*Melicope elleryana*  
Me-lee-cope eller-ree-ah-na

**Medium to large evergreen tree with large clusters of wildlife-attracting pink flowers during summer.**

These trees have a rounded canopy and a shallow root system which make them ideal street trees. This species flowers most profusely in full sun and attracts nectar-feeding wildlife to the garden. This tree is a natural host for the Ulysses butterfly and many other species.

**Category: Trees 5-10m**

**Height: 10 metres**

**Spread: 3 metres**

Full sun / part shade

Moderate water

Well-drained soil

Butterfly attracting

Bird attracting

**HOT TIP: Plant in full sun for maximum flowering.**
