SHAPING THE FUTURE OF SKIING

*Jacoba Kriechmayr
Zillertal, Austria*

Early morning tours while everyone else sleeps. The roar of the crowd, the start house bleeps. Our products are developed for years, but they're made for moments. In 2023, we are proud to unveil Volant as part of the Atomic family, combining premium materials with innovative performance to create skiing works of art. Our ever-expanding touring range is led by the new Backland ski – complete with a lower-impact design and complimented by the all-new Backland XTD boots and the redeveloped Backland Summit pin binding. We've got an all-new range of goggles – headlined by the Redster HD and Four Pro HD Photo – to help you see better, and ski better. And with the Hawx Ultra XTD BOA, we're moving the dial to create an even more precise fit. Finally, the Redster S9 Gen S ski changed the way we think about skating skis. Now, the Redster S7 incorporates our elite-level Gen S construction into a next-level cross-country ski that's available to all.

**CONSIDER
EVERYTHING.
COMPROMISE
NOTHING.**

Atomic was born and is based in the heart of the Austrian Alps. The mountain playground that overlooks our home is what defines us – and our products. But climate science is clear: just as our environment shapes us, so we are shaping it. The time for radical action on the climate crisis is now, and all of us at Atomic are committed to reducing our impact. But as we know from our experience in the mountains, the best way of deciding which way to go, is working out where you are.

*Jakober Kriechmayr & Stefan Ager
Zillertal, Austria*

For us, this means establishing a carbon footprint baseline for our products. We do this by conducting a life cycle assessment (LCA), which gives us an accurate picture of a product's environmental impact from raw materials to end of life treatment. From there, we can apply design changes that reduce the product's impact. The reduced impact-design of this year's Backland ski is proof that this process works. And from now on, we will be conducting LCAs as standard so that every new construction not only improves performance but also reduces impact.

*Nina Kern
Zillertal, Austria*

ONE STRATEGY. THREE PILLARS.

We know that this kind of data-driven design thinking works, but innovation for sustainable performance is just one part of our overall climate plan. By using our world-leading ski manufacturing capabilities, we will also create the world's most sustainable ski and boot production. And since no company can tackle the climate crisis alone, our third focus is on collaboration with all who share our concern about the climate. You can read more about the three pillars of Atomic's climate strategy on the next page.

ONE FOOT IN FRONT OF THE NEXT —

Mountains are climbed in small steps, not leaps and bounds. At Atomic, we know the scale of the challenges posed by climate change. But with clear direction and resolute determination, we believe that we can make meaningful change. Our climate strategy consists of three key focuses ...

Skaftafell National Park, Iceland

BOLD ACTIONS TO TRANSFORM THE VALUE CHAIN

For many brands, manufacturing is something that happens on the other side of the world. But not for us. At Atomic, manufacturing is our superpower. We own and manage the world's largest and most advanced ski factories. And from energy efficiency to materials use, we control every step of the production process – which means we can improve it, too. By experimenting with new ways of reducing impact, we are creating the world's most sustainable ski and boot production.

INNOVATION FOR SUSTAINABLE PERFORMANCE

With no snow, there can be no ski. Planetary restraints must become an intrinsic part of our design thinking, from skis and skins to boots and bindings. But let's be clear: impact reduction is not a performance inhibitor, it's a performance driver. By making sure every component in every product serves a performance-driven purpose, we will cut down on waste and develop better performing products. Ultimately, we'll reduce our impact. And we'll do it all without ever compromising on performance.

LOWER-IMPACT DESIGN

When you see a product with this label in the catalog, it means we've updated the design to reduce its impact. But it's all relative. Sustainability isn't a switch, it's a sliding scale. We'll keep working on new, even-lower-impact products, and we'll never label anything as 'sustainable'.

COLLABORATION FOR MASS MOVEMENT

If we know one thing for certain, it's that we can't tackle the climate crisis alone. Instead, we're galvanizing a network of actors who share our goal of stabilizing the climate. From our sponsored athletes to our industry competitors, local resorts to national governments, material suppliers to retailers, we all need the sport of skiing to survive. And together, we are a more effective force.

To find out more about Atomic's commitment to impact and sustainability, please read our report, published online.

ALPINE SKIS

*Roland Loipold
Reiteralm, Austria*

Looking out from our home in the heart of the Austrian Alps, we can see everything. From seldom reached summits to slopes packed with skiers. Pristine powder beneath the trees to crisp morning corduroy ready to be carved. The mountains are our playground, and there's a million and one ways to have fun. At Atomic, we combine innovation, authenticity, and a pioneering spirit to drive skiing forward. We pride ourselves on producing high performance skis for every possible condition and terrain so that – no matter where you are on the mountain – you can ski without limits.

BEYOND THE ORDINARY

VOLANT SKI

We yearn for the classic, the handcrafted, the timeless. Volant skis are built with precision and care in the heart of the Austrian Alps, the product of passionate craftsmen dedicating their love and attention to each ski. Set yourself apart with the stainless-steel aesthetic and peerless craftsmanship of Volant.

VOLANT

Stainless-Steel Construction

Truly unique, both in form and fashion. The Stainless-Steel Top is mirrored in the Double Steel Powered core construction, for inimitable performance and peerless aesthetic qualities.

Handcrafted in Austria

Volant skis are handmade with love and attention in Altenmarkt, Austria. Each ski is the product of hundreds of hours of work, each craftsman contributing their expertise to create a ski unlike any other.

Beyond the ordinary

Made in limited runs, we strive for perfection in every part of the build process, creating exceptional results. Made for those who appreciate the highest quality, those who are ready to ski beyond the ordinary.

REDSTER SKI

*Mikaela Shiffrin
Reiteralm, Austria*

Each Redster ski traces its DNA to World Cup competition. Designed with input from skiers like Mikaela Shiffrin, Sofia Goggia, Marco Schwarz, and Aleksander Kilde, no detail is overlooked. When you step into a pair of Atomic Redster skis and arc the perfect turn in fresh morning corduroy, you become part of our sixty-five years of skiing heritage. You enter the tradition of meticulous preparation and winters spent perpetually seeking your best. The Redster line covers every aspect of high-performance on-piste skiing. Chase speed and precision with the race-ready Redster G and Redster S. Create turns of any radius on the versatile Redster X and rip the piste in all conditions from morning hardpack to afternoon slush on the Redster Q.

Redster G / S

Built for speed. Turn your local piste into your own race course. Whether you're making fast GS style arcs or slicing precise slalom turns, the Redster G and S models are made to perform.

Redster X

Designed with Multi Radius Sidecut, the Redster X owns every turn, short or long, with confidence, speed, and a whole lot of fun.

Redster Q

Ski the piste in all conditions. A bonus 15mm of width underfoot will get you through firm morning cord, afternoon slush, or the variable snow of a storm day.

Pro-level performance

Redster Revoshock powers Atomic athletes to the top steps of podiums all around the world. Now, this revolutionary technology is available to you – bringing increased stability and unparalleled acceleration to your skiing.

Stability at any speed

Thanks to Revoshock's impact-absorbing spring steel modules, your skis will be shock-free at any speed, resulting in increased stability on every run.

Confidence to push your limits

With rebound-powered acceleration and no more distracting movement through your skis, you can concentrate on pushing your edges to the limit in total confidence.

REDSTER Q

All piste conditions, all day long

This is not a ski for race gates or speed suits. The Q wants to get out and run. It excels on firm morning corduroy, slashes through chop and handles slush with aplomb. When the on-piste conditions get a little dicey, the Redster Q is right at home.

Wider waist, wider ambitions

When you ski open-to-close, you're going to face changing snow conditions. With up to 85mm of waist width, the Redster Q wants to look a little further, to explore a little more.

Race-inspired, exploration-minded

The Redster Q traces its DNA straight to Atomic's World Cup-winning Redster program. With Revoshock, Power Woodcore, and a Titanal powered laminate, this ski has racing in its blood and exploration in its soul.

SHESKIS

*Julia Granbichler
Obertauern, Austria*

sheskis encapsulates our story. We race through slalom gates and plunge deep into powder. We travel through the mountains and ski on fresh groomers. We are part of a worldwide community of skiers and united by the feeling of cold, fresh winter wind on our faces. By using #sheskis we can share stories of passion, confidence, authenticity, and community. This is our place to talk about what we all love the most: skiing.

CLOUD FAMILY

Cloud C

The original Cloud – one of the best-selling women's piste skis of all time. Its powerful performance and effortless carved turns suit fast, confident skiers. While its elegant looks have made it an icon of the piste.

Cloud Q

Our latest Cloud range for taking on any conditions the piste throws at you. With 10mm extra width underfoot it's designed to see you through morning cord, afternoon slush or the variable snow of a storm day.

CLOUD C

Feel the confidence

Revoshock Light delivers optimized damping for smooth, vibration-free handling and lively, but relaxed, edge-to-edge response. For graceful, flowing, more confident skiing.

Performance meets style

Get the perfect balance of performance and design. Its powerful performance and effortless carved turns suit fast, confident skiers. While its elegant looks have made it an icon of the piste.

Lower-Impact Design

The materials and construction process emphasize locally sourced poplar, optimize the use of fiberglass and resin, minimize production waste and reduce CO₂ emissions by 4%.

CLOUD Q

All piste conditions, all day long

The Cloud Q can take on the groomers in any condition, turning every run into an exercise in total freedom. And at the end of the day when conditions are rough, the Q can dial back its rebellious streak and be forgiving.

Wider waist, wider ambitions

With up to 83mm underfoot, the Cloud Q can do more than its narrower Cloud family members. It's ready to float through the new snow of a storm day, handle the slush or blast through the chop of late afternoon.

Race-inspired, exploration-minded

The Cloud Q shares its technical DNA with its extended Redster family – loaded with Revoshock and a Titanal powered laminate – turning even the toughest groomers into a canvas for laying down beautiful arcs through the snow.

DESIGNED IN NORTH AMERICA. BUILT IN AUSTRIA. SKIED EVERYWHERE.

MAVERICK / MAVEN

Developed, tested, and validated in North America, where every mountain attracts a different type of skier and a style that requires unique characteristics in an all-terrain ski, Maverick is the ski that unites all mountains and skiers.

Featuring construction technology used by the world's top racers and professional freeride skiers, Maverick blends both ends of the spectrum to create a ski that is both pure groomer performance and playful in the powder.

MAVERICK

Exact & Relaxed

Strong and smooth, Maverick utilizes OMatic Construction to create a core that produces the ultimate balance of stiffness and flex throughout the length of the ski.

Balanced performance

Blending the perfect amount of rocker with camber underfoot for maximum effective edge contact during the entire course of every turn, Flow Profile delivers the ideal combination of shovel taper, tip rocker, and HRZN Tech Tip to create a ski that hooks up on hardpack as well as floats in fresh snow.

Strong power to weight ratio

Just what an all-mountain ski requires and nothing more. Constructed with only essential materials; precision milled poplar wood, lightweight fiberglass and Titanal layers or carbon inserts, OMatic delivers simple, lightweight and seriously sturdy performance.

PLAYFUL PROGRESSION FROM FREERIDE TO FREESTYLE

—
MEET THE BENT FAMILY

If you're a skier who sees the mountain as a blank canvas, then the new Bent Family has the brush with which to paint your masterpiece. Designed and developed in collaboration with artist and Atomic freeski athlete Chris Benchetler. The award-winning signature ski has evolved every season over the last 15 years and is now a full collection of freeride and freestyle skis all built with the same playful progression that inspired the original ski. From powder slashing to pillow dropping, huge airs to stomping impossible landings, every ski in the Bent Family is built with one purpose – to connect your imagination and creativity to the mountain.

BENT FAMILY

Playful progression

From freeride to freestyle, the Bent Family delivers the broadest bandwidth of performance characteristics for any terrain. Designed by Chris Benchetler, developed and loved by the Atomic Freeski Team, every Bent is super playful in big mountain powder and fearlessly progressive in the park.

Surfy stability

HRZN Tech Tip & Tail delivers 10% more surface area for awesome flotation in deep snow without adding any width or weight to the ski. This feature also creates a more relaxed tip and tail for more playful, progressive performance in freestyle terrain.

Set your imagination free

Leaving true ingenuity to the skier, abstract base and top sheet graphics reinterpret Benchetler's hand-drawn artwork to encompass a passion for self-expression and creating art through skiing.

SKI TECHNOLOGY

PISTE

THE STORY OF REVOSHOCK

Our quest to create faster skis led us to Revoshock, the pinnacle of ski stabilization and shock absorption. When you're racing, maintaining your line is the difference between winning and losing. Revoshock keeps our Redster skis stable, vibration-free, and in total control so you can rip around the gates on a perfect line.

"Redster Revoshock helps me stabilize the ski during the entire turn and pushes me forward into the next one. It does that by reducing vibration and increasing stability."

Sofia Goggia

REVOSHOCK S

Utilizing a series of spring steel modules each encased in impact absorbing elastomer, the revolutionary Revoshock S technology acts like a built-in suspension system for your skis to block distracting shocks before they reach your feet. But Revoshock S doesn't just absorb impacts — it rebounds them. From your ski tip to the binding plate, each spring steel module works in harmony to turn wasted energy into valuable acceleration out of the turn. Whether you're straight-lining groomers or making fast turns at your limit, the race-proven technology provides a smoother, more precise run.

REVOSHOCK C

Eliminates vibration to provide more stability and handles quick edge-to-edge.

REVOSHOCK LIGHT

Eliminates chatter and creates a smooth ride, for more forgiveness and effortless control.

VOLANT'S TOP-QUALITY BUILD CHARACTERISTICS

Rivaled only by their peerless aesthetics.

STAINLESS-STEEL TOP

The Stainless-Steel Top lends not only an exclusive, inimitable aesthetic to the Volant line, but also creates a balance of rigidity and stabilization for a smooth skiing experience.

DOUBLE STEEL POWERED

Two layers of steel in the construction allow for extraordinary performance characteristics, while saving weight.

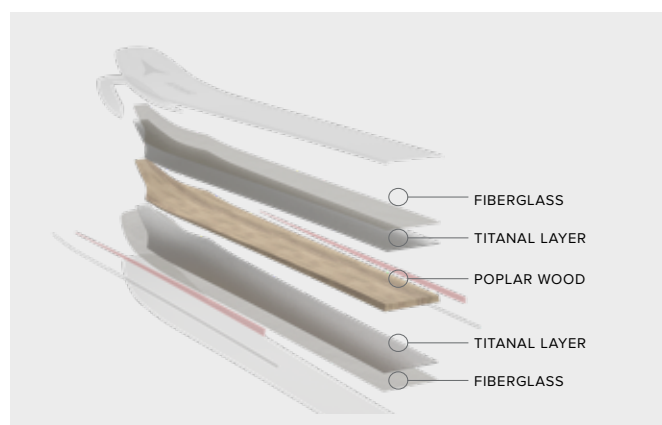

METAL VAPOR COATING

A premium metal vapor layer for exceptional appearance and durability.

ALL-MOUNTAIN

VERSATILE ALL-MOUNTAIN PERFORMANCE

OMATIC CORE

With a versatile all-mountain mindset, OMatic Construction creates a core that produces the ultimate balance of stiffness and flex throughout the length of the ski. Constructed with only essential materials; precision milled poplar wood, lightweight fiberglass and Titanal or carbon layers, OMatic delivers effortless performance, balance and stability from tip to tail.

FREESKI

ULTIMATE FLOATATION IN FREESKI TERRAIN

HRZN TECH TIP & TAIL

Features a fully beveled tip and tail that delivers 10% more surface area, without adding any width or weight to the ski, for awesome flotation in deep snow, less tip deflection and better tracking through chop. HRZN Tech Tip & Tail also creates a more relaxed tip and tail for more playful, progressive performance – making it the ultimate design for freeride and freestyle skiers

ALPINE BINDINGS

*Freeski Team
Absolut Park, Austria*

Verified by engineers and validated by professional athletes, Atomic bindings have been tested and skied under the most extreme conditions. From Overall World Cup globes to Olympic golds, winning X Games to the Freeride World Tour, descending from earth's highest peaks and crossing Antarctica – our bindings have conquered the roughest race courses and the toughest mountains. Never settling, we constantly source and test new materials to deliver the most advanced binding technologies that allow skiers to reach the next level in the sport.

BACKLAND

SHIFT

STRIVE

Low center of gravity

Low center of gravity of the LDN Toe places the binding closer to the ski for better next-to-snow feel, more direct response and quicker reaction throughout the turn. A slightly ramped chassis positions the skier in a more neutral stance while preserving the natural flex and arc of the ski.

Lightweight reliability

Robust and extremely lightweight, Strive shaves weight without compromising durability by using just enough metal where it's needed most. The result is an all-mountain binding with a lower swing weight for easier maneuverability and strong, proficient skiing all day long.

Ski the way you want

Approved by the Atomic Freeski team, Strive delivers a super stable platform that excels in every situation and snow condition. Whether it's all-mountain, freeride or freestyle – this is the binding that allows you to ski exactly the way you want, wherever you want.

BINDING TECHNOLOGY

BOOT AND BINDING COMPATIBILITY

Technology has come a long way on the boot/binding systems. Our range features different binding norms, designed to fit all kinds of boots on the market.

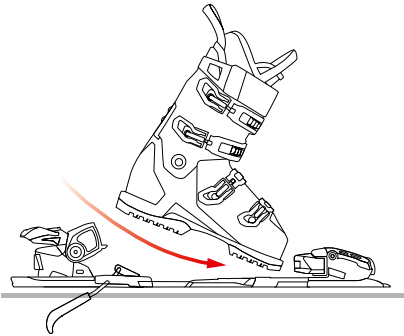

GRIPWALK

GripWalk is a sole/binding system that makes walking in ski boots significantly more comfortable, while also reducing the chance of slipping. Yet the GripWalk system also guarantees outstanding on-snow performance.

BETTER WALKING, MORE GRIP

A high-profile slip-resistant sole leads to outstanding grip for walking.

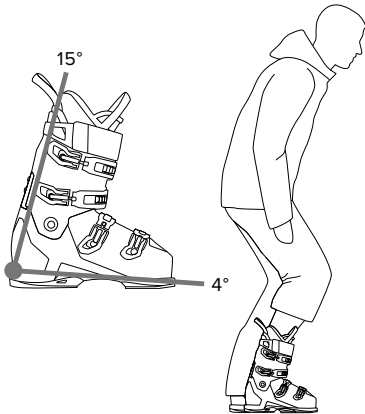

NO HEIGHT ADJUSTMENT

Simply step-in: bindings with GripWalk Logo need NO height adjustment – even when used with regular alpine boots and soles.

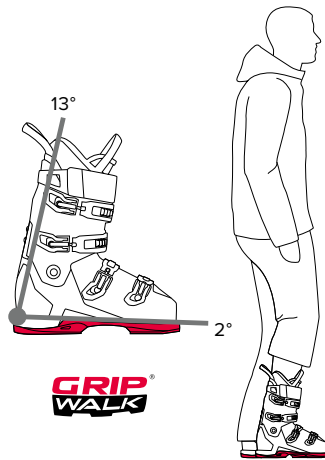

WALKING COMFORT

Increased walking comfort and improved natural roll thanks to curved rubber sole.

ISO 5355 - ON A FLAT SURFACE

Standing on a flat surface, ISO 5355 soles preserve Atomic's athletic stance.

GW - ON A FLAT SURFACE

Standing on a flat surface, GripWalk soles make the geometry more upright and more comfortable.

IN GRIPWALK BINDING

In a GripWalk binding, a GripWalk boot regains Atomic's athletic stance.

MULTI NORM CERTIFIED (MN)

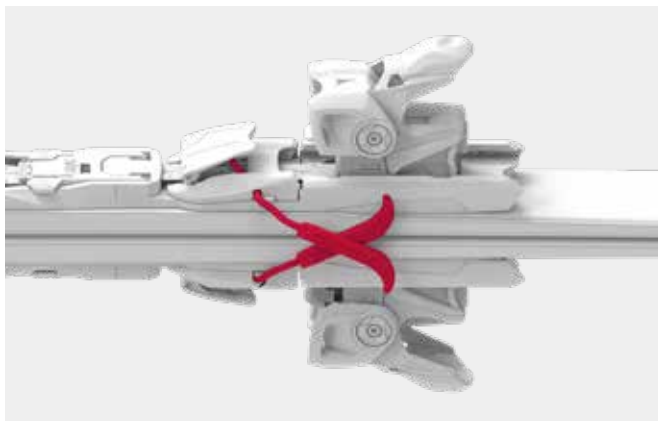

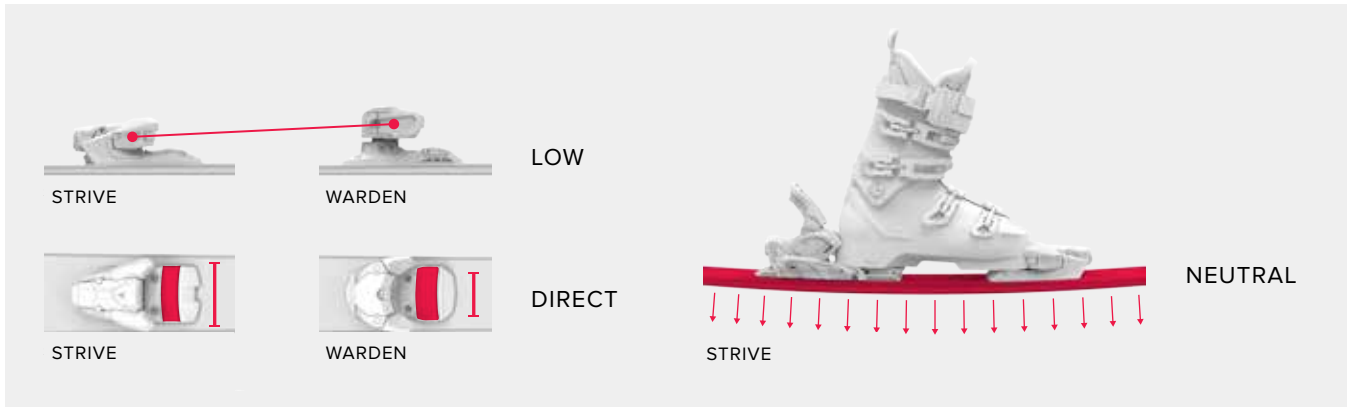

Thanks to an adjustable toe height and sliding AFD toe piece, Multi Norm certified bindings are TÜV approved, which means they fit every normed boot in the market.

PERFORMANCE FEATURES

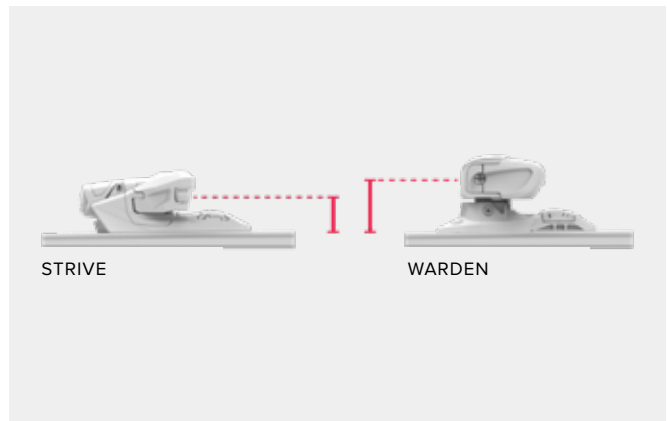

LDN TOE

Low. Direct. Neutral. These are the design characteristics of the revolutionary new LDN toe piece. A lower center of gravity places the binding closer to the ski for better next-to-snow feel and the wide base delivers more direct response and reaction throughout the turn. The flatter, neutral stance puts the skier in a more balanced position by preserving the natural flex and arc of the ski.

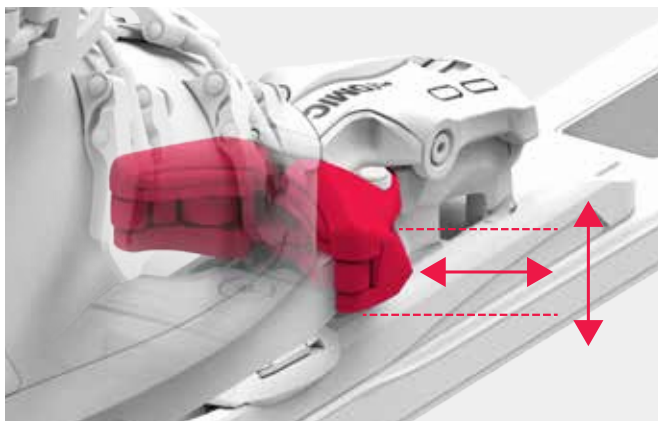

LOCKING BRAKES

A smart click and lock brake system conveniently fastens skis together for easy shoulder carry.

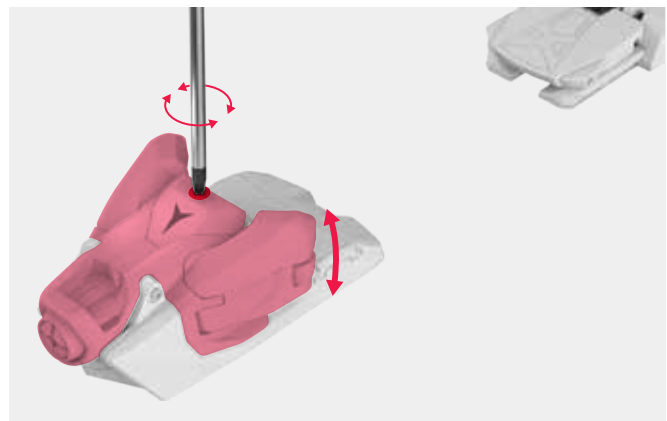

LOW PROFILE CHASSIS

A low stand height improves your feel for the terrain and enhances power transmission to the ski.

AUTOMATIC TOE ADAPTION

Toe adapts automatically to alpine normed boots for constant release values, even on worn out boots.

MANUAL TOE HEIGHT ADJUSTMENT

Adjustable toe height to let you switch between different boot norms.

BOOTS THAT FIT

Ski boots are the central interface between you and the mountain, the critical link to fit, comfort and performance. The Hawx family delivers a perfect first fit – from the narrow Hawx Ultra to the medium Hawx Prime and the wide Hawx Magna. No matter your foot shape, we have the boots that fit.

ATOMIC
PROFESSIONAL

At Atomic, our mission is to drive the sport of skiing forward. Inspired by our history and determined to push the limits of performance, we've created a range of Redster, Hawx and Hawx XTD ski boot liners designed to provide an elevated skiing experience like you've never felt before: the Atomic Professional Series.

The innovative Professional Dual Strap combines two elements together for secure, balanced performance. The elastic shock absorbing portion smooths out choppy terrain and increases damping while a static section provides pure power and energy transmission.

Offering the absolute best in fit, comfort, and performance, the new Mimic Professional liners for Redster, Hawx, and Hawx XTD deliver more foothold and feature an updated microfiber exterior for an even more harmonious fit.

MIMIC PROFESSIONAL

Supreme fit

The result of years of incessant ski boot development for Atomic's top World Cup racers, Mimic Professional injects advanced foam compounds into revolutionary Mimic liner technology to deliver a supremely customized fit with absolute precision.

Unrivaled comfort

Utilizing special foam compounds that precisely fill the space around your foot to create a personalized custom fit, the liner perfectly conforms to the anatomy of your foot and ankle areas eliminating the painful break-in period. Unrivaled comfort and increased warmth allow you to focus on skiing.

Next-level performance

Immediate power and energy transmission from foot to ski. A precise foam-molded fit eliminates all space between the liner and foot / ankle areas while Mimic technology produces an optimal next-to-shell fit. The result is superior power transfer and the ultimate interface between skier and ski boot.

REDSTER FAMILY

REDSTER STI

This highly anatomical 93mm narrow last is the lowest volume fit and has the ideal stability and stiffness for lighter racers.

REDSTER TI

This highly anatomical 95mm narrow last is the most successful race boot in the modern era and the current choice of most of our World Cup athletes.

REDSTER CS

This narrow 96mm last features more space in the forefoot and navicular areas for increased comfort while still retaining optimum foot hold for powerful skiing.

HAWX FAMILY

HAWX ULTRA
98mm NARROW FIT

HAWX PRIME
100mm MEDIUM FIT

HAWX MAGNA
102mm WIDE FIT

Hawx is one of the best-selling ski boot series in the world.

At the core of all these boots is the legendary Hawx feel – a unique combination of fit and balance that works for everyone!

MIMIC

From first fit ...

This is a boot that feels right from the very start. An anatomically pre-shaped heel and ankle area comfortably secures the foot the moment a skier steps into the boot – and it's only going to get better.

... to your fit.

The heel, ankle and tongue feature a layer of supportive, heat-moldable material. After being softened in the oven, this material mimics the precise shape of your foot, and hardens in that shape for a perfect custom fit.

It's the easy way

The heat-molding process is quick and easy, mess-free and repeatable – giving every boot-fitter the chance to make their customer's day – or entire ski season – with a fit that's as perfect as can be.

*Amie Engebretson
Truckee, USA*

The ultimate all-mountain crossover boot, Hawx Ultra XTD BOA offers the best of alpine skiing performance with efficient range of movement for walking. For those who ski every run at the resort yet like to explore beyond the boundaries for fresh snow and more adventurous skiing, this is your boot.

HAWX ULTRA XTD BOA

Dialed-in fit

A 98mm last makes this boot perfect for narrow-shaped feet. The revolutionary Mimic liner takes custom fitting to a new level while the radically innovative Boa® Fit System securely wraps the foot for an even more precise fit.

Maximum versatility

Free/Lock 4.5 ski/walk mechanism in combination with Frictionless Pivot allow for 54° of cuff rotation for natural and efficient mobility. Full rubber GripWalk sole provides traction and compatibility across a wide range of alpine and touring bindings.

All-mountain performance

The updated Prolite construction makes this boot 25% more stable by adding reinforcement in critical zones of the lower shell and upper cuff while True Flex PU plastics keep the flex progressive and smooth.

ACADEMY

What is the Mimic liner technology and why is it better than 3D? What are the differences between plastics? What makes an Atomic Hawx boot a Hawx? These are just some of the important questions we often get asked. Whether it's getting to know the basics or diving deep into professional bootfitting, the Atomic Academy offers you the exclusive opportunity to expand your knowledge.

The Atomic Academy workshops offer bootfitters the exclusive opportunity to expand their knowledge: first hand know-how, from professionals to professionals.

WORKSHOP LEVEL 1

This course establishes a solid foundation on which shop staff can efficiently and professionally assess foot and boot combinations, customize Atomic ski boots, make fewer mistakes and perform higher quality customer service in a consistent manner. You will leave with a systematic approach to boot-fitting and knowledge of Atomic-specific customization techniques.

WORKSHOP LEVEL 2

Atomic Academy Level 2 will grow and fine tune your current boot-fitting skills, focusing on efficiency and timely execution through better assessment and troubleshooting. You will leave with a deeper understanding of Atomic ski boots, custom footbeds, advanced customization techniques and the Mimic Professional fitting process.

BOOTS THAT FIT

FIRST FIT

A pair of proper fitting ski boots is the cornerstone of every skier's equipment setup and lays the foundation for a great skiing experience. The right ski boot should fit comfortably, providing a firm hold on the foot while intuitively transmitting power and control from skier to ski. Atomic offers a multitude of unique boot lasts and molds for both racing and all-mountain skiing. This enables a well-assorted shop to win in the first 30 seconds. No matter which foot shape walks in, you will have the right last width in store.

Redster STI / Racing Volume

Redster TI / Racing Volume

Redster CS / Low Volume

Hawx Ultra / Low Volume

Hawx Prime / Medium Volume

Hawx Magna / High Volume

BOOT CUSTOMIZATION

Boot customization is about making the shape of the boot mirror the shape of the foot. Sometimes we need to make space for the foot, sometimes we just need to fine tune an already good fit, and sometimes we need to take up excess space. For this reason, we speak about boot customization in terms of Expansion, Optimization, and Reduction.

EXPANSION <>

What to do when the foot shape is wider than the shell shape.

MEMORY FIT

Atomic Memory Fit is the ideal customization solution for when the foot is wider than the shell:

Best method for when traditional stretching is too time-consuming, or the area is simply too big

Completely adapts the shells and cuffs to the shape of skier's feet, ankles, and legs.

OPTIMIZATION ◎

What to do when the foot shape matches the shell shape.

MIMIC PROFESSIONAL

Mimic Professional is the ideal customization solution for liners.

MIMIC LINER

Atomic Mimic is a great customization solution for when the foot shape matches the shell shape: Completely reshapes the ankle area, tongue and calf to the shape of skier's feet, ankles, and legs.

REDUCTION >>

What to do when the foot shape is narrower than the shell shape.

MIMIC PROFESSIONAL

Mimic Professional is the ideal customization solution for liners.

VOLUME REDUCING LEG PAD

The Volume Reducing Leg Pad is designed to take up equal space around the leg, providing a snugger fit, increased comfort and increased shock absorption.

VOLUME REDUCING PAD KIT

Add these pads for reducing excess volume around the ankle area, forefoot and instep area of the liner.

BOOT TECHNOLOGY

ATOMIC'S SIGNATURE BOOT TECHNOLOGY: PROLITE

Prolite is a way of building boots that turns traditional thinking on its head. Instead of starting with a standard construction and cutting material away to save weight, Prolite does the opposite. It starts with the slimmest possible profile and then it builds up reinforcements in key areas where strength is needed – like the Energy Backbone down each boot spine. The impact of this construction? The lower weight saves energy and makes skiing effortless but also more precise with a tuned-in feel for the snow underfoot. And all the strength is still there when you need it for pushing hard.

THE NEW BOA® FIT SYSTEM ALPINE

Boa's H+i1 platform offers improved shell wrapping with bi-directional micro adjustments for a precision fit. The Boa Fit System uniformly wraps the foot and minimizes downward pressure while providing increased foot hold for improved skiing performance and all-day comfort.

LINER TECHNOLOGY

MIMIC

Special heat-moldable plastic in heel, ankle, tongue and cuff areas mimic the shape of your foot.

ADAPTIVE FIT SYSTEM (AFS) TONGUE

The adjustable AFS Tongue can be repositioned to accommodate different foot shapes & instep heights.

3D STRETCH TOE BOX

Asymmetrically shaped for left/right, 3D Stretch Toe Box allows for extra stretch & big toe comfort.

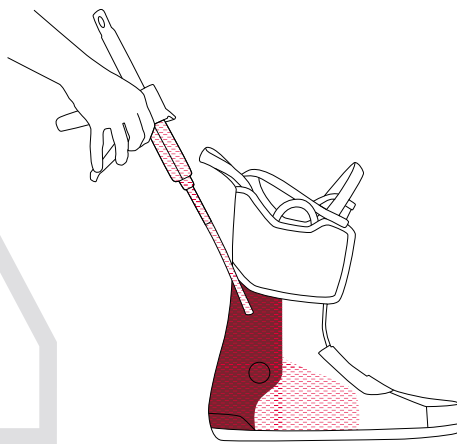

MIMIC PROFESSIONAL

Mimic Professional injects advanced foam compounds into revolutionary Mimic liner technology to create a customized fit that forms around the exact shape of the foot. The result is a liner that delivers the supreme fit, unrivaled comfort, and next-level performance.

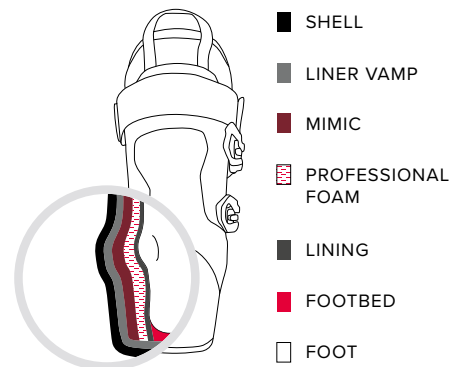

1. HEAT THE MIMIC ZONES IN THE OVEN

2. INJECT PROFESSIONAL FOAM INTO THE LINER

3. MIMIC: NEXT-TO-SHELL FIT; PROFESSIONAL FOAM: NEXT-TO-FOOT FIT

SHELL TECHNOLOGY

POWER SHIFT

Independently adjust forward lean to 13° or 15° or 17° as well as the flex index.

CANTABLE GRIP PADS

For Hawx Ultra, Prime and Magna, these grip pads are compatible with Atomic's canting shims.

ADAPTIVE FIT SYSTEM (AFS) CUFF

A removable cuff spoiler that increases the amount of tulip-shape and volume inside of the cuff.

ALIGNMENT AND CANTING

A properly canted ski boot allows the skier to have better balance and ultimately more control over the ski. Initiating the turn takes less effort, more power is directed to the ski, and the skier has an easier time staying balanced and centered from turn to turn.

CANTING ASSESSMENT SYSTEM
AM5006331001

To know which amount of sole canting is right for your customer, we developed the Canting Assessment System. Precision machined from billet aluminum, it is incredibly accurate and delivers consistent, repeatable results. The plate angle that you select is the angle that you set the boot up to. Plates range from 0.0° - 3.0°, every half degree.

CANTING SHIM STARTER KIT
AZE001202

This is the best solution for getting started & organizing your Canting Shims. Three pairs of each degree & size are supplied, along with appropriate length screws. Get this first and then re-order shims when necessary.

ATOMIC CANTMATE SYSTEM
AM5007781001 80 cm wide x 38 cm deep x 73h cm high

Cantmate elegantly combines sole canting, ramp angle adjustments and toe & heel routing into one tool, efficiently maximizing available workspace. Precision milled from aluminum in Sweden & tested with calibration equipment from Zeiss, it can plane a sole in increments of 0.25°. Items included: Cantmate device, Festool router, cutting bits, ISO 5355 height gauge and digital angle cube.

CANTING SHIM

Hawx Ultra, Hawx Prime and Hawx Magna all use our Cantable Grip Pads, which are compatible with our Canting Shims. The shims are available from 0.0° - 3.0°, every half degree. Canting Shims are sold as pairs and include appropriate length screws. Important note: once shims are added to the boot, the boot must be returned to proper ISO 5355 dimensions.

POLE TECHNOLOGY

SAFETY QUICK RELEASE SYSTEM (SQS)

The Atomic Safety Quick Release System (SQS) instantly releases your strap under tension to prevent injuries.

HAND GUARD-READY

Hand Guard-ready poles include our screwless, tool-free system which allows you to attach a hand guard just by clicking it in (hand guard bought separately).

SHAFT MATERIALS

ALUMINUM POLE TECHNOLOGY (3★ - 5★)

CARBON POLE TECHNOLOGY (4★ - 6★)

ULTRA CARBON POLE TECHNOLOGY (6★)

At Atomic we use a star system to help you select the right pole. Higher stars mean more durability and lower weight.

ALUMINUM POLE TECHNOLOGY Aluminum poles are extra durable poles with high-tensile strength.

CARBON POLE TECHNOLOGY Our poles made from Carbon are durable quality options –very rigid, stiff and light.

HYBRID POLES Hybrid poles are made from selected top-end materials for high-performance use.

ULTRA CARBON POLE TECHNOLOGY Our race poles are made from Ultra Carbon Pole Technology.

GRIPS

What you want from a grip depends on what you want to ski. We offer different grips with dedicated features for different kinds of skiing. See all the details below!

ERGONOMIC REDSTER GRIP (2K) An ergonomically shaped 2-component grip for a firm hold when skiing at high speeds.

ERGONOMIC AMT GRIP (2K) An ergonomically shaped 2-component grip for All Mountain skiing. It comes in different sizes for male and female hands, with special ridges for improved grip.

FREERIDE GRIP A longer freeride grip - helping you climb and ski in tough terrain.

ERGONOMIC BCT GRIP (EVA) An ergonomically shaped, extended EVA touring grip for comfortably gripping the pole lower down when climbing.

ERGONOMIC JR GRIP (1K) An ergonomically shaped junior grip giving little hands a firm hold.

STRAPS

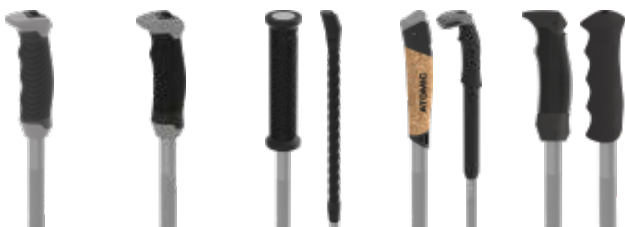

PRO STRAP Our top-of-the-range strap: pre-shaped and padded with a premium finish for a totally pressure-free hold. Also comes with easy size adjustment.

PREMIUM STRAP Our high-quality strap: easy to use, comfortably padded and with easy size adjustment.

ESSENTIAL STRAP Easy-to-use strap with size adjustment.

FIT TO PROTECT

The sport of skiing has defined Atomic since 1955. Everything we produce is informed by an authentic love of the sport and is designed and developed by people obsessed with skiing and innovation. We approach our protection and gear category with the aim to deliver the very best products for all skiers. We focus on providing Instant Fit and Supreme Protection across the category so that everyone can ski in comfort and confidence without distraction.

REDSTER SL

Feel safe as you race

The unique combination of AMID, Holo Core and an extra-durable PC Racecase delivers World Cup level protection. Redster SL CTD also features Shocksense for monitoring impact-damage from falls and gates. Dial up your safety, dial up your speed.

Protect yourself with the perfect fit

The Redster SL is so snug you'll forget you're wearing it! It comes with a 360° Fit System and Atomic Live Fit – our unique memory foam system that molds to your head shape for an instant individual fit. Ready to face any race.

Worn by our World Cup athletes

Speed and safety are in every detail of the Redster SL. It also comes with an adjustable Chin Guard in the box. It's the new Atomic helmet for all slalom racers, from young guns to our World Cup pros.

Analyze every impact

Every skier needs to know their helmet is safe to wear. Atomic Shocksense gives you that security. Its five impact-detection zones help assess the location and force of every impact then the app tells you if your helmet is damaged or still fully functional.

Send an SOS automatically

If there's an emergency, people need to know immediately. With the in-built SOS function, if the force on your helmet exceeds a certain threshold, the Atomic Shocksense App sends an SOS alert containing your GPS data to your emergency contacts.

Be safe everywhere

Our Shocksense technology is available for kids and adults across our range of racing, piste, all-mountain, freeski and touring helmets. Whatever your level and wherever you go, ski safe in the knowledge that you're fully protected.

SAVOR GT AMID VISOR

Adjusts automatically to light conditions

Boost your confidence in all light conditions thanks to a photochromatic HD lens with automatic tint-adjustment. Designed as one, the visor ID lens perfectly meets the curve of the helmet for max field of vision.

Supreme protection

With AMID and Holocore, the helmet has been constructed to give you maximum protection from all angles – up to 40% higher impact protection than industry safety standards – without compromising on weight, breathability, or durability.

Instant individual fit

Built with Atomic's intelligent 360° Fit System, Live Fit pads and Active Dual Zone Venting, this helmet instantly adapts to your head shape and keeps you comfortable and cool all day through.

HELMETS TECHNOLOGY

SUPREME PROTECTION

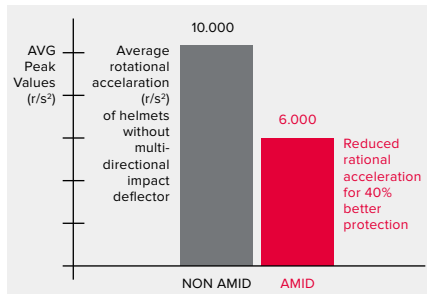

SHOCKSENSE

Shocksense uses a sensor inside your helmet to transmit impact data to the Atomic Shocksense App. It determines whether you need to replace the helmet and can send an SOS alert, as well as your GPS location, to emergency contacts. Meaning you're free to push your limits with total confidence in your equipment.

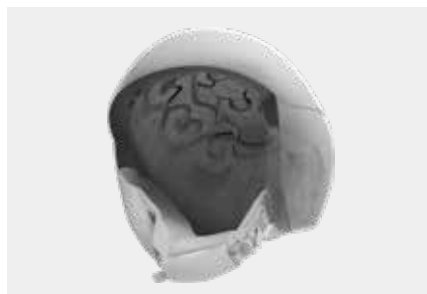

AMID

AMID stands for Atomic Multi-directional Impact Deflector and is our own development. It's a revolutionary dual-density foam system which is fixed to the helmet's core and free to move in all directions. This means better protection against impacts from all directions – as the foam cushions energy right at impact, then continues to deflect energy away from the head through its movement. By absorbing energy through the whole impact, it provides a new level of protection, whether the impact is high speed or low speed, direct or angled.

HOLO CORE

This unique 'egg-carton' construction creates an extended crumple zone for maximized shock absorption. It also comes with ventilation holes so it's cooler and lighter. This means up to 30% higher impact protection than industry safety standards require.

INDIVIDUAL FIT

360° RS FIT SYSTEM

The 360° RS Fit System lets you tailor your helmet to exactly your head shape, size and height. For an extra layer of fine-tuning, it also comes with customizable Live Fit pads on each side of your head that allow you to perfectly fit the helmet to a more oval or round head shape.

360° FIT SYSTEM + LIVE FIT

Live Fit pads form a wide band of memory foam that adapts precisely to your head for an instant individual fit. The progressive height-adjustable 360° Fit System lets you finetune the helmet to your head size – and also your headshape. It's 100% personalized comfort guaranteed for every skier.

VISOR

VISOR ID LENS

ID stands for Integrated Design, meaning the lens edge perfectly meets the curve of the helmet, maximizing your field of vision and offering greater protection against wind and snow.

ADJUSTABLE VISOR SETTING

A visor mounting that works perfectly whether you're wearing glasses or not. Simply pivot the visor and give yourself 8mm more room to accommodate glasses, without compromising field of vision or visor closure.

HD LENS TECHNOLOGY

Dials up color, clarity and contrast like never before, helping you ski with complete confidence.

HD PHOTO LENS TECHNOLOGY

Our photochromic HD lens that responds to changing light and delivers perfect contrast and clarity.

PHOTOCHROMATIC LENS TECHNOLOGY

Responds to light conditions and adjusts the level of tint, helping you see better and ski better!

STEREO LENS TECHNOLOGY

Nine layers of high-end mirror coating: glare protection, reduced eye fatigue and 100% clarity.

DESIGNED TO BE TOGETHER

All our goggles have frames to fit our helmets. And all our helmets are shaped to work with our goggles. That said, there are combinations that just work perfectly.

SEE BETTER. SKI BETTER.

With over two million working parts, the human eye is the most complex sensory organ of all. And to ensure a clear line of sight in even the most extreme mountain conditions, Atomic lens technology is just as advanced. As skiers ourselves, we know what skiers need, and we know that it all starts with clear vision. Applying our rigorous technical approach, we've designed, tested and perfected our goggles to help you progress, with HD lens tech to enhance color and contrast in all conditions.

From tight racing turns with Marco Schwarz to sending new lines with Aymar Navarro, all of our goggles are developed with direct feedback from our most demanding customers: our professional ski teams. And it's not all perfect powder when the sun is shining either. From bluebird days to blizzards, we test our goggles in all conditions to bring you innovative lens technology and robust frame design that is proven to help you see better ...

*Marco Schwarz
Atomic Racing Team*

*Aymar Navarro
Atomic Freeski Team
Copyright: Jaime Varela*

... because when you see better, you ski better.

HD LENS TECHNOLOGY

Engineered at our design center in Austria, HD lens technology is a proprietary innovation from Atomic that provides incredible depth perception for crystal clear vision in all light conditions. As skiers ourselves, we know from experience that flat light reduces confidence by making it harder to pick out variations in terrain. We developed our HD lens technology to dial up color, contrast and clarity like never before. Micro-crystals within the lens divide white light into its six spectral colors, enhancing the sensitive red and blue ones to radically improve depth perception, reduce eye fatigue and build your confidence in all conditions.

HD PHOTO LENS TECHNOLOGY

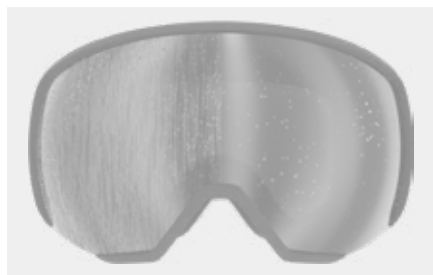

Confident skiing starts with great vision. New Atomic HD Photo lens technology delivers exceptional vision in all light conditions with one photochromic lens. Micro-crystals in the lens deliver perfect color, clarity and contrast. While the photochromic properties automatically adjust the level of tint to respond to changing light conditions – protecting you from glare and reducing eye fatigue.

LENS TECHNOLOGY

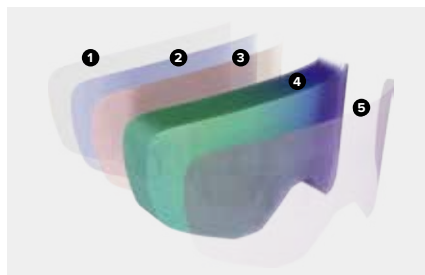

STEREO LENS TECHNOLOGY

Nine layers of high-end mirror coating increase protection from glare and reduce eye fatigue – with the colors and coatings perfectly balanced for 100% clarity.

PHOTOCHROMIC LENS TECHNOLOGY

Our photochromic lenses respond to changing light conditions by adjusting the level of tint. When it's dark they get lighter. When the sun comes out they get darker to protect you from glare.

FLASH LENS TECHNOLOGY

Flash lens technology includes one layer of high-quality mirror coating – for reduced glare, optimized clarity and an enhanced skiing experience.

HYDROPHOBIC LENS COATING

A durable coating that repels moisture, grease and dirt. Water drops roll off and disperse without streaking, while fingerprints can be easily removed.

SUPREME ANTI-FOG INNER LENS (AC)

Anti-fog properties helping you see better and ski better in all conditions.

ANTI-SCRATCH OUTER LENS (PC)

A hard coating with excellent anti-scratch properties so you'll always have a clear view.

FRAME TECHNOLOGY

QUICK-CLICK SYSTEM

Quick Click Lens is a mechanical system allowing you to change lenses in seconds: when conditions change you click out one lens, click in a new one and you're done.

SEALED LENS SYSTEM

The new Seald Lens System shuts out wind and water so even on powder days your goggles stay airtight: zero moisture, zero fogging, max visibility. It also allows you to switch lenses easily when needed.

OVER THE GLASSES (OTG LITE)

Extra grooves on the frame for prescription eyewear, but a design that also works for all skiers.

DIFFERENT FRAME SIZES

As well as different styles, our goggles come in different frame sizes. Ready to fit all face shapes.

GOGGLES FAMILIES

REDSTER

For skiers looking to perform at their best, whether that's racing, spending long days on the piste or venturing all over the mountain.

They're developed with World Cup DNA to make exceptional vision available to everyone. They come with our largest field of vision and include different lens set-ups allowing you to ski fast in all conditions.

FOUR

Backcountry, park, all mountain and everything in between – Four is for skiers whose love for the mountain has no limits.

Four are edgy, urban-inspired performance goggles specially designed for progressive skiers, and include different lens set-ups allowing you to thrive in all conditions. Don't shout, stand out!

REVENT

For the modern skier who wants to feel confident and perform strongly across the whole mountain.

Revent goggles are the perfect balance of performance and design, with a state-of-the-art modern look and a huge field of vision. Skiing at your best never looked so good.

SAVOR

For skiers who want to get out there, enjoy their skiing and make the most of the great outdoors.

Savor goggles are timeless classics for piste and all-mountain skiing that are comfortable in all conditions. Built to be as reliable as they are comfortable – to maximize your fun and minimize your fuss.

When you love skiing, you're always looking for new challenges. Every inch of snow an opportunity to perform your best. With their world cup DNA, epic field of vision and lens range, Redster goggles have been developed to give you exceptional visibility and sky-high confidence, at any speed.

REDSTER HD

Confidence-boosting contrast

Redster HD goggles use high-definition lens technology to dial up color, clarity and contrast like never before, with great depth perception and visibility in all light conditions.

Super-wide field of vision

The toric lens provides our widest field of vision ever, helping you see further and push harder whether you're racing or skiing on piste.

Sealed for speed

Built with World Cup DNA, the Sealed Lens System shuts out wind and water – no moisture, no fogging, just great visibility and confidence even when skiing at speed. Switch lenses easily with an extra lens in the box.

FOUR PRO

*Stefan Ager
Zillertal, Austria*

Whether you love the backcountry, park or anywhere in between – Four Pro is for getting out there and searching for the next adventure. With ultimate contrast and visibility in all light conditions, wherever you find yourself, whatever time of day, there's no better way to take it all in.

FOUR PRO

Adjusts automatically to light conditions

Boost your confidence in all light conditions thanks to a photochromatic HD lens with automatic tint-adjustment. A clear lens on top keeps you ready for adventures day or night.

Sealed for max visibility

The new Sealed Lens System shuts out wind and water so even on powder days your goggles stay airtight: zero moisture, zero fogging, max visibility. Also switch to a clear lens easily when needed.

Urban-inspired design

Four Pro goggles are understated and cylindrical for a cool, urban-inspired look under your helmet. They're also made using 30% to 35% recycled materials by weight.

MORE THAN JUST PRODUCT

*Sheskis Team,
Kitzsteinhorn, Austria*

TAILOR YOUR OWN RENTAL PROGRAM ACCORDING TO YOUR NEEDS

WELCOME TO A NEW RENTAL ERA

ATOMIC EASY RENTAL ASSISTANT (ERA)

Increase rental potential and get more people out skiing in less time: Atomic's Easy Rental Assistant (ERA) is a holistic, intelligent rental platform that delivers a new level of speed and efficiency to any rental shop. Atomic ERA greatly reduces the need for support and time required to fit and adjust rental equipment through a simple and approachable method. The process is streamlined allowing customers an all new option to self-service their personal equipment needs before final shop inspection and check out if preferred.

MORE TIME ON SNOW

Eliminate in-store bottle necks and get more skiers out on snow faster with an intelligent rental system specifically designed to save time and effort for shop staff and customers.

INTERCONNECTED COLOR-CODING SYSTEM

A unified color-coding system is applied across all product groups, making it easier than ever to identify the correct size for the best possible fit. Color-coding also reduces adjustment time, helps the staff save time restocking the rental fleet and allows for a new level of customer self-service.

THE PERFECT RENTAL SET-UP FORMULATED BY ATOMIC

Through intensive testing and research – from ski shape, correct boot fit, pre-set and fine-tuned binding adjustment – we have formulated a system that smoothly guides customers to the perfect rental set-up.

RENTAL – JUST NOT AS YOU KNOW IT. WHAT'S DIFFERENT?

THE FIRST COLOR-CODING SYSTEM FOR YOUR WHOLE SKIING SET-UP

Find your boot color-code first, then simply select that corresponding color for your skis, poles and helmet. Equipment selection and fleet restock made easy!

■ grey, ■ green, ■ blue, ■ red, ■ yellow

EASY TO READ SHOE SIZES MARKED ON EACH PAIR OF BOOTS

Pick the right boot instantly with shoe (not mondo) sizes clearly labelled on the back of each boot.

CUSTOMIZABLE BOOT FIT WITH FEWER SHELLS

Utilizing low and high volume liners, create a perfect fit for every customer while incorporating only five shell sizes.

SUPER-EASY BINDING ADJUSTMENT

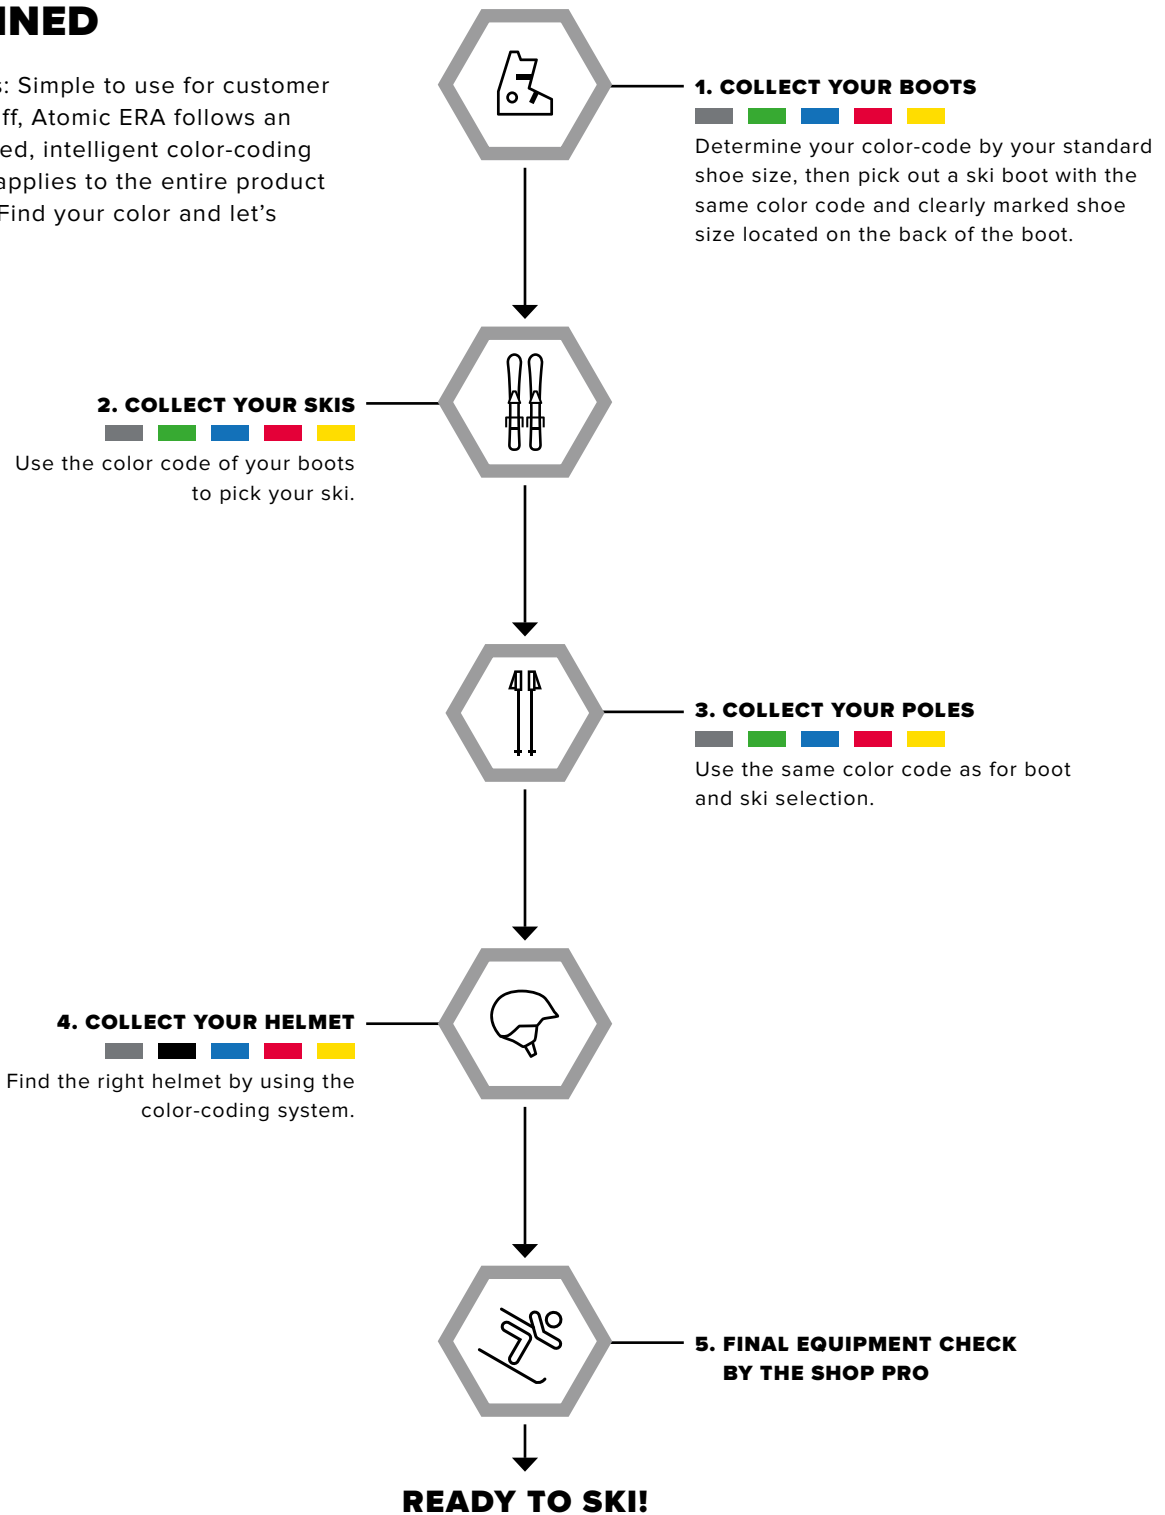

Thanks to the Leisuretrack Rental Plate and its color-coding system, there is no need for additional tools during binding adjustment.

Color-coding system yellow

RENTAL REDEFINED

How it works: Simple to use for customer and shop staff, Atomic ERA follows an interconnected, intelligent color-coding system that applies to the entire product assortment. Find your color and let's go skiing!

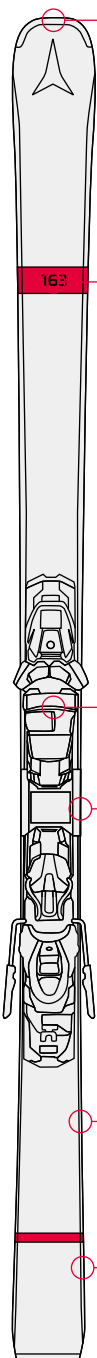

**SAVE 25% OF YOUR TIME WITH
ATOMIC'S ERA SYSTEM**

BUILT FOR RENTAL

Lots of skiers love renting because it gives them the chance to try out the latest technology each year. So we're putting loads of time and effort into providing a great rental offer. In fact, we've made sure all our regular inline skis and boots are 100% rental ready. And we offer a range of products specifically tailored for rental, all featuring our latest technical advances.

SKI

TIP PROTECTOR

A stainless steel protector that's screwed in so it's easy to replace and extends the life of the ski.

PM REDSTER RX ERA, PM REDSTER J2: COLOR-CODED SIZING

This ski is color-coded, which makes selecting the correct size quick and easy. Get skiers out of the shop and onto the snow quickly!

- 70cm/120cm/156cm
- 80cm/130cm/163cm
- 90cm/140cm/170cm
- 100cm/142cm/150cm
- 110cm/149cm

BARCODE HOLDER

A special spot for a barcode on the binding.

BEND-X TECHNOLOGY

A flex zone in the binding area of the Redster RX, Cloud 7 and all Junior models makes it easier to bend the ski using less power. This makes turning easier, even for beginners.

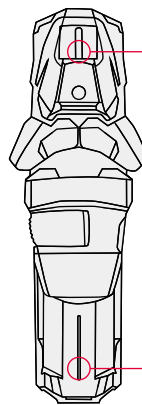

ROBUST BASES AND EDGES

Our skis come with sintered bases and Dura Edge technology for more grinding cycles and greater durability.

SLANTED SIDEWALLS

A construction with slanted sidewalls that avoids topsheet chipping and reduces scratches on the surface.

BINDING

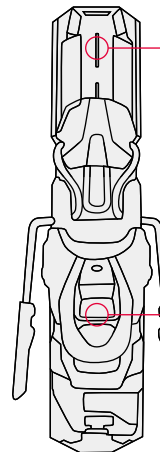

EASY TO READ DIN VALUES

Lets you read DIN values on toe and heel in a second, then adjust to suit skier's weight, height, age and skiing level.

EASY TO MOUNT

Really simple mounting saves you loads of time throughout the season.

LEISURETRAK RENTAL PLATE

With easy-to-read, color-coded sole length information on the baseplate.

- 275mm
- 295mm
- 315mm
- 335mm
- 355mm

TOOLLESS ADJUSTMENT

Easily adjustable sole lengths along with toe and heel components mean you can fine-tune a skier's position on their ski quickly and without tools.

GRIPWALK

Our GripWalk-ready ski bindings are designed with perfectly fitting contact points, ensuring optimal power transfer to the ski and work with regular alpine soles (ISO 5355) as well as GripWalk soles. They need no toe height adjustment and offer a perfect fit and release.

BOOT

BARCODE HOLDERS

Dedicated barcode panels on the boot help the barcode stickers stay put throughout the season.

SIZE AND SOLE LENGTH

Big numbers make it easy to find the right size.

POLYURETHANE SHELLS

Our durable, highly scratch-resistant shells make radiant colors and transparent designs possible.

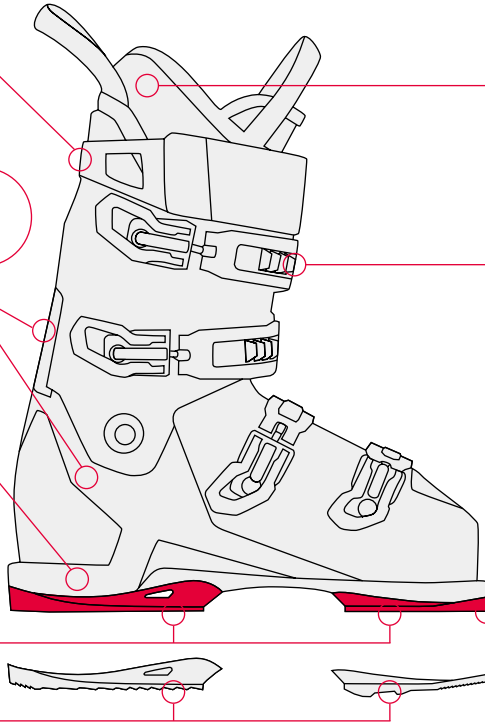

DURABLE SURFACE TEXTURE

A strong finish that improves durability and long-term aesthetics – featured on all Hawx boots.

EXCHANGEABLE SOLES

Our rental boots offer exchangeable soles. They can be set up with GripWalk or 5355 Alpine soles.

43
44

COMFORTABLE, LONG-LASTING LINERS

Soft and warm liners retain their high-grade appearance and remain extremely comfortable for years.

TOOLLESS ADJUSTABLE BUCKLES

We use buckles featuring adjustable tooth plates that can be easily shifted to fit different leg shapes.

HAWX MAGNA R ERA: COLOR-CODED SIZING

This boot is color-coded, which makes selecting the correct size quick and easy. Get skiers out of the shop and onto the snow quickly!

- Sizes: 22/23, Sole Length: 275mm
- Sizes: 24/25, Sole Length: 295mm
- Sizes: 26/27, Sole Length: 315mm
- Sizes: 28/29, Sole Length: 335mm
- Sizes: 30/31, Sole Length: 355mm

HELMET

3M™ X-STATIC LINING

This high-performance lining provides unparalleled anti-microbial and anti-odor properties – ideal for rental.

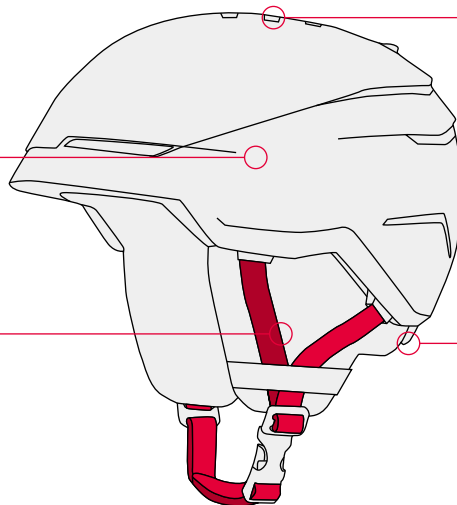

LIVE FIT

Live Fit pads surround the head 360° and instantly mold to different head shapes for an individual fit. They also dampen low-level impacts.

COLOR-CODED SIZING

All Atomic rental helmets are color-coded, which makes selecting the correct size quick and easy. Get skiers out of the shop and onto the snow quickly!

- XS
- S
- M
- L
- XL

ACTIVE AIRCON VENTING

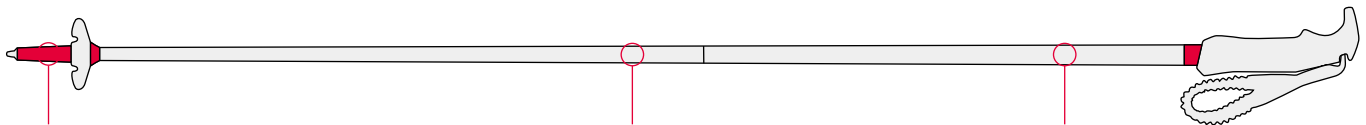

Aircon is our most advanced cooling system. The Holo Core offers wider and more air channels through each layer of the helmet which gives hot air room to escape while manually adjustable vents actively suck heat away from the head.

FIT SYSTEM

Our rental helmets can be manually height-adjusted and fine-tuned using a small dial at the back for an even more precise fit.

§ HELMET INDEMNIFICATION PROGRAM

POLE

COLOR-CODED SIZING

All Atomic rental poles are color-coded, which makes finding the right size super easy. Get skiers out of the shop and onto the snow quickly!

- 70 cm / 95 cm / 120 cm
- 75 cm / 100 cm / 125 cm
- 80 cm / 105 cm / 130 cm
- 85 cm / 110 cm / 135 cm
- 90 cm / 115 cm

LIGHTWEIGHT

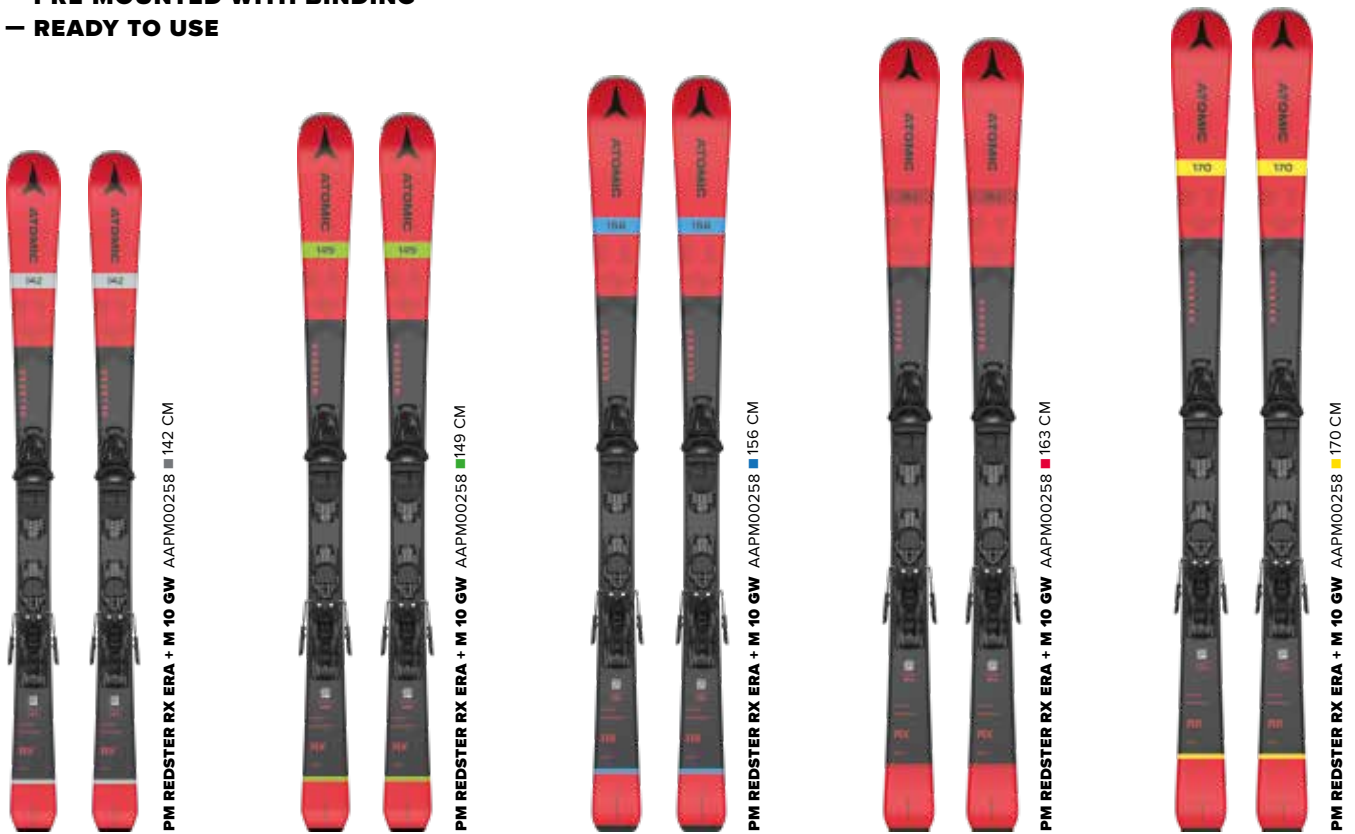

We make all our rental poles from composite material or aluminum. Both really light and durable.

HARD-WEARING COMPONENTS

These include more robust tubes, strong baskets and hard-wearing anodized graphics.

BUILT BY SKIERS. MADE TO EXPLORE.

Whether it's the stripped-back pursuit of distant peaks, a lap of a home mountain or an unskied big line, Atomic designs equipment that's been tested and designed to allow every skier to uncover their true potential.

*Jacoba Kriechmayr & Stefan Ager
Zillertal, Austria*

FAST AND LIGHT TOURING

The mountains are your hallowed training ground, and you need equipment that lets you climb efficiently and handle the downhill with confidence. When you're chasing personal bests and massive vert, reach for the Backland UL.

ALL-ROUND TOURING

Whether you're planning a day-tour or a quick lap after work, the all-round Backland series is designed so you'll enjoy every aspect of backcountry skiing, from the perfect kick-turn to the last descent of the day.

FREERIDE TOURING

Your Freeride touring equipment glides through the snow. It's weight optimized so you ascend easily. And since it's built to perform in variable conditions on the most intense lines, you know you can send it on the way down.

BACKLAND TO THE FOREFRONT

*Production
Altenmarkt, Austria*

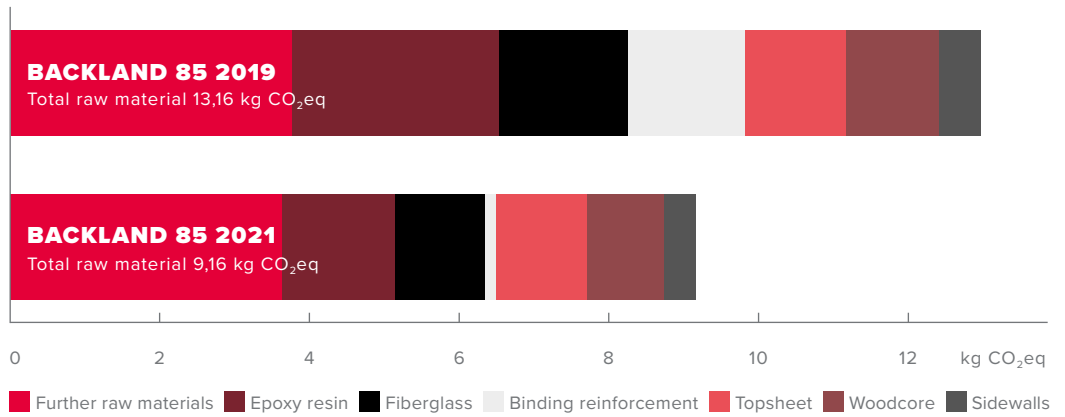

Far away from the confines of slopes and lift lines, the Backland ski is built for beyond. For the wilder places, where the effects of the climate crisis are often most evident. Where better, then, to begin reducing our environmental impact?

STATS TELL A STORY

Two years ago, the Backland 85 became the first ski in our range to undergo a life cycle assessment (LCA). From raw material extraction to end of life treatment, an LCA is a scientific tool that gives us an accurate picture of a product's impact. All information is validated by a third party in line with ISO14040 and ISO14044. And in the case of the Backland 85, the findings were clear.

Raw materials were the biggest impact drivers, with fiberglass and resin components contributing most to the ski's overall carbon footprint. Applying this knowledge, our designers worked with a range of new tools to develop prototypes that not only reduced the impact of the ski but also improved its on-snow performance.

GLOBAL WARMING POTENTIAL RAW MATERIALS

LOWER IMPACT, BY DESIGN

This year, the new Backland ski is made of a locally sourced poplar woodcore and significantly less fiberglass, resin and metal. The result? An average reduction of 30% in CO₂ emissions. The new, lower-impact design is featured in Backland skis between 85–95mm, and this is just the start.

From now on, we are committed to conducting LCAs on every product we redesign so that every new construction provides us an opportunity not only to improve performance but to reduce impact, too.

TOPSHEET WITH MORE RECYCLED MATERIAL

LOCALLY SOURCED POPLAR WOOD

HARD WOOD BINDING REINFORCEMENT

NEW WASTE-REDUCING SIDEWALLS

LESS FIBERGLASS & RESIN

LOWER-IMPACT DESIGN

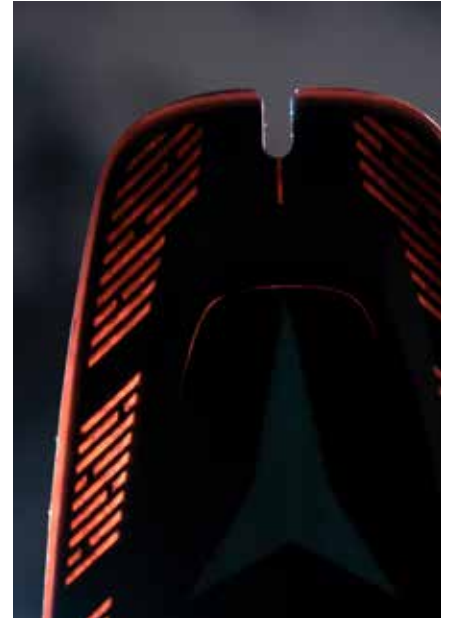

Backland 88

BACKLAND SKI TECHNOLOGY

All-terrain versatility, uphill efficiency, limitless float – the promise of Atomic's new touring ski range. Discover our latest touring ski technology.

HRZN 3D

HRZN 3D features a broader, uniquely beveled three-dimensional tip and increases surface area to create a ski that floats better in powder and improves ski handling in variable conditions. Utilizing a thinner, almost see-through, perforated material in its construction, HRZN 3D also reduces the swing weight of the ski for easier, faster, more powerful skiing. HRZN 3D seamlessly integrates into the Dura Cap sidewall making for a hyper-responsive tip-to-sidewall-to-edge connection with added durability.

ALL-TERRAIN PROFILE

After intensive testing and research, the new All-Terrain Profile is a completely redesigned ski construction that uses locally sourced wood with less fiberglass for a lighter, stronger, more all-around profile. This new material makeup changes the thickness curve, torsional stiffness and flex pattern to create an evolutionary sidecut and ski shape that offers greater versatility both on and off piste. Whether it's powder, hardpack, groomed or any condition in between, the new All-Terrain Profile handles everything with absolute confidence.

BACKLAND FAMILY

BACKLAND UL

Ultralight efficiency for maximum vert

Minimize weight and maximize performance – uphill and down. Efficient and ultralight, the Backland UL lets you move uphill like a mountain goat and descend with confidence.

BACKLAND SL

Move superlight in the backcountry

Superlight construction makes it easy to rack up the vert. The Backland SL is built to fly on both the skintrack and the descent.

BACKLAND

Tour the entire mountain

Strike the perfect balance between weight minimization, efficiency, and still have enough platform underfoot to confidently rip the lines that catch your eye from the skintrack.

BACKLAND FR

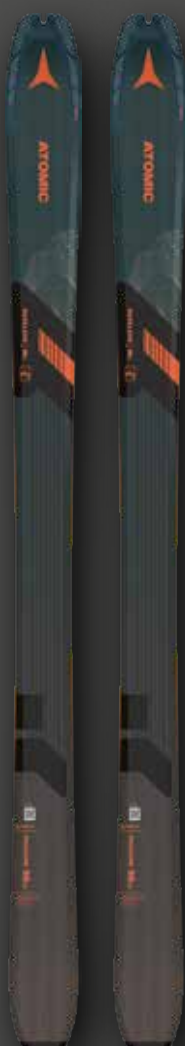

For big lines and bottomless pow

The Backland Freeride range is optimized to save weight for the ascent, and downhill-proven on the most intense lines. Go up comfortably, and send it as hard as you like on the way down.

*Herbert Buchsteiner
Zauchensee, Austria*

Shaping the future of the sport while realizing the limits of our planet's boundaries comes the all-terrain Backland ski. The eco-friendlier design is constructed with locally sourced poplar wood, less fiberglass and resin, reducing the environmental impact while delivering more soulful performance.

BACKLAND SKI

All-terrain versatility

A completely new construction with a lightweight natural wood to fiberglass ratio produces a unique tip shape and ski profile for efficient climbing and unrivaled downhill performance in any terrain.

Limitless float

HRZN 3D's broader, uniquely beveled three-dimensional tip increases surface area to create a ski that floats better in powder and improves handling in variable conditions. With minimum material construction to reduce swing weight for easier, more confident skiing.

Reduced environmental impact

A reinterpretation of the original Backland construction, this ski is built with locally sourced poplar wood and an eco-friendlier design that reduces production waste and cuts CO₂ emissions by 30%, redirecting energy savings into soulful performance power.

SKIN TECHNOLOGY

HYBRID GLUE 2.0

Hybrid Glue 2.0 is easy to handle as it won't stick your skins together. In addition, it will renew with a quick wash with a Hybrid cleaning kit.

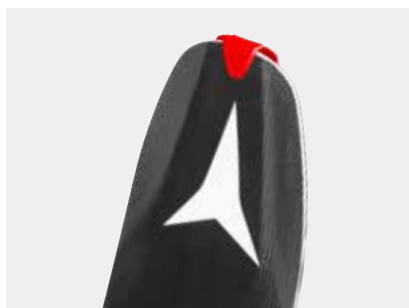

CLIP OVERVIEW

Our skins feature optimized Tip- and Tail-Clips for relevant ski models – and target users.

UNIVERSAL TIPCLIP

ATOMIC TIPCLIP

RACE TIPCLIP

CUTS

MULTIFIT CUT

MultiFit Cut means the skin can be cut in multiple widths or lengths.

PREFIT CUT

A skin custom made for an individual ski without additional fitting or trimming.

STRAIGHTFIT CUT

StraightFit Cut means the skin doesn't follow the ski's sidecut but is straight to save weight.

SKIMO ATHLETES

As committed ski tourers we're drawn to every type of terrain. We want to ski no matter the snow conditions, whether it's deep powder, firm hardpack or an icy skin track. Light, strong, and truly reliable – Backland Summit delivers the most balanced connection between your feet and the snow beneath.

BACKLAND SUMMIT

Easy to use

The easy step-in aid guides the ski boot automatically into position for trouble-free alignment and engagement. Conveniently adjust the three-stage climbing aid with the flick of a ski pole.

Safe and reliable

AutoFlex System provides 5mm of elasticity within the binding to support the natural ski flex and further enhance safety. Wide-ranging Release Value Adjustment allows for adjustment of release values up to 12 for trustworthy performance.

Made for All-round touring

High performance PA material reinforced with fiberglass keeps the binding lightweight for efficient uphill climbing. The robust design also features a wide contact area with the ski for powerful downhill performance on all types of terrain.

BACKLAND BINDING TECHNOLOGY

Our touring bindings range is equipped with features that deliver the most balanced connection between your feet and the snow beneath.

AUTOFLEX SYSTEM

The new AutoFlex System provides elasticity within the Backland Summit binding to support the natural ski flex and further enhance safety. The system features a spring beneath the heel mechanism that automatically provides 5mm of travel between the toe and heel during the arc of a turn. The 5mm provided by the spring come as additional travel to the recommended 4mm sole adjustment gap, resulting in a total of 9mm of binding travel.

RELEASE VALUE ADJUSTMENT

Full range of adjustment offers release values up to 12 for trustworthy performance for all skiers.

PATENTED STEP-IN AID

Patented step-in aid features an integrated toe bar that guides your boot into perfect position.

CLIMBING AID

Gain climbing efficiency by adjusting climbing aid to 0°, 7° or 13° with a simple flick of ski pole.

ALU/PA PIN TOE & HEEL

High performance PA material reinforced with fiberglass keeps binding lightweight for climbing.

TOURING BOOTS

BACKLAND ULTIMATE

The lightest touring boot in the Atomic line-up, Backland Ultimate is designed for super quick transitions and ultra fast and efficient climbing.

BACKLAND UL

Backland UL features lightweight, best-in-class mobility for ski tourers who favor the uphill and are mindful of every gram.

BACKLAND SL

Backland SL is an all-round touring boot that combines the efficient quick transitions of Backland UL with the solid downhill performance of the Backland.

BACKLAND

Wildly versatile, the narrow-fit all-round Backland touring boot with epic natural movement and a secure fit for controlled and responsive skiing.

BACKLAND XTD

The medium-fit Backland XTD blends epic natural movement with confidence-inspiring skiing power. This is the best skiing Backland boot.

HAWX XTD

Hawx XTD combines the legendary feel and all-mountain skiing power of Hawx with best-in-class touring walkability. This is the perfect crossover boot.

BACKLAND

Secure fit

This 98mm last boot features a next-generation Cross Lace 2.0 closure system that securely wraps the foot. The 3D Platinum liner with Dry Fit Foam creates a phenomenal and longer lasting fit that provides improved foot hold over previous Backland boots.

Touring comfort

Delivering easier than ever step-in/step-out, this boot also offers increased cushioning and foot hold thanks to its 3D liner made with Dry Fit Foam. Breathable zones in the liner allow excess heat to escape, keeping your feet drier and warmer.

Next-level skiing performance

The Free/Lock 4.0 ski/walk mechanism and Frictionless Pivot allow for 74° of epic natural movement for effortless climbing. The powerful carbon construction and new buckle closure systems take Backland to the next level in skiing performance.

*Herbert Buchsteiner
Zauchensee, Austria*

Built for those ski tourers looking for a medium-fit boot that offers rock-solid handling on the down and can climb anything on the way up, the all-round Backland XTD is your ticket to a season of touring adventures.

BACKLAND XTD

Anatomic medium fit

A 100mm last makes this touring boot perfect for medium-shaped feet. A Cross Lace 2.5 closure system securely wraps the entire foot by lacing the cable through the buckle to create a powerful fit.

Epic natural movement

Free/Lock 4.5 ski/walk mechanism in combination with Frictionless Pivot allow for 74° natural cuff movement for effortless mobility. A breathable and washable 3D Platinum Tour liner with Dry Fit Foam uniformly envelops the foot for all-day comfort while touring.

Best skiing touring boot

New Prolite construction makes this boot extremely stable by adding reinforcement in critical zones of the lower shell and upper cuff while keeping the boot agile. The carbon-powered shell and cuff offers a 120 flex for more powerful skiing.

TOURING BOOT TECHNOLOGY

EPIC NATURAL MOVEMENT

FRictionless PIVOTS

Igus polymer bushings provide a completely natural movement for effortless ascents. Frictionless Mirror Pivots: Symmetric and parallel pivots deliver 74° of super smooth, unimpeded cuff movement while touring.

FREE / LOCK

This mechanism is built for powerful skiing performance. Its external design allows for easily clearing snow and ice buildup while offering adjustable forward lean, efficient climbing and rock-solid, reliable downhill performance.

Free / Lock 4.5: Backland XTD, Hawx Ultra XTD, Hawx Prime XTD

Free / Lock 4.0: Backland UL, Backland SL, Backland

Free / Lock 3.5: Backland Ultimate

SUPERIOR CONTROL FOR SKIING

HYBRID OVERLAP

An open-throat and semi-overlap shell construction that improves step-in/out and foot wrapping.

Normal touring shell uses open-throat construction:

Open-throat allows for easy step-in/out, but normally doesn't wrap well in the toe area.

Normal overlap shell construction:

Offers fantastic wrapping of the foot, but at the sacrifice of easy step in/out.

CROSS LACE

This closure system securely wraps the complete foot to create a phenomenal fit with unparalleled foot and ankle hold. A supremely uniform fit is achieved by lacing the adjustment system through the lower buckle, allowing for improved support, easier on and off, personalized settings and a better overall fit.

Cross Lace 2.5: A more powerful Z-cable closure system specifically designed for the Hybrid Overlap of Backland XTD.

BACKLAND LAST WIDTHS

Backland UL, Backland SL, Backland / Low Volume

Backland XTD / Medium Volume

LINER TECHNOLOGY

BREATHABLE & HAND WASHABLE

Perforated construction with waterproof/breathable membrane keeps feet dry and warm. Hand washable and air-dry only.

DRY FIT FOAM

Dry Fit Foam uniformly envelops the foot for the best fit and offers resistance to packing out.

DURA SHIELD

A durable TPU layer covers a rugged mesh textile to protect the liner from daily wear and tear.

SHELL TECHNOLOGY

BOA® FIT SYSTEM TOURING

Dialed-in fit with BOA's M3v2 platform. Push to engage, turn to tighten and pull up for release.

STRETCH GUARD

A 2-layer construction for greater waterproofing, improved durability, and easier step-in/step-out.

Stretch Guard 360: A 100% weatherproof barrier that ensures complete protection from snow and water.

TYPES OF RUBBER SOLES

Skywalk Non-Norm Sole:

Lightweight, high-traction rubber sole with the greatest rocker profile for natural movement.

Skywalk Touring Norm Sole:

25% recycled rubber rockered sole for easy walking and excellent traction. Touring Norm ISO 9523

Skywalk GripWalk Sole:

25% recycled rubber rockered sole utilizes AFD areas for more power. Walk Norm ISO 23223

TOURING POLE TECHNOLOGY

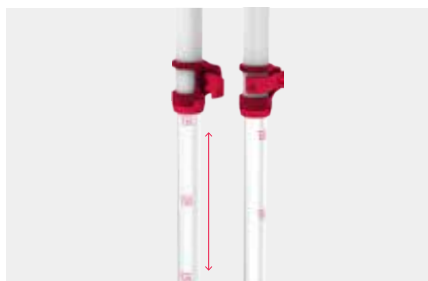

SQS – SAFETY QUICK RELEASE SYSTEM

The Atomic Safety Quick Release System (SQS) instantly releases your strap under tension to prevent injuries.

ADJUSTABLE LENGTH (TELESCOPE WITH POWER LOCK)

Our telescopic poles have an efficient and reliable lightweight locking system (Power Lock) for easy length adjustment to match the gradient of your climb.

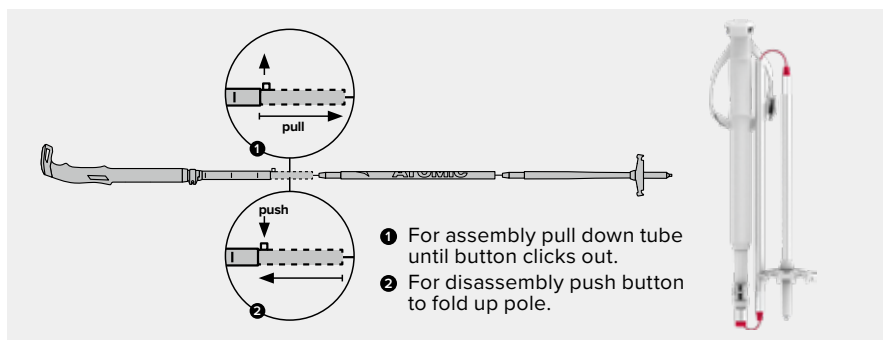

SKI BINDING SCREWDRIVER INSIDE

On specific models a ski-binding screwdriver (9mm phillips/flat-head) is integrated inside the shaft.

FOLDABLE POLE TECHNOLOGY

Our foldable poles are constructed just like a probe, from 5 pieces connected through a string inside. A push-button release mechanism allows the pole to be folded up to a length of just 40 cm.

BACKLAND

Supreme touring protection

The last climb on race day, the final descent of a long tour – performance and protection can't be compromised. With AMID, Holo Core and Multi-Norm certification for skiing, climbing and cycling, this lightweight helmet is everything you need to be your best in the mountains, all year through.

Individual Fit, all-day function

If a piece of gear isn't comfortable you're less likely to choose it. And when that piece of gear is your helmet, it's important to choose it every time. Backland helmets are built with Atomic's intelligent 360° Fit System, allowing adjustment on every axis, ensuring a perfect custom fit right out of the box.

Made to move in the mountains

Whether you're on the line at a World Cup race or setting out for an all-day tour you need performance gear fueled by ski touring technology. No matter how you move in the mountains, these helmets are designed so you can push your limits. It's also made using 43% recycled materials by weight.

BACKLAND HELMET TECHNOLOGY

SUPREME PROTECTION

SHOCKSENSE

Shocksense is our new smart helmet technology: a sensor inside your helmet combines with the Atomic Shocksense App to measure impacts and transmit an SOS alert if needed.

AMID

AMID (Atomic Multi-directional Impact Deflector) is our revolutionary dual-density foam system that provides up to 40% higher impact protection than industry safety standards require.

MULTI-NORM

MULTI-NORM CERTIFIED

Multi-Norm certified means that the Backland helmet meets safety requirements for skiing (EN1077:2007), climbing (EN 12492:2012), and cycling (EN 1078:2012, CPSC 1203). No more swapping helmets on multi-sport days! Take the Backland helmet on any adventure, all year round.

HYBRID EPP IN-MOLD CONSTRUCTION

The Hybrid EPP In-Mold Construction is our unique construction for the Backland helmet. It is super durable thanks to the EPP Edge Protection in the lower section. In addition, the upper in-mold construction means the EPS foam is molded directly into the PC shell. This makes the helmet super lightweight while also supremely safe.

PC MICROSHELLS

PC Microshells are added to a helmet shell to provide additional stability. This is a great way of adding structural reinforcement without adding bulk – keeping the helmet lightweight but super protective. (Only in Backland, Backland CTD and Backland UL CTD)

INSTANT FIT

360° FIT SYSTEM + LIVE FIT

Live Fit pads form a wide band of memory foam that adapts precisely to your head for an instant individual fit. The progressive height-adjustable 360° Fit System lets you finetune the helmet to your head size – and also your headshape. It's 100% personalized comfort guaranteed for every skier.

REMOVABLE AND WASHABLE FULL CAP SKI LINING

Our comfortable, lightweight Full Cap Ski lining is all about keeping you warm on cold days and cool on warm days. The highly technical material absorbs sweat and moisture to keep your head dry. It also features 3D-molded ear pads integrated into the liner. Plus it's removable and washable so it stays fresh for long-term wear.

3D MOLDED EARPADS

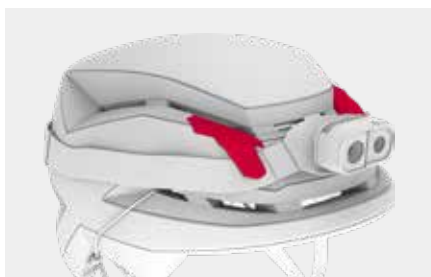

3D Molded Earpads are shaped especially for comfort and fit, surrounding your ears to keep them warm and protected in all conditions.

REMOVABLE AND WASHABLE SKIMO LINING

This minimalistic construction optimizes padding for comfort and protection while remaining really well ventilated and light. The material used is a highly technical material that also absorbs sweat and keeps your head cool. It's ideal for winter touring or long summer bike rides. Plus it's removable and washable so it stays fresh for long-term wear.

EXTRAS

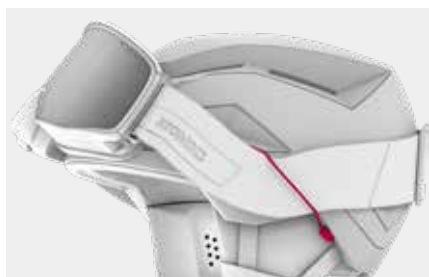

HEADLAMP FIXATION

Backland Helmets feature a special headlamp fixation at the front so you can quickly and easily mount your headlamp and it won't jiggle around. You can then fix your headlamp at the back using the goggle fixation, where there is also enough space for the battery pack.

RECYCLED LINER FABRIC

Our liners use a recycled material certified by the Global Recycled Standard (GRS). GRS is the international standard for responsible recycling chains and aims to increase the use of recycled materials, decrease the use of chemicals and improve materials' social and environmental impact.

REMOVABLE STRAP STATION

Our innovative Removable Strap Station sits tight against your helmet and keeps your goggles twist-free, easy to put on and ready to race at all times. And when you don't need the station, it can be easily removed to save weight.

REFLECTIVE ELEMENT

The Backland Helmet features a special Reflective Element at the back that delivers high visibility protection. Great for late-night bike rides or night tours.

DESIGNED TO BE TOGETHER

All our goggles have frames to fit our helmets. And all our helmets are shaped to work with our goggles. That said, there are combinations that just work perfectly.

BACKLAND FR PACKS

Fit for freeride touring

The Backland FR packs are designed with freeride touring in mind. Equipped with a variety of tool carries, this mountaineering-capable pack takes you from the skintrack to the summit so you can focus on big lines and deep turns.

Multi-use modularity

Every tour is different. You may carry your ice axe, crampons and rope for big objectives one day, and leave all but the essentials for low-angle blower the next. The Backland FR adjusts to fit the demands of your touring goals, large or small.

By athletes and mountain guides

The Backland FR packs have been put through their paces by Atomic pro team skiers and mountain guides. Every aspect of the Backland FR packs were tested in the alps in the harshest conditions to be sure they can meet the demands of the most committed skiers.

BACKLAND PACKS TECHNOLOGY

Being prepared for quick missions to rip pow can mean something different than being prepared for an overnight mid-winter ski tour. The Backland packs keep ski tourers equipped and ready to thrive in the mountains, no matter the objective.

MODULARITY FR

The Backland FR Packs adjust to fit the day's objectives. With a variety of modifiable features, like the Removeable Lid Bag and the rolltop opening, the Backland FR has the ability to expand or reduce volume as well as provide multiple ski carry options with A-frame and diagonal positions. Dedicated ice axe and rope carries help you move efficiently through any terrain. Fix your crampons, a sleeping mat, or whatever your tour requires with the Custom Daisy Chains for even more storage capacity.

EXTERNAL DAISY CHAIN FLEX-STOW

An external storage system comprised of strong, flexible cord and hooks developed with Duraflex. This system allows for additional storage capacity and flexibility and lets users pack sleeping mats, crampons, or anything else that might be carried outside the pack to increase organization.

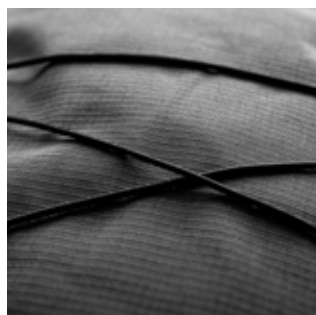

REMOVEABLE LID BAG

Designed to provide additional flexibility and weight savings. The top can be adjusted, or removed at the toggles. The pack remains completely functional with or without the Removeable Lid Bag.

MIPAN® REGEN™ RECYCLED NYLON

A lightweight, extremely durable, dirt and water-repellant textile. Made with MIPAN® regen™, a sustainable nylon yarn created from recycled pre-consumer waste. PVC-free, and meets the Control Union's GRS Certification standard.

GLOBAL RECYCLED STANDARD (GRS)

An international, voluntary product standard that sets requirements for third-party certification of recycled content, chain of custody, social and environmental practices and chemical restrictions.

DRIVEN BY A LOVE FOR SKIING

We've poured our heart and soul into our Nordic collection. Every detail driven by our passion to push skiing forward. Redster Gen S is a prime example. It's a new way of thinking about ski construction that's redefining the pinnacle of skate performance – and the future of cross-country skiing.

*Dario Cologna
Davos, Switzerland*

RACE

For when speed and performance is everything, whether it's about winning World Cup races or beating personal bests.

Redster products deliver ultra-low weight and ultimate power transmission for incredible acceleration – allowing you to push your performance even further.

SPORT

For skiers who care more about time in the outdoors than time on the stopwatch – but who still want gear that boosts their performance.

Pro equipment helps improve technique with stability and comfort, without making any compromise when it comes to performance.

TOURING

For when cross-country skiing is all about enjoying nature and spending time with friends outdoors.

Savor gear stands out for its ease of use. It delivers maximum comfort and maximum stability, meaning the time you spend exploring the tracks is a joy from start to finish.

Lisa Scheufele
Gnadenalm, Austria

SKI THE FUTURE

REDSTER S7 GEN S

When it's all about stability and efficiency, it's all about Redster S7 Gen S. Fueled by a racing spirit and our latest Gen S innovation, this ski brings World Cup technology to everyone – for your best cross-country experience yet. Get ready to ski the future.

REDSTER GEN S FAMILY

Redster S9 Gen S

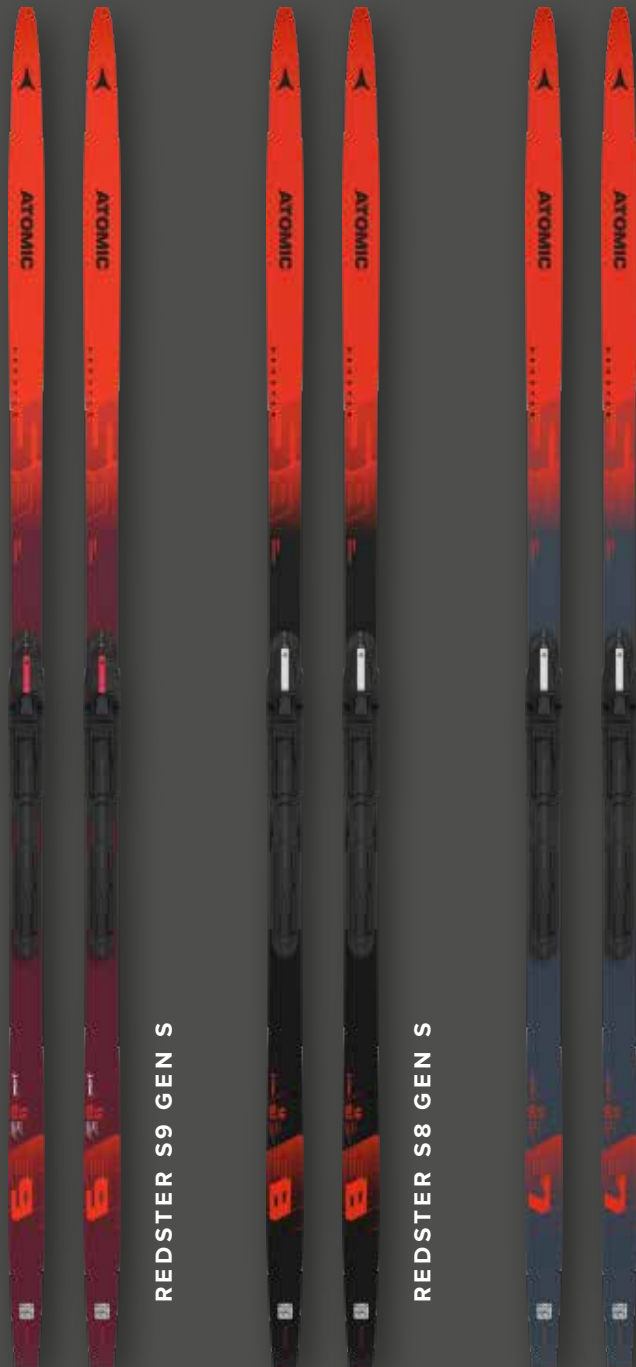

Redster S9 Gen S is our world cup race-winning ski with a super lightweight construction, epic power transmission and maximum acceleration. When speed and performance is everything, and hundredths matter.

Redster S8 Gen S

For committed skiers at every level and distance. Redster S8 Gen S is built for pushing limits and beating personal bests – with a lightweight construction plus strong power transmission and acceleration.

Redster S7 Gen S

Stability. Efficiency. Speed. Redster S7 Gen S is the ski that helps skiers go faster for longer every time they're on track. Built with a racing spirit, it's lightweight and dynamic with enhanced steering control.

REDSTER

Energy-saving efficiency

With a wider tip and tail from the Speedline sidecut, you'll get a stronger push — which means longer strides, improved steering ability, and a big boost to skiing efficiency.

Superior agility

Speedscale geometry makes the ski more precise and maneuverable so you can perform your best. The special geometry also enables skis to be shorter than usual, for greater agility than ever before.

Race-winning acceleration

Speed is everything when fractions of a second count. Racewall — our new sidewall construction — generates an even closer connection between ski edge and snow, meaning more direct power transmission, more stability, and faster skiing.

Gen S stability and agility

Our unique Speedscale ski geometry allows skis to be shorter than usual while boosting precision, agility and maneuverability. It also delivers better steering control and stability than ever before.

Stride efficiency

With its wider tip and tail, the Speedline sidecut creates a stronger push – for longer strides, improved steering and a big boost to skiing efficiency.

Accelerated progress

The 'Racewall' sidewall construction generates a closer connection between ski edge and snow. Delivering more power transmission, acceleration – and personal progress with every stride.

PRO CLASSIC

Precise yet stable

With a slightly wider sidecut, Pro Classics are precise and fast – but also stable. The perfect combination for fitness, improving technique, and enjoying your time on the tracks.

Dependable performance

Pro Classics are light and built to perform, but with a smooth, easy and forgiving feel that makes them the ideal daily training companion.

Any conditions, any time

Time after work? Pro Classic skis offer great grip & glide in all snow conditions, and with Skintec available you don't even need to kick-wax. Just pick up your skis and get going.

Superb stability

The Pro's Easy Edge Sidecut is a parallel sidecut, making it easier to set your edge on the snow for superb stability. Ideal for fitness skiing and improving technique.

Total control

The wider Comfort Tip and double grooves in the base generate easier steering and better control for effortless skating. The perfect training companion for beginners and intermediate skiers.

Maximum enjoyment

From after-work laps to weekend runs, our Ease Adjustment with a low and soft camber adjustment – and therefore longer contact zone – helps you perform and enjoy your skiing to the max.

WEIGHT RECOMMENDATION NORDIC SKI

On our Pro and Redster ski range you'll find a sticker on each ski that shows the individual characteristics of that ski. This includes its ideal weight range, based on the ski's specific length and flex. There are two different stickers, one for Classic and one for Skate:

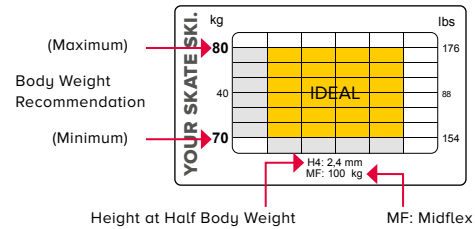

CLASSIC

This sticker includes a color coding for different conditions: cold (blue ■), universal (yellow ■) or warm (red ■). The sticker shown below is for a cold ski which is recommended for skiers between 72–94kg (159–207 lbs), perfectly suitable for 80–90kg (176–198 lbs). In addition, there's a special sticker for Skintec (color coding grey ■).

SKATE

The sticker shown below is for a ski which is recommended for skiers between 70 – 80 kg (154 – 176 lbs).

NORDIC SKI TECHNOLOGY

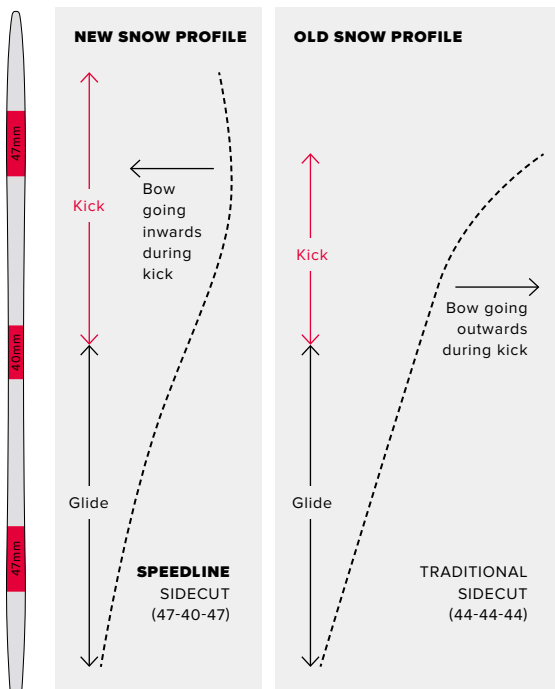

GEN S TECHNOLOGY

Redster Gen S technology represents the pinnacle of skate ski performance with a redesigned ski shape for maximum stride efficiency, a shorter body for increased control and agility, and a new sidewall that boosts power transmission.

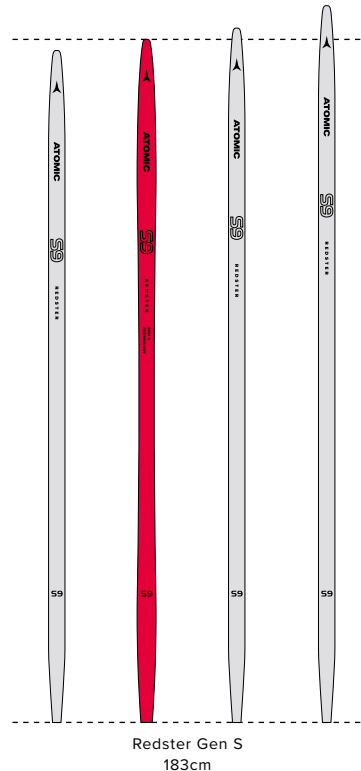

SPEEDLINE

Speedline is our new deeper sidecut with a wider tip and tail (47-40-47mm). This new shape enables longer strides, better stability and a big boost to skiing efficiency.

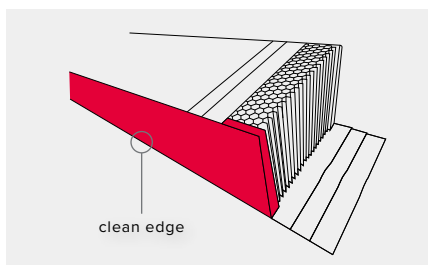

SPEEDSCALE

Speedscale is the unique Atomic ski geometry that means our skis can be shorter than usual. This boosts precision and makes them more agile and maneuverable than ever before.

RACEWALL

Racewall is a new sidewall construction used on our top skating skis. It generates an even closer connection between ski edge and snow, meaning more power transmission, more stability and faster skiing.

SKINTEC TECHNOLOGY

Skintec delivers the feel of a perfectly waxed ski – without any wax. 100% Mohair skins work in all conditions and can be changed without tools. Skintec skis are now our most popular models, with a full range available for all XC skiers. Skintec was created in our Atomic factory at Altenmarkt. It was the first skin technology on the mainstream market and has been pushing skin technology forward ever since.

EASY SKIN EXCHANGE

With Atomic Skintec you can easily exchange Mohair skins in seconds by yourself. Pick from a variety of skin options to suit terrain, conditions and how you want to ski.

100% MOHAIR SKINS

We use 100% Mohair in our skins as it has the best kick and glide properties in a wide range of conditions, and it's extremely robust.

UNIVERSAL SKIN: ALLROUND

The standard skin with optimal kick and glide properties in a wide range of conditions.

- Universal version delivered on all Atomic Skintec skis
- 100% mohair

SPEED SKIN: BETTER GLIDE

With a special weaving that's even better for gliding and double poling. Optimal on dry snow -3° or colder.

- Ideal for racers, seeking the most speed or for slower snow conditions
- 100% mohair

GRIP SKIN: BETTER GRIP

Is more geared towards climbing, with shorter hair for a safer grip uphill and better control downhill.

- Ideal for skiers wanting more secure grip and even for pulling a pulk sled
- 100% mohair

NORDIC BINDING TECHNOLOGY

PROLINK SHIFT BINDINGS

Atomic Prolink Shift Bindings are high-tech moveable bindings that let you adjust for more grip or glide as you go. Shift the binding forwards for more grip and stability. Backwards for better glide.

CLASSIC BENEFITS:

Binding moved BACKWARD
-2,25/ -1,5 / -0,75

- Ski camber rises
- Lifts the skin or kick wax of the snow

Better glide

Binding moved FORWARD
+0,75 / +1,5

- Ski camber goes down
- Increase contact between skin or kick wax with the snow

Better grip

SKATING BENEFITS:

Binding moved BACKWARD
-2,25/ -1,5 / -0,75

- Ski camber is rising up
- Less pressure in the front of the ski

For slow snow conditions

Acceleration feeling / easy skiing

Binding moved FORWARD
+0,75 / +1,5

- Ski camber goes down
- Increase pressure in the front of the ski

For icy and compact conditions

Better grip / stability

BONDED PROLINK SHIFT PLATE

This Shift plate is bonded to the ski, which results in the best power transmission and stability possible. Get the maximum performance from the power you put in.

REDSTER SKATE FAMILY

REDSTER S9 CARBON

Redster S9 Carbon is our World Cup charger. The lightest skating boot we've ever made, but still exceptionally strong – delivering 100% power transmission and acceleration for when speed and performance is everything.

REDSTER S9

Redster S9 is for racing at every level, and every distance. Built on a bedrock of Atomic race technology, it delivers the perfect combination of low weight and high power transmission for exceptional acceleration and endurance.

REDSTER S7

Inspired by our pro-athlete boots, Redster S7 is for all skiers looking to push their skiing to the next level. Fast, stable, efficient and super comfortable – S7 is about making progress with every stride you take.

REDSTER

World Cup acceleration

The Carbon Power Base is a new outsole handcrafted in Altenmarkt. Constructed from a single piece of carbon and designed with World Cup DNA, it totally surrounds the heel and sole – delivering 100% power transmission and awesome acceleration.

Wrap your foot perfectly

The Full Carbon Cuff combines freedom of movement with the lateral stability you need to push with confidence, while the 3D Race Lacing System wraps your foot for the perfect foothold.

Lose the weight, keep the power

The S9 Carbon is the lightest skating boot we've ever made but still exceptionally strong. This delivers great performance and enhanced snow feel in one. A lighter weight that's all benefit and no compromise!

PRO

Stay comfy and warm

Comfort is king for enjoying the tracks. The Pro C3 boot keeps feet warm and snug when you're out on a long weekend run. With a great fit, these boots make it incredibly comfortable all day.

Ski with power and precision

Pro C3 comes with the perfect foothold. The Quicklace system wraps the foot evenly, while a rigid External 3D Heel Counter delivers super stability. This allows skiers to ski with power and precision.

Find your groove

Enjoy freedom and stability in the same boot: Pro C3's Classic Flex delivers perfect natural movement for classic skiing, while the new mid-cut inner boot adds all the lateral stability you need.

NORDIC BOOT TECHNOLOGY

REDSTER CARBON BOOTS

At the heart of our Redster Carbon boots is a new carbon outsole created from a single piece of carbon. Handcrafted in Altenmarkt, this carbon outsole is incredibly light, rigid and stable – the three ingredients you need for powerful high-performance skiing.

CARBON POWER BASE

A sole and heel counter made from a single piece of carbon for superb power transmission and stability – with a dedicated flex for classic and skate.

CARBON CUFF

A lightweight molded carbon cuff that stabilizes the ankle and keeps your foot perfectly aligned on your ski. Together with the Carbon power Base, this Carbon cuff completes the Carbon Power System.

AAC – ATOMIC AIR CONTROL

A breathable water-repellent membrane combining Ripstop and Surfstretch materials. Helps you regulate temperature and lets your foot breathe.

FIT

RACE FIT

A precise Race fit for competitive athletes.

SPORT FIT

A snug Sport fit for athletic XC skiers.

TOURING FIT

A secure fit for ski tourers.

JUNIOR FIT

A specific smaller fit for little feet.

SLEEVE (from middle back to wrist*)	76	78	80	82	83	85
INSEAM PANT (from crotch to floor*)	76	77.5	79	80.5	82	84

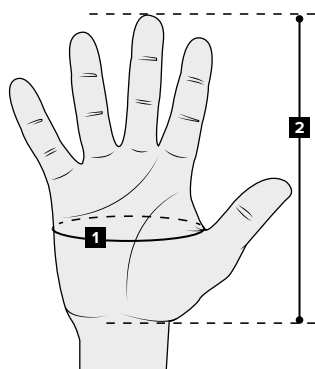

- 1** CHEST: The circumference of your chest is measured under your armpits, around your shoulder blades, and back to the front.
- 2** WAIST: Measure the circumference of your waist at your natural waistline, which is located above your belly button and below your rib cage.
- 3** HIP: Hip is measured at your widest point around the hip.
- 4** SLEEVE LENGTH: Measure from middle back to wrist (upper side of the sleeve).
- 5** INSEAM PANT: Measure from the top of your leg to the end of your leg (inside of the leg).

GLOVES MEN AND UNISEX (Sizing cm)

	XS (7,5)	S (8)	M (8,5)	L (9)	XL (9,5)	XXL (10)
HAND LENGTH	15,6	16,4	17,2	18,2	19,1	20,1
