Knürr Technical Furniture

The Workstation Experts

Our customers set the requirements – we respond with quality, flexibility, speed and perfected service.

Around the entire globe we are recognized as a particularly reliable partner for technical workstation systems, control consoles and operations control centers in traffic control technology, police, fire and ambulance services, industrial applications, the automotive industry, medical technology, electronics, media technology, power supply, logistics and banking/insurance.

Knürr Technical Furniture product philosophy:

- Investment-protected with long lifespan and flexible upgrading
- Reliable due to selected materials
- Ergonomic perfection by incorporating occupational health expertise into the individual planning, design and implementation
- Individual by analyzing process flows and environmental conditions

Workstation systems require uniform spatial concepts – complex technological integration with the highest functionality available!

Mobile equipment carriers from Knürr are one of the factors that create efficiency and autonomy in the laboratory, OP area, office and in the workshop.

Global presence, an innovative and aesthetic design, a mature range of standard products and our recognized high standard of production expertise make us stand out clearly from the crowd.

Knürr Technical Furniture

Product Portfolio

Knürr Dacobas®

Modular workstation systems for:

- Technological and office use
- Monitoring and control centers
- Control and measuring stations
- Security and rescue centers

Knürr CiCon®

Circular consoles for:

- Control rooms
- Monitoring centers

Workstation for Electronics Engineers

- Training and instruction workstations
- Assembly workstations
- Development workstations
- Service workstations

Knürr Elicon®

Modular workstation systems for:

- Technological and office use
- Monitoring and control centers
- Open control and measuring stations

Modular LCD Monitor Wall

Modular LCD monitor wall for:

- Measurement consoles and control rooms
- Emergency operations centers

Knürr ErgoCon®

Height-adjustable consoles for:

- Operations control centers
- Emergency operations centers

Knürr CoolDesk®

Comfort workstation solution with water-cooling for:

- Banks, insurance companies and process-controlled industrial applications

Ergonomic Flat Screen Holders

For universal use for 17" to 65" monitors

Mobile Workstations

- Automotive Industry
- Medical technology
- Industry and research
- Production and assembly

Accessories

- Cabinets
- Chairs
- Lights
- System accessories
- Power supply
- 19" accessories
- ESD accessories

Industry Expertise

Safety and Security Technology

Knürr is a specialist in taking care of the requirements of authorities and organizations with security tasks

- Operations control centers at police and fire stations, rescue services, customs, army, control and command centers in disaster management
- Industrial front desk systems and control centers of private security companies

Industry Expertise

Automation and industrial technology

Knürr Technical Furniture has been active in the furniture for process automation business for more than 20 years.

Knürr plans, develops and produces process control furniture for international customers.

Industry Expertise

Automotive

Mobile equipment trolleys and consoles for:

- Production control stations
- Engine and chassis dynamometers
- Test and assembly workstations
- Training and instruction workstations
- Development workstations

Industry Expertise

Medical technology

New workstation concepts, services and support services are increasingly being determined according to the principle of “flexibility through mobility of tools and instruments in use”. This is no where clearer than in diagnostics and therapy in the medical world.

Industry Expertise

Measurement, testing and lab technology

- Test and service workstations
- Assembly and production workstations
- Training and instruction workstations
- Development workstations

Industry Expertise

Banking and insurance

- Broker workstations
- The comfort workstation solution for banking and insurance operations.

Industry Expertise

Media technology/ broadcasting

We offer diverse console and video solutions for broadcasting, TV, media and conference technology.

- Consoles and monitor walls for conference areas, security centers and facility management
- Editing, reproduction and direction workstations

Industry Expertise

Energy provider

Innovative technologies require professional resource management and a smooth process flow. To control all this we offer consoles for:

- Control and monitoring stations in power supply centers and power plants

Industry Expertise

Logistics

We provide you with high-grade system solutions for logistical and industrial applications - robust, flexible, good to look at, ergonomic

- Mobile workstations for production order
- Workstations for mobile data recording, printing work, online processing

Industry Expertise

Traffic control technology

Aviation

Knürr's planning and engineering specialists are renowned experts when it comes to providing airport and traffic consoles for environments with demanding safety requirements.

Shipping

Tailor-made console solutions for traffic control centers, lock control and cargo management.

Rail

Consoles for operations centers and control rooms for rail traffic.

Road

Technical workstation systems for municipal and cross-regional traffic control consoles.

Some of our satisfied customers from these industries:

AREVA • Airbus Industries • GE Medical • Volkswagen • Police Paris • Qatar Airways • Deutsche Bahn • Siemens AG • Ericsson • BMW • LAX Los Angeles • Aesculap • Eurocopter • Daimler • Volvo • Air France • EADS • Yokogawa • Alcatel • Thales • Rohde & Schwarz • MUC Munich • DLR • BASF • Audi • Bayer • ABB • NASA • Gaz de France • Porsche • Zürich Airport • Daimler • Berlin Airport • Polizei Hamburg • Lufthansa • Deutscher Wetterdienst • DFS Deutsche Flugsicherung • Deutsche Bank

Mobility in practice

Modular standard solutions

Whether it be in the workshop area, electronics lab, the office or in medical technology – our comprehensive standard range provides diverse solutions for the safe and secure mobility of valuable equipment.

The modular construction enables multifaceted trolley configurations, immediately or at any time later on. For demanding anti-static environments Knürr provides various trolley systems – ranging from robust transport trolleys through to the fully equipped measurements and diagnostics trolley.

Ergonomic details also simplify daily tasks in a wide range of environments.

An extensive range of accessories supplements Knürr's mobile equipment carriers as requested by the customer: Flatscreen holders, ESD-casters, isolating transformers and leakage detectors, cable routing elements and all kinds of accessories for the medical sector.

Mobility in practice

Customized solutions

Based on our standard modules the options for unique originals are practically unlimited.

Challenge us with your requests! Ask us for your original and stand out on the market with your equipment trolley with customized design – harmonized with your company's image and design (CI/CD).

Our competent **design and technology** team is only too happy to optimally and specifically satisfy customer-specific requirements – and in the respective batch sizes.

“Utilize our long-standing years of **experience**, with which we ergonomically, technically and optically blend our mature and flexibly adjustable product platforms and components into your **individual solution.**”

Workstations – holistic planning

Ergonomics

Ergonomics is the science of designing the job, equipment, and workplace to fit the worker.

The work that is done at a workstation is all-important here:

- Monitoring work at a control station
- Telephone and reading work
- Everyday screen work
- Written work
- Testing, etc.

The following factors must, however, be harmonized with one another with the work at the monitor workstation in order to increase efficiency and minimize the amount of sick days:

1. Desk setup
2. Space requirement and room layout
3. Lighting
4. Acoustics
5. Room climate
6. Aesthetics and well-being at the workstation

These factors are handled differently by legislators, standardization institutes and insurance carriers. While the legislators (occupational health and safety laws, health and safety at work act, EU directives, monitor workstation legislation, etc.) determine the rules and regulations, the standardization institutes project the “current state of technology”.

Insurance carriers, such as the respective employer’s liability insurance associations, for example, provide “validated ergonomic findings”. §4 of the Labor Protection Act provides standardization institutes and

DIN, ISO and EN standards and employer’s liability insurance association regulations with the required legal character.

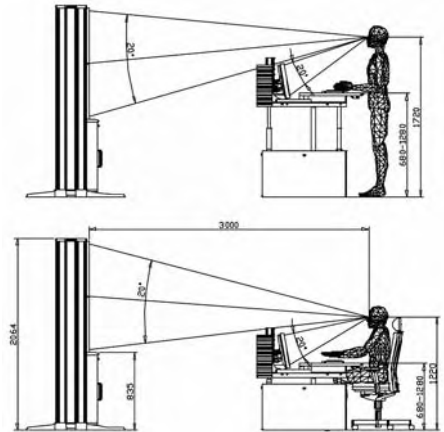

Whether it be new developments or customized products, Knürr complies in its design and development work with these generally applicable ergonomic rules.

Workstations – holistic planning

Room planning

1. Desk setup

- Anthropometry
- Worktops and work levels
- Leg space, legroom depth, legroom height
- Viewing distance to monitors
- Monitor tilt angle
- Monitor viewing angle, etc.

2. Space requirement and room layout

2.1 Basic concept

- Recording the current situation
- User consultation
- Conceptual planning
- Layout planning

2.3 Execution planning

- Detailed design for control rooms, consoles, operational equipment and installations
- Thermal management

2.2 Basic design

- Layout design
- Light design
- Ergonomic design
- Acoustics
- Colors and color combinations

2.4 Construction & production

- Construction of the designed equipment/installations
- Installation work
- Internal configurations

Workstations – holistic planning

Room planning

3. Lighting

- Knürr provides an optimum combination of evenly distributed indirect room lighting, plus individual workstation lamps.
- Avoid direct glare and reflected glare.

4. Acoustics

- The noise level for office and control rooms recommended by experts is 35-40 dB (A) and 55 dB (A) should not be exceeded.
- Knürr specifically prevents sound-carrying with the correct use of materials and preventive room planning. This includes wrapping disturbing sound sources or increasing sound-absorbing surfaces by applying the appropriate materials to floors, ceilings, walls, window fronts, cabinet panels and partition panels, etc.

5. Room climate

On request our climate engineers and workstation experts run tests to ensure that the requirements and standards for room temperature, air humidity and airflow speed are all complied with.

6. Aesthetics and well-being at the workstation

Numerous individual and subjective factors have an effect here – and these should be determined together with the employee.

For detailed and individual advice, simply use our Knürr ErgoScan® Service Package and call us at +49(0) 8723 28 111.

From the very beginning:

Project Management

Take advantage of our expert know-how, which we have been gathering for decades in numerous customer projects in various industries.

The **project manager** is your direct contact partner. They are the interface between you and the project, and they are responsible for the project planning in accordance with your individual requirements profile. Depending on the complexity of the task at hand, they put together a **professional team** of specialists from the most diverse disciplines.

Numerous factors are considered – from the creation of a list of functional specifications, budgeting and scheduling, through to special design specifications and technical integration, right on through to compliance with standards and guidelines and detailed project documentation.

During the **product design** phase, industrial designers and technicians work closely together to harmonize form and function. You check the result and can add your suggestions at any time with the aid of 3D CAD models.

The **prototyping** is also performed by experts that integrate your wishes, requests and suggestions into a first specific product.

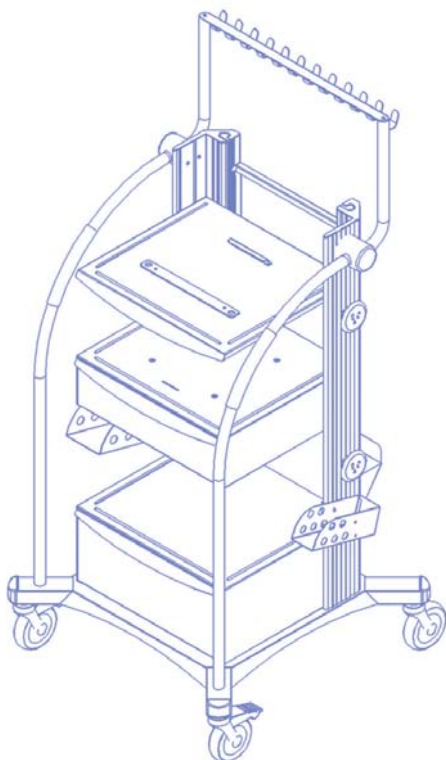

Design and Function

Design

Using the most modern CAD applications, we design your products, which set new standards in terms of technology and aesthetics. On the basis of the project-planned details, 3D views, design studies and volume models emerge, which represent the most realistic state of development progress and enable modifications in line with your wishes at absolutely any time.

Your company-own corporate design is also integrated with our proposals for materials and colors. Ultimately we ensure a smooth technical and technological integration while complying with UL, CSA, VDE or TÜV/GS standards. Only when these stages have been fully completed, can the first prototype be produced.

Exemplary results

Production and logistics

After the customer has approved the production release our elaborate **logistics concepts** go into operation. Customized planning is integrated into our **supply chain management** and seamlessly implemented.

We produce application-specific equipment trolleys in ultra-modern **industrial production processes**.

In the production phase, our employees – supported by our integrated **quality assurance procedures** – guarantee the best product available with their long-standing years of experience in production, packaging and shipping.

This also includes in-depth **packaging expertise**, equipped for global shipping and the most difficult environmental conditions.

Integrated solutions

More comprehensive benefits

Knürr products are put through multi-level quality assurance procedures in accordance with international standards. In addition, all necessary mechanical and electronic tests are carried out in both internal and independent laboratories.

GS certificates and compliance with the European Machine Directive provide you with the security that Knürr products are not only absolutely safe and long-life – they also comply with all standards and directives.

- Various tests on request: Earthquake test, advance tests, vibration test, stress test, environmental audit, VDE/GS, EMC test, etc.
- Industrial production ensures a guaranteed future and investment protection
- Detailed project documentation
- Compilation of assembly instructions
- Ability to operate globally due to Emerson Network Power's worldwide sales presence
- At the same time we also provide you with the benefit of a flexible and highly specialized organisation unit

Emerson Network Power is the global technology leader in numerous areas, and a recognized expert in helping to secure business-critical processes, and therefore contributes to “business-critical continuity.” A whole range of the most varied applications, including the tried and tested Knürr rack system solutions and the accompanying thermal management, ensures the required network stability with maximum technological adaptability at the same time.

Knürr system solutions in the world of information and network technology are part of an adaptive architecture from Emerson Network Power, which flexibly adapts to changes concerning security, high-density and all associated capacities. Companies are provided sustainable and longterm benefits from the high IT availability, operative flexibility and impressive reduction in investment and operating costs.

The Knürr Technical Furniture business unit develops, produces and distributes technical workstation systems for control consoles, operation control centers and electronics labs, as well as mobile equipment carriers for the automotive and medical technology industries.

Knürr AG is recognized around the world as one of the leading developers, manufacturers and distributors of rack and enclosure platforms in the indoor and outdoor area, including all relevant active/passive components in 19” construction and the technologies associated with it. Knürr is part of Emerson Network Power.

Knürr is certified in accordance with EN ISO 9001 and EN ISO 14001, and its quality management continuously guarantees the highest standards in all areas of the company.

Knürr Dacobas®-Consoles

Applications and Capabilities

Our ergonomically refined control consoles are used the world over and perform with excellent results in traffic control and airport operations and control centres. The demanding 24-hour operation in such environments is, of course, every bit as demanding on the operators and the technology in use.

The ergonomic workstation is important for the operator, just as the functionality of simple and rapid access is, so that the necessary components for the operation can be exchanged within minutes. This is where Knürr Dacobas® shows its strong points. - A transparent modular structure for creating the efficient interface between the control systems and the people that operate them. A flexible linking of the modules consequently enables the creation of the most diverse workstation environments.

DAC20181

DAC20116

Control and measurement consoles in the process industry are closely linked to the production process, and are therefore often exposed to quite severe conditions. Ergonomics are once again the center of focus in this area, but different technologies are utilized in each production process, and these require a high standard of flexibility with technical integration. This is where Knürr Dacobas® can fully implement the strengths that it has continually further developed over several decades.

KON20050

Knürr Dacobas®

Control Consoles

A special product area of the Knürr Dacobas® range is dedicated to the technical features of control consoles. This standard range allows most requirements to be covered, especially for RfPs – cost-effective, efficient and with short delivery times.

Technical pedestals, lowered monitors, 19" integration, cabling systems, console superstructures and flat screen holders generate an all-inclusive range that covers practically every requirement.

Any gaps that might still exist between the standard offer and your request are taken care of with modifications to the standard and special constructions carried out by our Customer Engineering.

Space management made easy!

Four basic modules enable room layouts for the most diverse applications:

Knürr Dacobas® Control Consoles Strong points

1 Ergonomics

Full front cover provides modesty screen for the leg area. The ergonomic leg space enables free movement of the chair in the link-up area.

Spacious desk depth of 1000 mm for setting up 21" monitors.

2 Cable routing

For cabling and installation of equipment, front and rear covers completely removed.

3 Simple and dust protected cable entry from above in the cable duct. Brush strip across the entire desk width.

4 Additional work and storage surfaces are created with desktop superstructures. A simple plug/screw connection enables vertical link-up for workstation superstructures, e.g. a second working level, lighting fixtures or rear panel.

5 Cable management

Separate horizontal and vertical cable routing in cable basket trays and cable routing rings. Easy cabling also via corner components.

6 The technical pedestal with a depth of 350 mm provides the option of integrating computers, mounting panels and 19" components.

7 Cable duct bottom opening of the double base in the technical pedestal or through the brush strip in the 19" pedestal. Optional ventilation in the covers.

8 19" Pedestal

Small smaract cabinet² with glass door and 19" extrusions for installing 19" components. Adapter for installing a lockable drawer, can also be mounted later on.

9 Drawer unit

Mobile drawer unit, 1/3x3 OU or 1/3/6 OU, can be positioned anywhere.

KON20027

Knürr Dacobas® Control Desk Level working surface, one-piece front and rear covers

- Working level with full-cover worktop
- Control desk frame with integrated front and rear panel mounting
- Technical pedestal accessible from front and rear, clear depth - 350 mm
- Cable routing possible from above in the cable duct across the entire desk width
- Dust protection in the cable routing area with brush strip
- The technical pedestal is open on the side with link-up for horizontal cabling
- Full front and rear cover can be removed from the technical pedestal
- Technical bottom cover with cable entry, diameter 80 mm
- Technical bottom cover prepared for 19" frame mounting
- Prepared for socket strip

Load rating

- 1500 N (static surface load)

Standards

- DIN 68761 for worktop
- EN 438 HGS class for high pressure plastic laminate

Material / Finish

- Worktop: three layer particle board, FP/Y E1 version, fire protection class B2
- Worktop coating: high pressure plastic laminate
- Desk frame: sheet steel, zinc passivated
- Front and rear covers: three layer particle board, FP/Y E1 version, directly coated, fire protection class B2
- Technical bottom cover, powder-coated texture

Colour

- Worktop, front and rear covers: light-grey
- Technical bottom cover, RAL 9011 graphite black

Supply schedule

- 1 Worktop with brush strip
- 1 Desk frame
- 1 Front cover
- 1 Rear cover
- 1 Mounting instructions
- Mounting material

How supplied

- Pre-assembled in modules

Note

- Please order socket strips separately
- The "push-lock" of the front and rear covers can be exchanged with a lock on request

Knürr Dacobas® Control Consoles

Control console corner

- Level corner panel
- Corner frame with integrated front and rear panel mounting
- Technical pedestal accessible from front and rear, clear depth -350 mm
- Extensive cable routing possible from above in the cable duct
- Dust protection in the cable routing area with brush strip
- The pedestal is open on the side with link-up for horizontal cabling
- Full front and rear cover can be removed from the pedestal
- Bottom cover with cable entry, diameter 80 mm
- Technical bottom cover prepared for 19" frame mounting
- Prepared for socket strip

Load rating

- 750 N (static surface load)

Standards

- DIN 68761 for corner panel
- EN 438 HGS class for high pressure plastic laminate

Material / Finish

- Corner panel: three layer particle board, FP/Y E1 version, fire protection class B2
- Corner panel coating: with high pressure plastic laminate
- Corner frame: sheet steel, zinc passivated, powder-coated
- Front and rear covers: three layer particle board, FP/Y E1 version, directly coated, fire protection class B2
- Bottom cover, powder-coated texture

Colour

Knürr Dacobas®

Circular Console

TFT Monitors, i.e. flat screens, are rapidly displacing the “tube technology” used to date. The space saving in the depth with desk and workbench systems is, of course, only guaranteed with a flat screen holder system, which makes the large support feet of the TFT unnecessary.

With systems with several flat screens, flat screen adaptations are a “must” at any rate.

Planning right from the outset with TFT adaption is the ideal solution, but flat screen adapters can also be integrated at any time later on, and this even with third party manufacturers.

Knürr Dacobas® circular console Strong points

1 KON20049

2 KON20050

3 KON20053

4 KON20054

4 KON20055

5 CIC20060

- 1 Modular concept**
The trapezoid shape of the individual consoles creates a circular setup when linked-up, and consequently produces an optimal horizontal view and access area.
- 2** With straight and trapezoid shaped workstation components, individual workstation environments and combinations can be realised. Linked-up technical desks extend the worktop surface.
- 3 Flat screen adapters**
The flat screen adapters comply with the VESA standard 75 and 100 (drill hole spacing, 75 mm and 100 mm).
The arrangement of flat screens on two levels is enabled with Knürr-specific functional rails.
- 4 Equipping**
The pedestal can be opened from both the rear and the front and is equipped with a pull-out shelf. Both 19" equipment and mounting panels for non-standard equipment can be mounted on 19" ex-trusions.
- 5 Monitor integration**
Quick and easy installation of TFT monitors; all trade-standard sizes, on one or two levels.
Flexible flat screen mounting with multifunctional rails.

Knürr CiCon® brochure!

Knürr Dacobas®

Operator Consoles

KON00254

CRT monitors cannot be replaced by flat screens in some special applications. Knürr Dacobas® operator consoles that optimise screen reflexes, access, viewing angles and distances as well as heat dissipation are provided for such special applications.

A simple exchange of the heavy monitors is of decisive significance in this respect.

Further solutions on request

KON00076

Knürr Dacobas®

Height Adjustable Control Console

The new Knürr Security Command Workstation is designed as a versatile control console with the comfort and convenience of a sit-stand workstation. The variable, electric height adjustment of 680 mm to 1120 mm working height is even possible with angled combinations. With operations control consoles, it is crucially important that the operator be able to work standing up in stressful operation situations. The stressful situation is consequently less demanding for the operator and the error rate is lower.

KON20047

We are happy to offer project planning and offers with detailed CAD room planning on request.

KON20048

Knürr ErgoCon® – Strong points

- The most modern lifting mechanism possible ensures the worktop moves up and down quietly and stepless
- Intelligent and hidden cable management
- Ergonomic monitor connection guarantees optimum viewing angles
- Ergonomic and robust desktop edge

■ New standards in electro-motor height changes:

- Running very quietly and smoothly, the work height can be set individually and stepless between 680 and 1250 mm
- With its stepless height adjustment and practically noiseless lifting mechanism, Knürr has now opened a new chapter in electro-motor height adjustment
- Individually programmable height positions and speeds for various users
- Intermediate stop and slow mode when nearing end position
- Anti-collision function minimizes downtimes and repair times
- Overload protection with individual current limiting
- In service cases: Fault identification with special codes, remote diagnostics setup, automatic detection of drives, swapping out the lifting columns during running operation, free access from outside via the removable side panels of the base units

Please also see our current
Knürr ErgoCon® brochure!

Knürr ErgoCon® – Control Room Console – Electric Height-Adjustable

ERG00019

TFT adaption

- Ergonomic monitor connection with to the circular functional rail guarantees optimum monitor viewing distances
- Freely positionable functional rail and monitor columns on the worktop and individual TFT mounting with grid perforation
- Height-adjustable functional rail for optimum monitor viewing angles
- Optimum monitor tilt angle with an electric height-adjustable monitor column

Ergonomic and robust desktop edge

- Warm synthetic materials ensure a pleasant surface temperature to positively influence the user's sensation and perception on touching and seeing the surface
- Knürr guarantees long lifecycles by using resistant and robust materials
- The solid-colored material precludes paint damage

ERG20058

Spacious technical pedestal

- For accepting mounting panels, chassis rails, computers and other equipment with full legroom with a width of 1600 mm or 2000 mm
- Cables can be routed through the cable basket tray to the side panels

ERG00006

Intelligent and hidden cable management

- Spacious, two-way cable chain in the base units with separator for separate cable routing
- Cable comb under the monitors – suitable for straight, concave and convex cable routing
- Cable management along the functional rail: with link chain, Velcro or fastening coils
- Cable exits on the desk surface for equipment cabling options

5 DAC20184

Office organisation and technical integration are enabled with a wide range of individual, configurable desk pedestals.

- 1 Desks are afforded a high load rating with a strong (50 mm) steel frame and a postformed desktop (70 mm).
- 2 The patented quick connect system guarantees simple and strong link-up of desk, cabinet and corner elements.
- 3 An easily assembled cable duct provides covered vertical routing of data and power supply cables.
- 4 Tapped thread in the top end of the extrusion allows adapters to be mounted for practical accessories.
- 5 Additional work and storage surfaces are created with desktop superstructures. A simple plug/screw connection enables vertical link-up for workstation superstructures, e.g. a second working level or lighting fixtures.
- 6 Cable Routing Set (CRS)
Quick and easy cabling with the cable routing set in the vertical cable duct under the worktop.

All workstations are also available in ESD version as required.

ESD Workstations

- When computers go crazy, alarm systems no longer function or cash registers simply refuse to work, the gremlin at work is quite often easy enough to identify: Static Electricity.
- The constant development of highly integrated circuits results in increasingly more efficient (but also increasingly smaller!) equipment. Therefore it is all the more important to determine the growing sensitivity of **electrostatic sensitive devices (ESD)**. Even voltages of just 100 – 200 volt are enough to damage microprocessors or MOSFETs.
- High voltages are often triggered by modern plastics, artificial fibres in clothing and carpets, and by low humidity in centrally-heated rooms. Depending on the shoe material, speed and humidity, a person walking across a carpet can be loaded with between 2000 and 20,000 volts.
- There is no doubt about it! The safety of electronic components (not to mention the well-being of the operating personnel) can no longer be guaranteed under these conditions.
- With the **ESD workstations from Knürr**, the perfect operational workstation equipment is now available.
 - Site insulation in accordance with VDE 0100, § 24 and DIN 57 680 part 2.
 - Protection of electronic components against static electricity (EN 61340)

The Basics

Generation of electrostatic charges cannot always be prevented. Therefore the discharge must be specifically “influenced”. Influenced means: All discharge processes must be run controlled and calculable. The calculable discharge process is described by the following exponential function:

$$U(t) = U_0 \cdot e^{-t/RC}$$

U₀ = Initial voltage of the capacitor

R = Leakage resistance

C = Capacity

By activating the equation towards R, an equation is generated with which an ideal leakage resistance can be ascertained.

$$R_e = \frac{t_{zul}}{C \cdot \ln(U_0/U_{zul})}$$

The optimal discharge curve is consequently achieved. Assuming that the voltage (U₀) must be reduced within 0.1 sec (t_{zul}) to 50 V (U_{zul}) so that the electrostatic endangered components are not under high voltage for too long, the leakage resistance therefore acts as the regulator for a controlled discharge.

Of course, for the safety of the endangered components it is also helpful if charges can be prevented before they are generated by equalising the different potentials. Conductive work and unit surfaces, plastic parts made of conductive materials, the connection of all parts with one another and with the ESD body are all required for this purpose.

Knürr Dacobas® Free-Standing Unit Technical data

- Bonded main unit
- At 6 OU with suspension frame
- Guides:
 - 1 OU Utility tray
 - Easy pull-out
 - 3 OU Telescopic slides
 - Part pull-out
 - 6 OU Telescopic slides
 - Full pull-out
- All telescopic slides enclosed
- Drawer catch
- Central lock system with exchangeable cylinder
- 1 Key as folding key

Finish / Colour

- Worktop, covers, front trim and handle: light-grey
- Legs: powder-coated texture, RAL 5008, grey-blue

Colour combination

- Final digit of order number .1
- Light-grey / RAL 5008, grey-blue

How supplied

- Fully assembled

Material

- Sheet steel frame, zinc-passivated
- Extruded aluminium legs
- Worktop and covers, three layer particle board, FP/Y E1 version, fire protection class B2
- Worktop coating
- High-pressure plastic laminate
- Drawer trims and drawer handle, plastic (PS)
- Drawer main unit, sheet steel, black

Knürr Dacobas® 19" Superstructure

- 19" Superstructure for mounting chassis', 19" modular chassis' and panels
- Front and rear side of the superstructure with 19" extrusions for fitting chassis' and modules in the 19" system and blanking plates
- Complies with IEC 297; the superstructure provides an additional working level and storage surface
- Link-up extrusions for fixing on desk

Dimensions

Installation depth, 365 mm

Standards

- DIN 68761 for worktops
- EN 438 HGS class for high pressure plastic laminate

Material / Finish

- Top and bottom cover, sheet steel, powder-coated texture
- Top cover: three layer particle board, FP/Y E1 version, fire protection class B2
- Side covers: three layer particle board, FP/Y E1 version, fire protection class B2

- Link-up extrusions: extruded aluminium, powder-coated texture
- 19" Extrusions: extruded aluminium

Colour

- Top cover and side covers: light-grey
- Top and bottom cover: RAL 9011, graphite black
- Rear panel: RAL 7035 light-grey
- Link-up extrusions: RAL 5008 grey blue

Installation options

- 3x10 U
- 3x13 U
- 3x16 U

Supply schedule

- Bottom cover
- Metal cover
- Rear panels
- Top cover

Note

Front panels can be found in the accessories catalogue

Mini Distributor for Knürr Dacobas®

- The mini distributor is based on an extruded aluminium extrusion. T-slots and screw channels are used to mount trade standard installation technology. The mini distributor can be equipped at the front with 3 HU front panel sections. With the adapters on the side, the mini distributor can be mounted on the Knürr Dacobas® desk and workbench system.

Material / Finish

Aluminium extrusion, antistatic powder-coated texture, RAL 7035
Adapter: sheet steel, antistatic powder-coated texture, RAL 7035

Supply schedule

- 1 Mini distributor extrusion
- 2 Knürr Dacobas® extensions
- 2 Mounting adapters
- Mounting material

Attention!

To ensure protection against electric shock, empty slots must be covered with front panel sections.

Note

The appropriate installation components can be found in the accessories catalogue

Knürr Dacobas®

19" Cabinets

Technical systems are not installed in large numbers directly in the workstation system for the most diverse reasons, but rather alongside or in a special central technical room.

In order to ensure that furniture system and 19" cabinet system are compatible with each another, Knürr Dacobas® provides a correspondingly designed 19" range.

Knürr Dacobas® is additionally rounded off by an accessories range, which covers other special applications.

Knürr Dacobas® 19" Cabinets Strong points

- 1 Installation option at any height and depth without significant mounting expense using T-slot principle with spring nuts.
- 2 Standard cabinet types provide installation space between front door and front panel level of up to 91 mm.
- 3 Simple mounting of the components with integrated tape measure with HU and mm division.
- 4 Mobility at installation point with stable, strong double castors.
- 5 Safe positioning with height adjustable feet with large stand area.
- 6 All components of the Knürr Dacobas® 19" cabinets are earthed in accordance with VDE 0100.
- 7 Accessible from all sides with hook-off side panels, rear doors and front doors (optional).
- 8 Rear door optionally with vent slots for optimal airflow.

Knürr Dacobas® 19" Cabinets for Components in Accordance with DIN 41 494

Technical data

Material / Finish

- Cabinet extrusions: extruded aluminium, powder-coated texture
- 19" Extrusions: extruded aluminium
- Top cover, covers and rear door: sheet steel, powder-coated texture
- Top cover and base frame: sheet steel, powder-coated texture, RAL 9011 black
- Plate feet: plastic

External dimensions

- Width 570 (600) mm
- Depth 670 (700) mm, 870 (900) mm
- Height 1298 mm - 2187 mm

Colour

- Final digit of order number .1:
- Top cover, covers and rear door: RAL 7035, light-grey
- Cabinet extrusions: RAL 5008 grey blue

Tests

- Earth, VDE 0100
- Upgrade capability in accordance with protection rating IP 50

Configuration

- Stationary with levelling feet
- Mobile on double castors

Note

2 Cabinets can be optionally linked-up via 2 daco posts or directly linked via 1 daco post. With direct linking, the internal side panels are not used. Chassis runners and 19" shelves can be installed. Socket strips must be ordered separately.

Supply schedule

- 1 Basic rack with 2 side panels, 4 plate feet, 4 cabinet extrusions and 4 19" extrusions with T-slot
- 1 Top cover, closed
- 1 Rear panel with vent slots, lockable

How supplied

Fully assembled

Emerson Network Power is the global technology leader in numerous areas, and a recognized expert in helping to secure business-critical processes, and therefore contributes to “business-critical continuity.” A whole range of the most varied applications, including the tried and tested Knürr rack system solutions and the accompanying thermal management, ensures the required network stability with maximum technological adaptability at the same time.

Knürr system solutions in the world of information and network technology are part of an adaptive architecture from Emerson Network Power, which flexibly adapts to changes concerning security, high-density and all associated capacities. Companies are provided sustainable and long-term benefits from the high IT availability, operative flexibility and impressive reduction in investment and operating costs.

The Knürr Technical Furniture business unit develops, produces and distributes technical workstation systems for control consoles, operation control centers and electronics labs, as well as mobile equipment carriers for the automotive and medical technology industries.

Knürr AG is recognized around the world as one of the leading developers, manufacturers and distributors of rack and enclosure platforms in the indoor and outdoor area, including all relevant active/passive components in 19” construction and the technologies associated with it. Knürr is part of Emerson Network Power.

Knürr is certified in accordance with EN ISO 9001 and EN ISO 14001, and its quality management continuously guarantees the highest standards in all areas of the company.

Knürr Elicon® Workstation Systems in Practice

Applications and Capabilities

The requirements for **modern workstation designs** are constantly increasing. And regardless of "where" you work, whether it is in a call centre, a security control station, at an electronics or programmer workstation or computer control station, the decisive criteria here is always "how".

The **optimal design** of the working environment - and this is increasingly more evident - enhances the motivation and efficiency of every individual employee. Because corporate success can only be truly realised when functionality and flexibility, quality and safety, timeless design and, needless to say, **ergonomics** result in a successfully implemented synthesis. Our workstation systems have proven to be a crucial contribution in this respect.

CON20091

CON20037

CON20085
Heidenhain, Traunreut

The **Knürr Elicon® workstation range** complies with all current EU guidelines for safety in the workplace for office and monitor workstations. The basic modular concept enables flexible and individual combinations. Knürr Elicon® consequently provides all the advantages of a forward-thinking end-to-end system.

CON20040
DymlerChrysler, Berlin

1 CON20064

2 CON20042

3 CON20043

Knürr Elicon® Strong points

- 1 **Modular construction**
Simple link-up of the modules enables individual room planning.
- 2 **Flexible working heights**
Working heights optionally adjustable at 20 mm increments (can also be changed at any time) meet ergonomic requirements.
- 3 **Cable management**
Spacious horizontal and vertical cable ducts are component parts of the basic equipment. Convenient access to the cable duct from above through the desk and system superstructure sliding sections.
- 4 Cables are routed in the cable ducts using **removable covers** inside and outside on the side panels.
- 5 **Providing electricity**
Cable troughs and crosspieces are equipped with a cap extrusion for easy mounting of socket strips and installation components. Electricity is consequently provided to a large extent as, "individually".
- 6 **Ergonomics**
Keyboards are placed conveniently on the fully extendable keyboard extension with ergonomically inclined, strong and stable telescopic slides.

Knürr Elicon® Connector Side Panels/Closing Side Panels

Connector/closing side panels

- Vertical cable routing in the spacious cable duct
- Sheet steel cable duct covers with hinge function for easy cabling
- Mounted superstructures (rear), add-on levels, and other components
- Mounting option for additional foot stabilizer at the rear to increase stability with add-ons
- Preassembled lock strips for simple and secure worktop mounting (680-760 mm, increment 20 mm). Any work height can be set at any time simply by turning a screw.

Connector Side Panels

- Segmented cable duct cover on the outside and inside

Closing Side Panels

- Full-length cable duct cover on the outside
- Segmented cable duct cover on the inside

Variants

Type 1

- Side panel with short stabilizer for worktops with depth 700 mm

Type 2

- Side panel with long stabilizer for worktops with depths 800/900/1000 mm

Material/finish

- Extruded aluminum with die cast aluminum stabilizer and head piece, antistatic powder-coated texture
- Cable duct cover: Sheet steel, rolled, antistatic powder-coated texture

Color combination

Final digit of order number .2:

- Metal parts: RAL 7035 light grey

Design elements: RAL 5003 sapphire blue

Knürr Elicon® Keyboard Drawer

Width: 675 /610 mm

- The keyboard drawer creates space on your desktop
- Leg space is guaranteed in both the pushed in and the pulled out position
- Can be upgraded at any time

Material / Finish

- Guides: sheet steel, powder-coated texture, light-grey
- Keyboard drawer: plastic PS-06

Colour

Coloured, light-grey

Load rating

50 N (static surface load)

Note

The keyboard drawer cannot be used with a desk width of 800 mm!

Smaract 19" Pedestal for Knürr Elicon®

CON20051

- 19" Pedestal, installation height, 12 HU
- 19" T-slot extrusion for variable mounting of installation components
- Shortened bottom on the rear metal door
- Cover panel with cable port on the rear, top
- For components in accordance with IEC 297-3

Material

- Extruded aluminium
- Corner connector, die-cast aluminium
- Covers, powder-coated texture
- Glass door: sheet steel with single safety glass panel
- Metal door: sheet steel

Model

IP 20

Space solution

82% of the basic surface can be used as space for installation and cable routing

Finish

- Basic frame: polished
- Covers, front and rear doors, RAL 7035 light-grey

Tests

- Safety in accordance with EN 50298 and EN 60950
- Protective conductor/earth in accordance with DIN VDE 0701-1
- IP test in accordance with DIN EN 60529

Supply schedule

- 1 Basic frame
- 2 Closed side panels
- 1 Shortened rear door
- 1 Cover panel with cable routing
- 2 19" Aluminium vertical extrusions, at the front, with T-slot
- 1 Earthing set
- 1 Assembly kit
- 1 Mounting instructions

Knürr Elicon® as Electronics Engineer Workstation

1 RAP00197

Flexibility

- 1 Individual combination and positioning of the functional modules/components
- 2 Quick start-up operation with pre-assembled and wired structural units
- 3 Easy exchange of modules/components on the Rapomos superstructure with integrated power supply bus system, and consequently, optimum adjustment
- 4 Variable system link-up with the extensive Elicon desk and superstructure range

 You will find installation components
 in the current *workstations for
 electronic engineers* brochure

Electronics Mini Distributor Rack

Strong points

1 RAP00133

2 EAP20076

EAP20013

1 The Electronics Mini Distributor Rack extends the basic desk with additional installation options of electronic components up to 91 mm installation depth in the horizontal pitch raster.

2 Design
The Electronics Mini Distributor Rack is based on an innovative extruded aluminium extrusion. T-slots and screw-in-slots are used for fixing trade standard installation technology.

3 Flexibility
Flexible use of the most varied electrical components in screw-in-slots provided for this purpose.

4 Electrical safety
With the antistatic powder-coated aluminium extrusion all discharge processes take place controlled. Electrical safety with front panels earthed with earthing spring strips.

■ Separation of data and power carrying cables with cable separator.

■ **Reduced installation time**

- Pre-wiring of electrical components through to complex complete wiring.
- Innovative plug technology reduces the 4-way bolting to 2 screw connections per horizontal pitch.

Mini Distributor

For Knürr Elicon® Electronic Workstation

- Extruded aluminum mini distributor, powder-coated, antistatic texture.
- T-slots and screw-in-slots are used to mount trade standard installation technology.
- Front mounting of standardized 3 HU front panel sections.
- Side adapter for mounting on the Knürr Elicon® workstation system.

- Adapter: Sheet steel, antistatic powder-coated texture, RAL 7021, dark grey

■ **Attention!**

Empty panels must be covered with front panel sections to ensure protection against electric shock.

■ **Supply schedule**

- 1 mini distributor
- 2 mounting adapters
- 1 mounting instructions
- Mounting material

■ **Note**

You will find installation components in the Workstations for Electronic Engineers brochure

Rapomos® Geräteträger-Aufbau Starke Argumente

1 EAP20016

1 EAP20039

2 RAP00133

3 RAP00193

1 The Knürr Rapomos® Equipment Carrier extends the basic desk with additional installation options of electronic components that are over the 91 mm installation depth in the 19" and horizontal pitch raster.

2 Flexibility
The Knürr Rapomos® superstructures can be easily and flexibly equipped with modular electronic components and 19" plug-in units.

- Individual combination and positioning of the functional modules/components in the equipment carrier.
- Fast start-up with preassembled and pre-wired equipment carrier units.
- Easy swap-out of modules in the Knürr Rapomos® Equipment carrier.

Electrical safety
The Knürr Rapomos® Equipment Carrier is a sheet steel construction for improved heat dissipation, shielding and electrical safety.

- Antistatic powder-coating on every level provides optimum protection of electronic components.
- All functional modules are CE-compliant and conform with the European standards concerning safety and EMC.

3 Mechanical safety
Additional load rating of the fully equipped 19" superstructure of max. 750N over the entire width.

EAP20014

Knürr Rapomos® 19" Superstructure Rack, 3 and 6 HU

- For mounting 19" equipment and 19" frames
- Superstructure rack with connection cable, approx. 2.5 m with protective contact plug
- Max. installation depth: 445 mm
- Assembly-set tilt setting of +/- 5°
- Variable height adjustment
- High load rating of the 19" superstructure per 19" plug-in unit
- Additional storage levels with high surface load capacity of 750 N

Knürr Elicon® Control Console

Applications and Capabilities

The migration of PC technology to control stations and measurement consoles for controlling and monitoring work results in the ever increasing deployment of Knürr Elicon® products. The most simple integration of technology conceivable, flexibility and future-orientation, regardless of whether CRT or TFT monitors are utilised. Leg space across the entire width and on request design of free-form worktops make Elicon the perfect control station in 24-hour operation environments.

- Total width of the modular panels mounting, 1080 mm

Knürr Elicon® Control Station

Height-adjustable

35

CON20014

CON20063

Elicon Control Station Height-adjustable

1. Advantages through height adjusting

- Changes between sitting and standing positions
- Worktop height adjustment to the respective work purpose
- Dynamic working conditions
- The workstations are available in widths: 800, 1200, 1600 and 1800 mm; side panel, H 1249 mm

2. Setting range

- Workplace guidelines and standards require sit/stand workstations to have a setting range of at least 440 mm (680 mm – 1120 mm). Our spindle stroke system has a setting range of 500 mm; this results in an adjustable range of 680 mm - 1180 mm

3. Drive

- Our electronic workstation height adjustment detects the different weights and synchronizes the drive at "always level".
- The stroke is 37 mm/sec.
- Fully driven out in 13.5 sec.
- Pleasant drive sound
- Two fixed heights programmable > personal assignment of the respective ideal position of the user

- Miniaturization makes the drive practically invisible
- Synchronized control in small switching unit in the cable duct
- Control console in the access area under the worktop
- Operating time, 6 min/hour and 2 minutes permanent
- 1500 N (max. surface load)

Note

Model available on request with short side panels!

Further worktop solutions possible

Ergonomic and robust desktop edge

- Warm synthetic materials ensure a pleasant surface temperature to positively influence the user's sensation and perception on touching and seeing the surface
- Knürr guarantees long lifecycles by using resistant and robust materials

Knürr Elicon® Office Strong points

CON20086

CON20056

- The ideal supplement to the Knürr Elicon® computer control station or Knürr Elicon® control console.
- The office elements of the Knürr Elicon® product line are the perfect supplement for computer control stations and control consoles or they can be used as independent office equipment.
- This product meets all international requirements for ergonomically formed monitor workstations. The two desk depths, 800 mm and 900 mm, and the height adjustment at increments of 20 from 680 to 760 mm enable an optimal adjustment for both the employees and the different monitor sizes.
- The integrated, standard version horizontal cable duct enables tidy, orderly cable routing. And of course, a cable duct is also included with the corners.
- Adapting TFT monitors and accessories via functional rail with workstation superstructure. Three different widths are available.

CON20011

Knürr Elicon® Office Side Piece

- Preassembled lock strips for simple and secure mounting of the work levels (680 - 760 mm, increment 20 mm). Can be set at any work height, at any time, simply by turning a screw.

- Material / Finish**
 - Extruded aluminium with diecast aluminium stabilizer and head piece, antistatic powder-coated texture
 - Cover: plastic ABS

- Colour combination**

Emerson Network Power is the global technology leader in numerous areas, and a recognized expert in helping to secure business-critical processes, and therefore contributes to “business-critical continuity.” A whole range of the most varied applications, including the tried and tested Knürr rack system solutions and the accompanying thermal management, ensures the required network stability with maximum technological adaptability at the same time.

Knürr system solutions in the world of information and network technology are part of an adaptive architecture from Emerson Network Power, which flexibly adapts to changes concerning security, high-density and all associated capacities. Companies are provided sustainable and long-term benefits from the high IT availability, operative flexibility and impressive reduction in investment and operating costs.

The Knürr Technical Furniture business unit develops, produces and distributes technical workstation systems for control consoles, operation control centers and electronics labs, as well as mobile equipment carriers for the automotive and medical technology industries.

Knürr AG is recognized around the world as one of the leading developers, manufacturers and distributors of rack and enclosure platforms in the indoor and outdoor area, including all relevant active/passive components in 19” construction and the technologies associated with it. Knürr is part of Emerson Network Power.

Knürr is certified in accordance with EN ISO 9001 and EN ISO 14001, and its quality management continuously guarantees the highest standards in all areas of the company.

Mobility In Practice

Modular Standard Solutions

Whether it be the workshop area, electronics lab, in the office or in medical technology applications – our extensive standard range provides diverse solutions for the safe and secure mobility of valuable equipment.

Our modular designs enable versatile trolley configurations, immediately or at any time later on.

For demanding anti-static environments Knürr provides various trolley systems – ranging from robust transport trolleys through to the fully equipped measurements and diagnostics trolley.

Ergonomic details also simplify daily tasks in a wide range of environments.

An extensive range of accessories supplements Knürr's mobile equipment carriers as requested by the customer: Flat screen holders, anti-static castors, isolating transformers and leakage detectors, cable routing elements and all kinds of accessories for the medical sector.

Stability

- Total load rating of up to 2100 N
- Worktops each with up to 800 N load rating
- High stability with low-lying centre of gravity
- Torsional strength with stable aluminium extrusions on die-cast aluminium stabilizers and cross-piece of sheet steel
- Optimal stability for equipment set up in the trolley with raised edges all around the worktop

Convenience

- Optimisation of operation with additional module components, such as
 - Cable duct
 - Rear panel
 - Euro mains distributor
 - Master switch
 - Socket strip
- Ergonomically optimal adjustment with
 - Keyboard extension with side mouse table
 - Tilttable shelves
 - Pull-out shelves
- Effortless management of obstacles and uneven floors with Ø 125 mm large smooth-running castors
- Positioning with 2 lockable castors
- No marks and scratches on the doors, panels and fittings due to the integrated plastic impact protection

Variability

- Sheet steel and ESD model components
- Modular designs enable numerous individual models
- Versatile applications ranging from the simple storage trolley to the complex medical trolley
- Simple and quick adjustment without special tools

Knürr DacoMobile® system components

Technical data

MOB20051

- Modules can be installed in 50 mm increments
- Smooth-running castors, Ø 125 mm, two with stoppers

Material

- Basic rack consists of:
- Extrusions: extruded aluminum
 - Rockers: die-cast aluminum
 - Crosspiece: sheet steel
- Worktop:
sheet steel or plastic
- Other modules: combination of plastic with sheet steel and laminated sheet or sheet steel

Finish

- Metal parts: powder-coated texture
Laminated sheet: fine-textured
Plastic parts: coated texture

Color

- Extrusions, rockers, castors:
RAL 5003, sapphire blue
or RAL 7021 antistatic
Modules:
RAL 7035, light gray
Antistatic castors: black

Maximum static load rating

- Per basic rack: 2,100 N
Per castor: 750 N
Surface load per worktop:
up to 800 N

How supplied

- Fully assembled

MET0003

MET 20000

MET00034

MET00037

■ Variability

- A completely individual mobile trolley can be put together from a basic trolley in 2 heights, 3 colors and 5 module components.
- Ideal height adjustment with variable height setting of the shelves

■ Stability

- High load rating:
 - up to 600 N per worktop
 - up to 2200 N for full trolley
- High stability with advanced sheet steel construction

■ Functionality

- Suitable for the most varied areas of application: e.g. receiving goods, picking up goods, PC or printer station

■ Cable management

- Safe cable routing with two cable ducts integrated in the extrusion
- Clear and orderly cable management with integration of accessory parts, e.g. a socket strip, which can be mounted on the extrusion.

■ Well-thought out solutions

- Vision and contact protection provided by the easy "on-off" rear panel, no tools needed
- Orderly arrangement of small material with drawer module with removeable small parts tray
- Smooth running 3/4 pull-out "Quattro" guide

■ ESD versions

- Safety and protection in demanding ESD environments provided by antistatic castors and antistatic powder coating.

BIL00071

BIL00072

BIL00107

Knürr EliMobil® Strong points

■ Aesthetics

- Modern and slim look with dynamic shapes
- Extrusions and die-cast rockers in modern design with narrow crosspiece
- Side panels of the shelves dynamically shaped
- Cable ducts are aesthetic and space-savily integrated into the extrusion

■ Functionality

- High EMC safety with separate cable routing of mains and data cables
- Storage space in the crosspiece for socket strips and excess cables
- Space-saving with optional use of surface areas with 2 basic widths* (450 mm and 550 mm)
* useable internal dimension between the extrusions
- Worktop can be loaded up to 300 N
(overall load rating of the trolley: up to 1800 N)

■ Variability

- Numerous individual models possible
- All modules can be combined and mounted in the easiest possible way
- Individual configuration with adjustment of the installation components at 25 mm intervals
- Simple and quick adjustment without special tools

■ Convenience

- Easy to clean with coated surfaces
- All surfaces are corrosion-free, impact and scratch-proof and acid and disinfection agent-resistant
- Vibration-free and noiseless transport with special rubber smooth-running castors Ø 100 mm

BIL00237

Knürr EliMobil® System Components

Technical data

- Modules can be installed at increments of 25 mm

■ Maximum static load rating

- Per basic frame: 1800 N
- Per castor: 750 N
- Surface load per worktop: 300 N

■ Material

- Basic rack consists of:
- Extrusions: extruded aluminium
 - Rockers: die-cast aluminium
 - Crosspiece: sheet steel
- Worktops: sheet steel/plastic
Storage shelf, storage tray: sheet steel
- Drawer module consisting of:
- Main unit, panels: plastic laminate-coated

■ Finish

- Metal parts: powder-coated texture
- Laminated sheet: fine textured
- Plastic parts: coated texture

■ Color combinations

Final digit of order number.2:

- Basic frame: RAL 7035 light-grey
- Plastic handles and caps RAL 5003 sapphire blue
- Castors: RAL 9011, graphite black

Knürr WerkstattMobil® Strong points

■ Standard trolleys

- Pre-configured standard trolleys for diverse use
- “Starter”
- “Profi”
- “Expert”
- Basic rack as the basis for individually set up mobiles

■ Functionality

- Robust equipment trolley for securely holding test/ measurement and diagnostics equipment, cables and documentation
- Compact structure for working in space-restricted areas
- The storage tray can be tilted by 15° and provides space for a diagnostics device and laptop
- Storage shelf and drawer can be mounted in 50 mm height increment
- Integrated cable hooks ensure tidiness and order

■ Variability

- All modules can be combined and mounted in the easiest possible way
- Simple and quick adjustment without special tools

■ Convenience

- Easy to clean with coated surfaces
- All surfaces are corrosion-free, impact and scratch-proof, and acid and disinfectant-resistant
- Vibration-free and noiseless transport with special smooth-running castors – Ø 125 mm

MOB20080

Isolating Transformers – ALN/ALE

ALN: For switch-on peak limit there are two NTCs in the input power circuit before the transformer.

ALE: The switch-on peak limit is set via an electrical relay in the input power circuit, which ensures "soft switching-on".

Basis of EC Declaration of Conformity in acc. with Directive 93/42 EEC, Annex I:
EN60601-1, EN60601-1-1
EN60601-1-1-2 (EMC)
EN14971

Dimensions
Width – 385 mm
Depth – 286 mm
Height – 135 mm

Supply schedule
1 isolating transformer
1 mains cable, 2.5 m
with protective contact plug

How supplied
Flat-packed kit

OEM

Individual solutions

Our standard modules mean the possibilities for unique originals are practically unlimited.

Help us with your requests! Ask us about your original and stand out on the market with your equipment trolley with customized design, harmonized with your company image (CI/CD).

Our expert **Design and Technology** Team will be happy to optimally and specifically meet all customer-specific requirements – assuming the appropriate batch sizes.

“Avail of our long years of **experience**, which we use to ergonomically, technically and optimally incorporate our mature and flexibly adjusted product platforms and components into your **individual solution**.”

MOB20079

MOB20084

MOB20026

Design and function

Design

Using the most modern CAD applications, we design your products, which set new standards in terms of technology and aesthetics. On the basis of the planned details, 3-D views, design studies and volume models emerge, which represent the most realistic state of development progress and enable modifications in line with your wishes at absolutely any time.

Your company-own corporate design is also integrated with our proposals for materials and color. Ultimately we ensure a smooth technical and technological integration while complying with UL, CSA, VDE or TÜV/GS standards. Only when these stages have been fully completed, can the first prototype be produced.

Exemplary results

Production and logistics

After production release by the customer our sophisticated **logistics concepts** go into operation. Customized planning procedures are integrated and smoothly implemented in our **Supply Chain Management**.

We produce application-specific equipment trolleys in ultra-modern **industrial production procedures**.

And in the production phase our employees guarantee the best possible end product with their long years of experience in parts production, packaging and shipping, supported by our integrated **quality assurance procedures**.

This also includes extensive **packaging expertise**, equipped for global shipping and the toughest environmental conditions.

Emerson Network Power is the global technology leader in numerous areas, and a recognized expert in helping to secure business-critical processes, and therefore contributes to “business-critical continuity.” A whole range of the most varied applications, including the tried and tested Knürr rack system solutions and the accompanying thermal management, ensures the required network stability with maximum technological adaptability at the same time.

Knürr system solutions in the world of information and network technology are part of an adaptive architecture from Emerson Network Power, which flexibly adapts to changes concerning security, high-density and all associated capacities. Companies are provided sustainable and long-term benefits from the high IT availability, operative flexibility and impressive reduction in investment and operating costs.

The Knürr Technical Furniture business unit develops, produces and distributes technical workstation systems for control consoles, operation control centers and electronics labs, as well as mobile equipment carriers for the automotive and medical technology industries.

Knürr AG is recognized around the world as one of the leading developers, manufacturers and distributors of rack and enclosure platforms in the indoor and outdoor area, including all relevant active/passive components in 19” construction and the technologies associated with it. Knürr is part of Emerson Network Power.

Knürr is certified in accordance with EN ISO 9001 and EN ISO 14001, and its quality management continuously guarantees the highest standards in all areas of the company.

Emerson Network Power

The global leader in enabling business-critical continuity

Knürr Orga-Cabinet Technical data

- Wooden main unit bonded
- Cabinets with/without plinth are height-adjustable with 4 levelling screws
- Superstructure cabinets without plinth and levelling components
- All cabinets can be locked with cylinder lock or coloured olive-shaped handle with cylinder lock
- Sliding door cabinets are fitted with a centre panel

Material

- Main unit, doors, side panels, bottom covers and rear panels: three-layer particle board, FP/Y E1 version, directly coated, fire protection class B2
- Compartments and shelves: sheet steel

Finish

- Main unit: laminated particle board, fine texture
- Metal parts: powder-coated texture

Dimensions

- Heights: 2, 3, 4 FH
Cabinet height 720 mm, adjustable with levelling feet to cabinet height 750 mm
- Depths: 430 mm (with post-formed top 440 mm)
- Widths: 800, 1200 mm
- Thickness: Main unit, bottom covers 22 mm
Doors, side panels 19 mm
Rear panels 13 mm
Glass doors 6 mm

Colour

- Final digit of order number .2:
- Main unit and sliding doors: light-grey
 - Shelves, RAL 7035 light-grey
- Final digit of order number .5:
- Main unit and shelves: RAL 7021 dark-grey
 - Sliding doors, beech finish

Standards

- DIN 68761 for main unit and post-formed top
- EN 438 for coating material
- DIN 16926 for high pressure laminated sheet

Note

Cabinet cover as postformed top: A postformed top can be set on top of each cabinet. This top is adjusted to the Knürr Elicon® technical furniture range and must be ordered extra. For 2 U-cabinets that are linked to workstations, there is a version with integrated postformed top, which are then adjusted to the worktop height.

Supply schedule

- 1 Wall-standing cabinet with sliding doors

How supplied

- Assembled

Knürr Orga-Cabinet

Strong points

1 ELI00518

- 1 A series of cabinets are available without plinth and can therefore be used as stacking cabinets. These cabinet variants enable numerous individual combinations to be created.
- 2 Even heavily loaded cabinets can be comfortably adjusted with the height adjuster from above.
- 3 A single safety glass panel is always used with cabinets with glass doors. All cabinets can be locked, including those with glass doors.
- 4 The free-standing drawer units can be height-adjusted so that they can be placed beside the workstation (desk), while mobile drawer units are mainly placed under the desks and are nonetheless always mobile. Drawer trims and handles create an ergonomic unit - safe and easy to handle.

1 ELI00071

3 ELI00073

- 5 All drawer units can be locked and have a drawer catch.
- 6 The utility tray runs on plastic runners, all other drawers run on telescopic slides, whereby the 6 OU drawer can be fully pulled out.

The telescopic slides are covered to prevent any kind of injury.

4 ELI00463

- 7 Additional shelves and other accessories supplement the cabinet range.

The partition walls enable a new form of office arrangement: individual modules can be rapidly combined to enable various configurations and at any angle from 90° to 180°. The modularity allows the employee to work in quiet and concentrate, or - if required - to arrange a communicative workstation environment. The partition walls are available with a comprehensive range of accessories, can be easily mounted and can be set up at absolutely any location.

Modular LCD Monitor Wall

- Increasing information density easily organized on several displays
 - More display space – resolution stays the same
 - High resolution increases legibility – character size stays the same
 - Increased system security – other displays can accept data
 - Mix of video and computer data – either via direct connection or video split computer
- Diverse sizes and monitor combinations are possible on request**

LCD monitor wall areas of application:

- TV studios, news studios, satellite monitoring
- Process display in control rooms, control and measuring stations
- Network Operation Centers (NOCs)
- Data centers – computer monitoring
- Operation control centers – police, fire department, rescue services
- Municipal traffic monitoring, security systems, video monitoring
- Airport and train station information terminals
- Reception areas

Practical benefits

- Low installation depth/lower space requirement – good fit for small control rooms
- The monitor wall can be positioned in the room, regardless of what the building's walls are made of
- Optional rear panel covers provide optimum protection for cables and plugs
- A mixture of different display sizes is also possible
- Professional cable management – integrated cable management in the rack side panels for professional installation
- Optional base cabinets create space for computers, power supplies and documentation
- The base cabinets provide spacious cable routing to the side panels of the monitor wall rack

VHP21051

Monitor Wall Complete with 4 Flat Screens 40"

- Flat screen mounting between the monitor wall vertical extrusions
- Stable and secure connection
- Monitors can swivel; tilt angle +15°/ -5°
- Base cabinet provides space for computers, all kinds of devices, and documentation
- Perforated rear panel with cover provides privacy screen and dust protection, and increases safety/security

Supply schedule

- 2 Knürr Elicon® range side panels; with integrated vertical cable routing and base stabilizers at the front and rear for the highest possible stability
- 2 crosspieces for fixing the TFT adapter; with integrated horizontal cable routing
- 4 TFT wall mounting brackets; tiltable (see page 9)
- 4 40" LCDs (Brand: Subject to manufacturer and technical changes due to short product cycles on the display market.)
- Network cable and VGA cable for 4 LCD monitors
- 1 base cabinet, consisting of 2 sliding door cabinets with full length worktop with post-forming edge
- Perforated rear panel, removable, consisting of 3 segments
- Mounting material

How supplied

Flat-packed kit, partially assembled

Dimensions

- Height 2,064 mm
- Total width 2,085 mm
- Clear width 1,975 mm
- Depth 330 mm
- Depth with base stabilizers 1,110 mm
- Base cabinet:
 - Height 835 mm
 - Width 1,975 mm
- Worktop depth 440 mm
- Shelves' useable depth 360 mm

Material

- Side panels – extruded aluminum extrusions with aluminum die-cast stabilizers and head pieces
- Sheet steel cable duct covers, rolled
- Crosspieces – sheet steel
- TFT wall mounting bracket – extruded aluminum extrusion with sheet steel monitor adapters
- Perforated rear panel – sheet steel
- Base cabinet – high pressure plastic laminate, melamine-coated

Finish

- Side panels – powder-coated, RAL 7021, dark gray
- Crosspieces, TFT wall mounting bracket and perforated rear panel – powder-coated, RAL 9006, white aluminum
- Base cabinet: main unit – melamine-coated, dark gray; cover and sliding doors – melamine-coated in beech finish

Control Station Chair, Mr. 24

- Seat and back support upholstery generously dimensioned for high sitting comfort
- Integrated lumbar support height and depth adjustment via ergonomically well situated operating elements on the rear side of the backrest
- Basically with slide seat with sitting depth setting
- Headrest in leather, chromium-plated support
- Seat and backrest move in complete synchrony with the body
- Adaption to different user weights enables individual spring force setting
- Backrest inclination, practically continuous locking
- Constant back support, even with working position reclined way back
- Vision height setting protected against dirt by sleeve packet
- Extremely robust armrests for 24-hour use
- Soft castors for hard floors
- GS tested
- British Standard

Technical data

- Sitting depth setting from 400 to 460 mm
- Backrest width and height: 470 x 600 mm
- Seat width and depth: 470 x 400 mm
- Headrest height adjustment: 50 mm
- Headrest width and height: 360 x 150 mm

- Similar mechanism configured for a body weight of up to 200 kg
- Backrest inclination up to 32°
- Seat height setting from 420 to 515 mm
- Armrest height setting from 190 to 300 mm
- Armrest width setting: 2 x 50 mm
- Armrest depth setting: 80 mm

Material

Cover: Tec wear and tear-proof cover material

Recaro Guard L Control Station Chair – 24-Hour Chair

- Tilt and height adjustable headrest for relaxed working
- Twin air chamber/pelvic support
- High durability materials, both with the frame structure and with the covering materials (meets highly demanding requirements, as based on car seat designs)
- Armrests can be folded up and tilt adjusted
- Tested for the most extreme load rating
- Backrest inclination can be adjusted with hand wheel operated on both sides
- Extremely comfortable sitting provided by tightly structured upholstery
- High load rating mechanism with cantilever function
- Individual weight settings (approx. 60 - 130 kg)
- Extra-strong gas spring for height adjustment
- Well-dimensioned base for standing stability (external diameter: 720 mm)
- Adjustable thigh support
- Soft castors for hard floors
- GS tested
- British Standard

Technical data

- Backrest width and height: 520 x 620 mm
- Seat width and depth: 550 x 560 mm
- Armrest width and length: 74 x 324 mm
- Headrest height adjustment range: 0 – 80 mm
- Headrest angle adjustment: 0 – 35°

ERG20063

Control Station Chair, Controller

- For 24-hour use in control and monitoring centres, operations control consoles or air traffic control towers
- Wide ergonomically formed upholstery
- Side surfaces covered with leather, centre area with material for excellent humidity regulation and breathing
- Head support can be adjusted in height and tilt
- Backrest tilt, 0°-16°
- Dynamic state (seat and backrest surface in combined movement) and free springing state (fixed seat and backrest surface but springing setting)
- 10 cm wide, lift-up and height adjustable armrests
- At the lower back, the backrest is equipped with an inflatable pelvic support
- The pivot point for the backward tilt of the Controller is directly under the front of the seat pan. The feet consequently always remain on the floor and the blood flow is never disturbed.

Technical data

- Width and height of the backrest 52x60 cm
- Width and height of the seat surface 52x60 cm
- Width and height of the headrest 52x60 cm
- Width and length of the armrests 9.5x34 cm

SAM80004

Industrial Chair

Technical data

The Sintec chairs each consist of a “basic” chair and the corresponding padding set (seat surface and backrest) of material or integral foam. The extremely sturdy fitting is made using Velcro strips.

Ergonomic seating design

An anatomically shaped seat surface automatically supports the correct sitting position and provides permanent contact for the upper body to the backrest. The integrated pelvic support prevents the pelvis from sagging. The vertebra is maintained in its anatomically natural S-shape, the discs are significantly relieved and sitting with a “round back” is never permitted, right from first use. The rounded-up front seat edge reduces pressure strains in the upper thigh area. Blood build-ups in the legs is also prevented. An integrated “anti-slide arch” prevents the body from sliding forward both when sitting leaning forward and when leaning back. The supportive contact for the backrest is always maintained. Spacious seat surface dimensions provide optimal sitting comfort. Seat width 48 cm, seat depth 42 cm.

Backrest designed with the body shape in mind

The flexible upper part of the backrest provides springing support for all body movements. The upper body is relieved, the blood flow of the back muscles is provided with the correct support.

The integrated spinal support ensures optimal relief for the back in the vertebral area and prevents sitting with a curved back. The specifically reduced backrest width in the upper area provides optimal room for movement for arms and upper body. A high backrest (420 mm) supports the entire vertebra over a large surface. The grooves worked into the seat surface and backrest ensure optimal air circulation and a healthy micro-climate of the work-environment chair.

Office and EDP - Workstation Lamp "Delight"

Technical data

- Office and EDP workstation lamp "Delight"
- 2 Compact fluorescent tubes, 9 watt each
- Coated parabolic grid in luminaire head prevents direct or reflected glare
- Supply voltage: 230 V/50 Hz
- Series reactor in the mains plug
- Lamp casing made of impact-resistant plastic with 3-D joint
- Joints, spring relieved
- Weight, 2.2 kg

Dimensions

- Column 445 mm
- Arm 400 mm
- Luminaire head 223x210x57 mm
- Mains cable, approx. 2.5 m, Euro plug

Colour

- Rods/bars: RAL 9005 black
- Luminaire head: RAL 9005 black

“Tycoon” Stand Lamp

Technical data

- 4x55 watt compact fluorescent lamps
- Power consumption: Approx. 235 watt
- Weight: Approx. 19.8 kg
- Base, free-standing
- Connection: Safety plug, approx. 3.0 m
- Supply voltage: 230–240 V / 50/60 Hz
- Light distribution: Mostly indirect
- Luminaire head can be rotated by 90°
- Head connection can be rotated by 45°
- Reflector removable, for easy cleaning
- Lamp base: C-shaped, flat
- Switch: Multifunctional switch
- Operating device: EVG

Dimensions

- Lamp body: 609x936x47
- Total height – 1,892 mm
- Round steel tube, diameter, 35 mm

Material

- Lamp housing: Aluminum/plastic
- Lamp rods/bars: Round steel tube

Finish/colour

- Lamp body and lamp bars/rods: Silver-metallic

Supply schedule

Knürr DI-STRIP® Strong points

- 1 Robust!**
Plug field protected with raised casing edges.
- 2 Stability**
High stability and torsional strength provided with closed sheet steel casing.
- 3 Electrical safety**
Full power to all connected consumers with full-length brass busbar. Shock hazard-proof and low contact resistance with double spring contacts.
- 4 19" installation**
Optimum use of space with 19" installation:
- With low height, 1 U (44.45 mm)
- With 45° positioning of the sockets
- 5 International compatibility**
Numerous standard products in accordance with international standards. Special models on request.
- 6 Flexibility**
Plenty of room for movement with 2.5 m power supply cable. Flexibility provided by standard plug with dual earthing system.
- 7 Aesthetics**
Appealing design with extruded casing and design side panels in visible area.
- 8 Cost-conscious**
Quick and easy mounting on the rack extrusion.
- 9 Universal**
1 and 3-phase systems.
- 10 Modularity**
Socket strip modules can be easily combined using plug-in connections.
- 10 Connectability**
Proven GST18 plug-in system for connecting socket strip modules.
- 11 Certifications**
Worldwide approvals and certifications are a quality feature.

DI-STRIP GST18 PLUG SYSTEM (WIELAND) COMPACT Standard DIN 49 440 (VDE)

- Quick and efficient plug connection system
- Plug-in electro-installation in place of conventional wiring
- Speed:
 - Due to simple plugging together of preconfigured elements
- Flexibility:
 - Due to the cable (cable length)
- Efficient:
 - Easy exchange of socket strips, without cabling expenses
- Safety:
 - Due to plug system, all faulty installations are excluded
- Space-saving:
 - Use of protection and switching functions can be extended to additional socket strips with no loss of plugging space by extending cable (maximum load rating of 16 A)

Material / Finish

Casing: closed sheet-steel extrusion, zinc-plated, powder-coated texture
 Plastic parts: polyamide PA6 (UL 94 V0), recyclable
 Internal conductor: full-length busbar, brass

Dimensions

Socket spacing: 50 mm
 Height: 45.5 mm
 Casing width: 44.4 mm (= 1 HU)
 Cable feed: 2.5 m

Approvals

CE label in accordance with the low potential guideline 2006/95/EWG, EMC guideline 2004/108/EWG
 VDE Certificate

Colour combination

RAL 7035 light-grey
 Plastic parts: RAL 7035 light-grey

3-Phase in workstations for electronic engineers with GST18 Strong points

1 DOS20132

Effort

In many sectors like in the workstation for electronic engineers

1 Solution

3-phase plug system, e.g. 96 A and more with redundant feed

2 Advantages

- Modularity
- Plug-in capability (no wiring required)
- Expandability
- Cascadability
- Easy implementation of redundancies / UPS secured circuits
- Mix of, for example, DIN protected contacts / IEC 320 Euro systems
- Installation position freely

Knürr DI-STRIP® Classic Standard DIN 49 440 (VDE)

- Optionally with lit switch, 2-pole switching
- Socket rotation: 45°
- Cable feed: H05VV-F 3G 1.5 mm²
- Moulded right angle plug

Material / Finish

Casing: closed sheet-steel extrusion, zinc-plated, powder-coated texture
Plastic parts: polyamide PA6 (UL 94 V0), recyclable
Internal conductor: full-length busbar, brass
Cable feed: PVC

Dimensions

Socket spacing: 100 mm
Height: 45.5 mm
Casing width: 44.4 mm (= 1 HU)
Cable feed: 2, 5 m

Approvals

CE Label in accordance with the low potential guideline 2006/95/EWG, EMC guideline 2004/108/EWG
VDE Certificate

Colour

Final digit of order number .1:
RAL 7035 light-grey
Final digit of order number .6:
Casing, RAL 2003, pastel orange
Plastic parts: RAL 7035 light-grey

Load rating

250 VAC/16 A

Supply schedule

DOS20068 with overvoltage protection

DOS00306 with overvoltage protection

DOS00270 with overvoltage protection

Knürr DI-STRIP® Safety Basic Standard DIN 49 440

- With overvoltage protection
- A combination of varistors and gas discharge arresters guarantee a rapid response and high discharge capacity
- Simple but effective protection against indirect strikes and voltage spikes from the mains
- Double protection:
 - 1. Up to max. surge current resistance, transient overvoltages are reduced to non-damaging values
 - 2. If the surge current resistance is exceeded, the connected equipment is separated from the mains to protect against further overvoltage spikes (the green function display goes off). The protection module must then be changed for further use.
- To increase the protection function, a coarse filter should be switched in advance in the building installation.
- 19" Installation option (with length 483 mm)
- Socket rotation: 45°
- Cable feed: H05VV-F 3G 1.5 mm²
- Moulded right angle plug

DOS80002

Knürr DI-STRIP® Ampere Meter

- With big open LCD display
- Effective value display of alternating currents per phase (1-phase or 3-phase, depending on the version)
- LCD display rotation in 90° steps
- Display can be switched bright or dark
- Unbalanced-load warning display with 3-phase version
- Load changes signaling
- Automatic background light reduction
- Meets the highest EMC requirements (interference immunity: Criterion A; radiated emission: Class B)
- Cable : 4 m H05VV-F 5 G 4 mm² (PizzaPower M)
- Cable: 2.5 m H05VV-F 5 G 2.5 mm² (TriplePower M)
- Cable: 2.5 m H05VV-F 3G 1.5 mm² (DI-STRIP Compact M, DI-STRIP IEC320 M)

Material/Finish

- Model: PizzaPower®:
- Casing: Sheet steel, zinc-passivated, powder-coated
- Other models:
- Casing: Closed sheet steel extrusion, zinc-passivated, powder-coated texture
- Plastic parts: Vampamid 6 0024 VO (UL94), recyclable

Approvals/certificates

- CE Symbol in accordance with Low Voltage Directive 2006/95/EC
- EMC Directive 2004/108/EC: EN61326-1, EN61000-3-2, EN61000-3-3
- FCC Class B
- CSA NRTL (PizzaPower m, TriplePower M, IEC320 M)
- CB-Scheme (TriplePower M, DI-STRIP compact M, IEC320M, Ampere Meter GST18i)

Colour

- Model, PizzaPower M:
- Casing: RAL 9005 black
- Other models:
- Casing: RAL 7035 light gray
- Plastic parts: RAL 7021 dark gray

Supply schedule

- 1 socket strip with ampere meter
- 2 mounting brackets
- 2 19" mounting brackets (with 19" installation option)

Note

- Other models (e.g. Sheet J-outputs) on request
- Ampere meter model with IP interface on request

HEI00379

Distribution Box

- For mounting installation technology DIN rail components, such as fuses, clamps, relays, etc.
- In the built-in status, the mounting level can be pulled out at the front, locked in position, and as a result, significantly simplifies the wiring of the individual components
- Not with "fixed installation" model
- On request: Delivered assembled and wired
- Further versions and models on request
- Installation space for up to 22 pieces of equipment with 18 mm width each
- Mounting of the TS35 DIN rail on several levels with simple plug-in connection
- Not with "fixed installation" model
- "Snap-in" mounting of DIN rail components
- Easy access to the protective earth and neutral conductor rails from the front
- Various positioning options prepared for N and PE rails
- Not with "fixed installation" model
- Cable entry at the rear via double brush strip (optionally via bushing sockets)
- Cable strain relief on the inside and therefore accessible from the front

- Labeling strips on the front, above and below the installation space
- Installation options for power distribution with 230 V AC, but also in the low voltage range (e.g. 48 V DC)
- 19" chassis, 3 HU, depth 150 mm

Material/finish

- Covers, powder-coated texture
- RAL 7035 light gray
- Main unit, sheet steel, zinc-passivated

Supply schedule

- 1 distribution box
- Including N and PE rails, cable entry, cable strain relief, empty panel covers and earth set

How supplied

- Fully assembled

Modular Frame For mounting modular panels without tools

- Modular frame for taking module panels, who are supplied customer-specific
- The modular frame can be installed in both wooden and metal panels
- In the joint area of the module panels, an underlay strip which can be set in the 12 mm increment serves as sealing
- Module panels can be removed without tools at any time and reinstalled at any other position
- Retaining strips for the module panels are released with unlocking lever which is also supplied
- A brush strip is placed on the front of the module frame and serves for routing cables and also provides dust protection.

Colour
Modular frame body and underlay strips, RAL 7035 light-grey
Modular frame trim and retaining strips, RAL 9006 white aluminium

Supply schedule
1 Modular frame with retaining strips and brush strip
Underlay strips adjusted for modular panel widths at multiples of 120 mm
1 Unlocking lever (plastic)

How supplied
Pre-assembled

Material / Finish
The modular frame body, module frame trim, retaining strips and underlay strips are sheet steel and have a powder-coated texture

Knürr Rapomos® Equipment Carrier Superstructure

Strong points

1 EAP20039

1 EAP20016

3 RAP00193

2 RAP00133

1 The Knürr Rapomos® Equipment Carrier extends the basic desk (Knürr Dacobas® and Knürr Elicon®) with additional installation options of electronic components that are over the 91 mm installation depth in the 19" and horizontal pitch raster.

2 Flexibility

The Knürr Rapomos® superstructures can be easily and flexibly equipped with modular electronic components and 19" plug-in units.

- Individual combination and positioning of the functional modules/components in the equipment carrier.
- Fast start-up with preassembled and pre-wired equipment carrier units.
- Easy swap-out of modules in the Knürr Rapomos® Equipment carrier.

Electrical safety

The Knürr Rapomos® Equipment Carrier is a sheet steel construction for improved heat dissipation, shielding and electrical safety.

- Antistatic powder-coating on every level provides optimum protection of electronic components.
- All functional modules are CE-compliant and conform with the European standards concerning safety and EMC.

3 Mechanical safety

Additional load rating of the fully equipped 19" superstructure of max. 750N over the entire width.

Find more information in the current *workstations for electronic engineers* brochure

SAM00346

ESD Components Static-safe-set

- Complies with DIN EN 100 015 and VDE 0104
- Includes the basic components required for equipping a workstation for electrostatic protection

Technical data

- Surface resistance in accordance with EN 100 015 $< 10^7 \Omega$
- Connection contacts: press studs, 4.5 mm

Supply schedule

- Floor mat, 1200x1800 mm, wheelchair compatible
- Desk mat 600x900 mm, heat-resistant up to 500°C
- Earth wristband, variable adjusting, 1 MOhm protective resistance on the wristband side
- Earth cable, 1.5 m with contact

For decades now **Emerson Network Power** has been a recognized global leader in the business-critical systems segment. The most successful companies in the world build on Knürr's solutions, technologies and support **services**.

Integrated solutions. Integrated benefits.

With **Emerson Network Power** you can have all the benefits of a fully integrated and ready-to-use solution together with Knürr and the other business portfolios of this Emerson Division.

With us you get all products and services from one single source!

You can be 100% assured that all components work in perfect harmony with one another. Test procedures, checks and certifications underscore this claim – as prototyping does in large projects.

■ **Reliability** – Proven because high quality technologies that minimize business-critical failure points in industrial processes guarantee the greatest possible reliability of your systems.

You can rest assured that your infrastructure is in the best of hands.

■ **Everything from one single source** – One central partner for the provision, configuration, installation and support of your production processes and technologies. One call is all it takes and we will advise and support you directly via our competence centers around the world or on-site as you please.

■ **Integration** – From individual components through to complete solutions, our products and support services form one solid holistic system. All ready-to-use products that carry our name are configured for optimum interaction.

■ **Technical support** – On-site support and factory-side assistance provided by application technicians and first-class engineers are offered as required. In terms of numbers alone, Emerson Network Power has the world's strongest team of customer service specialists, trained to perfection directly in the factory. These people have the knowledge and skills to guarantee the highest possible availability, and in emergencies they will ensure the fastest possible recovery. Perfect organization reveals local strengths!

■ **Flexible configuration options** – Your requirements change continuously. Our products and technologies can be adjusted so flexibly and provide you with a cost-effective option for supporting synchronized growth with a promising future.

■ **Energy efficiency** – This has always been one of our obligations towards our customers, which is why we provide especially energy-efficient solutions that set new standards. In the end result we contribute to your infrastructure being able to effortlessly stay abreast of current and future innovation requirements.

Every product that we provide has been tried, tested and proven by us; certification in acc. with ISO 14001.

Emerson Network Power is the global technology leader in numerous areas, and a recognized expert in helping to secure business-critical processes, and therefore contributes to “business-critical continuity.” A whole range of the most varied applications, including the tried and tested Knürr rack system solutions and the accompanying thermal management, ensures the required network stability with maximum technological adaptability at the same time.

Knürr system solutions in the world of information and network technology are part of an adaptive architecture from Emerson Network Power, which flexibly adapts to changes concerning security, high-density and all associated capacities. Companies are provided sustainable and long-term benefits from the high IT availability, operative flexibility and impressive reduction in investment and operating costs.

The Knürr Technical Furniture business unit develops, produces and distributes technical workstation systems for control consoles, operation control centers and electronics labs, as well as mobile equipment carriers for the automotive and medical technology industries.

Knürr AG is recognized around the world as one of the leading developers, manufacturers and distributors of rack and enclosure platforms in the indoor and outdoor area, including all relevant active/passive components in 19” construction and the technologies associated with it. Knürr is part of Emerson Network Power.

Knürr is certified in accordance with EN ISO 9001 and EN ISO 14001, and its quality management continuously guarantees the highest standards in all areas of the company.
