

Dwarf Palm Lily

Cordyline murchisoniae

kor-dih-LY-nee murch-ee-SON-ee-ay

Category: Low-growing
Under 1m

Height: 1 metre

Spread: 1 metre

Full Shade - part
Shade

Keep moist

Well-drained
moist soil

Indoor plant

Great for pots

Indigenous use
plant

Palm-like shrub which is often single-stemmed with leaves up to 15cm long. White flowers in spring/summer followed by attractive red berries.

Being a rainforest plant means this shrub tolerates heavy shade and likes moisture. It is also adaptable and can grow in drier conditions and part shaded areas.

HOT TIP: If used as an indoor plant, rotate frequently to help stop the plant bending to the light and allow the soil to almost dry out between watering
