ABOUT MANUFACTURING INDONESIA_____

Manufacturing Indonesia is Indonesia's largest international manufacturing exhibition providing a professional business platform for Indonesia's manufacturing industry.

One-stop solution for your factory! Now on its 32nd edition, Manufacturing Indonesia has attracted the industry leaders and key players in the global manufacturing industry who want to showcase their latest products and services. Incorporating Machine Tool Indonesia, Tools & Hardware Indonesia and Industrial Automation & Logistics Indonesia, the event provides the most cost-effective way to increase your business in South East Asia's biggest manufacturing market. Find what you need here – all under one roof!

Date :

WED - FRI
6,7,8
DECEMBER 2023

Open Hours
10 AM - 06 PM

SATURDAY
9
DECEMBER 2023

Open Hours
10 AM - 05 PM

Location :

Jakarta International Expo Kemayoran
Jakarta - Indonesia

HALL **A1,A2,A3
B1,B2,B3
C3,D1,D2**

Admission Policy :

Admission to trade and business visitors only.

Visitors in shorts, bermudas, singlets, slippers or sports sandals will not be allowed entry.

No children under 18 years will be admitted.

Flat shoes, peep toe, women sandals (no slippers, flipflop) are welcome

GENERAL INFORMATION

READY TO JOIN US?

Why you should register for this year's show?

- ✔ Become part of Indonesia's biggest manufacturing community and get connected to the decision-makers, sales, purchasers, engineers, potential agent/vendors – the key trade buyers in the manufacturing sector.
- ✔ Brainstorm with the key players in the industry – nothing beats the feeling of meeting your guru/clients onsite!
- ✔ As part of our sustainability program we no longer provide the onsite old-school printing registration form.

HOW TO VISIT

We offer various ways to assist you in registering for our show!

If you are our Gold Visitor, you may collect your Gold Visitor badges at the **GOLD VISITOR COUNTER** located in front of the entry gate, by presenting the QR Code sent to your email to our team.

Please proceed to the **ONSITE REGISTRATION COUNTER** to complete self-registration using the laptop provided at the venue.

If you encounter any problems during online registration, please visit the **HELP DESK COUNTER** so that we can assist you in checking your data.

ONSITE PROGRAMMES & ACTIVITIES

Seminar Series

Empowering Tomorrow's Manufacturing!

Join us at Manufacturing Indonesia 2023 for an insightful Seminar Series, where industry leaders converge to explore cutting-edge technologies, share expertise, and shape the future of manufacturing excellence.

Live Product Demos

Experience the Future in Action!

We provide LIVE product demos from the floor, showcasing the latest innovations in manufacturing technology. Witness efficiency, precision, and game-changing solutions unfold before your eyes.

Student Collaboration: WALK THE MANUFACTURING Student Tour

Guiding the Next Generation!

Embark on WALK THE MANUFACTURING Student Tour, inspiring future leaders by providing an exclusive behind-the-scenes look into the heart of innovation and technology in manufacturing.

NEW PROGRAMME

Kaizen is a Japanese term that means “continuous improvement.” It is a philosophy and methodology that has been widely adopted in the manufacturing industry, particularly in Japan but also globally, to enhance productivity, efficiency, quality, and employee engagement. Kaizen emphasizes incremental and continuous improvements in all aspects of a manufacturing operation, including processes, equipment, people, and products.

Ready for a manufacturing makeover? It's time to discover the art of continuous improvement at the Kaizen Clinic, exclusively at Manufacturing Indonesia 2023!

We provide KAIZEN CLINIC where you can get FREE consultation with our Kaizen Coach to discuss ways of implementing Kaizen principles and best practices, and have an intensive discussion to identify, analyze, and address issues and opportunities for improvement in your manufacturing operation.

Join us for an interactive journey into Lean Manufacturing, where every small change sparks big transformations. Here's why you can't afford to miss it:

- ✔ Continuous Improvement Expertise
- ✔ Lean Practices Demystified
- ✔ Interactive Workshops
- ✔ Smart Manufacturing Insights
- ✔ Networking Opportunities

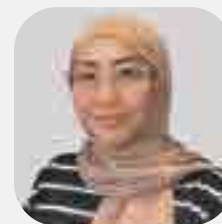

Meet The Coaches

Rizky Abdillah Ramadhan
Kaizen Consultant

Tejo Nugroho
IT Consultant

Amanda Nur Cahaya, S.Psi., M.Psi., Psikolog
HR & Organizational Development Consultant

Kaizen Clinic Schedule

DAY 1 - 6 DECEMBER 2023 - HALL B3

TIME	AGENDA	SPEAKER
11.00 - 12.00	Coaching Clinic	
13.30 - 14.30	Seminar : Design Thinking For Engineers	<ul style="list-style-type: none"> • Rizky Abdillah Ramadhan Kaizen Consultant
	Seminar : Safety Monitoring System Implementation	<ul style="list-style-type: none"> • Wisnu Hariyadi Health, Safety and Environment Expert - Lecturer SHE at Heavy Equipment Industry
14.30 - 16.00	Coaching Clinic	

DAY 2 - 7 DECEMBER 2023 - HALL B3

TIME	AGENDA	SPEAKER
10.00 - 12.00	Coaching Clinic	
13.30 - 14.30	Seminar Measuring Operational Excellence Based On OEE	<ul style="list-style-type: none"> • Yaser Ali Husen Lean Industry 4.0 Expert
14.30 - 16.00	Coaching Clinic	

DAY 3 - 8 DECEMBER 2023 - HALL B3

TIME	AGENDA	SPEAKER
10.00 - 12.00	Coaching Clinic	
13.30 - 14.30	Seminar Change Management And Relation to Digital Transformation	<ul style="list-style-type: none"> • Amanda Nur Cahaya, S.Psi., M.Psi., Psikolog HR & Organizational Development Consultant
14.30 - 16.00	Coaching Clinic	

DAY 4 - 9 DECEMBER 2023 - HALL B3

TIME	AGENDA	SPEAKER
10.00 - 12.00	Coaching Clinic	
13.30 - 14.30	Seminar Integrated Warehouse Management System	<ul style="list-style-type: none"> • Tejo Nugroho IT Consultant
14.30 - 16.00	Coaching Clinic	

NEW PROGRAMME

A Manufacturing Digital Hub at the Manufacturing Indonesia 2023, we centralized various digital platform and technology from our automation partners to showcase their latest digital technologies, solutions, and innovations in manufacturing industry. In collaboration with APTIKNAS, this Manufacturing Digital Hub serves as a focal point for industry professionals to explore and learn about the latest advancements in manufacturing technology.

Make the most of your visit by exploring how our digital innovations can propel your business to new heights of efficiency and productivity.

We eagerly anticipate your presence at the Manufacturing Digital Hub to witness the future of manufacturing!

EXHIBITING COMPANIES

ABRASIVE ENGINEERING PTE LTD

A3-3302

Abrasive Engineering Pte Ltd design and manufacture Manual, Automatic and Robotic Abrasive Blasting and Peening Machine. Supply Abrasives material like Aluminum Oxide, Glass Beads, Stainless Steel Shot/Grit, Plastic abrasives etc. We also supply equipment like Vibratory Machine, media and Compound for mass finishing by being the sole agent for Rosler Germany in Singapore, Malaysia and Indonesia. We also provide Blasting, Peening and Tumbling services in Singapore.

Kompac 750 Blasting Machine

Our Kompac 750 is a blasting machine of low cost/maintenance and simplicity. Our Kompac 750 comes fully assembled with in-built dust collector. Just plug in the 13 Amp 3 Pin Plug and the compressed air line and the machine is ready to use.

Rosler "Euro" Vibratory Machine

Euro rotary vibrators are ideal for interlinked, automatic surface finishing processes. They are characterized by a process channel with spiral bottom incline and pneumatically activated separation flap. A special "gate clearing" feature developed by Rosler allows fully automatic processing and separation.

Comco Micro Blaster

Comco's Simoom Technology, patented method of mixing air and abrasive, provides greater control, increased power and versatility. Its steady flow of abrasive ensures consistent results. With AccuFlo AF10 you can process parts faster with greater powder efficiency. Select from a wide range of abrasive types and sizes to obtain just the right finish.

ABRO TECHNOLOGIES PVT. LTD

D2-8905

ABRO is considered a leader in the field of Dynamic Balancing Machines. "Our success comes from our ability to provide balancing solutions to customers from all industries around the globe". The company has recently supplied a machine with high speed Vacuum Balancing of 100 Ton capacity up to 3600 rpm to ABB. ABRO produces machines for all types of industries such as Aerospace, Automobile, Power Generation & repair, Textile, General Maintenance.

DYNAMIC BALANCING MACHINE

ABRO is considered a leader in the field of Dynamic Balancing Machines.

"Our success comes from our ability to provide balancing solutions to customers from all industries around the globe".

The company has recently supplied a machine with high speed Vacuum Balancing of 100 Ton capacity up to 3600 rpm to ABB.

ABRO produces machines for all types of industries such as Aerospace, Automobile, Power Generation & repair, Textile, General Maintenance.

ABRO is also specialized in upgrading your existing balancing machines irrespective of its make.

ACE MICROMATIC INTERNATIONAL PVT LTD

D1-8218

AceMicromatic Group has created the ultimate Machine Tools Manufacturing Ecosystem. We offer Turning, Milling, Grinding, SPM's, 3D Metal Printing & Industry 4.0 solutions, all under one roof.

We offer comprehensive solutions to meet most customer needs. With more than five decades of rich and pioneering engineering experience, AceMicromatic Group has steadily grown to be one of the most successful businesses in the world.

CNC HORIZONTAL & VERTICAL TURNING AND TURNMILL CENTERS

CNC TURNING CENTERS, CNC TURNMILL CENTER, CNC VERTICAL LATHES, CNC CHUCKERS AND TWIN SPINDLE MACHINES

CNC VERTICAL & HORIZONTAL MACHINING CENTER

CENTER VERTICAL MACHINING CENTER, CNC HORIZONTAL MACHINING CENTER, CNC TWIN SPINDLE VMC, CNC DOUBLE COLUMN VMC

CNC GRINDING MACHINES

CNC CYLINDRICAL GRINDING MACHINES, CNC INTERNAL GRINDING, CNC CENTERLESS GRINDING MACHINES

EXHIBITING COMPANIES

ACE MICROMATIC INTERNATIONAL PVT LTD

D1-8218

AceMicromatic Group is India's largest machine tool conglomerate with a market presence in several countries across Asia, Australia, Middle East, North & South America and Europe. Formed with the intent to provide its customers a one stop shop for all machining needs, the group specializes in the manufacturing of CNC controlled turning, milling and grinding machines along with subsystems like tool turrets, ATC etc. The group offers its customers a wide and comprehensive range of machine to suit

CNC HORIZONTAL & VERTICAL TURNING AND TURNMILL CENTERS

J300 LM machine is a blend of cost-effectiveness & precision, ideal for most job shops & ancillaries. This horizontal 2-axes turning center is available in A2-5 spindle configurations with up to 320 mm maximum turning diameter for up to 300 mm Turning length. Available in Linear Motion (LM) guideway and CNC Controller options like Fanuc, Siemens and Delta, this machine has the versatility for most turning applications.

CNC VERTICAL & HORIZONTAL MACHINING CENTER

The DTC-400 XL is compact and powerful, loaded with BT-30/BBT-30 spindles. The machine is built with optimally designed structure to take care of cutting forces, cushioning high speed and accurate tapping. The machine is equipped with roller type LM guideways for delivering better rigidity and superior performance. The DTC-400 XL is equipped with High Speed Pocket tilting type Automatic Tool Changers with 16 / 24 tool capacity with chip to chip time of 1.7 / 1.5 sec, designed based on the machine size and suitable application. With a rigid structure and high speeds one can achieve high accuracy and productivity on these drill tap machining centers.

CNC GRINDING MACHINES

Flexi is a CNC Universal Grinding machine suitable for grinding OD, ID and Shoulders in a single chucking to achieve the highest precision in size and geometry. The machine bed construction is from high grade cast iron & box type structure. The machine is capable for high speed grinding up to 60 m/sec wheel surface speed. The axes move on High precision Linear mot guideways for precise positioning & repeatability with a straightness accuracy -0.002 mm over 400 length of standard test piece.

ACME INTERNATIONAL, PT

A2-220

We are committed to providing the highest quality products to support our customers' needs. At PT. ACME International, committing to quality, services, speed of delivery, and even cost are key drivers to become the right partner for our customers. Therefore, to ensure that our customers are always provided with the best solutions for their applications, we dedicate ourselves in continuing to improve and develop our product range through the latest technologies, equipment, as well as systems. We are ready to adapt and respond to industry trends and needs. In order to do so, we offer flexible support and rapid responses for customers. Our highly motivated staff are readily available to be your solution provider.

PT. ACME International serves in the Indonesian supporting Plastic and Metal Working Industries, such as Mold Base, Die Set, Finished Plates, and its Standard Components, including Factory Automation solutions

ADDTEC CO.,LTD.

D1-8411

Addtec is a major company in the field of HVAC systems, ventilated seats, etc and electronic components for vehicles. The company is growing into a global company specialized in electronic components for vehicles by developing and manufacturing parts like HVAC actuator, Auto flush door handle actuator, 4WD actuator, Valve actuator, Seat Ventilation ECU & Blower motor, and PTC heater as its main products.

HVAC ACTUATOR

Devices control air temperature from AC vents, recirculation/outside air intake and actuate the HVAC door flap to control air direction

VALVE ACTUATOR

Device opens and closes a water valve

Autoflush Door Actuator

Operate auto pop up to deploy the auto flush door outside handle

EXHIBITING COMPANIES

ADE TOOLS GROUP

B3-563

Vietnam ADE Tools Group is the second factory of China Jiangsu Suliang Tools Co., Ltd. in Vietnam. It mainly produces various types of cutting tools (Taper shank drill, Center drill, Fully ground drill, Step drill, Taps, Milling cutter, Chamfer deburringtool, Annular cutter, Carbide burrs, CNC)

EXHIBITING COMPANIES

AIWO INTERNASIONAL INDONESIA, PT

C3-6820

PT AIWO INTERNATIONAL INDONESIA telah memiliki pengalaman memproduksi kuas cat dan produk sanitary plastik sejak tahun 2013.

Produk unggulan dari PT All adalah Kuas Cat , Kran air plastik , Stop kran plastik Kualitas menjadi fokus utama produk yang kami hasilkan,mulai dari pemilihan bahan baku hingga proses quality control barang jadi

PT AIWO INTERNASIONAL INDONESIA telah mendapatkan sertifikasi ISO 9001 : 2015 dari lembaga akreditasi internasional

KUAS CAT MDN

Kuas Cat 899 MDN
Handle dari kayu,kombinasi bulu sintetik dengan bulu hewan sehingga mempunyai daya serap yang kuat , menghasilkan hasil yang rata dan irit dalam pemakaian cat
Mutu dan kualitas menjadi yang utama

KRAN AIR 107 MDN

Kran taman plastik terbuat dari bahan ABS, dengan As kran terbuat dari kuningan dan Bola katup terbuat dari besi chrome , membuat produk ini sangat awet dan tahan bocor

AKAIDO MARKETING SDN BHD

D2-8829

Founded in 2015, AKAIDO is a company specializing in the development and sales of cordless tools with lithium battery. Lithium battery offers value of low weight, high energy density, improved discharge and charge efficiency and longer life span. With lithium battery, our cordless tools provide more powerful performance besides serving you with unlimited freedom and less hassle. In the spirit of "Better Alternative of Power", the company constantly improves the product performance.

AKODA RESOURCES SDN.BHD

D2-8830

Base on the good reputation, AKODA had become one of the most active and reliable brands recognized by the Industrial. AKODA cutting product includes: Diamond Cutting Blade, Diamond Cup Wheel, Diamond Stone Bit, Construction Core Bit, Abrasive Cutting Disc, Concrete Floor Grinder Machine, Tungsten Carbide Tipped Saw Blade and Tungsten Carbide Tipped Drill Bit.

AKODA RESOURCES SDN.BHD
ALL KIND OF DIAMOND CUTTING BLADE, DIAMOND GRINDING DISC AND DIAMOND CORE BIT, TCT SAW BLADE .

EXHIBITING COMPANIES

AKS TOOLS, PT

B3-5426

PT. AKS Tools was founded in 2010 as abrasive, knife and saw importer. We provide an extensive range of quality products with affordable price from Finland, Japan, German and China. To fulfill our consumers' needs, we provide abrasive converting services to all shapes and sizes. With our modern converting facility, we can guarantee consistency of our product quality.

MIRKA ABRANET

Abranet is highly resistant to dust, which helps ensure optimal usage for every type of sanding work. When combined with our ergonomic and efficient power tools and dust extractors, you're guaranteed a dust-free surface, everytime. The Abranet is multifunctional, developed for sanding fillers, primers, lacquers, composite materials and a wide range of other materials for industrial application use.

AKM CIRCULAR SAW

GOODHAND GH-389

ALD VACUUM TECHNOLOGIES

A3-3420

ALD Vacuum Technologies is a synonym for innovation in vacuum technologies. ALD is a leading supplier of vacuum furnaces and processes. We operate in all fields of vacuum metallurgy and vacuum heat treatment. With subsidiaries in the USA, France, China, Japan, India, Singapore, and Thailand and over 70 representatives, we are serving our customers.

ALD's primary and re-melting technologies produce high grade materials and alloys. The main focus is on steels, nickel based alloys and special mat

Vacuum Metallurgy

Vacuum induction melting and de-gassing for higher alloyed steels, such as tool & die steel, stainless, duplex steel and Nickel based alloys. The absence of air avoids pick up of und desired element like Hydrogen, Oxygen and Nitrogen. Modification at these systems allows continuous and investment casting as well as powder making by gas atomisation. The product range is from laboratory scale with one litre to pilot and smaller production up to 3.000 litres (23 tons)

Vacuum Heat Treatment

MonoTherm is a single chamber multipurpose furnace for all heat treatment application, such as hardening, case hardening, annealing, tempering, brazing. The hot zone will be cylindrical or cubical. Four different furnaces sizes from 400x400x600 mm to 1200x1200x1500 mm are available. The charge weight will be from 200 to 2000 kg. The vacuum level could be down to 5x10⁻⁶ mbar. The maximum quench pressure is 20 bar. Dynamic quenching allows a gentle cooling of the load.

Additive Manufacturing - Metal Powder

Metal Powder is the raw material of additive manufacturing such as MIM or 3D Printing. With gas atomization it is possible to produce spherical metal powder particles, which are requested by those technologies. It is possible to atomize all kind of metal also reactive materials like Titanium and high melting metals, such as Tantalum. Batch sizes from 10kg to 500kg are available.

PTFE/PFA Lined Pipes, Fittings and Flexible Hose

ALTO SENTOSA, PT

C3-738

PT Alto Sentosa is a sales Agent and Authorized Service Center for the Nidec Control Technique brand in Indonesia With a reliable team of sales and technicians, as well as the use of original spare parts, we are able to provide quality service and competitive prices. Our scope of business : Sales, Repair, Preventive Maintenance.

Inverter Drives

- Simple, Reliable, Easy
- Outstanding control performance
- Superior Adaptability
- Optimize EMC design, immunity for high interference environment
- Compact design, based on thermal simulation & design to reduce product size
- Excellent Price/Performance Ratio
- * Warranty 3 Years

ANDALAN DIGITAL TEKNOLOGI, PT

B1-420

PT. Andalan Digital Teknologi is your trusted source for cutting-edge drive and automation solutions. As the exclusive distributor of VIECHI Electric Co., Ltd. in Indonesia, we deliver top-quality products and customized systems to enhance industrial processes. With a commitment to excellence, innovation, and comprehensive support, we empower businesses to thrive in today's competitive landscape. Count on us to optimize your operations and drive your success

VEICHI Electric

VEICHI Electric, a high-tech enterprise engaged in the R&D, production, and sales of industrial automation products, has focused on electric drive and industrial control since its establishment. We supply a wide range of products, including inverters, servo systems, motion controllers, PLCs, and HMIs, to diverse customers in lifting and mining equipment, machine tools, compressors, plastics, solar water pumping, building materials, robots or manipulators, printing and packaging, textile and chemical fiber, metallurgy, municipal, petroleum, chemical, and other industries.

General Drive Series

The Veichi General Drive Series is a versatile and advanced line of drive and automation solutions designed to meet the diverse needs of various industries. Known for their reliability, performance, and innovative features, these drives offer precise control and efficient operation for a wide range of applications. VEICHI Electric offers a General Inverter Series ranging from the Compact and Economic series, the High-Performance series, to the Multi-Drive series.

Automation Systems

VEICHI Automation Systems is a comprehensive suite of cutting-edge solutions designed to transform industrial and manufacturing processes. Renowned for its innovation, reliability, and performance, VIECHI Automation Systems encompasses a wide range of products and services tailored to meet the specific needs of various industries. Here are some key features and components of VIECHI Automation Systems: PLC, HMI, VFD, IoT, etc. We are trusted by industries worldwide for their ability to streamline operations, enhance productivity, reduce downtime, and improve the overall efficiency of industrial processes. With a focus on innovation and quality, VIECHI continues to be a leading provider of automation solutions across various sectors.

We provides many tools & accessories products. Drill machine, angle grinder, welding wire, hand tools, drill bits, grinding wheel, cutting wheel, and etc.

ARISMA DATA SETIA

B1-4109

PT ARISMA DATA SETIA is a computer system integrator company, specializing in IT network design & implementation, as well as, SOLIDWORKS 3D CAD/CAE/ Product Data Management/Technical Communication & File transfer solutions.

SOLIDWORKS
SOLIDWORKS adalah software 3D CAD yang juga bisa sekaligus untuk fungsi CAE dan CAM dengan pengguna paling banyak di dunia. SOLIDWORKS menjadi pilihan bagi para engineer dari seluruh dunia karena mudah dipelajari serta memiliki fitur yang lengkap sehingga bisa dipakai pada berbagai bidang industri.

MASTERCAM
MASTERCAM adalah software CAM pertama di dunia yang hingga saat ini masih menjadi pilihan utama bagi para pelaku machining. Fiturnya yang lengkap dan mudah dipelajari, Mastercam mampu menghasilkan proses machining yang cepat dengan presisi tinggi.

ZWCAD
ZWCAD adalah software CAD dengan lisensi permanen yang bisa membantu Anda untuk membuat desain 2D maupun 3D serta proses drafting yang lainnya.

EXHIBITING COMPANIES

ARUM INC.

D2-9105

All industrial products, from aircraft to smartphones, are made of precision metal parts. But, the parts manufacturers in many countries are now facing an ageing workforce and a shortage of skilled workers such as CNC programmers. ARUM Factory365 is the world's first AI solution which generates automatically CNC programmes by simply inputting 3DCAD data. This cloud-based solution reduces the man-hours and costs required to create CNC programmes and easily accelerates DX in their factories.

ARUM Factory365

ARUM Factory365, by simply uploading a 3D CAD data, (1) precisely analyzes the shape at 5/1000 mm intervals, (2) automatically identifies machining features such as threaded holes and leftover islands, (3) automatically selects the optimum tool, (4) uses a proprietary algorithm to calculate the optimum machining conditions at high speed, and (5) automatically calculates an efficient tool travel path. Finally, the system automatically outputs the "NC program," which are necessary to operate the machine tool.

ASAHI DIAMOND INDUSTRIAL INDONESIA, PT

D2-910

Since its founding in 1937, our company has deepened business operations as a specialized manufacturer of diamond tools. As an independent business group engaging in a wide range of business operations in Japan and other countries, we can invest human resources, information and other business resources at our own discretion. This is our greatest strength.

Rottar Dresser

Asahi Diamond is expanding to all industrial and life stage.

A unique feature of diamond is its hardness, which can add to higher efficiencies in many industrial applications. Its potential is particularly demonstrated in the processes of cutting, grinding and polishing and for use as wear surfacing. We at Asahi Diamond have understood this point from the beginning and have striven to open up new industrial technological frontiers. For years, our products have been making contributions to the improvement of varied manufacturing processes in many industries. Our diamond and CBN tools are now recognized as superior in quality and distributed around the world.

ASIAN BEARINDO SEJAHTERA, PT

D2-986

PT. ASIAN BEARINDO SEJAHTERA

PT. Asian Bearindo Sejahtera is part of ASIAN BEARINDO GROUP, which is ONE OF THE LEADING BEARING SUPPLIERS IN INDONESIA. Serving the local industry and automotive markets for over 40 years, we are vastly experienced in providing the needs for our customers' bearings solutions.

As a professional company for bearing solutions, Asian Bearindo Group provides various bearing brands and types from Europe, the USA, Japan, and China to ensure our customers' diverse and distinct demands.

We are

Bearings

A ball bearing is a type of rolling-element bearing that uses balls to maintain the separation between the bearing races.

A pillow block bearing consists of a mounting bracket (pillow block) that houses a bearing and is used in low-torque, light load applications

A pillow block bearing consists of a mounting bracket (pillow block) that houses a bearing and is used in low-torque, light load applications

A pillow block bearing consists of a mounting bracket (pillow block) that houses a bearing and is used in low-torque, light load applications

Belts

A belt is a loop of flexible material used to link two or more rotating shafts mechanically, most often parallel.

Lubricants

A lubricant is a substance, usually organic, introduced to reduce friction between surfaces in mutual contact, which ultimately reduces the heat generated when the surfaces move.

EXHIBITING COMPANIES

ASUENE APAC PTE.LTD.

D2-9107

Asuene is a Climate Tech company and our cutting edge service enables companies to measure their GreenHouse Gas emissions from scope1,2,3 to CFP. We also offer decarbonization solutions including sustainability consultation, carbon offset, and initiative alignment assistance for example, TCFD and PCAF. We also provide ESG Cloud Rating service based on GRI and UNGC. Asuene currently has 4,000+ clients in APAC.

EXHIBITING COMPANIES

AUTONICS INDONESIA, PT

B1-4202

Autonics is a globally trusted provider of industrial automation solutions from South Korea

Autonics develop and manufacture a wide range of automation products which are marketed worldwide. Our products are trusted and adopted by engineers in various industrial applications and our technology is widely applied in day-to-day automation devices. We hope to accomplish our mission, which is to enrich the quality of human lives by delivering new values that will make the world more convenient.

LSC Series

The LiDAR sensors LSC series feature 270° detection angle and up to 25 m detection distance to accurately detect object presence. The scanners offer 16 field sets and teaching function for flexible installation and Ethernet/Bluetooth communication allows easy configuration with PC and mobile application. The ROS (Robot Operation System) driver is also supported for SLAM (Simultaneous Localization and Mapping) function of AGV/AMR.

Safety Sensor

Safety is becoming an essential part in industrial automation. Autonics is proud to introduce various safety products to ensure safety in industrial sites. With automation technology and expertise which we have built for over 40 years, we now present new safety system that will protect you and your equipment with stable, reliable, flexible, and practical safety products and systems.

VC Series

5M Monochrome Smart Cameras
The VC series smart cameras utilize images captured by the integrated industrial camera lenses to determine the target object's code, OCR/OCV, patterns, alignment, presence, size, shape and more. The camera also utilizes global shutter method to capture accurate images, and the sensors feature 14 essential inspection functions for diverse applications. The VC series is optimized for heat dissipation to ensure reliable operation and high life expectancy.

BANDO INDONESIA PT

C3-7915

PT. Bando Indonesia is one of the leading automotive and industrial power transmission belt and conveyor belt manufacturer in Indonesia.

Bando Power transmission belt has been accepted by the local and foreign market for her quality products, enabling the company to dominate the market and fulfill her export to Singapore (for re-export to Middle East, Asia, Australia and Africa), Japan, Europe and USA.

Transmission Belt

All Transmission Belt.

BAOTN INTELLIGENT LUBRICATION TECHNOLOGY (DONGGUAN) CO.,LTD.

D2-8928

BAOTN Intelligent Lubrication Technology (Dongguan) Co., Ltd. has developed into one of the leading machinery manufacturer specializing in centralized lubrication systems. Founded in August 2006. The company adhere to the strategic approach that integrity is fundamental and quality wins the future' It produces a variety of quality and stable lubricating device products, including the resistant, volumetric, circulative, spray type, progressive dry and thin oil lubrication products.

Thin Oil Lubrication Pump with Digital Display

Quantify lubrication of each lubrication point.
Provided with liquid level switch.
Provided with pressure switch (optional).
With overheat protection, the motor is durable
The pumps has two layers of filters to make the oil passages smoother.

Electric grease lubrication pump GEN-2

- 1) The lubrication pump duty cycle can be controlled by the host PLC or a separate controller.
- 2) Set the solenoid valve pressure relief device, when the lubrication pump stops running, ensure that the system automatically and quickly relieve pressure.
- 3) The lubrication system is equipped with a pressure switch, which can effectively monitor the pipeline system to interrupt the flow, leakage and other pressure shortage phenomenon.

Vertical Multistage Centrifugal Water Pump

- 1) Beautiful appearance, quiet operation, strong power, high efficiency energy saving.
- 2) Machining center, industrial cleaning, electric spark, CNC lathe, filter system, grinder, cooling system.
- 3) MTS-B vertical multi-stage centrifugal pump series are small multi-stage immersed centrifugal pumps (with mechanical seal). The pumpsuction port is in the axial position and the discharge port is in the radial direction.

EXHIBITING COMPANIES

BBS AUTOMATION PENANG SDN BHD

A3-3326

BBS Group is a renowned German enterprise specializing in automated assembly and testing solutions for global industrial clients. BBS is committed to providing engineering solutions which are not only financially feasible and structurally sound, but help improve safety, reliability and profitability. At BBS, assembly automation is constantly being redefined and researched to provide the best solutions for your specific manufacturing needs.

Automated assembly

BBS Automation specialist for challenging tasks in the field of assembly automation. Our machines and systems assemble a wide variety of products for different industries.

Leak Detection Technology

BBS' highly sensitive leak detection and sniffing systems ensure that components assembled by our sophisticated manufacturing methods are leak-proof and sealed.

Build-to-Print Solutions

Offering flexible automation solutions tailored to our customers, BBS has the technologies, expertise, and infrastructure to carry out build-to-print projects.

BENCHMARK MEDIA INTERNATIONAL CORP.

CW-20

Benchmark Media, a trade magazine publisher from Taiwan, has been working on building a communication bridge between Taiwan manufacturers and international traders. We provide comprehensive supplier sources, exhibition calendars, and industry news in tools, hardware, gardening, plumbing fixtures, and automobile industries.

Guidebook to Taiwan Hand Tools

Benchmark Media has been the publisher of Guidebook to Taiwan Hand Tools for the Taiwan Hand Tool Manufacturers' Association (THTMA) since 2008. The guidebook, containing more than 500 pages of advertisements, products, and corporate information, has received favorable comments from manufacturers and buyers at home and abroad. Copies of this guidebook are widely circulated at major international hardware and automobile shows. Come check the latest issue here:

BENZ WERKZ INDONESIA, PT

C3-7618

PT Benz Werkz Indonesia is an import and distribution company which specializes on tools and hardware products. It was established on 2010 and has widely developed its product range. Our main products including Cutting and Grinding Wheel, Welding Machine and accessories, High Pressure Cleaner, Chuck, Drilling Equipment, Pneumatic Tools, Hose Clamp, Power Tools and spare parts, Automotive Tools and Hand Tools.

High Pressure Cleaner / Jet Cleaner

High Pressure Cleaner or Jet Cleaner is a machine build specially for general cleaning, to remove loose paint, mold, grime, dust, mud, and dirt from surfaces and objects such as buildings, vehicles and concrete surfaces.

Metal Cutting Disc

A Metal Cutting Disc is a specialized, often hand-held, power tool used for cutting hard materials, such as metal, stainless steel & aluminum.

Power Tools

Power Tools is commonly use in construction & renovation purposes. Ranging from Impact Drill, Jigsaws, Demolition Hammer, Marble Cutter, Angle Grinder, Etc. Also Available in corded or cordless option.

EXHIBITING COMPANIES

BERKAT SOLUSINDO, PT | WECON INDONESIA

B1-4020

PT Berkat Solusindo merupakan Authorized Distributor produk " WECON" WECON Technology Co.,Ltd. Produk Wecon meliputi Human Machine Interface (HMI), Programmable Logic Controller (PLC), Servo Controller, IIoT Solutions(V-NET & V-BOX) dan Inverter. Kami menawarkan solusi untuk kebutuhan otomasi di berbagai sektor industri dengan jaminan ketersediaan stok serta layanan purna jual. Produk unggulan kami adalah IIoT gateway yang sudah menjadi kebutuhan primer di Era Industri 4.0. Wecon Indonesia.

Wecon IoT Gateway

V-BOX is a device for use in remote debugging, web scada, API interface, app monitoring (android/IOS) Device ini mampu menjadi gateway dari berbagai controller yang anda miliki baik itu PLC, HMI, Inverter, dll dari brand apa saja

Wecon Programmable Logic Controller (PLC)

Wecon memiliki beberapa jenis PLC diantaranya sebagai berikut;
 1. LX3V Series (seris umum bertipe compact mulai dari 14 I/O - 60 I/O yang dapat diekspansi hingga 256 I/O
 2. LX5 Series (series type PLC compact dengan berbagai kelebihan seperti memiliki 8ch I/O high speed (pulse) support E-Cam dll
 3. LX6 Series (type terbaru dari wecon yang berjenis Modular)

Wecon Human Machine Interface (HMI)

kami memiliki HMI mulai dari 3.5 inch -15" dan varian HMI + IoT (7", 10,2" serta 15")

BERKAT SUKSES RAKING INDONESIA, PT

D2-982

Our Company Represents the TMS Roll forming machine company which is located in BANGKOK and the FACTORY is located in kanchanaburi.Thai roll engineering have many experiences for development from simply roll forming profile to complicated profile. And we supply the best qualities. one of the profiles you created is for Otomotiv namely, Door Frame, Guide Glass, Bumper Beam, side sill, TMS join with KOREA machine. and also made a machine for profile Raking. and we also offer profile Services

MACHINE ROLLFORMING
Machine Automotive, Cabel Tray.

Selective Rack
Racking for warehouses support heavy duty work. load 500-5000 kg/Level

Medium Rack
Medium Load series 500 kg./Level popular used for machine parts, Auto parts, Crate.

C3-6823

PT. Bintang Jaya Amasindo is Amada Distributor in Indonesia. We're selling new & used machineries such as Laser, Turret Punch, Press Brake, Shearing, Stamping, Band Saw & Fabricator machines. We also sell Amada Machine Operating Software, Band Saw Blades, Spare Parts and used & new Punching & Bending tools.

Industrial Machineries
New & used industrial machineries sale & service. Amada Band Saw Blades, NCT & Bending Tools, Spare Parts & software sale etc.

After sale services & Industrial Brushes
we are selling Industrial Brushes such as Wheel Brush, Cup Brush, Tube Brush, End Brush, Dish Brush & Hand Brush

EXHIBITING COMPANIES

BLUM PRODUCTION METROLOGY PTE. LTD.

D1-8016

Blum-Novotest GmbH is a renowned manufacturer of innovative and high-precision measuring and testing technology. We develop and manufacture solutions to the highest quality standards and the aim of boosting our customers' productivity. With technology "Made in Germany, BLUM leads the way in technology for optical and tactile production measurement technology for machine tools. Advanced measuring systems for tool setting, tool breakage detection and workpiece measurement in machine tools.

LC50-DIGILOG

FUTURE-ORIENTATED LASER MEASURING SYSTEM FOR MACHINING CENTRES

Reinvented by the inventor. The impressive performance of the LaserControl series has been ensuring maximum precision, reliability and efficiency in countless machining centres for decades now.

From machines for micro-machining, to series production right up to large component machining, these systems are used to guarantee highest quality around the clock for an economically viable price. And the latest generation is writing a new chapter in this success story: The trailblazing DIGILOG technology opens up a multitude of previously inconceivable applications in production measurement technology.

FORMCONTROL X

MEASURING AND AUTOMATION SOFTWARE

FormControl X is a user-friendly measurement software for machining centres for automated quality control of work-pieces in individual and series production. It enables maximum productivity and reduces scrap through monitoring measurements between and after machining, statistical process control based on the recorded measured values and reworking in the original clamping set-up.

TC64-DIGILOG

THE DIGILOG REVOLUTION

Digilog radio touch probe with revolutionary shark360 measuring mechanism. DIGILOG = high-precision digital measurement and lightning-fast scans in analogue mode. Featuring BRC radio technology, the DIGILOG touch probes are particularly well suited to use in milling and turning centres. By analogue scanning of the workpiece surface, machining errors are detected quickly and reliably.

BONDFLEX INDUSTRIAL PTE., LTD

A3-3309

Bondflex offer a complete portfolio of bonded abrasive products for customers across industries with bespoke services direct from factory.

CF GLOBAL TECHNOLOGIES PTE., LTD

D1-8114

CHINDT®, located in Shanghai, China, is a leading Non-destructive Testing Equipment manufacturer in China. Our equipment and related products range in the fields of NDT UV lamp, magnetic particle testing (MT), penetrant testing (PT), ultrasonic testing (UT) and magnetic flux leakage testing (MFL). CHINDT SEA supplies the full range of products from CHINDT and covers the after sales support for the SEA market.

Fluorescent Penetrant Inspection (FPI)
CHINDT designs and manufactures FPI systems with a high level of automation and various functions, including etching, pre-cleaning and post-cleaning auxiliary systems. Typical customers include Pratt & Whitney, Safran, GE, Martinrea Honsel, MAGNA, etc.

Magnetic Particle Inspection System (MPI)
Besides a full range of standard and custom-designed MPI systems, CHINDT is a leading manufacturer of MPI system with automatic defect recognition (ADR). MPI system with ADR has been implemented for bearings, aerospace parts and bolts.

Smart UV LED Light
CHINDT has a full range of UV LED lights, including torch type, overhead type and hand-held type. Phoenix Supreme is the second generation of Smart UV LED lamp innovated by CHINDT with real-time remote streaming, precise dimension measurement of fine defects and UV endoscopic viewing!

- Solenoid control
- Pressure control
- Flow Control

Stack Valves

- Sectional block
- Mono block
- Stackable/Non-stackable valves

CHINA MACHINERY INDUSTRY INTERNATIONAL COOPERATION CO., LTD.

C3-7718

China Machinery Industry International Cooperation Co., Ltd, founded in 1981, belongs to SINOMACH---a Fortune Global 500 enterprise. Relying on the strong group advantages and the support of five major R&D and manufacturing bases, CAEC integrates products and services in abrasives, cutting tools and bearings, widely used in construction, automobiles, electronics, steel, and energy. CAEC is committed to provide customers with overall solution.

Vitrified Bond CBN Grinding Wheels

Main features:
High grinding efficiency/High precision and good surface quality/Easy to dress with an electroplated dressing roller.
Application:
Mainly used for the precise grinding of the gearshaft and gear.
The Efficient grinding of gear shaft, gear inner hole and end face.
The Efficient grinding of belt wheel and wheel shaft for vehicle CVT automatic transmission.

Precision machine tool bearings

Dimension Series: H719C, H719AC, H70C, H70AC.
Size Range: H719: 8~220mm H70: 8~220mm.
Product Feature:
Super high speed, high rigidity, suitable for oil-air lubrication and spray lubrication.
Application:
Widely applied in the field of machinery, textile, automobile, railway, metallurgy, chemical industry and electronic.

Gear grinding wheels

Application fields: Mainly used in grinding and processing of automobile gears, reducer gears, etc.
Product features: Using special manufacturing technology, the product is sharply ground; less grinding heat, no burns and vibration marks on the workpiece; high grinding efficiency, good self-sharpening, good shape retention, and good precision in gear processing.

EXHIBITING COMPANIES

CHIYODA KOGYO INDONESIA, PT

B2-4515

We are an Industrial Automation System Solutions for Industry, Our service & products are Robot System Integrator, Special Purpose Machine, Precision Metal Processing, Vacuum Heat Treatment Service, and Trading. CIXI ALPHA BEARING COMPANY LIMITED

B3-5308

BEARINGS, MANUFACTURER, PULLEYS, METAL PRODUCTS, Metal transmission parts

C-JAC INDUSTRIAL CO., LTD.

B2-4622

C-JAC shock absorbers are developed to provide linear deceleration and therefore solve these problems. They can stop or change direction of moving objects smoothly and quietly without any compromising in safety. C-JAC shock absorbers are ideal for energy absorption and are being used whenever shock forces occur.

The Advantages Of Using C-JAC shock absorbers Include:

1. To increase production rate
2. To extend machine life
3. To reduce maintenance cost
4. To reduce vibration and noise levels

SHOCK ABSORBERS

Operating Principles Of Shock Absorbers

All series of CJAC shock absorbers are of such construction as shown in the On impact the piston rod moves into the shock absorber and the hydraulic fluid is pushed into accumulator to produce resistant force. Owing to special spacing and sizing of orifices, the pressure in the inner tube remains constant throughout the entire impact stroke. By providing a linear deceleration, a CJAC shock absorber brings the impacting object to stop smoothly and quiet. At the end of the impact stroke, the return spring pushes the piston to its original position for next cycle.

SPEED CONTROLLER

The HR hydraulic speed controller can continuously and steadily control the moving speed of an object for a long time. The design of the product is carried out in a spring and pneumatic movement. In order to be appropriate for the use in various environments, an external dust cover is also designed to ensure the service life and stability of the product in addition to dust-proof devices inside the product. The HR series also uses special hydraulic oil so that it does not cause a rise in the propulsion speed due to the warming of the moving load. The product is small in size and easy to install, and has 0-30 scale of options to allow the user to adjust the speed of the controlled object.

PILOT CHECK VALVE

his device is designed to assist the restriction of PC series' pressure, and the ensure the safety circuit prevention as well as self-driven situation from happening after the stop of cylinder. The positioning of the sudden stop of cylinder is highly accurate. Special circuit design applications are developed for the PC series.

COGNEX CORPORATION

D1-856

COGNEX — the world's leading provider of vision systems, software, sensors, and industrial barcode readers used in manufacturing automation. Cognex vision helps companies improve product quality, eliminate production errors, lower manufacturing costs, and exceed consumer expectations for high quality products at an affordable price. Typical applications for machine vision include detecting defects, monitoring production lines, guiding assembly robots, and tracking, sorting and identifying parts.

THE IN-SIGHT 3800 VISION SYSTEM

This advanced AI-based vision system provides a powerful, yet easy-to-use, solution for automated inspections. Embedded with a full set of robust rule-based tools and innovative edge learning technology, In-Sight 3800 solves a wide range of manufacturing applications, from defect detection and assembly verification to character reading and more.

IN-SIGHT SNAPP VISION SENSOR

The In-Sight SnAPP vision sensor brings the power of machine vision to everyone. With guided setup and pre-trained AI, In-Sight SnAPP allows manufacturers to quickly and easily automate inspections, no experience needed. Leveraging innovative vision technologies, these user-friendly sensors solve a wide range of error-proofing tasks to improve quality control.

THE DATAMAN 280 BARCODE READER

The DataMan 280 fixed-mount barcode reader offers premium decoding technology, modularity, and performance monitoring for tough manufacturing code reading applications. With more speed and resolution than comparable mid-range models, DataMan 280 can speed up production by achieving the highest read rates on 1D and 2D codes, including label-based and direct part mark (DPM) codes.

EXHIBITING COMPANIES

CONNECT AUTOMATION

D2-9604

Connect Automation adalah brand local Indonesia yang diproduksi oleh PT. Environeer. Kami telah beroperasi sejak tahun 2006 di Surabaya dan memiliki kantor cabang di Jakarta (Cikarang). Kami spesialis membuat conveyor seperti belt conveyor, roller conveyor, modular conveyor, table top chain conveyor, safety guarding, cover mesin, meja assembly, platform kerja, dll. Kami memiliki workshop dengan mesin-mesin yang lengkap & berteknologi canggih serta tim yg profesional & kompeten di bidangnya.

Belt Conveyor & Roller Conveyor

Adalah produk Connect Automation yang paling banyak dibutuhkan hampir di semua lini industry. Conveyor belt & roller yang kita support pada umumnya digunakan di industry menengah ke ringan, seperti industry plastik, injection moulding, blow moulding, food & beverages, otomotif, dsb.

Modular Conveyor

Conveyor ini banyak digunakan di industri F&B (Food & Beverage) karena mudah dibersihkan dan tahan air dan di industri keperluan rumah tangga (FMCG = Fast Moving Consumer Goods) karena modular belt dapat diganti per modul sehingga meminimalisir down-time maintenance & perbaikan.

Table Top Chain Conveyor

Biasanya diaplikasikan pada proses filling, labelling, printing di industri beverage, farmasi, kosmetik, FMCG, cooking oil, dll terutama untuk transfer botol dari bahan kaca ataupun plastik, serta kemasan pouch secara rapi berjajar dan terus-menerus.

CORAL ANTI-POLLUTION SYSTEMS

C3-536

Coral Anti-Pollution Systems is a market leader for end-to-end industrial pollution abatement solution. Through our wide range of products and accessories, we offer bespoke solution for multi-industries including but not limited to metalworking, woodworking, food, aerospace, composite and automotive. Our manufacturing capability of producing filtering elements, filtering vessel and blower allow very tight quality control, for the benefit to your end-users.

IPERJET DF MAX

Horizontal cartridge filtering unit with fully automatic pulsejet cleaning and integrated blower. Ideal for fine dust like powders, welding smoke, laser cutting fumes etc/

AIRCOM ATEX

Sleeve filter baghouse with automatic pulsejet cleaning system. Available in ATEX (Explosion proof) configuration. Ideal for heavy industries like woodwork, cement, foundries etc.

CENTRIFUGAL BLOWER

Coral Blower are industry leading in terms of efficiency thanks to advanced manufacturing techniques. Available from highflow-low pressure to lowflow - high pressure, our fans suit many industrial applications.

CORTINA CHINA-SAFETY JOGGER

C3-7708

Safety jogger is a professional shoe brand under Cortina. Safety jogger brand, founded in 2000, is one of the fastest growing professional shoe brands all over the world, and its products sell well all over the world.

- Annual sales of the group: about 2 billion RMB Yuan, sales of professional shoe brand products: about 600 Million RMB Yuan
- Professional R & D, sales, quality control, warehousing, customer service and other teams

DAIFUKU INDONESIA, PT

B2-480

Since 1937, Daifuku has focused on material handling – the movement of finished goods and work in progress. Our world-class systems lead the industry by combining conveying, storage, sorting, picking and controls. Our products serve customers in a range of industries and countries. We provide total support ranging from consulting to after-sales service, and offer 24-hour support, remote monitoring of equipment operation and preventive maintenance services.

Automated Storage & Retrieval System (AS/RS)

High-density pallet storage, high-speed operation, and versatility make Daifuku's unit load AS/RS the best-selling automated storage and retrieval system in the world. With its flexible design up to 40 m, the Daifuku unit load automated warehouse is customizable to fit your specific installation environment environments and operating conditions.

Conveyors & Sorters

Daifuku's Surfing Sorter is a high speed, positive divert sorter designed to accurately track and gently sort all types of carton sizes and configurations at designated points along the transportation line with a highly reliable sort rate. A wide range of cartons, totes and materials are easily and conveniently transported to their assigned zones at high sortation speeds. Along with various peripheral conveyors and automation equipment to derive full advantage of the sorter capacity, Daifuku provides fast and reliable sortation solution for your logistics needs.

Picking Systems

From fully automated picking by robots to efficient manual picking using indicators, we offer picking, palletizing, and depalletizing solutions that are best suited to the logistics characteristics of each customer.

The company specializes in the production of its own brand end mills, drills, Registered Brand: KAI DIFO & YOU CI, and agent international brands: SANDVIK, PRAMET, DIJET, MITSUBISHI, SUMITOMO, MOLDINO, CHAIN,

END MILLS, DRILLS, INSERTS

SANDVIK, MITSUBISHI, SUMITOMO, ETC.

DONGGUAN JIMMY CNC TOOL CO.,LTD

D2-8926

Dongguan Jimmy CNC Cutting Tools Co., Ltd. was established in 2008, produces and sells high-quality precision carbide cutting tools, alloy steel precision CNC milling shanks, milling shanks, milling discs and other CNC milling tools. We adopt domestic and foreign high-quality primary materials to ensure stability, survive on quality and develop on reputation. High-quality products and meticulous after-sales service to win the recognition of many customers.

CUTTING TOOL

Selection of 0.2 m imported ultra-micro carbide materials, high-speed processing of high hardness material life longer. Higher surface finish when processing optical moulds, better wear resistance when processing high hardness materials. the smallest diameter can be done diameter 0.1MM.

CUTTING BLADE

Selected 0.4 m-0.6 m ultra-fine grain cemented carbide pressed, excellent wear resistance, strong versatility. Reasonable cutting edge design, sharp edge, with high rigidity structure, reduce milling resistance and improve impact resistance

NC TOOL SHANK

Excellent quality and cost-effective. Selection of high quality alloy steel, quenching hardness up to HRC56, good anti-vibration effect. High precision tolerance and quality control.

EXHIBITING COMPANIES

DONGGUAN YHD SUPPLY CHAIN MANAGEMENT CO.,LTD

A2-220B

Yiheda, A China automation components' supplier, was founded in 2010, specialized in research, development, production, and sales of automation parts, provides one-stop supply of FA parts. Our main products include drag chains, couplings, timing pulleys, linear bearings, and sliders and so on. Our company covers an area of 200,000m² for manufacturing, with 139 sets of CNC equipment, 29 sets of CNC lathes, 26 sets of turning and milling compound equipment, 8 sets of gear hobbing equipment, etc., in addition to a world class intelligent warehouse and logistic center, which have more than 900,000 SKUs available on stock ready to meet customers demand for highly efficient and speedy delivery.

DRAG CHAIN

Drag Chain, also named cable carriers are flexible hollow structures composed of links to help guide and protect cables, hoses, and hydraulic lines on equipment and machinery. Yiheda has a complete line of cable carrier assemblies for high-performance, with mass production capabilities.

COUPLING

Shaft coupling and universal joint is a high-performance mechanical transmission device designed to connect and transfer power between two shafts, making complex transmission systems more flexible and efficient. Whether it is in industrial machinery, automotive, aerospace, or other applications that require transmission devices, our shaft coupling and universal joint can provide you with reliable solutions.

TIMING PULLEY

Timing pulleys, typically made of materials such as steel, aluminum alloy, cast iron, brass, etc., feature inner bores available in various forms, such as circular holes, D-shaped holes, tapered holes, and more. The timing pulley transmission system consists of a closed-loop synchronous belt with equally spaced teeth on its inner circumference, paired with corresponding timing pulleys.

DSL INDONESIA, PT

D1-8535

DSL group is a company that active in the field of material handling since 1986 which has head office located in Thailand. DSL group has targeted to expand the network into asian market that is why on 1st February 2007 DSL group expand market coverage to Indonesia by establishing PT. DSL Indonesia.

With more than 30 years experience in Thailand, We are Hyster dealer forklift also provide top quality material handling accessories such as solid tires forklift, battery forklift brand Midac, Eikto

Hyster Forklift

HYSTER-Yale Materials Handling Group, Inc. established in 1929 by Ernest G. Swigert in Portland, Oregon, U.S.A.

Battery Midac

Established in 1990 and received ISO 9002 in 1997, ISO 9001 in 1999, ISO 9001:2000 in 2002. Manufacture the motive power batteries, automotive batteries and stand-by power batteries in Italy.

Battery Forklift Lithium

With annual capacity of 2 giga KWH, EIKTO is leading manufacturer of industrial Lithium battery EIKTO's world-class facility and cutting edge R&D center can ensure your product is carefully developed,manufactured and tested the mission is to power business with green energy Manufacture in China.

DURA-METAL (S) PTE LTD

A3-3306

Dura-Metal supply:

Surface coating systems: Twin Wire Arc Spray, HVOF, HVOF, Plasma Spray, Fusejet Powder Welding, Powder Flame Spray, Wire Flame Spray and VRC Cold Spray, Laser Cladding Systems and PTA machines.

Consumables: Powders for Thermal Spray and Cladding, Wires for Thermal Spray, Tungsten Carbide Composite Rods, Welding Rods, Wear Plates, Brazing Powders & Paste, Powders for Additive Manufacturing, Cutting Inserts for Downhole Tool Dressing, Masking Tapes and Sealants.

Durajet HV 3800

The DURAJET HV3800 Metalizing system melts metal powder by heat generated through combustion of fuel gas and oxygen. Metal powder is fed to a flame-spraying torch at a regulated speed which can be hand-held or motion- controlled to apply powder coatings to a clean grit-blasted surface.

Towing yang mampu menarik beban 1 - 3,5 ton

DUTAFLW HIDROLIK, PT

D1-8330

Dutaflow Hidrolik is established in 1995 and is now one of Indonesian Leading Multi-Line Distributors of high quality hydraulic components. Our Product are used in a wide range of applications, including industria, oil and gas, automotive, logistic, mobile machinery, marine, food & beverage, electronic, construction, agriculture, etc. Authorized distributor: Tokyo Keiki, Danfoss-Vickers, Eaton, Nacol, MP Filtri, Sun hydraulics, hydroeduc, Walvoil, Poclain, Bucher, Stauff, SAI, Aeroquip, Winner, Centaur, Delta

System Power Unit
Hydraulic Power Unit, Cylinder, Table Lifter, etc.

Accessories
Filter, Pressure gauge, Hose, Fitting, Pipe, Clamps Pipe, ect.

EFOREL CITRA UTAMA, PT

B1-4018

EFOREL is the one leader for Industrial Computer in Indonesia market with Advantech Products. Whether you are looking for assistance in completing an integration project, require in-depth expertise in building a system, or want to find a total solution. Established since 1994 we are the one company that focus for Industrial Computer in Indonesia will roll over side by side to catch up that best matches your business needs and expand the resources and knowledge in your specific area.

Desktop Compact Fanless PC MIC-7700
MIC-7700 is Industrial Fanless PC provides rugged design with maximum flexibility, enabling reliable edge computing solutions.

Industrial IoT Gateway ECU-1051
Industrial IoT Gateways are ARM-based robust platforms with wireless and Ethernet communication, and multiple protocol support such as Modbus/BACnet/101/104/DNP3/PLC/Azure/AWS

Industrial SCADA Software WebAccess/SCADA
WebAccess/SCADA is a 100% web-based SCADA system which not only acquires and stores data, but visualizes it with a HTML5-based intelligent dashboard.

EXHIBITING COMPANIES

EFRATA OPTIMA KAIROSINDO, PT

D1-8235

PT EFRATA OPTIMA KAIROSINDO is a distribution company specializing in finishing products, namely GEMA powder coating equipment from Switzerland, and also AABO - IDEAL finishing system manufacturer from Denmark.

GEMA

Gema Switzerland GmbH is a leading supplier in the area of electrostatic powder coating with a worldwide presence. From simple hand coating through to fully automated powder coating, this Swiss company offers solutions that meet the high demands and requirements of customers around the world in a wide range of industrial sectors. Since 2012, Gema has been a part of the global Graco Group, an internationally leading manufacturer of liquid conveyance systems and components.

AABO IDEAL

We develop, produce and sell high quality and customized turnkey solutions for surface treatment lines. Having industrial finishing systems as our expertise for more than 60 years makes us a key player in the market. When you need to work with a partner who can supply industrial surface treatment systems for powder coating, e-coat and wet paint at their very best, we will be your choice of reason.

3D Printing, 3D Scanning related products and services.

Meltio

Meltio offers disruptive yet hassle-free metal 3D printing solutions to all, yielding fully functional metal parts for industrial prototyping or end-use. Their mission is to delight customers, partners, and employees by pioneering the development of affordable metal additive manufacturing solutions that are reliable, safe and easy to use.

INSPIRA TECHNOLOGY

Inspira Technology proudly stands as the exclusive Indonesian 3D printer manufacturer, maintaining a high Domestic Component Level (TKDN). With a commitment to innovation and technology.

Our offerings start from entry-level models perfect for beginners and educational settings, designed to make 3D printing accessible to all. Moving up the spectrum, we offer solutions ideal for Education, SOHO (Small Office/Home Office) environments, enabling creative freedom and productivity. For more demanding applications, our Production/Manufacturing series delivers precision and reliability, enhancing efficiency in the production process. Catering to the most complex and specialized tasks, our Industrial and Professional series is designed to meet the rigorous standards of industry professionals.

Moreover, we also provide OEM services, offering customization and tailored solutions to align with your specific requirements.

Ultimaker

Ultimaker is world class Top 3D Printer Company. We have two 3D Printer series. First is UltiMaker S Series, The S series combines ease of use with versatility, making it possible for you to pick, click, and print from up to 280 materials to meet a wide range of requirements. The Second is The Method series, it's designed for the high-quality production of tools and end-use parts. Their actively heated build chambers, direct drive, and rigid metal frame make it easy to 3D print a specific range of engineering-grade materials with high repeatability and dimensional accuracy using 1.75 mm filament.

Eonmetall is one of the largest warehouse racking systems manufacturer in Malaysia, providing the finest quality of products to all of the customers. We are using the advantage of technology supplement with stringent quality control systems to ensure high production standard are met. We also provide ideal solution to optimize warehouse storage space for businesses across various industries and offers one-stop solution in achieving the best space utilization to make your business successful.

WAREHOUSE RACKING SYSTEM
Eonmetall offers warehouse racking system solution includes selective pallet racking system, double deep racking system, very narrow aisle racking system, superbloc platform, bolt-free shelving system, drive in & drive through racking system, etc to make your business operation successful and efficient. These ideal solutions were designed to enable you to maximize the storage space efficiency and improve the overall operation productivity in your businesses.

EXHIBITING COMPANIES

EPSON INDONESIA, PT

B2-4718

EPSON

As a global technology leader, Epson creates and delivers technology solutions for businesses and consumers, from inkjet printers and digital printing systems to 3LCD projectors, smart glasses, sensing systems and industrial robots. The company is focused on driving innovations and exceeding customer expectations in inkjet, visual communications, wearables and robotics.

Epson's spectroscopic camera

Epson's spectroscopic camera uses a unique spectroscopic device to resolve light from an inspected object into multiple wavelengths and obtain spectroscopic images of each wavelength. If there are scratches or deposits on the surface of a product, or if a surface coating is not properly distributed, the light scatters in the area where there is an irregularity, so the amount of light obtained in the image changes. The condition of the surface of a product can be checked by reading the scattering of light from any of the spectroscopy images. In addition, multiple spectroscopy images can be combined to precisely determine the color of a product. It is thus possible to inspect both the condition and color of the product surface with the capture of a single image, thereby reducing the number of steps in the production line and reducing costs.

Industrial Scara Robot T3

Outstanding Cost-efficiency and Ease of Use for Significantly Lower Total Operating Cost
T Series robots feature a built-in controller for space-saving configuration flexibility and easy setup. Configuration ease ensures high productivity with minimum downtime, significantly reducing total cost of ownership.

Industrial Scara Robot GX4

Upgraded performance and functionality for high speed and precision applications at a lower total operating cost.
G Series robots have added their class-leading speed, repeating and low residual vibration. With advanced features and functions, they can significantly boost productivity in a wide range of applications.

EQUITY SERVICES & SOLUTIONS CO.,LTD

D2-9130

1)V-MER is a machine vibration analyzer that we developed ourselves. We purposely created it to meet the world's needs in the industrial maintenance industry

2)UD-1d Ultrasonic measuring device for maintenance and energy saving, that covers the needs of the industry from Air/gas/steam/liquid leak Either there is an internal or external leak/electricity will be shorted or burned

3)The VIBRO-LASER shaft alignment laser system is designed for precise alignment of drive driven equipment (pump)

V-MER Vibration Analyzer

Can identify problems automatically

- 1.Indicates vibration conditions according to ISO-10816-3 standards.
- 2.Point out the condition of the ball bearings (rolls bearing)
- 3.Indicates the condition of vibration caused by unbalance
- Indicates the condition of vibration caused by shaft misalignment (misalignment)

UD-1d Ultrasonic leak detector

Detect Ultrasonic 22-500kHz

- 1.Air leak
- 2.,Water leak
- 3.Gas leak
- 4.Liquid leak
- 5.Steam trap leak
- 6.Electric partial discharge
- 7.Bearing heat/early warning

Vibro Laser shaft alignment

Features of the laser

1. Accuracy ± 1 micron
2. Alignment can be 10 meters away.
3. Can be used on all 3 systems: Windows, Android, iOS.
4. Make a report by instructing the printer to print it.
5. Unlimited storage with 64GB memory.
6. 3 year warranty
7. V-Starter Basic Smart Vibration Analyzer (Option)

EXINERGY INDONESIA

D1-8017

PT. Exinergy Indonesia was established with the vision to become a leader in Industrial Solutions Provider. Our goal is to work together with our customer to increase productivity and efficiency by utilizing the latest innovation and technology.

Our intensive experience in various industries and supported by world's leading manufacturer in their field, PT. Exinergy Indonesia is ready to provide the best solutions, support and services to our customer.

IPC SG-30 STEAM GENERATOR

SG-30 is a portable steam cleaner. Designed for professionals and cleaning operators, it is handy, versatile and easy to use. IPC recommends the use of this steam cleaning machine in hotels, gyms and restaurants.

RGS A236 FOOD & PHARMA INDUSTRIAL VACUUM CLEANER

Real mobile vacuums with powers ranging of 1,5kW and capacities of 25lt, suitable for sucking substantial quantities of product from process machines, but also used at the end of the work shift for general cleaning of the working area.

This model is also available with a full range of options of easy installation to make the vacuum particularly suitable in the pharmaceutical world.

ISG PACK ECO TAPE 50

The Eco Tape 50 TBB is a semi-automatic "entry level" carton sealer with manual dimensioning, which seals with the self-adhesive tape the lower and upper part of fixed size American type boxes

EXXONMOBIL LUBRICANTS INDONESIA

B1-4431

ExxonMobil Lubricants Indonesia provide the industrial lubricants trusted by worldwide equipment builders and we can help you find which is right for your specific equipment. With more than 150 years of expertise in industrial lubrication, Mobil™ has the lubrication expertise and know-how to keep your operation running smoothly.

Mobil DTE™ 20 Ultra Series

Mobil DTE 20 Ultra series oils are high performance anti-wear hydraulic oils with extended oil life capabilities and have demonstrated up to 2 times longer oil drain intervals versus similar competitive oils

Mobilgear 600 XP Series

Mobilgear 600 XP Series are extra high performance gear oils having outstanding extreme pressure characteristics and load-carrying properties, intended for use in all types of enclosed gear drives with circulation or splash lubrication systems.

EXHIBITING COMPANIES

FANGLI HOLDINGS CO.,LTD.

D2-8917

Fangli Holdings Co.,Ltd. is a leading enterprise integrating research and development,manufacturing and marketing.FANGLI specialized in large,medium and small sized alternating current motors,including general purpose motors,high voltage motors,explosion-proof motors and aluminim motors. High/low voltage,IE1-IE5,extensive selection for customers' diffirenet applications. For more about FANGLI,welcome to visit at www.cnfangli.com.

FL3 (IE3) General Use Motor

FL3 series three phase asynchronous motor is a kind of totally enclosed fan-cooled squirrel-cage induction motor. The efficiency class is in accordance with IEC 60034-30 IE3 efficiency standard.

FL3 series motors have a lot of futures such as excellent performance, low noise and vibration, high reliability, easy operation and etc. Moreover, FL3 series motors have the same dimensions and output power with IE1/IE2/IE4/IE5 series, which follows IEC60072-1, therefore FL3 series could replace all IEC standard motors directly. Motors could be equipped with oil changing device without stopping, and reserved the space of thermistor and heater for end users.

FLA2 Aluminium Housing Motor

FLA2 series aluminium housing three phase asynchronous motors are developed from cast iron housing three phase asynchronous motors, since aluminium-alloy material has been introduced into its housing, end shield, terminal box and removable feet. Motor has wonderful appearance and smooth surface. Despite that, dimensions and output power of FLA/FLF/FLG series aluminium housing motors are the same as those of IE2/IE1 series three phase asynchronous motors.

FLA2/FLF2/FLG2 series aluminium housing motors have lots of futures such as high efficiency and energy saving, large starting torque, excellent performance, low noise and vibration, compact structure, high reliability, easy operation and etc.

Operating conditions of FLA/FLF/FLG series aluminium housing motors have efficiency class according to IEC60034-30, simultaneously, we supply IE3/IE2/IE1 series aluminium housing motors in conformity with IEC standard for customers.

YBX3 (IE3) Flameproof Motor

YBX3 series premium efficiency flameproof three phase asynchronous motor is totally enclosed, self-fan cooling, squirrel cage type. The efficiency class is in accordance with IEC60034-30 IE3 efficiency standard. It has high operational safety, excellent performance, low noise and vibration and meets the need of environment protection.

YBX3 series motor could marked as ExdIAT4/BT4 Mb, ExdIIAT4/BT4/CT4 Gb. ExdIAT4/BT4 Mb are applied in the non-excavation working condition and coal mine with methane or coal dust, ExdIIAT4/BT4/CT4 Gb are applied in the condition of explosion-proof gas compound with Factory II type, Grade A & B & C, temperature T1, T2, T3, T4 and T5.

FATEK AUTOMATION CORPORATION

B1-410

FATEK

FATEK was established in 1992 in Taiwan. Striving for R&D in order to provide high-quality, high-function and user-friendly automatic control products. The product line focuses on PLC, Motion, HMI, Servo, IoT solutions, SCADA software, etc. With our endeavors for decades, we are now well-recognized in the industry for high quality and reliability. FATEK engages in innovation to expand a broader application field, striving to becoming a professional, reliable and holistic solution provider.

M Series PLC

FATEK's latest medium-sized PLC, the M PLC, boasts industry-leading 0.8ns/LD CPU processing speed. With expandable DIO up to 2048 and built-in 16-axis EtherCAT motion control, it supports advanced features like synchronous control and electronic cam, making it ideal for diverse applications such as flying shear and rotary knife.

P/U Series HMI

FATEK HMI supports hundreds of PLC drivers, OPC UA, SQL database and MQTT, and can be easily connected and integrated with various devices and platforms. The dedicated editing software FvDesigner has built-in rich graphics files, and supports complete functions such as Script, Recipe, Alarm, Data log, Security, etc., which can easily meet various automation control needs.

SC3 Series Servo

Based on the EtherCAT communication, the FATEK servo products have the fastest synchronization cycle of 125us, which meets the requirements of high-speed and high-precision control. Providing complete power options from 100W to 7.5KW, and supports up to 23bit encoders to ensure that various control needs are met.

FILTRAS INDONESIA, PT

C3-6916

PT FILTRAS INDONESIA IS A COMPANY MANUFACTURING BAG FILTER, RETAINER CAGE, FILTER CLOTH, FABRICATION UNIT BAG HOUSE AND DUST COLLECTOR THE BIGGEST IN INDONESIA, OUR CUSTOMERS ARE NOT ONLY IN INDONESIA, WE ALSO SERVE CUSTOMERS FROM OUTSIDE INDONESIA

BAG FILTER

alat untuk memisahkan partikel kering dari gas (udara) pembawanya. Di dalam bag filter, aliran gas yang kotor akan partikel masuk ke dalam beberapa longsongan filter (disebut juga kantong atau cloth bag) yang berjajar secara paralel, dan meninggalkan debu pada filter tersebut

RETAINER

Retainer Cage is a support framework for filter bags to hold blower suction, or FILTER BAG DUST COLLECTOR support components so that they stay in shape.

BAG HOUSE UNIT

Baghouse is a type of air pollution control equipment used in factories, warehouses and other industrial or commercial areas to meet environmental and workplace safety requirements.

Medium Cut Safety Shoes with Original Leather for Upper Material. Protect with best quality Steel Toe and Oil Resistant Outsole. Combined with lace to add more firm protection
Other optional feature :
Anti Puncture with high quality steel plate embed in the outsole

Garuda Safety Shoes - GRD 201
Medium Cut Safety Shoes with Original Leather for Upper Material. Protect with best quality Steel Toe and Oil Resistant Outsole. Combined with lace to add more firm protection
Other optional feature :
Anti Puncture with high quality steel plate embed in the outsole

EXHIBITING COMPANIES

GATEWAY CONTAINER LINE INDONESIA, PT

C3-6625

Gateway Container Line Group originated in Bangkok Thailand in 1997 with its first office and original name of Gateway Logistics. With great demand in Consolidation in both Seafreight and Airfreight, a group of professional joined to create a network that is highly responsible and skillful. The group was officially formed on 2007.

Gateway Container line Indonesia was born on September 2009 to answer a logistics demand in the business. We are young, but with our youngness we will more aggressiv

SEA FREIGHT

Sea freight is a method of transporting large quantities of product via cargo ships; goods are packed into containers and these containers are loaded onto a vessel, where they will be sailed to their destination country.

- Export
- Import
- Consolidation
 - oDirect Console Export
 - oDirect Console Import
 - oTranshipment
 - Via Singapore
 - Via Hongkong
 - Via Colombo
 - Via Middle East
 - Via Europe
- FCL and LCL
- Project and Chartered Vessel Arrangement
- NVOCC (Non Vessel Operating Common Carrier)
- Alliances with major Shipping Lines

AIR FREIGHT

Air freight transportation is a fast and efficient shipping method that is particularly valuable to businesses needing to get products to international customers quickly or stay on track with a just-in-time manufacturing model.

- Export
- Import
- Door to door services
- Direct consolidation services
- Alliance with carriers
- Operators of charter flights
- Specialized handling and security
- Special handing for :
 - oPerishables
 - oDangerous Goods Cargo
 - oEnvirotainer

DOMESTICS AND PROJECT

Project cargo is a term used to broadly describe the national or international transportation of large, heavy, high value or a critical (to the project they are intended for) pieces of equipment. Also commonly referred to as Heavy lift, this includes shipments made of various components which need disassembly for shipment and reassembly after delivery. Project cargo is also a term used in the international insurance industry to describe DSU (Delay in Start Up) Marine Insurance, a specialized form of Marine cargo insurance.

EXHIBITING COMPANIES

GIKOKO KOGYO INDONESIA ,PT

D2-9113

PT Gikoko Kogyo Indonesia is a versatile engineering and manufacturing company specializing in design, installation, and after-sales services. Our primary products encompass Fan Blowers, Dust Collector Systems, Absorption Chillers utilizing waste, high-efficiency Boilers, and cutting-edge Energy Saving technologies.

Fan Blowers

Gikoko Taniyama Fan Blower, Axial Fan, Centrifugal Fan, Limit Load Fan

Dust Collector System

Dust Collector by design specification.

High Efficiency Boiler

Kawasaki High Efficiency Boiler from 3 Tph - 6 Tph

GISAN MAKINE SAN. VE TIC. LTD. STI.

B2-4711

Gisan was found in 1992 and has been manufacturing air operated diaphragm pumps, electromechanical diaphragm pumps, piston pumps and high pressure pumps since 2001 with RAN brand. After years in, Gisan has become the unique company in the world thanks to its completed all product range with its original design. Having being leader in local market and subsequently exporting more than 40 countries, Gisan has established a sales and service office in Indonesia.

Electro-Mechanical Double Diaphragm Pump

These electromechanical diaphragm pumps respond to our customers demand for a pump with a unique design concept augmented by low energy consumption. Thanks to the advanced technology and ongoing research and development, the quality of the RAN EM series has increased rapidly over the past number of years.

1" Air operated double diaphragm pump (Alum.)

Air operated diaphragm pumps are used for a variety of purposes in many areas of the AIR PUMPS industry. Pumps used by connecting a compressor in the appropriate capacity to the pump size are also preferred due to their being non-explosive (ex-proof). Gisan has awarded the Ran Brand to the Air Duct Pump market.

GLOBAL DIGITAL FORM, PT

D1-8619

TWA 3D's Technology and service, an authorized distributor for Creaform in Indonesia, providing high quality and cost effective technology which are ideal for any company and individual in the manufacture or design of physical products using 3D Technology (Rapid prototyping, reverse engineering and metrology inspection).

Our solution can be typically found in sectors such as aerospace, automotive, manufacturing, heavy industries, health care, oil & gas, power generator, education, etc.

HandySCAN 3D|BLACK Series

Metrology-grade portable 3D scanners HandySCAN 3D|BLACK Series is the fastest portable metrology-grade 3D laser scanner on the market, offering the highest measurement rate and accuracy available. It's ideal for product development and quality control.

MetraSCAN 3D

Optical CMM 3D scanners and probe The most complete 3D scanners for metrology-grade measurements on all materials, MetraSCAN 3D is a powerful inspection solution that is insensitive to instabilities and harsh environments.

HandyPROBE

The HandyProbe line-up is a portable optical CMM specifically designed for use on the shop floor.

This is only small sample of hundreds of new product which will be on display at the show. It's based on information provided by exhibitors as of November 4th, 2023. NOTE: this list is NOT comprehensive. The layout of this buyer's guide is at the full discretion of the organiser.

EXHIBITING COMPANIES

GOODWAY RUBBER INDUSTRIAL CO., LTD.

B2-4621

Goodway Rubber industrial Company Limited, established in 1986, is a professional manufacturer engaged in the development, production, sale and service of industrial moulded rubber parts such as Suction Cups, Connector Seals, Butterfly Valves, Grommets, No hub Pipe Coupling, O-rings & O-ring Kits, Hydraulic Seals and rubber bonding with the iron parts such as engine bushes for cars, motors, shaft seals, and hub seals, especially focus on "Bonded Seal" and Customized Molded Rubber Parts.

Bonded Seals

A bonded seal is a type of washer that consists of rubber and metal and it can be used to provide a seal around a screw or bolt.

GORBEL (TIANJIN) CRANE CO., LTD

B1-4129

G-Force Ergonomic lifting device

GRAHA MULTISARANA MESINDO, PT

B3-557

A leading company that provides your needs in every industry and service segment. Our products range from cutting tools, cleaning equipment, hand and power tools, protective equipment, spill kits, surveillance, and modern technology solutions such as solar power systems, access control, and many others. Discuss your needs with us, and all your problems will be resolved.

KLEENGUARD Protective Equipments
Brands you trust for the work you do.

WYPALL & KIMTECH Wipers
Keep workers productive with the right wiping solution.

DEVALL Spill Kits
The best solution for treating hazardous spills is not harming workers and the environment.

GREAT DYNAMIC INDONESIA, PT

B3-5503

Great Dynamic Indonesia proudly serves as the exclusive representative for Bodor's Laser Cutting Machine. Bodor's Laser Cutting Machines stand as a testament to quality and innovation. Experience the future of manufacturing with machines that exceed expectations, complemented by our unwavering commitment to unparalleled customer satisfaction.

P Series Fiber Laser Cutting Machine

Presenting the Bodor's P Series Fiber Laser Cutting Machine—an epitome of precision and sophistication in manufacturing. Boasting an impressive laser power spectrum ranging from 1.5kW to a commanding 60kW, this vast range empowers precision at every level, setting a new industry standard for versatility and capability. Whether your demands are intricate or colossal, Bodor delivers excellence. Its unparalleled precision caters to industries as diverse as aerospace and automotive, offering unrivalled efficiency and cost-effectiveness.

T Series Tube Laser Cutting Machine

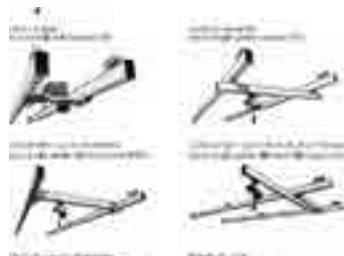

Unveil the epitome of precision with Bodor's Tube Laser Cutting Machine. Meticulously designed and engineered, it redefines tube and profile cutting, transcending industry standards. Ideal for automotive, construction, and diverse sectors, it sets a new benchmark in manufacturing excellence.

GREEN PLUS INDONESIA, PT

B3-5025

GREEN PLUS is a material handling specialist company. Our company sell of heavy load handling equipments our produk is EEPOS Rail System , Lifts All , Fezer

EePOS

Ergonomic working with the most smooth running aluminium rail system on the market

Fezer

The name FEZER stands for the interaction of efficient high-quality products with extraordinary services and competent, cooperative advisory service. Our products are designed for the multiple needs and requests of our customers.

Lifts All

Our focus has always been on ergonomics – it is the red thread through our product design and developments

EXHIBITING COMPANIES

GTG DIAMOND CO., LTD

D1-8425

GTG DIAMOND CO.,LTD has been supplying Diamond & CBN Grinding wheel to many industries for 30 years.

We have a lot of experience in many industries and We will help you succeed in your business.

GTG DIAMOND CO.,LTD have automated process systems for stable quality and We supply our customers with a differentiated bond system. We are always doing our best to satisfy our customers.

We have been committed to customer satisfaction. (For POSCO & Hyundai Steel)

RESIN BOND WHEEL

Resin bond is thermosetting material made of phenolic resin.

Sine resin bond has excellent grinding abilities, surface roughness and Minimal chipping,

It is widely used for various materials including difficult-to-machine materials such as ultra light steel. alloys, Ceramic, glass and silicon and steel materials including high-speed steel and sintered ferrous metal alloys.

METAL BOND WHEEL

Metallic bonds are formed from compound of various metal powders such as Cobalt, Copper, Brass, Iron, Silver and so on. Metal bond has excellent grit retention and wear resistance.

ELECTROPLATED WHEEL

The electroplated wheel's surface is coated with nickel. Electroplate wheels consist of a single layer of diamond & CBN which have been bonded to the wheel surface in a nickel.

GUANGDONG GONGYOU LIFT SLINGS MACHINERY CO., LTD

D2-9223

Guangdong Gongyou Lift Slings Machinery Co.,Ltd was established in the beginning of 1995. We are located in Nanhai District Foshan City, Guangdong Province. We primarily engaged in the production of various lifting products. We have 3 factories , hand pallet truck & stacker factory, chain hoist & lever hoist factory and webbing slings & ratch strap factory.

Now our products have been exported to more than 60 countries. Our brand WORKMATES was accepted by most of our customers.

PALLET TRUCK AND STACKER

WEBBING SLING

CHAIN BLOCK

GUANGDONG HANDE PRECISION MACHINERY CO.,LTD.

D2-8929

Guangdong Hande Precision Machinery Co., Ltd. is a high-tech enterprise specializing in R&D production and sales of air compressors, it focuses on the energy-saving air compressors such as double-stage compression air compressor and permanent magnet variable frequency air compressor. The company owns a 50,000 square meters modern assembly factory equipped with advanced automation processing equipment. In order to expand business in China, the company has set up branches in Cuanadona Dongguan, Cuanado

Screw air compressor

Two-stage compression reduces the compression ratio of each stage, reduces internal leakage, improves volumetric efficiency, reduces bearing load and increases the life of rotors. 2. Using two-stage compression rather than single one, the increase of air output volume can be 15%, means 15% energy saving. 3. The rotor adopts the newly design, has been through more than 20 processes of finishing, to ensure the accuracy, reliability and effectiveness of the rotor profile. 4. The two-stage compression is more efficient and energy saving, has been through saving energy as much as 35% comparing with ordinary constant frequency machine.

Screw air compressor

Constant frequency air compressor adopts industry leading screw air end, high efficiency and low rotating speed. Adopts the third generation tooth type of rotor, cutting edge geometric design, stable, reliable, energy saving and long service life. Adopts unique low-speed motor, high stability, 3-5% more efficient than similar product. Direct connection structure with 100% transmission efficiency without any loss, low maintenance cost, easy disassembly, greatly reduces downtime. The coaxial integrated structure reduces the use of quick-wear parts, owns 100% transmission efficiency. Low speed fan is used for long life. The cooler and fan can be dismantled separately. It can work in ambient temperature of 50°C. It is equipped with intelligent control system to ensure automatic and intelligent operation and it detects output air pressure and temperature etc. The intake valve controls the output air pressure within a narrow range for a stable output air pressure.

EXHIBITING COMPANIES

GUANGZHOU FANCHU LUBRICANT TECHNOLOGY CO.,LTD

A1-128

FanChu Lubricant Technology Co,Ltd was established in July 2005,covers an area of 20000 square meters. We are certified by ISO-9001,ISO-14001, ISO-45001,SGS and ROHS. FanChu Lube is the member of STLE, and also one of the standing directors of China Surface Engineering Association.In addition,we have cooperated with universities to set up enterprise technology center and practice bases.Mainly engaged in cutting fluid, anti-rust oil, demoulding agent and other products.

S43 Micro-Emulsion EP Cutting Fluid

S43 has excellent lubricity, anti-rust, cooling and EP properties. S43is formulated with high-effective corrosion inhibitor additive, lubricants, EP additives andso on. S43 has good bio-stability to ensure long service life. S43 is suitable for CNC machine center, multi-purpose combined tool machine and centralized cooling system. S43 is suitable for the operations such as turning, drilling and CNC machine center for the material of ferrous metal, copper and aluminum.

S74 ULTRA-THIN ANTI-RUST OIL

S74 is a volatile soft film anti-rust oil. This product has low odor,good water displacement, and good isolation effect on salt spray. After the anti-rust oil evaporates, it leaves a thin oil film on the metal surface, which has excellent anti-rust ability. It is suitable for rust prevention during the processing of steel parts and other processes, and it is also suitable for rust prevention in the storage of various metal products. Indoor rust protection lasts up to 12 months.

S45 Long-Life General Semi-synthetic coolant

is a volatile soft film anti-rust oil. This product has low odor, good water displacement, and good isolation effect on salt spray. After the anti-rust oil evaporates, it leaves a thin oil film on the metal surface, which has excellent anti-rust ability. It is suitable for rust prevention during the processing of steel parts and other processes, and it is also suitable for rust prevention in the storage of various metal products. Indoor rust protection lasts up to 12 months.

GUANGZHOU HEDA SHELVES CO.,LTD.

A3-3207

Guangzhou HEDA Shelves Co., Ltd., established in 2001, is a professional company specializing in designing, manufacturing, selling and installing all types of storage racks, display shelves, and all types of supermarket equipment. Our products have gained great credit from our clients with excellent quality, scientific designs, delicate workmanship, reasonable price, and considerate services.Quality and service is our culture!

Hardware tool display stand

Warehouse Equipment (light-duty shelves like storage shelves for home, medium-size shelves, heavy-duty shelves, mezzanine floors for warehouse/workplace and storage pallets

Supermarket shelf

Retail Store Fixtures (single sided gondolas/wall display shelves, double sided gondola shelves/island gondolas, promotion carts, shopping trolleys, shopping baskets and checkout counters

Hardware tool display stand

Metal Displays Racks (like slatwall display and pegboard display racks) for branding and trade shows, hardware tool displays etc.

GUANGZHOU KAILING BEARING., CO.LTD

B3-5311

Guangzhou Kailing Bearing Co., Ltd have 30 years of sales experience and 20 years of production experience. We source the bearings and provide all services for you in China. We are a company approved by the Chinese government for foreign trade.We have two factories, one in Shandong production base and one in Zhejiang production base. There are also dozens of brother factories. Our products range from low-end to high-end. If you cooperate with us, you will find the products you need.

PILLOW BLOCK BEARING

Cast iron block bearings are a type of bearing that use a cast iron housing or block to support the shaft and rotate with it. These bearings are commonly used in heavy-duty industrial applications, such as construction equipment, mining machinery, and agricultural machinery.

Cast iron block bearings, also known as pillow block bearings, are a type of mounted bearing that is commonly used in industrial applications. These bearings consist of a cast iron housing or block that is designed to support a rotating shaft. The housing contains an insert bearing, which is typically a ball bearing or a roller bearing.

DEEP GROOVE BALL BEARING

A deep groove ball bearing is a type of rolling-element bearing that is designed to support radial and axial loads. It consists of an inner race, an outer race, a cage, and a series of balls that are placed between the races. The balls are usually made of steel or ceramic and are held in place by the cage.

Deep groove ball bearings can be used in gearboxes, instruments, motors, household appliances, internal combustion engines, transportation vehicles, agricultural machinery, construction machinery, construction machinery, roller skates, yo-yo, etc.

EXHIBITING COMPANIES

HAI ROBOTICS

B1-4117

HAI ROBOTICS

Established in 2016, Hai Robotics is committed to gathering global talents to push forward the progress of human civilization using robotics technology. Its goal is to empower every warehouse and factory with logistics robots. The HaiPick solution is the world's first autonomous case-handling robot (ACR) system

HaiPick A42 Multi-Layer ACR

The A42-series offers picking and storage of cases up to a height of 5.2m (17.1 feet). The series consists of four models which handle a wide range of case dimensions and types. Compatible plastic tote and carton box in different sizes.

HANG ZHOU JNENTAN MACHINERY CO LTD

D2-9230

Hangzhou JenTan Machinery Co., Ltd., is a focus on the production of high-end lifting hoists and various sling products of the enterprise, the production base is located in China's canal capital Jiangsu Huai'an Industrial Park, the factory covers a total area of 200 acres, a total investment of 500 million yuan, the products are exported to more than 100 countries and regions.

Manual Chain Hoist
Manual chain hoist with forged alloy steel hooks, the cover is thickened and added a raised carving which protect internal structure effectively. Patented overload production is optional.

Manual chain hoist
This is classic hoist which is hot-selling for many years, with competitive prices, customers like it very much.

Lever Hoist
A updated new lever hoist, with light weight and better performance.

HANGZHOU UPWOOD HARDWARE&TOOLS CO.,LTD.

C3-6720

UPWOOD TOOLS is committed to providing a variety of pneumatic tools and related abrasives. We have an industrial grade product line specifically designed for factory use and a cost-effective product line suitable for assembly, repair, and personal use. Our advantage is to provide cost-effective products and high-quality services.

Air tools
The product line includes pneumatic sanders, grinders, drills, screwdrivers, rivet tool, rivet nut tool, air nailers, air chisels&hammers, AODD pumps, air mixers, etc. Most categories have two product lines: industrial grade and cost-effective.

Abrasives
Provide various high-quality abrasives.

EXHIBITING COMPANIES

HANGZHOU VISION INDUSTRIAL CO.,LTD

B1-4227

Hangzhou Vision Chain Transmission Co., Ltd. was established in 2004 and is an manufacturing enterprise that integrates research and development, manufacturing, marketing, and service. We have successfully passed ISO and SGS certifications. We have always been customer-oriented, providing efficient services and high quality products. Our mainly produces various specifications of Driving Chains, Conveyor Chains, Agricultural Chains, Engineering Chains, Leaf Chains, and Non-standard Chains.

Chain
Driving Chains, Conveyor Chains, Agricultural Chains, Engineering Chains, Leaf Chains, and Non-standard Chains

Engineering Chains

Conveyor Chains

HANSUNG TECH CO., LTD

D2-8820

Hansung Tech specializes in producing and exporting oil seal, o-ring, and cylinder packing from 1978. Then we have grown into a leading company in the domestic sealing industry. We have achieved the highest market share in the domestic MRO market. We are supplying non-inspection products to leading steel manufacturers in Korea. With more than 57,000 molds, we can reduce the burden of mold costs and guarantee fast delivery. In addition, special and large seals can be customized to meet customer.

OIL SEAL
Oil seals are used to protect shafts and bearings from ingress of dirt and foreign matter and egress of oil or grease.

O-RING
The O ring is a seal that is ring-shaped with a round cross-section. They are basically rubber rings used as seals. O-rings are among the most widely used seals in machinery and equipment, as they are cheap, easy to produce, reliable and easy to fit.

Cylinder Packing
Cylinder Packing is a term for sealing devices that are mounted on the moving parts of hydraulic, pneumatic, and water-pressure equipment, specifically reciprocating motion

HANYOUNG ELECTRONIC INDONESIA

B2-4518

PT. Hanyoung Electronic Indonesia is a company operating in the automation industry. We have been established since 1972 until now. We provide temperature controllers, measuring instruments, timers, counters, Panel meters and Proximity sensors required in the automation industry. Our products are used in various industries to produce the latest technology and become the largest and international class electronics company and create innovative products and designs, quality & competitive prices.

Temperatur
Temperature is a tool used to control hot or cold temperatures and can also measure humidity

Control Switch
Control Switch is a tool that is used to turn off and turn on (ON / OFF) a machine

Timer
Timer is a tool to control the time/hour that can be set according to our needs.

COUPLINGS

we can supply hydraulic fittings, air hose coupling, camlock, clamps, many coupling types

HEBEI YUYING HOISTING MACHINE PRODUCE CO.,LTD.

C3-7820

We are a company specializing in the production of sprockets, levers, electric hoists, pulleys, pulleys, small cars, and other products. We have more than 30 sets of professional equipment, more than 30 sets of the most advanced roller chain production line, and complete physical and chemical testing methods. Our annual output is 200000 units. Relying on a first-class management and technical team, the company has passed the CE system certification.

CHAIN BLOCK

TOYO Toyo chain hoist is a simple to use and portable manual lifting machinery suitable for factories, mines, construction sites, agricultural production, as well as docks, docks, warehouses, etc.

LEVER BLOCK

The HSH type chain hoist series mainly has tonnage of 0.75T-6T, 0.75T, 3T, 6T, etc. It has a reasonable design, advanced structure, high body strength, safe and reliable use, and convenient maintenanc

ELECTRIC HOIST

Ghost head electric chain block is one of the commonly used lifting equipment in factories, mines, ports, warehouses, freight yards, shops, and other areas. It is a machinery that improves labor efficient

EXHIBITING COMPANIES

HEIWA TECHNICA CO., LTD.

D2-9117E

HEIWA TECHNICA

HEIWA TECHNICA CO., LTD. specializes in manufacturing precision cutting machines, including "FINECUT," and abrasive precision cutting wheels like "NASTON" and "NASTON GOLD." These products, the result of an integrated production system, cater to various user needs from research and development to quality control. Precision cutting involves using a high-speed spinning cutting wheel with hard abrasive particles to grind materials without causing damage, resulting in finely finished surfaces.

Cutting Machine HS-100G2

The FineCut HS-100G2 type is a table-moving, automatic precision cutting machine designed for a spacious workspace that can accommodate various optional systems and excels in cutting hard and brittle materials that are difficult to machine. (Standard cutting capacity: 45mm)

Cutting Machine SS-31W

The SS-31W is a small and lightweight machine with a wide range of applications, making it extremely easy to operate. It is a precision cutting machine that is very convenient for cutting long materials or sheets. (Standard cutting capacity: 20mm)

Cutting Wheel

Cutting with a resin-bonded wheel, due to the use of extremely hard particles for grinding, enables cutting not only of regular metal materials but also difficult-to-machine materials such as hardened steel, ceramics, carbides, and more. Furthermore, cutting thin, reinforced, disk-shaped cutting wheels with a thickness of less than 1mm at high-speed rotation in a wet environment results in very small chips, leading to greatly enhanced surface smoothness and dimensional precision, enabling high-speed cutting.

HENAN QUANXIANG INDUSTRIAL CO., LTD.

C3-6719

Henan Quanxiang Industrial Co., Ltd. (ALF for short) is the Top-rank professional Manufacturer in China, engaging in manufacturing high-quality plastic fasteners, wire management devices and custom components.

ALF main products cover Nylon Cable Ties (PA66), Stainless Steel Cable Ties (SS-304,316), Cable Ties Accessories and Corrugated Conduits. ALF has passed ISO9001, ISO14001, ISO45001 certification and products are approved by UL, CE, RoHS, REACH, IATF16949 and etc.

Nylon Cable Ties

ALF specializes in producing Nylon Cable Ties, including Cable Ties for General Purpose, Mountable Head Ties, Releasable Ties, Marker Ties, Extra Heavy Duty Dies, Push Mount Ties, Double Loop Ties, Coloured Cable Ties and so on. Special materials, like weather resistant, cold resistant, heat resistant, UL94-V0, can also be provided. ALF Cable Ties have been certified to UL, Reach, RoHS, Halogen, UV resistant, IATF-16949, and ALF factory is BSCI approved.

Cable Tie Mounts

ALF specializes in producing Cable Tie Mounts, including Self-adhesive Cable Tie Mounts, Saddle Tie Mounts, Cable Tie Holders, R-clamps and etc. ALF extensive line of cable tie accessories will make your job a whole lot easier, regardless of the project or application. Cable Tie Mounts can save time by keeping the cable tie head from sliding down (vertical applications) and maintains its placement during horizontal applications.

EXHIBITING COMPANIES

HENANSHENG YONGMO TECHNOLOGY CO.,LTD.

C3-7711

Founded in 2018, It is a non-state-owned profit-making organization integrating design, research and development, manufacturing, sales and service of grinding wheel products in the abrasives industry. Its own abrasive tools brands "Yongmo", "Jinshihang", "Shihang", "Yuenuo" and other cutting, grinding and polishing series products (cutting discs/ grinding discs/abrasive wheels).

CUTTING WHEEL

Cut-off wheel for steel and stainless steel (INOX) with high cutting performance and long tool life

GRINDING WHEEL

Depressed center grinding wheels are ideal for heavy grinding and weld removal. Grinding wheels perform best in heavy-duty grinding applications where durability and product life are important. Long lasting, high performance grinding wheels, Wheels are fiberglass reinforced for added safety

FLAP DISC

The flap disc stands out due to its aggressive stock removal rate and excellent tool life while achieving the highest level of efficiency. It is the best conventional flap disc for steel.

HENGTRACO PROTECSINDO, PT

C3-6702

HENGTRACO established in 1986. We started our business in Pertokoan Glodok Jaya and at the first we were moving in the Technical Equipment. With our partner agencies such as YAMADA Lubricating Equipment, OPK Hand Lifting Equipment. Then in 2000 sets up PT HENGTRACO PROTECSINDO division for Safety Equipment. Over time the demand for Safety Equipment for domestic market is increasing, so to respond this following challenge we started to produce our own safety shoe brands Mighty Aces and Westco

A quality welding machine, newest technology adopted for welding satisfaction experiences. Good design, easy to use and value for money.

AP Sanjia Lifting Machines
Trusted quality of lifting products. Provided an quality Electric Chain hoist, Electric Winch, Chain Block, Minihoist and parts.

AP Welding Cable
High quality of welding cable, 100% copper cable, pvc insulated for durability usage. Also provide Aluminium Welding Cable with Copper coated. Suita for welding machines and general used.

HIOKI

B2-446

HIOKI adalah perusahaan teknologi terkemuka yang berfokus pada pengembangan peralatan pengukuran dan tes elektronik. HIOKI Indonesia (PT. Hioki Electric Indonesia) berdiri di Indonesia sebagai anak perusahaan dari Hioki E.E. Corporation Jepang, perusahaan ini telah menjadi pionir dalam industri pengukuran sejak lebih dari 80 tahun yang lalu. HIOKI menghadirkan beragam produk inovatif yang digunakan di berbagai sektor, termasuk elektronik, industri, otomotif, dan energi.

HIOKI
HIOKI memberikan kemampuan pengukuran presisi tinggi untuk berbagai parameter guna meningkatkan produktivitas dalam pembuatan komponen elektronik sekaligus membantu menghemat ruang di jalur produksi.

HIOKI LCR METER IM3536
HIOKI IM3536 meningkatkan standar industri untuk pengukur LCR umum dengan menawarkan frekuensi pengujian DC yang luas dan 4 Hz hingga 8 MHz (*1) dan memberikan akurasi 0.05%, ideal untuk mengevaluasi karakteristik komponen elektronik generasi berikutnya, termasuk induktor catu daya berkat frekuensi pengukuran maksimum instrumen 8 MHz (*1).

HIOKI POWER QUALITY ANALYZER PQ3198
HIOKI portable power meter dan analyzer merupakan instrumen pengukur daya terbaik di kelasnya untuk mengukur satu channel hingga tiga fase dengan tingkat presisi dan akurasi yang tinggi. PQ3198 adalah power quality analyzer untuk memantau dan merekam anomali catu daya, memungkinkan penyebab event diselidiki dengan cepat, dan juga untuk menilai masalah catu daya seperti penurunan tegangan, flicker, harmonik, dan masalah kelistrikan lainnya.

EXHIBITING COMPANIES

HIPOWER CO.,LTD

D2-9125

we, Hipower Hydraulic Co.,Ltd., have been stably supplying hydraulic cylinders for high-pressure concrete pump trucks and various cylinders and valves to our customers ever since our establishment in 1995 to supply valves in Korean market

Hydraulic cylinder
industrial cylinder and other custom made cylinder

Hydraulic cylinder
we make efforts to produce products with excellent and stable durability

valve
high pressure ball valve
special custom orders are available for other models

HISPEC MACHINE & TOOLS

A3-3308

We specialize in manufacturing a wide variety of high-precision collet chucks, cutting tool and accessories. Our extensive product range is known for its exceptional quality, and we guarantee timely deliveries but also offer:

1. Competitive Pricing: We provide cost-effective solutions without compromising on quality.
2. Customization: Tailored options to meet unique specifications.
3. Expertise: Decades of experience in the industry, ensuring top-notch products.
4. Extensive Inventory.

Collet Chucks and Cutting Tool
High precision collet chucks and accessories for CNC machine.

Machine Tools
Machine tools for CNC machine

HITACHI ASIA INDONESIA, PT

B2-4702

PT Hitachi Asia Indonesia, established in 2013, markets a wide range of industrial products, including Air Compressors, Continuous Ink-Jet Printers, Variable Frequency Drives, Induction Motors, Switches, Transformers, Hoists and other energy-saving equipment. We are committed to providing our customers with the best possible products and services. We are confident that our products will play a key role in many projects and businesses in Indonesia.

Air Compressors
Introducing Hitachi Air Compressor with "Fitlive". "FitLive" is a cloud monitoring service that has established a secure monitoring system in response to IoT. Remote monitoring using the cloud grasps the operation status in real time 24 hours a day, 365 days a year. Problems with the customer's equipment environment are identified through condition monitoring, and alarms are automatically sent by e-mail. Understand the operating status in real time remotely. Automatic mail transmission in the event of equipment alarm / failure. Operation data is automatically uploaded in the cloud. Reduce equipment downtime.

Hoists and Coding & Marking
Hitachi Ink Jet Printers are high quality, robust printers intended for industrial applications. The printer's mode of operation is based on the Continuous Ink Jet (CIJ) principle. Our products are used for date coding, product marking and variable printing onto products used in everyday life

Inverters and Motors
Hitachi Inverters are equipped with advanced features that deliver superior performance, reliability and flexibility. They are designed to meet various requirements from a wide range of demanding applications in Factory Automation, General Industry and HVAC applications in Building Industry. Hitachi, Ltd. was initially founded in 1910 as an electric repair shop. In 1914, Hitachi became the first manufacturer to manufacture industrial electric motors in Japan. Today, Hitachi manufactures state-of-the-art motors and motor products ranging from the smallest micro motors to the largest motor available anywhere in the world.

EXHIBITING COMPANIES

HOTECH MAJU SENTOSA, PT

B3-5031

PT HOTECH MAJU SENTOSA with the extensive experiences in Corporate and Retail Industry, we offers services and solutions to variants sector such as Marine, Construction, Production, Oil & Gas and Shipping Industries. Providing comprehensive of top quality products has become our inward focus in delivering outstanding services, in parallel with compliance of National and International Standard Approval.

NICRON EXH90
Rechargeable Headlamp, Spot & Flood - Explosion Proof
Model : EXH 90
Brightness : 170 Lumen
Runtime : 16 Hours
Distance : 170 Mtr
Drop Resistant : 2 Mtr
Battery : Polymer Battery
Include Certificate

NICRON EXB9
Rechargeable Impact resistant & Explosion Proof Flash light

NICRON EXB9
Rechargeable Aluminium Flash light
Model : EXB 90
Brightness : 200 Lumen
Runtime : 20 Hours
Distance : 196Mtr

HT TECH

D1-8410

HT TECH is the manufacturer. We make products which are used into excavator since 2001. We can supply as follows.
**Brand : KAWASAKI, HYUNDAI, VOLVO, HITACHI, KOBELCO, DOOSAN, SAMSUNG, CATERPILLAR, KOMATSU etc..
- Hydraulic main pump
- Travel motor(Final drive)
- Gear pump and spare parts

HYDRAULIC PUMP
Through the engine connecting the excavator main pump and gear pump makes the power . Also the pressure from the pump maintains a stable pressure and discharged through a gear pump.

TRAVEL MOTOR
Device for converting the mechanical energy supplied from the outside into the pressure energy of the hydraulic system of the working pump.

HYDRAULIC SPARE PART
Device to perform the mechanical work to the piston movement by the hydraulic pressure to the reciprocating linear.

HUAIAN YUANRUI WEBBING INDUSTRIAL CO.,LTD

C3-6521

We are a professional manufacturer of safety harness, safety lanyard, safety belt and other related fall protection products for several years in CHINA, looking for cooperation with your company. Our factory is ISO9001 certified, and our products are ANSI and CE certified, can also make according to your quality standard. We are located in Hwai'an city, around 2.5hours from Shanghai by speed train, welcome to visit our factory.

safety harness
Safety harness and safety lanyard and safety belt are for workers who work at height, for fall protection and safety purpose

safety lanyard
Safety harness and safety lanyard and safety belt are for workers who work at height, for fall protection and safety purpos

EXHIBITING COMPANIES

HUANGSHAN JIJIA TRANSMISSION MACHINERY CO.,LTD

B2-4927

Huangshan Jijia is devoted to researching and developing all kinds of roller chain, sprockets, gears, synchronous belt wheels, couplings and so on. The company has always been "researching and developing the most advanced transmission technology" as the purpose of enterprise development, relying on the parent company for more than 40 years of researching and development, awarded more than 40 inventions and new patents, as a high-tech enterprise and specialized and special new enterprise

Roller chain

olid rollers enhance rotation on the bushing while reducing impact loads on the sprocket tooth during operation. All components are heat treated to achieve maximum strength. Pre-loaded during the manufacturing process to minimize initial elongation. Hot dipped lubrication ensures 100% lubrication of all chain components to extend wear life.

P80 Pave chain

Jijia produces paver chains as a principal series to original equipment and replacement applications. A multiplicity of chain types are encountered, but all follow the same general format. Some of the more popular types encountered are highlighted in this section, but this is by no means exhaustive and for those chains required that are not detailed please contact our sales department.

Sprocket

As the vertical production capability, we're sure to provide customers with high-quality and precision chain sprockets. And not only standard size but OEM-embraced offers.

HUBEI FEIHU TECHNOLOGY CO.,LTD.

B3-571

Hubei Feihu Technology Co., Ltd. was founded in 1998 (formerly Tongcheng Jinhua Sandpaper Co., Ltd.) and is located in the Industrial Park of Shadui Town, Tongcheng County, Hubei Province. It is a professional abrasive tool industry chain company that integrates the production, processing, and research and development of sandpaper, paper tape, disc sand, and other products. Has been rated as a "high-tech enterprise" and has won several awards from the government and industry.

Waterproof sandpaper

Waterproof sandpaper is mainly used for polishing and polishing automobiles, furniture, leather, home appliance shells, and mechanical parts. It has the characteristics of grinding with water, high surface smoothness of the workpiece, and no dust pollution during operation.

Dry sandpaper

Dry sanding paper uses synthetic resin as a binder to bond abrasives onto latex, and is coated with an anti-static coating to make high-end products. It has the advantages of anti clogging, anti-static, good softness, and high wear resistance.

Disk flocking sandpaper

Flocking sandpaper, also known as self-adhesive sandpaper, has a layer of velvet covering the back of the sandpaper and can be attached to the sandpaper tray, making it very convenient to use.

HURCO (S.E. ASIA) PTE LTD

A3-3317

Hurco Companies, Inc. (NASDAQ: HURC) is an international, industrial technology company that sells CNC machine tools to the worldwide metal cutting and metal forming industry. The Company designs these controls and develops the software and is based in Indianapolis, Indiana, U.S.A. Hurco (S. E. Asia) Pte Ltd, a wholly owned subsidiary of Hurco Companies, Inc., was incorporated in Singapore since August 1991.

Hurco VM20i General Purpose 3-Axis VMC

The VM series of 3-axis CNC machining centers features a small footprint with a large work cube. No other CNC mill packs as much productivity into such an efficiently designed package.

EXHIBITING COMPANIES

HYOSHIN MECHATRONICS CO.,LTD

D1-8421

Hyoshin Mechatronics Co., Ltd also called Autosigma as our brand is specialized in solenoid valves for industry, pneumatic valves, electrically motorized valves since 1984. More than four decades we have contributed to valve industries, Autosigma has been more recognized by our clients. We are the only and the very first manufacturer for irrigation valves and gas valves in South Korea. For your automation world, we can help you with the worthwhile projects.

Solenoid Valves for Industries

- Available to provide you with the proper valves by your exact requests.
- Able to provide you with valves for media such as water, boiled water, steam, oil, gas, etc.
- Certification for ATEX ; Explosion Proof certified (Ex d mb IIC T4 IP67)
- Voltage options : 220V, 110V, 24V (AC), 24V, 12V (DC)
- Body Material : Brass, Stainless steel, etc.

Pneumatic Actuator Valves & Electrically Motorized Valves

- Pneumatic Actuator Valves**
- Operated by compressed air to open and close the valves
 - Available to add more options such as solenoid valves, limit switches or regulators to enhance the performance
 - We can provide you with double actuation or single actuation.
 - Double Actuator operated with Rack & Pinions
 - Single Actuator operated with Spring Returns
- Electrically Motorized Valves**
- Remote Control Available
 - Generating a large output with a quite compact structure
 - Available to provide you with a variety of body valves
 - 220V AC, 110V AC, 24V DC
 - ON-OFF operation or Proportional Control "

Irrigation Valves

- The very first and the only manufacturer for irrigation valves in South Korea
- Inevitable valves to feed the nutrient solutions and water the plants
- Operation to open or close the valve via power supplies and fluid pressure
- Relief valves, Water-level valves, directing solenoid valves for liquid fertilizer available
- Voltage Options : 24V, 220V, 110V (AC), 24V 12V (DC)

HYTORC SOUTH EAST ASIA PTE LTD

D1-8102

HYTORC INDUSTRIAL BOLTING SYSTEMS
The HYTORC mission is to optimize safety, quality and schedule in industrial bolting through innovative solutions, and an unyielding commitment to world class customer service. With authorized repair facilities located all over the world, fast and professional service is always available. All of our products are covered by our worldwide one-year no-questions-asked warranty, which includes free parts and labor. Our latest bolting systems are guaranteed to stop.

HYDRAULIC TORQUE WRENCH

HYTORC offers the latest hydraulic bolting technology with unique patented benefits that provide industry-leading safety and accuracy. Offering incredible repeatability, reliability, and durability – HYTORC hydraulic bolting systems and hydraulic torque wrench are the original torque/tension machines.

ELECTRIC TORQUE WRENCH

The ultimate solution for portability and convenience, HYTORC battery-powered bolting systems make safe and accurate bolting simpler than ever before.

PNEUMATIC TORQUE TOOLS

Industry leading reliability with the convenience of air power makes the HYTORC jGun lineup the simple solution for industrial maintenance.

EXHIBITING COMPANIES

IEADVANCE PRECISION TECHNOLOGY, PT

B3-5625

Manufacture and supplies wide range of abrasive wheel ; Bonded Abrasive and Super Abrasive Design wheel specification to suits end users technical and commercial needs. Serve and improve grinding industry with grinding knowledge Improve grinding cost Aimed at making grinding process easier through innovative solutions..

ABRASIVE

Leading manufacturers of Grinding wheels, making full range of Vitrified and Resin Bonded Grinding wheel. Caters to the need of major industries like Auto, Auto Components, Bearing, Steel, Surgical blade, General engineering, Foundry, Glass, Agri sector, Rice Polishing, etc.

IFM ELECTRONIC INDONESIA, PT

B2-4715

The ifm group of companies is a global industry leader for innovative sensors, controllers and SAP-based solutions with over 8,000 employees and a portfolio of 1,170 patent products. ifm electronic has been present in Indonesia through PT ifm electronic Indonesia, which was established on 10 October 2022. ifm provides reliable solutions and immediate services to all customers in multiple industries with a focus on food & beverage, automotive, water, steel, pulp & paper. ifm - close to you!

IO-Link Master

The IO-Link master for control cabinet installations has an integrated web server for configuration and diagnosis. This unit sends machine data, process parameters and diagnostic data via Profinet or Ethernet/IP to the controller. To ensure data can be processed by IT and used across factory locations or even around the world.

- Connection up to 8 IO-Link devices
- Simultaneous data exchange between the controller and the IT
- Units for field applications and control cabinets
- Integrated fieldbus interface.

Vibration Monitoring

Monitoring of overall vibration according to ISO 10816. Vibration monitoring systems are used for condition-based maintenance of machines and installations. They help to detect resulting damage at an early stage, avoiding consequential damage and increasing lifespans. The ifm product range includes vibration transmitters, vibration sensors, accelerometers and evaluation electronics.

Self-Monitoring Transmitter

Temperature is the physical variable most often measured in machines and installations for food and beverage, pharmaceutical, steel, metal and glass industries, also machine tool and automotive applications.

- A large selection of ifm temperature sensors is offered to suit different temperature ranges, installation depths, environmental conditions and media.
- Integrated deviation monitoring and diagnostic functions
 - Free factory calibration certificate available
 - Short response time
 - High precision 0.2K

EXHIBITING COMPANIES

IGUS INDONESIA, PT

B1-4216

igus® is a worldwide leading manufacturer with our main products, energy chain systems (e-chain® & highly flexible chainflex® cables) and polymer bearings (iglidur® spherical and igubal® rod end, xiros® ball bearings & drylin® linear guides). Solutions from igus®, which are high performance, lubricant and maintenance free, widely used in machine tool, conveyor, robotic, automation and material handling applications. Our products have been developed towards and complied with Industry 4.0.

ENERGY CHAIN E4QL

E4Q series energy chains have been developed to offer the best possible solution for unsupported and long travels. Based on the robust E4.1 energy chain standard that has been proven for over 12 years, the new series brings a long service life and a high degree of modularity. Energy chain with crossbars every link, openable from both sides
Typical application areas: machine tools, cranes, automation systems

Drive Technology Hybrid Ready cable

Reduce installation space and design time by 50%: igus is expanding its product portfolio of harnessed hybrid cables, adding ready-to-connect cables suitable for SEW-EURODRIVE with MOVILINK DDI and Siemens SINAMICS S210 with OCC.

igutex® TX1

igutex® TX1 plain bearings stand for very high load carrying capacity at high radial loads paired with good abrasion resistance. On the one hand, the special design ensures high dimensional stability due to the long-fiber winding, on the other hand, lubricant- and maintenance-free operation is possible thanks to solid lubricants. High dirt and media resistance round off the property profile. Typical applications : Agriculture, Construction machinery, Heavy machinery /Plant construction

IKA WIRA NIAGA, PT

D2-972

Since 1994 PT. Ika Wira Niaga has been a trustworthy Authorized Distributor of Koyo Bearing in Indonesia. For over 25 years, we have delivered excellence quality of services to ensure our customers' satisfaction. We provide quality products such as bearing, oil seal and drive shaft for various applications in many industries. Full technical assistance from our professional engineering team both local and Japanese experts are available for our customers

Bearing

There are many types of bearings such as Deep Groove Ball Bearing, Angular Contact Ball Bearing, Cylindrical Roller Bearing, Spherical Roller Bearing, Tapered Roller Bearing, Thrust Ball Bearing, Needle Roller Bearing and etc.

Oil Seal

Oil seals work to prevent leakage of sealed objects such as lubricants from inside and also to prevent the entry of dust and contaminants from outside.

Drive Shaft

A drive shaft acts as an intermediate between a driving shaft and driven shaft that are not aligned on the same axis, and transfer running torque smoothly.

IKEUCHI INDONESIA, PT

D1-8209

IKEUCHI is a Japanese manufacturer of high-quality spray nozzles and humidification systems. We design and produce high-precision nozzles and humidification systems for various industries. As "The Fog Engineers", we support manufacturing processes to solve their problems and improve their productivity. With 42,000 types of spraying nozzles such as Hydraulic Nozzle, Pneumatic Nozzle, Air Nozzle, Tank Cleaner, and Systems to support the growth of industries.

Dry Fog Humidifier AKIMist® "E"

AKIMist® produces ultra fine Dry Fog with a silky touch.
Sauter Mean Droplet diameter measured by a laser analyzer: 7.5 microns
Spray volume per each nozzle: 2.4 L/hr at Air Pressure 0.3 MPa (3 bar)
Up to 4 pieces of the nozzle mountable to a humidifier : Total 9.6 L/hr
Dry Fog condition: Maximum droplet diameter 50 microns or less and mean droplet diameter 10 microns or less.

GSIM II

- Full cone pneumatic spray nozzle producing a large amount of "fine fog".
- Energy-saving design - mean droplet diameter of 50 μm and a maximum droplet diameter of 150 μm at an air-water ratio of 130.
- Large turn-down ratio.
- Spray angle of 20 or 60.

BIM Series

Pneumatic nozzles producing fine fog

- Lineup of different spray patterns and types of adaptors for an optimal use under various conditions and environments
- System controllable by sensors or times

EXHIBITING COMPANIES

ILSUNG MTECH CO.,LTD

D1-8404

Founded in 2007, ILSUNG MTECH Co., Ltd specializes in precision manufacturing of steel bushings and pins for construction equipment to enhance the operation of moving parts. Through an optimized heat treatment process, inner circumference design and coating material, we were able to achieve 15% increase in strength and a 20% improvement in durability compared to existing products and they are tailored in various sizes to meet the customer's specific needs.

BUSHING

Bushing is mechanical part placed between the moving parts of excavator to reduce friction and wear.

BEVEL GEAR

Transmits mechanical power between two intersecting shafts.

ILTHABI HANBELL INDONESIA, PT

D2-9325

Hanbell screw air compressor has specialized to manufacture screw compressor for industrial market as well as for the air conditioning and refrigeration application. Hanbell indonesia is opening page of air compressor history and making contributions to customer. Hanbell utilizes 3D measuring devices to stricly maintain high quality standards. Every Hanbell compressor is well proven and fully tested prior to delivery. Our products such as Air Compressor, Air Dryer, Direct Driven,dan Sparepart.

AA6 Series (Direct Driven)

Hanbell AA6 series is our best seller, mostly because its reliability and value of money. A direc driven, energy saving, high efficiency, customer satisfaction, stainless pipeline, low gravity design. All design reflects the Hanbell pursuing values.

AE6 Series (Belt Driven)

Hanbell AE6 Series is present to fulfil the needs for a smaller capacity air screw compressor. A belt driven and advanced processing technology and automated manufacturing equipment, it provides most stable and reliabe compressed air to customers.

Double Stage Compressor

Hanbell D- Series using the fifth generation asymmetric 5-6 tooth profile, large diameter rotor, lower speed, longer service life, higher volume efficiency. Duble stage Compressor has average of 10-15% energy saving at 100% loading compared to single stage Compressor.

INDO KOMPRESIGMA, PT

D2-924

Indo Kompresigma PT is the sole agent for complete product range of KAESER Kompressoren SE, Germany in Indonesia with very strong reputation for more than 25 years which marked ourselves as the market leader in the compressors business. We are a member of worldwide KAESER organization and an independent member of the diversified Kawan Lama Group. Our head office is in Jakarta with 5 branch offices in Indonesia to ensure vast coverage and excellent after sales service to all customers.

KAESER Compressor
BSD 75

EXHIBITING COMPANIES

INDOBELTRACO JAYA SEMESTA, PT

D1-8201

It was started in 1986 as a small store, BELTRACO in Glodok Jaya, West Jakarta specialized in automotive industry spare parts. As we strengthen our position and become prominent we finally established PT Indobeltraco Jaya Semesta in 2007 to cater a wider market. Further, the company expanded its market share not only in automotive but also into broader ranger of power transmission industry. We cater to but not limited to Food and Beverage Industry, Marine Industry, and Agriculture Industry.

CHAIN & SPROCKET

Roller chain is the type of chain drive most commonly used for transmission of mechanical power on many kinds of domestic, industrial and agricultural machinery, including conveyors, wire- and tube-drawing machines, printing presses, cars, motorcycles, and bicycles.

BEARING & PILLOW BLOCK

Ball bearing is a type of rolling-element bearing that serves three main functions while it facilitates motion: it carries loads, reduces friction and positions moving machine parts. Ball bearings use balls to separate two "races," or bearing rings, to reduce surface contact and friction across moving planes. The purpose of a ball bearing is to reduce rotational friction and support radial and axial loads.

ELECTRIC MOTOR, MEDIUM GEAR, & REDUCER

A reduction gearboxes, or speed reducer, is used to reduce the speed of the input, from the motor, while also multiplying the torque the input creates. In cases where there is a requirement for a transmission device, a gear reducer is used. These highly versatile devices are used to transmit power from a motor to a driven load, and they can be used to manipulate torque and speed.

INDOMAKMUR INTI LESTARI, PT

C3-640

PT. Indomakmur Inti Lestari has always maintained a stable supply chain from leading suppliers and provided excellent products and services for more than decades. Dedicating the entire performance of our team to always prioritize customer satisfaction by always providing the best products and services.

AW Fraser

AW Fraser specialis in the production and supply of continuous cast and centrifugally cast bronze alloys, and precision machined components

KYOWA & MORRIS

Morris products are ac parts such as refrigerant, manifolds & accessories, ac pipes, duct tape.

MORRIS

Morris products are ac parts such as refrigerant, manifolds & accessories, ac pipes, duct tape

INDONESIA POWER SPRING, PT

D1-8537

PT. Indonesia Power Spring was founded in September 2012, which is located in Cikarang, Bekasi, Indonesia and operates in a 6450 meter square land. Our operation started in March 2014, manufacturing all kinds of winding spring which are used in all car seat belts and other purposes. Our base is Flat Spring Business. To keep customer satisfaction by insuring our products in high quality, we built a Quality Management System ISO 9001, IATF 16949 and ISO 1400

Return Spring Unit

Spiral Springs For Automobile Seatbelt Retractors

Spiral Spring & Constant Force Spring

Spiral Spring :
 1. For Balancer
 2. For Engine Starter Recoil Spring
 3. For Cord Real
 4. Constant Force Spring

EXHIBITING COMPANIES

INDUSTRIAL MULTI FAN, PT

D2-994

PT. Industrial Multi Fan is a company that specialized in industrial fan and ventilator, started its operation in 1988. It is the national leading fan and ventilation company in Indonesia. We provide all types of fan & ventilation for building, factory, warehouse, greenhouse & farm. With more than 20 years of experience serving fan and ventilation demand and support from our own test lab for fan & blower which comply to AMCA 210-99

Jet Spray Blower GSB-GT Serie

Jet Spray Blower jarak sampai 50 meter cocok di pasang di atas gedung untuk penghilang polusi dan dapat juga di pasang di mobil dan dilengkapi dengan Remote Control
Spesifikasi:
Power 2.2-11 KW
Voltage 380 V
Speed 2880 RPM
Level Max Throw Range 30-50 Meter

Axial Fan High Pressure AXB-D-VMD Series

Axial Fan Dengan Pressure yang sangat tinggi dengan Spesifikasi :
Size 16 ~ 40 inch
Power 550 ~ 18500 watt
Voltage 380 V
Speed 1420 ~ 2900 RPM
Air Volume 32584 ~ 1519 CMH
St. Pressure. 20 ~ 669 Pa

Ceiling Fan High Volume 7.3 Meter CFHV-DS-B730M-WY

Dengan menggunakan nord motor dari germany dan controller menggunakan Rexroth Bosch dengan Spesifikasi :
Size 7.32M
Power 1500W
Voltage 380V
Speed 50RPM
Air Volume 791100CMH
Noise ≤45dB

ING CO.,LTD

B3-5402A

Ing is a Japanese company founded in 2002. We are manufacture of labor-saving tools and safety lifting equipment its necessary for construction sites.

LiftLock300

LiftLock 300, it can safety lift objects such as 90mm or 120mm panels. When a load is applied, a force is applied to grip the object, and very easy and smooth to remove it with a single action.

Drive Wrench

Drive wrench, it is a tightening tool that can easily tighten bolts and nuts even in narrow spaces.

EXHIBITING COMPANIES

INGERSOLL RAND INDONESIA, PT

C3-730

Ingersoll Rand is a leading manufacturer of professional compressed air solutions for a range of different industries worldwide. Ingersoll Rand is a worldwide manufacturer of unrivalled compressed air solutions, parts and accessories and services for a wide range of industries and applications. With over 145 years of air compressor knowledge and expertise, you can trust Ingersoll Rand to provide you with a solution you can rely on. Ingersoll Rand has innovated various compressed air systems

Oil Flooded Screw Air compressor

A rotary screw compressor features two meshed rotors that trap air between them and reduce its volume. This process generates compressed air for various industrial and manufacturing purposes. The machine contains two helical-shaped rotary screws, which are positive displacement mechanisms that produce compressed air in a continuous, sweeping motion. Rotary screw compressors produce less pulsation than reciprocating/piston compressors and other versions. They provide massive volumes of compressed air and can function well in all types of weather conditions. These compressors also offer excellent energy efficiency and are easy to maintain.

Centrifugal Air Compressor

Our MSG Centac centrifugal air compressors are the most efficient and reliable air compressors on the market. Their packaged design makes them easy to install wherever needed. Every component of these compressors is mounted, piped and wired for convenient, single-point air and electrical connection.

Oil Free Screw Air Compressor

All of our oil-free rotary screw air compressors provide 100% oil-free air that meets ISO 8573-1:2010 Class 0 air quality standards. This makes them the perfect compressed air solution for the pharmaceutical, textile, food and beverage and electronics industries where contamination-free air is critical. When high air purity is a priority, choose Ingersoll Rand's expert oil-free air compressor solutions. Our range of oil-free air compressors includes our E-Series models, which are renowned for their world-class efficiency and reliability and are available in a variety of different sizes to suit your specific needs.

INITIALPOINT CO., LTD.

D2-9117B

We are a multi-factor authentication service provider for closed LTE connections and internet VPNs. Our MFA service is unique because it extends and adapts to not only major biometric authentication services but also GPS, hardware MAC addresses, and SIM information. We enhance the MFA process by changing IP addresses, so compared to ordinary methods, our service offers a higher level of security.

JinCreek, multi-factor authentication service

JinCreek is a service that performs multi-factor authentication in an inspection-based manner, transitioning IP addresses, and authenticating individuals, allowing them to connect to specific networks or services.

INTERNASIONAL TEKNIK SOLUSINDO,PT

B3-555

Being a High-Quality and Integrated Digital Weighing Scale Provider for 9 years

PT Internasional Teknik Solusindo, well known as ITS Scale is professionally provide to Multi-sector needs in weighing, such as :

- Various Digital Weighing Scale
 - Industrial Machinery
 - Software Development
 - Commercial Vending Machine
- We ensure reliability for our product, project, and aftersales priority. Collaborate and fulfill your digital integration weighing with us!

INDUSTRIAL SCALE

- A High-technology upgrading equipment for weighing.
- Digital scale is a must item to look for in various application towards multi-sector industrial and manufacture lines

EXPLOSION PROOF SCALE

- The best quality insurance service for Hazardous Area's weighing installation is Explosion-proof scale.
- Meet secure and high-durability specification in our explosion proof scale weighing series.
- Equipped with ATEX specializing function and IP66+ water protection

HEALTHCARE SCALE

- Well designed and pleasure improvement for our best medical equipment is ready to use!
- We built trust and integrity to care medical tools need in weighing.
- Certified with KEMENKES license and METROLOGI accuracy approve

INTRAMEGA GLOBAL, PT

B1-4116

Founded in 2014, Intramega Global is a provider of integrated warehouse solutions, including warehouse infrastructure, warehouse system and technology, and consulting services. We offer an extensive range of products and services that help our clients to maximize their warehouse performance, streamline their operations, and future-proof their warehouses.

With years of experience, our team of experts provides more than just regular products and service, but also customized solutions.

Storage System

a versatile solution that transforms your storage space into a streamlined, efficient hub of productivity. We understand that every warehouse is unique, and that's why our racking system is fully customizable to meet your specific needs. Our team of experts works closely with you to design and conceptualize a solution that seamlessly integrates into your existing setup while maximizing space utilization and organization. Whether you require selective pallet racking, cantilever racking, or a specialized configuration, our system is engineered for durability and precision.

Warehouse Automations

Our cutting-edge Warehouse Automation System – a versatile solution that empowers your business to excel in picking, sorting, transporting, and more. We understand that modern warehouses demand efficiency, flexibility, and adaptability, which is why our automation system is designed to meet the evolving needs of your business. From customized robotic picking solutions that dramatically enhance order fulfillment speed to intelligent sorting and transporting systems that optimize logistics, our comprehensive suite of automation tools can be tailored to suit your specific requirements.

Warehouse Management System

We provide advanced warehouse management solutions (WMS) from trusted brand Manhattan Associates. As their proud partner, we deliver top-of-the-line technology to optimize warehouse operations for businesses of all sizes. Our expert team offers unparalleled support, ensuring maximum value from your WMS investment.

Warehouse consulting services

Our Warehouse Consulting Services are your gateway to achieving peak efficiency and excellence in every facet of your warehouse operations. With a focus on providing tailored solutions, we partner with your organization to address the unique challenges and opportunities within your supply chain. Our comprehensive consulting services cover a wide spectrum, starting with an in-depth analysis of your current warehouse processes, identifying pain points, and exploring growth potential.

EXHIBITING COMPANIES

ISK INDONESIA, PT

D2-9115

We were founded for the purpose of aluminum casting mold design and manufacturing components. Since 2004, we have been involved in the manufacture of dies, contributing to the fields of two-wheel and four-wheel vehicles as well as a manufacturer of casting dies. Regardless of where we operate, we emphasize "manufacturing that contributes to social development". We treasure sincerity, technology, and the spirit to take on challenges for the sake of our customers. Thank you.

Low & High Pressure Casting Mold

Low pressure casting & high pressure casting is a casting production method that uses pressure to fill the mold with molten metal such as aluminum and magnesium. In this type of casting, the mold is placed in an airtight chamber, then pressurized gas is flowed into the chamber so that the liquid metal in the ladle is forced upwards through a fireproof channel into the mold. The advantages of this printing method include: Clean print results free from inclusions, Damage due to gas porosity and oxidation can be minimized, Mechanical properties are increased.

Gravity Casting Mold

A casting method that utilizes gravitational attraction to help aluminum liquid fill the cavities in the mold so as to form the desired product profile. Advantages of this method: excellent dimensional accuracy, the mold can be used repeatedly with high production levels.

Shell Casting Mold

Shell mold casting, a mold in the form of a thin wall/shell made from a mixture of sand with a thermoset resin binder. For patterns, components can be shaped as desired. Shell mold casting allows the use of both ferrous and non-ferrous metals, most commonly cast iron, carbon steel, alloy steel, stainless steel, aluminum alloy, and copper alloy. Special components that have certain sizes and require high accuracy, such as gear housings, cylinder heads, connecting rods, and lever arms.

ISOTEMA, PT

A2-2102

With a vast experience in machine tools trading since 1977, First Machinery Trade Co. (FMTC Group) strives to increase service and customer satisfaction through its subsidiary, PT ISOTEMA. Established in end of 2013, PT Isotema aims to satisfy the needs of Indonesia's manufacturing sector as a distributor of sheet metal machinery, fabrication machinery, machine tools and other industrial machinery also equipment supports.

TEKMA Fiber Laser Cutting Machine TLF-EA Series

Our TEKMA Fiber Laser Cutting is designed open and close cover depend on your needs. With selected branded component make your jobs easily, stable cutting, and profitable.

TEKMA NC Hydraulic Press Brake Machine WC67Y Series

TEKMA NC Press Brake is easy to use, user friendly, and reliable for your bending works.

TEKMA Fiber Laser Welding

Our Tekma Laser Welding is compact design, easy to use, and low cost process.

JABABEKA & CO

C3-6717

The Jababeka Industrial Estate is the first modern Indonesian eco-industrial estate and jointly developed with ProLH GTZ under a technical cooperation program collaboratively established by Indonesia's Ministry of Environment and the Republic of Germany. Since its establishment in 1989, Jababeka Industrial Estate has been acknowledged as the most successful industrial estate in Indonesia in terms of attracting multinational companies (MNCs), leading local companies and small & medium enterprise

Smart Manufacturing Hub

The Smart Manufacturing Hub is a factory with larger space, and giving customers the alternative to re-layout as they need (for workshop, warehouse, office, lounge, etc.). This type has fresh looks with a higher specification in finishing material, thus it will look more luxurious. With a wide-opening, high ceiling, and using solar panels, which enables it to be more eco-friendly and less power consumption. It is also supported by high technology and can be known as Smart Eco-Factory.

E-Space

The e-space block is designed specially for any type of industry, with a total building area of 828 m². This facility will maximize the area utilization for various industries such as automotive, electronic, machinery, food & beverages and furthermore. This building is also suitable for small and medium enterprises (SME)

JEDI-Hub

'JEDI-HUB' stands for Jababeka E-commercial Digital HUB develop Bio-Tech Industrial park, Halal Industrial Park, Startup Industrial Park and High Tech Industrial Park cluster. This is the real action of Jababeka's commitment to build the eco friendly and facilitate the tenants with the strategic place for their business.

EXHIBITING COMPANIES

JAC COUPLING CO.,LTD

D2-8822

JAC coupling

JAC COUPLING CO., LTD is the first leading brand in the power transmission coupling that is widely used in various industries such as steel, paper, crane and power plants. We are ready to be your next partner to find the best solution for all of your challenges that are related to utilizing couplings for your needs.

GEAR COUPLING

Features

1. Smaller, lighter than delivery horsepower.
2. Noise, little vibration during high-speed rotation.
3. It satisfies the standards of KS and JIS.

Application

Steel plant, Paper plant and other Industrial plant

COMPOSITE COUPLING

Features

1. Using composite materials (CFRP) rather than conventional metal materials can make weight reduction and deflection mitigation.
2. Prevention of corrosion and high fatigue life through composite materials.
3. Quality Assurance with Balancing Tests

Application

Cooling towers

Tire coupling

Features

1. Shock, vibration absorption and regulation through the rubber material.
2. No lubricating refuelling required.

Application

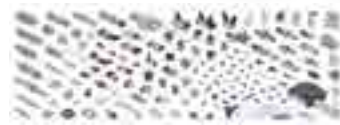

Various types of pumps and Conveyors

JANATICS INDIA PRIVATE LIMITED

B2-4530

JANATICS

JANATICS is a leading manufacturer of pneumatic products in India. Established in 1977, the professionally managed ISO 9001:2018-certified company has been serving the industry for over four decades. We cater to more than 25,000 OEMs globally. A network of over 200 channel partners. Exports to over 42 countries. Own subsidiaries in USA, Germany, and the UAE. Our Product ranges :
 * Air preparation units * Pneumatic Valves * Air Cylinders * One touch Fittings * Pneumatic Systems * Training kits.

Pneumatic Product & Parts

ISO Air cylinders, Square Cylinders, Compact ISO Cylinders, ISO Miniature Cylinders, Low Friction Cylinders, Round Cylinders, Compact Guided Cylinders, Rodless cylinders, Grippers- Parallel, Angular, Rotary Clamp cylinders, Rotary Actuator, Magnetic Sensor, Shock Absorbers, Filters, Mist Separator, Lubricator, Regulators, FRL, FRC, FRCLM, FRLM

Directional Control Valves

Direct Acting Valves, Solenoid Valves, Compact Valves DS2 Series ISO-1,3 Valves, Namur Valves,

One Touch Fittings & PU Tubes

ONE TOUCH FITTINGS - M5, 1/8, 1/4, 3/8, 1/2, 3/4, 1" Threaded nipples of L, T & Y fittings enable plastic portion to turn by 360°, Suitable for both Nylon and PU tubing, Bubble tight sealing of tubes, Teflon pre-coated male taper threads, Stainless steel collet, POLYURETHANE TUBES - Ø4, 6, 8, 10, 12mm OD

JEICO

D2-8818

JEICO

JEICO is a maker of industrial radio remote controllers in industrial use, such as for hoist and (over head & tower) crane, winches and gate, automobiles, conveying and transporting, and so on, for remote and wireless controlling fields both in the light and heavy industries.

JREMO 3K

Industrial radio remote controllers can be applied and mainly installed to cranes, hoists, and automatically controlled electric/electronic industrial equipment (such as gate, elevator, transfer car ect at factories for factory automation.

JREMO 4L

Industrial radio remote controllers can be applied and mainly installed to cranes, hoists, and automatically controlled electric/electronic industrial equipment (such as gate, elevator, transfer car ect at factories for factory automation.

JREMO 8K

Industrial radio remote controllers can be applied and mainly installed to cranes, hoists, and automatically controlled electric/electronic industrial equipment (such as gate, elevator, transfer car ect at factories for factory automation.

EXHIBITING COMPANIES

JEIL ENGINEERING & INDUSTRIAL CO., LTD.

D1-8405

With experience of 30 years, Our company is specialty manufacture company of reducer, various gear and power transmission. Our slogan is To the world by quality and Trust and honesty. Based on thorough craftsmanship, mod cons and reasonable line of products construction, personnel is trying to be world best company. Our company would like also to working with you about green energy sector and commercialization of the areas. Always do our best, wish to stay your side.

GEAR BOX

Industrial power transmission products must required gear boxes, and efficiency torque transfer most important that completely resolve the noise, vibration, exothermic, cutting degree. We produce various types HELICAL GEAR, BEVEL GEAR, PLANETARY GEAR, SPUR GEAR, WORM GEAR, and we can produce any ratio, power according to END USER's order. We have a technical cooperation with JAPAN professional gear maker HASEGAWA.

GEARED MOTOR

GEARED MOTOR integrally manufactured with a motor. It has a VERTICAL, HORIZONTAL and LINE POWER type.

CYCLO REDUCER

CYCLO REDUCER more light and compact reducer than others. It possible makes various ratio. It has a VERTICAL and HORIZONTAL type and possibly makes any ratio, power according to END USER's order.

JETRO Jakarta

D2-9110

Japan External Trade Organization

JETRO, or the Japan External Trade Organization, is a government-related organization that works to promote mutual trade and investment between Japan and the rest of the world. Originally established in 1958 to promote Japanese exports abroad, JETRO's core focus in the 21st century has shifted toward promoting foreign direct investment into Japan and helping small to medium size Japanese firms maximize their global export potential.

JIANDE SHUANGJIAN TOOLS CO.,LTD.

B3-564

Our company mainly produces materials, including PVC transparent granules, colorful transparent spins with double color handles, double color screw sets, screw sets with various specifications and other tools. We always adhere to the aim of "the quality is the basis of an enterprise"

EXHIBITING COMPANIES

JIANGSU AILAND TOOLS CO.,LTD

C3-6512

Company Description Jiangsu AILANDE was established in 1992, is specialized in threading tools in the development, production and sales of new enterprises. Covering an area of 15000 square meters, our factory is located in HouXiang Town, DanYang City, JiangSu Province, and is 10 kilometers apart from the shanghai-nanjing expressway, beijing-shanghai high iron and changzhou airport. The transportation is very convenient.

DRILL BIT

Twist drill is a tool for drilling round holes in workpiece by means of rotary cutting with relative fixed axis. It is named for its flute like spiral shape. Spiral grooves have 2 grooves, 3 grooves or more, but 2 grooves are the most common. Twist drill can be used in manual and electric hand held drilling tools or drilling machines, milling machines, lathes and even machining centers. The drill bit material is generally high-speed tool steel or cemented carbide.

TAPS

Hand taps refer to carbon tool or alloy tool steel rolling taps, suitable for manual tapping. Typically, a tap consists of a working part and a shank. The working part is divided into a cutting part and a calibration part. The former is ground with a cutting cone and is responsible for cutting work, and the latter is used to calibrate the size and shape of the thread.

DIES

The die is equivalent to a nut with high hardness. There are several chip removal holes around the screw hole. Generally, cutting cones are ground at both ends of the screw hole. Dies are divided into circular dies, square dies, hexagonal dies and tubular dies (types of teeth) according to their shapes and uses. Among them, the circular die is the most widely used

JIANGSU HANTANG INTERNATIONAL TRADE GROUP CORP., LTD.

C3-6721

We are a manufacturer which specializes in producing DIY electric tools series products. Our main products are mini drill, mini grinder, rotary tool kit, hot air gun, heat gun, finishing sander, palm sander and so on. Our products have passed several international approvals, such as UL in the USA and Canada, GS in Germany, CE/EMC in the EEC, and others in related countries and regions. In 2003, we also gained the certification of ISO9001:2000 quality control system by China certification center.

JIANGYIN MITOO PRECISE CO.,LTD

C3-7827

Jiangyin Mitoo Precise Co., Ltd. was established in 2008, located in Jiangyin, Jiangsu Province,adjacent Shanghai. We mainly produce special precision cold-rolled steel strip, machined parts,flat bar and forged bar. The main steel types are spring steel,tool steel,bearing steel,high-quality carbon structural steel,alloy structural steel,etc. The products are widely used in auto parts,hardware tools,cutting tools,transmission systems and other industries.

Precise steel strip

Mainly steel grade : CK10-CK75 •45Mn •65Mn•40Cr•SK2•SK4•SK5•42CrMo•75Cr1 •60Si2Mn•GCr15•4Cr13•6Cr13•51CrV4 etc. CK10-CK65,The finished steel strip has clean surface, uniform thickness and tolerance, the quality of our strip is more precise than our national standard.

At the same time there is also the Lead bath quenching furnace production line which is more advanced production equipment and production technology than our competitor. Also the geometry tolerance and shape of products has also been fully guaranteed.

Flat bar

The first large cross section of flat steel hot rolling production line in China has been put into the country. And the one-off conversion from coil to coil flat steel has been completed. Then we can get high-precision dimension tolerances and good surface quality through cold finish rolling. Our factory can also heat treatment according to customer needs, so that cold rolled flat steel instead of cold drawn flat steel can be realized. which can reduce the purchase cost for customers. Thickness: 3-25 mm Width: 20-130mm According to customer requirements, the rolling tolerance can achieve thickness+-0.05mm width+-0.10mm

Machined Parts

Our company specializes in the production of machined parts in China, producing parts through processes such as turning, milling, boring, drilling, grinding, heat treatment, and surface coating. We have more than 10 machining centers and 30 CNC lathes , including Mikron Mazak and Doosan. There are 3 production lines controlled by robotic arms, equipped with fully automatic rotary inspection machines, which effectively control quality stability and improve production efficiency. widely used in automotive bushings and motor shafts, military flashlights and communication equipment casings, transmission accessories for oil drilling platforms, casings for important components of passenger aircraft, medical equipment accessories, etc

Modula

Modula automated vertical storage solutions

Created to make the most of available vertical space and save floor space at the same time, Modula automated vertical storage solutions are suited to any type of product, in any industry sector or environment, and can be customised to various payloads, heights, sizes and options. Modula automatic vertical tray warehouses allow you to store goods in a clean, tidy, safe and fast-moving system, reducing the number of movements operators need to make and avoiding damage to your goods. Modula automatic vertical storage solutions are designed to save space and time and improve process efficiency.

The automatic vertical tray warehouses were designed according to the "goods-to-man" principle: there is no need for operators to move around the warehouse to pick or refill your goods. Instead, the products are brought directly to the picking bay. The picking bay can be customised for various configurations depending on clients' varying requirements.

Proper picking management within industrial warehouses translates into competitiveness on the market, especially given the decisiveness of performance in terms of the speed of management and fulfilment of orders.

All operator activity can be tracked and picking errors can be reduced to an incredible extent, courtesy of simple and intuitive visual aids

CNC MILLING VMC 1160

BENEFITS :

- Machine design with quality, reliability, User friendly and safety
- Stable quality products for Industrial grade machining center
- International warranty for controller.

EXHIBITING COMPANIES

KCC CO., LTD.

B3-510

We, KCC Co., Ltd., were established in 1992. With the goal of localizing the automation parts market, where more than 80% of the domestic market relies on imported products, we are constantly developing and releasing a variety of pneumatic parts, including fittings and speed controllers, as well as hydraulic cylinders and pneumatic solenoid valves. We will be recognized for our technological prowess through generous investment in R&D to create better quality products.

Pneumatic Cylinder

Our company is a pneumatic manufacturing company, and in the case of pneumatic cylinders, we sell a lot of our most basic products.

Pneumatic Solenoid Valve

Pneumatic solenoid valves are essential for use in automated factories and are one of the products with steady sales.

Pneumatic Gripper

Grippers are products used to transfer and transport workpieces

Electric micro grinder E-FORCE

The easy-to-use, professional micro grinder E-Force will fully meet your requirements from day one. Its game-changing features, excellent operability, and the highest level of safety ensure the most efficient and effective operation than any other products in the market today. The elite-athlete-like, stylish full metal body design without any plastic parts offers the best performance to meet your unique requirements.

EXHIBITING COMPANIES

KIMURA LASINDO, PT

D2-9606

PT. Kimura Lasindo was established in 24th October 1997 and its main business activity are in the field of sales and service of Resistance Welding Machine, Amada Miyachi Laser Welder, Laser Marking, Fine Spot Welder, and Welding Checker From Japan. Our company also specializes in design and installation of turnkey projects for automotive industry, electronics industry and home appliance industry. Also we specialize in mechanical and electrical works and are led by a team of experienced

AMADA MIYACHI WELDING CHECKER MM-400B
MM-400B welding monitor enables operators to monitor and manage key welding variables that result in changes in weld heat such as current, voltage, time, force and displacement. The compact unit supports a wide range of resistance welding technologies including AC, DC inverter, AC inverter, transistor and capacitive discharge. It features a simple and intuitive user interface and color touch panel display

PNEUMATIC SPOT WELDING MACHINE

1. Stroke variable pneumatic cylinder. Built-in lubrication-free bearing suits high speed & long operation period. Lower air consumption, faster welding reaction.
2. Precision digital IC control circuit No connection joints, simplified programming operations with better welding results.
3. With our own welding control, it is easy to assemble with automatic welding lines from capability of applying multiple welding units (15 units max) according to different requirements.
4. Toughest machine body with water circulation cooling system for high speed continual operation.
5. SCR circuit switch with current charge controller, perform best durability, reliability & welding quality.

BOLT FEEDER MACHINE
Bolts are put in the BOLT CUP safely, shifted to BOLT CUP (spring equipment) by the drop of the top HOLDER at the SPOT drop sign, and then inserted to PIN in the lower part, There is no damage in the CUP because of the bolt missing or shifting fault. It is easy to work and high in efficiency due to increasing speed by two times, so it is easy for (CONTROL-> PLC application) workers to control. And this supply system is easy to work for large and small PANEL, good for stability, quality improvement, and product uniformity."

KING POWER

KINGS BRITE CO., LTD.

C3-530

Kings Brite Co.,Ltd. Newly established in 1994. With More than 50 years of expertise, we compile with the best products for polishing metals surfaces and non-metals surfaces. At present, We are the one of leader Manufacturing, Supplier, Distributor, Exporter.

Buffing Wheel
Buffing wheel application for surface finishing metal (Steel, Aluminium, Stainless Steel, Silver, Brass)

Solid Compound
Solid compound application for surface finishing metal (Steel, Aluminium, Stainless Steel, Silver, Brass). use with Buffing wheel

Non-Woven Abrasives
Non-Woven abrasive application for preparation of surface metal and nonmetal (Steel, Aluminium, Stainless Steel, Silver, Brass, Plastic). Grinding, Polishing, Create Hairline & Satinline on surface metal.

EXHIBITING COMPANIES

KINGTON IMP & EXP CO., LTD

D2-9224

The company mainly products three series :K (YG),P(YT),M(YW). The main product:carbide rod ,carbide bars,drill tips, saw tips, wood-working carbide tips ,mine products and post machined products series etc. The annual output is over 300 tons.The products has been sold to the markets of South America,Europe, US,the Middle East and so on,more than 20 countries and regions, receives the favorable the favorable comment of customers.

carbide tools
from 3mm to 50mm

carbide strips

KINGYA CEMENTED CARBIDE TECHNOLOGY CO., LTD

D2-8925

Kingya Cemented Carbide Technology Co., Ltd is a private limited liability company engaged in tool manufacturing which have more than 20 years' experience. The company has passed ISO9001 quantity system,possesses advanced production equipment,complete testing instruments,strong R&D center and QC teams. We are specializing in the production of various carbide cutting tools with excellent quantity,and with strong technical support,and good after sales service.

KIRA LASER LEVEL CO., LTD

D2-9127

KIRA Laser Level has grown since 2009 to become an innovative leader in the development and manufacturing of laser tools. Our products consist of laser levels, laser sights, laser detectors and laser distance meters. Our innovative products in the manufacturing and RAD not only meet current needs but also future customer requirements. We strive to anticipate the market's future goals to provide tomorrow's solution today. At KIRA Laser Level, we pride ourselves not only on our products, but also on

Laser level

KIRA LASER LEVEL specializes in 8D and producing various types of laser levels; laser distance meters and laser detectors. Our marketing standards are "Trust-able, High Quality, Best Service, Competitive Price." And our business goal is getting mutual benefit with our customers.

EXHIBITING COMPANIES

KLINGELNBERG INDIA PVT LTD

A3-3325

Modern drive technology poses new challenges for design and quality assurance particularly when it comes to drivetrain electrification; offers precise, high-productivity technologies that deliver solutions for manufacturing high precision gears for gearboxes in motor vehicles, wind power plants, trains, airplane engines, cement mills, and ships or oil platforms. units include: 1. Oerlikon Bevel Gear Technology 2. Höfler Cylindrical Gear Technology 3. Precision Measuring Centers & 4. Drive Technology

Precision Measuring Centers P26/P40

Klingelberg measuring centers (P-series) today are ideally suited to handle most measurement tasks in a wide range of sectors: Users in the automotive and commercial vehicle industries, the aerospace and aeronautical engineering industries, as well as the wind power industry rely on this technology, which replaces up to six conventional measuring devices. This allows the following measurement tasks to be fully automated in a single setup:

- Gear measurement
- Optical measurement
- General coordinate measurement
- Form and position measurement
- Roughness measurement
- Contour measurement

Bevel Gear Technology - Cutting Machines C30

The production process chain for bevel gears includes tool preparation, cutting, measuring, hardening, grinding or lapping and testing, among others. The powerful KIMoS (Klingelberg Integrated Manufacturing of Spiral Bevel Gears) design software and the Closed Loop concept ensure transparency and documented quality throughout the entire process chain. Oerlikon bevel gear machines were developed with real-world applications in mind and meet the varying demands of a whole range of application industries. The target markets include the automotive industry, the commercial vehicle industry, the agricultural industry, shipbuilding, and aviation, as well as industrial gearbox manufacturing and plant engineering.

Cylindrical Gear Technology - Grinding Machines Speed Viper

The Höfler Cylindrical Gear Technology division allows users to manufacture cylindrical gears with diameters from 20 millimeters up to 10 meters economically and with high precision. Moreover, thanks to decades-long expertise and great innovative strength, Klingelberg is able to maintain a leadership position not only through its high research and development standards, but also its in-house application engineering services. Klingelberg offers advanced technology and efficient machines for cylindrical gear manufacturing. The company sees itself as a solutions provider that supports its customers from gear design to quality assurance, in order to produce top quality gearing.

KSEP CO., LTD.

D1-8407

"KSEP" has been developing motors that can be used in various fields as electric propulsion aviation, electric propulsion ships and wind power generation. High efficiency eco-friendly electric Motors: Axial/Radial type, Outer/Inner type that satisfy the customer requirements of motor power and suitable for the usage environment. (1kW-150kW)

EXHIBITING COMPANIES

LANGFANG WEIHANG PLASTIC RPRODUCTS CO.,LTD

B3-565

Langfang Weihang Plastic Products Co. LTD was establish in 2003 year. It is located in Wenan country, Langfang city, Hebei province China. Our main product is Yellow Fish Plug , Shark plug , Aircraft Expansion Anchors , Butterfly Expansion Anchors , Cross , Clips , Wedge and others Tile Leveling System. Our main market is America , Dubai, Egypt, India, Indonesia, and Middle East market.. We hope to establish a long-term cooperative relationship in the future

Plastic anchors, wall anchors
size from M6-M10, long: from 30mm to 500mm

tile spacer, tile leveling system
size:1mm, 1.5mm, 2mm, 2.5mm, 3mm

shark plug, wall plug
size:M5, M6, M7, M8, M10, M12, color: any color can choose

LANTECH INTERNATIONAL

D1-8430

We can provide from Std. to customized special tools relating to End mills, drills, reamers, boring bits, PCD/CBN tools, and slitting saws, etc.

End mill
Specially designed for machining Steels, Formax, Acrylic, Polyamide(PA), ABS, PE, Acetal, Aluminum, wood, PET, HDPE, Polycarbonate

Drill
Customized special drills for general purpose, high hardness, heat resistance and tough materials.

Indexable tools
Indexable tools for hardened materials of mold steel machining.

LDK-DE YUAN SMART TECHNOLOGY (FUJIAN) CO.,LTD.

B3-5713

Core competence:

- IATF certified manufacturing, measuring & inspection facilities.
- Dedicated research & development center;
- OEM & ODM capabilities; Customization capabilities.
- Bilingual sales & service team with average +15 years.

Main product range:

- Pillow block bearings,
- Plastic bearing units,
- Stainless steel bearing units
- Plummer Block
- Rod End Bearings
- Hydraulic rod ends
- Spherical Plain Bearings
- Deep Groove Ball Bearings
- Roller bearings
- End fittings
- Adapter Sleeves

Pillow Block Bearings
Cast iron housing units
Ductile iron housing units
Pressed steel bearing units
Zinc alloy miniature bearing units

Rod end bearings & Spherical plain bearing
Stainless steel rod end bearing,
Carbon steel rod end bearings,
Spherical plain bearings
Chromoly heim joints
Ball Joints
Universal bearings

Plastic housing with stainless steel bearing
1) Thermoplastic housing made of reinforced PBT polymer. Available in WHITE, BLACK, GREEN, BLUE color.
2) Insert bearing made of stainless steel 440 or 420, factory lubed with NSF registered food grade grease.

EXHIBITING COMPANIES

LESOSHOPPE SDN BHD

B3-5532

Lesoshoppe Sdn Bhd is 100% owned by Leso Corporation which is affiliated to Elsoft Research Berhad, a KLSE public listed company. Established in 2011, Lesoshoppe has expanded its Malaysian network through its sales and service centres in Selangor, Penang, Johor, Sabah and Sarawak. 1-Stop Trade Portal Solution Lesoshoppe, a multi-award winning ICT company, is leveraging its strength in providing Internet Based Trade Portal Solutions for the Test and Measuring industry.

LESTARI ELEKTRIK INDONESIA

B1-4030

We are authorized distributor of many Industrial Electrical and Automation Brand in Indonesia such as : IDEC Japan, Kraus & Naimer, Fibox, Weintek, Fatek, ICPDAS, GIC India, Wulian Smarthome, Autonics, Onka, Avalue, Emas, Wintec, Loop, Secu6. We also provide engineering services for industrial automation and electrical panel installation

LISHUI CITY LIMA INDUSTRY AND TRADE CO., LTD

B3-574

J·LD Tool

Our company is a professional manufacturer of lithium electric wrenches, electric drills, angle grinders, and electric hardware tools. Our products are best-selling in countries such as China, Southeast Asia, Europe, and America. Our company has branches in countries such as Indonesia, Vietnam, and the Philippines. The JLD TOOL HUJIA tool brand has a great reputation in Indonesia, with warehouses and after-sales centers in Jakarta and Surabaya, providing after-sales assurance for product quality

Electric Wrench
This is the latest J88VF electric wrench, using a high-strength brushless motor with a lifetime warranty. The battery adopts the latest ETA lithium battery technology. The thick copper core brushless motor has strong power, a super large capacity intelligent control lithium battery, LED lighting, reverse self stop, super strong torque, suitable for internal and external frame construction, steel structure disassembly, tire disassembly, woodworking drilling and other purposes.

Electric Drill
This is the latest 48VF10PS brushless electric drill, using a high-strength brushless motor with a lifetime warranty. The battery adopts the latest ETA lithium battery technology. The thick purple copper core brushless motor has strong power, a super large capacity intelligent control lithium battery, LED lighting, reverse automatic stop, easy impact, flat drilling, and screw tightening, and a three function 24 gear adjustment with one button switch to meet multifunctional needs.

Angle Grinder
This polishing machine adopts German technology, high-quality copper core motor, high temperature resistance, fast heat dissipation, strong power to ensure stable operation without burning the machine, suitable for wall slotting, metal cutting, stone cutting, metal polishing and other multiple scene needs.

LISHUI GUANGYUAN POWER TOOLS CO., LTD

C3-7822

Tmaster

Lishui Guangyuan Power Tools Co., Ltd is one professional manufacturer of power tools, covers more than 100 kinds of products, such as angle grinder, Drills, circular saw, planer, sander, polisher, router, trimmer, hammer, Cut off machine and so on. Sincerely welcome new and old friends at home and abroad to visit us and to create a bright future together!

POWERPLANNER T-191
Rated input Power: 500W
Planing Width: 82mm(3-1/4")
Planing depth: 2mm(1/16")
No-load speed: 16000r/min
Rated Voltage: 220V

CIRCULAR SAW T-582
Rated input Power: 1050W
Blade diameter: 190mm(7-1/2")
No-load speed: 4900r/min
Rated Voltage: 220V~

JIGSAW T-431
Rated input Power: 450W
Capacity: Wood 65mm(2-9/16")
Steel 6mm(1/4")
Impact Length: 18mm(3/4")
Rated Voltage: 220V~
No-load speed: 0-3100r/min

LONGKOU CITY ANLI TOOLS FACTORY

B3-567

Our factory established since 1990, major in hardware tools and hand tools. We located in Longkou city, Shandong province, 200km away from Qingdao port. We have 50-100 employees and cover an area of 2000 square meters, our main products are: cross wrench, L-type wrench, T-type wrench, Y-type wrench, Spark-plug wrench and so on. All our products are produced according to the international ISO standard, all products can be customized as per clients' request.

Cross Wrench

Cross wrench, 4 sockets, regular size is 17-19-21-23mm, used for dismantling tires of cars. Different surface as following, powder, zinc, sand chromed and morror chromed.

T-type wrench

T-type wrench, size is 200*310*10mm, and sockets from 6mm to 19mm. Black surface and heat treated sockets, it is strong enough to handle all conditions.

Telescopic Wrench

Lug wrench which is telescopic, the length is 350-530mm, with 4 sockets, 17*19/21*23mm. Normal packing is blister card packing and double blister card packing, easy carry and durable.

MADE-IN-CHINA.COM

B3-5518

Established in 1998, Made-in-China.com is developed and operated by Focus Technology Co., Ltd. Being a comprehensive service platform for foreign trade, Made-in-China.com is committed to tapping business opportunities for Chinese suppliers and overseas buyers, and providing one-stop services for promoting the international trade between the two sides. So far, Made-in-China.com has more than 18.2 million registered users in 220 countries and regions with an annual visit of over 830 million.

Hydraulic Motor, Hydraulic Pump, Hydraulic Cylinder, Steering Control Unit, Heat Exchange, Hydraulic Valve

Hydraulic Motor, Hydraulic Pump, Hydraulic Cylinder, Steering Control Unit, Heat Exchange, Hydraulic Valve

EXHIBITING COMPANIES

MAHKOTA BANDUNG TEKNIK, PT

B3-5001

Mahkota Bandung Teknik (MBT) is a company providing heat treatment and ED coating services, as well as trading company providing consumables and parts needed for heat treatment services. Since our establishment in 2007, MBT has been prioritizing customer's satisfaction with our treatment processes that meets customer's requirement and has been making continuous improvement since them

JASA HEAT TREATMENT

Providing Heat Treatment Services including: Quenching Tempering (Oil or Water), Normalizing, Annealing, Carburizing, Carbonitriding, Induction Quenching Tempering

ED PAINTING

Providing ED (Electro Deposition) Coating to metallic items, generally used as a base coat. The process works by running an electric current to deposit the paint to the items.

TRADING

Providing supplies used in heat treatment processes such as: Quenching Oil, Anti Rust, Water Base, Steel Shot, Epoxy, Alumina, Jig, Tray, and Basket. We also have Toe Cap and Insert Plate used in safety shoes.

MAJU ADIL SEJAHTERA ,PT

D1-8010

PT. Maju Adil Sejahtera since 2000. During 25 years of experience with the support of the best technical team, cooperatives and customers, we have contributed to supplying machinery, woodworking equipment and equipment, dust collector systems, and other fabrication installations. We keep moving With all our achievements, customer satisfaction remains a top priority until now. we import machines from China and Taiwan.

Machine

CHUANGHENG Innovative upper slider with 4 guide rails, higher precision and longer service life, Whole frame fabrication, With heat treatment and polished. (In the market, standard are 2 rails type) The machine is worked by hydraulic up-drive. Ram parts contains ram cylinder. The fine-tuning structure of the mechanical block is external, driven by servo motor, which is controlled by the CNC system to control the angle. The left and right cylinders are fixed on the frame and the piston (rod) is hydraulically driven to move the ram up and down.

MARKSMAN MARKING SYSTEM

D1-8423

Industrial Dot peen and Fiber laser marking system in Korea. We have been providing qualified industrial marking system all over the world via 18 countries business partner.. Main customers are Hyundai, Kia motor and their 1st - 3rd vendors, GM, Volvo, Honda, Suzuki, Tata motor, Rolls royce and so on.

Battery operated portable marking system

The MKP-054 is battery operated portable marking capability with Blue tooth connectivity. MKP-054 marking machine is ideal for large fabrications and bulky, heavy and stationary parts on pallets. It supports linear, angler and cylindrical surfaces and 2D Data Matrix marking.

Stand alone marking system

Stand alone Dot peen marking machine "MK-300" are designed for small quantity and various kinds of marking. The "MK-300" has built in controller inside of marking head as stand alone marking machine. You can edit marking data with inbuilt keyboard or send it wirelessly to the marking head in seconds via Bluetooth and verify your variable data and setting on the built-in LCD

EXHIBITING COMPANIES

MAKITECH SISTEM INDONESIA, PT

D1-827

Makitech is a world-class manufacturer of conveyor systems, advanced distribution, material handling and logistics equipment with the headquarter located in Nagoya, Japan.

GRAVITY CONVEYOR

Gravity means "of gravity." This gravity conveyor is also called free roller conveyor, colococon, and soroban. Wheel conveyors are also called by various names depending on the industry and company, such as roller conveyors, roller conveyors, and rail conveyors. Rollers basically have bearings at both ends of the pipe and are supported by two bearings, whereas wheel conveyors have one bearing that contacts the conveyed object on its outer periphery, and the inner ring protrudes in the width direction and is supported by two bearings. It is in contact with Instead of rollers, wheel conveyors are often used side by side in two or three rows. Compared to rollers, they have less inertial resistance, so they slide easily, and their own weight is light, making them easy to move. Because it cannot be made very strong due to its structure, it is suitable for lightweight transportation.

BELT CONVEYOR

Makitech's series of mini belt conveyors is called Belgotchi. This Belgotchi was born in 1998, around the time when Tamagotchi became a big craze. There are four types of frame heights: 12, 34, 60, and 90 to meet all needs.

TABLE LIFTER

Table Lifter is a device that raises and lowers a table horizontally. It can be adjusted to the optimal height for work, can lift, lower and adjust the height of heavy objects in cases where it is difficult for people to lift it, and is used as a work chair in high places and for stacking on each other.

MATESU ABADI, PT

B3-560

PT. MATESU ABADI is an Industrial, Medical Gases, Gas Equipment, and Services Company. Established in 1989 as First Gas Filling Plant as a sole proprietor. 1991, Establish PT. MATESU ABADI. 1994, began a partnership with Shin-Ei for Respiratory-related medical products. 1995, built Acetylene factory and a new company, PT. SENTUL PRIMA GASINDO. 2008, entry into the CFNG market. 2009, open a filling station in Batam, PT.MIG GASES. 2010, Expanded in Surabaya , PT MATESU GOTTY ABADI.

Welding electrode
Good welding result

Welding machine
General purpose Welding machine 120 A, 400 A , MIG 500 A, TIG 250 A, TIG 400 A.

HARRIS WELDING PRODUCTS
The best welding equipment.

EXHIBITING COMPANIES

MATEX CO., LTD.

B3-5402B

Matex Co., Ltd. is designing, developing, manufacturing, and selling plastic injection molded products and planetary gear reducers. We have a sales office at Tokyo Japan, and mass production factories at Osaka Japan, Jiangsu China, and Laguna Philippines. Matex specializes in contract development, prototyping, and mass production according to customer's specifications using expertise of processing technologies of various materials, including metals (sintered and machined) and plastics.

Planetary Gear Reducer Unit

Matex planetary gear reducer unit is a product in which only the gear part of a general gearhead type is taken out and made into a unit. Therefore, you can build your original gear reduction mechanism using Matex planetary gear reducer unit, even if you have no knowledge of gear or gear reducers. There are standard line-up with outer diameter from 26 to 200 mm, and we have built a system that allows us to sell even 1 pcs. We are also flexible to customization, and can design, develop, prototype, and mass-produce products that meet your needs.

Plastic Injection Molding

We have mass production plants in Japan, China, and the Philippines, and our group has 165 injection molding machines. We can deal with from 5 tons to 1,000 tons of mold clamping pressure and a wide range of materials from POM to PEEK. Our specialty is mechanical parts, especially gears

EASYCLAMP (Mold Clamp)

"EASYCLAMP" is a mold clamp that has been a long-selling product of Matex and has been used for many years in domestic and overseas molding factories. By rotating the product body, EASYCLAMP can accommodate 4 different height mold bases without removing the bolt from the mold. This can contribute to reducing the time required to change molds.

MEDIA PNEUMATIC, PT

D1-8301A

Pneumatic Lubricants Products and Services since 2000. We are not just selling the Product but we are building the Trust. PT Media Pneumatic committed to provide genuine goods with good quality and the best service to all customer, competitive price and short delivery times also very important to our Company. We being the Leading Company in the supply of pneumatic and lubrication products, both in terms of good quality, price, prompt delivery time and best after sales services to the customer.

CKD

PT Media Pneumatic merupakan salah satu Distributor CKD. Brand Japan yang populer dibidang Pneumatic Pernah mendapatkan penghargaan For Sales No 1 Dealer Indonesia pada tahun 2019

E.MC Pneumatic

PT Media Pneumatic merupakan Sole Agent untuk Brand E.MC di Indonesia. E.MC merupakan brand China yang populer saat ini. Kualitas yang baik dan harga yang bersaing dengan brand ternama Festo dan SMC

Chenying Lubrication System

Selain Pneumatic, PT Media Pneumatic juga memiliki produk untuk sistem pelumas seperti oil pump (automatic & Manual). Seperti Hand pump, electric pump dan distributor oli lainnya. Chenying brand taiwan merupakan produk andalan PT Media Pneumatic untuk Sistem Lubrikasi

MELZER GLOBAL SEJAHTERA, PT

B3-5716

PT. MELZER GLOBAL SEJAHTERA established since October 2009, With the goal to provide product with "MELZER" & "DCA" brand. Focusing to provide best product solution for Welding Equipment, Machinery, Lifting Equipment, Material Handling, Storage System, Abrasive & Finishing Product, Machine Tools Accessories, Cleaning Equipment, Power Tools, Hand Tools, Air Tools, Painting Equipment, Air Compressor, Safety & Protection Equipment, Lighting, etc

DCA Power Tools

DCA, owned by Dongcheng Company, is a brand of professional grade power tools, which is committed to manufacturing high-quality professional grade power tools. DCA power tools are manufactured according to rigorous production standards, and are widely used in the fields of building construction, home decoration, stone processing, shipbuilding and water conservancy projects. With exquisite technology and good reputation, DCA has become one of the most competitive professional power tools brands in the market. In the future, DCA will continue adhering to the mission of "Professional Power Tools, Keep Improving Unceasingly" and innovate constantly to provide good quality products and satisfying services for global users.

EXHIBITING COMPANIES

MENAM STAINLESS WIRE PUBLIC CO., LTD

D1-854

Menam Stainless Wire was established in 1991. Over 32 years of continual research, development and improvement. MENAM is now recognized as a world leader of Cold Drawn manufacturer of Stainless Steel Wire and Bar. Our 2 Main products category

- Stainless Steel : Wire, High Precision Bar, Profile Wire, and Stainless Steel welding consumable TIG and MIG
- Alloy and Carbon Steel: Free Cutting Steel, Carbon Steel and High Carbon Chromium Bearing Steel

Stainless Steel and Alloy Carbon Steel

- Stainless Steel : Wire, High Precision Bar, Profile Wire, and Stainless Steel welding consumable TIG and MIG
- Alloy and Carbon Steel: Free Cutting Steel, Carbon Steel and High Carbon Chromium Bearing Steel

METALLIZING EQUIPMENT COMPANY PVT. LTD

D2-8902

A wide range of thermal spray system equipment like Plasma Spray, HVOF Spray, ARC Spray, Flame Spray etc. is available for providing coating solutions. MEC manufactures Turnkey systems for Surface Preparation / Surface Finishing Equipment like Shot & Grit Blasting, Dry & Wet Shot Peening Machines. The product portfolio also introduces Auxiliary Equipment like Job Manipulators, Gun Manipulators, Acoustic Chambers, Dust Collector Systems, Thermal Spray Wires, spray powders, masking tapes etc.

ARCJET 99/400 ARC SPRAY SYSTEM

The MEC Arc Spray Unit; Model: 99/400 is a reliable and robust system that has the following features:

- This system is designed to process all conductive wires relevant to thermal spray, solid wires, and cored wires.
- New technology of the power source is a combination of advanced control and supply circuits that deliver stable voltage to wire and allow the system to spray any conductive wire at the lowest possible voltage. This increases energy efficiency.
- High-Velocity Arc Spray (HVAS) Technique which is useful to get low porosity, high-quality coating at the most economical cost.

HVOF SPRAY SYSTEM, HIPOJET 2700

MP 2100 "HVOF" SPRAY SYSTEM equipped with HVOF spray gun to deposit wear and corrosion resistant coatings on materials, such as ceramic and metallic layers. Common powders include WC-Co, chromium carbide, MCrAlY, and alumina. The process has been most successful for depositing cermets materials (WC-Co, etc.)

METALTECH ENERGI CAHAYA, PT

B3-5823

PT Metaltech Energi Cahaya is one of the most trustable and reliable name in Indonesian market for surface preparation (abrasive blasting) and metal spray coatings (HVOF, ARC, Plasma...etc) in respect to supply leading by experienced leaders to serve the clients 24x7 non stop.

ARC SPRAY SYSTEM; AMST-8830AR/400

AMST Arc Spray System; Model: 8830-AR/400 is most trustable coating machine now a days in Indonesia as it is ROBUST, USER FRIENDLY and TO GET PERFECT COATING

MACHJET-I HVOF SYSTEM

AMST MACHJET-I PORTABLE HVOF POWDER SPRAY SYSTEM is best HVOF machine. It is user friendly and coating results achieved by this machine are superior compare to other models available in market

EXHIBITING COMPANIES

MINDMAN INDUSTRIAL CO., LTD.

B2-4603

Mindman Industrial Co., Ltd. was established in 1979 with a destination to provide high quality pneumatic automation components for a wide variety of industries. We are proud to possess the diversified product lineup includes solenoid valves, air treatment units, pneumatic cylinders, electric actuators and all different types of fluid power accessories. In the vast automation market, Mindman will spare no effort in establishing a brand – a world-class premium automation components supplier

Fieldbus system

- Solenoid valve can match different modules, like IO-Link, MRL, Modbus-RTU
- Quick tube fittings can be installed.
- Fast troubleshooting thanks to multi-angle LED display
- It is easy to repair due to solenoid valves can be replaced simple and fast.
- Labor cost can be reduced
- Reduce error of wiring
- Web server function
- The voltage is DC24V.

Automatic Tool Changer

- High rigidity locating pins with special treatment for good service life.
- Tapered locating stud for high locating accuracy.
- Repeat accuracy $\pm 0.015\text{mm}$.
- Ejection mechanism for releasing base plate (R) and tool plate (T).
- Self-locking mechanism for preventing plates from ejecting when pneumatic source was accidentally removed.
- Accurate connection change with electric module to avoid manual operation mistakes.
- ISO flange for easy-mounting on most of the robot arms.

Digital Flow and Pressure Sensor

- Flow and pressure 4 digit, 7 segment dual LCD display.
- 8 digit accumulated flow rate display
- Real-time monitoring
- RS485 Modbus control.

MISUMI INDONESIA, PT

D1-8602

MISUMI is a leading manufacturer and distributor of standard components for engineering. We are renowned globally for its high quality, fast delivery, low prices and convenience of easy one-stop shopping. With our newly established MISUMI INDONESIA, we will provide better services to our valued customers in Indonesia, enabling customers to enjoy shortened lead time in design/ assembling machines and toolings. We believe that all our customers will be satisfied by our supply and services.

ALUMINIUM FRAME E-SERIES

Aluminum Frame products of various sizes and accessories with the best quality specifications & competitive prices. Stock items ready to ship

LINIER MOTION E-SERIES

Linier Motion Economy Series available from Linear Guides, Linear Shafts, Linear Bushings to Actuators with the best quality and competitive prices

PNEUMATIC E-SERIES

PNEUMATIC Economy Series ready stock with wide variety product such as Fitting, Tubes, Solenoid Valves, etc

EXHIBITING COMPANIES

MITRA CIPTA HARDI ELEKTRINDO, PT

B3-559

With the tagline 'One Stop Solution for Your Electrical Needs', PT. Mitra strives to present all products and what customer service needs for mechanical and electrical components in one company. It makes PT. Mitra trusted as suppliers for large property projects in the country. Some of our clients are Sinar Mas Land Limited, PT. Astra Daihatsu Motor, PT. Bank Mandiri (Persero) Tbk., PT. Wilmar Group, PT. Nestle Indonesia, PT. Pfizer Indonesia, PT. Indocement Tunggul Prakarsa Tbk and retailers.

KÄRCHER

Starting in 2019, the Jakarta Kärcher Store & Service Center has been opened and started to operate as a store of the most complete range of Kärcher products, as well as the official Kärcher service center. Located in a strategic location in the Central Jakarta area, this area is easy to reach by private vehicles and public transportation, precisely at the Harco Mangga Dua complex, Blok C, No. 1 Jl. Mangga Dua Raya, Jakarta Pusat 10730

CHEETAH

To meet the needs of the Indonesian industry and the need for work safety, here are safety shoes that specialize in vulcanized rubber outsole and polyurethane with the Cheetah trademark. Can be used for daily activities or for work in industrial areas.

HIKVISION

Hikvision is the World's leading manufacturer of innovative technology solutions. Hikvision is expanding its reach to smart home technologies, industrial automation, and automotive electronics industries, audio and video encoding, video image rendering, and related data storage, as well as forward-looking technologies such as cloud computing, big data.

MITRA HITECH INDOTAMA, PT

B3-5826

Perusahaan profesional yang bergerak dibidang alat ukur yaitu timbangan digital, checkweigher, metaldetektor, dan juga aplikasi system atau software pendukung timbangan digital. Kami membantu para pelanggan kami dalam hal memberikan solusi penimbangan serta sistem record data transaksi penimbangan adapun timbangan digital yang kami miliki terdiri dari beberapa kebutuhan untuk dilaboratorium, produksi, jembatan timbang, dan didukung oleh tenaga teknis yang berpengalaman.

Software Penimbangan Industry

Software penimbangan industri merupakan software yang didesain untuk memenuhi kebutuhan industri di era 4.0 yang di tuntut terkait integrate data, keamanan data serta pencatatan data secara manual/tulis tangan menjadi terecord by system secara real time. Software penimbangan industri yang MHI tawarkan terdiri dari software counting, software premix, jembatan timbang, quality controlsertagudanginboundatau outgoingyang semua software mampu terintegrate ke satu server perusahaan atau SAP/ERP perusahaan. Software memiliki login acces atau security yang membuat tidak semua orang mampu untuk mengakses reporting data yang membuat keamanan data terjaga. Pengupdatean master dan pengoperasiannya mudah serta mampu untuk mengefisienkan waktu kerja.

CHECK WEIGHER

Pada divisi finish good industri farmasi ataupun food baverage sering terdapat permasalahan pada barang yang akan di distributorkan. Masalah biasanya berkaitan pada jumlah kapsul dalam satu botol ataupun jumlah ml untuk industri food and beverage. Untuk mengatasi hal tersebut, perlu peralatan untuk mengecek produk. Check weigher merupakan peralatan yang berfungsi untuk mengecek produk yang di lengkapi oleh konveyor serta rijector. Produk yang berjalan pada konveyor akan di deteksi oleh sensor untuk mendapatkan data berat. Apabila berat yang terbaca kurang/ lebih dari berat standar produk maka rijector otomatis akan menggeser produk tersebut dari konveyor. Sehingga output dari checweiger adalah produk yang lulus pengecekaan. Check weigher mampu untuk di setting dalam 1 menit berpa produk yang terlewat. Misalnya dalam 1 menit 1000 produk yang terlewat. Sehingga hal ini menguntungkan bagi perusahaan dalam mempercepat pendistributoran produk, packing serta tidak ada kesalahan dalam isian produk.

Timbangan Industri dan Indikator Timbangan

VIBRA menyediakan empat mode penimbangan, pengukuran berat sederhana, penghitungan komponen, persentase penimbangan, dan pengukuran karat untuk perhiasan sehingga dapat dengan mudah mengganti mode penimbangan dengan menekan tombol fungsi. Respon cepat dan indikasi stabil merupakan fitur penting dalam pengukuran berat benda/part yang tepat di lengkapi rs232 sebagai komunikasi data dengan Sensor garpu tala atau Tuning Fork Sensor inovatif yang membuat tahan lama. Selain itu portabilitas tinggi, Housing yang ringkas, Desain hemat ruang memungkinkan memasangnya bahkan di ruang kecil Sedangkan Indikator B19S merupakan indikator dengan kecerahan dapat di atur, memiliki fungsi animal weighing sehingga cocok untuk weighing beams serta memiliki kapasitas hingga 3 ton yang memungkinkan digunakan dalam penimbangan floor scale. Selain itu indikator juga mampu untuk di gunakan sebagai bench scale dengan variase plat full stain less steel atau biasa dengan ukuran plat dapat di custome Sehingga cocok untuk industri food and beverage.

EXHIBITING COMPANIES

MITSUBISHI ELECTRIC INDONESIA, PT

B1-4302

Applying advanced technology to make changes for the better – all around the world. Our corporate statement, "Changes for the Better," encapsulates all that we stand for and aspire to: a brighter future for society, industry and everyday life through innovation. For 100 years, we have helped create a brighter tomorrow globally through our cutting-edge technologies.

Digitalization for Smart Manufacturing

Industry 4.0 or Smart Manufacturing is indispensable for future manufacturing growth. While many corporations understand the importance of automation, they sometimes struggle to make it a reality. Mitsubishi Electric utilizes digital technology to connect the entire manufacturing life cycle with the aim of optimal and flexible manufacturing to address uncertainty to realize the smart manufacturing in the factory. Utilizing Smart Manufacturing through digitalization solution by integrating the FA and IT technologies, we are able to improve production efficiency, reduce the total cost of development, production, and maintenance, continue to support customer improvement activities, and propose solutions that aim for production that is one step ahead.

High-performance Die-Sinker EDM SG-28

Sensing technology (D-CUBES) and AI technology (Maisart) optimize machining in real time.

1. IDPM3

*Machining speed is up to 50% faster with the combination of highly accelerated (1.6G) jump control and adaptive control "IDPM3".

*Suppresses edge wear enables single electrode machining. Electrode cost, setup and machining time are significantly reduced.

2. Maisart

*Optimize the jump length according to the machining dimension and shape.

*Automatically recognizes distinct depth of machining to improve stability.

*Plunge machining reduces machining time by up to 30%.

Numerical Control (CNC) Remote Service (iQ Care Remote 4U)

Supporting manufacturing sites with IoT. Remote service that supports maintenance of CNC through Mitsubishi Electric e-F@actory. Quick implementation of remote service and accumulation of machine operation data using the cloud.

1. Dashboard function helps you improve production process and reduce running cost.
2. Reduced machine downtime. Quick response when trouble occurs
3. Remote monitoring. Check the machine and factory condition through the internet using laptop or mobile phone.

MITSUBOSHI BELTING SALES INDONESIA, PT

C3-736

Mitsubishi Belting Ltd Corporate Outline "To Give attentive Consideration to Both Humanity and Nature". Mitsubishi Mutual Trust and Confidence with High Performance, High Precision and High Quality Products

Power Transmission Belt and Conveyor

High Precision transmission belt are used in all Industries and in equipment ranging from automobiles to industrial machines, precision equipment, office automation equipment and household appliances. We have enhanced the heat Resistance, oil resistance and other properties of our automobile transmission belts to extremely high levels machines. A Variety of things are carried with Conveyor belts. Required functions and characteristics are diverse, and the conveyor belts have developed with social progress. At iron and steel, cement, and material conveyance sites, heavy duty rubber belts are useful. Light conveyor belts, "Mama-Line series", bring safety and hygiene to light duty conveyance: food products conveyance and food products manufacturing. In addition, for logistic terminals, delivery centers of distribution industry, and conveying check-in baggage in airports, logistic use light conveyor belts, "LOGISTAR series" which help to improve working environments by speeding up and having low noise.

Mitsubishi Engineering Plastic (MEP)

Essential to variety of equipment that support today's information society is functional plastic part. Plastic is use here and there in our daily lives throughout society; in particular, it contributes to industry machines development and improved performance. Compared with metal. It is extremely useful material because of its light weight, low noise, oil less and maintenance free characteristics.

Waterproofing Material

Providing waterproof construction materials that are not harmful to people or the environment Mitsubishi Belting offers a wide range of waterproof materials capable of supporting various building needs, from vulcanized rubber waterproof sheets made utilizing a waterproofing restoration method for metal roofing that is mainly for covering and restoring metal roofing to a variety of other resin-based sheet waterproofing materials and paint-based waterproofing materials.

EXHIBITING COMPANIES

MONITOR ERP SYSTEM SOUTHEAST ASIA PTE. LTD.

B2-440

Monitor ERP, a complete ERP system optimized for manufacturers since 1974. As a market leader in Sweden, we've empowered over 5,500 companies across various sizes and manufacturing industries while guiding more than 160 customers in Southeast Asia to achieve world-class production standards. Our commitment extends to developing innovative and sustainable solutions to help you reach your sustainability goals and more responsible production. Join us at Hall B2, Stand 440 for a Monitor ERP demo.

Monitor ERP

Monitor ERP is an award-winning manufacturing ERP system, developed with over 50 years of experience and user feedback to effortlessly fit your unique processes. Monitor elevates your production quality and efficiency by seamlessly integrating six key modules: Manufacturing, Purchase, Sales, Stock, Time recording, and Accounting, covering every facet of your manufacturing company's operations. What sets our software apart is its user-friendly interface and cost-effectiveness. It provides real-time control over your shop floor operations and introduces the capability to perform sustainability calculations through "Sustainability by Monitor". With this powerful tool, you can plan and calculate your CO2 emissions at the component level, ensuring alignment with international standards and regulations, empowering you to make informed, sustainable decisions for your business.

MOTOLOGY ELEKTRIK INDONESIA, PT

C3-7831

PT. MOTOLOGY ELEKTRIK INDONESIA IS SOLE AGENT OF INDUCTION ELECTRIC MOTORS IN INDONESIA. We specialize in all types of IEC Standard induction motors, both single phase and three phase (IE1) as standard stocks. Our aim is to supply to our customers in Indonesia high quality motors at VERY competitive prices. All our motors comes with a 1-year warranty against manufacturing defects. We Provide WP gear and Helical gear with good quality and Excellent services."

Helical Gear Reducer

Based on the modular system design, can be easily equipped with various forms of motor or other power input. The same type of machine can be equipped with a variety of power motors. Easy to achieve the combination of various types of connection. High Efficiency, single type reducer efficiency as high as 96%. Transmission is divided into fine, wide range. Combined model can form a larger transmission ratio. Low output speed. Various installation forms, can be any position of horizontal or flange installation.

Precision Planetary Gearbox

Small volume, light weight, high bearing capacity. Long service life, smooth operation, low noise. The output torque is big, the speed ratio is big, the efficiency is high, the performance is safe.

YNMRV Series Worm Gear Reducer

Reducer Model 25 -90 using high-quality aluminum alloy die-casting box, light and beautiful shape, compact structure, small size, light weight, save installation space, not easy to rust. Reducer Model 110-150 using gray cast iron aluminum mold casting, the appearance of beautiful and strong, can be installed in various directions. Good heat dissipation performance, safe and reliable. High efficiency. High bearing capacity, stable transmission, small vibration, low noise. A variety of power input and torque output connection structure, to meet a variety of connection needs. The shape design of the box body and the layout of the bottom hole are suitable for a variety of installation methods, and the utility model has strong versatility.

WP Series Worm Gear Reducer

Product features Widely used in light industry, good wear resistance, high dimensional accuracy, low noise, advanced central casting. High hardness shell, compact structure. The transmission is stable. The vibration is small, the transmission ratio is big, may match with each kind of machine.

Helical Gear Reducer-R Series

Based on the modular system design, can be easily equipped with various forms of motor or other power input. The same type of machine can be equipped with a variety of power motors. Easy to achieve the combination of various types of connection. High Efficiency, single type reducer efficiency as high as 96%. Transmission is divided into fine, wide range. Combined model can form a larger transmission ratio. Low output speed. Various installation forms, can be any position of horizontal or flange installation. Parameters Size 17, 27, 37, 47, 57, 67, 77, 87, 97, 107, 137, 147, 167 Ratio 3.83-229.71 Power (kw)

Imajin offers complete end-to-end manufacturing solutions, specialize in mold and die making, custom part production, metal stamping, fabrication, and specialized machining. These services supported by our project management software (SaaS) to facilitate realtime monitoring. We can help you create new product from prototype to mass production. Imajin boosts local production by connecting SMEs in manufacturing and ensuring the products meet global quality standards.

NANJING CUH SCIENCE & TECHNOLOGY CO., LTD

B1-4016

CUH[®]

Nanjing CUH Science & Technology co.,Ltd, (known as Nanjing CUH, or abbr CUH) is a global leader in the R&D and manufacturing of vibratory feeder controllers. Since its establishment in year 2003, CUH has grown to become the manufacturer of vibratory feeder controllers in Asia. With over 130 employees, CUH is committed to providing innovative total solutions including drive, control, sensing, communication, sorting to meet various personalized needs of the automated feeding industry.

Vibratory feeder controller SDVC311-M

The output frequency range covers 5.0Hz to 400.0Hz with 0.1Hz accuracy. Brake function to quickly stop the vibratory feeder by shifting the current phase by 180° during the soft-stop process.

SDVC34-MR

Automatic Constant Feed Speed Control, Automatic Frequency Adjustment, Automatic Resonant Frequency Search, Counting, Rs485 Communication, Automatic Switch Sensor Type Recognition, Sync Output, Overvoltage Protection Digital Overheat Protection, Overcurrent Protection, Restorable Short Circuit Protection

SDVC61-M

SDVC61 series intelligent low-voltage flexible vibration feeding controller is a product specially designed for the flexible feeding system of voice coil motor.

NANTONG SHENGQIANG MACHINERY MANUFACTURING CO. LTD

B3-5812

Nantong Shengqiang Machinery Manufacturing Co., Ltd. was established in 2012, located in Jiangsu, China, is a modern factory specializing in the development and production of air compressors and power tools.

air compressor

Air compressor is a kind of equipment used to compress air and provide kinetic energy, which is directly driven by the motor or diesel engine compressor, and the air is compressed to a certain value in the air storage tank after sucking in air, causing the cylinder volume to change, thereby generating pneumatic energy.

Lithium battery tools

Cordless lithium drill is a portable battery-type DC power tool. It basically resembles a pistol and is easy to hold. By clamping various types of drill bits in the front, various functions can be achieved, including drilling and screwing

NINGBO GUOTEN INDUSTRIAL CO., LTD.

Established in 2006, Ningbo Guoten Industrial Co., Ltd. is a leading professional manufacturer and exporter of PVC cutters, pruning shears, hand saw, electric pruning shears, cordless chainsaw, and other professional agriculture & garden tools in Ningbo, China. With more than 16 years' know-how experience of manufacturing and exporting goods in the area of agriculture & garden tools. Our own professional R&D team and after sale service team. We are looking forward to working with you.

Electric Chainsaw

CS088 newly upgraded electric chain saw, adding a lubricating oil system on the original basis, which is more convenient to use, maintenance of blades and chains. The cordless mini chainsaw is equipped with two large-capacity 21V batteries. This kind of battery operated chainsaw only takes two hours to fully charge the battery chain saw. Say goodbye to the traditional annoying power cord and ensure the consistency of work during operation.

Electric Pruning Shears

W35A with its compact and lightweight design, is especially suitable for women and the elderly. The lithium cordless pruning shears can be easily trimmed and allow you to enjoy the trimming process. The branches 0-35mm in diameter can be cut with a simple hook.

NOVACEL S.A.S

D1-850

As a leader in its industry for more than 40 years, Novacel constantly focuses on expertise and innovation in order to provide its customers and partners with the most appropriate surface solutions to preserve the value of their materials worldwide. Offering a complete range of technical films, tapes, papers and machines, we can assist you throughout your industrial processes in all market segments

Novacel 4228 REF

Description "Novacel 4228 REF is THE worldwide reference of processing film during Fiber and CO2 LASER cutting

- >Cutting in one step, and at full speed
- >No bubbling or lifting
- >Suitable for both Fiber and CO2 technology
- >Clean edge, no shrinkage
- >Premium adhesion for reliability during the process but also eliminates a step

Novacel Oxygen Vegetal 3030 GAB

Produced with plant feedstock thanks to the Mass balance approach, the 3030 GAB Vegetal is the most eco responsible solution of the Oxygen Range. It reduces the carbon footprint by 35%! Suitable for laser cutting of stainless steel, aluminium and all types of mechanical transformations.

- Very high level of adhesion
- Suitable for both Fiber and CO2 LASER.
- LASER Cutting in one step, at full speed.
- Satin backing for automatic pile-off system.
- Worldwide outdoor guarantee of 6 months.
- Fossil resources saved : 30% of vegetal oil
- Lower carbon footprint : -35% CO2 eq
- Recyclable

BN 7000

The Novacel BN 7000 is a double sided repulpable tape. It is used for high speed flying splices on coaters in the paper industry. It has a thickness of 100µm / 3.9mil.

SEKWANG SELUX CO., LTD

D1-8431

Excellent Precision, Excellent Quality

SEKWANG CO., LTD is the leading manufacturer of machining tool holder. SEKWANG SELUX CO., LTD has manufactured the machining tool holder more than 40 years. We has produced all kinds of the tool holder, collet, pull stud bolt in our factory with keeping stock and We always have earned an excellent reputation in manufacturing tools of high quality and grown up our sales volum.

SHRINK FIT HOLDER

1. 3 (T.I.R) Run-out at 4D away from shank nose.
2. Excellent Run-out accuracy and powerful clamping.
3. Optimal operation with slim and symmetrical design.
4. All products can be used for center through coolant type.

HYDRAULIC CHUCK

1. SELUX HYDRAULIC CHUCK can be easy clamp and unclamp using just one T-Wrench and very convenient to exchange cutting tools.
2. SELUX HYDRAULIC CHCUK boast a wide variety of uses as holder for precision finishing operation
3. SELUX HYDRAULIC CHUCK ensure high precision runout accuracy is less than 3 at 4D (T.I.R) and has been designed and optimized for high speed machining. (Max G2.5 at 25,000 rpm)

MILLING CHUCK

1. SELUX MILLING CHUCK is chucking and unchucking just whith 2 revolution
2. As it has "O-RING" between body of milling chuck and CAP, SELUX MILLING CHUCK do not have vibration and has extreme rigidity.
3. 5 (T.I.R) RUN-OUT at 3.5D away from shank nose. Two face contact cause to be the optimal cutting operation because of vibrational absorption.

NUTECH INDUSTRIES INDONESIA, PT

C3-6830

NUTECH as Storage Solution Specialist For over 33 years, the team at NUTECH continues to produce a comprehensive, top quality range of shelving and racking system to meet the diverse needs of today's market place. From consultation, design, production, and project installation, NUTECH has done it all.

Shuttle Rack

Shuttle racking is a new kind of storage management systems, with high density storage racks and shuttle cars working with forklifts to provide a new concept of loading and storage pallets. This concept utilizes the warehouse spaces more efficiently and is more flexible compared with traditional storage methods. Benefits of storage and retrieval rates can be increased by adding additional pallet shuttle units.

100% of available space is optimized. This automated storage system makes the most of limited space and forklift truck fleets.

Compatible with both FIFO and FILO rotation, suitable for manufacturing business with high throughputs such as FMCG, Food, Beverage, Semi-conductor, Rubber Gloves, Condom, and more.

Forklift no longer needs to enter the rack - reduces labor and material handling cost; eliminated damage on stored goods; improves throughputs. The time and money saved from this investment, in turn, generates more profit for the company

Very Narrow Aisle (VNA) Pallet Rack Systems,

In Very Narrow Aisle (VNA) Pallet Rack Systems, the space separating parallel rack units is greatly reduced, and pallets are placed and retrieved using a side loading fork truck aka. VNA Reach Truck. This minimizes the size of the aisles between rows of racks and can reduce the aisle space by around 40%. A super flat floor is required. The racking system is designed around the operating tolerances of your chosen Very Narrow Aisle (VNA) handling equipment with aisles marginally wider than the load. While these trucks are often more expensive than standard forklifts, using narrow aisles can give you major savings on building costs by allowing you to store more with less space. Pallets in very narrow aisle systems are 100% selective. With VNA racking, access to stock is uncompromised and the amount of product stored in the warehouse is maximized. It is an effective method of increasing pallet storage within a given area. Your storage capacity can be increased by an additional 40% over Selective Pallet Rack (SPR) by choosing VNA.

Drive-In Rack

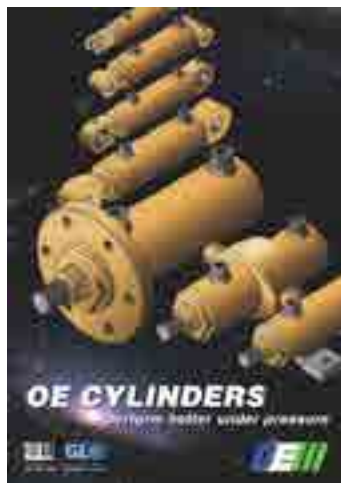

Drive-in Pallet Racking provides maximum storage capacity using the minimum amount of space. It is particularly suited to store a very large quantity of the same product. Loading and unloading are undertaken by means of counterbalance truck or reach-trucks that drive down each lane into the racks. This racking system is most suitable for manufacturers of products that are produced in batch, or in warehouse operation where there are limited products SKU and pallets cannot be safely blocked or stacked. Frequently used in cold stores (refrigeration and freezing) which require maximum use of space for the storage of products in a controlled temperature

O.E. MANUFACTURING PTE LTD

D1-8110

Established in 1996 | Setting Industry Standards for Over 27 Years O. E Manufacturing Pte Ltd, your trusted partner in high-pressure hydraulic solutions. With a legacy spanning over two decades, we have consistently delivered excellence in hydraulic cylinders and HPU, earning the trust of international companies such as Danfoss, Bosch Rexroth, Hydac, and Parker, to name a few. We have factories located in Singapore and China. Office in USA and Japan. Distributors in various cities in ASEAN.

Hydraulic cylinder / Power unit

Hydraulic cylinder
Bore: 25mm-800mm
Stroke: Up to 8000mm
Max pressure: 350 bar max
Hydraulic Power Unit (HPU)
Design: According to your specification.
Max 50 HP

Compact Hydraulic Power unit

AC/DC powered compact design for OEM. Competitive price, x-stock in Singapore factory

Ceramic coated hydraulic cylinder

The most corrosion resistant hydraulic cylinder now make in OE Singapore factory.

EXHIBITING COMPANIES

OERLIKON BALZERS ARTODA INDONESIA, PT

B3-5017

**oerlikon
balzers**

Oerlikon Balzers, world-leading provider of surface technologies, develops solutions and equipment and offers services to considerably improve the efficiency and longevity of precision components and tools for the metal and polymer processing industry

BALINIT FORMERA

The die casting industry is constantly facing new challenges in terms of die-cast part tolerances, requirements for surfaces, cycle times, and casting tools of which more and more is demanded. The exceptionally hard, extremely erosion and wear-resistant coatings from Oerlikon Balzers are a significant factor when it comes to protecting the mould from soldering and premature fire cracks. BALINIT® FORMERA plays a major role in stabilising the casting process and in reducing both maintenance costs and waste material

REGRINDING

For outstanding results full reconditioning from one single-source Take advantage of our top service for your high-performance round tools

BALINIT ALTENSA

BALINIT ALTENSA Speed pays off The high-speed solution for productive gear cutting

OPTICAL GAGING (S) PTE LTD

D1-8106

PT. Win Sarana Perkasa was established in Indonesia owned by a local who also based in Indonesia. We are the official Representative/Agent/Distributor of Optical Gaging Products (OGP) in Indonesia. Today we meets the metrology needs of manufacturers from manual inspection to fully automated. With the support from headquarters based in Singapore, we successfully introduced SmartScope® System and wide product range for Quality Control and Assurance in Indonesia

OGP (Optical Gaging Products)

OGP® offers precision video and multisensor coordinate measuring systems used for dimensional inspection, designed and manufactured at our corporate headquarters in Rochester, NY, USA. We have over 70 years of industry experience.

The products we make fit a range of categories: multisensor metrology, optical inspection, video measurement, laser scanning, and more.

ORIENTAL MOTOR ASIA PACIFIC PTE. LTD.

B2-442

Orientalmotor

Oriental Motor was incorporated in 1950 in Japan. We specialize in the manufacturing and sales of industrial motors, controllers, motorized actuators and thermal management products. Our products are designed, manufactured and shipped directly from Japan.

AZ Series

AZ Series (STEP Servo Stepper Motor)

The AZ Series is a Stepper Servo motor that has a built-in absolute ABZO sensor which provides a battery-free absolute system and the driver uses STEP system. Together, it combines ease of use with reliability and provides high performance, high reliability and space-saving features

BLV Series R Type

BLV Series R Type (Brushless Speed Control

The BLV Series R Type is a brushless motor with a DC power input that is even smaller and lighter than other speed control products. It offers low-speed operation from 1r/min and can be set to achieve a smooth drive. It is battery-powered and supports the development of more compact devices. It supports Modbus (RTU) and CANopen communication.

EZS/EAC Series

EZS/EAC Series

The Motorized Linear Slides are positioning Linear Slides that adopt AZ Series motors, composed of frames; guide rails; guide blocks; and ball screws. These motorized linear slides are capable of accurate and precise straight-line motion due to the rotation of ball screws and guides.

EXHIBITING COMPANIES

ORSKOREA LLC

D1-8403

ORSKOREA has secured competitiveness through 25 years of technical development by experienced engineers. It is internationally recognized for its quality and is known for offering high-quality products at competitive prices. Our product characteristics: [Grinding Machines]

- *High-precision machining for high-value-added parts
- *Automation of production feasible
- *Customization available [Spindles]
- *High speed up to 120,000rpm
- *Low noise & low vibration
- *Customization available
- *Repair service

Centerless Grinding Machine

A machine equipment that uses a fixed grinding tool to grind the surface of a rotating workpiece without rotation. Applicable materials: Bearings, Shaft, Compressor Sleeve, Common Rail Pump, etc.

Double Disc Surface Grinding Machine

A machine equipment that utilizes two grinding wheels to simultaneously process both sides, making it suitable for processing various materials. Applicable materials: Bearings, Connecting Rod, Vane, Electronic Parts, etc.

Internal/External Grinding Machine

A machine equipment with the capability to grind internal and external diameters to achieve precise shapes and surface quality. Applicable materials: Bearings, Gear, Gauge, Chuck collect, etc.

OSAKA BUSINESS DEVELOPMENT AGENCY

B3-5402

Osaka Business Development Agency (OBDA) is an organization supporting business of Osaka-based small and medium-sized enterprises (SMEs). Osaka has many small and medium-sized companies with unique technologies and craftsmanship skills, and those companies have been long supporting Japan's leading businesses for many years. Please visit us for highly-sophisticated technology, processing skills and superior services, and maximize business opportunities together!

OTOMASI BERSAMA INDONESIA, PT

B1-4217

Otomasi adalah Perusahaan Teknikal Servis, Perawatan Mesin CNC dan Otomasi yang terintegrasi. Satu-satunya distributor resmi Syntec CNC kontroller di Indonesia dan berada dalam naungan Syntec Technology yang berpusa di Hsinchu, Taiwan.

Syntec serial Solution untuk Mesin CNC

Syntec CNC
CNC Bubut & Milling
Yaskawa Servo
Leantec Roboti

Leantec Robotic

Robot adalah sebuah sistem mekanik yang mempunyai fungsi sebagai menggerakkan analog yang berfungsi untuk gerak organisme dan kobinasi dari banyak fungsi

PACIFIC RUBBER WORKS CO., LTD.

D2-9130

PACIFIC RUBBER WORKS HAS BEEN MANUFACTURING AND EXPORTING RUBBER AND PLASTIC PRODUCTS FOR OVER 80 YEARS, WITH STRONG GLOBAL NETWORK. OUR MAIN PRODUCTS AND SERVICES ARE RUBBER AND PLASTIC COMPONENTS USED IN THE AUTOMOTIVE, ELECTRONICS, MEDICAL EQUIPMENT, FOOD PRODUCTS, AEROSPACE INDUSTRY, AND MANY MORE.

Rubber and Plastic Parts for Automotive

Lightweight design for improved performance, exceptional strength and durability for demanding applications, and precision-molding for greater design flexibility.

Rubber and Plastic Parts for Electric & Home Appliance

Excellent insulation properties for safety and energy efficiency, exceptional strength and durability for reliable operation moisture and chemicals precision-molding for production quality and enhance appeal.

EXHIBITING COMPANIES

PAIONIA FURYOKUKI CO., LTD.

D2-9114

Paionia Furyokuki

PAIONIA FURYOKUKI is a company of particle contamination control devices. The need to create clean environment has become a subject of importance for many industries. For example, introduction and operation of the system of HACCP requires clean environment for food process industry. There are many other industries which require cleaner working environment to improve quality of their products. PAIONIA FURYOKUKI's devices help companies in those industries create clean environment

Air Vacuum Mat

If you want to use a more effective measure to prevent contaminants from entering cleanroom, If you want to make your work environment cleaner to ensure your product quality, If you feel sticky mats are troublesome and their performance is not satisfactory, Then consider to use 'Air Vacuum Mat'. You want to keep your factory clean. We will make it cleaner. The 'Air Vacuum Mat' is a new approach for cleaning outsole of shoes. The 'Air Vacuum Mat' removes dust by sucking. If you are interested, please contact us.

PAMY PNEUMATIC

D1-828

PAMY A Pneumatic Company

Pamy Pneumatic Indonesia didirikan pada tahun 1999 yang merupakan produsen komponen pneumatic serta mengembangkan komponen pneumatic untuk memenuhi kebutuhan pelanggan di semua industri. Pamy Pneumatic Indonesia mempunyai cabang di kota-kota besar Indonesia diantaranya Jakarta, Surabaya, Semarang, dan Bandung. Produk PAMY memaparkan trend pasar menuju diversifikasi yang lebih besar dengan berbagai variasi produk, menawarkan produk berkualitas tinggi dengan biaya yang kompetitif.

AIR CYLINDER PNEUMATIC MSC

Cylinder pneumatik (terkadang disebut silinder udara) adalah peralatan mekanis yang menggunakan gas terkompresi untuk menghasilkan gaya dalam gerakan linier resiprok dan memiliki fungsi sebagai sumber tenaga mekanik yang dapat digunakan dalam berbagai aplikasi otomatisasi.

SOLENOID VALVE 2W

Solenoid valve atau katup solenoid merupakan komponen tambahan pada sistem pneumatic yang bertransmisi otomatis. Komponen ini dipasang pada bagian body valve. Seperti namanya, solenoid valve bekerja sebagai katup untuk mengendalikan aliran udara dalam sistem pneumatic

FITTING SPEED CONTROL

Fitting Speed Control di pasang pada Instalasi Pneumatik karena mempunyai fungsi Untuk mengontrol atau mengatur volume buangan angin yang keluar dari benda kerja sehingga akan menghasilkan kecepatan gerak benda kerja yang terkontrol sesuai kebutuhan

PANDU HYDRO PNEUMATICS, PT

D1-8301B

PT. PANDU HYDRO PNEUMATICS SUPPLYING HYDRAULIC COMPONENT, SERVICE AND REPAIR. WE CAN HELP YOU TO DESAIN YOUR HYDRAULIC SYSTEM. ALSO PRODUCE HYDRAULIC POWER PACKS, CYLINDERS AND MANY OTHER EQUIPMENT BASED ON YOU DEMANDS.

Hydraulic Power Unit

We can design and build hydraulics power units based on your needs. The hydraulics power unit will be assembled in our workshop to ensure its efficiency and quality. Our experienced team will help you to optimize the productivity of your industry.

Winner By Danfoss

We are excited to offer Winner by Danfoss Hydraulics hoses and fittings. A complete high-performance hose and fitting with a standard-performance price that made for various applications. Winner by danfoss is the choice when every job matters.

Technical Engineering

Providing technical engineering is one of our primary services. Our reliable engineers are ready to assist your needs in hydraulics systems.

PANDULIMA HYDROMATIC, PT

B1-4330

PT. Pandulima Hydromatic was established in 1997. We are Committed to providing our customers with only the best Hydraulic and Pneumatic components with guaranteed quality. We are proud to claim Authorised Distributorship from brand Yuken, CKD, Legris Parker, Hydromax, DAW, Stauff, Voss, Hirose, Coolbit, Samho, Galtech and Pister. We also provide custom engineering to cater for industries individual requirement. Our staffs will provide you with the best service and satisfaction is quaranteed

Yuken
in 40 years, YUKEN went from an auto repair shot to a publicly traded company. Since then YUKEN has continued to expand its line of hydraulic products as well as certain types of machinery dependent on hydraulic power

Parker Legris
The legris product range encompasses a wide variety of pneumatic products, ranging from fitting and valve to transair tube and shop systems

CKD
CKD as a Japanese company has been a pioneer in pneumatic automation and anticipating changes in times. Drawing on CKD unique cutting edge technology CKD is committed to providing the technical solutions and contributing to manufacturing advantage around the world

PDS INTERNATIONAL PTE LTD

D1-8109

With over 30 years of experience in the safety field, PDS International is a pioneer of workplace safety. We have our fingers on the pulse of what modern workplaces need. From consultations to PPE recommendations, we're available to help you find a solution that's tailored specifically for your workplace needs. We have a strong presence in Asia with branches in Singapore, Malaysia and Indonesia. Visit us at our office or online site for all your safety PPE and workplace safety needs

WORKSAFE® PU3003 CUT 5 SAFETY GLOVES
Flexible, comfortable and highly cut-resistant gloves

- Lightweight and highly cut-resistant gloves
- Protects hands against sharp-edged items like metal, glass and ceramics
- Polyurethane coating provides tactile sensitivity
- For use during work that involves handling sharp-edged objects

WORKSAFE® STEDA II E3055
Stronger, more durable and extra comfortable. The enhanced design of WORKSAFE® Steda II - successor of our popular Steda, is now better with metal-free design.

- Lightweight impact-resistant nylon/polycarbonate frame
- Dual density injected anti-slip skull-grip temples
- Impact-resistant integrated TR90 side shields
- Comfortable ABS/thermoplastic rubber (TPR)
- browguard
- 3-point adjustable temple inclination for better fit
- Integrated universal-fit nose pads
- Metal-free: does not contain any metal parts
- Tested to ANSI Z87.1-2010 standard and complies with SS473:2011 standards

WORKSAFE® M210N95

- Meets NIOSH 42CFR84 N95 requirements. TC-84A-5411 (refer to attached certificate)
- All filters are designed to provide economical protection
- Maintenance free
- Adjustable nose-clip conforms to nose for a secure seal and reduced eyewear fogging
- Comfortable to wear and easy to use

EXHIBITING COMPANIES

PERDANA TEKNIK MANDIRI, PT

D1-8216A

PT PERDANA TEKNIK MANDIRI was established in 2003, used to a Tarding Company, In June 29, 2006. It was changed as PT Perdana Teknik Mandiri. We are a company who distributes and supplies material for hydraulic and pneumatic cylinder, particularly for Oil and Gas Industry, Mining, Playwoods, Manufacturing Industry, and Heavy Equipment Industry.

Hydraulic and Pneumatic Cylinder

For hydraulic cylinder we provide materials and custom cylinder

Parts of Pneumatic Cylinder

For pneumatic cylinders we are available for standard bore and stroke under the JUFAN, SHAKO and XCPC Brands. If there is a custom one, we can indent it.

PERONI KARYA SENTRA, PT

D2-9324

Peroni Karya Sentra, was established in Indonesia in 1997 with a foreign investment from Taiwan. As one of the best manufacturers of stainless steel flanges and fittings, we have been providing excellent casting flange, pipe fitting, and valves products for our customers in various industries which located in Europe (Italy & France), and others are in New Zealand, Singapore, Malaysia, Thailand and more which have gained us a good reputation during the past 25 years.

Stainless Steel Flanges

Stainless Steel Flanges which varies from Standard ASTM A351, JIS, Stainless Steel Flanges, Dimension conform to Standard JIS, ANSI, UNI, EN, DIN. Material conform to ASTM A351 Grade CF8 & CF8M and AISI 304 & 316, with pressure ratings from Class 150 and 300.

Stainless Steel Fittings & Valves

Stainless Steel Screwed Pipe Fittings and Valves, Dimension conform to ASME B16.3 AND ANSI/MSS SP-114-2018. Valves standard practice MSS-SP-110-1996, with Testing procedures according to API 598. Material conform to ASTM A351 Grade CF8 & CF8M, and AISI 304 & 316 with pressure ratings from class 150 and 1000 WOG

Carbon Steel Flange

Carbon Steel Flange, Dimension conform to JIS 10K with Material Grade Q235

PHAOS TECHNOLOGY PTE. LTD.

A3-3303

Phaos Technology Pte Ltd stands as a vanguard in the field of optics technology, situated within Singapore.

At PHAOS, we firmly believe that the future's trajectory is intricately tied to advancements in optical technology. As such, our company is wholeheartedly dedicated to the tireless pursuit of research and development in the realm of sophisticated optical technologies. Our primary aim revolves around democratizing access to these advancements across a diverse market.

PT-Zoom

PT-Zoom (PTZ) is an Automatic 3D 360° video stereoscopic microscope that has long working distance, wide field of view and high-definition imaging quality. Based on the two-dimensional observation, rotating three-dimensional observation function is added. It is simple to push and pull to switch. Real-time image observation and 360° rotation, which makes unilateral specimen easy to be observed in all directions, multi-directionally. PTZ is equipped with two types of light sources: front light and side light, which perfectly solves the problem of light dark angle. It is widely used in electronic components, precision hardware, deep hole wall, life science, animal and plant morphology, criminal investigation, identification and so on."

PT-Metrology

PT-Metrology (PTM) is a microscope with precision image analysis algorithms, using double tele-centric optical lens with high depth of field.

PTM series achieves fast dimensional measurement by one-key operation. In CNC mode, after placing workpiece on object table, the operator only needs to press start button, then the instrument measures and evaluates the dimension fast. Consequently, PTM series is also called one-key image measuring machine.

EXHIBITING COMPANIES

PHOENIX CONTACT (SEA) PTE LTD

B1-4417

Connecting, distributing, and controlling power and data flows - we have been developing the right products for this purpose since 1923. Whether in industrial production facilities, in the field of renewable energies, in infrastructure, or for complex device connections: our solutions are used wherever processes must run automatically.

TRIO3-PS/1AC/24DC/20/8C/10L - Power supply unit

Primary-switched power supply unit, TRIO POWER, Push-in connection, 8-channel electronic circuit breaker, IO-Link, DIN rail mounting, input: 1-phase, output: 24 V DC / 20 A, Adjustable from 24 V DC ... 28 V DC

XT 2,5 - Feed-through terminal block

Feed-through terminal block, nom. voltage: 800 V, nominal current: 24 A, number of connections: 2, number of positions: 1, connection method: Push-X-connection, Rated cross section: 2.5 mm², cross section: 0.5 mm² - 4 mm², mounting type: NS 35/7,5, NS 35/15, color: gray

FL MGuard 2102 - Router

Remote maintenance router, 10/100/1000 Mbps, NAT, VPN, firewall

PICOGEN INDUSTRY SDN. BHD.

B3-5527

Our company specialises in creating custom-made products for leading industries such as Plastic Mould, Press Die, Automotive, Aerospace, Semiconductor, Automation, and Medical. Our precision manufacturing processes allow us to customise products including angle, length, radius, diameter, and material type. We can meet micron tolerances and fulfil a wide range of customer needs with cutting-edge facilities. Grinding surface roughness typically reaches Ra0.01, tolerances under +/-0.001mm.

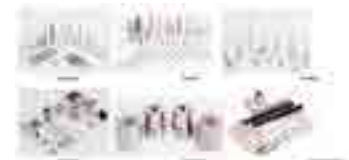

CUSTOMS FABRICATION

PILOT PUNCH, PUNCHES, MOULD PIN, DIE BUTTONS, FORMING DIE, CUSTOM MAKE PRECISION ENGINEERING, PLASTIC MOLD COMPONENTS, PRESS DIE COMPONENTS, STAMPING DIE PUNCHES

CUSTOMS FABRICATION

MACHINE PARTS, MOULDS, DIES AND ACCESSORIES

CARBIDE PRODUCT

MACHINE PARTS, MOULDS, DIES AND ACCESSORIES

PILZ

B2-455

Pilz is a global leader in safe, secure and complete automation solutions. Headquartered in Germany for 75 years and operating in Southeast Asia for 7 years and counting, solutions by Pilz are backed by extensive knowledge and expertise in various industries focused on the stringent demands of safety, security, and automation technologies. Pilz's product portfolio includes safety relays and controllers, sensors, operating and monitoring systems, network and drive technologies

PNOZ - Safety Relays

In 1987 Pilz patented the first emergency stop relay to protect man and machine. That was a milestone in safety technology. The safety relays PNOZ quickly progressed to be the world's most commonly used safety relays. The PNOZ brand is now synonymous with safety relays. PNOZ - The original!

PITreader - Access Management System

With PITreader you can implement tasks relating to access permissions for plant and machinery. The options range from a simple enable and user authentication to a complex permission matrix and company-specific coding. PITreader is flexible as a standalone device or it can be used in conjunction with a Pilz controller. The transponder keys with RFID technology are available in freely writable versions and also with fixed, stored permissions. Of course, suitable software tools are available for fast and simple programming of the PITreader keys and the PITreader settings.

PSENme5 - Safety Gate System

Thanks to integrated guard locking, the secure safety gate system PSENmech is suitable for personal and process protection and can be used in numerous industries and applications. Particularly if you are looking for an economical basic solution for safety gate monitoring, then the mechanical safety gate system PSENmech is right for your application. PSENmech with guard locking can be expanded with an escape release or emergency release.

EXHIBITING COMPANIES

PIRANUSA - ZWSOFT INDONESIA

D1-8433

PIRANUSA (Piranti Nusantara Teknologi) adalah perusahaan IT penyedia software Engineering sebagai satu-satunya ZWSOFT Value Added Reseller di Indonesia. Kami menyediakan solusi CAx software CAD/CAM/CAE yang ringan dengan produk andalannya ZWCAD, ZWCAD MFG dan ZW3D dengan sistem license permanen. PIRANUSA terus memenuhi berbagai kebutuhan multi disiplin industri seperti MFG (manufacturing) dan AEC (Architecture, Engineering, dan Construction) dari solusi hingga implementasi

ZWCAD

ZWCAD

ZWCAD adalah software Alternatif pengganti AutoCAD terbaik saat ini dengan lisensi permanent. ZWCAD compatible dengan semua file .DWG, .DXF, .DWT, dan lain-lain

ZWCAD MFG

ZWCAD MFG

ZWCAD MFG adalah Software CAD Alternatif dengan tools khusus manufacturing (compatible dengan .dwg) yang menyediakan all-in tools shaft generator, tolerance dimension, surface texture symbol, balloon, dan BOM.

ZW3D

All-in-one, affordable CAD/CAM/CAE. solusi 3D CAD/CAE/CAM yang mudah dipelajari dan lengkap dapat membantu pengembangan produk dari konsep hingga produksi.

PLARAD

B3-5218

PLARAD TORQUE & TENSION SYSTEMS One of the oldest company in the industry with long experience and knowledge in the bolting technology since 1962, covering : : hydraulic-torque-wrench, hydraulic-tensioner, hydraulic-pump, nut-runners (pneumatic, battery & electric) and multipliers. It all started in Germany and kept all the process (designed, engineered and manufactured) under one control and one management in Germany up till now, proudly MADE-IN-GERMANY

PLARAD BATTERY NUTRUNNER

High precision torque tool (+/- 4%) with fastest speed (4-gear-speed for better productivity). Available in various capacity options, from 500 Nm up to 8000 Nm. High quality made in Germany with proven track-record of nutrunners worldwide since 80s and has been widely used in Indonesia since 2010 in mining, earthmoving workshops and power-plant. Available for customized reaction-arms to suits the industrial need Backed-up with in-country-after-sales-support by PT Gratari for : parts, repair, calibration and training services

PLARAD HYDRAULIC TORQUE WRENCH

High precision torque tool with special features of fine-toothed ratchet system offers 2 main unique benefits : higher torque precision and prevents jamming. Available in various capacity options, from 1000 Nm up to 65000 Nm. High quality made in Germany with proven track-record since 70s in various critical industries Available for customized reaction-arms to suits the industrial need Supported by most advanced and robust hydraulic-pump in the market Backed-up with in-country-after-sales-support by PT Gratari for : parts, repair, calibration and training services

PLARAD ROBOTIC ARM

Supporting Arm bring benefits in operating power-tool:
 Reduce Fatigue of Tool-Operator
 Improve Health of Tool-Operator
 Improve Safety of Tool-Operator
 Increase Productivity of Tool-Operator
 Improve Lifetime of Tools
 The solution is fully customized according to the working-area and tool (dimension, type and weight).
 The solution is applicable in various industries :
 Production Manufacturing Logistic
 Field-Support
 Unique technology that combine the high-precision machinery to bring rigid arms, but very flexible to support smooth operation of tool and bring improvements in ERGONOMY.

EXHIBITING COMPANIES

PLATINDO CIPTA RAYA, PT

C3-772

PT. Platindo Cipta Raya is an engineering and custom machining service company in Indonesia and part of the Propan Raya Group. The company has produced various custom machines such as mixer, process tank, turn-key systems to manufacture specialized products. Our team consists of numerous professionals, skilled technicians, and engineers engaged in product development and quality assurance systems. Consultation, design, prototyping, and automation are essential parts of our service to clients

Inline Mixer Head (Rotor Stator - Chamber)

Inline Mixer Head (Rotor Stator - Chamber) is a specialized mixing device used in various industrial processes to achieve thorough and efficient blending, dispersion, and emulsification of liquids and solids. Unlike traditional batch mixers, inline mixer heads are designed to perform continuous mixing as fluids or ingredients flow through them.

ATEX Lab HSD Mixer 2 HP Hydraulic Lifting

A Lab HSD (High-Speed Dispenser) Mixer is a type of laboratory equipment used for the mixing, blending, and dispersing of various substances, often in small-scale research and development or quality control applications. It is specifically designed for tasks that require high shear forces and rapid dispersion of solid or liquid components into a liquid medium.

Mixing Blades

Mixing blades are specialized mixing tools used in various industries, particularly in the production of paints, coatings, adhesives, and other viscous or liquid materials. They are designed to efficiently disperse, dissolve, or blend solid and liquid components into a homogeneous mixture.

POLIWEK INDO UTAMA, PT

D1-8137

Poliwek Indo Utama provide PolyWorks Software, 3D Reverse Engineering & Inspection Services. Our business almost 80% related to mechanical industry in automotive, aerospace, consumer product, oil & gas, tools & die, workshop, and household field

PolyWorks Software

PolyWorks® is the first single-vendor solution that supports all 3D measurement processes and tasks performed by industrial manufacturing organizations, from model-based definition for measurement planning in CAD software, to dimensional analysis, quality control, and reverse-engineering, up to the enterprisewide sharing of 3D measurement data and results.

3D Scan, Reverse Engineering & Inspection

We are provided services of 3D design and modeling reverse engineering from various part automotive, household, electronics, etc. The technology we used is very high 3D digitized point cloud line laser scanner and optical scanner machine. Also we are experienced engineers use the latest digitizing and software technologies available for contact & non-contact measurement to perform probing and 3D scanning inspection for your company.

3D CMM Scanner

Scanning point cloud for Reverse Engineering and Inspection Metrology Analysis.

POWER MACHINE TOOLS, PT

A1-1102

We are a distributor for Haas Automation, the largest machine tool builder in the United States. Manufactures a full line of CNC vertical and horizontal machining centers, CNC lathes, and rotary tables. Built to deliver high accuracy, repeatability and durability. Haas Factory Outlet Indonesia, A Division of PT. Power machine Tools is defined not only by its machining centers but by its outstanding service and applications.

CNC MACHINING CENTER

Haas Automation is the largest machine tool builder in the western world, manufacturing a complete line of CNC vertical machining centers, horizontal machining centers, CNC lathes, and rotary products

EXHIBITING COMPANIES

PRIMA NANO COATING, PT

B3-5217B

PVD Coating is a coating technology or physical vapor deposition to transfer a coating material to a substrate surface under vacuum. Our PVD coating machine has a chamber capacity of 1000 x 1200 mm (diameter x height) with a maximum weight of 1000 kg, which is able to perform the coating process on :

1. Press/Stamping Dies, Drawing/Forming/Drawing & Punch.
2. Aluminum Die Casting & Plastic Injection Mold.
3. Core Pins, Injector Pins, Cold Forging Punch & Dies
4. Forming & Bending Rolls

COATING

Coating by physical vapor deposition to transfer the coating material to the surface of the workpiece under vacuum conditions.

PLASMA NITRIDING

Plasma Nitriding is a surface-hardening heat treatment that introduces nitrogen atoms into the surface of steel to form nitrides. The purpose of nitriding is to increase the surface hardness of the steel and improve its wear and corrosion resistance properties

PRIMA TIGON GLOBAL, PT

B3-5217A

PT Prima Tigon Global was established in 1992 in Jakarta, Indonesia as an independent company with its main line of business is supplying quality industrial solutions to the business market in Indonesia. As an established company offering solution to customers, we are supported by highly qualifield engineers, technicians, and support personnel form various backgrounds and is constantly expanding and diverging to accommodate the growing market demands in industrial

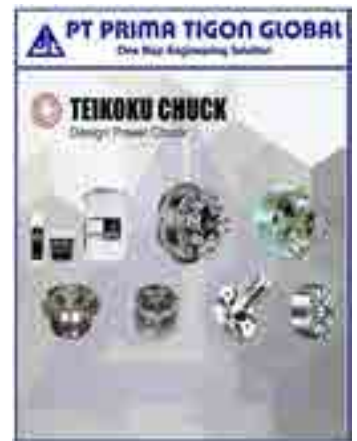

MOLDINO

Hi-Pre 2 Advantages in the total process including not only machining but also polishing and adjustment. The production of high-precision molds is not only affected by the final finishing process, but also by the machining accuracy of the preceding rough and semi-finishing processes. Pursue high precision from rough machining, and aim for optimization in the total process including polishing and adjustment! This is the "Hi-Pre²" advocated by MOLDINO. Hi-Pre² stands for "High Precision Pre-finishing"

NT TOOL

Manufacturing and sales of tool holders for machining centers and dedicated machines
*Manufacturing and sales of tool holders peripherals for machining centers and dedicated machines
*Manufacturing and sales of jig bushing and chamfering drill

TEIKOKU CHUCK

Made-To-Order responding to a wide variety of chucking requests. CHUCK is one of work-holding device that is used for lathes (turning machines). It clamps a workpiece and maintains its posture to accurately convey the spindle's rotational energy to the workpiece. In short, it is a reliable tool that securely holds the workpiece during machining. There are variety of chucks for any kinds of workpiece shape and cutting conditions. TEIKOKU CHUCK is a company that produces Design-Chucks to hold various kinds of workpieces.

"PT Prima Tooling is a distributor of graphite products manufactured by Tokai Carbon Co.,LTD, Japan, one of the largest graphite producers in the world. With high quality graphite from Tokai Carbon Co.,LTD, PT Prima Tooling has helped graphite users for various industrial purposes by improving the quality of the final product and increasing productivity and production efficiency

TOKAI CARBON

Tokai Carbon is one of brand Graphite from Japan. And one application graphite is used for EDM Electrode. Prima Tooling are single reseller of Graphite Tokai Carbon in Indonesia, we are selling fine carbon, friction material, and manufacturing graphite electrodes

COGO TOOL

COGO's Own Coating Method (CVD Diamond Coating) High resistance and performance when to cut graphite multiple product Line. DIAMOND Coated End Mills for Graphite CVD diamond is a binderless-pure crystal, delivering identical properties of single diamond crystal. COGO is applying the latest CVD coating technology which has no residual Stress at the interface for extending tool life

EROWA

The tooling system for EDM and milling Fast and precise resetting in tool-making and in light chip removal: save time and money by using the EROWA EDM Tooling System. The basis of this workpiece clamping system is constituted by the EROWA ITS chucks, which can be fitted and aligned on the machine table or on the machine quill. Workpiece and electrodes are fitted to and set up on system carriers such as pallets, electrode holders, centering plates, etc. – and production can start.

PRO MECHANIC

Pro Mechanic Indonesia is an Industrial Equipment Supplier. We provide CNC Milling and Lathe Machines, Stone Crusher Machines, CAD/CAM Software and other Industrial Support Equipment. The brands that we market are the best products from well-known manufacturers with the best quality.

ZW3D

ZW3D an integrated CAD/CAM solution designed for the complete product development process, features the fastest kernel for Solid-surface Hybrid Modeling, non-solid mold parting and smart CNC Machining tactics from 2 axis to 5 axis.

Blaser Swisslube

High-performance metalworking fluids, CNC process optimization, and support services.

Since our founding in 2011, Pusaco have grown from a small startup into one of largest distributors in our region. We are proud of our ability to provide excellent products and services to both large and small companies alike. We work diligently every day to ensure that our customer gets exactly what they need when they need it. Today Pusaco Group has served over 3000 satisfied customers across Malaysia and Indonesia.

EXHIBITING COMPANIES

QINGDAO GUANRUI HARDWARE TOOLS CO.,LTD.

C3-6503

Qingdao Guanrui Hardware Tools Co.,Ltd. is a professional manufacturer and supplier of Wheelbarrow,wheels, Welded wire mesh,Hexagonal wire mesh,Aluminium Expanded wire mesh,Roofing nails, concrete nails,boat nails,common nails etc, and drywall screw,self-drilling screw,chipboard screw etc etc,we also directly engaged in the sale and all kinds of hardware tools,construction tools etc. We would ask a sincere cooperation and common development and prosperity with all customer and friend.

Wheelbarrow

The products specification can be customized,like tray thickness,handle thickness,weight,color and packing etc. Welcome to inquiry with details requirements.

Nails and drywall screw etc

All kinds of nails and drywall screw,self-drilling screw etc, the packing is customized.

Wire Mesh and other hardwares

Wire mesh can be customized packing,other hardwares too.

QINGDAO HUAERWEI VEHICLE MANUFACTURING CO., LTD.

C3-7807

Our company is a large-scale production enterprise that integrates rubber products, hardware tool manufacturing, handcarts and tool carts, and textile machinery manufacturing. The company has a complete production management system and testing equipment, all of which meet the requirements of the international market. The company's products are from more than 100 countries and regions around the world, and it enjoys a good reputation in the international market

WHEEL BARROW

WHEEL BARROW

WHEEL BARROW

QINGDAO HUATIAN HAND TRUCK CO.,LTD

B1-4231

Qingdao Huatian Hand Truck Co., Ltd. was founded in January 2000 and specializes in the production of Wheel Barrow, Trolley, Plat-form hand truck.Garden cart, Roll containers, Dog kennel, Pet cage, plastic product,wheel and etc. Huatian covers an area of more than 200,000 square meters and has 1,000 employees, it has developed into a leading brand enterprise with large production scale and extensive sales coverage in the industry in China now.

Wheel Barrows

The wheel barrows are with steel /plastic trays and with air/solid wheels.

Plat-Form Hand Truck

Foldable Platform Handtruck
Foldable Handle for easy storage
Foot bar release lowers handle steel/PP platform with non slip deck surface
Pb-free and UV resistant powder coating
Heavy duty with 150KG load capacity
Overall Size:H850xh165xL708xW452mm4"mute wheels with 2swivel casters and 2rigid casters

Wheels

Rubber air wheel,Rubber solid wheel and PU wheel

EXHIBITING COMPANIES

QINGDAO NEWRUN MACHINERY CO., LTD.

C3-7826

QINGDAO NEWRUN MACHINERY CO.,LTD. produces and supplies various machinery parts, to the industries of automotive, high-speed train, mining machinery, agricultural machinery, hydraulics and oil etc. We are mainly supplying to Europe and North America. We installed precise machines such as CNC centers (MORI SEIKI, MAZAK), NC lathes (DMG, TAKISAWA) etc.; Also inspection instrument like 3D coordinate measuring, roughness tester, contour graph, hardness tester and Mitutoyo gauges

MACHINING PARTS

MACHINING PARTS

QINGDAO RESTART NEW MATERIAL TECHNOLOGY CO.LTD

B1-4002

Qingdao Restart New Material Technology Co., Ltd is a manufacturing enterprise specializing in the application and development of environmentally friendly new materials. The company provide low - carbon and environmentally friendly product solutions such as R7/R8 thermoplastic high - pressure hoses, Centralized lubrication system hoses etc. Our mission is to make the world greener and life better, and we hope to become a "TPU application development leader" through professional expertise

LUBRICATION GREASE HOSE

High pressure lubricating grease hose, can be used for wind power, construction machinery, mining machinery, etc

PRESSURE TEST HOSE

It is used in hydraulic systems to test the pressure of various points in the hydraulic system and pipelines as conductive fluid media.

R7/R8

Black color, Pin Pricked Polyurethane. Available twin and multi lines with different hose combination and size. Also, special colors up on request

QINGDAO RUBBER SIX HOSE CO., LTD

B2-4931

Qingdao Rubber Six Hose Co., Ltd. is registered in Qingdao Changyang Industrial Park with a registered capital of 80 million yuan. It is a professional manufacturer of high, medium and low pressure hoses under the "LEAD-FLEX" and "Lifu" brands. With strong technical strength and advanced equipment, the company has successively developed various steel wire braided hoses, steel wire spiral hoses and various hoses with fiber materials as reinforcement as well as drilling hoses, oxygen blowing hose

HYDRAULIC HOSE

A pipe for transporting liquid, usually used in hydraulic systems

QUALITECH INDOPIRANTI, PT

D2-970

Prona air tool Manufacturing limited was established in the 1980's of Taiwan. Prona is a company that specialized in high-end product advanced machinery and equipments, precise processing technique. Prona factory is currently located in Fo shan, guang Dong with 67890 m2 of total area and is a sole foreign-invested company. Prona never prides it self on present achievement, but always keep improving on the current products and technique and continue to develop new product

PRONA
WORLD SPRAY GUN EXPERT

This is only small sample of hundreds of new product which will be on display at the show. It's based on information provided by exhibitors as of November 4th, 2023. NOTE: this list is NOT comprehensive. The layout of this buyer's guide is at the full discretion of the organiser.

EXHIBITING COMPANIES

RAJA TEKNIK ADITAMA, PT

C3-6626

PT Raja Teknik Aditama (RTA) specializes in design, engineering and manufacture custom precision parts. We provide technical consultancy for re-engineering/re-manufacture of custom precision parts to enhance the part performance and lifetime.

Custom Industrial Parts & Components

We design and produce custom parts to enhance part & component lifetime and performance. Our flexible engineering solutions made us one and only company that can offer various custom industrial parts and components with more than 100+ material available from ferrous, no-ferrous metals to engineering plastics and composite materials.

Custom Wear Liner Plate & Hardfacing Welding Wire

Wear plates are the most important parts for many machinery. It acts as a wear & tear parts to prevent the abrasion particles damage the main body. Transfer load between the plate and counterparts and perform low friction under linear movement.

Housing, bearing, and shaft system

Housing, bearings, seals and shaft are the most critical parts for any mechanism. These 4 components play the most important parts for any rotating, radial and linear movement. We are able to provide custom made Housing, Bearing and shaft as well as the best fitting (shrink fit or clearance fit) to suit for specific application.

RELIANCE (XIAMEN) INDUSTRY CO.,LTD

C3-7830

Our main products are Trapezoidal roofing & cladding machine, automatic CZ machine, glazed tile roofing machine, floor decking machine, ridge cap roll forming machine, industry storage racking system equipment, metal rolling shutter system equipment, slitting line, cut to length line and other customized roll forming machines. We have nearly 25 years of industry experience, Export to more than 88 countries and religion. Our service office located in Bandung, Jakarta etc.

ROLL FORMING MACHINES

REXPOWER HYDRAULIC & PNEUMATIC CO., LTD.

B2-4607

REXPOWER HYDRAULIC & PNEUMATIC CO., LTD., Ltd. was established in 1980. It is marketed all over the world under its own brand REXPOWER, and it also provides OEM service. The company is a professional manufacturer and trader of hydraulic components. The main products are the production and sales of hydraulic valves, gear pumps and centralized lubrication products, as well as the import and export of various hydraulic machinery parts.

Hydraulic Solenoid Directional Valve

Max. Operating pressure: 35 Mpa
Max. T-Line Back Pressure: 21 Mpa
IP67-equivalent high dust and water-proof characteristics.

Trochoidal Pump

Can be applied to various kinds of machinery, as the transportation of hydraulic and lubricating oil, or the function of cooling and lubrication.

Oil Filter

Use for various kind of machinery, chemical industry, ship industry and vehicle industry. Stable and durable use life. Can be a circulation device for machinery.

EXHIBITING COMPANIES

RIASARANA ELECTRINDO, PT

B2-4919

Distributor Resmi dari beberapa brand terbaik dunia dalam sektor kelistrikan seperti MEAN WELL, ABB, PANASONIC, HITACHI, KSS, MAX dan masih banyak lagi. ACS180 – Machinery drive
Reliable machine operations and essential applications control in a compact footprint

ACS480 – General Purpose Drive
The ACS480 low voltage AC drive is part of ABB's all-compatible drives portfolio and features a wide range of useful built-in features in a compact design

All-Compatible ACS880 Single Drives
With the ACS880 single drives you simplify your world and open all possibilities. You have complete flexibility and capability in wall-mounted or cabinet-built drives.

RIKEN KEIKI NARA MFG. CO., LTD.

D2-9112

We focus on the development, production, and sales of abnormality monitoring device and measuring equipment for stamping press machines. Our goal is to offer quality control and improved productivity in high speed stamping press work. Our products are,

1. Automatic Press Bottom Dead Center Monitoring Device (Slug Detector)
2. Press Miss Detector
3. Automatic Press Load Monitor
4. Oil Spray System
5. Dynamic Displacement Acquisition System
6. Press Operation Management System

Slug Detector NEW SELBER CB/CX

- An automatic press monitor to detect scrap buildup and scrap inclusion in press work.
- High precision detection, resolution 0.1 m (max setting 99.9 m)
- Can be extended up to 8 channels (CX 1unit 2ch: RM-2510)
- Analog output function installed

Load Monitor NEW SELBER VL
Monitor load value by press body column strain during press work.

Miss Feed Detector NEW SELBER BM
Detect troubles due to feed or output errors during press work.

RINGIER TRADE MEDIA LTD.

CW-21

Ringier Trade Media Ltd. is a leading B2B industrial information provider, providing industrial leaders in China and Asia with the technical information, solutions and applications they need to improve their manufacturing and marketing capability through multiple media platforms that include print (industry trade journals), online (www.industrysourcing.com), events, digital marketing, iPad, iPhone and Android devices.

International Metalworking News for Asia

Published 6x a year in English, International Metalworking News for Asia reaches a qualified controlled readership of 46,950 (including print and digital) manufacturing decision makers who plan the purchase of metalworking, cutting & forming machinery, materials and execute manufacturing strategies, and plant managers who evaluate and make recommendations. Each subscription is requested in writing. Each reader is qualified by name, job title and industry and re-qualified annually by our call center. In addition an active engaged audience follow the various Metalworking social media channels on Twitter, facebook, YouTube, LinkedIn , Blogs with the average monthly page views of 75,000+.

RODA ROLLEN INDONESIA

D1-8621

PT RODA ROLLEN INDONESIA is a supplier for Mechanical and Electrical engineering products for modern general industries. The company was established in 1998 and since then has become a stockist and representatives agents for many leading brands in industrial engineering from around the world.

ELECTRIC MOTOR

Introducing our comprehensive selection of induction motors, meticulously engineered to meet diverse industrial and commercial requirements. Whether you necessitate a 3-phase or 1-phase motor, our offerings are tailored to deliver dependable performance. Our 3-phase induction motors epitomize durability and reliability, engineered for robust applications. We offer an array of mounting options, facilitating seamless integration into your machinery. These motors are meticulously crafted, employing cutting-edge technology to ensure consistent efficiency and longevity. For less demanding tasks, our 1-phase induction motors are available in various technical specifications. Choose from an assortment of mounting configurations, including foot-mounted and flange-mounted options, to suit your installation preferences. Rely on our induction motors to drive your operations with efficiency and precision. Elevate your equipment's performance with our esteemed motor solutions today.

GEAR REDUCER

Our comprehensive selection of industrial gear reducers, meticulously engineered to enhance the performance of your machinery with exacting precision. Our portfolio boasts a diverse array of gear types, including worm gears, helical, helical bevel, and hypoid gears, meticulously crafted to meet the stringent demands of industrial applications. These gear reducers offer a spectrum of mounting options and technical specifications, ensuring seamless integration into your systems. Precision-engineered for optimal power transmission, reduced wear, and unparalleled efficiency, our gear reducers embody the pinnacle of engineering excellence. Elevate your industrial operations with unwavering confidence, as our gear reducers stand as a testament to professionalism and unwavering commitment to precision. Explore our extensive range today, and experience the epitome of motion control solutions.

INDUSTRIAL PUMP

Proudly presenting our distinguished catalog of industrial pumps, meticulously engineered to meet the stringent standards of the industrial sector. Within our extensive range, you will find single and multi-stage pumps, alongside gear pumps, all meticulously crafted to deliver exceptional performance and unwavering reliability in the most demanding industrial applications. Our single and multi-stage pumps offer precise and efficient fluid handling solutions, addressing high-pressure processes and complex multi-level pumping requirements with the utmost precision and robustness. For applications demanding precise fluid transfer for viscous liquids, our gear pumps exemplify engineering excellence, boasting accurate metering and enduring construction. Rely on our industrial pumps to elevate your operations with the utmost professionalism and precision. Explore our comprehensive range today and experience the epitome of fluid handling solutions.

EXHIBITING COMPANIES

RUKUN SEJAHTERA TEKNIK, PT

A3-2631; A3-340

Indonesia's leading distribution company with the widest range of industrial tools, hardware and machinery. We specialize in supplying and servicing the automotive, oil and gas, construction, shipyard, aerospace and manufacturing industry and etc. We had been operating for more than 30 years and we are dedicated to providing our customers with committed and well trained team members with outstanding products, timely delivery, and customer service that is second to none.

SAGARA PRIMA PERKASA, PT

C3-6910

PT Sagara Prima Perkasa is an innovative specialty chemical trading company dedicated to providing high quality products, technology advanced and environmentally acceptable solutions to our customers. Serving all sectors of the industries market, PT. Sagara Prima Perkasa provides a full range of products and application technologies designed for use in various industries.

SAGALubs FSF (Full Synthetic Package)
SAGALubs FSF is a full synthetic metal working fluid package designed for general grinding application, such as surface, cylindrical and centerless grinding. It is suitable for ferrous and also yellow metal based materials. This full synthetic package can be diluted by 50% to 70% of water to give a full synthetic metal working fluid

SAGALubs SSF 1550 (Semi Synthetic Package)
SAGALubs SSF 1550 is low oil long life semi synthetic package designed for multipurpose applications, for ferrous and specifically aluminium based materials, it is designed to meet with modern day machining with low foaming metal working fluid and offers a clearer visual of the workpiece. This product also contains EP and AW additives based on phosphate

SAGALubs SO 1585 (Soluble Oil Package)
SAGALubs SO 1585 is soluble oil package designed to emulsify low viscosity base oil to provide both lubrication and cooling in metalworking application.

SALESTRAD CORPORATION (S) PTE LTD

A3-3400

Since 1994, we specialised in Wireless Industrial Remote Control and Data Transmission Systems, Cable & Hose Management & Protection Systems, Electrical Pushbuttons, Control & Limit Switches, All types of Sensors for Industrial Safety & Automation, and Many Other Industrial Products & Services. With our high quality products and well-skilled team, we are dedicated to bring the best people, products and services to you, as Your Industrial Solutions Partner.

HBC Wireless Remote Control Systems
German based radio specialist with wireless remote control systems for cranes, conveyor, construction machines, port handling equipment and many more applications.

Dataeagle Wireless Data Transmission Systems
German based wireless data transmission from sensors, PLC, bus-components, I/O modules, etc. by radio to increase safety and reliability, save costs for installation, reduce PLC-failure caused by damaged cables, etc. Also available to transmit data safe over long distances.

KJTDO Wireless Limit Switches & Sensors
KJTDO produces a wide range of sensors, limit switches, safety light curtains, conveyor belt protection devices, visual detection, wireless limit switches & sensors etc.

EXHIBITING COMPANIES

SANDMASTER ASIA, PT

D1-8233

sandmaster

The company Sandmaster was founded in the year 1980 in Zofingen, Switzerland. At the time a small set up, producing manual operated blasting cabinets and table top fine blasting equipment. Today, Sandmaster is a globally operating company serving top companies around the globe. The most important products for the company are a variety of semi-automated sandblasting systems to demanding industries like mold & dies, cutting tools, medical, surface treatment, oil and gas, etc

Cabinet Sandblasting Machine

The blasting installation is wide working cabinet in manual processing of varieties workpieces in combination with its novel design and its proven blasting system.

Outdoor Mobile Blaster

The dry pressure blasting mobile installation has 100 liters media capacity. Suitable to work with the varied workpiece, large, heavy, and flexible.

SANLIMAN JAYA ABADI, PT

D1-8435

PT. Sanliman Jaya Abadi is Indonesia's leading distribution company with wide range of high-quality measuring instruments and industrial tools. With decades of combined experiences in the field of measuring instruments and tools, we are highly confident with the choice of products we supply. All of our products are handpicked by our experienced marketing research team. Our company caters to the needs of many customers and consumers with products suitable for their needs.

SANMEN TAILI MOTOR CO.,LTD.

B1-4008

Sanmen Taili Motor Co.,Ltd. is mainly focusing on gear transmission solutions in the automation industry and intelligent equipment field. The company has a rich product line, which can meet personalized and customized needs of customers, and a number of product technical indicators have reached international standards. The market share is in the leading position in the industry, and it is China's first high-tech enterprise integrating R&D, manufacturing and service of geared motors and vfd's

Micro AC DC Geared Motor

Power: 6w-1.5kw;
Motor size : 60mm, 70mm, 80mm, 90mm, 104mm, 120mm;
gearbox type: inline GK, GS, right angle RH, RA,
linear type;
gearbox ratio: 2K-750K
decimal middle gearbox is available

Small AC Geared Motor

Power: 0.1KW-7.5KW;
voltage: three phase 380VAC;
single phase 110VAC/220VAC;
Motor type: GH (horizontal), GV (Vertical)
Gearbox ratio: 2K-20000K;
output shaft diameter : 18mm, 22mm, 28mm, 32mm, 40mm, 50mm, 60mm

Variable Frequency Drive 0.2KW-550KW

VFD type: US, US-2, US-5, M1, M2, M3, G, S18, S20, S30, S36
Power: 0.2KW-550KW;
Voltage: input single phase 220VAC, three phase 220VAC/380VAC;
output 3 phase 220VAC/380VAC

EXHIBITING COMPANIES

SARANA TRIMITRA SOLUSINDO PRATAMA, PT

B2-450

PT. Sarana Trimitra Solusindo Pratama established in Jakarta on 1998, we are the leading company specializing in Industrial and Building Automation System in Indonesia. We have been holding LS Electric (Korea) Exclusive Authorized Distributor for Drive and Automation since 2001. We also hold distributorship for Motortronics (Korea) Softstarter, Sewha (Korea) Industrial Weighing, LG Becon (Korea) Building Management System and LS Electric (Korea) Gridsol Power System

LS Electric VFD / Drive

LS Electric VFD / Drive Series are reliable, high-quality and powerful. Made in Korea, it offers quality in a competitive pricing

LG Becon System

LG Becon the Building Management System (BMS) from LG Electronics Korea. Designed to serve wide range of buildings such as offices, factory, high-rise buildings, hotel and university

LS Electric Gridsol Power System

LS Electric Gridsol is designed to be the smart-grid-based integrated energy and power management solution for factory complex and critical industries such as data center, airports and hospitals

SATO LABEL SOLUTIONS, PT / SATO LABEL INDONESIA, PT

B1-4102

SATO is a renowned global leader in providing comprehensive Auto ID. Our innovative offerings leverage advanced technologies such as barcodes, QR codes, RFID, and digital watermarking. With operations in 26 countries across the world. In Indonesia, we have separate companies: PT. SATO Label Indonesia (SLI) and PT. SATO Label Solutions (SLS). PT. SATO Label Indonesia focuses on label production and PT. SATO Label Solutions serves as the sales unit and has a presence in 5 cities.

CL4NX Plus

Our flagship 4-inch industrial printer now with greater print precision and speed for even the most demanding printing needs! Designed to save time, reduce waste and fit seamlessly into existing workflows, the CL4NX Plus is ideal for a variety of barcode & RFID* applications across industries such as retail, manufacturing, automotive, food and healthcare. User can achieve significant efficiency gains with its enhanced print speed and high quality printing. It is built for demanding industrial printing applications as well as micro-label applications such as labelling printed circuit boards (PCB) of small electronic products.

SAYI ELECTRIC CO., LTD. / SHANGHAI SAYI YIMAI TECHNOLOGY CO., LTD.

B3-5813

We are professional manufacturer of air compressors and air blowers in China, more than 22 years of the production, located in Zhejiang province with 90,000 workshop and total sales is around USD 90 million for air compressor and air blower at last year. The products of screw air compressor, piston air compressor, all kinds of air blowers are widely used in fields of industry, construction, machinery equipment, chemical, medical treatment, family expenses and etc

Screw air compressor all-in-one

Large exhaust, stable air pressure, high efficiency and energy saving. Beautiful appearance, compact maintenance. Safe and reliable operation, stable noise, low temperature and long service life. The intelligent control system has the function of automatic start-up and stop when normal operation without workers

Air blower

Air blower is equipped with a new type of impeller, characterized with reasonable angel, large air volume, low noise, high efficiency, energy efficient it is applicable to factories, warehouses, buildings, basements ventilation and air cooling Also be equipped with window shutter for dust-wind-water resistant.

Piston air compressor

Horizontal tank with low center of gravity. Induction motor with low rotate speed, longer life and lower noise. Metal guard for protecting the belt and wheels.

EXHIBITING COMPANIES

SCP AUTOMATION (M) SDN BHD

B3-5531

SCP Automation has been a leading process cooling manufacturer since 1994. Our wide range of products includes water chillers, dehumidifiers, panel coolers, and mould temperature controllers. Additionally, we offer customized chillers tailored to meet the specific requirements of our customers. With a commitment to quality and innovation, SCP Automation is dedicated to providing reliable cooling solutions for various industries.

INDUSTRIAL WATER CHILLER
SCP INDUSTRIES WATER CHILLER, PROUDLY MANUFACTURED IN MALAYSIA, OFFERS A VERSATILE SOLUTION FOR A WIDE RANGE OF APPLICATIONS. IDEAL FOR PLASTIC MOLDING, FOOD PROCESSING, ELECTROPLATING, AND MEDICAL INDUSTRIES, OUR CHILLER EFFICIENTLY PRODUCES COLD WATER AS LOW AS -25°C . SAFETY IS A TOP PRIORITY, WHICH IS WHY OUR CHILLERS COME EQUIPPED WITH RELIABLE DEVICES TO PROTECT THE COMPRESSOR AND WATER PUMP. WE HAVE THOROUGHLY TESTED AND ENSURED THE RELIABILITY OF EACH COMPONENT, MAKING IT EASY TO SOURCE AND MAINTAIN. COUNT ON SCP INDUSTRIES WATER CHILLER FOR DEPENDABLE PERFORMANCE AND ROBUST COOLING CAPABILITIES.

INDUSTRIAL HEAVY DUTY DEHUMIDIFIER
SCP INDUSTRIES HEAVY DUTY DEHUMIDIFIER, PROUDLY MADE IN MALAYSIA, IS SUITABLE FOR A WIDE RANGE OF APPLICATIONS, INCLUDING FOOD INDUSTRIES, ELECTRIC CONTROL ROOMS, AND SPARE PARTS STORAGE ROOMS. OUR DEHUMIDIFIER IS CAPABLE OF ACHIEVING HUMIDITY LEVELS AS LOW AS 40% RH. OPERATING THE DEHUMIDIFIER IS SIMPLE; JUST CONNECT THE POWER AND TURN IT ON. ADDITIONALLY, OUR DEHUMIDIFIER IS EQUIPPED WITH SAFETY FEATURES TO PROTECT ITS FUNCTIONALITY. WE HAVE THOROUGHLY TESTED THE RELIABILITY OF EACH COMPONENT, ENSURING EASY AVAILABILITY FOR REPLACEMENTS. TRUST SCP INDUSTRIES HEAVY DUTY DEHUMIDIFIER FOR EFFICIENT OPERATION, DEPENDABLE PERFORMANCE, AND READILY ACCESSIBLE SPARE PARTS.

INDUSTRIAL HEAVY DUTY PORTABLE AIRCOND
SCP Industries Heavy Duty Portable Air Conditioner, proudly made in Malaysia, is suitable for a wide range of applications, including food industries, electric control rooms, and spare parts storage rooms. Our portable air conditioner is capable of cooling temperatures as low as 18°C . Operating the unit is simple; just connect the power and turn it on. Additionally, our portable air conditioner is equipped with safety features to ensure its protection. We have thoroughly tested the reliability of each component, making it easy to source replacements when needed. Trust SCP Industries Heavy Duty Portable Air Conditioner for efficient cooling, dependable performance.

SE MICRO ENGINEERING SDN BHD

B3-5530

SE MICRO was established since year 2002 in Malaysia. We are the manufacturer of high precision parts and tools for all equipment in Semiconductor Industry. Besides, we also offer special treatment services such as Kashima coating, New Kanuc coating, Kaniflon coating etc.

CORE CLAMPER
Non-Magnetic Carbide precision part in inductor industries for engage inductor.

MOVING CLAMPER
Non-Magnetic Carbide precision part in inductor industries for transfer & move inductor part.

CARBIDE NOZZLE
Precision carbide insertion nozzle for SMT industries provide longer tool life.

SEM MATIC SDN BHD

B3-5528

SEM MATIC is an experienced machining company since 2002. We offer a wide range of ultra precision machining service, including turning, milling and centerless grinding on different materials, ranging from metals, ceramics to engineering plastics. SEM MATIC also provide comprehensive one-stop service from raw material & advanced (fine) ceramic preparation, machining and secondary process to assembly. We also offer cutting-edge automation solutions to enhance our clients' manufacturing processes.

Precision Machining Part
From intricate components with complex geometries, our precise machining capabilities guarantee high-quality, precise machined products that meet customer requirement.

Advanced Ceramic Part (Non-Porous)
We provide a single destination for design, production, and quality assurance, ensuring top-tier ceramic components. Our advanced technology guarantees optimal thermal, electrical, and mechanical attributes.

Advanced Ceramic Part (Porous)
We provide a single destination for design, production, and quality assurance, ensuring top-tier ceramic components. Our advanced technology guarantees optimal thermal, electrical, and mechanical attributes.

EXHIBITING COMPANIES

SEGIBIZ CO., LTD

D2-8821

SEGIBIZ Co., Ltd. was established in 1991 and is a company that produces electrical products such as junction boxes, LEDs, and power distributions, and continues to grow through product development and quality enhancement. The philosophy that SegiBiz Co., Ltd. pursues is to make products that can solve the inconvenience of people working in the electric field. Based on the current ISO9001 quality management system, we are constantly striving for development.

LED Signal Tower Lamp

Excellent radiating effect by using special vacuum evaporation treatment reflector along with high brightness LED

The operator can change the color of each stage
Convenient maintenance and management as the groove and the interior are integrally structured.

In addition to the buzzer, 8-chord melody sounds can be built-in

In the case of the melody type, up to 4 different notes are possible for each stage.

Power Distribution

The power distribution is a device that distributes the secondary power supplied from the main power to the primary power of each phase. It is a product that improves the existing complex distribution method to increase the efficiency of installation work. PC-made cover and heat-resistant material side plate are strong against shock and heat, so you can use it safely.

There are 2 layers / 3 layers / 4 layers and the terminal has 6P / 10P

There is a capacity of 50A / 100A / 200A

There is a removable protective cover to prevent accidents such as electric shock in advance.

Plastic Terminal Box

Plastic terminal boxes use incombustible ABS and are suitable for sensors, limits S/W, V/V BOX and various kinds of intermediate terminal boxes. Assembling existing prefabricated terminals and boxes is not difficult; productivity is maximized with all-in-one production, which saves resources so that they can be used more practically and safely. It is used in a range of fields, including industrial machinery, robots, commercial wiring, and low voltage control systems. Feature The boxes come in two colors gray and ivory with three types of covers : gray, ivory, and transparent. Excellent waterproofing and dustproof thanks to the polyurethane packing. Terminal integrated box using incombustible ABS, with various customized sizes available for user convenience.

SENRI LIMITED

D2-9108

SENRI Limited, a global B2B SaaS company originating from Japan and operating in the ICT sector. Our innovative mobile-based sales automation system, SENRI, has seen rapid growth since its launch in Indonesia in 2021. In the role of a Customer Support Specialist, you'll be a fundamental part of our team, playing a critical role in customer experience by facilitating seamless onboarding.

SENRI
Salesforce Automation System to support sales team performance

SEVEN OCEAN HYDRAULIC IND CO., LTD.

B2-4606

For over three decades, Seven Ocean Hydraulics has provided customers from Asia, and now expanded worldwide with high quality and reliable directional control valves, modular stack valves, assemblies, power units and other valves and components. Our products are of proven design and quality, and have been deployed successfully in a variety of applications for many years. We look forward to the opportunity to cooperate with you.

SOLENOID VALVES
The DSV / DSD valve is a solenoid actuated, direct acting, subplate/manifold mounting hydraulic directional control valve with 4 ports and 2 or 3 spool positions. Its primary function is to direct fluid flow to a work cylinder or to control the direction of rotation of a hydraulic motor. Available in DSV: Conduit terminal box connection or DSD: DIN 43650 style connection, a wide range of spool styles and choices of AC / DC voltages are available for order.

MODULAR VALVES
The modular stack valves are designed to install between directional control valves and its mounting surface, manifold block or subplate. Seven Ocean Hydraulics has a full range including flow control, pressure relief, pressure reducing, sequencing, counterbalance and check functions in modular sandwich style valves.

WET MOTOR PUMP
Increase precision and efficiency with Seven Ocean integrated hydraulic motor pump units. They are compact in size with a close coupled motor pump design, the unique submerged connection substantially increases the working life of the pump unit. Proven tests of low temperature rise and minimizing noise level during operations.

SGO. CO., LTD

D1-8424

SGO, the biggest manufacturer of oilless bearings, in Korea. SGO is specialized in making bronze oilless bearings for 20 years and has been supplying oilless bushings and sliding plates to major players of Injection molding machine, Stamping Press, Construction machinery, General industrial machine, Transportation device, pulp and paper machine, and off-shore device in Korea, Japan, India, USA including Germany. SGO is equipped with full production line from foundry to finished product

SGO Oilless bearing
Oilless bearing (Self-lubricating bearing) can improve productivity and save cost/time by having the material properties which can withstand both high & low temperature, corrosive environment, foreign particles, and impact load. It is a plain bearing with graphite plugged to base metal. Fine particles of solid lubricant create lubrication film on the motion part, when friction is occurred, and the bearing can achieve excellent self-lubrication and abrasion resistance under dry lubricating condition.

Self-Lubricating Bearing for Palm Oil Mill
Wheel bearing for Transfer carriage, Oilless bushing for Screw Conveyor
Change the roller bearing to Spherical plain bearing (Increase operating time, reduce maintenance)

Oilless bearing for Screw conveyor
Wheel bearing for Transfer carriage, Oilless bushing for Screw Conveyor
Change the roller bearing to Spherical plain bearing (Increase operating time, reduce maintenance)

EXHIBITING COMPANIES

SEW EURODRIVE INDONESIA, PT

B2-4403

As one of the market leaders in drive and automation technology, SEW-EURODRIVE moves applications in almost every industry. Countless conveyor belts, packaging machines, beverage filling plants, baggage carousels in airports and many more would come to a standstill without motors, gear units, gearmotors, inverter technology, associated automation technology and service offerings from SEW. As a global player, we are at home on all continents in 54 countries and always close to our customers

Gearmotors/ Gear units

Helical gearmotors Make use of the advantages of the compact combination of powerful helical gear units and AC motors. Our helical gearmotors of the series R..DR.. set themselves apart with their finely stepped gear unit ratios and variety. Parallel-shaft gearmotors: compact and powerful The parallel-shaft gearmotors of the series F..DR.. are perfect for all your design-related applications where you rely on space-saving components. They provide optimum installation conditions thanks to their slim design. Helical-bevel gearmotors Our helical-bevel gearmotors K..DR.. are an excellent choice for many applications that require compact drives with high efficiency. As they are especially low-maintenance they will reduce your costs in day-to-day operation. Helical-worm gearmotors Due to their design and from being combined with a helical gear stage, the helical-worm gearmotors S..DR.. have particularly high efficiency. They are also extremely low-noise and thus avoid high noise emission levels. SPIROPLAN® right-angle gearmotors Are you looking for drives which bring top speed to your handling application? In that case, the SPIROPLAN® right-angle gearmotors W..DR.. are a good choice. Their aluminum housing makes them lightweight; their design makes them space-saving.

Industrial Gear Units

X series industrial gear units The robust X series industrial gear units feature an invertible housing and a very broad gear ratio range. The finely stepped sizes provide additional variability during installation and use. Generation X.e helical gearunits / bevel-helical gear units. With 23 finely graduated sizes, the helical and bevel-helical gear units of the X.e series cover the torque range from 7.2 to 500 kNm. The extensive modular program and the large number of predefined additional equipment and options offer a high degree of flexibility for adaptation to the application situation. Regardless of whether you are a plant manufacturer or operator - the X.e series offers the right solution for every requirement. P series planetary gear units. The compact construction as a planetary gear unit and a primary gear unit is a feature of our industrial gear unit P series. They are used in systems which demand low speeds and a high torque. Industrial gear units girth gear series Girth gears are used to drive large, rotating systems such as dryers, rotary kilns or horizontal mills. The flexible concept from SEW-EURODRIVE has simplified manufacturing, transport and assembly.

Inverter Technology

MOVITRAC® LTE-B+ basic inverters in IP20 Simple handling application and limited space in the control cabinet? Perfect conditions for our MOVITRAC® LTE-B+ frequency inverters in IP20. Their compact design and range of functions make them ideally suited for controlling the speed of asynchronous motors.

MOVITRAC® LTP-B standard inverter with high degree of protection Introducing MOVITRAC® LTP-B, the all-rounder for specialist field applications. Dusty and damp ambient conditions are no problem for our frequency inverter with high degree of protection.

MOVIDRIVE® B drive inverter Flexible, compact and intelligent: our MOVIDRIVE® B drive inverters. They save space in the control cabinet and are equipped with integrated positioning and sequence control as standard.

SHACHIHATA BUSINESS UNIT (GADING MURNI, PT)

B3-5829

SHACHIHATA BUSINESS UNIT dari PT. Gading Murni adalah distributor tunggal dari Shachihata Inc, Nagoya, Jepang. Perusahaan ini bertanggungjawab atas distribusi berbagai produk penunjang industri berkualitas tinggi yang diproduksi oleh Shachihata Inc di wilayah Indonesia. Dengan focus khusus pada pelanggan industri manufaktur Jepang yang beroperasi di Indonesia. Produk-produk unggulan yang di distribusikan oleh Shachihata Business unit PT. Gading Murni meliputi :

1. TAT Ink Stamp
2. Artline

Artline (Paint Marker , K-177N)

ARTLINE Paint Marker EK-400XF adalah paint marker dengan aneka warna pilihan sangat cocok digunakan untuk menulis dibahan dengan permukaan besi, plastik, kaca, t-shirt tidak mudah luntur dengan Aliran tinta adjuster mengontrol aliran tinta yang tepat untuk memastikan kelancaran penyorotan. Artline Kawakimapan K-177N Spidol permanen yang tidak mengering selama 2 jam bahkan ketika dibuka. Sangat ideal untuk menandai pada pelat dan bagian logam serta pengiriman dan inspeksi.

Shachihata TAT Ink

Tinta TAT dari Shachihata, Jepang adalah tinta permanen yang biasa digunakan oleh industri untuk marking pada produk. Ada banyak tipe dan warna untuk tinta ini. Harga untuk semua tipe dan warna adalah sama untuk ukuran yang sama

Shachihata Xstamper, TAT stamper, Xtensions

Shachihata Xstamper adalah stempel yang biasa digunakan untuk kertas, kardus dan tinta yang digunakan tidak permanen. Shachihata TAT Stamper adalah sebuah produk stempel premium dari Jepang yang diciptakan untuk digunakan bersamaan dengan tinta TAT atau tinta permanen yang bisa distempelkan diberbagai macam media selain kertas dan karton. Biasa digunakan sebagai stempel markin pada dunia industri. Shachihata Xtensions Numeral dan Alphabet pack adalah stempel angka dan huruf untuk media besi, karet, kain, bata, plastik, kayu, kulit.

Xtensions Numeral : 0-9
Xtensions Alphabet : A-Z

EXHIBITING COMPANIES

SHANDONG RUIJIE CNC TECHNOLOGY GROUP CO., LTD

C3-6918

Shandong Ruijie CNC Technology Group Co., Ltd was founded in 2003. We are well known for our superior quality and service in the field of manufacturing. Our products: Fiber laser cutting machine ,Laser welding machine,Co2 Laser Engraving&cutting Machine, Wood /Advertising/Marble CNC Router ,Advertising bending machine ,Plasma Metal cutting machine. Our services: Mass production of standard and custom machines/Efficient domestic and international door-to-door service/24 Hours online free service.

Fiber laser cutting machine 3015

Fiber laser cutting machine 3015 working size :3000*1500 mm Power:3000W

Application: Suitable for high quality cutting of different metal sheets

Fiber laser welding machine

Fiber laser Welding machine Power:1000W-3000W

Application: This machine has three functions of cutting, welding and cleaning, which is suitable for the processing and manufacturing of multi-heavy metal plate.

Fiber laser Pipe cutting machine

Pipe material fiber cutting machine. Power:1000W-3000W.

Size:Diameter15mm-220mm,length:6000mm. Application: Suitable for batch cutting of square pipe, round pipe and other materials.

SHANDONG YITAI SHENGYE WELDING EQUIPMENTS CO., LTD.

B3-5309

Shandong Yitai Shengye Welding Equipments Co., Ltd. is an international developer, manufacturer and supplier of quality IGBT welding inverter from China.

Welding inverters covers Arc welding machine, MIG/MAG /TIG welders, plasma cutting machine, SAW, Stud welding machine etc, with good quality and pretty competitive price. Hope to find like-minded partners to achieve a win-win situation!

Support OEM logo service

IGBT inverter welding machine

Welding inverters covers Arc welding machine, MIG/MAG /TIG welders, plasma cutting machine, SAW, Stud welding machine.

Arc welding machine

- Digital display, welding current adjustable precision;
- Arcstrikingcurrentcanbeadjustedindividually, with excellent arc striking performance;
- Thrust current can be adjusted arbitrarily;

MIG/MAG /TIG welders

- It has the functions of manual arc welding, gas shielded welding and carbon arc gouging;
- Easy to strike the arc, high success rate;
- It has the function of eliminating the ball when closing the arc;
- Adopt waveform control technology, improve molding and reduce spatter.

SHANGHAI LIANHE INDUSTRIAL VEHICLE EQUIPMENT CO., LTD

C3-6725

Plastic Platform Trolley

Heavy duty platform trolley, 100% new PP material deck, rubber wheels moving silence. Thicken handle, stable and durable.

Steel Platform Trolley

Popular platform trolley with competitive price, moving smoothly, light weight.

Hand Trolley

Protatable hand trolley with telescopic handle, stair climbing wheels for optional. Aluminum frame is light and durable.

EXHIBITING COMPANIES

SHANGHAI KAISEN ENVIRONMENTAL TECHNOLOGY CO., LTD

A1-1516

Shanghai Kaisen Environmental Technology Co., Ltd. has been committed to the design, development and production of purification products such as welding and cutting dust, grinding dust, oil mist and oil fume. The company's products adopt advanced technology and select a variety of components to assemble, forming a series of diversified smoke and dust purification products and integrated system engineering.

Fume Extractors

The company's products are widely used in welding, cutting, grinding, spraying, casting, chemical, wood processing, tobacco, ceramics, papermaking and other industries.

Pullner

Shanghai Pullner Filtration Technology Co., Ltd. located in Songjiang district Shanghai. We are committed to the field of filtration process technology development, technology consulting, services and filtration equipment, filters and filter R&D production and sales.

Shengda

SHANGHAI SCREW COMPRESSOR CO., LTD.

D2-9213

SHANGHAI SCREW COMPRESSOR CO., LTD is founded at Shanghai in 2000. SCR together with Anest Iwata, a high-tech Japanese air compressor manufacturer, provide a complete range of compressed air system products such as high efficiency inverter screw air compressor, oil-free scroll and screw air compressor, etc. SCR Compressor is one of the leading air compressor brand in global market with hundred of official distributors around the world.

SCR EPM Series

SCR ElectroPermanent Magnet Series is the key to sustainable energy saving. This high-efficiency inverter technology could save the operational cost up to 40%!

SHANGQIU EUROPUS MEASURE TOOLS CO.,LTD

C3-7821

Shangqiu Europus Measure Tools Co.,Ltd is an manufacturing enterprise that has its own research and development center, design, production and sales department. The building area is over 20,000 square meters, with more than 150 employees. The quality of various high-precision measuring tapes produced by the company meets European and American standards. The products have passed CE, MID I & II, ISO9001:2015, BSCI and other certifications. Warmly welcome our customers to visit and guide.

Tape Measure

New ABS case with TPR coated, auto-stopper, new style with comfortable hand feel. #50 carbon steel, #65 Mn spring.

Tape Measure

New ABS case with rubber coated, new style with comfortable hand feel. #50 carbon steel, #65 Mn spring. nylon coated blade.

Tape Measure

New ABS case with TPR coated, new style with comfortable hand feel. #50 carbon steel, #65 Mn spring. double side printing with black hook.

Tape Measure

New ABS case with TPR coated, auto-stopper, new style with comfortable hand feel. #50 carbon steel, #65 Mn spring. double side printing with nylon coated blade.

Tape Measure

New ABS case with TPR coated, new style with comfortable hand feel. #50 carbon steel, #65 Mn spring. double side printing with nylon coated blade.

EXHIBITING COMPANIES

SHENZHEN SINOVO ELECTRIC TECHNOLOGIES CO., LTD

B3-5613

SINOVO

SINOVO established in 2006, with more than 200 employees and 86,000sq. ft factory. Products include VSD/VFD, solar pump inverters, off grid and hybrid solar inverters, portable power supply, soft starters, PLC, Servo, and HMI. SINOVO can provide you with high-quality and good-priced products within a short delivery time, and provide perfect after-sales service and professional technical support, so that you have no worries after purchasing the products. SINOVO may also provide convenient transpo

VFD/Frequency Inverter

SINOVO inverter is a general high-performance frequency inverter, it is mainly used for controlling and regulating speed and torque of the three-phase AC asynchronous motor; We adopt high-performance current control technology, high torque output at low frequency, the overload capacity is strong, has a good stability and dynamic performance, have a variety of communication bus function, support for multiple PG card, rich powerful, stable performance; With perfect anti tripping control and the ability to adapt to bad power grid, can be widely used in textile, wire drawing, packaging, fans, pumps and all kinds of automatic production equipment driver change.

SHINHUNG IND. CO., LTD.

D1-8408

ShinHung

Our company started manufacturing gas appliances for the first time in Korea and has been a professional company for 66 years. Products that can be distributed have agents nationwide in Korea, Shipbuilding (Hyundai, Hanwha Ocean, Hyundai Mipo, etc.) Equipment, Steel (POSCO, Hyundai Steel, etc.), Heavy Industries (Doosan, etc.) We produce and sell products specialized in various business areas. *GAS CUTTING TORCH, *GAS REGULATOR, *GAS NOZZLE, *FLASHBACK ARRESTOR

Flashback Arrestor

Blocking and preventing reverse fire that may occur when using a cutting torch, heating torch, etc It's a safety device that prevents bigger accidents.

Gas Cutting Torch

It is a gas hand tool used to cut iron plates using oxygen and gas, and there are various types such as Japanese, American, and European.

Gas Regulator

It is a device that decompresses the pressure of a cylinder that fills oxygen and gas.

SHINOHARA ELECTRIC CO., LTD

B3-5402G

篠原電機株式会社

Shinohara Electric, Japan is specializing in manufacturing and selling various types of structural materials and parts for power panel board & switch board. We are Pioneer company in Japan and top share manufacturer in this business field for 62 years. We firstly introduce "Wire Bunding Tube with Hock Button" which is very useful for maintenance work of power panel board. This product is popular not only in Japan but also in India, Malaysia, and Vietnam.

Wire Bunding Tube with Hock Button

- 1.Fire Resistant
- 2.Suitable for Free Maintenance & Design Change
- 3.Free Length & Economical Maintenance
- 4.Good Insulating Property

Ventilating Louver

Ventilation of power distribution board contributes to heat control inside. Prevents water infiltration With Fan type is available

EXHIBITING COMPANIES

SICHUAN ODOT AUTOMATION SYSTEM CO.,LTD

B2-4929

Odod Automation founded in 2003, has 20 years of experience in automation control and industrial communication technology. As a national high-tech enterprise specializing in industrial communication product R&D, industrial automation control system design, integration and technical services, the company has passed ISO9001 certification, intellectual property management system standards certification, which is a member of PROFIBUS-US & PROFINET Association (PChina), EtherCAT Technology Association,

Remote IO

C series - the remote IO system consists of network adapter module and extended IO module. The network adapter module is responsible for fieldbus communication, and it could realize the communication with the master controller or host computer software.

B Series integrated BOX I/O

ODOT B series integrated I/O module consists of communication board (COMM board) module and extended IO module. The COMM board could select the corresponding bus module according to the communication interface of the controller system. The mainstream industrial communication protocols include Modbus, Profibus-DP, Profinet, EtherCAT, EtherNet/IP, CANopen, CC-Link, PowerLink, etc. The extended I/O module is divided into six categories: digital input modul

PLC

ODOT PLC C-3351 Codesys V3.5

1. Reliable, compact, easy to expansion IO, can support up to 32 I/O modules.

2. It could be applied to multiple industries and scenarios such as mechanical processing equipment, sewage treatment, textile, non-standard automation, etc.

Protocol Converter

ODOT-PNM02 V2.1
Modbus master/slave, RTU/ASCII) to ProfiNET, 2 port serial port (RS485/ RS232 / RS422), supports 50 slots, 200 commands in TIA portal (by configured software), support MAX 60 slaves

Industrial Switches

MS100T
10/100 Mbps self-adaption, (Auto-MDI/MDI-X)
Supports IEEE 802.3 for 10BaseT
Supports IEEE 802.3u for 100BaseT and 100BaseFX

EXHIBITING COMPANIES

SICHUAN TELOS NEW MATERIAL TECHNOLOGY CO., LTD

B3-570

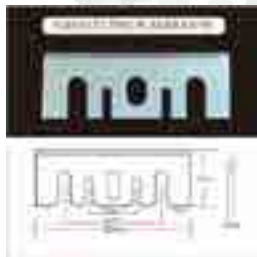

SICHUAN TELOS NEW MATERIAL TECHNOLOGY CO., LTD is generated based on 18 years old factory KENLAR & AEROLITE, with more than 18 years continuous research and improvement on woodworking cutters like straight planer knife, electric planer blade, indexable insert knife, finger joint cutter, drill bit and straight bit, we promised to provide high-quality products to new and old customers. Foreign sales team with rich experience take care of oversea business, welcome you to check more.

1900B PLANER BLADE

Easy To Operate, High Safety Level, Competitive Price, High-Accuracy, Long Service Life, Patented Product, High Productivity, Low Maintenance Cost, High Rigidity

POWER TOOLS PLANER BLADE F20A

TCT type is very advantageous for price and performance, hot selling in Indonesia. OEM packing. Skillful experience for famous brand.

WOOD STRAIGHT TCT PLANER KNIFE

Tungsten Carbide Planer Knife is replacement for wood planer, the hot selling size (610x30x3mm), blade part is brazed with tungsten carbide, we ensure sufficient size 10x1mm. it uses high hardness (HRA88-90) and virginal fine particles of tungsten carbide. Our factory accumulate rich experience for welding, the finished product is seamless, without overflowing, relieving of internal stress, then processed with precise grinding machine. They are good working for a variety of hard woods. With the features of good red hardness, less than 400mm length Wood Planer Knives edge straightness error < 0.05mm. Besides, they are strong resistance to abrasion, sharp blade, smooth planed surface, no distortion and no crack. In comparison of traditional ways, tungsten carbide planer knife can work longer time, and reduce blade-sharpen frequency, can save purchase and manual cost.

SIGMA TEK SYSTEMS, LLC. CHINA

A3-322

SigmaTEK Systems is the leading global provider of innovative end-to-end CAD/CAM software solutions. Our product suite covers the full range of fabrication workflow; from quoting to shipping, including robust integration with a wide range of business systems and the unique ability to program all major laser, waterjet, oxyfuel, plasma, punch, router, knife, press brake, and tube machines.

Sigmanest Solutions

Sigmanest solutions are the best choices for companies, which can match cutting machines, laser machines etc.

SINAR INDAH JAYA ABADI, PT

C3-7518

We are the leading manufacture of abrasive product in indonesia since 2002 and in korea since 1955. we are supplying product over 50 countries and continue to create the best customer value and experience by offering high quality solutions for the market. since 1955,cheil grinding wheels ins., ltd has been manufacturing high quality grinding wheels product to meet the wide range of industrial grinding, cutting and finishing applications.

I-PRIX CUTTING & GRINDING WHEELS

Made by suprior technology of cheil korea available for metal, stainless steel and masonry cut-off wheels available size 4 inch until 20 inch grinding wheels available size from 4 inch until 9 inch

RAIL GRINDING WHEELS
Grinding & Cutting for Railway

VITRIFIED GRINDING WHEELS
Manufacturing in variations of vitrified, resinoid, rubber, epoxy, mgo, cbn, diamond wheels.

This is only small sample of hundreds of new product which will be on display at the show. It's based on information provided by exhibitors as of November 4th, 2023. NOTE: this list is NOT comprehensive. The layout of this buyer's guide is at the full discretion of the organiser.

EXHIBITING COMPANIES

SINGA MAS MANDIRI, PT

C3-6616

PT SMM as importer & distribution of brand TORA (Hand Tools, Power Tools, General Tools), of brand LINZ & MURAKU (Welding machine & equipment), of brand SGL (Spray Gun & Compressor), of brand UNIQUE STAR (Files). We distribute & cooperation directly to Agents or Distributors or Retailers in each 34 Provinces in Indonesia.

TORA
TORA is specialize in Hand Tools, Power Tools, General Tools

SGL
SGL is specialize in Painting Tools & Equipment as Spray Gun, Paintbrush, & Compressor.

MURAKU
Muraku is specialize in equipment of welding tools

SINGAPORE PRECISION ENGINEERING AND TECHNOLOGY ASSOCIATION (SPETA)

To strive to be the PROFESSIONAL, PREFERRED and PRESTIGIOUS trade association serving the Precision Engineering industry

The Singapore Precision Engineering and Technology Association (SPETA) is the leading trade association for the Precision Engineering Industry. Our members comprise both SMEs and MNCs engaging in the manufacturing and distribution of precision engineering components, products, tools, equipment, machinery and other solutions. They participate in diverse sectors including

Trade Associaton
Singapore Precision Engineering and Technology Association (SPETA)

SKF INDUSTRIAL INDONESIA

D1-8315

For over 115 years, we at SKF have been perfecting our craft. SKF has evolved into a knowledge engineering company that is able to provide multiple product and solutions to create proven, yet unique solutions for our clients. With expertise on bearings, seals and lubrication systems, services within remanufacturing, condition monitoring and maintenance. Together, we re-imagine rotation for a better tomorrow by creating intelligent and clean solutions for people and the planet.

Bearing
Rolling bearings support and guide rotating or oscillating machine elements – such as shafts, axles or wheels – and transfer loads between machine components. They provide high precision and low friction and therefore enable high rotational speeds while reducing noise, heat, energy consumption and wear.

Condition Monitoring
With condition based maintenance, you can monitor the operation of critical systems in real time and identify potential wear or faults in moving components as they develop. This allows for a more convenient scheduling of service or repair intervals.

Lubrication Systems
In a typical machine, lubricants amount to 2-3 % of running costs. But 40 % of maintenance costs come from poor lubrication. That's why we talk not only about lubrication but lubrication management, taking a more holistic view and seeing lubrication management as an essential part of maintenance. We can never avoid failures of systems exposed to friction, but with combined data insights and means of intervention, we can safeguard effectiveness and reliability, supporting asset health and sustainability. Using technology to improve the way we use our resources responsibly. This is the next step in machine care.

EXHIBITING COMPANIES

SKT INTERNATIONAL, PT

B1-454

PT. SKT International was founded in 2006 by a team of professionally trained engineers and sales people who have vast experience and product knowledge in Electronic & Automotive industry. At PT.SKT International, we strive to be the market leader in our specialised industry by maintaining the highest standard in customer service and products quality. We talk to our clients in great details before offering our solutions and products. We believe that "if we can't satisfy our clients' needs,

VESSEL

Full range of information on product groups ranging from tightening tools such as drivers, bit sockets and air tools to anti-static products in the factory.

SMC AUTOMATION INDONESIA, PT

B2-4502

SMC Automation Indonesia established since September 2012 (Operational Start on April 2014), specializes in pneumatic control engineering to support industrial automation. SMC develops a broad range of control systems and equipment, such as directional control valves, actuators, and air line equipment, to support diverse applications.

Pneumatic Products

SMC specializes in pneumatic control engineering to support industrial automation. SMC develops a broad range of control systems and equipment, such as directional control valves, actuators, and air line equipment, to support diverse applications.

Non-Pneumatic Products

SMC also provides Non-Pneumatic Products such as Chiller, Electric Actuator, Ionizer, etc.

Training Kits

SMC also provides Training Kit products for education.

EXHIBITING COMPANIES

SNAP-ON TOOLS SINGAPORE PTE. LTD

B3-5507

Snap-on is well known as leading global developer manufacturer and marketer of tools & equipment solutions for professional tools user. We provide the most advanced tooling solutions for critical industries, with range of speciality aviation tools, hand & power tools, tool storage, tool management & safety solution

Snap-on Tools

Snap-on Tools provide solution for hand tools with wide range to make work easier for professionals performing critical tasks. With new product, ATC Level5 we are starting to digitize tools management.

Blue Point - Hand Tools and Equipment Solution Provider

An extensive range of tools & equipment for the workplace. With no compromise quality and lifetime warranty, Blue Point is better solution and right choice!

Bahco Hand Tools and Cutting Tools Solution

Bahco is one of the key innovator in the tool industry which provide solution for professional hand tools and cutting tools with wide range line up products

SNDWAY TECHNOLOGY (GUANGDONG) CO., LTD.

B3-5708

Sndway Technology (Guangdong) co., Ltd., formerly known as Dongguan Sndway Electronic co, Ltd., was established in 2010 and changed its name to Sndway Technology (Guangdong) co., Ltd in September 2023 after the shareholding reform. Sndway is a high-tech company focus on designing, developing and manufacturing Laser Distance Meter, Laser Rangefinder Telescope, Industrial Non-destructive Detector and Environmental Detector, which are sold to more than 30 countries and regions in the world.

Laser Distance Meter

Measuring Range 0.05-100m
 Measuring Accuracy ± 2 mm
 Measuring Unit mm/in/ft
 Continuous Measurement YES
 Area Measurement YES
 Volume Measurement YES
 Triangle leg Measurement YES
 LCD TFT
 Addition/Subtraction YES
 Area&Volume Addition/Subtraction YES
 Max./Min. Measurement YES
 Striking-out YES
 Delay Measurement YES
 Digital Level YES
 Camera YES
 Max storage 100 Units
 Connection USB
 Laser Class 635nm Class 2
 Automatic laser off 20s
 Automatic shutdown 150s
 Storage Temperature -20 -40
 Operating Temperature 0 -40
 Storage Humidity RH85%
 Battery 3*1.2V 1000mA Ni-MH
 Size 125*50*26.5mm
 Weight 155g with battery

Ultrasonic Thickness Meter

Display 2.0" 240x320 TFT LCD
 Measuring Range 1.00 ~ 300.00 mm
 Sound Velocity 1000-9999 m/s
 Resolution 0.1 mm/0.01 mm/0.1 in
 Accuracy $\pm(0.1+1.0\%*H)$ mm, H is the thickness of the object
 Memory 300sets, records including Material, Velocity of Sound, Unit, Measuring Value, the MAX value, the MIN value and Average Value
 Main Functions Thickness testing, Thickness scanning, Sound Velocity testing, Calibration testing
 Power Supply 3x1.5V AAA
 Working Temperature 0 °C~40 °C
 Working Humidity 10%~80%RH
 Storage Temperature -10 °C~50 °C
 Storage Humidity 10%~70%RH
 Dimension 128*63.5*27mm

EXHIBITING COMPANIES

SOLAR DIAMOND TOOLS (INDIA) PVT. LTD

D2-8906

Solar Diamond Tools (India) Pvt Limited, an ISO 9001:2015 company, was incorporated in the year 1982 in Mumbai. We are the leading manufacturer and exporter of industrial diamond tools in India. Our product range comprises - Stationary and Rotating diamond dresser Diamond & CBN honing stones and Honing Sleeves PCD & PCBN Inserts and Tools Diamond & CBN Electroplated Products Diamond Lapping Products Diamond Rolls Diamond & CBN Resin, Metal, Hybrid & Vitrified grinding wheels

HONING STONES AND SLEEVE

ROTATING DRESSERS

STATIONARY DIAMOND DRESSER

SOMAGEDE INDONESIA, PT

A2-2118

PT Somagede Indonesia, established since 1989, has consistently served the industry in Indonesia by providing solutions for quality and reliable machine tools components and adhesives materials. The success that we have achieved today is driven by our company's core strength in distribution, innovation, and our amazing team throughout the organization. With SGI's successes in the manufacturing industry, we believe we have what it takes to serve other industries in Indonesia.

SUMITOMO

Manufacturer of precision tools for metalworking in turning, drilling and milling.

BIG DAISHOWA

Big Daishowa is a premium industrial tooling company with a mission to deliver the best with a commitment to installing truly efficient solutions.

HENKEL LOCTITE

Henkel is the leading solution provider for adhesives, sealants and functional coatings worldwide.

SP SYSTEMS CO.,LTD.

D1-8402

SP SYSTEMS is supplying industry gantry robot and transfer automation systems that are customized in accordance with customer's unique needs from designing to installation. We have developed customized solutions according to the characteristics of various industries such as Automobiles, 2nd batteries, Construction, Shipbuilding, and Defense industries. SP SYSTEMS will do the best based on our management philosophy that puts customer satisfaction first with SP's spirits

GANTRY ROBOT SYSTEM

GANTRY ROBOT SYSTEM can handle various item from 10kg to 400kg

TRACK MOTION SYSTEM

TRACK MOTION SYSTEM can handle heavy items from 180kg to 3600kg.

EXHIBITING COMPANIES

SPLENDOR INOVASI INDONESIA, PT

C3-535

PT. Splendor Inovasi Indonesia is a distribution and manufacturing company for cutting tools, especially sawing tools. Our main products are bandsaw blades for various processing industries. We are an authorized distributor of Håkansson Sågblad AB (Sweden) products in Indonesia. Our company is also equipped with capabilities to customize our products according to customer requirements. We look forward to building a strong partnership with you!

Carbon Steel Bandsaw Blades

Cost-effective blades for various industries. Made from the best materials with hardened tooth tips for accurate cutting & increased blade life.

Bi-metal Bandsaw Blades

Available in M42 and M51 tooth tips with various tooth profiles & pitch. Suitable for cutting ferrous, non-ferrous metals, nickel-based alloys, hard wood, and other difficult-to-cut materials.

Other Blades & Knives

We also provide various blades and knives suitable for other industries. Customized products and materials are also available to order. Kindly contact us for other blades and products.

SQC WIRE MESH PTE LTD

A3-330

SQC Wire Mesh Sdn. Bhd.

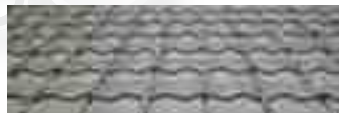

SQC Wire Mesh provides our customers a wide range of wire mesh solutions. We specialize in all kinds of woven wire meshes made from a wide range of materials. SQC Wire Mesh is committed to sharing our technical competence and expertise in wire based industrial screen, filter wire cloth, constructional mesh, architecture mesh, wire products. SQC Wire Mesh carries an extensive selection of Woven, Welded Mesh, Crimped Mesh, Knitted Mesh, Conveyor Mesh, Architecture Mesh, Perforated plate

Woven Wire Mesh

The Plain Wire Cloth Weave is the most common wire cloth used and it is one of the simplest wire cloths. The plain wire cloths are not crimped before weaving, and each warp wire passes over / under the wires running through the cloth at 90 degree angles.

Warp and weft wire diameters are generally the same. Used for the majority of commercial applications and for filtration where a high flow rate is required.

Crimped Wire Mesh

Crimped wire mesh is used in the waste water, oil refining, mining, construction, safety and food processing industries for applications that require strength and large-hole filtering and screening. Pre-crimped wire cloth is also used in architectural and industrial design applications.

Welded Wire Mesh

Welded Wire Mesh is generally of a larger open size and wire thickness, with intersecting wires welded together at each junction to provide more strength and rigidity to maintain uniform squares or rectangular shapes. Generally used as a support mesh for filtrations and in other applications as partitions, security panels, dog and bird cages, gabion baskets and retaining wall gabions'

SUGINO MACHINE INDONESIA, PT

D1-858

Sugino Machine develops, designs, manufactures, and sells high-pressure jet cleaning equipment, ultrahigh-pressure water cutting equipment, equipment for the inspection and maintenance of nuclear power plants, wet/dry atomization equipment, drilling units, tapping units, machining centers, tube expansion tools and equipment, tube pulling equipment, roller burnishing tools, biomass nanofiber, industrial robot, etc

SELFEEFER & SYNCHRO TAPPER

Compact, general-purpose drilling and tapping in one unit. Ready to adapt to your projects.

"SUPEROLL" Roller Burnishing Tool

The Global Standard for Roller Burnishing Tool, Sugino "Superoll". For more than 50 years, customers have continued to use our products - a testimony to our high quality. Through our extensive product line, we provide customers with the most suitable tools for their objectives.

Washing and Deburring Machines

"Sugino High-pressure Water Cleaner" capable of washing various parts with 50 MPa (max.) high pressure water. Sugino Machine is the world's one and only washing machine manufacturer engaged in integrated manufacturing from high-pressure pumps to washing machines. We deliver products throughout the world using technological solutions developed through extensive experience.

SUMBER MEGA JAYA, PT

B3-528

PT. Sumber Mega Jaya is a lifting equipment specialist which owned TOYO and POWERTEC brands that has served thousands of customers since 1983. Located in Glodok, Jakarta, our main products include Wire Rope, Rigging Hardware, Chain Block, Chain Hoist & Wire Hoist, Winch, Webbing Sling, Chain, and Rope.

Chain Block TOYO

Chain Block is a mechanical device used for lifting and lowering heavy loads in a controlled manner. It is a common tool in various industries, including construction, manufacturing, and material handling, where the need for lifting and positioning heavy objects arises.

Mini Hoist TOYO

Mini Hoist is a compact and portable lifting device designed for smaller and lighter lifting tasks. These hoists are typically used in situations where larger and more powerful hoisting equipment is not necessary or practical. Mini hoists are often favored for their ease of use, versatility, and mobility.

Chain Hoist KD Series TOYO

Chain Hoist is a type of lifting device that uses an electric motor to raise, lower, and move heavy loads in a controlled and efficient manner. It is a versatile tool commonly used in various industrial and commercial applications where precision and ease of operation are important. Electric chain hoists offer several advantages over manual chain hoists, including increased lifting capacity and reduced physical effort.

SUNCRAFT HARDWARE TOOLS CORP.

C3-7808

SUNCRAFT'S products include a full range of power-tool accessories, plastics, blow-mould and metal-packaging products, original-equipment-manufacturer tooling and metal-stamping fabrication.

Black oxide twist drill bit

118° or 135° with split point for precision start no walking

Taper shank black oxide twist drill bit

Black oxide drill bits provide good performance in soft metal, low alloy steel, plastic and wood.

EXHIBITING COMPANIES

SURFACE PREPARATION ENGINEERING PTE LTD

A3-3408

Surface Preparation Engineering designs, fabricates and markets machinery that clean and prepare metallic surfaces. The surface preparation machinery offered by us includes the complete range of wheelblast and airblast equipment. The equipments are designed and manufactured based on the principles of centrifugal and pneumatic propulsion of the abrasive respectively. We work with our clients to build customized machinery that address their unique needs.

PRESSURE BLAST MACHINE

Pressure Blast Machine is an innovative solution crafted with extra strong blasting power and superb dust separation system. The blasting cabinet is rugged and steady with wide working chamber. It can be placed anywhere. Designed with high visibility, enhanced safety feature and quite operation.

DUST COLLECTOR DC-2XL-B32LH

Low Height Dust Collector with twin pleat polyester cartridges, timer controlled reversed pulse jet and compact in size can be placed anywhere.

PT Surya Teknik Abadi adalah sebuah perusahaan yang bergerak dalam perdagangan barang untuk keperluan logistik. Menyediakan berbagai macam material handling equipment yang ramah lingkungan dengan konsep go green. Berdiri pada tanggal 26 November 2012 PT Surya Teknik Abadi semula hanya menjual material handling equipment dengan konsep manual.

Namun dengan semakin bertumbuh pesatnya perekonomian di Indonesia PT Surya Teknik Abadi berkembang menjadi perusahaan yang dapat mensuply kebutuhan perusahaan

Tangga Elektrik

Fitur Tangga Electric- Tangga Hidrolik Aluminium Platform Work Peralatan Standar:

- * Perangkat Cadik Leveling
- * Operasi dua pengontrol
- * Tombol berhenti darurat
- * Sistem penurunan darurat
- * Kelebihan beban terbatas
- * Indikator pengisian daya baterai
- * Saklar batas instrumen tingkat.

Full Electric

HAND STACKER FULL ELECTRIC KX CDD Keuntungan Progresivitas:

Motor dan pengontrol Penggerak AC menggunakan merek asing paling canggih, untuk memastikan kelancaran kendaraan yang presisi dengan jalan pengereman regeneratif, anti slip, fungsi bebas perawatan motor. Motor pengangkat, unit daya hidrolik, pegangan pengoperasian, steker listrik, daftar komponen utama tampilan daya, dan kronograf semuanya mengadopsi produk merek terkenal. Desain suspensi menggunakan sistem penggerak, memastikan kontak roda dan tanah baik, kelincahan kemudi, pengoperasian yang nyaman. Pemeliharaan: Motor AC, tanpa sikat, bebas perawatan, sangat menghemat biaya. Buka papan penutup belakang terintegrasi, membuat perakitan perbaikan dan pemeliharaan sangat nyaman. Tampilan pengukur daya yang akurat di lingkungan yang keras, dan ketika kegagalan forklift dapat menampilkan kode kesalahan, perawatan yang mudah.

Electric Stacker

Elektrik Stacker CTDC Keuntungan:

Sistem kemudi bantuan rantai pegangan-kastor sangat mengurangi intensitas tenaga kerja. Jenis garpu yang dapat disesuaikan secara keseluruhan, yang dapat diturunkan ke tingkat kaki yang sama. Dilengkapi dengan katup tahan ledakan, terhadap jatuhnya garpu yang tiba-tiba dan mencegah operator dari bahaya. Rantai menghubungkan roda samping dan pegangan, mudah untuk kemudi. Rem kaki yang mudah dioperasikan. Perangkat perlindungan over-discharge sangat memperpanjang waktu penggunaan baterai. Fungsi angkat adalah elektro hidrolik sementara gerakannya manual, cocok untuk semua kebutuhan pengangkatan Anda (merak, rak, membongkar dll). Desain kompak dengan konstruksi baja yang kuat.

SUTO ITEC INDONESIA, PT

D2-9614

S401/S421 Thermal Mass Flow Meter

S401 and S421 thermal mass flow meters are perfectly suited to be integrated into process controls or high-level monitoring systems. Various output options are offered for a seamless integration:

S461 Ultrasonic Flow Meter for liquid (Clamp-on)

The ultrasonic clamp-on flow meter S461 has all it takes to measure reliable, easy and accurate flow and consumption of liquids. Based on the transit time technology, this flow meter comes with unique features and outstanding performance.

S211/S215/S220 Dew Point Transmitters

The Dew point Transmitter is available with different measurement units for dew point, humidity, temperature and pressure.

EXHIBITING COMPANIES

SYSTEM STONE

D2-9130

System Stone is a Factorium CMMS system developer founded by industry-standard experts and a team of computer engineers to design and develop. "Comprehensive and Easy-to-Use Maintenance Software" We design maintenance software Maintenance application can open worksheet Repair factory machinery, approve work, report factory repairs calibration program and currently developed Online contractor management system become one more service.

Factorium CMMS

Maintenance Management System is a maintenance system for factory machinery or equipment. Used in various industries by Factorium CMMS, a maintenance app that can run from a single mobile phone. That will help to manage the maintenance work of the factory's machinery equipment or assets in the industrial plant or other industries

T & T INDUSTRIES PTE LTD

A3-3406

We are a Leading Supplier of LASER WELDING/CUTTING/MARKING Machine in today's Modern Workshop to help our customers to gain competitive advantages. We are also a Distributor of Mold & Die Repair Equipment and other Welding Products and Welding Accessories from reputable brands.

We are a Leading Supplier of LASER WELDING/CUTTING/MARKING Machine in today's Modern Workshop to help our customers to gain competitive advantages.

ROCKLIZER MICRO

We are a Distributor of Mold & Die Repair Equipment and other Welding Products and Welding Accessories.

TAESUNG FLEXIBLE

D1-8416

Taesung flexible manufactures the expansion joints for water supply and sewage, agricultural and industrial water supply, and onshore and offshore plant, including steel production and power generation, based on quality innovation for customer satisfaction. In addition, as we actively invest and have excellent technical staff, we are recognized for our best to further develop and grow through creativity and quality innovation.

Exposed single bellows expansion pipe joint

It connects between the valve and pipe or between pipes to absorb vibration and external shock to protect machinery and pipes. It is mainly used in ground structures or valve room to absorb vibration and the expansion and contraction of pipes.

Buried type double bellows expansion pipe joint

It connects between structures and pipes or between structures to absorb shocks such as ground subsidence, vibrations, and earthquakes to protect machinery and pipes. As it doesn't need a separate valve room and can be connected between pipes, it has the advantage of being buried in the ground. It is effective in preparing for differential subsidence, ground deformation caused by earthquakes, and liquefaction. It comes into wide use for water supply, sewage, agricultural and industrial water as it is solid."

EXHIBITING COMPANIES

TAEYEON MACHINERY CO.,LTD.

D2-8817

Established in 1992, our company produces high-quality rebar cutters, bending machines, automatic rebar cutting, and bending lines. The company has grown into a specialized company/exporter that produces and exports products, and is recognized as Korea's largest specialized manufacturer in the field of rebar processing. The products we manufacture are Rebar Cutter and Rebar Bender, which are mainly used at construction sites.

REBAR BENDER TYB-D26

The products we manufacture are Rebar Cutter and Rebar Bender, which are mainly used at construction sites. Purchasing (importing) companies are small construction equipment (tool) sellers or construction companies build rebar processing plants.

TYC-HD42A

TAIZHOU FEIDA MACHINE TOOL CO., LTD.

B3-5303

TAIZHOU FEIDA MACHINE TOOL CO., LTD. is near to Ningbo and Shanghai port. Our company was founded in 1995. The construction area is 30,000 square meters, mainly export to Europe, South America, North America and Asia. We have CE ROHS certificate. We are one of the professional manufacturers in China. Our products include welding machine, battery charger and plasma cutter such as MMA, TIG, MIG, CUT, BX1 and so on. We provide OEM and ODM, welcome to contact us

MMA WELDER

manual arc welder, portable and light, easy to operate and have good welding result.

MIG WELDER

gas shield MIG welding machine, use solid wire and flux-cored wire, also have MMA function

PLASMA CUTTER

air plasma cutter, light and easy to operate, high efficiency

TAIZHOU JERRYS MECHANICAL AND ELECTRICAL TECHNOLOGY CO.,LTD

C3-6527

Taizhou Jerrys Electromechanical Technology Co., Ltd. is located in Taizhou, Zhejiang. The company specializes in the production of high-pressure cleaning machines, electric motors and other products. It's a scientific and technological enterprise integrating R&D, manufacturing and sales. The company has a high-quality technical development team and a sound management system, so that we strive for perfection for every nuance. Products are exported to more than 30 countries and regions.

JT18

JT18 is our best-selling product, sold in more than 30 countries and regions, with a patented exquisite housing, high power and pressure. High efficiency induction motor built-in thermal protection, overload protection and waterproof protection.

JT20

JT20 is our newest product, with a unique exterior design that has attracted the attention of customers in many countries and is about to take the market by storm. It has a smart display that can show voltage and overheating faults.

R2

R2 has a strong power with overload protection of all copper wire motor, long service life, easy maintenance, with intelligent display, to bring you a relaxed and happy clear experience. It has a novel appearance that distinguishes other types of products on the market and is visually enjoyable.

EXHIBITING COMPANIES

THK CO., LTD

D1-8318

THK's creative ideas and unique technology made the company worldwide pioneers in the development of the Linear Motion (LM) Guide mechanism. Today, our LM Guide devices are an indispensable component of mechanical and electronic systems in a wide variety of industries. THK has also developed many other unique mechanical components, including the Ball Spline, Ball Screws and Link Balls, which are manufactured by us for supply to customers worldwide.

LM Guide

The LM Guide (Linear Motion Guide) is our main product, incorporating a part with a linear rolling motion into practical usage for the first time in the world. It realizes the development of high-precision, high-rigidity, energy-saving, high-speed machines with long service lives.

OEE Optimization Platform OMNIedge

- Visualize machines status and avoid extended downtime with a ready to use IoT service. Now available for more components than ever before.
- Easy Set-Up: The network is automatically set up as soon as you attach the sensor to the THK component and turn it on.

Electric Actuator Compact Series KSF

- Long Stroke (Max stroke of 1500 mm)
- High-Speed, Rapid-Acceleration/Deceleration
- Long Service Life (Achieves a service life of 20,000 km)

TIRTA SURYA MANDIRI, PT

D1-8437

PT. Tirta Surya Mandiri established in 2002, ever since then we are determining to fulfill every need requested by our valuable customer in many industrial sectors. With ability to source numerous brands and type of parts from all over the world, we have been growing to become one competitive company in industrial supplies. We do whatever it takes to help you tool your business for success. Simply put, we have more tools in our tool box than anyone else.

EQOFLUIDS

Aluminium Piping for Compressed Air offers a perfect connection for compressor receiver to air line service components through an absolute take off and ring main point. This can easily be fitted with just push-in action and does not require the preparation of threaded pipe or solvent. The assembly of these systems is easy and simple due to easy to disconnect features. Further, this system can be extended or altered with much decreased production down time. Our range is appreciated for abrasion resistance, durable nature, excellent functionality and corrosion resistant finish.

VPINSTRUMENTS

If the energy is measured, it can be utilized meaningfully. These solutions helps in saving compressed air and industrial gases by revealing the cost of these gases and by providing monetary benefits to the clients. These solutions are used for measuring the demand and the actual consumption of energy used in plant.

BLOVAC

BLOVAC Drum is the pneumatic pump for drums that makes the suction/discharge operation from a drum easy by only setting it on the filling opening of your steel-made drum of JIS standard.

TITAN TEKNIKATAMA INDONESIA, PT

B3-5015

Cutting Tools

Cutting tools are tools used to remove material from a workpiece in the form of chips. They are used in a wide range of manufacturing and machining processes, such as drilling, milling, turning, and grinding.

Gauges

Precision gauges for machining.

Manufacturing and Reconditioning Special Tools

We serve the Indonesian metalworking industry with the highest quality of work with a skilled and dedicated team.

EXHIBITING COMPANIES

TOCHU THAILAND CO., LTD.

D1-860

Firmly positioned as a pioneer in the shot blasting industry, Tochu Thailand Co., Ltd. is the most experienced company within Thailand and South East Asia. Having placed a strong emphasis on developing our products for over 40 years, we are now a technology leader in our field. This has resulted in improvement of various critical aspects of the machines, such as increasing the efficiency of blast wheels and work piece handling systems.

Rotary Hanger Shot Blasting Machine TRH-5A
This 2-Hanger Rotary Type Shot Blasting Machine Type TRH is the preferred choice for customers that need to blast cast iron and aluminum castings. The workpieces can be conveniently loaded and unloaded by placing them on the hanger in the front section of the machine, while at the same time the other batch of workpieces are cleaned in the blasting area. Due to the fact that they are placed on hangers, damage to delicate workpieces will be prevented making this kind of machine the most suitable solution for the treatment of automobile and die-casting components.

Tumblast Shot Blasting Machine TC-312DM
These Tochu Small Tumblast Shot Blasting Machines are suitable for customers looking for an economical way to clean smaller automotive workpieces, roughen the surface prior to rubber coating or to achieve a cosmetic surface finish for die-casting components. The capability to blast even the smallest workpieces, e.g. screws and nuts, make this product range one of our most popular to date.

Rotary Table Shot Blasting Machine TRP
The Tochu Turn-Table Shot Blasting Machine Type TRP is extremely versatile and can be used for cleaning castings, scale and rust removal, burr removal and the removal of residue after welding. Workpieces can be roughened or matted and coatings can also be removed. Due to the strategic location of the blast wheels, workpieces of different and complex shapes can also be processed.
 \tHighly versatile machine
 \tFully automated blasting of workpieces
 \tMinimal floor space requirements
 \tPitless machine design
 \tCost efficient processing of parts"

TOKIMEKU PTE LTD

A3-3310

Tokimeku is an automations solutions provider with expertise in laser and joining technologies. We are an affiliated company of Hakko Products Pte Ltd, a company founded in 1987 that specialises in soldering equipment. We provide engineering consultancy, application proof of concept, technically sound design for manufacturing proposals, and regional service and support.

Brands we Carry: TOKI, HAKKO, LPKF, TECHSPRAY, OPTILIA, RADIANT, SAN EI TECH and more

Automated Dispensing
Hands-free dispensing of glue, solvents, greases or liquids of various viscosity is now made easy with the Tokimeku Auto Dispensing System. Applicable for a wide range of applications like dot, line, spray etc.

Laser Depaneling / Prototyping Machines
Tokimeku carries a wide range of depaneling and prototyping machines that uses laser to provide clean edges with no burrs that cuts rigid, flexible or flex-rigid PCBs. These machines can be easily integrated into your production or research line and can cut PCBs of different shapes and sizes.

HAKKO HU-200 Auto Soldering Station
All-in-one 4-axis + 1 (feeder) control soldering robot system with easy programming software which allows creating a soldering program easily. All operations such as soldering conditions including solder feed amount and heating time can be controlled with the tablet provided for consistent and repeatable soldering.

TOKY INDONESIA

D1-8332

Products have covered power meters, industrial control instruments, smart energy meters, transmitters, sensors, and power, energy efficiency, industrial automation system software and other products

Temperature Controller
RS485 communication, ModBUS-RTU protocol. industrial level of EMC test and higher reliability.

Power meter
ds9L, three phase energy meter, with rs485 port

Counter
CA/CA-W Digital Counter Meter Economical and practical, dual-line 6 digits display. High-performance, micro processor as controlling core High accuracy and anti-interference capability. NPN PNP can switch the short-circuit pin internally. With F/R/N/C output function

This is only small sample of hundreds of new product which will be on display at the show. It's based on information provided by exhibitors as of November 4th, 2023. NOTE: this list is NOT comprehensive. The layout of this buyer's guide is at the full discretion of the organiser.

EXHIBITING COMPANIES

TOKYO METROPOLITAN SMALL AND MEDIUM ENTERPRISE SUPPORT CENTER

D2-9117A

Tokyo Metropolitan Small and Medium Enterprise Support Center (Tokyo SME Support Center) is a public-interest corporation established by Tokyo Metropolitan Government for promoting business developments of small and medium-sized enterprises (SMEs) in Tokyo, and it supports SMEs in various business fields to meet their levels of growth. Among the divisions of Tokyo SME Support Center, the comprehensive support for SMEs in terms of their internationalization is handled by Tokyo SME Support Center.

TOP MOST ROBOTICS AND SYSTEM INDONESIA, PT

B2-4925

Handling Case Mission Robot

Handling process with robotics arms, move the product to different position so can reach to the conveyor system.

PT. Top Most Robotics And Systems Indonesia is one of System Integrator for Robotics Automation System. We are dealing in all sector of Manufacturing Industries, such as Automotive Industry, Palletizing System, Conveyor System, Logistics & Warehousing Shelving Systems, Finishing/Deburring, Die Casting, and etc. Good quality output and affordable price are our strong points. We are sure that our service can makes good impact to the productivity.

TOYO AUTOMATION CO., LTD

D2-9117C

Since 1971, Toyo Automation Co., Ltd. is a pioneer and highly specialized in designing and manufacturing seismic sensors. Total number of our seismic sensors sold in Japan and overseas has exceeded 2 million units, making it the number one supplier in the world. Major fields of application are: 1. Elevators 2. Boiler equipment 3. Liquefied Petroleum Gas (LP-Gas) equipment 4. Plant equipment 5. Electrical facilities 6. Water storage tanks

Seismic sensor

There are mechanical seismic sensors that use magnetic force to detect earthquakes and do not require a power supply, and electronic seismic sensors that use capacitive sensors to detect primary wave, secondary wave, and long-period earthquakes. It is used as a sensor to detect and notify earthquakes in a variety of equipment, including earthquake emergency operation systems for elevators, and emergency shutoff systems that automatically close water tank valves to secure emergency water.

Emergency shutoff system

This system immediately closes the shutoff valve when its seismic sensor detects earthquake motion. In the event of an earthquake, water tank will maintain a specific volume of water on hand. However, it may experience unexpectedly flowing water as a result of pipe damages. Installing the system prevents the water flow.

TOYOX CO.,LTD

B2-4731

We produce hoses and connectors from Japan for various industrial needs, our hoses already have RoHS2 and Food grade certificates with complete certificates for the food and pharmacy industries, we are always committed to customer satisfaction

EXHIBITING COMPANIES

TRATAS MEGAH LESTARI, PT

C3-6618

Summitech Professional is a premium quality protective glove and markets a wide range of protective gloves for the industries thus offering a comprehensive hand protection services. Product quality in compliance with international standard and regulations and designing products from the stage of conceptualization to final production towards meeting the market requirements and customer needs. Summitech Professional is a product that is made by Sumirubber Malaysia Sdn.

GT-F-09C

Sarung tangan Summitech Professional type GT-F-09C merupakan sarung tangan Chemical Resistant dan Cleaning Handling gloves yang dapat digunakan untuk banyak kegiatan dalam industri:

1. Chemical processing & preparation
2. Petrochemical dan Agrochemical industri
3. Logistik dan warehouse
4. Pekerjaan janitorial
5. Restaurant & Hotel
6. Household work

- Fitted sleeve to prevent water in
- Ribbed sleeve to maximize airflow

TRIDI ZAIKU INDONESIA, PT

C3-6602

We are the Biggest Distributor of 3D Printers, 3D Scanners, CO2 Laser Machines, Fiber Laser Machines, and CNC Router & Milling Machines

Laser Marking & Cutting Machine

we provide affordable Laser Marking and Cutting that can cut all materials with high detail, we have Fiber Laser cutting & marking, CO2 Laser cutting & marking

CNC Router and Milling Machine

we provide best performance CNC Machine that can cut all materials with high precision

3D Scanner and 3D Printer

We provide most popular brands of 3D Scanner and 3D Printer, such as Shining 3D, Anycubic, Creality, Flashforge, Prusa, Bambulab

EXHIBITING COMPANIES

TRIMANUNGGAL SEJAHTERA, PT

D2-9202

Products that will be displayed in the form of safety items, then other heavy equipment for the needs of companies and field projects with several international brands and our own local brands which of course have the best quality.

REDRAM

Red Ram is a specially established line that answers directly to the side demands of welding and machinery industry, that is Industry Safety Garments & Equipments such as : Welding Apparels (eg. Leather Jacket/ Pants), Gloves, Shields, Shoes and Screens or Frames. With various sizes and colors, all products under Red Ram are compliant to PPE and Conformity. Made in : Republic of China

LENCO

Lenco manufactures a complete line of manual welding accessories and automotive spot welders. The factory located in Jackson, Missouri is a fully integrated facility with foundry, plastic molding, and machining capabilities. LENCO products are sold through welding distributors throughout the world. Made in : U.S.A

WEILER

Weiler was originally a manufacturer for industrial brushes in jewelry industry in 1898. Currently, Weiler owns manufacturing facilities worldwide specializing in global source for surface conditioning product. As the industry expert, Weiler provides solutions to a wide range of cleaning, finishing and deburring applications in multiple industries such as: Welding, Heavy Equipment Manufacturing, Construction, and Pipeline/Petrochemical , among others. Key products including : Power Brushes, Abrasive Flap Discs and Roughneck® Premium Line including Pipeline Brushes Made in : U.S.A

EAGLE CLAMP

The Eagle Clamp never neglects to challenge to a new field aiming at the product development and high value. Many patent fillings outside the country are the proofs of our enterprise and future possibilities Made in : Japan

MILLER

Miller® is about building things that matter. We lead the welding industry in building advanced, solution-focused products and meeting crucial needs for welding safety and health. This company began with an innovation that responded to customer needs, growing from a one-man operation in 1929, to the world's largest manufacturer of arc welding products. Made in : U.S.A

TRUMPF INDONESIA

A3-3319

TRUMPF

We are a market and technology leader in machine tools and lasers for industrial manufacturing. Our innovations play a role in virtually every sector of industry, from software that paves the way for smart factories to solutions for high-tech processes in industrial electronics.

TRUBEND 1225

The efficient basic machine impresses with its simple operability, high precision, and the familiar TRUMPF safety standards. Fast set-up as well as simple and smooth operation with minimal downtimes offer you the perfect introduction to the TRUMPF bending world.

TRULASER 1000 BASIC EDITION (L99)

The TruLaser Series 1000 Basic Edition combines TRUMPF quality with an attractive price and offers the best solution for beginners & experienced customers. TRUMPF

EXHIBITING COMPANIES

TSUBAKI INDONESIA TRADING, PT

B1-4415

Tsubaki has been well known as a worldwide leading manufacturer of Power Transmission products and Materials Handling systems for over 100 years. Since its establishment, Tsubaki committed to not only crafting reliable and high-quality products but also providing a product that is safe for society. In recent years, in accordance with the concept of Ecology & Economy, we have worked rigorously to develop new products that simultaneously realize lower burdens on the natural environment.

SFV Conveyor

Specialized conveyor that designed and produced by Tsubaki Bulk Handling Corporation. It allows to convey bulk material

TTF STORAGE SYSTEMS SDN BHD

D2-862

TTF Marketing Holdings Sdn Bhd and TTF Storage Systems Sdn Bhd are leading manufacturer of warehouse storage system & solution provider in Malaysia. With our dynamic strength and full coordination, both corporate are generally recognized as "TTF GROUP". TTF GROUP is home to multiple distinctive brands built based on the respective expertise that each brand posses. Our mission is to "Creating innovative storage & retrieval solutions that are "effective & efficient".

Light Duty Racking Systems

Light Duty Racking Systems includes Boltless Rack, Rakku Rack, and etc. With loading capacity ranging from 100-400kgs per uniformly distributed loads, it offers multiple application subject to users storage needs.

Medium Duty Racking Systems

Medium Duty Racking Systems includes Ideal Longspan Shelving Rack. With loading capacity ranging from 400-500kgs per uniformly distributed loads, it offers multiple application subject to users storage needs.

Heavy Duty Racking Systems

Heavy Duty Racking Systems includes Heavy Duty Pallet Rack, Shelving Rack, and etc. With loading capacity ranging from 1,000-3,000kgs per uniformly distributed loads, it offers multiple application subject to users storage needs.

TWIN-TOWN ENTERPRISES

C3-6723

Twin-Town is a fully integrated enterprise, incorporating technology, research and development, manufacturing and marketing functions, Twin-Town now owns outright, or partly owns the following factories: Twin-Town saw industries co., ltd. Twin-Town abrasives manufacturing co., ltd. Twin-Town diamond co., ltd. Twin-Town become a leading manufacturer & supplier of Circular saw blades, abrasives, and diamond tools in China.

TCT saw blades

TCT saw blades for cutting wood, aluminium and steel.

Diamond tools

Diamond tools for cutting and grinding hard and brittle stone

Abrasives

Abrasives for cutting and grinding metal and inox

Hisaka Plate Heat Exchanger & Ball Valve

Hisaka Works.Ltd was founded in Japan in May 5, 1942.Its main products are plate heat exchangers (Gasketed and semi-welded), Brazed plate heat exchangers, ball valves, sterilized machineries (for food, beverages, and pharmaceuticals), Dyeing and drying machineries for textile. Throughout the year, Hisaka Works. Ltd. have been very succesfull recording an annual turnover of 23.7 billion JPY and producing various patents domestically and Internationally. We PT. Unggul Prakarsa Prisma - Hisakindo is the sole authorized agent for Hisaka Works in Indonesia market. We fully support for both sales and after sales service of all Hisaka Unit in Indonesia. For all inquiries please contact our email : unggulpp@upp.co.id

ESKA CORP INDONESIA

Eska Corporation is one of the leading manufacturer of steel products. We make full use of advance technics and equipment during our production, including X-ray detection, ultrasonic testing, hydrostatic pressure testing machine, tensile testing machine, and other physics & chemistry techniques and integral inspection system, to reach the best products as per the standards and satisfy our valuable customers Our main products are pipes, fittings, flanges, valves, plates, bars, profiles, bolt & nuts, and metal fabrications With strict quality management system, scientific, overall marketing, strong financial strength, excellent after sales service, and advance management experiences, we sincerely hope to establish the long term business relationship to get mutual benefit and development.

UNGGUL SEMESTA, PT

D2-8717A

We are a company engaging in the scope of welding, engineering and automation businesses. Our company distributes machines sourced from Japan, China, Thailand, USA, Netherlands and Singapore. Manufacturers worldwide trust us to market and provide after-sales service to customers in Indonesia. In developing the marketing of products, our team receives training and is equipped by manufacturers with facilities and synergies in order to meet customer needs.

OTC DAIHEN

Arc Welding Equipments : Arc welding involves using electric arc to join pieces of metal together.

DENGSHATOA

Resistance / Spot Welding Equipments : Resistance / spot welding is a kind of welding process that works by applying pressure and current through the metal area which is to be joined.

ENDO

Material Handling Equipment : Moving goods and materials with machines in a factory.

Our product lineup covers various industrial operations involving cutting, grinding, welding, heavy lifting, repair, chemicals and hoses.

Nippon Resibon

Nippon Resibon is the brainchild of Resibon Japan Co.Ltd, which is a globally well-known resinoid wheel expert and producer from Osaka Japan since 1958. Since its founding, it has launched various popular products based on original ideas and technologies which could perform flawlessly in grinding, cutting and polishing all kind of materials. Among those are "The Super Series" which is significantly boots the abrasion and grinding performance of conventional tools, "Colored Grinding Wheel" which transformed the industry's perception of an entire product category, and "Flexibel Grinding Wheel" which was the first of its kind in the industry. Nippon Resibon is a brand that is trusted by many local professional and users, and has been the top of mind brand for grinding and cutting for many years.

ULTRA Abrasive

In order to cope with the increasing demanding market for better and cost-effective products, Resibon Japan Co. Ltd, who is the maker of Nippon Resibon, built its overseas factory venture in Thailand to meet with such demands. Cooperating with us as its representative in Indonesia, it created an entire new line-up of products named Ultra which despite the lower cost still able to perform exceptionally well. It is a brand to watch out for since it is innovating as fast or even faster than its big brother counterpart, Nippon Resibon.

Bridgestone Hose

Bridgestone Corporation is a manufacturer of truck and car parts established in Fukuoka, Japan in 1931 and is now the largest tire manufacturer in the world. Using his long experience in processing rubber products, it is divided into categories of rubber products, including rubber hoses for industry. Bridgestone hose has a range of different products such as air, water, gas and hydraulic hoses that can be used in the most complex industrial needs but still prioritize safety and also durable

VENUS WIRE INDUSTRIES PVT. LTD.

PT. Victor Inti Teknindo, an Indonesia supplier of industrial and automotive tools equipment that oriented to quality of product and service with national business coverage. PT. Victor Inti Teknindo is assigned to be the sole distributor of Firebird - a world-class air tools brand- in Indonesia.

FIREBIRD Automotive & Industrial Air Tools

Firebird has successfully sell their product to global market including Asia, United States, Brazil, and Europe. Beside, Firebird has been widely acknowledged for its best-quality products, such as air impact wrench, air blow gun, air screwdriver, air drill, air sander, etc. All the products are manufactured under strict quality controlling of the material and production process. Therefore, Firebird has also accredited with international quality certification ISO 9001. Firebird is well-known for its quality, performance, durability, after sales service and best value. Firebird is used by most of major automotive authorized maintenance service workshops, and heavy duty professional industrial factories in Indonesia.

Firebird Air Impact FB-1483

World Wide Class Automotive Air Impact with best quality, aftersales service and lifetime warranty. Passed the quality test and used by several automotive leader brands in Indonesia.

FIREBIRD Air Impact FB-2634

World Wide Class industrial air impact with best quality, aftersales service and lifetime warranty. Used and recommended by industrial leader brands in Indonesia.

VPS CO., LTD.

D2-8819

VPS have manufactured Dry Screw Vacuum pump as special item. We are doing our best to develop for vacuum business since VPS had been established. Through solving the product with the spirit of Challenge and Pioneer, we develop our product which do not need any disposition like wastewater or waste oil for green environment dry vacuum pump. We are exporting our small, medium & large capacity Dry Screw Vacuum pump to Worldwide market by ourselves.

VPS-C Series

Variable Pitch Screw pump Power Consumption Reduced by 30% Low Discharge Temperature

VPS-P Series

Oil & Water free Dry running operation makes Clean Vacuum Not using Oil & Water as pumping medium, low operation cost

EXHIBITING COMPANIES

WAM TRADING INDONESIA, PT

C3-780

WAMGROUP is the global market leader in Screw Conveyors and amongst the most prominent players in the field of Bulk Solids Handling & Processing Equipment. The company founded in Modena, Italy, in 1968, employs some 2,400 people at more than 60 locations in 40 countries.

The Company's comprehensive product range includes equipment for Bulk Solids Handling & Processing, Dust Filtration, Waste Water Treatment and Renewable Energy Generation.

WBH Lithium High-Efficiency Single-Shaft Ploughshare Mixers for Secondary Battery Industry

The WBH Lithium Horizontal Single-Shaft Batch Mixer is based on the principle of mechanical fluidisation of the product. The special shape, position, and rotational speed of the mixing tools create a centrifugal vortex motion, which allows the materials to be projected three-dimensionally and to merge together. This ensures that ingredients with different particle sizes and bulk densities are mixed perfectly and with high precision within the shortest possible time.

SILOTOP ZERO Silo Venting Filters

SILOTOP ZERO is a cylindrically shaped dust collector for venting pneumatically filled silos. Its stainless-steel casing contains vertically mounted POLYPLEAT elements made from NANOFIBER filter media. The compressed air pulse-jet cleaning system is integrated into the hinged weather protection cover.

Tanker Loading Bellows ZG

ZG Loading Bellows are used for efficient, dust-controlled loading of dry, dusty bulk solids into tankers. The spouts are provided with inner tapered cones to contain the flow of material and an outer double bellows to provide for dust removal. At the lower end of the Loading Bellows, a SINT engineering polymer-coated cone with special sealing properties is provided for connection to the tanker.

WANNER™

A1-162

Since 1972, Wanner Engineering manufactures high pressure, sealless pumps with proven performance and reliability in some of the toughest industrial equipment and process applications. Main product lines include Hydra-Cell, Vector, and Stan-Cor pumps. The Hydra-Cell's durability, performance and simplicity of design make it the optimum choice for the widest range of pump applications. Hydra-Cell pumps are sold and serviced worldwide by a comprehensive network of factory trained pump distributor

Hydra-Cell®

Hydra-Cell positive displacement pumps feature a sealless pumping chamber and hydraulically-balanced diaphragm design, enabling the pumps to provide leak-free, low-maintenance performance while processing difficult fluids over a wide range of pressures and flows.

EXHIBITING COMPANIES

WEIDMÜLLER

B2-4902

Be it automobile manufacturing, electricity production or water management - hardly any of today's industries can do without electronics and electrical connectivity. New, more varied challenges have to be overcome, and the solutions to them will not be found in high-tech products alone. As experienced experts, Weidmüller supports our customers and partners globally with products, solutions and services in the industrial environment of power, signals and data.

Automation & IoT Solutions

Our comprehensive and cutting-edge IIoT portfolio applies for both, greenfield and brownfield applications. We offer components and solutions from data acquisition, data pre-processing, data communication and data analysis.

Smart Connectivity Solutions

Well conceived connections increase your efficiency. Our products create added value in planning, installation and operation.

WELDMAX INDONESIA MANDIRI, PT

B3-5424

Weldmax is all about high quality and lean manufacturing which is now a premium name in the welding industry and you can be guaranteed that we care the most. With the recent inverter additions and enhancements to the product line up, Weldmax now has products suited to a wide field of uses starting from welding in the garage to heavy boiler making and structural steel and stainless manufacturing.

Laser Welding Machine HGLW Series

Laser welding has the following specifications: Support stainless steel, carbon steel, aluminium welding wire, Support process library storage, 6 spot modes, Adjustable light spot - Control screen directly digitally sets the parameters of the wire feeder, Beautiful welding seam, fast speed, no welding marks, no discoloration, no need for later polishing, and others

Welding Machine Hugong & Weldmax

Weldmax and Hugong have many types of welding machines and are guaranteed quality and safety and also have a 1 year machine and spare parts service guarantee, which means that if there are problems or non-commercial damage and not the operator's fault, you can claim for a free replacement.

Welding Consumables Weldmax & Chosun

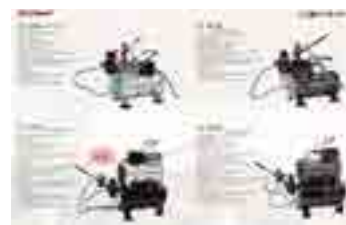

Weldmax and Chosun are welding wires with very good quality, strong welding results, affordable prices, have many types of welding wire as well as very complete sizes of welding wire, and are guaranteed safe because they have been verified with BKI (Indonesian Classification Bureau)

WENZHOU HANFONG MACHINERY CO.,LTD

C3-7515

Wenzhou HanFong Machinery Co., Ltd. Designs and manufactures the most efficient and powerful oil-less mini air compressors, airbrushes, airbrush holders, sun tanning systems and accessories in Wenzhou city, China. Our products are specially suited for airbrush tanning, tattoo, makeup, airbrush T-shirt, art designs, advertising spray, and so on. C3-6505

Wenzhou Junwei plastic limited company is located in the "" China Electric Capital* Zhejiang province Yueqing city economic development zone, and the beautiful scenery of the state-level scenic spot - Yandangshan mountain scenic area adjacent to Wenzhou airport, 30 km;seven of the Wenzhou harbor three kilometers, terraqueous empty traffic is convenient. The company has a production plant 5000 square meters,now more than 200 employees, fixed assets amounts to 30000000 yuan, specialize in cable tie.

nylon cable ties,nail clips,tile spacers etc

Material:Nylon 66,94V-2 certified by UL,Heat-resisting,erosion control, insulate well and not apt to age. Color:Natural(or white,standard color), UV black and other colors are available as requested.

stainless steel cable ties

Material: 201,304 and 316,erosion control, and not apt to age. Color:Natural(or white,standard color), black and other colors are available as requested.

nail clips

Material: PP,Steel nail.
How to use: Put the cable under the clip andhammer the nail into the wall to secure the cable.
Application:Securing of cables for general indoor wiring

tile spacers

spcers are used for tile gap.

cable puller

it is used for dragging wires in building

WESPA METALLSÄGENFABRIK

A3-3424

WESPA your technology partner for all metal-cutting needs. Since our foundation in 1950 in Spangenberg, and the production of the first bandsaw tools for metal cutting, we have become a pivotal technology partner for every sawing requirement.With a global sales network and specialized trading partners in over 100 countries, and our own companies in North America and Asia, we proudly guarantee fast availability and comprehensive service that you will surely benefit from!

CROSSTEC

The flexible blade for continuously changing workpieces.

EVOTEC SC

The high-performer for high-strength materials.

SUPER SCL

The effective blade for solid materials.

WILBERT PERKASA TEKNIK, PT

C3-6902

PT. Wilbert Perkasa Teknik si a company engaged in General Supplier and Contractors mainly focused on industrial circulation. Established in 2018, PT. Wilbert Perkasa Teknik focuses on providing solution and give the best services according to our partners'need. Our goal is to be the first choice for our business partners by contributing to each of our clients more than they expect through professional service and full integrity.

Traftek Roof Cone Fan

Traftek Roof Cone Fan is our best seiling rooftop exhaust fan (Roof Ventilator). Specifically designed with the latest technology. Traftek Roof Cone Fan is the right solution to solve any circulation problem in your industry, removing heat, dust, smoke, also odors. It is the right choice for many solutions, prioritizing function, power, and efficiency in your industry

Traftek Cone Fan

Traftek Cone Fan is our best selling well mounted exhaust fan. Traftek Cone Fan can be applied as 2 function (as output or as Input Fresh Air). Specifically designed with the latest technology. Traftek Cone Fan is trusted to be the right solution not only removing heat, dust, smoke, odors, but also can be applied to input fresh air into a room.

Traftek HVLS Fans

Traftek HVLS Fans is an Industrial Ceiling Fan that distributes large ampunts of air at low rotational speed. Suitable for : Warehouse, Barns, Hangars, Shopping Malls, Commercial Area, School, Public Transportation, Airport, Etc

This is only small sample of hundreds of new product which will be on display at the show. It's based on information provided by exhibitors as of November 4th, 2023. NOTE: this list is NOT comprehensive. The layout of this buyer's guide is at the full discretion of the organiser.

EXHIBITING COMPANIES

WingArc Singapore Pte. Ltd.

D2-9102

WingArc is Japanese Data Empowerment Company and provides the Data Analytics solutions which is top market share in Japan. We have many Use Case of "Kaizen" for Manufacturing as Real-time Monitoring Dashboard. You can connect to data from such as ERP, MES, equipment, signal tower, tablet, camera, Excel and easily create customized dashboards using the GUI. We strongly support your smart factory in terms of data utilization.

Realtime BI

Realtime BI is an Indonesian cloud service solution that enables all data utilization on one platform

WINNER HYDRAULICS CORPORATION

B2-4618

Winner's main products include Hydraulic Screw-in Cartridge valves, Electronic, Proportional Cartridge Valves, Power packs, Manifolds and coils. We have the best R&D team to provide various hydraulic solutions. Winner delivers competitive and high quality products to customer through comprehensive manufacturing system. Zinc-Nickel plating offers better corrosion resistance than Zinc plating. If you would like to have further understanding about Winner, please visit www.winnerhydraulics.com.

Cartridge Valves/Solenoid Cartridge Valves

Winner, which produces a variety of cartridge valves. Winner supplies proportional valve, pressure control valves, flow control valves, directional control valves, logic element valves, solenoid operated valves and manifolds. The valves can save space and weight which are easy to install and can be widely applied to industrial, mobiles and integrate circuits. Our products are of high quality and 100% tested. Winner also accepts custom orders.

AC/DC Hydraulic Power Packs

- DC motors from 0.55KW to 3.0 KW as well as DC 12V and DC 24V.
- AC motors from 0.25HP to 3.0 HP.
- Pump capacity range is from 0.5 cc/rev to 7.3 cc/rev.
- Standard tank sizes vary from 0.5L to 8.0L.
- Hydraulic circuit valves can be inter-changed with the standard manifold.

Custom tanks are also available.

Manifolds

ML Line Mount Standard Manifolds
MH Sandwich Manifolds
MM Motor Mount Manifolds
Integrate Manifolds
Custom Manifolds are also available

WIRA GRIYA, PT

D1-8117

Pneumatic Diaphragm Pump PD40

Diaphragm pump PD40 of outstanding flushability and high reliability, friendly to people and the environment. Contributes to resource saving and cost reduction.

World Hoist

Low headroom, C-type structure
Rotation mounting design for lifting motor
Smart driving, higher efficiency
Stepless control trolley
Maintenance free

Air Electrostatic hand gun HB5000

Transfer efficiency, Film coating quality, safety and comfortable operation

EXHIBITING COMPANIES

WIRATAMA MITRA ABADI, PT

C3-6819

Wiratama Mitra Abadi established in 2004. Our business field are measurement, level and electrical. We have our own brand Flowma . We are stockist for Flowmasonic ultrasonic flowmeter and Flowmag electromagnetic flowmeter . We do training, services and calibration flowmeter many kind of brands. We are distributor from USA, German, Netherland and Japan. We also stocksit for electrical connector such as Circular connector, rectangular connector etc.

FLOWMETER

Flowmeter is a measurement to count the flow of liquid, gas, solid etc.
Best seller - Your most popular product in the market

LEVEL

Level is a measurement to count the level of liquid, gas, solid etc.
Best seller - Your most popular product in the market

DISPLAY AND CONTROL

We are suply such as batch control, data logger, recorder and HMI
Best seller - Your most popular product in the market

XIAMEN DONGWEITING ELECTRICAL ENGINEERING INDUSTRIAL CO., LTD

B1-4128

Our main products are T.W.T electric gear motors, motors for mechanical parking garages, clutch breakers, speed controller inverters, mini gear motors, GA worm gear motors, planetary gear motors, linear type reducers, servo motors, right angle gear motors, AC gear motors and oil pump motors, etc. Being low noise, high torque, compact, light weight, long life, maintenance-free, etc, our products have passed the ISO, 3 C, CE quality certification

AC Motor

6w to 250w induction motor, Variable speed motor 110v 220v 380v 440v high torque low speed

DC motor

12v 24v 90v 180v 20w to 200w
Rated speed 1800rpm/3200rpm, torque 0.9-250kg-cm

Small AC Gear Motor

100w to 7.5kw, 220v 380v 1 phase/ 3 phase motor with gear box, final speed 0-500rpm
Rated Speed 1450/1750rpm

XINGXIONG CO., LTD

D2-8930

We are a professional supplier of tool and die steel from China, covering the following products: hot work mold steel, cold work mold steel, plastic mold steel, among which plastic mold steel: 1.2312/4140/1.2311/1.2738 is our star product. We also sell equipment including: CNC Duplex Milling Machines, CNC Gantry Grinding Machine, Gantry milling machine,etc

MOULD STEEL

hot work mold steel, cold work mold steel, plastic mold steel, among which plastic mold steel: 1.2312/4140/1.2311/1.2738 is our star product.

CNC Milling Machines

We also sell equipment including: CNC Duplex Milling Machines, CNC Gantry Grinding Machine, Gantry milling machine,etc

EXHIBITING COMPANIES

XINLEI COMPRESSOR CO., LTD

D2-9217

Xinlei compressor co., Ltd was founded in Zhejiang, China in 2006. Xinlei is a high-tech enterprise with independent research and development intellectual property rights. And awarded the title of National "specialized and innovative Small Giant". Xinlei is a manufacturer of air compressors specializing in R&D, manufacturing, sales and services of air compressors. The company covers an area of 110,000 square meters and has more than 900 employees.

XINLEI SCREW AIR COMPRESSOR

1. Real better than Grade 1 energy efficiency
2. Coaxial integrated direct connection technology
3. Smart IOT
4. Oil-cooled high-efficiency permanent magnet motor

XINLEI PM VARIABLE-FREQUENCY CENTRIFUGAL BLOWER

1. High efficiency and energy saving
2. Convenient disassembly
3. Stable and reliable
4. Intelligent control.

XINLEI PM VARIABLE FREQUENCY PISTON AIR COMPRESSOR

1. Super energy efficiency
2. Lightweight design
3. Low noise and oil free
4. Fast air intake large displacement.

XINXIANG COOLWORKS FILTER CO., LTD.

B3-5411

Coolworks Filter company was built in year 2013, as always committed to the research, production and manufacture of oil separators, air filters and oil filters for screw air compressors. We have established strategic cooperation relationship with many famous manufacturers in domestic and abroad. Coolworks Filter's sales network spreads all over the world, while they gain a good reputation in the industry.

Flange type oil separator

Used to replace the filters of the air compressors in brand of Atlas Copco, CompAir, Ingersoll-Rand, Boge, Kaeser, Sullair, Kaishan, etc.

Double open oil separator

Used to replace the filters of the air compressors in brand of KOBELCO, KAESER, HITACHI, SULLAIR, etc.

Single open oil separator

Used to replace the filters of the air compressors in brand of KOBELCO, KAESER, HITACHI, SULLAIR, etc. Filter is made of ultra-fine glass fiber paper produced by HV company

XINXIANG DADI FILTER MANUFACTURING CO., LTD

B3-5709

Xinxiang Dadi Filter Manufacturing Co., Ltd was founded in 2004. We are committed to providing customers with high-quality products, professional technology and good after-sales service. Our company mainly focused on the field of filtration, we provide filtration solutions for oil and air. Our main products including Air compressor filters (oil-gas separator, oil filter element, air filter element), precision filter element series, hydraulic filter element series and other filtering products.

Air Compressor Air Oil Separator

Application: screw air compressor and slide compressor
 Residual oil rate: 1-4mg/m³
 Working temperature: 120 °C
 Pressure drop: 0.15-0.2bar
 Rated flow: 1 -- 46m³ / min
 Service life: 4000-6000h
 Advantages: use of top filter material, high reliability
 Low residual oil rate, low fuel consumption
 More efficient oil interception

Air Compressor Oil Filter

Application: screw air compressor and slide compressor
 Service life: 1500-2000h (poor working condition, shorten replacement cycle)
 Advantages: use of top filter material, high ash content
 Bypass valve design ensures smooth lubricating oil during cold start of the machine
 Convenient disassembly and space saving
 Low maintenance cost

Air Compressor Air filter

Air filter is the first protective in the open system of "suction air intake" of air compressor. It is required that under any working conditions of the air compressor, remove the harmful dust, particles and matters in the air inhaled by the air compressor as much as possible to prevent them from entering the compressor system, and caused damage of the performance and service life for compressor main engine and auxiliary system (such as oil gas separator, oil filter, lubricating oil, etc). Therefore, the air filter plays an important role in protection for compressor

EXHIBITING COMPANIES

XQL LASER CHINA CO.,LTD

B3-5230

XQL LASER CHINA CO.,LTD was established since 2006, located in Shunde District National High-tech Industrial Zone, is a laser intelligent equipment enterprise integrating design, development, production and sales. Our Main products : fiber laser cutting machine , laser welding machine, laser cleaning machine, laser automation solutions, Robot laser welding machine etc., The sales service network has covered more than 26 provinces and regions in China, and exported to more than 60 countries.

XQL FIBER LASER CUTTING MACHINE

Fiber laser cutting machine in sheet metal processing, chassis cabinets, home appliances kitchen and bathroom, lighting, advertising industry, auto parts, aerospace and other industries widely used.

XQL FIBER LASER WELDING MACHINE

3 in 1 fiber laser welding machine with welding, cutting, and cleaning function.

XQL ROBOT LASER WELDING MACHINE

Simple operation, fully automatic welding, high efficiency, no need for personnel operation, saving labor cost.

XY(NANJING) INDUSTRY EQUIPMENT CO., LTD

B1-4130

We are specialized in welding and cutting industry over 20 years' experience. Our main product is Welding consumables, such as MIG welding contact tip and nozzle, spot welding cap tip, holder, KCF pins and so on. We produce Welding equipment like robotic spot welding gun, welding controller, tip dresser, resistance welding machine as well.

Cap tip

Cap tip is widely used for robotic spot welding gun among automobile industry.

Contact tip

Contact tip is applicable to Automobile industry, Shipyard construction, Steel Struction construcion and so on.

YAKIN CO., LTD.

D1-8415

For half a century, Yakin Hoist has been dedicated to a single path, providing reliable and high-quality hoisting solutions. We have manufactured various insulated conductor bar and bus bar and I beam cable hanger and so on. We proudly announce that we are one of pioneer in Korea heavy industry market by supplying trolley bar system and conducted bar system. Our main clients are Poscco, SEAh, Hyundai steel, Dongkuk steel, SK Ocean plant Doosan and mainly heavy industries.

conductor bar

Bus Bar Trolley bars, also known as rigid bars, busbars, or bus bars, have various names and are primarily used in steel mills and other industrial environments. Yagin's trolley bars are known for their high quality and reliable performance.

I beam cable hanger

I-beam cable hangers can be custom-made in various sizes according to customer requirements. Cable hangers, end hangers, and lead hangers are available in different types specifically designed for I-beam applications, providing flexible options to meet the unique needs of each project.

MONORAIL BAR

U-bar, a type of trolley bar, is used to supply electricity to amusement park high-speed trains and is manufactured for 200A capacity. Insulated conductor bars for monorails can be equipped with Yakin's Trolley-Bar and U-bar, providing reliable and efficient power supply solutions for such applications.

EXHIBITING COMPANIES

YAMAHA MOTOR PARTS MANUFACTURING INDONESIA, PT (YPMI)

B3-553

PT. Yamaha Motor Parts Manufacturing Indonesia (YPMI) is an automotive component manufacturer company which supports for 2 wheels vehicle, marine engine and 4 wheels vehicle. The main businesses are Aluminum and Steel parts manufacturing. YPMI also offers the services for cutting tool regrinding and mould/dies manufacturing. Supported with modern manufacturing equipment & inspection technology, YPMI is committed to provide a range of quality products that meet international standard.

OEM Parts

The main businesses are Aluminum and Steel parts manufacturing. Aluminum manufacturing consists of forging for piston parts and casting (gravity, low pressure and high pressure die casting) with various parts production such as head cylinder for motorcycle and automobile, tilt cylinder for marine engine, rear arm and wheels. In steel production, our business focuses in transmission forging, crankshaft, camshaft, cam shift, fork shift, weight line, pin piston, and pin crank machining.

Services

In addition of OEM parts production, YPMI also offers services for cutting tool regrinding, manufacturing solutions, and IoT Support System. The tools that can be regrind are Drill, Center Drill, Endmill, Reamer, Grinding Profile, Broaching Cutter, Shaving Cutter, Hobbing Cutter, Gundrill Cutter, Diamond etc. For the manufacturing solutions, YPMI capable of optimizing casting process by using CAD/CAE software, casting analysis, casting porosity, and user experience. For the IoT support system, YPMI already using a paperless collect data system, which is every data on every machine is already integrated in some dashboard. This helps us to analyze the error and suggested us how to improve it.

Sales Parts

YPMI also develops and offers dies/mould and low cost AGV. Dies making services are used for various industrial purposes, using high grade machines and modern equipment. AGV is one of the product transfer modes developed internally by YPMI and can be applied to indoor or outdoor conditions.

YAMASHINA SEIKI CO.,LTD.

B3-5402H

""REALIZE YOUR IMAGINATION""
-We bring your ideas to life-Since our founding in 1939, we have been developing and manufacturing lubrication equipment, heat exchangers, and machine tools for the shipbuilding industry, automotive industry, and power plants. We have also been applying our accumulated technologies to the development and manufacture of medical devices. Yamashina Seiki's strength lies in our ability to develop products that provide solutions to the needs of society.

Edgein

Bench-type Round Chamfering Machine Anyone can chamfer steel plates easily, quickly, and stably. Enables stable quality chamfering. Significantly reduces rework. The chamfer size can be made uniform by machining the end face of the steel plate while the guide rollers are in contact with it. The main spindle has a vertical float mechanism, enabling machining that follows the warping of steel plates. Special Feature Thin plate chamfering available (1.6mm to 36mm) Capable of processing not only straight lines but also curved lines. Work inside diameter is also machined

YANGZHONG BEST GRINDING TOOLS CO.,LTD

C3-7823

Our company is Yangzhong Best Grinding Tools CO.,LTD which manufactures Abrasive Cloth Roll, Fiber disc, Abrasive Paper, Abrasive Disc, Flap Disc. And we are the direct manufacturer. Our factory is one of the largest manufacturing sites in China. Also we have high level of automation. And we offer OEM service, print your own brand logo! If you are interested in our products please feel free to contact us by E-mail. Thanks a lot and look forward to hearing from you soon!

ABRASIVE CLOTH ROLL

EXHIBITING COMPANIES

YAMATO GOKIN CO., LTD

D2-9117D

Yamato Gokin uses over 80 years of experience to manufacture and provide the highest of quality plates, bars, discs and molds of special copper alloys including aluminum bronze, copper beryllium, copper chromium, and high strength brass.

Our in-house developed Corson System (NC) alloy is not only environmentally-friendly and beryllium-free, but also boasts uniform strength and utility.

Copper Chromium/Zirconium alloy

Yamato Gokin has specialized in producing various high-strength, wear-resistant, heat-resistant, and high-electrical-conductivity alloy materials for many years. Our copper chromium (brand name SH alloy) has gained an excellent reputation with our customers for its high quality and strong performance. In addition, our SH-2 alloy, developed from SH alloy, has achieved a landmark reputation and is in high demand from users of alloys similar to SH.

Beryllium copper alloy

Also known as spring copper and beryllium bronze, beryllium copper is one of the highest strength copper-based alloys in the market. At Yamato Gokin, we manufacture seven types of beryllium copper alloys with characteristics and mechanical properties optimized for use in the manufacturing and metalworking industries like our own.

NC Alloy (Corson System)

There are no alloys anywhere on the market that can compare with our revolutionary new type of environmentally-friendly NC alloy, which contains nickel, silicon and chromium, but is beryllium-free. We now supply our NC alloy material to one of Japan's Big Three auto manufacturers, and another of the Big Three is evaluating the alloy with hopes that its use will contribute to environmental sustainability. Also, one of the largest die cast machine makers in Japan has been conducting tests on the NC alloy because it is well-suited for plunger tips.

YEE YOUNG INDUSTRIAL CO., LTD

D1-8216B

YEE YOUNG Industrial CO., Ltd. established since 1980 is a manufacturer which certified according to EN ISO 9001:2015. Main products as follows
 1) Hard Chromium Plated Piston Rods DIN CK45/DIN CF53/SCM440
 2) Induction Hard Chromium Plated Rods DIN CK45/DIN CF53/SCM440/SUJ2 SAE52100DINCR6
 3) Carbon Steel hydraulic cylinder Tubes
 4) Cold Drawn Precision Steel Tubes
 5) Hollow shafts of telescope cylinders
 6) Stainless Steel SUS 304 Honed Tubes
 7) Stainless Steel SUS304 hard Chromium Plated Rods

Hard Chromium Plated Piston Rods DIN CK45/ DIN CF53/SCM440

By precision cold drawing, the tensile strength is higher. After harden chrome plating, the chrome shaft obtains good corrosion resistance, great abrasion resistance, uniformity of hardness. It can further go through other additional processing like lathing, milling, drilling, etc. Suitable for piston rod, hydraulic cylinder rod, pneumatic cylinder shaft, punching machine, pressing machine, mechanical guide rod, mechanical column bar, solid bar, crane, plastic injection machine, sealing machine, packaging machinery, and other automation machinery.

2) Induction Hard Chromium Plated Rods DIN CK45/DIN CF53/SCM440/SUJ2 SAE52100DINCR6

Through heat treatment, the hardness is greater than common harden chrome plated rod. Induction chrome shaft reaches uniform hardening thickness with no soft spots. It has high stability, low ductility, and superior wear resistance. For mechanical guide rod, tie bar, linear bearing slide rod, excavator, loading machine, construction equipment.

Carbon Steel hydraulic cylinder Tubes

Hydraulic Cylinder Honed / skived Tube withstands higher pressure than welded tube without splits. After honing /Skiving, carbon steel cylinder honed/skived tube of mechanical structure use has precision diameter, smooth surface, and excellent performance of oil storage. This kind of Hydraulic Cylinder Tube and Pneumatic Cylinder Tube work smoothly without pauses and has longer working life in cylinders. Applies to hydraulic cylinders tube, pneumatic cylinders tube, forklift, crane, excavator, punching machine, and other kinds of labor-saving automatic mechanical engineering.

EXHIBITING COMPANIES

YELIM PAINTING SYSTEM CO., LTD

D1-8406

As a company with a proven track record on quality, with more than 20 years of technical expertise in producing painting machines and in-house production facilities, YLKorea supplies airless pumps, electronic diaphragm pumps, high-pressure painting swivels, air swivels, and spray guns, among others, to shipbuilders, automobile vendors, plant facilities in Korea and overseas, as well as to all local industries.

Ram Pumps

It is mainly used in silicone injection line of automobile production plant, and there are 5 Gallon and 55 Gallon according to the specifications of paints. It is a high viscosity transfer pump that can supply sealant, adhesive and other medium to high viscosity filler to double layer glass silicon injection. It is available for two component(single or plural) finishing proportioners providing accurate mix ratios, material savings and consistent performance. In addition, heating system can be installed by optional Main function: Checkmate type is more durable than previous ball type at the bottom, and it is possible to transport highly viscous fluid more efficiently.

73000-ST

73:1 Airless pumps are suitable for explosion hazardous plants and shipbuilding applications. Main function: The discharge pressure of high pressure pump is maximum 474 ~ 200 bar. It is Designed to prevent freezing and pulsation structure.

YG-1 TOOLS, PT

B3-5515

YG-1 is one of the world's 5 major companies in the End Mill manufacture and sales industry and also the largest in the Republic of Korea. Based on its 38 years of know-how, YG-1 is expanding diversification of items. Founded in 1981, YG-1 has grown to be a strong and firm company recognized globally in the cutting tool industry. With outstanding human resources and distinguished technology, YG-1 is always looking towards the future.

CUTTING TOOLS

Global YG-1 in the Cutting Tools Industry for Total Solution Company

 2. Holmaking
 3. Threading
 4. Indexable Tools
 5. Others Tools
- YG-1 Milling tools

YIWU B.B.U. IMP.&EXP. CO.,LTD.

B3-5524

Yiwu B.B.U. Import and Export Co., Ltd. is a factory and export company which is specially focused on the products like MMA Welding machines, DC Tig Welding machines, AC/DC Tig Welder, Mig Welder, Plasma Cutter, Multi-functional inverted Welder and the welding parts. With the advanced igt Technology, the welders under the name Stahlwerk and Vector Welding have gained high reputation in the whole world with more portable size and competitive price.

MMA Welder

With the Mosfet Technology, can weld different Metal from 2.4-4.0mm in all kind of conditions stably.

ACDC WIG200P

With the Mosfet Technology, this welder is famous as its multi-functions for DC Tig, DC Tig Puls, MMA, AC Tig which is suitable for the thick and thin sheet , different kinds of the metal.

Newyork2500

With newest IGBT Technology, this welder is famous as its portable size and multi-functions such as DC Tig, DC Tig Puls, MMA, AC Tig and plasma cutter which is suitable for the thick and thin sheet , different kinds of the metal.

YONGKANG KANGYANG TOOLS CO., LTD

C3-7509

YONGKANG KANGYANG TOOLS CO.,LTD.' is integrating the development, manufacture and sale of professional power tools, meanwhile we are always adhering to the business philosophy of 'benefit mutually,forge ahead resolutely' and insisting on 'customer first, quality essential' management concept.

Our good product and service have earned extremely high praise from our clients. We sincerely hope we can establish stable and mutual beneficial business dealing with you. Let us carry forward together!

ANGLE GRINDER

100% pure copper large motor
 ·External design of carbon brush cover
 ·Special air flue and effective cooling motor to improve service life
 ·Unique design of motor with larger power and stronger overload protection

ELECTRIC DRILL

100% pure copper large motor
 ·High and low strong speed
 ·Powerful power and torque to achieve high work efficiency
 ·Compact ergonomic design and good manipulation to finish the work precisely

ELECTRIC PLANER

100% pure copper large motor
 ·Powerful power to ensure high planing speed
 ·New design, maximum planing depth up to 2mm
 ·Optimized airflow to ensure the removal of sawdust

EXHIBITING COMPANIES

YONGKANG RAYKA INDUSTRY & TRADE CO., LTD

C3-7516

RAYKA

RAYKA is located in Yongkang city, Zhejiang province, China, and was established in June 2007. The factory owns two production sites and covers area of 8,000 square meters, and has more than 150 hundred full time employees. Our main market is US, Europe, Australia, South America. RAYKA has strong R&D team that can help your product range stay ahead of the trend and get your more market share and margin. RAYKA is the professional manufactory for garden tools.

Garden shears(opper, hedge shear and pruner) and Garden tools

Garden shears is ideal for cutting living stems and branches. Garden tools is suitable for gardening works such as shovelling, moving soils and digging.

YONGKANG RUNPOWER TRADING CO.,LTD.

C3-7814

Run Power

Runpower Company is professional supplier for india market. our products include angle grinder, marble cutter, electric drill, demolition hammer, router, circular saw, polisher, vibrator, paint mixer, electric chain saw and gasoline chain, brush cutter, etc. All kinds of power tools and garden tools.

We provide the most advantageous products to customers, sincere business, hope our cooperaiton will take us better tomorrow, let us work together to toast our dream!

YONGKANG SEMLI HARDWARE PRODUCTS CO.,LTD

C3-7513

SEMLI

Yongkang Semli Hardware Products Co., Ltd. is located in Yongkang city. Which near the Wenzhou/Ningbo/Shanghai Expressway, reached directly to Ningbo, Shanghai and Hangzhou etc. It has transport facilities.

Our company is professional in making chainsaw (Professional chainsaw and DIY chainsaw), Brush Cutter, Earth Auger, Water Pump, Tiller etc. The adoption of the advanced detecting device and the complete detecting method give an effective guarantee for quality.

cutting disc

YONGTIAN LIFTING

C3-6502

Established in 1999, YONGTIAN LIFTING is a high-tech enterprise focusing on Technology Research, Manufacturing and Sales, we specialize in the manufacture and export of Light Lifting Equipment, such as AC Powered Electric Hoists and DC Battery Powered Electric hoist. Our products are widely used in various industries and sold globally, with a particularly strong demand in the European and North American markets.

DC 18V BATTERY MINI HOIST

1. Brushless DC motor (BLDC);
2. Double brake Protection: Electronic brake + Mechanical brake.
3. 18V power supply is equipped with 2.0Ah or 4.0Ah battery pack and charger.
4. Small size and light, portable to carry, convenient to installation and operation.
5. With Safety Bracket, Up/Down position limit device.
6. Operating Switch with Emergency-Off Function.

DC 18V BATTERY CHAIN HOIST

- 1.Brushless AC/DC Motor.
2. Dual Brake Protection: Electronic brake + Mechanical brake.
3. Powered by 2.0Ah or 4.0Ah 18V / 36V Lithium battery.
4. Load Chain: GS certificate approval.
5. Lifting Height: 6m as standard.
6. Operating Switch with Emergency-Off Function.
8. All aluminum alloy body, lightweight.

ELECTRIC MINI HOIS

EXHIBITING COMPANIES

YOOSUNGENG CO., LTD.

D1-8418

We provide the marking and engraving and the related laser machine solutions to suit the various industrial environment and customer needs. Yoosungeng Co., Ltd We will lead product development, build customer trust, and keep our promise with our customers through efficient service and quality enhancement efforts. We will listen and communicate with our customers and continue to create new technologies from a long and broad perspective.

M-mark portable marking machine

Battery-type wireless Portable Dot peen marking machine This is a compact battery-type wireless portable dot peen marking machine that allows marking process with one hand, so it is useful for marking on heavy objects or in the outside working yard.

Hand held laser marking machine

Small head and compact controller suitable for hand-held laser marking can be carried out in any working environment

YT10 / YT10pro portable inkjet printer

It is an industrial inkjet marking machine that is widely used throughout the industry. It is a marker that can be used in oil, water, UV ink, and is used in plastic, paper, wood, vinyl metal, etc., and can be easily carried around and used anywhere.

YOUNG IL CO., LTD

D1-8412

Youngil has established in 1968. We are manufacturing industrial spray and lacquer spray. We supply our products to Samsung, Hyundai motors in Korea.

Crack check
Cleaner
Penetrant
Developer

ZINC PRIMER
Room-temperature galvanizing method
Excellent heat resistance
Classification approval

Releasing agent
YL-502 is lubricating anti-agent which can be used in machine of diverse industrial area and household.

YUEQING RUIBO PNEUMATIC TOOLS CO.,LTD

C3-6515

W-71/77 SPRAY GUN

High atomization technology can easily complete various spraying operations. Spraying can be achieved with 2.5-3.0Bar and air pressure. The spray gun reduces excessive atomization, is environmentally friendly and saves paint

EXHIBITING COMPANIES

YUTIEN HYDRAULIC INDUSTRY CO., LTD.

B2-4631

YUTIEN Hydraulic provides customized services to design various machine automation systems to suit the needs of various work environments. In addition, we warmly welcome customers to choose YUTIEN's own products or specify the brand components they require. We will always be willing to help customers create the best "Low Noise, Power Saving, High Efficiency" power unit.

Modular Stack Valves

1. Modular stack valve is an advance system for piping systems.
2. It is a set of valves that come in different sizes and can be used together.
3. All the components are modular; it is easy to customize and install the stack valve.

Solenoid Controlled Relief Valves

1. It is a combination of a relief valve and an electromagnetic reversing valve.
2. The solenoid valve is directly installed on the relief valve, and is linked to the vent port, thus it does not require extra relief pipes.

Customized Power Units

1. Customized Design.
2. Matching every working environment.
3. Machine Automation Systems.
4. Low Noise, Power Saving, High Efficiency.

YUYAO AKF FASTENERS CO., LTD

D2-9226

AKF is stable fasteners supplier: Eight Major Guarantees, Making Your Imports More Reassuring.

We have ISO9001, BSCI, CE Certifications AKF Mainly Operates Three Major Businesses.

1. Mainly Producing Anchors And Bolts
• One Stop Fastener Supply Chain With 369 Suppliers And Stable Supply Of Other Fastener Products.

2. Non Standard Customized Products.
3. DIY Small Packaging. Color Box • PP Bag • PP Box • Blister • Single label • Window color box Etc.

Looking forward to your visit!

Screw

- Chipboard screw
- Drywall screw
- Tapping screw
- Hex washer head drilling screw
- concrete screw

It is our strength, including but not limited to ZINC, HDG, Dacromet, Ruspert and other surface treatments.

Bolt

- HEX Bolt
- Carriage bolt
- Standard DIN933, DIN931, DIN603, ANSI, ASTM

Anchor

- 3PCS Heavy Duty Anchor with Bolt
- Hollow Wall Anchor
- Zinc Alloy Easy Drive Anchor

ZELLTECH

B3-5516

PT Cellcius Indoperkasa was established in 2009 and provides various insulation products (heat absorbers) equipped with advanced technology and the best service to provide effective and efficient solutions for buildings. The production is tightly supervised under ISO 9001:2015 and our distributed products have received a tremendous number of international certificates.

ZELLTECH SANDWICH PANEL

Modern sandwich-shaped building materials are hygienic, fast installation, and do not spread fire, creating a beautiful and well-insulated building

ZELLTECH DIAPACK

It is one of the results of our innovation that was born as a form of continuous improvement that we make. The world's first diamond patterned aluminium foil bubble reflective insulation, made with European technology machines, provides the best-in-class performance insulation.

ZELLTECH FRP V-SKY

V-Sky FRP Roof is a translucent roof made of Fiberglass Reinforced Polymer (FRP) which is equipped with a Dupont Melinex coating and an anti-UV gel layer, as the most appropriate solution for your roofing needs.

ZHEJIANG JINHUA CUMET ABRASIVE CO.,LTD

C3-6730

CUMET is devoted to offering various solutions for your surface finishing and materials cutting and excellent quality with competitive prices which has started with Bonded Abrasive manufacturing and now it has becoming great exporter of Coated Abrasives, Drill Bits, Diamond Blades, etc

ZHEJIANG KING WIN ABRASIVE CO.,LTD

C3-7809

We are a manufacturer of abrasive tools with 14 years of experience

Steel Wire Brush

"Durable with high quality, Selected high-quality steel wire materials, resistant to wire shedding and sharp Wear resistant large area rust removal, polishing, deburring, cleaning.
Effectively improving work speed"

Cutting disc and flap disc

Made of aluminum oxide grains, safe and stable. High quality withstand the high speed. For cutting fiberglass, steel, plastic, stainless steel, steel pipe, sheet metal and wood etc. Widely used in industries such as automotive, transportation, mining, shipbuilding, construction, welding, foundries, fabrication, etc

Nylon Polishing wheel

Made of high-toughness and high-temperature resistant nylon fiber. Mesh-like fiber structure can effectively dissipate heat, reduce dust. Fast wire drawing, clear and beautiful silk texture. Wildly used in polishing for metal, ceramics, marble, and stone etc.

We are Zheng's Way Ladder, with our own factory named "Zhejiang Leader Industry & Trade Co.,Ltd." We've been dealing with the design and manufacturing of ladder for 16 years. Our concept focus on being ladder experts which allowed ou to deliver products with high quality, safe design, affordable price and so on to our customers all over the world. We have professional team (design and development + production + quality control + warehouse + logistics + sales). We'll offer you the best service.

ALUMINUM TELESCOPIC LADDER

high quality aluminum telescopic ladder

ALUMINUM MULTI-FUNCTION LADDER

strong aluminum multi-function ladder, can change into many different shapes.

EXHIBITING COMPANIES

ZHEJIANG LINGBEN MACHINERY & ELECTRONICS CO., LTD.

C3-6523

We specializes in the developing, producing and selling of gasoline and diesel generator, high pressure washer, water pump and all spare parts for generators for more than 20 years. We have a group of well-trained skilled technician and advanced equipment.

Generator

Excellent combustion efficiency produces extremely high economic benefits. The stable automatic voltage regulation system and oil warning system make it safe to use

High Pressure Washer

Gasoline car washing machine is an efficient car washing tool, which uses gasoline as a power source, spraying water and car washing liquid through a high-pressure water gun in order to quickly and thoroughly clean the vehicle

Water Pump

Gasoline engine is lighter than diesel engine, lower manufacturing cost, less noise and better starting at low temperature

ZHEJIANG LONGBO M&E EQUIPMENT CO., LTD.

C3-7818

Established in April 2004, Xinjiang Longbo Industrial Stock Co., Ltd. has its predecessor as Xinjiang Longbo Industrial Co., Ltd. This company completed the shareholding system transformation on December 30, 2015, and officially changed its name into "Xinjiang Longbo Industrial Stock Co., Ltd.". It was officially listed on the national stock transfer system on June 13, 2016, becoming the first foreign trade industry and the first local ethnic enterprise listed company.

ZHEJIANG PROWELL ELECTRONIC AND TECHNICAL CO., LTD

C3-6504

The company is located in Wuyi County, which is well known as the hometown of fluorite and the city of hot springs. The company is a high-tech enterprise that continues to focus on the research and development, manufacturing, sales and service of inverter welding equipment. The company leading Products are inverter MMA welding machine, inverter TIG welding machine, inverter MIG welding machine and inverter PlasmaCUT welding machine. The company currently has more than 280 employees and produces

EXHIBITING COMPANIES

ZOLLER SINGAPORE PTE., LTD

D1-8510

Industry Solutions from ZOLLER

From factory settings to inspection and tool management, we offer you user-friendly solutions that are easy to integrate into your existing processes.

No matter whether you are in the automotive or medical industry, whether you are a grinding and sharpening company or producing tools – the results are always the same: Shorter machine downtimes, reduced tool costs, and better quality.

ZOLLER »TMS Plus«

Smart Solutions for Your Production Process

TMS Tool Management Solutions PLUS ZOLLER tool presetting and measuring machines equals better overall performance. With one central database, ZOLLER goes along with your complete real and virtual life cycle of your tools

z.One is the central tool database. All stations of the production process access this database, as well as ERP and other software systems. Multiple data maintenance is not necessary.

From CAD design » CAM Production Planning » Tool Storage » Tool Preparation » Presetting and Measuring » Production » Follow-up Orders » Documentation of Manufacturing Process » 100% delivered Quality.

ZOLLER »genius«

The ZOLLER »genius« is the universal measuring machine for cutting tools. From the quick inspection of individual criteria to the fully automatic and user-independent complete check, your tools are checked quickly, simply and with maximum precision. Measuring results are documented in detail and can be transferred to your grinding machines with a simple click. This means that the »genius« saves you valuable time in work preparation and programming, eliminates unnecessary reworking and customer complaints, and ensures a quality which will impress both you and your customers.

ZOLLER »powerShrink«

ZOLLER »powerShrink 400/600«

The heat shrink system with optimal energy efficiency and maximal safety Clamping and unclamping tools in record time, while saving energy and conserving chucks: You get all these benefits with the inductive »powerShrink« heat shrink system. When developing this device, series, ZOLLER focused on achieving maximum energy efficiency as well as a fast and reliable shrinking process – allowing more profitability in your production.

With the »powerShrink« device series, you can increase production efficiency. 100% made by ZOLLER Unique control concept Significant energy savings of up to 30% compared to the previous model.

永康市永砂工贸有限公司

C3-7514

永康市砂轮厂(现永康市永砂工贸有限公司)成立于1984年, 占地面积5000平方米。专业生产全尺寸75-400树脂砂轮, 在生产各个环节都有完善的质量控制体系, 所有产品都符合ISO9001国际管理体系。我们最擅长为客户提供最具性价比的OEM生产解决方案。我们期待在不久的将来与世界各地的新客户建立成功的业务关系。

PUTRA TEKNIK SINERGI, PT

E-POWER 700 products are widely used by customers in industries such as manufacturers, construction, bridge equipment manufacturers, energy, oil & gas, mining, rigging, quarrying, steel & rolling mills, shipbuilding & repairing, offshore marine, power plants, maintenance & repair (MRO), aerospace, railroads, transportation and many other industries requiring hydraulic power.

EPOWER700

E-POWER 700 high pressure hydraulic cylinders, pumps, pullers, tools & systems to meet the most demanding hydraulic application requirements.

VF FASTENING SYSTEMS PTE. LTD

D1-8101

VF Fastening Systems Pte Ltd was established in 1992 as a general trading company. Its humble beginnings has since progressed into a specialized distribution company for fasteners and hardware.

VF Fastening embraces the philosophy of providing a total solution, encompassing both product and support, for our customers' assembly needs. Our goal of providing excellent products and services has reaped its benefits when we successfully secured "Exclusive Distributorship" for established manufactures

Hardwares

Provides best accessories hardware for productions and manufacturing.

Fasteners

Provides best fastening solutions for manufacturer.

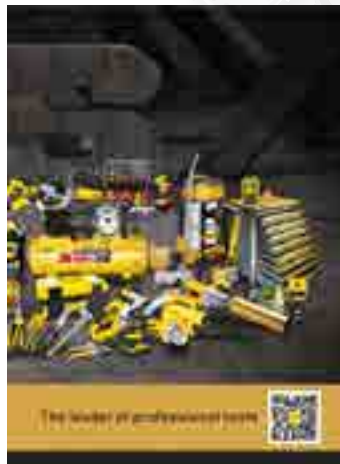

ASIAALUM TRADING INDONESIA, PT

D2-8702

ASIAALUM TRADING INDONESIA is a leading and dynamic building materials trading company in Indonesia. With a commitment to excellence and a comprehensive product range, we aim to be the preferred choice for developers, builders, large-scale infrastructure projects, and wholesale/retail businesses in the building materials industry.

Let's strive together for a better economy in Indonesia by offering top-notch building materials, efficient logistics, and excellent customer service.

BOSI TOOLS

ZHEJIANG BOSI BICHUANYINZHOU TECHNOLOGY CO.,LTD, NINGBO SHIJI BOSI TOOLS CO.,LTD both are the leader of China professional tools industry enterprise. It passed ISO9001, ISO14001, OHSAS18001 certificates.

Hardwares

Yinxiang welders help create the beauty of life elaborately. Every beam of dazzling arc light reflects our passion in life. Every beam of welding spark tells our pursuit of pursuit of perfection. We create infinite fortune for the society, while bringing fun and happiness. We strive to make a contribution to the welding industry. Working with global clients, we weld pieces into a world of beauty. Yinxiang is a symbol of welders, a link to the future

Tianjin Bridge Welding Equipment

Providing "ONE-STOP" Welding Techonology Solution.

The main products include welding electrodes, gas shielded welding wire, flux cored welding wire and welding flux, etc.

AZENTIO SOFTWARE

A1-1406

Singapore-headquartered Azentio Software is a market-leading provider of ERP systems. The company currently serves over 500 industrial enterprises in MEA and APAC, including manufacturing and ancillary industries, who are using the company's flagship platform Azentio ONEERP.

Azentio ONEERP Cloud is a fully integrated and collaborative system providing a smooth transition roadmap, helping the industry to embrace digital transformation and remain competitive and efficient.

Azentio ONEERP

Azentio ONEERP Cloud is a fully integrated and collaborative system collaging the digital manufacturing and SCM components that addresses dynamic conditions in the industry value chain and shifting customer demands. ONEERP Cloud elevates business processes by means of ultramodern technology, software security, best-in-class scalability, integrability of the solution, and more. The intelligent platform from Azentio represents a significant leap forward in empowering supply chain, manufacturing, and financial functions with unrivaled efficiency and flexibility. By embracing the industry cloud paradigm, ONEERP Cloud is thoughtfully designed to cater to the unique needs of manufacturing, distribution, and ancillary sectors, thus delivering a comprehensive solution to industry-specific challenges. Beyond its innovative features, ONEERP Cloud stands out for its seamless delivery and robust support services. With hassle-free implementation and a dedicated support model, businesses can swiftly transition to the cloud while enjoying continued assistance. This streamlined approach ensures a smooth journey from adoption to proficient utilization.

Width: Min 5 mm

MOBILE INNOVATION INDONESIA, PT

B2-433

PT. Mobile Innovation Indonesia was established in 2013 as a subsidiary of Mobile Innovation Co., Ltd., a joint venture between NTT DOCOMO, INC., and Loxley Public Company Limited. NTT DOCOMO is a leading mobile network operator in Japan, providing comprehensive services centered on mobility, and Loxley, with a history of almost 80 years, is a leading company in Thailand with a track record in wide range of business.

Docomo IoT Manufacturing Line Analysis
Easy visualization and analysis of equipment operating state. One-stop service from data acquisition to proposal of measures for production improvement.

RealWear HMT-1
The RealWear HMT-1 has been the market leader in industrial wearables since its launch in 2018. Purpose built for the modern frontline workforce. It connects the frontline worker to inform, and expertise needed to successfully complete job tasks safely and efficiently. It's and industrial dashboard: there when you need it and out of your way when you don't.

AVATOUR
AVATOUR 360° remote presence lets you invite your clients, collaborators or friends to join you in a real place in real time. No business trip anymore, wherever you are in the world.

JIANDE SHUANGJIAN TOOLS CO.,LTD.

B3-564

Our company mainly produces materials, including PVC transparent granules, colorful transparent spins with double color handles, double color screw sets, screw sets with various specifications and other tools. We always adhere to the aim of "the quality is the basis of an enterprise".

EXHIBITOR LIST

VISIT OUR 365 DIGITAL SHOWROOM FOR THE FULL ACCESS!

365 DIGITAL SHOWROOM is where you can virtually explore and visualize the products that coming from our key players in manufacturing industry! It's accessible 24/7, you can browse products and view details, at anytime that is convenient for you, regardless of time zones or holidays.

Discover the latest innovations in the manufacturing industry and explore advanced technology solutions that can increase your production efficiency and business productivity.

EXHIBITING COMPANIES

ACCURATE MACHINERY COMPANY

D2-9131

We specialize in precision machinery for deep hole drilling. Our experienced team delivers high-quality solutions. Our advanced machines are reliable and precise, serving aerospace, automotive, energy, and medical industries. With strict quality control, we meet the highest standards. We invest in innovation and R&D to meet market demands.

Seven-Axis Deep Hole Drilling and Milling Center

This advanced machine combines drilling and milling with high accuracy. It's perfect for industries that require precise and deep hole machining. With its seven axes, it offers flexibility and efficiency in complex operations. Ideal for aerospace, automotive, and mold making industries.

Three-Axis Gun Drilling Machine

This machine is designed for precise deep hole drilling. It offers versatility and accuracy, making it ideal for industries like automotive, aerospace, and mold making. Achieve excellent results with this reliable and efficient drilling solution.

Vertical Deep Hole Drilling and Milling Center with Ring-type Guide Bushing

This Machine offers improved accuracy and rigidity compared to horizontal drilling. It provides convenient functionality with its patented ring-type guide bushing design, allowing for easy switching between drilling and milling operations. This versatile machine integrates drilling, milling, tapping, and engraving functions, and can achieve automated production with a tool magazine. It is suitable for a wide range of applications in industries such as mobile phones, aerospace, toys, computers, electronics, and home appliances.

ADVANCED CERAMICS TECHNOLOGY (M) SDN. BHD.

A1-150

DIGITAL MODULAR SERIES

For higher throughput and larger components that can't be handled manually. Standard plug-and-play options include filtration, frequencies, automatic fill/drain, conductivity, and much more. Our DMS system is expandable, versatile, and modular.

COMPACT ULTRASONIC VAPOR DEGREASER (SOLVAC S1)

The Solvac S1 provides automated solvent washing, rinsing, cooling, and drying all in a single compact unit. You will enjoy a wide range of premium features for a standard-level, budget-friendly price.

INDUSTRIAL TANKS AND GENERATORS

Our tanks offer the ideal ultrasonic bath environment for precision cleaning, with plug-and-play transducerized applications. Our industrial-strength generators (sold separately) provide all the power you will need.

AKBAR MULIA MESIN, PT

A1-1005

Imports of metal industrial machines such as CNC plasma, CNC lathe, CNC milling, press break, punching machine etc

Hydraulic Press Break

The press brake combined with left and right columns, worktable, cylinder, ram and oil tank etc. The cylinder is positioned in center face of the frame with the reasonable force, high strength and good rigidity, and easy for transportation, installation and commissioning. The hydraulic system can prevent the machine from overload when the thickness of the plate is changed or the wrong selection of the bottom die's opening width. Otherwise, the machine features a smooth and reliable performance and easy operation. It has the functions of inching, single cycle, dwell and releasing pressure operation, The working pressure is constant over the entire stroke.

EXHIBITING COMPANIES

ANHUI AOXUAN HEAVY INDUSTRY MACHINE CO., LTD

A1-142

Anhui Aoxuan Heavy Industry Machinery Co., Ltd. was founded in 2001, Registered capital of 20 million ,Has its own large-scale production plant covers an area of 5000 square meters, base lies in Bowang District, Maanshan City, Anhui Province, bowang is known as "the first town of blade mold in China", and its reputation is widely spread throughout the country. We have three production workshops, 200 workers, 20 technical engineers and 3 experienced designers.

CNC Hydraulic press brake ,Hydraulic shearing machine, rolling machines, hydraulic press, punching machines, plasma cutting machines, auto duct equipment, fiber laser cutting machines and so on.

ANHUI CHIZHOU HOUSEHOLD MACHINE TOOL CO., LTD

A1-145

Anhui Chizhou Household Machine Tool Co., Ltd. founded in 1994.covers a land area of 355,000 m² and with 200 workers .Group regards quality as its life. We has successively won the ISO9001 , CE certificate, Famous trademark certificate of Anhui Province. Group's leading products include vertical machining centers, horizontal machining center, CNC drilling and milling machine, CNC lathe, and general small-type machinery, etc. With the reliable quality and steady performance.

CNC LATHE

CNC MILLING MACHINE

BENCH LATHE MACHINE

ANHUI DONGHAI YUXIANG IMPORT AND EXPORT CO.,LTD

A2-2730

ADH has the experiences in manufacturing of sheet metal machinery for more than 21 years.Our main product is press brake,shears,fiber laser cutting machine and panel bender.We have a completed team for sales and service all over the world.We have more than 8 engineers Chinese and foreign engineers to ensure 24 answering and feedback.We already cover 70% market of the world and have sales and service team in local market in many countries,this ensures to supply most easy way for customer to buy.

Press Brake

For metal sheet bending and forming. Widely used in sheet metal processing, electrical boxes and cabinets, household appliances, kitchen supplies, elevators, automobile production, light poles, road and bridge construction and other fields

Fiber Laser Cutting Machine

Used for cutting flat metal plates, both straight and curved cutting is possible. The material is made of various metals, such as carbon steel, stainless steel, aluminum plate, galvanized plate, etc.

Shearing Machine

Used for cutting flat metal, straight cutting, made of various metals, such as carbon steel, stainless steel, aluminum plate, galvanized plate, etc.

EXHIBITING COMPANIES

ANHUI HUAXIA MACHINE MANUFACTURING CO., LTD

D2-9126

Anhui Huaxia Machine Manufacturing Co., Ltd. mainly manufactures sheet metal processing equipment such as CNC press brake machines, CNC shearing machines, and laser cutting machines. The factory has been in operation for over 20 years and covers an area of 110000 square meters. It is a leader in metal sheet metal processing manufacturers

CNC press brake machine, hydraulic shearing machine, laser cutting machine, hydraulic press machine, plate rolling machine, tools.

ANLY ELECTRONICS CO., LTD.

A3-3230

ANLY Electronics was founded on January 8th, 1971. After 50 years of support from our customers and dedication from our employees, it has achieved its leading status in the industry. ANLY holds its core values of technology innovation and customer satisfaction to maintain the leading status in the 21 century. ANLY has been manufacturing the traditional automation components such as timer, counter, controller, floatless relay, relay, solid state relay, digital temperature controller.

EP2-2
PROTECTIVE RELAY

EP4-1
PROTECTIVE RELAY

H3D-M
TIMER RELAY

ANNN YANG MACHINERY CO., LTD.

A2-2709

ANNN YANG MACHINERY is a lathe manufacturer in TAIWAN. Since its inception in 1990, Annn Yang has been developing lathes for the international market, producing precision built machines that are both unique in design and function.

CNC Lathe
Heavy duty CNC Lathe, with big spindle bore, extra rigid machine base, box guide way.

Heavy duty lathe
Heavy duty lathe with large swing, big spindle bore.

Manual lathe
High speed lathe, manual lathe, variable speed lathe, clutch lathe.

AUTO SUPER CO., LTD.

D2-8803

AUTO SUPER CO.,LTD. was established in 1987 specializing in manufacturing hydraulic vises and accessories for machine tools. The vises are uniquely designed and specially constructed, minimum bending can be obtained when maximum clamping force applied. "Quality is tantamount to sustainable operation." It is with that vision that we go forward to reach our goal of being a premier, world-class producer of quality products for overseas and domestic buyers.

SCV127 SELF CENTRING VISE
Suitable for 4 and 5 Axis CNC Rotary Table usage. Vise precision of its center repetition position is $\pm 0.01\text{mm}$.

C96 QUICK-CHANGE BASE PLATE
Suitable for SCV127 AND SCV150 series self centring vise and apply it to 4 and 5 Axis CNC Rotary Table usage.

SCV-100 SELF CENTRING VISE
Suitable for 4 and 5 Axis CNC Rotary Table usage. Vise precision of its center repetition position is $\pm 0.01\text{mm}$.

EXHIBITING COMPANIES

B.K.TECH

D1-8422

We B.K Tech, are professional manufacturer for Automobile mold parts. We produce Oilless, Flange Lifter, Guide block set.

Oilless

B.K.TECH OILLESS

1. Processed only by specialized companies
2. Can be used in high / low temperature.
3. Can be used in corrosive atmosphere.

BAY UNION ABRASIVE TECHNOLOGY CO., LTD

A1-1322

Bay Union was founded in 1987. We have focused on producing vitrified bonded grinding wheels in a very fast and steady way. HIGH PERFORMANCE, HIGH-QUALITY STABILITY, and FAST DELIVERY are our strength, and that is why we can expand very fast in precision grinding market. In order to satisfy customers' needs, we are promoting standard series whether for applying Surface Grinding, Cylindrical Grinding or Internal Grinding, we provide a faster way in selecting suitable products for your grinding demands.

Vitrified bonded CBN Wheel

High hardness: CBN grinding wheel has a much higher hardness than ordinary grinding wheels, so it can more effectively process materials with high hardness, such as high-speed steel, hard alloys, and diamonds.
High precision: CBN grinding wheel can achieve high-precision grinding, with low surface roughness and high surface quality of the processed workpiece.
Long service life: Due to the high hardness of CBN grinding wheel, its service life is long and can be several times that of ordinary grinding wheels. BAYUNION can highly customize CBN grinding wheels to meet your grinding needs, greatly improving grinding efficiency and extending the life of the grinding wheel.

CKS Cylindrical Grinding Wheel

CKS has good cutting performance and is suitable for external cylindrical grinding of general heat-treated carbon steel and all kind of alloy steels. It performs well in high plunge grinding speed and shows very good results in surface roughness. The standard CKS80K can be easily dressed, and the surface roughness of the workpiece can achieve Ra0.4um.

PP Internal Grinding Wheel

PP series is widely used for internal grinding, with a special SG abrasive formula that gives it excellent grinding performance. Compared to other brands of SG grinding wheels, PP has better cutting ability and can improve grinding efficiency on materials such as heat-treated bearing steel, alloy steel, and surface-hardened chromium. The typical diameter range of the commonly used grinding wheel is between 15mm to 100mm, with a standard grit size of #80.

BUANA PRIMA RAYA, PT

A2-2403

PT Buana Prima Raya with its partnership with Gedee Weiler Pvt., Ltd., is a trading company engaged in the supply of workshops and laboratory equipment. We also support government programs for the use of domestic products for machineries with our partnership with ATMI Solo and Polman Bandung. With our professional Sales and Engineering Team that are trained to utmost their knowledge and experiences, we are convinced that we can give full satisfaction to our customers.

Gedee Weiler Uniturn UT 350 DU

Compact CNC Turning Centre with Sub Spindle for 1 operation and II operation on the same

LT-300-100

We support government programs to use domestic products for machineries with our partnership with ATMI Solo

VMC-60E

Our new product supporting the Government domestic content program in partnership with ATMI Solo

EXHIBITING COMPANIES

BUKWANG TECHNOLOGY CO., LTD.

D1-8420

Bukwang Tech have been manufactured plastic and press mold components for automobile since 1991. We always do the best with accumulated experience and technology and we are going to make products according to your demand. We are well known for its highest product quality. We are going to manage our company with improving quality of products technology and service to make our customers satisfied.

plastic die standard components

Plastic Components: Core Unit, Gas Spring, Water Cooling system, Spring Core, etc.
Press Components: Automation parts, Gauge, Hemming, Flange Lifter, H-Type Lifter etc.

CAIRNHILL SERVICHE INTI, PT

D1-8618

Cairnhill Metrology is an industrial metrology solutions provider established on 16 August 1983. Working with a long-term view, we partner with principals who are global leaders in their fields, whose strengths in technology and innovation, we complement with up-to-date uniform high standards of service delivery through our network of offices in Singapore, Malaysia, Indonesia, the Philippines and Thailand.

ACCRETECH AXCEL CMM

New generation high accuracy 3D CMM with high-speed, high accuracy and high resistance to environment positioned as a global standard machine.

HEXAGON ABSOLUTE ARM

The flagship of the Absolute Arm range, the Absolute Arm 7-Axis delivers tactile probing and non-contact scanning in a uniquely ergonomic package. It's the clear choice for high-end portable measurement applications. With usability central to its design, this is an articulating measuring arm that can't be beaten when it comes to ease of movement and ease of measurement.

Waygate Technologies V|tome|x M

The Phoenix V|tome|x M is Waygate Technologies most versatile and precise X-ray microfocus CT cabinet system for 3D metrology and analysis. This highly productive Dual|tube scanner with its 300 kV microfocus and optional 180 kV nanofocus X-ray tubes delivers improved accuracy at unprecedented speeds—helping you dramatically optimize your lab research results and production quality processes to meet today's and future increasing demands.

CHANGZHOU HIBOO TOOLS CO.,LTD.

B3-5310

Changzhou Hiboo Tools Co., Ltd is a Gold Supplier that specializes in Carbide End Mills, Drills, Inserts, Reamers, and other customized cutting tools. The efficient workshop and imported 5AXIS grind machines, which are operated by skilled operators. The Zoller Measuring and Inspecting Machine is used to ensure that each cutter gets inspected. More than 20000 cutters are now in stock to satisfy your immediate needs. There are enough raw materials on hand to keep prices stable.

Carbide square end mills

High quality carbide tungsten steel material , high performance for hard materials, Cutter is made of Micro Grain

Carbide ball end mills

Suitable for heavy cutting, and high hardness cutting Suitable for cutting mould steel, stainless steel

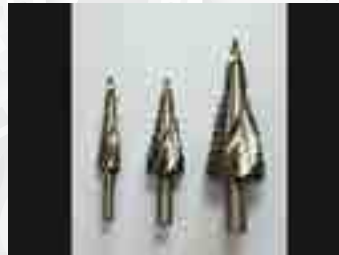

carbide corner radius end mills

Suitable for heavy cutting, and high hardness cutting Suitable for cutting mould steel, stainless steel

EXHIBITING COMPANIES

CHANGZHOU SHUANGYANG TOOLS CO., LTD.

B3-5318

STEP DRILL
HIGH QUALITY CUTTING TOOLS

End Mill
High performance cutting tools

CHANGZHOU XUTE JIFENG TOOLS GROUP CO., LTD

D1-8141

Changzhou Xute Jifeng Tools Group Co.,Ltd. was established in 2013,we are a professional enterprise engaged in the design, manufacture and sales of cemented carbide tools.We mainly produce all kinds of cemented carbide milling cutter and drilling special tools for the field. It

Main products include carbide end mills, carbide drill bits, carbide reamer, carbide thread milling, minitvire boring cutter and other CNC Mechanical tools and non-standard forming tools

CHENGDU METCERA ADVANCED MATERIALS CO., LTD.

D2-9330

Chengdu Metcera Advanced Materials Co., Ltd is an international enterprise focusing on the field of integrating research, development, production and sales of powder metallurgy new materials: cermet & carbide insert and solid tools.

Cemented carbide cutting tool

Cermet & carbide solid rods

Cermet & carbide solid tools

EXHIBITING COMPANIES

CHIH LIEN INDUSTRIAL CO., LTD.

A1-1324

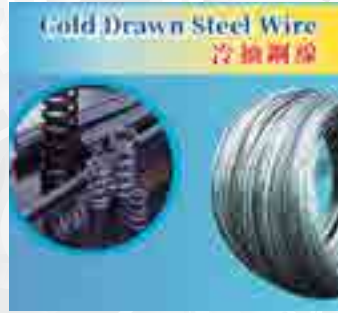

Chih Lien Industrial Co., Ltd. specializes in Cold-drawn Steel Bar and Steel Wire manufacturing, we produce various of steel grades like carbon steel, free cutting steel, alloy steel, spring steel and stainless steel...etc. Our products have been widely applied in the following professional fields: Industrial Machinery, Precision Parts, Bicycle, Motorcycle, Automobile, Tool, Household, Electronic, OA Machine, Spring, Furniture and Construction, etc.

Cold drawn steel bar

Free cutting steel, stainless steel, carbon steel, spring steel, alloy steel, tool steel

Cold drawn steel wire

High carbon steel, free cutting steel, alloy steel

CIAMIX MACHINE INDONESIA, PT

A1-1001

PT. CIAMIX MACHINE INDONESIA IS distributor of SHANDONG WEIDA HEAVY INDUSTRIES CO LTD.

WEIDA is Famous Brand in China and produced 5 Axis Gantry Type Machining Center, CNC Gantry Type Machining Center, High Speed Machining Center, Vertical Machining Center, CNC Milling Machine, Radial Drilling Machine and Universal Milling Machine.

Vertical Machining Center VMC MAXI 7040 & VMC MAXI 1160

Mesin ini didesain dengan gerakan meja X, Y dan Z Axis menggunakan linear way slide, menggunakan CNC Control GSK 218M serta part yang berkualitas bagus. Sehingga dihasilkan mesin yang presisi.

Uncoiler Straightener 2in1 & NC Roll Feeder

Uncoiler Straightener 2in1 adalah alat bantu untuk melepaskan gulungan lembaran plat logam sekaligus meluruskan lembaran plat logam sebelum masuk ke NC Roll Feeder. sedangkan NC Roll Feeder adalah alat bantu mesin press untuk mengatur gerakan maju lembaran plat logam sesuai yang diinginkan.

Precision Power Press Machine

Power Press Machine adalah mesin yang berfungsi untuk membentuk, melubangi atau memotong lembaran plat logam sesuai dengan cetakan yang disiapkan dan sesuai kemampuan daya tekan mesin

CORTOOL MANUFACTURING GROUP

B3-5330

Cortool Manufacturing Group (Established in 1999). We are ISO9001: 2015 Quality management systems, AEO Certificated Company No.2102960445 starting 2001, and members of CCCME and IHA since 2004. Established in 1999 and combined producing, R&D and marketing, mainly engaged in manufacturing industrial cutting tools and its import & Export business...We are professional on solid carbide drills, mill and threading tools, coolant and w/o coolant drills, aerospace cutting and countersinking tools.

Deep hole drilling

Unique flow channel design, more adequate cooling, effectively improve the life of the drill.

Solid carbide and HSS Milling cutters

solide carbide milling cutters in 2/4/6 flutes... with different coating. We also can accept non-standard customization.

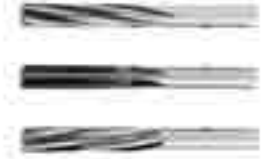

Inserts

CNC inserts with professional coating. We also can accept non-standard customization.

Solid carbide taps

Solid carbide forming taps with internal coolant. Solid carbide forming taps. Solid carbide spiral/straight fluted taps.

Solid carbide reamer

Reamers deliver high- Precision hole finishes.

EXHIBITING COMPANIES

DARDI INTERNATIONAL CORPORATION

A3-3206

DARDI

Founded in 1996, as the pioneer of ultra-high pressure water jet application technology in China and among the top list in the world, Dardi International Corporation is a national high-tech enterprise specialized in research and development, manufacturing, marketing, and technical service of ultra-high pressure water jet technology application products, and has built up the "Machinery Industry Ultra-high Pressure Waterjet Engineering Laboratory", the "Ultra-high Pressure Waterjet Engineering

Cantilever-type Waterjet Machine

Classic cantilever type: Standardized design, high versatility, new tool bed, split-type workbench, high cutting accuracy, loading and unloading at three sides

1. The cantilever-type counterweight balance structure and split-type design results in economized space and easy operation
2. The guide rail of the machine tool adopts labyrinth-type waterproof and sand control design
3. With the centralized automatic lubrication system and humanization design, the equipment is maintained automatically
4. The high quality guide rail sourced from international brand is used to guaranteed the high precision of parts processing and the smooth transmission
5. Three-axis, five-axis, and multi-head cutting may be optional

Pallet-Changer Fiber Laser Cutting Machine

1. Interactive pallet changer can complete the change in 10 seconds; the plates are loaded and unloaded simultaneously while conducting the processing operation, so as to improve work efficiency to a great extent;
2. The fully-enclosed integrated design is used to ensure operation safety and reduce environmental pollution effectively;
3. The automatic centralized lubrication function is used to lubricate on schedule and in fixed quantity, so as to maintain the machine in an intelligent way;
4. The precision racks and pinions as well as the reducer transmission components sourced from international well-known brands are used to ensure the protection of airborne acceleration.

DJTOL GRINDING MACHINE CO.,LTD

A1-143

DJTOL

DJTOL TOOLS (has been registered) was established in 1999, which is professional produce on Milling tools (tungsten), Turning milling tools (tungsten), drilling tools (tungsten), Engraving and milling tools (tungsten), Woodworking tools (tungsten), HSS tools (tungsten), Metal ceramic cutting tools (tungsten), Diamond tools, hob cutters, broach cutters, cutter hilt, cutter arbor, and collet. The full range, complete specifications, adequate supply, to create the most comprehensive tool product sales network.

CNC engraving and milling tools, engraving and cutting tools, drilling tools, wood working tools, turning milling tools, metal ceramic cutting tools, diamond tools, hss tools

DUTA KALINGGA PRATAMA, PT

A1-1017

Since 1987, PT. Duta Kalingga Pratama has been successful in gaining admirations from commercial and industrial customers all over Indonesia, and beyond. From 1993, DKP has been the forerunner in Auto ID and Data Capture (AIDC) technology and with over 35 years of experience, DKP continues to provide high-quality, cost effective and innovative solutions in AIDC technology and towards Visibility Solutions

AIDC product

DKP serves various industries from Warehousing / Distribution, Manufacturing, Healthcare, E-commerce, Transportation & Logistic, Education, Telecommunication, Retail, Government Institutions

EXHIBITING COMPANIES

ECOM PRECISION MACHINERY CO., LTD

A1-1317

ECOM Founded in 1976 and specializes in machine tool manufacturing. ECOM machine tools have been recognized worldwide for superior precision, outstanding rigidity, and exceptional reliability. ECOM product covers CNC Vertical Machining Center, Horizontal Machining Center, Tapping Center, and Double-Column Machining Center. Today there are more than 30 different models in production, fulfilling the industry's diverse requirements.

VL-V8

VL-V8 comes with a high-performance roller linear guideway for all 3-axis. It provides fast & accurate rapid feed, and also the allowance of heavy workpiece Z-axis. The 3-axis pre-loaded C3 class high precision ballscrews all has been well pre-extension, and directly coupled to A/C servo motors. It significantly eliminates backlash and ensures the highest rigidity.

HMC-630

The ECOM HMC-Series is a horizontal machining center designed specifically for a No. 50 taper spindle, and is ideal for mass production of large workpieces. The machine meets a wide range of machining needs, mainly from the automotive and construction machinery fields. The ECOM HMC-Series accommodates workpieces up to a maximum part capacity of 400-1200kg. All HMC-Series are with an integrated 4th-axis rotary table.

DMC-1722

The structures of major components for DMC machining centers have been designed with the finite element method (FEM). We refine our design and improve product quality. The ECOM DMC provides stability, and power requiring to deliver super-sized precision for meticulous industries such as aerospace, electronics, and automotive

ELITE AIR INDUSTRIAL CO., LTD

D2-8916

Elite Air have products of all types of compressor ranging from screw, oil free screw, piston, high pressure, PET, centrifugal. Air treatments like refrigerant air dryer, desiccant air dryer, and all kinds of pre and after filters. Other gases like oxygen and nitrogen generator as well, giving you all your compressor solutions.

Air compressor

Energy saving screw compressor

Centrifugal Blower

Air Suspension oil free blower. Almost no maintenance, increased efficiency more than 20%

Nitrogen Generator

Sleek design, easy maintenance, less maintenance parts.

ENOMOTO MACHINE

A2-228

Servomotor driven screw press for Metal Forging Automobile Parts.

Servomotor driven Screw press

Press machine for Forging to make Automobile parts such as Gears

EXHIBITING COMPANIES

FACCIN GROUP

A3-350

For over six decades, the FACCIN Group has remained at the forefront of the metal forming industry, positioning itself as a global leader in the manufacturing of top-quality metal forming machines. The group's unwavering commitment and dedication to excellence are evident through its three leading brands - FACCIN, BOLDRINI, and ROUND0, offers a vast array of plate rolls, angle rolls, dished end lines, and integrated solutions for rolling, bending, and forming metal sheets, profiles, and heads.

FACCIN 3-roll Plate Roll Variable Axis - HAV Series

The FACCIN's HAV 3-roll variable axis plate rolls are recognised worldwide as the most advanced and powerful model of electronic 3-roll bending rolls. The HAV series combines rolling power and maximum pre-bending precision, assuring high performances in less time. The special variable geometry configuration makes it the preferred choice for medium-heavy and heavy rolling processes for plates with thicknesses up to 300mm. Other than its versatility and flexibility, the HAV series can easily bend a wide range of diameters due to the interchangeable top rolls, it combines maximum precision with best pre-bending performances, and top reliability thanks to a revolutionary hydraulic unit.

ROUND0® Angle Rolls for Tube and Profile Bending

The Round0® R series, belongs to the new line of premium angle rolls covering capacities from 1 to 20000 cm³.

Manufactured with premium internal components, the R model offers the lowest working height in the industry which eliminates the need of pit construction, bringing a greater operator ergonomics while facilitating the profile or tube loading.

Furthermore, an advanced hydraulic system and special components have been installed capable of reducing noise and increase control.

Each axis can be independently controlled maintaining its maximum bending capacity without loss of power regardless of speed. For greater precision a user-friendly control concept, the wCNC4, is provided as standard.

BOLDRINI Automatic Dishing Line - Hydraulic Press PAO with Manipulator and Flanging Machine RIBO

The BOLDRINI PAO series is an advanced and high-speed portal frame press that boasts a cutting-edge handling device, equipped with a CNC manipulator that is able to handle multiple blanks, ensuring impeccable forming quality. In addition, a high-tech automatic playback system is included, allowing exact and uninterrupted repetition, ensuring accuracy and efficiency.

Furthermore, the RIBO series from BOLDRINI are flanging machines especially designed for simple operation and high productivity of large dished and flanged ends. This model can process a dimensional range from 2 to 80 mm thick (cold-forming) or up to 300 mm (hot-spinning).

FANUC INDONESIA, PT

A2-2218

The three businesses of FA, ROBOT and ROBOMACHINE are unified with SERVICE as "one FANUC", to provide innovation and reassurance to manufacturing sites around the world. Conforming to the spirit of "Service First", FANUC provides lifetime maintenance of its products for as long as they are used by customers, through more than 270 service locations supporting over 100 countries.

ROBOT Products

The FANUC Robot i series is a series of highly reliable intelligent robots with the sophisticated advanced controller R-30iB with intelligence and networking for versatile applications.

ROBOMACHINE Products

The Robomachines include ROBODRILLS, ROBOSHOTS, and ROBOCUTS.

FA Products

The FA product lineup includes CNCs, servo motors, servo amplifiers, and laser oscillators.

FFG GLOBAL CNC MACHINERY HOLDING CO.LTD

D1-8501

FFG Global CNC Machinery Holding Co., Ltd. ("FFG Global" for short) was founded in 1993. Through global restructuring, FFG Global was generated from the machine tools enterprise operated for over 40 years, gathering the founder Mr. Zhu Zhiyang's lifelong efforts. FFG Global covers nearly 20 well-known brands in the industry, owning 21 production bases in Asia, Europe and America, and over 4,000 employees by the end of 2021. The machines produced by FFG Global have served multiple downstream fields.

Machining Center

X: 850- 1800 mm Y: 560- 900 mm
Table Size: 1000 - 2000 mm x 550 - 900mm

Lathe CNC

45° Slant Bed prevents vibration or unwanted strain Max. Cutting length 350-1500mm Max. Cutting Diameter 280-630mm/Spindle A2-6 - A2-8, 8"-10"

This is only small sample of hundreds of new product which will be on display at the show. It's based on information provided by exhibitors as of November 4th, 2023. NOTE: this list is NOT comprehensive. The layout of this buyer's guide is at the full discretion of the organiser.

EXHIBITING COMPANIES

FICEP-CORIMPEX-LVD

B3-5416

FICEP is the largest producer in the world today of automated systems for the fabrication of structural steel, plate and an outstanding producer of equipment for the forging industry. FICEP offers Automatic solutions for the processing of:

- Angles and flats
- Beams and pipes
- Plates
- Surface Treatment
- Robotic Welding

FICEP offers solutions for:

- Transmission Towers
- Service Centres
- Agricultural and Earth Moving Equipment
- Bridges
- Commercial and Industrial Structures
- Offshore and Onshore Wind Industry

VALIANT

High performance sections multi-spindle drilling and sawing.

The Valiant represents the latest evolution in our drill line range. This product line is a new three-spindle system for the processing of the complete range of rolled structural steel shapes. These new models are the result of the constant commitment by our Engineering Team in addressing the requirements of the world's structural steel fabricators. In addition to the many industry leading innovative designs and features of the other structural steel drilling lines in our range, the Valiant incorporates several additional unique features and benefits.

KRONOS

Plates thermal cutting and drilling. Kronos HP, SP & PC models are heavy duty gantry style thermal cutting systems engineered for steel fabricators who need to generate diverse plate parts from stock plates. The Ficep Kronos integrates all the cutting, marking and drilling processes into one single operation to reduce material handling cost.

NOZOMI

9 axes sections thermal coping. The innovative features of the NOZOMI robot makes it the optimum choice for the fabrication of structural shapes and round pipes with the plasma thermal cutting process. Today the innovative developments of Hypertherm's "True Hole" process makes the thermal cutting of copes, mechanical openings, weld prep and in some applications bolt holes extremely efficient. An additional advantage is the use of the plasma torch for marking. This opens up capabilities such as generating part marking, layout locations with orientation marks and weld symbols all within the same thermal processing cell.

FIRST MACHINERY TRADE. CO

A2-2203; A2-202

First Machinery Trade Co (FMTC) adalah agen, supplier dan distributor berbagai jenis mesin industri terutama Computerize Numerical Control (CNC), waterjet, fiberlaser, dan metal 3d printer. Kami selalu memberikan kualitas terbaik dan banyak melayani industri otomotif, pertambangan, alat berat, industri percetakan logam, industri kereta api dan pesawat terbang.

Dengan pengalaman 30 tahun kami, FMTC adalah perusahaan yang dapat diandalkan dalam menjadi agen, supplier dan distributor di pasar.

SODICK

Sodick is a pioneer manufacturer in numerically controlled (NC) electric discharge machines. Since the formation of our company, there has been a dramatical improvement in precision machining. Sodick have also made tremendous contributions to the world of manufacturing as can be attested by electric discharge control research and development of NC units. To contribute to our customers' manufacturing activities, Sodick manufactures and sells electrical discharge machines and high-precision, high-speed machining centers; injection molding machines utilizing the proprietary V-LINE® system; and noodle-making and other automatic food machines in strict accordance with our corporate motto of "Create," "Implement" and "Overcome Difficulties."

HARTFORD

MGPS (Micro-Grade Process and Standard) and High Efficient Spindle-grade accuracy performance, 24hrs spindle operation

1. MGPS (Micro Grade Process and Standard) with positioning accuracy within 8 m , repeatability accuracy within 5 m.
2. High quality self-made spindle to ensure spindle run-out within 5 m.
3. Oil-air lubrication spindle Spindle bearing is lubricated by lubrication oil, spindle is capable of long term running.
4. Two face binding design for increasing cutting capability and machining accuracy, accuracy raised 30%.

TAIKAN

T-V1165S line rail type vertical machining center is a small and medium size machine tool, the workpiece can be automatically and continuously finished after a clamping milling, drilling, boring, expanding, reaming, countersinking, tapping and other processes, the machine tool is suitable for small and medium-sized box type, plate type, disk type, valve type, shell type, mold and other complex parts of multi-species of small and medium batch processing. The machine adopts high precision linear rail and ball screw, the machine has better dynamic responsiveness, can achieve high speed cutting, low speed without crawling, in precision parts, 5G products, hardware, auto parts, medical equipment industry is widely used.

EXHIBITING COMPANIES

FOSHAN HUIBAISHENG LASER TECHNOLOGY CO.,LTD.

D1-8521

FOSHAN HUIBAISHENG LASER TECHNOLOGY CO., LTD. is the manufacturer of fiber laser cutting machine, laser welding machine since 2004 with 100000 square meters workshop , including sheet cutting , tube cutting , laser welding . we have whole production chain , can supply OEM regarding customers' requirements

Single table fiber laser cutting machine
Economic type 1.5-6kw laser power

Full cover with exchange table fiber laser cutting machine
Exclusive patent climbing exchange table

Tube laser cutting machine
Round and square tube diameter can be same

GALAKSI METAL MESINDO, PT

A2-2616

PT GALAKSI METAL MESINDO product are MANUAL TIG, MIG AND SMAW MACHINE, ROBOT WELDING, LASER WELDING AND PLASMA CUTTING MACHINE

FOCUS ROBOT WELDING

FOCUS LASER WELDING MACHINE

GANZHOU ACHECK TOOL TECHNOLOGY CO., LTD

B3-5702

Ganzhou Achteck Tool Technology Co., Ltd. is a wholly-owned subsidiary of Chongyi Zhangyuan Tungsten Co., Ltd. (Listed Company with stock code 002378). It was established in 2007, located in Ganzhou Economic Development Area, with an area of 200,000 m². The registered capital of Achteck is 1.65 billion Yuan. Achteck has world class cemented carbide tool production technology. Achteck products can be widely applied in Petroleum, electric power, iron and steel, CNC machine tools industries.

Turning, milling, drilling, grooving
We offer turning, milling, drilling, grooving tools.

EXHIBITING COMPANIES

GEM POWER INDONESIA INDUSTRY, PT

A1-120

PT. Gem Power as the professional ZITAI Cold & SIMHIOPE hot chamber die casting machines, auxiliary equipment and parts. Also supply general machine tools such as LI-HSUN Live centers, SEEDTEC precision surface grinding, OSCARMAX EDM, KTK drilling & Tapping machine, CHII LONG Vibratory finishing machine, Abrasive stone. Also available for supply custom automatic production machine.

COLD CHAMBER DIE CASTING MACHINES
For casting the automotive aluminum parts

HOT CHAMBER DIE CASTING MACHINE
For LPG Regulator and some small automotive parts.

SEEDTEC PRECISION SURFACE GRINDER

GENERAL TECHNOLOGY GROUP DALIAN MACHINE TOOL IMPORT & EXPORT CO.,LTD.

B3-5802

DMTG is one of the largest machine tool builder in China, manufacturing high-speed CNC machine tools, high-speed machining centers, flexible production lines, and CNC function components. For our higher accuracy and durability, Dalian Machine Tool Group has provided more than 500,000 machine tools and 600 automatic production lines for the automotive industry, wind power, oil drilling, rail transportation, engineering machinery and other key industries.

Slant Bed CNC Lathe Machine Model : CLS-20
Standard Configurations:
- Fanuc controller
- Hydraulic 8 - position turret
- NSK Spindle bearings and X/Z axis bearings
- X/Z THK ball screws & THK linear guideways
- Taiwan Non through-hole hydraulic chuck
- Hydraulic tailstock
- Heat exchanger
- Chip conveyor
- Automatic lubrication system
- Standart toolkit

Flat Bed CNC Lathe Machine CKE Series
Standard Configuration:
- 3-jaw manual chuck
- Manual tailstock
- Vertical 4-position turret
- Heat exchanger
- Manual speed shift
- FANUC 0I-TF (5) Plus system

Vertical Machining Center Model : VDLS-850, VDLS-1000, VDLS-1300
Standard Configurations
- Fanuc controller
- 24T arm - type ATC
- Ball screw and linear guideway
- Spindel air blow
- Heat exchanger
- Compact oil - water separator
- Screw - type chip conveyor
- Rigid tapping
- Workpiece coolant system
- Automatic lubrication system
- Air gun

GENTIGER MACHINERY INDUSTRIAL CO., LTD.

A2-2716

GENTIGER Machinery was founded in 1995 by Mr. Li Jay, the president of the board. Since its establishment, it has adhered to the spirit of "sincerity, integrity, and trustworthiness" to produce precision turret milling machines and CNC high-speed machines. Many high-speed machine design structures and concepts have obtained more than 20 patents, and it is expected to become the No. 1 brand of Taiwan's high-speed machine.

CNC HIGH-SPEED HORIZONTAL BAND SAW MACHINE

1. The double-column saw frame structure raises rigidity.
2. The main driving wheels are equipped with an encoder for instant feedback and speed compensation.
3. Material sizing and cutting feed by servomotor.
4. The roller bed and dual movable jaw of F&R avoid material drag and squeezing.
5. The arch elevation mechanism uses a laser induction and isn't limited by the material height and shape.
6. The sawing order can be scanned by QR CODE to establish the parameters which is beneficial for management.
7. Graphical dialogue operation screen, humanized operation, improving operation convenience.
8. Equipped with a multi-function meter that immediately monitors the instantaneous energy consumption and efficiency.
9. High-performance design and stable structure can get the best sawing flatness, reduce material waste, and improve efficiency.
10. The machine combines fashion and technology while injecting the meaning of high speed, stability, and eco-friendliness.

EXHIBITING COMPANIES

GISMA CIPTA SUKSES, PT

A1-110

GISMA CIPTA SUKSES, PT is an engineering company which is professional in the field of Maintenance, Repair, Retrofit, Rebuild & Overhaul machine tools and industrial machinery for more than 22 years, and specialized in the field of Automation and Robot Integrator. Supported by professional engineers who are experienced and competent in their fields, we are providing the right solutions to our partners. Speed, accuracy and precision are our culture.

M3RO (Maintenance, Repair, Retrofit, Rebuild & Overhaul)

GISMA provides solutions for the maintenance and repair of industrial machines, especially machine tools. The M3RO (Maintenance, Repair, Retrofit, Rebuild & Overhaul) division provides certified technical facilities and services to handle various problem areas in industrial machines both on a small scale and on a large scale.

Machinery & Accessories Trading

As the times progressed and the demand for industrial machinery increased, in 2013 Gisma Cipta Sukses, PT began to expand its business network into the trading of industrial machinery and equipment, which were supplied from Germany, Japan, Korea, Taiwan and China. We are sure that by having a laboratory and technicians who are reliable in engineering, we can provide the best after sales service for you.

Factory Automation

Following the developments in the industrial era 4.0 and the large number of industrial demands for automation and development products in Indonesia which are top priorities, in 2015 we tried to develop this business by forming the Automation, Construction & Fabrication division with the scope of work of Special Purpose Machines (SPM), Robotics, System Integration, Inspection & Measurement.

GLOBAL MACHINE TOOLS, PT

A3-360

PT. Global Machine Tools always provides the best for you. We are a trusted machine supplier in Indonesia. We have Sales Team and engineering Team with Many Experience in this business. Your satisfaction is our priority. Our Main Business : Sheet Metal Machine : Shearing, Press Brake, Notcher, Plasma, Laser, etc Cutting Metal Machine : Lathe, Milling, Bandsaw, Shapping, Slotting, Grinding, Radial Drilling, etc Welding Equipment, Handling and Lifting Material Equipment, etc.

Press Brake Machine

Press Brake is a tool or pressing machine for bending metal sheets and materials, most often plate sheets. This machine forms a predetermined angle by clamping the workpiece between a suitable punch and dies.

Shearing Machine

Shearing Machine is a cutting machine that uses a hydraulic or manual working system. This system makes it easier for you to cut plates. The advantage of using a Hydraulic Shearing Machine is that it will be easier for us to cut plates with a greater thickness compared to cutting manually. You only need to set the thickness and pressure of how many tons for your machine, then your machine is ready to use.

Laser Machine

Laser cutting machines have the ability to cut metal or metallic materials. The work results are neat and stable. Has good working speed with smooth and fast machine movements. Several types of metal materials that can be worked on using a fiber laser machine include: Cutting stainless steel, carbon steel, mild steel, alloy steel, galvanized steel, silicon steel, spring steel, titanium sheet, galvanized sheet, iron sheet, inox sheet, aluminum, copper, brass and other metal sheets, metal plates, pipes metal and tube, etc

EXHIBITING COMPANIES

GUANGDONG ZHONGCONG INTELLIGENT EQUIPMENT CO., LTD.

D2-8921

Guangdong HANBS Intelligent Equipment Co., Ltd., a national high-tech enterprise, is located in Dalang Town, Dongguan City, the center of the Guangdong-Hong Kong-Macao Greater Bay Area. The company has more than 80 patents. And adhere to quality and provide users with precision machine tools with high precision, good stability and strong reliability. Reverse technology, respect users, actions can prove everything! Concentrate on quality, serve with heart, time can prove everything.

CNC LATHE

HS-820

HS-820 has the function of switching between guide sets and non-guide sets. The highest rotation speed of the spindle and the length of the single chip reach a higher level. The daily operation of chip cleaning and process switching are also fully considered in the design. Double-spindle, double-channel design. The spindle and back spindle are both high-precision built-in electric spindles.

HS-926

HS-932

HS-P15

HANN KUEN MACHINERY & HARDWARE CO., LTD

A2-2704

HANN KUEN was founded in 1985 and have extended its expertise in developing & manufacturing special purpose machine units, such as drilling head, tapping head, boring and milling head, servo driven facing head, built-in motor spindle unit, spindle with auto unclamping cylinder, servo and hydraulic slide tables.

SPINDLE DRILLING TAPPING SPINDLE UNIT - SERVO CONTROL

SSD06 spindle unit is designed servo feeding with ball screw grade C5 and driven by servo motors. The spindle nose accuracy is strictly under 0.003mm and maximum capacity up to 20mm for drilling and M16 for tapping (S45C). CNC Spindle allows to perform all types of machining applications such as drilling, tapping, chamfering, reaming and countersinking.

DRILLING SPINDLE HEAD

SD3 is an automated self-feeder drilling head unit with an oil damper for air feed or hydraulic valve to control the feeding rate. The accuracy of spindle nose is strictly under 0.003mm and maximum drilling capacity up to 6mm (S45C). This unit allows to perform all types of machining applications such as drilling, chamfering, reaming and countersinking.

TAPPING SPINDLE HEAD

STON tapping spindle unit is designed with lead screw transmission and supported automatic thread cutting and float tap chuck. The maximum tapping capacity is M6 (S45C).

HEBEI RUIAO MACHINE TOOL ACCESSORIES PRODUCING CO.,LTD

B3-5410

Our factory was started in 1993. Along with the rapid development of domestic industry over these years, we have completed the transition from a growth company to a mature company that owns an integrated customer service system. Our main products are cable chains, slideway covers, chip conveyor and chains, oil mist collector, cantilever control box etc.

CABLE DRAG CHAIN

The cable chain are flexible hollow structures used to guide, support, and protect cables, hoses, and hydraulic lines when makes reciprocating motion.

BELLOWS COVER

used to protect the slide way of the machine, in order to maintain the precision moving and increase the lifetime of the spindle.

OIL MIST COLLECTOR

suitable for collecting and purifying oil mist of various machine tools. The product features are small size, large air volume, high purification efficiency, low noise, long life of consumables, and low replacement cost.

EXHIBITING COMPANIES

HENTRACO, CV

A1-1033

C.V. Hentraco's machinery and industrial machines trading footprint includes the most active trading warehouse in East Java operating from Surabaya and in West Java operating from Cikarang. C.V. Hentraco is trading world class machinery products at short lead times. A strategic regional network of distribution centres in Surabaya and Jakarta with dynamic supply solutions and immediate stock availability are the keys to our wide range spread to industries and market sectors.

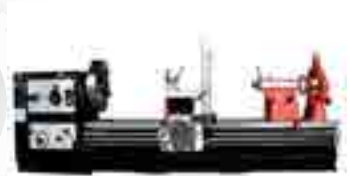

HIGH SPEED VERTICAL MACHINING CENTER MCV1000

Vertical Machining Center MCV1000 offers reliability with its rigid box way design combined with precision accuracy making it well suited for production and accurate machining operation

"FIRST" Brand Vertical Horizontal Turret Milling Machine

"FIRST" Brand with over 55 years of producing high quality milling machine present DC Servo Milling Machine for reliability and speed machining

"Hebei Yawo" Heavy Duty Horizontal Lathe Machine

With up to 16ton weight capacity and 16m long capacity, Hebei Yawo offers reliability combined with affordability

HIWIN TECHNOLOGIES CORP.

D2-8816

HIWIN Technologies Corp. is professionally design/development, manufacturing of ballscrews, linear guideways, industrial robots, rolling bearings and medical treatment equipment products. Our mission is to fill the needs of various industries and human well-being.

HIWIN comes from "HI-tech WINner" and means, "With us, you are a hi-tech winner." As you incorporate our product within your applications, you will realize the uncompromising value and the leading technological advancements.

Torque Motor Rotary Table (TMRT)

HIWIN Torque Motor Rotary Table (TMRT) uses a water-cooled direct-drive torque motor, built-in high-rigidity and high-precision bearings, absolute angle encoders and powerful brakes system. Compared with mechanical indexing table, TMRT has high speed and high torque characteristics, suitable for the needs of various machining equipment.

Different from the mechanical indexing plate, HIWIN Torque Motor Rotary Table has no backlash in the machining process due to the removal of the mechanical transmission structure, thus improves the stability of the machining accuracy, which is different from the mechanical indexing table. Through the installation of HIWIN Torque Motor Rotary Table, the original machining equipment is upgraded to 3+1 axis, 4 axis or 5 axis to achieve one-time clamping processing, improve processing efficiency and increase production capacity.

6 Axis Articulated Robot

A compact and agile jointed-arm robot with high degrees of freedom to perform complex jobs such as dirty, difficult and dangerous jobs to save human labor. Provide best functions for workpiece manipulating, precise assembly, complex machining and inspection.

SCARA Robot

Possessing high precision and flexibility, a rotary axis can be added to the joint-end to increase the degree of freedom. Different end-effectors can be incorporated to achieve high precision assembly or rapid planar machining.

HONOR GEAR PUMPS CORP.

A2-2705

HONOR GEAR PUMPS CORP. was formed as a result of the purchase of a local hydraulic gear pump product line, which was established in 1984. The skilled engineering staff at HONOR represents our commitment to the quality found in our product line. To further demonstrate our dedication to quality, we are certified UKAS ISO 9001:2015. We will continue to expand our product line and would be pleased to consider all customer requirements.

GEAR PUMP /GEAR MOTOR

Extrusion type aluminum-alloy-pump housing. The front and rear covers can be either aluminum alloy die casting or cast iron, and this small gear pump is of high yield rate, high efficiency while low noise, and the displacement is 0.8cm³/r ~ 125cm³/r.

EXHIBITING COMPANIES

HONOR SEIKI CO., LTD

A2-2711

Honor Seiki Co., Ltd. continues to develop quality CNC Vertical lathe and Vertical turning center to meet the highest standards in precision, efficiency, and reliability. Honor Seiki adapted the dual channels of standard VTL and industry solutions to increase its market share. The strength of Honor Seiki is customized design to meet the user's requirements. Achieving and fulfilling customers' satisfaction is our mission. We are proud of providing our machines to many leading companies in global

CNC VERTICAL LATHE-VL-66A (HIGH SPEED TURRET TYPE MACHINE)

- *High Flexibility for production arrangement
- *Easy for robot connection
- *Vertical type turret, Gang type turret, and Milling type turret are available
- *Wide span column with hardened box way design
- *100% spindle balancing process after offers high durability
- *High-grade Meehanite casting with casting with box in box structure offers high rigidity and stability for long-term heavy cutting'

CNC VERTICAL TURNING CENTER-VL-160CM (RAM TYPE MACHINE)

1. Stable column design
 - One piece column with wide span
 - Box structure of column reduce vibration
2. Powerful tool clamping system
 - GC clamping system
 - BT-50 clamping system
 - Solid Lock clamping system (U.S. patent of invention by Honor Seiki)
3. Brilliant design of cross-rail
 - Position lock with clamping to make sure its parallelism and stability
4. Thoughtful table bearing choice
 - Bigger bearing for stronger rigidity and durability
 - Carbonized gear
 - JIS Grade SCM440 Material
5. Strong design
 - High-grade Meehanite casting with box in box structure
 - One piece big machine bed with build in gear box and table spindle

CNC VERTICAL TURNING CENTER-VL-400C-2R (DUAL RAM TYPE MACHINE)

- *Dual ram can do the machining simultaneously to save machining time. *High-intensified one-piece casting iron is designed by symmetrical, box type and high rigidity structure. With the strengthened reticulated rib, it can support gravity compression and resist deformation.
- *Powerful tool clamping system Solid Lock clamping system (U.S. patent of invention by Honor) *Brilliant design of cross-rail Position lock with clamping to make sure its parallelism and stability

HUENCHEN MACHINERY CO., LTD.

D1-8112

HUENCHEN has over 40 years of experience in manufacturing processing machines. Our processing machines, such as riveting machines, snap fastening machines, eyeletting machines, cutting machines, punching machines, are widely applied in suitcase, leather bags, baby stroller, aero industry, car industry, stationery and etc. We also provide customized equipment services, which can be deeply customized according to customer needs. We also try our best to meet customer needs in after-sales service.

HC-70 Hydraulic Orbital Riveting Machine

The machine utilizes a spindle jointly developed with a Japanese manufacturer, and it incorporates Japanese-imported bearing seals. Paired with a hydraulic system, this equipment delivers stable and powerful output during operation. The machine could provide an unprecedented level of riveting quality.

HC-5HB High Speed Heading Machine

1 Die 2 Blow Heading Machine is used to produce screw in the fastener field. The machine's main body is manufactured using high-strength casting and undergoes precision machining with high-precision equipment. Finally, the taxiing plane is scraped achieve stability in production and an extended operational lifespan. The process is to feed the wire, cut the wire and form the screw head shape by a series of tools and dies.

HC-450 Hydraulic Cutting Machine

The machine's four- columns design enhances the stability of the cutting process, and it is equipped with a German-made hydraulic pump to provide a high cutting output. The machine is suitable for cutting large quantities of leather, handbags, plastic products and etc. Cutting patterns and shapes could be cut by changing the operating tools.

EXHIBITING COMPANIES

HUI BAO ENTERPRISE CO., LTD.

A1-1331

Hui Bao Enterprise Co., Ltd. (THB) was established since 1988. We are one of leading manufactures / designers of FRL combinations, air compressor components, quick couplers, air hose and pneumatic tools in Taiwan. We have been working with some esteemed brands. Moreover, THB products are sold worldwide successfully.

HVLV Gravity Spray Gun (Top Cup)

- Built-in regulator for stabilizing output pressure and better atomization
- Aluminum body for light weight and durable and user-friendly
- Stainless trigger and nozzle, which is designed for water-based paint (Material for spray cap is brass)
- Transparent cup with scale for checking paint easily

HVLV Gravity Spray Gun (Side Cup)

- Built-in regulator for stabilizing output pressure and better atomization
- Aluminum body for light weight and durable and user-friendly
- Stainless trigger and nozzle, which is designed for water-based paint (Material for spray cap is brass)
- Transparent cup with scale for checking paint easily

Digital Tire Inflator

- Easy to read LCD display with large screen
- PSI, Bar and Kpa - 3 kinds of measurement range
- Rubber protector cover can reduce the damage of dropping and does not slip easily when holding with only one hand.

INDO BEST WELDER & HEATER, PT

D1-829

We are distributors of welding, and heating machines, equipments and parts, most of which come from Japan, Taiwan, Thailand and China. With brands as following :

CHUO

Chuo Seisakusho, Ltd. Professional maker of Resistance welder and Rectifier, has provided satisfaction to customers under the mission statement, "Send the Kindness," since its established in 1936.

SPOTRON

SPOTRON: Welding Instrument
SPOTRON, No.1 brand in Japan, specialized in design, development, production and sales of welding instrument (Force gauge, Current meter, Micro-resistance checker, etc.) for spot welding.

AVIO

AVIO Product Lineup
I. Micro Spot Welder
II. Pulse-Heat Welder (Hot-Bar)
III. Ultrasonic Welder
IV. Laser Welder

INTERMESINDO RAYA, PT

Fiber Laser Cutting Machine

EXHIBITING COMPANIES

ITAICHU (M) SDN BHD

B3-5529

ITAICHU is an established and reliable company in Malaysia with more than 30 years of experience in manufacturing spare parts for all major brands of Shot Blasting Machine and supplies up to 1,500 tonnes of Steel Grit and Steel Shot in Malaysia every year. We are committed to ensure that the quality of our products complies with global standards and our competitive price does not compromise the life expectancy of our products.

SHOT BLASTING MACHINE SPARE PARTS & BLASTING ABRASIVE

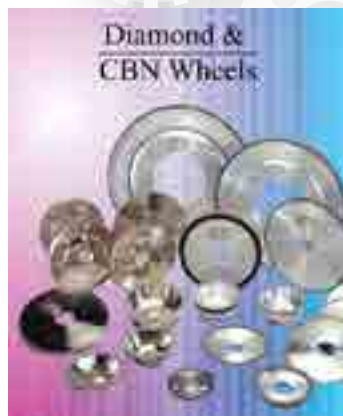

SUPPLYING OF ALL MAJOR BRANDS OF SHOT BLASTING MACHINE MANUFACTURER FROM COUNTRIES LIKE CHINA, JAPAN, SOUTH KOREA, TAIWAN, USA, EUROPEAN UNION & ETC. SUPPLYING BLASTING ABRASIVE LIKE STEEL SHOT, STEEL GRIT, STAINLESS STEEL SHOT, BROWN ALUMINIUM OXIDE, STAINLESS STEEL CUT WIRE, GLASS BEADS, CAST ZINC SHOT, ALUMINIUM CUT WIRE & ETC.

ITS MACHINE TOOLS (M) SDN BHD

D2-853

We are importer & exporter for Diamond, CBN and Bonded Abrasive Wheels in Malaysia.

Diamond & CBN Wheels
Diamond and CBN Wheels

Bonded Abrasive Wheels
Bonded Abrasive Wheels

Resin & Vitrified Bond Wheels
Resin & Vitrified Bond Wheels

JAR HON MACHINERY CO., LTD

A1-1318

Jar Hon Machinery Co., Ltd is a leading and successful manufacturer of tapping & drilling machines since 1986 under the brand name of "JAR HON". The trademark, three-point-star and concentric circle symbolize the spirit of unity and the prospect of promoting our products worldwide. More than 30 years, a team of experienced and highly skilled professionals has devoted to research and development. Not only upgrade traditional tapping machine to numeric control tapping machine but also set go

JT-6516E(2S) Slanting Type 2-spindle Auto Tapping Machine

The machine can be attached double spindle head and work efficiency can be more increased. Both cutting TAP and forming TAP are suitable.

Fully automatic tapping process. One operator can easily operate several machines at the same time. By using proper master pitch gears (change gears A and B pair), highly accurate thread can be tapped. It is easy and quick to change different size.

The length of the tapping stroke can easily be adjusted for high accuracy which is suitable for tapping blind hole parts. It has safe device to monitor the feeding, torque, radial, and clamping to keep TAP's long life and ensure safe working job. It governed by PLC. It can install additional hopper to increase automatic working. It can install additional sheet metal cover to gain more safety and reduce noise. Pre-work parts auto-checking and machine auto-stop if abnormal.

JD-15015F Horizontal Type Auto Feeding Drilling machine

It's a mechanical movement, the machine is a fully auto. feeding continuous tapping, one user will permit to operate several machines at same time.

It governed by PLC control.

It's useful running to the special working-pieces which are not easy to vertical-feeding job or an oblong type working-pieces so on. Provision of BLANK Auto-Checking and Auto-Stop if abnormal.

JT-4508NC Servo Numerical Control tapping machine

Numerically control main spindle speed and tapping depth. Repeatability $\pm 0.1\text{mm}$. Servo motor attached with HMI, it's convenient to set and operate.

With functions of general tapping, blind-hole tapping, small-hole tapping and peck tapping, etc.

It can connect and handshake with other mechanical equipments.

EXHIBITING COMPANIES

JAYA METAL TEKNIKA, PT

A2-2318; A2-260; A2-2316

PT. JAYA METAL TEKNIKA is an industrial machinery and tools trading company, which is supply from Japan, Germany, Switzerland, Australia and Taiwan. Our vision is to contribute for the efficiency on the Indonesia industrial manufacture. Our skills engineers have been provide a professional service for all valuable customer with the sophisticated equipment, we're confident to provide services in the Industrial Machinery Company in Indonesia.

Machinery

CNC Machining Center, CNC Lathe, CNC / ZNC EDM, CNC EDM Wirecut, CNC Grinder, Robotic, Plastic Injection, CMM, Stamping Press, Hydraulic Press Brake, Shearing, Manual Milling, Manual Lathe, Drilling & Tapping, Bandsaw.

Fiber Laser & Machinery

Fiber Laser Cutting, Fiber Laser Marking, Fiber Laser Welding, Fiber Laser Cleaning, Mold Laser Welding, UV Laser Marking, Compressor, Press Brake, Robot Automation, Welder, Vacuum Lifter, CNC Machining, Stamping Press & Bandsaw.

Accessories

Shrink Fit System, Angle Head, Milling Chuck, Profile Projector, Vision Measurement Machine, Automatic Tapping Machine, Air Conditioner, Chiller, Sharpening Machine, Endmill Grinder, Measuring Instruments, Power Pack, Angle Vice, Lifting Magnet, Magnetic Chuck, Lubrication System.

JIANGSU MIKE LASER EQUIPMENT CO., LTD.

D2-9331

The main products currently offered by the company include laser sheet cutting machines, laser pipe cutting machines, laser welding machines, laser marking machines, laser cleaning machines, 3D five-axis laser equipment, coil material leveling & laser cutting lines, fully automatic laser pipe cutting machines, fully automatic laser welding machines, flat laser cutting machines with a power capacity of up to 50,000W and customized non-standard automation laser equipment.

Laser sheet cutting machine

Compact structure, space-saving. Easy to operate, fully functional. Used for cutting various metal sheets of different thickness. Suitable for multiple product batches of small quantities.

laser welding machine

Simple and easy to learn. Convenient and flexible to operate. High cost-effectiveness.

laser aparts

Rycus laser source, Max laser source, Reci laser source, cypcut control system, raytools cutting head, Hanli water chilling.

JINAN AUTEN MACHINERY CO., LTD.

A1-130

Jinan Auten Machinery Co., Ltd. is a professional company dedicated in developing, studying, designing, manufacturing, and selling cnc machines, such as cnc angle punching machine line, cnc angle drilling machine line, cnc plate punching machine, cnc plate drilling machine, cnc H beam drilling machine, cnc beam band sawing machine, cnc roll forming machine, cnc pipe cutting machine, cnc plate plasma cutting machine, cnc grinding machine, electric power fittings and so on.

High speed cnc angle punching line

It is used for angle steel marking, punching, and shearing mainly in the field of angle steel tower industry, electric power fittings, structure storage facilities, and steel structure construction industries etc.

High Speed CNC Plate Punching and Drilling Machine

Used for punching, drilling and marking joint plates in the field of iron tower. It is also used to punching, drilling and marking metal plate in other industry field.

High Speed CNC Plate Drilling and Milling Machine

It is used in steel structure drilling in construction, bridge, tower etc., and can be used in pipe and plate of boiler, petro line, baffle plate and round flange.

EXHIBITING COMPANIES

KANEMATSU KGK INDONESIA, PT

A3-300

PT. Kanematsu KGK Indonesia is one of Leading Machine Tools Distributors From Japan has expanded its business,not only dealing on the machine tools for parts of automotive,motorcycle,mold and die production,etc,but also on the Industrial machinery such as food Industry,Textile Industry, Wood Product Industry,etc. we are Importing lots of variety of Japanese Machinery,Taiwanese, and European with earning high reputation by our loyal Customer as Function of Engineering,after sales support

SEIBU WIRE EDM M50HP SERIES

SEIBU is High speed,High Precision wire EDM M-series for Ideal Non-Stop-Operation,an annealing current is repeatedly passed through the wire, and the wire is pulled while being heated to straighten it using our dry annealing method. SHM (Start-Hole Device,Mounting) SHM is a start-hole drill that can be easily mounted on a machine and Top Class AWF(Automatic wire feeding Device)

STAR CNC SWISS TYPE AUTOMATIC LATHE SB-20R SERIES

STAR SB-Series : Design in Pursuit of Optimal Efficiency The DNA of the Best-Selling Machine. the latest SB series aims for optimization of machining to perform respective applications through" Flexible Selection" by Fabricating an ideal tooling layout. Optionally equipped with bar feeder non stop operational can be carried out

EXCESS-HYBRID II CAM-TOOL

EXCESS-HYBRID II is Hybrid CAD/CAM system adapted to Die/Mold Manufacturing site,CAM-TOOL is a Five-axis control machining center compatible,High-end CAS/CAM system with a hybrid CAM engine (Polygon and Surface)

KAYO PRODUCTS CO., LTD.

A1-1307

Kayo Group is a leading manufacturer and supplier for Gas Welding and Personal Protective Equipment in Taiwan. Wilson is a subsidiary of Kayo Group which has devoted to selling gas welding and cutting equipment for over 40 years. With rich experience on solving customers problems, Kayo deeply understood the demands of the market. In 2014, Kayo set up its own factory - Wilson Technical Inc. to produce high quality gas welding & cutting equipment to satisfy worldwide customers' requirements.

Power Kit KVHB-21 Gas Welding and Cutting Kit

UL Listed.
It packed in a strong stainless steel working case.
Cuts up to 8"
Welds up to 1/2" steel
Heavy duty regulators

KNM-250 Universal Hand Cutting Torch.

EN ISO 5172
Universal type heavy duty.
Cuts up to 300mm steel.
Multiple head angle and torch length available.

Wilson F821 Series Flashback Arrestors for Regulator

UL Listed. EN ISO 5175-1 & AS 4603.
Dust Filter
Flame Arrestor
Non-return Valve
Temperature sensitive cut-off Valve

KODUCT CO., LTD.

D2-9124

Established in 1986, KODUCT manufactures, produces, and delivers superior Cable Carrier, Flexible Tube, Connector, Cable Track Systems, unmatched among our global competitors, and a ROBOT DRESSPACK system in cooperation with German company BIZLINK. In addition, we utilize a global quality system that accepts quality-related inquiries from anywhere in the world, supporting our exports to more than 25 countries.

Plastic Cable Carrier

Cable carrier installed in moving machine and equipment is used to protect cables and hoses. (material: plastic)

Flexible Tube

Flexible tube and connector are eco-friendly products made of materials that follow RoHS(10 restricted materials) regulations.

Steel cable carrier

Cable carrier installed in moving machine and equipment is used to protect cables and hoses. (material : steel)

EXHIBITING COMPANIES

KUNSHAN OMATEI MECHANICAL AND ELECTRICAL EQUIPMENT CO., LTD.

A3-346

Omatei produce and sell OMATEI and NTH brand series production, it's mainly applied in the industry field of machine tools, precision machining, automotive making, electronics, aerospace, Etc. we have not only high percent market share in China domestic, but in Europe and America and Southeast Asia market as well, our production has been recognized and praised by our customers from all over of the world!

CHUCK JAWS

Soft jaws & hard jaws & customized jaws for lathe chuck series

LATHE CHUCK

High accuracy hydraulic chuck & Manual chuck & customized chuck series

LAJU KENCANG MESINDO, PT

A1-1231

LK is one of the Machine Tool Manufacturer in the world, producing a board range of CNCs from TC Tapping Center, Vertical and Horizontal Machining Center, and our Double Column Machining Center for different industries, such as 3C, automotive and motorcycle. LK CNC machines offer easy programming, accuracy, reliability, and durability.

WE ARE MACHINE MANUFACTURING COMPANY, OUR PRODUCT CONSIST OF :

1. Vertical Machining Center
2. Turning Lathe Machine
3. Horizontal Machining Center

Vertical Machining Center 3

MV series can be used for machining general mechanical and assembly parts, die casting parts and mold processing.

Turning Lathe Machine (LT-8)

Low center of gravity slant bed construction ensure high rigidity and heavy cutting performance. Features efficient chip removal and convenient load / unloading workpiece.

LI XIANG MACH. & ELEC. CO., LTD

A2-2708

Li Xiang machinery diversify its product line to fulfill the differing needs from various customers.

LI XIANG'S PEI GONG branded gearbox was established in 1976, known as the iconic brand in Taiwan's domestic market. The products line includes Worm gear reducer, Helical gear reducer, Planetary gear reducer, Gear motor, Screw jacks, Miter reducer, customized products and so on. We provide the high-quality products and professional service to customer, One stop solution provider, matches your

HELICAL GEAR REDUCER

The structure of the gear motor is integrally formed, and it has the characteristics of small size and high torque. It is often used in mechanical equipment connected to an AC power supply (AC).

WORM GEAR REDUCER

The internal structure of the worm gear reducer is composed of a worm wheel, a worm, and an output shaft. The reducer is made of good worm gear materials plus heat-treated and finely ground worms. The traditional cast iron worm gear reducer has a variety of appearance changes, which can meet the needs of various equipment.

EXHIBITING COMPANIES

MAPLE TECHNOLOGY CO., LTD

A1-1316

Maple Technology Co., Ltd is a company from Taiwan. Maple has already 35 years of vnc machine manufacture ,research and development. There are various machine type in Maple :

Vertical Machining Center, VMC, Horizontal Machining Center, HMC, Bride Type Machining Center ,BMC, Other Machining Centers, Gantry Model, and CNC Lathes.

Maple is always going to proceed with our worldwide partners.

If you would like to know more Maple's information , please come to meet us during 6 – 9 December 2023.

ME-1055

ME-1055 has strong machining body structure to support a platform capable of supporting to 800 kgs. ME-1055 could do versatile tasks not only parts production but also mold production. ME-1055 is equipped with high-end servomotors that are directly connected to the ball screw not one single ounce of power is lost during transmission.

ML-280

ML-280 is high speed slant bed lathe with 8 position servo hydraulic turret. ML-280 is equipped with a 7.5 kw high-power motor and machine structure, and further enhanced spindle and axis ball screw stiffness. ML-280 could offer excellent cutting capability up to a maximum turning diameter 400(disc) and maximum turning diameter 210(axis) and with a maximum turning length of 600mm

MATRIX PRECISION CO., LTD.

A3-3218

Matrix Precision Co., Ltd. is the professional manufacturer of gear grinding machine, worm thread grinding machine and hob sharpening machine. Matrix takes the knowledge of gear transmission and precision machining as the core technology, to build the mathematical models, so gradually develops its own unique gear software and machine tools.

GHP-3540

Matrix GHP-3540 : CNC Gear Profile Grinding Machine. GHP-3540 applies high speed grinding spindle; through the in-house developed intelligent conversation window software, it can flexibly output the required tooth profile and grinding parameter. The machining workpieces include the involute gear and cycloidal gears; the high efficiency and high precision expressed from the product are equivalent to worldwide-top brand's ones; GHP-3540 is your best choice.

Gear Cutting tools

Based on the core technology in high-precision machinery and gear production, Matrix provides hobs, carbide hobs, shaving cutters, shaper cutters, master gears and technical service. Many years of experience in the market which offers efficiency in designing software and production system. Matrix is also known for on time problem solving, innovative design and technique exchange seminars according to the customer's needs, continuing to respond to the market and lead the future

GVP-8040

Matrix GVP-8040: CNC Vertical Type Gear Profile Grinding Machine. GVP-8040 applies high speed grinding spindle; through the Matrix developed intelligent conversations window software, it can flexibly output the required tooth profile and grinding parameters. The machining workpieces include involute gear, large-module hobs and cycloidal gears; the high-efficiency and high precision expressed from the products are equivalent to worldwide-top brand's ones; GVP-8040 is your best choice.

MITUTOYO INDONESIA, PT

D1-8615

Mitutoyo Indonesia set up its office in 2005, and is located in Cikarang, Bekasi. With regional sales offices, M³ Solution Centers, calibration labs and aftersales services as well as machine-specific training and general metrology training courses, comprehensive range of precision measuring equipment from Micrometers, Calipers, Digital Scale and DRO, Data Management-SPC to Hardness Testing Systems, FORM Measurements, Optical Measuring, Coordinate Measuring Machines and Measuring Systems

Surface Measure 1008S

High accuracy and environment-resistant sensor for various 2D and 3D data measurement

MiSTAR555

Highly Environment-resistant Coordinate Measuring Machine, Allowing On-site Inspection outside the Measuring Room

Special Promotion Bundle CV-2100M4 & SJ-411

Bundle these two entry level Contour and Surface Roughness Measurement Equipment to Save Cost!

EXHIBITING COMPANIES

MIYANACH IND. CO., LTD.

A1-1330

Miyach Ind. Co. Ltd. is a ISO 9001 and CE certificated company. We manufacture portable magnetic drilling machines and wide range of tungsten carbide tipped hole saws, annular cutters, for drilling purpose. Miyach Ind. Co. Ltd. was established at Fenyuan T., Changhau, Taiwan in 1985. We uphold the spirit of continuous exploring, and strive for excellence in our products and technologies. In 2006, we set up second factory, invested a considerable sum in purchasing various precision machines.

TUNGSTEN CARBIDE TIPPED HOLE SAWS
TCT Hole Saws PL-52
Brand : WS (Wind Speed)
Model : PL-52 (Dynamite one piece Type)
Cutting Depth : 4mm thickness
Capacity : 16mm-100mm
Pass through max. depth 50mm
Coated TIN Drill bit

WS-3500M PORTABLE MAGNETIC DRILLING MACHINE
Brand : WS (Wind Speed)
Model : WS-3500M (Manual Feed)
Hole Capacity: 35mm (for 12-35mm cutter and up to 50mm thickness plate)
Motor Rated Power Consumption: 1100W (5 Ampere)
No-Load Speed: 780 rpm
Magnet Adhesion: 15680 N /1600 kgf
Magnet Dimensions: 186mm x 86mm x 56mm
Weight: 14 kg

TUNGSTEN CARBIDE TIPPED ANNULAR CUTTER
Tct Annular Cutters FS-350
Brand : WS (Wind Speed)
Model : FS-350
Type : One Touch Shank
Cutting Depth : 35L(mm)
Capacity : 13mm-40mm
Cutter Connection : 19.05mm (one touch shank)

MOMMENTUM DJAJA, PT

A1-1219

PT. Mommentum Djaja has been the authorised distributor of Koike in Indonesia since 1976. We have experience more than 46 years serving in Heavy Equipment Manufactures General Fabrication Shops, Power Generation Plants, Pipe and Vessel, Shipyards and offshore Platforms, Transportation, Steel Service Centers and Educational Institutions. The Extensive line of Equipment that have been used in these area and industries include CNC Oxy-Fuel, CNC Plasma, and Laser. Distributor cutting plasma Hypertherm

CNC Oxy-Fuel, CNC Plasma DAMA

NANJING KLAUS CNC MACHINERY CO.,LTD

A3-3202

KRRASS have the world top R & D team to ensure the most innovative technical processes are used to create the highest quality products. Factory direct sales, no middlemen, cost-effective. And Krass have a professional online and offline after-sales service team, also there are sales service stations in more than 50% of the countries in the world. So we can make sure that every customer will have a good guarantee after purchasing Krrass Machines, Krrass Machine must create value for every customer

3-4 Axis Back Gauge Press Brake
MB8 Series bending machines, designed with high technology to increase efficiency on precise part bending. With Easy to use control unit, stable body structure, perfect design, low operating cost, different tool usage options, maximum safety standards, KRRASS bending machine is the best in the world in its segment. Bending performance is increased by using high quality European clamping system and easiness to use. KRRASS is your solution partner with various tool options.

Hydraulic Shearing Machine
Hydraulic Shearing machines are machine tools used for straight cuts on sheet metal. On a

swing beam shear, the swing beam moves with the upper blade in a circular arc. On a guillotine shear, the upper shaft moves straight down. KRRASS Shears have been manufactured since 1995 and installed and working in various sheet metal cutting operations for many industries. Years of experience have helped us develop durable, low-distortion, and precise cutting machines.

Fiber Laser Cutting Machine
The fiber laser cutting machine is to focus the laser emitted from the laser into a high-power density laser beam through the optical path system. The laser beam is irradiated on the surface of the workpiece, making the workpiece reach the melting point or boiling point, while the high-pressure gas coaxial with the shaft blows the molten or vaporized metal away. When the relative position of the laser beam and the workpiece moves, the material will form a slit to achieve the purpose of cutting. The fiber laser cutting machine process replaces the traditional mechanical knife with an invisible beam. It has the characteristics of

high precision, fast cutting, not limited to the cutting pattern, automatic typesetting to save materials, smooth incision, low processing cost, etc. It will be gradually improved or replaced in Traditional metal-cutting process equipment. The mechanical part of the laser cutter head has no contact with the workpiece and will not scratch the surface of the workpiece during work. The laser cutting speed is fast. The incision is smooth and flat and generally does not require subsequent processing; the cutting heat-affected zone is small, the plate deformation is small, and the slit is narrow (0.1mm-0.3mm). The incision has no mechanical stress and no shearing burrs. Fiber laser cutting machine has the advantages of high machining accuracy, good repeatability, and no damage to the material's surface. CNC programming can process any plan and cut the entire board in a large format without opening the mold, which is economical and time-saving.

EXHIBITING COMPANIES

NANJING LIANPENG MACHINERY TECHNOLOGY CO. LTD

A1-1416

Nanjing Lianpeng Machinery Technology Co., Ltd. is a modern management enterprise which produces all kinds of common and CNC bending machines, shears, laser cutting machines and matching knives and moulds. The company has a group of knowledgeable and younger team dedicated to the development of sheet metal processing machine tools. The product development department uses CAD, CAPP, PDM and other aided design software, has a strong ability to develop and design, and adopts the international advanced

CNC bending machine

CNC bending machine is mainly used for sheet metal bending

Plate shears

Plate shears are used to cut iron plates

Laser cutting machine

Laser cutting for cutting metal products, iron, copper, aluminum

NANJING SVIDE AUTOMATIC WELDING EQUIPMENT CO., LTD

B3-5602

Nanjing Svide Technology Co., Ltd., was established in 2003 in Baixia industrial zone of Nanjing city. It is specialized in resistance spot welding equipment and equipment industry, and has provided 20 years of service for automotive body welding and railway vehicle industry. It is one of the main suppliers of resistance welding equipment in automotive industry, and is also the major supplier and system integrator of CRRC of the resistance welding equipment and equipment.

Suspension spot welding machine

- 500A/800A/1200A controllers can be configured
- Waterway corrosion resistance
- Resistance to impact
- Waterway system with flow detection
- Can be equipped with 2 pcs of welding guns
- Can be connected to the Internet

Vertical (fixed) spot (projection) welding machine (DC / AC)

Railway application scope: spot welding of small parts

- Adopt Digital PID closed-loop control, good control stability;
- Control frequency 1-4KHz, fast dynamic response, high control accuracy;
- Constant voltage, constant current, constant power three welding control modes;
- The full solid DC link capacitor is used, and the service life is long;
- The Hall current sensor is used to detect the DC output with high precision;
- The transformer secondary current feedback realizes the full closed-loop control of the current;
- Current, voltage, power and dynamic resistance data can be collected and output according to the control cycle, which is convenient for quality management and traceability of welding quality

Robot system integration of automobile parts;

- Laser brazing, spot welding, edging, handling and conveying of automobile front and rear covers
- Laser flying welding, spot welding, riveting, gluing, assembly and handling of front and rear wheel housing bottom plates of automobile side wall
- Spot welding and laser brazing of automobile roof
- Automobile door spot welding, laser flying welding
- Auto parts arc welding, laser cleaning, laser quenching
- Laser cutting of automobile exhaust pipe and household appliance sheet metal
- Laser cladding of high temperature materials for large shaft and nuclear power plant
- Laser welding of kitchen range hood
- Laser welding, handling and transportation of automobile soft pack battery
- Automobile hard clad battery assembly, cleaning, gluing, arc welding, laser welding, handling and transportation

EXHIBITING COMPANIES

NANJING TEYUN MACHINERY MANUFACTURE CO.,LTD

A1-136

TEYUN®

Teyun has specialized in the hydraulic machines for many years, the mainly products including the recycling equipment (scrap metal shear, scrap metal baler, non-ferrous baler, shredding machine, briquetting machine ect.) and the aluminum extrusion line. Teyun has a professional sales team to sever the customers from all over the world and win the high recognition from the customers.

scrap metal baler

The scrap metal baler is used to recycle the scrap metal into a bale, this process can reduce the cost of transport and space to stock.

scrap metal shear

For cutting the scrap metal, we have four types of the scrap metal shears, they are the container shear, alligator shear, hydraulic gantry shear and the super alligator shear.

Aluminum/cooper extrusion line

The aluminum extrusion line is used to producing the aluminum profiles, it's not a single machine, it includes the aluminum extrusion main press and the auxiliary equipment (the cooling table, aging furnace, heating furnace, mold oven and puller). We can offer you the whole line aluminum/cooper extrusion plan

NANTONG TOBEL INTELLIGENT CONTROLLING EQUIPMENT CO.,LTD

B3-5302

TOBEL is a national high-tech enterprise specializing in the research, development, manufacturing and sales of industrial refrigeration equipments. We lead energy-saving and environmental refrigeration products and provide overall temperature control solutions for industrial fluids.

Oil chiller

TOBEL's main industrial refrigeration equipment is oil chiller. Comparing with conventional cooling equipments, TOBEL oil chiller can rapidly cool down oil and not affected by ambient temperature, which can completely solve the heating problem in machining process to ensure stable operation of mechanical equipment and improve machining accuracy.

Oil cooler

Water chiller

NCB CO., LTD.

A2-2726

NCB started business S/W development and processing company in 1997. NCBrain was released in 2003 and has been supplied to more than 1,800 customers with 8,000 seats, including Samsung, LG, Hyundai, KIA, Toyota, Honda and Mahindra.

NCBrain

NCBrain builds an optimal database considering machining, and changes existing NC data to optimal machining NC data through simulation.

NCBrain AICAM

AICAM, an autonomous driving concept of artificial intelligence, realizes safe and fast unmanned automated machining with just 5 clicks using modeling.

EXHIBITING COMPANIES

NIKON INDONESIA, PT

D1-8517

Nikon provides a variety of products, services, and solutions worldwide, based on advanced opto-electronics and precision technologies cultivated during the company's more than 100 years of history. To meet the diversifying and sophisticated needs with solid technical capabilities, we have established a flexible Monodzukuri (manufacturing) system throughout the Nikon Group.

Video Measuring Systems

NEXIV CNC Video Measuring Systems Automatically inspect the dimensions of a variety of components from fine precision equipment and electronics parts, using optical measuring and use of image processing technologies. By precisely detecting the feature edges of the sample using CCD and CMOS Camera image and with data processing, the measurement of complex sample is possible

X-ray CT

Nikon Metrology X-ray sources are at the heart of our technology and have been designed and manufactured in-house since 1987 to this day, offering over 30 years of knowledge. Being at the heart of the image, control over the X-ray source technology allows Nikon Metrology to quickly move with the market and develop complete and innovative solutions to the application demand. All Sources are open-tube giving a low cost of ownership and range from low (130) to medium (225) to high (450) kV, all with micron resolution.

Laser Radar

With applications across a wide range of industries, from automotive and aerospace through to energy and renewables, APDIS Laser Radar systems allow large volume, non-contact measurement with unmatched speed and precision in fully-automated or semi-automated installations.

NINGBO BLIN MACHINERY CO., LTD.

B3-5315

- We are one professional CNC MACHINE(CNC Turning,CNC Milling,CNC Drilling& Tapping) manufacturer and exporter in CHINA.
- 43 years' history for machine tool manufacturing.
- 14 years' history for cnc machine export.
- Total 3 manufacturing bases in CHINA.
- Covered more than 40000m2 manufacturing workshop.
- Taiwan / Germany technology cooperation.
- Set up 2500m2 export sales center& showroom in NINGBO city.
- Exported to 64 countries in the world

SLANT BED CNC LATHE BL-S200

- Adopt similar structure as JAPAN TAKISAWA, bed adopt flat bed, slide board adopt 30°slant design, high rigidity, good machining flexibility
- Super compact structure, big inside space, modern appearance
- Adopt JAPAN technology, designed by JAPAN engineer, most parts adopt GERMANY/JAPAN/TAIWAN brand
- Adopt modularization design, has strong extended function, easy for various especial configuration choice, such as tool setter, parts catcher, robot etc.
- Adopt HT300 resin sand cast iron, after aging treatment and FEA analysis, small distortion, good torsional strength, good heat stability.
- Base adopt multilayer strengthening rib, ensure bed's strength and stability
- Frame adopt oil-coolant separation design, adopt independent coolant tank
- Adopt high precision integral spindle unit, spindle motor adopt high performance servo motor, big output torque, high speed, wide adjustment range
- Adopt high precision pre-stretched ball screw(double nuts),coupled with feeding motor directly by linkage,high transmission rigidity, can realize class precise turning
- Adopt high precision ROLLER type linear guideway, high rigidity, good accuracy holding, suitable for heavy loading and precise machining
- Can mount right-setting or back-setting chip conveyor, strong chip conveying capacity
- Represent the top class of Chinese CNC turning machine
- S200: 8T/12T Hydraulic-servo tool turret

SLANT BED CNC LATHE BL-S205Y

- Adopt similar structure as JAPAN MAZAK, bed adopt flat bed, slide board adopt 30°slant design, high rigidity, good machining flexibility
- Adopt JAPAN technology, designed by JAPAN engineer, most parts adopt GERMANY/JAPAN/TAIWAN brand
- Adopt modularization design, has strong extended function, easy for various especial configuration choice, such as tool setter, parts catcher, robot etc
- Adopt HT300 resin sand cast iron, after aging treatment and FEA analysis, small distortion, good torsional strength, good heat stability
- Base adopt multilayer strengthening rib, ensure bed's strength and stability
- Frame adopt oil-coolant separation design, adopt independent coolant tank
- Adopt high precision integral spindle unit, spindle motor adopt high performance servo motor, big output torque,high speed,wide adjustment range
- Adopt high precision pre-stretched ball screw(double nuts), coupled with motor directly by linkage,high transmission rigidity, can realize class precise turning.
- Adopt high precision ROLLER type linear guideway, high rigidity, good accuracy holding, suitable for heavy loading and precise machining
- Adopt Hydraulic-servo tool turret/powerd tool turret,fast tool changing, good repeatability,high efficiency
- S205Y adopt especial structure programmable tailstock, tailstock quill not move, whole tailstock body driven by hydraulic cylinder on linear guideway
- S205Y: 12T powered tool turret+YS axes+tailstock

SWISS-TYPE AUTOMATIC CNC LATHE BL-CSL265

- Dual spindle,total 5 axes
- Adopt TAIWAN technology,most parts adopt GERMANY/JAPAN/TAIWAN brand
- Adopt meehanite resin sand cast iron, after aging treatment, small distortion, good heat stability and high rigidity
- Adopt high precision built-in electro-spindle,NSK super high precise angle contact ball bearing, achieve spindle's high rigidity and good precision retention,spindle flop≤2 m
- Adopt JAPAN THK brand high precision ball screw and linear guideway
- Adopt gang type tool, can achieve turning/milling/drilling etc combined machining by side-mounted live tool and C axes
- After mount automatic bar feeder, can realize automatic machining
- Suitable for complex, small-sized, precise, slender axles workpiece machining

EXHIBITING COMPANIES

NINGBO DABU WELDING TECHNOLOGY CO., LTD

B3-5706

DABU focuses on professional design and manufacture. Its spirit is "make orientation, top quality, technology innovation, sustainable development" DABU works on developing, manufacture and sales of welding machine, welding helmets, plasma cutting machine, battery charger and welding cables. So far, the company has passed ISO9001, ISO 14001, BSCI and other certificates, such as ANSI, GS, TUV, CE, SAA, VDE, ETL and so on.

MMA welding machine

MMA welding machine, IGBT, digital display, VRD, duty cycle 60%, Hot start, Arc force, Anti-stick, fan cooling, 1-phase 230V (starting from 160V), generator friendly

welding helmet

Auto darkening welding helmet: Battery powered with solar-assist for long life(up to 5000 hours) with chargeable batteries required. Four independent arc sensors. Filter darkening reaction is 1/25000 sec. Variable shade 5-8.5/9-13.5, variable sensitivity and delay controls.

MIG WELDING MACHINE

MIG-MAG, MMA, TIG-lift, IGBT, synergic control, digital display, duty cycle 60%, EURO-connector, 0.6-1.0mm solid and flux-cored wire, D100/D200 wire spool 1/5 kg, 230V

NINGBO HAITIAN PRECISION MACHINERY CO., LTD.

A1-1118

NINGBO HAITIAN PRECISION MACHINERY CO., LTD. is the largest CNC machine tool manufacturer in China. Focus on CNC equipment production for 20 years. Include Ddouble Column Machining Center, Horizontal Machining Center, Vertical Machining center and CNC Lathe.

Double Column Machining Center

Can produce various types of Double Column machining centers

Vertical Machining Center

VMC/CFV

Horizontal Machining Center

H series/ HPC

NIREI CORPORATION LTD.

A2-2710

Nirei Corporation Ltd., established in 2011, is a factory invested by a Japanese knife maker. We have been dedicated to the manufacturing of high-quality, high-precision, and durable Slitter Knives, Spacer, and related products for several years. Currently, we have customers in Taiwan, Mainland China, and Southeast Asia countries such as Indonesia, Malaysia, Thailand, and Vietnam, which includes some well-known world-class companies.

Slitter knives, Spacers & Patented light spacers

Our slitter knives are made of high-toughness, wear-resistant steel modified by Japanese technology and finely ground by a precision grinding machine made in Japan. It is suitable for cutting all kinds of stainless steel, carbon steel, cold rolled steel, galvanized steel, high-tension steel plate, aluminum plate, silicon steel sheet, and so on. We are committed to assisting customers in solving all their problems encountered in steel cutting.

EXHIBITING COMPANIES

OKE PRECISION CUTTING TOOLS CO., LTD.

B3-5614

Established in Jan 1996, OKE Precision Cutting Tools Co., Ltd with registered capital of CNY 158 million, is a high-tech enterprise specializing in independent R&D, production, and sales of cemented carbide and CNC cutting tool products. On 10th Dec. 2020, OKE was successfully listed on the Chinese Stock Exchange, the stock symbol: 688308. By the end of 2022, the company has 1000 employees, more than 200 are specialized in technology research.

Carbide insert
CNC carbide insert, PVD-coated inserts, CVD-coated inserts

Solid carbide cutting tool
carbide endmill, carbide drill, carbide rod.

CNC tooling systems
reaming, drilling and milling tools

OTANO MULTI MESINDO, PT

A2-2602, A2-2502A

PT. OTANO MULTI MESINDO PRODUCT ARE CNC TURRET PUNCH, CNC PRESS BRAKE AND SHEARING, CNC TUBE BENDING MACHINE, CNC LASER CUTTING, BANDSAW AND PIPE CUTTING MACHINE, IRON WORKER, POWER PRESS MACHINE, CHAMFERING MACHINE

CNC TURRET PUNCH MACHINE

POWER PRESS MACHINE

CNC TUBE BENDING MACHINE

PROFET AI

A1-121

Profet AI's No-Code AutoML Platform accelerates industries by swiftly deploying high-quality prediction models, solving production and digitalization challenges. Trusted by global leaders in EMS, Semi-OSAT, PCB, IC design, etc., Profet AI delivers AI solutions within a week, leveraging successful cases from industry giants. With exceptional efficiency, it attracts 100+ manufacturing clients across 14 sectors. Over 70% are industry leaders and publicly listed companies.

Profet AI | AutoML

End-to-End No-Code Enterprise AI Platform for rapid model development and deployment

- * PROFET AUTOML*
- NO CODE DEVELOPMENT PLATFORM
 - = 1 day training course
 - = 1 week deployment plan
 - = 5 days Problem-solving methodology
- * PROFET VIRTUAL SCIENTIST*
- READY TO GO APPLICATIONS
 - = 12 different manufacturing industries
 - = 100 real use cases
 - = 10 mins demonstration

EXHIBITING COMPANIES

QINGDAO GLORIES INTERNATIONAL TRADING CO., LTD

B3-5427

We are specialized in international business on machines and tools, including metal working machine, sheet metal working machines, wood working machines, accessories and tools, with more than 15 years of experience, to provide the best price/quality/service to customers all over the world.

WOOD CUTTING TABLE SAW

RELIABLE QUALITY AND STRONG CUTTING CAPACITY FOR WOOD WORKING WITH 254MM CIRCULAR BLADE

PLANER AND THICKNESSER

PERFECT MACHINE FOR WOOD PLANNING AND THICKENING

DRILL PRESS

HIGH COST PERFORMANCE HOUSEHOLD DRILL PRESS

RENISHAW INDONESIA

D1-8515

Renishaw is one of the world's leading engineering and scientific technology companies, with expertise in precision measurement and healthcare. The company supplies products and services used in applications as diverse as jet engine and wind turbine manufacture, through to 3D printing, dentistry and brain surgery.

The Renishaw Group currently has 77 offices in 36 countries, with over 5,000 employees, of which over 3,000 people are employed within the UK.

Equator™ 500 gauging system

Equator 500 high-speed comparative gauging measure parts quickly and accurately on the shop floor with the scanning speeds in excess of 200 mm/s. With a working volume of 500 mm x 400 mm, Equator 500 enables the accurate gauging of larger parts between a range of 5 °C and 50 °C at any rate of temperature change. It is compatible with new IPC software which allows constant monitoring and automatic adjustment of a machining operation, keeping part dimensions close to nominal and well within process control limits.

NC4+ Blue non-contact tool setting system

NC4+ Blue non-contact tool setter systems incorporate industry-first blue laser technology and advanced optics, enabling measurement of a wide variety of tools at production feeds and speeds, and minimising the risk of excessive tool wear or tool breakage. NC4+ Blue systems measure and detect tools down to $\varnothing 0.03$ mm and to a repeatability of ± 0.5 μ m for accurate measurement of small tools and reduce tool to tool measurement errors. Available in fixed systems, separate systems and custom solutions, the ultra-compact NC4+ Blue series fits your different applications.

EXHIBITING COMPANIES

RINCO ULTRASONICS (M) SDN. BHD.

A1-160

ELECTRICAL MOTION

The Electrical Motion series is ideal for welding, cutting and punching thermoplastics, non-wovens and textiles.

Thanks to the electric drive, the controller is extremely precise, allowing the best possible welding results.

In addition to the 8 welding modes, a trigger can be set to initiate the ultrasound.

STANDARD

The ultrasonic welding machines in the Standard series with pneumatic drive are ideal for welding, cutting and punching thermoplastic moulded parts, non-wovens and textiles as well as films, or for embedding metals in plastic. Standard models can be used for high-precision machining of parts made from plastic with designs of average complexity.

With an adjustable travel measurement of 0.01 mm, these machines work very precisely and achieve accurate welding results.

The option to store up to 32 parameter data sets ensures repeatability. Multi-level user administration controls permission to make changes to welding parameters, thereby increasing process reliability in operation.

HAND WELDING

The ultrasonic hand-held welding units in the HW series are ideal for spot welding, riveting, flanging and cutting plastics and synthetic textiles.

With their low weight and ergonomic shape, they're a fantastic addition to any scenario involving manual applications. A user-friendly and cost-effective design make the HW series of ultrasonic hand-held welding units a standout choice for manual workstations.

The horn – which is the actual welding tool – is easy to replace, making it an economical option for performing several applications with the same ultrasonic hand-held welding unit.

SANES PRESSES CO., LTD

A1-1306

SANES PRESSES is a professional presses maker who focuses on the development of various presses and related equipment, such as production line design, automation equipment, tooling, and so on. SANES PRESSES provides presses as customers' requirements and keeps developing high precision, high rigidity, low noise, and low vibration press machines for our customers. To offer highly efficient production and prolong tooling life for customers is our never-changed goal.

Precision Warm, Hot Die Forging Presses

SHF Series presses

- Totally realize the high accuracy, high stiffness, low noise requirements for warm ~ hot die forging.
- New design moves die forging towards high precision operation. New design moves die forging towards high precision operation.
- Virtually nil gap variation of diagonal X-type guide rails.
- High quality machine accuracy improving machine endurance, providing lasting value.

Double Point Crank Less Presses

EHW Series Press

- H frame double point progressive/transfer press, a standard model for general use.
- A straight-side structure avoids deformation and is the ideal frame for presswork.
- Reduces noise and vibration considerably during operation. Improve operation environment greatly.
- A high accuracy straight-side press with a reasonable price.

Double Point Link Presses

CBL Series

- Unique design for Knuckle Dual Link, holds the slide for about 45 degrees at the bottom dead center. Maximize Material forming time and ensure uniform material flow is achieved.
- With FCF(Fine Cold Forming), suitable for the production of intricate parts with coining or sizing. As tradition, these kind of intricate parts only be completed via fine blanking press, but these parts can be completed under FCF, a very high quality of the stamped parts with a near fine blanking quality is achieved.

EXHIBITING COMPANIES

SCN MACHINERY CO.,LTD

D2-8802

SCN Machinery Co., Ltd. is established in 2010. We are specialized in manufacturing and design various kinds of hydraulic press, inclusive of :
Deep Drawing Hydraulic Press
Forging Hydraulic Press

Die Spotting Press
C Frame Hydraulic Press
Four Column Hydraulic Press
Table Type - Reversing Machine
L Type - Reversing Machine

Forging hydraulic presses
Tonnage: 100 - 12000 ton

Bolster Area: 800 x 700 - 1500 x 1600 mm
Sturdy H frame structure.
The main cylinder is forged.

Deep Drawing hydraulic presses

Tonnage: 100 - 3000 ton
Bolster Area: 800 x 700 - 4500 x 3000 mm

For molding parts and accessories for automobile and motorcycle bodies, kitchenware, electrical appliances, and metalwork. This hydraulic press can perform pressing, drawing, and cutting for steel and stainless steel products.

180° Die Spotting Machine

Tonnage: 50 - 600 ton
Bolster Area: 1000 x 800 - 4500 x 3000 mm
Equipped with high rigid, high precision, easy operation control, SDP series efficient the precise molding operation.
Precise, easy to operate, shorten operation time, decrease worker's tiring, and increase working safety.
180° Hydraulic Die Spotting Machine series perfectly fulfill your needs for molding operation.

SHANDONG TIGER CNC MACHINE TOOL ACCESSORIES CO.,LTD.

A3-320

The company has two production bases, CNC turntable production base and manual indexing product base, and has the right to import and export. Is a professional production of machine tool accessories manufacturing enterprises. The company's main products are CNC indexing head series. CNC rotary table series. as well as indexing head. rotary table, flat pliers, grinding wheel balance frame, machine tool fixtures, milling series.

CNC indexing head series

CNC indexing head series is one of the main accessories for CNC milling machines, machining centers, and other machine tools

CNC five-axis rotary table

CNC five-axis rotary table is one of the main accessories for CNC milling machines, machining centers, and other machine tools

CNC four-axis rotary table

CNC four-axis rotary table is one of the main accessories for CNC milling machines, machining centers, and other machine tools

SHANGHAI SIEG MACHINERY CO., LTD.

A1-1123

Shanghai SIEG Machinery Co., Ltd was founded in 1988. As we have grown, we have gained extensive knowledge and experience to meet your requirements. We know exactly "What you want" and "How you want it".
With over 35000 pieces of annual output, SIEG's sales network has extended to more than 30 countries throughout the world. Whilst the largest proportion of our machines has been shipped to North America and Europe, we are actively exploring new opportunities, whilst maintaining our existing cu.

SHUZ TUNG MACHINERY IND. CO., LTD

A3-3226

Established in 1978, Shuz Tung has been dedicated to manufacturing of various machinery and automation equipment. In the past 42 years, Shuz Tung specialize in:

- * CNC/NC tube bending machines (suitable for tube size DIA.4~DIA.170)
- * Tube end forming, swaging, punching cutting machines.
- * 3D tube fiber laser cutting machine.
- * Auto cell organization in handling & welding intelligent robot.
- * Turn-key organization and equipment supply for bicycles manufacture.
- * Hydromed tube OEM/ODM

CNC & NC Tube Bending Machine

Auto Cell Organization
Customized auto welding & handling organization.

3D Tube Laser Cutting Machine & Hydroformed Tube OEM

SICHUAN MACHINERY IMP & EXP. CORP. LTD.

D1-8617

Since the early 1980s, Scetools and West Tool Manufacturing embarked on manufacturing and supplying machinist cutting and measuring tools by our own production line. In year 2012, Scetools established the joint venture with European brand Measuring Instrument Dasqua and high precision Cutting tools Brand Harlingen in Milano, Italy. Starting to Supply customers industrial grade precision measuring and cutting tools at most competitive cost possible in the world market.

Dasqua high Precision Digital Caliper

1. High Precision Digital Caliper
2. Range 150mm
3. Data Output
4. Dasqua Blue Series

Optical Grating Digital Micrometer

1. Quick move type Digital Micrometer
2. Rechargeable Battery
3. Data output
4. Super high Accuracy & Stable
5. Tolerance setting

HYDRAULIC EXPANSIONS CHUCK SET

Balanced to 25000rpm G2.5, 100% inspected BIONICS DESIGN "SHARK GILL"
Super transmitted torque for high clamping reliability.
Flexible clamping range due to use of intermediate sleeves.
Axial length adjustable and max. adjustment travel 10 mm.
Excellent vibration damping which can improve surface quality at the workpiece and have higher tool life time as well as protect the spindle
Suitable for clamping cutting tools with parallel shank to h6 tolerance.

EXHIBITING COMPANIES

SJTEC

A3-348

We have a more 26years experience of Carbide Cutting tools business, especially manufacture carbide drill, reamer, endmill and cutters. Also we manufacture special formation of size on the customer's request. We are one of the largest drill manufacturers in Korea. Our EQ standard drill use the best materials also under the ISO quality control systems. Any other size and shape can be available made to your order. Also we have a Tooling team and R&D so that we can offer to you our Tools solutions.

DRILL

The drills are designed to work with hard materials such as steel, cast iron, and SUS. It is easy to release chips and the drills are suitable for high speed machining.

REAMER

Reamer to process wide processed works from nonferrous, general steel to hard die steel, especially previous difficult to cuts.

END MILL

Shows excellent function in end mill of the ultra-fine, difficult to cuts, such as hard and SUS. Available to low load cutting and great in chip flow and bonding with buffing or automatic honing process.

STARWILL CHEMICALS SDN. BHD.

B3-5525

Starwill mission is to provide user with outstanding products and solutions that improve their lives and work. They continuously innovate and closely focus on user needs, striving to become industry leaders and create a better working environment and life experience for their customers.

STARWILL ANTI RUST LUBRICANT SPRAY 400ML

STARWILL SW-401 is petroleum based lubricant that can be used to lubricate an array of machinery and moving parts. It also eliminates squeaks caused by friction, protects against rust, and prevents sticking and freezing, among other applications. Specialty lubricants that can help stop unwanted sound by absorbing impact and minimizing vibration, as well as by providing solutions that are clean and free from the foreign particles that may contribute to noise generation in high-speed applications.

STARWILL CARB AND INJECTION CLEANER

STARWILL SW-CCC is a powerful combination of concentrated solvents which is formulated to remove Dirt, Gum, Varnish, Eliminates stalling and rough idling. Periodic use on Cars, Trucks, Airplanes, Boats, Lawnmowers, etc, will keep them clean, fuel efficient and trouble free. It can even be used on running engines. This product is formulated for high performance without the use ozone depleters or chlorinated solvents.

STARWILL ENGINE DEGREASER

STARWILL ENGINE DEGREASER is a powerful water-base formula which combines the cleaning degreasing strength of solvents, detergents and water into one powerful mix in low VOC content. It has no harsh fumes, nontoxic and safe for any surface. It is fast acting and easily rinsed off for a clean bright surface. STARWILL Engine Degreaser is a powerful but environmental friendly cleaner for the greasiest area of your vehicle-engine compartment. Many engine problems are easier diagnose on a clean engine.

SUNMATCH INDUSTRIAL CO., LTD

A1-1428

Sunmatch Industrial Co. Ltd. is a professional pneumatic tool manufacturer, established in Taiwan since 1985. We manufacture tools mainly for automotive and industrial use, and have an extensive range of products that include Impact Wrenches, Ratchet Wrenches, Grinders, Sanders, Drills, Screwdrivers and many others; Sunmatch has become the manufacturer that supplies the widest range of air tools in Taiwan. Today, Sunmatch exports products 99% under customers' private brands and 1% under Sunma

Impact Wrenches

Our impact wrenches feature big power but compact size and light weight, mainly for automotive maintenance and assembly

Die Grinders

These industrial grade die grinders feature 0.35HP & 0.55HP, and pass 1000 hours of lifetime, great for industrial use

Air Drill

for automotive, industrial, aircraft and ship-building

This is only small sample of hundreds of new product which will be on display at the show. It's based on information provided by exhibitors as of November 4th, 2023. NOTE: this list is NOT comprehensive. The layout of this buyer's guide is at the full discretion of the organiser.

EXHIBITING COMPANIES

TAIWAN ASSOCIATION OF MACHINERY INDUSTRY

A1-1327

TAMI (Taiwan Association of Machinery Industry) was founded in October 1945 and originally named "Taiwan Association of Iron Industry". It was then renamed "Taiwan Provincial Association of Iron Industry". In May 1947, the organization reshuffled and became "Taiwan Provincial Confederation of Machinery Industry". On April 28th 1948, the name TAMI was officially established and used as Taiwan Association of Machinery Industry from November 1st 2013.

In 1999, TAMI was certified as an ISO9000 org

TAIWAN EXTERNAL TRADE DEVELOPMENT COUNCIL (TAITRA)

A3-3216

Taiwan External Trade
Development Council

Founded in 1970, TAITRA is Taiwan's foremost nonprofit trade promoting organization. Sponsored by the government and industry organizations, TAITRA assists enterprises to expand their global reach. Headquartered in Taipei, TAITRA has a team of 1,300 specialists and operates 5 local offices as well as 62 branches worldwide. Together with Taipei World Trade Center (TWTC) and Taiwan Trade Center (TTC), TAITRA has formed a global network dedicated to promoting world trade.

International Trade Administration has begun the "Smart Machinery Overseas Promotion Program" since 2018. Through integrated marketing activities and by matching potential clients with producers, we intend to enhance our industry image and to seek overseas business opportunities.

TAIWAN MACHINE TOOL & ACCESSORY BUILDERS' ASSOCIATION (TMBA)

D2-8805

Taiwan Machine Tool & Accessory Builders' Association (TMBA) was established in Taichung in October 2007, symbolizes the unity of the machine tool and accessory industry in Taiwan. The association plays the role of a communicator between the government and the private sector, and hopes to fully integrate and utilize various resources, leading the industry to be based in Taiwan and connected to the world.

TMBA 2024

TMBA 2024 Taiwan International Machine Tool Show has a brand-new appearance. It will be held for the first time in Taipei Nangang Exhibition Hall 1 & 2 from March 27 to 31, 2024. The theme of this exhibition is "Double-axis Smart Manufacturing X Sustainable Future DX & GX for a Sustainable Future". With digital transformation and green transformation as the two main axes of the exhibition, the latest machine tools, automation equipment, key components and smart manufacturing technologies will be displayed. Attract professionals and entrepreneurs from machine tool related industries from all over the world. We invite you to join us!

TMBA member directory

The "Taiwan Machine Tool and Components Manufacturers Directory" published by TMBA has been favored by domestic and foreign buyers for its exquisite printing and clear arrangement of product items. The directory not only provides basic information for subscribers to log on, but also serves as a quick search tool for product vendors.

EXHIBITING COMPANIES

TAIWAN SIMCO COMPANY

A1-1309

SIMCO

Taiwan SIMCO Company, founded in 1982, has been the leading enterprise in spring machinery over two decades. For its excellent services, reasonable pricing and high performance, SIMCO has won wide recognition and enjoyed worldwide distribution to America, Europe, Australia, South-East Asia and mainland China, selling more than 2000 machines to hundreds of customers, and the product ranges has Spring Machine, Tube Bending Machine, Strip Stamping & Forming Machine, CNC Wire Bending Machine.

CNC-620RW

Versatile spring former applicable for wire forming, torsion and extension springs.
8 forming slides controlled by cam axis.
Wire Rotation 360 degree.
Quick release mechanism for wire change over.
Varieties of configurations such as lateral slide, servo cutter, dual spinner, rotary gripper, hook station and etc.

CSC-508

5axes high speed coiler
Garter spring capacity
Edit-on-the-fly
Auto edit function
Proportional adjustment for OD, Pitch, and number of coils
Simple torsion spring available
Optional spring gage, air slide, torsion attachment, etc

EF-20W

Versatile spring former applicable for wire forming, torsion and extension springs.
Camless design. Spring setup time can be significantly saved for production.
Varieties of configurations such as lateral slide, servo cutter, dual spinner, rotary gripper, hook station and etc.
Window-based Motion Control integrates EtherCAT communication.
Patented spring editing software of innovative two programming modes. Intuitional chart programming helps to optimize your program, reducing the time gap between axis movement, greatly increase production speed.
Prepared for Industry 4.0.

TAIWAN TUNGSTEN CARBIDE CO., LTD.

A1-1325

TTC Taiwan Alloy 台灣合金
TUNGSTEN CARBIDE CO., LTD.

Taiwanalloy has been manufacturing Tungsten Carbide related products for many years, and be established in 1998. With the experienced skills, the products' quality has also got a lot of good recognition.

Products brief introduction: Our company is devoted in the development of the sintering technologies for manufacturing of the carbide dies and mold for nut, screw, self-drilling screw, etc and customized tungsten carbide products for other industries.

Products for the steel industry

Customized die products for the production of pipes and wires in the steel manufacturing industry.

Alloy products

The patented products of the company.

Our customized products focus on enhancing production conditions, combining two tungsten steel materials with different properties to improve the fracture problem caused by excessive hardness and extend the service life.

Blanks

Tungsten steel blanks are mainly used in the production of electronic stamping dies and special-shaped dies. Tungsten carbide products all undergo wire-cutting processes (processed by HIP/CIP)

EXHIBITING COMPANIES

TAIZHOU KELITE TOOLS CO.,LTD.

B3-5607

Taizhou Kelite Tools Co., Ltd. was established in year 2007, which is a professional manufacturer that specialized in design and development of high-precision sophisticated gear cutting tools. The main products include Gear Hobs, Gear Shaping Cutters, Gear Shaving Cutters, Broaching Tools, Gear Milling Cutters and Rack Type Cutters, etc.

Taizhou Kelite Tools Co., Ltd. has already been given the certification of quality system ISO9001 in 2009, and also have right of self-export.

GEAR HOBGING CUTTER

We can do gear hobs, pre-grinding hobs, rack gear hobs, inserted type hobs, sprocket hobs, worm wheel hobs, timing belt hobs, spline hobs, circular-arc hobs, pre-shaving hobs, chamfering hobs, etc. For spur gears, straight- or helical tooth, with involute flanks.

GEAR SHAPING CUTTER

We manufacture all kinds of shaper cutters such as parallel side spline shaper cutters, sprocket shaper cutters, helical gear shaper cutters, chamfering shaper cutters, timing pulley belt shaper cutters, merge gear shaper cutters, missing teeth gear shaper cutters, topping shaper cutters, etc. Both can be disc type and Bowl type According to pitch diameter, the shaper can be 50 75 100 125 160 200 Standards of GB, DIN, GOST, etc. High accuracy From Module 0.8-Module 20

GEAR SHAVING CUTTER

Axial Shaving Cutter: Long useful life due to normal grooving
Plunge shaving cutters: Much more efficiency, normally 3-5 times higher
High precision
The roughness of the shaved gear can be Ra0.4-0.8 m

TAIZHOU OUNIC IMPORT & EXPORT CO., LTD.

D2-9228

We are a professional company to export all kinds of lifting equipment and rigging hardware, including KOIO brand electric chain hoist, electric wire rope hoist, mini hoist, manual hoist, manual trolley, electric winch, mini lift crane, gantry crane, jib crane and end carriage

We focus on providing high quality products with the most favourable price, fast delivery time, professional after-sales service to all of our customers. Free sample for most of our products will be available.

ELECTRIC CHAIN HOIST

Electric Chain Hoist is made of light aluminum alloy shell, light but hard with low noise

MINI HOIST

Motor in 100% copper, With emergency stop, Over heat protecting device can be optional

MANUAL HOIST

Double pawl braking system, Ball bearing and gears with improved design make it in light effort force and smooth operation

TAIZHOU WEILONG CNC LATHES TOOLS MANUFACTURING CO.,LTD.

B3-5408

Taizhou Veyron CNC cutting edge tools Manufacturing Co., Ltd. is located in the hometown of Chinese workers and cutting tools-Zhejiang Wenling City, is a large professional manufacturer of CNC tool. After years of unremitting efforts, My company has formed a specialized tool turning series, large-scale production, the series of product quality, productivity Volume at the forefront of the domestic industry. The main products are: CNC turning, die cutter, can be indexable face milling etc.

A1-1308

TCIM was established in 2010 and mainly focus on CNC Wire/Strip forming machines manufacturing. Our core value is "high-quality,high-efficient" machines which are able to win the appreciation,trust and affirmation from customers.

CNC Strip Forming Machine

Our standardized forming machines, enabling you to meet all your process requirements.

Food Mesh Belt Machine

we develop customized technologies to meet the unique requirements of your industry

Eye Link Belt Machine

We develop customized technologies to meet the unique requirements of your industry

TW - TAEWON PRECISION

D2-8823

We are

- 1st producer for plasma and flame cutting parts in Korea
- supply to global shipbuilding companies in Japan and Korea
- have own R&D centre which is authorised by the Korean government
- No. 1 market seller in Japan for welding tractor
- have several patents, so no problem with selling our compatible parts in Europe and U.S.

Plasma cutting consumable

Spare parts for plasma cutting and flame (L.P.G.) cutting machines.

- No.1 seller in Korea
- The 1st producer in Korea (30years of history)
- R&D centre authorised by Korean government
- Have more than 30 patents
- Supply for SAMSUNG, HYUNDAI, DAEWOO shipbuilding companies

Auto welding carriage

Portable welding tractor

- is suitable for long distance welding
- safe, fast, and stable quality provide
- 1 workers can manage several machine at the same time
- No.1 market dominance in Japan

UNION BRUSH - EANG LIAN CORPORATION

A2-2713

Eang Lian Corporation, was established in 1985 as an experienced manufacturer, specializing in full range of industrial brushes in Taiwan. With own brand, UNION Brushes is widely recognized and trusted by distributing around the world. Whether you have need of heavy-duty power brushes, light polishing duty or hand-held cleaning brushes on the market, UNION finish your problems.

UNION Brush -Industrial Brushes

Applications for various types of flat, cup/ bowl, disc, shank, radial/circular, tube, angle grinding, twist knob and miniature brushes as well as the various types of bristles. Used for brushing, grime removal, rust removal, welding slag removal, deburring, grinding and polishing of the different work surfaces, grooves, slots, holes, and joints for various types of mechanical equipment, such as electric or pneumatic grinders, electric drills and machinery.

UNION Deburring and Precision Grinding Brushes

Professionally designed and diverse range of products guaranteeing a professional service to industry in the manufacturing process and in the surface treatment of the manufactured product.

Deburring components of engine transmission box, compressor, powder metallurgy, gears, special alloys, etc. after they have been processed and brushing of deep holes after boring/drilling.

Process applications in the shipbuilding, forging, sheet metal, paper, food processing industries, amongst others.

UNION FM Non-Woven Mill Roll & Roller Brush for Steel Industrial

Steel industry, metal plates rolling production line, wire drawing production line and in processes such as acid pickling, degreasing and cleaning after annealing.

Surface treatment such as brushing, grime removal, cleaning, etc. as part of large-scale equipment manufacturing processes for various types of automated production lines.

EXHIBITING COMPANIES

UNITED PROARC CORPORATION

A3-2718

ProArc designs and manufactures advanced automated cutting, drilling and welding products for use in a variety of industries such as steel fabrication, shipbuilding, and manufacturing. Its product line includes CNC cutting system, CNC drilling system and automated welding system. ProArc systems have been tested and proven throughout the world, earning strong loyal customer base with huge global presence in 61 countries worldwide.

ProArc Master

ProArc Master has always been the ultimate in form and function: All-in-one CNC cutting system that puts everything — machine motions, display, processor, cutting performance, and more — inside one simple, stylish enclosure. The all-new ProArc Master includes the most advanced, most brilliant CNC cutting system we've ever delivered, and it's filled with all-new technologies that take power and performance to a whole new level.

ProArc Welding System

At the core of the welding system is the positioner and the DIY (do-it-yourself) components. Be creative — Mix and match various components with the positioner to create your ultimate welding system. Delivers high quality circumferential welding results with operator's minimal welding experience. Setup time is greatly reduced with the easy interchangeability of the components that encourages instant rearrangements according to your ever-changing welding jobs.

VERSAN.CO.LTD

A1-1430

Versen Co.,Ltd has nearly half century of sales experience in the industrial lubricant market. As the market becomes more and more diversified, it has always taken customer needs and quality first as its business philosophy to improve services and quality. with years of experience and innovative business concepts, we will continue provide customers with high-quality lubricants and correct use of practical experience.

WEN ZHOU XIDIN ELECTRONICS TECHNOLOGY CO.,LTD.

B3-5707

XIDIN, founded in 2008, is a high-tech enterprise integrated with R&D production and sales, specializing in providing system solutions in the field of welding and respirators protection. The welding helmets and powered air purifying respirators, as our leading products, have been well sold in more than 70 countries around the world because of their innovative design, top quality, competitive price and good service.

WELDING HELMET

AUTO-DARKENING WELDING HELMET

EXHIBITING COMPANIES

WIJAYA MACHINERY PERKASA, PT

B3-5418

PT. Wijaya Machinery Perkasa (WMP) is an industrial equipment distributor that provides extensive technology, product, marketing and service capabilities from various industrial divisions. The company was founded in 2003 and began supplying reconditioned and used Japanese machinery to key industries. The needs for industrial machines are increasingly diverse, and consideration of the environment must also be increased.

POWER PRESS MACHINE EDPS

Quality press machines that can help you in all your work with the various capacities provided

Capacity : 25 - 600 Ton

FLAT BED CNC LATHE MACHINE DMTG

Standard configurations

- Servo spindle motor (CKD6150,CKE6136/6140/6150 Series)
- Frequency spindle motor (CKE6163/6180/61100 Series)
- 3-Jaw manual chuck
- Manual tailstock
- FANUC Oi-TF(5)
- Vertical 4-position turret
- Heat exchanger

Workpiece length : 750 - 6000 mm

DIESEL, GASOLINE / LPG & ELECTRIC FORKLIFT

Warehouse equipment with various types of fuel and capacities that can help you speed up all your goods moving needs

- Rated capacity : 1.5 - 16 Ton
- Lift Height : 3 - 6.5 Meter

WONJIN INDUSTRY CO.

A3-3227

Founded on April 1, 1997, Wonjin Industrial specializes in Korea's only special carbide brazing and die-casting mold cooling coolers and manifolds based on know-how and technology accumulated through decades of research and development with a never-ending spirit of challenge. It is a company that does it. Major domestic customers include Renault Samsung, Hyundai, and Kia, and it is a global company doing business with 35 companies in 12 overseas countries, including Toyota and Renault.

Cooler

Die Casting Mold Parts for Production AL of Auto-motives
Mold Cooler which supply water, purpose to high quality and extension Mold life Cycle
No Leaking and Defeat with using Special Brazing Method

Core Pin

Parts used to construct the inner diameter of the hole of die casting mold.
Parts to easily remove gas from where the gas is gathered part.

WUHAN HUAZHONG NUMERICAL CONTROL CO., LTD

A1-1122

cnc controllers, machine tools & industrial robots

EXHIBITING COMPANIES

WUXI RUIZHI FONDA METAL TECHNOLOGY DEVELOPMENT CO.,LTD

B3-5319

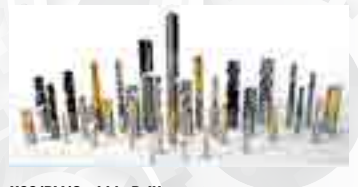

Palantir is a growing rapidly cutting tool's brand, owned by Wuxi Ruizhi Fonda Metal Technology Development Co., Ltd. Combining our remarkable material expertise of HSS/ PM-HSS/ Solid Carbide with the outstanding engineering skills originated from Cleveland Tools Inc., built in 1876, a legend of metalworking industry, we are committed to delivering extensive lists of cutting tools for Milling, Drilling, Threading, Tapping, Turning and Saw Blades to the customers throughout the world.

CARBIDE INSERTS

- *Turning insert
 - Internal turning
 - Cylindrical turning
- *Milling insert
 - Square shoulder milling series
 - 45° face milling series
 - Face milling series
 - Mold milling series
 - Fast feed milling series
 - Ball nose milling series
- *Grooving and Parting
 - Single side
 - Double side
- *Milling cutter and arbor
- *Hole Drilling
 - U-drill
 - Sword tooth drill

HSS/PM/Carbide Drill

Powerful R&D team, Innovations on UDL Drill, CHP Helical Point drill, High productivity

HSS/PM Tap

Creative color ring design, made of HSSE and PM-HSS with special wear and heat resistance coating and superior cutting geometry

WUYI PASSION INDUSTRY AND TRADING CO.,LTD

D2-9227

Our company is a manufacturer specialized in the research, development and production of 2-stroke and 4-stroke gasoline garden machinery. All of our products comply with international quality standards and are greatly appreciated in a variety of different markets throughout the world.

Our main products are brush cutter, chain saw, earth auger, water pump, hedge trimmer and multi-function tools with ISO9001, CE, GS, EUV certificates.

Gasoline chain saw

58cc Chain saw, Super easy start, 2.7KW power, power boost 25%, fuel saving 30%, with damping system, more comfortable.

Gasoline brush cutter

Professional brush cutter with anti-vibration system, 1.7KW power, 30% power boost, 50% saving fuel.

Cordless brush cutter

20V*2 battery, dual speed adjustment, bigger power, longer working time, suitable for different battery.

XI'AN AMCO MACHINE TOOLS CO.,LTD

B3-5605

Xi'an AMCO Machine Tools Co., Ltd was established in 2007. We sell all kinds of universal machine tool equipment, spinning equipment, as well as design and production of special equipment according to customer requirements.

We have an experienced and skilled professional team which could provide a full range of technical support and solutions for customers.

Eagerly looking forward to cooperate with you and create a better future together.

C9372 Brake Lathe

Specification
 Rotor Diameter 4"-24" (102mm-610mm)
 Maximum Rotor Thickness 2.85" (73mm)
 Drum Diameter 6"-28" (152mm-711mm)
 Drum Depth 9" (229mm)
 Flywheel Diameter 6"-24" (152mm-611mm)

EXHIBITING COMPANIES

YAKIN MAJU SENTOSA, PT

A1-1203

For more than 40 years, we have been passionate about providing innovative solutions in precision manufacturing processes. Cooperating with more than 30 partners from around the world, we constantly endeavour to deliver the highest quality for our customers. In order to provide the best engineering solutions for our customers, we always keep up with industry trends and constantly search for products with fine technology.

DINDAN – COOLING PANEL

Pioneer of complete service provider and expert in business of air-conditioning for control cabinets (Enclosure Cooling Unit). The cooler panel especially designed for the panel to maintain the temperature inside the panel. The unit can be operated 24 hours per days and can be operated in the high ambient temperature.

SYLVAC – SCAN MEASUREMENT

The measuring solution for cylindrical parts. Designed with Reflex-Click technology for one click measurement of cylindrical parts without programming.

DOALL – BAND SAW

DoALL solution is the global standard with the outmost compatibility and value to a wide variety of sawing solution for high production, multi-purpose, miter cutting, vertical contour, and custom engineered cutting. This includes: bi-metal, carbide, diamond, carbon and knife-edge blades.

PT Yakin Maju Sentosa also provide bandsaw welding service in our workshop in Cikarang.

YAMAZEN INDONESIA, PT

A2-240; A2-2418

In order to accurately understand the customer needs at production site and to quickly and economically supply machine tools that respond to technological change & diversification, We can provide cutting-edge technology & information through collaboration with leading manufactures in each industry. We can process specialized machine that will meet the quality and quantity of your's products. We also hold a demonstration & technical seminar for operator, quality control personel & show room.

YASDA

The best machining center to the world

BROTHER

Equipped with a newly developed tilting rotary table with a maximum jig area of 500 mm in diameter.

Combination with a 28-tool magazine enables multi-face machining that breaks the conventional concept of #30 machines.

CITIZEN

The Citizen A20 has been acclaimed by customers as a high capability, low-cost machine solution. Now, we are launching the A320VII model which offers the potential to convert from guide bushing to non-guide bushing mode

YANGZHOU DEVELOPPING IMP & EXP CO.,LTD

A1-1015

We mainly produce CNC machines, drilling & milling machines, drilling machines, metal cutting saws, bench grinders and various electrical tools, and they are sold mainly to the countries and regions such as United States, Europe, Australia, South America, and Southeast Asia, etc. The products we developed are featured with series and user-friendly design, and produced in conformity with European standard, high quality and high cost performance.

CNC MILLING

With Siemens system ; With CE standard ; With European design

CNC LATHE MACHINE

With Siemens system ; With Ball Screw; With CE standard ; With European design ;

MILLING MACHINE

With different size ; With CE standard ; With Perfect milling surface individually clampable guideways; Stable column with dovetail guide, adjustable on all 3 axes via V-ledges

EXHIBITING COMPANIES

YANGZHOU SUPER MACHINE TOOL CO., LTD

B3-5712

Yangzhou super machine tool co., ltd is a state high and new tech enterprise specialized mainly in research and development, production and sales of such electromechanical products as CNC machine tool.

The main products include mc-h series horizontal machining centers, XH71 series vertical machining centers, mc-vh series vertical-horizontal machining centers, CK series CNC lathes, C62 series horizontal lathes and Z50 series vertical drilling machines.

There are now more than 500 employees in Ya

Turning Machines (Lathes)

Yangzhou super machine tool co., ltd is a state high and new tech enterprise specialized mainly in research and development, production and sales of bench lathe, lathe, drilling machine, CNC lathe and CNC machine center

YESTOOL CO., LTD.

D1-8417

YESTOOL is one of leading Korean manufacturers to produce various carbide cutting tools with unique interchangeable design and higher performance in this market. Interchangeable KRUZ drill system is popularly using by valued end users around the world who are seeking for productivity and cost effective tool in many industries. "K" series drill is also proved by structural machine operators as the most silent tool with wonderful hole finished beyond conventional drill.

KRUZ Drills

Interchangeable KRUZ drill system is popularly using by valued end users around the world who are seeking for productivity and cost effective tool in many industries.

"K" series

"K" series drill is also proved by structural machine operators as the most silent tool with wonderful hole finished beyond conventional drill.

YIH SHEN MACHINERY CO., LTD.

A1-1318

YSM has been working in press forming machines since the 1979 and has developed a solid foundation and powerful energy in R&D. YSM also puts many efforts in tooling design and development so as to provide the high-quality tools and relative technical support to clients. It is Innovation, Experience and Global instant service that make YSM outstanding nowadays. YSM keeps going to develop the market around the world and has the overseas agents that support service to customers.

STRIP & WIRE FORMING MACHINE

The YSM-36T can produce the kind of computer shrapnels and electronic/ lighting components, and fastener parts in the automotive sector. Moreover, the electric control is upgraded to PLC touch screen, so production information is shown on the screen, making all the information crystal clear to users. The forming slides are with double cams, so that when forming tool returns, it will be driven by backward cam. The integration of backward cams and slide sensors prevents forming tools from sticking, protecting the equipment and prolonging the lifetime of the equipment. it is also can installed with INTERCOM automatic NC tapping which made in Italy, providing tapping solution for users.

EXHIBITING COMPANIES

YOKE INDUSTRIAL CORP.

A1-1431

YOKE is Taiwan based manufacturer of lifting fittings for chain, wire rope and webbing slings for more than 38 years. Certified by ISO 9001 as well as DNV, API, ABS and DGUV. YOKE supply digital product line and qualified products tested in accordance with EN1677, i.e. Lifting Point (YP), DA shackle (DNV 2.7-1 approved), Snatch Block (YSB), and G100 lifting components.

Digital Lifting Point

YOKE Digital Yellow Point offers a risk-free and cost-saving solution for lifting across industries. Turning, rotating and tilting are commonly required in lifts which increase the risk level of the lift, causing the bolt to back out and failing the lift. This danger can happen with standard eye bolts. However, Digital Yellow Point bring you the best solution with considerable safety feature also with its pre-use check function with a simple click on the App. Come to visit and see how YOKE newest product, SupraTag digitalize your product line and how we can digitalize our current yellow points and leverage our technology to boost your operation, safely.

RFID Digital Tag

The YOKE SupraTag as part of a digital platform can ensure:

All manufacturers can add all their digital documentations, standards, pre-use guidance. The equipment is safe and suitable for service. Safe use instructions are available to every user who handles the equipment fitted with the Supratag or embedded chip.

The equipment is in a safe condition and has been inspected and thoroughly examined whether it is safe to use.

Records of conformity, test and examination are digitally available.

Appropriate National and International Standards, industry guidelines and recommendations or employers own requirements are met – EN818, EN1677, ASME, LOLER, LEEA etc.

YUNG I MACHINE ENTERPRISE CO.,LTD.

A1-1302

Yung I (PT.SENTOSA MANDIRI TOOL) is located in Tangerang and has two branch offices in Jakarta and in Cikarang. We manufacture spare parts of excavator heavy machinery...etc. We also offer quality Made-In-Taiwan products of hand tools, hardware and accessories of machine tools. Please visit our booth during the exhibition for more information.

Drill, Collet, Holder, Vise, Chuck, Cutting Tool, Accessories

Sentosa Mandiri (Yung I) specialize in manufacturing various hardware and accessory of tools.

End Mill, Tap, Hand Tool, Grinding Machine.

Sentosa Mandiri (Yung I) provide high quality and good price of Made-In-Taiwan products.

EXHIBITING COMPANIES

ZHEJIANG FUSHI MACHINERY TECHNOLOGY CO LTD

A1-140

Zhejiang Fushi Machinery Technology Co., Ltd. is a CNC machine tool production and various component casting and processing enterprise that integrates research and development, manufacturing, sales, and technical services, and has its own export rights. The company is located in Lincheng Industrial Concentration Zone, Changxing County, Huzhou City, Zhejiang Province, at the junction of Jiangsu, Zhejiang, and Anhui provinces, with convenient transportation. It is located by the beautiful Taihu L

Machining Center

The design and development of TV series drilling centers meet the requirements of users for high-speed and high productivity vertical drilling centers. The overall layout of the TV series drilling center is a vertical frame structure, which is compact and can withstand heavy loads during processing. It can maintain no vibration and deformation during high-speed displacement, and is suitable for processing automotive, motorcycle parts, and small generator parts.

ZHEJIANG XINXING TOOLS CO., LTD

B3-5430

Zhejiang Xinxing Tools Co., Ltd., was founded in 1992, is a high-tech enterprise focusing on hole processing technology which located near the beautiful Nanbei Lake. Since its founding 30 years ago, the company has set up the mission of providing manufacturing industry with high efficiency & precision cutting tools, consistently implement the innovative development strategy, deeply cultivate the productivity of cutting tools and technology improvement.

Speed drill

Speed drill is a high-performance replaceable insert drill system originally launched by CHTOOLS. The triple positioning structure for which a patent is licensed features extraordinary connection strength and positioning accuracy. and the optimal geometric design and materials contribute to its excellent drilling speed and durability. Given the split replaceable construction, it can achieve flexible combination of inserts of various functions and holders of different lengths, thereby satisfying the needs of different materials to be processed, different drilling depths and other applications, and achieving the advantages of minimized tool investment and less inventory

Spade drill

Spade drill is an replaceable insert drill bit system produced by CHTOOLS. Spade drill can be used in traditional machine tools and CNC machine tools, directly insert replacement, no need regrinding, higher drilling speed and other characteristics can greatly improve the efficiency of drilling. Especially compared with twist drill, the efficiency has been greatly improved, and has become the best choice for traditional machine tools and CNC machine tools to improve the quality and efficiency of hole processing.

HSS annular cutter (core drill) series

Features and highlights

1. Employing HSS-E for production, with excellent performance of high hardness, abrasion resistance and tenacity, the product will have a very long service life under stable processing status;
2. Based on different cutting depth, designing corresponding end-edge cutting geometry, which possesses good centering and blade collapse resistance performance;
3. Possessing all the shank types, and being suitable for all the magnet drilling machines worldwide;
4. Complete and advanced heat treatment process and quality inspection standard, guarantee product quality;
5. Automatic CNC machine tool processing, with consistent and stable quality;

EXHIBITING COMPANIES

ZHUZHOU APPLE CARBIDE TOOLS CO.,LTD

B3-5608

ZHUZHOU APPLE CARBIDE TOOLS CO.,LTD is leading by the production and sales of cnc inserts,solid carbide end mills,carbide rods,with bringing in the imported advanced precision equipments,we build a complete tungsten carbide production line. each new products has finished strict cutting experiment automonously firstly according to different machining conditions.our products mainly covers turning, milling, drilling, grooving and parting inserts, solid carbide end mills, carbide rods are hot sales.

Carbide Inserts

ZhuZhou Apple Carbide Produced Carbide Inserts for CNC machining,full series for P.M.K series workpieces with turning, milling,drilling, grooving, scarfing.etc.

Solid Carbide End Mills

ZhuZhou Apple Carbide Produced Solid Carbide End Mills are used in a wide range of applications and enable efficient machining.An appropriate combination of cutting edge and tool strength makes cutting easier and faster, extending tool life.

Carbide Rods

ZhuZhou Apple Carbide produce solid carbide rods,carbide rods with one and two straight holes, two and there spiral holes too. Shaped carbide rods and customization is also available.

ZHUZHOU SANT CUTTING TOOLS CO.,LTD

A2-2727

Zhuzhou Sant Cutting Tools Co., Ltd is a modern joint-stock company specializing in the designing, producing and selling of CNC cutting tools and cemented carbide tools. Located in Zhuzhou,one of the biggest manufacturing bases of cemented carbide cutting tools in China,our company mainly produces various cnc turning tools, milling tools, drilling tools, cnc inserts, tooling systems and various cemented carbide tools.

Turning tools

P/M/D/C/S/W types can be provided and all kinds of non-standard with required inserts Boring Bar (P/S/M type) Grooving tools (Match with ZCC.CT/Korloy/ Kyocera inserts) Threading tools

milling tools

face milling/ Square shoulder milling tools/ Profile milling tools/ Side and face milling tools/ Chamfer milling tools/ High feed milling tools/ Helical face milling tools and all other customized can be accepted

U drills

ECO-CONSCIOUS PROGRAMMES

Be a part of our collective effort
to drive higher sustainability at
MANUFACTURING INDONESIA 2023!

At Manufacturing Indonesia, we are committed to delivering a sustainable event for both exhibitors and attendees. Our focus is on the long-term impacts we have on customers, colleagues, the communities we work in, and the environment.

SHUTTLE BUS SERVICE

- Shuttle Bus Service to MFI 2023 is FREE OF CHARGE
- Points to JIEXPO, Kemayoran based on the schedule below:

TO JIEXPO		
KIIC	▶	GIIC
9.00		9.30
	▶	Arrive JIEXPO
		11.00

FROM JIEXPO		
Depart JIEXPO	▶	KIIC
16.00		17.30
	▶	GIIC
		18.00

- Shuttle Bus Station on JIEXPO: Drop off Hall B1
- Schedule may be delayed and change according to conditions

Bring your electric vehicle to the Manufacturing Indonesia and experience the future of sustainable transportation!

- ✔ **DEDICATED PARKING:** Exclusive parking spaces for your EV.
- ✔ **EV CHARGING:** Power up while you explore the latest in manufacturing.
- ✔ **DOUBLE IMPACT:** Every charge contributes to charitable causes.

HYDRATE SUSTAINABLY

Bring Your Own
Tumbler to
Manufacturing
Indonesia
for FREE Refills!

We invite you to be part of the movement! Bring your own tumbler to the show, and we'll quench your thirst with FREE, refreshing refills at our water station!

Unlock Sustainable Horizons:

Fly Green to the Manufacturing Indonesia! We're offering an exclusive code for eco-friendly flights to our event. Join us on the journey towards sustainability as we revolutionize manufacturing together!

PROMO CODE : MFGID23

Turning Waste into Wonder!

Excited to announce our collaboration with ECOLOOP at the Manufacturing Indonesia. Together, we're redefining sustainability by managing exhibition waste responsibly. Join us in creating an eco-friendly event that leaves a positive impact.

Informa BetterStands

Moving away from disposable stands together.

Better quality. Better safety.
Better experience.

Better Stands: building a sustainable future for the events industry.

What is the plan?

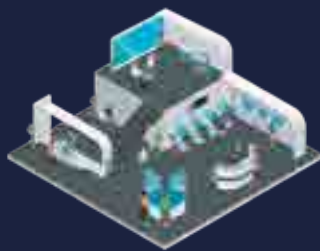

- Support our exhibitors to move away from the use of disposable stands.
- Ensure that all stands are designed and built with reuse in mind.

What will improve?

- Significantly reduced waste.
- Lower carbon footprint.
- Safer working environment on-site.
- Improved customer experience.
- Potential cost savings.

How will this benefit exhibitors?

- Smoother and more efficient build and breakdown.
- Highlights and protects the sustainable credentials of exhibitor brands.

What do exhibitors need to do?

- Follow Better Stands regulations as part of your contract
- Appoint a stand contractor who has sustainability credentials
- Ensure your stand contractor is briefed on Better Stands from the outset.

How will we do it?

- Promote reusable stands and prohibit disposable builds.
- Ensure stands are made from sustainable materials.
- Work with exhibitors to find the solution that fits their needs.

DOWNLOAD PAMERINDO SMART EVENTS

Revolutionize Your Manufacturing Experience: Discover, Connect, and Innovate with Our Smart App: PAMERINDO SMART EVENTS!

We are excited to introduce our revolutionary Manufacturing Smart App, designed to make your experience at Manufacturing Indonesia seamless and efficient. This app puts all the essential show information right at your fingertips, empowering you to maximize your time and connections.

How to Get Started

Download our Manufacturing Smart App now on Google Playstore and App Store to unlock the full potential of your Manufacturing Indonesia experience.

KEY FEATURES

Exhibitor Booth Locator

Easily find exhibitor booths and their precise locations on the show floor.

Exhibitors' Products Showcase

Explore a comprehensive catalog of exhibitors' products and services.

Show Floorplan

Navigate the exhibition space effortlessly with our interactive floorplan.

Seminar Schedule

Stay informed about the latest insights and trends with the complete seminar schedule.

Meeting Appointments

Schedule one-on-one appointments with exhibitors to discuss your specific needs and interests.

ABOUT THE ORGANISER

PT Pamerindo Indonesia is the leading trade fair organiser in Indonesia, established with the sole purpose of organising specialised trade exhibitions for the Indonesian market. The company has grown considerably and now regularly organises over 20 trade exhibitions in the following sectors: Beauty, Building & Construction, Electric & Power, Food & Hospitality, Laboratory, Manufacturing, Mining, Plastics & Rubber, Oil & Gas sectors. Since its inception PT Pamerindo Indonesia has organised over 200 international trade exhibitions in Jakarta, Surabaya, and Bali.

PT Pamerindo Indonesia is part of Informa Markets, a division of Informa plc. Informa Markets creates platforms for industries and specialist markets to trade, innovate and grow. Our portfolio is comprised of more than 550 international B2B events and brands in markets including Healthcare & Pharmaceuticals, Infrastructure, Construction & Real Estate, Fashion & Apparel, Hospitality, Food & Beverage, and Health & Nutrition, among others.

We provide customers and partners around the globe with opportunities to engage, experience and do business through face-to-face exhibitions, specialist digital content and actionable data solutions. As the world's leading exhibitions organiser, we bring a diverse range of specialist markets to life, unlocking opportunities and helping them to thrive 365 days of the year.
