

CICLOSPORT®

SPORTS INFORMATION SYSTEMS

2015/16

ABOUT CICLOSPORT SPORTS INFORMATION SYSTEMS

CicloSport K.W. Hochschorner GmbH was established in 1978 in the town of Stockdorf near Munich. Since our foundation over 30 years ago we have stood for innovation in the sport electronics sector.

Since CicloSport was founded the family business has developed into one of the leading sports computer producers at our time. The name CicloSport is synonymous with high quality and a variety of comprehensible and usable information.

In 1989 CicloSport was one of the pioneers that offered cycle computers for the bicycle market. Since then we have continued to develop our products. Below we have listed a number of product highlights we have managed to produce in the last 34 years.

- 1980 First electronic CicloSport Cycle Computer
- 1985 First CicloSport Cycle Computer with Altimeter
- 1990 First CicloSport Heart Rate Monitor
- 1997 First CicloSport-HAC (Heart Rate Monitor, Altimeter and Cycle Computer)
- 2000 First CicloSport navigation system for bicycles
- 2001 Digital, wireless transmission system using the 868 MHz frequency
- 2002 Digital, wireless cardio training security system for up to 20 participants
- 2002 Radar Distance System for distance and speed measurements relating not only to sport
- 2005 First CicloSport cycle computer with digital transmission, wireless cadence measurements and automatic cycle recognition
- 2007 Introduction of the CicloInZone® used to calculate the optimal training range
- 2009 First GPS-navigation system especially developed for the outdoor/cycle sector
- 2011 Development of HMI's for pedelec systems

CicloSport has its own development department, in which our engineers are working on new and innovative products. The success of this work is reflected among other things in the cooperation between CicloSport and the Robert Bosch GmbH in the area of eBike systems, which exists since the year 2010.

In order to achieve CicloSport's quality standards, a process and customer oriented management system on the basis of DIN EN ISO 9001:2008 was implemented in the year 2011. This certificate after international standards keeps records about the continuous control and improvement of processes in the company.

We offer these three product areas

-  Cycle Computers **CICLO MASTER**
-  Multifunction Computers **CICLO CONTROL**
-  Heart Rate Monitors **CICLO PULS**

CicloSport represents

-  Innovation
-  Quality
-  Functionality
-  Information variety
-  Design
-  Enthusiasm for sports and
-  Tradition

Not only our competent dealers are convinced of our product, also our partners Mountain Bike Holidays, Roadbike Holidays, bikexpress and Bicycle Holidays Max Hürzeler to name a few.

CICLO CONTROL®

SMART-NAVIGATOR.

Find your way and improve yourself.

TRACK YOUR GOALS
Wherever you are, even on the other side of the world.

NEW

HAC 1.2 SMARTNAVIC

White/black – Art. No.: 10302401

Smart navigation device including training and cycling functions.

Functions

- Bike functions
- Heart rate measurement
- Altimetry
- Navigation*
- Training functions
- Power calculation (W)
- Cadence
- Temperature
- Lap functions
- Time functions
- Hiking mode
- Up to 4 bikes
- 5 languages
- Lightmanager

Optional with accessories

- Cadence (wireless)
- Heart rate measurement
- Power measurement
- Burnt calories

DIGITALLY ENCODED

WIRELESS DIGITAL TRANSMISSION = MAX. FAIL SAFETY

SMARTPHONE CONNECTIVITY

Available from May 2016

NEW

HAC 1.2+ SMARTNAVIC

White/black – Art. No.: 10302402

Smart navigation device including training and cycling functions.

Functions

- Bike functions
- Heart rate measurement
- Altimetry
- Navigation*
- Training functions
- Power calculation (W)
- Cadence
- Temperature
- Lap functions
- Time functions
- Hiking mode
- Up to 4 bikes
- 5 languages
- Lightmanager

Optional with accessories

- Power measurement
- Burnt calories

DIGITALLY ENCODED

WIRELESS DIGITAL TRANSMISSION = MAX. FAIL SAFETY

SMARTPHONE CONNECTIVITY

Available from May 2016

*in combination with the Komoot App

NEW

HAC 1.1 SMARTNAVIC

White/black – Art. No.: 10302400

Smart navigation device and cycling functions.

Functions

- Bike functions
- Navigation*
- Time functions
- Hiking mode
- Up to 2 bikes
- 5 languages
- Lightmanager

Optional with accessories

- Cadence
- Heart rate
- Burnt calories

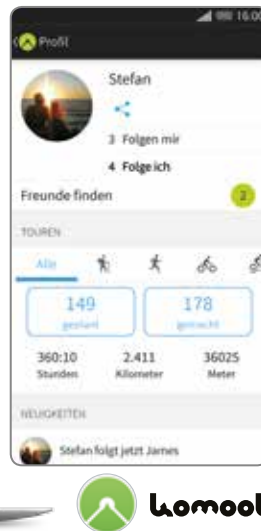

DIGITALLY ENCODED

WIRELESS DIGITAL TRANSMISSION = MAX. FAIL SAFETY

SMARTPHONE CONNECTIVITY

Available from May 2016

By purchasing the HAC 1.2 (+) or HAC 1.1 you will get free access to the komoot world map.

HF-Set BLE

Textile transmitter belt with BLUETOOTH SMART

Soft and extremely comfortable – a topless feeling with BLUETOOTH SMART. Enjoy the uniquely new feeling of wearing our textile transmitter belt!

Outstanding Features:

- BLUETOOTH SMART technology
- Comfortable, light, small
- Skin friendly
- Elastic
- Ventilated
- Works even dry
- Transmitter unit is compatible with other systems e.g. heart rate shirts
- Washable elastic parts
- Compatible to all Smartphones with Bluetooth Smart (e.g. iPhone 4s und 5)

Compatible devices:

WHY CHOOSE CICLOSPORT CYCLE COMPUTERS?

- Huge, easy to read 3-line display
- Individually configurable display (Multi Choice System)
- Aerodynamic design, scratch resistant casing
- Quick and easy to operate using the simple menu structure
- Buttonless: CM 2.11 and CM 4.11

- Three button system: CM 2.21, CM 4.21 (HR), CM 4.41 A (HR), CM 9.3 A, CM 9.3 A +
- Optional and individual upgrade possibilities for a number of the basic computers e.g. cadence and heart rate transmitters
- Ease of use due to our Twist Klick handlebar bracket
- Multi Lock handlebar brackets also suitable for bike stem installation
- TwoInOne system (automatic cycle recognition with the CM 9.x series)

CM 9.3 A

white/black · Art.-No.: 10104800

Wireless cycle computer using digital transmission (ANT+) including altimetry and PC-Analysis

Cycle functions

- Speed (199km/h) (current/average/maximum)
- Trip/total distance
- Programmable total distance
- Trip/total time
- Speed comparison
- Auto start/stop
- TwoInOne system with automatic cycle recognition

Altimeter functions

- Current altitude
- Home/starting point altitude
- Incline and decline display
- Trip/total altitude
- Trip maximum altitude

Power functions

- Power calculation (watt) (current/average/maximum)

Temperature functions

- Temperature (current/average/maximum)

Additional functions

- Time 12/24h display
- Date
- Power down mode
- Night light display
- PC-Analysis (optional)

Optional extras

- PC configurable
- Cadence function (wireless)
- Heart rate functions
- Power measurement (watt) (current/average/maximum, left, right side separated)

Delivery scope

Twist Klick handlebar bracket, speed transmitter, spoke magnet, mounting materials and USB interface. Optional: wrist band (for jogging computer use)

CM 9.3 A +

white/black · Art.-No.: 10104900

Wireless cycle computer using digital transmission including altimetry, heart rate monitor, cadence and PC analysis (ANT+)

Cycle functions and altimeter functions as for CM 9.3 A

- **additional heart rate functions**
- Heart rate monitor functions (current/average/maximum)
- Programmable heart rate limit (upper and lower limit)
- Calculated optimal training zone using CICLEInZone®
- Exercise times above within or below your targeted heart rate range
- Calories burnt (current/total)

Temperature functions

- Temperature (current/average/maximum)

Additional functions

- Time 12/24h display
- Date
- Power down mode
- Night light display
- PC-Analysis (optional)

Cadence functions

- Cadence (current, average, maximum)

Optional extras

- PC configurable
- Power measurement (watt) (current/average/maximum, left, right side separated)

Delivery scope

Twist Klick handlebar bracket, speed transmitter, spoke magnet, cadence transmitter, cadence magnet, textile chest belt (to monitor your heart rate), wrist band, mounting materials, USB interface

CM 4.41 A

black · Art.-No.: 10104600

Wireless cycle computer with altimetry

Cycle functions

- Speed (199 km/h) (current/average/maximum)
- Trip/total distance
- Programmable total distance
- Trip/total time
- Speed comparison
- Auto start/stop
- TwoInOne-System

Altimeter functions

- Current altitude
- Home/starting point altitude
- Incline and decline display
- Trip/total altitude
- Trip maximum altitude

Temperature functions

- Temperature (current/average/maximum)

Additional functions

- Time 12/24h display
- Date
- Power down mode

Optional extras

- PC configurable
- PC-Analysis
- Heart rate functions (as for CM 4.41 A HR)
- Cadence function (current/average/maximum)

Delivery scope

Twist Klick handlebar bracket, transmitter, spoke magnet and mounting materials

Optional: wrist band (for jogging computer use)

ALTIMETRY

CM 4.41 A HR

black · Art.-No.: 10104610

Wireless cycle computer with altimetry and heart rate monitor

Cycle functions and altimeter functions as for CM 4.41 A additional heart rate functions

- Heart rate monitor functions (current/average/maximum)
- Programmable heart rate limit (upper and lower limit)
- Calculated optimal training zone using CICLOInZone®
- Exercise times above within or below your targeted heart rate range
- Calories burnt (current/total)

Temperature functions

- Temperature (current/average/maximum)

Additional functions

- Time 12/24h display
- Date
- Power down mode

Optional extras

- PC configurable
- PC-Analysis
- Cadence function (current/average/maximum)

Delivery scope

Twist Klick handlebar bracket, transmitter, spoke magnet, transmitter belt including elastic strap, mounting materials.

Optional: wrist band (for jogging computer use)

CM 4.21 HR

black · Art.-No.: 10104410

Wireless cycle computer with heart rate monitor

Functions as for CM 4.21 but with additional heart rate functions

- Heart rate monitor functions (current/average/maximum)
- Programmable heart rate limit (upper and lower limit)
- Calculated optimal training zone using CICLOInZone®
- Exercise times above within or below your targeted heart rate range
- Calories burnt (current/total)

Additional functions

- Time 12/24h display
- Date
- Power down mode

Optional extras

- PC configurable
- PC-Analysis
- Cadence function (current/average/maximum)

Delivery scope

Twist Klick handlebar bracket, transmitter, spoke magnet, transmitter belt including elastic strap, mounting materials.

Optional: wrist band (for jogging computer use)

HEART RATE

CM 4.11

black · Art.-No.: 10104300

Button and wireless cycle computer

Cycle functions

- Speed (current/average)
- Trip/total distance
- Programmable total distance
- Auto start/stop

Additional functions

- Time 12/24h display

Optional extras

- PC configurable

Delivery scope

Twist Klick handlebar bracket, transmitter, spoke magnet and mounting materials

CM 2.21

black/silver - Art.-No.: 10104100

Wired cycle computer

Cycle functions

- Speed (199 km/h) (current/average/maximum)
- Speed comparison
- Trip/total distance
- Trip/total time
- Programmable total distance
- Auto start/stop
- TwolnOne System

Additional functions

- Time 12/24h display
- Date
- Power down mode

Optional extras

- PC configurable
- PC-Analysis
- Cadence function (current/average/maximum)

Delivery scope

Twist Klick handlebar bracket and sensor, spoke magnet and mounting materials

CM 2.11

black/silver - Art.-No.: 10104000

Buttonless wired cycle computer

Cycle functions

- Speed (current/average)
- Trip/total distance
- Programmable total distance
- Auto start/stop

Additional functions

- Time 12/24h display

Optional extras

- PC configurable

Delivery scope

Twist Klick handlebar bracket and sensor, spoke magnet and mounting materials

BLACKLINE

CM 8.2 Blackline

champagne-white · Art.-No.: 10103700

Wireless cycle computer using digital transmission (BlueEye III – 2,4GHz)

Cycle functions

- Speed 199km/h (current/average/maximum)
- Programmable trip-/total distance
- Trip-/total time
- Speed comparison
- Auto start/stop
- TwoInOne-system with automatic cyclerecognition

Additional functions

- Time 12/24h display
- Date
- Power down mode

Optional extras

- Heart rate functions
- Cadence function (wireless)
- PC analysis

Delivery scope

Twist-Klick handlebar bracket, transmitter, spoke magnet and mounting materials, optional: wrist band (for jogging computer use)

DIGITALLY ENCODED

WIRELESS DIGITAL TRANSMISSION = MAX. FAIL SAFETY

CM 4.2 Blackline

silver/black · Art.-No.: 10103400

Wireless cycle computer

Cycle functions

- Speed (199 km/h) (current/average/maximum)
- Trip/total distance
- Programmable total distance
- Trip/total time
- Speed comparison
- Auto start/stop
- TwoInOne-System

Heart rate functions

- Heart rate monitor functions (current/average/maximum)
- Programmable heart rate limit (upper and lower limit)
- Calculated optimal training zone using CICLOInZone®

CM 4.2 HR Blackline

silver/black · Art.-No.: 10103410

Wireless cycle computer with heart rate monitor

- Exercise times above within or below your targeted heart rate range
- Calories burnt (current/total)

Optional extras

- Cadence function (current/average/maximum)

Additional functions

- Time 12/24h display
- Date
- Power down mode

Delivery scope

Twist Klick handlebar bracket, transmitter, spoke magnet and mounting materials, wrist band (for jogging computer use)

CM 4.1 Blackline

black · Art.-No. 10103302

Button and wireless cycle computer

Cycle functions

- Speed (current/average)
- Trip/total distance
- Programmable total distance
- Auto start/stop

Additional functions

- Time 12/24h display

Delivery scope

Twist Klick handlebar bracket, transmitter, spoke magnet and mounting materials

CM 2.1 Blackline

black · Art.-No. 10103001

Buttonless wired cycle computer

Cycle functions

- Speed (current/average)
- Trip/total distance
- Programmable total distance
- Auto start/stop

Additional functions

- Time 12/24h display

Delivery scope

Twist Klick handlebar bracket and sensor, spoke magnet and mounting materials

CM 309

black · Art.-No. 10102309

Wireless cycle computer

Cycle functions

- Speed (up to 199 km/h) (current/average/maximum)
- Trip/total distance
- Trip/total time
- Speed comparison

Additional function

- Time
- Power-Down-Modus
- Night-Light-Display
- Calories burnt

Delivery scope

Twist Klick handlebar bracket, transmitter, spoke magnet, transmitter belt including elastic strap, mounting materials.

CM 109

black · Art.-No. 10102109

Wired cycle computer

Cycle functions

- Speed (up to 199 km/h) (current/average/maximum)
- Trip/total distance
- Trip/total time
- Speed comparison

Additional function

- Time
- Power-Down-Modus
- Night-Light-Display
- Calories burnt

Delivery scope

Twist Klick handlebar bracket and sensor, spoke magnet and mounting materials

PC-Set-Tool

Manage your device

The PC-Set-Tool provides an easy way to setup your CicloSport device. All settings can be done via a user-friendly software interface, so your device is set-up and ready to use in just a few seconds.

Using the PC-Set-Tool also allows you to store all settings and all data on your PC or Mac. This also includes the daily and total values, like distance, heart rate, altitude etc. (depending on the device).

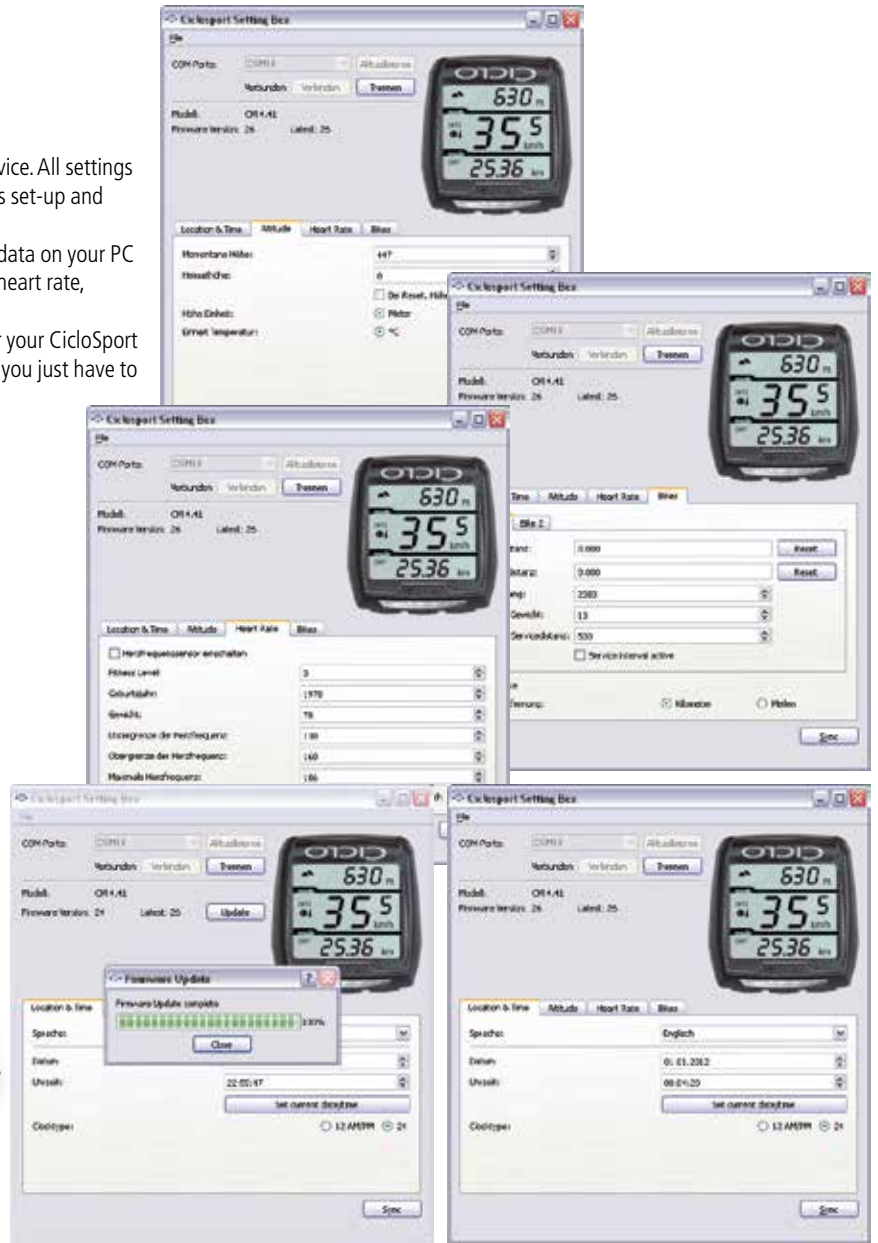

In addition the PC-Set-Tool checks online for firmware updates for your CicloSport device. Whenever there are improvements or added functionality, you just have to click the update button and your device will get the new features.

The PC-Set-Tool is compatible with the following devices of the CicloMaster series:

- CM 2.11
- CM 2.21
- CM 4.11
- CM 4.21, CM 4.21 HR
- CM 4.41 A, CM 4.41 A HR
- CM 9.3 A, CM 9.3 A +

color: black

Article No.: 11204690

Ciclo TestStation

Art.-No. 10105000

Test station for all devices of Ciclo series 4, 8, 9, HAC 4 and CP 13is, CP 16is

You can check the functions speed, cadence and heart rate for all above named devices on two different levels ("slow" and "fast").

Additionally, it is possible to test all heart rate belts with the aid of the two clamps.

Never losing sight of the training success. The CicloSport heart rate monitors incorporate all important functions required for heart rate monitored activities. The CICLOInZone® function (CP 13is, CP 16is) calculates your optimal heart rate training zone. A manually programmed heart rate limit can also be implemented easily. Using the target zone memory, training times within the zones can easily be retraced. The colour coded heart rate bar graph shows information regarding the stress intensity (for CP 13is and CP 16is).

CICLOPULS®

CP 16is

black/champagne · Art.-No.: 10290516

Heart rate monitor with CICLOInZone® Training support

two line display, easy to use, replace batteries by yourself

Heart rate functions

- Heart rate (current/average/maximum)
- Programmable heart rate limits (upper and lower limits)
- Optimal training zone calculation using CICLOInZone®
- Training times below/within/over your heart rate limit
- Acoustic alarm (can be deactivated)
- Visual alarm
- Heart rate display using colour bar graph

Calorie functions

- Burnt calories (current, total)

Additional functions

- Stop watch
- Time (12/24h)
- Date
- Alarm clock
- Night light display
- Alarm that can be activated and deactivated

Delivery scope

Transmitter belt including elastic strap, universal handlebar bracket

HF-Set Textile

Soft and extremely comfortable – a topless feeling.
Enjoy the uniquely new feeling of wearing our textile transmitter belt!

Blue Eye III

- Comfortable, light, small
- kind to the skin
- elastic
- ventilated
- also functions when dry
- Transmitter unit is compatible with other systems e.g. puls function shirts
- elastic parts can be washed

Analog

Art.-No.: 11400125
(suited for e.g. CM 4.xx, CM 4.x, CP 13is, CP 16is)

Blue Eye III

Art.-No.: 11203685
(suited for e.g. CM 8.x, CM 9.x) 

HF-Set BLE

Textile transmitter belt with BLUETOOTH SMART

black · Art.-No.: 11203695

Outstanding Features:

- BLUETOOTH SMART technology
 - Comfortable, light, small
 - Skin friendly
 - Elastic
 - Venti-lated
 - Works even dry
 - Transmitter unit is compatible with other systems e.g. heart rate shirts
 - Washable elastic parts
 - Compatible to all Smartphones with Bluetooth Smart (e.g. iPhone 4s und 5)
- Compatible devices: <http://www.ciclosport.com/ble>
