**Subject: Cultural Resources Study, 25550 Clawiter Road Industrial Project, City of Hayward, Alameda County, California**

Dear Ms. Schmidt:

The City of Hayward (City) retained Rincon Consultants, Inc. (Rincon) to conduct a cultural resources study in support of an Initial Study and Mitigated Negative Declaration (IS-MND) for the 25550 Clawiter Road Industrial Project in the city of Hayward, Alameda County, California (Attachment 1: Figure 1). The proposed project on the approximately 19.12-acre project site includes removal of existing slab foundations and development of a new industrial campus with two industrial buildings and two employee patios/amenity areas (Attachment 1: Figure 2). Additional project activities include site landscaping and parking development. This memorandum presents the results of this cultural resources study.

The project is subject to the California Environmental Quality Act (CEQA). All work was completed in compliance with CEQA and applicable local guidelines and requirements. To complete this study, Rincon conducted a cultural resources records search, a search of the Native American Heritage Commission's (NAHC) Sacred Lands File (SLF), and a pedestrian field survey of the project site.

## Methods

### Cultural Resources Records Search

Rincon requested a search of the California Historical Resources Information System (CHRIS) at the Northwest Information Center (NWIC) at Sonoma State University on February 2, 2021. The records search would identify previously recorded cultural resources, as well as previously conducted cultural resource studies within the project site and a half-mile radius. The records search also included a review of the National Register of Historic Places (NRHP), the California Register of Historical Resources (CRHR), the Office of Historic Preservation Historic Properties Directory, the California Built Environment Resources Directory, and the Archaeological Determinations of Eligibility list.

The NWIC records search was completed on March 5, 2021 (Attachment 2), and did not identify any previously recorded cultural resources within the project site. Within the 0.5-mile radius, the records search identified three previously recorded cultural resources (Table 1) and 29 previously conducted cultural resources studies (Table 2).

**Table 1 Previously Recorded Cultural Resources within a 0.5-mile Radius**

Primary Number	Trinomial Number	Description	Eligibility Status	Recorded by and Year	Relationship to Project Site
P-01-002269	CA-ALA-000681H	Eastshore Grant Transmission Line	Recommended ineligible for CRHR	2001 (Cindy Baker, PAR Environmental Services, Inc.)	Outside
P-01-003312		Herman Mohr House	Determined ineligible for NRHP, recommended ineligible for CRHR, and recommended ineligible for Alameda County Register	1974 ([none], Hayward Area Historical Society); 2008 ([none], Carey & Co); 2019 (Laura MacDonald, Michael Baker International)	Outside
P-01-011804		T-Mobile West LLC Transmission Line	Recommended ineligible for NRHP and CRHR	2016 (K.A. Crawford, Crawford Historic Services)	Outside

## Sacred Lands File Search

As part of the process of identifying cultural resources in or near the project site, Rincon contacted the Native American Heritage Commission (NAHC) on February 2, 2021, to request a review of the Sacred Lands File (SLF). The SLF is an inventory of places of cultural or traditional significance to California Native American tribes. The NAHC emailed a response on February 22, 2021, stating that the results of the SLF search were negative for the presence of Native American cultural resources within the project site (Attachment 3).

## Historic-Period Aerial Photograph and Topographic Map Review

The project site is located at 25550 Clawiter Road, adjacent to the Southern Pacific Railroad (SPRR) and surrounded by industrial development. The earliest available USGS topographic map (1899) depicts the project site as undeveloped land within the *Arroyo De La Alameda* land grant, with the SPRR adjacent to the east of the project site. A 1959 USGS topographic map shows the initial development of the area and two large buildings are depicted within the project site (USGS 1959). The SPRR is shown in its current location, east of the project site. Based on historic aerial imagery of the area, the former buildings within the project site were demolished between 1987 and 1993, and another building and associated structures were constructed between 1993 and 2002 (NETRonline 1987, 1993, 2002).

## Field Survey

Rincon Archaeologist Elaine Foster, M.A., RPA (#56605886) conducted a pedestrian field survey of the project site on March 16, 2021. The survey consisted of inspecting areas of exposed ground for prehistoric artifacts (e.g., flaked stone tools, tool-making debris, stone milling tools, ceramics, fire-

affected rock), ecofacts (marine shell and bone), soil discoloration that might indicate the presence of a cultural midden, soil depressions, and features indicative of the former presence of structures or buildings (e.g., standing exterior walls, postholes, foundations) or historic debris (e.g., metal, glass, ceramics).

The project site primarily consisted of concrete paved areas, brick walkways, driveways, the building foundation and other associated foundations (Attachment 1: Figure 3) from buildings that were demolished between 2016 and the date of the survey (NETRonline 2021), and a paved asphalt parking lot on the western edge of the property. Areas where the soil could be examined included landscaped areas within the parking lot (Attachment 1: Figure 4), the property boundary on all sides (Attachment 1: Figure 5), and a large grassy area in the northern portion of the property (Attachment 1: Figure 6). Landscaped areas consisted of trees, shrubs, and sparse gravel. Ground visibility ranged from poor (0-10%) in areas with overgrown landscaping and heavy gravel cover to excellent (80-100%) in areas with low grass coverage, such as the northern portion of the property, and areas that have been exposed by recent construction activities. Observed soils were a fine-grained, brown, chalky loam that have been previously disturbed by the development of the property; building debris and modern refuse were observed during the survey. The railroad depicted in early topographic maps and aerial photographs is still present to the east of the project site (Attachment 1: Figure 7).

The field survey did not identify any cultural resources in the project site.

## Findings and Recommendations

The background research and field survey did not identify any cultural resources in the project site. Site conditions and previous land use indicate that the project site has been extensively disturbed by previous construction and subsequent demolition and does not appear to be sensitive for archaeological cultural resources. The foundational remains of a building were located on site; however, these foundations are less than 45 years old and they are not further considered in this report (NETRonline 1993, 2002).

Rincon recommends a finding of ***no impact to historical or archaeological resources*** under CEQA. However, the potential occurrence of cultural resources cannot be entirely discounted. Therefore, Rincon recommends the following measure in the event of an unanticipated discovery of archaeological resources. The project is also required to adhere to state regulations regarding the discovery of human remains, detailed below.

### Unanticipated Discovery of Archaeological Resources

If archaeological resources are encountered during ground-disturbing activities, work in the immediate area should be halted and an archaeologist meeting the Secretary of the Interior's Professional Qualification Standards for archaeology (National Park Service 1983) should be contacted immediately to evaluate the find. If necessary, the evaluation may require preparation of a treatment plan and archaeological testing for CRHR eligibility. If the discovery proves to be significant under CEQA and cannot be avoided by the project, additional work, such as data recovery excavation, may be warranted to mitigate any significant impacts to historical resources.

## Unanticipated Discovery of Human Remains

The discovery of human remains is always a possibility during ground-disturbing activities. If human remains are found, the State of California Health and Safety Code Section 7050.5 states that no further disturbance shall occur until the County Coroner has made a determination of origin and disposition pursuant to Public Resources Code Section 5097.98. In the event of an unanticipated discovery of human remains, the Alameda County Coroner must be notified immediately. If the human remains are determined to be prehistoric, the Coroner will notify the Native American Heritage Commission, which will determine and notify a Most Likely Descendant (MLD). The MLD shall complete the inspection of the site and provide recommendations for treatment to the landowner within 48 hours of being granted access.

Should you have any questions concerning this study, please do not hesitate to contact any of the undersigned.

Sincerely,

Sacred Lands File Search Results

## NATIVE AMERICAN HERITAGE COMMISSION

February 22, 2021

Elaine Foster, Archaeologist  
Rincon Consultants, Inc.

Via Email to: [efoster@rinconconsultants.com](mailto:efoster@rinconconsultants.com)

**Re: 25550 Clawiter Road Industrial Project, Alameda County**

Dear Ms. Foster:

A record search of the Native American Heritage Commission (NAHC) Sacred Lands File (SLF) was completed for the information you have submitted for the above referenced project. The results were negative. However, the absence of specific site information in the SLF does not indicate the absence of cultural resources in any project area. Other sources of cultural resources should also be contacted for information regarding known and recorded sites.

Attached is a list of Native American tribes who may also have knowledge of cultural resources in the project area. This list should provide a starting place in locating areas of potential adverse impact within the proposed project area. I suggest you contact all of those indicated; if they cannot supply information, they might recommend others with specific knowledge. By contacting all those listed, your organization will be better able to respond to claims of failure to consult with the appropriate tribe. If a response has not been received within two weeks of notification, the Commission requests that you follow-up with a telephone call or email to ensure that the project information has been received.

If you receive notification of change of addresses and phone numbers from tribes, please notify me. With your assistance, we can assure that our lists contain current information.

If you have any questions or need additional information, please contact me at my email address: [Sarah.Fonseca@nahc.ca.gov](mailto:Sarah.Fonseca@nahc.ca.gov).

Sincerely,

Sarah Fonseca  
Cultural Resources Analyst
