## **2017 Decorative Wood Product Information Guide**

## ***Carvings are available in North American hardwoods, including:***

**Alder (ALD)** – superior clear FAS grade; typical “rustic” characteristics are defected out (such as heavy mineral, heavy sap, or severe knots); pulled for uniform pink coloration

**Cherry (CH)** – FAS select grade, pulled for maximum red-colored heartwood on the best face

**Maple (MP/HMP)** – New York and Michigan select hard maple; FAS grade 1&2 white

**Oak (OK)** – FAS superior grade select Appalachian red oak; pulled for wheat color

## ***Most carvings are also available in species designed for price-sensitive projects, including:***

**Rubberwood (RW)** – a member of the maple family, this hardwood comes from trees whose sap produces latex (rubber); an environmentally friendly wood due to its secondary use in furniture and carvings; dense tight grain with even coloration ranging from pink to light brown; accepts stain readily to match a wide variety of North American species

**White Birch (WB)** – hardwoods including Asian white birch, Russian (Baltic) birch, and Asian soft maple; pale white in color with finely textured grain makes this species a good staining alternative to hard maple
