REPORT STRUCTURE

INDUSTRY TRENDS

INDUSTRY ACCELERATORS

## What's in it for you:

This report will help you to receive:

- Insights on your current SAP ERP system and industry trends
- Relevant SAP S/4HANA 1909 business scenarios by line of business
- Tailored guidance and recommendations to realize the value from SAP S/4HANA

What we know about Sample Customer:

- We analyzed business process performance and usage data provided from your SAP ERP system PRD
- 6 lines of business use PRD, including Finance, Sourcing & Procurement, Sales & Service, Supply Chain, Manufacturing & Asset Management

**Business Opportunities with SAP S/4HANA**

INTRODUCTION

**NEW IN RELEASE 1909** 

REPORT STRUCTURE

**INDUSTRY TRENDS** 

**INDUSTRY ACCELERATORS** 

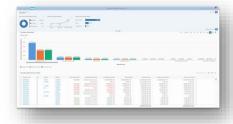

## Selected Highlights of SAP S/4HANA 1909:

#### Manufacturing:

New Predictive Material and Resource Planning

- Reduces inventory carrying costs by forecasting component demand with predictive material and resource planning.
- Supports interactive planning with simulations, considers top-level demands (e.g. product forecast), derives component and capacity demands.
- Lower inventory due to appropriately sized buffers.

### **Sourcing and Procurement:**

**Delivery Time Prediction** 

- Predicts delivery dates of raw materials and classifies the shipments into different categories.
- Enables you to react to potential material shortages proactively and to avoid production rescheduling.
- With machine learning, driving up planning and delivery reliability, while decreasing manual monitoring effort.

#### Finance:

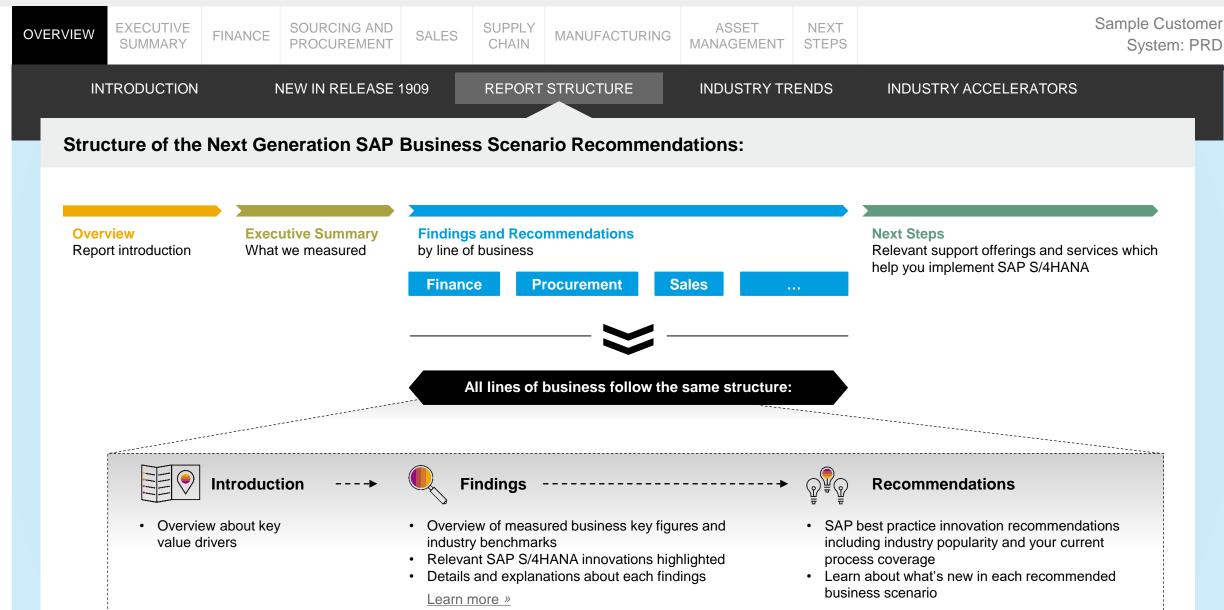

# Intercompany Reconciliation and Matrix Consolidation in Group Reporting

- Consolidated finance reporting using new matrix consolidation enables simplified consolidation capabilities.
- Evaluates consolidation perspectives individually or combined in matrix reports, and provides enhanced analysis of group consolidations.

INTRODUCTION

**NEW IN RELEASE 1909** 

REPORT STRUCTURE

**INDUSTRY TRENDS** 

**INDUSTRY ACCELERATORS** 

## **Trends in Consumer Products Industry:**

## **Key Challenges**

within your industry

#### **Empowered consumers**

- Consumers are informed, empowered and always on
- They can shop and buy from anywhere and make choices about where and how they would like to take

#### **Expanding ecosystems**

- Deliver the supply chain transparency that today's shoppers demand
- Reach consumers across channels directly in moments of need

#### **Extraordinary innovators**

- Building innovative business models
- Redefining customers expectations and gaining market shares

## **Key Trends**

within your industry

#### **Enabling new business models**

- · Monetizing content or data
- · Pursuing innovative partnerships

#### **Delivering personalized outcomes**

- Build enduring customer and consumer relationships
- By delivering on a set of outcomes, often service driven, that go well beyond traditional product focus

#### Competing as an ecosystem

- Expand the boundaries of consumer products
- · By teaming with non-traditional ecosystem partners
- · To deliver higher value at no or low incremental cost

## **Key Value Drivers**

within your industry

#### Reimagine order to delivery

- · Improve customer service
- Reduce inventory carrying costs
- · Reduce logistics costs

#### Reimagine personalized products

- · Increase revenue from new products
- · Increase revenue growth
- Reduce research and development expense

#### Reimagine operational procurement

- · Reduce procurement function costs
- Improve compliance on supplier and price policies, taxation, and regulations
- Improve cash flow with faster payments

INTRODUCTION

**FINDINGS** 

RECOMMENDATIONS

## **OPTIMIZE FINANCE:**

Reduce G/L Efforts And Financial Closing Time

- Reduction of G/L efforts is related to simplification of processes within G/L and increased automation
- Reduce financial closing time is about the reduction of days to close annual books and to complete the annual hard close on entity and corporate level, and includes the time for regulatory disclosures such as a 10-K report in the United States or similar financial statements in other countries

**Reduce Finance Costs** 

• Finance costs include all finance function-related costs such as cost of finance staff (headcount costs), external spend, technology spend and all other finance function-related spend

Go to findings »

Reduce Days Sales Outstanding

- Days sales outstanding is a measure of the average number of days that a company takes to collect revenue after a sale has been made
- A low number means that it takes a company fewer days to collect its accounts receivable
- A high number shows that a company is selling its product to customers on credit and taking longer to collect money
- Days sales outstanding calculation: [Accounts Receivables / Total Credit Sales] X Number of Days

Go to findings »

#### **Consumer Products Industry Benchmark:**

#### **Details**

What we measured

#### **Aging Distribution:**

	0-3	3-6	6-12	1-3	3+
	months old	months old	months old	years old	years old
ĺ	959	210	588	304	16.140
	5%	1%	3%	2%	89%
	5%	1%	3%	2%	5

#### **Top 5 Company Codes:**

Company Code		Items	Percent
HQR	Headquarter	8.889	49%
SA02	Sales Area France	3.205	18%
SA01	Sales Area Germany	1.395	8%
SA06	Sales Area USA	975	5%
SA09	Sales Area Japan	629	3%

## **Implication**

Understand the problem

#### **Possible Root Causes:**

- Delayed incoming payments
- Incoming payments could not be matched against open items in finance AR
- · No dunning procedures in place

#### **Possible Business Impact:**

- · Working capital: Delayed incoming cash
- Inaccurate cash & liquidity planning data
- · Unnecessary high manual workload
- Higher finance process operations costs

## **Financial Accounting**

### **Business Scenario Description**

Provide a single source of truth for general ledger and subledger applications and real-time integration to logistics with a full audit trail.

Enable self-service analytics directly from highlygranular operational data.

Demo

Industry popularity

#### **Value Drivers**

- Reduce G/L & financial closing costs Support fast, peer-to-peer intercompany reconciliation, single source of truth and automating closing tasks
- Reduce audit costs Enable standardization and automation within audit management processes
- Reduce days to close annual books Support fast, peer-to-peer intercompany reconciliation; automating closing tasks; and increasing user efficiency

#### What's new in SAP S/4HANA

- Universal ledger
  - SAP S/4HANA provides a single, universal ledger that simplifies all accounting processes.
- Simplified and streamlined process and purchase order accruals

Massive efficiencies are enabled by removing redundant steps and streamlining integration.

NEW with SAP S/4HANA 1909: Purchase order accruals are now available.

Built-in innovations

Built-in innovations such as SAP CoPilot and machine learning apps further increase the release of tremendous value by freeing up scarce human capital to focus on producing real business insight rather than mere data manipulation.

### **Debt and Investment Management**

### **Business Scenario Description**

Achieve lower borrowing costs and secure investment returns at lowest risk with real-time insights from SAP S/4HANA. Improve your capital structure with winning strategies that balance debt against equity, risk, and returns in real time.

Industry popularity

### **Value Drivers**

- Reduce of Cost of Capital and increase ROI Optimize the capital structure, balancing trade-offs, debts, equity, and risk.
- Reduce treasury operational costs Automate transaction posting and position reporting in the general ledger

#### What's new in SAP S/4HANA

- Simplified management process of foreign exchanges
  - The foreign exchange management process has been simplified with SAP S/4HANA.
- SAP Treasury and Risk Management application Most-used trade finance processes are enabled in the SAP Treasury and Risk Management application. In addition, the integration with market data providers has been made available.
- Reporting

There are new reporting capabilities with unlimited granularity, simplified front-office integration capabilities e.g. integration for cloud editions of SAP Treasury and Risk Management, and SAP Cash Management applications, as well as a cloud-based enhancement for European Market Infrastructure Regulation (EMIR) reporting.

### **Dispute Resolution**

### **Business Scenario Description**

Clarify and resolve customer payment disputes automatically to increase productivity. Increase efficiency and customer satisfaction by automating the creation of dispute cases related to invoice and payment discrepancies.

Industry popularity

### **Value Drivers**

- Reduce days sales outstanding (one time benefit)
   Establish a single source of truth regarding dispute management with documented resolution history for prompt action
- Reduce Customer Billing, Credit & Collections Cost
   Automate dispute creation and resolution, while enabling self-service, mobile access to key account receivables information
- Reduce uncollectible accounts receivable write-offs
   Clarify disputes faster, leading to prompt payments and credits when valid

47

### What's new in SAP S/4HANA

Automation, analytics and more

Cross-system automation of collections processes to deliver superior customer service.

Analytics and workflow alignment with sales, A/R, and executives to reduce DSO.

Optimized for global business services deployment.

Collaboration

Automated collaboration with external expertise. Nextgeneration intelligent invoice-matching powered by machine-learning.

· Global business services deployment

Complete process renovation for collections management and dispute resolution, Fiori Smart Business Cockpits for Accounts Receivable Managers and Accountants deliver real-time operational reporting available on any device.

# **Financial Risk Management**

### **Business Scenario Description**

Protect your assets and cash flow with real-time financial risk management using SAP S/4HANA.
Assess risks (including foreign exchange, interest rate, price, and credit risks) and manage market conditions using robust analytics.

Industry popularity

#### **Value Drivers**

- Reduce financial risks
   Create and implement real-time hedging strategies.
- Reduce operational costs for treasury
   Automate transaction posting and position reporting in the general ledger

#### What's new in SAP S/4HANA

- SAP Fiori-based reporting capabilities

  This functionality allows CAP Fiori based
  - This functionality allows SAP Fiori-based reporting capabilities with unlimited granularity and furthermore the identification of risk exposures across the organization.
- Optimized foreign exchange (FX) and liquidity planning

Hedge management capabilities as well as legal compliance and preparedness for upcoming regulatory challenges such as IFRS (International Financial Reporting Standards) 9 are enabled.

**NEW with SAP S/4HANA 1909:** Now a liquidity planning is available.

Treasury reporting

This area has been considerably enhanced with a balance sheet and FX exposure as well as credit line analysis overview pages for FX process and interest rate management.

### **Joint Venture Accounting**

### **Business Scenario Description**

Increase visibility into joint ventures and productionsharing contracts for billing and reporting. Support timely invoice handling by distributing billable and nonbillable costs to different cost centers and projects.

Industry popularity

### **Value Drivers**

- Reduce G/L efforts and financial closing time costs Increase visibility into related costs for joint venture and partner billing. Reduce uncollectible accounts receivable write-offs by capturing detailed joint venture data in realtime.
- Reduce audit costs
   Process transactions to consistently apply business rules to generate files for auditors of joint-venture partners

#### What's new in SAP S/4HANA

Joint venture accounting data model changed
 Joint venture accounting (JVA) is recording documents in
 the universal journal instead of the JVA Special Ledger.
 The finance document split is now mandatory for venture
 characteristic venture.

**NEW with SAP S/4HANA 1909:** Joint venture accounting is now available.

- Simplified asset transfers
   The methods of asset transfer have been streamlined and simplified.
- Enhanced options for document splitting
  Implementing this business function provides document
  splitting at venture, equity group and recovery indicator
  level in new general ledger. With this function, trail
  balance at venture, equity group and reinsurance are
  possible.

# Reimagine Record to Report

### **Reimagine Order to Cash**

#### **Traditional Scenario:**

- Delayed close activities that do not begin until period end
- Multiple ledgers require timeconsuming and error-prone reconciliations

- Risk of regulatory noncompliance due to lack of transparency and manual monitoring of processes
- Risk of penalties and fines with insufficient, manual and error-prone tax audit processes
- Manual, timeconsuming and effort-intensive processes
- Financial data needs to be replicated from the financial system into the consolidation system, requiring data aggregation and transformation
- Executive conversation is limited to static presentations, and ad hoc questions and analysis need to be taken offline for a later discussion

Financial Accounting

Management Reporting

Compliance, Tax

**Entity Close** 

Consolidation

Reporting, Analytics

#### The New World With SAP:

- Event-triggered execution enabled through real-time derivation of profitability characteristics
- No reconciliation needed because of one universal journal entry that provides a single source of the truth
- End-to-end visibility and steering capabilities for local periodic legal reporting
- Continuous, self-auditing tax monitoring processes

Faster, efficient, and compliant close process

Real-time consolidation enabled by instant data access from integrating transaction and master data Transformed board room
experience with real-time business
intelligence, ad hoc reporting at a
granular level, and what-if analysis
to make decisions

#### **Reimagine Record to Report Reimagine Order to Cash**

#### **Traditional Scenario:**

- Inconsistency of interactions with customers across business
- Manual, time-consuming and effort-intensive processes
- Highly technical custom efforts for building and and maintaining interfaces to external agencies
- Manual, costly, and time consuming billing processes
- Increased rate of accounting and settlement errors
- Disjointed manual handling, which drives up DSO and puts customer relationships at risk
- Inconsistent account prioritization; labor-intensive and long cycles; high costs of collection; increased bad debt risk
- · Significant manual and errorprone effort required to process payments and handle exceptions
- Rule-based approaches decline in effectiveness over time

**Order and Contract** Management

**Check Credit** 

**Resolve Disputes** Issue Invoice

Collect Cash

Settle, Reconcile

#### The New World With SAP:

- Multichannel, rolebased access to accurate, real-time information on products, pricing, customers, and contracts
- Event-triggered execution and full automation of creditworthiness assessment
- Seamless integration to external credit agencies to incorporate external credit rating information
- **Empowered customers** with a payment portal and e-billing
- Real time access to all transactional details
- High processing speed for digital businesses

- Standardized processes that scale according to business needs
- Centralized information repository for root cause analysis of disputes
- Immediate visibility of customer account and status across the company
- **Smarter automation and** collaboration for cash collection

- Next-generation intelligent invoicematching powered by machine learning
- · Ability to capture much richer detail of customer- and country-specific behavior without the costs of manually defining detailed rules.

#### Revenue

US\$43.8 million (2015)

#### **Web Site**

www.woowahan.com

#### **Partner**

LG CNS www.lgcns.com

#### **Objectives**

- Reliable financial data to drive business decisions
- Ease and consistency of business tasks with systems that are user friendly
- More-efficient management through standardized information
- · System configuration and standard processes that can scale with a growing business

#### Why SAP

- Proven success of SAP® solutions globally, locally, and among industry peers
- SAP S/4HANA® to simplify the IT landscape, increase efficiency, and enable active planning, simulations, and decisions based on real-time data

#### Resolution

Worked with SAP partner LG CNS to deploy SAP S/4HANA

#### **Benefits**

- · Strengthened claim and obligation management and automated settlement processing
- Accelerated the processing of expense accounting and improved efficiencies in electronic payments
- Provided a user-friendly personnel, time card, and compensation management system, increasing the efficiency of employees and managers
- Increased standardization across IT systems and secured operational stability through better monitoring

"In our business there is no room for error. When using our apps, vendors and customers need to be sure that their orders are processed correctly and payments are fast and accurate. With SAP S/4HANA, we can handle transactions automatically and securely – and we can continue to do so as the business grows."

Hyunjun Yoon, COO, Woowa Brothers Corp

# 6.3 million

Transactions processed automatically in the first seven months

# 7 days

For account closing – down from 20 days

# 0 errors

In vendor receipts, thanks to automated reimbursements

# **Real-time**

Fund balance through the daily-balance closure system

- Improve accounts payable (Full-Time Equivalents)
   FTE productivity

Provide more transparency and centralizing the recording and management of all accounts payable data

#### What's new in SAP S/4HANA

- Machine learning to monitor blocked invoices
   Monitoring invoices blocked for payment is now assisted by a predictive engine based on machine learning algorithms?
- System invoice matching
  Increase the process speed with matching invoice data
  against predecessor documents and verify that all legally
  binding information is included.

## **Reimagine Strategic Procurement**

### **Traditional Scenario:**

- · Multiple disconnected data sources
- Disparate and disconnected data sources, and inability to extract meaningful insights
- Manual identification of sources of supply
- Manual and time-intensive supplier discovery and qualification process

- E-mail-based collaboration and manual evaluation of supplier responses
- Inefficient bid management with RFx coordination through e-mails; limited buyersupplier collaboration; and manual processing and analysis of supplier responses
- Mismanaged and misplaced paper-based contracts
- Manual authoring, longer cycle times, and high legal costs

### **Increased Visibility Into Internal And External Data**

### **Automated Supplier Evaluation And Qualification**

### Streamlined, Tool-Based **Bid Management Process**

### **Automated Contract Collaboration And Compliance**

### The New World With SAP:

- 360-degree view of spend and supplier and market data through business network integration
- Access to global supplier pool with visibility into preferred and qualified sources
- Embedded capabilities to view additional supplier data for a better informed decision

- **Comprehensive RFx management** with reverse- and forward-auction capabilities that enables valueoptimized cost savings and faster sourcing cycle
- **Contract lifecycle management** capabilities including authoring, negotiation, execution and digital signature

#### **Web Site**

www.convergentis.com

#### **Objectives**

- Support 200% annual growth as international business expands with multiple currencies and foreign exchange risk
- Create the framework to support a new professional services business line
- Manage business processes like financial close, invoicing, and supply chain

#### Resolution

- Moved to a digital business foundation, with SAP S/4HANA® providing the business with a single source of truth
- Rolled out the SAP Fiori® user experience (UX) to support critical business processes
- Used the Build tool to help project teams collaborate with business users and create prototypes of enterprise applications with real data

#### **Benefits**

- · Gave the sales team insight into account-specific net margins
- Tracked hours in real time for accurate invoices and project margin analysis
- Improved business asset visibility for informed investment decisions
- Trained new employees with a simple and personalized user experience
- Eliminated business requirement documents and improved the accuracy of application development
- Helped ensure that enterprise applications meet business user needs by allowing them to give detailed feedback early and frequently in the development process for Customer solution to further enhance the ability to respond rapidly to changing business needs

ASSET MANAGEMENT NEXT STEPS Sample Customer System: PRD

INTRODUCTION

**FINDINGS** 

**RECOMMENDATIONS** 

### **OPTIMIZE SALES:**

- On-time delivery performance is the percentage of orders that are fulfilled on or before the customer's requested date.

  Delivery measurements are based on the date a complete order is shipped or the ship-to date of a complete order
- A complete order has all items on the order delivered in the quantities requested. An order must be complete to be considered fulfilled. Multiple line items on a single order with different planned delivery dates constitute multiple orders, and multiple planned delivery dates on a single line item also constitute multiple orders
- On-time delivery performance is calculated as: [Total number of orders delivered in full and on-time to the customer's request date] / [Total number of orders received] X 100

Increase Sales Force Efficiency

- Sales force efficiency measures the ratio of the cost of 'sales full time equivalent employees' and revenue
- Sales force efficiency is calculated as: [Sales FTE Cost/ Revenue] X 100

Go to findings »

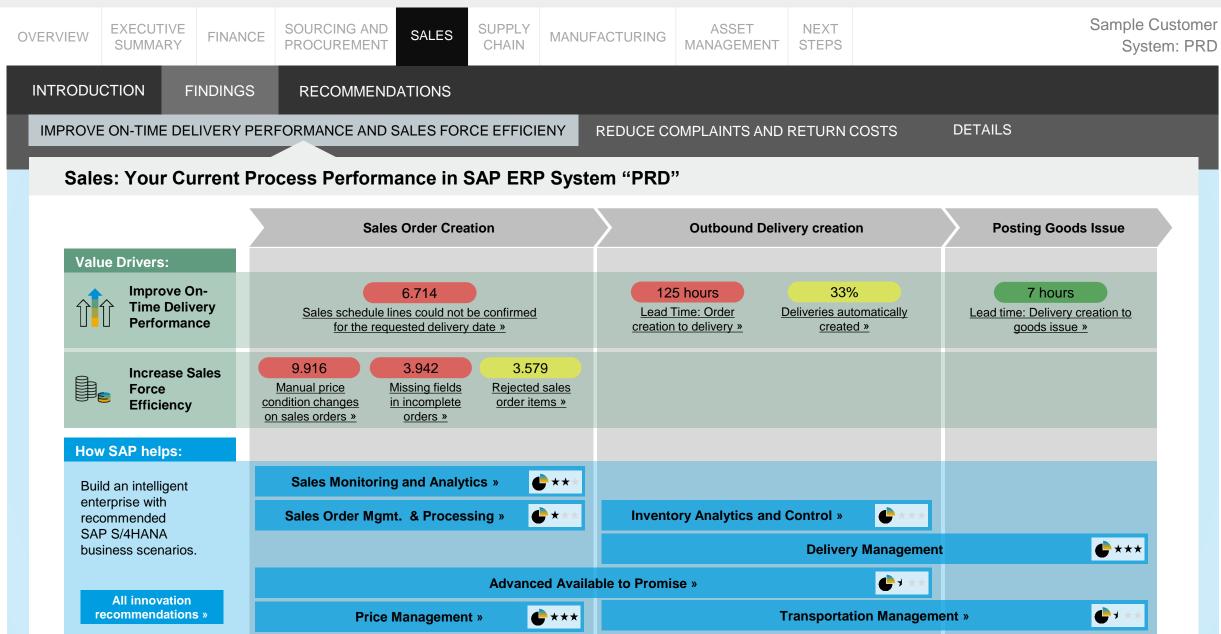

Reduce Complaints
And Return Costs

- · This value driver focuses on the management of complaints and returns
- The goal is to reduce overall return costs in both frequency of returns and costs per return. This covers the logistics part of returns as well as managing complaints and analytics options to improve overall customer satisfaction
- Related process performance indicators are e.g. the number of sales order items that are rejected, the number of return order items and credit memo requests created

## **Open return orders**

## **Findings and Benchmark**

What we measured

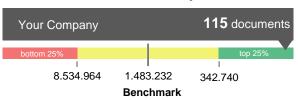

## 115 documents

### **Open return orders**

Absolute number of return orders with a delivery date in the past and no return delivery was created yet.

Learn more »

### **Consumer Products Industry Benchmark:**

### **Details**

What we measured

### **Aging Distribution:**

0-3	3-6	6-12	1-3	3+
months old	months old	months old	years old	years old
17	10	0	3	85
15%	9%	0%	3%	74%

### **Top 5 ERP Sales Organizations:**

<b>ERP Sales Organization</b>		Documents	Percent
SREN	MU Europe North	49	43%
SRAS	MU Africa South	13	11%
SRU3	MU US North-East	11	10%
SRU4	MU US North-West	8	7%
SRNA	MU North Africa	6	5%

## **Implication**

Understand the problem

### **Possible Root Causes:**

- Missing information in return orders
- · Materials are not available
- · Missing or inaccurate master date

### **Possible Business Impact:**

- · Unnecessary high manual workload
- · Higher sales operations costs

   Take informed spare parts inventory management
   decisions based on real-time and historical data

### What's new in SAP S/4HANA

- Real-time inventory management
   An overview page presents selected and relevant KPIs and charts at a glance.
- Improved analysis of goods movements
   This includes the analysis of both the goods receipt blocked stock and stock in transit (as part of predictive analytics and machine learning).
- 1909 release highlight: "slow or non-moving materials" and "dead stock analysis"
   NEW with SAP S/4HANA 1909: Enhancements were made to the SAP Fiori app "slow or non-moving materials" enabling users to display a prediction for slow or non-moving materials with regard to the future development of a material.

The new app for inventory analysis displaying obsolete stock is called the "dead stock analysis" app.

**Reimagine Order to Delivery** 

#### **Traditional Scenario:**

- Little visibility into the order-todelivery process
- · Many manual steps that slow down the process
- · Delivery commitments based on a separate system and outdated data resulting in cancelled or delayed orders
- · Complex and time-consuming process to get a holistic view of all process-related issues
- · Prior communications and decisions cannot be tracked in the system
- · Increased safety buffers to make up for the lack of inventory invisibility, locking up capital
- Interface needed between ERP and extended warehouse management
- Transportation process taking place in disparate systems with inefficient business partner collaboration
- · Limited optimization possibilities

- · No out-of-the-box eventtracking capabilities
- Analytics and reporting done in a separate business warehousing system with no real-time data update

Sales order Capture

Sales Order Confirmation Sales Order Tracking & Collaboration

Inventory Management **Outbound Delivery, Transport Planning & Dispatch** 

**In-Transit Tracking** 

### The New World With SAP:

- An intuitive user experience on any device providing real-time insights into the order to delivery process
- · Up-to-date inventory information resulting in realistic fulfillment commitments
- Advanced ATP with allocation enforcement and management
- Monitoring of fulfillment status of all sales orders over the whole process
- · Relevant insights, contacts, and collaboration features for internal sales
- Single warehousing platform for all warehousing operations
- Minimized safety stock with just-in-time material availability
- Single platform for transportation management with real-time embedded analytics
- Capacity management. planning, collaboration. execution, charge management
- Insights into transportation execution, tracking of goods and assets in transit
- Analysis of vehicle and sensor data in real time, optimizing logistics and improving service

#### **Before: Challenges and Opportunities**

- Increase process consistency and improve reporting capabilities
- Mitigate operational risk and facilitate mergers and acquisitions
- Integrate overseas subsidiaries and address the needs of aging IT infrastructure and software

#### Why SAP and Woongjin

- Powerful, unified software for finance and controlling, sales, materials management, process orchestration, and master data and landscape management
- Straightforward implementation and expert support from SAP and Woongjin
- Enablement workshops for SAP S/4HANA and knowledge transfer to CJ Logistics' customers
- Premium engagement services from the SAP Value Assurance program for SAP S/4HANA that provide comprehensive business, product, and system support

#### After: Value-Driven Results

- · Connected and aligned processes and improved governance across the distributed enterprise
- Created an organization-wide framework to enable profit and loss management
- · Simplified and accelerated reporting with flexible, agile functionality
- Integrated financial and controlling data and standardized transaction processing
- Enabled mergers, acquisitions, and incorporation of new company codes, thanks to a unified template for rapid system integrations with SAP S/4HANA

#### **Partner**

Infiniti Techlabs LLP www.infinititl.com

#### **Objectives**

- Simplify, automate, and streamline business processes
- Achieve real-time integration of business processes across logistics, supply chain, manufacturing, and finance
- Determine profitability of different product categories across regions

#### Resolution

- Deployed SAP S/4HANA by partnering with Infiniti Techlabs LLP
- Integrated the manufacturing business process with other areas of logistics, procurement, and finance
- Automated freight determination based on customer region from point of delivery, as well as orderwise tracking in pricing, enabling immediate reconciliation of bills payable to the freight vendor
- Implemented controlling and profitability analysis, enabling top managers to evaluate market segments across products, customers, and orders
- Automated the contract management system through SMS and e-mails

#### **Benefits**

- Reduced reconciliation efforts by integrating the weighbridge with SAP solutions for all inward and outward goods movement
- Eliminated the need for reconciliation between warehouse and accounts, resulting in fully integrated inventory and accounting transactions
- Eliminated the need to exercise credit controls manually through the automation of blocking and unblocking customers by system

SOURCING AND PROCUREMENT

SALES SUPPLY CHAIN

MANUFACTURING

ASSET MANAGEMENT

NEXT STEPS Sample Customer System: PRD

INTRODUCTION

**FINDINGS** 

RECOMMENDATIONS

### **OPTIMIZE MANUFACTURING:**

Accelerate
Manufacturing Cycle
Time

 Manufacturing cycle time is the time of actual production from when a customer order is released to the plant floor for a particular product through to the completion of all manufacturing, assembly, and testing for that specific product (does not include front-end order-entry time or engineering time spent on customized configuration of nonstandard items, or time in finished goods inventory)

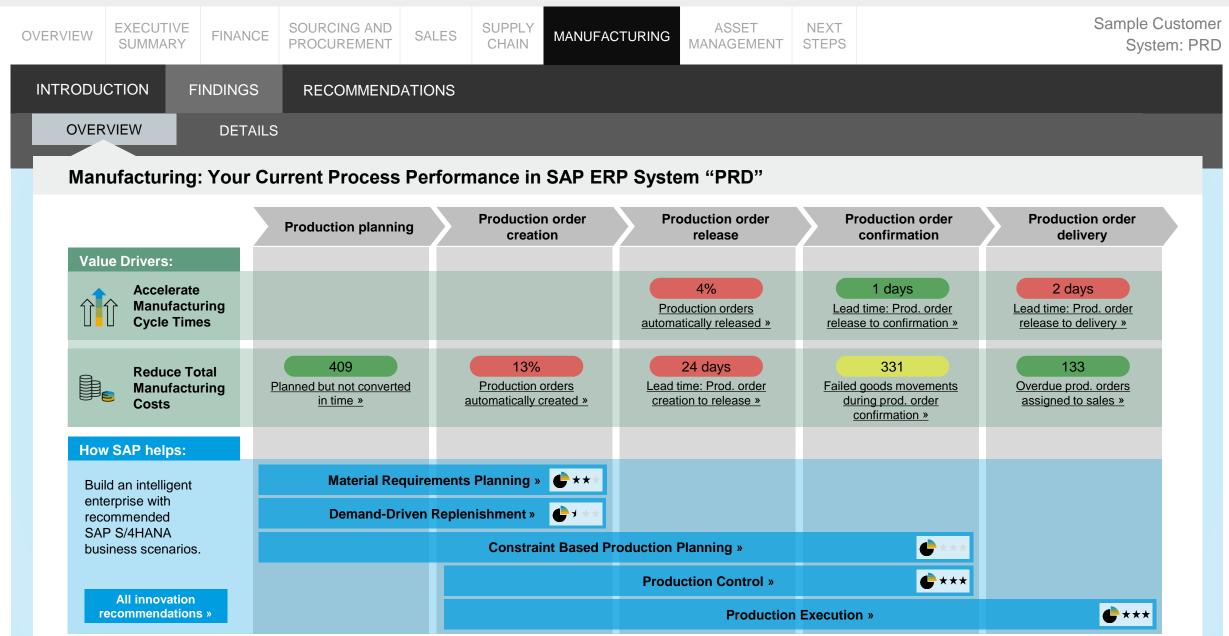

Reduce Total Manufacturing Costs

- Total manufacturing cost is the sum of costs of all resources consumed in the process of making a product
- The manufacturing cost is classified into the following categories:
  - · Direct materials cost
  - · Direct labor cost
  - · Manufacturing overhead
  - · Manufacturing extraordinary costs
  - · Outsourced manufacturing costs

What we measured

### **Aging Distribution:**

0-3	3-6	6-12	1-3	3+
months old	months old	months old	years old	years old
18	0	0	0	391
4%	0%	0%	0%	96%
4%	0%	0%	0%	Ş

#### Top 5 Plants:

Plant		Documents	Percent
F04	Factory Portugal	299	73%
F05	Factory India	49	12%
F20	Factory Mexico	16	4%
F21	Factory Spain	12	3%
F22	Factory Brazil II	1	0%

### **Implication**

Understand the problem

#### **Possible Root Causes:**

- Low trust on system-based planning data
- Production without production planning or outside of SAP-system
- Poor housekeeping: Non-deleted documents from inactive plants and/materials

#### Possible Business Impact:

- · Inaccurate supply chain and replenishment
- Low production control (e.g. risk of double production)
- Higher workload for manual planning and production order entry

#### **Production Execution**

## **Business Scenario Description**

Move quality products faster through production execution. Streamline production schedules based on real-time data. Monitor released production and process orders efficiently.

## **Value Drivers**

- Improve on-time delivery performance Adjust capacity planning to demand.
- Reduce manufacturing cycle time Ensure optimal resource commitments
- Reduce total manufacturing costs Integrate all required information to reduce buffer times

#### What's new in SAP S/4HANA

- Dashboards for manufacturing process New dashboards for manufacturing process tracking are available.
- Material requirements planning (MRP with demanddriven MRP and cockpit) and more Production planning and demand scheduling (PPDS) integrated into SAP S/4HANA. New demand-driven material requirements planning (MRP) and new production engineering and operations.
- 1909 release highlight: New functions for process manufacturing

NEW with SAP S/4HANA 1909: A new make-to-stock production is available for process manufacturing. Notably with co- and by-products, silo materials, inbound storage tank management, tank trailer filling with residuals, and make-to-order production.

## **Material Requirements Planning**

## **Business Scenario Description**

Use sophisticated material requirements planning balances to optimize services and cost reduction. Gain visibility across the supply chain to monitor stock-outs and automatically create procurement proposals.

6 used transactions »

Industry popularity

### **Value Drivers**

- Reduce days in inventory Consider all inventory data, lead times, and procurement timing in calculations.
- Reduce revenue loss due to stock-outs Monitor inventory and automating the creation of procurement proposals
- Improve on-time delivery performance Leverage MRP logic to ensure that materials are in stock and manufacturing is scheduled on time to meet delivery goals and order commitments.

#### What's new in SAP S/4HANA

- New material requirements planning cockpit The whole material requirements planning cockpit has been renewed and redesigned.
- Embedded production planning and demand scheduling
  - With SAP S/4HANA the production planning and demand scheduling (PPDS) functionality is now embedded in the SAP S/4HANA core.
- 1909 release highlight: Predictive material and resource planning (pMRP) application and process manufacturing

NEW with SAP S/4HANA 1909: A completely new predictive material and resource planning (pMRP) application is available incl. simulation which reduces inventory carrying costs.

Also the make-to-stock production - process manufacturing is now available.

## **Demand-Driven Replenishment**

## **Business Scenario Description**

Promote material flow with strategically-placed buffers, reducing inventory and improving service. Manage variability by strategically locating and sizing stock buffers to decouple the supply chain into segments.

\* \* \*

Your Usage Intensity

New Industry popularity

### **Value Drivers**

- Improve on-time delivery performance
   Replenish buffers based on a consumption logic and make clear replenishment priorities to production and procurement.
- Reduce days in inventory
   Size stock buffers based on demand-and-supply variability, dynamically adjusting them as demand and lead time change
- Reduce inventory obsolescence
   Uncouple supply chain with strategically placed stock buffers

### What's new in SAP S/4HANA

- New demand-driven material requirements planning (MRP) embedded in S/4HANA
  - Use demand-driven replenishment to flexibly prebuffer components based on incoming and predictive demand.
- Strategic inventory planning through demand-driven material requirements planning
   Demand-driven Material Requirements Planning (MRP) is
  - Demand-driven Material Requirements Planning (MRP) if fully embedded in existing Material Requirements Planning (MRP) run logic.

## **Recipe/Routing Management**

## **Business Scenario Description**

Accelerate time to market with recipe/routing management. Enable production planning ?by specifying details about work centers where operations are carried out and listing required production resources and tools.

Industry popularity

### **Value Drivers**

- Reduce engineering change cost
   Leverage enhancements in product structure management.
- Reduce penalties and costs of product recalls/ design issues
  Handle accurately the distribution of any changes in recipe or bill of material
- Reduce time to market for new products
   Use granular recipe/routing information to accelerate hand-over

### What's new in SAP S/4HANA

- Simplified User interface
   A simplified user interface allows easier access and better usage of the recipe.
- Analytics
   The analytics abilities have been simplified and are easier accessible.
- Improved processes and visualization
  Structured engineering processes are available and 3D visualization is possible.

## **Repetitive Manufacturing**

## **Business Scenario Description**

Adjust your repetitive manufacturing production schedules flexibly. Support both configurable and non-configurable products with control in repetitive, make-to-stock, or make-to-order environments.

Industry popularity

### **Value Drivers**

- Improve profitability
   Adjust production to market demand.
- Reduce inventory carrying cost
  Provide increased visibility of exact line-side stock
- Reduce manufacturing cycle time
   Automate data capture and integration into associated business processes

#### What's new in SAP S/4HANA

- Incoming and outgoing payments
   With SAP S/4HANA, a new variant configuration has been made available for make-to-order production and simulation.
- Dashboards for manufacturing
   The dashboards for manufacturing have been enhanced to allow process tracking.
- New material requirements planning cockpit and embedded production planning and demand scheduling

The material requirements planning cockpit has been completely redesigned and production planning and demand scheduling has been embedded in SAP S/4HANA.

## **Constraint Based Production Planning**

## **Business Scenario Description**

Shorten lead times at low cost with constraint-based production planning using SAP S/4HANA by linking advanced planning processes to manufacturing execution.

Instantly react to changes on the plant floor using one system.

#### New

**Business** 

scenario details »

Industry popularity

#### **Value Drivers**

- Reduce manufacturing cycle time
   Transition from infinite to finite planning and instantly identify production bottlenecks.
- Reduce raw material & work in progress days in inventory
   Integrate scheduling and execution to gain a consistent, real-time view of inventory and product data
- Reduce revenue loss due to stock-outs
   Improve flexibility through fast and responsive production planning closely linked to manufacturing execution

### What's new in SAP S/4HANA

- New material requirements planning cockpit
  A new material requirements planning (MRP) cockpit with
  enhanced / improved functions and embedded production
  planning and demand scheduling (PPDS) is available.
- Predictive material requirements planning
   Simulate potential capacity & planning issues, before they arise and fix it, before material requirements planning creates the orders.
- Visualize capacity issues in web based Gantt charts
   Embedded production planning and demand scheduling
   (PPDS) and predictive material requirements planning
   runs the material requirements planning in simulation
   mode to evaluate the impact on fixed capacity &
   constraints.

### Kanban

## **Business Scenario Description**

Drive lean Kanban execution that reduces operating costs. Establish a continuous Kaizen improvement approach; use Kanban processing in lean replenishment for external and internal material flows.

#### New

Industry popularity

### **Value Drivers**

- Reduce inventory carrying cost Determine production supply according to the actual demand of the customer.
- Reduce manufacturing cycle time Ensure optimal resource commitments and continuous process improvements
- Reduce total manufacturing costs Support lean execution principles based on standardized pull processes and tight integration of lean execution to

#### What's new in SAP S/4HANA

- Out-of-the-box Kanban process The out-of-the-box Kanban process is supported with simplified user experience.
- Non-automotive customers This functionality becomes newly available also for nonautomotive customers with SAP S/4HANA.
- 1909 release highlight: New replenishment strategy NEW with SAP S/4HANA 1909: A new replenishment strategy is available for stock transfer, using Kanban. Having this replenishment strategy in place, warehouse tasks to replenish a Kanban container are automatically created when you set the Kanban container to empty.

#### **SAP® Solutions**

SAP S/4HANA®, SAP Fiori® apps

#### **Before: Challenges and Opportunities**

- · Accurately track the availability of material for made-to-order products
- Migrate from an Oracle-based PowerTerm solution for better insight into financial and procurement operations
- Gain better control over inventory using live tracking and valuation
- · Reduce supply chain risk and the risk of procurement errors

#### Why SAP and KPIT Technologies

- SAP S/4HANA for a single source of data on inventory turnover, material flow, and stock transfers
- SAP Fiori apps for an any-device, mobile-first, role-based user experience that simplifies employee engagement and boosts productivity
- Faster project completion with expertise and best practices from KPIT Technologies

#### After: Value-Driven Results

- Optimized supply chain with real-time inventory visibility, from purchase requisition to goods receipt
- Faster production using touch-screen technology that allows workers to order consumables instantly
- Improved visibility of raw-material consumption and goods-in-transit stock
- · Better non-destructive testing quality controls using automated monitoring and reporting

**50%** 

Reduction in manufacturing cycle time

## **OPTIMIZE ASSET MANAGEMENT:**

Reduce Unplanned Downtime Or Outage

This value driver focuses on reduction of financial losses caused by asset downtime or outages.

This includes:

- Unplanned outages
- Prolonged downtimes caused by bad asset management
- Better transparency and management of such unplanned outages

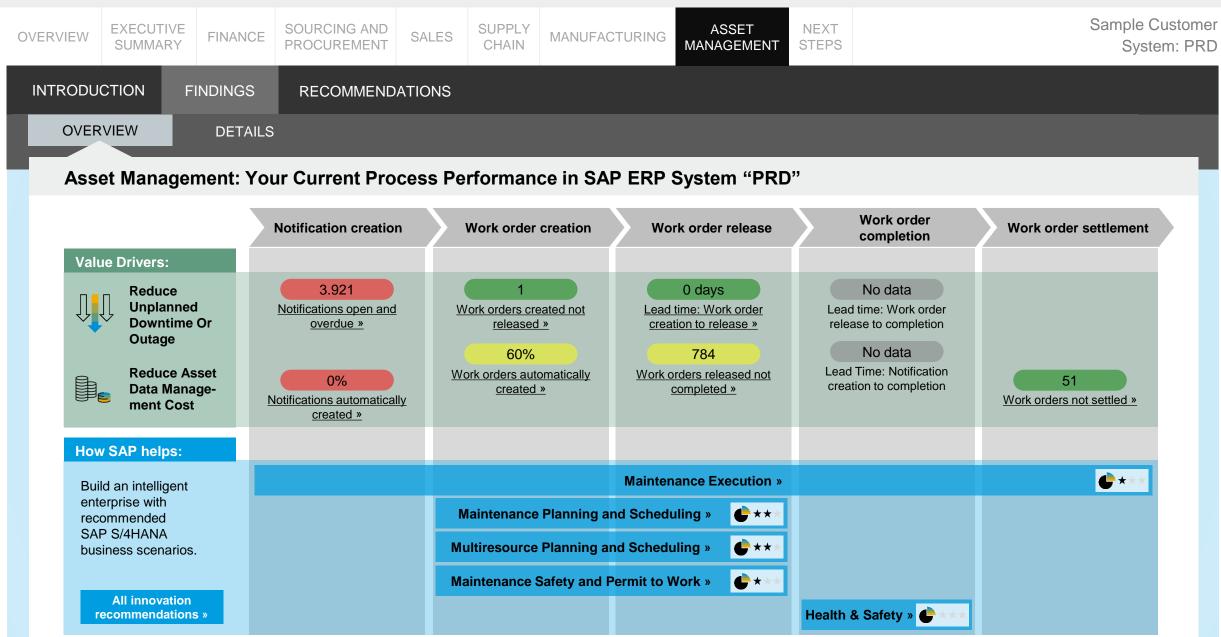

Reduce Asset Data Management Cost Reduction of asset data management cost is about:

- · Better control of asset data
- Integrated and automated processes to manage asset data in a lean way

### **Environment Management**

### **Business Scenario Description**

Reduce your environmental impact with comprehensive environment management

## Industry popularity

### **Value Drivers**

- Reduce EH&S penalties and fines Meet regulatory, industry, and corporate needs for emissions and other environmental regulations
- Reduce uncollectible accounts receivable write-offs Understand and plan for regulatory and emissions risk management properly to avoid unnecessary financial losses

### What's new in SAP S/4HANA

- Enhanced environmental data processing The performance of daily environmental data processing has been accelerated.
- Graphical user interface and delivered example methodologies for greenhouses A graphical user interface to manage emission data as well as for delivering example methodologies for greenhouse gas emission calculations have been made available.
- 1909 release highlight: Emissions forecasting capability

NEW with SAP S/4HANA 1909: The new emissions forecasting capability as part of environment, health & safety helps to visualize environmental risks. Based on historical data, the system forecasts the emission data values via machine learning time-series predictive models.

## **Management of Change**

### **Business Scenario Description**

Managing operational changes with thorough review, risk mitigation, and documentation approval

### **Value Drivers**

- Reduce EH&S penalties and fines
  Approve changes that contain appropriate risk mitigations and help ensure compliance with all defined safety precautions
- Reduce unplanned downtime or outages
   Plan and properly monitor all necessary actions related to a change and increase process quality and corrective actions
- Reduce fixed asset service and maintenance costs
   Plan and execute technical changes that increase asset reliability and reduce maintenance inefficiencies

### What's new in SAP S/4HANA

New core data services view

A core data services view for several objects has been made available with SAP S/4HANA. This includes damage analysis, location analysis, object statistics, planner group analysis, and manufacturer analysis.

### **Anticipate Maintenance**

### **Traditional Scenario:**

- Work order process is triggered by static preventive maintenance plans or failure notes
- Maintenance work order is manually scheduled and then printed
- Asset status is determined onsite; required spare parts or resources might be missing

- Second visit to the asset is required to perform maintenance work
- Maintenance work is confirmed on paper, and the asset management system is updated the next day.

### The New World With SAP:

- Work order process is triggered by asset health predictions based on granular sensor data or by realtime condition monitoring
- Precise knowledge of the asset status allows automatic allocation of the right resources and spare parts and optimizes the route
- Maintenance work is confirmed, and asset status is updated in real time via the mobile asset management application

### Company

Kaeser Kompressoren SE

### Headquarter

Coburg, Germany

#### Website

www.kaeser.com

### Industry

Industrial machinery and components

#### **Products and Services**

Compressed air systems and compressed air consulting services

### **Employees**

5,500

### **SAP® Solutions and Services**

SAP® Leonardo Internet of Things (IoT) capabilities, SAP Asset Intelligence Network, SAP Predictive Maintenance and Service solution

### **Before: Challenges and Opportunities**

- Service team unable to access calibration data and other equipment-specific information, which was stored in on-premise systems
- No solution to meet the needs of dealers and companies' service providers
- · Need for track-and-trace capabilities with selected suppliers to scale up potential

#### Why SAP

- · Strategic partnership and co-innovation with SAP
- SAP Asset Intelligence Network based on SAP S/4HANA® Cloud for use in maintenance of equipment information and greater transparency over usage
- Standard integration between SAP S/4HANA, SAP Predictive Maintenance and Service, the SAP Manufacturing Execution application, and third-party solutions
- Ability to establish a "digital twin" to build entirely new data-driven business models

#### After: Value-Driven Results

- Increased service efficiency with one single source of product, component, spare-part, and service information
- Higher customer and dealer satisfaction with an up-to-date digital replica and improved supplier collaboration
- Greater transparency across the company's installed base, enabling it to offer additional digitalservices and new business models
- Enhanced flexibility of a cloud-based solution

"SAP Leonardo technologies provide the framework for different applications that can be easily combined to orchestrate your own business model."

Falko Lameter, CIO, Kaeser Kompressoren SE

## Understand and Monitor your Processes: Get the Data for your Bottom-up Business Case

Business KPI Trees with SAP Solution Manager 7.2

## Business process improvement tool suite in SAP Solution Manager\* with out-of-the-box key figure content:

- SAP Business Process Analytics root cause analysis tool for your process experts. This is the prerequisite to derive and implement action items, which can be documented and tracked in issue management in SAP Solution Manager.
- Dependency diagrams help to differentiate cause and effect of different key figures. These 'KPI trees' visualize qualitative relationships between key figures. Drill-downs down to the individual document allow you to identify root causes and give you a clear understanding of where you need to improve.
- **Tabular dashboards** can be built on top of business process analytics and enable continuous tracking and break down across organizational units for your activated key figures.
- The **progress management board** visualizes key figures improvements.

#### DISCLAIMER AND TERMS OF USE

#### Disclaimer

By ordering a SAP Business Scenario Recommendations report, you agree to the applicable terms and conditions available on the SAP Business Scenario Recommendations web site (and provided to you in writing upon request). Please be aware that the SAP Business Scenario Recommendations report is a high-level planning tool to get an overview of the relevant new functionalities provided by SAP S/4HANA. It does not cover all functional benefits that may be relevant for planning of your implementation. Furthermore, it does explicitly not contain functional benefits introduced with new functionalities not related to the SAP S/4HANA business scenarios. Data contained in the SAP Business Scenario Recommendations report may be changed without prior notice and is provided for informational purposes to SAP customers only. For more detailed information, especially with respect to process or scenario-specific information, please refer to the SAP web site located at <a href="http://www.sap.com/next-generation-BSR">http://www.sap.com/next-generation-BSR</a>. Before you perform any tasks related to the software lifecycle, you still have to consult the relevant documentation, such as Master Guides, documents provided in SAP Support Portal, support package stack guides, and SAP Notes. You cannot rely on the results of the SAP Business Scenario Recommendations report. If you need individual guidance and support for your installation, upgrade or improvement project, please contact your local SAP consulting organization for further advice. The SAP Business Scenario Recommendations and its content are provided by SAP SE and its affiliated companies ('SAP Group') for informational purposes only, without representation or warranty of any kind, and SAP Group shall not be liable for errors or omissions with respect to the materials. SAP does not warrant the accuracy or completeness of the information, text, graphics, links, or other items contained within these materials and shall have no liability for damages of any kind including without

#### **Terms of Use**

By ordering a SAP Business Scenario Recommendations report, you agree that SAP may contact you with solution tailored offers in relation to the implementation of SAP Software. You are required to provide SAP with Company's historical production usage data and additional information & data ("Company Data") as specified on the SAP Business Scenario Recommendations web site or communicated to you to enable SAP to create a SAP Business Scenario Recommendations report. SAP may use Company Data solely for (i) creating a SAP Business Scenario Recommendations report and (ii) the purpose of testing and improving SAP's software, products or services. Company Data shall be considered the Proprietary Information of Company and shall be protected from disclosure in accordance with the terms of the License and this Agreement. Company will not provide SAP with Company Data that contains any information about an identifiable individual ("Personal Information"). Company will ensure that Company Data is cleansed of all Personal Information prior to providing such Company Data to SAP. SAP may elect to provide Company with results ("Results") of tests performed on SAP's software, products or services using Company Data. Company may use Results solely for the purpose of evaluating the Results. Company may not use Results in a production environment or to support its business processes, planning or decisions. Results shall be considered the Proprietary Information of SAP and shall be protected from disclosure in accordance with the terms of the License and this Agreement. Company Data and Results are provided at the sole discretion of the disclosing party on an "AS IS" basis. Neither party makes any express or implied representations or warranties as to the accuracy, completeness, reproducibility or availability of Company Data or Results.
