Protect, Connect, Share…

- Continuous file backup across multiple computers to keep all of your data protected.
- Central file access and storage for computers across your network.
- Remote access to files when you're away from home.[1]
- Easily create an HP Photo Webshare site, where selected family, friends or associates can view and share photos and video clips.
- Stream photos, music and videos to your entertainment center or other computers on your network.[2]
- Expansion bay lets you easily add additional storage capacity as needed.
- Elegant black styling built for quiet, cool system operation.
- Smart energy saving hard disk drive spin down and exceptional power consumption.
- Backed by HP Total Care support with one year limited hardware warranty and software technical support from date of purchase.

Automatically protect your increasingly digital world

As you accumulate increasing amounts of digital content, keeping everything protected becomes a daunting task. The HP Media Vault takes the worry out of data protection by continuously and automatically backing up all of your important media and files.

- Automatic file backups can be set to run weekly, daily or continuously – as often as you need.
- Need more space? No problem! Easily add a second hard disk drive for additional capacity or the added protection of an extra "mirrored" copy (Raid 1) of your most important media and files.[3]
- Take a copy offsite. For the ultimate in data protection, you can backup your HP Media Vault to an external hard disk drive and take the copy to a separate location for safe-keeping.[4]

Enjoy your digital experiences when and where you want from any internet connected computer

Multiple computers in your home, home office, or small business often means files, documents, photos, music and videos are scattered everywhere and difficult to locate. The HP Media Vault provides a central copy of all your media and files for easy access from any computer in your home, home office, or small business network. Your HP Media Vault also provides remote access to your most important files from any internet-connected computer.[1]

- Access your files and enjoy your media from computers on your home office or small business network.
- Remotely access your files from any computer connected to the internet.[1]
- Stream personal photos, music and home video files to your entertainment center.[2]

Easily share with your friends, family and business associates

Sharing files and photos via the web used to be a time-intensive and sometimes scary endeavor. Your HP Media Vault allows you to grant file access to specified people outside your home, home office or small business. Using HP Photo Webshare, you can create a photo website on your HP Media Vault.

- Authorized visitors can remotely view approved folders containing relevant documents, files, photos, etc.[1]
- Use HP Photo Webshare to set up groups for sharing different photo albums; e.g., to family, soccer team, business clients, etc…You can even give specific visitors permission to add their own photos to share as well.[1]
- Setup email notifications and access levels for HP photo webshare visitors.

Software

Operating System	• Linux
HP Media Vault Client Control Center Software	• Easy control center for accessing files, setting up automated backups and configuring the HP Media Vault from any computer on your network. Features listed below can be accessed through the control center. Set up shared folders, access privileges, network settings, and other custom settings.
HP Photo Webshare	• Easily share photos and video clips using your HP Media Vault. Friends, family and/or business associates receive a secure login to your HP Media Vault for viewing your photos or adding their own (subject to access privileges that you control).[1]
Server for iTunes	• Centralize your iTunes music libraries and playlists in the server for playback to any PC or notebook running iTunes on your home network.
Remote Access	• Configure a personalized website address. The HP Media Vault can be accessed remotely for file retrieval and/or HP Photo WebShare access. Remote access is also available for designated friends, family and associates.[1] Remote access requires setting up a free or charge-based account with TZO dynamic DNS service.[6] Broadband Internet connection required for remote access to your home network.[1]
File backup	• File backup software allows for scheduled backups of multiple PCs to the HP Media Vault. Go back in time by saving multiple versions of files.
HP Media Vault Backup	• Ability to backup specific folders to an external USB drive for an extra copy of important files.[4]
Media streaming	• DLNA compatible UPnP media streaming capability for streaming photos, music and video to PCs, notebooks or a networked home entertainment center.[2]
Minimum System Requirements	• PC client: 1 GHz Intel Pentium III processor or equivalent with 256MB RAM. • Minimum hard disk drive space requirements: 150MB free for included software installation. • CD-ROM drive. • Internet connectivity recommended for software updates. • Web browser-Internet Explorer 6.0 or greater, Firefox, Netscape 7.
Operating system support	• File backup - Microsoft Windows® XP Home, XP Professional, Microsoft Windows® Vista - Home Basic, Home Premium, Business, and Ultimate editions. • File sharing - Windows® XP and Vista (see above for details), MAC OSX, Linux
Language Support	• English • French
