

Current research on the biology of threatened plant species of the Mediterranean Basin and Macaronesia: a database

J. M. Iriondo, L. J. De Hond & C. Gómez-Campo

Introduction

One of the most basic tools needed to confront the loss of biodiversity on our planet is information. Once priorities are set for the species where the danger of extinction is most imminent, conservation plannmakers and managers need information on the biology of those species and their habitats in order to adopt appropriate action measures. In many cases, such information already exists dispersed in different institutions. However, it is not always easily available due to the large number of disciplines involved and the diverse character of the institutions concerned with conservation activities.

At the VI OPTIMA Meeting in Delphi (Greece) in 1989, the session of the OPTIMA Commission for the Conservation of Plant Resources agreed that the Commission should be involved in the collection of data on current and past research on the biology of threatened plants of the Mediterranean Basin and Macaronesia. Four years later, at the VII OPTIMA Meeting in Borovetz (Bulgaria), a preliminary draft containing data on 201 species was presented. Further information on these and other species has been added to obtain the present edition.

The main objectives in this project are to:

1. Elaborate a list of threatened plant species of the Mediterranean Basin and Macaronesia subjected to some type of biological study.
2. Provide information on research teams that work with threatened plant species in specific areas of biological study.
3. Facilitate communication among research teams that study threatened plant species belonging to a particular taxonomic group.
4. Provide bibliographical references related to studies on the biology of threatened plant species of the Mediterranean Basin and Macaronesia.
5. Give planners and managers a complete picture on the overall state of the knowledge of a particular threatened plant species.

The information contained in this database covers the period 1805-1994. At the present time it is not yet an exhaustive compilation of all data published during this period. However, it provides biologists, managers and planners an information base so that past efforts are not duplicated, gaps in knowledge can be identified and filled and we can efficiently proceed with the conservation of rare plants in the Mediterranean Basin and Macaronesia.

It is satisfying to see that the relevance of information for biodiversity conservation is now seriously being considered by governments. Thus, Article 6 of the Biodiversity Convention requires ratifying countries to develop an information base for promoting national biodiversity strategies and action plans. Among the up-to-date and reliable data required for the effective implementation of the activities prescribed in the articles of the Convention on Biological Diversity, data on threatened species is considered to be a priority.

Data have been gathered mainly through a questionnaire distributed to institutions that work in this field (Figure 1). The questionnaire asks for information about plant species of the Mediterranean Basin and Macaronesia classified as endangered (E), vulnerable (V) or rare (R) according to IUCN criteria.

The entries in the questionnaire are:

- | | |
|------------------------|--------------------|
| * Name of the species | * Institution |
| * Family | * Postal address |
| * IUCN category | * Area of study |
| * Distribution | * Bibliography |
| * Name of researcher/s | * Current research |

Additionally, information has been gathered from publications obtained through computerized bibliography search at the main international databases. Currently, this database holds information on 281 Mediterranean plant species (including Macaronesia) classified as endangered (E), vulnerable (V) or rare (R) according to IUCN criteria. Indeterminate (I) and insufficiently known (K) categories have been accepted since they are actually referring to the above-mentioned categories of threat. Furthermore, three species extinct (Ex) in their natural habitats have also been included.

A considerable number of questionnaires have been completed with information regarding species threatened in a particular country but not worldwide. In some other cases, information on infraspecific taxa has been submitted. This information has not been included in the present work, but is being stored for future use.

The 281 species belong to a wide taxonomic range (56 different families) (Table 1). The largest-represented family in the draft is Asteraceae, followed by Brassicaceae, Plumbaginaceae, Caryophyllaceae, Apiaceae and Liliaceae. Together they cover 50 % of the species present in this database. Regarding the categories of threat, the rare category (R) has been the most abundant with 103 species (37 % of the total).

Table 1. List of families represented in the database and number of species in each one.

Family	Species	Family	Species
Amaryllidaceae	6	Lamiaceae	8
Apiaceae	14	Lauraceae	1
Aquifoliaceae	1	Lentibulariaceae	2
Araceae	1	Liliaceae	12
Asteraceae	38	Malvaceae	3
Boraginaceae	10	Myricaceae	1
Brassicaceae	31	Myrsinaceae	1
Campanulaceae	3	Oleaceae	1
Caprifoliaceae	1	Papaveraceae	1
Caryophyllaceae	27	Pinaceae	2
Celastraceae	2	Plumbaginaceae	19
Chenopodiaceae	1	Poaceae	1
Cistaceae	4	Polygonaceae	1
Convolvulaceae	4	Primulaceae	3

Family	Species	Family	Species
Crassulaceae	6	Ranunculaceae	6
Cupressaceae	1	Rhamnaceae	2
Cyperaceae	1	Rosaceae	1
Dipsacaceae	1	Rutaceae	2
Ericaceae	2	Salicaceae	1
Euphorbiaceae	7	Sapotaceae	1
Fabaceae	16	Scrophulariaceae	8
Gentianaceae	1	Solanaceae	2
Geraniaceae	6	Terrstroemiaceae	1
Gesneriaceae	3	Thymelaceae	1
Globulariaceae	3	Ulmaceae	1
Guttiferae	3	Urticaceae	1
Iridaceae	2	Valerianaceae	1
Isoetaceae	1	Violaceae	1

This work gathers the research of teams in 52 institutions from 15 different countries. The distribution of the species included shows that so far the collection of data from countries other than Spain has been less intensive. Canary Islands (84 species) and Peninsular Spain (64 species) hold together more than half of the species present in this work (Table 2).

Table 2. Geographical distribution of the species contained in the database. The number of species endemic of each country or area in parenthesis.

Distribution	Species	Distribution	Species
Albania	2 (0)	Irak	1 (0)
Algeria	2 (1)	Iran	1 (0)
Austria	1 (0)	Italy*	18 (11)
Azores	17(15)	Madeira	5 (2)
Balearic Is.	9 (6)	Morocco	2 (1)
Bulgaria	9 (3)	Portugal*	6 (5)
Canary Is.	84 (82)	Romania	4 (0)
Caucasia	2 (0)	Sardinia	6 (0)
Corsica	14 (6)	Sicily	14 (9)
Crete	4 (3)	Spain	64 (61)
Czechoslovakia	1 (0)	Tunisia	1 (0)
France*	4 (1)	Turkey	21 (19)
Greece*	12 (9)	Yugoslavia	8 (2)
Hungary	2 (0)		

*: mainland excluding major islands.

The most frequent areas of study have been propagation methods, germination-dormancy, culture techniques and micropropagation. One must notice that the areas of study section and the index on areas of study only refer to the current activities held by the researchers. In many cases, the bibliography section contains additional information on studies of the species on several other different disciplines of biology. In this bibliography section, only references that deal specifically with the species or give substantial information on some aspect of its biology have been included. It is our aim to improve the content of this database and keep it up to date. You can contribute to this project by filling a copy of the questionnaire shown in Figure 1. Any corrections or updates on current data will be also greatly appreciated. If you are interested in taking a more active role in the collection of data of your country or region, please contact us.

Fig. 1. Questionnaire on current research on the biology of endangered plant species of the Mediterranean Basin and Macaronesia.

Since 1989, the OPTIMA Commission for the Conservation of Plant Resources is involved in the collection of data on what has been done and what's being done in the biology of threatened plants of the Mediterranean basin.

If you work in this area we would very much appreciate you spent a few minutes filling this short questionnaire.

Please use a separate form for each species. Make photocopies of this form if necessary. Please, read the appended notes first.

Species (1): _____

Family: _____ IUCN category (2): _____

Distribution (3): _____

Name of researcher/s: _____

Bibliography (6):

Current research (7):

Fig. 1. Questionnaire on current research on the biology of endangered plant species of the Mediterranean Basin and Macaronesia (Page 2).

Notes:

- (1) Species of interest are those classified as R, V or E (rare, vulnerable or endangered) in a worldwide scale, by IUCN.
- (2) IUCN category.
- (3) Country or countries and/or geographical region.
- (4) Address of the organisation or institution. Please include telephone, telex and fax numbers if applicable.
- (5) Check the area/s most closely related to your investigation.
- (6) Please include published articles as well as those "in press" from your group or other sources. Make reference to the author, year, title, publication, pages.
- (7) Please use a format similar to (6) omitting the name of journal and giving a provisional title and tentative year of publication.

Please send this questionnaire to the following address:

Ciudad Universitaria
E- 28040 Madrid, Spain

IUCN Categories**Extinct (Ex)**

Taxa no longer found in its natural habitat. It includes taxa that, although vanished in its natural habitat, still survive in culture.

Endangered (E)

Taxa in danger of extinction and whose survival is unlikely if the causal factors continue operating. Included are taxa whose numbers have been reduced to a critical level or whose habitats have been so drastically reduced that they are deemed to be in immediate danger of extinction.

Vulnerable (V)

Taxa believed to move into the Endangered category in the near future if the causal factors continue operating. Included are taxa of which most or all the populations are decreasing because of over-exploitation, extensive destruction of habitat or other environmental disturbance; taxa with populations that have been seriously depleted and whose ultimate security is not yet assured; and taxa with populations that are still abundant but are under threat from serious adverse factors throughout their range.

Rare (R)

Taxa with small world populations that are not at present endangered or vulnerable, but are at risk. These taxa are usually localized within restricted geographical areas or habitats or are thinly scattered over a more extensive range.

Indeterminate (I)

Taxa known to be Extinct, Endangered, Vulnerable, or Rare but where there is not enough information to say which of the four categories is appropriate.

Insufficiently known (K)

Taxa that are suspected but not definitely known to belong to any of the above categories, because of the lack of information.

Geographical distribution of species

Geographical distribution of species is given primarily at country level. However, major Mediterranean and Macaronesian Islands or Archipelagos have been given an specific entity. Therefore, names of countries, such as France, Greece, Italy, Portugal or Spain, refer just to the mainland, excluding major islands.

Acknowledgements

We are grateful to all research teams that have kindly provided us with the information for this database. We also appreciate the advice provided by Prof. W. Greuter and Dr. A. Santos.

Androcymbium europaeum* (Lange) K. Richter*LILIACEAE**

Status: V

Distribution: Spain

Researcher: J.Y. Lesouef *et al.*

Institution: Conservatoire Botanique de Brest

Address: 52 Allée du Bot

F-29200 Brest, France

Phone: 33 98 418895

Area of study: * Culture techniques

Researcher: J. Pedrola and J. Caujape

Institution: Est. Inter. Biol. Mediterránea

Address: Jardín Botánico "Marimurtra"

E-17300 Blanes, Girona, Spain

Phone: 34 72 330826

Area of study: * Genetics

Current research:

Spatial distribution, genetic structure and other biological data of a narrow endemism:
Androcymbium europaeum.

Researcher: D. Rivera, M. Moliner, F.A. Tomas-Barberán, I. Paterna, M.J. Nicolás, C. Marín, J.A. Sánchez and M.A. Morte

Institution: Dpto. Biología Vegetal (Botánica)

Facultad de Biología

Universidad de Murcia

Address: 30071 Murcia, Spain

Phone: 34 68 833000 Ext. 2378

Fax: 34 68 835418

Area of study: * Metabolism, enzymes

* Germination, dormancy

* Flowering, fruit development, pollination

* Dispersal

* Propagation methods

* Micropropagation

* Culture techniques

* Phenology

* Demography, population dynamics

* Ecology

Zelkova sicula* Di Pasquale, Garfi & Quézel*ULMACEAE**

Status: E
Distribution: Sicily

Researcher: G. Garfi and G. Di Pasquale
Institution: Dipartimento di Scienze Botaniche
Address: Via Archirafi 38
I-90123 Palermo, Italy
Phone: 39 91 6161493

Area of study:
* Autecology
* Demography
* Genetics
* Pedoantracology
* Conservation

Bibliography:

Di Pasquale, G., Garfi, G. and Quézel, P. (1992) Sur la présence d'un *Zelkova* nouveau en Sicile sud-orientale (Ulmaceae). *Biocosme Mésogén*, 8(4)-9(1):401-409.

Di Pasquale, G. and Garfi, G. (1993) *Zelkova sicula* Di Pasquale, Garfi et Quézel, unique représentante du genre dans l'attuale flora italiana. *Giorn. Bot. Ital.* 127(3):649.

INDEX OF GENERA AND SPECIES

- Abies nebrodensis* (Lojac.) Mattei
Abies pinsapo Boiss.
Acanthorhinum rivas-martinezii (Schez.-Mata) Fdez.-Casas & Schez.-Mata
Achillea taygetea Boiss. & Heldr.
Adonis cylindrica Boiss., Heldr. & Orph in Boiss.
Aeonium gomeraense (Praeger) Praeger
Aichryson pachycaulon Bolle
Aichryson palmense Webb ex Bolle
Aichryson porphyrogennetos Bolle
Allium pyrenaicum Costa y Vayreda
Ammi huntii H.C. Watson
Anagyris latifolia Brouss. ex Willd.
Anchusa crispa Viv.
Androcymbium europaeum (Lange) K. Richter
Androcymbium rechingeri Greuter
Antirrhinum charidemi Lange
Antirrhinum microphyllum Roth.
Antirrhinum pertegasii Rothm.
Apium bermejoi Llorens
Aquilegia bertolonii Schott
Aquilegia cazorlensis Heywood
Aquilegia champagnatii Moraldo, Nardi et La Valva
Aquilegia litardierei Briq.
Arbutus canariensis Veillard ex Duhamel
Arenaria rigida Bieb.
Argyranthemum hierrense Humphries
Armeria soleirolii (Duby) Godron
Artemisia granatensis Boiss.
Artemisia pancicii (Janka) Ronn.
Asphodelus bento-rainhae P. Silva
Asphodelus gracilis Br.- Bl. & Maire
Asphodelus roseus Humbert & Maire
Astragalus centralpinus Braun Blanquet
Astragalus dasyanthus Pall.
Astragalus wilmottianus Stoj.
Atractylis arbuscula Svent. & Mich.
Atractylis preauxiana Schultz Bip.
Atropa baetica Willk.
Azorina vidalii (H.C. Watson) Feer
Barbarea sicula Presl
Bassia saxicola (Guss.) A.J. Schott
Bellis azorica Hochst. ex Seub.
Bencomia exstipulata Svent.
Biscutella fontqueri Guinea & Heywood
Biscutella rotgesii Foucaud
Brassica insularis Moris
Bupleurum elatum Guss.
Campanula poscharskyana Degen
Capsella thracica Velen.

- Carduncellus dianius* Webb
Carduus thracicus (Velen.) Hayek
Carex calderae A. Hansen
Centaurea balearica Rodr.
Centaurea carratracensis Lange
Centaurea hermannii F. Hermann
Centaurea lainzii Fdez. Casas
Centaurea rothmalerana (Arènes) Dostal
Centaurium rigualii Esteve
Centranthus trinervis (Viv.) Béguinot
Chaerophyllum azoricum Trelease
Cistus osbeckiifolius Webb ex Christ.
Cistus palhinhae Ingram
Coincyia rupestris Rouy
Colchicum chalcedonicum Azn.
Colchicum corsicum Baker
Colchicum turcicum Janka
Convolvulus canariensis L.
Convolvulus caput-medusae Lowe
Convolvulus lopez-socasii Svent.
Coronopus navasii Pau
Crambe arborea Webb ex Christ.
Crambe scaberrima Webb ex Bramwell
Crepis canariensis (Sch. Bip.) Babč.
Crocus etruscus Parl.
Cupressus dupreziana A. Camus
Cytisus aeolicus Guss.
Cytisus moleroi Fdez. Casas
Daboecia azorica Tutin & E.F. Warb.
Daphne rodiguezii Teixidor
Delphinium pictum Willd.
Descurainia gilva Svent.
Dianthus diutinus Kit.
Dianthus nardiformis Janka
Diplotaxis siettiana Maire
Dorycnium broussonetii (Choisy.) Webb & Berth.
Dracunculus canariensis Kunth.
Echium acanthocarpum Svent.
Echium auberianum Webb & Berth.
Echium handiense Svent.
Echium hierrense Webb ex Bolle
Echium leucophaeum Webb ex Spr. & Hutch.
Echium pininana Webb & Berth.
Erodium cazorlanum Heywood
Erodium paularense Fdez. Glez. & Izco
Erodium rupicola Boiss.
Erugastrum palustre (Perona) Vis.
Euonymus latifolius Miller
Euphorbia azorica Seub.
Euphorbia gaditana Cosson
Euphorbia handiensis Burchd.

- Euphorbia lambii* Svent.
Euphorbia maresii Knoche
Euphorbia mellifera Aiton
Euphorbia stygiana H.C. Watson
Euzomodendron bourgaeanum Cosson
Festuca arenicola (Prod.) Soó
Fritillaria conica Boiss.
Genista benehoavensis (Bolle ex Svent.) M. del Arco
Genista cilentina Valsecchi
Geranium cazorlense Heywood
Geranium dolomiticum Roth.
Geranium rubescens Yeo
Gesnouinia arborea (L.f.) Gaudich
Globularia ascanii Bramwell & Kunkel
Globularia neapolitana O. Schwarz
Globularia sarcophylla Svent.
Gonospermum gomerae Bolle
Gypsophila papillosa Porta
Haplophyllum patavinum (L.) G. Don fil.
Heberdenia excelsa (Aiton) Banks ex DC.
Helianthemum juliae Wildpret
Helianthemum polygonoides Pein., Mtez.-Parras, Alc. & Esp.
Helichrysum monogynum Burtt & Sunding
Hieracium valentinum Arv.-Touvet et Rev.
Hippocratea valentina Boiss.
Hypericum athoum Boiss. & Orph.
Hypericum delphinum Boiss. & Heldr.
Hypericum kelleri Baldacci
Hypochoeris oligocephala (Svent. & Bramw.) Lack
Iberis fontqueri Pau
Iberis grosii Pau
Ilex perado Aiton
Ipomoea imperati (Vahl) Griseb.
Iris pamphylica Hedge
Isatis amani Davis
Isatis arenaria Azn.
Isatis aucheri Boiss.
Isatis bitlisica Davis
Isatis callifera Boiss. et Bal.
Isatis candolleana Boiss.
Isatis cappadocica Desv.
Isatis constricta Davis
Isatis ermenekensis Yildirimli
Isatis frigida Boiss. et Kotschy
Isatis huber-morathii Davis
Isatis kozlowskyi Grossh
Isatis lockmanniana Kotschy et Boiss.
Isatis pinnatiloba Davis
Isatis spatella Davis
Isatis undulata Aucher ex Boiss.
Isoetes malinverniana Ces. et De Not.

- Isoplexis chalcantha* Svent. & O'Shan.
Isoplexis sceptrum (L.f.) Loudon
Jankaea heldreichii (Boiss.) Boiss.
Lactuca watsoniana Trelease
Lavatera acerifolia Cav.
Lavatera oblongifolia Boiss.
Lavatera phoenicea Vent.
Leucanthemum arundanum (Boiss.) Cuatrec.
Leucanthemum gracilicaule (Dufour) Alavi & Heywood
Leucojum nicaeense Ard.
Ligusticum corsicum Gay
Limonium arborescens (Brouss.) O. Kuntze
Limonium carthaginense (Rouy) C.E. Hubb. & Sandw.
Limonium castellonense Erben
Limonium cavanillesii Erben
Limonium dendroides Svent.
Limonium duforei (Girard) O. Kuntze
Limonium estevei Fdez. Casas
Limonium fruticans (Webb) O. Kuntze
Limonium gibertii (Sennen) Sennen
Limonium imbricatum (Webb & Berthel.) Hubbard
Limonium malacitanum B. Díez Garretas
Limonium optimae Raimondo
Limonium parvibracteatum Pignatti
Limonium preauxii (Webb & Berth.) O. Kuntze
Limonium redivivum (Svent) Kunkel & Sund.
Limonium rumicifolium (Svent) Kunkel & Sund.
Limonium spectabile (Svent.) Kunkel & Sund.
Limonium todaroanum Raimondo & Pign.
Linaria tursica Valdés & Cabezudo
Lithodora nitida (Ern.) R. Fernandes
Lithodora oleifolia (Lapeyr.) Griseb.
Lithodora rosmarinifolia (Ten.) Johnston
Lotus azoricus P.W. Ball
Lotus berthelotii Masferrer
Lotus campylocladus Webb & Berth.
Lotus kunkelii (Esteve) Bramwell & Davis
Lotus maculatus Breitf.
Lugoa revoluta DC.
Lysimachia minoricensis Rodr.
Maytenus canariensis (Loes.) Kunkel & Sunding
Medicago strasseri Greuter, Matthäs & Risse
Melanoselinum decipiens (Schrader & Wendl.) Hoffmann
Myrica rivasmartinezii A. Santos
Nananthea perpusilla (Loisel.) DC.
Narcissus bugei (Fdez. Casas) Fdez. Casas
Narcissus longispathus Pugsley
Narcissus nevadensis Pugsley
Narcissus tortifolius Fdez. Casas
Naufragia balearica Const. & Cannon
Nepeta teydea Webb & Berth.

- Ocotea foetens* (Aiton) Benth. & Hook. f.
Papaver rupifragum Boiss. & Reuter
Pericallis hadrosoma (Svent.) B. Nord.
Pericallis hansenii (Kunkel) Sund.
Petagnaea gussonei (Spreng.) Rauschert
Petrocoptis crassifolia Rouy
Petrocoptis grandiflora Rothm.
Petrocoptis guarensis Fernández Casas
Petrocoptis hispanica (Willk.) Pau
Petrocoptis montserratii Fernández Casas
Petrocoptis montsicciana O. Bolós & Rivas-Martínez
Petrocoptis pardoii Pau
Petrocoptis pseudoviscosa Fernández Casas
Petrocoptis viscosa Rothm.
Picconia azorica (Tutin) Knobl.
Pimpinella anagodendron Bolle
Pimpinella bicknellii Briq.
Pinguicula nevadensis (Lindb.) Casper
Pinguicula vallisneriifolia Webb
Primula allionii Loisel.
Primula palinuri Petagna
Pulicaria canariensis Bolle
Ramonda nathaliae Panc. & Petrov
Ramonda serbica Panc.
Rhamnus glandulosa Aiton
Rhamnus lojaconoi Raimondo
Rosmarinus tomentosus Huber-Morat & Maire
Rouya polygama (Desf.) Coincy
Rumex azoricus Rech. fil.
Ruta pinnata L.f.
Rutheopsis herbanica (Bolle) Hans. & Kunk.
Salix tarracensis Pau
Salvia blancoana Webb & Heldr.
Sambucus palmensis Link in Buch.
Santolina ligustica Arrigoni
Santolina neapolitana Jordan et Fourr.
Satureja innota (Pau) G. López
Scabiosa nitens Roemer & Schultes
Scilla hughii Tineo
Sedum multiceps Coss. & Durien
Sedum pruinatum Link ex Brot.
Senecio hermosae Pitard
Senecio malvifolius (L'Herit.) DC.
Senecio palmensis (Chr. Sm. ex Ness) Link. apud Buch.
Seseli farrenyi Molero & Pujadas
Sideritis argosphaela (Webb & Berthel.) Clos.
Sideritis marmorea Bolle
Sideritis sventenii (Kunk.) Mend. Heuer
Sideroxylon marmulano Banks ex Lowe
Silene adscendens Lag.
Silene cambessedesii Boiss. & Reuter

Silene diclinis (Lag.) Laínz
Silene elegans Link ex Brot.
Silene goulimyi Turril
Silene hifacensis Rouy ex Willk.
Silene macrorhiza Gay & Durieu ex Lacaita
Silene nocteolens Webb & Berthel.
Silene pindicola Hausskn.
Silene schwarzengereri Halacsy
Silene senneni Pau
Silene stockenii Chater
Silene velutina Pourret ex Loisel.
Solanum lidi Sunding
Spergularia azorica (Kindb.) Lebel
Stemmacantha cynaroides (Chr. Sm.) Dittrich.
Sternbergia candida B. Mathew & Baytop
Sventenia bupleuroides Font Quer
Tanacetum ferulaceum (Webb) Sch. Bip.
Tanacetum oshanahanii Marrero, Febles & Suárez
Tanacetum ptarmiciflorum (Webb) Sch. Bip.
Thymus richardii Pers.
Tinguarra cervariaefolia Parl.
Tolpis azorica (Nutt.) Pinto da Silva
Trachelium asperulooides Boiss. & Orph.
Tulipa goulimyi Sealy & Turrill
Verbascum litigiosum G. Samp.
Viola cheiranthifolia H. B. & K.
Visnea mocanera L. f.
Zelkova sicula Di Pasquale, Garfi & Quézel

INDEX OF FAMILIES

AMARYLLIDACEAE

- Leucojum nicaeense* Ard.
Narcissus bugei (Fdez. Casas) Fdez. Casas
Narcissus longispathus Pugsley
Narcissus nevadensis Pugsley
Narcissus tortifolius Fdez. Casas
Sternbergia candida B. Mathew & Baytop

APIACEAE

- Ammi huntii* H.C. Watson
Apium bermejoi Llorens
Bupleurum elatum Guss.
Chaerophyllum azoricum Trelease
Ligusticum corsicum Gay
Melanoselinum decipiens (Schrader & Wendl.) Hoffmann
Naufraga balearica Const. & Cannon
Petagnaea gussonei (Spreng.) Rauschert
Pimpinella anagodendron Bolle
Pimpinella bicknellii Briq.
Rouya polygama (Desf.) Coincy
Rutheopsis herbanica (Bolle) Hans. & Kunk.
Seseli farrenyi Molero & Pujadas
Tinguarra cervariaefolia Parl.

AQUIFOLIACEAE

- Ilex perado* Aiton

ARACEAE

- Dracunculus canariensis* Kunth.

ASTERACEAE

- Achillea taygetea* Boiss. & Heldr.
Argyranthemum hierrense Humphries
Artemisia granatensis Boiss.
Artemisia pancicii (Janka) Ronn.
Atractylis arbuscula Svent. & Mich.
Atractylis preauxiana Schultz Bip.
Bellis azorica Hochst. ex Seub.
Carduncellus dianius Webb
Carduus thracicus (Velen.) Hayek
Centaurea balearica Rodr.
Centaurea carrratracensis Lange
Centaurea hermannii F. Hermann
Centaurea lainzii Fdez. Casas

- Centaurea rothmalerana* (Arènes) Dostal
Crepis canariensis (Sch. Bip.) Babc.
Gonospermum gomerae Bolle
Helichrysum monogynum Burtt & Sunding
Hieracium valentinum Arv.-Touvet et Rev.
Hypochoeris oligocephala (Svent. & Bramw.) Lack
Lactuca watsoniana Trelease
Leucanthemum arundinatum (Boiss.) Cuatrec.
Leucanthemum gracilicaule (Dufour) Alavi & Heywood
Lugoa revoluta DC.
Nananthea perpusilla (Loisel.) DC.
Pericallis hadrosoma (Svent.) B. Nord.
Pericallis hansenii (Kunkel) Sund.
Pulicaria canariensis Bolle
Santolina ligustica Arrigoni
Santolina neapolitana Jordan et Fourr.
Senecio hermosae Pitard
Senecio malvifolius (L'Herit.) DC.
Senecio palmensis (Chr. Sm. ex Ness) Link. apud Buch.
Stemmacantha cynaroides (Chr. Sm.) Dittrich.
Sventenia bupleuroides Font Quer
Tanacetum ferulaceum (Webb) Sch. Bip.
Tanacetum oshanahanii Marrero, Febles & Suárez
Tanacetum ptarmiciflorum (Webb) Sch. Bip.
Tolpis azorica (Nutt.) Pinto da Silva

BORAGINACEAE

- Anchusa crispa* Viv.
Echium acanthocarpum Svent.
Echium auberianum Webb & Berth.
Echium handiense Svent.
Echium hierrense Webb ex Bolle
Echium leucophaeum Webb ex Spr. & Hutch.
Echium pininana Webb & Berth.
Lithodora nitida (Ern.) R. Fernandes
Lithodora oleifolia (Lapeyr.) Griseb.
Lithodora rosmarinifolia (Ten.) Johnston

BRASSICACEAE

- Barbarea sicula* Presl
Biscutella fontqueri Guinea & Heywood
Biscutella rotgesii Foucaud
Brassica insularis Moris
Capsella thracica Velen.
Coincya rupestris Rouy
Coronopus navasii Pau
Crambe arborea Webb ex Christ.
Crambe scaberrima Webb ex Bramwell
Descurainia gilva Svent.

- Diplotaxis siettiana* Maire
Erucastrum palustre (Pirona) Vis.
Euzomodendron bourgaeanum Cosson
Iberis fontqueri Pau
Iberis grosii Pau
Isatis amani Davis
Isatis arenaria Azn.
Isatis aucheri Boiss.
Isatis bitilisica Davis
Isatis callifera Boiss. et Bal.
Isatis candolleana Boiss.
Isatis cappadocica Desv.
Isatis constricta Davis
Isatis ermenekensis Yildirimli
Isatis frigida Boiss. et Kotschy
Isatis huber-morathii Davis
Isatis kozlowskyi Grossh
Isatis lockmanniana Kotschy et Boiss.
Isatis pinnatiflora Davis
Isatis spatella Davis
Isatis undulata Aucher ex Boiss.

CAMPANULACEAE

- Azorina vidalii* (H.C. Watson) Feer
Campanula poscharskyana Degen
Trachelium asperuloides Boiss. & Orph.

CAPRIFOLIACEAE

- Sambucus palmensis* Link in Buch.

CARYOPHYLLACEAE

- Arenaria rigida* Bieb.
Dianthus diutinus Kit.
Dianthus nardiformis Janka
Gypsophila papillosa Porta
Petrocoptis crassifolia Rouy
Petrocoptis grandiflora Rothm.
Petrocoptis guarensis Fernández Casas
Petrocoptis hispanica (Willk.) Pau
Petrocoptis montserratii Fernández Casas
Petrocoptis montsicciana O. Bolós & Rivas-Martínez
Petrocoptis pardoi Pau
Petrocoptis pseudoviscosa Fernández Casas
Petrocoptis viscosa Rothm.
Silene adscendens Lag.
Silene cambessedesii Boiss. & Reuter
Silene diclinis (Lag.) Laínz
Silene elegans Link ex Brot.

- Silene goulimyi* Turril
Silene hifacensis Rouy ex Willk.
Silene macrorhiza Gay & Durieu ex Lacaita
Silene nocteolens Webb & Berthel.
Silene pindicola Hausskn.
Silene schwarzenbergeri Halacsy
Silene senneni Pau
Silene stockenii Chater
Silene velutina Pourret ex Loisel.
Spergularia azorica (Kindb.) Lebel

CELASTRACEAE

- Euonymus latifolius* Miller
Maytenus canariensis (Loes.) Kunkel & Sunding

CHENOPodiaceae

- Bassia saxicola* (Guss.) A.J. Schott

CISTACEAE

- Cistus osbeckiifolius* Webb ex Christ.
Cistus palhinhae Ingram
Helianthemum juliae Wildpret
Helianthemum polygonoides Pein., Mtez.-Parras, Alc. & Esp.

CONVOLVULACEAE

- Convolvulus canariensis* L.
Convolvulus caput-medusae Lowe
Convolvulus lopez-socasii Svent.
Ipomoea imperati (Vahl) Griseb.

CRASSULACEAE

- Aeonium gomeraense* (Praeger) Praeger
Aichryson pachycaulon Bolle
Aichryson palmense Webb ex Bolle
Aichryson porphyrogennetos Bolle
Sedum multiceps Coss. & Durien
Sedum pruinatum Link ex Brot.

CUPRESSACEAE

- Cupressus dupreziana* A. Camus

CYPERACEAE

- Carex calderae* A. Hansen

DIPSACACEAE

Scabiosa nitens Roemer & Schultes

ERICACEAE

Arbutus canariensis Veillard ex Duhamel
Daboecia azorica Tutin & E.F. Warb.

EUPHORBIACEAE

Euphorbia azorica Seub.
Euphorbia gaditana Cosson
Euphorbia handiensis Burchd.
Euphorbia lambii Svent.
Euphorbia maresii Knoche
Euphorbia mellifera Aiton
Euphorbia stygiana H.C. Watson

FABACEAE

Anagyris latifolia Brouss. ex Willd.
Astragalus centralpinus Braun Blanquet
Astragalus dasyanthus Pall.
Astragalus wilmottianus Stoj.
Cytisus aeolicus Guss.
Cytisus moleroi Fdez. Casas
Dorycnium broussonetii (Choisy.) Webb & Berth.
Genista benehoavensis (Bolle ex Svent.) M. del Arco
Genista cilentina Valsecchi
Hippocrepis valentina Boiss.
Lotus azoricus P.W. Ball
Lotus berthelotii Masferrer
Lotus campylocladus Webb & Berth.
Lotus kunkelii (Esteve) Bramwell & Davis
Lotus maculatus Breitf.
Medicago strasseri Greuter, Matthäs & Risse

GENTIANACEAE

Centaurium rigualii Esteve

GERANIACEAE

Erodium cazorlanum Heywood
Erodium paularense Fdez. Glez. & Izco
Erodium rupicola Boiss.
Geranium cazorlense Heywood
Geranium dolomiticum Roth.
Geranium rubescens Yeo

GESNERIACEAE

Jankaea heldreichii (Boiss.) Boiss.
Ramonda nathaliae Panc. & Petrov
Ramonda serbica Panc.

GLOBULARIACEAE

Globularia ascanii Bramwell & Kunkel
Globularia neapolitana O. Schwarz
Globularia sarcophylla Svent.

GUTTIFERAE

Hypericum athoum Boiss. & Orph.
Hypericum delphinum Boiss. & Heldr.
Hypericum kelleri Baldacci

IRIDACEAE

Crocus etruscus Parl.
Iris pamphylica Hedge

ISOETACEAE

Isoetes malinverniana Ces. et De Not.

LAMIACEAE

Nepeta teydea Webb & Berth.
Rosmarinus tomentosus Huber-Morat & Maire
Salvia blancoana Webb & Heldr.
Satureja innota (Pau) G. López
Sideritis argosphaecela (Webb & Berthel.) Clos.
Sideritis marmorea Bolle
Sideritis sventenii (Kunk.) Mend. Heuer
Thymus richardii Pers.

LAURACEAE

Ocotea foetens (Aiton) Benth. & Hook. f.

LENTIBULARIACEAE

Pinguicula nevadensis (Lindb.) Casper
Pinguicula vallisneriifolia Webb

LILIACEAE

Allium pyrenaicum Costa y Vayreda
Androcymbium europaeum (Lange) K. Richter

- Androcymbium rechingeri* Greuter
Asphodelus bento-rainhae P. Silva
Asphodelus gracilis Br.- Bl. & Maire
Asphodelus roseus Humbert & Maire
Colchicum chalcedonicum Azn.
Colchicum corsicum Baker
Colchicum turcicum Janka
Fritillaria conica Boiss.
Scilla hughii Tineo
Tulipa goulmyi Sealy & Turrill

MALVACEAE

- Lavatera acerifolia* Cav.
Lavatera oblongifolia Boiss.
Lavatera phoenicea Vent.

MYRICACEAE

- Myrica rivasmartinezii* A. Santos

MYRSINACEAE

- Heberdenia excelsa* (Aiton) Banks ex DC.

OLEACEAE

- Picconia azorica* (Tutin) Knobl.

PAPAVERACEAE

- Papaver rupifragum* Boiss. & Reuter

PINACEAE

- Abies nebrodensis* (Lojac.) Mattei
Abies pinsapo Boiss.

PLUMBAGINACEAE

- Armeria soleirolii* (Duby) Godron
Limonium arborescens (Brouss.) O. Kuntze
Limonium carthaginense (Rouy) C.E. Hubb. & Sandw.
Limonium castellonense Erben
Limonium cavanillesii Erben
Limonium dendroides Svent.
Limonium duforei (Girard) O. Kuntze
Limonium estevei Fdez. Casas
Limonium fruticans (Webb) O. Kuntze
Limonium gibertii (Sennen) Sennen
Limonium imbricatum (Webb & Berthel.) Hubbard

- Limonium malacitanum* B. Díez Garretas
Limonium optimae Raimondo
Limonium parvibracteatum Pignatti
Limonium preauxii (Webb & Berth.) O. Kuntze
Limonium redivivum (Svent.) Kunkel & Sund.
Limonium rumicifolium (Svent.) Kunkel & Sund.
Limonium spectabile (Svent.) Kunkel & Sund.
Limonium todaroanum Raimondo & Pign.

POACEAE

- Festuca arenicola* (Prod.) Soó

POLIGONACEAE

- Rumex azoricus* Rech. fil.

PRIMULACEAE

- Lysimachia minoricensis* Rodr.
Primula allionii Loisel.
Primula palinuri Petagna

RANUNCULACEAE

- Adonis cyllenea* Boiss., Heldr. & Orph in Boiss.
Aquilegia bertolonii Schott
Aquilegia cazorlensis Heywood
Aquilegia champagnatii Moraldo, Nardi et La Valva
Aquilegia litardierei Briq.
Delphinium pictum Willd.

RHAMNACEAE

- Rhamnus glandulosa* Aiton
Rhamnus lojaconoi Raimondo

ROSACEAE

- Bencomia exstipulata* Svent.

RUTACEAE

- Haplophyllum patavinum* (L.) G. Don fil.
Ruta pinnata L.f.

SALICACEAE

- Salix tarragonensis* Pau

SAPOTACEAE

Sideroxylon marmulano Banks ex Lowe

SCROPHULARIACEAE

Acanthorrhinum rivas-martinezii (Schez.-Mata) Fdez.-Casas & Schez.-Mata

Antirrhinum charidemi Lange

Antirrhinum microphyllum Roth.

Antirrhinum pertegasi Rothm.

Isoplexis chalcantha Svent. & O'Shan.

Isoplexis sceptrum (L.f.) Loudon

Linaria tursica Valdés & Cabezudo

Verbascum litigiosum G. Samp.

SOLANACEAE

Atropa baetica Willk.

Solanum lidi Sunding

TERNSTROEMIACEAE

Visnea mocanera L. f.

THYMELACEACEAE

Daphne rodriguezii Teixidor

ULMACEAE

Zelkova sicula Di Pasquale, Garfi & Quézel

URTICACEAE

Gesnouinia arborea (L.f.) Gaudich

VALERIANACEAE

Centranthus trinervis (Viv.) Béguinot

VIOLACEAE

Viola cheiranthifolia H. B. & K.

INDEX OF IUCN CATEGORIES

(Ex) EXTINCT

Diplotaxis siettiana Maire
Ipomoea imperati (Vahl) Griseb.

Lithodora nitida (Ern.) R. Fernandes
Lithodora oleifolia (Lapeyr.) Griseb.
Medicago strasseri Greuter, Matthäs & Risso
Papaver rupifragum Boiss. & Reuter
Pericallis hansenii (Kunkel) Sund.
Petrocoptis crassifolia Rouy
Petrocoptis grandiflora Rothm.
Petrocoptis guarensis Fernández Casas
Petrocoptis hispanica (Willk.) Pau
Petrocoptis montserratii Fernández Casas
Petrocoptis montsicciana O. Bolós & Rivas-Martínez
Petrocoptis pardoi Pau
Petrocoptis pseudoviscosa Fernández Casas
Petrocoptis viscosa Rothm.
Sambucus palmensis Link in Buch.
Sedum pruinatum Link ex Brot.
Silene adscendens Lag.
Silene cambessedesii Boiss. & Reuter
Silene diclinis (Lag.) Laínz
Silene goulimyi Turril
Silene pindicola Hausskn.
Silene schwarzengeri Halacsy
Silene stockenii Chater

TAXONOMY

Crocus etruscus Parl.
Cytisus aeolicus Guss.
Genista cilentina Valsecchi
Ipomoea imperati (Vahl) Griseb.
Lithodora rosmarinifolia (Ten.) Johnston
