

**Fragrant Carpet Mix–**  
*Agastache aurantiaca*

Annual  
Full sun; moist, well-drained soil. Plants reach 12–18 inches and spread 10–12 inches.

- Attracts bees, butterflies and hummingbirds!
- Aromatic flowers bloom in a variety of colors ranging from lilac to tangerine

**Euphorbia Glitz White-**  
*Euphorbia graminea*

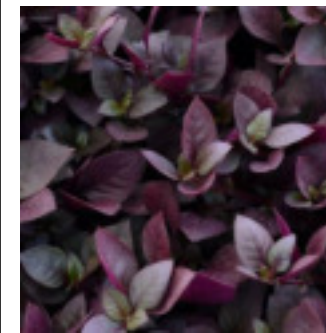

Annual  
Plant height: 15-24”  
Plant width: 15-20”

- Low maintenance
- Heat and drought tolerant
- Rebounds quickly from adverse weather - perfect for the landscape!

**Purple Prince Alternanthera –**  
*Alternanthera brasiliana*

Annual  
Full sun to partial shade; dry or moist, well-drained soil. Plants reach 10–16 inches and spread 18–20 inches.

- Great for beds, containers, ground cover.
- Heat and drought resistant
- Start indoors and set outdoors when night temperatures get above 60°

**Double Harmony Anemone Mix–**  
*Anemone coronaria*

Perennial  
Partial shade; moist, well-drained soil. Plants reach 12 inches and spread 8 inches with 3–3.5 inch blooms.

- This mix of 5 colors is excellent for containers and cutting
- Flowers in early spring and again in early fall

**Liberty Classic Mix–**  
*Antirrhinum majus*

Annual

Full sun; moist, well-drained soil  
Plants reach 18–22 inches, and  
spread 12–14 inches.

- Great for beds and larger pots
- Colorful snapdragons attract bees

**Montego Formula Mix–**  
*Antirrhinum majus*

Annual

Full sun; moist, well-drained  
soil. Plants reach 6–8 inches,  
and spread 6–8 inches.

- Ideal for production in packs and small pots.
- Bright multi-flowering blooms

**Ballerina Red Thrift–**  
*Armeria pseudarmeria*

Perennial

Full sun to partial shade; moist,  
well-drained soil. Plants reach 12–  
14 inches and spread 12–16 inches.

- Drought and heat tolerant, great for borders and rockery
- Deadhead for repeat blooming throughout the summer
- Evergreen foliage

**Showstar–**  
*Astilbe arendsii*

Perennial

Full sun to partial shade; moist,  
well-drained soil. Plants reach  
14 inches.

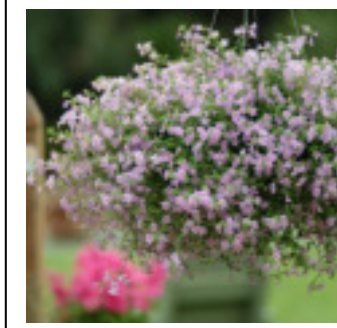

- Dense upright plumes.
- Perfect for pot production
- High fertilization required

### **Blutopia Bacopa-**

*Sutera cordata*

Annual

Full sun to shade; moist, well-drained soil. Plants reach 4–6 inches and spread 12–18 inches.

- Great for hanging baskets and containers
- Blooms profusely in spring and fall, and intermittently in summer

### **Tomato – Chocolate Cherry**

- Harvest 70 days from setting out transplants.
- Indeterminate.
- One inch fruits, appearing in clusters of 8 all over this compact vining plant, they ripen delectably from green to lavender to richest mahogany!
- The plant reaches 5 to 6 feet high and about 3 feet wide, sometimes continuing to grow and set new fruit into autumn.
- It could work for a large container.

### **Begonia Ambassador Mix -**

*Begonia semperflorens*

Annual

Partial shade; moist, well-drained soil. Plants reach 12 inches, spread 10–12 inches.

- Consistent and uniform growing and flowering
- Heat, humidity and drought tolerant

### **Million Suns- (Sanvitalia)**

*Sanvitalia speciosa*

Annual

Full sun or partial shade; heat tolerant and prefers well-drained, sandy soil. Space plants 5-6 inches apart.

- Blooms all summer long
- Attracts bees
- Suitable for containers, baskets

### **Cerastium Silver Carpet-**

*Cerastium tomentosum*

Perennial

Full sun; dry, sandy, well-drained soil. Plants reach 6–12 inches and spread 6–18 inches.

- Neat mat-forming groundcover
- Tolerates drought and shallow, rocky soil
- Will self-seed if spent blooms are not removed

### **Luna Red- (Hibiscus)**

*H. moscheutos*

Perennial

Full sun; plants reach 2-3 feet, spread 2 feet. Does well in clay or other mineral-rich soil.

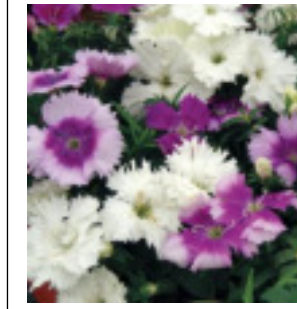

- Drought tolerant
- Need lots of light to flower
- Suitable for containers

### **Diana Lavendina (Dianthus) -**

*Dianthus chinensis*

Biennial

Full sun; moist, well-drained soil. Plants reach 10–12 inches and spread 6–8 inches.

- Extra large, ruffled, spicy-scented blooms
- Blooms reliably in spring and fall, continuing through summer in cooler climates

### **Sparkler Mix Spider Flower -**

*Cleome hassleriana*

Annual

Full sun; moist, well-drained soil. Plants reach 3 ft. 6 in – 4 ft. and spread 12 in. with 4-6 in. blooms.

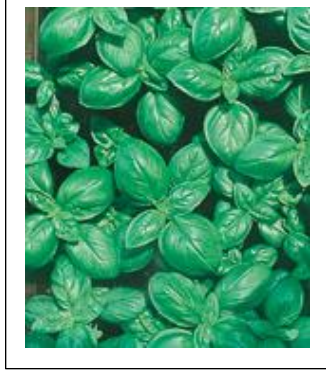

- Easy to care for
- Heat and drought tolerant
- Attracts butterflies

### **Martina Genovese Basil-**

*O. basilicum*

Annual

2 inch dark green leaves; transplant seedlings 12 inches apart. Pinch off flowers to prolong leaf harvesting period.

- Fragrant
- Popular herb for flavoring

### **Thai Basil-**

*O. basilicum* var. *thyrsoiflora*

Annual

2 inch dark green leaves; transplant seedlings 12 inches apart. Pinch off flowers to prolong leaf harvesting period.

- Fragrant
- Popular herb for flavoring

### **Giant Exhibition Complete Mix (Coleus) -**

*Solenostemon scutellarioides*

Annual

Partial to full shade; normal, loamy soil. Plants reach 12–16 inches, and spread 12–15 inches.

- Large, eye-catching foliage in a wide variety of colors: black, bronze, chartreuse, medium green, red, variegated, yellow

### **Chocolate Covered Cherry (Coleus) –**

*Solenostemon scutellarioides*

Annual

Full sun to partial shade; normal, loamy soil. Plants reach 12–14 inches and spread 10–12 inches.

- Heat and humidity tolerant
- Waits longer to flower

### **Wizard Mix (Coleus)-**

*Solenostemon scutellarioides*

Annual

Partial to full shade; moist, well-drained soil. Plants reach 10–12 inches and spread 8–10 inches.

- Compact and bushy, great for bedding and containers
- 8 color varieties including: rose, jade, golden, mosaic, coral sunrise, and scarlet

### **Leisure Coriander (Cilantro) -**

*Coriandrum sativum*

Annual

Full sun; moist, well-drained soil. Plants reach 12–24 inches.

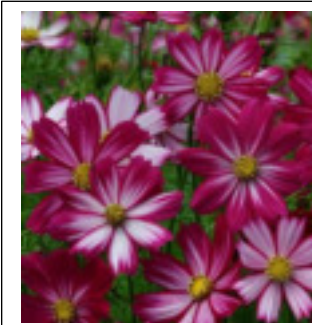

- Use chopped leaves for salad and seeds for flavoring pickles or sausage
- Weed control is important in the early stages
- Attracts pollinating insects

### **Peppermint Candy Cosmos -**

*Cosmos bipinnatus*

Annual

Full sun; moist, well-drained soil. Plants reach 18–24 inches and spread 12–18 inches.

- Attracts hummingbirds, butterflies, and honeybees
- No two flowers are exactly alike
- Great for cutting, bedding, and containers

### **National Pickling Cucumber -**

*Cucumis sativus*

Annual

Full sun; moist, well-drained soil. Plants spread 3–4 feet, and produce cucumbers up to 6 inches.

- Pick at 2-3 inches for gherkins, or at 4 inches for fresh eating as slicers
- Shaped especially to pack well into jars for pickling

### **Dash Mix (Dianthus) -**

*Dianthus barbatus interspecific*

Perennial

Full sun to partial shade; fertile, well-drained soil. Plants reach 15–20 inches and spread 12–14 inches.

- Mix of crimson, magician, pink, violet and white flowers
- Good for both containers and landscapes

### **Dwarf Dill Fernleaf –** *Anethum graveolens*

Annual

Full sun; moist, well-drained soil. Plants reach 18 inches and spread 12–15 inches.

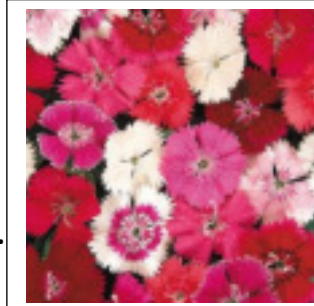

- Tangy flavor goes well with fish or vegetable dishes.
- Disease and pest resistant
- Leaves can be harvested before flowering

### **Ideal Select Mix (Dianthus)–**

*Dianthus chinensis x barbatus*

Biennial

Full sun; moist, well-drained soil. Plants reach 8–10 inches and spread 12–14 inches.

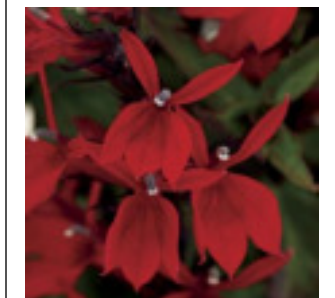

- Excellent for pots, packs and landscapes
- Bright and colorful plants bloom continuously all summer long

### **Starship Scarlet Lobelia –** *Lobelia speciosa*

Perennial

Full sun to partial shade; moist, well-drained soil or clay. Plants reach 20-24 inches and spread 6-20 inches.

- Good for cutting
- Attracts hummingbirds

**Black Velvet Rose Geranium**—  
*Geranium pelargonium x hortotum*

Annual  
Full sun; moist, well-drained soil. Plants reach 10–14 inches and spread 14–18 inches.

- Eye-catching rose blooms top dark leaves
- Good for cutting and larger containers

**Sparkle White Guara** -  
*Guara lindheimeri*

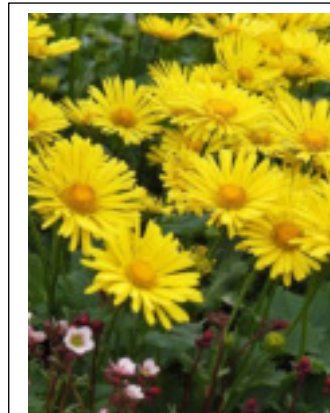

Perennial  
Full sun to partial shade;  
loamy, well-drained, soil.  
Plants reach 12-24 inches  
and spread 12-18 inches.

- Long taproot best suited to deep pots
- Good for borders
- Attracts butterflies and bees

**Little Leo**—  
*Doronicum orientale*  
Perennial

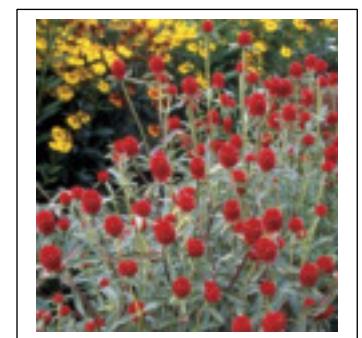

Full sun to partial shade; moist,  
sandy or normal soil. Plants  
reach 10–12 inches and spread  
10–12 inches.

- Compact and good for containers, edging
- Deer and rabbit resistant

**Strawberry Fields  
(Gomphrena)** –  
*Gomphrena haageana*

Annual  
Full sun; moist, well-drained  
soil. Plants reach 2 feet 8  
inches and spread 12 inches.

- Keeps blooms and foliage through the summer heat
- Flowers are great for cutting and drying

**Filou White (Gypsophila) –**  
*Gypsophila repens*

Perennial

Full sun; moist, well-drained soil. Plants reach 6 inches and spread 8-12 inches.

- Suitable for groundcover, rock gardens, and landscape borders
- Heat and drought tolerant
- Attractive to butterflies

**Silver Mist (Helichrysum)–**  
*Helichrysum petiolare minus*

Annual

Full sun to partial shade; moist, well-drained soil. Plants reach 6–8 inches and spread 18–24 inches.

- Small, silvery leaves are soft all season long
- For greener foliage plant in partial shade, for more silver, go for full sun

**Ruby Bells –**  
*Heuchera sanguinea*

Perennial

Full sun to partial shade; moist, well-drained soil. Plants reach 12–16 inches, and spread 12–16 inches.

- Wands of ruby-red bells top a mound of deep green foliage
- Great for cutting, edging, and borders
- Attractive to hummingbirds

**Luna Rose (Hibiscus) -**  
*Hibiscus moscheutos*

Perennial

Full sun; moist, well-drained soil. Plants reach 2–3 feet and spread 2 feet.

- Blooms first year from seed
- Attractive to hummingbirds, but not to deer
- Loves heat and can tolerate drought

### **Blue Glow -**

*Echinops bannaticus*

Perennial

Full sun to partial shade; moist, well-drained soil. Plants reach 3–4 feet and spread 2–3 feet.

- Great for cutting and drying
- Globe Thistle head is not prickly to the touch, and rises above the silvery green foliage

### **Evening Scentsation Petunia –**

*Petunia atkinsiana*

Perennial

Full sun; moist, well-drained soil. Plants reach 5-8 inches and spread 2 feet 6 inches - 2 feet 11 inches.

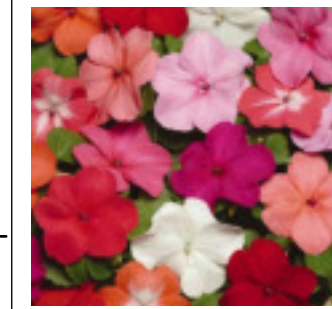

- Suitable for beds, baskets and containers
- Fragrance that intensifies in the evening

### **Impatiens Super Elfin XP Mix –**

*Impatiens walleriana*

Annual

Partial to full shade; moist, well-drained soil. Plants reach 8–10 inches, and spread 12–14 inches.

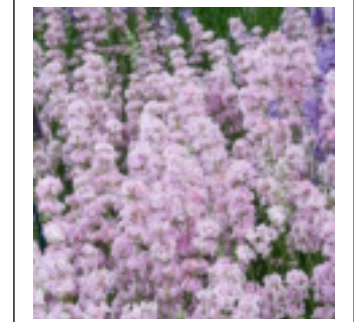

- Bright-colored flowers bloom all summer long
- Great for containers and beds

### **Lavandula Rosea (Lavender)-**

*Lavandula augustifolia*

Perennial

Full sun; dry, well-drained soil. Plants reach 12–15 inches, and spread 12–15 inches.

- Thrive in alkaline, sandy or light soil
- Fragrant and grows in upright bunches

**Maverick Mix Geranium**–  
*Pelargonium hortorum*

Annual

Full sun; well-drained soil or clay. Plants reach 14-16 inches and spread 12-14 inches.

- Very tolerant of heat and humidity
- Suitable for beds and containers

**Dark Beauty (Ligularia)**–  
*Ligularia dentata*

Perennial

Partial to full shade; moist, rich soil. Plants reach 36–39 inches and spread 2–3 feet.

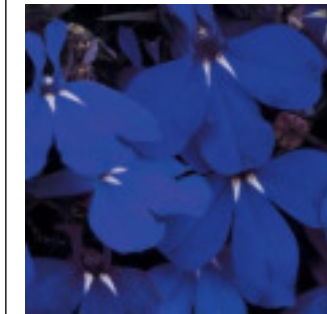

- Large, sulphur-orange daises borne on strong stems above deep foliage.

**Lobelia Riviera Midnight Blue** –  
*Lobelia erinus*

Annual

Partial shade; moist, well-drained soil. Plants reach 5 inches and spread 8 inches.

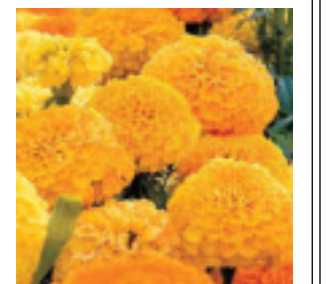

- Flowers early into a compact, ball-shaped mound
- Perfect for beds, borders, and containers

**Park's Whopper Gold (Marigold)**–  
*Tagetes erecta*

Annual

Full sun; moist, well-drained soil. Plants reach 18 inches and spread 12 inches.

- Flowers bloom into 4-inch golden balls.
- Drought and heat resistant
- Maintains its large radiant blooms all summer long

### **Vanilla improved (Marigold) -**

*Tagetes erecta*

Annual

Full sun; moist, well-drained soil. Plants reach 16–14 inches and spread 10–12 inches.

- 3-inch ivory balls top tall, bushy plants
- Very hardy with resistance to heat, humidity, pests, and diseases

### **Janie Primrose Yellow**

**Marigold –**

*Tagetes patula*

Annual

Full sun; moist, well-drained soil. Plants reach 8 inches, space plants 6-18 inches apart.

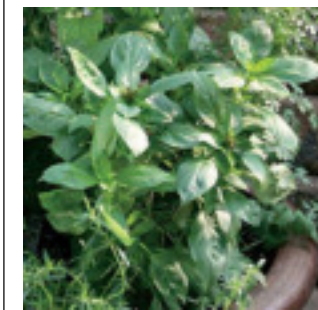

- Heat tolerant
- Attractive to butterflies, repellent to nematode pests

### **Lemon Basil-**

*O. basilicum citriodora*

Annual

2 inch dark green leaves; transplant seedlings 12 inches apart. Pinch off flowers to prolong leaf harvesting period.

- Fragrant
- Popular herb for flavoring

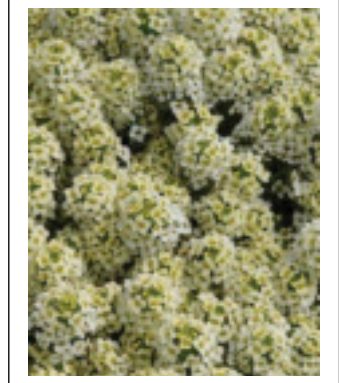

### **Easter Bonnet Lemonade- (Alyssum)**

*Lobularia maritima*

Annual

Plants average 6-10 inches in height and spread 12-14 inches.

Plant in fine soil low in pH

- Suitable for pots, containers, baskets, etc.
- Fragrant

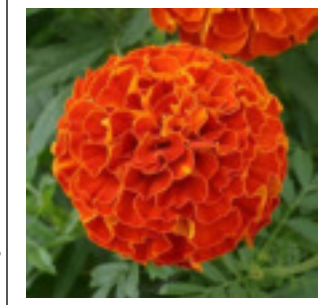

**Zenith Red (Marigold) -**

*Tagetes patula*

Annual

Full sun; moist, well-drained soil.

Plants reach 12–15 inches and spread 10–12 inches.

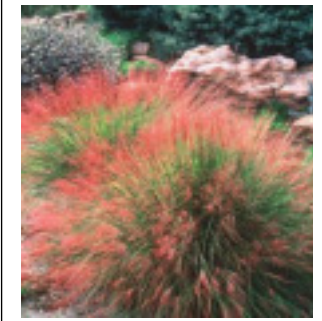

- Mahogany-red blooms that shade into a striking red-gold pattern with maturity
- Excellent for bedding and massed planting

**Undaunted Ruby Muhly Grass –**

*Muhlenbergia reverchonii*

Perennial

Full sun; dry or moist, well-drained soil. Plant reach 15–18 inches and spread 18–24 inches.

- Long-lasting, dark, dramatic pink blooms
- This grass can survive both tough winters and dry summers

**Zinnia – Benary's Giant**

Annual

Full Sun

Grows 2 – 2 ½ feet tall

- Unique lime green color.
- Good for cut flower arrangements.
- Hardy, blooms all summer, cut dead blooms for more flowering.
- Attracts pollinators to the garden.

**Savoie Boreal Forget-Me-Not –**

*Myosotis sylvatica*

Perennial

Full sun to full shade; moist, well-drained soil. Plants reach 6–9 inches and spread 9–12 inches.

- Changes colors as it matures, phasing through pink, salmon and blue
- Good for beds, borders, containers, cutting

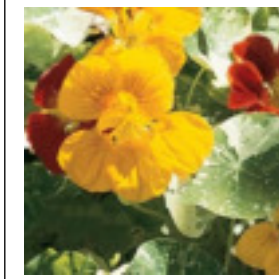

**Nasturtium Alaska Mix -**

*Tropaeolum majus*

Annual

Full sun; moist, well-drained soil.

Plants reach 10–12 inches and spread 8–10 inches.

- Flowers display a range of colors including cherry, crimson, orange, salmon and yellow
- Tolerate poor soils and heat or cold

**Nicotiana Whisper Mix -**

*Nicotiana hyb.*

Annual

Full to partial sun: moist, well-drained soil. Plants reach 3–4 feet, and spread 2 feet.

- Amazing flower power all season long
- Excellent for providing height and structure to garden beds

**Ornamental Oregano Kirigami –**

*Origanum x hybrida*

Annual

Full sun; moist, well-drained soil.

Plants reach 28 inches, and spread 12–14 inches.

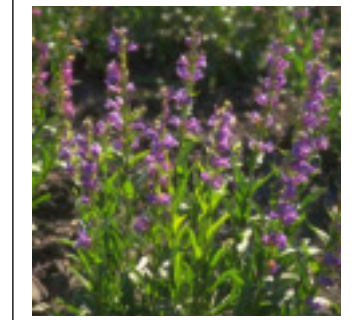

- Perfect for hanging baskets and tall flowerpots
- Ornamental, non-culinary oregano has large purple-green bracts and rose flowers

**Rocky Mountain Penstemon -**

*Penstemon strictus*

Perennial

Full sun; moist, well-drained soil. Plants reach 2–2.5 feet and spread 3 feet.

- Intense blue 1-inch blooms open along long stems
- Attracts butterflies and hummingbirds

**Sunburst Ruby Penstemon–**  
*Penstemon x mexicali*

Perennial

Full sun to partial shade; moist, well-drained soil. Plants reach 16 inches and spread 15–18 inches.

- A profusion of white-centered, ruby-red blossoms on glossy green stems
- Deadhead to encourage longer blooming

**Jalapeno Pepper–**  
*Capsicum annuum*

Annual

Full sun; moist, well-drained soil. Plants reach 26 inches and spread 12–18 inches.

- 3.5 inch fruits are both sweet and hot
- Peppers are ready to pick when dark green

**Sweet Rainbow Blend Pepper–**  
*Capsicum annuum*

Annual

Full sun; moist, well-drained soil. Plants reach 2–3 feet and spread 2–3 feet.

- Randomly assorted selections of 6 hybrid colors each with a distinctive flavor
- For best results, allow to ripen on the vine

**Petunia Double Glorious Mix -**  
*Petunia x hybrida*

Annual

Full sun; moist, well-drained soil. Plants reach 10–15 inches and spread 10–12 inches.

- Multicolor mix of solids and bicolors with huge 4–5 inch flowers
- Great in containers, baskets, beds

**Petunia Dreams Mix –**  
*Petunia x hybrida*

Annual

Full sun; moist, well-drained soil.  
Plants reach 10–15 inches and  
spread 10–12 inches.

- 3.5–4-inch flowers bloom in a variety of colors
- Excellent for pots or hanging baskets

**Petunia Easy Wave Yellow–**  
*Petunia x hybrida*

Annual

Full sun; moist, well-drained soil.  
Plants reach 6–12 inches and  
spread 2.5–3.25 feet.

- Trailing stems make this plant perfect for hanging baskets, window boxes, flowerpots
- Wide open 2-inch blooms of bright yellow to pale gold

**Petunia Tritunia Star Mix–**  
*Petunia x hybrida*

Annual

Full sun; moist, well-drained  
soil. Plants reach 12–14 inches  
and spread 14–16 inches.

- A mix of Ultra, Storm, and Bravo Tritunia Star varieties
- Eye-catching flowers are uniform in star pattern, habit and timing

**Phlox 21<sup>st</sup> Century Mix -**  
*Phlox drummondii*

Annual

Full sun; moist, well-drained  
soil. Plants reach 10 inches and  
spread 10 inches.

- Best in 4 inch pots or larger containers
- 1 inch blooms rise in big, rounded clusters above the foliage

### **Phlox Globe Mix–**

*Phlox drummondii*

Annual

Full sun; moist, well-drained soil.  
Plants reach 12 inches and  
spread 8 inches.

- Colorful blooms range from scarlet through pink and lavender to white.
- Great for beds, borders and window boxes

### **Primlet Primrose Mix–**

*Primula acaulis*

Perennial

Partial shade; moist, well-  
drained soil. Plants reach 6  
inches and spread 6–8 inches.

- Thrives even in dry shade, setting blooms in a rainbow of colors
- Great for cutting, containers, ground cover
- Survives the winter and often self-seeds

### **Salvia New Dimension Blue–**

*Salvia nemorosa*

Perennial

Full sun; moist, well-drained  
soil. Plants reach 8–10 inches  
and spread 6–18 inches.

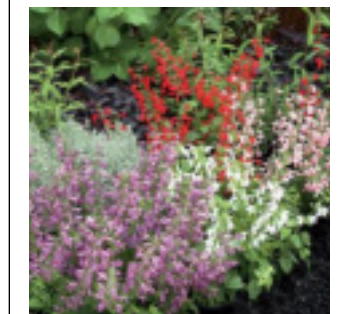

- Blooms late spring to mid summer, and often reblooms in fall
- Discourages deer and rabbits, but attracts butterflies, bees, hummingbirds

### **Salvia Summer Jewel Mix -**

*Salvia coccinea*

Annual

Full sun; moist, well-drained  
soil. Plants reach 15–20 inches  
and spread 10–16 inches.

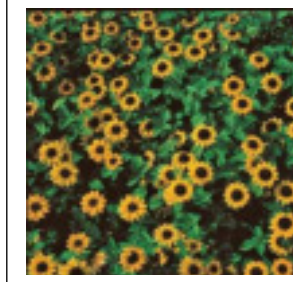

- Colorful mix of pink, red and white flowers
- Super abundant producer of .5 inch blooms all summer long
- Attracts butterflies, bees and hummingbirds

**Mandarin Orange (Sanvitalia)–**  
*Sanvitalia procumbens*

Annual

Full sun; moist, well-drained soil.  
Plants reach 6–10 inches and  
spread 10–18 inches

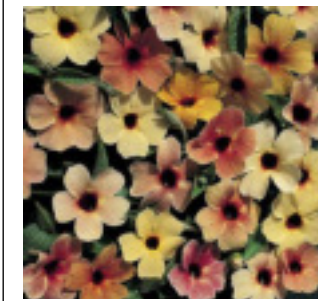

- Heat and drought tolerant
- Great for containers or as an edger

**Thunbergia Spanish Eyes–**  
*Thunbergia alata*

Annual

Full sun to partial shade; moist,  
well-drained soil. Plants climb 5–  
8 feet and spread 6 feet.

- Mix of terracotta colors with contrasting black eyes
- Suited for both baskets, containers, and fences, trellises

**Creeping Thyme–**  
*Thymus serpyllum*

Perennial

Full sun to partial shade; light,  
well-drained soil. These dwarf  
matted plants reach 3-5 inches  
and spread 8-12 inches.

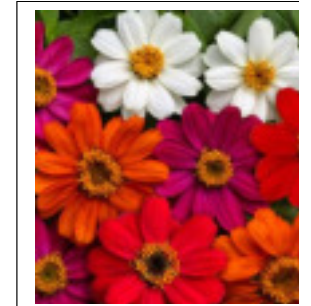

- Great for rock gardens, pathways, ground cover, cooking
- Dense mats of aromatic foliage with purple flowers

**Profusion AAS Mix (Zinnia) –**  
*Zinnia hybrida*

Annual

Full sun; moist, well-drained soil.  
Plants reach 12–15 inches and  
spread 12–15 inches.

- Contains Profusion orange, cherry, red, and white
- 2-inch blooms create a carpet of color on super-vigorous dwarf plants

**Costoluto Genovese Tomato –**  
*Lycopersicon esculentum*

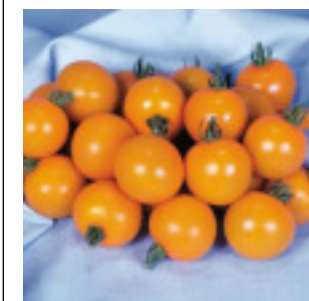

Annual

Full sun; moist, well-drained soil. Produces approx. 7 ounce fruits.

- 78 days to harvest from setting out transplants
- High acidity gives this tomato an intense tangy flavor

**Orange Paruche Tomato–**  
*Lycopersicon esculentum*

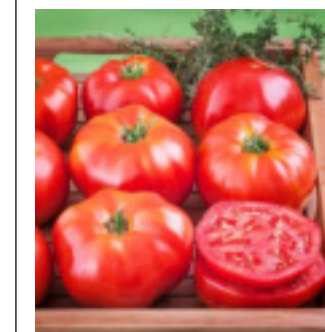

Annual

Full sun; moist, well-drained soil. Produces cherry tomatoes 1 inch in diameter.

- 67 days to harvest from setting out transplants
- Tangy and especially sweet
- Resistant to some common tomato diseases

**Ace 55 Heirloom Tomato**

75 days to maturity

- Large, deep red fruit.
- Low acid content.
- Crack-resistant.
- Plant is not overly tall, but still benefits from staking.
- Good for containers.
- Resistant to verticillium wilt (V), fusarium wilt (F), and alternaria stem canker (ASC).

**Park's Season Starter Tomato -**  
*Lycopersicon esculentum*

Annual

Full sun; moist, well-drained soil. Produces 6 ounce fruits.

- 60 days to harvest from setting out transplants
- Yields many uniform, succulent, tangy tomatoes that are resistant to cracking

**Rocky Top Tomato –**  
*Lycopersicon esculentum*

Annual

Full sun; moist, well-drained soil. Produces 7-7 ½ oz. fruits.

- 75 days to harvest from setting out transplants
- Highly resistant to a number of tomato diseases

**Rutgers Tomato–**  
*Lycopersicon esculentum*

Annual

Full sun; moist, well-drained soil. Produces 8 oz. fruits.

- 82 days to harvest from setting out transplants
- Resistant to cracking and several common tomato diseases

**Veeroma Tomato–**  
*Lycopersicon lycopersicum*

Annual

Full sun; moist, well-drained soil. Produces 2–4 oz. fruits.

- 72 days to harvest from setting out transplants
- The best tomatoes for making tomato paste and sauce

**Tomato - Brandywine**

Annual

Full Sun

Medium tall, best staked or caged.

80-100 days to maturity.

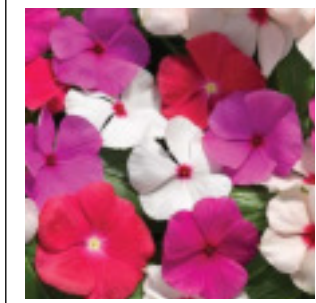

- Prized for great tomato flavor!
- Large fruits, often over 1 lb.
- Heirloom variety, oval shape, often showing ridges and green “shoulders” near the stem.

**Vinca Cora Cascade Mix –**  
*Catharanthus roseus*

Annual

Full sun to partial shade; sandy, well-drained soil. Plants reach 8 inches and spread 32–36 inches.

- Mounded, trailing habit, producing large flowers with overlapping petals
- Mix of colored blooms

**Crystal White (Zinnia) –**  
*Zinnia haageana*

Annual

Full sun; moist, well-drained soil. Plants reach 12 inches and spread 6–8 inches

- Startlingly white blooms with gold centers and one to two layers of overlapping petals
- Lush and spreading, these plants really cover the ground

**Easter Bonnet Peach- (Alyssum)**  
*Lobularia maritima*

Annual

Plants average 6-10 inches in height and spread 12-14 inches. Plant in fine soil low in pH

- Suitable for pots, containers, baskets, etc.
- Fragrant

**Giant Cactus Mix (Zinnia) -**  
*Zinnia elegans*

Annual

Full sun; normal, loamy soil. Plants reach 2.5 feet and spread 8–10 inches.

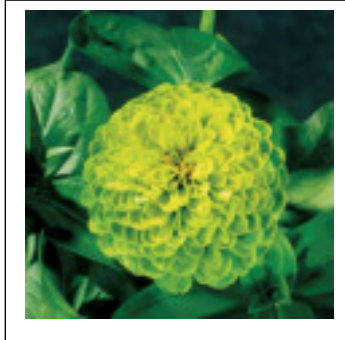

- The more you pick, the more you get of these 4- to 5-inch beauties
- Mix of 7 colors, each with masses of long needle-thin petals

**Envy (Zinnia)–**  
*Zinnia elegans*

Annual

Full sun to partial shade;  
normal, loamy soil. Plants  
reach 2.5 feet and spread  
8–10 inches.

- 2-inch, semi-double blooms are good for cutting
- Best color in partial shade
