Moulding

Product Information Guide

Carvings are available in North American hardwoods, including:

Alder (ALD) – superior clear FAS grade; typical “rustic” characteristics are defected out (such as heavy mineral, heavy sap, or severe knots); pulled for uniform pink coloration

Cherry (CH) – FAS select grade, pulled for maximum red-colored heartwood on the best face

Maple (MP/HMP) – New York and Michigan select hard maple; FAS grade 1&2 white

Oak (OK) – FAS superior grade select Appalachian red oak; pulled for wheat color

Poplar (POP) – Southern FAS natural poplar; a mixture of sap and heartwood; blacks, purples, and greens are acceptable; this is our paint-grade species for linear mouldings

Most carvings are also available in species designed for price-sensitive projects, including:

Rubberwood (RW) – a member of the maple family, this hardwood comes from trees whose sap produces latex (rubber); an environmentally friendly wood due to its secondary use in furniture and carvings; dense tight grain with even coloration ranging from pink to light brown; accepts stain readily to match a wide variety of North American species

White Birch (WB) – hardwoods including Asian white birch, Russian (Baltic) birch, and Asian soft maple; pale white in color with finely textured grain makes this species a good staining alternative to hard maple
