<sup>(2)</sup> GHz refers to internal clock speed of the processor. Other factors besides clock speed may impact system and application performance. This system requires a separately purchased 64-bit operating system and 64-bit software products to take advantage of the 64-bit processing capabilities of the AMD Sempron processor. Given the wide range of software applications available, performance of a system including a 64-bit operating system will vary. Enhanced Virus Protection (EVP) is only enabled by certain operating systems including the current versions of Microsoft® Windows®, Linux, and BSD Unix. Protection of the OS or applications may not be enabled by default. After properly installing the appropriate operating system release, users must enable the protection of their applications and associated files from buffer overrun attacks. Consult your OS documentation for information on enabling EVP. Contact your application software vendor for information regarding use of the application in conjunction with EVP. AMD and its partners strongly recommend that users continue to use third party anti-virus software as part of their security strategy.

<sup>(3)</sup> Up to 256MB of main system memory may be allocated to support video graphics.  
<sup>(4)</sup> For hard drives, GB = 1 billion bytes. Actual formatted capacity is less. Up to 10GB of storage space is reserved for the system recovery software.  
<sup>(5)</sup> Capacity based on average compressed .jpg size of 2MB/image @ 4MP.

<sup>(6)</sup> As HD DVD and Blu-ray are new formats containing new technologies, certain disc, digital connection, compatibility and/or performance

issues may arise, and do not constitute defects in the product. Flawless playback on all systems is not guaranteed. In order for some HD-DVD and Blu-ray titles to play, they may require a DVI or HDMI digital connection and your display may require HDCP support. For Blu-ray / HD DVD player & SuperMulti DVD burner with LightScribe Technology. Data transfer rates up to 6,000 KB/s (CD read/write), 21,632 KB/s (DVD read/write), 26,340 KB/s (BD read) and 13,383 KB/s (HD DVD read). NOTE: HD DVD/Blu-ray Disclaimer only applies to Consumer Desktop PCs only. Some HD DVD and Blu-ray advanced features may not be supported. CPU power is dedicated to support HD DVD and Blu-ray playback functions. It is recommended that you close all other applications before and during HD DVD and Blu-ray playback. HD DVD and Blu-ray movies will only play through the HD DVD and Blu-ray player software. Advanced Access Content System (AACS) keys are integrated into your PC for copy protection purposes. Occasional renewal of the AACS key is required, and easily done by connecting to the internet.

<sup>(7)</sup> 33.6 Kbps send/up to 56 Kbps download/14.4 Kbps fax.  
<sup>(8)</sup> Internet access required.  
<sup>(9)</sup> Internet access required. First 60 days included; subscription required for live updates afterwards.  
<sup>(10)</sup> Internet access may be required.  
<sup>(11)</sup> Intended for your original content and other lawful uses.  
<sup>(12)</sup> The Microsoft® Office Home and Student Edition 2007 is a trial version; functionality is reduced after 60 days. The full version is sold separately.  
<sup>(13)</sup> Internet access requires payment of additional fees or subscription for use. Offer does not include local telephone company charges, if any, or applicable taxes.

Any long distance charges incurred will be the responsibility of the customer. Please make sure your access number is local. A valid credit card is required to initiate the service. This offer valid in the U.S.A. only. Additional terms and conditions may apply, see AOL offer for details.

<sup>(17)</sup> ATSC high-definition (HD) source content varies and will depend on broadcast signal, antenna, and other factors. In cities where local off-air HD programs are available, reception may vary based on geographic location. An external over-the-air antenna that receives UHF and VHF signals is required for ATSC reception. Viewing HD content will require a compatible high-definition display. Ability to record, edit, or transfer broadcast content such as TV programming may be limited depending on the type of content.
