

SIMPLY CONNECT MORE!

HP recommends Windows Vista® Business.

HP USB 2.0 Essential Port Replicator

Affordability and versatility to match your busy workstyle

Essential for wherever you work

Whether it's at home or at the office, the places where you work are just as varied as the devices you need to connect to. For cost-conscious users who are constantly on the go, HP offers the affordable HP USB 2.0 Essential Port Replicator.

By connecting your HP Business Notebook to this convenient and versatile port replicator, you can enjoy immediate audio and network connectivity, plus improve your productivity with access to up to five concurrently working universal serial bus (USB)-connected devices. Over a single USB cable, you can connect your notebook to a keyboard, mouse, printer and other accessories that you regularly use, giving you a true desktop experience!

USB—as simple as 1-2-3

The HP USB 2.0 Essential Port Replicator is an ideal expansion solution for HP Business Notebooks that do not support traditional docking, like HP ProBook s-series, HP Mini notebooks and Compaq Business notebooks. Because USB is an industry-standard protocol that works on almost every computer, this docking solution is compatible with a wide variety

of HP and third-party notebooks, as well as with a broad range of older generation notebooks—so there's no need to refresh (and incur additional costs) should you change or upgrade notebooks.

As far as ease of use goes, nothing could be more simple or versatile. The HP USB 2.0 Essential Port Replicator features two Always-On USB ports that can be used to power or charge your portable music player, external hard drive and other similar devices. For added convenience, this pair of powered USB ports is housed within a swivel top that can be turned 90 degrees to provide easy access and prevent larger USB devices from blocking other available ports. And because different work spaces in different locations are configured differently, the HP USB 2.0 Essential Port Replicator can be arranged either vertically or horizontally to accommodate the space requirements of your immediate work environment.

At the office or at home

Setting up the HP USB 2.0 Essential Port Replicator at home or at the office couldn't be simpler—just connect the devices you want to use to the port replicator, install the appropriate software and drivers, and you're ready to work! This is especially convenient for remote or home-office workers who don't want a lot of clutter, mobile workers who are constantly on the road, or just about anyone who wants an easy-to-use and affordable solution to enhance their workspace experience.

For an even greater workspace experience, HP offers a variety of notebook stands that are ideal for users whose notebook panel is their sole display. Simply slip your notebook into the stand, connect the devices you need to the port replicator, and adjust the panel to your desired viewing angle. Immediately you've got a more comfortable—and productive—work environment!

Features and value, perfectly balanced

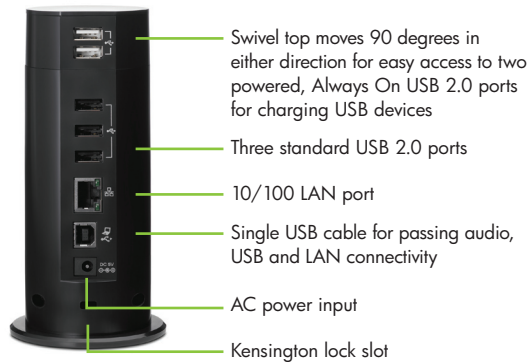

The HP USB 2.0 Essential Port Replicator offers the features you use most without building in unnecessary and costly features that typically go unused. With five USB ports, a local area network (LAN) port, headphone and microphone ports, and an industry-standard security lock slot, this value-packed docking solution creates a desktop-like experience while striking a perfect balance between functionality and affordability.

Leveraging the power of HP Professional Innovations

The HP USB 2.0 Essential Port Replicator is part of the family of innovative HP Docking solutions that allow HP Business Notebooks to deliver an enhanced desktop experience. Combined with our broad line of accessories, these solutions help increase the security, reliability and ease of use of your HP Business Notebook—so you can stay productive when you're on the go, wherever you may go.
