

# QLD Peppermint

*Eucalyptus exserta*

Yoo-kuh-LIP-tuss ex-SIR-ta

Category: Large Tree  
(over 10m)

Height: 15 metres

Spread: 5 metres

**A tree or mallee (on dry sites) with branching canopy and sparse grey-green foliage. Fibrous grey bark on the trunk, with smooth grey bark on the upper branches, turning pink orange in late spring & summer. Tolerates shallow, infertile soils.**

As with many Eucalyptus species, the leaves change shape as the tree matures. In this species, they give off a characteristic eucalyptus-oil aroma when crushed.

Full sun

Drought tolerant  
once established

Well-drained soil.  
Tolerates infertile  
soils

Bee attracting

Butterfly  
attracting

Traditional use  
plant

**HOT TIP: Provides a favourable food source and habitat for Koalas**
