1 Know-how that matters!

Liebherr-Hausgeräte has specialised in developing and manufacturing first class refrigerators and freezers of premium quality and cutting edge design for over 50 years. Innovative ideas are constantly added to the products for enhancing freshness, improving ease-of-use and saving even more energy to raise customer product value.

2 Premium product quality

To ensure the renowned Liebherr quality, only first class components are used. For example, accurate electronic control systems are used in conjunction with optimised refrigeration components. During the manufacturing process the appliances undergo comprehensive testing and inspection to ensure perfect workmanship and flawless functionality. This means Liebherr appliances have a long service life.

3 Innovative ideas

Liebherr appliances boast a compelling array of innovative ideas. Take, for example, the freestanding Premium appliances with the new electronic control system and user-friendly Touch feature, or the PremiumPlus models with the innovative LED lighting, convenient IceMaker with twist tray, or GlassLine shelves for versatile use.

4 Classical design

The combination of classical, timeless design with high quality materials like glass and stainless steel makes Liebherr appliances the focus point in any kitchen.

5 Environmentally friendly

For Liebherr, being actively green starts at the very beginning of the design process. In keeping with this ethos, Liebherr uses high quality components for its appliances to provide long and safe operation and top energy efficiency. All plastics are marked for recycling. The manufacturing processes are also geared to efficient use of resources. To give one example: the heat naturally generated during manufacture of the appliances is recycled as heating energy.

6 Super energy efficiency

By deploying state-of-the-art, precision electronics combined with finely tuned, highly efficient refrigeration systems, Liebherr offers a wide range of energy saving appliances. All the product groups feature models securing great savings in the A+ and A++ top energy efficiency classes.

7 BioFresh feature

In the BioFresh compartments many types of food stay fresher for longer. Food retains its healthy vitamins, aroma and appetising appearance up to three times longer than in conventional fridges. To accomplish this, the temperature is accurately kept at just above 0 °C, together with ideal humidity in each of the BioFresh drawers. These drawers can be used individually, as HydroSafes with high humidity or as DrySafes with low humidity to enable versatile storage.

8 NoFrost - professional quality freezing performance

The NoFrost system from Liebherr provides fast, fan-assisted freezing performance for the safe storage of food with lasting freshness. The NoFrost system dispenses with fixed shelving, allows more flexible capacity storage and keeps the freezer constantly frost-free making defrosting a thing of the past.

9 Perfect climate for fine wines

Liebherr's wine storage cabinets and multi-temperature wine cabinets are designed specifically to keep wine in its optimum environment. These appliances feature state-of-the-art electronic control systems, special vibration free compressors and a host of features such as tinted glazed doors, activated charcoal filters or stable, hand crafted wooden shelves on telescopic rails.

10 Awards given to the range

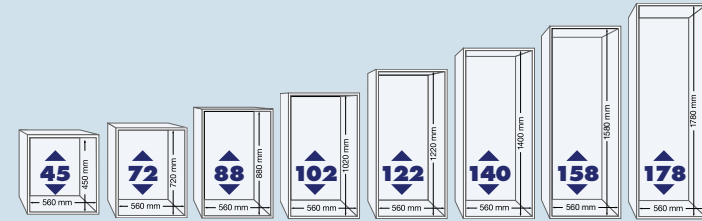

The design quality of Liebherr appliances is confirmed by independent institutions. The built-in IKB 3454 model with BioFresh technology in energy efficiency class A+ was awarded the PlusX award for user convenience and environmental friendliness. Liebherr also won the PlusX 2007 title as the Most Innovative Brand of large appliances.

How to find the right built-in appliance

Liebherr offers built-in appliances for integrated use or with décor panel. To find the appliance for you, simply choose the method of integration, the aperture and the features of the model that best suits your needs.

Aperture Sizes *

Built-in appliances for integrated use

The appliances will fit easily behind your unit door, so are ideal for integration into a fitted kitchen, creating a uniform look. Note the method by which the door is fitted:

Sliding system

The unit door is hinged on the cabinet and connected to the appliance door with sliding rails. When the door is opened and closed, the unit door slides along the rails.

The door-on-door system

The unit door is fixed directly onto the appliance door.

Built-in appliances with décor panel

Built in appliances for use with décor panels can be fitted with a panel finished to match the other kitchen units. Décor panels are available from specialist suppliers. Panels can be fitted with a thickness of up to 4 mm. Built-in appliances are supplied with aluminium coloured décor frame as standard, brown or white frames are also available as accessories. If the height of an existing décor panel is too small for a replacement appliance, it can be made to fit with equaliser trims of various heights in the same colour as the décor frame. One or two equaliser trims (top and/or bottom) may be used depending on how much has to be equalised and taking visual aspects into account. The trims are available in three heights (16, 41, 60 mm) and colours (brown, white, aluminium): part no. 9733.

For more information to décor panels and reference numbers please see installation diagrams in the middle of the catalogue.

How to find the right under worktop appliance

Liebherr offers under-worktop appliances for integrated use or with décor panels. To find the right appliance for you, simply choose the method of integration, the aperture and the model features that best suits your needs.

Top quality for your kitchen

The models:

Comfort

Liebherr's superior quality means well thoughtout features and a comprehensive range of equipment. The renowned Liebherr quality means that you get many benefits from the product features and innovative ideas.

Premium

Liebherr fridges and freezers incorporate cutting edge technology that only high quality appliances demand, right down to the finest detail. A characteristic feature of Premium models is the high standard of design in conjunction with a host of innovative ideas and a comprehensive array of equipment.

PremiumPlus

Top of the range Liebherr fridges and freezers with the exclusive extra bonus of additional equipment. Here, the individuality, needs and requirements of the customer take centre stage. Highlights of PremiumPlus models are the Premium features, complemented by the outstanding and unique product benefits of PremiumPlus. These product features are geared to give maximum convenience and the latest product design trends. The two top features of the PremiumPlus are the unique light column for the fridge compartment and the innovative BioFresh lighting.

Built under integrated refrigeration

By fitting the fridge and freezer under an existing worktop and behind the unit door, you can create a uniform look in your kitchen. The unit door is attached permanently to the appliance with the door-on-door method. Ventilation and air extraction are provided through the plinth and no ventilation grill is required in the work surface.

The door-on-door system

The unit door is fixed directly onto the appliance door.

Built under décor panel refrigeration

A décor panel (thickness up to 4 mm) matching the kitchen units is attached to the appliance door. Décor panels are available from specialist suppliers. These appliances are available with white décor trims (ventilation grill, décor frames, plinth). Ventilation and air extraction are provided at the front of the appliance therefore no ventilation grill is required in the work surface.

Super savings in energy consumption

Many Liebherr fridges and freezers come in the best energy efficiency classes A++ and A+++ and are therefore the top energy savers in any home.

Using state-of-the-art electronic control units in conjunction with optimised refrigerating systems has achieved a further significant reduction in energy consumption in comparison with previous economical models.

*see installation drawings for binding dimensions

A unique feature is the lighting in the PremiumPlus range

Hallmarks of the PremiumPlus range are two light columns integrated into the liner on either side. Inside there are numerous LEDs ensuring a uniform illumination of the interior. The special satin finish of the light cover creates a pleasant lighting atmosphere.

BioFresh lighting

In the PremiumPlus appliances the BioFresh compartments have LED lighting, ensuring a clear view of the food stored inside. The LED lighting is elegantly integrated into the side wall for a flush finish.

Freezer compartment lighting

This innovation provides a perfect view inside the freezer compartment. In the combined BioFresh fridge-freezers of the PremiumPlus range, the freezer compartment now features interior lighting. Integrated above the freezer drawers is a LED light strip ensuring ideal illumination of the opened, transparent drawers to give you an even better view of the stored food.

The **BioFresh drawers** are mounted on telescopic rails which means they are flush with the inner compartment. Even at an opening angle of 90°, they can be pulled-out and are removable.

In the PremiumPlus appliances the **BioFresh compartments** have LED lighting, ensuring a clear view of all the food stored inside. The LED lighting is elegantly integrated into the side wall for a flush finish.

The humidity can be set in the HydroSafe - for best storage conditions for fruits and vegetables.

BioFresh – Maximising the life of fresh produce

The BioFresh safes guarantee the perfect climate for long-term freshness. With the temperature maintained just above 0°C and with an ideal humidity level, fruit, vegetables, meat and fish retain their healthy vitamins, delicate aroma and appetising appearance up to three times longer than in a traditional refrigerator compartment.

The state-of-the-art BioFresh technology offers the perfect storage solution: the BioFresh drawers can be individually controlled as either HydroSafes, with high humidity, or as DrySafes, with low humidity to give a versatile storage solution. This means the ideal climate can be provided for all types of produce.

BioFresh – Take a fresh look at healthy eating

The information below relates to the storage of produce in a BioFresh compartment compared with a traditional refrigerator compartment.

Broccoli + 8 days

Prawns + 1 day

Raspberries + 2 days

Artichokes + 7 days

Grapes + 17 days

Carrots + 30 days

Asparagus + 8 days

Apples + 30 days

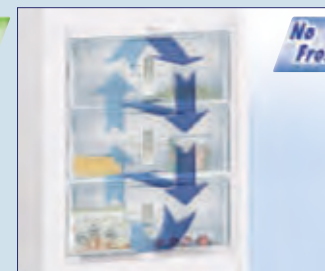

An highlight in any kitchen

Illustration: ICBN 3066

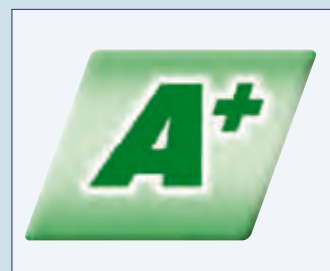

In the **BioFresh** compartments food retains its healthy vitamins, aroma and appetising appearance up to three times longer than in a conventional fridge. Through its advanced technology the temperature is accurately kept at just above 0°C. Each drawer can be used individually and provides ideal humidity - HydroSafes with high humidity or DrySafes with low humidity - for a versatile storage solution.

The **NoFrost** system from Liebherr provides rapid, fan-assisted, frost-free freezing for the safe, long-term storage of food. The NoFrost technology creates a much larger storage capacity and keeps the freezer constantly frost-free to make defrosting a thing of the past.

The clearly laid out, precision **control system with MagicEye** ensures that the digitally displayed temperature you select is kept exactly to the degree chosen. The clear arrangement of the function buttons makes for easy and convenient use.

Super savings in energy consumption.

Many Liebherr fridge-freezers come in the energy efficiency class A+ and are therefore the top energy savers in any home - day in, day out. Deploying state-of-the-art electronic control units in conjunction with optimised refrigerating systems has achieved a further significant reduction in energy consumption in comparison with previous economical models.

The **SoftSystem** ensures that the door closes gently even when fully loaded. The door closes automatically from an opening angle of approximately 30°.

An innovative and unique detail is the **integrated bottle shelf**. When you need to store very tall bottles, the bottle rack in the door can be moved upwards allowing the entire depth of the appliance to be used. Alternatively, the glass shelf under the bottle shelf can be utilised.

Electronic control system

- MagicEye with digital temperature display for refrigerator compartment and NoFrost freezer compartment
- Separate temperature regulation for refrigerator and freezer compartment using buttons
- Automatic SuperCool function
- Automatic SuperFrost function, quantity-controlled
- Visual and audible warning signal in case of malfunction
- Audible door alarm
- Control lamp for mains, alarm, SuperCool, SuperFrost, FrostControl and child lock

Fridge compartment

- Automatic defrosting
- Forced air cooling with fan
- GlassLine storage shelves - 1 sectioned, with slide under half shelf option
- GlassLine storage racks with bottle and can holders
- Smooth, easy-to-clean compartment liner with elegant holding columns for rearrangement of the glass shelves
- LED interior light with ICBN 3056
- LED light column on either side for even, high-class illumination of the interior with ICBN 3066
- Integrated bottle shelf for versatile use
- Swivel lid for butter and cheese compartment with egg tray

BioFresh compartment

- Automatic defrosting, forced air cooling
- Pull-out BioFresh safes mounted on telescopic rails
- DrySafe with low humidity - for fish, meat and dairy products
- HydroSafe with adjustable humidity for fruit and vegetables
- LED lighting with ICBN 3066

Freezer compartment

- NoFrost. Automatic defrosting
- Forced air cooling
- FrostSafe system with completely enclosed, transparent drawers
- LED lighting for ideal illumination of the extended drawers with ICBN 3066
- VarioSpace due to removable drawers and intervening glass shelves
- IceMaker with fixed water connection with ICBN 3066
- Ice cube tray with ICBN 3056

Features

- SoftSystem to cushion door closure
- Door opening angle of 115°
- Height-adjustable feet at the front
- Reversible door

Illustration: ICBN 3066

DuoCooling uses two separate cooling circuits to independently control fridge and freezer compartment temperatures.

With DuoCooling there is no air exchange between fridge and freezer compartments so odour transfer is prevented and food is stored in optimum conditions.

The **IceMaker** provides you with a constant supply of ice cubes for every occasion. Whether you fancy a cold drink or you're having a big party, the IceMaker automatically keeps your supplies topped up.

The distinctive **GlassLine equipment** puts the finishing touches to the overall impression of high quality conveyed by the interior. The shelves are made of safety glass, as are the racks with stainless steel trims in the door interior. The sectioned, slide-under glass shelf lends itself to versatile use as it can be inserted at different heights, just as the user pleases.

Fridge-freezers

The **NoFrost system** from Liebherr provides rapid, fan-assisted, frost-free freezing for the safe, long-term storage of food. The NoFrost technology creates a much larger storage capacity and keeps the freezer constantly frost-free to make defrosting a thing of the past.

SmartFrost system
Compared to other static freezers, Liebherr's SmartFrost technology freezes food faster, and reduces ice build-up by 50%, making defrosting simpler and quicker. It also provides a more flexible storage area with greater capacity and improved energy consumption for lower running costs.

All **transparent drawers** are extra deep. They are designed so that all frozen foods, from a duck to a boxed pizza, will fit conveniently and neatly, and are easy to remove. Every drawer can be used for both freezing and storage, so there's no need to repack the food once it has been frozen.

The **SoftSystem** ensures that the door closes gently even when fully loaded. The door closes automatically from an opening angle of approximately 30°.

The **IceMaker** provides you with a constant supply of ice cubes for every occasion. Whether you fancy a cold drink or you're having a big party, the IceMaker automatically keeps your supplies topped up.

A special quality of light
A special quality of interior illumination is created with the innovative LED light housing in all the single door-on-door fridges of the Premium range. What's more, the LED technology means that the light housing is compactly incorporated into the compartment liner.

Electronic control system

- MagicEye with digital temperature display for refrigerator and freezer compartment (with ICN models)
- MagicEye with LED temperature display (with IC 3013 and ICS 3113)

- FrostSafe system with completely enclosed, transparent drawers
- VarioSpace due to removable drawers and intervening glass shelves
- IceMaker with fixed water connection (with ICN 3066)
- Ice cube tray (except ICN 3066)

Features

- SoftSystem to cushion door closure (with ICN models)
- Height-adjustable feet at the front
- Reversible door

The transparent vegetable bins provide a clear view of the stored food and slide out effortlessly on the **roller system**. The roller plates integrated in the floor of the liner are easy to remove for cleaning.

DuoCooling uses two separate cooling circuits to independently control fridge and freezer compartment temperatures.

With DuoCooling there is no air exchange between fridge and freezer compartments so odour transfer is prevented and food is stored in optimum conditions.

The highly efficient forced **air system** ensures that freshly stored food is rapidly cooled down and that the cooling temperature is uniform throughout the interior. The fan is switched off by a door contact when the door is opened, saving valuable energy.

Electronic control system

- MagicEye with LED temperature display
- Temperature regulation for the refrigerator compartment
- Automatic SuperFrost function, time-controlled
- Control lamp for mains and SuperFrost
- Visual and audible warning signal in case of malfunction (ICUNS 3013)

Fridge compartment

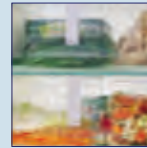

- Automatic defrosting
- Forced air cooling with ICUNS models
- GlassLine storage shelves - 1 sectioned, with slide under half shelf option
- Comfort GlassLine door rack with dividers
- Smooth, easy-to-clean compartment liner with elegant holding columns for rearrangement of the glass shelves
- Interior light
- Fruit and vegetable drawers
- Egg tray

Freezer compartment

- NoFrost: Automatic defrosting (with ICUNS)
- Forced air cooling (with ICUNS)
- SmartFrost: Easy defrosting with smooth and easy-to-clean interior (with ICUS models)
- FrostSafe system with completely enclosed, transparent drawers
- VarioSpace due to removable drawers and intervening glass shelves
- Ice cube tray

Features

- Height-adjustable feet at the front
- Reversible door

All transparent drawers are extra deep. They are designed so that all frozen foods, from a duck to a boxed pizza, will fit conveniently and neatly, and are easy to remove. Every drawer can be used for both freezing and storage, so there's no need to repack the food once it has been frozen.

SmartFrost system
Compared to other static freezers, Liebherr's SmartFrost technology freezes food faster, and reduces ice build-up by 50%, making defrosting simpler and quicker. It also provides a more flexible storage area with greater capacity and improved energy consumption for lower running costs.

VarioSpace
Freezer drawers and glass shelves can be removed. VarioSpace allows for practical storage solutions for all types of larger produce.

Attractive, practical, energy-saving: the single door Premium fridges

Super savings in energy consumption.

Many Liebherr fridges come in the best energy efficiency classes A+ and A++ and are therefore the top energy savers in any home - day in, day out. Deploying state-of-the-art electronic control units in conjunction with optimised refrigerating systems has achieved a further significant reduction in energy consumption in comparison with previous economical models.

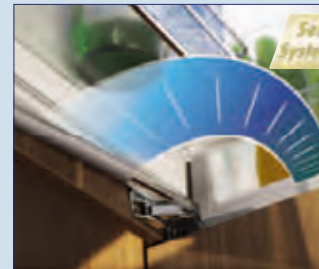

Vegetable drawers on removable rollers

The transparent vegetable drawers running on rollers are designed to form a harmonious synthesis with the interior and provide a clear view of the stored food. They slide out effortlessly on the roller system. The roller plates, integrated in the floor of the liner come as standard in all the single door-on-door fridges in the Premium range, without BioFresh, from the 122 cm aperture size upwards.

A special quality of light

A special quality of interior illumination is created with the innovative LED light housing in all the single door-on-door fridges of the Premium range. What's more, the LED technology means that the light housing is compactly incorporated into the compartment liner.

The **SoftSystem** ensures that the door closes gently even when fully loaded. The door closes automatically from an opening angle of approximately 30°.

The clearly laid out, precision **control system with MagicEye** ensures that the digitally displayed temperature you select is kept exactly to the degree chosen. The clear arrangement of the function buttons makes for easy and convenient use in IKP models.

Important features of the **compartment liner** in the single-door fridges are two elegant vertical support columns on either side at the front and rear, lit by numerous LEDs. The inner liner is designed to make shelf adjustment easy. This concept ensures greater flexibility when rearranging the glass shelves. A further advantage is the smooth compartment liner, making it easy-to-clean.

Electronic control system

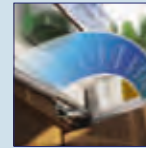

- MagicEye with digital temperature display
- Temperature regulation for refrigerator compartment
- Automatic SuperCool function
- Control lamp for mains and SuperCool

Fridge compartment

- Automatic defrosting
- GlassLine storage shelves - 1 sectioned, with slide under half shelf option
- GlassLine storage racks with bottle and can holders
- Smooth, easy-to-clean compartment liner with elegant holding columns for rearrangement of the glass shelves
- LED interior light
- Fruit and vegetables drawers with pull-out roller system (except IKP 2050)
- Bottle shelf (with IKP 2850 and IKP 2450)
- Swivel lid for butter and cheese compartment with egg tray

Features

- SoftSystem to cushion door closure
- Door opening angle 115°
- Height-adjustable feet at the front
- Reversible door

The **SoftSystem** feature provides added safety and convenience. Integrated on the door, the SoftSystem cushions movement when the door is closed. This SoftSystem ensures that the door closes gently even when fully loaded. The door closes automatically from an opening angle of approximately 30 °.

The transparent **vegetable drawers running on rollers** are designed to form a harmonious synthesis with the interior and provide a clear view of the stored food. They slide out effortlessly on the roller system. The roller plates, integrated in the floor of the liner, come as standard in all the single door-on-door fridges of the Premium range without BioFresh from an aperture size of 122 cm upwards.

The innovative **LED light housing** creates first class interior illumination. What's more, the LED technology means that the light housing compactly incorporates into the compartment liner.

- Fruit and vegetable drawers (with IK 2214 and IK 2410)
- Egg tray

Freezer compartment

- Ice cube tray (with IK 2214 and IK 3414)

Features

- Door opening angle 115°
- Height-adjustable feet at the front
- Reversible door

The highly efficient forced air system ensures that freshly stored food is rapidly cooled down and that the cooling temperature is uniform throughout the interior. The fan is switched off by a door contact when the door is opened, saving valuable energy.

The elegant **GlassLine shelves** made of safety glass are shatter-proof, scratch-resistant and easy-to-clean. The high-quality stainless steel trims are the perfect complement. The height-adjustable shelves can be relocated to suit personal requirements at any time.

The automatic **SuperCool** function lowers the refrigerator temperature down to as far as +2°C - ideal for rapidly cooling freshly stored food.

A special feature in the fridges with décor panel is the **MagicEye with LED temperature display**. It is easy and convenient to use.

The exquisite **GlassLine equipment** puts the finishing touches to the high quality and overall impression of the stylish interior. The shelves and the storage racks in the inner door are made of glass with stainless steel trims. Two easily attachable plastic components mean it can now be inserted at different heights, as required.

The automatic **SuperCool** function lowers the refrigerator temperature down as low as +2°C - ideal for rapidly cooling freshly stored food.

Build under fridges

Front ventilation

Air flow on Liebherr undercounter appliances enters and exits at the front of the appliance. This happens at plinth level or at the top edge of the appliance depending on the model type. The advantage is no ventilation grill is required in the worktop.

UK 1610 is suitable for Side-by-Side installation in conjunction with the UIG 1313 under-worktop freezer for integrated use (fridge must be on the left).

The elegant **GlassLine shelves** made of safety glass are shatter-proof, scratch-resistant and easy-to-clean. The high-quality stainless steel trims are the perfect complement. The height-adjustable shelves can be relocated to suit personal requirements at any time.

The precision control system of the UK models creates a stunning visual impact. This precision electronic control system enhances the ease and convenience of use. The **SuperCool function** quickly reduces the temperature of the fridge compartment; ideal for rapidly cooling down freshly stored food.

Attractive and practical. The food inside your KIUe 1350 fridge is easy-to-see and access with the practical pullout shelves and drawer.

Models in the Comfort range come with **Comfort GlassLine**: high quality glass equipment for the door interior. Comfort GlassLine features are shelves made of satin finished safety glass with steel railings and plastic surround. The can and bottle racks have an adjustable holder for secure storage of the food in the door interior.

Electronic control system

- MagicEye with LED refrigerator temperature display (with UIK 1414 and UIK 1610)
- Automatic SuperCool function (with UIK 1414 and UIK 1610)
- Control lamp for mains and SuperCool (with UIK models)

Fridge compartment

- Automatic defrosting
- GlassLine storage shelves - 1 sectioned, with slide under half shelf option (except KIUe 1350)
- Interior light
- Fruit and vegetable drawers
- Egg tray

Features

- Door opening angle 115° (with UIK models)
- Front ventilation and air extraction therefore no ventilation grill in the worktop necessary
- Variable plinth: height and depth can be adjusted in line with other kitchen units (except UK 1720)
- Feet at the back can be adjusted from the front with UIK models
- Reversible door (except KIUe 1350)

Attractive and practical. The food inside your fridge is easy-to-see and access with the practical pullout shelves and drawer.

Front ventilation
Air flow on Liebherr undercounter appliances enters and exits at the front of the appliance.

Low energy Built-in freezers

A special feature in the freezers of the Premium range is the clearly laid out, precision control system with **MagicEye**. This ensures accurate temperature control. Clearly arranged function buttons make the appliance simple and convenient to operate. The automatic SuperFrost function freezes food rapidly while preserving the vitamins.

The **NoFrost system** from Liebherr provides rapid, fan-assisted, frost-free freezing for the safe, long-term storage of food. The NoFrost technology creates a much larger storage capacity and keeps the freezer constantly frost-free to make defrosting a thing of the past.

SmartFrost system
Compared to other static freezers, Liebherr's SmartFrost technology freezes food faster, and reduces ice build-up by 50%, making defrosting simpler and quicker. It also provides a more flexible storage area with greater capacity and improved energy consumption for lower running costs.

The **SoftSystem** ensures that the door closes gently even when fully loaded. The door closes automatically from an opening angle of approximately 30°.

VarioSpace
Freezer drawers and glass shelves can be removed. VarioSpace - the practical storage solutions for larger produce.

All **transparent drawers** are extra deep. They are designed so that all frozen foods, from a duck to a boxed pizza, will fit conveniently and neatly, and are easy to remove. Every drawer can be used for both freezing and storage, so there's no need to repack the food once it has been frozen.

Electronic control system

- MagicEye with digital temperature display with Premium models
- MagicEye with LED temperature display with Comfort models
- SuperFrost function, quantity-controlled with Premium models
- SuperFrost function, time-controlled with Comfort models
- Visual and audible warning signal in case of malfunction
- Control lamp for mains, alarm and SuperFrost

Freezer compartment with IGN 2566

- NoFrost: Automatic defrosting
- Forced air cooling
- IceMaker with fixed water connection
- FrostSafe system with completely enclosed, transparent drawers
- Five drawers mounted on telescopic rails
- VarioSpace due to removable drawers and intervening glass shelves

Freezer compartment with SmartFrost models

- SmartFrost: Easy defrosting with smooth and easy-to-clean interior
- FrostSafe system with completely enclosed, transparent drawers
- VarioSpace due to removable drawers and intervening glass shelves

Features

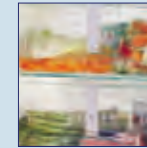

- Door opening angle 115° (except IGS 1113)
- Height-adjustable feet
- Reversible door

The **IceMaker** provides you with a constant supply of ice cubes for every occasion. Whether you fancy a cold drink or you're having a big party, the IceMaker automatically keeps your supplies topped up.

VarioSpace Freezer drawers and glass shelves can be removed. VarioSpace allows for practical storage solutions for all types of larger produce.

All **transparent drawers** are extra deep. They are designed so that all frozen foods, from a duck to a boxed pizza, will fit conveniently and neatly, and are easy to remove. Every drawer can be used for both freezing and storage, so there's no need to repack the food once it has been frozen.

VarioSpace
Freezer drawers and glass shelves can be removed. VarioSpace allows for practical storage solutions for all types of larger produce.

With the **automatic SuperFrost function**, temperatures down to as low as -32 °C are reached in no time. This means food can be frozen in an especially advantageous manner to preserve the vitamins, taste and appearance. After the freezing operation is over, the appliance switches back automatically to the normal mode.

Electronic control system

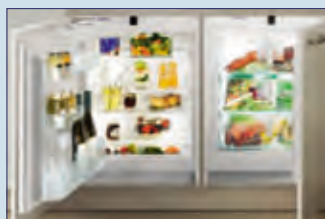

- MagicEye with LED temperature display
- Automatic SuperFrost function, time-controlled

Built-in wine cabinets

It is only under perfect conditions that a good wine can develop into a really excellent vintage and maintain its long-term value. Wine storage and multi-temperature wine cabinets from Liebherr are the ideal answer. Incorporating the latest climate technology, they provide the ideal conditions for wines to mature in peace and reach their peak of flavour. Featuring a state-of-the-art electronic control system, special compressors and a host of helpful features, such as the activated carbon filter and the specially designed doors with UV protection, these appliances are tailored for storing wine perfectly.

The Vinidor range

The Vinidor range combines the advantages of wine storage cabinets and multi-temperature wine cabinets in one appliance. This range offers two wine zones in which the temperature can be individually set to the exact degree required. This means that, for instance, red and white wine can be kept at their ideal serving temperatures in the same appliance. These cabinets also provide the ideal conditions for long-term storage of large quantities.

5 to 20 °C

5 to 20 °C

Wine storage cabinets

Wine storage cabinets are the ideal choice for storing larger wine collections over the long-term. However, these appliances are also ideally suited for keeping larger quantities at drinking temperature. The selected temperature is maintained at a uniform, constant level throughout the interior of wine storage cabinets.

5 to 20 °C

Perfect conditions for fine wines

No matter whether we're talking about wine production, storage or tasting, the right temperature is crucial. It's a vital factor in creating a perfect vintage. Not only for growing the grapes, for producing, maturing and storing the wine but, first and foremost, for the flavour. The temperature at which a wine is served is essential for savouring the flavour at its very best.

All the Vinidor appliances feature an innovative **LED lighting concept**. There is LED lighting in each temperature zone, integrated in the ceiling and in the insulation plates. This advanced technology ensures uniform illumination throughout the interior. Since any heat generated by the LEDs is minimal, wines can be presented, bathed in light, for a longer time period.

The wine storage cabinets from Liebherr have an **activated charcoal filter**, which can be easily changed, that purifies the incoming fresh air to obtain the optimum odour-free quality. Each wine compartment in the Vinidor appliances range has an activated charcoal filter of its own.

The Vinidor range features secure **wooden pull-out shelves** providing a good overview and convenient access to the bottles. The handmade shelves crafted from untreated wood are ideal for storing bottles of Bordeaux safely. Storing the bottles in opposite directions on the pull-out shelves permits full use of the capacity.

The built-in appliance WTEes 2053 comes with half-folding wooden shelves for presenting wines or storing open bottles.

Electronic control system

- Electronic control system in insulation panel
- Electronic temperature control, separately adjustable ranges, each between +5°C and +20°C
- Digital temperature display for upper and lower temperature range
- Visual and audible warning signal in case of malfunction
- Audible door alarm

Interior

- 2 separately adjustable temperature ranges
- Perfect climate conditions through forced air cooling and activated charcoal filter
- Control of humidity by shiftable ventilation
- WTEEs: 6 storage shelves, 4 of which are wooden pull-out shelves, of which 2 are foldable
- WTUes: 5 storage shelves, 3 of which are wooden pull-out shelves
- LED interior light can be dimmed or permanently switched on or off

The Vinidor appliances feature an innovative LED lighting concept. There is LED lighting in each temperature zone, integrated in the ceiling and in the insulation plates. This advanced technology ensures uniform illumination throughout the interior. Since any heat generated by the LEDs is minimal, wines can be presented, bathed in light, for a longer time period.

Features

- Reversible doors
- Elegant stainless steel handle
- Isolation tinted glazed door with stainless steel frame
- WTUes can be fitted under worktop; height of plinth can be adjusted by 50 mm with adjustable feet; ventilation and air extraction through the plinth, so no ventilation grill necessary in the work surface
- SoftSystem to cushion door closure (WTEes 2053)
- Lockable door

Electronic control system

- Electronic temperature control, one temperature range adjustable between +5°C and +20°C
- Touch electronic with WKEes 553
- Digital temperature display
- Visual and audible warning signal in case of malfunction
- Audible door alarm

Interior

- Perfect climate conditions through forced air cooling and activated charcoal filter
- WKUes: 4 storage shelves, 3 of which are pull-out grid shelves with front
- WKEes: 3 storage shelves, whereof 2 are wooden pull-out shelves
- LED interior light can be dimmed or permanently switched on or off
- WKUes: Interior light permanently shiftable

Accurately maintaining the right temperature is vital for wine to reach optimum maturity. The precision electronic Touch control system allows the temperature to be regulated to exactly the degree wanted ranging between 5°C and 20°C. All the functions can be simply and conveniently operated at the touch of a finger on the **electronic touch panel**. The temperature is indicated in the control display.

Features

- Reversible doors
- Elegant stainless steel handle with WKUes 1753
- Elegant recessed grip with WTEes 553
- Tinted isolation glazed door with stainless steel frame
- WKUes 1753 can be fitted under worktop; height of plinth can be adjusted by 50 mm with adjustable feet; ventilation and air extraction through the plinth, so no ventilation grill necessary in the work surface
- Lockable door with WKUes 1753

The wooden pull-out shelves provide an overview and convenient access to the bottles. The handmade shelves crafted from untreated wood are ideal for storing bottles of Bordeaux safely.
