Preventive Care and Screenings

Facts about ACA-covered services

At Health Net Health Plan of Oregon, Inc. (Health Net), we believe that staying healthy is just as important as getting well. Our preventive health overview helps you and your doctors determine individual needs for preventive care services based on the best available medical evidence.

What's covered

The services listed in this flyer are a summary of the preventive services and well-child care you and your family are eligible for as Health Net members under the Affordable Care Act (ACA). If you are enrolled in a health plan subject to the ACA, you will not have a deductible or cost-share for preventive services when received from an in-network provider. Some individual and group health plans are not subject to this ACA provision, and you may pay part of the cost for preventive services. Services received from an out-of-network provider may not be covered. Consult your plan documents for complete details about your benefits.

You can find all the details about covered services on the government's website at www.healthcare.gov.

Preventive pharmacy medications

Coverage for preventive pharmacy medications is limited to prescription drugs or over-the-counter medications that are determined to be preventive,

as recommended by the United States Preventive Services Task Force (USPSTF) A and B recommendations and the Health Resources and Services Administration (HRSA) guidelines. Health Net may impose cost-sharing on brand-name drugs only when a generic version is available. Examples of covered medications include:

- Aspirin to prevent cardiovascular disease and also for preeclampsia prevention in pregnant women.
- FDA-approved contraception methods and breast cancer preventive medication for women.
- Tobacco cessation medications.
- Folic acid for women planning and/or capable of pregnancy.
- Iron supplements for children at increased risk for iron-deficiency anemia.
- Oral fluoride supplements for preschool children where the water source does not contain fluoride.

Note: A prescription is needed for these items to be administered under pharmacy benefits.
