1HZ0000530	AccuSender Fax	AccuSender Fax is a business application that enables users to send scanned documents as faxes directly from your KYOCERA MFP. Through integration with most popular fax servers on the market, users simply scan a hardcopy document or select one from stored archives, configure it as an attachment to an e-mail message, and use the recipient's fax number as the e-mail address. The fax server translates the attachment, which is then processed as an incoming fax by the recipient's fax machine.	\$199.00
1HZ0000950	PinPoint Scan 3	With Kyocera's PinPoint Scan application, scanning to your PC or MAC from your network connected MFPs becomes as easy as scanning from a desktop scanner but with the added speed, security and versatility Kyocera MFPs provide. With one easy-to-install application, your employees will have their own personalized scanning solution designed to fit their unique workflow needs. Personalized scanning destinations can be easily created and managed without the need for IT intervention. These destinations then become simple one-touch buttons on the MFP control panel. When employees want to scan a document, all they have to do is access the PinPoint Scan 3 application on the KYOCERA MFP, enter their pin code, select a destination, and they're ready to go!	\$319.00
1HZ0000640	Google Connector	Kyocera's Google Connector is a business application that enables end users to access their Gmail and Google Calendars.
