., 668 F. Supp. 2d 1239, 1245 (E.D. Ca. 2009) (''Countrywide submits, and the Court agrees, that RESPA requires a lender to send a Good Bye letter to the Mailing Address listed by the borrower in the loan documents. When the borrower submits an express change of mailing address, the lender is required to send the Good Bye letter to the new address.'').

must deliver the notice to the mailing address (or addresses) listed by the borrower in the mortgage loan documents, unless the borrower has notified the servicer of a new address (or addresses) pursuant to the servicer's requirements for receiving a notice of a change in address.

33(b)(3)(ii) Extended Time

RESPA section (b)(2)(B) and (c)(2)(B) contains exemptions from the general requirements that the transferor notice be provided not less than 15 days before the effective date of transfer and that the transferee notice be provided not more than 15 days after the effective date of transfer. 12 U.S.C. 2605(b)(2)(B) and (c)(2)(B). Paragraphs (b)(2)(B) and (c)(2)(B) permit these notices to be provided not more than 30 days after the effective date of assignment, sale, or transfer that is preceded by the termination of a servicing contract for cause, a servicer's bankruptcy, or the commencement of proceedings by the FDIC for conservatorship or receivership of the servicer. These exemptions to the general timing requirements are currently set forth in § 1024.21(d)(2)(ii).

The Bureau had proposed to adopt the existing exemptions and add § 1024.33(b)(3)(ii)(D), which would extend the current 30-day exemption to situations in which the transfer of servicing is preceded by commencement of proceedings by the NCUA for appointment of a conservator or liquidating agent of the servicer or an entity that owns or controls the servicer. The Bureau did not receive comment on this aspect of the proposal and is adopting new § 1024.33(b)(3)(ii)(D) as proposed.

As is evident by RESPA section 6(b)(2)(B) and (c)(2)(B), one of the purposes of RESPA is to provide exemptions from the general transfer notice timing requirements for servicing transfers occurring in the context of troubled institutions involving the appointment of an agent by a Federal agency, such as those in which a servicing transfer is preceded by the commencement of proceedings by the FDIC for conservatorship or receivership of the servicer (or an entity by which the servicer is owned or controlled). The Bureau does not believe that the timing for providing a servicing transfer disclosure should differ for an insured credit union in the process of conservatorship of liquidation by the NCUA compared to an insured depository institution in the process of conservatorship or receivership by the FDIC. Thus, because the Bureau believes institutions for which the NCUA has commenced proceedings to appoint a conservator or liquidating agent should be treated similarly to those for which the FDIC has commenced proceedings to appoint a conservator or receiver, the Bureau believes § 1024.33(b)(3)(ii)(D) is necessary to achieve the purposes of RESPA. Accordingly, the Bureau exercises its authority under RESPA section 19(a) to grant reasonable exemptions for classes of transactions necessary to achieve the purposes of RESPA.

33(b)(3)(iii) Notice Provided at Settlement

RESPA section 6(b)(2)(C) and (c)(2)(C) generally provides that the timing requirements of the transferor and transferee notices at RESPA section 6(b)(2)(A) and (B), and (c)(2)(A) and (B) do not apply if the person making the loan provides a transfer notice to the borrower at settlement. Current § 1024.21(d)(2)(iii) implements these provisions and provides that notices of transfer delivered at settlement by the transferor servicer and transferee servicer, whether as separate notices or as a combined notice, satisfy the timing requirements of § 1024.21(d)(2). The Bureau proposed to move this provision to new comment 33(b)(3)–1 substantially as in the original.[88] The Bureau did not receive comment on this aspect of the proposal. The Bureau is adopting the substance of the language in the proposed commentary but is placing the language in new § 1024.33(b)(3)(iii) instead of official commentary to more closely track the requirements of the statute.

33(b)(4) Contents of Notice

Overview

RESPA section 6(b)(3) sets forth content requirements for the transferor notice, and RESPA section 6(c)(3) requires that the transferee notice contain the same content required by RESPA section 6(b)(3). 12 U.S.C. 2605(b)(3) and (c)(3). RESPA section 6(b)(3)(A) through (G) requires that the transferor and transferee notice contain the effective date of transfer, contact information for the transferee servicer, the name of an individual or department of the transferor and transferee servicer who may be contacted for borrower inquiries, the date on which the transferor will stop accepting payments and the date on which the transferee servicers will begin accepting payments, any information about the effect of the transfer on the availability of insurance, and a statement that the transfer will not affect any term or condition of the mortgage loan, other than servicing. These requirements are currently implemented by § 1024.21(d)(3)(i) through (vi). Section 1024.21(d)(3)(vii) also requires servicers to include a statement of the borrower's rights in connection with complaint resolution, including the information set forth in § 1024.21(e), as illustrated by current appendix MS–2.

The Bureau proposed to adopt most of the existing content requirements from current § 1024.21(d)(3), with the exception of the complaint resolution statement in § 1024.21(d)(3)(viii) and certain other changes discussed in more detail below. Except as otherwise discussed below, the Bureau is adopting § 1024.33(b)(4) as proposed. Accordingly, § 1024.34(b)(4) sets forth content requirements for the transfer notice, including the effective date of the servicing transfer; the name, address, and telephone number for the transferor and transferee servicers to answer inquiries related to the transfer of servicing; the date on which the transferor will stop accepting payments and the date the transferee will begin accepting payments, as well as the address for the transferee servicer to which borrower payments should be sent; information about whether the transfer will affect the terms or availability of insurance coverage; and a statement indicating that the transfer does not affect any of the mortgage loan terms other than servicing.

Information about loan status. Two consumer advocacy groups also requested that the Bureau require that transfer notices provide information about the default status of the loan and include a full payment history. The groups explained that many servicing problems occur at or near the time of transferring servicing records and that errors involving one or two payments can spiral into a threatened foreclosure despite borrower efforts to prove that payments were in fact made. Thus, the consumer groups recommended that the transfer notices should advise if the homeowner is current and whether there are any unpaid fees, and the status of loss mitigation options being considered. They also recommended that a full payment history, including allocation of the payments to interest, principal, late fees, and other fees should be included by both the old and the new servicer, so that the homeowner may promptly ascertain if there is a discrepancy in the records. These commenters also requested that the

[88] Whereas § 1024.21(d)(2)(iii) describes a notice of transfer ''delivered'' at settlement, § 1024.33(b)(3)(iii) describes a notice of transfer ''provided'' at settlement. The Bureau has made this change to conform to the language of RESPA section 6(b)(2)(C) and (c)(2)(C) and other similar technical amendments throughout Regulation X.

Bureau require that fees not listed in a payment history provided at the transfer of servicing be waived.

The Bureau recognizes the problems that can arise when servicing is transferred, especially in the case of a borrower who is not current at the time of transfer. However, requiring individualized information about each borrower's loan could significantly affect the time required to produce the notice as well as the cost. Moreover, the Bureau believes that other new provisions being finalized in Regulation X and Regulation Z will adequately address borrowers' interests in ensuring the accuracy of transferred records concerning their payment history. First, borrowers will be able to obtain information about their current payment status on a monthly basis on the periodic statement required under the Regulation Z provision that the Bureau is finalizing in the 2013 TILA Mortgage Servicing Final Rule. That statement will show, among other things, the payment amount due, the amount of any late payment fee, the total sum of any fees or charges imposed since the last statement, the total of all payments received since the last statement, the total of all payments received since the beginning of the current calendar year, transaction activity since the last statement, the outstanding principal balance, the borrower's delinquency status, amounts past due from previous billing cycles, and the total payment amount needed to bring the account current. As a result, if there are discrepancies between the last statement provided by the prior servicer and the first statement provided by the new servicer, those discrepancies will be apparent on the face of the statements. Second, borrowers will also be able to assert errors and request information about their payment history and current status through the new error resolution and information request provisions of Regulation X §§ 1024.35 and 1024.36; and new § 1024.38(b)(1)(iii) requires servicers to maintain policies and procedures reasonably designed to ensure that the servicer can provide a borrower with accurate and timely information and documents in response to the borrower's requests for information with respect to the servicing of the borrower's mortgage loan account. Third, new § 1024.38(b)(4) generally requires servicers to maintain policies and procedures reasonably designed to ensure (as a transferor servicer) the timely transfer of all information and documents in a manner that ensures the accuracy of information and documents transferred, and (as a transferee servicer) identify necessary documents or information that may not have been transferred by a transferor servicer and obtain such documents from the transferor servicer. Fourth, new § 1024.38(c)(2) generally requires, among other things, that servicers maintain a schedule of all transactions credited or debited to the mortgage loan account, including any escrow account defined in § 1024.17(b) and any suspense account and data in a manner that facilitates compiling such documents and data into a servicing file within five days. In light of these provisions, the Bureau does not believe that the cost of providing the default status of the loan or a full payment history with the servicing transfer notice for all borrowers would be justified.

Statement of borrower's rights in connection with the complaint resolution process. Although not specifically required by RESPA section 6(b)(3), current § 1024.21(d)(3)(vii) requires that the transfer notice include a statement of the borrower's rights in connection with the complaint resolution process. The Bureau proposed to remove this requirement from the servicing transfer notice in new § 1024.33(b)(4). Two consumer advocacy groups requested that the Bureau retain the current requirement, noting that borrowers would benefit from being informed of their rights related to errors and information requests. They asserted that retaining an existing disclosure would not add new burden. Further, they asserted that omitting the disclosure would not significantly reduce burden because the language in the proposed revised model notice (without the complaint resolution statement) at appendix MS–2 would likely only comprise one page, and that adding a paragraph about the error resolution and information rights might at most extend some of the information to the back side of the notice, but would not require an additional page or increased postage.

After considering the comments received, the Bureau has decided to adopt § 1024.33(b)(4) without a requirement to provide information about complaint resolution, as proposed. The Bureau believes that borrowers are best served by providing a notice that clearly and concisely explains that the servicing of their mortgage is being transferred, and that detailed information about the error resolution and information request process may not always be optimally located in the transfer notice. Additionally, as a result of amendments to the error resolution and information request procedures that the Bureau is finalizing in this rule, the existing disclosure in current appendix MS–2 would no longer be completely accurate.

The Bureau agrees that borrowers should be notified of their rights in connection with errors and inquiries, but the Bureau believes that borrowers should be informed of the error resolution and information request process through mechanisms that do not necessarily depend on the transfer of servicing. To address this, the Bureau is adding a requirement in § 1024.38(b)(5) that servicers maintain policies and procedures reasonably designed to ensure that servicers inform borrowers of procedures for submitting written notices of error set forth in § 1024.35 and written information requests set forth in § 1024.36. New comment 38(b)(5)–1 explains, among other things, that a servicer may comply with § 1024.38(b)(5) by including in the periodic statement required pursuant to § 1026.41 a brief statement informing borrowers that borrowers have certain rights under Federal law related to resolving errors and requesting information about their account, and that they may learn more about their rights by contacting the servicer, and a statement directing borrowers to a Web site that provides the information about the procedures set forth in §§ 1024.35 and 1024.36.[89]

The Bureau believes that a requirement to establish policies and procedures to achieve the objective of notifying borrowers of the written error resolution and information request procedures set forth in §§ 1024.35 and 36 will provide servicers with more flexibility to the time and in a manner in which to notify borrowers about the written error resolution and information request procedures. Specifically, the Bureau expects that servicers may decide to inform borrowers about these procedures at a time and in a manner that borrowers are more likely to find beneficial than at the time of servicing transfer. Further, as described in more detail in the section-by-section analysis of § 1024.40, pursuant to § 1024.40(b)(4), servicers must have policies and procedures reasonably designed to ensure that continuity of contact personnel assigned to assist delinquent borrowers provide such borrowers with information about the procedures for

[89] During the fourth round of consumer testing in Philadelphia, Pennsylvania, the Bureau tested a brief statement informing borrowers that they have rights associated with resolving errors. While participants generally understood the meaning of the clause, the Bureau is not finalizing model language for a statement informing borrowers of their rights to resolve errors and request information.

submitting a notice of error pursuant to § 1024.35 or an information request pursuant to § 1024.36.

Finally, the Bureau believes borrowers are most likely to raise questions and complaints with servicers outside of the formal process outlined in §§ 1024.35 and 36. To ensure that servicers have systems in place for responding to errors and information requests through informal means, the Bureau believes servicers should have reasonable policies and procedures in place for responding to errors and information requests that fall outside of the required error resolution and information request procedures set forth in §§ 1024.35 and 36. Accordingly, as discussed in more detail in the section-by-section analysis of § 1024.38(b)(1), the Bureau is adopting § 1024.38(b)(1)(ii) and (iii), which generally requires that servicers maintain policies and procedures that are reasonably designed to ensure that the servicer can investigate, respond to, and, as appropriate, make corrections in response to borrower complaints, and provide accurate and timely information and documents in response to borrower information requests. Therefore, for the reasons discussed above, the Bureau is adopting the proposal to remove the requirement that the servicing transfer notice describe the complaint resolution statement currently set forth in § 1024.21(d)(3)(vii).

33(b)(4)(ii) and (b)(4)(iii)

RESPA section 6(b)(3)(C) and (D) requires that the transferor and transferee notices include the name and a toll-free or collect call telephone number for an individual employee or the department of the transferor and transferee servicers that can be contacted by the borrower to answer inquiries relating to the transfer of servicing. 12 U.S.C. 2605(b)(3)(C) and (D). The Bureau proposed to implement these requirements, currently in § 1024.21(d)(3)(ii) and (iii), through new § 1024.33(b)(4)(ii) and (iii).

The Bureau's proposal would have retained the requirement to provide contact information for ''an employee or department'' of the transferor and transferee servicers. The Bureau had also proposed in § 1024.33(b)(4)(ii) and (iii) to remove the requirement that the transferor and transferee servicers provide collect call telephone numbers, but to retain the requirement to provide toll-free telephone numbers. Accordingly, proposed § 1024.33(b)(4)(ii) and (iii) would have required that servicers provide only a toll-free telephone number for an employee or department of the transferee servicer that can be contacted by the borrower to obtain answers to servicing transfer inquiries. The Bureau's proposal also would have required that the transferor notice include the address for an employee or department of the transferor servicer that can be contacted by the borrower to obtain answers to servicing transfer inquiries. Current § 1024.21(d)(3)(iii) requires only that the notice list telephone contact information to reach an employee or department of the transferor servicer.

One industry commenter indicated that providing an individual employee name may not be appropriate in all cases because individuals can change roles within a servicer's organization. The commenter requested that only contact information for a servicing department be required. One individual consumer recommended requiring that the notice of transfer identify the owner or assignee of the loan, without contact information, in addition to contact information for the transferor and transferee servicers. Another individual consumer also recommended that the transfer notice include a plain language explanation of what ''owning'' and ''servicing'' a loan mean.

The Bureau is adopting the requirements in proposed § 1024.33(b)(4)(ii) and (iii) substantially as proposed. However, the Bureau is retaining the option to include a collect call number because, upon further consideration, the Bureau believes some servicers may continue to use collect call numbers. The Bureau is also retaining the requirement to provide contact information for either an employee or department in the final rule. Neither the statute nor the regulatory provision requires servicers to list specific employees but instead gives servicers the option of listing personnel or a department contact number. The Bureau believes servicers should be able to determine the most appropriate point of contact within their organizations. While the Bureau recognizes that servicer personnel may change over time, the Bureau does not believe that there is significant risk from the potential that contact information may be inaccurate because servicers are required under § 1024.38 to have policies and procedures in place to achieve the objective of providing accurate information to borrowers. Servicers may choose to provide department-level contacts to ease their own compliance. The Bureau believes borrowers would likely benefit from the disclosure of specific employees to the extent the servicer decides to list them.

The Bureau has considered the recommendation to require that the servicing transfer notice identify the owner or assignee of the loan in addition to contact information for the transferor and transferee servicer but is not adopting such a requirement in the final rule. First, the Bureau notes that the servicing disclosure statement provided at application pursuant to § 1024.33(a) already provides information about whether the lender, mortgage broker who anticipates using table funding, or dealer may assign, sell, or transfer the mortgage servicing to any other person at any time. Additionally, the Bureau believes the language in the model form at appendix MS–2, explaining that a new servicer will be collecting the borrower's mortgage loan payments and that nothing else about the borrower's mortgage loan will change, will avoid potential confusion about what the transfer of servicing means for a borrower's loan. Additionally, as explained above, the Bureau believes that borrowers are best served by a transfer notice that sets forth the most relevant information related to the transfer of servicing of their loan and who should receive their payments requiring additional information in the notice about the owner or the loan may be confusing. Finally, the servicing transfer notice will include contact information for the transferor and transferee servicer that the borrower may contact with any questions.[90]

33(b)(4)(iv)

RESPA section 6(b)(3)(E) requires that the transferor and transferee notices provide the date on which the transferor will cease to accept payments relating to the loan and the date on which the transferee servicer will begin to accept such payments. 12 U.S.C. 2605(b)(3)(E). This requirement is currently in § 1024.21(d)(3)(iv), which the Bureau proposed to implement through proposed § 1024.33(b)(4)(iv).

Several individual consumers indicated that the transfer notice could provide clearer instructions for how borrowers should submit payments after the effective date of transfer date. One individual consumer recommended that the notice should list the Web site address for transferee servicer and the proper address to submit electronic payments. Other consumers recommended that the notice explain which servicer is responsible for making payments from any escrow account for

[90] Pursuant to § 1024.36(d)(2)(i)(A), a servicer generally must respond within 10 days to borrower requests for information about the identify or, and address or relevant contact information for, the owner or assignee of the borrower's mortgage loan.

property taxes and insurance and the effective date of such payments.

Current § 1024.21(d)(3)(i) requires and the current model form in appendix MS–2 include a statement directing borrowers to send all payments due on or after the effective date of transfer to the new servicer.[91] The Bureau's proposed amendments to the model notice contained similar language but included space for the transferee servicer's payment address.[92] The Bureau is adopting this change to the model form in the final rule. *See* appendix MS–2. The Bureau believes this change to the model form will provide clear instructions to borrowers for the submission of future payments to the transferee.

The Bureau does not believe it is necessary to amend the regulatory text of § 1024.33(b)(4)(iv) because the Bureau believes servicers have an incentive to instruct borrowers where to send future payments, and the Bureau is concerned that a regulatory requirement to identify payment instructions, including electronic payment instructions, could be overly prescriptive. Moreover, § 1024.33(b)(ii) and (iii) requires transferor and transferee servicers to provide the contact information for borrowers to obtain answers to inquiries about the transfer; the Bureau believes that borrowers requiring further instruction about submitting payments would make use of this contact information.

33(c) Borrower Payments During Transfer of Servicing

33(c)(1) Payments Not Considered Late

RESPA section 6(d) provides that, during the 60-day period beginning on the effective date of transfer of servicing of any federally related mortgage loan, a late fee may not be imposed on the borrower with respect to any payment on such loan and no such payment may be treated as late for any other purposes, if the payment is received by the transferor servicer (rather than the transferee servicer who should properly receive the payment) before the due date applicable to such payment. This provision is implemented through § 1024.21(d)(5). The Bureau proposed to retain that general requirement in new § 1024.33(c) by making a clarifying revision to the regulatory text—*i.e.,* that such misdirected payment may not be treated as late ''for any purpose.''

The Bureau also proposed to add a qualification to that general prohibition to conform new § 1024.33(c)(1) with the requirements in new § 1024.39 by clarifying that a borrower's account may be considered late for purposes of contacting the borrower for early intervention. Proposed § 1024.39 would have required servicers to provide oral and written notices to borrowers about the availability of loss mitigation options within 30 and 40 days after a missed payment, respectively.

The Bureau did not receive comment on this aspect of the proposal and is adopting § 1024.33(c)(1) substantially as proposed, except with respect to the statement referencing § 1024.39. The Bureau is adding new comment 33(c)(1)–1, to clarify that the prohibition on treating a payment as late for any purpose in § 1024.33(c)(1) includes a prohibition on imposing a late fee on the borrower with respect to any payment on the mortgage loan, with a cross-reference to RESPA section 6(d) in order to clarify that the statutory prohibition on charging late fees remains in effect notwithstanding the change to the language of the regulatory provision.

In the final rule, the Bureau is not adopting the proposed qualifying language regarding § 1024.39 as regulatory text, but instead is adopting this language as new comment 33(c)(1)–2. New comment 33(c)(1)–2 clarifies that a transferee servicer's compliance with 1024.39 during the 60-day period beginning on the effective date of a servicing transfer does not constitute treating a payment as late for purposes of § 1024.33(c)(1). The Bureau believes this provision is more appropriately located as commentary than regulatory text because it is an interpretation of the prohibition on treating a payment as late.

The early intervention rules are new requirements designed to inform delinquent borrowers about loss mitigation options. While a borrower who has made a timely but misdirected payment is not likely to benefit from information about early intervention, transferee servicers may not know the reasons for a missed payment if they are unable to establish live contact with borrowers pursuant to § 1024.39(a) (requiring that servicers establish live contact or make good faith efforts to do so by the 36th day of a borrower's delinquency). In the face of this uncertainty, transferee servicers may decide the best course of action is to comply with § 1024.39, as applicable. In these situations, the Bureau does not believe a servicer complying with § 1024.39 is treating a borrower as late within the meaning of RESPA section 6(d).

33(c)(2) Treatment of Payments

The Bureau also proposed to add a requirement in proposed § 1024.33(c)(2) that, in connection with a servicing transfer, a transferor servicer shall promptly either transfer a payment it has received incorrectly to the transferee servicer for application to a borrower's mortgage loan account or return the payment to the person that made the payment to the transferor servicer. The Bureau explained that many servicers already transfer misdirected payments to the appropriate servicer in connection with a servicing transfer, and the Bureau requested comment regarding whether the option to return the payment to the borrower should be eliminated.

One industry commenter supported the proposed provision, but two consumer advocacy groups and a number of individual consumers requested that the Bureau require the transferring servicer to forward all payments received from borrowers after the transfer date to the appropriate servicer. Consumer groups and individual consumers were concerned that returning misdirected payments to the borrower would lead to confusion, defaults, unnecessary fees, and potentially more foreclosures. Consumer groups believed that the transferor servicer could easily pass payments on to the transferee servicer, reducing the opportunity for unnecessary harm to borrowers. Similarly, one individual consumer suggested that the borrower should be permitted to make payments to the transferor servicer during the 60 days after the transfer date. Another individual consumer recommended that the transferee servicer should be responsible for collecting payments from the transferor servicer. Another consumer recommended that transferee servicer should be required to take steps to remind the borrower to send payments to the new servicer.

After consideration of the comments received, the Bureau has decided to adopt § 1024.33(c)(2) substantially as proposed. As discussed in more detail below, the Bureau believes that this requirement is necessary and appropriate to achieve the consumer protection purposes of RESPA, including ensuring the avoidance of unnecessary and unwarranted charges and the provision of accurate information to borrowers. Accordingly, the provision is authorized under sections 6(j)(3), 6(k)(1)(E), and 19(a) of RESPA.

[91] Appendix MS–2 currently states, ''Send all payments due on or after that date to your new servicer.''

[92] The Bureau proposed to amend appendix MS–2 to state, ''Send all payments due on or after [Date] to [Name of new servicer] at this address: [New servicer address].''

The Bureau has added clarifying language to § 1024.33(c)(2) and has made conforming edits to § 1024.33(c)(2)(i) and (ii) to clarify the circumstances under which the transferor servicer must take action with respect to misdirected payments. Section 1024.33(c)(2) now provides that, beginning on the effective date of transfer of the servicing of any mortgage loan, with respect to payments received incorrectly by the transferor servicer (rather than the transferee servicer that should properly receive the payment on the loan), the transferor servicer shall promptly take action described in either paragraph (c)(2)(i) or (c)(2)(ii). The Bureau has modeled this language on the language of § 1024.33(c)(1) (payments not considered late). The Bureau does not intend any substantive difference from proposed § 1024.33(c)(2).

The Bureau has also added language to § 1024.33(c)(2)(ii) to provide that if a servicer does not transfer a misdirected payment to the transferee servicer, the servicer must return the payment to the person that made the payment to the transferor servicer and notify the payor of the proper recipient of the payment. The Bureau believes § 1024.33(c)(2) will ensure that transferor servicers take some action with respect to misdirected payments; otherwise, transferor servicers may claim that they had no obligation with respect to misdirected payments. The Bureau also believes it is reasonable to permit transferors to either return a misdirected payment to the payor or transmit the payment to the transferee servicer because there may be circumstances in which a borrower would want to be notified that the payment had been mailed to the wrong servicer, recoup the misdirected payment, and forward it to the correct servicer. In addition, there may be situations in which a transferor servicer receives a payment from a party it does not recognize as the borrower associated with the mortgage loan account. In such situations, the Bureau believes servicers may reasonably determine the best course of action is to return such a payment to the payor. Moreover, the Bureau does not believe there is significant potential for borrower harm associated with § 1024.33(c)(2) because § 1024.33(c)(1) permits a 60-day grace period in which timely but misdirected payments to the transferor servicer may not be considered late for any purpose. In addition, § 1024.33(c)(2) requires the transferor servicer to take action with respect to the misdirected payment ''promptly.'' The Bureau does not agree with individual consumers who suggest that borrowers should be permitted to make payments to the transferor during the 60 days after the transfer date, or that the transferee servicer should collect payments from the transferor. While § 1024.33(c)(1) would prevent timely but misdirected payments from being treated as late, the transferor servicer's contractual right to collect payments from the borrower would likely end after a servicing transfer.

In the final rule, the Bureau has added language to § 1024.33(c)(2)(ii) to require the transferor servicer to notify the payor of the proper recipient of payment. Although the servicing transfer notice will provide some notice to the borrower of a transfer, there may be situations in which the payor may be a different party than the borrower who received the transfer notice. In addition, the fact that the payment was sent to the transferor servicer would suggest that the transfer notice sent pursuant to § 1024.33(b) did not achieve its intended purpose. Thus, the Bureau believes it is appropriate to instruct the payor of the proper recipient of the payment and that borrowers will be better served by this requirement than by requiring the transferor to redirect the payment to the transferee.

33(d) Preemption of State Laws

RESPA section 6(h) generally provides that a person who makes a federally related mortgage loan or a servicer shall be considered to have complied with the provisions of any such State law or regulation requiring notice to a borrower at the time of application for a loan or transfer of the servicing of a loan if such person or servicer complies with the requirements under RESPA section 6 regarding timing, content, and procedures for notification of the borrower. 12 U.S.C. 2605(h). Current § 1024.21(h) implements RESPA section 6(h) and was finalized as part of a HUD's 1994 final rule implementing RESPA section 6, which was added by section 921 of the Cranston-Gonzalez National Affordable Housing Act.[93]

Current § 1024.21(h) provides that a lender who makes a mortgage servicing loan or a servicer shall be considered to have complied with any State law or regulation requiring notice to a borrower at the time of application or transfer of servicing if the lender or servicer complies with the requirements of § 1024.21. The provision further states that any State law requiring notice to the borrower at application or transfer of servicing is preempted and that lenders and servicers shall have no other disclosure requirements. Finally, § 1024.21(h) provides that provisions of State law, such as those requiring additional notices to insurance companies or taxing authorities, are not preempted by RESPA section 6 or § 1024.21 and that this additional information may be added to a notice provided under § 1024.33 if permitted under State law.

The Bureau proposed to move § 1024.21(h) to new § 1024.33(d), along with several non-substantive amendments. The language of the Bureau's proposed preemption provision is substantially similar to the existing preemption provision with respect to the types of provisions of State laws or regulations preempted—*i.e.,* those requiring notices to the borrower at application or transfer of servicing where the servicer or lender complies with the Bureau's servicing transfer notice provisions. The Bureau notes, however, that consistent with the discussion above, the Bureau's proposal would have expanded the coverage of the preemption provision to cover subordinate-lien mortgage loans by replacing the term ''mortgage servicing loan'' in the current language with references to the term ''mortgage loans.'' The Bureau notes that expanded coverage of the preemption provision to subordinate-lien loans is consistent with the scope of statutory preemption provision in RESPA section 6(h), which applies to ''person who makes a federally related mortgage loan or a servicer.'' As discussed above, the term ''federally related mortgage loan'' includes subordinate-lien loans. 12 U.S.C. 2602(1)(A).

The Bureau received one comment from an organization of State bank regulators that requested that the Bureau omit § 1024.33(d). The organization asserted that proposed § 1024.33(d) is broader than the statutory preemption provision in RESPA section 6(h) because the proposed rule would have invalidated State laws rather than having provided that any State requirements were fulfilled by compliance with the Federal regime. The organization explained it believes RESPA section 6(h) is sufficient to address the issue of duplicative or conflicting State laws, without promulgation of implementing regulations.

Specifically, the organization objected to language in proposed § 1024.33(d) stating that State laws requiring notices to borrowers were preempted, ''and there shall be no additional borrower disclosure requirements.'' The commenter asserted that RESPA section 6(h) provides State notice laws are

[93] *See* 59 FR 65442, 65443 (1994).

considered satisfied if the RESPA timing, content, and notice procedure requirements are met—not that State laws are invalidated. The commenter asserted that RESPA section 6(h) allows State laws to apply where the or servicer has not satisfied the RESPA requirements, and that State examination processes would be hampered by an interpretation that simply invalidates State law requirements.

The Bureau is finalizing § 1024.33(d) as proposed. The Bureau has considered these objections but disagrees that the language of § 1024.33(d) as proposed is broader than the language of RESPA section 6(h) or will introduce new difficulties for State bank examiners. By adopting § 1024.33(d), the Bureau is maintaining substantially all of the language of § 1024.21(h), which was originally adopted by HUD through its final rule implementing RESPA section 6(h). By implementing RESPA section 6(h) through § 1024.33(d), the Bureau intends to maintain the current coverage of § 1024.21(h) as it has existed for many years. Accordingly, the Bureau disagrees that § 1024.33(d) will introduce any new complications into the State examination process.

The commenter was also concerned that, by implementing RESPA section 6(h) through language similar but not identical to the statutory provision, proposed § 1024.33(d) would broaden the classes of State laws that are subject to RESPA section 6(h). The commenter focused on the omission in proposed § 1024.33(d) of the word ''such'' from the statutory phrase ''complied with the provisions of any such State law''; and the omission of the phrase limiting the scope of RESPA section 6(h) to the ''timing, content, and procedures'' for notification to the borrower under RESPA section 6.[94]

The Bureau disagrees with the commenter's assertion that, by eliminating ''such'' from the statutory provision of ''complied with the provisions of any *such* State law'' (emphasis added), the Bureau has broadened the scope of the preemption from specific State laws requiring notice to broad classes of law. Section 1024.33(d) makes clear that the State laws at issue are those requiring notice to borrower at the time of application for a loan or transfer of servicing of a loan, which the Bureau believes is consistent with the types of notices identified in RESPA section 6(h). The Bureau also disagrees with the commenter's assertion that, by eliminating the statutory phrase, ''regarding timing, content, and procedures for notification of the borrower'' from the description of the requirements under section 6 with which a servicer must comply to trigger preemption, the Bureau has broadened the preemption provision. Section 1024.33(d) indicates that State laws and regulations are considered to be complied with if the lender or servicer complies with the requirements of ''this section,'' which refers to the regulatory section (1024.33) containing requirements regarding timing, content, and procedures for notifying borrowers about servicing transfers. Accordingly, the omission of the phrase regarding timing, content, and procedures does not substantively alter the meaning of section 6(h) of RESPA.

Finally, the commenter suggested there may be tension between § 1024.33(d) and § 1024.32(b), which provides that servicers can combine disclosures required by other laws or the terms of an agreement with a Federal or State regulatory agency with the disclosures required by subpart C. The Bureau does not believe these provisions are in conflict. Paragraph 33(d) applies by its terms only to notification provisions in § 1024.33. To the extent § 1024.32(b) generally provides that servicers can combine disclosures required by other laws or the terms of an agreement with a Federal or State regulatory agency with the disclosures required by subpart C, the Bureau believes that servicers would understand that the more specific rule overrides the general rule with regard to servicing transfer disclosures.

Section 1024.34 Timely Escrow Payments and Treatment of Escrow Account Balances In General

In the 2012 RESPA Mortgage Servicing Proposal, the Bureau proposed to move the substance of current § 1024.21(g) to new § 1024.34(a) to require a servicer to pay amounts owed for taxes, insurance premiums, and other charges from an escrow account in a timely manner, pursuant to the requirements of current § 1024.17(k). The Bureau also proposed in new § 1024.34(a) to make certain non-substantive amendments to the language of current § 1024.21(g). Further, the Bureau proposed to add new § 1024.34(b) to implement Dodd-Frank Act amendments to section 6(g) of RESPA. The Bureau is adopting § 1024.34 substantially as proposed, except as where noted in the section-by-section analysis below.

34(a) Timely Escrow Disbursements Required

RESPA section 6(g) provides that, if the terms of any federally related mortgage loan require the borrower to make payments to the servicer of the loan for deposit into an escrow account for the purpose of assuring payment of taxes, insurance premiums, and other charges with respect to the property, the servicer shall make payments from the escrow account for such taxes, insurance premiums, and other charges in a timely manner as such payments become due. 12 U.S.C. 2605(g). Current § 1024.21(g) implements this provision by replicating the statutory nearly verbatim. Current § 1024.21(g) uses the term ''mortgage servicing loan'' in place of the statutory term ''federally related mortgage loan'' and includes a cross-reference to § 1024.17(k), which sets forth more detailed requirements for how escrow payments are made in a timely manner.

The Bureau proposed to incorporate the substance of current § 1024.21(g) into new § 1024.34(a) to provide that, if the terms of a mortgage loan require the borrower to make payments to the servicer of the mortgage loan for deposit into an escrow account to pay taxes, insurance premiums, and other charges for the mortgaged property, the servicer shall make payments from the escrow account in a timely manner, that is, on or before the deadline to avoid a penalty, as governed by the requirements in § 1024.17(k).

As discussed above, the Bureau proposed to expand the scope of current § 1024.21(g); proposed § 1024.34(a) would have replaced the term ''mortgage servicing loan'' with the term ''mortgage loan,'' which includes subordinate-lien loans. Other than this change in scope, the Bureau proposed several non-substantive technical revisions to the current provision. One commenter indicated that subordinate-lien, closed-end loans typically do not have escrow accounts. The commenter asked that the Bureau clarify whether these rules would apply to subordinate-lien loans to avoid confusion.

[94] RESPA section 6(h) provides, in full: ''Notwithstanding any provision of any law or regulation of any State, a person who makes a federally related mortgage loan or a servicer shall be considered to have complied with the provisions of *any such State law or regulation* requiring notice to a borrower at the time of application for a loan or transfer of the servicing of a loan if such person or servicer complies with the requirements under this section *regarding timing, content, and procedures for notification to the borrower''* (emphasis added). Section 1024.33(d) provides, in relevant part: ''A lender who makes a mortgage loan or a servicer shall be considered to have complied with the provisions of any State law or regulation requiring notice to a borrower at the time of application for a loan or transfer of servicing of a loan if the lender or servicer complies with the requirements of this section.''

The Bureau is adopting this provision as proposed. RESPA section 6(g), and both current § 1024.21(g) and new § 1024.34(a), limit the applicability of the provision, among other things, to loans whose terms require the borrower to make payments to the servicer of the loan for deposit into an escrow account to pay taxes, insurance premiums, and other charges for the mortgaged property. Thus, if a subordinate-lien mortgage loan does not require borrowers to make payments into an escrow account, § 1024.34(a) would not apply.

34(b) Refunds of Escrow Balance

34(b)(1) In General

As noted above, RESPA section 6(g) generally requires a servicer to make payments from an escrow account in a timely manner as payments become due. 12 U.S.C. 2605(g). Section 1463(d) of the Dodd-Frank Act amended RESPA section 6(g) by adding a provision requiring that any balance in any such account that is within the servicer's control at the time the loan is paid off be promptly returned to the borrower within 20 business days or credited to a similar account for a new mortgage loan to the borrower with the ''same lender.'' The Bureau proposed to add § 1024.34(b)(1) through (2) to implement this amendment to RESPA section 6(g).

Proposed § 1024.34(b)(1) would have provided that, within 20 days (excluding legal public holidays, Saturdays, and Sundays) of a borrower's payment of a mortgage loan in full, any amounts remaining in the escrow account shall be returned to the borrower. The Bureau explained in its proposal that the Bureau interprets the 20-day allowance in RESPA section 6(g) to apply only if the servicer refunds the escrow account balance to the borrower (and not if the servicer credits a new account with the same lender, as provided in proposed § 1024.34(b)(2)).

Several industry associations and a community bank commenter recommended that the Bureau permit servicers to net escrow funds against the payoff amount. These commenters noted that community banks frequently net escrow funds against a payoff balance, and they observed that requiring servicer to obtain a full payoff and then refund the escrow is costly and does not provide a benefit to the borrower. Another industry association commenter requested that the Bureau clarify that the borrower may direct how the escrow account funds should be applied.

Based on these comments and upon further consideration, the Bureau has decided to revise the proposed regulatory text and commentary. To clarify the relationship between § 1024.33(b)(1) and (b)(2), the Bureau has amended § 1024.34(b)(1) to provide that, ''[e]xcept as provided in paragraph (b)(2),'' a servicer shall return escrow funds to the borrower. Paragraph (b)(2) continues to give the servicer the option of applying the escrow account to the new loan in specified circumstances. Accordingly, servicers shall generally refund escrow amounts to the borrower, unless the servicer applies the escrow balance to a new account, as permitted under § 1024.33(b)(2). In addition, the Bureau has added language referring to amounts remaining in an escrow account ''that is within the servicer's control'' to replicate language appearing in the statutory provision. The Bureau has also made minor technical wording clarifications, but is otherwise adopting the text of § 1024.34(b)(1) as proposed.

The Bureau has also included comment 34(b)(1)–1 to clarify that § 1024.34(b)(1) does not prohibit a servicer from netting any remaining funds in an escrow account against the outstanding balance of the borrower's mortgage loan. The Bureau interprets RESPA section 6(g), as amended by the Dodd-Frank Act, as only requiring servicers to return escrow balances or credit a new account after the mortgage loan is paid off. The Bureau does not believe the Dodd-Frank Act amendment to RESPA section 6(g) was intended to affect the manner in which the loan is paid off. Accordingly, the Bureau has added comment 34(b)(1)–1 to clarify that servicers are not prohibited under § 1024.34(b)(1) from netting any remaining funds in an escrow account against the borrower's outstanding loan balance.

34(b)(2) Servicer May Credit Funds to a New Escrow Account

As amended by the Dodd-Frank Act, RESPA section 6(g) permits a servicer to credit the escrow account balance to an escrow account for a new mortgage loan to the borrower with the same lender if the servicer does not return the balance to the borrower within 20 business days. 12 U.S.C. 2605(g). To implement this provision, the Bureau proposed to add new § 1024.34(b)(2) to provide that a servicer may credit funds in an escrow account balance to an escrow account for a new mortgage loan as of the date of the settlement of the new mortgage loan if the new mortgage loan is provided to the borrower by a lender that: (i) Was also the lender to whom the prior mortgage loan was initially payable; (ii) is the owner or assignee of the prior mortgage loan; or (iii) uses the same servicer that serviced the prior mortgage loan to service the new mortgage loan.[95] Thus, if the servicer credits the funds in the escrow account to an escrow account for a new mortgage loan, the credit should occur as of the settlement of the new mortgage loan. The Bureau proposed to add comment 34(b)(2)–1 to clarify that a servicer is not required to credit an escrow account balance to a new mortgage loan in any circumstance in which it would be permitted to do so. Thus, a servicer would have been permitted, in all circumstances, to return funds in an escrow account to the borrower pursuant to proposed § 1024.34(a).

Several industry commenters supported proposed comment 34(b)(2)–1. However, several industry associations requested that the rule include an option for the borrower to direct how the escrow account funds should be applied. One industry trade association expressed concern that RESPA section 6(g) and proposed § 1024.34 contained an ambiguity regarding the ability of a servicer to transfer funds retained in the escrow account to a new lender with the borrower's consent. This commenter noted that, while neither RESPA section 6(g) nor § 1024.34 explicitly prohibits this practice, the use of the term ''same lender'' in the statute and proposed § 1024.34 creates uncertainty over whether a servicer may credit any excess escrow account balances to a new escrow account for a new mortgage loan with a *new lender* with the borrower's consent.

Section 1024.34(b)(2) provides that, notwithstanding § 1024.34(b)(1), if the borrower agrees, a servicer may credit any amounts remaining in an escrow account that is within the servicer's control to an escrow account for a new mortgage loan as of the date of the settlement of the new mortgage loan if the new mortgage loan is provided to the borrower by a lender specified in § 1024.34(b)(2)(i) through (iii). As in the proposal, these lenders are (i) the lender to whom the prior mortgage loan was initially payable; (ii) the lender that is the owner or assignee of the prior mortgage loan; or (iii) the lender that uses the same servicer that serviced the

[95] As the Bureau explained in its proposal, the Bureau interprets the language ''account with the same lender'' consistent with secondary market practices. In addition, ''lender'' is defined in Regulation X to mean, generally, the secured creditor or creditors named in the debt obligation and document creating the lien. For loans originated by a mortgage broker that closes a federally related mortgage loan in its own name in a table funding transaction, the lender is the party to whom the obligation is initially assigned at or after settlement.

prior mortgage loan to service the new mortgage loan.

The Bureau has considered commenters' recommendations to revise § 1024.34 to permit servicers to credit escrow accounts for loans with a new lender with the borrower's consent, but the Bureau declines to further amend proposed § 1024.34(b)(2) to expand the types of lenders with whom a borrower's new mortgage loan may be credited. The Dodd-Frank Act amended RESPA section 6(g) to require that servicers either return remaining escrow account balances to the borrower within 20 days or credit a new escrow account for a new mortgage loan with the ''same lender,'' which the Bureau has interpreted to be (i) the lender to whom the prior mortgage loan was initially payable; (ii) the lender that is the owner or assignee of the prior mortgage loan; or (iii) the lender that uses the same servicer that serviced the prior mortgage loan to service the new mortgage loan. The Bureau believes an additional exception to permit servicers to apply remaining escrow balances to lenders who are not the ''same lender'' within the meaning of RESPA section 6(g) would subsume the statutory provision. Moreover, the Bureau believes that the provision in § 1024.34(b)(1) (generally requiring servicers to return remaining escrow balances to borrowers within 20 days of loan payoff) provides borrowers with sufficient flexibility to apply their funds as they wish.

In addition, the Bureau has revised proposed § 1024.34(b)(2) to add the phrase ''if the borrower agrees'' to require servicers to obtain the borrower's consent before crediting an escrow balance to a new escrow account for a new mortgage loan. The Bureau has added this language to ensure borrowers are informed of and agree to a servicer's actions with respect to any remaining escrow balances if the servicer does not return the balance within 20 days under § 1024.34(b)(1). Moreover, unlike the 20-day period in which the servicer must otherwise refund escrow balances in § 1024.34(b)(1), § 1024.34(b)(2) does not require that funds be credited within a particular time frame; the Bureau believes it is appropriate to include a requirement in § 1024.34(b)(2) that the borrower agrees before the servicer takes an action that could delay the disposition of the borrower's escrow account balance. The Bureau also believes it is appropriate to include a requirement that borrowers agree to servicer actions under § 1024.34(b)(2) to avoid potential borrower confusion that might otherwise arise if a servicer did not refund an escrow balance within 20 days, as required under § 1024.34(b)(1). Accordingly, the Bureau believes that the addition of the requirement that a borrower must agree under § 1024.34(b)(2) is necessary and appropriate to achieve the consumer protection purposes of RESPA, including to achieve the purposes of RESPA section 6(g) and to ensure responsiveness to borrower requests. This change is therefore authorized under sections 6(j)(3), 6(k)(1)(E), and 19(a) of RESPA. The Bureau has also made technical revisions to proposed § 1024.34(b)(2) to clarify its relationship to § 1024.34(b)(1), in light of the Bureau's revision to § 1024.34(b)(1) in this final rule.[96]

To ensure servicers can easily credit funds to a new account, the Bureau has added comment 34(b)(2)–2, which explains that a borrower may provide consent either orally or in writing. The Bureau has also added language to § 1024.34(b)(2), referring to amounts remaining in an escrow account ''that is within the servicer's control,'' to replicate language appearing in the statutory provision. Finally, the Bureau is adopting comment 34(b)(2)–1 substantially as proposed to clarify that a servicer is not required to credit funds in an escrow account to an escrow account for a new mortgage loan and may, in all circumstances, comply with the requirements of § 1024.34 by refunding the funds in the escrow account to the borrower pursuant to § 1024.34(b)(1).[97]

Section 1024.35 Error Resolution Procedures

Section 6(e) of RESPA requires servicers to respond to borrowers' ''qualified written requests'' that relate to the servicing of a loan, and § 6(k)(1)(B) of RESPA, added by the Dodd-Frank Act, separately prohibits servicers from charging fees for responding to valid qualified written requests. Section 1463(a) of the Dodd-Frank Act amended RESPA to add new servicer prohibitions regarding borrowers' assertions of error and requests for information. Specifically, section 1463(a) of the Dodd-Frank Act added section 6(k)(1)(C) to RESPA, which states that a servicer shall not ''fail to take timely action to respond to a borrower's requests to correct errors relating to allocation of payments, final balances for purposes of paying off the loan, or avoiding foreclosure, or other standard servicer's duties.'' In addition, section 1463(a) of the Dodd-Frank Act added section 6(k)(1)(D) to RESPA which states that a servicer shall not fail to provide information regarding the owner or assignee of a borrower's loan within ten business days of a borrower's request. Neither Dodd-Frank Act provision suggests that a borrower request to correct an error or for information regarding the owner or assignee of the borrower's loan must be in the form of a ''qualified written request'' to trigger the new servicer prohibitions.

As explained in the proposal, the Bureau believed that both borrowers and servicers would be best served if the Bureau were to clearly define a servicer's obligation to correct errors or respond to information requests as required by RESPA sections 6(k)(1)(C) and (D) and the RESPA provisions regarding qualified written requests. Thus, the Bureau proposed to establish comprehensive, parallel requirements for servicers to respond to specified notices of error and information requests. The Bureau proposed § 1024.35 to set forth the error resolution requirements that servicers would be required to follow to respond to errors asserted by borrowers. The Bureau proposed § 1024.36 to set forth the information request requirements that servicers would be required to follow to respond to requests for information from borrowers. In doing so, the Bureau intended to establish servicer procedural requirements for error resolution and information requests that are consistent with the requirements applicable to a ''qualified written request'' that relates to the servicing of a loan under RESPA. Rather than create overlapping regimes that might confuse and frustrate both borrowers and servicers alike, the Bureau intended to create a uniform regulatory regime by subsuming the qualified written request rules in the new regime established and authorized by the Dodd-Frank Act for notices of error and requests for information more generally. The Bureau believed such a single regulatory regime would reduce the burden on both borrowers and servicers who otherwise would expend wasteful resources navigating between two separate regulatory regimes and parsing form requirements applicable to qualified written requests. To that end, the Bureau proposed to delete current § 1024.21(e), the existing regulations concerning qualified written requests, and provide instead that a qualified written request asserting an error or

[96] The Bureau has added the following language to § 1024.34(b)(2): ''Notwithstanding paragraph (b)(1) of this section * * *''

[97] The Bureau has made a technical correction to comment 34(b)(2)–1 to replace the proposed comment's reference to ''§ 1024.34(a)'' with a corrected reference to ''§ 1024.34(b)(1).''

requesting information regarding the servicing of a mortgage loan would be subject to the new provisions governing notices of error and information requests, as applicable.[98]

Because the Bureau understands that the majority of borrower complaints are submitted orally, the Bureau proposed that both written and oral notices of error would be subject to the error resolution provisions. At the same time, the Bureau recognized that permitting oral error notices would significantly expand servicers' responsibility to respond to notices of error. To enable servicers to allocate resources to respond to errors in a manner that would benefit borrowers, the Bureau proposed a limited list of errors to which the error resolution provisions would apply. As discussed in more detail below, industry commenters were unanimously opposed to applying error resolution requirements under proposed § 1024.35 to errors asserted orally. Consumer advocacy group commenters expressed support for applying the requirements under § 1024.35 to oral error notices, but were strongly opposed to the proposal to limit those errors subject to error resolution procedures under proposed § 1024.35 to a finite list. Industry commenters supported inclusion of a limited list. Based on the Bureau's consideration of these comments and the analysis below, the final rule does not require servicers to comply with error resolution procedures under § 1024.35 for oral notices of error. At the same time, the final rule includes a catch-all provision that defines as an error subject to the error resolution procedures under § 1024.35 errors relating to the servicing of a borrower's mortgage loan. Moreover, the final rule provides that a servicer's policies and procedures should be reasonably designed to provide information to borrowers who are not satisfied with the resolution of a complaint or request for information submitted orally of the procedures for submitting written notices of error and information requests.

Some credit unions, community banks and their trade associations asserted that the Bureau should exempt small servicers from error resolution requirements under § 1024.35 and information request requirements under § 1024.36. Commenters argued that small servicers effectively communicate with borrowers regarding complaints and information requests, and especially disfavored the proposed requirement that small servicers respond to oral notices of error and information requests. In contrast, a consumer advocacy group commenter asserted that exempting small servicers would be inappropriate, as all servicers should be capable of complying with error resolution and information request requirements. Having carefully considered these comments, the Bureau declines to exempt small servicers from error resolution procedures under § 1024.35 and information request procedures under § 1024.36. As discussed above, §§ 1024.35 and 1024.36, as finalized, do not require servicers to comply with such procedures for oral submissions by borrowers. In light of this adjustment, final §§ 1024.35 and 1024.36 primarily provide clarification as to existing obligations under RESPA and Regulation X. Moreover, the burden on all servicers is significantly mitigated. For these reasons, and the reasons discussed below, the Bureau declines to exempt small servicers from error resolution and information request procedures.

Legal Authority

Section 1024.35 implements section 6(k)(1)(C) of RESPA, and to the extent the requirements are also applicable to qualified written requests, sections 6(e) and 6(k)(1)(B) of RESPA. Pursuant to the Bureau's authorities under sections 6(j), 6(k)(1)(E), and 19(a) of RESPA, the Bureau is also adopting certain additions and certain exemptions to these provisions. As explained in more detail below, these additions and exemptions are necessary and appropriate to achieve the consumer protection purposes of RESPA, including ensuring responsiveness to consumer requests and complaints and the provision and maintenance of accurate and relevant information.

35(a) Notice of Error

Section 6(k)(1)(C) of RESPA, as added by section 1463(a) of the Dodd-Frank Act, prohibits servicers from failing to take timely action to respond to requests of borrowers to correct certain errors. However, unlike section 6(e) of RESPA, which sets forth specific rules for submission of and response to ''qualified written requests,'' section 6(k)(1)(C) of RESPA does not specify that borrowers' requests to correct errors must be submitted in any particular format to trigger the new prohibition.

Proposed § 1024.35(a) stated that a servicer must comply with the requirements of § 1024.35 for a notice of error made either orally or in writing and that included the name of the borrower, information that enabled a servicer to identify the borrower's mortgage loan account, and the error the borrower believed had occurred. Section 1024.35(a) was intended to implement RESPA section 6(k)(1)(C), with respect to borrower requests to assert errors generally, and RESPA section 6(e), with respect to qualified written requests by borrowers to correct errors, by defining what constituted a proper borrower request within the meaning of these provisions. The Bureau received comment on proposed § 1024.35(a) and is finalizing it with changes as discussed below.

Substance Over Form

The proposal included proposed comment 35(a)–2, which would have clarified that the substance of the notice of error would determine the servicer's obligation to comply with the error resolution requirements, information request requirements, or both, as applicable. Proposed comment 35(a)–2 stated that no particular language (such as ''qualified written request'' or ''notice of error'') is necessary to set forth a notice of error. The Bureau did not receive comment regarding proposed comment 35(a)–2 and is adopting it as proposed.

Qualified Written Requests

Proposed § 1024.35(a) would have required a servicer to treat a qualified written request that asserts an error relating to the servicing of a loan as a notice of error subject to the requirements of § 1024.35. The Bureau intended to propose servicer obligations applicable to qualified written requests that were the same as requirements applicable to other notices of error that met the requirements for assertions of error under § 1024.35(a). One consumer group commenter expressed support for the proposal because it dispensed with technicalities about whether an assertion of error constituted a valid qualified written request. A trade association commenter said the Bureau failed to define a valid qualified written request and said that proposed § 1024.35 does not fully integrate section 6(e) of RESPA into the proposed error resolution procedures. Another trade association of private mortgage lenders said the proposal did not make clear what constitutes a qualified written request and to what extent servicers must continue to comply with existing law regarding qualified written requests. Having considered these comments, the Bureau notes that final § 1024.31 defines the term ''qualified written request.'' In addition, as

[98] Notably, a notice of error may also constitute a direct dispute under Regulation V, which implements the Fair Credit Reporting Act, if it complies with the requirements in 12 CFR 1022.43.

discussed above, the Bureau has added new comment 31 (qualified written request)-2, which clarifies that the error resolution and information request requirements in §§ 1024.35 and 1024.36 apply as set forth in those sections irrespective of whether the servicer receives a qualified written request. Finally, the Bureau has revised proposed § 1024.35(a) to make clear in the final rule that a qualified written request that asserts an error relating to the servicing of a mortgage loan is a notice of error for purposes of § 1024.35 for which a servicer must comply with all requirements applicable to a notice of error.

Oral Notices of Error

The Bureau proposed to require servicers to comply with the requirements under § 1024.35 for errors asserted by a borrower either orally or in writing. The Bureau believed this approach was warranted because, based on its discussions with consumers, consumer advocates, servicers, and industry trade associations during outreach, the Bureau learned that the vast majority of borrower complaints are asserted orally rather than in writing. The proposal solicited comment regarding whether servicers should be required to comply with the error resolution requirements under § 1024.35 for notices of error received orally.

The Bureau received a number of comments from both consumer groups and various industry members on this question. Consumer advocacy group commenters reiterated their support for applying the requirements under § 1024.35 to notices of error made orally, noting that consumers most often assert errors and request information orally rather than in writing. In contrast, consumer commenters on Regulation Room disfavored the proposal's application of the error resolution requirements under § 1024.35 to notices of error received orally. Consumer commenters, citing their negative experiences attempting to request information from servicers orally, were concerned that encouraging an oral process would weaken consumer protections. Industry commenters also opposed the proposal's application of the error resolution requirements under § 1024.35 to oral notices of error, albeit for different reasons. Industry commenters asserted that applying error resolution requirements to oral notices of error would create new burdens for servicers regarding tracking the notices of error and monitoring borrowers' receipt of written acknowledgements and responses. Industry commenters further stressed that a written process would provide more clarity and certainty as to the nature of the error the borrower asserted and the communications from the servicer to the borrower during the conversation. Further, industry commenters asserted, written notices of error would help avoid situations in which the borrower and servicer have differing recollections as to the content of the borrower's notice of error and the servicer's response during the conversation. Absent a written record, commenters said, servicers would need to record conversations with borrowers to minimize the significant litigation risk. The commenters asserted that recording conversations could be especially costly for small servicers and would require the borrower's consent in many jurisdictions. Some industry commenters also noted their belief that RESPA requires that borrowers assert errors in writing.

Many of the concerns articulated by industry commenters were consistent with those expressed by small entity representatives with whom the Small Business Review Panel conducted outreach in advance of the proposal. The Small Business Review Panel recommended that the Bureau consider requiring small servicers to comply with the error resolution procedures under § 1024.35 only when borrowers asserted errors in writing.[99] The Small Business Review Panel also recommended that the Bureau consider adopting a more flexible process for tracking errors and demonstrating compliance that could be used by small servicers.[100]

The Bureau had anticipated many of these comments and had proposed to delimit the category of issues that could be raised through the error process to mitigate the challenges of identifying oral assertions of error. Nonetheless, after consideration of these comments and the comments received with respect to the Bureau's definition of error as discussed below, the Bureau is amending proposed § 1024.35(a) to apply the error resolution requirements under § 1024.35 solely to notices of error received in writing, and the Bureau is broadening the definition of error as well. While borrowers may continue to assert errors orally, servicers will not be required to comply with the formal error resolution requirements outlined in § 1024.35 for such assertions of errors. Instead, the Bureau has added § 1024.38(b)(1)(ii), which generally requires that servicers maintain policies and procedures that are reasonably designed to ensure that the servicer can investigate, respond to, and, as appropriate, make corrections in response to complaints, whether written or oral, asserted by borrowers. In addition, the Bureau has added a requirement in § 1024.38(b)(5) that servicers establish policies and procedures reasonably designed to achieve the objective of informing borrowers of the procedures for submitting written notices of error set forth in § 1024.35 and written information requests set forth in § 1024.36.

The Bureau believes that imposing the formal requirements under § 1024.35 only to written notices of error and addressing oral notices of error instead through the policies and procedures requirements under § 1024.38 strikes the appropriate balance between ensuring responsiveness to consumer requests and complaints and mitigating the burden on servicers of following and demonstrating compliance with specific procedures with respect to oral notices of error. The Bureau believes that the need to provide additional flexibility to servicers with respect to responding to oral notices of error is particularly necessary in light of the Bureau's further decision, as discussed below, to expand the list of covered errors under § 1024.35 to include a catch-all provision for errors relating to the servicing of mortgage loans. On the one hand, the Bureau is persuaded, for the reasons discussed further below, that it should not delimit the set of issues that consumers should be able to raise within the error resolution process. On the other hand, the Bureau also is persuaded that determining from a telephone call from a borrower to a servicer whether the borrower is asserting an error rather than simply, for example, posing a question can be challenging. Drawing this line—and triggering the investigation and response requirement with respect to errors—would be exponentially more difficult if any concern relating to the servicing of the borrower's mortgage loan could constitute an error.

The final rule will thus require servicers to maintain policies and procedures reasonably designed to ensure that servicers investigate, respond to and, as appropriate, resolve oral complaints on a more informal basis, without having to follow the formal error resolution requirements, so long as the servicer has policies and procedures reasonably designed to

ensure that borrowers are informed of the written error resolution procedures. At the same time, the final rule will provide a broader definition of errors subject to the requirements of § 1024.35.

Borrower's Representative

Proposed comment 35(a)–1 would have clarified that a notice of error submitted by an agent of the borrower is considered a notice of error submitted by the borrower. Proposed comment 35(a)–1 would have further permitted servicers to undertake reasonable procedures to determine if a person who claims to be an agent of a borrower has authority from the borrower to act on the borrower's behalf. Several industry commenters said it would be costly and burdensome to determine whether a third party has authority to act on a borrower's behalf. Many requested clarification as to what the Bureau believes constitutes acting on the borrower's behalf. Further, some industry commenters expressed concern about potential liability for the improper release of information, including the risk of violating State or Federal privacy laws, as well as what commenters perceived to be increased risk of identity theft and fraud. Finally, a few industry commenters took the position that only the borrower, but not the borrower's agent, should be permitted to assert notices of error.

Section 6(e)(1)(A) of RESPA states that a qualified written request may be provided by a ''borrower (or an agent of the borrower).'' Thus, one consumer advocacy group commenter noted that the proposal to permit borrowers' agents to submit notices of error is consistent with the statutory requirement. Consumer groups also requested that the Bureau clarify that the timelines for error resolution will not toll during the period in which the servicer attempts to validate through reasonable policies and procedures that a third party purporting to act on a borrower's behalf is, in fact, an agent of the borrower.

Having considered these comments, the Bureau is amending proposed comment 35(a)–1 to address servicers' concerns about potential liability for the improper release of information. The final comment clarifies that servicers may have reasonable procedures to determine if a person that claims to be an agent of a borrower has authority from the borrower to act on the borrower's behalf, for example, by requiring purported agents to provide documentation from the borrower stating that the purported agent is acting on the borrower's behalf. Upon receipt of such documentation, the servicer shall treat a notice of error as having been submitted by the borrower. The Bureau acknowledges that requiring servicers to respond to error notices submitted by borrowers' agents is more costly than limiting the requirement to borrowers' notices, but notes that this approach is consistent with section 6(e)(1)(A) of RESPA with respect to a qualified written request. The Bureau believes that it is necessary and appropriate to achieve the consumer protection purposes of RESPA, including ensuring responsiveness to borrower requests and complaints, to apply this requirement to all written notices of error, especially since borrowers who are experiencing difficulty in making their mortgage payments or in dealing with their servicer may turn, for example, to a housing counselor or other knowledgeable persons to assist them in addressing such issues. The Bureau declines to define further the term ''agent.'' The concept of agency has historically been defined under State or other applicable law. Thus, it is appropriate for the definition to defer to applicable State law regarding agents.

35(b) Scope of Error Resolution

Section 6(e) of RESPA requires servicers to respond to ''qualified written requests'' asserting errors or requesting information relating to the servicing of a federally-related mortgage loan. Section 1463(a) of the Dodd-Frank Act amended RESPA to add section 6(k)(1)(C), which states that a servicer shall not ''fail to take timely action to respond to a borrower's request to correct errors relating to allocation of payments, final balances for purposes of paying off the loan, or avoiding foreclosure, or other standard servicer's duties.'' The Bureau believes that standard servicer duties are those typically undertaken by servicers in the ordinary course of business. Such duties include not only the obligations that are specifically identified in section 6(k)(1)(C) of RESPA, but also those duties that are defined as ''servicing'' by RESPA, as implemented by this rule, as well as duties customarily undertaken by servicers to investors and consumers in connection with the servicing of a mortgage loan. These standard servicer duties are not limited to duties that constitute ''servicing,'' as defined in this rule, and include, for example, duties to comply with investor agreements and servicing program guides, to advance payments to investors, to process and pursue mortgage insurance claims, to monitor coverage for insurance (*e.g.,* hazard insurance), to monitor tax delinquencies, to respond to borrowers regarding mortgage loan problems, to report data on loan performance to investors and guarantors, and to work with investors and borrowers on options to mitigate losses for defaulted mortgage loans.[101]

Limited List

The Bureau proposed § 1024.35(b) to implement section 6(k)(1)(C) of RESPA. Proposed § 1024.35(b) set forth a limited list of errors to which the error resolution provisions would apply. The Bureau proposed a limited list because it believed such a list would provide certainty to both borrowers and servicers regarding the types of errors that are subject to the error resolution process. Further, as discussed above, the Bureau believed a limited list would enable servicers to allocate resources to respond to errors in a manner that would ultimately benefit borrowers. The Bureau also considered that it was proposing to require servicers to respond to both oral and written error notices and information requests in compressed time periods. Finally, the Bureau considered the feedback the Small Business Review Panel received from small entity representatives regarding whether the error resolution procedures should include a catch-all provision to the enumerated list of errors. In general, small entity representatives commented favorably on the Bureau's proposal to delimit the list of errors.

The Bureau solicited comment regarding whether the list of errors to which error resolution procedures would apply should include a catch-all provision or be limited to an enumerated list. Industry commenters supported the establishment of a limited list of errors, noting certainty, clarity, and notice as its primary benefits. Consumer group commenters generally opposed limiting notices of error to an enumerated list. Consumer advocates asserted that the proposal was a departure from and offered fewer consumer protections than the existing qualified written request process under section 6 of RESPA, which incorporates a catch-all provision for errors relating to the servicing of a borrower's mortgage loan. Some consumer advocates noted the reference in section 6(k)(1)(C) of RESPA to ''standard servicer's duties,'' and argued that the catch-all provision should likewise cover all errors relating to ''standard servicer's duties.'' In addition, some consumer group commenters noted the fluid nature of

[101] In providing these examples, the Bureau is making no judgment regarding whether they fall within the meaning of ''servicing'' as defined in this rule.

mortgage servicing and cautioned that a limited list of covered errors lacks the flexibility necessary to ensure that consumers will be adequately protected as servicing practices evolve.

After consideration of these comments, and as discussed further below, the Bureau has decided to revise proposed § 1024.35(b) to include a catch-all that includes as an error errors relating to the servicing of a borrower's mortgage loan. In addition, as discussed below, final § 1024.35(b) substantively retains the enumerated errors listed in the proposal. The Bureau believes revising proposed § 1024.35(b) in this manner is necessary and appropriate to achieve the consumer protection purposes of RESPA, including ensuring responsiveness to consumer requests and complaints in light of the fluidity of the mortgage market and the inability to anticipate in advance and delineate all types of errors related to servicing that borrowers may encounter, and which should be subject to the error resolution process under § 1024.35 to prevent borrower harm. At the same time, the Bureau believes that the costs and burdens created by having a more expansive definition of the term error are significantly mitigated because, as discussed above, the final rule applies error resolution requirements under § 1024.35 only to written assertions of error. Moreover, the final rule implements an error resolution process that is consistent with the existing process for responding to qualified written requests under RESPA section 6, which includes a catch-all for servicing-related errors.

Covered Errors

The Bureau proposed comment 35(b)–1, which would have clarified that a servicer would not be required to comply with the requirements of proposed § 1024.35(d) and (e) if a notice related to something other than one of the types of errors in proposed § 1024.35(b). The proposed comment provided examples of categories of excluded errors that would not be considered covered errors pursuant to proposed § 1024.35(b). These included matters relating to the origination or underwriting of a mortgage loan, matters relating to a subsequent sale or securitization of a mortgage loan, and matters relating to a determination to sell, assign, or transfer the servicing of a mortgage loan.

Industry commenters supported the proposed exclusion, noting that the categories the Bureau proposed to exclude are unrelated to servicing and largely beyond servicers' knowledge. Some consumer group commenters objected that the proposed exclusions were overly broad. The Bureau believes that a mortgage servicer is generally not in a position to investigate or resolve borrower complaints regarding potential errors that may have occurred during an origination, underwriting, sale, or securitization process. Accordingly, the Bureau is adopting comment 35(b)–1 substantially as proposed. The final comment clarifies that, in addition to § 1024.35(d) and (e), servicers need not comply with § 1024.35(i) with respect to a borrower's assertion of an error that is not defined as an error in § 1024.35(b). Final comment 35(b)–1 also includes a clarification that the failure to transfer accurately and timely information relating to a borrower's loan account to a transferee servicer is an error for purposes of § 1024.35, while matters relating to an initial determination to transfer servicing are not.

A trade association of reverse mortgage lenders also commented regarding the scope of the error resolution procedures, urging the Bureau to exclude reverse mortgages from the scope of covered error. Having considered this comment, the Bureau notes that servicers of reverse mortgage transactions are already subject to the qualified written request procedures set forth in section 6(e) of RESPA and § 1024.21(e) of Regulation X. Likewise, pursuant to final § 1024.30, the error resolution requirements under § 1024.35 apply to reverse mortgage transactions that are mortgage loans, as that term is defined in final § 1024.31. Accordingly, to the extent that a borrower asserts an error under § 1024.35 that is applicable to such a reverse mortgage, the servicer shall comply with error resolution procedures as to the error. For example, because § 1024.30 generally excludes servicers of reverse mortgage transactions from § 1024.41, errors asserted under § 1024.35(b)(9) and (10), discussed below, are not applicable to reverse mortgage transactions.

35(b)(1)

Proposed § 1024.35(b)(1) would have included as a covered error a servicer's failure to accept a payment that conforms to the servicer's written requirements for the borrower to follow in making payments. The Bureau proposed § 1024.35(b)(1) to implement, in part, section 6(k)(1)(C) of RESPA with respect to borrower requests to correct errors relating to allocation of payments for a borrower's account and ''other standard servicer's duties.''

A failure to accept a proper payment will necessarily have implications for the correct application of borrower payments. The Bureau further believes that proper acceptance of payments is a standard servicer duty. Moreover, proper acceptance of payments is, by definition, servicing, and already subject to the qualified written request procedure set forth in section 6(e) of RESPA and current § 1024.21(e) of Regulation X. The Bureau did not receive comment regarding proposed § 1024.35(b)(1) and is adopting it as proposed.

35(b)(2)

Proposed § 1024.35(b)(2) would have included as an error a servicer's failure to apply an accepted payment to the amounts due for principal, interest, escrow, or other items pursuant to the terms of the mortgage loan and applicable law. The Bureau proposed § 1024.35(b)(2) to implement, in part, section 6(k)(1)(C) of RESPA with respect to borrower requests to correct errors relating to the allocation of payments for a borrower's account and other standard servicer duties. Proper allocation of payments is also, by definition, servicing, and already subject to the qualified written request procedures set forth in section 6(e) of RESPA and current § 1024.21(e) of Regulation X. The Bureau did not receive comment regarding proposed § 1024.35(b)(2) and is adopting it as proposed.

35(b)(3)

Proposed § 1024.35(b)(3) would have included as an error a servicer's failure to credit a payment to a borrower's mortgage loan account as of the date of receipt, where such failure results in a charge to the consumer or the furnishing of negative information to a consumer reporting agency. The Bureau proposed § 1024.35(b)(3) to implement, in part, section 6(k)(1)(C) of RESPA with respect to borrower requests to correct errors relating to the allocation of payments for a borrower's account and other standard servicer duties. A failure to credit a payment as of the date of receipt may have implications for the correct application of borrower payments. A servicer's failure to credit a payment promptly may cause the servicer to report to a borrower improper information regarding the amounts owed by the borrower and may cause a servicer to misapply other payments received by the borrower. Further, a servicer's failure to credit borrower payments promptly may generate improper late fees and other charges. The Bureau further believes that prompt crediting of borrower payments is a standard servicer duty as set forth in section 6(k)(1)(C) of RESPA. The Bureau also observes that prompt crediting of borrower payments is, by definition,

servicing and, therefore, is subject to the qualified written request procedure set forth in section 6(e) of RESPA.

As the Bureau noted in the 2012 RESPA Servicing Proposal, prompt crediting of payments to consumers is required by section 129F of TILA, which was added by section 1464 of the Dodd-Frank Act and will be implemented by § 1026.36(c)(1) in the 2013 TILA Servicing Final Rule. For a mortgage loan secured by a principal dwelling, TILA section 129F mandates that servicers shall not fail to credit a payment to a consumer's loan account as of the date of receipt, except when a delay in crediting does not result in any charge to the consumer, or in the furnishing of negative information to a consumer reporting agency. *See* 15 U.S.C. 1639f. TILA section 129F provides a specific exception for payments that do not conform to a servicer's written requirements, but nonetheless are accepted by the servicer, in which case the servicer shall credit the payment as of five days after receipt. *See* 15 U.S.C. 1639f(b). Servicers of mortgage loans covered by TILA section 129F have a duty to comply with that provision.

A credit union and a non-bank servicer commented on proposed § 1024.35(b)(3). The credit union requested greater flexibility as to payments received outside of the servicer's operating hours or at the end of the business day. The non-bank servicing company requested clarification that the proposal was not intended to impact servicers' ability as to scheduled interest loans to credit an account as of the receipt date and apply payment as of the scheduled due date. The Bureau believes § 1024.35(b)(3) as proposed would have provided servicers sufficient flexibility to credit payments, as it would have limited errors to where the failure to credit a payment as of the date of receipt results in a charge to consumers or furnishing of negative information to a credit reporting agency. Nevertheless, the Bureau recognizes that there would be little consumer benefit to subjecting servicers to potentially overlapping standards as to prompt crediting of borrowers' accounts. At the same time, for those loans that are not subject to TILA section 129F, the Bureau believes that it would be inappropriate to extend the requirements of that provision beyond the scope mandated by Congress, as implemented by § 1026.36(c)(1) of the 2013 TILA Servicing Final Rule. Accordingly, the Bureau is revising the proposed language in final § 1024.35(b)(3) to make clear that a servicer's failure to credit a payment to a borrower's mortgage loan account as of the date of receipt is an error only in those circumstances in which the failure to credit as of the date of receipt would contravene § 1026.36(c)(1). Final § 1024.35(b)(3) defines as an error the failure to credit a payment to a borrower's mortgage loan account as of the date of receipt in violation of 12 CFR 1026.36(c)(1). Because servicers will already be required to comply with § 1026.36(c)(1) with respect to certain mortgage loans they service, the Bureau does not believe that defining their failure to do so as an error imposes additional burden on servicers.

35(b)(4)

Proposed § 1024.35(b)(4) would have included as an error a servicer's failure to make disbursements from an escrow account for taxes, insurance premiums, or other charges, including charges that the borrower and servicer have voluntarily agreed that the servicer should collect and pay, as required by current § 1024.17(k) and proposed § 1024.34(a), or to refund an escrow account balance in a timely manner as required by proposed § 1024.34(b). The Bureau proposed § 1024.35(b)(4) to implement, in part, section 6(k)(1)(C) of RESPA with respect to borrower requests to correct errors relating to the allocation of payments for a borrower's account and other standard servicer duties.

In the normal course of business, servicers typically engage in collecting payments from borrowers to fund escrow accounts and disburse payments from escrow accounts to pay borrower obligations for taxes, insurance premiums, and other charges. Servicers typically undertake this obligation on behalf of investors because a borrower's maintenance of an escrow account reduces risk for investors that unpaid taxes may generate tax liens that are higher in priority than a lender's mortgage lien and that unpaid insurance may cause lapses in insurance coverage that present risk for investors in the event of a loss. Servicers are required to make disbursements from escrow accounts in a timely manner pursuant to section 6(g) of RESPA and are required to account for the funds credited to an escrow account pursuant to section 10 of RESPA. In addition, the proper disbursement of escrow funds is, by definition, servicing and, therefore, is currently subject to the qualified written request procedure set forth in section 6(e) of RESPA and current § 1024.21(e) of Regulation X. A credit union commenter agreed that proposed § 1024.35(b)(4) should constitute an error. For the reasons set forth above and in the proposal, the Bureau is adopting § 1024.35(b)(4) as proposed.

35(b)(5)

Proposed § 1024.35(b)(5) would have included as an error a servicer's imposition of a fee or charge that the servicer lacks a reasonable basis to impose upon the borrower. The Bureau proposed § 1024.35(b)(5) to implement, in part, section 6(k)(1)(C) of RESPA with respect to standard servicer duties. The Bureau believes that it is a typical servicer duty, both to the borrower and to the servicer's principal, to ensure that the servicer has a reasonable basis to impose a charge on a borrower.

The Bureau believes that servicers should not impose fees on borrowers that are not bona fide—that is, fees that a servicer does not have a reasonable basis to impose upon a borrower. Examples of non-bona fide charges include such common sense errors as late fees for payments that were not late, default property management fees for borrowers that are not in a delinquency status that would justify the charge, charges from service providers for services that were not actually rendered with respect to a borrower's mortgage loan account, and charges for force-placed insurance in circumstances not permitted by final rule § 1024.37.

Improper fees harm both mortgage loan borrowers and the investors that are mortgage servicers' principals. Improper and uncorrected fees harm borrowers by taking funds that may otherwise be used to keep a mortgage loan current. Further, improper fees reduce recovery values available to investors from foreclosures or loss mitigation activities. Servicers that operate in good faith in the normal course of business refrain from imposing charges on borrowers that the servicer does not have a reasonable basis to impose and correct errors relating to those fees when they arise.

Industry commenters asserted that the term ''reasonable basis'' is open to interpretation and thus urged the Bureau to further define the term or to otherwise provide additional clarification. One credit union trade association suggested that the Bureau prohibit fees for which the servicer lacks a legal basis. Having considered these comments, the Bureau believes it is appropriate to provide more clarity as to what constitutes a fee for which a servicer lacks a reasonable basis. Accordingly, the Bureau has added new comment 35(b)–2, which provides examples of fees that a servicer lacks a reasonable basis to impose. The Bureau

is otherwise adopting § 1024.35(b)(5) as proposed.

35(b)(6)

Proposed § 1024.35(b)(6) would have included as an error a servicer's failure to provide an accurate payoff balance to a borrower upon request pursuant to 12 CFR 1026.36(c)(3). The Bureau intended through this provision to implement TILA section 129G, which was added by section 1464 of the Dodd-Frank Act and which requires that a creditor or servicer of a home loan send an accurate payoff balance amount to the borrower within a reasonable time, but in no case more than seven business days after the receipt of a written request for such balance from or on behalf of a borrower. The Bureau proposed § 1024.35(b)(6) to implement, in part, section 6(k)(1)(C) of RESPA with respect to borrower requests to correct errors relating to a final balance for purposes of paying off a mortgage loan and standard servicer duties.

Servicers already have an obligation to comply with the timing requirements of section 129G of TILA with respect to any mortgage loan that constitutes a ''home loan'' as used in section 129G of TILA.[102] The Bureau proposed § 1024.35(b)(6) because it believed, consistent with TILA section 129G, that borrowers require accurate payoff statements to manage their mortgage loan obligations. A payoff statement is necessary any time a borrower repays a mortgage loan, and servicers routinely provide payoff statements for borrowers to refinance or pay in full their mortgage loan obligations. However, consumer advocates have indicated that servicers have failed, or refused, to provide payoff statements to certain borrowers or have required borrowers to make a payment on a mortgage loan as a condition of fulfilling the borrower's request for a payoff statement.[103] Any such conduct has the perverse effect of impeding a borrower's ability to pay a mortgage loan obligation in full.

The Bureau did not receive comment regarding proposed § 1024.35(b)(6) but is revising the proposed language in the final rule to make clear that the failure to provide a payoff balance is an error only in those circumstances in which TILA section 129G, as implemented by § 1026.36(c)(3) of the 2013 TILA Servicing Final Rule, applies. The Bureau recognizes that there would be little consumer benefit to subjecting servicers to potentially overlapping standards under TILA and RESPA as to the provision of a payoff statement. At the same time, for those loans that are not subject to TILA section 129G, the Bureau believes that it would be inappropriate to extend the requirements of the provision beyond the scope mandated by Congress, as implemented by § 1026.36(c)(3).

Final § 1024.35(b)(6) defines as an error the failure to provide an accurate payoff balance amount upon a borrower's request in violation of section § 1026.36(c)(3). Because servicers will already be required to comply with the timeframes set forth in § 1026.36(c)(3) with respect to certain mortgage loans they service, the Bureau does not believe that defining their failure to do so as an error imposes additional burden on servicers.

35(b)(7)

Proposed § 1024.35(b)(7) would have included as an error a servicer's failure to provide accurate information to a borrower with respect to loss mitigation options available to the borrower and foreclosure timelines that may be applicable to the borrower's mortgage loan account, as required by proposed §§ 1024.39 and 1024.40. The Bureau proposed § 1024.35(b)(7) to implement, in part, section 6(k)(1)(C) of RESPA with respect to borrower requests to correct errors relating to avoiding foreclosure, as well as errors relating to standard servicer duties.

In order to pursue loss mitigation options that may benefit both the borrower and the owner or assignee of the borrower's mortgage loan, a borrower requires accurate information about the loss mitigation options available to the borrower, the requirements for receiving an evaluation for any such loss mitigation option, and the applicable timelines relating to both the evaluation of the borrower for the loss mitigation options and any potential foreclosure process.

The Bureau believes that borrowers may benefit from asserting errors with respect to a servicer's failure to provide information regarding loss mitigation options that may be available to the borrower but for which the servicer has not provided information to the borrower. By correcting such errors and providing the borrower with accurate information regarding such loss mitigation options, a servicer can help a borrower receive an evaluation for available loss mitigation options pursuant to § 1024.41 and to potentially receive an offer of such an option, which may be mutually beneficial to the borrower and the owner or assignee of the borrower's mortgage loan.

Further, the Bureau believes that the National Mortgage Settlement, servicer participation in Home Affordable Modification Program (HAMP) sponsored by the U.S. Department of the Treasury (Treasury) and HUD, and servicer participation in other loss mitigation programs required by Fannie Mae and Freddie Mac demonstrate that, at present, servicers typically provide borrowers with information regarding loss mitigation options and foreclosure and that providing such information to borrowers is a standard servicer duty.

One non-bank servicer and one credit union commented on proposed § 1024.35(b)(7). Both advocated against inclusion of a servicer's failure to provide information regarding loss mitigation options as an error subject to error resolution procedures under § 1024.35. The credit union asserted that lenders are incentivized to provide accurate loss mitigation information, as they try to avoid foreclosing upon properties.

The Bureau believes it is critical for borrowers to have information regarding available loss mitigation options and requiring that a servicer comply with error resolution procedures as to a borrower assertion that a servicer failed to provide such information is important to ensure that borrowers receive this information. The Bureau does not believe there is significant risk that the rule will result in servicers limiting options offered to consumers, as investors and guarantors dictate the loss mitigation options available to borrowers. Further, the Bureau notes that the failure of a servicer to provide accurate information will create liability under this section only if the servicer fails to correct the error when called to its attention. Accordingly, the Bureau is adopting § 1024.35(b)(7) as proposed, except that the Bureau has removed the reference to § 1024.40 in light of other changes to the proposed rule.

35(b)(8)

Proposed § 1024.35(b)(8) would have included as an error a servicer's failure to accurately and timely transfer information relating to a borrower's mortgage loan account to a transferee servicer. The Bureau proposed § 1024.35(b)(8) to implement, in part, section 6(k)(1)(C) of RESPA with respect to borrower requests to correct errors relating to standard servicer duties.

[102] In the Bureau's 2013 TILA Servicing Final Rule, the Bureau interpreted the use of the term ''home loans'' to include consumer credit transactions secured by a consumer's dwelling.

[103] *See, e.g., Mortgage Servicing: An Examination of the Role of Federal Regulators in Settlement Negotiations and the Future of Mortgage Servicing Standards: Joint Hearing Before the Subcomm. on Fin. Inst. & Consumer Credit & Subcomm. on Oversight & Investigations of the Hous. Fin. Serv. Comm.*, 112th Cong. 76 (July 7, 2011) (statement of Mike Calhoun, President, Center for Responsible Lending).

The Bureau believes that the accurate and timely transfer of information relating to a borrower's mortgage account is a standard servicer duty. In the normal course of business, servicers typically anticipate that they will be required to transfer servicing for some mortgage loans they service. Owners or assignees of mortgage loans typically have rights to transfer servicing for a mortgage loan pursuant to the requirements set forth in mortgage servicing agreements. Servicers generally are required to develop capacity for transferring information to transferee servicers in order to comply with such obligations to owners or assignees of mortgage loans. Further, servicers generally are required to develop capacity to download data for transferred mortgage loans onto the servicer's servicing platform. Borrowers may be harmed, however, if information that is transferred to transferee servicers is not accurate, current, or is not properly captured by a transferee servicer. In certain circumstances, such failure may cause errors to occur relating to allocating payments, calculating final balances for purposes of paying off a mortgage loan, or avoiding foreclosure.

Accordingly, the 2013 RESPA Servicing Final Rule requires servicers to maintain policies and procedures reasonably designed to achieve the objective of facilitating servicing transfers. Specifically, § 1024.38(b)(4)(i) provides that as a transferor servicer, a servicer must maintain policies and procedures reasonably designed to ensure the timely transfer of all information and documents in the possession or control of the servicer relating to a transferred mortgage loan to a transferee servicer in a form and manner that ensures the accuracy of the information and enables a transferee servicer to comply with its obligations to the owner or assignee of the mortgage loan and applicable law.

Under proposed § 1024.35(b)(8), a servicer's failure to accurately and timely transfer information relating to a borrower's mortgage loan account to a transferee servicer would constitute an error. The Bureau believes that by defining an error in this way, a borrower will have a remedy to ensure that a transferor servicer provides information to a transferee servicer that accurately reflects the borrower's account consistent with the obligations applicable to a servicer's general servicing policies and procedures. The Bureau did not receive comment regarding § 1024.35(b)(8) and is adopting it as proposed.

35(b)(9) and 35(b)(10)

Proposed § 1024.35(b)(9) would have included as an error a servicer's failure to suspend a foreclosure sale in the circumstances described in proposed § 1024.41(g). The Bureau proposed § 1024.35(b)(9) to implement, in part, section 6(k)(1)(C) of RESPA with respect to borrower requests to correct errors relating to avoiding foreclosure and other standard servicer duties.

Proposed § 1024.41(g) provided that a servicer that offers loss mitigation options to borrowers in the ordinary course of business would be prohibited from proceeding with a foreclosure sale when a borrower has submitted a complete application for a loss mitigation option by a specified date unless the servicer denies the borrower's application for a loss mitigation option (including any appeal thereof), the borrower rejects the servicer's offer of a loss mitigation option, or the borrower fails to perform on a loss mitigation agreement. These requirements are discussed in more detail in the section-by-section analysis for § 1024.41 below.

A credit union commenter asserted that failure to suspend a foreclosure sale in the circumstances described in proposed § 1024.41(g) should not be considered an error subject to the error resolution requirements under § 1024.35 because, the commenter reasoned, a lender will delay foreclosure when there is a legitimate need to do so. Having considered the comment, and as explained with respect to § 1024.41, the Bureau continues to believe it is appropriate to prohibit a servicer from completing the foreclosure process until after a borrower has had a reasonable opportunity to submit an application for a loss mitigation option and the servicer has completed the evaluation of the borrower for a loss mitigation option, and that a borrower should be able to assert an error where a servicer fails to comply with these procedures.

The Bureau, however, is revising proposed § 1024.35(b)(9) in light of changes to proposed § 1024.41. Final § 1024.35(b)(9) defines as an error subject to error resolution requirements under § 1024.35 making the first notice or filing required by applicable law for any judicial or non-judicial foreclosure process in violation of § 1024.41(f) or (j). The Bureau has also added new § 1024.35(b)(10) which defines as an error moving for foreclosure judgment or order of sale, or conducting a foreclosure sale in violation of § 1024.41(g) or (j).

35(b)(11)

New § 1024.35(b)(11) includes a catch-all that applies error resolution procedures to errors relating to the servicing of a borrower's mortgage loan. As discussed above, the Bureau solicited comment regarding whether the list of covered errors should include a catch-all provision. The Bureau also requested comment as to whether to add additional specific errors to the list of errors under § 1024.35. In particular, the Bureau solicited comment regarding whether to include as an error a servicer's failure to correctly evaluate a borrower for a loss mitigation option.

Industry commenters supported the inclusion of a limited list of errors, citing certainty, clarity, and notice as its primary benefits. Consumer group commenters generally opposed limiting notices of error to a finite list. Consumer advocates asserted that the proposal was a departure from and offered fewer consumer protections than the existing qualified written request process under section 6 of RESPA, which applies to all errors relating to servicing. In addition, some consumer group commenters noted the fluid nature of mortgage servicing and cautioned that a finite list lacks the flexibility necessary to ensure that consumers will be adequately protected as servicing practices evolve.

As to whether the Bureau should add additional specific errors to the list of covered errors, some consumer groups suggested the addition of specific errors, including errors relating to escrow accounts, servicing transfer, disclosures, and loss mitigation, while also reiterating their support for a broad catch-all provision. While most industry commenters said the proposed list of covered errors was adequate, a credit union commenter suggested that the Bureau add requests to cancel liens once accounts have been paid in full. Both consumer groups and industry commented regarding whether to include a servicer's failure to correctly evaluate a borrower for a loss mitigation option as an error. One consumer group urged the Bureau to do so, asserting that because the Dodd-Frank Act requires servicers to take timely action to correct errors relating to avoiding foreclosure, the plain language of the statute suggests that borrowers should be able to assert errors related to loss mitigation before they get to the point of a foreclosure sale. The commenter further contended that the appeals process set forth in proposed § 1024.41(h) will not hold servicers sufficiently accountable for uncorrected errors. The commenter said that borrowers need a statutory remedy for uncorrected errors. Another

consumer group advocated for a catch-all sufficiently broad to capture the array of servicer loss mitigation duties. An industry association took the opposing view, citing concerns about the inability to objectively measure whether a servicer evaluated a borrower for an option correctly. The industry commenter requested that should the Bureau add this category as a covered error, the Bureau also clarify that a servicer who complies with § 1024.41 has not committed the error.

As noted in the proposal, the Bureau believes that the appeals process set forth in § 1024.41(h) provides an effective procedural means for borrowers to address issues relating to a servicer's evaluation of a borrower for a loan modification program. For this reason, and the reasons stated below with respect to loss mitigation practices, the Bureau declines to add a servicer's failure to correctly evaluate a borrower for a loss mitigation option as a covered error in the final rule.

The Bureau is, however, adding new § 1024.35(b)(11), which includes a catch-all that defines as an error subject to the requirements of § 1024.35 errors relating to the servicing of a borrower's mortgage loan. The Bureau believes that any error related to the servicing of a borrower's mortgage loan also relates to standard servicer duties. The Bureau also agrees with consumer advocacy commenters that the mortgage market is fluid and constantly changing and that it is impossible to anticipate with certainty the precise nature of the issues that borrowers will encounter. The Bureau, therefore, believes that it is necessary and appropriate to achieve the purposes of RESPA to craft error resolution procedures that are sufficiently flexible to adapt to changes in the mortgage market and to encompass the myriad and diverse types of errors that borrowers may encounter with respect to their mortgage loans. At the same time, the Bureau believes the costs and burdens created by having a more expansive definition of error are significantly mitigated because, as discussed above, under the final rule the requirements under § 1024.35 apply only to written notices of error. Moreover, the final rule adopts a process that is consistent with the existing process for responding to qualified written requests under RESPA section 6, which likewise includes a catch-all for servicing-related errors. The Bureau declines to add additional covered errors beyond the catch-all.

35(c) Contact Information for Borrowers To Assert Errors

The Bureau proposed § 1024.35(c), which would have permitted a servicer to establish an exclusive telephone number and address that a borrower must use to assert an error. If a servicer chose to establish a separate telephone number and address for receiving errors, the proposal would have required the servicer to provide the borrower a notice that states that the borrower may assert an error at the telephone number and address established by the servicer for that purpose. Proposed comment 35(c)–1 would have clarified that if a servicer has not designated a telephone number and address that a borrower must use to assert an error, then the servicer will be required to comply with the error resolution requirements for any notice of error received by any office of the servicer. Proposed comment 35(c)–2 would have further clarified that the written notice to the borrower may be set forth in another written notice provided to the borrower, such as a notice of transfer, periodic statement, or coupon book. Proposed comment 35(c)–2 would have further clarified that if a servicer establishes a telephone number and address for receipt of notices of error, the servicer must provide that telephone number and address in any communication in which the servicer provides the borrower with contact information for assistance from the servicer.

The Bureau proposed to allow servicers to establish a telephone number and address that a borrower must use to assert an error in order to allow servicers to direct oral and written errors to appropriate personnel that have been trained to ensure that the servicer responds appropriately. As the proposal noted, at larger servicers with other consumer financial service affiliates, many personnel simply do not typically deal with mortgage servicing-related issues. For instance, at a major bank servicer, a borrower might assert an error to local bank branch staff, who likely would not have access to the information necessary to address their error. Thus, the Bureau reasoned, if a servicer establishes a telephone number and address that a borrower must use, a servicer would not be required to comply with the error resolution requirements for errors that may be received by the servicer through a different method.

Most industry commenters favored allowing servicers to designate an address and telephone number to which borrowers must direct error notices. At the same time, such commenters asserted that creating an exclusive intake portal was not sufficient to offset the burdens inherent in permitting oral error notices to which error resolution requirements apply. Some commenters said that designating telephone lines for error notices could be especially costly for small servicers. Thus, one community bank trade association argued that the proposal favored large institutions. Two industry commenters requested clarification regarding how servicers must treat error notices sent to the wrong address. Finally, one credit union commenter asserted that servicers should only be required to include designated telephone numbers and addresses in regular forms of communication to borrowers, such as the periodic statement. In contrast, consumer group commenters suggested that to the extent a servicer designates a telephone line or address, the servicer should be required to post such information on its Web site and to include it in mailed notices.

Because the final rule removes the requirement that servicers comply with error resolution requirements under § 1024.35 for oral notices of error, the Bureau believes that it is no longer necessary to regulate the circumstances under which servicers may direct oral errors to an exclusive telephone number that a borrower must use to assert an error. However, for written error notices, the Bureau continues to believe that it is reasonable to permit servicers to designate a specific address for the intake of notices of error. Allowing a servicer to designate a specific address is consistent with current requirements of Regulation X with respect to qualified written requests. Current § 1024.21(e)(1) permits a servicer to designate a ''separate and exclusive office and address for the receipt and handling of qualified written requests.'' Moreover, the Bureau believes that identifying a specific address for receiving errors and information requests will benefit consumers. By providing a specific address, servicers will identify to consumers the office capable of addressing errors identified by consumers.

The Bureau believes it is critical for servicers to publicize any designated address to ensure that borrowers know how properly to assert an error and to avoid evasion by servicers of error resolution procedures. This is especially important because, as noted in the proposal, servicers who designate a specific address for receipt of error notices are not required to comply with error resolution procedures for notices sent to the wrong address. Accordingly, final § 1024.35(c) requires servicers that

designate an address for receipt of notices of error to post the designated address on any Web site maintained by the servicer if the Web site lists any contact address for the servicer. In addition, final comment 35(c)–2 retains the clarification that servicers that establish an address that a borrower must use to assert an error, must provide the address to the borrower in any communication in which the servicer provides the borrower with contact information for assistance. The Bureau is otherwise adopting § 1024.35(c) and comments 35(c)–1 and 35(c)–2 as proposed, except that the Bureau has revised the provisions permitting servicers to designate a telephone number that a borrower must use to assert an error and clarified that the notice to the borrower must be written.

Multiple Offices

Proposed § 1024.35(c) also included language that would have required a servicer to use the same telephone number and address it designates for receiving notices of error for receiving information requests pursuant to proposed § 1024.36(b), and vice versa. Further, the Bureau proposed comment 35(c)–3, which would have clarified that any telephone numbers or address designated by a servicer for any borrower may be used by any other borrower to submit a notice of error. For instance, if a servicer set up regional call centers, it would have had to assist any borrowers who called in to a particular center to complain about an error, regardless of whether the borrower called the correct region.

One non-bank servicer expressed concern about the proposal's requirement to designate the same address and telephone number for notices of error and information requests. The commenter explained that it assigns separate teams to address information requests and error notices. Thus, the commenter asserted, proposed § 1024.35(c) would negatively impact customer service. Having considered this comment, the Bureau notes that it proposed § 1024.35(c) because it was concerned that designating separate telephone numbers and addresses for notices of error and information requests could impede borrower attempts to submit notices of error and information requests to servicers due to debates over whether a particular communication constituted a notice of error or an information request. For the reasons set forth above and in the proposal, final § 1024.35(c) maintains the requirement that servicers designate the same address for receipt of notices of error and information requests. In addition, the Bureau is adopting comment 35(c)–3 as substantially as proposed, except that the Bureau has removed references to error notices received by telephone.

The Bureau proposed comment 35(c)–5 to further clarify that a servicer may use automated systems, such as an interactive voice response system, to manage the intake of borrower calls. The proposal provided that prompts for asserting errors must be clear and provide the borrower the option to connect to a live representative. Because the final rule does not require servicers to comply with error resolution procedures for oral error notices, the Bureau is withdrawing proposed comment 35(c)–5 from the final rule.

Internet Intake of Notices of Error

The Bureau proposed comment 35(c)–4 to clarify that a servicer would not be required to establish a process for receiving notices of error through email, Web site form, or other online methods. Proposed comment 35(c)–4 was intended to further clarify that if a servicer establishes a process for receiving notices of error through online methods, the servicer can designate it as the only online intake process that a borrower can use to assert an error. A servicer would not be required to provide a written notice to a borrower in order to gain the benefit of the online process being considered the exclusive online process for receiving notices of error. Proposed comment 35(c)–4 would have further clarified that a servicer's decision to accept notices of error through an online intake method shall be in addition to, not in place of, any processes for receiving error notices by phone or mail.

One consumer group commenter advocated requiring servicers to establish on online process for receipt of error notices. The Bureau agrees that online processes have significant promise to facilitate faster, cheaper communications between borrowers and servicers. However, the Bureau believes that this suggestion raises a broader issue around the use of electronic media for communications between servicers (and other financial service providers) and borrowers (and other consumers). The Bureau believes it would be most effective to address this issue in that larger context after study and outreach to enable the Bureau to develop principles or standards that would be appropriate on an industry-wide basis. The Bureau is therefore, at this time, finalizing language to permit, but not require, servicers to elect whether to adopt such a process. The Bureau intends to conduct broader analyses of electronic communications' potential for disclosure, error resolution, and information requests after the rule is released. Accordingly, the Bureau is adopting comment 35(c)–4 as proposed, with minor technical amendments, and the Bureau has removed references to error notices received by telephone.

35(d) Acknowledgment of Receipt

The Bureau proposed § 1024.35(d), which would have required a servicer to provide a borrower an acknowledgement of a notice of error within five days (excluding legal public holidays, Saturdays, and Sundays) of receiving a notice of error. Proposed § 1024.35(d) would have implemented section 1463(c) of the Dodd-Frank Act, which amended the current acknowledgement deadline of 20 days for qualified written requests to five days. Proposed § 1024.35(d) would have further implemented the language in section 6(k)(1)(C) of RESPA prohibiting the failure to take timely action to respond to requests to correct errors by applying the same timeline applicable to a qualified written request to any notice of error.

Industry commenters, including multiple credit union associations, requested that the Bureau lengthen the acknowledgment time period, asserting that five days is unreasonable, especially for smaller institutions. A nonprofit mortgage servicer said the timeframe is insufficient for its small volunteer staff. An industry trade association commenter argued that the acknowledgment requirement creates unnecessary paperwork and should be removed from the final rule altogether. In contrast, consumer group commenters were generally supportive of the acknowledgment requirement, noting that the timeline in the proposal was consistent with that in the Dodd-Frank Act for qualified written requests.

The Bureau believes that acknowledgment within five days is appropriate given that the Dodd-Frank Act expressly adopts that requirement for qualified written requests and differentiating between the two regimes would increase operational complexity. Moreover, the burden on servicers is significantly mitigated by the fact that the error resolution procedures are only applicable to written notices of error. The Bureau further notes that the contents of the acknowledgment are minimal. In addition, servicers need not provide an acknowledgment if the servicer corrects the error identified by the borrower and notifies the borrower of that correction in writing within five days of receiving the error notice.

Accordingly, the Bureau is adopting § 1024.35(d) substantially as proposed, except that the Bureau has revised the provision to clarify that the acknowledgment must be written.

35(e) Response to Notice of Error

The Bureau proposed § 1024.35(e) to set forth requirements on servicers for responding to notices of error. As discussed in more detail below, proposed § 1024.35(e) would have implemented the response requirement in section 6(e)(2) of RESPA applicable to a qualified written request, including section 1463(c) of the Dodd-Frank Act, which changed the deadline for responding to qualified written requests from 60 days to 30 days. Proposed § 1024.35(e) would have further implemented section 6(k)(1)(C) of RESPA by applying the same requirements and timeline applicable to a qualified written request to any notice of error.

35(e)(1) Investigation and Response Requirements

Proposed § 1024.35(e)(1) would have required a servicer to correct an error within 30 days unless the servicer concluded after a reasonable investigation that no error occurred and notified the borrower of that finding. As discussed below, the Bureau maintains the 30-day timeline in the final rule.

Notices to Borrower

Proposed § 1024.35(e)(1)(i)(A) would have required a servicer that does not determine after a reasonable investigation that no error occurred as set forth under § 1024.35(e)(1)(i)(B), to correct the error identified by the borrower, and provide the borrower with notification that indicates that the error was corrected, the date of the correction, and contact information the borrower can use to get further information. One industry commenter asserted that RESPA does not require that servicers provide correction dates and questioned the utility of such a requirement. The commenter further requested clarification as to whether the date of correction was equivalent to the effective date of the correction.

The Bureau did not intend the reference to the date of correction in § 1024.35(e)(1)(i)(A) to refer to the date the correction was made by the servicer, but rather to the date the correction is made effective. Accordingly, the Bureau is amending proposed § 1024.35(e)(1)(i)(A) to add the word ''effective'' to the final rule in order to clarify that the date servicers must provide is the effective date of the correction. The Bureau believes that providing the effective date of the correction is meaningful information for a borrower to assess whether the servicer has satisfactorily corrected the error, particularly in cases involving changes to the balance of the borrower's account. Commenters did not comment on other aspects of proposed § 1024.35(e)(1)(i)(A), and the Bureau is adopting § 1024.35(e)(1)(i)(A) as proposed, except that the Bureau has revised the final rule to clarify that the notification must be provided in writing and the servicer's contact information must include a telephone number.

Proposed § 1024.35(e)(1)(i)(B) would have required a servicer that determines after conducting a reasonable investigation that no error occurred to provide the borrower a notice stating that the servicer has determined that no error has occurred, the reason(s) the servicer believes that no error has occurred, and contact information for servicer personnel that can provide further assistance. The proposal would have also required the servicer to inform the borrower in the notice that the borrower may request documents relied on by the servicer in reaching its determination and how the borrower can request such documents. In contrast, proposed § 1024.35(e)(1)(i)(A) would not have required a servicer who determines that an error has occurred and corrects the error to provide a statement in the notice to the borrower about requesting documents that were the basis for that determination.

One consumer group commenter requested that the Bureau amend the proposed rule to address situations in which servicers make inaccurate determinations that no error occurred. The Bureau believes that, as proposed, the rule adequately addresses such scenarios by requiring disclosures about borrowers' rights to request the information on which the servicer relied, so as to facilitate the borrower's opportunity to review and consider further action as appropriate. The Bureau believes that the rule will facilitate the timely correction of errors and that borrowers are less likely to need documents and information when errors are corrected per the borrower's requests. Accordingly, the Bureau is adopting § 1024.35(e)(1)(i)(B) as proposed, except that the Bureau has revised the provision to clarify that the notification must be written and the servicer's contact information must include a telephone number.

Multiple Responses

The Bureau proposed comment 35(e)(1)(i)–1 to clarify that if a notice of error asserts multiple errors, a servicer may respond to those errors through a single or separate written responses that address the alleged errors. The Bureau believes that the purpose of the rule, which is to require timely resolution of errors, is facilitated by allowing a servicer to respond to multiple errors set forth in a single notice of error through separate communications. For example, a servicer could correct one error and send a notice regarding the correction of that error, while an investigation is in process regarding another error that is the subject of the same notice of error. The Bureau did not receive any comments regarding proposed comment 35(e)(1)(i)–1 and is adopting it as proposed.

Different or Additional Error

The Bureau proposed § 1024.35(e)(1)(ii), which provided that if a servicer, during the course of a reasonable investigation, determines that a different or additional error has occurred, the servicer is required to correct that different or additional error and to provide a borrower a written notice about the error, the corrective action taken, the effective date of the corrective action, and contact information for further assistance. Because the servicer would be correcting an error, a servicer would not be required to provide a notice to the borrower about requesting documents that were the basis for that determination for the reasons discussed above. Proposed comment 35(e)(1)(ii)–1 would have clarified that a servicer may provide the response required by § 1024.35(e)(1)(ii) in the same notice that responds to errors asserted by the borrower pursuant to § 1024.35(e)(1)(i) or in a separate response that addresses the different or additional errors identified by the servicer. The Bureau did not receive any comments regarding proposed § 1024.35(e)(1)(ii) and comment 35(e)(1)(ii)–1 and is adopting both substantially as proposed.

As discussed above, the Bureau believes that a consumer protection purpose of RESPA is to facilitate the timely correction of errors. Where a servicer discovers an actual error, this purpose is best served by requiring the servicer to correct that error subject to the same procedures that would have applied had the borrower asserted the same error through a qualified written request or notice of error. Accordingly, the Bureau finds that § 1024.35(e)(1)(ii) is necessary and appropriate to achieve the consumer protection purposes of RESPA, including of facilitating the timely correction of errors.

35(e)(2) Requesting Information From Borrower

Proposed § 1024.35(e)(2) would have permitted a servicer to request that a borrower provide documentation if needed to investigate an error but would not have permitted a servicer to require the borrower to provide such documentation as a condition of investigating the asserted error. Further, proposed § 1024.35(e)(2) would have prohibited a servicer from determining that no error occurred simply because the borrower failed to provide the requested documentation. The Bureau proposed § 1024.35(e)(2) to allow servicers to obtain information that may assist in resolving notices of error.

Several industry commenters stressed the importance of permitting reasonable requests for information from borrowers. Commenters said that limiting servicers' access could impede the early resolution of errors. One industry commenter asked that the Bureau clarify that servicers may request documents so long as they do not condition investigation on the receipt of documents. Other commenters requested clarification that requiring a borrower to provide specific information about what the borrower is requesting does not constitute requiring a borrower to provide information as a condition of conducting the investigation.

Having considered these comments, the Bureau believes the proposed rule strikes the right balance by permitting servicers to request documents from borrowers so long as the servicer's investigation and conclusion that no error occurred is not dependent on the receipt of documents. As stated in the proposal, the Bureau believes that the process for servicers to obtain information from borrowers should not prejudice the ability of the borrower to seek the resolution of the error. Accordingly, the Bureau is adopting § 1024.35(e)(2) as proposed with minor technical amendments.

35(e)(3) Time Limits

35(e)(3)(i)

The Bureau proposed § 1024.35(e)(3)(i), which would have required a servicer to respond to a notice of error not later than 30 days (excluding legal public holidays, Saturdays, and Sundays) after the borrower notifies the servicer of the asserted error, with two exceptions: Errors relating to accurate payoff balances and errors relating to failure to suspend a foreclosure sale where a borrower has submitted a complete application for a loss mitigation option. As discussed further below, the proposal would have required servicers to respond to errors relating to payoff balances within five days (excluding legal public holidays, Saturdays, and Sundays) after the servicer receives the notice of error. The Bureau believed this shortened timeframe was appropriate because a servicer's failure to correct such an error may prevent a borrowing from pursuing options in the interim, such as a refinancing transaction. The proposal would have also required servicers to respond to errors relating to the failure to suspend a foreclosure sale where a borrower has submitted a complete application the earlier of within 30 days (excluding legal public holidays, Saturdays, and Sundays) after the servicer receives the error notice or prior to the foreclosure sale. The Bureau believed the shorter timeline was appropriate because delaying the response and investigation until after the foreclosure sale could cause irreparable harm to the borrower.

While several industry commenters asserted that 30 days was insufficient for error notices, one credit union stated that the timeline was reasonable. Similarly, a consumer group commenter noted that the timeline was consistent with the time period for qualified written requests required by the Dodd-Frank Act. Consumer commenters on Regulation Room asserted that the timelines were too generous. The Bureau believes that the 30-day timeframe proposed is appropriate given that the Dodd-Frank Act expressly changed the timeframe for qualified written requests from 60 days to 30 days and differentiating between two regimes would increase operational complexity as well as burden on borrowers and servicers. Accordingly, the final rule adopts the 30-day timeline as proposed.

Shortened Time Limit To Correct Errors Relating to Payoff Balances

Proposed § 1024.35(e)(3)(i)(A) would have provided that if a borrower submits a notice of error asserting that a servicer has failed to provide an accurate payoff balance as set forth in proposed § 1024.35(b)(6), a servicer must respond to the notice of error not later than five days (excluding legal public holidays, Saturdays, and Sundays) after the borrower notifies the borrower of the alleged error. The Bureau proposed the accelerated timeframe because it believed that a 30-day deadline for responding to this type of notice of error would not provide adequate protection for borrowers because the servicer's failure to correct the error promptly may prevent a borrower from pursuing options in the interim such as a refinancing transaction. Moreover, discussions with servicers during outreach suggested that a five day timeframe would be reasonable for a servicer to correct an error with respect to calculating a payoff balance.

Industry commenters noted the complexity involved in calculating payoff balances, especially where servicers need to collect information from third parties, such as fee information from vendors or prior servicers. In light of the complexity involved, industry commenters asserted that the timeframe was insufficient.

While the Bureau continues to believe it is important to have an accelerated timeline for errors associated with payoff balances, the Bureau acknowledges that in some circumstances the need to collect information from third parties may pose timing challenges. Accordingly, the Bureau has revised proposed § 1024.35(e)(3)(i)(A) to provide that a servicer must respond to a borrower's notice of error asserting that a servicer has failed to provide an accurate payoff balance as set forth in § 1024.35(b)(6) not later than seven days (excluding legal public holidays, Saturdays, and Sundays) after the borrower notifies the servicer of the alleged errors. The Bureau believes that this modest increase in the timeline strikes the right balance between prompt provision of payoff information to consumers and the need for servicers to have sufficient time to access the required information. Moreover, the Bureau also notes that section 129G of TILA requires servicers to provide accurate payoff balance amounts to consumers within a reasonable time, but in no case more than seven business days. Otherwise, the Bureau is adopting § 1024.35(e)(3)(i)(A) as proposed, with minor technical amendments.

Shortened Time Limit To Correct Certain Errors Relating to Foreclosure

Proposed § 1024.35(e)(3)(i)(B) would have provided that if a borrower submits a notice of error asserting, under § 1024.35(b)(9), that a servicer has failed to suspend a foreclosure sale, a servicer would be required to investigate and respond to the notice of error by the earlier of 30 days (excluding legal public holidays, Saturdays, and Sundays) or the date of a foreclosure sale. Proposed comment 35(e)(3)(i)(B)–1 would have clarified that a servicer could maintain a 30-day timeframe to respond to the notice of error if it cancels or postpones the foreclosure sale and a subsequent sale is not

scheduled before the expiration of the 30-day deadline.

The Bureau believes the shortened timeframe is appropriate because, given the complexity of the process, servicers may mistakenly fail to suspend a foreclosure. Thus, the Bureau believes borrowers may reasonably benefit from the opportunity to have servicers investigate and respond to notices of error regarding such failures before the foreclosure sale. The Bureau believes that a timeframe that allowed a servicer to investigate and respond to the notice of error after the date of a foreclosure sale would cause irreparable harm to a borrower. Accordingly, the Bureau is adopting § 1024.35(e)(3)(i)(B) and comment 35(e)(3)(i)(B)–1 as proposed, except for minor technical amendments and that the Bureau has revised § 1024.35(e)(3)(i)(B) to reference both § 1024.35(b)(9) and (10).

Extensions of Time Limit

Proposed § 1024.35(e)(3)(ii) would have permitted, subject to certain exceptions discussed below, a servicer to extend the time period for investigating and responding to a notice of error by 15 days (excluding legal public holidays, Saturdays, and Sundays) if, before the end of the 30-day period set forth in proposed § 1024.35(e)(3)(i)(C), the servicer notifies the borrower of the extension and the reasons for the delay in responding. Proposed comment 35(e)(3)(ii)–1 would have clarified that if a notice of error asserts multiple errors, a servicer may extend the time period for investigating and responding to those errors for which extensions are permissible pursuant to proposed § 1024.35(e)(3)(ii).

While some consumer groups generally objected to the proposed extension, one industry commenter urged the Bureau to permit two automatic 15-day extensions. The Bureau does not believe that permitting a second 15-day extension would promote timely resolution of errors. Section 1463(c)(3) of the Dodd-Frank Act amended section 6(e) of RESPA to provide one 15-day extension of time with respect to qualified written requests, and the Bureau believes that differentiating between two regimes would increase operational complexity.

The Bureau did not propose to apply the extension allowance of proposed § 1024.35(e)(3)(ii) to investigate and respond to errors relating to a servicer's failure to provide an accurate payoff statement or to suspend a foreclosure sale. As discussed above, the final rule applies a shortened timeframe for responding to such errors in light of special statutory provisions and special considerations at the foreclosure stage. Permitting a 15-day extension of those timeframes would negate these shortened response periods and undermine the purposes served by shortening them. For the reasons set forth above and in the proposal, the Bureau is adopting § 1024.35(e)(3)(ii) and comment 35(e)(3)(ii)–1 substantially as proposed.

35(e)(4) Copies of Documentation

Proposed § 1024.35(e)(4) would have required that, where a servicer determines that no error occurred and a borrower requests the documents the servicer relied upon, the servicer must provide the documents within 15 days of the servicer's receipt of the borrower's request. The Bureau proposed comment 35(e)(4)–1 to clarify that a servicer would need only provide documents actually relied upon by the servicer to determine that no error occurred, not all documents reviewed by a servicer. Further, the proposed comment stated that where a servicer relies upon entries in its collection systems, a servicer may provide print-outs reflecting the information entered into the system.

Some industry commenters questioned the utility of providing documents relied upon to borrowers, noting that borrowers may not understand how to interpret the documents printed from servicers' systems. Industry commenters said providing such documents will be burdensome, and one commenter added that the Dodd-Frank Act neither requires nor contemplates such a requirement. One commenter urged the Bureau to clarify that servicers need only provide borrowers a summary of information that is stored electronically and not in a producible format. And several industry commenters urged the Bureau to limit servicers' responsibility to provide documents that reflect trade secrets or other sensitive information.

The Bureau believes the proposed rule strikes the right balance in that it does not subject servicers to undue paperwork burden but assures that borrowers will have access to underlying documentation if necessary. In certain cases, a borrower may determine that the servicer's response resolves an issue and that reviewing documents would be unnecessary. Thus, the Bureau believes that requiring a servicer to provide documents only upon a borrower's request limits burden. The Bureau understands that servicers may store information electronically and not in a readily producible format. Accordingly, the Bureau is adopting final comment 35(e)(4)–1, which clarifies that servicers may provide a printed screen capture in such situations, as proposed with minor technical amendments. In addition, the Bureau acknowledges industry commenters' concern regarding providing confidential or sensitive information to borrowers. Accordingly, the Bureau has revised proposed § 1024.35(e)(4) to provide that servicers need not produce to borrowers documents reflecting confidential, proprietary or privileged information. Final § 1024.35(e)(4) further provides that if a servicer withholds documents relied upon because such documents reflect confidential, proprietary or privileged information, the servicer must notify the borrower of its determination in writing. The Bureau is otherwise adopting § 1024.35(e)(4) as proposed.

35(f) Alternative Compliance

Proposed § 1024.35(f) provided that a servicer would not be required to comply with the timing and process requirements of paragraphs (d) and (e) of proposed § 1024.35 in two situations. First, a servicer that corrects the error identified by the borrower within five days of receiving the notice of error, and notifies the borrower of the correction in writing, would not be required to comply with the acknowledgment, notice and inspection requirements in paragraphs (d) and (e). Because such errors are corrected, an investigation would not be required. Second, a servicer that receives a notice of error for failure to suspend a foreclosure sale, pursuant to § 1024.35(b)(9), seven days or less before a scheduled foreclosure, would not be required to comply with paragraphs (d) and (e), if, within the time period set forth in paragraph (e)(3)(i)(B), the servicer responds to the borrower, orally or in writing, and corrects the error or states the reason the servicer has determined that no error has occurred.

35(f)(1) Early Correction

The Bureau proposed § 1024.35(f)(1) to permit alternative compliance as to errors resolved within the first five days. This provision is consistent with section 6(e)(1)(A) of RESPA, which requires servicers to provide written acknowledgment of a qualified written request within five days (excluding legal public holidays, Saturdays, and Sundays) ''unless the action requested is taken within such period.'' In addition, the alternative compliance mechanism in proposed § 1024.35(f)(1) was based on feedback from servicers during outreach, and especially small servicers, which indicated that the majority of

errors are addressed promptly after a borrower's communication and generally within five days. Small entity representatives communicated to the Small Business Review Panel that small servicers have a high-touch customer service model, which made it very easy for borrowers to report errors or make inquiries, and to receive real-time responses. The Bureau believed the alternative compliance method was necessary and appropriate to reduce the unwarranted burden of an acknowledgement and other response requirements on servicers, and especially small servicers, that are able to correct borrower errors within five days consistent with the Small Business Review Panel recommendation that the Bureau consider requirements that provide flexibility to small servicers.

Industry commenters supported the proposal's exemption of servicers from complying with paragraphs (d) and (e) where the servicer corrects the error identified by the borrower within five days of receiving the notice of error. However, industry commenters opposed the requirement that servicers notify borrowers of the correction in writing. Commenters reasoned that a significant number of errors are asserted and quickly resolved in a single telephone call. Accordingly, commenters argued that the requirement to advise borrowers of the correction in writing would be burdensome.

The Bureau believes that because the final rule subjects written but not oral notices to error resolution requirements under § 1024.35, the commenters' concerns regarding written notice of correction has been significantly mitigated. To the extent that a borrower asserts an error in writing which the servicer resolves within five days, the Bureau believes the borrower will benefit from receiving the written notification. For these reasons, the Bureau adopts § 1024.35(f)(1) as proposed, except that the Bureau has revised the provision to make clear that the servicer must provide such notification within five days of receiving the notice of error.

35(f)(2) Errors Asserted Before Foreclosure Sale

As explained in proposed § 1024.35(f)(2), the Bureau believes that it is appropriate to streamline acknowledgment and response requirements when servicers receive a notice of error that may impact a foreclosure sale less than seven days before a foreclosure sale. Notices of errors identified in § 1024.35(b)(9) and (10), which focus on the failure to suspend a foreclosure sale in the circumstances described in § 1024.41(f), (g), or (j), implicate this concern. Numerous entities, including other federal agencies and small entity representatives during the Small Business Review Panel outreach, expressed concern about borrower use of error resolution requirements as a procedural tool to impede proper foreclosures and promote litigation.[104]

Industry commenters reiterated concerns heard during pre-proposal outreach that borrowers could use the error resolution requirements to halt foreclosure sales, including minutes before a foreclosure sale. One industry commenter stressed that in some circumstances, whether to proceed with foreclosure will be beyond the servicer's control, as some courts will not cancel foreclosure after a certain date and Freddie Mac can override a servicer's request to postpone or cancel a sale. Thus, two commenters urged the Bureau to exempt from liability servicers required by an investor, insurer, guarantor or legal requirement to proceed with a foreclosure sale. Another industry commenter requested an exception for those borrowers who have had their claims heard by a court, asserting that servicers need finality and that extending foreclosure timelines is costly. In contrast, consumer group commenters opposed the alternative compliance option for errors asserted within seven days of a foreclosure sale. Consumer groups asserted that servicers should be required to communicate with borrowers in writing. In addition, some consumer group commenters reasoned that because proposed § 1024.35(f)(2) would exempt the servicer from the requirement to conduct an investigation or provide the borrower with the documents relied upon in reaching its determination that no error occurred, it would effectively permit servicers to ignore valid requests for postponement so long as the servicer sends a letter stating that no error occurred.

Having considered these comments, the final rule provides that for error notices submitted seven days or less before a foreclosure sale that assert an error identified in § 1024.35(b)(9) or (10), servicers are not required to comply with the requirements for acknowledgement and response to notices of error, but must make a good faith attempt to respond to borrowers, orally or in writing, and to either correct the error or state the reason the servicer has determined no error occurred. As stated in the proposal, the Bureau believes that reducing the procedural requirements for servicers to follow for such notices mitigates the concern that borrowers may use error resolution procedures to impede foreclosure, while maintaining protection for consumers. The Bureau believes that this alternative compliance method is also consistent with the Small Business Review Panel recommendation that the Bureau provide flexibility to small servicers and responds to small entity representatives' concern that error resolution procedures may be used in unwarranted litigation. Further, the Bureau understands the timing to be consistent with the GSE requirement that servicers conduct account reviews to document that all required actions have occurred at least seven days prior to a foreclosure sale. The Bureau declines to revise the proposal to require that servicers communicate with borrowers in writing, as the Bureau believes servicers require flexibility in communicating with borrowers close in time to a foreclosure sale.

35(g) Requirements Not Applicable

The Bureau proposed § 1024.35(g) to set forth the types of notices of error to which the error resolution requirements would not apply.

35(g)(1) In General

Proposed § 1024.35(g)(1) would have provided that a servicer is not required to comply with the error resolution requirements set forth in § 1024.35(d) and (e) if the servicer reasonably makes certain determinations specified in §§ 1024.35(g)(1)(i), (ii), or (iii). Specifically, subject to certain exceptions, a servicer need not comply with error resolution requirements with respect to a notice of error that asserts an error that is substantially the same as an error asserted previously by or on behalf of the borrower, that is overbroad or unduly burdensome, or that is untimely. A servicer would be liable to the borrower for its unreasonable determination that any of the listed categories apply and resulting failure to comply with proposed § 1024.35(d) and (e), however. Industry commenters generally favored the proposed exclusions, but requested that the Bureau expand the categories for which servicers would not be required to comply with error resolution requirements. Except as discussed below, the Bureau declines to do so. The Bureau has, however, revised proposed § 1024.35(g)(1) to state that, in addition to § 1024.35(d) and (e), a servicer is not required to comply with § 1024.35(i) if

[104] *See* U.S. Consumer Fin. Prot. Bureau, *Final Report of the Small Business Review Panel on CFPB's Proposals Under Consideration for Mortgage Servicing Rulemaking,* 30 (Jun, 11, 2012).

a servicer reasonably determines that §§ 1024.35(g)(i), (ii), or (iii) apply.

35(g)(1)(i)

Proposed § 1024.35(g)(1)(i) would have provided that a servicer is not required to comply with the notice of error requirements in proposed § 1024.35(d) and (e) with respect to a notice of error to the extent that the asserted error is substantially the same as an error asserted previously by or on behalf of the borrower for which the servicer had previously complied with its obligation to respond to the notice of error pursuant to § 1024.35(e)(1), unless the borrower provides new and material information. The proposed rule would have defined new and material information as information that was not reviewed by the servicer in connection with investigating the prior notice of error and was reasonably likely to change a servicer's determination with respect to the existence of an error.

As stated in the proposal, the Bureau believes that both elements of this requirement are important. First, the information must not have been reviewed by the servicer. If the information was reviewed by the servicer, then such information is not new and requiring a servicer to re-open an investigation will create unwarranted burden and delay. Second, even if the information is new, it must be material to the asserted error. A servicer may not have reviewed information because the information may not have been material to the error asserted by the borrower. The Bureau proposed § 1024.35(g)(1)(i) to ensure that a servicer is not required to expend resources conducting duplicative investigations of notices of error unless there is a reasonable basis for re-opening a prior investigation because of new and material information.

The Bureau proposed comment 35(g)(1)(i)–1 to further clarify that a dispute regarding whether a servicer previously reviewed information or whether a servicer properly determined that information reviewed was not material to its determination of the existence of an error, will not itself constitute new and material information and, consequently, does not require a servicer to re-open a prior, resolved investigation of a notice of error.

While industry commenters supported the proposed exclusion, some consumer groups expressed concern. One consumer group commenter argued that the proposal effectively requires that borrowers describe alleged errors with more specificity than is appropriate, given that borrowers often do not fully understand the nature of the alleged error. Another consumer group commenter urged the Bureau to require servicers to inform borrowers that servicers will reconsider a duplicative error notice to the extent that the borrower is able to more concisely describe an alleged error. Another commenter asserted that the proposed exclusion shields servicers from the consequences of incompletely addressing a notice of error the first time it is received. Finally, an anonymous commenter questioned the Bureau's authority to create the exclusion altogether.

Having considered these comments, the Bureau believes that § 1024.35(g)(1)(i), as proposed, strikes the appropriate balance in that it requires servicers to respond to duplicative error notices only to the extent that such notices present new and material information. The Bureau recognizes that borrowers will assert errors in lay terms, and this section is not intended to require any particular level of specificity in the errors that borrowers assert. All that this section provides is that if a borrower submits a second error claim that the servicer reasonably determines is substantially the same as a previous submission, the servicer is not obligated to go back through the investigative process unless the borrower has presented new and material information. Thus, to the extent that a borrower initially lacks sufficient information to articulate clearly an alleged error but is later privy to new and material information that enables the borrower to describe the error more clearly, proposed § 1024.35(g)(1)(i) requires a servicer to reconsider new and material information subsequently put forward by the borrower. Thus, for the reasons outlined in the proposal and set forth above, the Bureau is adopting § 1024.35(g)(1)(i) and comment 35(g)(1)(i)–1 as proposed, with minor technical amendments.

The Bureau's authority for § 1024.35 is addressed above. Moreover, the Bureau finds that § 1024.35 is necessary and appropriate to achieve the purposes of RESPA, including ensuring responsiveness to consumer requests and complaints because the Bureau believes that this purpose will best be met if servicers are not required to waste resources responding to duplicative requests that will not benefit consumers, but rather are allowed to focus their resources on responding to error requests where such responses are most likely to result in consumer benefit.

35(g)(1)(ii)

Proposed § 1024.35(g)(1)(ii) would have provided that a servicer is not required to comply with the notice of error requirements in proposed § 1024.35(d) and (e) with respect to a notice of error that is overbroad or unduly burdensome. The proposed rule would have defined ''overbroad'' and ''unduly burdensome'' for this purpose. It would have provided that a notice of error is overbroad if a servicer cannot reasonably determine from the notice of error the specific covered error that a borrower asserts has occurred on a borrower's account. The proposed rule would have provided that a notice of error is unduly burdensome if a diligent servicer could not respond to the notice of error without either exceeding the maximum timeframe permitted by § 1024.35(e)(3)(ii) or incurring costs (or dedicating resources) that would be unreasonable in light of the circumstances. The proposed rule would have further clarified that if a servicer can identify a proper assertion of a covered error in a notice of error that is otherwise overbroad or unduly burdensome, a servicer is required to respond to the covered error submissions it can identify. Finally, the Bureau proposed comment 35(g)(1)(ii)–1 to set forth characteristics that may indicate if a notice of error is overbroad or unduly burdensome.

During pre-proposal outreach, consumers, consumer advocates, servicers, and servicing industry representatives indicated to the Bureau that consumers do not typically use the current qualified written request process to resolve errors. During the Small Business Review Panel outreach, small entity representatives expressed that typically qualified written requests received from borrowers were vague forms found online or forms used by advocates as a form of pre-litigation discovery. Servicers and servicing industry representatives indicated that these types of qualified written requests are unreasonable and unduly burdensome. Small entity representatives in the Small Business Review Panel outreach requested that the Bureau consider an exclusion for abusive requests, or requests made with the intent to harass the servicer.

The Bureau requested comment regarding whether a servicer should not be required to undertake the error resolution procedures in proposed § 1024.35(d) and (e) for notices of error that are overbroad or unduly burdensome. Industry commenters supported the exclusion, but urged the Bureau to remove the requirement that servicers identify valid assertions of error in submissions that are otherwise overbroad or unduly burdensome. Industry commenters said servicers

should not be required to parse through such submissions to locate a clear assertion of error. One large trade association of mortgage servicers said that the requirement effectively subsumes the exclusion. Consumer group commenters generally disfavored the exclusion. One commenter questioned the assertion that borrowers primarily use qualified written requests to obtain prelitigation discovery. One consumer group said the exclusion gives servicers too much discretion. Another said it requires borrowers to state the basis for their alleged error with too much specificity. An anonymous consumer advocate said a request from a single borrower should not be so voluminous as to be burdensome for servicers to respond. Another consumer group commenter requested that the Bureau address situations in which the servicer erroneously determines that a submission is overbroad or unduly burdensome. Finally, one consumer group commenter said the proposed exclusion for unduly burdensome notices of error leaves borrowers unprotected as to errors that are especially egregious or complex.

In proposing § 1024.35(g)(1)(ii), the Bureau did not intend to frustrate consumers' ability to assert actual complex errors and to have such errors investigated and corrected, as appropriate, by servicers. The Bureau believes it is critical that consumers have a mechanism by which to have complex errors addressed. Accordingly, the Bureau has revised proposed § 1024.35(g)(1)(ii) and proposed comment 35(g)(1)(ii)–1 to remove references to unduly burdensome notices of error. At the same time, the Bureau proposed § 1024.35(g)(1)(ii), in part, because the Bureau believes that requiring servicers to respond to overbroad notices of error from some borrowers may cause servicers to expend fewer resources to address other errors that may be more clearly stated and more clearly require servicer attention. As discussed above, the Bureau expands the definition of errors subject to the requirements of § 1024.35 to contain a catch-all for all errors relating to the servicing of the borrower's loan. Given the breadth of the errors subject to the requirements of § 1024.35, the Bureau continues to believe that a requirement for servicers to respond to notices of error that are overbroad may harm consumers and frustrate servicers' ability to comply with the new error resolution requirements. The Bureau does not believe that the error resolution procedures are the appropriate forum for borrowers to prosecute wide-ranging complaints against mortgage servicers that are more appropriate for resolution through litigation. Accordingly, the Bureau is adopting § 1024.35(g)(1)(ii) and comment 35(g)(1)(ii)–1 substantially as proposed, except that the Bureau has revised the provisions to remove references to unduly burdensome notices of error.

35(g)(1)(iii)

Proposed § 1024.35(g)(1)(iii) would have provided that a servicer is not required to comply with the notice of error requirements in proposed § 1024.35(d) and (e) for an untimely notice of error—that is, a notice of error received by a servicer more than one year after either servicing for the mortgage loan that is the subject of the notice of error was transferred by that servicer to a transferee servicer or the mortgage loan amount was paid in full, whichever date is applicable. The Bureau proposed this provision to set a specific and clear time that a servicer may be responsible for correcting errors for a mortgage loan.

Moreover, the Bureau proposed § 1024.35(g)(1)(iii) to achieve the same goal that currently exists in Regulation X with respect to qualified written requests. Specifically, current § 1024.21(e)(2)(ii) states that ''a written request does not constitute a qualified written request if it is delivered to a servicer more than one year after either the date of transfer of servicing or the date that the mortgage servicing loan amount was paid in full, whichever date is applicable.''

One industry trade association expressed support for proposed § 1024.35(g)(1)(iii). A credit union commenter requested that the Bureau impose an additional time limitation on borrowers' ability to assert errors, noting that it often services mortgages for the life of the loan. A consumer advocacy group commenter disagreed with proposed § 1024.35(g)(1)(iii) and asserted that borrowers should be permitted to raise errors with their current servicer regardless of whether the servicer was responsible for the error. Having considered these comments, the Bureau declines to impose additional time limits on a borrower's ability to assert errors, as borrowers may discover errors long after such errors were made. In addition, the Bureau does not believe that § 1024.35(g)(1)(iii), as proposed, prohibits a borrower from raising errors with the borrower's current servicer. Thus, for the reasons set forth above, the Bureau is adopting § 1024.35(g)(1)(iii) as proposed with a minor technical amendment.

35(g)(2) Notice to Borrower

Proposed § 1024.35(g)(2) would have required that if a servicer determines that it is not required to comply with the notice of error requirements in proposed § 1024.35(d) and (e) with respect to a notice of error, the servicer must provide a notice to the borrower informing the borrower of the servicer's determination. The servicer must send the notice not later than five days (excluding legal public holidays, Saturdays, and Sundays) after its determination and the notice must set forth the basis upon which the servicer has made the determination, noting the applicable provision of proposed § 1024.35(g)(1).

One credit union trade association disfavored the proposed requirement that a servicer send a notice informing the borrower that an error falls into one of the enumerated exceptions. The commenter suggested that the Bureau permit servicers to send a standard notice informing borrowers that the servicer received the notice of error and is not required to respond.

The Bureau proposed § 1024.35(g)(2) because it believes that borrowers should be notified that a servicer does not intend to take any action on the asserted error. The Bureau also believes borrowers should know the basis for the servicer's determination. By providing borrowers with notice of the basis for the servicer's determination, a borrower will know the servicer's basis and will have the opportunity to bring a legal action to challenge that determination where appropriate. Accordingly, having considered the comment, the Bureau is adopting § 1024.35(g)(2) as proposed.

35(h) Payment Requirements Prohibited

Proposed § 1024.35(h) would have prohibited a servicer from charging a fee, or requiring a borrower to make any payment that may be owed on a borrower's account, as a condition of investigating and responding to a notice of error. Proposed comment 35(h)–1 would have clarified that § 1024.35(h) does not alter or otherwise affect a borrower's obligation to make payments owed pursuant to the terms of the mortgage loan. The Bureau proposed § 1024.35(h) for three reasons. First, section 1463(a) of the Dodd-Frank Act added section 6(k)(1)(B) to RESPA, which prohibits a servicer from charging fees for responding to valid qualified written requests. Proposed § 1024.35(h) would implement that provision with respect to qualified written requests. Second, the Bureau believes that a

servicer's practice of charging for responding to a notice of error impedes borrowers from pursuing valid notices of error and that the prohibition is therefore necessary and appropriate to achieve the consumer protection purposes of RESPA, including ensuring responsiveness to borrower requests and complaints. Third, the Bureau understands that, in some instances, servicer personnel have demanded that borrowers make payments before the servicer will correct errors or provide information requested by a borrower. The Bureau believes that a servicer should be required to correct errors notwithstanding the payment status of a borrower's account. A consumer advocacy group commenter noted, without elaborating, that it supported the fee prohibition reflected in proposed § 1024.35(h). For the reasons set out above, the Bureau is adopting § 1024.35(h) and comment 35(h)–1 as proposed.

35(i) Effect on Servicer Remedies

Adverse Information

Proposed § 1024.35(i)(1) would have provided that a servicer may not furnish adverse information regarding any payment that is the subject of a notice of error to any consumer reporting agency for 60 days after receipt of a notice of error. RESPA section 6(e) sets forth this prohibition on servicers with respect to a qualified written request that asserts an error. Proposed § 1024.35(i)(1) would implement section 6(e) of RESPA with respect to qualified written requests and would apply the same requirements to other notices of error.

The Bureau proposed to maintain the prohibition regarding supplying adverse information for the 60-day timeframe set forth in section 6(e)(3) of RESPA with respect to qualified written requests and to apply it to all notices of error. Even though a notice of error may be resolved by no later than 45 days after it is received pursuant to proposed § 1024.35(e)(3)(ii), the Bureau reasoned that the 60-day timeframe is appropriate in the event that there are follow-up inquiries or additional information provided to the borrower.

Industry commenters strongly objected to the 60-day reporting prohibition. Commenters said the proposal undermines the accuracy and integrity of credit reports. One commenter said the Fair Credit Reporting Act already governs credit reporting. One large bank commenter asserted that because credit reporting is a safety and soundness protection, banks have a duty to accurately report delinquencies. Several industry commenters also noted a concern that, based on prior experience, borrowers may use the reporting prohibition to manipulate the system by disputing legitimate delinquencies in order to apply for credit without derogatory marks on credit reports. The Bureau acknowledges the concerns expressed but notes that Congress specifically imposed the 60-day reporting prohibition with respect to qualified written requests in section 6(e) of RESPA. As discussed above, the Bureau believes it is necessary to achieve the consumer protection purposes of RESPA, including to ensure responsiveness to borrower requests and complaints and the provision of accurate and relevant information to borrowers, to apply the same procedures to all notices of error as applicable to qualified written requests. Otherwise, borrowers and servicers must expend wasteful resources parsing the form requirements applicable to qualified written requests and navigating between two separate regulatory regimes. As detailed above, the Bureau believes that the interests of borrowers and servicers are best served and the purposes of RESPA are best met through a single regulatory regime applicable to both qualified written requests and other notices of error. The Bureau is therefore adopting § 1024.35(i)(1) as proposed, as it is consistent with the 60-day reporting prohibition for qualified written requests required by section 6(e) of RESPA.

Ability To Pursue Foreclosure

Proposed § 1024.35(i)(2) stated that, with one exception, a servicer's obligation to comply with the requirements of proposed § 1024.35 would not prohibit a lender or servicer from pursuing any remedies, including proceeding with a foreclosure sale, permitted by the applicable mortgage loan instrument. The Bureau proposed one exception to § 1024.35(i)(2) where a borrower asserts an error under paragraph (b)(9) based on a servicer's failure to suspend a foreclosure sale in the circumstances described in proposed § 1024.41(g). The Bureau proposed § 1024.35(i)(2) to clarify that, in general, a notice of error could not be used to require a servicer to suspend a foreclosure sale.

A consumer group commenter asserted that proposed § 1024.35(i)(2) should be amended to prohibit a lender or servicer from pursuing a foreclosure sale upon receipt of any notice of error that disputes a servicers' ability to foreclose. As stated in the proposal, the Bureau believes that the purpose of RESPA of ensuring responsiveness to borrower requests and complaints would be impeded by allowing a notice of error to obstruct a lender's or servicer's ability to pursue remedies permitted by the applicable mortgage loan instrument.

The requirements in proposed § 1024.41 establish procedures that servicers must follow for reviewing loss mitigation applications. Servicers are capable of complying with the requirements prior to a foreclosure sale. Nothing in this proposed requirement affects the validity or enforceability of the mortgage loan or lien. Further, a servicer has the opportunity to retain its remedies when a borrower submits a completed application for a loss mitigation option. A servicer may establish a deadline by which a borrower must submit a completed application for a loss mitigation option, and, so long as the servicer fulfills its duty to evaluate the borrower for a loss mitigation option before the date of a foreclosure sale, a servicer may comply with the requirements of § 1024.35 without suspending the foreclosure sale. For the reasons set forth above and in the proposal, the Bureau is adopting § 1024.35(i)(2) as proposed, except that the Bureau has revised the provision to reference both paragraphs (b)(9) and (10).

Section 1024.36 Requests for Information

Section 6(e) of RESPA requires servicers to respond to ''qualified written requests'' that relate to the servicing of a loan. Section 1463(a) of the Dodd-Frank Act amended RESPA to add section 6(k)(1)(B), which prohibits servicers from charging fees for responding to valid qualified written requests (as defined in regulations to be issued by the Bureau). In addition, section 1463(a) of the Dodd-Frank Act amended RESPA to add section 6(k)(1)(D), which states that a servicer shall not fail to provide information regarding the owner or assignee of a mortgage loan within ten business days of a borrower's request.

Proposed § 1024.36 set forth requirements servicers would be required to follow to respond to information requests from borrowers with respect to their mortgage loans. The Bureau proposed § 1024.36 to implement the servicer prohibitions set forth in section 6(k)(1)(B) and 6(k)(1)(D) of RESPA, as well as the requirements applicable to qualified written requests set forth in section 6(e) of RESPA. In addition, as discussed above with respect to § 1024.35, the Bureau believed that it served the interests of

borrowers and servicers alike to establish a uniform regulatory regime, parallel to that applicable to notices of error under § 1024.35, applicable to borrower requests for information relating to their mortgage loan irrespective of whether such requests were made in the form of a qualified written request. In the Bureau's view, such requirements are necessary to ensure that servicers respond to borrowers' requests and complaints and timely provide borrowers with relevant and accurate information about their mortgage loans.

Legal Authority

Section 1024.36 implements section 6(k)(1)(D) of RESPA, and to the extent the requirements are also applicable to qualified written requests, sections 6(e) and 6(k)(1)(B) of RESPA. Pursuant to the Bureau's authorities under sections 6(j), 6(k)(1)(E), and 19(a) of RESPA, the Bureau is also adopting certain additions and certain exemptions to these provisions. As explained in more detail below, these additions and exemptions are necessary and appropriate to achieve the consumer protection purposes of RESPA, including ensuring responsiveness to consumer requests and complaints and the provision and maintenance of accurate and relevant information.

36(a) Information Requests

Proposed § 1024.36(a) would have required a servicer to comply with the requirements of proposed § 1024.36 for an information request from a borrower that includes the borrower's name, enables the servicer to identify the borrower's mortgage loan account, and states the information the borrower is requesting for the borrower's mortgage loan account. The Bureau received no comment on this aspect of proposed § 1024.36, and is finalizing these requirements as proposed. The Bureau is otherwise finalizing proposed § 1024.36 as discussed below.

Qualified Written Requests

Similar to the proposed requirements for notices of error, proposed § 1024.36(a) would have required a servicer to treat a qualified written request that requests information relating to the servicing of a loan as an information request subject to the requirements of § 1024.36. The Bureau intended to propose servicer obligations applicable to qualified written requests that were the same as requirements applicable to information requests under § 1024.36(a). One consumer group commenter expressed support for the proposal because it dispensed with technicalities about whether an information request constituted a valid qualified written request. One trade association commenter said the Bureau failed to define a valid qualified written request and said that proposed § 1024.36 does not fully integrate section 6(e) of RESPA into the proposed information request procedures. Another trade association of private mortgage lenders said the proposal did not make clear what constitutes a qualified written request and to what extent servicers must continue to comply with existing law regarding qualified written requests. Having considered these comments, the Bureau notes that final § 1024.31 defines the term ''qualified written request.'' In addition, as discussed above, the Bureau has added new comment 31 (qualified written request)-2, which clarifies that the error resolution and information request requirements in §§ 1024.35 and 1024.36 apply as set forth in those sections irrespective of whether the servicer receives a qualified written request. Finally, the Bureau has revised proposed § 1024.36(a) to make clear in the final rule that a qualified written request that requests information relating to the servicing of a mortgage loan is a request for information for purposes of § 1024.36 for which a servicer must comply with all requirements applicable to a request for information.

Oral Information Requests

The Bureau proposed to require servicers to comply with information request procedures under § 1024.36 for information requests made by borrowers orally or in writing. The Bureau believed this approach was warranted, in part, because discussions with consumers, consumer advocates, servicers, and industry trade associations during outreach suggested that the vast majority of borrowers orally request information from servicers.

As was the case for notices of error, the Bureau believed that a requirement that an information request be in writing would serve as a barrier that could unduly restrict the ability of borrowers to have errors resolved and requests fulfilled. At the same time, the Bureau recognized the burdens on servicers to ensure compliance with the proposed rule with respect to oral information requests. The Bureau believed that elements of the proposed rule would assist in mitigating servicer burden. For example, the Bureau considered that the proposal allowed servicers to designate a specific telephone number for receiving oral information requests and included an alternative compliance provision that allows a servicer to provide information orally if the information is provided within five days of the borrower's request.

In addition, the Bureau learned from pre-proposal discussions with servicers, including the small entity representatives in the Small Business Review Panel outreach, that most information requests are responded to by servicers either on the same telephone call with the borrower or within an hour of a borrower's communication. The Bureau believed that allowing servicers to respond to information requests orally would significantly reduce the burden associated with the proposed information request requirements on servicers. Further, the Bureau believed that this requirement provided flexibility for small servicers consistent with the recommendations of the Small Business Review Panel and mitigates concerns by the small entity representatives regarding compliance costs.

The Bureau solicited comment regarding whether servicers should be required to comply with information request procedures for information requests asserted orally. The Bureau received a number of comments from both consumer groups and various industry members. Consumer group commenters reiterated their support for applying the information request provisions to requests made orally, noting that consumers most often request information orally rather than in writing. Consumer commenters on Regulation Room disfavored the proposal's application of the information request procedures under § 1024.36 to information requests received orally. Consumer commenters, citing their negative experiences attempting to request information from servicers orally, were concerned that encouraging an oral process would weaken consumer protections. Industry commenters also opposed the proposal's application of the information request requirements to oral information requests. Commenters said doing so would create new burdens for servicers regarding tracking the information requests and monitoring that a borrower receives written acknowledgements and responses. Industry commenters further stressed that a written process would provide more clarity and certainty as to the nature of the request and what the servicer communicated to the borrower during the conversation. Further, industry commenters asserted, requiring written information requests would help avoid situations in which the borrower

and servicer have differing recollections as to the borrower's request and the servicer's response during the conversation. Absent a written record, commenters said, servicers would need to record conversations with borrowers to minimize the significant litigation risk. The commenters asserted that recording conversations could be especially costly for small servicers and would require the borrower's consent in many jurisdictions.

After consideration of these comments, the Bureau is amending proposed § 1024.36(a) to require servicers to comply with § 1024.36 solely with respect to written requests for information. While borrowers may continue to raise information requests orally, servicers will not be required to comply with the formal requirements outlined in § 1024.36 for such requests. Instead, the Bureau has added to the final rule § 1024.38(b)(1)(iii), which generally requires that servicers maintain policies and procedures that are reasonably designed to ensure that servicers provide borrowers with accurate and timely information and documents in response to borrowers' requests for information. In addition, the Bureau has added a requirement in § 1024.38(b)(5) that servicers establish policies and procedures reasonably designed to achieve the objective of informing borrowers about the availability of procedures for submitting written notices of error set forth in § 1024.35 and written information requests set forth in § 1024.36.

The Bureau believes that eliminating the requirement under proposed § 1024.36(a) for servicers to comply with the requirements under § 1024.36 with respect to oral requests for information from borrowers and instead requiring servicers to develop policies and procedures to ensure responsiveness to such oral requests and inform borrowers about the availability of the written process, strikes the appropriate balance between providing prompt responses to borrower requests and mitigating servicer burden. The final rule will thus require servicers to maintain policies and procedures reasonably designed to assure that the servicers respond to oral information requests on a more informal basis, without having to comply with all of the required steps for a formal information request under § 1024.36. As discussed more fully below, because only written information requests will be subject to the procedures outlined in § 1024.36, the Bureau believes it is logical and appropriate to require servicers to respond to such written requests in writing.

Borrower's Representative

Section 6(e)(1)(A) of RESPA states that a qualified written request may be provided by a ''borrower (or an agent of the borrower).'' *See* RESPA section 6(e)(1)(A). The Bureau proposed comment 36(a)–1 to clarify that this standard applies to all information requests, irrespective of whether they are qualified written requests. Specifically, proposed comment 36(a)–1 would have clarified that a servicer should treat an information request submitted by a person acting as an agent of the borrower as if it received the request directly from the borrower. Further, proposed comment 36(a)–1 stated that servicers may undertake reasonable procedures to determine if a person that claims to be an agent of a borrower has authority from the borrower to act on the borrower's behalf.

Several industry commenters said it would be costly and burdensome to determine whether a third party has authority to act on a borrower's behalf. Many requested clarification as to what the Bureau believes constitutes acting on the borrower's behalf. Further, some industry commenters expressed concern about potential liability for the improper release of information, including the risk of violating State or Federal privacy laws, as well as what commenters perceived to be increased risk of identity theft and fraud. Finally, a few industry commenters took the position that only the borrower, but not the borrower's agent, should be permitted to request information pursuant to § 1024.36.

One consumer advocacy group noted that the proposal to permit borrowers' agents to submit information requests is consistent with the statutory language. Consumer groups also requested that the Bureau clarify that the timelines will not toll during the period in which the servicer attempts to validate through reasonable policies and procedures that a third party purporting to act on a borrower's behalf is, in fact, an agent of the borrower.

Having considered these comments, the Bureau is amending proposed comment 36(a)–1 to address servicers' concerns about potential liability for the improper release of information. The final comment clarifies that servicers may have reasonable procedures to determine if a person that claims to be an agent of a borrower has authority from the borrower to act on the borrower's behalf, for example, by requiring that purported agents provide documentation from the borrower stating that the purported agent is acting on the borrower's behalf. Upon receipt of such documentation, the servicer shall treat a request for information as having been submitted by the borrower. The Bureau acknowledges that requiring servicers to respond to information requests submitted by borrowers' agents is more costly than limiting the requirement to borrowers' requests, but notes that this approach is consistent with section 6(e)(1)(A) of RESPA with respect to a qualified written request. The Bureau finds that it is necessary and appropriate to achieve the consumer protection purposes of RESPA, including ensuring responsiveness to borrower requests and complaints, to apply this requirement to all written information requests, especially since borrowers who are experiencing difficulty in making their mortgage payments or dealing with their servicer may turn, for example, to a housing counselor or other knowledgeable persons to assist them in addressing such issues. The Bureau declines to further define the term ''agent.'' The concept of agency has historically been defined in State and other applicable law. Thus, it is appropriate for the definition to defer to applicable State law regarding agents.

Information Subject to Information Request Procedures

Section 6(e)(1)(A) of RESPA requires servicers to respond to qualified written requests that request information relating to the servicing of a loan. Proposed § 1024.36(a) would have provided that any information requested by a borrower with respect to the borrower's mortgage loan is subject to the information request requirements in proposed § 1024.36 other than as provided in proposed § 1024.36(f), which defined specific circumstances in which a servicer is not obligated to comply with information request procedures.

One industry commenter expressed concern that borrowers or their attorneys may abuse the information request process. The commenter said that borrowers may request information that should already be in the borrower's possession, such as information received at closing. The commenter also urged the Bureau not to require that servicers produce the servicing file in response to a borrower's information request. The commenter said that such information will be of limited utility to borrowers and often reflects privileged communications. Having considered these comments, the Bureau notes that final § 1024.36, like the proposal, has mechanisms in place to limit abuse and to protect confidential communications. Specifically, as discussed more fully

below, § 1024.36(f) lists circumstances under which servicers need not comply with information request requirements under § 1024.36. To the extent that a borrower requests a servicing file, the servicer shall provide the borrower with a copy of the information contained in the file subject to the limitations set forth in § 1024.36(f).

Another commenter requested clarification as to whether consumers may use the information request process to request payoff statements. The Bureau is amending proposed § 1024.36(a) to make clear that servicers need not treat borrowers' requests for payoff balances as requests for information for which servicers must comply with the information request procedures set forth in § 1024.36. The Bureau believes that this revision is appropriate, as borrowers already have a mechanism by which to request payoff balances under section 129G of TILA with respect to home loans. For those loans that are not subject to section 129G of TILA, the Bureau believes that it would be inappropriate to extend the requirements of that provision beyond the scope mandated by Congress, as implemented by § 1026.36(c)(3) of the 2013 TILA Servicing Final Rule.

Owner or Assignee

Section 1463(a) of the Dodd-Frank Act amended RESPA to add section 6(k)(1)(D), which states that a servicer shall not fail to provide information regarding the owner or assignee of a mortgage loan within ten business days of a borrower's request. Proposed comment 36(a)–2 would have clarified that if a borrower requests information regarding the owner or assignee of a mortgage loan, a servicer complies with its obligations to identify the owner or assignee of the mortgage loan by identifying the entity that holds the legal obligation to receive payments from a mortgage loan. Proposed comments 36(a)–2.i and 36(a)–2.ii would have provided examples of which party is the owner or assignee of a mortgage loan for different forms of mortgage loan ownership. These include situations when a mortgage loan is held in portfolio by an affiliate of a servicer, when a mortgage loan is owned by a trust in connection with a private label securitization transaction, and when a mortgage loan is held in connection with a GSE or Ginnie Mae guaranteed securitization transaction. The Bureau believes that it would not provide additional consumer protection to impose an obligation on a servicer to identify entities that may have an interest in a borrower's mortgage loan other than the owner or assignee of the mortgage loan, as such information would be of limited utility.

During outreach, servicers generally did not express concerns to the Bureau regarding the obligation to provide borrowers with the type of information subject to the information request requirements. Specifically, in the Small Business Review Panel outreach, small entity representatives indicated that they felt fairly comfortable with the types of information that would be subject to the requirements, indicating that this information was generally in the borrower's mortgage loan file.

The small entity representatives did express concern regarding the obligation to provide information regarding the owner or assignee of a mortgage loan. The small entity representatives stated that servicers may not have contact information for owners or assignees of mortgage loans, that such owners or assignees are not prepared to handle calls from borrowers, and that a typical servicer duty is to handle customer complaints so that owners or assignees of mortgage loans do not have to handle that responsibility. Certain owners, assignees, and guarantors of mortgage loans, including other federal agencies, have expressed similar concerns to the Bureau.

Industry commenters expressed similar concerns in response to the proposal. One industry trade association suggested that the Bureau amend proposed comment 36(a)–2 to require that servicers identify the name of the trustee rather than the name of the legal entity that holds the legal right to receive payments. The commenter argued that the information that the Bureau proposes servicers provide would not be meaningful to borrowers, as the trust itself cannot act. Moreover, the commenter asserted that servicers do not typically track the trust name with the account, as such information is rarely used. One large bank commenter urged the Bureau to amend the comment to replace the reference to ''obligation'' with ''right'' as the commenter asserted the former is not technically accurate.

As outlined in the proposal, the Bureau understands the concerns asserted by servicers, owners, assignees, guarantors, and other federal agencies that requiring servicers to provide the proposed information to borrowers may confuse borrowers and lead to attempts to communicate with owners or assignees that are unprepared or unwilling to engage in such communications. The requirement that servicers identify to the borrower the owner or assignee of a mortgage loan was added as section 6(k)(1)(D) of RESPA by the Dodd-Frank Act. Section 6(k)(1)(D) requires that information regarding the owner or assignee of a mortgage loan must be provided to borrowers. The Bureau believes that the benefit to borrowers of obtaining the information, which was required by Congress, justifies any concerns about the potential for confusion. As to commenters' concern that trustee information is more relevant than trust information, the Bureau notes that proposed comment 36(a)–2 provided that where a trust is the owner or assignee of a loan, a servicer must provide the name of both the trustee and the trust. Also, for clarification purposes, the Bureau is revising proposed comment 36(a)–2 to state that when a borrower requests information regarding the owner or assignee of a mortgage loan, a servicer complies by identifying the person on whose behalf the servicer receives payments from the borrower. Otherwise, the Bureau is adopting comment 36(a)–2 substantially as proposed.

36(b) Contact Information for Borrowers To Request Information

The Bureau proposed § 1024.36(b), which would have permitted a servicer to establish an exclusive telephone number and address that a borrower must use to request information in accordance with the procedures in § 1024.36. If a servicer chose to establish a separate telephone number and address for information requests, the proposal would have required the servicer to provide the borrower a notice that states that the borrower may request information using the telephone number and address established by the servicer for that purpose. Proposed comment 36(b)–1 would have clarified that if a servicer has not designated a telephone number and address that a borrower must use to request information, then the servicer will be required to respond to an information request received at any office of the servicer. Proposed comment 36(b)–2 would have further clarified that the written notice to the borrower may be set forth in another written notice provided to the borrower, such as a notice of transfer, periodic statement, or coupon book. Proposed comment 36(b)–2 would have further clarified that if a servicer establishes a telephone number and address for receipt of information requests, the servicer must provide that telephone number and address in any communication in which the servicer provides the borrower with contact information for assistance from the servicer.

The Bureau proposed to allow servicers to establish a telephone number and address that a borrower must use to request information in order to allow servicers to direct oral and written requests to appropriate personnel that have been trained to ensure that the servicer responds appropriately. As the proposal noted, at larger servicers with other consumer financial service affiliates, many personnel simply do not typically deal with mortgage servicing-related issues. For instance, at a major bank servicer, a borrower might request information from a local bank branch staff, who likely would not have access to the information necessary to respond to the request. Thus, the Bureau reasoned, if a servicer establishes a telephone number and address that a borrower must use, a servicer would not be required to comply with the information request requirements set forth in § 1024.36 for requests that may be received by the servicer through a different method.

Most industry commenters favored allowing servicers to designate an address and telephone number to which borrowers must direct information requests. At the same time, such commenters asserted that the proposal constituted an insufficient remedy to the burdens inherent in permitting oral information requests. Some commenters said that designating telephone lines for information requests could be especially costly for small servicers. Thus, one community bank trade association argued that the proposal favored large institutions. Two industry commenters requested clarification regarding how servicers must handle information requests sent to the wrong address. Finally, one credit union commenter asserted that servicers should only be required to include designated telephone numbers and addresses in regular forms of communication to borrowers, such as the periodic statement. In contrast, consumer group commenters suggested that to the extent a servicer designates a telephone line or address, the servicer should be required to post such information on its Web site and to include it in mailed notices.

Because the final rule removes the requirement that servicers comply with information request requirements under § 1024.36 for oral information requests, the Bureau believes that it is no longer necessary to regulate the circumstances under which servicers may direct oral information requests to an exclusive telephone number that a borrower must use to request information. However, for written information requests, the Bureau continues to believe that it is reasonable to permit servicers to designate a specific address for the intake of information requests. Allowing a servicer to designate a specific address is consistent with current requirements of Regulation X with respect to qualified written requests. Current § 1024.21(e)(1) permits a servicer to designate a ''separate and exclusive office and address for the receipt and handling of qualified written requests.'' Moreover, the Bureau believes that identifying a specific address for receiving information requests will benefit consumers. By providing a specific address, servicers will identify to consumers the office capable of addressing requests made by consumers.

The Bureau believes it is critical for servicers to publicize any designated address to ensure that borrowers know how properly to request information and to avoid evasion by servicers of information request procedures. This is especially important because, as noted in the proposal, servicers who designate a specific address for receipt of information requests are not required to comply with information request procedures for notices sent to the wrong address. Accordingly, final § 1024.36(b) requires servicers that designate addresses for receipt of requests for information to post the designated address on any Web site maintained by the servicer if the servicer lists any contact address for the servicer. In addition, final comment 36(b)–2 retains the clarification that servicers that establish an address that a borrower must use to request information, must provide the address to the borrower in any communication in which the servicer provides the borrower with contact information for assistance. The Bureau is otherwise adopting § 1024.36(b) and comments 36(b)–1 and 36(b)–2 as proposed, except that it has revised the provisions permitting servicers to designate a telephone number that a borrower must use to request information and clarified that the notice must be written.

Multiple Offices

Proposed § 1024.36(b), similar to proposed § 1024.35(c) for notices of error, would have required a servicer to use the same telephone number and address it designates for receiving notices of error for receiving information requests pursuant to proposed § 1024.36(b), and vice versa. Further, proposed comment 36(b)–3 would have clarified that any telephone numbers or addresses designated by a servicer for any borrower may be used by any other borrower to submit an information request. This clarifies that a servicer may not determine that an information request is invalid if it was received at any telephone number or address designated by the servicer for receipt of information requests just because it was not received by the specific phone number or address identified to a specific borrower.

One non-bank servicer expressed concern about the proposal's requirement to designate the same address and telephone number for notices of error and information requests. The commenter explained that it assigns separate teams to address information requests and error notices. Thus, the commenter asserted, proposed § 1024.36(b) would negatively impact customer service. Having considered this comment, the Bureau notes that it proposed § 1024.36(b) because it was concerned that designating separate telephone numbers and addresses for notices of error and information requests could impede borrower attempts to submit notices of error and information requests to servicers due to debates over whether a particular communication constituted a notice of error or an information request. For the reasons set forth above and in the proposal, final § 1024.36(b) retains the requirement that servicers designate the same address for receipt of information requests and notices of error. In addition, the Bureau is adopting comment 36(b)–3 substantially as proposed, except that the Bureau has removed references to information requests received by telephone.

Proposed comment 36(b)–5 would have further clarified that a servicer may use automated systems, such as an interactive voice response system, to manage the intake of borrower calls. The proposal provided that prompts for requesting information must be clear and provide the borrower the option to connect to a live representative. Because the final rule does not require servicers to comply with information request procedures for oral requests, the Bureau is withdrawing proposed comment 36(b)–5 from the final rule.

Internet Intake of Information Requests

The Bureau proposed comment 36(b)–4 to clarify that a servicer would not be required to establish a process for receiving information requests through email, Web site form, or other online methods. Proposed comment 36(b)–4 was intended to further clarify that if a servicer establishes a process for receiving information requests through online methods, the servicer can designate it as the only online intake process that a borrower can use to request information. A servicer would not be required to provide a written

notice to a borrower in order to gain the benefit of the online process being considered the exclusive online process for receiving information requests. Proposed comment 36(b)–4 would have further clarified that a servicer's decision to accept requests for information through an online intake method shall be in addition to, not in place of, any processes for receiving information requests by phone or mail.

One consumer group commenter advocated requiring servicers to establish an online process for receipt of information requests. The Bureau agrees that online processes have significant promise to facilitate faster, cheaper communications between borrowers and servicers. However, the Bureau believes that this suggestion raises a broader issue around the use of electronic media for communications between servicers (and other financial services providers) and borrowers (and other consumers). The Bureau believes it would be most effective to address this issue in that larger context after study and outreach to enable the Bureau to develop principles or standards that would be appropriate on an industry-wide basis. The Bureau is therefore, at this time, finalizing language to permit, but not require, servicers to elect whether to adopt such a process. The Bureau intends to conduct broader analyses of electronic communications' potential for disclosure, error resolution, and information requests after the rule is released. Accordingly, the Bureau is adopting comment 36(b)–4 as proposed, with minor technical amendments, and having removed references to information requests received by telephone.

36(c) Acknowledgment of Receipt

Proposed § 1024.36(c) would have required a servicer to provide a borrower an acknowledgement of an information request within five days (excluding legal public holidays, Saturdays, and Sundays) of receiving an information request. Proposed § 1024.36(c) would have implemented section 1463(c) of the Dodd-Frank Act, which amended the current acknowledgement deadline of 20 days for qualified written requests to five days. Proposed § 1024.36(c) would have further applied the same timeline applicable to a qualified written request to any information request.

Industry commenters, including multiple credit union trade associations, requested that the Bureau lengthen the acknowledgment time period, asserting that five days was unreasonable, especially for smaller institutions. A nonprofit mortgage servicer said the timeframe was insufficient for its small volunteer staff. An industry trade association commenter argued that the acknowledgment requirement creates unnecessary paperwork and should be removed from the final rule altogether. In contrast, consumer group commenters were generally supportive of the acknowledgment requirement, noting that the timeline in the proposal was consistent with that in the Dodd-Frank Act for qualified written requests.

The Bureau believes acknowledgment within five days is appropriate given that the Dodd-Frank Act expressly adopts that requirement for qualified written requests and differentiating between two regimes would increase operational complexity. Moreover, the burden on servicers is significantly mitigated by the fact that the information request procedures are only applicable to written requests. The Bureau further notes that the contents of the acknowledgment are minimal. Moreover, servicers need not provide an acknowledgment if the servicer provides the information requested within five days. Accordingly, the Bureau is adopting § 1024.36(c) as proposed.

36(d) Response to Information Request

The Bureau proposed § 1024.36(d) to set forth requirements on servicers for responding to information requests. As discussed in more detail below, proposed § 1024.36(d) would have implemented the response requirement in section 6(e)(2) of RESPA applicable to a qualified written request, including section 1463(c) of the Dodd-Frank Act, which amended certain deadlines for responses to qualified written requests. Proposed § 1024.36(d) would have further implemented the ten business day timeline in section 6(k)(1)(D) of RESPA by applying the timeline to requests for information about the owner or assignee of the loan.

36(d)(1) Investigation and Response Requirements

Proposed § 1024.36(d)(1) would have required a servicer to respond to an information request within 30 days by either (i) providing the borrower with the requested information and contact information for further assistance, or (ii) conducting a reasonable search for the requested information and providing the borrower with a written notification that states that the servicer has determined that the requested information is not available or cannot reasonably be obtained by the servicer, as appropriate, the basis for the servicer's determination, and contact information for further assistance. The proposal would have only required a servicer to provide a written notice to the borrower in response to the information request if the information requested by the borrower is not available or cannot reasonably be obtained by the servicer. The proposal would have permitted a servicer to respond either orally or in writing to the borrower if the servicer is providing the information requested by the borrower. The Bureau proposed to allow servicers to respond orally because it believed that the goal of providing information to borrowers would be furthered by allowing servicers to respond orally. Additionally, the Bureau believed that allowing the servicer to respond orally would reduce the burden on servicers.

One consumer advocacy group commenter urged the Bureau to require that servicers respond to information requests in writing. The commenter argued that servicers regularly provide borrowers inconsistent and inaccurate information, which necessitates a written response. Because, as discussed above, the final rule requires borrowers to submit information requests in writing in order to gain the benefit of the information request procedures set forth in § 1024.36, the Bureau now believes it is appropriate and effectuates the consumer protection purposes of RESPA to require that servicers respond to borrowers' information requests in writing. Doing so will help ensure that there is a written record of both the borrower's request and the servicer's response, which the Bureau believes will reduce confusion regarding the accuracy of the information provided. For these reasons, the Bureau is adopting § 1024.36(d)(1) substantially as proposed, except that it has removed references to a servicer's oral response and clarified that the servicer's contact information must include a telephone number.

Information Not Available

Proposed comment 36(d)(1)(ii)–1 would have clarified that information should not be considered as available to a servicer if the information is not in the servicer's possession or control or the servicer cannot retrieve the information in the ordinary course of business through reasonable efforts.

The purpose of the information request requirements is to provide an efficient means for borrowers to obtain information regarding their mortgage loan accounts and the Bureau believes that imposing obligations on servicers to provide information in response to an information request is an efficient means of achieving the goal of providing a borrower with access to requested information. However, the Bureau

proposed comment 36(d)(1)(ii)–1 because it believes that burden for information requests will increase greatly if a servicer is required to undertake an investigation for documents that are not in a servicer's possession or control. The same inefficiency exists even if information is in a servicer's possession or control but, for appropriate business reasons, is stored in a medium that is not accessible by a servicer in the ordinary course of business. The Bureau believes that the marginal benefit of having additional information available to borrowers is not justified by the significant burdens that such investigations may incur. Moreover, the Bureau believes that it would frustrate the consumer protection purposes of RESPA to require that servicers devote considerable resources, which could otherwise be spent on responding to information requests that would benefit borrowers, to locating inaccessible information.

One mortgage servicer commented on proposed comment 36(d)(1)(ii)–1. The commenter requested that the Bureau provide examples in the commentary of what it considers to be unavailable information. Proposed comment 36(d)(1)(ii)–2 provides examples of when documents should and should not be considered to be available to a servicer in response to an information request, and such examples are reflected in the final comment as well. For the reasons discussed in the proposal and above, the Bureau is adopting comments 36(d)(1)(ii)–1 and 36(d)(1)(ii)–2 substantially as proposed.

36(d)(2) Time Limits

36(d)(2)(i)

Section 1463(b) of the Dodd-Frank Act amended section 6(e)(2) of RESPA to require a servicer to investigate and respond to a qualified written request within 30 days (excluding legal public holidays, Saturdays, and Sundays). Prior to the Dodd-Frank Act, servicers had 60 days to investigate and respond to a borrower's qualified written request. The Bureau proposed § 1024.36(d)(2)(i) to implement section 6(e)(2) of RESPA with respect to qualified written requests, and to impose the same timeframe on other requests for information from borrowers. Specifically, proposed § 1024.36(d)(2)(i) would have required a servicer to respond to an information request not later than 30 days (excluding legal public holidays, Saturdays, and Sundays) after the servicer receives the information request, with one exception discussed below.

While several industry commenters asserted that 30 days was insufficient, one credit union opined that the timeline was reasonable. Similarly, a consumer group commenter noted that the timeline was consistent with the time period for qualified written requests required by the Dodd-Frank Act. Consumer commenters on Regulation Room asserted that the timeline was too generous. The Bureau believes that the 30-day timeframe proposed is appropriate given that the Dodd-Frank Act expressly changed the timeframe for qualified written requests from 60 days to 30 days and differentiating between two regimes would increase operational complexity as well as burden on borrowers and servicers. Accordingly, the Bureau is adopting the 30-day timeline as proposed.

Shortened Time Limit To Provide Information Regarding the Identity of the Owner or Assignee

Section 1463(a) of the Dodd-Frank Act added section 6(k)(1)(D) to RESPA, which sets forth a ten business day limitation on a servicer to respond to a borrower's request for information regarding the owner or assignee of a mortgage loan. The Bureau proposed § 1024.36(d)(2)(i)(A) to implement this provision of RESPA. Proposed § 1024.36(d)(2)(i)(A) would have provided that if a borrower submits a request for information regarding the identity of, and address or relevant contact information for, the owner or assignee of a mortgage loan, a servicer shall respond to the information request with ten days (excluding legal public holidays, Saturdays, and Sundays). Proposed § 1024.36(d)(2)(i)(A) would have required a servicer to provide the requested information within ten days (excluding legal public holidays, Saturdays, and Sundays) instead of ''10 business days,'' as the Bureau interprets the ''10 business day'' requirement in section 6(k)(1)(D) of RESPA to mean ten calendar days with an exclusion for intervening legal public holidays, Saturdays, and Sundays, and proposes to implement that interpretation in proposed § 1024.36(d)(2)(i)(A).

Two non-bank servicers commented that ten days is insufficient for those circumstances in which a servicer needs to obtain documentation confirming ownership, such as information contained in the collateral file. The Bureau acknowledges the concerns expressed but, as discussed in the proposal, the Bureau does not believe that the burden of obtaining this information for any borrower will be significant enough to justify additional time beyond the ten days (excluding legal public holidays, Saturdays, and Sundays) established by Congress for responding to borrower requests for information regarding the owner or assignee of the loan. Servicers generally have access to the identification of investors as that information is necessary to determine where to direct mortgage loan payments and reports with respect to the performance of serviced assets. The benefit to the borrower of obtaining the information, which Congress required, justifies the costs to servicers of complying within ten days (excluding legal public holidays, Saturdays, and Sundays). Accordingly, the Bureau is adopting § 1024.36(d)(2)(i)(A) as proposed.

Extensions of Time Limits

Section 1463(c)(3) of the Dodd-Frank Act amended section 6(e) of RESPA to permit servicers to extend the time for responding to a qualified written request by 15 days if, before the end of the 30-day period, the servicer notifies the borrower of the reasons for the extension. The Bureau proposed § 1024.36(d)(2)(ii) to implement this provision with respect to qualified written requests, and to impose the same timeframe with respect to other requests for information. Proposed § 1024.36(d)(2)(ii) would have permitted a servicer to extend the time period for responding to an information request by 15 days (excluding legal public holidays, Saturdays, and Sundays) if, before the end of the 30-day period set forth in proposed § 1024.36(d)(2)(i)(B), the servicer notifies the borrower of the extension and the reasons for the delay in responding. For the reasons discussed above, the Bureau did not propose to apply the extension allowance of proposed § 1024.36(d)(2)(ii) to information requests with respect to the owner or assignee of a mortgage loan. Permitting a 15-day extension of that timeframe would negate the shortened response period and undermine the purpose served by shortening it. While some consumer groups disfavored the extension, for the reasons discussed above and in the proposal, the Bureau is adopting § 1024.36(d)(2)(ii) as proposed with minor technical amendments.

36(e) Alternative Compliance

Proposed § 1024.36(e) would have provided that a servicer is not required to comply with the requirements of paragraphs (c) and (d) of proposed § 1024.36 if the information requested by a borrower is provided to the borrower within five days along with

contact information the borrower can use for further assistance. This provision was consistent with section 6(e)(1)(A) of RESPA, which requires servicers to provide written acknowledgment of a qualified written request within five days (excluding legal public holidays, Saturdays, and Sundays) ''unless the action requested is taken within such period.'' Proposed § 1024.36(e) would have permitted a servicer to provide the information requested either orally or in writing. Proposed comment 36(e)–1 would have permitted servicers that provide information orally to demonstrate compliance by, among other things, including a notation in the servicing file that the information requested was provided or maintaining a copy of a recorded telephone conversation.

Because, as discussed above, the final rule requires borrowers to submit information requests in writing in order to gain the benefit of the information request procedures set forth in § 1024.36, the Bureau now believes it is appropriate and consistent with the consumer protection purposes of RESPA to require that servicers respond to borrowers' information requests in writing. Doing so will help ensure that there is a written record of both the borrower's request and the servicer's response, which the Bureau believes will reduce confusion regarding the accuracy of the information provided. The Bureau did not receive comment regarding proposed § 1024.36(e) and, for the reasons set forth above, is adopting § 1024.36(e) substantially as proposed, except that it no longer permits servicers to respond orally and clarifies that the contact information must include a telephone number. The Bureau is removing proposed comment 36(e)–1 from the final rule.

36(f) Requirements not Applicable

The Bureau proposed § 1024.36(f) to set forth the types of information requests to which the information request requirements would not apply.

36(f)(1) In General

Proposed § 1024.36(f)(1) would have provided that a servicer is not required to comply with the information request requirements set forth in § 1024.36(c) and (d) if the servicer reasonably makes certain determinations specified in §§ 1024.36(f)(1)(i), (ii), (iii), (iv) or (v). Specifically, subject to certain exceptions, a servicer would not be required to comply with information request requirements under § 1024.36 as to information requests that are duplicative, overbroad or unduly burdensome, or untimely, as well as requests for confidential, proprietary, general corporate or irrelevant information. A servicer would be liable to the borrower for its unreasonable determination that any of the listed categories apply and resulting failure to comply with proposed § 1024.36(c) and (d).

36(f)(1)(i)

Proposed § 1024.36(f)(1)(i) would have provided that a servicer is not required to comply with the information request requirements in proposed § 1024.36(c) and (d) with respect to an information request that requests information that is substantially the same as information previously requested by or on behalf of the borrower, and for which the servicer has previously complied with its obligation to respond to the information request. Proposed comment 36(f)(1)(i)–1 would have clarified that a borrower's request for a type of information that can change over time should not be considered substantially the same as a previous request for the same type of information. The Bureau proposed § 1024.36(f)(1)(i) to ensure that a servicer is not required to expend resources conducting duplicative searches for documents, as such a requirement could divert resources from responding to other requests.

One anonymous commenter urged the Bureau to withdraw proposed § 1024.36(f)(1)(i), claiming that the Bureau lacked authority to narrow the requirements listed in RESPA. The Bureau's authority for § 1024.36 is discussed above. In addition, the Bureau believes that it would frustrate the consumer protection purposes of RESPA to require that servicers devote resources, which could otherwise be spent on responding to information requests that would benefit consumers, to respond to duplicative information requests. The Bureau therefore believes that § 1024.36(f)(1)(i) is necessary to achieve the purposes of RESPA, including of ensuring responsiveness to consumer requests and complaints and the provision and maintenance of accurate and relevant information. Accordingly, for the reasons set forth in the proposal and above, the Bureau is adopting § 1024.36(f)(1)(i) and comment 36(f)(1)(i)–1 substantially as proposed.

36(f)(1)(ii)

Proposed § 1024.36(f)(1)(ii) would have provided that a servicer is not required to comply with the information request requirements in proposed § 1024.36(c) and (d) with respect to an information request that requests confidential, proprietary, or general corporate information of a servicer. The Bureau proposed § 1024.36(f)(1)(ii) because it believed that the purpose of providing borrowers with a means to request information regarding a borrower's mortgage loan account would be frustrated by permitting borrowers to request confidential, proprietary, or general corporation information of a servicer. Proposed comment 36(f)(1)(ii)–1 would have provided examples of confidential, proprietary, or general corporate information. These include information requests regarding: management and profitability of a servicer; other mortgage loans than the borrower's; investor reports; compensation, bonuses, and personnel actions for servicer personnel; the servicer's training programs; investor agreements; the evaluation or exercise of any owner or assignee remedy; the servicer's servicing program guide; investor instructions or requirements regarding loss mitigation options, examination reports, compliance audits or other investigative materials.

Industry commenters expressed support for proposed § 1024.36(f)(1)(ii), but urged the Bureau to make clear that servicers need not turn over privileged documents. Multiple industry commenters said that servicers should not be required to produce pooling and servicing agreements, as such agreements are confidential, proprietary and also costly to mail. In contrast, one consumer advocate commenter said that such agreements are not typically confidential or proprietary, yet important because servicers rely on such documents to make erroneous claims that they are not authorized to offer certain loan modifications. Consumer advocacy groups also asserted that proposed § 1024.36(f)(1)(ii), as a whole, gives servicers too much discretion which may increase servicers' nonresponsiveness. An anonymous commenter said it was unclear which information falls into proposed § 1024.36(f)(1)(ii) and also questioned the Bureau's authority to narrow the requirements of RESPA.

Having considered these comments, the Bureau is amending proposed § 1024.36(f)(1)(ii) to provide that servicers need not provide borrowers with information that is confidential, proprietary or privileged, as the Bureau believes that permitting information requests for such information could impede the ability of servicers to operate effectively. In addition, the Bureau believes that it would frustrate the consumer protection purposes of RESPA to require that servicers devote

resources, which could otherwise be spent responding to information requests that would benefit consumers, to determining how to respond to information requests for confidential, proprietary, or privileged information that generally would not directly benefit the borrower, but might pose considerable disclosure risk to the servicer.

The final rule further removes the reference to general corporate information, and references to such information have been removed from the examples listed in final comment 36(f)(1)(ii)–1 as well. For example, because the Bureau does not believe that pooling and servicing agreements are typically kept confidential, final comment 36(f)(1)(ii)–1 no longer lists such agreements as examples. However, the Bureau notes that to the extent that a borrower requests such agreements, a servicer is not required to comply with the requirements of § 1024.36(c) or (d) if the servicer reasonably determines that any of the exclusions set forth in § 1024.36(f) apply. The Bureau's authority for § 1024.36 is addressed above.

36(f)(1)(iii)

Proposed § 1024.36(f)(1)(iii) would have provided that a servicer is not required to comply with the information request requirements in proposed § 1024.36(c) and (d) with respect to information requests that are not directly related to the borrower's mortgage loan account. The Bureau proposed § 1024.36(f)(1)(iii) because it believes the protection in it is appropriate to fulfill the purpose of the proposed rule, which is to provide a means for borrowers to obtain information from servicers regarding their own mortgage loan accounts.

A consumer group commenter argued that the proposal requires that borrowers state the information requested with too much specificity, arguing that a general request for information about the status of the borrower's loan should suffice. An anonymous commenter asserted that the Bureau proposes to improperly narrow the scope of information requests. The commenter reasoned that section 6(e)(1)(B) of RESPA requires servicers to respond to qualified written requests for information relating to the servicing of the loan. The commenter argued that the Bureau proposes to narrow that definition by adding the requirement that such requests must ''directly'' relate to the ''mortgage loan account'' for the loan.

By relieving servicers of the duty to respond to requests for information that are not directly related to the borrower's mortgage loan account, the Bureau does not intend to impose an obligation on borrowers to identify with specificity the precise document or data point the borrower is seeking. Rather, the point of this section is to assure that servicers' resources are focused on securing relevant information for borrowers by excluding requests for information that are not relevant to the borrower's account. For the reasons discussed above, the Bureau finds that § 1024.36(f)(1)(iii) is necessary to achieve the purposes of RESPA by ensuring that servicer resources that could be devoted to responding to information requests that benefit borrowers are not diverted to responding to information requests that would not result in consumer benefit. Accordingly, for the reasons set forth in the proposal and above, the Bureau is adopting § 1024.36(f)(1)(iii) as proposed. The Bureau is also adopting new comment 36(f)(1)(iii)–1, which includes examples of information that is not directly related to a borrower's loan account.

36(f)(1)(iv)

Proposed § 1024.36(f)(1)(iv) would have provided that a servicer is not required to comply with the request for information requirements in proposed § 1024.36(c) and (d) with respect to a request for information that is overbroad or unduly burdensome. The proposed rule would have defined ''overbroad'' and ''unduly burdensome'' for this purpose. It would have provided that an information request is overbroad if a borrower requests a servicer provide an unreasonable volume of documents or information to a borrower. The proposed rule stated that an information request is unduly burdensome if a diligent servicer could not respond to the request without either exceeding the maximum timeframe permitted by § 1024.36(d)(2)(ii) or incurring costs (or dedicating resources) that would be unreasonable in light of the circumstances. The proposed rule would have further clarified that if a servicer can identify a valid information request in a submission that is otherwise overbroad or unduly burdensome, the servicer is required to respond to the information request that it can identify. Finally, the Bureau proposed comment 36(f)(1)(iv)–1 to set forth characteristics that may indicate if an information request is overbroad or unduly burdensome.

As discussed above for proposed § 1024.35(g)(1)(ii), during pre-proposal outreach, consumers, consumer advocates, servicers, and servicing industry representatives indicated to the Bureau that consumers do not typically use the current qualified written request process to request information. During the Small Business Review Panel outreach, small entity representatives expressed that typically qualified written requests received from borrowers were vague forms found online or forms used by advocates as a form of pre-litigation discovery. Servicers and servicing industry representatives indicated that these types of qualified written requests are unreasonable and unduly burdensome. Small entity representatives in the Small Business Review Panel outreach requested that the Bureau consider an exclusion for abusive requests, or requests made with the intent to harass the servicer.

The Bureau requested comment regarding whether a servicer should not be required to undertake the information request requirements in proposed § 1024.36(c) and (d) for information requests that are overbroad or unduly burdensome. Industry commenters supported the exclusion, but urged the Bureau to remove the requirement that servicers identify valid information requests in submissions that are otherwise overbroad or unduly burdensome. Industry commenters said servicers should not be required to parse through such submissions to locate a clear information request. One large trade association of mortgage servicers said that the requirement effectively subsumes the exclusion. Consumer group commenters generally disfavored the exclusion. One commenter questioned the assertion that borrowers primarily use qualified written requests to obtain prelitigation discovery. One consumer group said the exclusion gives servicers too much discretion. Another said it requires borrowers to state their information requests with too much specificity. An anonymous consumer advocate said a request from a single borrower should not be so voluminous as to be burdensome for servicers to respond. Another consumer group commenter requested that the Bureau address situations in which the servicer erroneously determines that a submission is overbroad or unduly burdensome.

The Bureau proposed § 1024.36(f)(1)(iv), in part, because the Bureau believes that requiring servicers to respond to overbroad or unduly burdensome information requests from some borrowers may cause servicers to expend fewer resources to address requests that may be more clearly stated and more clearly require servicer attention. The Bureau was especially

concerned about this in light of the proposed rule's requirement that servicers respond to an expanded universe of information requests, including requests for information that do not specifically relate to ''servicing'' as defined in RESPA, as implemented by this rule, as well as information requests asserted orally. While the final rule does not require that servicers undertake the information request procedures in § 1024.36(c) and (d) for oral submissions, it does not limit information requests to those related to servicing. Thus, the Bureau continues to believe that a requirement for servicers to respond to information requests that are overbroad or unduly burdensome may harm consumers and frustrate servicers' ability to comply with the new information request requirements. Finally, as stated in the proposal, the Bureau does not believe that the information request procedures should replace or supplant civil litigation document requests and should not be used as a forum for pre-litigation discovery. Accordingly, the Bureau is adopting § 1024.36(f)(1)(iv) and comment 36(f)(1)(iv)–1 substantially as proposed.

36(f)(1)(v)

Proposed § 1024.36(f)(1)(v) would have provided that a servicer is not required to comply with the information request requirements in proposed § 1024.36(c) and (d) for an untimely information request—that is, an information request delivered to the servicer more than one year after either servicing for the mortgage loan that is the subject of the request was transferred by that servicer to a transferee servicer or the mortgage loan amount was paid in full, whichever date is applicable. The Bureau proposed this provision to set a specific and clear time that a servicer may be responsible for responding to information requests for a mortgage loan.

Moreover, the Bureau proposed § 1024.36(f)(1)(v) to achieve the same goal that currently exists in Regulation X with respect to qualified written requests. Specifically, current § 1024.21(e)(2)(ii) states that ''a written request does not constitute a qualified written request if it is delivered to a servicer more than one year after either the date of transfer of servicing or the date that the mortgage servicing loan amount was paid in full, whichever date is applicable.''

One industry trade association expressed support for proposed § 1024.36(f)(1)(v). Consumer advocacy groups did not comment on proposed § 1024.36(f)(1)(v). For the reasons set forth above, the Bureau is adopting § 1024.36(f)(1)(v) as proposed with a minor technical amendment.

36(f)(2) Notice to Borrower

Proposed § 1024.36(f)(2) would have required that if a servicer determines that it is not required to comply with the information request requirements in proposed § 1024.36(c) and (d) with respect to an information request, the servicer must provide a notice to the borrower informing the borrower of the servicer's determination. The servicer must send the notice not later than five days (excluding legal public holidays, Saturdays, and Sundays) after its determination and the notice must set forth the basis upon which the servicer has made the determination, noting the applicable provision of proposed § 1024.36(f)(1).

One credit union trade association disfavored the proposed requirement that a servicer send a notice informing the borrower that an information request falls into one of the enumerated exclusions. The commenter suggested that the Bureau permit servicers to send a standard notice informing borrowers that the servicer received the information request and is not required to respond.

The Bureau proposed § 1024.36(f)(2) because it believes that borrowers should be notified that a servicer does not intend to take any action on the information request. The Bureau also believes borrowers should know the basis for the servicer's determination. By providing borrowers with notice of the basis for the servicer's determination, a borrower will know the servicer's basis and will have the opportunity to bring a legal action to challenge that determination where appropriate. Accordingly, having considered the comment, the Bureau is adopting § 1024.36(f)(2) as proposed.

36(g) Payment Requirement Limitations

Proposed § 1024.36(g)(1) would have prohibited a servicer from charging a fee, or requiring a borrower to make any payment that may be owed on a borrower's account as a condition of responding to an information request. Proposed § 1024.36(g)(2) would have, however, permitted fees for providing payoff statements or beneficiary notices under applicable law. The Bureau proposed § 1024.36(g)(1) and (2) for three reasons. First, section 1463(a) of the Dodd-Frank Act added section 6(k)(1)(B) to RESPA, which prohibits a servicer from charging fees for responding to valid qualified written requests. Proposed § 1024.36(g) would have implemented that provision with respect to qualified written requests for information relating to the servicing of a mortgage loan. Second, the Bureau believes that a servicer practice of charging for responding to an information request impedes borrowers from pursuing valid information requests, and that the prohibition is therefore necessary and appropriate to achieve the consumer protection purposes of RESPA, including ensuring responsiveness to borrower requests and complaints. Third, the Bureau learned from outreach with consumer advocates that, in some instances, servicers have demanded that borrowers make payments before the servicer will provide a borrower with information requested by the borrower or will correct errors identified by a borrower. The Bureau believes that a servicer is required to provide a borrower with information about the borrower's mortgage loan account notwithstanding the payment status of a borrower's account.

Some consumer advocacy group commenters expressed support for the fee prohibition, stating that the prohibition is statutorily required. In contrast, a large credit union trade association opposed the prohibition, noting that it bars fees for items for which credit unions routinely charge, such as fees for copies of cancelled checks and periodic statements. The trade association argued that the proposed rule should take the fact that a fee is legally permissible into account. A law firm that represents servicers argued that it would be unfair and economically burdensome to prohibit servicers from charging fees for duplicate statements, such as year-end statements and tax forms.

Having considered these comments, for the reasons stated above and in the proposal, the Bureau is adopting § 1024.36(g) as proposed, except that § 1024.36(g)(2) no longer references payoff statements. The Bureau has removed the reference to payoff statements, as the final rule excludes such statements from information request requirements under § 1024.36 altogether.

36(h) Servicer Remedies

Proposed § 1024.36(h) would have provided that the existence of an outstanding information request does not prohibit a servicer from furnishing adverse information to any consumer reporting agency or from pursuing any remedies, including proceeding with a foreclosure sale, permitted by the applicable mortgage loan instrument. The proposed requirement is consistent with section 6(e)(3) of RESPA which

prohibits servicers from furnishing adverse information only as to qualified written requests that assert an error with respect to the borrower's payments, but not to a qualified written request that requests information. Moreover, the Bureau does not believe that the consumer protection purposes of RESPA would be furthered by permitting borrowers to evade consumer reporting by submitting an information request. The Bureau did not receive comment regarding proposed § 1024.36(h) and is adopting it as proposed.

Section 1024.37 Force-Placed Insurance

Section 1463(a) of the Dodd-Frank Act amended section 6 of RESPA to establish new servicer duties with respect to servicers' purchase of force-placed insurance on a property securing a federally related mortgage loan. The statute generally defines ''force-placed insurance'' as hazard insurance coverage obtained by a servicer of a federally related mortgage loan when the borrower has failed to maintain or renew hazard insurance on such property as required of the borrower under the terms of the mortgage loan. New § 6(k)(1)(A) of RESPA states that a servicer shall not obtain force-placed insurance unless there is a reasonable basis to believe the borrower has failed to comply with the loan contract's requirements to maintain property insurance. New section 6(*l*) of RESPA further states that servicers must: (1) provide two written notices to a borrower over a notification period lasting at least 45 days before imposing a charge for force-placed insurance on the borrower; (2) accept any reasonable form of written confirmation from a borrower of existing insurance coverage; and (3) within 15 days of the receipt of confirmation of a borrower's existing insurance coverage, terminate force-placed insurance and refund all force-placed insurance premiums paid by the borrower during any period during which the borrower's insurance coverage and the force-placed insurance coverage were both in effect, as well as any related fees charged to the borrower's account with respect to force-placed insurance during such period. Section 6(*l*) of RESPA additionally states that no provisions of section 6(*l*) shall be construed as prohibiting a servicer from providing simultaneous or concurrent notice of a lack of flood insurance pursuant to section 102(e) of the Flood Disaster Protection Act of 1973. Section 6(m) of RESPA states that all charges related to force-placed insurance imposed on a borrower by or through a servicer, other than charges subject to State regulation as the business of insurance, must be bona fide and reasonable.

The Bureau proposed § 1024.37 to implement the new servicer duties established by section 1463(a) of the Dodd-Frank Act in section 6(k) through (m) of RESPA. Force-placed insurance was created by the insurance industry to provide mortgage loan owners and investors with a hazard insurance product that would protect the value of their investment by insuring properties securing mortgage loans when hazard insurance obtained by a borrower lapsed. In recent years, however, force-placed insurance has become a consumer protection concern and has attracted the attention of lawmakers, enforcement officials, and Federal and State regulators.[105] First, a force-placed insurance policy typically provides less coverage than the typical homeowners' insurance policy because force-placed insurance has been designed to provide coverage limited to protecting the value of the dwelling, but not personal property, personal liabilities for injuries on site, and other types of loss included in the scope of coverage of a typical homeowners' insurance policy. Second, although a force-placed insurance policy generally provides less coverage than a homeowners' insurance policy, force-placed insurance policy premiums are generally substantially more expensive than homeowners' insurance policy premiums. One large force-placed insurance provider estimates that the force-placed policies it writes cost, on average, 1.5 to 2 times more than the prior hazard insurance purchased by a borrower.[106] But at the same time, it has been reported that an individual force-placed policy could cost 10 times as much as a homeowners' insurance policy.[107] Explanations for the cost of force-placed insurance differ. Industry stakeholders generally attribute the substantially higher cost of force-placed insurance (relative to homeowners' insurance) to the fact that force-placed insurance: (1) Can be purchased for every mortgage loan in a servicer's portfolio (including vacant properties and other properties that homeowners' insurance providers will not insure); (2) ensures continuous coverage as of the date a homeowners' insurance policy lapses or is canceled; and (3) can be canceled by a servicer at any time, with a full refund back to the date of placement.

Consumer groups, however, assert that the higher cost of force-placed insurance can be largely explained by market mechanisms that drive force-placed insurance providers to compete for business from servicers. Consumer groups argue that the cost of force-placed insurance is inflated by incentives like commissions to servicers (or their affiliates) that are licensed to engage in insurance transactions, no-cost or below-cost insurance tracking and monitoring services to servicers because the actual cost is passed on to borrowers in the force-placed insurance premium charge a force-placed insurance provider assesses on a borrower through the servicer, and payments for entering into reinsurance arrangements with servicers (or their affiliates) that are licensed to engage in insurance transactions. Consumer groups and mortgage investors have alleged that servicers have frequently improperly placed force-placed insurance, in some instances to receive lucrative commissions or reinsurance fees, or other consideration.[108] In some

cases, consumer groups have asserted that the higher cost of force-placed insurance can drive borrowers, particularly those already facing financial hardship, into default.

As discussed above, RESPA is a remedial consumer protection statute and imposes obligations upon the servicing of federally related mortgage loans that are intended to protect borrowers. The Bureau believes that the obligations the Dodd-Frank Act established with respect to servicers' purchase of force-placed insurance were intended to impose, at minimum, (1) a duty to help borrowers avoid unwarranted and unnecessary charges related to force-placed insurance through both direct limitations on certain charges and several procedural safeguards; and (2) a duty to provide borrowers with reasonably accurate information about servicers' grounds for purchasing force-placed insurance and the financial impact that such purchase could have on the borrowers, in order to encourage borrowers to take appropriate steps to maintain their hazard insurance policies.

Legal Authority

Section 1024.37 implements section 6(k)(1)(A), 6(k)(2), 6(*l*), and 6(m) of RESPA. Pursuant to the Bureau's authorities under sections 6(j), 6(k)(1)(E), and 19(a) of RESPA, the Bureau is also adopting certain additions and certain exemptions to these provisions. As explained in more detail below, these additions and exemptions are necessary and appropriate to achieve the consumer protection purposes of RESPA, including the avoidance of unnecessary and unwarranted charges and fees and the provision to borrowers of accurate and relevant information.

37(a) Definition of Force-Placed Insurance

37(a)(1) In General

As added by the Dodd-Frank Act, section 6(k)(2) of RESPA states that for purposes of section 6(k) through (m) of RESPA, force-placed insurance means hazard insurance coverage obtained by a servicer of a federally related mortgage loan when the borrower has failed to maintain or renew hazard insurance on such property as required of the borrower under the terms of the mortgage. The Bureau proposed § 1024.37(a)(1) to implement section 6(k)(2) of RESPA. The proposed provision stated that in general, for purposes of § 1024.37, the term ''force-placed insurance'' means hazard insurance obtained by a servicer on behalf of the owner or assignee of a mortgage loan on a property securing such loan.

Proposed § 1024.37(a)(1) did not incorporate language from the statute referring to a borrower's failure to maintain or renew hazard insurance as required under the terms of the mortgage. As explained in the proposal, the Bureau was concerned that adopting that language might raise questions whether the Dodd-Frank Act protections applied to situations in which a borrower did, in fact, have hazard insurance in place but the borrower's servicer obtained force-placed insurance anyway. The Bureau noted that borrowers in such a situation are most in need of protection from unwarranted and unnecessary charges related to force-placed insurance. Indeed, in other respects, the force-placed insurance provisions added to RESPA by the Dodd-Frank Act expressly contemplate that the protections apply in circumstances where a borrower, in fact, has hazard insurance in place. For example, the notice to the borrower required under RESPA section 6(*l*)(1)(A) is required to include a statement of the procedures by which the borrower may demonstrate insurance coverage, and under RESPA section 6(*l*)(3), which provides that upon receipt by a servicer of confirmation that a borrower has hazard insurance in place, a servicer must terminate force-placed insurance and refund to the borrower all force-placed premiums and related charges for periods of overlapping coverage. Thus, notwithstanding the phrase ''when the borrower has failed to maintain or renew hazard insurance,'' the Bureau interprets the definition of force-placed insurance to include situations in which a servicer obtains hazard insurance coverage on a property where the borrower has in fact maintained the borrower's own hazard insurance. The Bureau also proposed to add language to the definition of the term ''force-placed insurance'' in proposed § 1024.37(a)(i) to describe the insurance as being obtained by a servicer ''on behalf of the owner or assignee of a mortgage loan on a property securing such loan.'' This language was intended to distinguish force-placed insurance from situations in which a servicer renews borrowers' own hazard insurance policies as described in § 1024.17 or otherwise. The Bureau observes that a servicer is simply renewing a borrower's own hazard insurance under these circumstances and does not interpret such insurance as hazard insurance ''obtained'' by a servicer within the statutory definition of ''force-placed insurance'' set forth in section 6(k)(2) of RESPA. The Bureau did not receive comments on the proposed definition of the term ''force-placed insurance'' set forth in proposed § 1024.37(a)(1). Accordingly, the Bureau is adopting § 1024.37(a)(1) as proposed.

37(a)(2) Types of Insurance Not Considered Force-Placed Insurance

37(a)(2)(i)

Proposed § 1024.37(a)(2)(i) would have provided that hazard insurance to protect against flood loss obtained by a servicer as required by the Flood Disaster Protection Act of 1973 is not force-placed insurance for the purposes of § 1024.37. The Bureau proposed to exclude flood insurance that is required under the Flood Disaster Protection Act of 1973 (FDPA) from the definition of the term ''force-placed insurance,'' because, as discussed above in the section-by-section analysis of the defined term ''Hazard insurance,'' the Bureau believed and continues to believe that the Bureau's force-placed insurance regulations should not apply to servicers when they are required by the FDPA to purchase flood insurance. As discussed above, the FDPA provides an extensive set of restrictions on a servicers' purchase of flood insurance required by the FDPA, and the Bureau was concerned that subjecting servicers to overlapping regulatory restrictions would be unduly burdensome and might result in consumer confusion.

Several consumer groups suggested that the Bureau should only exempt servicers from the Bureau's force-placed insurance regulations to the extent they purchase force-placed flood policies from the National Flood Insurance Program (NFIP) because the FDPA can reasonably be interpreted to require servicers to purchase force-placed flood insurance through the NFIP. The consumer groups further asserted that it was important to ensure that RESPA's consumer protections with respect to force-placed insurance apply when servicers force-place private flood insurance because private force-placed insurance policies are more expensive than the NFIP flood policies. As discussed above, industry commenters generally said that the proposed exclusion of hazard insurance to protect against flood loss obtained by a servicer as required by the FDPA from the definition of the term ''force-placed

unfair and deceptive practices in the discharge of their loan servicing activities by imposing force-placed insurance without properly notifying the borrowers and when borrowers already had adequate coverage) (filed on March 14, 2012).

insurance'' was workable and adequately mitigated the risk of a servicer having to comply with both regulations under the FDPA and the Bureau's force-placed insurance regulations.

The Bureau has carefully considered these comments and is adopting proposed § 1024.37(a)(2)(i) as proposed. The Bureau does not administer the FDPA, and accordingly declines to opine on whether the FDPA requires servicers to purchase flood insurance policies from the NFIP. The Bureau, however, observes that there is existing guidance from Federal agencies that administer the FPDA that suggests that a servicer may reasonably interpret the FDPA to permit servicers to satisfy their obligations under the statute through the purchase of private flood insurance.[109]

Moreover, the consumer groups did not suggest that the consumer protections in the FDPA do not apply to a servicer's purchase of private flood insurance, and the Bureau has no reason to believe that they do not. Accordingly, the Bureau believes that if the Bureau were to adopt the consumer groups' suggestion to exclude from the definition of the term ''force-placed insurance'' only policies purchased under the NFIP, a servicer who purchased private flood insurance to comply with its obligations under the FDPA would have to comply with both the Bureau's regulations and regulations under the FDPA. As discussed above, this result would impose unnecessary compliance burdens and frustrate the consumer protection purposes of RESPA's force-placed insurance provisions. For the reasons discussed above, § 1024.37(a)(2)(i) is necessary and appropriate to avoid undermining the consumer protection purposes of RESPA's force-placed provisions and is thus authorized under sections 6(k)(1)(E), 6(j)(3), and 19(a) of RESPA.

37(a)(2)(ii) and (iii)

The Bureau proposed § 1024.37(a)(2)(ii) to clarify that hazard insurance obtained by a borrower but renewed by the borrower's servicer as required by § 1024.17(k)(1), (2), or (5) is not force-placed insurance for purposes of § 1024.37. The Bureau proposed § 1024.37(a)(2)(iii) to clarify that hazard insurance renewed by the servicer at its discretion if the servicer is not required to renew the borrower's hazard insurance as required by § 1024.17(k)(1), (2), or (5) is also not force-placed insurance for purposes of § 1024.37. As discussed above, the Bureau observes that a servicer is simply renewing a borrower's own hazard insurance under these circumstances and does not interpret such insurance as hazard insurance ''obtained'' by a servicer within the statutory definition of ''force-placed insurance'' set forth in section 6(k)(2) of RESPA. Other than a large bank servicer commending the Bureau for the exclusion from the definition of ''force-placed insurance'' of hazard insurance renewed at the servicer's discretion for non-escrowed borrowers, the Bureau did not receive comments on either proposed § 1024.37(a)(2)(ii) or (iii). Accordingly, proposed § 1024.37(a)(2)(ii) and (iii) are adopted as proposed, except the Bureau has made technical revisions to proposed § 1024.37(a)(2)(ii) consistent with changes to the language of § 1024.17(k)(5), and adopts § 1024.37(a)(2)(iii) with the clarification that § 1024.37(a)(2)(iii) applies to the extent the borrower agrees. The Bureau believes it is appropriate to create incentives for servicers to work with non-escrowed borrowers to renew hazard insurance originally obtained by these borrowers, but not for servicers to renew such insurance without borrower consent.

One state housing finance agency commenter suggested that the Bureau should allow collateral protection plans as an acceptable alternative to force-placed insurance for subordinate liens. The Bureau's force-placed insurance regulations are not intended to regulate the type of hazard insurance a servicer obtains on behalf of the owner or assignee of a mortgage loan to insure the property securing such loan. But if a servicer attempts to seek payment from a borrower for such insurance, the Bureau's force-placed regulations will apply.

37(b) Basis for Charging a Borrower for Force-Placed Insurance

Section 6(k)(1)(A) of RESPA states that a servicer of a federally related mortgage loan shall not obtain force-placed insurance unless there is a reasonable basis to believe the borrower has failed to comply with the loan contract's requirements to maintain property insurance. The Bureau proposed § 1024.37(b) to implement section 6(k)(1)(A) of RESPA. Proposed § 1024.37(b) stated that a servicer may not obtain force-placed insurance unless the servicer has a reasonable basis to believe that the borrower has failed to comply with the mortgage loan contract's requirement to maintain hazard insurance.

The Bureau also proposed related commentary to provide illustrative examples of ''a reasonable basis to believe'' that a borrower has failed to maintain hazard insurance. Proposed comment 37(b)–1 would have provided two examples in the context of a borrower with an escrow account established to pay for hazard insurance premiums. Proposed comment 37(b)–2 would have provided an example of a borrower who has not established an escrow account to pay for hazard insurance premiums. During pre-proposal outreach, servicers and force-placed insurance providers told the Bureau that their process of verifying the existence of insurance coverage before obtaining force-placed insurance for borrowers with escrow and borrowers without escrow was different. Accordingly, the Bureau believed that it was appropriate to provide different examples based on whether the borrower had escrowed for hazard insurance.

Several consumer groups and a number of industry commenters suggested that the Bureau make changes to proposed § 1024.37(b). Consumer group commenters expressed the concern that proposed § 1024.37(b) would be too weak to motivate servicers to change their practices with respect to the purchase of force-placed insurance. Several consumer groups recommended that that the Bureau replace the proposed commentary to 1024.37(b) with a collective standard that would determine whether the servicer had a reasonable basis for obtaining force-placed insurance based on whether the percentage of cases in which borrowers receive a full refund for force-placed insurance charges exceed five percent per calendar year.

In contrast, a number of industry commenters suggested that proposed § 1024.37(b) was too limiting and might unduly chill servicer's use of force-placed insurance to protect a lender's collateral. A number of industry commenters requested that the Bureau change proposed § 1024.37(b) so that the reasonable basis standard in § 1024.37(b) would be defined solely by compliance with the procedural requirements enumerated in section 6(*l*) of RESPA and § 1024.37(c) and (d)[110]

[109] *See* Interagency Questions and Answers Regarding Flood Insurance, 74 FR 35914, 35944 (July 21, 2009) (question 63 & 64 provide guidance on the circumstances under which lenders could rely on private flood insurance policies to meet their obligations to maintain adequate flood insurance coverage); *see also,* Fed. Emergency Mgmt. Agency, *Mandatory Purchase of Flood Insurance Guidelines* 42 (September 2007)(stating that a lender has the option of force placing flood insurance through a private (non-NFIP) insurer).

[110] Section 6(*l*) provides that a servicer of a federally related mortgage shall not be construed as having a reasonable basis for obtaining force-placed

or, in the alternative, would provide a safe harbor for servicers that meet such requirements. One large force-placed insurance provider and one large bank servicer said that if the Bureau did not change proposed § 1024.37(b), then the Bureau should expressly state in commentary to § 1024.37(b) that the examples are illustrative and do not provide the only situations in which a servicer has a reasonable basis to believe that the borrower's hazard insurance has lapsed. One national trade association representing federal credit unions suggested that the Bureau provide a safe harbor for servicers acting in good faith when they obtained force-placed insurance.

After careful review of these comments and further consideration, the Bureau is adopting § 1024.37(b) with changes. First, the Bureau has concluded that when a servicer purchases force-placed insurance but does not charge a borrower for such insurance, the servicer does not ''obtain'' force-placed insurance within the meaning of section 6(k)(1)(A) of RESPA. The Bureau arrived at this conclusion after re-evaluating the connection between section 6(k)(1)(A) and (*l*). As described above, section 6(k)(1)(A) establishes that a servicer of a federally related mortgage loan shall not obtain force-placed insurance unless there is a reasonable basis to believe the borrower has failed to comply with the loan contract's requirements to maintain property insurance. Section 6(*l*) establishes that a servicer of a federally related mortgage loan shall not be construed as having a reasonable basis for obtaining force-placed insurance unless the requirements of section 6(*l*) have been met. But one of the requirements is that a servicer must terminate force-placed insurance within 15 days of the servicer receiving confirmation of a borrower's existing insurance coverage. The Bureau believes that this provision expressly contemplates that a servicer may purchase force-placed insurance before meeting the requirements of section 6(*l*). Accordingly, where ''obtaining'' is used in section 6(*l*), the Bureau interprets the statute to mean ''charging.'' Because ''obtain'' appears in section 6(k)(1)(A) and 6(*l*), the Bureau has changed § 1024.37(b) to reflect more clearly the statutory prohibition against ''charging.'' Accordingly, as finalized, § 1024.37(b) provides that a servicer may not assess on a borrower a premium charge or fee related to force-placed insurance unless the servicer has a reasonable basis to believe that the borrower has failed to comply with the mortgage loan contract's requirement to maintain hazard insurance.

The Bureau has also changed commentary intended to explain the circumstances that provide a servicer with a ''reasonable basis to believe'' for purposes of § 1024.37(b). The Bureau has decided not to provide specific examples of ''a reasonable basis to believe.'' Instead, as adopted, comment 37(b)–1 provides that information about a borrower's hazard insurance received by a servicer from a borrower, the borrower's insurance provider or insurance agent, may provide a servicer with a reasonable basis to believe that the borrower has failed to comply with the loan contract's requirement to maintain hazard insurance. The Bureau believed that sometimes the absence of information may provide a servicer with a reasonable basis to believe that the borrower has failed to comply with the loan contract's requirement to maintain hazard insurance. Accordingly, proposed comment 37(b)–1 would have clarified that a servicer had a reasonable basis to believe that a borrower with an escrow account established for hazard insurance has failed to maintain hazard insurance if the servicer had not received a renewal bill within a reasonable time prior to the expiration date of the borrower's hazard insurance. Upon further consideration, the Bureau believes that the comment may convey that the absence of information would provide a servicer with a safe harbor. The Bureau believes that a safe harbor based on the absence of information would not adequately ensure that borrowers are protected from unwarranted and unnecessary charges related to force-placed insurance. Accordingly, the Bureau is adopting commentary to provide that in the absence of receiving information about a borrower's hazard insurance, a servicer may satisfy the reasonable basis to believe standard if a servicer acts with reasonable diligence to ascertain a borrower's hazard insurance status, and does not receive, from the borrower or otherwise have evidence of insurance coverage as provided in § 1024.37(c)(1)(iii).

The Bureau has concluded that a servicer following the notification procedure established by section 6(*l*) of RESPA has acted with reasonable diligence to ascertain a borrower's hazard insurance status, but compliance with those procedural elements alone are not sufficient to provide a safe harbor. The statute prohibits a servicer from imposing any charge on a borrower for force-placed insurance if the servicer has received demonstration of hazard insurance coverage by the end of the notification process. Accordingly, comment 37(b)–1, as adopted, explains that an example of acting with reasonable diligence is one in which a servicer complies with the notification requirements set forth in § 1024.37(c)(1)(i) and (ii), and if after complying with such requirements, the servicer does not receive, from the borrower or otherwise, evidence of insurance coverage as provided in § 1024.37(c)(1)(iii).

The Bureau does not believe that it is necessary to provide a separate safe harbor for servicers acting in good faith because the Bureau believes the standard set forth in § 1024.37(b) provides sufficient flexibility for servicers to balance their obligations to owners and assignees of mortgage loans to ensure that a property is adequately insured and to protect borrowers from unwarranted and unnecessary charges and fees. The Bureau also declines to adopt a collective standard to evaluate whether a servicer's purchase of force-placed insurance is proper. The Bureau believes that the percentage of cases in which a borrower receives a full refund for force-placed insurance charges may be relevant in assessing whether a servicer is maintaining reasonable policies and procedures to ensure that a servicer is maintaining accurate information about a borrower's mortgage loan. But the Bureau believes that section 6(k)(1)(A) of RESPA established a loan-level standard. Using a collective standard to evaluate whether a servicer has satisfied the reasonable basis to believe requirement in section 6(k)(1)(A) would not be appropriate because the standard would be overbroad and might discourage a servicer from obtaining force-placed insurance even though a servicer has actual information that a borrower has failed to comply with the loan contract's requirements to maintain property insurance.

A state trade association representing banks and one of its member banks urged the Bureau to eliminate proposed § 1024.37(b). They expressed concern that the reasonable basis standard, in combination with the prohibition on charging a borrower for insurance in proposed § 1024.37(c)(1) for at least 45 days, would increase the likelihood that homes go uninsured for a significant period of time. The Bureau declines to eliminate § 1024.37(b) because the Bureau believes the provision is necessary to implement RESPA's force-placed provisions. In addition, the Bureau believes that the commenters' concern is unwarranted, in particular, because § 1024.37(b) has been revised to

insurance unless the requirements of section 6(*l*) of RESPA have been met.

reframe the prohibition as one on charging the borrower for, rather than purchasing, force-placed insurance.

Lastly, a state trade association representing banks and thrifts expressed concern that servicers may rely on information from an insurance provider that later turns out to be incorrect about the status of a borrower's hazard insurance coverage to purchase force-placed insurance. For example, the commenter said that insurance providers may send notices of cancellation to servicers before a borrower's insurance actually lapses. The Bureau recognizes that servicers may sometimes wrongly conclude that there is a reasonable basis to charge borrowers for force-placed insurance, even after complying with the procedures steps in § 1024.37(c)(1). But whether § 1024.37(b) is violated turns on whether or not a servicer had a reasonable basis to reach its conclusion based on the information the servicer has at the time the servicer charges a borrower for force-placed insurance.

37(c) Requirements for Charging Borrower Force-Placed Insurance

37(c)(1) In General

Section 6(*l*)(1) of RESPA, added by section 1463(a) of the Dodd-Frank Act, states that a servicer may not impose any charge on a borrower for force-placed insurance with respect to any property securing a federally related mortgage unless the servicer (1) sends a written notice by first-class mail to a borrower that contains disclosures about a borrower's obligation to maintain hazard insurance, a servicer's lack of evidence that a borrower has such insurance, a clear and conspicuous statement of how the borrower may demonstrate coverage, and a statement that a servicer may obtain insurance coverage at a borrower's expense if the borrower does not provide demonstration of coverage in a timely manner (*see* section 6(*1*)(1)(A)(i) through (iv)); (2) sends a second written notice by first-class mail containing the same disclosures to a borrower at least 30 days after mailing the first written notice (*see* section 6(*l*)(1)(B)); and (3) does not receive any demonstration of hazard insurance coverage by the end of the 15-day period beginning on the date the second written notice was sent to the borrower (*see* section 6(*l*)(1)(C)).

The Bureau proposed § 1024.37(c)(1) to implement section 6(*l*)(1). Proposed § 1024.37(c)(1) would have provided that a servicer may not charge a borrower for force-placed insurance unless: (1) A servicer delivers to the borrower or places in the mail a written notice with the disclosures set forth in § 1024.37(c)(2) at least 45 days before the premium charge or any fee is assessed; (2) it delivers to such borrower or places in the mail a written notice in accordance with § 1024.37(d)(1), which would have prohibited a servicer from delivering or placing in the mail this second notice until 30 days have passed after the servicer has delivered or placed in the mail the first written notice required by § 1024.37(c)(1)(i); and (3) during the 45-day notice period, the servicer has not received verification that such borrower has hazard insurance in place continuously. Proposed § 1024.37(c)(1)(iii) also stated that determining whether the borrower has hazard insurance in place continuously, the servicer shall take account of any grace period provided under State or other applicable law. The Bureau proposed to permit a servicer to choose between delivering the written notice to the borrower or mailing the written notices established by section 6(*l*)(1)(A) and (B) of RESPA because the Bureau believed it was necessary and proper to achieve the purposes of RESPA to provide servicers with flexibility to either deliver or mail the required notices, since delivery will often be faster than transmittal by mail.

Proposed comment 37(c)(1)–1 would have clarified the minimum length of the notice period. It stated that notice period set forth in § 1024.37(c)(1) begins on the day that the servicer delivers or mails the notice to the borrower and expires 45 days later, and that the servicer may assess the premium charge and any fees for force-placed insurance beginning on the 46th day if the servicer has fulfilled the requirements of § 1024.37(c) and (d). The comment further stated that if not prohibited by State or other applicable law, the servicer may retroactively charge a borrower for force-placed insurance obtained during the 45-day notice period. Proposed comment 37(c)(1)(iii)–1 would have provided examples of borrowers having hazard insurance in place continuously.

Two non-bank servicers stated that they supported proposed § 1024.37(c)(1) and related commentary. One of the commenters observed that the Bureau's proposal reflects its current practice. This is consistent with feedback from small servicers with whom the Small Business Review Panel conducted outreach in advance of the proposal. One participant stated that it currently provides two notices that are very similar to the ones that would be required, and another participant stated that it currently exceeds the number of notices that would be required.

The Bureau received comments on various aspects of proposed § 1024.37(c)(1). Except as discussed below, the majority of industry commenters did not raise concerns with the notification aspect of proposed § 1024.37(c)(1). The majority of industry commenters only sought clarification. First, they requested the Bureau clarify that a servicer may retroactively charge a borrower for force-placed insurance back to the date that a borrower's hazard insurance lapsed, even if the servicer sends the first notice after the date of lapse. Second, a number of industry commenters requested that the Bureau clarify how a servicer should account for grace periods when determining whether a borrower has hazard insurance in place continuously. They observed that a grace period under a typical hazard insurance policy extends a policyholder's insurance coverage past the expiration date only if the policyholder pays the past-due premium during such period. A bank servicer requested the Bureau clarify that ''grace period'' used in proposed § 1024.37 refer to grace periods applicable to the borrower's hazard insurance, and not grace periods applicable to the borrower's loan during which the borrower pays the mortgage payment after the due date without incurring a late charge. One large bank servicer sought clarification of whether the notice period could exceed 45 days.

A minority of industry commenters opposed the notification aspect of proposed § 1024.37(c)(1). One credit union contended that the proposed notices would be duplicative, unnecessary, and add to the overall cost of lending because borrowers already receive multiple notices from their insurers prior to cancellation. A trade association representing retail banks asserted that if a borrower's hazard insurance coverage lapses before the second notice is provided, then a servicer should be able to obtain force-placed insurance without having to send the second notice. A bank servicer argued that rather than requiring a servicer to send a second notice at least 15 days prior to charging a borrower for force-placed insurance, the Bureau should instead permit a servicer to simply provide a notice within five days of purchasing force-placed insurance. One state credit union league expressed concern about the aggregate notice burden servicers would be required to bear if the mortgage servicing rules are finalized as proposed and suggested that the burden could be reduced if the Bureau combines the first and second written notice into a single notice. One

credit union asserted that the Bureau should allow a servicer to include the proposed force-placed insurance notices with the periodic statement because multiple documents mailed to the borrower could decrease the probability of the borrower actually paying attention to the information.

Several industry commenters urged the Bureau to reconsider the aspect of the proposal that would have required servicers to wait at least 45 days to charge a borrower for force-placed insurance. The commenters contended that servicers, especially small servicers, would incur significant costs because servicers would have to advance force-placed insurance charges for borrowers. One state credit union trade association urged the Bureau to exercise its exception authority to exempt small servicers from the requirements of § 1024.37(c). In addition to the cost of advancement, the commenter also asserted that it would be costly for small servicers to send the notices. One non-bank servicer suggested the Bureau shorten the notice period to 30 days, while a bank servicer urged the Bureau to shorten the notice period to 10 days. One bank servicer also requested the Bureau to preempt Texas law that addresses notification requirements that apply to creditors' purchase of force-placed insurance for residential mortgages.

One bank servicer commented that a rule requiring servicers to provide notices like the proposed periodic statement or force-placed insurance notices to borrowers would be a waste of servicer resources without a corresponding benefit to consumers in situations involving a borrower whom the servicer has referred to foreclosure, a borrower who has declared bankruptcy, or a borrower who has made no payment or contacted the servicer for more than six months and whom the servicer has determined to have vacated the property. It sought an exemption from compliance with any force-placed insurance notification requirements with regard to those three categories of borrowers. One national trade association representing credit unions and a credit union commenter expressed concern that credit union members may believe that they should only be charged from the date that they received the first notice. Lastly, some industry commenters stated that a servicer should not be subject to a waiting period of 45 days to obtain force-placed insurance because it leaves collateral exposed and increases the risk to the borrower.

In contrast, one consumer advocacy group urged the Bureau to strengthen the notification requirement so that a servicer would be required to provide the first notice within 15 days of placing force-placed insurance. It further asserted that it would be unreasonable to permit a servicer to retroactively charge a borrower for more than 60 days of force-placed insurance because it is a servicer's responsibility to identify lapses in insurance and notify borrowers of such lapses in a timely fashion.

Lastly, several industry commenters requested the Bureau clarify what ''verification'' means because they were concerned that the proposal would have required servicers to accept any insurance information they received from borrowers. The commenters noted that the traditional means of establishing proof of insurance is by requiring a borrower to provide a copy of an insurance policy declaration page, a certificate of insurance, or the insurance policy. The commenters expressed concern that without any of these, servicers may might potentially not be able to provide mortgage investors with the proof such investors require as evidence of coverage.

After careful consideration of these comments and further consideration, the Bureau is adopting § 1024.37(c)(1) with several adjustments. With respect to the notification aspect of § 1024.37(c)(1), the Bureau notes that RESPA establishes a very detailed scheme for any servicer (without consideration of the servicer's size) to follow before a servicer imposes a charge on any borrower for force-placed insurance. The Bureau believes that the prescriptive nature of the statutory scheme suggests that Congress believed that each step was necessary to achieve the consumer protection purpose of RESPA's force-placed insurance provisions. The notification procedures the Bureau proposed in § 1024.37(c)(1) mirror the prescriptive statutory scheme because they were necessary to achieve the intent of Congress. The Bureau declines to adopt suggestions received from commenters, which ranged from creating exemptions for small servicers and unresponsive borrowers to changing various aspects of the notification requirements, because they would make § 1024.37(c)(1) depart from the statutory scheme Congress established.

The Bureau has also worked to craft effective notices through consumer testing, and the results of those tests suggest that borrowers will in fact welcome and respond to the notices. The Bureau further believes that some of the commenters' concerns are addressed by the fact that the Bureau is interpreting the statutory language to allow charges to be assessed retroactively for any period in which coverage was not maintained continuously once the procedural and substantive statutory criteria are met. Moreover, the Bureau believes that it is unnecessary to set limitations on a servicer's right to assess on borrowers charges retroactively because the statute establishes that a borrower has an unconditional right to a full refund of force-placed insurance premium charges and related fees the borrower has paid for any period in which the borrower's hazard insurance and the force-placed insurance were both in place.

With respect to the request for preemption, the Bureau observes that based on the way in which the commenter described Texas law, it does not appear that compliance with Texas law would prevent a servicer from complying with the Bureau's force-placed insurance notification requirements. Accordingly, the Bureau believes preemption is not appropriate based on the information provided.

The Bureau is making several changes to § 1024.37(c)(1) for clarification purposes. The Bureau is adopting new comment § 1024.37(c)(1)(i) to clarify that a servicer may charge a borrower for force-placed insurance a servicer purchased, retroactive to the first day of any period in which the borrower did not have hazard insurance in place. The Bureau is clarifying the role of a grace period under applicable law in determining whether a borrower has hazard insurance in place continuously in new comment 37(c)(1)(iii)–1. The Bureau is adopting § 1024.37(c)(1)(iii) to clarify what ''receiving verification'' means by replacing the phrase ''received verification that the borrower has hazard insurance in place continuously'' in proposed § 1024.37(c)(1)(iii) with the phrase ''received, from the borrower or otherwise, evidence demonstrating that the borrower has had in place continuously hazard insurance coverage that complies with the loan contract's requirements to maintain hazard insurance.''

The Bureau has concluded that putting the responsibility entirely on a servicer to verify a borrower's hazard insurance coverage by requiring a servicer to accept any written information from a borrower as long as it contains the insurance policy number, and the name, mailing address and phone number of the borrower's insurance company or the borrower's insurance agency as evidence of insurance would impose too large of a burden on a servicer to determine whether the property is in fact insured

in accordance with the terms and conditions of a borrower's loan contract. Accordingly, in new comment 1024.37(c)(1)(iii)–2, the Bureau is explaining that as evidence of continuous hazard insurance coverage that complies with the loan contract's requirements to maintain hazard insurance, a servicer may require a copy of the borrower's hazard insurance policy declaration page, the borrower's insurance certificate, the borrower's insurance policy, or other similar forms of written confirmation because the Bureau interprets the statutory language ''reasonable form of written confirmation of existing insurance coverage'' in section 6(*l*)(2) of RESPA to mean documents servicers typically require borrowers to provide to establish proof of coverage. Further, comment 37(c)(1)(iii)–2 provides that a servicer may reject evidence of hazard insurance coverage submitted by the borrower if neither the borrower's insurance provider nor insurance agent provides confirmation of the insurance information submitted by the borrower, or if the terms and conditions of the borrower's hazard insurance policy do not comply with the borrower's loan contract requirements because the Bureau interprets section 6(*l*)(3) of RESPA to permit a servicer to separately confirm insurance information that a borrower has proffered to establish proof of coverage and the statutory language in section 6(k)(1)(A) to permit a servicer to charge a borrower force-placed insurance when the servicer has a reasonable basis to believe that the borrower has failed to comply with the loan contract's requirements to maintain property insurance.

With respect to the request to clarify that the 45-day notification period set forth in proposed § 1024.37(c)(1) establishes the minimum amount of time that must lapse between the time a servicer sends a borrower the first written notice required by section 6(*l*)(1) and the time a servicer imposes a premium charge or fee related to force-placed insurance, the Bureau believes that the fact that the Bureau intended the 45 days to be the minimum amount of time was clear in the proposal and thus, does not believe additional clarification in the final rule is necessary.

37(c)(2) Content of Notice

As discussed in the section-by-section analysis of § 1024.37(c)(1), section 6(*l*)(1)(A)(i) through (iv) of RESPA establishes the disclosures that a servicer of a federally related mortgage loan must provide in the written notices it sends to borrowers. The Bureau proposed § 1027.37(c)(2) to implement section 6(*l*)(1)(A)(i) through (iv). Proposed § 1024.37(c)(2) would have required a servicer to set forth, in the notice that would have been required under proposed § 1024.37(c)(1)(i), certain information about force-placed insurance. Specifically, proposed § 1024.37(c)(2)(i) through (iv) would have required a servicer to disclose the following information: (1) The date of the notice; (2) the servicer's name and mailing address; (3) the borrower's name and mailing address; and (4) a statement that requests the borrower to provide hazard insurance information for the borrower's property and identifies the property by its address. Proposed § 1024.37(c)(2)(v) would have required that a servicer provide a statement that the borrower's hazard insurance is expiring or expired, as applicable, and that the servicer does not have evidence that the borrower has hazard insurance coverage past the expiration date. For a borrower that has more than one type of hazard insurance on the property, the servicer must identify the type of hazard insurance for which the servicer lacks evidence of coverage. Proposed comment 37(c)(2)(v)–1 would have explained that if a borrower has purchased a homeowners' insurance policy and a separate hazard insurance policy to insure loss against hazards not covered under his or her homeowners' insurance policy, the servicer must disclose whether it is the borrower's homeowners' insurance policy or the separate hazard insurance policy for which it lacks evidence of coverage to comply with § 1024.37(c)(2)(v). Proposed § 1024.37(c)(2)(vi) would have required that a servicer provide a statement that hazard insurance is required on the borrower's property and that the servicer has obtained or will obtain, as applicable, insurance at the borrower's expense.

Proposed § 1024.37(c)(2)(vii) would have required that the initial notice to the borrower contain a statement requesting the borrower to promptly provide the servicer with the insurance policy number and the name, mailing address and phone number of the borrower's insurance company or the borrower's insurance agent. Proposed § 1024.37(c)(2)(viii) would have required the notice to contain a description of how the borrower may provide the information requested pursuant to § 1024.37(c)(2)(vii).

Finally, § 1024.37(c)(2)(ix) and (x) would have required information regarding the relative costs and scope of coverage of force-placed insurance versus hazard insurance obtained by the borrower, specifically: (1) The cost of the force-placed insurance, stated as an annual premium, or as a good faith estimate if actual pricing is not available; and (2) a statement that insurance the servicer obtains may cost significantly more than hazard insurance obtained by the borrower and may not provide as much coverage as hazard insurance obtained by the borrower. Proposed § 1024.37(c)(2)(xi) would have required that a servicer provide the servicer's telephone number for borrower questions.

The disclosures regarding the potential cost and scope of coverage for force-placed insurance were not specifically required under the Dodd-Frank Act, but the Bureau believed that it was appropriate to propose them pursuant to the Bureau's RESPA section 6(k)(1)(E) authority in order to provide borrowers with critical information about the benefits, costs, and risks of the insurance that would be imposed if they failed to act. The Bureau noted in the proposal that the Bureau tested the force-placed insurance disclosures established by the Dodd-Frank Act in three rounds of consumer testing. Participant response in consumer testing suggested that knowing about higher cost of force-placed insurance could motivate borrowers to act promptly and thus avoid being charged for force-placed insurance. All participants said upon receipt of the notice, they would immediately contact their insurance provider to find out whether or not their hazard insurance had expired or purchase new hazard insurance because they would not want to pay for the higher cost of force-placed insurance.

The Bureau proposed comment 37(c)(2)(ix)–1 to clarify that the good faith estimate of the cost of the force-placed insurance the servicer may obtain should be consistent with the best information reasonably available to the servicer at the time the disclosure is provided. The proposed comment stated that differences between the amount of the estimated cost disclosed under § 1024.37(c)(2)(ix) and the actual cost do not necessarily constitute a lack of good faith, so long as the estimated cost was based on the best information reasonably available to the servicer at the time the disclosure was provided. The Bureau believed that its proposed good faith standard would provide significant safeguards against the risk that some servicers might intentionally underestimate the cost of force-placed insurance while providing sufficient flexibility to account for the fact that costs may change due to legitimate reasons between the time the disclosure

is made and the time the borrower is charged.

Several consumer groups applauded the content requirements the Bureau proposed, but with one caveat. They expressed concern that the proposed disclosure concerning the fact that force-placed insurance may not provide as much coverage as borrower-obtained hazard insurance was too generic, and thus would not provide information meaningful enough to alert the borrower to the risks of force-placed insurance and prompt the borrower to act. They suggested adding additional disclosures that force-placed insurance would not cover damage to the borrower's personal property, personal liability for injuries to others while they are on the borrower's property, or living expenses while the borrower's home is under repair. The Bureau has considered the consumer groups' concern but is reluctant to add further information without consumer testing in light of the risk that information overload could adversely impact the effectiveness of the notice. The Bureau also notes that results of the testing of the model forms suggest that the existing disclosures will prompt recipients of the force-placed insurance notices to act promptly. As summarized by Macro in its report on the consumer testing of mortgage servicing disclosures during the pre-proposal stage, all subjects who were shown samples of force-placed insurance notices said they would act immediately in response to receiving such notices, even though the samples did not contain detailed description of potential coverage differences.

One consumer group suggested that a statement informing a borrower of the availability of State-created hazard insurance programs should be a required disclosure because these programs are designed to make hazard insurance available to borrowers who have trouble qualifying for insurance from traditional sources. Again, the Bureau has considered the issue but is reluctant to add further information without consumer testing in light of the risks of information overload. The Bureau is also concerned that a completely generic notice that State programs ''may'' be available without contact information would not be very useful to consumers, and that tailoring the notices to particular States would be burdensome to servicers. Accordingly, the Bureau declines to implement the comment. The commenter also urged the Bureau to require servicers to include force-placed insurance charges in regular invoice statements that are sent to a borrower so that a borrower is constantly reminded of how much of the borrower's payments are going toward paying for such insurance. Another consumer group submitted similar comments recommending that the Bureau require servicers to identify force-placed insurance charges specifically in proposed periodic statements so that borrowers could easily recognize when force-placed insurance has been obtained. The Bureau notes that servicers will be required to list force-placed insurance charges like any other charge, in the periodic statement that the Bureau is finalizing in the 2012 TILA Servicing Final Rule.

Consumer advocates and some industry commenters praised the proposal to require actual cost information or estimated costs in the mandatory disclosures. A force-placed insurance commenter, for instance, stated that it currently provides its borrowers with such estimates and that it has proven successful in convincing borrowers of the benefit of obtaining their own coverage. Some industry commenters, however, opposed the proposed disclosure as unnecessary because the Bureau separately proposed to require servicers to inform borrowers that force-placed insurance may cost significantly more than borrower-obtained hazard insurance. One force-placed insurance provider further observed that the existing practice of most servicers is to provide a binder of the force-placed insurance coverage with the second notice to make borrowers aware of the cost of such insurance. These commenters and a large bank servicer further noted that the National Mortgage Settlement did not include a required disclosure about the cost of force-placed insurance and urged the Bureau to refrain from requiring more disclosures than required by the settlement.

Commenters also asserted that a servicer might not have enough information to provide an estimate of force-placed insurance costs because the first notice would be provided to a borrower at a point where a servicer might not have obtained the premium information. Estimates are also complicated by the fact that the cost of insurance is determined by factors not within the servicer's control (*e.g.,* insurers' pricing formulas, the number of days a borrower is delinquent on the mortgage loan). Two national trade associations representing the mortgage industry asserted that if a servicer does not rely on a third party to track a borrower's hazard insurance, the servicer would not have the information necessary to make good faith estimates of insurance premiums until the force-placed insurance is actually issued. One of the commenters asserted that this problem is likely to be most acute for small servicers because they often do not hire third parties to track a borrower's hazard insurance. The two commenters also questioned whether a servicer could be held liable for differences between an estimate and the actual cost under a theory that the differences were caused by unfair, deceptive, or abusive practices. They also questioned whether a servicer would have the authority to provide the estimate because for an estimate to be binding, an insurance binder from a licensed insurance agent or provider is required. The two commenters and a force-placed insurance provider also expressed concern that the potential inaccuracies with estimate costs may lead to customer confusion and complaints. Lastly, several industry commenters expressed concern with the use of the phrase ''good faith estimate'' because the phrase is a defined term in existing Regulation X with a different meaning than the meaning set forth in proposed comment 37(c)(2)(ix)–1.

After considering these comments, the Bureau is withdrawing the requirement to provide the cost of force-placed insurance (or a good faith estimate of the cost) in the notice required by § 1024.37(c)(1)(i), but keeping the requirement for purposes of the reminder notice required by § 1024.37(c)(1)(ii). The Bureau believes that this will reduce compliance burden concerns while continuing to assure that borrowers receive specific prices or estimates that are likely to provide strong motivation to renew their homeowners' insurance policies. Additionally, the regulatory text is changed to refer to a ''reasonable estimate'' rather than a ''good faith estimate,'' and the commentary is changed to clarify what a ''reasonable estimate'' means.

A number of industry commenters recommended that the Bureau allow servicers to provide a borrower with additional information about force-placed insurance. They stated that servicers currently provide a number of disclosures in addition to the information the Bureau has proposed in response to State disclosure requirements, class action litigation, and industry best practices. Commenters expressed concern that the failure by servicers to include additional information may subject servicers to further litigation and extensive potential liability. Some commenters suggested that the Bureau permit servicers to include additional information and the required information in one document.

One large bank servicer suggested an alternative approach where a servicer would be permitted to include additional information in the same transmittal that is used to provide notices containing the required information.

The Bureau believes that providing additional information in the same notice as the required information could obscure the most important information or tend to create information overload. For instance, one industry commenter provided a list of additional information that included 10 specific pieces of information and a catch-all category for disclosures related to force-placed insurance imposed by other State or Federal law. The Bureau believes it would be better if servicers have latitude to provide the additional information on separate pieces of paper in the same transmittal. Accordingly, the Bureau is adopting new § 1024.37(c)(4) to provide that a servicer may not include any information other than information required by § 1024.37(c)(2) in the written notice required by § 1024.37(c)(1)(i), but that a servicer may provide such additional information to a borrower in the same transmittal as the transmittal used to provide the notice required by § 1024.37(c)(1)(i) but on separate pieces of paper. The Bureau is adopting parallel provisions in § 1024.37(d) and (e), numbered as § 1024.37(d)(4) and (e)(4), respectively. The Bureau has also revised § 1024.37(c)(2) to permit the notice required by § 1024.37(c)(1)(i) to include, if applicable, a statement advising a borrower to review additional information provided in the same transmittal. The Bureau has adopted parallel provisions in § 1024.37(d) and (e).

37(c)(3) Format

As previously discussed, section 6(*l*)(1) of RESPA establishes that a servicer must provide a borrower with two written notices before charging a borrower for force-placed insurance. To implement this provision, the Bureau proposed § 1024.37(c)(3) and (d)(3) in parallel. Proposed 1024.37(c)(3) stated that disclosures set forth in proposed § 1024.37(c)(2) must be in a format substantially similar to form MS–3(A), set forth in appendix MS–3. Disclosures made pursuant to § 1024.37(c)(2)(vi) and (c)(2)(ix) must be in bold text. Disclosure made pursuant to § 1024.37(c)(2)(iv) must be in bold text, except that the physical address of the borrower's property may be in regular text. The Bureau believed the use of bold text to bring attention to important information would make it easier for borrowers to identify promptly the purpose of the notice and to find the information quickly and efficiently. Additionally, the Bureau stated in the proposal that the Bureau believed that it was important to bring attention to the cost of force-placed insurance so borrowers have a clear understanding of the cost to them of the service that servicers provide in obtaining force-placed insurance. The Bureau further noted that it believed that it was important for borrowers to understand that the servicer's purchase of force-placed insurance arises from the borrower's obligation to maintain hazard insurance. Although the notice contains additional information that is important, the Bureau believes the usefulness of highlighting in focusing a borrower's attention on important information decreases if highlighting is used unsparingly.

One large bank servicer commended the Bureau for the model forms the Bureau proposed. It observed that the forms were thoughtfully designed and should be readily understandable to consumers. Another large bank servicer agreed with the Bureau's rationale that model forms facilitate compliance with the new Dodd-Frank Act requirements concerning force-placed insurance disclosures and the Bureau's proposed supplemental disclosures, but sought clarification that servicers may use the model forms as guidance but are not required to demonstrate strict adherence to the language of the forms. One non-bank servicer argued that disclosure forms should generally be open-ended to allow the servicer to provide all the content required by the Bureau while allowing the servicer to tailor the form to its needs; however, the commenter stated that it did not have concerns with the model force-placed insurance forms the Bureau proposed.

In consideration of the comments received and based on further consideration, the Bureau is changing § 1024.37(c)(3) to no longer require a servicer to provide the information required by § 1024.37(c)(2) in a form ''substantially similar'' to form MS–3A, as set forth in appendix MS–3. As adopted, § 1024.37(c)(3) provides that a servicer may use form MS–3A in appendix MS–3 to comply with the requirements of § 1024.37(c)(1)(i) and (2). However, the Bureau is adopting a final § 1024.37(c)(3) that generally contains the highlighting requirements set forth in the proposal.

37(d) Reminder Notice

37(d)(1) In General

As discussed above, section 6(*l*)(1) of RESPA, added by section 1463(a) of the Dodd-Frank Act, states that a servicer must send two written notices to the borrower prior to charging the borrower for force-placed insurance. Specifically, RESPA section 6(*l*)(1)(B) requires servicers to use first-class mail to send a second written notice to the borrower, at least 30 days after mailing initial the notice required by RESPA section 6(*l*)(1)(A), that contains all the information described in section 6(*l*)(1)(A)(i) through (iv) of RESPA.

The Bureau proposed § 1024.37(d)(1) to implement section 6(*l*)(B) of RESPA. Proposed § 1024.37(d)(1) stated that one written notice in addition to the written notice required pursuant to § 1024.37(c)(1)(i) must be delivered to the borrower or placed in the mail prior to a servicer charging a borrower for force-placed insurance. It further stated that the servicer may not deliver or place this second written notice under § 1024.37(d)(1) in the mail until 30 days after delivering to the borrower or placing in the mail the first written notice under § 1024.37(c)(1)(i). Proposed § 1024.37(d)(1) would also have mandated that a servicer that receives no insurance information after delivering or placing in the mail the written notice required pursuant to in § 1024.37(c)(1)(i) must provide the disclosures set forth in § 1024.37(d)(2)(i), while a servicer that does receive insurance information but is unable to verify that the borrower has hazard insurance coverage continuously must provide the disclosures set forth in § 1024.37(d)(2)(ii).

Proposed comment 37(d)(1)–1 would have explained the content of the reminder notice will vary depending on the insurance information the servicer has received from the borrower. Two national trade associations representing the mortgage industry urged the Bureau to permit servicers to use the same letter they sent to a borrower to comply with the first written notice requirement to comply with the second written notice requirement.

As the Bureau noted in the proposal, section 6(k)(1)(B) of RESPA can be read to require a servicer to provide the same disclosures a borrower has previously received. However, where a borrower responds to the first notice by providing insurance information, the Bureau believed that the reminder notice would be more useful if it contained an acknowledgement of the information these borrowers provided in response to the first notice and informed these

borrowers that the information provided was not sufficient for a servicer to verify that they had continuous coverage in place. The Bureau observed in the proposal that simply repeating the same content as the first notice might cause borrowers to become frustrated and confused by the fact that they are receiving another notice asking for insurance information when they thought they had already provided such information.

As discussed above in the section-by-section analysis of § 1024.37(c)(1), some industry commenters urged the Bureau to withdraw the requirement that a servicer send a borrower a second notice before charging a borrower for force-placed insurance. As the Bureau observed in the section-by-section analysis of § 1024.37(c)(1), Congress specifically required that two notices be provided before a servicer charges a borrower for force-placed insurance. For reasons discussed above, the Bureau does not believe that varying from this statutory scheme is appropriate. Further, comments from two large force-placed insurance providers suggest that at least by the time of the second notice, servicers will be able to provide borrowers with a reasonable estimate of the cost of the force-placed insurance, so that the second notice will complement the first.[111] Accordingly, the Bureau is adopting § 1024.37(d)(1) as proposed with an adjustment to emphasize that a servicer may not charge a borrower for force-placed insurance unless it has delivered or mailed the second written notice at least 15 days prior to imposing such charge.

37(d)(2) Content of Reminder Notice

The Bureau proposed § 1024.37(d)(2) to address the content of the second required notice. Proposed § 1024.37(d)(2)(i) would have set forth the information that a servicer must provide in the written notice established by section 6(*l*)(1)(B) of RESPA to a borrower from whom the servicer has not received any insurance information. Proposed § 1024.37(d)(2)(ii) would have set forth the information required where the servicer received insurance information from the borrower within 30 days after delivering to the borrower or placing in the mail the written notice set forth § 1024.37(c)(1)(i), but not was not able to verify that the borrower has hazard insurance in place continuously.

Proposed § 1024.37(d)(2)(i) would have required that if a servicer that has not received any insurance information from the borrower within 30 days after delivering or placing in the mail the notice required pursuant to § 1024.37(c)(1)(i), the servicer must provide a reminder notice that contains the disclosures forth in § 1024.37(c)(2)(ii) to (c)(2)(xi), the date of the notice, and a statement that the notice is the second and final notice. The Bureau explained in the proposal that it believes that the date of the notice and a statement that the notice is the second and final notice helps to distinguish the notice from the notice required pursuant to § 1024.37(c)(1)(i). Moreover, because the servicer would not have received any insurance information, the Bureau believed it would be appropriate to require the servicer to provide the disclosures set forth in § 1024.37(c)(2)(ii) to (c)(2)(xi) in the second written notice sent to a borrower who has not sent the servicer any insurance information in response to the first written notice.

Proposed § 1024.37(d)(2)(ii) would have required that if a servicer has received insurance information from the borrower within 30 days after delivering to the borrower or placing in the mail the written notice set forth in § 1024.37(c)(1)(i), but has not been able to verify that the borrower has hazard insurance in place continuously, then the servicer must deliver or place in the mail a written notice that contains the following: (1) The date of the notice; (2) a statement that the notice is the second and final notice; (3) the disclosures set forth in § 1024.37(c)(2)(ii), (c)(2)(iii), (c)(2)(iv), and (c)(2)(xi); (4) a statement that the servicer has received the hazard insurance information that the borrower provided; (5) a statement that indicates to the borrower that the servicer is unable to verify that the borrower has hazard insurance in place continuously; and (6) a statement that the borrower will be charged for insurance the servicer obtains for the period of time where the servicer is unable to verify hazard insurance coverage unless the borrower provides the servicer with hazard insurance information for such period.

As described above in the section-by-section analysis of § 1024.37(c)(2), a number of industry commenters requested the Bureau to withdraw the requirement to provide the cost of force-placed insurance (or a good faith estimate of the cost) and to permit servicers to include additional information in the force-placed insurance notices the Bureau proposed. For reasons discussed above, the Bureau is keeping the requirement to provide the cost of force-placed insurance (revised to refer to a ''reasonable estimate'' rather than a ''good faith estimate'') in the second notice and not permitting a servicer to include additional information in a second reminder notice. The Bureau has also added new comment 37(d)(2)(i)(D)–1 to clarify what a ''reasonable estimate'' means.

37(d)(3) Format

As previously discussed, the Bureau proposed new §§ 1024.37(c)(3) and (d)(3) in parallel to implement section 6(*l*)(1). Proposed § 1024.37(d)(3) would have provided that the disclosures set forth in proposed § 1024.37(d)(2)(i) must be in a format substantially similar to form MS–3(B), and the disclosures set forth in § 1024.37(d)(2)(ii) must be in a format be substantially similar to form MS–3(C). Proposed § 1024.37(d)(3) would have provided that disclosures required by § 1024.37(d)(2)(i)(B), (d)(2)(ii)(B), and (d)(2)(ii)(F) must be in bold text. The Bureau observed in the proposal that the reasons the Bureau provided for requiring the use of highlighting (bold text) for purposes of § 1024.37(c)(3) also applied to § 1024.37(e)(3). As discussed above, the Bureau has made changes to § 1024.37(c)(3) in adopting § 1024.37(c)(3), and the Bureau is making conforming changes to § 1024.37(d)(3).

37(d)(4) Updating Notice With Borrower Information

The Bureau proposed § 1024.37(d)(4) to provide that if a servicer receives hazard insurance information from a borrower after the second written notice required pursuant to § 1024.37(d)(1) has been put into production, the servicer is not required to update the notice so long as the notice was put into production within a reasonable time prior to the servicer delivering the notice to the borrower or placing the notice in the mail. The Bureau proposed related commentary, comment 37(d)(4)–1, that would have provided that five days prior to the delivery or mailing of the second notice is a reasonable time and invited comments on whether, in certain circumstances, a longer time frame is reasonable.

As discussed above, the Bureau observes that one of the minimum consumer protection purposes Congress intended to establish by creating new servicer duties with respect to a servicer's purchase of force-placed insurance is to provide a borrower with reasonably accurate information about a servicer's grounds for purchasing force-placed insurance. The Bureau believes that a servicer has a duty to ensure that

[111] The commenters suggested that if the Bureau was going to adopt the requirement that servicers must provide the actual cost (or good faith estimate of the cost) of force-placed insurance, the requirement should be limited to the second notice.

the second notice contains reasonably accurate information about an individual borrower's hazard insurance status. Therefore, the Bureau believes that a servicer has a duty to update the second notice if it receives new insurance information about a borrower after sending the first written notice to the borrower. The Bureau, however, observed in the proposal that a servicer might have to prepare the written notice in advance of sending it. Accordingly, the Bureau explained that it believed that it was appropriate to create a safe harbor of five days to protect a servicer acting diligently from exposure to potential litigation if the information the servicer provided in the second notice turns out to be, in fact, inaccurate, due to information about a borrower's hazard insurance it receives subsequent to putting the second notice into production.

One force-placed insurance provider and two national trade associations representing the mortgage industry recommended the Bureau withdraw proposed § 1024.37(d)(4) or, in the alternative, expand the safe harbor to 10 days, excluding legal holidays, Saturdays and Sundays, because some servicers use third-party service providers to prepare force-placed insurance notices and need a period of longer than 5 days to prepare the notices. The force-placed insurance provider contended that servicers are going to update the second notice or not send the second notice at all if they have received verification of a borrower's hazard insurance because they would not want to send their customers unnecessary notices. Two other force-placed insurance providers also recommended that the safe harbor be expanded to 10 days from the date that a borrower's insurance is verified, but did not indicate whether 10 days should exclude legal holidays, Saturdays, and Sundays.

The Bureau observes that as discussed above, the intent of § 1024.37(d)(4) is to create a safe harbor to protect servicers who are diligent in ensuring that borrowers receive reasonably accurate information from potential litigation risk. Accordingly, the Bureau is concerned that a 10-day safe harbor, even one that includes legal public holidays, Saturdays and Sundays, would be overbroad and give the benefit of the safe harbor to servicers who are not diligent in ensuring that borrowers receive accurate information. But the Bureau has concluded that servicers that use third-party service providers to prepare force-placed insurance notices could reasonably require more than 5 days to prepare the second written notice in a timely manner, especially a five-day period that includes a legal public holiday, Saturday, or Sunday. Accordingly, the Bureau is adopting proposed comment 37(d)(4)–1 with a change to clarify that the 5-day period excludes legal public holidays, Saturdays, and Sundays. The Bureau believes this adjustment strikes the right balance between achieving the consumer protection of providing a borrower with accurate information about a servicer's grounds for purchasing force-placed insurance and providing diligent servicers with a safe harbor from potential litigation risk.

37(e) Renewal or Replacement of Force-Placed Insurance

The Bureau proposed § 1024.37(e) to prohibit a servicer from charging a borrower for the replacement or renewal of an existing force-placed insurance policy unless certain procedural requirements are followed as specified in proposed § 1024.37(e). The Bureau proposed the requirements because pre-proposal outreach suggested that there is no widespread industry standard that applies to renewal procedures for force-placed insurance. Moreover, commissions and reinsurance agreements may create strong incentives at renewal as well as at original placement. The Bureau believes that the renewal notice is authorized under RESPA section 6(*l*), which provides that a servicer does not have a reasonable basis to obtain force-placed insurance unless certain notice requirements are met, and does not limit such requirements to the first time a servicer obtains and charges a borrower for force-placed insurance. The Bureau has, however, made certain adjustments to the notice and procedure requirements set forth in RESPA section 6(*l*), as described below, to account for the fact that in the case of the renewal of forced-placed insurance, the borrower already will have received at least two prior force-placed insurance notices. Section 1024.37(e) is further authorized under sections 6(j)(3), 6(k)(1)(E), and 19(a) of RESPA as necessary and appropriate to achieve the consumer protection purposes of RESPA, including avoiding unwarranted charges and fees and ensuring the provision to borrowers of accurate and relevant information. As discussed below, the Bureau is adopting proposed § 1024.37(e) generally as proposed with a few changes to address issues that were raised in comments.

37(e)(1) In general

The Bureau proposed § 1024.37(e)(1) to provide that that a servicer may not charge a borrower for renewing or replacing existing force-placed insurance unless: (1) The servicer delivers or places in the mail a written notice to the borrower with the disclosures set forth in § 1024.37(e)(2) at least 45 days before the premium charge or any fee is assessed; and (2) during the 45-day notice period, the servicer has not received evidence that the borrower has obtained hazard insurance. The Bureau stated in the proposal that it believed that the procedures it proposed concerning renewal and replacement would provide advance notice to allow a borrower the time the borrower may need to buy hazard insurance before being charged again for the cost of force-placed insurance at renewal or replacement.

The Bureau did not believe a servicer should have to wait until the end of the notice period before charging a borrower for the cost of renewing the force-placed insurance if a borrower has confirmed that there was a gap in coverage with respect to a borrower who obtains hazard insurance after receiving the renewal notice. Accordingly, the Bureau proposed § 1024.37(e)(1)(iii) to permit a servicer who has renewed or replaced existing force-placed insurance during the notice period to charge a borrower for such renewal or replacement promptly after a servicer receives verification that the hazard insurance obtained by a borrower did not provide a borrower with insurance coverage for any period of time following the expiration of the existing force-placed insurance, notwithstanding § 1024.37(e)(1)(i) and (e)(1)(ii). The Bureau proposed comment 37(e)(1)(iii)–1 to provide an example of what this means.

Two national trade associations representing the mortgage industry observed that it is common industry practice for a servicer to send renewal notice to borrowers but urged that the Bureau permit servicers to charge a borrower for the renewal of existing force-placed insurance at the time of purchase because a servicer should not have to incur the burden of not being able to impose a charge on a borrower related to force-placed insurance at the time of renewal or replacement. The Bureau declines to modify the proposal because the Bureau believes imposing a notice period during which a servicer is prohibited from charging a borrower for force-placed insurance is appropriate and necessary to help a borrower avoid the cost associated with the borrower's servicer renewing or replacing the borrower's hazard insurance. The Bureau further notes that a servicer can provide the 45-day notice in advance of the expiration of the current forced

place coverage, and accordingly, disagrees that § 1024.37(e)(1) would invariably prohibit a servicer from imposing a charge on a borrower related to force-placed insurance at the time of renewal or replacement. Accordingly, the Bureau is adopting § 1024.37(e)(1) as proposed, except technical changes to clarify what evidence of borrower's coverage means for § 1024.37(e)(1). New comment 37(e)(1)–1 clarifies that a servicer may require a borrower to provide a form of written confirmation as described in comment 37(c)(1)(iii)–3 and may reject evidence of coverage submitted by the borrower for the reasons described in comment 37(c)(1)(iii)–2. Comment 37(e)(1)(iii) is adopted as proposed.

37(e)(2) Content of Renewal Notice

Proposed § 1024.37(e)(2) would have required a servicer to provide a number of the disclosures set forth in in proposed § 1024.37(c)(2) in the renewal notice. The Bureau explained in the proposal that the main differences between the disclosures set forth in proposed § 1024.37(c)(2) and proposed § 1024.37(e)(2) are that in proposed § 1024.37(e)(2), servicers must provide a statement that: (1) The servicer previously obtained insurance on the borrower's property and assessed the cost of the insurance to the borrower because the servicer did not have evidence that the borrower had hazard insurance coverage for the property; and (2) the servicer has the right to maintain insurance by renewing or replacing the insurance it previously obtained because insurance is required. The Bureau believes the differences are necessary to distinguish the notice required pursuant to proposed § 1024.37(e)(1) from the notice required pursuant to proposed § 1024.37(c)(1). The proposed requirement in § 1024.37(c)(2)(ix) concerning provision of the cost of the force-placed insurance, stated as an annual premium, or a good faith estimate of such cost, would have been replicated in proposed § 1024.37(e)(2)(vii), with related commentary that would have explained that the good faith requirement set forth in § 1024.37(e)(2)(vii) is the same good faith requirement set forth in § 1024.37(c)(2)(ix).

The comments the Bureau received with respect to the content of the force-placed insurance notices under § 1024.37(c)(2) (*i.e.,* comments about the requirement to provide a good-faith estimate and requests to be allowed to provide additional information) also apply to proposed § 1024.37(e)(2). The Bureau believes that the burden of providing a good faith estimate is lower for purposes of § 1024.37(e)(2) than for purposes of providing such an estimate for purposes of § 1024.37(c)(2) because a servicer can provide such an estimate based on the amount of current premiums. Accordingly, the Bureau is adopting this requirement in the final rule (revised to refer to a ''reasonable estimate'') and made technical changes in related commentary to reflect this revision. For reasons discussed above, the Bureau is not permitting a servicer to include additional information in the notice required by § 1024.37(e)(1). But, as discussed above, the Bureau is adopting new § 1024.37(e)(4) to permit servicers to provide additional information in the same transmittal the servicer uses to provide the replacement or renewal notice.

37(e)(3) Format

Proposed § 1024.37(e)(3) would have provided that that the disclosures set forth in § 1024.37(e)(2) must be in a format substantially similar to form MS–3(D), set forth in appendix MS–3. It also stated that disclosures made pursuant to § 1024.37(e)(2)(vi)(B) and 37(e)(2)(vii) must be in bold text, and disclosures made pursuant to § 1024.37(e)(2)(iv) must be in bold text, except that the physical address of the property may be in regular text. Because proposed § 1024.37(e)(3) paralleled proposed §§ 1024.37(c)(3) and (d)(3), the Bureau is adopting § 1024.37(e)(3) with change to conform to changes made in § 1024.37(c)(3) and (d)(3).

37(e)(4) Compliance

Proposed § 1024.37(e)(4) would have provided that before the first anniversary of a servicer obtaining force-placed insurance on a borrower's property, the servicer shall deliver to the borrower or place in the mail the notice required by § 1024.37(e)(1). Further, proposed § 1024.37(e)(4) would have provided that a servicer is not required to comply with § 1024.37(e)(1) before charging a borrower for renewing or replacing existing force-placed insurance more than once every 12 months.

The Bureau explained that the Bureau did not believe receiving more than one renewal or replacement notice in a 12-month period was necessary because borrowers should be able to retain the first notice under proposed § 1024.37(e)(1), including the cost or estimate information, for future reference. The Bureau also noted that some small servicers who participated in the Small Business Review Panel expressed concerns about the cost of sending renewal notices over a 12-month period because unlike large servicers, a number of small servicers purchase force-placed insurance policies that would have to be renewed monthly. The Bureau, however, solicited comments on whether providing the renewal or replacement notice once during a 12-month period would adequately inform borrowers about the costs, benefits, and risks associated with servicers' renewal or replacement of existing force-placed insurance.

One large force-placed insurance provider commented that one notice per year is sufficient to remind borrowers without overly burdening the servicer or potentially inundating borrowers with multiple and repetitive notices. In contrast, a state consumer group asserted that one notice over a 12-month period may not be enough to adequately inform borrowers of the costs, benefits, and risks of servicer's renewal or replacement of force-placed insurance and urged the Bureau to require a servicer to provide at least two renewal notices over a 12-month period to inform borrowers of the force-placed insurance premium they would be charged.

The Bureau has further considered the issue but continues to believe for the reasons stated in the proposal that one annual renewal notice will adequately inform borrowers of the costs, benefits, and risks of servicer's renewal or replacement of force-placed insurance. Additionally, the Bureau notes that in conjunction with the Bureau's periodic statement rule, most borrowers whose servicers are charging them for force-placed insurance will be made aware of that fact because a servicer will be required to list force-placed insurance charges on periodic statements. Accordingly, the Bureau is adopting proposed § 1024.37(e)(4) as proposed, renumbered as § 1024.37(e)(5) in the final rule.

37(f) Mailing the Notices

Section 6(*l*)(1) of RESPA, discussed previously, establishes that servicers must use first-class mail to send the notices established by section 6(*l*)(1)(A) and (B) of RESPA. The Bureau proposed to implement this aspect of section 6(*l*)(1) of RESPA by adding new § 1024.37(f) to provide that if a servicer mails a notice required pursuant to § 1024.37(c)(1)(i), (d)(1), or (e)(1) of this section, a servicer must use a class of mail not less than first-class mail.

As discussed above, the Bureau believes that it is necessary and appropriate to achieve the purposes of RESPA to allow servicers to transmit the force-placed notices required under § 1024.37 by a class of mail better than

first. The Bureau observed in the proposal that although the notice required by proposed § 1024.37(e)(1) is not required by RESPA, applying the same mailing requirements to all notices under § 1024.37 would facilitate compliance by promoting consistency. The Bureau did not receive any comments on proposed § 1024.37(f) and is adopting § 1024.37(f) as proposed.

37(g) Cancellation of Force-Placed Insurance

Section 1463(a) added new section 6(*l*)(3) to RESPA, which states that within 15 days of receipt by a servicer of confirmation of a borrower's existing insurance coverage, the servicer must: (1) Terminate the force-placed insurance; and (2) refund to the borrower all force-placed insurance premium charges and related fees paid by the borrower during any period in which the borrower's insurance and the force-placed insurance were both in effect. The Bureau proposed § 1024.37(g)(1) and (2) to implement section 6(*l*)(3) of RESPA. Section 1024.37(g)(1) and (2) would have provided that within 15 days of receiving verification that the borrower has hazard insurance in place, a servicer must cancel force-placed insurance obtained for a borrower's property and for any period during which the borrower's hazard insurance was in place, refund to the borrower all force-placed insurance premium charges and related fees paid by the borrower for such period. Proposed § 1024.37(g)(2) would have also required a servicer to remove all force-placed insurance charges and related fees that the servicer has assessed to the borrower for any period during which the borrower's hazard insurance was in place from the borrower's account. The Bureau believes that Congress, by establishing the duty to provide a full refund of the force-placed insurance premium and related charges paid by a borrower for any period of time during which the borrower's hazard insurance coverage and the force-placed insurance coverage were both in effect, also intended to establish the duty to remove a premium charge or fee related to force-placed insurance for such period. Accordingly, the Bureau interprets the statutory duty to provide such refund to include the duty to remove all force-placed insurance premium charges and related fees charged to a borrower's account for any period during which the borrower's hazard insurance coverage and the force-placed insurance coverage were both in effect.

Several industry commenters asserted that a borrower should not have an unconditional right to receive a refund for all force-placed insurance premium charges and related fees paid by the borrower during any period of overlapping coverage. They asserted that it would not be reasonable for a servicer to absorb the cost of the refund if a borrower does not provide evidence of insurance in a timely manner or if a servicer had a reasonable basis to purchase force-placed insurance. Some commenters asserted that an unconditional right to a refund would encourage borrowers to act irresponsibly by not providing evidence of insurance in a timely manner. One state housing finance agency and a force-placed insurance provider suggested that servicers needed 15 business days to cancel force-placed insurance and provide a borrower with refunds in an orderly manner and asked the Bureau to adjust the timelines accordingly.

The Bureau is finalizing § 1024.37(g) as proposed, with adjustments to the regulatory language for clarity. While a number of commenters indicated that they understood ''receiving verification that the borrower has hazard insurance in place'' meant receiving evidence of insurance coverage, just as the Bureau has adjusted the text of §§ 1024.37(c)(1)(iii), (d)(2)(ii), and (e)(1)(iii), to clarify what ''receiving verification'' means, the Bureau has made similar revisions to enhance the clarity of § 1024.37(g).

Additionally, in finalizing § 1024.37(g)(2), the Bureau has replaced the proposed phrase ''for any period during which the borrower's hazard insurance was in place'' with the phrase ''for any period of overlapping insurance coverage'' because the Bureau believes the language ''periods of overlapping coverage'' more closely aligns with the statutory language ''any period during which the borrower's insurance coverage and the force-placed insurance coverage were each in effect'' in RESPA section 6(*l*)(3). The Bureau is adopting new comment 37(g)(2)–1 to explain what ''period of overlapping insurance coverage'' means for purposes of § 1024.37(g)(2). The Bureau, however, is not adopting proposed comment 37(g)–1 because upon further consideration, the Bureau believes that further elaboration on what a servicer must do to comply with § 1024.37(g) is not required.

With respect to commenters asserting that a borrower should not have an unconditional right to a full refund of force-placed insurance premiums and related fees paid by the borrower, the Bureau notes that section 6(*l*)(3) of RESPA expressly establishes that a borrower's right to a full refund for any period during which the borrower's hazard insurance and the force-placed insurance were both in effect is an unconditional one. Moreover, based on consumer testing and other outreach, the Bureau is skeptical that the statutory regime will cause borrowers to be less diligent in responding to notices from their servicers asking them to provide evidence demonstrating insurance coverage and result in servicers having to absorb significant costs.

As discussed above, across all rounds of testing, participants uniformly understood the timeliness of their response upon the receipt of force-placed insurance notices affected whether or not they would have to pay for force-placed insurance. All participants said they would take immediate action because they did not want to bear the expense of force-placed insurance.[112] The uniformity of the responses supports the Bureau's belief that the substantially higher cost of force-placed insurance provides borrowers with a natural incentive to provide their servicers with evidence of insurance coverage in a timely manner.

Further, based on outreach the Bureau has done with force-placed insurance providers and servicers, as well as based on public statements made by these entities and comment letters the Bureau has received from industry, the Bureau observes that the typical force-placed insurance on the market provides for flat cancellation (*i.e.,* the force-placed insurance provider provides a full refund of force-placed insurance premiums paid by the borrower for any period of time where the force-placed insurance and the borrower's hazard insurance coverage were both in effect).[113] Accordingly, the Bureau does

[113] *See e.g.,* N.Y. State Dep't of Fin. Services, *Testimony of John Frobose, President of American Security Insurance Company (ASIC)* 6 (describing that if ASIC receives proof that there was no gap in hazard insurance coverage on a borrower's property, ASIC refunds all force-placed insurance premiums paid); *see also,* N.Y. State Dep't of Fin. Services, *Written Testimony of Nicholas Pastor and Matthew Freeman on behalf of QBE Insurance Corporation and QBE FIRST Insurance Agency* 15 (stating that if the borrower provides proof of voluntary insurance such that there was no lapse in the voluntary coverage, all premiums paid by a borrower or deducted from a borrower's escrow account are refunded, regardless of when the borrower provided the proof of voluntary coverage): *See further,* N.Y. State Dep't of Fin. Services, *Written Testimony of Justin Crowley on behalf of Select Portfolio Servicing, Inc, Pelatis Insurance Agency Corp. and Pelatis Insurance Limited* 5 (stating that it provides a full refund equal to the total amount of force-placed insurance premiums charged to the borrower's account for any period

not believe that servicers will have to absorb significant costs.

The Bureau further declines to adjust the timeline a servicer must follow to cancel fore-placed insurance and refund force-place premium charges and related fees paid by the borrower. As discussed above in the section-by-section analysis of the defined term ''Day'' in § 1024.31, the Bureau believes that Congress intended the term ''day'' by itself to mean a calendar day for purposes of RESPA. The 15-day timeline for cancellation and refund is expressly established by section 6(*l*)(3) of RESPA.

Further, based on the Bureau's outreach and public statements made by force-placed insurance providers and servicers, the Bureau understands that servicers' purchase of force-placed insurance is generally a rare occurrence. If the volume of force-placement is small to begin with, then the Bureau is skeptical that requiring servicers to follow the statutorily-prescribed timeline would overwhelm a servicer or otherwise impose too large of a burden. Accordingly, the Bureau does not believe it is appropriate to deviate from the statutory-determined timeline set forth in section 6(*l*)(3).

A large force-placed insurance provider, a state trade association representing mortgage lenders, and a bank servicer expressed concern that § 1024.37(g), as proposed, would be construed as requiring a servicer to cancel force-placed insurance and provide a full refund even if a borrower's hazard insurance policy does not meet the loan contract's requirements. Although the Bureau does not believe that it was reasonable to construe proposed § 1024.37(g) to require a servicer to cancel force-placed insurance and provide a full refund even if a borrower's hazard insurance policy does not meet the loan contract's requirements, the Bureau believes that in any event, the commenters' concern is adequately addressed by § 1024.37(g), which, as adopted, clarifies that ''receiving verification'' in proposed § 1024.37(g) means receiving evidence demonstrating that the borrower has had hazard insurance in place that complies the loan contract's requirements to maintain hazard insurance.

Lastly, one large bank servicer expressed concern that the obligation to refund a borrower for force-placed insurance premiums and related fees paid by the borrower triggers a subsequent escrow analysis disclosure set forth in current § 1024.17(c)(3), which requires a servicer to perform an escrow account analysis at the completion of the escrow account computation year, which is defined in current § 1024.17(b) as ''a 12-month period that a servicer establishes for the escrow account beginning with the borrower's initial payment date.'' Providing a refund to a borrower in accordance with § 1024.37(g), by itself, does not trigger the obligation to perform an escrow account analysis required by current § 1024.17(c)(3).

37(h) Limitation on Force-Placed Insurance Charges

Section 1463(a) of the Dodd-Frank Act amended RESPA section 6 by adding new section 6(m) to RESPA, which states that apart from charges subject to State regulation as the business of insurance, all charges related to force-placed insurance imposed on the borrower by or through the servicer must be bona fide and reasonable. Proposed § 1024.37(h)(1) generally mirrored the statutory language by providing that except for charges subject to State regulation as the business of insurance and charges authorized by the Flood Disaster Protection Act of 1973, all charges related to force-placed insurance assessed to a borrower by or through the servicer must be bona fide and reasonable. Proposed § 1024.37(h)(2) would have provided that a bona fide and reasonable charge is a charge for a service actually performed that bears a reasonable relationship to the servicer's cost of providing the service, and is not otherwise prohibited by applicable law.

The Bureau noted in the proposal that the Flood Disaster Protection Act of 1973 establishes that notwithstanding any Federal or State law, any servicer for a loan ''secured by improved real estate or a mobile home'' may charge a reasonable fee for determining whether the building or mobile home securing the loan is located or will be located in a special flood hazard zone. *See* 42 U.S.C. 4012a(h). As discussed in the proposal and explained above, the Bureau was concerned about issuing regulations that would overlap with regulations issued pursuant to the FDPA, and believed that borrowers would be confused by receiving overlapping notices under the two regimes with respect to the same flood insurance policy. Accordingly, as discussed above, the Bureau used its authority under section 19(a) of RESPA to exempt hazard insurance to protect against flood loss obtained by a servicer as required by the FDPA from the definition of force-placed insurance. Consistent with this exemption and for the same reasons, the Bureau believed that it was necessary to achieve the purposes of RESPA's force-placed insurance provisions to use it authority under section 19(a) of RESPA to exempt charges authorized by the FDPA from proposed § 1024.37(h). The Bureau received no comments on the exemption and is adopting this aspect of § 1024.37(h)(1) as proposed.

With respect to proposed § 1024.37(h)(2), which would have set forth the Bureau's proposed definition of ''bona fide and reasonable charge,'' the Bureau noted in the proposal that the Bureau believed it was important that servicers do not try to inflate the already-high cost of force-placed insurance by assessing charges to borrowers that are not for services actually performed, do not bear a reasonable relationship to the servicer's cost of providing the service, or are prohibited by applicable law.

One non-bank servicer commended the proposed definition of ''bona fide and reasonable charge'' and predicted that the Bureau's proposal would stop many of the abusive servicer practices that have damaged the industry's reputation over the past few years. But a national trade association representing the consumer credit industry contended that the proposed definition would create an ambiguous standard that would expose lenders to class action lawsuits and infringe on state insurance departments' sole authority to regulate insurance rates.

Other comments received from a national trade association representing realtors and several consumer groups urged the Bureau to go further in regulating charges related to force-placed insurance that a servicer imposes on a borrower. The realtors association urged the Bureau to mandate affordable force-placed insurance premiums. One consumer group urged the Bureau to ban servicers or their affiliates from receiving any fee, commission, kickback, reinsurance contract, or any other thing of value for a force-placed insurance provider in exchange for purchasing force-placed insurance, and to prohibit a servicer from obtaining an amount of force-placed insurance coverage greater than the replacement cost value of the borrower's property. Two national consumer groups suggested that the Bureau should expressly exclude unreasonable costs and other costs unrelated to the provision of force-placed insurance. Two other national consumer groups asserted that the Bureau should expressly exclude commissions or other

during which the borrower maintained his or her own homeowners' coverage) (copies of the aforementioned testimonies are available at *http://www.dfs.ny.gov/insurance/hearing/fp_052012_testimony.htm*).

compensation paid by a force-placed insurance provider or its agent to a servicer or any affiliate of the servicer, costs associated with insurance tracking, cost for activities for which a servicer is being reimbursed by the owner of the mortgage, costs associated with the administration of reinsurance programs, cost to subsidize unrelated servicer activities, and any cost that is not directly related to the provision of force-placed insurance. They also urged the Bureau to provide guidance about prohibited fees that is consistent with Fannie Mae's proposed changes to its servicing guidelines on force-placed insurance.[114] These commenters further asserted that State insurance regulators have no authority over a charge that a servicer imposes on a borrower for force-placed insurance because a servicer is not an entity regulated by state insurance regulators.

After consideration of the comments submitted, the Bureau believes it is appropriate to finalize § 1024.37(h)(2) as proposed. The Bureau believes § 1024.37(h) appropriately implements RESPA 6(m)'s ''bona fide and reasonable'' requirement in a way that does not overlap with state insurance departments' authority to regulation insurance rates. Further, the Bureau believes § 1024.37(h) provides clear guidance for servicers by unambiguously prohibiting a servicer from charging a borrower for a service it did not perform, or charging a borrower a fee that does not bear a reasonable relationship to the servicer's cost of providing the service, or that would be otherwise prohibited by applicable law.

With respect to the request that the Bureau should revise the definition of ''bona fide and reasonable charges'' to exclude unreasonable costs, other costs unrelated to the provision of force-placed insurance, and cost to subsidize servicing activities unrelated to the provision of force-placed insurance, the Bureau believes that the proposed and final definition already exclude such charges.

With respect to requests that the Bureau mandate affordable force-placed insurance premiums, prohibit servicers from receiving commission or similar fees or things of value, prohibit fees associated with the cost of administration of reinsurance programs or insurance tracking, the Bureau recognizes the concerns, but believes the provisions of § 1024.37 provide adequate safeguards to borrowers and consistent with the regulatory scheme mandated by Congress.

With respect to the request that the Bureau prohibit servicers from charging borrowers for costs that could be reimbursed by the owner of the mortgage loan, the Bureau believes that where a servicer charges a borrower for first-placed insurance in accordance with the requirements under § 1024.37, it is reasonable for the borrower, rather than the owner or assignee of the mortgage loan, to bear the costs of such insurance. With respect to the request that the Bureau exclude costs not directly related to force-placed insurance from the definition of ''bona fide and reasonable charges,'' the Bureau believes that the bona fide and reasonable standard provides adequate protection to borrowers without distinguishing between whether a charge is ''directly'' or ''indirectly'' related to force-placed insurance. Such a standard would thus inject addition complexity without concomitant consumer benefit.

With respect to the request that the Bureau provide guidance about prohibited fees that is consistent with Fannie Mae's proposed changes to its servicing guidelines, the Bureau carefully reviewed Fannie Mae's servicing announcement and concluded that it would not be appropriate to provide similar guidance. The draft guidance simply informs servicers that Fannie Mae no longer plans to reimburse a servicer for certain servicer expenses related to servicer's purchase of force-placed insurance and importantly, it offers no guidance on the charges a servicer may impose on a borrower with respect to a servicer's purchase of force-placed insurance. Additionally, the Bureau believes that the prohibitions and requirements with respect to force-placed insurance under § 1024.37 provide adequate protection to borrowers and that there is no reason to depart from the scheme established by Congress to regulate force-placed insurance by importing Fannie Mae's guidance regarding prohibited fees into the final rule.

Lastly, with regard to the argument that no charge imposed by a servicer is subject to State regulation as the business of insurance because a servicer is not regulated by State insurance regulators, the Bureau believes the language of section 6(m) of RESPA clearly contemplates that servicers may pass through charges that are subject to State regulation as the business of insurance to a borrower, and the fact that such charge is passed through by the servicer does not mean that such charge is no longer subject to State regulation as the business of insurance. For the foregoing reasons, the Bureau is adopting § 1024.37(h)(2) as proposed.

37(i) Relationship to Flood Disaster Protection Act of 1973

Section 1463 of the Dodd-Frank Act amended section 6 of RESPA to add new section 6(*l*)(4) to provide that the new Dodd-Frank Act requirements concerning force-placed insurance do not prohibit servicers from sending a simultaneous or concurrent notice of a lack of flood insurance pursuant to section 102(e) of the Flood Disaster Protection Act (FDPA). The Bureau proposed § 1024.37(i) to provide that if permitted by regulation under section 102(e) of the Flood Disaster Protection Act of 1973, a servicer subject to the requirements of § 1024.37 may deliver to the borrower or place in the mail any notice required by § 1024.37 together with the notice required by section 102(e) of the Flood Disaster Protection Act of 1973.

One national trade association representing banks and insurance providers urged the Bureau to permit servicers to combine the notice required pursuant to the FDPA with any notice required pursuant to § 1024.37. One state consumer group expressed concern that a borrower might be confused if it receives a notice required pursuant to § 1024.37 and a notice required pursuant to the FDPA at the same time. The commenter observed that the notices should be distinguishable from each other and should state that there is a difference between the two notices.

Congress vested other Federal regulators with the authority to issue regulations under the FDPA, and thus, the Bureau cannot revise the content of notices required under the FDPA. With respect to potential confusion caused by receiving concurrent notices, the Bureau notes that it has excluded insurance required under the FDPA from the definition of force-placed insurance so that borrowers will not receive overlapping notices under § 1024.37 and the FDPA with respect to the same insurance policy. To the extent

[114] Fannie Mae issued a servicing announcement stating that any servicer requesting reimbursement of force-placed insurance premiums must exclude any lender-placed insurance commission earned on that policy by the servicer or any related entity, costs associated with insurance tracking or administration, or any other costs beyond the actual cost of the lender-placed insurance policy premium. *See* Fannie Mae, *Updates to Lender-Placed Property Insurance and Hazard Insurance Claims Processing* (Mar. 14, 2012), *available at https://www.fanniemae.com/content/announcement/svc1204.pdf.* The Bureau observes that Fannie Mae followed up in May of 2012 with a public statement announcing that it has postponed the implementation date of these guidelines until further notice. Fannie Mae, *Effective Date for Lender-Placed Property Insurance Requirements, available at https://www.fanniemae.com/content/announcement/ntce052312.pdf.*

borrowers receive separate notices under § 1024.37 and the FDPA with respect to separate insurance policies, the Bureau further believes that borrowers will be able to distinguish the notices under the two regulatory schemes based on their content. The Bureau also observes that it has addressed compliance burden by permitting under final § 1024.37(i) that notices under the FDPA and § 1024.37 could be provided to borrowers in the same transmittal. Accordingly, the Bureau is adopting § 1024.37(i) as proposed, except with adjustment just described. As adopted, § 1024.37(i) states if permitted by regulation under section 102(e) of the Flood Disaster Protection Act of 1973, a servicer subject to the requirements of § 1024.37 may deliver to the borrower or place in the mail any notice required by § 1024.37 and the notice required by section 102(e) of the Flood Disaster Protection Act of 1973 on separate pieces of paper in the same transmittal.

Section 1024.38 General Servicing Policies, Procedures, and Requirements

Background. As discussed above, the Bureau proposed rules that would amend Regulation X to implement the Dodd-Frank Act amendments to TILA and RESPA, with respect to among other things, error resolution and information requests. The Bureau also proposed to use its section 19(a) authority to require servicers to establish and to implement reasonable policies and procedures to manage information and documents, to evaluate and respond to loss mitigation applications, and to achieve other important objectives.

As described more fully above, the Bureau's proposal sought to address pervasive consumer protection problems across major segments of the mortgage servicing industry that came to light during the recent financial crisis and that underlie many consumer complaints and recent regulatory and enforcement actions. In the 2012 RESPA Servicing Proposal, the Bureau stated that it believed that many servicers simply had not made the investments in resources and infrastructure necessary to service large numbers of delinquent loans. The Bureau noted that recent evaluations of mortgage servicer practices have indicated that borrowers have been harmed as a result of many servicers' lacking adequate policies and procedures to provide servicer personnel with appropriate borrower information. Federal regulatory agencies reviewing mortgage servicing practices have found that certain servicers demonstrated ''significant weaknesses in risk-management, quality control, audit, and compliance practices.'' [115]

Further, the Bureau noted that major servicers demonstrated systemic failures to document and verify, in accordance with applicable law, information relating to borrower mortgage loan accounts in connection with foreclosure proceedings. Examinations by prudential regulators found ''critical deficiencies in foreclosure governance processes, document preparation processes, and oversight and monitoring of third parties * * * [a]ll servicers [examined] exhibited similar deficiencies, although the number, nature, and severity of deficiencies varied by servicer.'' [116]

As the Bureau explained in the 2012 RESPA Servicing Proposal, a servicer's obligation to maintain accurate and timely information regarding a mortgage loan account and to be able to provide accurate and timely information to its own employees and to borrowers, owners, assignees, subsequent servicers, and courts, among others, is one of the most basic servicer duties. A servicer cannot comply with its myriad obligations to investors and applicable law, unless it maintains sound systems to manage the servicing of mortgage loan accounts, including information systems that maintain accurate and timely information with respect to mortgage loan accounts. To address those critical concerns, the Bureau decided to use RESPA section 19(a) authority to propose a rule to address servicers' information management and other general servicing policies and procedures across the industry.

The Bureau received general comments about whether it was appropriate for the Bureau to regulate servicers' practices related to information management and other servicer policies and procedures identified in the 2012 RESPA Servicing Proposal. Consumer group comments generally demonstrated support for the proposal. Industry comments, on the other hand, expressed skepticism about whether it is necessary for the Bureau to regulate servicers' information management and other operational practices. Some industry comments suggested that recent State and Federal remediation efforts, such as the National Mortgage Settlement, and other existing regulations obviated the need for any regulation by the Bureau. Some servicers also urged the Bureau to delay adopting the proposed rule. The Bureau also received a small number of comments about the scope of the rule, including whether the proposed rule would apply to mortgages other than federally regulated mortgages or to reverse mortgages.

In light of the potential harm to borrowers due to the deficiencies in servicer practices highlighted in the proposal, the Bureau continues to believe that servicers should achieve certain critical general servicing objectives and requirements. The Bureau declines to adopt the commenters' suggestions that regulation of these practices is not necessary at this time, and is adopting § 1024.38, as proposed with the modifications discussed in detail below. Through enforcement and supervision of § 1024.38, the Bureau will evaluate whether servicers are achieving the objectives and requirements set forth in § 1024.38. The Bureau also expects that servicers will measure their own ability to achieve the objectives and requirements set forth in § 1024.38. In addition, the Bureau expects that servicers' policies and procedures will address the core functions that they need to achieve those objectives and requirements, including providing adequate staffing and meaningful oversight of the resources engaged in achieving those important objectives and requirements, including servicer staff, service providers, and vendors.

As explained above, the Bureau believes that the general servicing policies, procedures, and requirements set forth in § 1024.38 are necessary and appropriate to achieve the consumer protective purposes of RESPA, including to avoid unwarranted or unnecessary costs and fees, to ensure that servicers are responsive to consumer requests and complaints, to ensure that servicers provide and maintain accurate and relevant information about the mortgage loan accounts that they service, and to facilitate the review of borrowers for foreclosure avoidance options. Moreover, as discussed in detail below in part VII, the Bureau believes that the burden imposed on servicers under the final rule is reasonable in light of the countervailing benefits of the provisions.

[115] *Problems in Mortg. Servicing From Modification to Foreclosure: Hearings Before the Senate Comm. on Banking, Hous. & Urban Affairs,* 111th Cong. 4 (2010) (statement of Daniel K. Tarullo, Board of Governors, Federal Reserve System), *available at http://www.federalreserve.gov/newsevents/testimony/tarullo20101201a.htm.*

[116] *Failure to Recover: The State of Hous. Mkts., Mortg. Servicing Practices and Foreclosures: Hearings Before the House Comm. on Oversight and Gov't Reform,* 112th Cong. 4 (2012) (statement of Morris Morgan, Office of the Comptroller of the Currency), *available at http://www.occ.gov/news-issuances/congressional-testimony/2012/pub-test-2012–47-written.pdf.*

As discussed in detail above in the section-by-section analysis of § 1024.30, § 1024.38 applies only to the servicing of federally related mortgage loans, as defined in § 1024.2, and does not apply to the servicing of reverse mortgages, as defined in § 1024.31, or with respect to any mortgage loan for which a servicer is subject to regulation by the Farm Credit Administration as a ''qualified lender,'' as defined in 12 CFR 617.7000. In addition, § 1024.38 does not apply to small servicers, as defined in 12 CFR 1026.41(e)(4). The Bureau has also modified the final rule to clarify that the policies, procedures, and requirements set forth in § 1024.38 are broader than information management and encompass general servicing policies, procedures, and requirements.

Legal Authority

In proposing § 1024.38, the Bureau relied on a number of authorities, including section 6(k)(1)(E) of RESPA. That provision, which was added by § 1463 of the Dodd-Frank Act as part of a broader set of servicing-related requirements, authorizes the Bureau to promulgate regulations ''appropriate to carry out the consumer protection purposes of [RESPA].'' In the proposal, the Bureau noted that § 1024.38 was further authorized under section 6(j)(3) of RESPA, as necessary to carry out section 6 of RESPA, and under section 19(a) of RESPA, as necessary to achieve the purposes of RESPA. Because rules issued under section 6 of RESPA, including under sections 6(k)(1) and 6(j)(3), are enforceable through private rights of action, the Bureau proposed § 1024.38(a)(2), which set forth a safe harbor under which a servicer would not violate proposed § 1024.38 unless it engaged in a pattern or practice of failing to achieve any of the objectives set forth in § 1024.38. The Bureau believed that creating a pattern or practice threshold would significantly improve industry practices but not subject servicers to lawsuits with respect to, for example, a single lost document or filing error.

The Bureau received many comments on the private liability suggested by the Bureau's reliance on its authority under section 6 of RESPA to propose § 1024.38. Numerous industry commenters expressed concern that authorizing § 1024.38 under section 6 of RESPA would create a private cause of action to enforce the provisions of the section. These commenters noted that the litigation risk created by the proposed rule would complicate compliance due to the potential for inconsistent judicial interpretations of the rule. In light of this concern, industry commenters asked the Bureau to provide detailed, specific guidance on how to comply with the objectives set forth in proposed § 1024.38. In addition, servicers argued that the Bureau and prudential regulators are better positioned to assess and supervise servicers' internal policies and procedures than courts through civil litigation. Industry commenters also stressed that the private litigation that would likely ensue under proposed § 1024.38 would increase the cost of servicing and thereby decrease the availability of credit.

Consumer group commenters generally supported the allowance of private rights of action to enforce § 1024.38 but expressed dissatisfaction with the proposed safe harbor, which they argued should be eliminated or revised to reduce the barriers to successful civil actions and to ensure sufficient protection for borrowers. They commented that the safe harbor definition would make it difficult for consumers to bring successful civil suits, and urged the Bureau to eliminate or to revise the safe harbor to provide relief for more borrowers. Consumer advocates argued that borrowers need strong protections because borrowers cannot select their servicers.

As stated in the proposal, the Bureau is concerned that a servicer's failure to achieve each of the objectives and standard requirements set forth in § 1024.38 creates the potential for adverse consequences harmful to borrowers. These may include imposing improper fees on borrowers, inability reasonably to evaluate borrowers for loss mitigation options that may benefit borrowers and owners or assignees of mortgage loans, unwarranted costs to borrowers, and the potential for fraud upon courts through inaccurate or unverifiable legal pleadings.

The Bureau sought to balance the need for consumer protections with the costs created by command-and-control regulation by proposing objectives-based policies and procedures that allowed servicers flexibility to set policies and procedures reasonably designed to achieve certain defined objectives. Because a single failure to achieve a desired objective or requirement is not necessarily indicative of a servicer's failure to implement appropriate policies and procedures and in light of the potential costs of civil litigation, the Bureau proposed a safe harbor under which servicers would be liable only for systemic violations of § 1024.38. Upon consideration of the comments and further consideration, however, the Bureau has concluded that the proposed formulation would not have adequately balanced the countervailing concerns of borrowers and industry. Requiring a showing of a pattern or practice could make it difficult for borrowers or regulators to obtain remedies until a servicer had inflicted widespread harm among its borrowers. At the same time, the prospect that many individual suits could be filed could threaten to undermine the basic goal of an objectives-based system, if servicers felt pressured to adopt models to reduce risk that were not in fact appropriately tailored to their particular operations.

Ultimately, the Bureau agrees with the commenters that allowing a private right of action for the provisions that set forth general servicing policies, procedures, and requirements would create significant litigation risk. As the commenters noted, courts potentially would interpret the proposed flexible objectives-based standards inconsistently, which would have created compliance challenges for servicers. To address such challenges, the Bureau believes that it would have needed to issue more prescriptive standards in the final rule. The Bureau continues to believe, however, for the reasons discussed above, that flexible objectives-based standards are best suited to address the information management and other servicing challenges faced by different servicers that the Bureau identified in the proposal. Policies and procedures best suited to achieve the desired objectives are often highly dependent on the facts and circumstances of an individual servicer, such as the number and type of loans being serviced, and the technology that the servicer has deployed.

The Bureau believes that supervision and enforcement by the Bureau and other Federal regulators for compliance with and violations of § 1024.38 respectively, would provide robust consumer protection without subjecting servicers to the same litigation risk and concomitant compliance costs as civil liability for asserted violations of § 1024.38. Indeed, the Bureau believes that the Bureau and other Federal regulators have the experience and judgment necessary to evaluate a servicer's compliance with § 1024.38 and to take action against servicers whose operational systems are not reasonably designed to achieve the stated objectives without waiting for evidence of a pattern or practice of undesirable outcomes. Prior to the enactment of the Dodd-Frank Act, there was no comprehensive Federal supervisory authority over non-bank mortgage servicers. The Dodd-Frank Act

created a comprehensive regime of federal regulation over both bank and non-bank mortgage servicers. Under this new regime, the Bureau and other federal regulators can calibrate supervision to focus on practices that present the greatest risk to borrowers and work with servicers to assure that servicers have implemented effective systems that protect consumers and manage servicing portfolios. At the same time, the new comprehensive regulatory regime will allow the Bureau and other regulators to take prompt and effective action where a servicer's policies and procedures are deficient without waiting for proof of a pattern or practice of abuse.

Therefore, the Bureau is restructuring the final rule so that it neither provides private liability for violations of § 1024.38 nor contains a safe harbor limiting liability to situations where there is a pattern or practice of violations. As discussed in more detail below, the Bureau has also revised some of the proposed objectives and added new requirements that the Bureau believes can be appropriately overseen by supervisory agencies but that would have been difficult for the courts to administer on a case-by-case basis. The Bureau believes that this approach more appropriately balances the need for robust consumer protections with respect to the general servicing policies, procedures, and requirements set forth in § 1024.38 through supervision and enforcement by the Bureau and other agencies with the flexibility for industry to define how to achieve the important objectives set forth in § 1024.38.

Thus, the Bureau no longer relies on its authorities under section 6 of RESPA to issue § 1024.38. Instead, the Bureau is adopting § 1024.38 pursuant to its authority under section 19(a) of RESPA. As explained in more detail below, the Bureau believes that the servicing policies, procedures, and requirements set forth in § 1024.38 are necessary to achieve the purposes of RESPA, including to avoid unwarranted or unnecessary costs and fees, to ensure that servicers are responsive to consumer requests and complaints, to ensure that servicers provide and maintain accurate and relevant information about the mortgage loan accounts that they service, and to facilitate the review of borrowers for foreclosure avoidance options. The Bureau believes that without sound operational policies and procedures and without achieving certain standard requirements, servicers will not be able to achieve those purposes. The Bureau is also adopting § 1024.38 pursuant to its authority under section 1022(b) of the Dodd-Frank Act to prescribe regulations necessary or appropriate to carry out the purposes and objectives of Federal consumer financial laws. Specifically, the Bureau believes that § 1024.38 is necessary and appropriate to carry out the purpose under section 1021(a) of the Dodd-Frank Act of ensuring that markets for consumer financial products and services are fair, transparent, and competitive, and the objective under section 1021(b) of the Dodd-Frank Act of ensuring that markets for consumer financial products and services operate transparently and efficiently to facilitate access and innovation. The Bureau additionally relies on its authority under section 1032(a) of the Dodd-Frank Act, which authorizes the Bureau to prescribe rules to ensure that the features of any consumer financial product or service, both initially and over the term of the product or service, are fully, accurately, and effectively disclosed to consumers in a manner that permits consumers to understand the costs, benefits, and risks associated with the product or service, in light of the facts and circumstances.

38(a) Reasonable Policies and Procedures

Proposed § 1024.38(a)(1) would have required servicers to establish reasonable policies and procedures for achieving certain objectives relating to borrower mortgage loan accounts. Proposed § 1024.38(a)(1) provided that a servicer meets this requirement if the servicer's policies and procedures are reasonably designed to achieve certain objectives, which are set forth in proposed § 1024.38(b), and are reasonably designed to ensure compliance with certain specific requirements in proposed § 1024.38(c).

Proposed comment 38(a)–1 would have clarified that the proposed rule permits servicers to determine the specific methods by which they will implement reasonable policies and procedures to achieve the required objectives. The proposed comment also explained that servicers have flexibility to design the operations that are reasonable in light of the size, nature, and scope of the servicer's operations, including, for example, the volume and aggregate unpaid principal balance of mortgage loans serviced, the credit quality, including the default risk, of the mortgage loans serviced, and the servicer's history of consumer complaints. The Bureau noted in the proposal that it intended that this clarification would provide servicers flexibility to design policies and procedures that are appropriate for their servicing businesses.

The Bureau received a handful of comments on the structure of the requirements. Industry commenters, especially credit unions, were generally supportive of framing the requirements as objectives-based standards. A trade association expressed support for the flexibility included in the rule, but noted concern that examiners may not view servicers' programs flexibly and instead may ask servicers to change existing programs based on unpublished rules. A consumer group commented that framing the requirements as objectives-based standards would lead to inconsistent practices throughout the mortgage servicing industry.

The Bureau is adopting § 1024.38(a), which is re-numbered from proposed § 1024.38(a)(1), as proposed with non-substantive modifications. The Bureau believes that, due to diversity of servicer size, infrastructure, and work practices, flexible objectives-based standards are best-suited to manage servicers' operational practices. The Bureau understands as the commenters suggest that framing the requirements as objectives-based standards will lead to differences between how servicers implement the objectives, but believes that objectives-based standards best balance the burden on the industry with the protections for consumers.

The Bureau is adopting comment 38(a)–1, as proposed with non-substantive modifications to explain that a servicer may determine the specific policies and procedures it will adopt and the methods by which it will implement those policies and procedures so long as they are reasonably designed to achieve the objectives set forth in § 1024.38(b). A servicer has flexibility to determine such policies and procedures and methods in light of the size, nature, and scope of the servicer's operations, including, for example, the volume and aggregate unpaid principal balance of mortgage loans serviced, the credit quality, including the default risk, of the mortgage loans serviced, and the servicer's history of consumer complaints. Comment 38(a)–1 clarifies that servicers may retain existing procedures or design policies and procedures that are appropriately tailored to their operations, as long as the procedures are reasonably designed to achieve the important objectives set forth in § 1024.38(b). The Bureau is also adopting new comment 38(a)–2 to clarify the meaning of the term procedures. As stated in the comment, the term ''procedures'' refers to the actual practices followed by a servicer for achieving the objectives set forth in § 1024.38(b). This comment clarifies

that the Bureau expects that servicers' policies and procedures will be reasonably designed to measure their ability to achieve the objectives set forth in § 1024.38 and to make ongoing improvements to their policies and procedures to address any deficiencies.

Safe harbor. As discussed above, the Bureau proposed § 1024.38(a)(2) to provide a safe harbor for servicers for non-systemic violations of § 1024.38 to manage the costs that would arise from the contemplated litigation risk created by the contemplated civil liability for violations of § 1024.38. Proposed § 1024.38(a)(2) stated that a servicer satisfies the requirement in proposed § 1024.38(a)(1) if the servicer does not engage in a pattern or practice of failing to achieve any of the objectives set forth in proposed § 1024.38(b) and did not engage in a pattern or practice of failing to comply with any of the standard requirements in proposed § 1024.38(c). Proposed comment 38(a)(1)–1 would have provided examples of potential pattern or practice failures by servicers. Proposed comment 38(a)(2)–1 would have provided further clarification about the operation of the safe harbor.

Comments received by the Bureau expressed uniform dissatisfaction with the proposed safe harbor definition. Industry commenters in general expressed the concern that the proposed safe harbor would not sufficiently insulate them from the large costs that they said that they would bear due to the litigation risk they saw embedded in the proposal as a result of civil liability, as discussed above in the section-by-section discussion of the legal authority for § 1024.38. In addition, some industry commenters stated that the safe harbor provision, which is based on the lack of a pattern or practice, would lead to costly discovery because servicers would be required to produce large volumes of documents to establish the absence of a pattern or practice.

Consumer group commenters also expressed opposition to the proposed safe harbor. They commented that the safe harbor definition would make it difficult for borrowers to bring successful civil suits, and urged the Bureau to eliminate or to revise the safe harbor to provide relief for more borrowers. Consumer advocates argued that borrowers need strong protections because borrowers cannot select their servicers.

As discussed above, the Bureau is adopting final general servicing policies, procedures, and requirements that are not enforceable through a private right of action. As violations of this § 1024.38 no longer carry potential civil liability, the Bureau does not believe that the proposed safe harbor is appropriate to include in the final rule. The Bureau is adopting a final rule that does not include proposed § 1024.38(a)(2) or proposed comments 38(a)(1)–1 and 38(a)(2)–1. This revision will also allow the Bureau to protect borrowers through robust supervision and enforcement of the servicing policies, procedures, and requirements set forth in § 1024.38 without having to demonstrate a pattern or practice of violations.

38(b) Objectives

38(b)(1) Accessing and Providing Timely and Accurate Information

38(b)(1)(i)

Proposed § 1024.38(b)(1)(i) would have required that a servicer's policies and procedures be reasonably designed to achieve the objective of providing accurate and timely disclosures to borrowers. As stated in the proposal, the Bureau believed that this was an important objective to protect borrowers by making sure that servicers provide borrowers with accurate and timely information about their mortgage loan accounts. Having received no comments on this provision, the Bureau is adopting § 1024.38(b)(1)(i), as proposed.

38(b)(1)(ii)

Proposed § 1024.38(b)(1)(ii) would have required that a servicer's policies and procedures be reasonably designed to achieve the objective of enabling the servicer to investigate, respond to, and, as appropriate, correct errors asserted by borrowers, in accordance with the procedures set forth in § 1024.35, including errors resulting from actions of service providers. A servicer's ability to investigate promptly and respond appropriately to an assertion of error is necessarily dependent upon the accuracy of the servicer's records and on the ability of the servicer's employees to access those records readily. As a result, the Bureau believed that including this objective as one of the objectives for a servicer's policies and procedures was an important supplement to the Dodd-Frank Act error resolution requirements that are implemented in § 1024.35.

The Bureau received one comment on proposed § 1024.38(b)(1)(ii). A trade association urged the Bureau to limit the applicability of § 1024.38(b)(1)(ii) to errors submitted pursuant to § 1024.35. The Bureau declines to adopt the commenter's suggestion. In light of the Bureau's decision to limit the applicability of § 1024.35 to notices of error submitted in writing, as discussed above in the section-by-section analysis of § 1024.35, the Bureau has decided to modify proposed § 1024.38(b)(1)(ii) to clarify that a servicer must have policies and procedures reasonably designed to respond to complaints asserted by borrowers, including those complaints that are not subject to the procedures set forth in § 1024.35. In particular, the Bureau believes that the modification is necessary and appropriate to ensure that consumers receive prompt and appropriate responses to oral complaints even though such complaints will not trigger the formal processes under § 1024.35.

The Bureau also is removing the reference to the actions of service providers from the text of the rule, and, instead, is adopting new comment 38(b)(1)(ii)–1 to clarify that policies and procedures to comply with § 1024.38(b)(1)(ii) must be reasonably designed to provide for promptly obtaining information from service providers to facilitate achieving the objective of correcting errors resulting from actions of service providers, including obligations arising pursuant to § 1024.35.

38(b)(1)(iii)

Proposed § 1024.38(b)(1)(iii) would have required servicers to develop policies and procedures reasonably designed to provide borrowers with accurate and timely information and documents in response to borrower requests for information or documents related to their mortgage loan accounts in accordance with the procedures set forth in § 1024.36. The Bureau believed that the proposed provision was an important supplement to the Dodd-Frank Act information request requirements that are implemented in § 1024.36 because the maintenance of accurate information regarding mortgage loan accounts is necessary for a servicer to respond to requests for information made by borrowers.

The Bureau received no comments on § 1024.38(b)(1)(iii). However, in light of the Bureau's decision to limit the applicability of § 1024.36 to requests for information submitted in writing, as discussed above in the section-by-section analysis of § 1024.36, the Bureau has decided to modify proposed § 1024.38(b)(1)(iii) to clarify that a servicer must have policies and procedures to provide a borrower with accurate and timely information and documents in response to the borrower's requests for information with respect to the borrower's mortgage loans, including those requests that are not asserted in accordance with the procedures set forth in § 1024.36. In particular, the Bureau continues to believe that servicers must have the capacity to respond to borrowers'

requests for information reported to servicers orally, but the Bureau believes that it is appropriate to allow servicers to design policies and procedures best suited to their operations to achieve this objective. Accordingly, the Bureau is adopting § 1024.38(b)(1)(iii) with modifications from the proposal to broaden the scope of the objective to include borrower requests for information or documents with respect to the borrower's mortgage loan that are not encompassed by the written information request process set forth in § 1024.36.

38(b)(1)(iv)

Proposed § 1024.38(b)(1)(iv) would have required servicers to establish policies and procedures reasonably designed to achieve the objective of providing owners or assignees of mortgage loans with accurate and current information and documents about any mortgage loans that they own. As stated in the proposal, the Bureau believes that to protect borrowers, it is necessary for owners and assignees to receive accurate and timely information about the mortgage loans they own. As the Bureau stated, owners and assignees can play an important role in ensuring that servicers comply with the requirements of the owner or assignee which may inure to the benefit of borrowers.

The Bureau received a comment on this proposed provision from an investor, providing types of information that would benefit investors regarding loss mitigation evaluations conducted, and loss mitigation agreements entered into, by servicers. Having received no comments on the substance of the proposed rule, the Bureau is adopting § 1024.38(b)(1)(iv), as proposed. The Bureau is also adopting new comment 38(b)(1)(iv)–1 to clarify the information and documents contemplated by this section. Comment 38(b)(1)(iv)–1 provides that the relevant and current information to owners or assignees of mortgage loans includes, among other things, information about a servicer's evaluation of borrowers for loss mitigation options and a servicer's agreements with borrowers on loss mitigation options, including loan modifications. Such information includes, for example, information regarding the date, terms, and features of loan modifications, the components of any capitalized arrears, the amount of any servicer advances, and any assumptions regarding the value of a property used in evaluating any loss mitigation options.

38(b)(1)(v)

Proposed § 1024.38(b)(1)(v) would have required that a servicer's policies and procedures be reasonably designed to achieve the objective of enabling the servicer to submit documents or filings required for a foreclosure process, including documents or filings required by a court of competent jurisdiction, that reflect accurate and current information and that comply with applicable law. The Bureau believes that it is necessary and appropriate to protect borrowers from harms resulting from servicers' failure to submit accurate, current, and compliant documents in foreclosure proceedings. In issuing the proposed rule, the Bureau pointed to findings by the Office of the Comptroller of the Currency that major servicers demonstrated failures to document and verify, in accordance with applicable law, information relating to borrower mortgage loan accounts in connection with foreclosure proceedings.[117]

The Bureau received a number of comments on proposed § 1024.38(b)(1)(v). State attorneys general commented that the Bureau should adopt stricter standards to ensure the accuracy and validity of foreclosure documentation, such as the standards included in the recent National Mortgage Settlement. In addition, consumer groups urged the Bureau to require servicers who are initiating a foreclosure to provide documentation to borrowers of the right of the party initiating the action to foreclose, including providing evidence of an enforceable security interest and verification of supporting statements.

After consideration of the comments, the Bureau has concluded that the proposed language already appropriately addresses the concerns raised. Section 1024.38(b)(1)(v), as proposed, requires servicers to develop policies and procedures reasonably designed to achieve the objective of ensuring the accuracy of any documents filed in foreclosure proceedings, which would include affidavits or security instruments, and, therefore, is broad enough to cover the specific documents identified in the National Mortgage Settlement. Specifying particular documents which must be submitted accurately, or regulating the particulars of how documents are prepared and validated by servicers, would be inconsistent with the rule's broad objectives-based standards, which, as discussed above, are designed to provide flexibility for a wide range of servicers to develop policies and procedures that are appropriate to their business and that will achieve the stated objectives. Accordingly, the Bureau declines to adopt a final rule containing the specific details included in the National Mortgage Settlement. The Bureau expects that the court filings of servicers whose operational and information management policies and procedures are reasonably designed to achieve the objective of § 1024.38(b)(1)(v) will be accurate and authorized by the underlying security documents.

Second, the Bureau believes that the information request process defined in proposed § 1024.36 provides borrowers in foreclosure with access to the documentation described by consumer groups. Specifically, § 1024.36, as proposed, requires servicers to provide to borrowers upon their request information about their mortgage loan accounts, including their servicing files, which includes a complete payment history, a copy of their security instrument, collection notes, and other valuable information about their accounts. Accordingly, the Bureau does not believe that it is necessary to revise the proposed language to provide this protection. For the reasons discussed above, the Bureau is adopting § 1024.38(b)(1)(v), as proposed.

38(b)(1)(vi)

The Bureau's proposed servicing operational policies and procedures did not specifically address a servicer's obligations related to successors in interest upon the death of a borrower. The Bureau received information about difficulties faced by surviving spouses, children, or other relatives who succeed in the interest of a deceased borrower to a property that they also occupied as a principal residence, when that property is secured by a mortgage loan account solely in the name of the deceased borrower. In particular, the Bureau understands that successors in interest may encounter challenges in communicating with mortgage servicers about a deceased borrower's mortgage loan account. The Bureau believes that it is essential that servicers' policies and procedures are reasonably designed to facilitate communication with successors in interest regarding a deceased borrower's mortgage loan accounts. Therefore, the Bureau is adopting § 1024.38(b)(1)(vi) to clarify that servicers should maintain policies and procedures that are reasonably

[117] *Failure to Recover: The State of Hous. Mkts., Mortg. Servicing Practices and Foreclosures: Hearings Before the House Comm. on Oversight and Gov't Reform,* 112th Cong. 4 (2012) (statement of Morris Morgan, Office of the Comptroller of the Currency).

designed to, upon notification of the death of a borrower, identify promptly and facilitate communication with the successor in interest of the deceased borrower with respect to the property secured by the deceased borrower's mortgage loan.

38(b)(2) Properly Evaluating Loss Mitigation Applications

Proposed § 1024.38(b)(2) would have established a number of objectives designed specifically to support servicers' loss mitigation activities and to facilitate compliance with various requirements under proposed § 1024.41. Specifically, proposed § 1024.38(b)(2) would have required that a servicer's policies and procedures be reasonably designed to achieve the objective of enabling the servicer to (i) provide accurate information to borrowers regarding loss mitigation options; (ii) identify all loss mitigation options for which a borrower may be eligible; (iii) provide servicer personnel with prompt access to all documents and information submitted by a borrower in connection with a loss mitigation option; (iv) enable servicer personnel to identify documents and information that a borrower is required to submit to make a loss mitigation application complete; and (v) enable servicer personnel to evaluate borrower applications properly, and any appeals, as appropriate.

In the proposal, the Bureau expressed its belief that requiring servicers to have reasonable policies and procedures to maintain and manage information and operations that are designed to enable the servicer to evaluate borrowers for loss mitigation options facilitates compliance with proposed § 1024.41. Further, such policies and procedures are likely to protect consumers by requiring servicers to consider, in advance of the potential delinquency of a particular mortgage loan, the loss mitigation options that are generally available to borrowers.

While acknowledging that servicers generally have begun to alter the manner in which they invest in infrastructure and are changing their approach to default management, the Bureau stated in the 2012 RESPA Servicing Proposal that it believes that a requirement to develop reasonable policies and procedures to enable a servicer to evaluate loss mitigation applications imposes a reasonable burden on servicers that will benefit delinquent borrowers once the rule takes effect and will protect borrowers in future years as servicers transition from reacting to the current financial crisis to a more steady market more likely to be punctuated by regional spikes in delinquencies and foreclosures. Absent regulation, servicers that have not yet invested in improving loss mitigation functions may find less incentive to do so as housing markets recover, leading to continued inadequate infrastructure during future regional or national housing downturns, which may lead to future borrower harm. The Bureau requested comment regarding whether the Bureau had identified the appropriate objectives with respect to proposed § 1024.38(b)(2) and whether objectives should be removed, or other objectives included, in the requirements.
