

Genetically Engineered Food Alert Coalition has launched a campaign to get Kraft Foods to remove all genetically engineered ingredients from their products because of the risks they pose to our health and the environment.

"All of us—government, industry, and the scientific community—need to work on ways to prevent this kind of situation from ever happening again."

Kraft Foods' response to the StarLink™ corn contamination.

"In all likelihood some of our products do contain biotech ingredients from [genetically modified] crops." Kraft Foods, consumer letter, October 1999.

TAKE ACTION!

CALL KRAFT during our Week of Action: April 17-22

1-888-560-4625

Call, Email, Write, or Fax Kraft Foods. Tell Kraft to send you a written guarantee that they will change their policies on genetically engineered foods by removing genetically engineered ingredients from their products, or else you will no longer buy their products.

Go into your local grocery store and talk to the manager. Show them this leaflet and ask them to contact their corporate headquarters and Kraft Foods (contact info below) and tell them that their customers are demanding that they remove all genetically engineered ingredients from their products.

Join Genetically Engineered Food Alert and the growing movement against untested, unlabeled genetically engineered food across the world. Talk to the person who handed you this leaflet to get involved locally. Keep informed by visiting our web site at:

www.gefoodalert.org
