## 1. Introduction

### 1.1 Software

Tiered Color Monitor™ is a Kyocera business application that enables Kyocera and Copystar dealers to capture and utilize the 3-tier meter count capability from Kyocera Multifunctional Products (MFPs). The meter counts are automatically transmitted in a secure manner directly to a spreadsheet located in the dealership's private Google Drive account.

Benefits of Tiered Color Monitor:

- Automatic, periodic capture of 3-tier meter counts per device.
- Raw data is entered into a spreadsheet for easy tabulation and processing.
- End-users can visualize color usage by viewing usage graphs on the MFP panel.
- Service technicians can easily upload 3-tier meter counts over wireless networks by scanning a QR code displayed by the application using a mobile phone.

### 1.2 This Guide

This Guide is intended for trained Kyocera or Copystar dealer service technicians. It describes the components, functions, installation requirements and setup steps required to deploy Tiered Color Monitor effectively.

Since Tiered Color Monitor offers multiple configuration options, it is essential to understand these to deploy this solution correctly.

### 1.3 Supported MFP Models

For a full list of support MFP models, please refer to the Solutions Compatibility Chart on [KDACentral.com](http://KDACentral.com).

### 1.4 Licensing

Tiered Color Monitor requires the purchase of a software license from an authorized Kyocera or Copystar dealership.

You have the opportunity to evaluate the software, free of charge, during two 30-day trial periods. Tiered Color Monitor will be disabled when the two trial periods expire, and you will be required to purchase a license key to be entered to continue using the application.

## 1.5 On-line Activation

**Tiered Color Monitor** uses the same activation method as the Card Authentication Kit, Teaching Assistant, Data Security Kit and the Document Guard Kit. Following the purchase of a license certificate, the Product ID Number is sent in an email message. You will need these items as well as the **MFP Serial Number** when you access the License Page from KDACentral.

You will be issued a unique Activation Key once you register your option. Print this page and input this Activation Key number on the panel of your **HyPAS-Enabled MFP or HyPAS-Capable MFP** to activate it.

### Login to the License Key Service on KDACentral.com

What's Required:

- License Certificate
- Product ID Number
- MFP Serial Number

### Tiered Color Monitor Licensing Procedure

1. Enter the Product ID from the License Certificate, Click Next

The screenshot shows the 'License Key Issue System' web interface. At the top, a progress bar indicates the steps: Enter Product ID (highlighted in red), Verify product, Enter Machine No., Re-enter Machine No., Verify your entry, and Issue License Key. Below the progress bar is a language dropdown menu set to 'English'. The main content area contains the following text: 'Thank you for purchasing our product. Follow the instructions here for issuing the license key. Check the Machine No. on your machine and enter the number in the space provided in License Certificate in advance. The number is shown on the rating plate attached on the machine in 10 alphanumeric characters after "Machine No." For example: Machine No. ABC12X3567'. Below this is a section titled 'Enter Product ID' with a text input field containing 'GC0S . 22HB . 4FC2 . N2K3'. A 'Next' button with a right arrow is located at the bottom right.

2. Your Product will be verified, Click Next.

The screenshot shows the 'License Key Issue System' web interface at the 'Verify product' step. The progress bar now highlights 'Verify product' in red. The main content area contains the text: 'Your purchased product is as below:'. Below this is a table with two columns: 'Product Name' and 'Product ID'. The table contains the following data:

Product Name	Printed Document Guard Kit (A)
Product ID	GC0S-22HB-4FC2-N2K3

Below the table, it says 'If it is OK, click Next.' At the bottom left is a 'Back' button with a left arrow, and at the bottom right is a 'Next' button with a right arrow.

3. Enter the MFP Serial Number, Click Next.

**License Key Issue System**

Enter Product ID >> Verify product >> **Enter Machine No.** >> Re-enter Machine No. >> Verify your entry >> Issue License Key >>

**Enter Machine No.**

Enter the machine No. that you have written in License Certificate.

Machine No. :

If it is OK, click Next.

[← Back](#) [Next →](#)

4. Re-enter the MFP Serial Number to confirm it, Click Next.

**License Key Issue System**

Enter Product ID >> Verify product >> Enter Machine No. >> **Re-enter Machine No.** >> Verify your entry >> Issue License Key >>

**Re-enter Machine No.**

Enter the machine No. again to confirm it.

Machine No. :

If it is OK, click Next.

[← Back](#) [Next →](#)

5. Your Information will be verified, Click Next.

**License Key Issue System**

Enter Product ID >> Verify product >> Enter Machine No. >> Re-enter Machine No. >> **Verify your entry** >> Issue License Key >>

**Verify your entry**

Verify your entry so far.

Product Name	Printed Document Guard Kit (A)
Product ID	GC05-22HB-4FC2-N2K3
	SAMPLE
Machine No.	SPL8811406

If it is OK, click Next.  
The license key will be issued.

[← Back](#) [Next →](#)

6. Your License Key is issued.

### License Key Issue System

Enter Product ID >> Verify product >> Enter Machine No. >> Re-enter Machine No. >> Verify your entry >> Issue License Key >>

#### Issue License Key

The license key has issued.

Product Name	Printed Document Guard Kit (A)
Product ID	GC0S-22HB-4FC2-N2K3
	SAMPLE
Machine No.	SPL8811406
License Key	3171-6246-4236-9163-5966

Date of Issue : March 23, 2016 1:58:31 AM JST

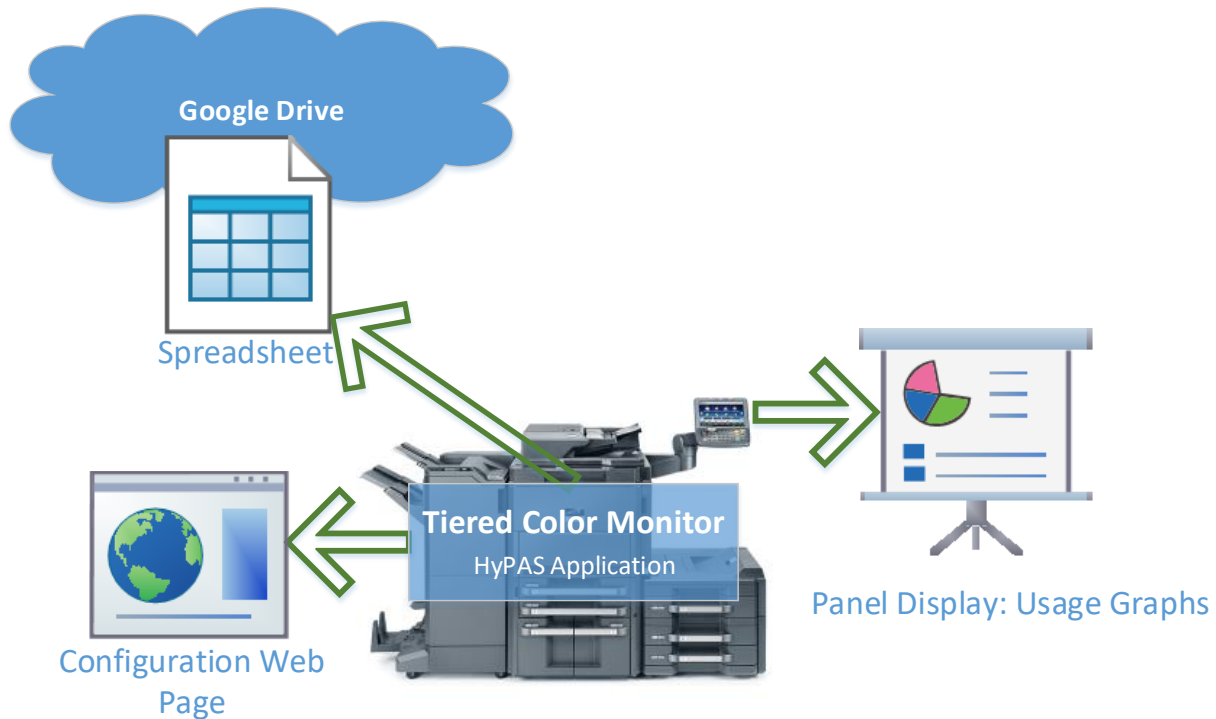

Write the above license key in the space provided in License Certificate.  
Print this screen and keep it in a safe place.

 **Print** [Continue to issue other license key.](#)

Now, the issuing process is completed.

7. Print the Page and input the License Key number on the panel of your HyPAS enabled MFP to activate your Device.

## 2. Application Overview

### 2.1 HyPAS Application

Tiered Color Monitor is a HyPAS application (software program) resident on the MFP. Once installed, activated and licensed on an MFP, the application will periodically take usage counter snapshots and transmit them to a spreadsheet on Google Drive.

### 2.2 Google Drive Spreadsheet

Meter counts from Tiered Color Monitor enabled MFPs are collected in a central spreadsheet located in the dealership's own Google Drive account. The spreadsheet is created from a template published in Google Drive.

1	Timestamp	Count Date	Serial #	Customer ID		Level 1	Level 2	Level 3	Single Color	B&W	Total
2	1/29/2014 11:47:04	01/29/2014 11:47:04AM	L234829034	ABC Corp	automated	22	51	77	100	215	465
3	1/29/2014 12:03:27	01/29/2014 12:03:26PM	P498329234	DEF Inc	automated	199	453	223	800	761	2436
4	1/30/2014 15:22:54	01/30/2014 03:21:06PM	L853200003	Initech Corp	automated	554	417	928	0	766	2665
5	1/30/2014 16:44:50	01/30/2014 04:25:22PM	L444838392	Example 5	automated	800	800	800	400	800	3600
6	1/30/2014 16:47:53	01/30/2014 04:49:16PM	L853200003	Test	automated	554	417	928	0	766	2665

### 2.2.1 Spreadsheet Data Columns

Column	Purpose
<b>Date</b>	Date of counter snapshot.
<b>Serial No.</b>	MFP's unique serial number.
<b>Customer ID</b>	Arbitrary text entered by dealer technician, used to identify customer.
<b>Asset ID</b>	Asset number programmed into the MFP.
<b>Submitted By</b>	Identifies technician who uploaded the counts. This field is blank or automatic.
<b>Level 1</b>	Number of pages with coverage below threshold #1.
<b>Level 2</b>	Number of pages with coverage between thresholds #1 and #2.
<b>Level 3</b>	Number of pages with coverage greater than threshold #2.
<b>Single Color</b>	Number of single color pages.
<b>Monochrome</b>	Number of monochrome (B&W) pages.
<b>Total</b>	Total number of pages printed.

### 2.3 Configuration Web Page

Tiered Color Monitor is configured by launching the configuration web page by accessing this URL:

**[http://<mfp\\_ip\\_address>:8080/tcm/config.jsp](http://<mfp_ip_address>:8080/tcm/config.jsp)**

Upon authentication, the dealer technician could program the application's polling frequency, change the destination spreadsheet URL, and edit field values.

### 2.4 Panel

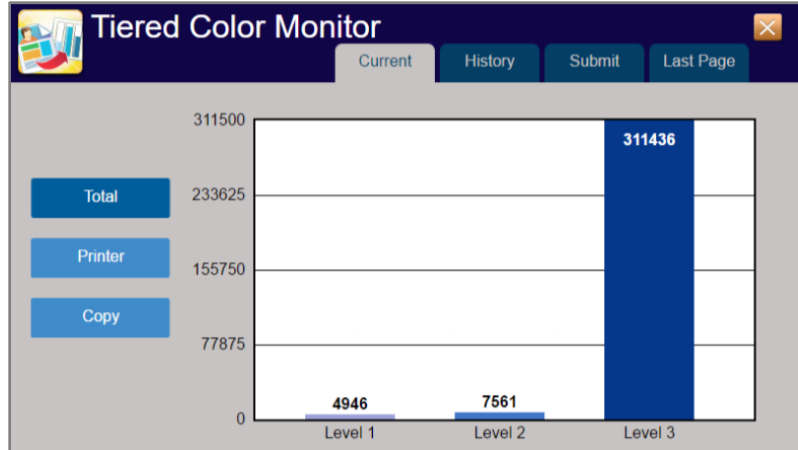

The application's panel displays usage data as simple to understand graphs. The graphs provide a quick visualization of color usage over a period of one year.

On the MFP panel, press the Tiered Color Monitor application button to launch the application's user interface.

The screenshot shows the configuration interface for the Tiered Color Monitor. It features a dark blue header with the application name and a 'Logout' link. Below the header, there are 'Settings' and 'Log' buttons. The main content area is titled 'Settings' and contains a form with the following elements: a dropdown menu for 'Please specify a day of the month to get meter count' (set to '1st'); radio buttons for 'Automatic Submission (DNS required): Enable (selected) / Disable'; a 'DNS Status: DNS found' indicator; a text input field for 'Google Form URL'; a green 'Test' button; a text input field for 'Customer ID(optional)'; and a green 'Save' button at the bottom right. The footer includes 'Copyright © 2014 KYOCERA Document Solutions America, Inc.' and the 'KYOCERA Document Solutions' logo.

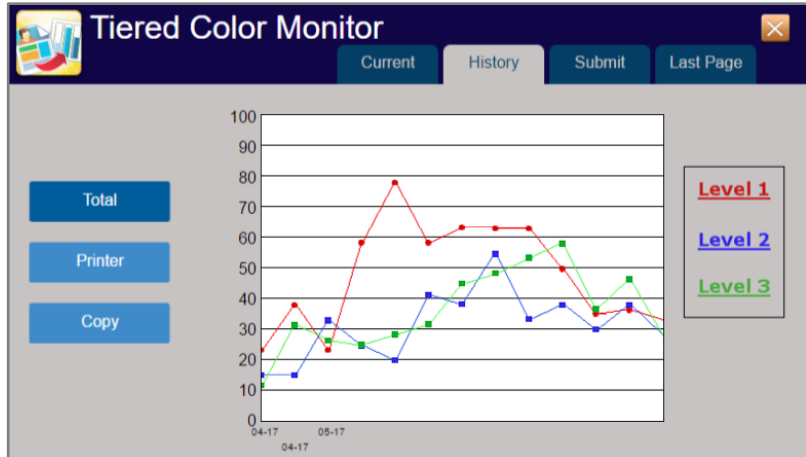

### 2.4.1 Total Counters – Bar Chart

The first screen shows the breakdown (by color coverage levels) of the number of pages printed. To return to this view, press the “Current” tab on the top of the screen.

### 2.4.2 Usage History – Line Chart

To compare monthly usage, press the “History” tab on the top of the screen. This view shows a line graph, illustrating how usage varied across the previous months. Each line on the graph corresponds to a coverage level and is color-coded.

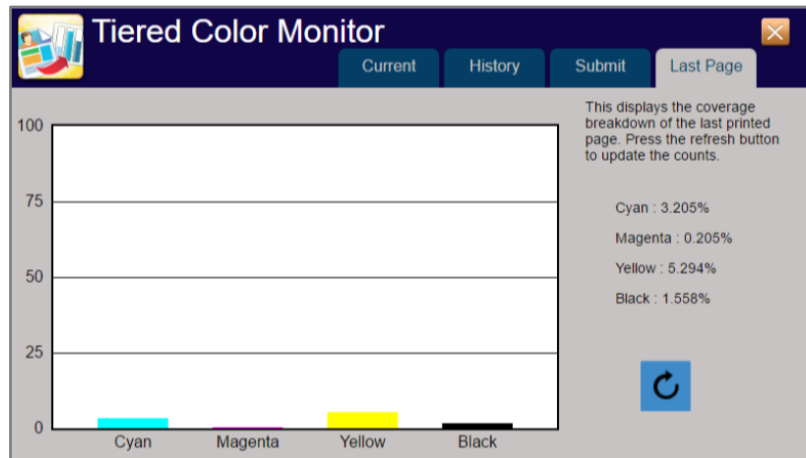

### 2.4.3 QR Code Submission

In addition to providing end-users with usage information, the dealer technician can generate a QR Code that allows him/her to manually upload data to the spreadsheet. This feature would be helpful in the event that the MFP was unable to transmit counts automatically, or as a record a service visit was carried out.

## 2.4.4 Last Page Tab

The Last Page tab will show you the coverage breakdown of the last printed page. This can be used to gauge where a document will fall into which tier. The refresh button can be used to update the counts.

## 3. Setup

Tiered Color Monitor requires setting up the MFP and the spreadsheet on Google Drive.

### 3.1 MFP Setup

#### 3.1.1 Basic MFP Setup

- Ensure that the MFP is updated to the latest available firmware level.
- The MFP must be connected to a network port and link lights must be active.
- The MFP must have at least one empty application slot (under System Menu > Applications).

#### 3.1.2 Enabling 3-tier color

Please refer to the MFP's Service Manual for instructions on enabling and setting up 3-tier color coverage. The outline of the steps include:

- Enter Maintenance Mode.
- Open U332: Adjust Coverage Size Calculation Rate.
- Rate: Set a value between 1.0 and 3.0. Default: 1.0.
- Mode: Set to 1.0 to enable 3-tier color coverage counts.
- Level 1 and Level 2: must be set between 0.1 and 99.9. Default: 1.0 and 2.5 respectively.

*NOTE: The threshold values must be set for the Tiered Color Monitor to work correctly and effectively.*

#### 3.1.3 Internet Connectivity and DNS

For the application to be able to send counts to Google Drive, the MFP must be connected to the Internet through the LAN, a functional DNS server must be accessible on the network and DNS settings on MFP Command Center must be properly entered.

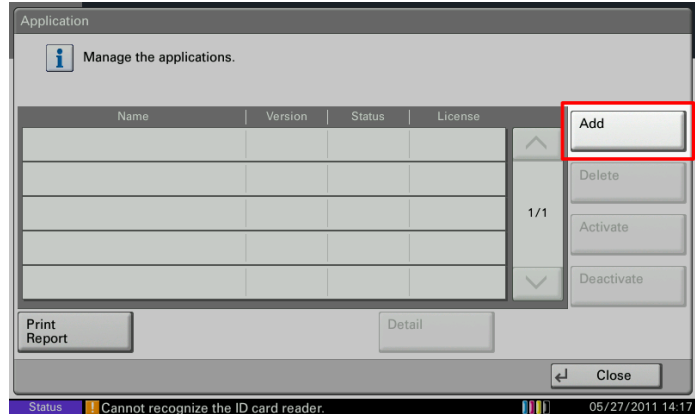

To setup DNS Settings:

1. Open Command Center and login as MFP Administrator.
2. Navigate to Network Settings > TCP/IP.
3. Under IPv4 Settings > DNS Server, select either "Use DNS Server from DHCP" or "Use following DNS Server" depending on the LAN's IP address scheme.

#### 3.1.4 Installation on HyPAS-Enabled MFPs

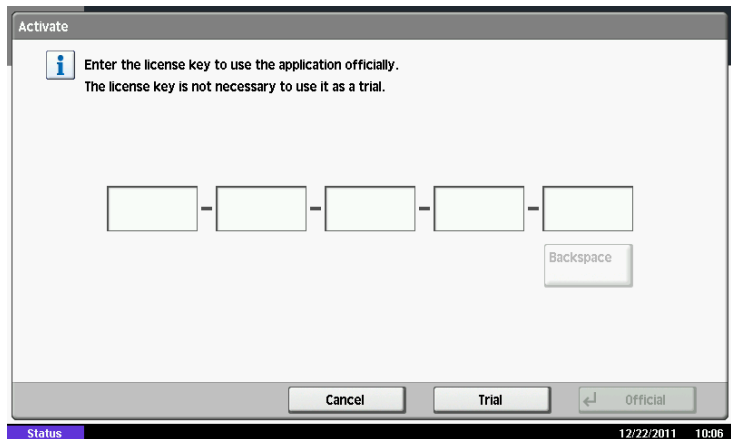

1. Download the Tiered Color Monitor Package file from "KDACentral" Kyocera and Copystar Dealer Portal and copy it to the root of a clean USB flash drive.
2. At the MFP control panel, open System Menu > Applications.
3. Log in as Administrator when prompted. The default login name is Admin and the default password is Admin (Note: Enter capital A when entering 'Admin' as both login name and password fields are case-sensitive).

4. Press the Add button.

5. Insert USB flash drive into the MFP.
6. A list showing the application will appear.
7. Select Tiered Color Monitor and press Install.
8. After installation, press Close to return to the Application screen.

9. Select Tiered Color Monitor and Press Activate. The MFP will prompt for Activation mode. If a license key is available, enter the license key, then select Official. Otherwise, press the Trial button to activate one of the two 30-day trials. One trial can last for 30 days after which time the trial button will be disabled and the Tiered Color Monitor service will

no longer start. A license must be purchased from an authorized Kyocera or Copystar dealer in order to restart the Tiered Color Monitor service.

10. After Tiered Color Monitor is activated successfully, it can be executed from the home screen.

## 3.2 Installing Spreadsheet

### 3.2.1 Google Drive Account

This setup step requires a Google Drive account which can be created at <http://drive.google.com/>.

Please create an account or log in to an existing account before proceeding further.

*NOTE: It is recommended to set up one account per dealership that will capture all meter reads for the entire MIF with Tiered Color Monitor installed.*

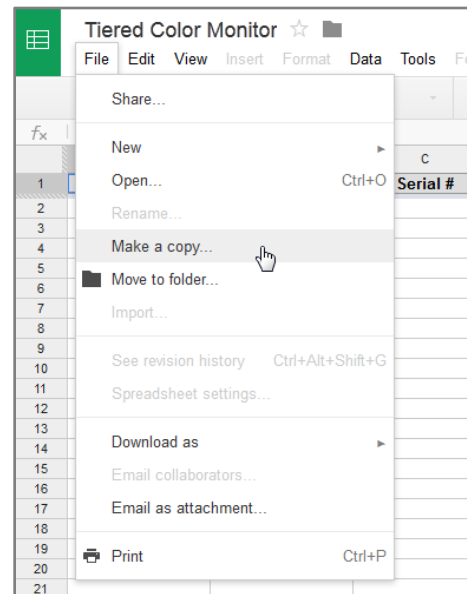

### 3.2.2 Creating Spreadsheet

1. After creating a Google Drive account or logging in to an existing account, go to the following URL to open the Tiered Color Monitor Data spreadsheet:

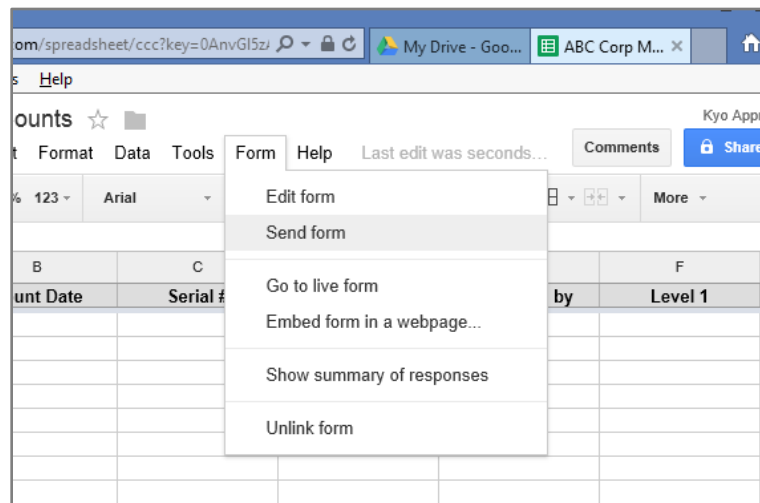

<https://drive.google.com/open?id=1K9bxbp6wtttdlsu52Xo5SI7xrpmFEaxqnmZGJoxROaw9w>

2. Click on *File > Make a Copy* to save it to your Drive account. *Make a copy* will only be available if a Google Drive account is currently signed in.

*NOTE: You need to be signed into your Google account to make a copy of the spreadsheet.*

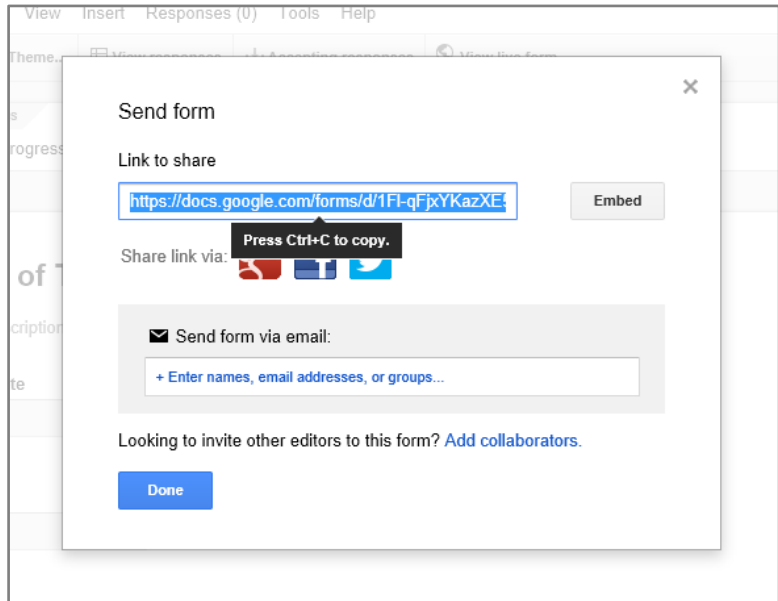

3. Once you have your copy of the spreadsheet, click on *Form > Send Form*.

4. When the form web page appears, copy the URL to clipboard using the following steps:

- a. Click on the link and select all the text.
- b. Copy the text to the clipboard by pressing Ctrl + C (or Right-click and select "Copy").

5. Paste this URL in to notepad and save it for use during application configuration, covered in the Application Configuration section.

### 3.3 Application Configuration

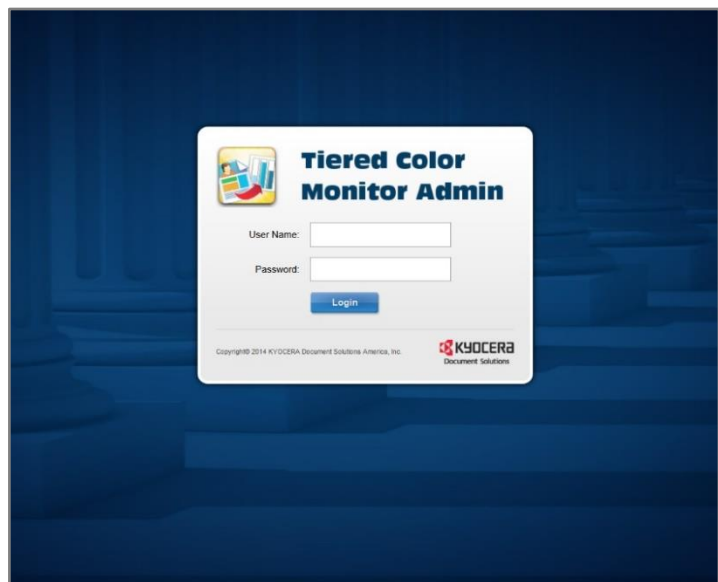

To begin setting up Tiered Color Monitor, open a web browser to the following URL:

*https://<MFP IP Address>:8083/tcm/config.jsp – or – http://<MFP IP Address>:8080/tcm/config.jsp*

<MFP IP Address> in the above examples must be replaced with the MFP's network IP address, for example: "192.168.1.45".

At the login page, enter the username and password of an administrative account and press the "Login" button. The default administrator account is "Admin", with password "Admin".

After successful authentication, the settings page appears as shown below.

### 3.3.1 Automatic Meter Collection

To configure the application to automatically send meter counts to a Google spreadsheet, follow these steps:

1. Enable automatic submission by setting Automatic Submission to “Enable”.
2. Paste spreadsheet URL into the “Google Form URL” field. Please refer to the previous section for steps on obtaining this URL.
3. Click Test button to ensure the URL is correct. If the URL is correct, the web page should display “OK”; otherwise it would display an error message.
4. Click the “Save” button to save changes and start meter collection.

The screenshot shows the 'Settings' page of the Tiered Color Monitor application. At the top, there is a dark blue navigation bar with the application logo and a 'Logout' link. Below this, there are two tabs: 'Settings' (which is active) and 'Log'. The main content area is titled 'Settings' and contains a form for configuring automatic meter collection. The form includes a dropdown menu for 'Please specify a day of the month to get meter count:' with '1st' selected. Below this is a radio button group for 'Automatic Submission (DNS required):' with 'Enable' selected. A large text input field for 'Google Form URL:' is present, with a 'Test' button below it. A 'Customer ID(optional):' field with 'test' entered is also visible. A 'Save' button is at the bottom right of the form area. The footer contains copyright information for KYOCERA Document Solutions America, Inc.

#### Configuration Options:

- **Customer ID:** Enter a value to identify the customer account (i.e., client number). This field is optional.
- **Meter collection day:** Select a day of month from the drop-down list. The default value is set to first of the month.

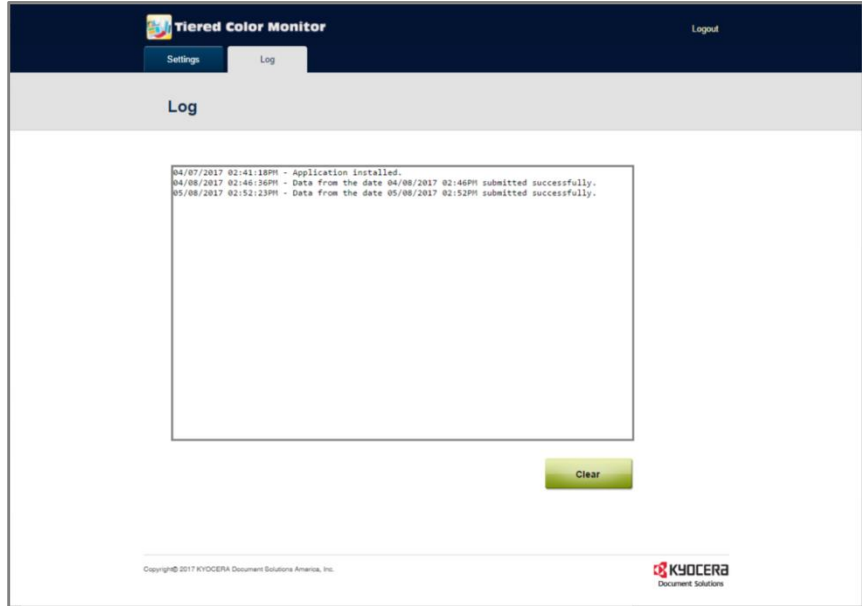

*NOTE: Only one day per month can be set per device.*

### 3.3.2 Event Log

To view a log of important events such as transmission errors, click on the Log tab. The web page shows a chronological list of events that occurred, including the time, type and error messages, if any. The event log is an essential troubleshooting tool and can help identify problems.

To clear the log, click the “Clear” button and refresh the browser.

## 4. Managing the data

### 4.1 Customizing the spreadsheet

Customizing the spreadsheet is a method to simplify the process of managing your data.

#### 4.1.1 What you can change

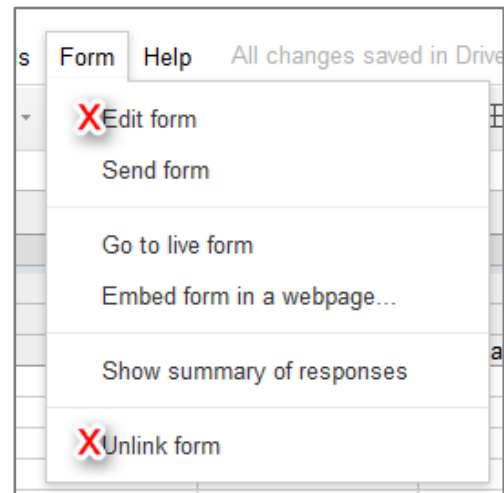

After the spreadsheet is downloaded, you can make changes to the following fields:

- Spreadsheet name
- Column names
- Column order

In addition, you can also sort the data by columns in ascending and descending order. For example, you can view the meter counts by each machine by sorting the serial number column.

Only make changes to the spreadsheet. Do not edit or unlink the form which is associated with the spreadsheet.

***WARNING: Do not make any changes to the form file itself. Doing so will prevent the data from reaching the spreadsheet.***

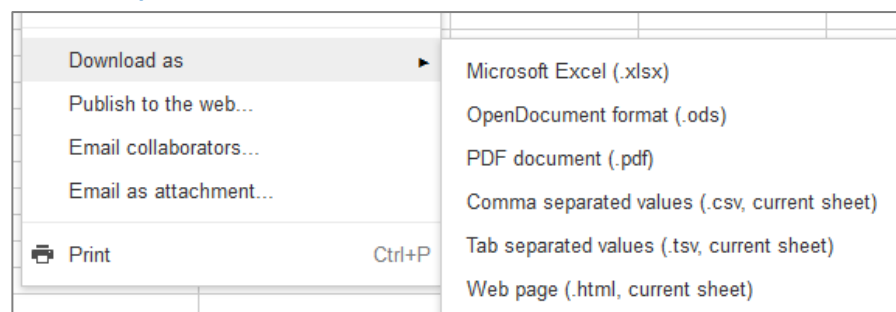

#### 4.1.2 Managing the data

Google spreadsheets allow a maximum of 400,000 cells per spreadsheet which equals over 36,000 entries. Over the course of a year, this equates to 3,000 machines. If you are getting close to the limit of cells, there are a two options:

##### ***Option 1: Clearing out the data on the spreadsheet.***

First, back up your data by downloading it as a format of your preference. Under the file menu, mouse over “Download as” and select what type of file you would like.

Next, select all the rows you wish to delete. Highlight the entire row by clicking on the row number located on the left side of the spreadsheet. You can hold shift and click the last row you would like to select them all. Then right click the highlighted area and click "Delete rows X-X".

*NOTE: Selecting only the cells containing data will not completely delete the data. You must select the entire row.*

**Option 2: Creating a new spreadsheet from Google Templates.**

*NOTE: This option will require re-configuration on each machine. The URL must be updated.*

## 5. Troubleshooting

<b>ISSUE:</b> The spreadsheet does not receive data	Check	The Spreadsheet URL in the applications configuration page.
		Ensure the MFP is network connected and DNS is setup correctly.
		Press the “Test” button in the Application Configuration web page.

If issues persist, please contact your authorized Kyocera or Copystar Dealer for assistance.

## 6. Support

### **For Tiered Color Monitor Support:**

**Contact your authorized Kyocera or Copystar Dealer.**
