

Third & Fourth Class

15th - 19th June

Dear Parents/Guardians and Children,

I hope you are all well. We will continue with our themed work this week. I hope the baking went down well!

We will be exploring the summer solstice this week which is on Saturday 21st June. It is the longest day of the year, meaning that we have the most hours of sunlight on that day and shortest night of the year in the northern hemisphere. This is also known as midsummer.

You will notice some lessons on farm safety and road safety below. It would be great if you could explore these with your child please.

Please feel free to email me pictures of some work that your child is particularly proud of. I especially look forward to seeing what places of interest are near you for Work It Out Wednesday.

If you have any questions or if I can help you please feel free to email me at:

Comearalisronaghns@gmail.com

Best wishes,

Carmel O'Meara.

Mindfulness Monday!

Try a *different* 'Breathe - Self-Regulation and Relaxation Technique for Children' which features a range of calming breathing techniques, written activities and guided visualisations that children can use to bring about a sense of peace and comfort in any situation.

Please click on the following link to engage in a guided visualisation:

<https://www.pdst.ie/primary/healthwellbeing/relaxationandself-regulationtools>

English

-English in Practice Page 82 Q 1-15.

-Spelling Workbook:

Unit 17. Please learn the lower half of the spellings for this week.

-Learn the first 3 spellings.

For those of you who do not have your Spelling Workbook please go to Prim-Ed website. Select "For Parents" section. Select "Download your free pack". Fill in username etc. Check email and select download pack for the relevant class level. Scroll down to the spelling page section. Activities can be completed in your homework copy if you have no printer at home.

-Reading and comprehension:

Please click on the following link to learn about the summer solstice:

<https://www.twinkl.ie/resource/cfe2-t-2545561-summer-solstice-information-powerpoint>

Read the comprehension The Summer Solstice below a few times on Monday and answer questions 1-5.

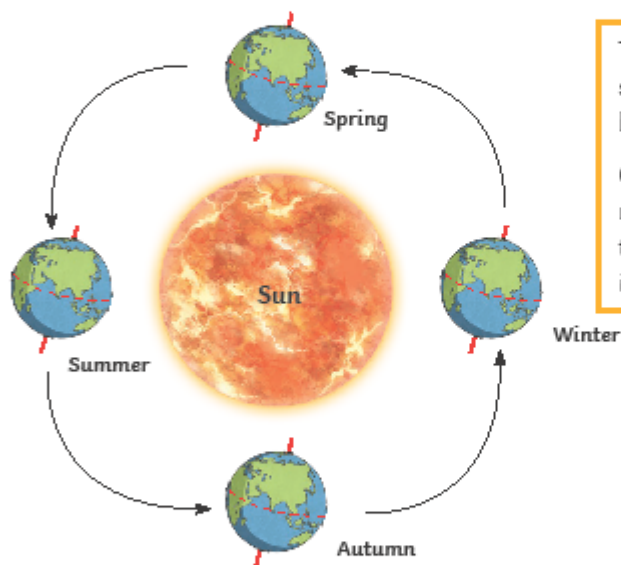

Summer Solstice

The equator is an imaginary line around the middle of the Earth. Above the equator is the northern hemisphere. Below the equator is the southern hemisphere.

Can you imagine a pole going through Earth from the North Pole to the South Pole? This pole would be the Earth's axis. The Earth spins round on this axis. The axis makes the Earth lean or tilt over.

The Earth moves around the Sun. This takes around a year. At different times of the year, as it journeys around the Sun, some places on Earth are nearer to the Sun than others.

If you live in the northern hemisphere, Earth is tilted closer to the Sun in the summer, giving more light and heat. The northern hemisphere is further away from the sun in the winter and countries receive less light and heat.

This diagram shows the seasons in the northern hemisphere.

Can you see how the northern hemisphere is tilted towards the sun in summer?

What is the Summer Solstice?

The Summer Solstice happens when the North Pole is most tilted towards the sun. It marks the change when days in the northern hemisphere begin to grow shorter.

The Summer Solstice happens around 21st June. This is also known as midsummer and is the longest day and shortest night of the year in the northern hemisphere.

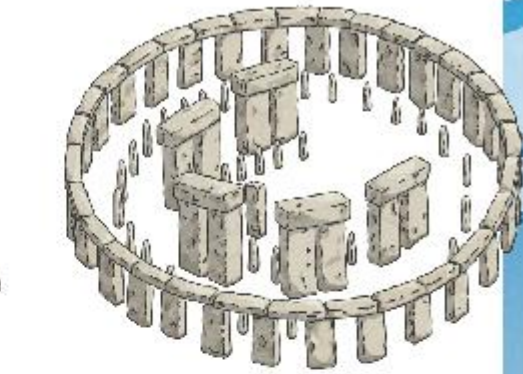

Summer Solstice in the Far North

Around the Summer Solstice, countries in the Arctic Circle, like parts of Norway, Finland, Greenland and Alaska, have daylight all day long and this is all because of the tilt of the Earth's axis.

In the UK from mid-May to mid-July, the Shetland Islands and Orkney enjoy the summer dim or summer twilight. This is when the sun only sets for a few hours so it never gets really dark.

Solstice Celebrations

For thousands of years, there have been solstice celebrations around the world. The hours of daylight and the seasons were important to the people long ago. Today, festivals, bonfires and parades mark the Summer Solstice.

In England, many people gather at Stonehenge, which is believed to have been an important religious site 4000 years ago. At the Summer Solstice, some of the stones at Stonehenge are in line with the rising sun.

On the Orkney Islands, Summer Solstice is celebrated at the ancient standing stone circle of the Ring of Brodgar.

Questions

1. Explain what the terms equator, northern hemisphere and southern hemisphere mean.

2. Explain what the Earth's axis is.

3. Why, during the Earth's orbit, are some places nearer to the Sun than others?

4. When does Summer happen in the northern hemisphere?

5. When does Winter happen in the northern hemisphere?

6. What is the Summer Solstice?

7. What happens to the hours of daylight in the northern hemisphere at the Summer Solstice?

8. Why do some countries of the northern hemisphere have 24-hour daylight around the Summer Solstice?

Summer Solstice
Questions

9. Where would you go in the UK to enjoy the longest hours of daylight?

10. What evidence is there at Stonehenge that Summer Solstice was in some way significant for the people of ancient times?

Irish

-Irish Verb: Revision: Tar & Tabhair. Look over it in your verb and grammar copy. Write the following sentences in Irish using your verb knowledge:

1. They did **not** come to school because it was snowing.
2. Did he give the chocolate to Joe?

-Wordsearch: Complete the wordsearch below by looking up the words you do not know in your dictionary.

Talented Tuesday!

Art

Our Art lesson this week will allow you to explore your artistic talents! As we are learning about the Summer Solstice the following piece of art explores the colours and textures that can be used to add depth to your piece. Get creative in the materials you use, for example you could use tinfoil and twine etc.

Sun Burst Weaving Craft Activity

You will need:

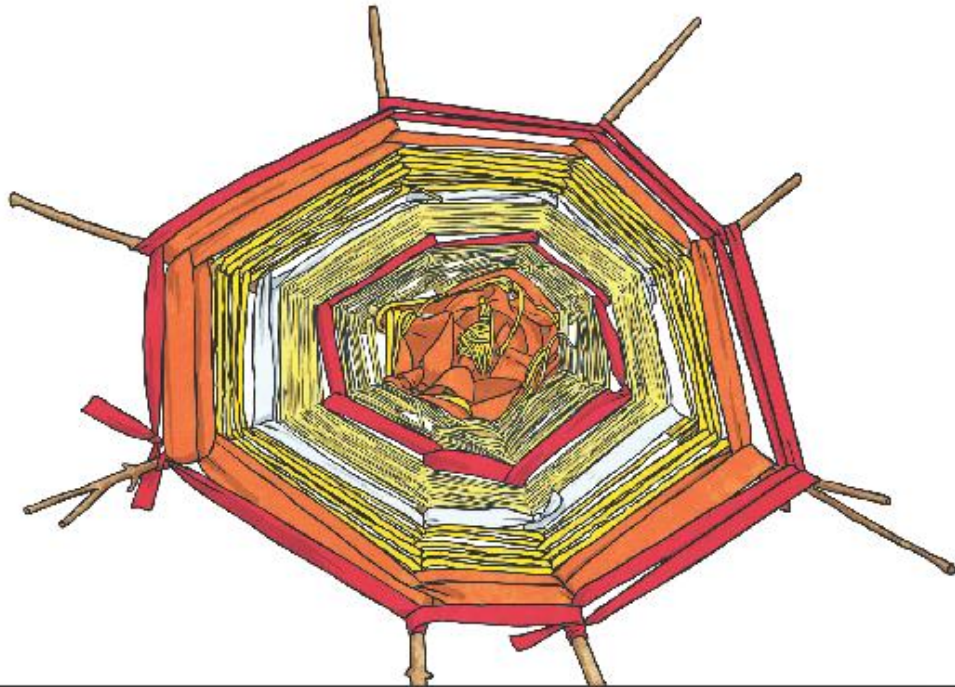

4 twigs of equal length. How large or small you make your sun burst is up to you!

Materials for weaving like wool, ribbon, material, string, thread - whatever you think will work! Choose sunny colours like red, pink, yellow and orange.

Thin wire to fix your twigs together.

What you have to do:

1. Place your twigs in a star shape.
2. Fix the centre securely with wire. The twigs should not move when you are weaving.
3. Start weaving your materials in and out around the twigs. Start at the centre and tie a knot to secure the material.
4. Continue weaving and watch your sunburst grow until it is the size you want.
5. You can then trim the twigs if you want to.
6. Make a hanging thread and display your Sunny Sun Burst.

S.P.H.E.

Many of us have enjoyed the good weather by going for walks, sometimes on the roads. With the increase in traffic on the roads of late we will explore some ways that we can remain safe on the roads. Please click on the following link below:

Work It Out Wednesday!

S.E.S.E.

We have so many places of historical value on our doorstep. Over the last few months you may even have explored some of them that you never knew existed before. I visited the ruins of a castle, a fairy fort and a limestone kiln over the last few weeks near my home. This week I would like you to briefly write about and/or draw five places or objects of historical value, or five interesting things/places that are found about 5km from your home. You might even like to visit some of them with an adult! It would be great if you could send a photo of that work to me. I'm looking forward to seeing what's on your doorstep!

English

-English in Practice page 83 Q 1-15

Table Toppers: Page 54 Day 4.

Complete the Maths trail below:

Scavenger Hunt Activities around the Garden

These fun scavenger hunts are designed to be completed inside the house or in your garden or balcony.

Rainbow Search
Try to find objects in your own outside area that are every colour of the rainbow. Find something that is:

- red
- blue
- orange
- indigo
- yellow
- violet
- green

Sound Quest
Sit quietly and listen carefully. Can you hear two noises made by:

- machines?
- people?
- animals?
- nature?
- birds?

Shape Search
Lie on your back. Can you see an object that is:

- square?
- circular?
- triangular?
- rectangular?
- hexagonal?

Texture Search
Look around your outside space. How many objects can you find that are:

- rough?
- smooth?
- squashy?
- soft?

Fitness Friday!

- This week's challenge is a strength challenge! If you don't have dice, get a pack of playing cards and take out an Ace, 2, 3, 4, 5 and 6. You could even use the left over cards to determine the amount of each exercise you should complete!

STRENGTH

Plank

Squats

Curlups

Lunge

Pushups

Wall Sit

REPS/TIME
3 DICE
ROLL

Roll 1 die and perform the strength movements listed above. Roll and add 3 dice to determine the number of reps or seconds you will perform it.
