Note 1: Feature Code 9551 indicates a Gateway system that supports third-party backend storage. The Machine Type is the same as Filer with "G" as a visual indicator on the external MTM label which uses the same base Filer MTM. Data ONTAP reports different Vital Product Data (VPD) for Gateway systems which is noted below for each model. N60x0 systems use the same motherboard FRU replacement for both Filer and Gateway. Sysconfig output includes VPD info and is available in AutoSupport (ASUP).

Note 2: 2858-Ax0 with FC 9551 Gateway VPD is 2858-Gx0

Note 1: Feature Code 9551 indicates a Gateway system that supports third-party backend storage. The Machine Type is the same as Filer with "G" as a visual indicator on the external MTM label which uses the same base Filer MTM. Data ONTAP reports different Vital Product Data (VPD) for Gateway systems which is noted below for each model. N6200 systems require motherboard (controller) FRU replacement specific to Filer or Gateway and model. Sysconfig output includes VPD info and is available in AutoSupport (ASUP).

Note 2: 2858-Cx0 with FC 9551 Gateway VPD is 2858-Dx0
